1. Government is unaware of and gets little information about the reality of social conflicts and dissatisfaction. If government knows nothing about the problems and believes all is normal in society, it will not believe there is easing and channeling to do, and hence no need to build an internal social buffer. But since conflicts and dissatisfaction do exist, they may build up, grow and end up causing great social disturbance and even social and political crisis. This situation is not unknown in history.

2. Government knows something about the reality and decides to take alleviating measures, but the wrong ones. We can liken the situation to a doctor treating a patient. The doctor finds the patient to be seriously ill but prescribes the wrong treatment, producing only slight improvement in his condition, but no cure. The illness may also be aggravated because of the doctor's delay or wrong prescription. Similarly, in dealing with conflicts and dissatisfaction in society, even if government knows how serious they are, but takes the wrong countermeasures, the problems will continue to exist and even intensify. This is because government receives inadequate information, overestimates the efficacy of its measures and underestimates the side effects, or fails to adjust its measures

according to changing situations, etc. All the foregoing illustrates the shortcomings of regulation by government.

3. Government knows the situation, decides on alleviating measures and these are apposite. In the normal course of events, government measures should be effective in this situation. However, many past incidents illustrate that those regulating measures had limitations and were not always in line with government wishes. On the one hand, all social conflicts spring from two sides being out of harmony. Each side believes itself in the right and to have suffered loss of income, jobs, welfare, living standard, etc. It's often hard to sort out which side is correct and which not. Such disputes and arguments are unlikely to be eased through government arbitration as an administrative agency. Government might come up with the correct decision, but it might not satisfy both sides. Such problems can only be solved through non-governmental harmonization, on the basis of a spirit of mutual forgiveness and mutual reconciliation, which is beyond the reach of government as the administrative agency. It is not always necessary to decide who is right and who is wrong. Pragmatic "smoothing over" is a common folk solution to such problems and is not always a bad idea. But government regulation is unlikely to adopt the "smoothing things over" approach. The government measures may be theoretically correct, however, they often appear impotent in solving social conflicts and dispelling dissatisfaction. On the other hand, many of these problems have been a long time forming and getting more intense. If they can be eased or channeled whilst still in their infancy, the measures might be very effective. However, as an administrative agency, government has its established working procedures, and the information it gets is not always timely or complete; by the time government gets involved, the conflicts and dissatisfaction are well past the infancy stage and the impact of regulation will thus decrease to a great extent even if the measures taken are correct. This is a limitation of regulation by government. Therefore, to ease social conflicts and channel dissatisfaction, it is

necessary to build an internal social buffer other than regulation by government. Again, the role of regulation by custom and morality makes its presence felt.

6.4.2 Building Buffering and Channeling Mechanisms into Society

So, looking further, let us ask where, in non-idealized government regulation, should we look for safety valves in social and economic life? How does one go about building buffering and channeling mechanisms into society? Taking a perspective other than regulation by government, we can say that producing a new balancing power in society will be conducive to setting up such mechanisms.

The new balancing power referred to involves neither market nor government. The market is a kind of balancing power that brings about the effective distribution of resources through the mechanism of supply and demand and maintains a balance among the providers of various production factors; i.e., suppliers can get income according to the quality and quantity of the production factors they supply, factors that have stood the test of the market. Meanwhile, the market also maintains a balance between the trading parties; i.e., it coordinates their relations according to the principle of fair competition. It is a traditional balancing power, but it has two obvious limitations at least. Firstly, its balancing power is not applicable to activities and relations in the non-traded sector, because here trade is not conducted according to market principles. Secondly, even in the traded sector, the balancing power of the market is still limited because regulation by market only takes into account economic benefits rather than a raft of non-economic considerations. However, since man is more than "economic man" but also "social man," in handling relations between people, market power alone is not enough.

Government is another balancing force, with a role that cannot be

replaced by market in coordinating income distribution, region-to-region or sector-to-sector relations and the relation between economic growth and social development. However, as mentioned above, apart from its imperfections, government has another characteristic: When addressing people-to-people relations, it appears as an administrative organ superior to individuals, so it is difficult to satisfy both sides in disputes. That is to say, the disputes or conflicts among people cannot be eased purely through administrative intervention. Moreover, with socio-economic development and technological progress, it has become harder and harder for government to play a role in balancing people-to-people relations. Take the relations between an enterprise and its employees for example. If government intervenes when a dispute occurs, the enterprise, being mostly concerned about profits and economic results, often feels that what the government is trying to safeguard is something remote, something the enterprise can only partly enjoy but will entail it paying higher costs (more tax, higher spending on employee welfare, increased wages, etc.). Therefore, the enterprise is often dissatisfied with government behavior, but does not always say so. But sometimes the employees feel the enterprise is what government cares about more, especially when their job, wage and welfare demands are not met. Their feeling of discontent will grow and usually, unlike the enterprise, they will not keep it to themselves but express it. Government intervention may sometimes ease the conflict, but it can sometimes intensify or deepen it.

Where, at the end of the day, should we look for a new social balancing power? If it does exist, how would it work, how important would its role be, and surely it would have some limitations? These questions deserve exploration. In my book *The 20th Century British Economy: A Study of "the British Disease,"* I made the following point: The general public is a new balancing power.¹¹ The public is not a single homogenous entity but comprises several different classes or ranks. Take the scenario of a three-sided conflict involving government, enterprise and employees: When the government seems

impotent, the enterprise helpless and the employees angry, the balancing power of the general public comes into play. The public, as members of society and citizens, make their own demands. What they want is normal social order, guarantee of citizens' legal rights and a peaceful living and working environment. Suppose that normal life in a city is affected by strikes or parades and demonstrations: students cannot get to school, buses and subways stop running, airports are shut down, garbage piles up uncollected on the streets, milk supplies dry up, hospitals turn away patients, and even water, electricity and gas supplies are cut, etc. The public will start to see these actions as destructive of order and a violation of law and, far from supporting the strikers and demonstrators, will begin feeling less sympathy with them than they did previously. When this point is reached, even the wives of strikers and demonstrators will start complaining to their husbands, and then children, relatives, friends and neighbors will come out to blame them. The strikers or demonstrators may feel isolated from the public and ask themselves whether there might be some problem with the organizers, planners and decision makers of this action, whether things have gone too far, and whether they should quit while ahead. Thus we can see the public as a new balancing force in socio-economic life. It is taking effect quietly and gradually in easing social conflicts.

Similarly, if an enterprise pollutes the environment, putting at risk and harming its neighbors, conflict between the enterprise and the residents around will be exacerbated. Government might then put pressure on the enterprise, ordering it to suspend production or shut down, but this might mean laying off employees, who then petition the government for reemployment, which puts it between a rock and a hard place: nobody involved—the enterprise, its workforce, the local residents—feels satisfied with the government. If government shows partiality to any side it will cause the others to complain against it. In a situation like this, the public will play a role as a balancing force in harmonizing relations between the three. What enables the public to

play such a role is that it always considers things from the perspective of maintaining social order, and public targets and interests are their top consideration. The residents whose living environment is polluted are part of the public, as are the employees of the polluting enterprise; government is elected by representatives of the public, and subject to the check of the public; the enterprise's management tier or decision makers are also part of the public and their behavior is also subject to the check of the public. In this way, social conflicts arising from environmental pollution can be solved through talks and negotiations, lest the situation goes to extremes. The role of the public as a social balancing force is intangible; neither regulation by market nor by government can substitute for it.

So, objectively, does an inbuilt social buffering and channeling mechanism actually exist, and if so where and how was it built? We may draw the following conclusions: It does indeed exist and it exists in the public's concern for and participation in social affairs. The more the public cares about and involves itself actively in social affairs, the more important its harmonizing role as a social balancing force will be and the more helpful it will be in easing social contradictions. However, the public's concern for and participation in social affairs is based on the premise that they put high value on social order, public targets and interests, and are willing to work hard for these things. Therefore, the greater the public's sense of responsibility towards society, the public interest and social affairs, the greater its social balancing role will become. Conversely, if the majority of the public care only about themselves rather than social order, public targets and interests and have no enthusiasm for participating in social affairs, the public will be no social balancing power at all, which will make it very hard to create in-built social buffering and channeling mechanisms.

While the public is playing its role as a balancing force its individual members are in the course of adapting to the changing society and building new concepts that suit the changes. For good or

bad, individuals influence each other: if many people concern themselves with public targets and interests and act positively to promote social harmony, that will influence more and more people to care about social affairs and the social balancing role of the general public will grow. This is the positive side of mutual influence. On the negative side, if the majority cares only for itself rather than society, such influence will encourage indifference to social affairs among more people. Thus we can see how an individual's enthusiasm or indifference toward social affairs is influenced by those around. The more adaptive the individual to changing society and the more receptive to new notions that suit the changes, the more easily will he change his traditional attitude to interpersonal relations and become an active participant in social affairs, which is to say, although some people remain indifferent to social affairs, this does not alter the general trends that people increasingly care about social affairs and that the public's role as a balancing power is gradually getting stronger.

6.4.3 Tangible and Intangible Social Safety Valves

Now, armed with a deeper understanding of social buffers and channels, we can proceed to discuss psychological factors pertaining to the creation of social safety valves.

Social safety valves are sometimes tangible and sometimes not. We have mentioned that the public as a new balancing power can ease social conflicts and channel feelings of discontent; this belongs to the category of intangible social safety valve. The term tangible social safety valve mainly refers to the existence of a resource that can ease social conflicts, or an organization that can channel dissatisfied sentiments, etc.

History is rife with examples of migrant settlement and development of large tracts of virgin land beyond existing borders functioning as a social safety valve. Cohorts of people who were

capable but could not make use of their talent in their current circumstances could take over such available land to produce and operate, consequently easing social contradictions. The existence of such territories allowed a chance for the discontented to seek their fortune there, thereby reducing their dissatisfaction level. Both when North America was a British colony and after American Independence, the territory gradually expanded westward; it was this huge land that attracted a great number of immigrants from Europe. They hailed from different European countries, from cities and from villages; their numbers embraced rich and poor, noble and humble alike. But in all cases their leaving their place of origin had the effect of easing social contradictions there. North America therefore became a social safety valve for Europe, a situation that lasted for at least two or three centuries.¹² We can find quite a few parallels in Chinese history: Northeast China received a great number of pioneers from Shandong and Hebei provinces; people from Guangdong and Fujian provinces migrated to Southeast Asia and started new businesses there. Such migrations undoubtedly eased social contradictions in their places of origin. We cannot say migration would eliminate local contradictions, i.e., we should not overestimate the role of migration in solving social contradictions in the place of origin, but at least it relieved the pressure of population, employment and land and reduced discontent there. In this sense, the existence of land at home or abroad for immigration and development is a social safety valve that will last for a long period. We should also acknowledge that the development of social relief undertakings and the existence and function of social relief organizations and agencies can also be tangible social safety valves. Social relief can be roughly grouped into three classes: government relief, community relief and non-governmental charity relief. Their commonalities are: Through using social relief funds, disaster victims can be helped through catastrophe, to survive hunger and cold; impoverished families can be helped figure out more ways to make a living; the lives of the disabled and those without family

support can be improved. The more developed the relief undertakings, the greater the role they will play and the more easily social contradictions will be eased. Therefore, the role of social relief undertakings and organizations as social safety valves is plain for all to see.

Autonomous mass organizations of urban or rural residents could be another kind of social safety valve for easing social conflicts and channeling dissatisfaction. The word "could" is a deliberate choice: it depends whether the nature of such organizations has changed or not. Those that have changed their nature, no longer being autonomous or mass-oriented, cannot ease social conflicts; indeed, under the control of certain people, they become bullies and would make conflicts more acute. If they have remained true to their nature, then they can represent the will and interests of the masses and will negotiate with them on everything pertaining to their interests. Consequently they can play a role in easing social conflicts and channeling dissatisfaction.

Migration to undeveloped land, social relief organizations and autonomous mass organizations are three examples of tangible social safety valves. For these valves to function effectively, we cannot ignore the importance of moral factors. As pioneers, immigrants need strong cohesion and enterprising spirit in order to overcome numerous hardships and for their migration to achieve things. The development and work of social relief organizations depend, in addition to their staff's strong sense of responsibility and compassion, on the generous donations of those supporting charitable and public welfare causes. For an autonomous mass organization, what keeps it true to its nature, really representing the interests of and working for the masses, is that its leaders exercise strict self-discipline, live up to the expectations of the masses and are honest and responsible. On the other hand, the masses have sense of responsibility toward the organization, stick to their principles and contest behaviors that go against mass interests. Thus we can see that it is moral force that backs up tangible social

safety valves and without its support they could hardly play their due role.

Turning to intangible social safety valves, it should be pointed out that the psycho-spiritual safety valve is more effective than those of a tangible nature. It can both dissolve social contradictions and guide the trend of thoughts. To be specific, the psycho-spiritual safety valve refers to people's identification with society, their confidence in how society and their lives will develop in the future; i.e., the belief that as long as they work hard together, social development targets can be realized, living conditions improved and their abilities used to the full. Identification with society is also manifested as follows: If there are various things in life that are not totally perfect, this is not too serious, because these imperfections can be reduced or eliminated through reform, adjustment or the establishment and improvement of social check and balance mechanisms. With a psycho-spiritual safety valve, social contradictions can be dissolved and the trend of thought can be guided in a right direction. It is something that cannot be replaced by market or government regulation.

For any society, there is nothing more fearsome than the existence within it of a group of despairing people. History shows us situations where some people because of poverty and ill luck, lived lives without hope, having completely lost confidence in their future. Having despaired of people and of society, identification with society would be out of the question. Those in despair may have a destructive social influence in the sense that they may break laws and social order, and they could have a depressing influence on the emotions of those around, thereby reducing social vitality. If such people are very few, they will not greatly impede socio-economic development. But if they are more than just a handful and constitute a fairly large social segment, that may very well create social problems and conflicts that will cost society a great deal of time and energy to resolve. Therefore, the need to reduce, perhaps to nothing, the number of people in despair, can lead us to a better understanding of why social safety

valves are so important.

Changed outlook is hugely important to the formation of a psycho-spiritual safety valve. As mentioned many times above, the role of moral force is not just to shape people's behavior through standards and restrictions, but to inspire and encourage them to improve themselves. The speed and the degree of economic development are important criteria, but from the social development perspective, we should also adopt the criterion of whether people can enjoy society's care, respect and nurture. This is because even if society neglects such things, the economy can still grow rapidly for a short period. What's worse, it will intensify and increase social conflicts and dissatisfaction, perhaps leading to social unrest as more and more people feel devoid of hope. One important aspect of changed outlook is to take care, respect and nurture of people as a social development target and judgment criterion. Only in this way can regulation by morality function to the full and a psycho-spiritual safety valve smoothly take shape.

6.4.4 Transition from Old Balance to New Balance

Societies always follow a cycle of moving from control to confusion, back to control and returning to confusion, but in different periods of history and amid different contexts, the degree of control/confusion is different: great, average or little control might be the case, as might great, average or little confusion. What we term control is the maintaining of equilibrium; the term confusion means disequilibrium once balance has been destroyed. The "control-confusion-control" cycle means the original long-sustained balance is first broken and later replaced by a newly formed balance. In some sense, social safety valves are helpful in maintaining balance and, should it be broken, in establishing a new one. This is because social safety valves, tangible or not, can dissolve contradictions before they become intensified and go out of control.

This brings us to an important question, namely, how to understand such terms as reconciliation, compromise and mediation? In some books or conversations, "mediation" and "compromise" often seem to be derogatory terms, especially when the suffix "-ism" is attached. In fact, whether it is mediation or compromise, they both contain the wisdom that "it is better to dissolve conflicts rather than create them." So does the term "reconciliation."

How is a new balance formed and maintained? Not necessarily by one side defeating another: that might be the case in some situations, but in others situations, it might be the product of reconciliation. Reconciliation means each side steps back a little, puts aside minor differences and seeks common ground so as to form a new balance. Compromise, mediation and reconciliation are similar in their meaning. Even if one side defeats or actually crushes the other, does it mean a new balance can form smoothly and be sustainable? Not necessarily so. The victory of one side is just one precondition for forming and maintaining a new equilibrium: reconciliation, compromise and mediation are also necessary, otherwise relations between people would be inordinately tense and the new equilibrium would be of short duration. Therefore, after one side defeats or crushes another, reconciliation, compromise and mediation will often follow. Only thus can the new balance be sustained.

There is an opinion that reconciliation implies weakness and betrayal, as if only uncompromising and continuous resistance would not mean these things. Obviously, this opinion is a gross oversimplification of an intricate and complicated social environment. A society is diverse, as are the interests and targets of its individuals and groups. We live in a complex world where absolute black and absolute white do not exist, except in the theoretical models of some idealists. As well as these extremes, the world has yellow, red, green, gray, and many other shades. Mediation is important because it means a way towards harmony. Compromise is necessary because it tells us the in-between state does exist. Reconciliation is necessary because it reflects

the possibility of various options. These concepts do not equate to "weakness" and "betrayal" and cannot be mixed up with them.

Are we justified in coming to the following conclusions? A society without safety valves is one that struggles to maintain stability and is replete with potential for crisis; when a society's mode of thinking and behavior is centered on fighting and resistance rather than reconciliation, compromise and mediation, then it will find it hard to develop effective safety valves to eliminate potential social crises. Fighting and resistance are indeed necessary and inevitable, but a society also needs reconciliation, compromise and mediation. We can even say the three are normal and even ubiquitous. Without them, social safety valves could not be established, nor could social equilibrium be maintained.

Those who look down on reconciliation as timidity are themselves timid, since their fear of facing the complexity and challenges of reality drives them to escape into such simplifications, retreating into an unrealistic world of their own design.

Those who contemptuously regard reconciliation as betrayal are in fact mocking themselves. Who has never resisted? Who has never compromised? Fighting and reconciliation are both inevitable. People should fight when necessary and reconcile when necessary. There is no exception in reality, even for those who scorn reconciliation as betrayal.

Betrayal should of course be condemned, but reconciliation should never be confused with it. The result of such confusion is socially damaging. Such an unreasonable opinion should surely carry no weight: no one, I believe, would agree with its untenable conclusion.

肆 社会经济运行中的安全阀

一、关于政府在缓解社会矛盾方面的局限性

社会经济运行中的安全阀，是指在社会经济运行过程中，如果社会矛盾比较尖锐，社会上的一部分人的不满情绪比较大，应当使这些矛盾和不满情绪有一些泄放口，以免矛盾越来越激化，不满情绪越积越多，最后弄到难以收拾的地步。也就是说，在社会经济运行过程中，矛盾宜化解而不宜蓄积，社会上的不满情绪宜疏导而不宜堵截。社会应当具有一种内在的缓冲机制、疏导机制。社会经济运行中的安全阀就是对这种内在的缓冲机制、疏导机制而言的。

在这里有必要对政府调节的局限性作一些阐述。这里所谈的是政府在缓解社会矛盾和疏导社会不满情绪方面的局限性。

应当指出，尽管政府在调节中往往掌握着主动权，即政府认为需要调节时就进行调节，不需要调节时就不进行调节，但这并不等于说政府的调节一定能够按照理想的方式进行，政府调节的结果也不一定就是理想化的。政府的调节是现实的调节，而并非理想化的调节。一般说来，政府调节的局限性主要在于：政府由于主观条件和客观条件的限制而不可能掌握全部必要的信息，从而不可能在掌握了全部必要的信息之后再作出决策。而且，从政府与公众之间关系的角度来看，在政府把自己的行为理想化的同时，公众也在根据以往的经验对现实和未来进行估计，作出判断，拟定准备实行的对策。这样，现实的情况不可能像政府所设想的那样完满，它会同预期的效果有一定的距离。何况，政府是一个，企业和个人是无数个，无数个企业和个人的眼睛都集中到政府身上，而政府却无法把眼光具体地投向每一个企业和个人。政府的行为易于被公众所认识，而政府却不易了解每一个企业和个人的行为。由此看来，政府调节的非理想化是一个不可能被否认的事实。

过去长时期内，有些人对政府调节有一种不正确的看法，似乎只要政府向公众“灌输”一种思想，公众就会接受这种思想，于是政府调节也就没有什么障碍了。这种看法实际上设定了两个并不存在的前提。一是假定公众对政府是绝对信任的，公众认为政府的任何措施都是正确的，是符合公众利益的，所以政府说什么，公众就接受什么。二是假定公众除了接受政府的“灌输”之外没有任何可供选择的余地，即如果公众不接受政府的“灌输”，那是不容许的，如果公众对政府的调节措施有任何异议，那更在被取缔之列。于是不管公众想通了还是没有想通，都得接受这种“灌输”。显而易见，即使在计划经济体制之下，这两个前提也是不存在的。过高地估计“灌输”的作用，只能使政府自我陶醉，并在政府行

为理想化的幻觉中越陷越深。

不错，在政府采取调节措施之前是需要向公众进行解释的。政策的宣传是使政策增加效果的条件。政府在采取某项调节之前如果能先对公众作充分的说明，化解公众的疑虑，这无疑有利于该项调节的推行。然而，向公众作解释不等于向公众“灌输”。“灌输”仅仅适用于对政府行为的非理性信仰者。其实，既然某些人已经成了对政府行为的非理性信仰者了，“灌输”可能是多余的，因为即使不“灌输”，他们也相信政府万能或政府永远正确。

不可否认，这种“灌输”的副作用是十分明显的。由于把公众当成被动的接受者，在信息流程上只有自上而下的输入，而往往缺少自下而上的反馈，并且信息来源单一，即由政府发布信息，公众缺少从其他来源得到信息的机会。在这种情况下，个人仅仅作为行政部门的附属物而存在。如果说公众中有相当多的人还不至于或不敢公开抗拒政府的某些调节措施的话，至少仍会默默地抵制或另找躲避的办法，这样也会使政府的调节效果下降。

在了解了政府调节的上述种种局限性之后，让我们再就缓解社会矛盾和疏导社会不满情绪方面所存在的政府调节的局限性进行讨论。可以分三种情况来谈。这三种情况是：第一种情况，政府不了解下情，得不到有关社会矛盾和社会不满的真实情况；第二种情况，政府对社会矛盾和社会不满的真实情况有所了解，决定采取措施来加以缓解，但措施不当；第三种情况，政府对社会矛盾和社会不满的真实情况有所了解，决定采取措施来加以缓解，并且措施是正确的。

1. 政府不了解下情，得不到有关社会矛盾和社会不满的真实情况。

假定政府对下面所产生的社会矛盾和社会不满情绪不了解，以为社会一切正常，那就会认为没有什么化解和疏导工作可做，从而也就谈不到建立社会内在的缓冲机制的必要性的了。但社会上不可能不存在社会矛盾，也不可能没有对社会的不满情绪。于是矛盾就会越积越多，社会不满情绪也会不断增长，最终会导致社会的动荡，甚至爆发一场社会政治危机。这种情况在历史上不是没有出现过的。

2. 政府对社会矛盾和社会不满的真实情况有所了解，决定采取措施来加以缓解，但措施不当。

这正如医生治病一样。一个医生，如果他发现病人患了病，并且病情较重，但开出的处方却不合适，其结果，或者只是让病情稍有减轻，

但却没有治好；或者拖延了时间，使病情加重；或者由于处方不对路，病情恶化。政府在处置社会矛盾和社会不满问题时，即使了解了社会矛盾和社会不满情绪的存在及其严重程度，但由于措施不当，结果不仅有可能使这些矛盾和不满情绪继续存在，甚至有可能使矛盾进一步激化，使社会的不满情绪进一步加剧。原因在于，政府信息不充分，或对措施的效果估计过高而对措施的副作用估计不足，或政府的调节不能随着客观形势的不断变化而及时调整，等等。这些都反映了政府在这方面的调节的局限性。

3. 政府对社会矛盾和社会不满的真实情况有所了解，并且采取了正确的措施。

照理说，在这样的情况下，政府有关缓解社会矛盾和社会不满情绪的调节措施应当是有成效的。然而，正如历史上许多事件已经表明的，政府调节措施依然存在着局限性，这些措施未必能够符合政府的设想。可以从两方面进行分析：一方面，任何社会矛盾总是由两方之间的不协调引起的，每一方都认为自己是有理的，都认为自己吃了亏，在收入分配上是如此，在就业、福利、生活状况等方面也是如此，很难断言究竟哪一方正确，哪一方不对。诸如此类的纠纷、争议，都不是依靠政府作为行政主管机构做一个裁决就能化解的。政府可以作出公正的裁决，但不一定使双方都满意。这一类问题只有通过民间的协调，本着互谅互让的精神来处理，才能缓解。这就超出政府作为主管机构的力量之外了。有许多问题不一定非要判断谁对谁错不可，“和稀泥”是民间常用的办法，这句话不见得总是错的。但政府调节很难去“和稀泥”，从而尽管从理论上说政府的措施十分正确，而在化解社会矛盾和消除社会不满方面却似乎常常无能为力。另一方面，许多社会矛盾和社会不满情绪是日积月累而形成并激化的，如果在它们处于萌芽状态时就能予以化解、疏导，也许是很有效的。然而，政府作为行政主管机构，总有自己的既定决策程序和办事程序，再加上政府的信息不一定及时和完整，因此即使政府事后能采取正确措施，但社会矛盾和社会不满情绪通常已经不是处于萌芽状态了。在这种情况下，政府调节的效果就会减少很多。这也表明了政府调节的局限性。

由此看来，为了化解社会矛盾，为了疏导社会的不满，有必要在政府调节以外去寻找社会内在的缓冲机制的建立途径。习惯与道德调节的作用将在这个领域内再次呈现出来。

二、社会内在缓冲机制、疏导机制的建立

接着，让我们探讨一下在政府调节非理想化的条件下，社会经济运行中的安全阀究竟在哪里？怎样才能建立社会内在的缓冲机制、疏导机制？从政府调节以外的角度来考察，可以认为，使社会中产生一种新的平衡力量，对建立社会内在的缓冲机制、疏导机制是有利的。

这里所说的是社会中的一种新的平衡力量，未把市场和政府包括在内。市场是一种平衡力量，它通过供求机制的作用而使资源得到有效配置，使各个生产要素的供给者之间维持一种平衡关系，即各自按照经过市场检验的、所提供的生产要素的数量和质量而取得收入。同时，市场也在交易双方之间维持一种平衡关系，即按照公平竞争的原则来协调买方与卖方的关系。市场是一种传统的平衡力量，但它至少有两个显著的局限性：第一，市场力量的平衡作用对于非交易领域内的各种活动和各种关系是不适用的，因为非交易领域不按市场规则来处理问题。第二，即使在交易领域内，市场的平衡作用也有局限性，因为市场调节仅仅考虑经济利益方面而不可能把一系列非经济因素考虑在内，但人不仅仅是“经济人”，还是“社会的人”，所以，在处理人与人之间的关系时，仅靠市场力量是不够的。

政府也是一种平衡力量。政府通过调节手段的运用，在协调收入分配，协调地区之间与部门之间的关系，以及协调经济增长与社会发展之间的关系时，有着市场调节所无法发挥的平衡作用。但是，正如前面所指出，政府调节除了有非理想化这一特点而外，还有另一个特点，即政府在处理人与人之间的关系时是以凌驾于个人之上的行政主管机构身份出现的，所以在发生某些社会纠纷时难以使冲突的双方都感到满意。人与人之间的纠纷或冲突并不是单纯依靠行政力量的介入就得以缓解的。加之，随着社会经济的发展和技术进步，政府要在人与人之间的关系中起到平衡作用，已经越来越不容易了。以企业与职工之间的关系来说，如果在发生纠纷时政府介入了，这时，由于企业关心利润，关心经济效益，企业往往感到政府所维护的是遥远的东西，是自己只能享受到部分利益的东西，而自己为此付出的代价（如税金，根据政府的规定而承担的福利支出，在政府介入后提高了的工资标准等）过大。所以企业并不经常满意政府的行为，只是有时不流露而已。而职工有时则感到政府更关心的是企业，特别是在就业、工资、福利等要求未得到满足时，

他们的不满情绪会更大，他们不像企业那样含蓄，而常常会流露出来。政府介入之后，企业与职工之间的矛盾在某些场合可能缓和一些，而在另一些场合甚至还有可能激化或深化。

那么，社会上新的平衡力量究竟在哪里呢？新的平衡力量如果存在的话，它又是如何起作用的呢？它能够起多大的作用？难道它没有局限性吗？……所有这些问题都值得我们探讨。

在《二十世纪的英国经济：“英国病”研究》一书中，我们曾提出了这样一种观点：社会上的公众是一种新的平衡力量。¹¹公众并不成为一个阶级或阶层。它包括了社会上一些不同阶级和阶层的成员。比如说，当政府、企业、职工三者之间发生矛盾而政府显得无能为力、企业显得无可奈何、职工又愤愤不平时，公众这个平衡力量就发挥作用了。公众是以社会成员的身份、公民的身份提出要求的。他们要求的是正常的社会秩序，是对公民合法权益的保障，是个人工作和家庭生活安定的环境与条件。假定某一个城市内，罢工或游行示威活动使社会正常生活受到了损害，当孩子们上不了学，公共汽车或地铁停止运行，飞机场关闭，街头上的垃圾无人清扫，牛奶供应停顿，医院里不收病人，或者连水、电、煤气的供应都中断了的时候，公众便把这些看成是破坏秩序和违背法律的行为，从而减少了对本来可以给予同情的罢工者、游行示威者的同情，更不必说支持罢工者、游行示威者了。到那时候，连罢工者、游行示威者的妻子也会埋怨自己的丈夫，他们的孩子也会责怪自己的父亲，他们的亲戚、朋友、邻居都会出来说话。罢工者、游行示威者会感到自己被孤立了，感到自己脱离了群众。于是他们会自省：是不是罢工和游行示威的组织者、策划者的决策有问题？是不是做过了头？是不是应当“适可而止”、“见好就收”？所以公众成为社会经济生活中的一个新的平衡力量，这个平衡力量在悄悄地起作用，使社会矛盾逐渐走向缓解。

同样的道理，当企业造成环境污染，附近居民受到威胁和损害时，企业与附近居民之间的矛盾加深了。这时，政府有可能对企业施加压力，命令企业停产或关闭，但企业中的职工却可能因此而失业，于是职工又向政府请愿，要求再就业，政府在这种情况下常常处于两难境地，结果，企业、职工、附近居民都感到不满意。政府偏向这一方，另一方抱怨政府；政府偏向另一方，这一方又抱怨政府。公众是这种场合能够协调各方之间关系的一种平衡力量。公众之所以能够发挥协调各方关系

的平衡作用，主要是因为公众总是从维护社会秩序的角度来考虑问题的，公众考虑得更多的是公共目标和公共利益。居住在污染地带附近的居民，是公众的一部分；造成污染的企业的职工，也是公众的一部分；政府是公众的代表选举出来的，要受到公众的制约；企业的管理层、决策层本身也是公众的组成部分，他们的行为同样要受公众的制约，这样，有关环境污染等原因所引起的社会矛盾都可以通过协商方式来解决而不致把问题弄得太僵、太绝。公众在这方面作为社会平衡力量的作用，是无形的，也是市场调节与政府调节都无法替代的。

那么，究竟客观上是不是存在社会内在缓冲机制、疏导机制？社会内在缓冲机制、疏导机制究竟在哪里？它是如何建立的？可以得出如下的结论：社会内在缓冲机制、疏导机制是存在的，它存在于公众对社会事务的关心和参与之中。公众越是关心社会事务，越是积极参与社会事务，公众作为社会平衡力量所起的协调作用就越重要，从而就越有助于化解社会矛盾，疏导社会的不满情绪。而要公众关心社会事务，积极参与社会事务，则又以公众对社会秩序的重视，对公共目标和公共利益的关心并愿意为之而努力作为前提。因此，公众越有社会责任感，越有公益精神，越关心社会事务，公众的社会平衡作用就越大。相反的，如果社会上多数人只关心自己而不关心社会秩序、公共目标和公共利益，缺少参与社会事务的积极性，那就谈不到公众的社会平衡作用，社会内在缓冲机制、疏导机制的建立也就异常困难。

公众发挥自己所特有的平衡作用的过程，同时也是个人适应于变动中的社会并建立与变动中的社会相适应的新观念的过程。社会上的个人都是相互影响的：既有积极的影响，也有消极的影响。假定社会上有较多的人重视公共目标和公共利益，并用自己的实际行动来促进社会的协调，那么在他们的影响下，会有更多的人关心社会事务，公众的社会平衡作用也将不断增大。这就是个人之间的积极影响的表现。反之，假定社会上许多人只关心自己而不关心社会，那么在他们的影响下，社会上会有更多的人也对社会事务采取冷漠的态度。这就是个人之间的消极影响的表现。可见，个人对社会事务的冷与热，或变冷与变热，都会受到周围的人的影响。个人越能适应变动中的社会，越容易接受与变动中的社会相适应的新观念，个人也就越有可能转变对人际关系的传统看法，而成为关心社会事务的积极参与者。这就是说，尽管社会上总有一些人对社会事务是冷漠的，但改变不了人们越来越关心社会事务的大趋势，

改变不了公众的社会平衡作用逐渐加强的大趋势。

三、有形的社会安全阀和无形的社会安全阀

在对社会内在的缓冲机制、疏导机制有了较深入的了解之后，我们就可以进一步探讨与社会安全阀的建立有关的心理因素。

社会安全阀有的是有形的，有的是无形的。前面所谈的关于公众是一种新的平衡力量，对社会矛盾有化解作用，对社会不满有疏导作用，这就属于无形的社会安全阀之列。至于有形的社会安全阀，主要是指一种资源的存在，它可以缓解社会的冲突；或一种组织机构的存在，它可以对社会的不满情绪进行疏导；等等。

比如说，对国内外大片未开发地带的移民和开发，在历史上曾经起过社会安全阀的作用，即有了这片可供移民、开发的土地，社会上一批有能力而在现实环境中无法发挥出来的人到这片土地上去生产经营，从而缓解了社会矛盾；也可以让社会上一些有这种或那种不满情绪的人到这片土地上去寻找发展机会，从而减少他们的不满程度。当年北美作为英国的殖民地时，以及美国独立以后领土逐渐向西部扩张时，这一大片土地就曾经吸引了欧洲大量移民。移民的成分是复杂的，他们来自欧洲的不同国家，来自城市和乡村，有穷有富，有贱有贵，但不管怎样，他们离乡背井来到北美，使家乡的社会矛盾因此有所缓解。北美成为欧洲的一个社会安全阀，在历史上持续了二百年甚至更长的时间。¹²在中国历史上也可以找到不少例证。当年中国的东北就曾经容纳了山东、河北的大量拓荒者，广东、福建的城乡居民到东南亚一带开创自己的事业，这都使移民的原籍的社会矛盾有所缓解。这些事实也是不可否认的。尽管我们不能认为移民能够消除当地的社会矛盾，即不能过高地估计移民在解决社会矛盾方面的作用，但移民至少可以减轻当地的人口压力、就业压力、土地匮乏的压力，移民至少在一段时间内使社会的不满情绪减少了。从这个意义上说，国内外可供开发和移民的土地的存在，是一个可以持续一段时间的社会安全阀。

我们也应当承认，社会救济事业的发展、社会救济组织机构的存在和发挥作用，同样可以成为社会经济运行中的有形的社会安全阀。社会救济大体上分为三类，即政府（包括中央政府与地方政府）的救济、社区的救济、民间慈善团体的救济。这三类社会救济的共同点在于：通过

社会救济款项的运用，有助于帮助灾民渡过难关，免于饿死、冻死；有助于扶植贫困家庭，增加谋生能力；有助于接济社会上的鳏寡孤独和残疾人，使他们生活上有所改善，等等。社会救济事业越发展，社会救济组织机构越能发挥作用，社会矛盾越容易化解。因此，社会救济事业和社会救济组织机构作为一种有形的社会安全阀，其作用是有目共睹的。

城乡居民的自治性群众组织，有可能成为另一种化解社会矛盾、疏导社会不满情绪的社会安全阀。为什么这里使用了“有可能”三个字？这主要是同城乡居民的自治性群众组织变质与否有关。变质的群众组织不仅起不了缓冲社会冲突的作用，反而会加剧社会的冲突，因为群众组织的变质已经使得它的自治性质、群众性质荡然无存，这样的组织被某些人把持以后已成为欺压群众的组织了。如果城乡居民的自治性群众组织没有变质，它们能代表群众的意愿，代表群众的利益，凡涉及群众利益的事情都同群众商量，那么，它们就能够发挥化解社会矛盾、疏导社会不满情绪的作用。

以上所列举的对未开发地带的移民、社会救济组织机构、自治性群众组织，都是有形的社会安全阀。要使这些有形的社会安全阀有效地起作用，仍然不可忽视道德因素的重要性。正如前面曾经提到的，移民们在拓荒开发的过程中，需要有强大的凝聚力，需要有顽强的进取精神、创业精神，才能克服种种困难，使移民事业取得成就。社会救济组织机构的发展及其工作的开展，除了依靠从事社会救济工作的人员有高度责任心和爱心而外，还要依靠来自社会上热心公益事业、慈善事业的人们的慷慨捐赠。自治性群众组织之所以能够不变质，能够真正代表群众的利益来为群众办事，一方面是由于这些群众组织的领导人能严格自律，不辜负群众对自己的信任，认真负责，另一方面是由于群众出于对本组织的责任感，敢于坚持原则并同违背群众利益的行为抗争。由此看来，有形的社会安全阀的背后实际是道德力量的支持。没有道德力量的支持，有形的社会安全阀是难以发挥应有的作用的。

下面，让我们对无形的社会安全阀再进行一些考察。应当指出，人们心理上的、精神上的安全阀，也许是一种比有形的社会安全阀更为有效的安全阀。它既有化解社会矛盾的作用，又有引导社会思潮的作用。具体地说，人们心理上的、精神上的安全阀，是指人们对社会这个大群体的认同，对社会发展前景和生活前景的信心，即认为只要经过共同努力，社会发展目标是可以实现的，人们的生活状况会越来越改善，人们

的聪明才智就会有施展的机会。人们对社会这个大群体的认同还体现在：如果现实生活中还存在着各种不尽如人意之处，那么这不要紧，通过改革，通过调整，通过社会制衡机制的建立与完善，不尽如人意之处将会减少或消失。有心理上的、精神上的安全阀，社会矛盾可以化解，社会思潮也会有正确的导向。这是市场调节、政府调节都无法替代的。

对任何一个社会来说，最可怕的莫过于存在一批绝望的人。从历史上看，某些人生活贫困、潦倒，生活在一种绝望状态之中，他们对前景丧失了信心。他们既然对社会、对个人前途都绝望了，对社会的认同也就无从谈起。绝望者的存在将给社会带来破坏性的影响，这种破坏性既可能表现于绝望者本人的各种破坏法律、破坏社会秩序的行为上，也可能表现为一种对周围的人有影响的消沉、沮丧情绪，从而使社会的活力减退。如果只是单个的绝望者，那么即使他绝望了，对社会经济发展的阻碍也不会很大。如果绝望的不只是少数几个人，而是较多的社会成员，那就会造成社会问题，社会需要耗费不少时间和精力来化解由此引起的社会矛盾，平息由此引起的社会不安。因此，对于社会经济运行中为什么需要有安全阀这一点，可以从减少绝望者人数和使绝望者消失的角度来加深认识。

观念的转变同人们心理上的、精神上的安全阀的形成有重要关系。前面已多次提到，道德力量的作用不仅在于对人们的行为进行规范和约束，而且也在于对人们的激励，在于促进个人得以自我发展与自我完善。以经济发展速度和经济发展程度作为判断是非的标准，当然是重要的，但从社会发展的方面来分析，还应当把是否对人的关心、尊重、培养作为是非判断的标准之一，因为在一段时间内，即使忽视了对人的关心、尊重、培养，经济也有可能以较快的速度增长，而从长时期考察，忽视了对人的关心、尊重、培养，经济的持续增长固然要受到阻碍，更严重的是将引起社会矛盾的加剧和社会不满情绪的滋长，最终会引起绝望者人数的增加并使社会动荡不安。观念转变的一个重要方面就是要对人的关心、尊重、培养作为社会发展的目标，并作为是非判断的标准之一。只有这样，道德调节的功能才可以更充分地发挥出来，在社会经济运行中，心理上的、精神上的安全阀也就可以较顺利地形成。

四、从原有的平衡状态向新的平衡状态的过渡

社会总是从治走向乱，从乱又走向治，从治再走向乱。只是在不同的历史时期，在不同的情况下，治和乱都有程度的差异，有大治、中治、小治之分，有大乱、中乱、小乱之别。所谓治，无非是一种平衡状态的形成；所谓乱，无非是原有的平衡状态被打破。所谓“治——乱——治”，就是指原有的平衡状态在维持一段时期之后被打破了，然后又形成了新的平衡状态。

社会经济运行中的安全阀的作用，从某种意义上说，是有利于原有的平衡状态的维持，以及有利于在原有的平衡状态被打破以后再建立新的平衡状态的。这是因为，社会安全阀的存在可以化解矛盾，使矛盾不至于激化而达到不可收拾的地步。不管是有形的社会安全阀还是无形的社会安全阀，都具有这种作用。

由此我们将涉及一个重要的问题，即如何理解和解、折中、调和这些名词？在某些书籍里或在人们言谈时，调和肯定被看成是一个贬义词，折中也常常含有贬义，特别是加上“主义”二字时更是如此，诸如“调和主义”、“折中主义”之类的用语多半是用于贬损的。实际上，调和也好，折中也好，都含有“矛盾宜解不宜结”的意思，和解更是如此。

一种新的平衡状态是如何形成并维持的？难道只不过是一方战胜另一方或一方吃掉另一方的结果？不一定如此。在某些情况下，新的平衡状态确实是一方战胜了另一方、吃掉了另一方之后而形成的。但在另一些场合，则很可能是双方和解的产物。和解，意味着各自后退一步，寻找某个共同点，求同存异，从而形成了新的平衡状态。调和、折中，其意义和作用与之相似。即使是一方战胜了另一方，或一方吃掉了另一方，难道新的平衡状态就此就形成了？建立了？并一直维持下去了？也不一定。通常的情况是：这仅仅是形成并维持新的平衡状态的一个前提。在这个前提下，仍然需要有所调和，有所折中，有所和解。新的平衡状态不可能是一种关系异常紧张的状态，否则新的平衡关系即使形成了，又能维持多久？因此，在一方战胜了另一方，甚至吃掉了另一方之后，紧接而来的通常仍然是这个大前提之下的调和、折中、和解。唯有这样，才能使新形成的平衡状态维持下去。

还有一种说法，即认为调和意味着怯懦和背叛。按照这种说法，似乎只有一直对抗下去，毫不妥协，才表明既不怯懦，又不背叛。显然，这是一种把本来错综复杂的社会环境极其不恰当地简单化的想法。社会是多元的，一个人或一个群体的利益和目标也是多元的。在这个复杂的

世界上，并非只存在“要么是黑，要么是白”的两极状态，也许“非黑即白”的两极状态仅仅存在于某些理想主义者的理论模式之中。世界上固然有黑有白，但也有黄色、红色、绿色、灰色等。调和之所以必要，因为这意味着走向一种和谐。折中之所以必要，因为这表明中间状态的存在。和解之所以必要，因为这反映了有各种可能性可供选择。调和与怯懦、背叛是两类截然不同的概念，不可混为一谈。

我们可不可以得出如下的论断呢？一个缺少社会安全阀的社会，是一个难以维持社会稳定并且充满着危机因素的社会；一种只知道斗争、对抗而不知道调和、折中、和解的思想方式、行为方式，一旦成为某个社会中占主流地位的思想方式、行为方式，那么这样的社会也就难以建立起有效的社会安全阀，社会中的危机因素也就消除不了。必要的斗争、对抗，既是回避不掉的，也是社会所需要的，但社会同样需要有调和、折中、和解，甚至可以认为，调和、折中、和解经常存在，处处存在。没有调和、折中、和解，不仅建立不了社会安全阀，而且连社会的平衡状态也难以维持。

把调和贬为怯懦的人，本身就是另一种形式的怯懦者，因为他不敢正视多元化世界的现实，不敢面临这一现实的挑战，而只得以简单得不能再简单的方式来逃避现实，遁入自我设计的非现实世界中。

把调和贬为背叛的人，对他本人来说则是绝大的讽刺。谁没有抗争过？谁没有妥协过？抗争与调和都不可避免，该抗争时抗争，该调和时调和。现实生活中的人莫不如此，难道唯独把调和贬为背叛的人例外？

背叛当然是应受谴责的。但把调和视为背叛，却把两件绝不相同的行为混淆在一起了。混淆的结果，对社会显然有害。难道对这种混淆就置之不理，听之任之？我想谁也不愿得出这种结论。

CHAPTER 7 MORAL RENEWAL AND SOCIO-ECONOMIC DEVELOPMENT

第七章 道德重整与社会经济发展

7.1 Introducing Max Weber's Thesis

7.1.1 Weber's Emphasis on Ethical Factors

In discussing the role of regulation by morality and custom in socio-economic development, it is necessary to explore the theories of Max Weber, the prominent German historian, sociologist and economist. Weber wrote on a wide range of subjects and his work *The Protestant Ethic and the Spirit of Capitalism* has been globally influential. On publication in the early 20th century, it attracted the notice of academics, but not the general public; however after World War II, especially since the 1960s, a surge of interest in Weber swept around the world. Why such interest in Weber the man and his arguments? Why did this vogue appear long after his demise? The reason lies in the arguments themselves and the post-war situation of the world.

Weber's thesis concerns the spiritual drive in economic development. He gives material factors their due importance in economic development but gives greater weight to spiritual factors. He believes that spiritual drive comes from ethical notions and these are often linked to religious ethics. With spiritual drive, economic development will be faster. According to Weber, the spirit of capitalism is a prerequisite for the production of capitalist society. For example, in Western Europe, without the Protestant ethic there would

have been no spiritual drive for the development of capitalism, *ergo* no capitalist society. His analysis goes as follows: Why did capitalism emerge first in Western Europe rather than in Southern Europe? After all, economic development in Southern Europe started earlier in history: by the 14-15th centuries, prosperous commercial cities with manual workshops had already emerged in Italy. But the economy of Southern Europe was never able to break away from feudalism and cross the threshold into capitalism. In Weber's opinion, the answer must be sought from the perspective of religious ethics. Catholicism ruled in Southern Europe and influenced every corner of its society. According to its dogma, man is the servant of God and is born with original sin. What to do? One way was to atone for their sins through penances and abstinence; another way was to atone by donating money to the Church. At that time, the Church sold indulgences to people. "They were total or partial remissions for such sins as yet unpunished, without which they would be punished both in this life and in Hell, even if the sinner tried hard to win absolution through severe penance and sacrament and had got remission. Getting Divine mercy was a prerequisite. In addition, the Church required men to pray, fast and restrain themselves, to practice acts of charity, such as donation and benefaction, worship at various churches, pay for masses, and to initiate philanthropic and public welfare causes such as building churches, bridges, roads and dykes, etc. Those measures were intended to help the development of religion, but they actually became just one of many techniques that the Church had for ruthlessly exploiting people."²

In Weber's opinion, penance, abstinence and donation to the Church could not help promote economic development and the emergence of capitalism. Catholicism could not give birth to the spirit of capitalism and was thus incapable of leading society to the capitalist age. According to Weber, although commerce brought economic prosperity to Southern Europe for a while, it was still medieval Roman Catholic morality that dominated society. St. Thomas

characterized the desire for gain as *turpitude* (which term even included unavoidable and hence ethically justified profit-making), which was considered genuine.³ In places where such doctrine ruled minds, even when businessmen did amass money they still could not slip the shackles of the old teachings. "Their life-work was, so long as they clung to the tradition of the Church, at best something morally indifferent. It was tolerated, but was still, even if only on account of the continual danger of collision with the Church's doctrine on usury, somewhat dangerous to salvation. Quite considerable sums, as the sources show, went at the death of rich people to religious institutions as conscience money, at times even back to former debtors as *usura* which had been unjustly taken from them."⁴ "Mediaeval ethics not only tolerated begging but actually glorified it in the mendicant orders. Even secular beggars, since they gave the person of means opportunity for good works through giving alms, were sometimes considered an estate and treated as such."⁵ How could such ethical values promote the emergence and development of capitalism?

While the economy of Southern Europe was booming, in the East, in China especially, the economy was probably even more vigorous. So why did capitalism not emerge in China? Weber attributes this to religious ethics, considering that Oriental and Chinese religious ethics were not suitable for producing capitalism. He cites the example of Buddhist monks valuing lives to come not the current one, but since the afterlife is vague and reincarnation unbelievable, the emphasis on afterlife could never result in capitalism. Taoism, suggests non-involvement and returning to the simple state, a concept clearly inimical to the engendering of capitalism. Later, Taoism changed: The upper class followed it for longevity and personal enjoyment whereas insurrectionary peasants followed it for egalitarian purposes. Neither provided suitable soil for capitalism to take root.

Weber called Confucian thought Confucianism, a system of ideas with great influence in the East, especially in China. But Confucianism emphasizes self-cultivation, pursues perfection of moral character and

hopes to replace pursuit of material benefits with spiritual satisfaction. Later when Confucianism became the orthodoxy in China's feudal society, it advocated loyalty to the monarch and self-sacrifice while despising commerce and wealth. Here again, an ethical outlook that provides no fertile soil for cultivating capitalism. The influence of these ethics made it easier for the ordinary folk of China to endure a life of poverty and hardships. As a result, the agriculture-based *status quo* was taken as the natural order, the pursuit of commercial gain was despised, and aspiration and drive to amass wealth and develop the economy was hugely enfeebled. Therefore, although China had been prosperous in the past, capitalism was still an impossibility. Being so dominated by Confucian thinking, China could never manage to cross the threshold to capitalism.⁶

So why did capitalism emerge in Western European countries such as the Netherlands and Britain during the 16th and 17th centuries? In Weber's view, it was because both were Protestant countries and it was Protestantism that fostered capitalism. According to Protestant ethics, men are servants of God and all are sinners and must redeem themselves. But how? By dint of hard work, thrift and amassing wealth. To work was to work for God, so man must be diligent and not fear hardships. To live thriftily was for accumulating fortune, which in turn was for enlarging the scale of the undertaking and ultimately for God. The greater their achievements, the better the work they were seen as doing in the service of God. Consumption was inferior to accumulation. Puritans always dressed simply and shunned extravagance. Some Puritan groups displayed their resolve by willingly committing to a lifetime of frugality and hard work. But such commitment and behavior were different from both the ascetic practices of the Catholic Church and the behavior of Confucianists in China who were satisfied with a poor but clean life. The ascetics of the Old Church redeemed their sins by ascetic practice: They did not start undertakings, still less amass wealth. Confucian followers were content to be poor in order to perfect their morality. What they

upheld and pursued was to be an official of integrity and competence, loyal to the monarch and looking after the populace rather than starting an undertaking and amassing wealth. The Protestant ethic was: Hard work, thrift and amassing wealth are the best ways to salvation. Hard work and thrift are helpful for starting undertakings and amassing wealth. A lifetime of thrift and hard work will result in more and more wealth and correspondingly greater achievements.

In Weber's opinion, capitalism in Western Europe was born and developed under the guidance of the Protestant ethic. He asserts, "For if that God, whose hand the Puritan sees in all the occurrences of life, shows one of His elect a chance of profit, he must do it with a purpose. Hence the faithful Christian must follow the call by taking advantage of the opportunity. 'If God show you a way in which you may lawfully get more than in another way (without wrong to your soul or to any other), if you refuse this, and choose the less gainful way, you cross one of the ends of your calling, and you refuse to be God's steward, and to accept His gifts and use them for Him when He requireth it...'"⁷ This passage fully reflects the Protestantism ethic of "working hard and amassing wealth in the service of God."

The Puritan understanding of poverty may explain the issue better. "To wish to be poor was, it was often argued, the same as wishing to be unhealthy; it is objectionable as a glorification of works and derogatory to the glory of God. Especially begging, on the part of one able to work, is not only the sin of slothfulness, but a violation of the duty of brotherly love according to the Apostle's own word."⁸ This is what distinguishes the Protestant ethic from those of Catholicism and the Orient.

7.1.2 The Reason for "Weber Fever"

How do we evaluate Weber's thesis? There are various explanations on the origin of capitalism and Weber's differs from those of other scholars, because of his emphasis on ethical factors, i.e.

cultural factors.

According to Weber, the Roman Catholic ethic was incompatible with the spirit of capitalism, making it hard for capitalist economy to develop in Catholic countries. But people with a different view might argue: France is a Catholic country, isn't it? So why did its economy grow so fast later? How come French capitalism was not inferior to the capitalism of Protestant countries? The rapid development of the French economy might be attributable first and foremost to political factors, the fact that the revolution of 1789 severely hit its old systems and cleared the path for a capitalist economy. Therefore, over-emphasis on ethical factors is perhaps not a correct interpretation.

According to Weber, in countries of the Orient the influence of religious ethics made it hard for capitalism to develop, citing Confucianism as hardly compatible with the spirit of capitalism. But a contrary argument might be put: History demonstrates that the rapid development of capitalist economy is not limited to Protestant countries, since Eastern countries like Japan, South Korea and Singapore have their own cultural traditions but have also experienced rapid development of a capitalist economy. Therefore, capitalism can be compatible with both Protestant and Confucian ethics. It's even possible for the combination of capitalism with Confucianism ethics to create greater miracles.

Nevertheless, Weber's thesis is still considered valuable by academics, and even dissenting voices acknowledge that the thesis is very enlightening. The role of ethical and cultural factors emphasized by Weber is actually a mode by which multiple factors stimulate system change and economic development. In other words, only in combination with social, political and economic factors can ethical and cultural factors result in the emergence and development of capitalism. It thus discards the theory on the origin of capitalism that regards economy and politics as the only decisive factors.

The "Weber fever" that took hold around the world after World War II relates to the world's political situation at the time and with

Weber's emphasis on ethics and culture. In the aftermath of war, the defeated nations of Japan and Germany faced the urgent task of rebuilding their countries, and newly independent countries in Asia and Africa needed to advance toward modernization by way of faster economic development. The inspiration that people derived from Weber's works is this: Spiritual drive is necessary for economic development. Without it, economic development will struggle. Of course this spiritual drive is not limited to the Protestant ethic discussed by Weber, but possibly it is an ethical outlook adaptive to the cultural tradition of a nation. But in the Protestant ethic, we can find some correspondences, among them the concept of "the calling." It meant: all have a moral obligation to be diligent in and dedicated to their work. Even though the work is in a secular environment, they have a duty to do it well, because they are working for God. This is what the Protestant ethic taught people, but what do non-Protestant ethics teach? Whether or not they use the specific concept of "the calling," there are correspondences: they don't say working for God, but say working for the country, the nation and society and it is everyone's obligation to make the country strong and wealthy, revitalize the nation and make society prosperous. To work with dedication is to do one's duty for the country, the nation and society. For economic development there must be a spiritual drive and this is it.

In the Protestant ethic, for an individual to amass wealth was not a matter for reproach. The amassed wealth itself was no sin, unless used for frivolous personal extravagance. If the wealth was used for the welfare of human beings it could be regarded as a dedication to God. Protestant ethics also had the notion that wealth could and should be accumulated provided it was by just means, and, moreover, if the accumulation benefited economic development, it could be regarded as a dedication to society. Thus, although non-Protestant ethics are different in form from the Protestant ethic, their essence is the same, and this both inspired interest in Weber's works and made

people feel they could learn something useful from them.

7.1.3 Weber's Thesis and the Rationality of Historical Process

In studies of modernization, scholars often raise the questions: Why did industrial revolutions develop to different degrees in different countries and regions? What factors stimulated industrial revolutions in this country or that one? What were the most important factors? Researchers come up with different answers to this last question according to their different perspectives, since Weber's thesis is one among a number of theories about modernization. One of its main lessons is this: For a nation, even if the requisite material and technical conditions are present, industrial revolution will be hard if the right ideological and moral conditions are absent or if there is no spiritual drive for revolution or modernization. Even if it has started its modernization, the process will still be hindered or even interrupted. In other words, Weber's thesis tells us that behind industrial revolution and modernization, there is a kind of invisible spiritual power leading people to strive hard for economic fruits and encouraging them to pioneer and operate unflaggingly, to make profit, to amass and to start new undertakings.

According to Weber's thesis, since capitalism represents a spirit and an outlook that will encourage people to pioneer and progress, then an internal contradiction appears, namely this: On what grounds did he assert that capitalism was a phenomenon specific to Western Protestant culture? He could at most draw the following conclusion: Capitalism was born in Western Europe between the 16th and 17th centuries, but this is only the first historical example to illustrate the importance of ethics to economic development: It is not proof that only the Protestant ethic could produce capitalism and promote modernization. The Catholic ethic could change or be interpreted from

a new angle. Specifically, the medieval buying of indulgences and ascetic practices in penance for sins could be abandoned. Did the vast majority of Catholics not do so later? To interpret and understand Catholic ethics from a new angle, did capitalism not develop rapidly in Catholic countries also? This reasoning can also account for the relation between Confucianism and economic development in countries of the East. This has become a hot academic issue from the middle of the last century.

According to Weber, the process of industrial development is also a process of adjustment of relationships, pre-industrialization relations such as hierarchy, hereditary system, clan rule, and personal bondage not being conducive to industrial development. Therefore, if capitalism is to play a dominant role in a country and if its industry is to develop greatly, its interpersonal relations should also change correspondingly, a change often accompanied by a change in ethical outlook. Weber's penetrating analysis posits a close link between socio-economic development and change in interpersonal relations and ethical outlook. That is, behind every great historical event, there is an intangible spiritual force. Without it, a nation's economy will be moribund, but with such a force there is hope of rapid growth. Any country hoping to develop its economy rapidly should nurture such spiritual force. Non-Protestant regions such as the newly independent countries of Asia and Africa post-World War II would develop very slowly if they could not find a spiritual counterpart to the Protestant ethic, but by fostering such a power, they could hope to catch up with the developed countries.

Another important lesson from Weber is this: Deepening the study of modernization demands a broader discussion in the areas of society, economy, culture, ethics, politics, etc., and a discussion limited to politics or economy is far from enough. In the Chinese academic community, among those with an interest in Weber's work there is virtually unanimous acceptance of this point. In their opinion, the value for China's modernization studies lies more in Weber's method

of analyzing historical process than in Weber's thesis itself.

From Weber's thesis it is possible to draw out an important issue, namely, understanding the rationality of the historical process. What is meant by this? According to Weber, it means that the behavior of people or society has changed from being emotional to being rational. People originally had no clear goals, nor, accordingly, did primitive societies. At that time, simple survival was enough, avoiding death from hunger, cold or wild beasts, but these could not count as definite goals. Later, although society was developing and economy was getting active, people's goals were still to survive and multiply. An individual's lifespan was finite but that of the clan infinite, so the survival of generation after generation became a goal for all traditional society. But it was still not a specific goal. Only after a society had passed through its traditional stage into the modern civilization stage did the rational nature of the historical process appear. For example, according to the Protestant ethic, people should be hard working and thrifty, amass wealth and start undertakings, so as to fulfill their "calling," in other words, the rationalization of behavioral goals. Human society always moves in the same direction—from being without clear goals toward having clear goals—and the rationality of historical process always becomes more and more clear. This is a law of historical development.

What does Weber's thesis tell us? It can be encapsulated thus: The rationality of historical process is displayed as human and social behavior having clearer and clearer goals rather than being limited to survival and multiplication. In the absence of spiritual power and ethics at the heart of the rational goals, a society could not possibly achieve sustainable progress.

壹 韦伯理论引起的思考

一、韦伯对伦理因素的强调

在讨论习惯与道德调节在社会经济发展中的作用时，有必要联系德国著名历史学家、社会学家、经济学家马克斯·韦伯（Max Weber）的理论作一些探讨。韦伯一生写了不少著作，涉及的范围很广，尤其是他的《新教伦理与资本主义精神》一书¹，是一部很有影响的世界名著。这本书在20世纪初年刚刚问世时，只是学术界中有人注意到它，而没有引起社会各界的兴趣。但第二次世界大战结束以后，特别是60年代以后，却在世界上掀起了一阵“韦伯热”。为什么会出现对韦伯本人及其学术观点的强烈兴趣？为什么这种兴趣是在韦伯去世后若干年才出现？这既同韦伯的论点有关，也同第二次世界大战结束后的形势有关。

韦伯的理论涉及经济发展的精神动力问题。他一方面强调经济发展中物质因素的重要性，同时更加强调精神因素的作用。他认为，精神动力来自伦理观念，而伦理观念往往同宗教的伦理联系在一起。有了精神的动力，经济发展就会加快。

根据韦伯的论述，资本主义精神是资本主义社会产生的前提。在西欧的社会经济发展过程中，如果没有新教伦理，就不会有发展资本主义的精神动力，从而也就不会有资本主义社会。他是这样进行分析的：

资本主义为什么首先兴起于西欧而不是南欧？从历史上看，南欧的经济发展较早，意大利在十四五世纪就已经出现了繁华的商业城市，手工工场也已产生，但南欧的经济始终没有越过封建主义的界限，跨不过资本主义入门的门槛。韦伯认为，这只有从宗教伦理着手分析，才能找到正确的答案。旧教统治着南欧，旧教的影响渗透到南欧社会的各个领域。按照旧教的观点，人是上帝的仆人，人都是有罪的，那该怎么办呢？一是要苦苦修行、禁欲，以便赎罪；二是把钱捐给教会，这也是为了赎罪。在当时，教会出售的赎罪券，“是对仍须受惩罚的罪恶的全部赦免或部分赦免，否则要在现世或炼狱中受罚，即使罪人经过苦行赎罪圣礼，罪行已获赦免，亦在所难免。蒙受圣恩是一个必不可少的先决条件。此外，教会还规定要祈祷、斋戒和克己，以及从事各种善行，如捐赠和施舍，朝拜各个教堂，出钱朝圣，兴办慈善事业甚至公益事业，如建造教堂、桥梁、道路和堤坝。这种做法本应有助于促进宗教事业的发展，但实际上它成为教会横征暴敛的许多手段之一”。²

在韦伯看来，无论是苦苦修行、禁欲还是把钱财捐赠给教会，都不能促进经济的进一步发展，不能导致资本主义的产生。旧教伦理被认为无法产生资本主义精神，从而无法把社会带入资本主义阶段。韦伯指

出，尽管商业曾造成南欧经济的一度繁荣，但支配着社会的是中世纪的天主教伦理。“圣·托马斯将追求财富的欲望斥为卑鄙无耻（这一用语甚至还用来指责那种不可避免的因而在伦理上是完全正当的获利），他的这一论点在当时被奉为真理”。³在这一教义统治着人们思想的地方，即使有些人经商赚了钱，但仍摆脱不了旧教伦理的束缚，“只要他们不肯放弃教会的传统，他们毕生从事的工作充其量不过是某种在道德上毫无建树的东西……各种资料表明，富人们往往在临终之际将巨额钱财捐献给教会，用心补赎自己良心上的愧怍”。⁴更有甚者，“中世纪的伦理观念不仅容忍乞讨的存在，而且事实上在托钵僧团中还以乞讨为荣。甚至世俗的乞丐，由于他们给有钱人提供了行善施舍的机会，有时也被当做一笔财产来对待”。⁵这种伦理观念怎能促进资本主义的产生与发展？

在南欧经济曾经兴盛的同时，在东方国家，尤其是中国，经济可能更加繁荣、兴旺。那么，资本主义为什么没有产生于当时的中国呢？韦伯认为这也可以从宗教伦理中得到解释。东方的、中国的宗教伦理被认为是不适宜产生资本主义的。比如说，佛教徒重来世而不重现世。来世是渺茫的，轮回之说不可信，重来世的思想无论如何不可能导致资本主义的产生。再如，道教是中国土生土长的宗教，道教主张清静无为，清静无为的思想显然对资本主义的产生不利。以后，道教的思想还有如下的转变，如社会上层信奉道教，是为了长生不老，个人享乐；农民起义军信奉道教，所追求的是平均主义，这同样不利于产生资本主义。

韦伯把儒家思想称做儒教，在东方，尤其是在中国，儒家思想的影响大，但儒家注重修身，追求个人道德的完善化，希望以精神上的满足来替代对物质利益的追求。以后，儒家思想成为封建社会的正统之后，宣扬忠君和牺牲自我，以商为耻，以富为耻，这是一种不适合资本主义产生与发展的伦理观念。正是在这种伦理观念的支配下，广大的中国平民百姓对生活中的贫困较易忍受，对艰苦的环境有忍耐力，以农业为本的现实被认为理所当然，对商业利益的追求却受到鄙视，努力积累财富以发展经济的愿望和动力大大减弱了。因此，尽管中国在历史上曾经是繁荣的，但中国不可能产生资本主义。在儒家思想占统治地位的情况下，中国迈不过进入资本主义大门的门槛。⁶

那么，为什么资本主义于十六七世纪能在西欧国家，例如荷兰和英国产生呢？韦伯指出，这是由于荷兰和英国都是新教国家，新教伦理孕育了资本主义。根据新教伦理，人是上帝的仆人，人都是有罪的，需要

赎罪。靠什么来赎罪？只能靠工作勤奋，生活节俭，积累财富。工作，是为上帝而工作，所以必须勤奋，不怕艰苦。生活节俭，是为了积累财富，积累财富又是为了把事业的规模扩大，因此，积累财富也是为了上帝。事业上的成就越大，表明为上帝服务的工作做得越好，工作越有成绩。至于消费，那是服从于积累的。清教徒们总是衣着朴素，不尚奢华，某些清教徒团体甚至以甘愿一辈子节俭生活但一辈子勤奋工作来表明自己的决心。但这种立誓节俭的许诺和实际行为，既不同于旧教徒中一些人的苦行，也不同于中国信奉儒家思想的人的安于清贫。旧教中的那些苦行者，以苦行本身来赎罪，他们不开创事业，更不会积累财富把事业越做越大。中国信奉儒家思想的人安于清贫，是为了使个人的道德操行臻于完善，他们所崇尚的、追求的是做清官，做好官，忠于君主，爱护黎民，而不是开创事业，也不是积累财富。新教的伦理观念则是：勤奋、节俭、积累财富，都是人们最好的赎罪方式，勤与俭是同开创事业、积累财富相联系的。一辈子过节俭生活但一辈子勤奋工作，积累的财富越来越多，成就也越来越大。

韦伯认为，西欧的资本主义正是在这种新教伦理的指引下产生与发展起来的。关于这一点，韦伯有如下的论述：“在清教徒的心目中，一切生活现象皆是由上帝设定的，而如果他赐予某个选民获利的机缘，那么他必定抱有某种目的，所以虔信的基督徒理应服膺上帝的召唤，要尽可能地利用这天赐良机。要是上帝为你指明了一条路，因循你可以合法地谋取更多的利益（而不会损害你自己的灵魂或者他人），而你却拒绝它并选择不那么容易获利的途径，那么你会背离从事职业的目的之一，也就是拒绝成为上帝的仆人，拒绝接受他的馈赠并遵照他的训令为他而使用它们。”⁷这一段话充分反映了“为上帝而辛劳致富”的新教伦理观。

也许更能说明问题的是清教徒对贫穷的认识。“清教徒时常争辩说，期待自己一贫如洗不啻是希望自己病入膏肓；它名为宏扬善行，实为贬损上帝的荣耀。特别不可容忍的是有能力工作却靠乞讨为生的行径，这不仅犯下了懒惰罪，而且亵渎了教徒们所言的博爱义务”。⁸这正是新教伦理同旧教伦理以及东方伦理的重大区别。

二、“韦伯热”的原因

如何评价韦伯的理论？在资本主义起源问题上，有各种各样的解

释。韦伯的解释不同于其他学者之处，主要在于他对伦理因素的强调，也就是对文化因素的强调。

根据韦伯的理论，旧教伦理同资本主义精神是不相容的，所以旧教国家的资本主义经济不容易发展。但持有不同观点的人却争辩说，法国不也是旧教国家之一吗？为什么法国经济后来会迅速发展呢？为什么法国的资本主义不比新教国家逊色呢？法国资本主义经济的迅速发展，也许首先应当归功于政治因素，即1789年革命对旧制度的打击为法国资本主义经济的发展开辟了道路，可见，过分强调伦理因素未必是一种正确的解释。

根据韦伯的理论，在东方国家，由于宗教伦理的影响，资本主义是难以发展的，比如说，儒家伦理就很难同资本主义精神相容。但持有不同意见的人却反驳道，历史实践已经表明，资本主义经济的迅速发展不限于新教国家，东方的日本、韩国、新加坡等国都有自己的文化传统，它们的资本主义经济迅速发展起来了，可见，资本主义既可以同新教伦理相容，又可以同儒家伦理相容，甚至儒家伦理同资本主义的结合会创造出更大的奇迹等。

尽管如此，韦伯理论仍被学术界评定为是有价值的。即使对韦伯理论持不同意见的人，也承认韦伯的理论给人们以不少启示。韦伯强调伦理因素、文化因素的作用，实际上所提出的是一个多因素促成制度转换和经济发展的模式，即伦理因素、文化因素唯有同社会、政治、经济等因素综合地起作用，才导致资本主义的产生与发展，从而摒弃了那种把经济或政治视为单一的的决定性因素的资本主义起源论。

第二次世界大战结束以后世界范围内的“韦伯热”的形成，既同第二次世界大战结束以后的世界政治经济形势有关，又同韦伯对伦理因素、文化因素的强调有关。第二次世界大战结束后，日本、德国战败后面临重建的迫切任务，亚洲、非洲出现了一些新独立的国家，要求加快发展经济，走上现代化道路。人们从韦伯的著作中所得到的重要启示是：要发展经济，必须有一定的精神的动力。没有精神的动力，经济是上不去的。这里所说的精神的动力，当然不限于韦伯所讨论的新教伦理，而可能是同本民族的传统文化相适应的一种伦理观念。但从新教伦理中，也可以找到某种对应物。比如说，新教伦理中的“天职”观念就是可以借用的。“天职”是指：每个人都要勤于本职工作，忠诚于本职工作，这是个人的道德义务。尽管这是人们在世俗环境中的工作，但人人都有责任把

这项工作做好，因为这就是为上帝而工作。新教伦理是这样教导人们的，那么新教以外的其他伦理观点又是怎样教导人们的呢？不管它们是不是采用“天职”这个概念，但对应物仍然存在，这就是把为上帝工作转换成为国家、为民族、为社会而工作；使国家富强，使民族振兴，使社会繁荣昌盛，成为每个人应尽的责任，人们勤于本职工作，忠诚于本职工作，就是向国家、民族、社会尽到了义务。经济发展中需要有精神的动力，这就是精神的动力。

又如，在新教伦理中，个人财富积累在道德上本来是无可非议的。积累财富本身无罪，只有财富被用于骄奢淫逸的个人享乐时才有罪，财富的积累如果造福于人类，则被认为是对上帝的奉献。新教的这一伦理在新教以外的伦理中也存在，这就是：可以而且应当积累财富，只要财富是通过正当途径得到的，那也无可非议。而且，如果财富的积累对发展经济有利，那就是对社会作出贡献。可见，尽管其他伦理在形式上与新教伦理不一样，但实质并无区别。这就使得人们对韦伯的著作不仅感兴趣，而且感到有所借鉴。

三、韦伯理论与历史进程的合理性

在研究现代化进程时，人们常常提出如下的问题：为什么工业革命在不同的国家和地区有不同的发展过程？是哪些因素促成了这个国家或那个国家的工业革命？在促成工业革命的若干因素中，最重要的因素是什么？研究者们由于观点的不同而会提出不同的因素作为最重要的因素，韦伯的理论是若干种有关现代化的理论中的一种。但韦伯给人们的主要启示在于：一个民族，虽然在某个发展阶段已经具备了物质技术条件，如果不具备意识形态方面的条件，不具备伦理道德观念方面的条件，如果缺乏产生工业革命或现代化的精神的动力，那么工业革命仍然难以发生，现代化的进程即使开始了，也会受阻、中断。换句话说，韦伯理论告诉人们，在工业革命的背后、现代化进程的背后，存在着一种不易被察觉的、无形的精神力量，它引导人们去努力争取经济的果实，鼓励人们孜孜不倦地去开拓、经营，获取利润，积累财富，再创新业。

按照韦伯的理论，既然资本主义代表着一种精神、一种理念，而这种精神、理念将促使人们去开拓、进步，那么韦伯的理论就出现了一个内在的矛盾，这就是：有什么理由把资本主义说成是西欧新教文明所特

有的现象呢？至多只能得出这样的结论：十六七世纪在西欧产生了资本主义，那仅仅是历史中出现的第一个例证，可以用以说明伦理观念对经济发展的重要意义，但不能说明只有新教伦理才能产生资本主义，才能推动现代化的进程。旧教伦理是可以变的，也可以从新的角度来解释，具体地说，中世纪那种向教会购买赎罪券的做法、那种苦苦修行以求解脱和赎罪的做法是可以放弃的，后来不也被旧教徒中的绝大多数人所放弃了吗？从新的角度来解释、领悟旧教伦理，资本主义不也在旧教国家中迅速发展起来了吗？同样的道理也适合于儒家伦理同东方国家经济发展之间关系的解释。这正是20世纪中期以后学术界研究的热点问题之一。

按照韦伯的理论，工业发展的过程同时也是人际关系的调整过程，前工业社会的人际关系，如等级关系、世袭关系、家族统治、人身依附等，都不利于工业发展。因此，资本主义要在某个国家内取得支配地位，工业要有较大发展，人际关系也必须相应地变革，这种变革往往是同伦理观念的转变相伴而行的。韦伯这种把社会经济发展同人际关系的变革、伦理观念的转变紧密地联系在一起的分析，十分精辟。这就是说，在任何一个重大的历史事件的背后，都存在一种无形的精神力量，哪个民族缺乏这种精神力量，那里的经济就死气沉沉；哪个民族有这种精神力量，它就有迅速成长的希望。谁要想迅速发展经济，就必须培育和发展这种精神力量。新教文明以外的地区，例如第二次世界大战结束后亚洲、非洲新独立的国家，如果找不到同当年的新教伦理相对应的精神力量的话，发展只可能迟缓、滞后，而一旦培育和发展了相应的精神力量，后进国家赶上先进国家就是有希望的。

从韦伯的理论研究所得到的一个重要启示是：对现代化问题的深入研究要求在社会、经济、文化、伦理、政治等领域内开展广泛的探讨，仅仅拘泥于政治或经济领域内是远远不够的。中国学术领域中一些对韦伯的著作感兴趣的人几乎全都察觉到了这一点。他们认为，韦伯的著作所给予中国现代化研究者的启发，与其说是韦伯的理论本身，不如说是韦伯所提供的一种可以用来分析历史进程的方法。

从韦伯的理论还可以引申出一个重要的问题，这就是对历史进程的合理性的认识。什么是历史进程的合理性？按照韦伯的理论，这是指人们的行为或社会的行为从激情转入了理性。人们本来没有明确的目标，原始社会就是如此。当时，只要饿不死，冻不死，不被野兽吃掉，能活

下来，就行了。这谈不上有什么明确的目标。后来，尽管社会发展了，经济活跃了，但人们仍然是以生存作为目标，以繁衍后代作为目标。个人的生命是有限的，家族的生命是无限的，因此生存与繁衍便成为目标，整个传统社会都这样。这仍然不是明确的目标。只有当社会越过了传统阶段，进入现代文明阶段之后，历史进程的合理性才显现出来，因为只有到了这个时候，人们才认真地思考自己的目标，使行为的目标理性化。例如，在新教伦理中，工作勤奋，生活节俭，积累财富，创造事业，以尽“天职”，这就是行为目标的理性化。在新教文明以外的伦理观念中，同样存在着为一定的目标而工作和生活的精神动力，行为目标也趋向理性化。人类社会总是从缺乏明确的目标走向明确的目标，历史进程的合理性总是越来越明朗的。这就是历史发展的规律。

韦伯的理论在这方面告诉我们什么呢？归结起来就是这样一点：历史进程的合理性体现于人们的行为、社会的行为逐渐有了明确的目标，而限于生存和繁衍；假定缺少精神力量，没有一定的伦理观念作为行为目标理性化的内核，社会的持续进步将是不可能的。

7.2 The Urgency of Moral Renewal

7.2.1 Old Culture and Ethics Replaced by New

Now let us shift our focus from Weber to the issue of China's modernization.

At the present stage, China faces an urgent task of moral renewal. This is actually a question of how to replace the old culture and ethics with new ones. At the heart of the old culture were deities and officials, in contrast with our people-centered new culture. The former emphasized worship, authority and bondage in contrast to the latter's stress on science, knowledge, independence and self-esteem. The old ethic protected the old culture and order whereas the new ethic safeguards the new.

Due to its emphasis on worship, power and bondage, old culture was intrinsically a deity-and-official-oriented culture. New culture is

bound to center on people, science and knowledge because of its emphasis on science, knowledge, independence and self-esteem. In this lies the biggest distinction between the old culture and the new.

Looking at the political dimension, we can take the year 1949 as the dividing line between old and new. But culturally, the line is far from clear, since the old culture existed for a long time before 1949 and did not disappear after that, although some of it took on new forms. Both pre-1949 culture and new forms of old culture shared the common ground of superstition and worship of power rather than proceeding from science and centering on people. This was because old culture had dominated China for so long, had a solid economic base and was deeply, deeply rooted in the soil of feudalism. Therefore, even post-1949, apart from stubbornly surviving, it reappeared in different guises. In my book *Whither China's Economy* I labeled pre-1949 old culture "the standard old culture," and old culture in new forms "old culture in new clothes."⁹ What actually survived in China from the 1950s to the end of the 1970s were two versions of old culture. The Cultural Revolution (1966–1976) was a classic period when the two old-culture versions co-existed and dovetailed. Such a situation has also appeared in some historical stages in some other countries, but it was most conspicuous in China from the 1960s to 1970s.

The old culture needed to be cleared away, but how? It is often claimed that economic development is vital and higher per capita income indispensable and that once such aims are realized old culture will be more easily uprooted since the poverty that fostered it is a thing of the past. Such thinking does make sense but it has a major flaw. We cannot root out old culture purely by economic development and increasing per capita income. Compared with 1949, mid-1960s China had experienced economic development and increase of income per capita, but the old culture still survived and remained influential. The "standard old culture" had by no means left the stage when "old culture in new clothes" made its entrance. This is surely worth some

consideration.

The old culture denies the status of people as the main body of society, and is characterized by ignorance, blind obedience and superstition, so in order to really get rid of it and develop new culture, the most important task is to reform the system from which old culture draws its lifeblood, in particular the system that fostered "the standard old culture" and "old culture in new clothes." System reform is more important than economic development. On the foundation of system reform, with educational and economic development progressing in tandem, and per capita income increasing along with rising educational level, old culture can be more effectively eradicated. Moreover, the purpose of education goes further than imparting knowledge and skills. More important is to improve the national caliber via education and to take "making people the key" and "modernization of people" as major tasks. Without these, there can be no modernization of society, economy, science and technology, still less the introduction of new culture and ethics to replace the old.

Apart from relying on ignorance, blind obedience and superstition, old culture and ethics were also sustained by a hierarchical estate system and rank relationships, visible or invisible. These constituted a component part of the old system. The countryside is a case in point: It is here that "the standard old culture" has most stubbornly clung to life and where rank relations are at their strictest. Rank relations are closely connected to traditional values and ethics. Why is the power of deities, the gentry, clans and husbands hard to break? It has to do with the rank relations sustained by the traditional values and ethics. In rural areas, "the standard old culture" will exist forever if the traditional values and ethics and the long-existing rank relations are not expunged. In the cities, the estate system and the rank relations are usually invisible, but they too cause people to be constrained by traditional values and ethics. Being invisible, the estate system and rank relations in urban areas are not easily detectable; indeed, some people tacitly accept them, not daring or wanting to stir

them up. In system reform a prolonged conflict is most likely to occur in the area of values and ethics. "Making people the key" and "modernizing people" mean abandoning the estate system and rank relations, establishing new individual-to-group relations, including identification, cooperative and contractual relations. Once this is understood, we can understand the profound and far-reaching significance of moral renewal.

Old systems will not collapse of their own volition; neither will old traditions and powers dissolve by themselves. Old culture and ethics may reappear in new garb. In the 1960s, young Chinese joined in the Cultural Revolution in the name of "smashing the four olds," but this generation was fooled and cheated. The so-called "smashing the four olds" turned out to be safeguarding old culture, especially "old culture in new clothes." Ignorance, blind obedience, superstition and extremism made them guardians of old culture and destroyers of the new. Fortunately, most of them woke up fairly soon to the harsh reality and a realization that they had become victims of the old culture. Such is history, cold and neutral. Every Chinese should surely draw a lesson from the freakish phenomenon of "old culture in new clothes" after 1949, including how it was conceived, born and raised.

What must happen for the old culture and ethics to be replaced by new? Apart from system reform, economic and educational development, people also need to realize the harm of the old cultures, both versions. The young intellectuals sent down to the countryside during the Cultural Revolution, fooled and hoodwinked by old culture, would later be among those harboring the most bitter hatred for it. Is this not a convincing proof?

However, replacing of the old culture and ethics by the new is far from easy. It involves the issue of moral renewal, a mission impossible to complete in a generation or two.

7.2.2 Moral Renewal and "Re-launch"

No one can deny the great achievements made in economic construction since the founding of New China in 1949. For a long time after 1949, China's culture seemed a mish-mash of good and bad. On the one hand, the "standard old culture" continued to exist and exert influence, while the "old culture in new clothes" grew rapidly, with its influence increasing. On the other hand, the new culture that represented the *zeitgeist* grew and exerted ever greater influence on people as well. For this period, the growing influence of new culture was indispensable to China's achievements in economic construction.

To be specific, after long years of wars and chaos, the Chinese people warmly embraced the new regime; yearning for a prosperous revitalized China, they were ready to create a better future through their toil, enterprise and dedication. Their enthusiasm was undoubtedly a manifestation of the growing new culture and new ethics. Borrowing from Weber's thesis, we can say that a concept similar to Weber's "calling" now existed in Chinese society of that time. For the sake of national prosperity and better lives for more and more people, many people volunteered to relocate to border regions, remote areas and harsh environments where they worked hard, regardless of return. For them, it was their "calling" to do so. We may call such spirit the "start-up spirit." It animated and was essential to "start-up practice" and to the successes of economic construction.

Why was the "start-up spirit" so short-lived? The reasons are many, but in terms of system, the planned economy strangled individual initiative and creativity, giving birth and nurture to egalitarianism. Importantly, ideological campaigns such as the "anti-rightist" and "anti-right deviation" movements and the Cultural Revolution put a dead hand on people's spirits, and any enterprise or creative enthusiasm ebbed away. During the Cultural Revolution when black was called white and all sense of judgment was lost, people could hardly be expected to throw themselves into economic development. As it became more and more common to trample creativity and stifle enterprise, only disappointment and despair

remained, so how could people still have any passion to selflessly give their all for economic construction? The spiritual trauma was not something quickly healed. By the later stage of the Cultural Revolution, many people were spiritually void and inert, seemingly indifferent to anything and everything. Its aftermath of nihilism, listlessness and negativity still exists to a degree. After the Cultural Revolution ended and as China entered the market economy with reform and opening-up, some people went from one extreme to the other. Driven by the spur of economic gain, such people disregarded commercial and professional ethics, earned indecent money, or openly declared their living creed that individual benefit was paramount, that money came first, there was nothing money couldn't achieve. Neither extreme is aligned to the goals of modern development. In such context, it is urgent to raise the issue of "re-launching" and cultivating a "re-launch spirit." To go on developing our economy, there must be a spiritual drive; we must inculcate in society the notion of striving hard for China's prosperity and modernization. Of the lessons we can draw from Weber's thesis the most important is this: Without spiritual drive, breakthroughs in economic development will not come easily.

This brings us to the question of moral bankruptcy, a frequent talking point in recent years. In looking at the underlying reasons, rational analysis is more useful than emotional judgment. Morally damaged and unscrupulous people are produced by any age or time; it is just the numbers that vary. The reasons for moral bankruptcy are complex and arise from different circumstances, so we must use a holistic analysis rather than a single-element approach. What we need to clarify is this: Why, after a period of benign social ethos post-1949, should so much terrible and amoral behavior have emerged in China? How does one account for the gradual disappearance of the fine social ethos? In this context, the question of moral renewal has been raised. When people become hypocritical, they will lie and hide the truth, and wear a mask in dealing with others, thereby distorting morality. But why do people become hypocritical? There is spontaneous

hypocrisy and forced hypocrisy. Spontaneous hypocrites are the minority: most people only resort to hypocrisy under duress, but there are some who fall somewhere between the two types. Forced hypocrisy for reasons of self-protection without any wish to harm others can be called "moral distortion." Spontaneous hypocrisy is different, not for self-protection, but motivated by the prospect of personal benefit, and this deserves to be called moral bankruptcy. Whether forced by pressure of circumstances or spontaneous, springing from selfishness and greed, hypocrisy is always a betrayal of man's nature. Of course, even in the hardest circumstances, there are still non-hypocrites: but in the prevailing moral climate they could do little to prevent the good social ethos ebbing away, since most people had been forced into hypocrisy.

A classic example is how people saw the domestic political and economic situation in the later stage of the Cultural Revolution. Those who spoke the truth were toppled. Some people lied because they had to for the sake of self-protection and so as not to meet the same fate as the truth tellers. They saw telling a lie as expedient, figuring perhaps that to speak the truth now could lose them any chance of speaking anything at all in future. In circumstances like this, forced lying was completely forgivable, even though it contributed to the ebbing away of a good social ethos. The willing liars did so not to protect themselves, but to flatter and fawn on those with power for their own personal gain. In full knowledge that China's economic situation was a mess, they would come up with fantasies such as "the situation is peaceful and the masses are all happy" and "history has never known times as good as these." Some were actually proud of their ability to concoct facts and frame others in order to achieve their own purpose. Those willing hypocrites bear the greater blame for the waning of the good social ethos. Even worse, when they got their way and were rewarded for their hypocrisy, this had a very bad demonstration effect on society and accelerated its moral corruption.

The question of moral renewal was raised after almost 20 years of

political purges and campaigns culminating in the Cultural Revolution caused grave moral distortion in society; it was also raised when China started out on the road of reform and opening-up, as people began to feel the urgency and necessity of "re-launching" and establishing the "re-launch spirit" to drive it forward.

贰 道德重整的迫切性

一、新文化、新伦理对旧文化、旧伦理的代替

让我们从关于韦伯理论的讨论转到对中国现代化问题的讨论上来。在中国现阶段，道德重整是一个迫切任务。

道德重整实际上是一个如何以新文化、新伦理代替旧文化、旧伦理的问题。扼要地说，旧文化以神为中心，以官为中心，新文化以人为中心；旧文化强调的是崇拜，是权力，是依附，新文化强调的是科学，是知识，是自立自尊。旧伦理维护的是旧文化、旧秩序，新伦理维护的是新文化、新秩序。

正因为旧文化强调崇拜、权力、依附，所以旧文化本质上必然是一种神化的、官本位的文化，而由于新文化强调科学、知识、自立自尊，所以新文化必然以人的利益为出发点，以尊重科学和尊重知识为出发点。这是新旧文化的最重要的区别。

从政治上说，可以把1949年作为一条分界线，但从文化的角度来看，这条分界线远不是那么清楚的，因为旧文化在1949年以前固然长期存在过，而在1949年以后，旧文化却并未消失，只不过其中有些内容采取了新的形式。无论是1949年前的旧文化还是1949年以后以新形式出现的旧文化，其共同点都是迷信，对权力的膜拜，而不以科学为出发点，不以人为中心。正由于旧文化在中国历史上长期占据支配地位，它在经济中有坚实的基础，它在封建主义的土壤中扎根扎得太深了，所以1949年以后，除了原来的旧文化照样存在而外，又增添了新形式下的旧文化。我在《中国经济往何处去》一书中，把1949年以前的旧文化称做“标准的旧文化”，把1949年以后出现的新形式下的旧文化称做“改装的旧文化”。⁹从20世纪50年代到70年代末这段时间内实际存在于中国

的，就是这两种旧文化。其中，“文革”时期（1966～1976年）是“标准的旧文化”与“改装的旧文化”两者并存和巧妙地结合的典型时期。这种情况在世界其他一些国家的历史上某个阶段内也曾出现过，但在20世纪60年代与70年代的中国却最为明显。

旧文化当然需要清除，但旧文化要靠什么来清除？人们常说，经济发展是必要的，人均收入水平上升是不可少的，经济发展和人均收入提高后，旧文化所借以生存的贫困状态消失了，清除旧文化就会容易些。这种观点不是没有道理的，但仍有较大缺陷。单纯依靠经济发展和人均收入的提高不足以清除旧文化。20世纪60年代中期同1949年相比，中国的经济发展了，人均收入水平上升了，但旧文化的影响消除了吗？没有。不仅“标准的旧文化”没有退出历史舞台，甚至又增添了“改装的旧文化”。这些难道不值得反思吗？

由于旧文化否定人作为社会主体的地位，旧文化以愚昧、盲从、迷信为特征，所以要真正清除旧文化和促进新文化的发展，最重要的是变革旧文化赖以栖身的体制，特别是要改变“标准的旧文化”和“改装的旧文化”两者得以滋长的体制。体制的变革比经济发展更重要。在体制变革的基础上，在发展经济的同时发展教育，在人均收入水平上升的同时提高人们的教育水平，对旧文化的清除工作才会有效。而且，教育的目的不仅仅是传授知识和技能。更重要的是提高国民素质，把“以人为本”和“人的现代化”作为一项主要内容。没有“以人为本”和“人的现代化”就谈不上社会经济的现代化和科学技术的现代化，也不可能以新文化、新伦理代替旧文化、旧伦理。

要知道，旧文化、旧伦理除了依靠人们的愚昧、盲从、迷信来维持而外，还要依靠有形或无形的等级制和身份关系来维持，这种等级制和身份关系就是旧体制的组成部分。以农村来说，农村历来是“标准的旧文化”的势力最顽固的地盘，也是身份关系最严格的场所。身份关系同传统的价值观念、伦理观念紧密地联系在一起。神权、绅权、族权、夫权的统治为什么不易打破，这些都与传统价值观念、伦理观念所支撑的身份关系有关。在农村中，如果不破除传统价值观念、伦理观念，不破除相沿已久的身份关系，“标准的旧文化”就会一直存在下去。在城市中，等级制和身份关系往往是无形的，它们也使得人们受到传统的价值观念、伦理观念的束缚。同时，也正因为城市中的等级制和身份关系往往是无形的，所以它们不易被人们察觉，甚至会被一些人默认而不敢或不想触

动它们。制度变革中一场持久的冲突，很可能发生在价值观念、伦理观念的领域内。“以人为本”和“人的现代化”意味着人们对等级制和身份关系的摒弃，树立个人与群体之间的新关系，包括认同关系、协作关系、契约关系等。只有了解了这些，我们才能懂得道德重整的深远意义。

旧体制不会自动瓦解，旧传统、旧势力不会自行消失，旧文化、旧伦理还可能以改装的形式出现。20世纪60年代内，一批年轻人曾经以“破四旧”的名义参加了“文化大革命”。他们是被愚弄、被欺骗的一代，他们参加的是名为破除旧文化，实为维护旧文化，特别是“改装的旧文化”的逆流。愚昧、盲从、迷信，再加上偏激，使他们成为旧文化的维护者和新文化的毁坏者。幸而冷酷无情的现实使他们中的大多数人较快地醒悟过来了，使他们中的大多数人真正领悟到自己最终成为旧文化的受害者。历史就是这样冷酷无情，难道每一个人不应当从1949年以后“改装的旧文化”这个怪胎的孕育、出生到成长的过程中汲取教训吗？

新文化、新伦理怎样才能代替旧文化、旧伦理？除了前面所提到的要依靠制度变革，依靠发展经济和发展教育而外，还必须让人们深刻懂得旧文化的害处，包括“标准的旧文化”的害处和“改装的旧文化”的害处。一些曾经受旧文化的蒙蔽、愚弄的上山下乡的知识青年，后来之所以会成为最痛恨旧文化的队伍中的一员，不正说明了这一点吗？

然而，旧文化、旧伦理被新文化、新伦理的代替，远不是那么容易的。这涉及道德重整问题，而道德重整很可能不是一两代人就能完成的任务。

二、道德重整与“第二次创业”

不能否认1949年以后经济建设的巨大成就。1949年以后的相当长一段时间内，中国的文化领域似乎是鱼龙混杂的格局：一方面，“标准的旧文化”继续存在，继续发生影响，而“改装的旧文化”则以较快的速度在滋长，其影响越来越明显；另一方面，代表着时代精神的新文化也在成长之中，并且同样地对人们产生影响。这段时间内中国经济建设的成绩同成长中的新文化的影响是分不开的。

具体地说，在中国社会经历了长期战乱之后，好不容易盼来了新政权的建立，人们渴望国家从此强盛，民族从此振兴，人们有一种强烈的创业精神、进取精神、奉献精神，并有信心通过自己的艰苦努力来创造

美好的未来。这种创业、进取、奉献的精神，无疑是当时正在成长之中的新文化、新伦理的体现。如果借用韦伯的理论来叙述的话，那么可以认为，当时在中国社会上已经产生了类似韦伯所说的“天职观念”。为了国家的繁荣昌盛，为了让广大人民的生活越过越好，当时有许多人自愿地到边疆去，到偏僻的地带去，到艰苦的环境去，勤奋工作，不计报酬，因为在他们看来，这就是“天职”。我们可以把这种精神称做“第一次创业精神”。有了“第一次创业精神”，才有“第一次创业”的实践，也才会有经济建设的成绩。

为什么“第一次创业精神”未能持久保持呢？原因很多，从体制上说，计划经济体制扼杀了人们的积极性、创造性，使平均主义思想得以滋生。而从意识形态领域来看，一个重要的原因是“反右”、“反右倾”直到“文化大革命”，把人们的精神挫伤了，进取、创业的热情消失了。“文化大革命”期间，黑白颠倒，是非混淆，人们还有什么发展经济的积极性呢？当人们看到创造性被践踏和进取心被扼杀的情况已经越来越普遍的时候，剩下的只是失望、绝望，哪里还有奋不顾身地投身于经济建设的热情呢？精神上的创伤绝不是短时期内就能治愈的。于是到了“文革”的后期，社会上不少人在精神上处于一种空虚状态，仿佛把什么都看淡了，看穿了，看透了，得过且过，无所作为。这种虚无、颓丧、消极的思想至今仍有一定的市场。而在“文革”结束，逐步转入以市场经济为目标的改革开放过程中，由于经济利益的驱动，有些人又从这个极端转到另一个极端，不顾商业道德和职业道德，大赚昧心钱，或者公开声称个人利益至上，金钱第一，金钱万能，以此作为人生信条。这两个极端都是与现代化建设的目标不符的。在这种情况下，提出“第二次创业”和培育、树立“第二次创业精神”尤其必要。中国经济的进一步发展，必须有精神上的动力，要在社会上树立如何为中国的繁荣昌盛而奋发图强的观念，为实现现代化目标而努力的思想。韦伯理论中如果说有一些可供我们思考和给予启示的话，那么最重要的启示应当是——没有精神的动力，经济就难以取得新的突破。

由此涉及近来社会上议论颇多的道德沦丧问题。究竟怎样看待道德沦丧的原因？在这个问题上，我们应当多一些理性的分析，而不能仅仅从感情出发。必须指出，在任何一个时代，任何一个地方，都会出现道德败坏、无恶不作的人，只不过有的年代多一些，有的年代少一些，有的地方多一些，有的地方少一些而已。道德沦丧的原因是复杂的，而且

是多种情况，不能用某一因素来代替综合分析。历史上的例证就不必再提了，我们需要弄清楚的是，为什么在中国这块土地上，在经历了1949年以后一段时间良好的社会风尚之后，后来却会出现不少不顾道德的恶行呢？为什么良好的社会风尚逐渐褪色了呢？这是值得深思的。道德重整问题的提出，与此有直接的关系。

良好的社会风尚的褪色是从虚伪开始的。人们虚伪以后，假话充斥，真话绝迹，人以虚伪面貌待人，道德便被扭曲了。那么，为什么人们会变得虚伪了呢？实际上，虚伪分为两种类型，一种是自觉的虚伪，另一种是被迫的虚伪。自觉虚伪的，毕竟只是极少数人。大多数人是被迫虚伪。还有一部分人介于自觉虚伪与被迫虚伪之间，或者说是半自觉虚伪、半被迫虚伪。被迫虚伪只不过是一种自保、自卫的做法，并无害人之心，是不得已而为之。这可以称做“道德的扭曲”。自觉虚伪就不同了，这不是为了自保、自卫，而是另有所图，借虚伪而牟取私利。这可以称做“道德的沦丧”。无论是被迫虚伪还是自觉虚伪，都是对人的本性的一种背叛。这种背叛，前一种情况下应归因于环境的压力，后一种情况下则主要归因于私利或贪婪的作祟和驱使。当然，不虚伪的人，即使在环境最恶劣时，也是存在的。但在环境恶劣这个大气候中，他们难以扭转良好的社会风尚逐渐褪色的趋势。这时，社会上大多数人不得不被迫虚伪。

一个典型的例子是“文化大革命”后期如何看待当时国内的政治经济形势。说真话的人被整下去了，说假话的人中有被迫的，也有自觉的。被迫说假话，只不过为了保全自己，不至于落得与说真话的人同样的下场。被迫说假话，也可能是一种策略，即今天说假话是为了以后有机会再说话，否则以后连说话的机会都没有了。对于被迫说假话的情形，在当时的环境下是完全可以谅解的，但即使如此，也会对良好社会风尚的褪色起着不好的作用。至于自觉说假话的，与此有所不同。他们不是为了保全自己，而是明知当时国内经济形势很糟，却一定要说当时的经济形势怎么好，什么“莺歌燕舞”，什么“历史上从来没有这么好过”，等等，这种自觉的虚伪是为了奉迎、献媚，为了由此获取个人的利益。自觉虚伪的人中间，还有一些则以捏造事实为能事，陷害他人以达到个人的目的。良好的社会风尚的褪色、一些人道德的沦丧，应由形形色色的自觉虚伪者负更大的责任，特别是当他们自觉虚伪的做法一时得逞，并且还得到了奖赏时，就对社会产生了恶劣的示范效应，加速了社会风尚

的败坏、道德的败坏。

道德重整问题正是在经历了将近二十年的“反右”、“反右倾”、“文化大革命”等政治运动，使社会的道德严重扭曲之后被提出的，也是在走上改革开放的道路，人们感到“第二次创业”的迫切性和树立“第二次创业精神”的必要性后被提出的。

7.3 The Long-term Nature of Moral Renewal

7.3.1 Moral Renewal and Improvement of National Caliber

From the foregoing analysis we learn that the urgency of moral renewal right now has to do with the stubborn persistence of old cultures and their serious social impact, and also with the negative feelings in society such as emptiness, depression, suspicion and helplessness. Moral renewal means building new culture and ethics to replace the old, to foster and establish the "re-launch spirit," to raise the national caliber, so as to engender a spiritual drive in the modernization process.

Although new culture and new ethics will eventually be established and developed on the foundation of economic growth, the task of moral renewal cannot wait. The only way appropriate to China's realities is to set about the task on the basis of real life, to constantly improve the national caliber and put effort into practicing moral renewal. Certainly, moral renewal and the replacement of old culture and ethics with new ones is a long-term process and cannot be completed within a short period, but that does not mean we cannot do or achieve anything in moral renewal at the present stage. The urgency of the task tells us we must start on it right away.

Passive waiting is not the right attitude, but it is equally wrong to rush at the job. The replacement of old culture and ethics with new is

a historical trend and cannot be realized so quickly. The victory of new culture means society has made the transition from the "material age" to the "age of man." New culture discovers and respects man's value, and puts man at the center of things rather than the material, and this can only be achieved via a long process. For China, the victory of new culture will be much harder won than we imagined, since feudalism dominated social ideology and people's lives for over a thousand years and survived in the planned economy as "old culture in new clothes," the costume change fooling many people for a while that it was a brand new culture. In China's moral renewal process, even more important than renewing people-to-people and people-to-material relations is the need to instill in people the belief that only a new understanding of the value and significance of life will make it possible to "liberate" oneself, have internal moral inspiration and restraint and have strong enterprising and creative spirit.

Here it is necessary to discuss the question of moral standards, of which there are usually two in life—internal and external. Concerning the differentiation, we may refer to passages in Max Weber's *General Economic History*, in which he wrote: "Furthermore we find everywhere else a primitive, strictly integrated internal economy such that there is no question of any freedom of economic action between members of the same tribe or clan, associated with absolute freedom externally."¹⁰ This means that, in a group, even a primitive tribe, there might be an internal moral standard for internal affairs and an external moral standard for external affairs. Behavior is regulated by two different standards. He continues, "In contrast with this, the second characteristic of western capitalism is the lifting of the barrier between internal economy and external economy, between internal and external ethics, and the entry of the commercial principle into the internal economy, with the organization of labor on this basis."¹¹ This passage is instructive for an understanding of the moral renewal's long-term nature.

The erasing of the demarcation between external and internal

moral standards has a direct bearing on the openness of a society or a group. The more open the society, the more readily the two standards merge. The development of capitalist society testifies to this fact. The same is true of groups, too. In a closed group the demarcation will always be definite no matter what the group's nature is. Its internal standard will probably be unsuitable for dealing with external matters and vice versa. Only when it becomes less closed will the boundary gradually fade away.

China is in transition between the planned economy and the market economy. Under the former, it basically adopted the closed society model, and for members of that society the demarcation between two moral standards was very clear-cut. The same behavior was thought a violation of moral standard if directed internally but thought permissible in external affairs. The same speech was deemed permissible internally but a violation of moral standard externally. Over many years, the Chinese became accustomed to the differences, so the contradiction itself and its potential impact on the social ethos went unconsidered. In plain terms, people identified with the dual standard as a custom, when it was actually a distortion of morality: Utilitarianism won out over judgment of right and wrong and moral standards were subordinated to political and economic needs.

The problem did not stop there. As previously discussed, in an environment inimical to truth telling, the majority were forced to lie and be hypocritical for reasons of self-protection, whilst a minority did so willingly for their own benefit. The forced hypocrisy can be called "moral distortion" and spontaneous hypocrisy "moral bankruptcy." All in all, the question becomes more complicated when talking about a situation in which people could not treat each other sincerely, behave with integrity or regulate their behavior according to an inbuilt moral standard, added to which there was a clear-cut demarcation between external and internal moral standards. This is because the demarcation already constituted a moral distortion, one made more acute by forced hypocrisy. If some were spontaneously hypocritical for personal

benefit, this constitutes moral bankruptcy on top of moral distortion. As a result, the dual standard became a multiple moral standard, or a moral standard expressed in several forms. Truth and falsehood become impossible to judge, the two being so messed up and mixed. This was the reality China had to face in the early stage of reform and opening-up. Only by admitting the reality can we have a deep understanding of the mental state of the Chinese under the impact of one political campaign after another—the "anti-rightist," "anti-right deviation" movements and the Cultural Revolution. Only then can we truly appreciate the long-term nature and difficulty of moral renewal.

7.3.2 Moral Renewal: Fantasy and Reality

Max Weber cited the pioneering process of Puritans in New England to illustrate the role of Protestantism in promoting the emergence and development of capitalism, and to demonstrate the importance of establishing a moral standard. To our previous examples of insights from Weber's thesis we can now add one more: There was an element of fantasy contained in the Puritan notion of "the calling" and their ethic, although this in no way prevented the Protestant ethic playing a positive role in economic development. Daniel J. Boorstin wrote in *The Americans: the Colonial Experience*: "IF THERE WAS ever a people whose intellectual baggage equipped them for a journey into Utopia it was the New England Puritans. In their Bible they had a blueprint for the Good Society, their costly expedition to America gave them a vested interest in believing it possible to build Zion on this earth."¹² At that time New England was a colony of Britain and the migrants had to accept British law to protect their own interests, a reality that diluted the tinge of fantasy, but this does not negate the fact that they crossed the ocean and came to North America with the fantasy of building their "kingdom of heaven" on the earth.

It should be noted that despite the fantasy element in the

migrants' aspirations, their moral inspiration and restraint were always real. Today, in its "re-launch," China has taken moral renewal as a mission, but it is not comparable with the situation of the Pilgrim Fathers because of the differences in terms of character, conditions, mission and goals. In China, if we can achieve moral renewal, both moral inspiration and restriction will be realistic, and the development goals will be reachable ones. To put it simply, moral renewal and improving the national caliber are not fantasy aspirations: Our development goal is not to create an ideal "paradise" and modern society is not a Utopian one. The approach to moral renewal and improving caliber should proceed from real life and have realistic steps and goals. As for abhorrence of old culture in its many forms, we cannot afford a purely emotional or purely theoretical awareness. The nurturing of a good social ethos should start from reality, relying on everyone's effort in regulating personal behavior. Only thus can achievements in moral renewal stop being one-off and accidental phenomena and good social ethos will no longer be a vague abstraction.

There is another significant aspect to removing the fantasy element from moral renewal, namely, to design an "ideal society" but without divorcing it from reality. In the past, all designs for an "ideal society" were on paper or in the mind only, hard to put into practice. Such experiments that did get off the ground were limited in scope and ended in failure within a couple of generations. Theoretical constructs cannot stand up to the test of practice. It is worth noting that if a politician wants to turn a large-scale design for an "ideal society" into a policy and impose it by force, what may emerge will not be paradise, it could well be socially catastrophic.

Friedrich Hayek looked at this question. According to him, in history idealist politicians had put forward various guidelines or proposals for achieving an "ideal society" and expended a lifetime of effort for this goal. However, judging from the results, those idealists frequently delivered disaster rather than happiness. Convinced of the

loftiness of their ideals, they went to any lengths, regardless of the consequences, resorting to unscrupulous tactics with a clear conscience. The greater their allegiance to their ideals and goals, more zealous they were in promoting their ideas. The more interventionist and destructive their actions against the invisible and spontaneous force controlling socio-economic life, the more dire were the consequences for society.¹³

What is the invisible and spontaneous power controlling socio-economic life that Hayek talked about? It is usually thought of as the market mechanism. According to Hayek, regulation by market as an "invisible hand" spontaneously takes a role wherever there is trading activity. But this seems a narrow interpretation: Aside from market mechanism, the force of custom and morality constitutes another invisible and spontaneous power dominating socio-economic life. It existed before the appearance of regulation by market and afterwards too, being particularly apparent in the non-traded sector. The reforms implemented by the idealist politicians in order to make their "ideal society" reality not only destroyed the market mechanism but damaged the invisible and spontaneous power of regulation by custom and morality, thus destroying the cultural traditions shaped by custom and morality. They only trusted in individual strength and government strength, and relied only on the latter. So they forced through the program that they espoused, producing breakdown of social order, leading to deaths from hunger and cold, people being compelled to leave their native places, becoming homeless and vagrant. Such tragedies are not rare, neither in the past nor the present, neither in China or abroad.

Why should things go this way? In Hayek's view, the politicians made a common theoretical mistake: Namely, seeing their own will as more elevated than anything else, they thought of themselves as saviors of the world, in other words God, and their actions were "enforcing justice on behalf of Heaven." They regarded it as an unquestionable moral imperative to transform the world according to

their vision. Aside from this, they made the mistake of regarding regulation by government as omnipotent and government measures as a panacea for any "social malady" (some of them not actually "maladies" at all). In their view, provided their plans were followed to the letter, and with strict policies strictly enforced, they could bring people a better life and lead them into "paradise." However, although they promised a better life, they were unaware that society would have to pay a very heavy price for nothing but a multitude of after-effects and a dire social legacy. This is because with the abandonment of the market mechanism and regulation by custom and morality, what awaited society was a "worse life" and disaster. As mentioned above, socio-economic life is usually comprised of the traded sector and the non-traded sector. When the market mechanism is abandoned, the traded sector ceases to exist in actuality, because it has become distorted and changed into the non-traded sector. When regulation by custom and morality is abandoned, the various relations in the non-traded sector are also distorted and become false and hypocritical relations. Is this not a disaster?

It is because an "ideal society" contains elements of fantasy and its forcible implementation by idealist politicians often brings unforeseen social catastrophes that, when proposing moral renewal and nurture and establishing a good social ethos, we should do so from the standpoint of realistic analysis: It is better to see the problems as hard and complex rather than over-simplify them, better to have a long-term, incremental plan than to act with undue haste, better to focus on normalizing behavior through laws, enlightening people by education, making more people realize wholeheartedly the necessity of following social morality than attempting to unify minds and normalize behavior through administrative measures. It is especially important that we should make constant progress in raising people's material living standards while satisfying their spiritual needs, but we should not define every detail for our future society. Two passages in *Socialist Politics and Economics* are of significance here.

"Every generation has its own historic mission. This generation of scholars of economic theory should focus on the problems of socialist economy in its developing stage."¹⁴ "If we bite off more than we can chew, worry about several generations further down the line, design details for future social and economic development, then later generations will only see us as a joke."¹⁵

叁 道德重整的长期性

一、道德重整与国民素质的提高

通过以上的分析，我们可以了解到，当前，道德重整之所以具有迫切性，不仅同旧文化（包括“标准的旧文化”和“改装的旧文化”）的顽固及其对社会的严重影响有关，而且同社会上存在的空虚、颓丧、怀疑或茫然不知所措的情绪及其滋长有关。道德重整意味着要建设新文化、新伦理以取代旧文化、旧伦理，也意味着要培育和树立“第二次创业精神”，提高国民素质，使现代化进程中产生一种精神的动力。

虽然新文化、新伦理终将在经济发达的基础上确立并发展，但道德的重整不能等到经济发展以后才作为任务而提出。从现实生活着手，不断提高国民素质，着力于道德重整的实践，这才符合中国的实际。由于道德重整以及新文化、新伦理对旧文化、旧伦理的取代都不是短期内就能完成的，所以我们应当理解道德重整的长期性。另一方面，道德重整的长期性不等于现阶段在道德重整方面是无所作为的或不可能取得成就的。道德重整的迫切性表明从现在起就必须着手于道德重整工作。

消极等待的想法固然不对，但急躁情绪也同样错误。新文化、新伦理取旧文化、旧伦理而代之，是历史发展的趋势，却不会迅速实现。新文化的胜利意味着社会从“物的时代”过渡到“人的时代”。新文化发现并尊重人的价值，承认以人中心而不再以物为中心，这是一个长期实现的过程。就中国来说，由于封建主义曾经在长达千年以上的时间内支配着社会的意识形态和人们的生活，而在计划经济体制之下旧文化还以“改装了的形式”存在过，并一度使人们误认为这就是一种崭新的文化，因此，新文化的胜利远比人们想象的要艰难。在中国，在道德重整过程

中，不仅要着重于调整人际关系，调整人与物之间的关系，更重要的是要使人们自身建立一种信念，即只有对人生的价值和意义有新的认识，才能做到“人的解放”，才会产生发自内心的道德激励与道德约束，也才会产生强烈的进取精神、创业精神。

在这里，还有必要考察一下道德标准的问题。这就是：在生活中往往有两个道德标准，一是对内道德标准，二是对外道德标准。关于对内道德标准与对外道德标准的区分，可以参看马克斯·韦伯在《世界经济通史》中的有关论述。他写道：“我们到处都可以看到一种原始的、严密的整体化内部经济，以致在同一部落或氏族的成员之间就根本不存在经济行动自由的问题，但在对外贸易方面有绝对的自由。”¹⁰这表明，在一个群体内部，可能存在着一一种内部的道德标准，对什么事情有自己的一套规定，哪怕在原始的部落中都如此，而在对外交往中，则又有另一种道德标准，即对外道德标准，用不同的标准来规范成员的行为。韦伯接着写道：“相形之下，西方资本主义的第二个特征就是消除内部经济和外部经济、对内道德标准和对外道德标准之间的界限，以及把商业原则连同在这个基础上的劳动组织纳入内部经济。”¹¹这段话对于了解道德重整的长期性是有启发的。

把对内道德标准与对外道德标准之间的界限消除，同一个社会或一个团体的对外开放程度有直接的关系。社会对外开放程度越高，对内道德标准与对外道德标准就越容易合而为一，资本主义社会的发展过程证实了这一点。对一个团体来说，情况同样如此。如果一个团体是严格封闭性的组织，那么不管团体的性质如何，它的对内道德标准与对外道德标准之间的界限总是明显的，适用于对内的道德标准不一定适用于对外，适用于对外的道德标准也不一定适用于对内。只有随着该团体的封闭性的减弱，两种道德标准之间的界限才会逐渐淡化。

中国正在经历从计划经济体制向市场经济体制的转变。在计划经济体制下，基本上采取的是封闭社会的模式。对于社会成员，两种道德标准的区别是清晰的。同一种行为，在对内时被认为是违背道德标准的，在对外交往时可能被看成是可以容许的行为；同一种言论，在对内时被认为可以容许的，在对外交往时可能被认为是违背道德标准的。多年以来，社会成员已经习惯了这些区别，因此不去考虑这里所存在的矛盾或不一致会对社会风尚产生什么样的影响。可以简要地说，社会上对内与对外两种道德标准的存在并被社会成员作为一种习惯而认同，实际上

是一种道德的扭曲：功利主义压倒了对是非的判断，道德规范服从于政治经济的需要。

问题还不止于此。前面已经指出，在不容许说真话的大环境中，社会上大多数人为了自保、自卫而被迫虚伪，即口是心非地说假话，另有少数人则出于个人获取私利的意图而自觉虚伪。如上所述，被迫虚伪可以称为“道德的扭曲”，自觉虚伪可以称为“道德的沦丧”。总之，在人们不能以诚相待，不能表里一致，不能按照内心的道德判断来调节自己的行为的情况下，再加上社会上存在着对内道德标准与对外道德标准的明显界限，于是问题就变得更加复杂。这是因为，两种道德标准的存在已经是一种道德的扭曲了，如果人们仍然被迫虚伪，不得不说假话来保全自己，那就是道德扭曲的加剧；如果一些人仍然自觉虚伪，企图借此获取私利，那就是在道德扭曲基础上的道德沦丧。于是两种道德标准很可能变成多种道德标准或多种道德的表现形式，真真假假，真假难辨，真就是假，假中又有假，这正是我们在转入改革开放之初不得不面对的现实。只有承认这一现实，才能对经历了“反右”、“反右倾”、“文化大革命”以后中国的社会心态有比较深入的了解，也才能懂得道德重整工作的艰巨性和长期性。

二、道德重整：空想与现实

马克斯·韦伯曾以新英格兰清教徒的创业过程为例，说明新教伦理在促进资本主义产生与发展中的重要作用，并由此论证道德规范的确立的意义。关于韦伯这一理论的启示，前面已经作了阐释。但在这里需要补充一点，即清教徒的“天职”观念和他们的伦理带有空想的成分，尽管这种空想的成分并不妨碍新教伦理在经济发展中的积极作用的发挥。正如丹尼尔·布尔斯廷（Daniel J. Boorstin）在《美国人：开拓历程》一书中所说：北美“新英格兰清教徒的思想基础实在比任何人都接近乌托邦思想。他们的《圣经》中有‘美好社会’的蓝图；他们历尽艰辛来到北美洲，必然相信在人间这块地方能够建设‘天国’”。¹²虽然由于新英格兰当时还是英国的殖民地，移民在这块殖民地上必须接受英国的法律，以保障实际的利益，从而空想的色彩在现实面前有所减弱，但这并不否定他们漂洋过海来到北美时，是带着在人间建设“天国”的空想前来的。

应当指出，清教徒希望通过移民和创业在北美建设“天国”的设想固

然带有空想的成分，但道德的激励与道德的约束始终是现实的。今天，在中国“第二次创业”的过程中，提出道德重整的任务，显然不能同当年向北美移民开拓时的情况相提并论，因为性质不同，条件不同，任务或目标也不同。在我们这里，如果实现了道德的重整，不仅道德激励与道德约束是现实的，而且建设的目标也是可以达到的。简言之，在我们这里，提出要重整道德和提高国民素质，并不是一种空想，建设的目标也不是去创造某种理想的“天堂”，现代化的社会不是乌托邦式的社会。国民素质的提高和道德的重整，都应当从现实生活中开始，目标是现实的，步骤也是现实的。对于形形色色的“标准的旧文化”和“改装的旧文化”的厌恶，不应仅仅出自感情上的痛恨或纯理论的认识。从现实生活中开始，从每个人的周围开始，通过个人行为的规范，养成良好的社会风尚。这样，道德重整方面所取得的成绩，就不再是偶然的、个别的，良好的社会风尚也不再是空泛的、抽象的。

不使道德重整带有空想的成分，还有一个重要的意义，即不要脱离实际地去设计某种“理想社会”，因为历史上所有关于“理想社会”的设计都是纸面上的东西，或者是思想家头脑里的东西，难以付诸实施，而小范围内的实验也至多维持一两代人，最终不得不以失败告终。理论上的构想经不起实践的检验。更值得注意的是，假定某个政治家想在大范围内把“理想社会”的设计变成政策，强行推行，其结果不仅不可能把人们带入“天堂”，而必然会给社会带来一场灾难。

哈耶克（F. A. Hayek）曾对此进行过分析。哈耶克认为，人类历史上曾经出现过一些有理想的政治家，他们提出过各种关于实现“理想社会”的纲领或主张，他们的一生曾为此作过不小的努力，然而从实行的后果来衡量，这些理想主义者给人们带来的往往不是幸福，而是灾难。他们自认为理想是崇高的，因此无所顾忌，不计后果，甚至不择手段，因为这无愧于心。他们越是忠实于自己的理想与目标，他们就越是竭力推行自己的主张，越是干预与破坏在社会经济生活中起着支配作用的无形的力量、自发的力量，而这种无形的力量、自发的力量受限制和受破坏的程度越大，给社会造成的恶果也就越大。¹³

哈耶克在这里所谈到的在社会经济生活中起支配作用的无形力量、自发力量，究竟是什么呢？通常被认为是对市场机制而言。市场调节是一只“无形之手”，在存在着交易活动的场合时时处处自发地起作用。这是哈耶克的原意。但这种理解似乎比较狭窄。在社会经济生活中起着支

配作用的无形力量、自发力量，除了市场机制以外，还有习惯与道德力量。在市场调节出现之前固然如此，在市场调节出现之后也如此，特别是在非交易领域内，情况更加明显。那些有理想的政治家为了实现某种“理想社会”的模式而推行的改革措施，不仅破坏了市场机制这种无形力量、自发力量，而且也破坏了习惯与道德调节这种无形力量、自发力量，也就是破坏了习惯与道德力量所形成的文化传统。他们只相信个人的力量和政府的力量，也只依靠政府的力量，于是就硬性推行自己所信奉的那一套纲领，结果就导致社会秩序的混乱，甚至发生人民饿死、冻死、离乡背井、到处流浪的惨剧。这种例子在古今中外都是屡见不鲜的。

那么，为什么会发生这种情形呢？在哈耶克看来，这些政治家有一个共同的理论上的错误，就是把个人的意志看得高于一切，似乎自己就是救世主，就是人间的上帝，自己的所作所为就是“替天行道”。按照自己的意图来改变世界，被看成是天经地义。此外，他们还犯有把政府调节当做无所不能的错误，似乎政府的措施是医治“社会百病”（实际上其中有些不一定是“病症”）的法宝。在这些政治家的心目中，只要按自己的意图去做，政策措施严厉些，再严厉些，似乎就能给社会带来更好的生活，把平民百姓引入“天堂”。但是，尽管他们给了社会以“更好的生活”的承诺，却不了解他们不仅首先使社会为此付出极其高昂的代价，而且事后往往全部落空，并给社会留下了一大堆后遗症。这是因为，市场机制的被摒弃，特别是习惯与道德调节的被摒弃，给社会带来的是“更坏的生活”，是一场灾难。前面已经谈到社会经济生活在通常情况下包括交易领域和非交易领域两大部分，市场机制被摒弃后，实际上交易领域就不再存在了，交易领域已被人为地扭曲，从而变形为非交易领域了；习惯与道德调节被摒弃后，实际上非交易领域内的各种关系也被人为地扭曲了，甚至变形为虚伪的关系、矫揉造作的关系。这不是灾难又是什么？

正因为“理想的社会”中往往带有空想的成分，而通过某些有理想的政治家的硬性贯彻会给社会带来一场意想不到的灾难，所以当我们提出道德重整和培育、树立良好的社会风尚时，立足点应当放在现实的分析上，宁可把问题看得艰巨些、复杂些，而不应简单化；宁可有一种长期的、渐进的设计，而不应操之过急；宁可把工作的重点放在用法律规范人们的行为，用教育来启迪人们，使更多的人能发自内心地认识到遵守

社会道德的必要性，而不应试图通过行政措施来达到统一人们思想和规范人们行为的目的。尤其重要的是，我们应当朝着既使得人们在物质上能不断提高生活水平，又使得人们在精神上能不断得到满足和享受的方向前进，但不能规定未来的社会应当如何如何等具体的细节，这才是正确的思路。我在《社会主义政治经济学》一书中曾写下这样两段话，我把它们转引如下，我想这是很有意义的。

“一代人有一代人的历史使命。作为经济理论工作者，我们这一代要着重研究的，应是发展阶段的社会主义经济问题。”¹⁴

“如果我们不自量力，硬要以后若干代的人们操心，去设计未来的社会经济发展和演变的细节，那只能使自己成为后人的笑柄。”¹⁵

7.4 Rule of Law, Democracy and Moral Renewal

7.4.1 Rule of Law and its Opposite

In discussing moral renewal in the real world, the argument between rule of law and rule of man immediately confronts us. Let us begin by asking what the essential nature of this argument is.

What is the opposite of rule of law: rule of man or rule of morality? Both positions have their proponents and both have arguments to justify their stance.

The argument of those who take the opposite to rule of law as being rule of man goes as follows: Under rule of law, everything goes by law, law is above everything, people are equal before law, law should be strictly followed, and violations of it must be punished. Under the rule of man, man's words are more powerful than law, and man is superior to law. Therefore, what we need is rule of law and not rule of man, which is its antithesis.

Those who think that the opposite of rule of law is rule of morality argue thus: Rule of law proceeds from the thesis that "man's nature is evil" whereas the basis of rule of morality is that "man's

nature is good." Rule of law emphasizes deterrence and punishment, without which society cannot be peaceful and orderly. Therefore, under rule of law, law should be strictly followed, and violations of law must be punished. Rule of morality emphasizes moral influence and education. It values giving methodical and patient guidance and being tireless in teaching others so as to bring about social peace and order. Moreover, it can help every member of society become a person of high moral character. Hence, rule of law and rule of morality are opposites.

How, then, are we to view the arguments on rule of law, rule of man and rule of morality? Both positions have some sense to them, but careful scrutiny will reveal that both are partial and fail to make clear what the opposite of rule of law is.

To put it simply, the opposite of rule of law is actually non-rule-of-law. If rule of law requires strict observance of law, punishment of violations, and equality of all before, then non-rule-of-law means law need not be observed, violations can remain unpunished, and there is no equality before law. If there is something that tramples on law, then it is nothing else but non-rule-of-law.

Let us turn now to rule of man. Those who take rule of man as the opposite of rule of law actually treat rule of man as non-rule-of-law. The feature of non-rule-of-law is arbitrary rule, a feature it shares with rule of man. In this sense, it is not at all inappropriate to take rule of man as the opposite of rule of law. However, there can be another interpretation of rule of man, namely: Law is determined by and executed by man. If rule of man is not regarded as arbitrary rule or as trampling on law but as man determining and executing law and carrying out rule of law, then it is consistent with rule of law, not opposite to it. Those who disagree that rule of man is the opposite of rule of law interpret rule of man from this perspective precisely. They do not advocate arbitrary rule or replacing law by man's will; what they do emphasize is that rule of law cannot be implemented without man and that man's caliber is very significant to rule of law. Since

there are two different understandings of rule of man, the argument over rule of law and rule of man will be interminable. If we define rule of man as non-rule-of-law, i.e., that rule of man is arbitrary rule and tramples on law, then there can be no more argument.

Now let's discuss the understanding of rule of morality. The question of whether man's nature is evil or good has never been settled, and we can leave it aside here. It is partial to see rule of morality as the opposite of rule of law, because advocates of rule of law have never denied the role of moral education and neither have they denied the significance of legal restriction and punishment.

The argument over rule of law and rule of morality boils down to an argument over which of the two is "fundamental." The idea that "rule of law is fundamental" does not deny the role of moral education, so "rule of law is fundamental" actually means "rule of law is major and rule of morality is supplementary." "Rule of morality is fundamental" means "rule of morality is major and rule of law is supplementary." Since the argument boils down to which one is major and which supplementary, then the two cannot be called opposites.

In light of this, it is more realistic and convincing to take non-rule-of-law as the opposite of rule of law.

The long period of feudal rule in Chinese history was less rule of man than non-rule-of-law. The term non-rule-of-law can best reflect the nature of feudal rule. The imperial power was supreme, absolute and not to be profaned—a classic example of non-rule-of-law. If we insist that it was rule of man, this is the only way to interpret it: The so-called "rule of man" was no more than a cover for "rule of emperor" or "rule of monarch." In other words, only law that can restrict imperial power or the behavior of emperors themselves counts as law consistent with rule of law. More importantly, true rule of law that is worthy of the name means that law for restricting the highest authorities and the makers of law can be really carried out.

There is a specious argument to the effect that what Shang Yang, the famous reformer of ancient China, espoused was rule of law to

replace rule of man, and that what the first emperor, Qinshihuang, implemented was also rule of law. Such argument is clearly wrong. In the state of Qin and the later Qin Dynasty and in an age when imperial power was paramount, how could they change the general situation of "rule of emperor" or "rule of monarch"? And was not "rule of emperor" or "rule of monarch" essentially rule of man? Considering Shang Yang's words and actions, without "rule of monarch" what could he achieve at that time? The so-called "rule of law under imperial power" or "rule of law under the rule of monarch" is far from same as true rule of law. In my opinion, this is proven by the history of the state of Qin and later the Qin Dynasty and there is no point in wasting more words on it.

In feudal society, since rule of man means "rule of emperor" or "rule of monarch," then there was inevitably "rule of officials under imperial power." The officials ruled for the monarch, and if there was law to cite, the officials executed it on monarch's behalf. However, although law was made and executed by officials, since it was all done under the "rule of emperor," it was not something you could call "rule of law."

All in all, the concept of rule of man is itself somewhat hazy. The point that imperial power is supreme and greater than law puts it in the category of non-rule-of law rather than rule of man (unless rule of man is seen as synonymous with non-rule-of-law). After 1949, what existed in China, dominated by "old culture in new clothes," was not rule of man but non-rule-of-law. There can be no more accurate term than non-rule-of-law to describe the various arbitrary and law-trampling phenomena, such as the "anti-rightist," "anti-right deviation" movements and the Cultural Revolution. This being the case, why not just propose that "China should go from non-rule-of-law to rule of law" or "China must replace non-rule-of-law with rule of law"? Is this not more easily acceptable to the public than "going from rule of man to rule of law" or "replacing rule of man with rule of law"? Would that not cause less controversy or indeed none at all?

7.4.2 Not Every Legal Act Equates to Rule of Law

It is necessary to go deeper into rule of law.

In real life, the authority of law should be established and everything should be subordinated to law. But does any act done according to law equate to rule of law? Although we have discussed this question previously, we need to return to it. For example, in the 1930s, Hitler's coming to power was completely in line with the German constitution and once in charge he won unlimited powers, all of them legal. In the name of law he could and did have arrested, tried and convicted anyone opposed to him, anyone not supporting Nazi rule, or anyone he simply disliked. In terms of law itself, at least in the mid-and late-1930s, Hitler's behavior was still legal because he did it according to law. But does this allow the verdict that Germany practiced rule of law after Hitler took power? Clearly, we cannot draw the equals sign between legal and rule of law, or between acting according to law and rule of law.

Wearing the hat of legality, some people can exploit existing law as a tool for autocracy or strongman politics. If there is no such law in reality, then it can be immediately made, passed and put into effect. Therefore, when there is legal basis to cite, autocracy or strongman politics can most definitely be dressed up in a cloak of legality. As to constitutional or legal articles unhelpful to autocracy or strongman politics, these can be amended through so-called legal procedures, thereby removing any contradiction to the principle of acting according to law. This shows autocratic rule may present itself as legal rule and strongman politics as law-based politics, both consistent with the principle of acting according to law. Instances of this are not rare at any time in history or in any country.

It becomes necessary, therefore, to elaborate on the true meaning of "rule of law" in a scientific way. An essential point is that law should be the product of democracy and also its guarantee. We should start by analyzing the essence of law. Only law as a product and

guarantee of democracy can be used as the basis of rule of law. In situations when democracy is stripped away, even though law exists, there can be no rule of law worthy of the name. Therefore, in discussing what rule of law is, we must note: Laws themselves must be consistent with the democratic spirit and be made under the condition of democracy and their execution must have democratic supervision. Otherwise, although law does exist and affairs are handled according to law, it does not necessarily constitute rule of law.

Some might contend that since democracy is in a continual process of development and perfection and law is always made and executed in this process, it follows that there can never be such a thing as totally perfect law. As the situation changes and democracy improves, law will be amended, enriched and added to. And surely will this not influence the rule of law? As we know, even if democracy is an ongoing, developing and imperfect process, in a certain period and under certain conditions, law still can be the product and guarantee of democracy, which is a thing entirely different from destroying democracy and providing a cloak of legality for autocracy and strongman politics. The amending, enriching and supplementing of law can be conducted on the basis of democracy, which is something totally different from the autocratic behavior of forcible revision of law heedless of democracy.

Opinions such as "anything goes provided there's no law against it" are simply mocking rule of law and whitewashing autocracy and strongman politics in legal form. In China this is very likely the residual influence of feudalism in the political area. At the end of the 1980s, there was a wave of "new authoritarianism," which amounts to no more than a pirated version of "open absolutism." It took the cover of legality, and brandished the banner of rule of law but what it actually pushed forward was an improved version of autocracy, namely "new authoritarianism." Its appearance and the fact that it was actually commended by some at that time make us more alert to the need for democratic and legal construction and the relation between

democracy and rule of law.

Democracy is a manifestation of the existence of order. It will never mean disorder. Rule of law is inseparable from democracy and without democracy there will be no rule of law. Under rule of law, no behavior of autocratic rule or so-called "open absolutism" that waves the banner of legality is allowed to exist. When "new authoritarianism" first appeared at the end of the 1980s, one pretext advanced by its proponents was that the current administrative organs were not efficient and the neo-authoritarian approach would improve efficiency. The excuse did not have a leg to stand on. One might ask how low efficiency in administration came about. It was the inevitable outcome of lack of democracy, lack of rule of law and lack of restriction and oversight mechanism on government stretching back for years. With no check-and-balance power on administrative organs, no inner self-restriction mechanism, and with government servants lacking self-discipline, the result is bound to be low or even negative efficiency. Therefore, in trying to improve administrative efficiency, we can never resort to methods destructive to democracy and rule of law, which is to say, the methods espoused by "new authoritarianism." Resort to such methods might seem to improve efficiency at the speed of lightning, but democracy, the basis of rule of law, will be destroyed. The seemingly high efficiency will be short-lived. Furthermore, the arbitrary, non-democratic and unscientific decision-making process will result in more serious loss of efficiency. For China at the present stage, democracy and rule of law are works in progress, gradually advancing, not halting, still less retreating. But what "new absolutism" advocated was "going into reverse," a movement against the tide of the age. It claimed to accelerate modernization, but if we were to follow it, modernization would remain beyond our reach. With democracy destroyed, rule of law could not be achieved and we would be farther, not closer, from the goal of modernization.

7.4.3 Moral Renewal and the Building of Democracy

The formulation and execution of law cannot be separated from the role of people. If legislators lack democratic thinking and law-executors lack democratic style, it will be hard to achieve rule of law, so we cannot underestimate the role of people. Moreover, the public also need democratic thinking so they can understand the need to safeguard the dignity of law and the importance of observing it, and so they can supervise those who execute law. A precondition for realizing rule of law is public oversight. The extent of the role of the public in building democracy will be determined by how strong their awareness of rule of law and democracy is. The traditional idea of local officials being "parent officials" is a display of "standard old culture," and a mainstay of that culture's persistence.

Given the millennia-long dominance of feudal thinking, and the tenacity of old culture, it is unsurprising that cultivating democratic consciousness among the public is an uphill task in China. Another factor militating against realization of rule of law is the long-nurtured mentality of dependence on officials. The long-standing mindset reflects the long-enduring minor status of the public. For example, when an ordinary citizen is wronged by some administrative agency, he always hopes there will be an "impartial official" to uphold justice on his behalf, rehabilitate his reputation and punish the corrupt officials or those abusing law for personal benefit. Of course, one has to acknowledge that, in the absence of democracy, ordinary citizens had no choice and they cannot be blamed for having such a mindset. What should be held responsible is the system that made the public so insignificant.

Building democracy is a question of systems. To build a democratic system there needs to be effective reform of the political system, making the public real masters able to exercise their rights rather than being masters in name only. This goal cannot be realized

overnight, but it is something we must strive hard toward. In this process, the public's democratic consciousness will gradually strengthen and their dependency on officials will eventually be overcome or eliminated. This brings us to an important task in moral renewal: Moral renewal should include the building of democratic thought. More specifically, all should know how to exercise their rights, how to elect suitable persons as representatives of the people and be leaders of government agencies, how to remove incompetent representatives and leaders from office, and how to view and comment on politics, government measures, and the capability and achievements of government officials. Moral renewal can be complete and adequate only if such things come into its scope. How individuals nurture creativity and enterprise, how to build group consciousness, how to be self-disciplined, how to safeguard social, commercial and professional ethics, and how to stand up for right, etc., are all necessary, but if the scope of moral renewal went no further than this, it would not be helpful for building democracy, for promoting rule of law on the basis of democracy, let alone for turning a society or a whole country into one where rule of law holds sway.

As discussed above, the opposite of rule of law is non-rule-of-law, the features of which are monarchs and officials being higher than law, their behaviors contemptuous of law and the trampling of law. If moral renewal does not encompass the building of democratic thought or awareness of exercising one's rights, non-rule-of-law will not exit the stage of history of its own volition. Even in a society of non-rule-of-law, people might also have enterprise and creativity (albeit often frustrated), have self-discipline, know the importance of social ethics, stand up for right and enjoy helping others, but these cannot help realize rule of law. This tells us that an all-round understanding of moral renewal is necessary, one that does not exclude the building of democratic thought. When people have enterprise, creativity and dedication to the public weal, as well as democratic consciousness, courage to participate in and review government affairs and courage

to exercise their right of supervision over government officials, the task of moral renewal shall be completed. All in all, in the environment of rule of law, law is not only the means for guaranteeing people's rights, but also the basis for restricting the power of the authorities.

肆 法治、民主与道德重整

一、法治的对立面是非法治

在讨论现实条件下的道德重整问题时，法治与人治之争自然而然地会展现在我们面前。关于这场争论，我们不妨先研究一下：争论的实质究竟是什么？

法治的对立面是人治还是德治？有些人认为，法治是同人治相对立的，但也有些人说，法治的对立面应当是德治。各有各的论据，并且也都有一定的道理。

把人治作为法治的对立面的理由主要是：在法治之下，一切依法而行，法高于一切，法律面前人人平等，有法必依，违法必究；而在人治之下，人言大于法，人的行为可以凌驾于法律之上，于是法律便遭到了践踏。因此，要法治而不要人治，法治的对立面正是人治。

把德治作为法治的对立面的理由主要是：法治的出发点是“人性恶”，德治的出发点是“人性善”；由于法治从“性恶”出发，所以强调的是告诫，是处罚，非如此不足使社会安定、有序，所以要贯彻有法可依，有法必依，执法必严，违法必究的原则；由于德治从“性善”出发，所以强调的是道德感染与教化，是循循善诱，诲人不倦，从而不仅可以使社会安定、有序，而且可以使每个社会成员都成为道德高尚的人。因此，法治与德治是对立的。

怎样看待以上有关法治与人治以及法治与德治之争呢？正如我在本节一开始就说过的，主张法治与人治相对立和主张法治与德治相对立的人，都有一定的道理。然而，只要仔细地考察一下，那么不难发现，这两种主张都有片面性。它们全都没有说清楚法治的对立面应该是什么。

扼要地说，法治是与非法治对立的，非法治才是法律的对立面。如

果说法治所要求的是一切依法而行，有法必依，违法必究，法律面前人人平等，那么非法治所表明的是并非依法而行，有法可以不依，违法可以不究，法律面前也不是人人平等的。如果说是法律的践踏，那么这恰恰是非法治，而不是其他。

下面，让我们转入对人治的理解。在上面提到的把人治作为法治的对立面的解释中，是把人治当做非法治来看待的。非法治的特征是治理的任意性，这也正是人治的特征。从这个意义上说，把法治与人治相对立，并无任何不妥之处。然而，对人治还可以有另一种理解，即法是由人制定的，并且由人来执行的。假定不是把人治理解为治理的随意性或理解为对法律的践踏，而是指要依靠人来制定法律和执行政律，靠人来贯彻法治，那么法治与这种人治就是统一的，而不是对立的。某些不同意把法治与人治相对立的人正是从这个角度来理解人治的，他们也不赞成治理的任意性，不主张以个人的意志来代替法，他们所强调的只是法治离不开人和人的素质对于法治的重要意义。既然对人治可能有前一种理解，又可能有后一种理解，所以人治与法治之争总是没完没了。如果明确地把人治定义为非法治，即人治是指治理的任意性和对法律的践踏，那就不会有争议了。

再看看关于德治的理解。“人性善”还是“人性恶”，这是一个长期未能解决的问题，在这里可以略去不谈。把法治与德治相对立，看来是不全面的。这是因为，主张法治的人并不否定道德教化的作用；主张德治的人也并不否定法律约束与制裁的意义。法治与德治之争可以归结为“以法治为本”还是“以德治为本”之争。“以法治为本”并不排斥道德教化的作用，所以“以法治为本”实际上是“法治为主，德治为辅”，而“以德治为本”实际上是“德治为主，法治为辅”。既然法治与德治之争最终归结为孰主孰辅之争，那就谈不上法治以德治为对立面或德治以法治为对立面了。

由此看来，还是把法治的对立面看成是非法治，更符合实际，也更有说服力。

中国历史上长期的封建统治，与其说是人治，不如说是非法治。用非法治来反映封建统治的本质，是最准确不过的。皇权至高无上，皇权是绝对的、不容亵渎的，这是典型的非法治。如果一定要把这说成人治，那么只能这样理解：所谓人治无非是“皇治”、“君治”的遮羞布。换言之，只有能够限制皇权或皇帝本人行为的法律，才是符合法治原则的

法律。更重要的是，只有能够限制最高统治者权力和能够制约法律制定者行为的法律真正得以实施，这才是名副其实的法治。

有一种似是而非的论点是：商鞅推行的是法治，以代替人治；秦始皇实施的是法治，以法治国。这种论点显然是不妥当的。在皇权高于一切的秦国、秦朝，怎么可能摆脱“皇治”、“君治”的大格局？而“皇治”、“君治”实质上不仍然是人治吗？即以商鞅的所言所行来看，离开“君治”，他能有什么作为？所谓“皇权之下的法治”、“君治之下的法治”，同真正的法治相差很远很远，我想这已被秦国、秦朝的历史所证实，用不着再赘言了。

在封建时代，人治既然是“皇治”、“君治”，那么，就必然会有“皇权之下的官治”。官是代表君主来统治的。如果有法律可援引，那么官是代表君主来执法的。这时，尽管已制定了法，并由官来执行，但都处于“皇治”之下，从而也就谈不上什么法治。

总之，人治的概念本身是不清楚的。皇权至上，权大于法，这些只能被说成是非法治，很难用人治来表述（除非把人治看做非法治的同义词）。1949年以后在“改装的旧文化”的支配之下，存在于中国社会上的，与其说是人治，还不如说是非法治。用非法治来反映“反右”、“反右倾”、“文化大革命”以及各种治理的任意性和对法律践踏的现象，同样是最准确不过的。既然如此，何不直接地用“中国应由非法治走向法治”、“中国必须让法治取代非法治”之类的提法呢？这岂不比使用“由人治走向法治”或“让法治取代人治”之类的提法更容易被公众所接受吗？岂不会较少地引起争议，甚至不会引起争议吗？

二、并非任何一种依法办事都等于法治

关于法治问题，有必要再作进一步的探讨。

在现实生活中应当建立法律的权威，唯法是从。但是不是任何依法办事都等于法治呢？这就需要认真思考了。关于这个问题，前面已经讨论过，现在不妨再简述一下。比如说，在20世纪30年代，希特勒上台执政是完全合乎德国宪法的，他上台后又根据法律获得了无限的权力。他对一切反对他的人、对纳粹统治有不同意见的人，以及他看不顺眼的人，都根据法律加以逮捕、审判、定罪。从法律本身而言，至少在20世纪30年代中期和后期，希特勒的所作所为仍属于合法的行为，因为他并

没有不依法办事。但能够由此判断希特勒执政后的德国实行了法治吗？可见，合法与法治之间不能画等号，依法办事也不一定等于法治。

在合法的幌子下，有些人完全可以利用现有的法律作为推行专制统治或强人政治的手段。如果现实中还缺少这样的法律，那么并不排除可以立即制定它，通过它，让它早日生效。因此，实行专制统治或强人政治完全可以在有法律根据的情况下披上一种合法的外衣。至于原有的宪法或法律中有些不利于推行专制统治或强人政治的条件，那也可以按照法定的程序进行修改，这同样与依法办事是不矛盾的。这表明专制统治可以表现为合法的专制统治，强人政治可以表现为有法可依、依法办事的强人政治。中外历史上这样的事例并不罕见。

为此，就需要科学地阐明“法治”二字的真正含义。法应当是民主的产物，又是民主的保障，这是问题的关键。对于法治的含义，应当从法律的实质来着手分析，只有作为民主的产物并且又能保障民主的实施的，法律，才能作为法治的依据。在剥夺了民主的场合，可以有法律，但不可能有名副其实的法治。因此，在讨论究竟什么是法治时，必须强调的是：法律本身必须符合民主的精神，而且是在民主的条件下制定的，法律的执行必须受到民主的监督，否则，即使有法可依和依法办事，也不一定就是法治。

也许有人会提出，民主是一个不断发展与日益完善的过程，法律总是在民主走向完善的过程中被制定和被执行的，任何时候都不可能有尽善尽美的法律。法律在经历一段时间之后，随着客观形势的变化，随着民主的不断发展与日益完善，将被修改、充实和补充。这样，法治不就受到影响了吗？这种疑问是可以解释清楚的。要知道，即使民主有一个发展与完善的过程，但这并不妨碍在一定的时期和一定的条件下，法律仍然可以是民主的产物并成为民主的保障，这同破坏民主来为专制统治和强人政治制造合法外衣根本不是一回事。法律的修改、充实、补充也完全可以在民主的基础上进行，这同置民主于不顾的强行修改法律的专制行为根本不是一回事。

那种认为“只要合法就什么都可以干”的主张，无非是对法治的嘲弄和对合法形式下的专制统治、强人政治的粉饰。在中国，这很可能是政治领域内封建主义影响的表现。20世纪80年代末在中国曾经热闹过一阵子的“新权威主义”，戳穿了无非是所谓“开明专制主义”的翻版。“新权威主义”未尝不可以接过合法的外衣，打着法治的旗号，而推行的却是改良

的专制统治，即“开明专制”。“新权威主义”的出现及其在当时居然还得到了一些人的赞赏，使我们更加懂得了民主与法制建设的必要性，以及民主与法治两者之间的关系。

民主是有序的表现，民主绝不等于无序。法治同民主是不可分割的。没有民主，就没有法治。所以法治条件下，绝不容许也绝不可能存在任何打着合法旗号的专制统治或所谓“开明专制”的行为。20世纪80年代末，当“新权威主义”刚出现时，鼓吹“新权威主义”的人的借口之一是目前的行政机构缺乏效率，推行“新权威主义”据说正是为了提高行政效率。这个理由是站不住脚的。试问，现实生活中的行政缺乏效率是怎样产生的？这正是多年以来缺乏民主、缺乏法治、缺乏对政府的约束与监督机制的必然结果。多年以来，对行政部门缺乏制衡力量，而行政部门自己又没有约束机制，行政部门的工作人员也缺乏自律，于是低效率就难以避免，甚至还可能产生负效率。因此，要消除行政低效率或负效率，决不能依靠破坏民主、破坏法治的办法，即“新权威主义”所主张的那些办法。如果那样，一段时间内表面上似乎雷厉风行，办事效率可能提高，但由于法治的基础——民主——被破坏了，表面上的高效率不但不可能持久，而且更可能的是由于独断独行，决策不民主、不科学，从而造成更大的负效率。对中国现阶段来说，民主是渐进的过程，法治也是渐进的，渐进毕竟是“进”，既不是“停”，更不是“退”。“新权威主义”的主张却是倒退，是逆时代潮流而动的。“新权威主义”声称要加速现代化的来临。其实，按照“新权威主义”的主张去做，现代化目标根本无法实现，因为民主被破坏了，法治实现不了，同现代化目标的距离只能越来越远而不可能缩小。

三、道德重整与民主建设

前面已经谈到，法律的制定和执行都离不开人的作用。制定法律的人如果缺乏民主思想，执行法律的人如果缺乏民主作风，那么法治就很难实现，因此人的作用是不可低估的。不仅如此，公众同样需要有民主思想，只有这样，他们才知道维护法律尊严的必要，才知道守法的必要，也只有这样，他们才能对执政者进行监督。监督来自公众，这是实现法治的必要条件。公众在民主建设中的作用的的大小，取决于公众自身的法治观念与民主意识的强弱。那种把地方政府官员称做“父母官”的传

统思想，是“标准的旧文化”的表现，也是“标准的旧文化”得以延续的支柱。

法治之所以不易实现，除了公众的民主意识不易确立而外（这是可以理解的，因为在中国这块土地上，封建思想毕竟统治了这么多年，旧文化不易清除），还同公众长期养成的一种对官员的依赖思想有关。公众对官员的依赖思想由来已久，这正是长期以来公众被置于无足轻重的地位的反映。比如说，一个普通老百姓在受到行政部门的不公平对待时，总希望有一位“青天”出来主持正义，为自己平反并惩办贪官污吏或徇私枉法者。应该承认，在缺乏民主的条件下，普通老百姓也只好如此，这不能责怪他们有这样或那样的依赖思想，而只能责怪那种把公众置于无足轻重的地位的制度。

民主建设是一个制度问题。要建立民主制度，需要进行有效的政治体制改革，让人民不再是名义上的主人，而要成为真正行使自己权利的主人。尽管这不是迅速就能实现的，但我们必须朝这个方向努力去做。在这个过程中，人民自身的民主意识应逐渐增强，对官员的依赖思想也将被克服、被消除。于是就涉及道德重整方面的一项重要内容，这就是：道德重整应包括民主思想的建立，包括人人懂得如何行使自己的权利，选举能为人民服务的人担任人民代表和政府部门的负责人，罢免一切不称职的人民代表和政府部门的负责人；还包括懂得如何评论政治，评论政府的措施，评论政府官员的能力和政绩。把这些内容列入道德重整的范围内，道德重整才是全面的、充分的；否则，假定道德重整只包含个人如何培育进取精神和创业精神，如何树立群体观念，如何自律，如何维护社会公德、商业道德、职业道德，以及如何见义勇为、助人为乐等等，尽管这是必要的，但却无助于民主建设的进展，无助于在民主的基础上推进法治，并使得法治社会、法治国家的设计得以实现。

前面已经指出，法治的对立面是非法治，非法治的特征是君大于法、官大于法，个人的行为可以凌驾于法治之上，法律遭到践踏。如果道德重整中不包含民主思想的建立，不包含公民行使自己权利的观念的确立，那么非法治的格局是不会自动退出历史舞台的。而在非法治的条件下，人们也可以有进取精神和创业精神（尽管它们会受到挫折），有自律，有注重社会公德的表现，并且也会有见义勇为、助人为乐的行为等等，但法治却不可能因此而实现。这就告诉我们，对道德重整必须有全面的理解，不能把民主思想的建立排除在外。只有既使人们树立进取

精神、创业精神、为公益事业做奉献的精神，又使人们建立民主意识，勇于议政参政，敢于行使自己对政府官员进行监督的权利，才可以称做实现了道德重整的任务。总之，在法治环境中，法律不仅是保障权利的手段，而且是限制权力的依据。

7.5 Rebuilding Social Trust

7.5.1. The Need to Rebuild Social Trust: From the Perspective of Enterprise Survival and Development

In a market economy, enterprises of all types of ownership (private, state-owned or whatever form) are the blood cells of the economy and should be based on integrity: No enterprise can survive or develop without the trust of its investors, clients and other enterprises in the same trade.

In the traded sector, every enterprise has the status of a trader. The enterprise-to-enterprise relation is one of trader-to-trader, as is that between enterprise and clients. Even the enterprise-to-investor relation can be seen as trader-to-trader. When the credibility of an enterprise is gone or weakened, this relationship may loosen to breaking point. A classic example could be found in a long existing partnership business. In this organizational form, partners shoulder unlimited and joint liability, so there must be complete trust between them. Otherwise, who would be willing to shoulder the other partners' liabilities? Without this trust, partnership enterprises would hardly survive. For the widely existing limited liability companies or corporations, credibility is also very important. Whether the shareholders trust the corporation depends on whether the board exercises its right to examine the corporation's operation performance and profit allocation plan and all its important actions such as capital growth, issuing of shares, mergers, staff movement and dismissal,

liquidation, etc. Top executives of limited liability companies or corporations must earn the trust of shareholders in order to stay in post, and companies must earn the trust of investors in order to enjoy sound growth.

In day-to-day business, a credibility crisis might arise for many different reasons: The producing or selling of shoddy or fake products will make clients lose confidence in the enterprise; late payment for goods or services or tardy repayment of bank loans will damage its credibility; unilaterally scrapping a contract to the detriment of the other party will result in collaborators and clients losing trust in the enterprise. Such practices as false accounting, misleading advertising, or release of inaccurate information will cause an enterprise's credibility to fall and to stir up opposition from other businesses in the same line. An enterprise with a bad reputation will lose potential for growth.

According to modern economics, for an enterprise to survive and grow, it needs material, human and social capital. Material capital includes factory buildings, machinery equipment, raw materials, spares and accessories, energy supply, etc. Human capital is embodied in the skills, knowledge, wisdom, experience and perseverance of the workers and management. Social capital refers to social relations, interpersonal communications, brands, and reputation that are conducive to the survival and growth of an enterprise. Social relations and interpersonal communication are built on a foundation of mutual trust. If an enterprise has a good reputation and trustworthy people at the top, other enterprises will be willing to trade or work with it. Without social capital, an enterprise will find it hard to grow, even if its material capital is plentiful and of good quality. Such an enterprise will be isolated in the commercial world; business opportunities and new markets will come hard.

Some enterprises or their top executives are actually aware that their lack of credibility will lead to the enterprise getting into dire trouble and damage to their personal reputation, so why do they

persist in producing shoddy or even fake products, delay payments owed, make empty advertising claims and cheat customers? One reason is the temptation of personal gain and the other is the "trusting to luck mentality." The former is the basic reason whereas the latter encourages risk-taking in the belief that things will remain undiscovered and the pay-off is worth the gamble. This mindset is dangerous and can lead into serious error.

In fact, every enterprise and every enterprise leader faces a legal bottom line and a moral bottom line, neither of which can be overstepped. Overstepping a legal bottom line is not allowed by the law and doing so makes the enterprise and its leaders legally liable for the consequences. Similarly, the moral bottom line cannot be ignored. On some occasions they may overstep both, but on others perhaps they engage in "edge ball," only overstepping the moral line whilst staying within the law. This is not right either. An enterprise and its leaders must be aware that they must violate neither the legal bottom line nor the moral one. Things that legal provisions do not allow are definitely forbidden, and crossing the moral bottom line should similarly be forbidden. They should remember that observing these co-existing restraints is the only way to maintain credibility and win public trust. In the Ming and Qing dynasties, one of the most important reasons for the enduring prosperity of merchants from Anhui and Shanxi was their ability to discipline themselves with Confucian teachings, thus remaining trustworthy and honest in business.

Such transgressions as outlined above are not the monopoly of private enterprises or their leaders: State-owned enterprises and their leaders have been known to take such risks. The temptation of personal benefit refers not only to monetary gain, also to promotion and increased salary and other rewards. Promotion is especially attractive for leaders of state-owned enterprises. Lured by such prospects, they may manage to increase the output value and profit of the enterprises even at the cost of their credibility. In other words,

some state-owned enterprises will also risk breaking legal and moral restrictions and doing things that are injurious to their reputation.

One reason for this "taking a chance and trusting to luck" is the belief that their behavior will remain undiscovered and unexposed. The second reason is that even if they are exposed and punished, the punishment is usually very light, so, calculating that "the benefits outweigh the costs," the enterprises think the risk worthwhile. In other words, if their violation of rules and laws succeeds, they gain a great deal personally, and if their wrongdoing is discovered and punished, they pay too small a price, and so such violation goes on despite being forbidden. What's worse, in the case of leaders of state-owned enterprises, the fine is usually paid by the enterprises, so the leaders don't consider themselves as actually having a real loss.

What the foregoing tells us is that "the benefits outweigh the cost" situation must be eliminated, and that punishment should be severe; moreover, the punishment should fall specifically and personally on those responsible, so they will no longer take irresponsible chances.

To build trust between enterprises in the same line, we must strengthen the role of industry associations. Apart from guiding production and operation and coordinating mutual help between enterprises, an industry association should play a bigger role in promoting self-discipline and mutual discipline among its member enterprises. Both forms of discipline are means by which the association can help enterprises raise their legal and moral awareness. Only by enterprises practicing self-and mutual discipline, reminding, stimulating and supervising other enterprises in the same line can the overall credibility of that industry keep on growing. Within the scope of an industry association, all its member enterprises are equal regardless of ownership type, scale, capitalization or length of time in business. This facilitates the practice of mutual discipline. Self-discipline, including legal and moral restriction, of every member enterprise is voluntary, but whether and to what degree an enterprise has self-discipline is supervised by the industry association and other

enterprises of the same trade. Oversight will help an enterprise to be more self-disciplined.

It should be pointed out that the social responsibility borne by an enterprise does not stop at supplying quality products and services, being progressive and innovative, and creating wealth and jobs: it also includes caring about public welfare, being ready to help the poor and adhering to the principle of trust, treating clients, public and traders in honest fashion. An enterprise that betrays society's trust, destroying its own credibility or even causing a crisis of social credibility cannot be said to be socially responsible.

Therefore, it is of real importance to propose "the necessity of rebuilding social trust from the perspective of the survival and development of enterprises." From the perspective of international economy, the subprime lending crisis that hit the USA in 2007–2008 and the consequent global financial crisis were intrinsically deep and broad credit crises and crises of social credibility. The long-term low bank interest rate caused investors to endlessly expand their profit-seeking behavior. The unchecked spread of financial derivatives made the financial bubble more and more fragile and the quality of loans worsened by the day. Under the impact of company bankruptcies and bank failures the credit system collapsed. People lost their belief in banks and other financial bodies; neither did they trust agreements and contracts with trading partners. For those reasons, as the global financial crisis continued, its impact on the real economy became more and more evident; it even started to influence consumer attitudes and behavior in the West, which in turn may have far-reaching influence on Western society. The exposure of problems in powdered milk, liquor, rice, pork, soy sauce, duck eggs, salt, etc. has caused worries over food safety. For example, although only a few brands of milk powder were actually involved, the exposure influenced the reputations and sales of all milk powder enterprises in China and there was a scramble to buy imported brands. If the government had taken no countermeasures, the crisis of credibility

would have continued to deteriorate. Thus we can see the importance and urgency of reconstructing social trust.

Market order is maintained by social trust. An enterprise is supported by its own credibility. Consumers vote for an enterprise on the basis of their trust in its products. Aren't these persuasive enough arguments for the importance of self-discipline, mutual discipline and moral and legal restriction to the fate of enterprises and market prosperity?

7.5.2 The Need to Rebuild Social Trust: From the Perspective of Harmonious Interpersonal Relations

Everyone belongs to at least one group and, however large or small, it always consists of more than one person, and relations between people always involve the issue of trust. Trust is essential to the survival of a group or the maintenance of interpersonal relations.. Without trust, there will be no harmonious interpersonal relations, no social organizations or even no society.

Trading activities can only be launched on the premise of trust. Everything that happens between traders—the buying and selling of goods and services, hiring and being hired, the lending of money, renting or transfer of real estate, extending credit, insurance, entrusted agency, etc.—starts from the premise of mutual trust. Similarly, mutual trust is a precondition for cooperation between traders, such as co-investing to establish or purchase an enterprise, joint research and development of a project, discussing segmentation and coordination of market share, distribution of benefits, united action against another trader, or employees preparing united action to demand more from employers. Only with trust can they reach an agreement or a tacit understanding. If they doubt each other, their cooperation or trade will struggle to continue.

As previously stated, in social life, the non-traded sector is often

much larger than the traded sector. In the non-traded sector, relations such as ties among families, clansmen, neighbors, townsmen, schoolmates or teachers-and-students are not based on trading rules, but trust is essential here too. Without it, these relationships will be harmed. For the basic order and stable life of a group as small as a family, a village or a residential block, the building of social trust is essential. Money is also involved between neighbors, townsmen or schoolmates but, unlike the market, it does not follow rules of trade. For example, if someone urgently needs to borrow money from neighbors, relatives or friends, must they first negotiate, write an IOU, fix a rate of interest and make pledges? This is usually not the case, because they rely on mutual trust. If there is no mutual trust between a childless couple, how long will their marriage last? A couple without trust will break up sooner or later.

Interpersonal relations should be harmonious, and harmony must be based on mutual trust. People need to cooperate and cooperative relations are not purely about benefits: They are first and foremost a requirement of social exchange, i.e., everyone is willing to cooperate with others in the interest of survival, overcoming difficulties, and common development. You want to cooperate with others and them with you. Seen in this light, trust is an intrinsic need: it comes from within.

So we can distinguish two different scenarios: cooperation based on trust and trust based on cooperation. The former is the more important.

Let's start with the life and work of the earliest human beings. In remote antiquity, people had to trust each other in order to survive. Without market and government, people gathered and formed a group with the same aim: to survive in the extremely hard environment. "You survive, I survive and we all survive" was the moral foundation that gave birth to trust. Otherwise how could an individual find enough food by himself, or defend himself against wild beasts? How could he survive cold winters, snowstorms, forest fires and floods?

Just take hunting for example. Without working together what success could be expected? Cooperation was indispensable: once there was trust there could be trust-based cooperation.

As humans made more and more contact over a greater range of activities, groups became more populous, group-to-group contacts became more frequent, as did communications between individuals. We cannot say mutual trust had emerged between the members of one group and those of another, or between their respective leaders, but the need for cooperation between groups did emerge naturally. For instance, if one's own group was attacked by another coming to steal property, abduct people and occupy land it had to cooperate with other groups to resist the enemy. In such cases, the need for cooperation was usually put first. But in such cases, perhaps their cooperation was based on pre-existing mutual trust, built up in the course of previous dealings. An alternative is that there had been little previous contact and the groups had not built up any mutual trust, but that this emerged gradually, resulting from their necessary cooperation to resist the incursions. This is cooperation-based trust.

As interpersonal relations expand over a wider field, there is a concomitant increase in people-to-people contact and cooperation in non-traded sector. It is not possible to confine one's dealings and cooperation to old friends: such things will inevitably involve new people. Therefore trust-based cooperation and cooperation-based trust actually co-exist. Trust is absolutely essential to both. Without it there can be no cooperation and even if there has been in the past, it will be short-lived.

In a group, big or small, organized or non-organized, consultation and election among members complement each other; this is a precondition for the stability and development of the group. Election is a form of democracy and consultation implies democracy. To recognize electoral democracy but deny consultative democracy is not right, but nor is the converse. In the development of human society, consultative democracy has a much longer history than electoral. In

remote antiquity, it was the first form of democracy, and with the subsequent emergence of election both forms were used. The consultative form could better ease the atmosphere and enable all sides to fully exchange ideas in search of a generally acceptable solution whilst retaining mutual trust and understanding. The use of election can be regarded as a result of consultation. Of course, this is not to discount the advantages and significance of election: but if there was only electoral democracy and nothing else, the results, on the principle of "the minority subordinate to the majority," might be less satisfactory than those combining the two types.

We have learned that in history, in the handling of group internal affairs and external dealings with other groups, the main principle was consultation. Election was used only when it was necessary to make, modify or abolish regulations and conventions in a group, when it was to elect or dismiss a leader or a major functionary of a group, when a group was to sign or end a contract with other groups or when it was to leave an organization formed with one or more other groups. But usually in such cases consultative and electoral democracy were used in tandem.

In handling interpersonal relations, both these democratic forms are products of civilization passed down over thousands and thousands of years. Each historical period had its own particularities, and each nationality and country used both, as determined by its own customs. There was no uniformity, but the common foundation was mutual trust. That the group and its members should have a moral bottom line was a necessary condition for the normal running of consultative and electoral democracy.

Actually, interpersonal relations in the non-traded sector encompass much more than consultation and election. Trust is also a basic element for forming harmonious interpersonal relations in these sectors. For example, within a family, if a child is forced by the parents to marry someone against his or her personal choice he or she may leave home and perhaps even commit suicide. Trust in the

parents has been lost. In a clan, if bullying elders hog common clan properties or take advantage of the weak, the clan members will rise in resistance, no longer trusting the elders. If someone, disregarding honor, cheats, extorts or entraps others, he will cut himself off from his friends, colleagues and neighbors, who will find him loathsome. If someone inside an academic group is exposed for plagiarism or faking data, he will be ostracized, because no one trusts him anymore; if the academic group allows such things to go unchecked, its reputation will be seriously damaged and fewer people will want to join in it. Clearly, the importance of trust or mutual trust in non-traded sector, and the consequences of their loss are no less considerable than in the traded sector.

In conclusion, the issue of social trust crops up everywhere. In the traded sector, if society has lost trust, the market will be in disorder, the traders will not be sure of their goals, cash trading will replace trading on credit, barter trade may even replace trade by cash, and human society will go back to the primitive stage. This is not to be contemplated. The consequences would be even more pronounced in the non-traded sector. If society no longer had trust, no one would trust or be trusted. All interpersonal relations would fall apart and all social organizations collapse. Could such a society still enjoy stability and development?

7.5.3 The Need to Improve Government Credibility

The building of social trust is a process, one in which interpersonal contacts and enterprise-to-enterprise trading activities are begun and expanded through the constant accumulation of trust. As a behavioral agent, government has contact with the public and enterprises at every moment, which also involves issues of mutual trust: The general public and enterprises trust the government and vice versa. Such mutual trust accumulates with time. If the behavioral agents, including the government, do not trust each other, society will

be in disorder and the social ethos will deteriorate. Once again, we may analyze from the perspectives of the traded and the non-traded sectors.

Once people enter the traded sector, they act in the capacity as traders and according to the rules of these sectors while never crossing the legal and moral bottom lines. Government, as one of the behavioral agents, is no exception. For example, as a purchaser, government needs to buy all kinds of products and services from enterprises. Government and the enterprise, as buyer and seller respectively, should trade in accordance with relevant laws, rules and regulations and on the principle of trust. To give a further example, in land transactions, there is a supply-demand relationship between government (the supply party) and the realtor (the demand party). The latter gets land by following certain laws, rules and regulations. Trust between the two parties is, as ever, the norm to be observed. There is no exception for government. In the traded sector, sellers and purchasers are equal, and whether it is buyer or seller, government cannot ride roughshod over the other party. Only when both sides are equal and both follow the rules of these sectors can they build mutual trust.

In the non-traded sector the situation is somewhat more complex. In addition to person-to-person contact, clan-to-clan contact, relations within clans or within various social groups, there are also relations between government and communities, social groups, clans, families and individuals. For example, when an individual pays tax to government or its affiliated department, this is not a trading relation between seller and purchaser. Nor is it a trading relation when the government and its affiliated departments are required to aid natural disaster victims, orphans and low-income families. As to the role performed by legislation and security departments in handling disputes among the public, this is even less of a trading relationship. In spite of this, government or its affiliated departments must be trustworthy, build mutual trust with the people concerned, and never

violate laws, rules or regulations in the course of their duties.

Then how does government win trust from the public and enterprises in traded as well as non-traded sector? How is mutual trust between them established? Such questions exist even in autocratic societies. When China was under autocratic rule, imperial power was paramount and subjects were absolutely subordinate to the royal court. But it is evident from the importance attached to the imperial examination system during the Ming and Qing dynasties and the severe punishment meted out to violators of the system that imperial power of that time always tried to ensure the fairness and impartiality of the examination. Why so? It was to safeguard credibility of the imperial power among the public. If this was diminished, the strength of imperial power would be threatened. For another example: why did Chinese imperial power throughout the ages always honor "clean officials"? This too was for strengthening popular trust in the royal court, because for the common people a "clean official" was a measure of imperial credibility. Under democratic systems in capitalist and socialist countries alike, society is turning more attention to popular trust in government. An important distinction between democratic and autocratic systems is that under the former, the public and enterprises have many more free choices: If unrequired in one place, they can go elsewhere; they can migrate between cities and even between countries; they can change occupations; investors can withdraw their investment or switch it to a different sector. The general public and enterprises also have more channels for complaint or expressing a personal view, criticizing the behavior of responsible departments, including exposing bribery and perversion of justice among government organs and staff. So, for government to maintain popular credibility is a tougher task than in the past. The forcefully executed measures habitually resorted to under autocratic systems such as blocking information or suppressing public opinion, have already lost their base under democratic systems.

In other words, under a democratic system, because the public

and enterprises have freedom to choose, the government has to find more ways to increase its credibility to suit the new situation. This is exactly what distinguishes a society with rule of law from a non-rule-of-law society. For example, in the traded sector, whether the government engages in the capacity of seller, purchaser or joint investor, it must observe laws, rules and contracts. Only thus can it be trusted by the other party to the trade or the co-investor. At pre-contract stage the other party can take into account the government's track record in fulfilling commitments and on the basis of this decide whether to sign the contract or to withdraw. If the contract has been signed and the trade is underway to the detriment of the other party, then, once bitten twice shy, it will not cooperate with government again. If the government does not comply with the contract or fulfill its promises, it is destroying its own credibility and will hardly be trusted by the public and enterprises. In the traded sector, both parties are equal: both parties are free agents in the choice and neither should cross the legal and moral bottom lines.

In the non-traded sector, the role of the government is special: It usually appears in the capacity of manager and servant of public affairs and not as a trader. In such cases, to keep and improve its public credibility, the foremost issue is positioning itself correctly, not the observance of trading rules or similar. In traded sector, although the government can be a trading party or a joint investor, it is at the same time the manager and servant of public affairs. Irrespective of whether both or just one of the trading parties are enterprises, the government still plays that public affairs role. Therefore, in the non-traded sector, if the government wants to maintain and improve its credibility, its priority should be to fulfill that role in a way that wins it public trust. If government staff abuse their power, show partiality to some and treat others unfairly, engage in cover-ups and cheat the public, and if they exploit their positions of authority, break the law and cross legal and moral bottom lines for personal gain, this will drag down public trust in government.

In both sectors under discussion, government credibility is something that builds up gradually, but can be destroyed in an instant. Just like a big dam, it has to be built, maintained and reinforced over a long time, but it is vulnerable to sudden collapse after a huge storm and deluge. The government should keep alert to this, be vigilant and never let such disaster strike its credibility.

To improve government credibility with the public, these four aspects will need to be tackled:

One: Although laws, regulations and policies are not necessarily perfect in their new-born form, they are still better than none at all. A situation devoid of laws and policies will make government staff more casual in managing public affairs and thus government credibility will decrease. Of course, laws, regulations and policies should be made as scientific and rational as possible and take into account the opinions of experts, scholars, experienced civil servants and representatives of the public. Once put into effect, the government should try by various methods to monitor how they are being implemented, discover problems and defects and revise them according to official procedures. But before revising, one should protect the stability of laws, regulations and policies and not change them casually; such an approach will damage government credibility.

Two: Government staff must become more integrity-conscious. This is because they directly handle public affairs and, being at the interface of public and government, represent its image. Low credibility is in many cases caused by government staff failing to handle affairs according to law, ignoring policies or being untrustworthy. And corrupt behaviors like gaining personal benefits by abusing power, receiving and even extorting bribes are even more deadly to government credibility. Therefore, there must be a mechanism to supervise government staff and to keep them clean and just, so as to safeguard their own image and that of the government.

Three: In a time when China is still in transition between the planned and the market economy and further reform is needed, it is

necessary to combine efforts to raise government credibility with efforts to deepen system reform, since measures for handling public affairs under the planned system are not suitable for the market economy. In the traded sector, once power gets involved in trade, there will be rent-seeking, a phenomenon very liable to emerge in the economic transition. This is because the formulation and allocation of quotas, prevalent under the planned system, often came about through the manipulation of power and provided a hotbed for rent-seeking. In the transitional period, the quota system lingers on in some industries, so the double-track system becomes a feature of this period, one that can also give rise to rent-seeking. All these make the public more suspicious of government. In the non-traded sector, because the supply of some public products often does not meet demand, when supply and demand are under stress, the competent departments and government staff may use their power to intervene. Some recent frequent examples in China are parents competing for places at the choicest kindergartens, primary and middle schools for their children, patients competing for their preferred hospitals and doctors, applicants for affordable housing demanding decent locations, etc. Thus, deeper system reform is necessary in the traded and the non-traded sector alike. The persistence in the traded sector of quotas, government procurement, double-track and industrial monopoly systems has a great deal to do with the imperfections of system reform. In the non-traded sector the question of fairness in supply and distribution of public goods can be resolved only through deeper system reform. In light of this, system reform is very pertinent to government credibility.

Four: Since modern economy is a credit economy, government as one of its behavioral agents must be credible and trustworthy both in the trade and non-traded sector. However, a modern economic system as a credit-based system cannot be perfected with sole reliance on a certain kind of behavioral agent. In this kind of social credit system, the government is not only a trader but an administrator and servant

of public affairs. As such, it is responsible for helping advance the establishment of social credit, which will in turn help improve mutual trust between government, the public and enterprises. In other words, building a social credit system is a measure for improving government credibility.

What is a social credit system, how does one build it and where can government play a role? We will discuss these questions in the next part.

7.5.4 Building a Social Credit System

There are three main aspects of social credit: individual credit, intermediary agency credit and enterprise credit. Individual credit means: In a credit society and credit economy, the credit of an individual as a member of society and trader in the market should be known by others and the intermediary agencies before he can have dealings with others or be accepted by other parties to the trade. To build a social credit system, a suitable individual credit rating system and the compiling of individual credit records are both necessary.

Credit of intermediary agency credit: Intermediary agencies engaged in credit surveys, credit collection, credit information, credit evaluation and credit guarantee, etc., also face questions of credibility. Are they themselves credible, fair and just, are their ratings authoritative, and are their responsibilities as important as their powers? If banks, insurance companies, securities companies, or loan and trust companies have departments for collecting data on individual or enterprise credit, they should come under the intermediary agency credit system.

Enterprise credit: Apart from intermediary agency credit, all enterprises including insurance companies, securities companies, and loan and trust companies, face questions of credibility. As regards an enterprise, the true situation of its assets, balance sheet, ability to repay, profitability, reputation and credit management are all of

concern to society. Financial enterprises face special issues in addition to the above listed questions of credibility: for example bank risk in lending to enterprises, in issuing credit cards, of granting personal loans, the possible impact of international finance and risk resilience. All of the above concern society.

Therefore, a social credit system is actually a tripartite one that comprises individual credit system, intermediary agency credit system and enterprise credit system. One opinion holds that the scope of the intermediary agency credit system should be expanded to encompass asset evaluation agencies, accounting firms, auditing offices, law firms, etc., since their business also involves credit evaluation and one of their outputs is to clearly show society the credit status of some individuals and enterprises. Therefore, the credibility of these agencies themselves is very important. Otherwise, how much trust can one have in the output of an intermediary agency that is itself non-credible?

So, what should be the government role in building a social credit system? Should the credit of the government itself be included? These are questions of a different order and we shall discuss them separately.

The first question: What should be the government role in building a social credit system? There are four aspects to this: Firstly, it is expected to provide a sound legal environment for the building of this system, so that individual, intermediary agency and enterprise credit systems all have laws or rules to follow. Secondly, it is expected to provide technical support for the building of such a system. In particular, the building of a credit database should be accelerated with government support. That is to say, it is far from enough for the intermediary credit agencies alone to concern themselves with the building of a credit database, so government must play a leading role and help to realize the sharing of information resources by the whole society. Thirdly, the government should be a role model, improving the credibility of its staff and itself, spurring all practitioners of credit

business to improve their own credibility and stick to legal and moral bottom lines, thereby increasing mutual trust between themselves and the public. Fourthly, the government should put more effort into the administration of social credit, especially the credit status of intermediary credit agencies and of enterprises. The role of the government in this respect is irreplaceable by any social group(including industry associations), because the credit information relating to an enterprise is widely dispersed among banks, tax, customs, quality supervision, justice and business administration departments, etc. It is hard to learn or to make a realistic evaluation of an enterprise's credit standing without combining the information from all departments and making a holistic analysis. No intermediary credit agency has the same competency as government to undertake such a role. After all, the credit status of such agencies is also under the administration of relevant government departments.

The next question: Should the credit of the government itself be included in this system? We will approach it from two angles.

One angle is: The credit of the government is the credit of the country. To maintain the country's credit the government must have the trust of its own people plus the trust of other countries and international organizations. But these things are not what the social credit system is intended to solve. In terms of technology, we can rely on intermediary credit agencies to assess the credit of enterprises; we can rely on government departments to integrate information and administer the credit status of enterprises and evaluations by intermediary agencies; we can also evaluate the credit status of enterprises and intermediary credit agencies on the basis of certain criteria. But how are we to rate government credit? Are intermediary credit agencies competent to do this job? What criteria can they adopt as quantitative measures? Would their evaluation have any validity? This is a tough and as yet unsolved question that requires further study. If foreign rating agencies produced evaluations of China's national credit, what degree of credibility would the results show?

The other angle is this: The credit of individual government staff cannot be taken as representative of the whole country, nor can the credit of a local government be taken as representative of the country and the central government. The reason is simple: Individual government employees conduct themselves differently: some are honest and clean in performance of their official duties, whereas some violate laws and regulations, take bribes or are derelict in their duties. The latter types will be deemed as harming the government image, and if they work in agencies relating to foreign affairs they will be deemed as harming the national image, but this is not the same thing as the credit status of a country or a government. Furthermore, the behaviors of local governments (from provincial and municipal to county and town) such as breaking contracts and refusing to repay debts will harm the image of these governments. If those behaviors involve the interests of foreign businessmen, they will harm the national image: but they do not equate to the credit status of a country, either, since the credit of any local government cannot be taken as representing that of the central government and the whole country.

Of course, the behavior of government employees should be checked and supervised so that they will not do anything injurious to the government image. Local government behaviors such as reneging on promises to domestic and foreign enterprises should be given due attention and addressed according to law lest they harm the image of the government and the country. This is essential if government credibility and the national image are to be improved. If foreign businessmen dealing with specific government employees or negotiating with specific local governments encounter violations of law, untrustworthy behaviors and attempts to extort bribes, how can this not be detrimental to the national image?

Finally, one must analyze the role of trade associations in building a social credit system. Trade associations and chambers of commerce are intermediary organizations and can play a larger role in

building a social credit system, such as promoting self-discipline and self-management of the trade, launching activities among enterprises in the same line involving mutual trust, mutual discipline, mutual protection and mutual loaning, etc., actively taking over some functions transferred from government and filling the gap left after the government role changes. When some or the majority of enterprises in a particular trade face losing credit for various reasons, the trade association or chamber of commerce can appeal on behalf of the trade and its members to protect their rights. At the same time, the rather rapid development of a trade and the constant emergence of new trades will encourage the establishment of new trade associations and chambers of commerce. The founding should be based on the principles of voluntary start-up, independent election of presidents, collection of funds and hiring of staff. All in all, by increasing the self-discipline of enterprises, supporting and encouraging the development of private enterprises, and improving the caliber of private entrepreneurs, trade associations can play a rather important role in building a complete social credit system.

伍 社会信任的重建

一、从企业的生存和发展看重建社会信任的必要

在市场条件下，企业（不管是什么所有制的和什么组织形式的企业）是经济的细胞，企业都应当以诚信为本。如果企业失去了投资人的信任，失去了客户的信任，失去了同行的信任，企业是不可能生存和发展的。

这是因为，在交易领域内，每一个企业都以交易者的身份出现。企业同企业之间的关系是交易者之间的关系，企业同客户之间的关系同样是交易者之间的关系。即使是企业同投资人之间的关系，也可以看做是交易者之间的关系。只要失去了信任，哪怕信任削弱了，这种交易关系就会淡化，直到断裂。最典型的例子就是从古代一直延续到现代的合伙

制。合伙制作为一种企业组织形式，合伙人承担的是无限责任和连带责任，合伙人之间必须有充分的信任，否则谁愿意为合伙的伙伴承担无限连带责任？合伙制企业必定无法存在下去。广泛存在的有限责任制企业（如有限责任公司和股份有限公司），信任同样是非常重要的。以股东们对公司的信任来说，关键在于股东会是否履行了对公司的经营业绩和盈利分配方案的审查权，以及对公司增资、发行股票、合并、转让、解散和清算等重大事实的审查权。有限责任公司和股份有限公司的高层管理者必须取得股东们的信任，才能任职，公司必须取得投资者的信任，才能发展壮大。

在日常交易活动中，企业的信任危机可能来自各个不同方面。例如，某个企业生产或销售劣质产品，甚至假冒产品，从而失去客户的信任；某个企业拖延其他企业的货款不还，拖欠银行贷款不还，从而使诚信受到损失；某个企业单方毁约，使合同的另一方受损，从而也失去了合作者或客户的信任，等等。至于企业伪造账目，做虚假广告，或公布不准确的信息等，不仅诚信丧失，而且会遭到同行们的抵制，企业的声誉扫地，发展的空间也就失去了。

关于企业的生存和发展，现代经济学认为通常需要三种资本。一是物质资本。厂房、机器设备、原材料、零配件、能源供给等，都属于物质资本之列。二是人力资本。体现于劳动者和管理者身上的技能、知识、智慧、经验、毅力等，都包括在人力资本之中。三是社会资本。这里所指的社会资本，是指一种适合于企业生存和发展的社会关系、人际交往、品牌、信誉等。社会关系和人际交往是建立在相互信任的基础上的；品牌要靠信任来支撑；信誉是扩大人际交往和确立良好的社会关系的基石。企业和企业领导者的信誉好，其他企业愿意同该企业交易、合作；企业领导者个人信誉好，别人愿意同你交往，在你遇到困难时愿意伸出援助之手。这就是社会资本。任何一个企业如果缺少社会资本，即使有较多、较好的物质资本，也难以发展。这样的企业在业界通常是孤立的。没有社会资本，企业很难找到商机，也很难开拓市场。

有些企业和企业领导人并不是不知道丧失信用和缺少社会信任会使企业陷入困境，使企业领导人身败名裂，但为什么还会从事生产和销售假冒伪劣产品、赖债不还、炮制虚假广告、欺骗客户等活动呢？这只能归结为以下两点：一是被私利所诱惑，二是存在侥幸心理。被私利所诱惑是根本性的，存在侥幸心理导致这些企业和企业领导人去冒险，认为

这多半不会被发现，而在私利诱惑之下这样做还是值得的。所以任何人都不应心存侥幸，否则都会被侥幸心理所误导。

实际上，摆在每一个企业和每一位企业领导人面前的有两条底线，即法律底线和道德底线，这两条底线都是不能逾越的。越过了法律底线，当然为法律所不允许，企业和企业领导人无疑会承担由此产生的后果和相应的法律责任。但不能忽视的是还存在一条道德底线。在某些情况下，企业和企业领导人既越过了法律底线，又越过了道德底线；但在另一些情况下，企业和企业领导人可能使自己的所作所为并未越过法律底线（即所谓“打擦边球”的作为），但却越过了道德底线。这同样是不对的。企业和企业领导人必须有如下的认识：不仅不能触犯法律底线，而且也不能触犯道德底线。为法律法规所不容固然是严禁的，逾越了道德底线同样需要严禁。在企业经营中，企业和企业领导人要牢记两种约束的并存，即法律约束和道德约束的并存，这样才能保持自己的信用，取得社会的信任。从中国明清两代的商业史可以了解到，徽商、晋商之所以长期兴盛不衰，一个重要的原因是坚持用儒家的道德来约束自己，在商场上笃守诚信。

在谈到私利诱惑问题时，不能认为只有私营企业和私营企业的领导人才会因私利的诱惑而冒风险去突破法律底线和道德底线。国有企业和国有企业领导人同样是有这种可能的。这里所说的私利诱惑不仅是指货币收入的诱惑，还包括企业领导人职务提升和工资、奖金增加的诱惑，尤其是职务提升的诱惑。如果以信用受损为代价而使国有企业的产值增加了，利润增加了，国有企业的领导人或国有企业内的有关管理人就有了职务提升和工资、奖金增加的希望，这也属于私利诱惑的范畴。否则，我们怎能解释为什么有的国有企业也会丢掉法律约束和道德约束去从事有损于企业信誉的事情呢？

无论是私营企业还是国有企业，在从事损坏企业信用的行为时，之所以存在侥幸心理，主要有两个原因：一是前面提到过的，以为这样做不会被发现、被揭露；二是即使被发现、被揭露了，受到了处罚，但通常是相对轻微的，于是就会产生“成本与收益不对称”的状况，使企业认为这样做还是合算的。也就是说，假定冒险违法违规得手了，个人收益很大；即使冒险违法违规被逮住了，受到处罚，但损失不大，于是冒险违法违规行为屡禁不止。尤其是国有企业领导人冒险违法违规后，被罚的款项是由国有企业偿付的，所以他们认为自己实际上没有什么损失。

上述这种情况告诉我们，在处理企业违法违规时，一定要消除经济生活中存在的“成本与收益不对称”的状况，处罚要严，而且处罚要落实到具体的企业负责人、责任人，使他们不再存在侥幸心理。

为了在企业与企业之间重建社会信任，有必要加强行业协会的作用。行业协会除了有指导本行业各企业生产经营和协调企业之间展开互助等任务外，更有促进各个企业自律和互律的作用。自律和互律都是引导企业增加法律意识和道德意识的手段。只有企业有了自我的法律约束和道德约束，同行业的企业又在法律的约束和道德约束方面起着相互帮助、相互提醒、相互促进和相互监督的作用，本行业的信誉才能不断提升。在一个行业协会的范围内，所有参加行业协会的企业都是平等的，不分所有制，也不分规模的大小、资本的多少和企业建立时间的早晚，这样才便于企业之间的互律。至于参加行业协会的每个成员的自律，包括法律约束和道德约束，尽管是自觉自愿的，但由于有了行业协会这样的组织，一个企业是否自律，或自律达到何种程度，则会受到行业协会和同行们的监督，这也将有助于企业自律程度的提高。

应当指出，企业的社会责任不仅在于为社会提供优质产品和优质服务，不断进行自主创新，为社会创造更多的财富和提供更多的就业机会，也不仅在于关心公益事业，帮助穷人，而且还在于坚持诚信原则，以诚信对待客户、对待公众、对待一切交易者。背离了社会信任，企业就谈不上自己的社会责任，更不必说企业破坏了社会信任，甚至制造了社会信任危机了。

因此，在这里提出“从企业的生存和发展看重建社会信任的必要”，是有现实意义的。从国际经济的角度来考察，2007～2008年发生的美国次贷危机，以及由此引发的国际金融危机，从本质上就是一场深刻和广泛的信用危机、社会信任危机。银行的长期低利率使投资者的逐利行为不断膨胀，金融衍生产品的泛滥使得金融泡沫越来越严重，贷款质量日益恶化，信用制度在企业破产和银行倒闭的冲击下崩溃了。人们不再相信银行和其他金融机构，甚至不再相信交易对方的承诺和合同。正因为如此，所以国际金融危机持续下去，对实体经济的影响越来越显著，而且已经开始影响美国民众和西方其他发达国家的民众消费观念的改变和消费行为方式的调整，进而将会对西方社会产生深远的影响。再从我国国内考察，引起社会普遍关心的事件之一就是食品安全。奶粉、白酒、大米、猪肉、酱油、鸭蛋、食盐等问题食品被曝光以后，引起了人

们对食品安全的关注。比如说，尽管有问题的奶粉只是某些厂家生产出来的，但问题一被揭露，便影响到所有的生产奶粉的企业，国产奶粉的声誉立即受到严重损毁，销量锐减，一段时间内人们纷纷抢购国外生产的奶粉。如果不是政府有关部门迅速采取应对措施，奶粉的信用危机还会继续扩大。从这里可以清楚地了解到重建社会信任的任务是多么重要，多么迫切。

市场是靠社会信任维持的，企业是靠自身的信用支撑的，广大消费者凭着信任给生产消费品的企业投票。上述这一切还不足以说明企业的自律和互律、企业的法律约束和道德约束关系到企业的命运和市场的兴衰吗？

二、从人际关系的和谐看重建社会信任的必要

前面已经指出，人总是生活在一定的群体之中的，群体有大有小，但至少是一个人以上才组成群体。人与人之间始终存在信任问题。群体的存在和人际关系的维持，离不开信任。没有信任，不会有人际关系的和谐，不会有社会组织，甚至社会都难以存在。

交易活动只有在信任的前提下才能开展。交易活动中交易者之间的关系，无非是商品和劳务的买卖，雇用和被雇用，货币借贷，不动产租赁或转让，信托，保险，委托代理，等等，这些都以交易双方的相互信任为前提。同样的道理，交易者与交易者的合作，包括共同出资，建立企业，收购企业，或共同研发一个项目，甚至商议市场份额的分割与协调，利益的分配，或交易者们准备采取一致行动抵制另一个交易者，雇工们准备采取一致行动对雇主提出这样或那样的要求，也都以相互间的信任为条件，这样才能达成某种协议或默契。如果信任削弱了，互不相信，他们之间的交易关系、合作关系也就难以继续下去。

也正如前面已经指出的，在社会生活中，非交易领域通常远远大于交易领域。在非交易领域内，人与人之间的关系，包括家庭关系、家族关系、街坊邻里关系、同乡关系、同学关系、师生关系，尽管全都不按市场交易规则办事，但信任却是永远存在的。没有信任，这些人际关系全都会受到损害。小到一个家庭、一个村落、一栋居民住宅，基本秩序的维持和民间生活的进行，无不要求建立社会信任。有了社会信任，基本秩序就维持了，稳定了。街坊邻里之间、同乡之间和同学之间，并不

是没有金钱往来的，但不像市场中那样一定要按市场交易规则办事。比如说，一个人有某种急需，向同村的居民借钱，向亲戚朋友借钱，难道非得先谈判，立字据，定利率，抵押，质押不可？一般情况下不是这样的。这就是仰赖相互信任而产生的关系。再如，即使是只有夫妻两人的小型家庭，在互不信任的条件下究竟能维持多久？缺少信任的夫妻二人，迟早是会分手的。

人与人的关系需要和谐，而和谐必定以相互信任为基础。人与人之间需要协作，而协作关系的建立绝不单纯是一种利益关系，而首先是一种社会交流的需要，即每个人出于生存的需要而愿意同别人协作，共同渡过困难，或谋求共同发展。这样，你就会要求同别人协作，别人也希望同你协作。从这种角度来看，信任是内在的需要，也就是说，信任是内生的。

由此可以区分以下两种情况，一是基于信任的协作，二是基于协作的信任。两者是有差别的，而且前者一直是主要的。

不妨从人类最早的生活和生产活动开始分析。远古时代，人出于生存的愿望，必须相互之间有信任。大家聚集于一个群体之中，当时既没有市场，又没有政府，大家都抱着一个宗旨：在异常艰苦的环境中如何生存下来。“你活我也活，大家都要活”——这就是产生信任的道德基础。否则，一个人怎能寻觅到食物？一个人怎能防御野兽的攻击？一个人怎能经受得了严冬、暴风雪、山火、洪水的袭击？即以捕捉野生动物来说，不靠大家一起围猎，能有多大收获？协作是必不可少的。于是有了信任，才会有基于信任的协作。

人类交往的范围越来越大，不仅本群体的人数由于生育后代而增多，而且由于群体的活动领域扩展了，本群体同其他群体的接触也越来越频繁，从而个人之间的交往也越来越多。这时还谈不到本群体同其他群体的成员之间已经产生了信任，或本群体的领导同其他群体的领导之间已经产生了信任，但协作的需要却自然而然地出现了。比如说，当另一个外来的群体前来抢劫财物，掠走人口，或占领土地时，本群体需要同其他的群体联合起来去抵抗敌人，协作的需要通常被放置在前面。这时，可能依然是先有信任，再有协作，即这一群体同某个群体在过去交往的关系中已建立了信任，所以这种协作仍是基于信任的协作；但也可能出现另一种情况，即这一群体同某个群体过去接触不多，尚未建立信任，然而在共同对付另一个群体前来侵犯时，是先有协作，再逐步建立

相互信任。这就是基于协作的信任。

随着人际关系的扩展，非交易领域内人与人之间的交往和协作也越来越多。一个人不可能总是和某些老相识交往和协作，总要同某些新相识交往和协作。所以基于信任的协作和基于协作的信任是并存的。但无论是基于信任的协作还是基于协作的信任，都离不开信任二字。没有信任，不可能有协作，即使有过协作，也只能是短暂的。

在一个群体中，不管群体是大还是小，有组织形式还是不存在组织形式，成员们的协商与选举总是相辅相成的。这是群体得以稳定和发展的条件。选举表现为民主，协商同样意味着民主。只承认选举民主而否定协商民主，是不对的；同样的道理，只承认协商民主而否定选举民主，也是不对的。协商民主的历史，从人类社会成长过程来看，要比选举民主久远得多。在远古时代，群体内部最初形成的就是协商民主，后来才出现选举民主，而且协商与选举两种方式总是兼用的。两种方式相比，协商方式可以使气氛缓和，不至于那么紧张，各方可以充分交换意见，寻找各方都可以接受的方案，使得整个过程保持信任和互让互谅。选举方式的采用可以成为协商的成果。当然，这并不排斥选举民主的优点，也不否定选举民主的意义。但如果只有选举民主，结果形成的“少数服从多数”的结果很可能不如协商民主和选举民主两者兼用的结果。

从这里可以了解到，在社会上各个群体内部和各个群体之间历史上通行的处理事务的原则主要是协商。只有在需要产生、修改和废除群体的规章、公约时，或在需要产生和罢黜领袖或主要办事人员时，以及在与另一个群体或另外若干个群体订立和废止协议时，或加入和退出另一个群体或另外若干个群体组成的组织时，才采用选举民主。何况在这种场合，协商民主和选举民主也通常兼用。

人际关系中协商民主和选举民主都是人类文明的产物，是历经数千年甚至更为长久的过程而传承下来的。各个历史时期有各自的特点，各个不同的民族、国家也各有依据自己的习惯而采取的协商方式和选举方式。这里并不存在统一的做法。但所有这些方式或做法都不能没有相互信任作为基础。群体和成员的道德底线是协商民主和选举民主赖以正常运作的必要条件。

实际上，非交易领域内的人际关系要远比协商民主和选举民主广泛。信任同样是构成人际关系和谐的基本要素。非交易领域内的人际关系靠信任维持。比如说，在一个家庭内部，如果家庭对子女实行包办婚

姻，违背子女的意愿，子女会离家出走或以死抗争，这就表明子女对家长失去了信任；如果一个家族内部，家族长辈霸占家族公产或欺辱孤儿寡母，族人会起来抗争，这表明族人对族中长辈失去了信任；如果朋友之间、同事之间、邻居之间有人不顾信义，欺骗别人，甚至敲诈别人，陷害别人，这个人就会自绝于朋友、同事、邻居，成为人所不齿者；如果在学术团体中出现了剽窃、作假、伪造数据等恶劣现象，剽窃者、作假者、伪造数据者同样在被揭露后会陷入孤立，因为他已失去了别人的信任；而如果该学术团体对此事不闻不问，听之任之，这个学术团体的声誉便会大幅下降，人们也就不愿意再参加这样的学术团体了。可见，非交易领域内信任或相互信任的重要性绝对不亚于交易领域，非交易领域内信任或相互信任丧失的严重性也绝对不轻于交易领域。

综上所述，从交易领域到非交易领域，社会信任问题是处处存在的。在交易领域，由于社会信任的丧失，市场秩序必定紊乱，交易者的预期无法确定，现金交易将取代信用交易，甚至实物交易将取代现金交易，人类社会将退回到原始的物物交换的阶段。这简直是不可思议的。而在非交易领域，情况则更加难以想象。社会信任丧失了，谁都不敢相信别人，谁也不被别人信任，一切人际关系都崩溃了，一切社会组织都解体了，社会还能稳定和发展吗？

三、提高政府公信力的必要

社会信任是一个过程。在这个过程中，人与人之间的交往和企业与企业之间的交易活动，都是依靠信任的不断累积而展开和扩大的。政府作为一个行为主体，它时时刻刻同公众打交道，同企业打交道，这里同样存在着相互信任问题：公众和企业信任政府，政府也信任公众和企业。这种相互信任也是不断累积的。如果包括政府在内的各个行为主体之间缺少信任，社会肯定紊乱无序，社会风气也肯定不正。

我们仍然可以从交易领域和非交易领域这两个不同的领域进行分析。

以交易领域来说，所有的人只要一进入交易领域，便都以交易者的身份出现，他同对方的关系都以交易领域通行的规则为准，不能逾越法律底线和道德底线。政府作为行为主体之一，同样应当如此。比如说，政府作为采购者，它要从企业那里采购所需要的各种产品和服务。在这

种场合，政府作为买方，企业作为卖方，买方与卖方应当按相关的法律法规和规章制度进行，诚信是双方共同遵守和奉行的准则。又如，政府作为土地供给方，它向房地产商提供土地，房地产商作为需求一方，依循一定的法律法规和规章制度取得土地，诚信依旧是双方共同遵守和奉行的准则，政府也不例外。在交易领域内，买卖双方的地位是平等的，政府无论作为买方还是作为卖方，都不能凌驾于另一方之上。只有双方地位平等，又都遵守交易领域的规则，相互信任才能建立。

非交易领域内的情况要比交易领域内复杂一些。要知道，非交易领域内，除了人与人之间的交往、家族与家族之间的交往，以及家族内部、各种社会团体内部的成员间关系而外，还包括了政府同社区、社会团体、家族、家庭和个人之间的关系。比如说，个人向政府和政府下属部门缴纳税费，这就不是买卖双方之间的交易关系。又如，社会上存在着灾民、孤儿、低收入家庭，政府和政府下属部门按照规定给他们的救济，这也不是买卖双方之间的交易关系。至于政府的司法机构、治安机构等处理公众之间的各类纠纷时所扮演的角色，那就更不是交易双方的关系了。尽管如此，政府和政府下属部门都必须讲信用，同当事人之间建立相互信任的关系，而不能违背法律法规和规章制度而自行其是。

需要进一步讨论的是，无论是在交易领域还是在非交易领域，政府如何取得公众和企业的信任？政府同公众、企业之间的相互信任是如何建立的？即使在专制社会中，这类问题也是同样存在的。虽说在专制制度下的中国，皇权至上，臣民俯首听命于朝廷，但从明清两代对科举制度的重视和对违法违规行为的严厉惩处可以看出，皇权总是力图保证科举制度的公平和公正。为什么会这样？这正是为了维护皇权在公众面前的公信力，因为公信力降低了，皇权的巩固也就受到了威胁。又如，在中国过去历朝历代，为什么皇权一直表彰“清官”，同样是为了增强朝廷的公信力。因为公众认为“清官”代表了皇权的可信度。在民主制度之下，无论是资本主义国家还是社会主义国家，政府的公信力更加引起社会的关注。政府自身更要不断提高公信力。民主制度和专制制度的重要区别之一在于：在民主制度下，公众和企业都具有比专制制度之下多得多的自由选择机会。“此处不留人，自有留人处”：移民国外，从这一城市迁往另一城市，从这种职业改为另一种职业，作为投资者还可以撤走自己的投资，或从这一投资领域转向另一投资领域，等等。公众和企业可以有较多的机会通过不同的渠道申诉自己的意见，批评某一主管部门

的所作所为，包括揭露某些机构和某些办事人员的贪赃枉法行为。这样，政府要维护自己的公信力就比过去难得多。专制制度下政府惯用的封锁信息、强制推行某些措施，甚至用高压手段来钳制舆论的做法，在民主制度下已经失去了制度的基础。

换言之，在民主制度下，公众和企业正因为有了自由选择的机会，所以政府必须适应新的情况采取增加自身公信力的办法。这正是法治社会同非法治社会的区别。比如说，在交易领域内，政府无论是以买方身份出现，还是以卖方身份出现，或者以合作投资者的身份出现，都应当遵守法律法规，遵守合同。这才能取得交易另一方或合作投资另一方的信任。如果合同尚未签订，交易的另一方或合作投资的另一方可以根据政府以往的履约状况作出选择：签约还是不签约。如果合同已签，交易已在进行，交易的另一方或合作投资的另一方至多吃亏一次，下一次就不会再同政府来往了。政府不履行合同，不实践承诺，就是自毁信用，难以得到公众和企业的信任。交易领域内双方是平等的，甲方在选择乙方，乙方也在选择甲方，法律底线和道德底线谁也不敢突破。

在非交易领域内，政府的作用是特殊的。正如前面已经指出的，政府并不以交易者的身份，而通常是以公共事务管理者和服务者的身份出现。在这种场合，要维护、提高政府的公信力就不是遵守交易规则之类的问题，而且首先是摆正政府位置的问题。政府在交易领域内虽然可以成为交易的另一方或合作投资的另一方，但政府同时也是公共事务的管理者和服务者。无论交易的双方都是企业，还是交易的一方是企业，政府作为公共事务管理者和服务者这一职能始终是存在的。而在非交易领域，政府则一直充当公共事务管理者和服务者的角色，为公众而管理公共事务，为公众服务。因此，在非交易领域，政府要维持和提高自身的公信力，主要应在充当公共事务管理者和服务者时取得公众的信任。如果政府工作人员滥用权力，偏袒某些人而使另一些人受到不公正待遇；或者隐瞒事实真相，欺骗了公众；甚至利用管理公共事务的权力，破坏法律法规，突破道德底线，获取私利，那只能使政府的公信力降低，使公众对政府的信任度大大降低。

政府无论在交易领域内的公信力还是在非交易领域内的公信力，都是逐渐累积而成的。增加政府的公信力要靠日积月累，而损毁政府的公信力则很可能只在顷刻之间，正如修筑一条大堤一样，筑堤靠长期的垒土、维护、加固，而大堤被冲垮，却可能在一场特大暴雨之后。政府对

这一点必须有清醒的认识，时时保持警惕，不要使自身的公信力毁于一旦。

要提高政府的公信力，主要应从以下四个方面着手：

第一，尽管法律、法规和政策在开始制定时不一定是完善的，但有法律、法规和政策可遵循总比缺少法律、法规和政策要好，否则便会形成无法可依、无政策可循的格局，进而造成政府工作人员在公共事务管理中的随意性扩大，使政府的公信力降低。当然，法律、法规 and 政策的制定应当尽可能科学、合理，并听取专家学者、有经验的政府工作人员和公众代表的意见，在出台后要通过多方面的调查了解法律、法规 and 政策的实施状况，发现问题和不足，再根据程序进行修改。而在修改前，仍应维持法律、法规 and 政策的稳定性，不能随意变更，否则同样会降低政府的公信力。

第二，政府工作人员的诚信意识必须加强。这是因为，公共管理事务是具体的政府工作人员从事的，正是他们代表了政府的形象，处在同公众接触的第一线。公众对政府的信任度降低，在不少场合是由于具体的政府工作人员不依法办事、不遵循政策、不守信用等所造成的。至于政府工作人员倚仗手中的权力获取私利，接受贿赂，甚至索取贿赂等行为，更会败坏政府的公信力。因此，必须有一定的监督政府工作人员诚实守信、廉洁奉公的机制，以维护政府工作人员和政府部门的形象。

第三，由于我国至今仍处在由社会主义计划经济体制向社会主义市场经济体制转轨的过程中，改革有待于深化，所以要把提高政府公信力与深化体制改革结合起来。在计划体制下所实行的公共事务管理办法，早已不适合市场经济体制。交易领域内，权力一旦介入了交易，就会有寻租活动，这在计划体制下和体制转轨时期是容易发生的。这是因为，在计划体制下盛行着配额的制定和分配，这些都是在权力操纵下实现的，于是寻租活动便有了滋生的温床。在体制转轨时期，配额制度在某些行业还保留着，而双轨制的施行则是体制转轨时期的特点，双轨制之下同样有可能引发寻租活动。这些都会增加公众对政府的不信任。非交易领域内，由于社会上某些公共产品的供给往往少于公众对公共产品的需求，所以在供求关系紧张时，主管部门和相应的政府工作人员便有可能利用手中的权力介入公共产品的供求关系之中。社会上近年来反映较多的是：中小学校的学生择校，幼儿园的进入，患者的择医院和择医师，保障性住房供给中需求方的择地点，等等。这样，无论是交易领域

还是非交易领域，深化体制改革都是必要的。交易领域内的配额制度、政府采购制度、双轨制度、行业垄断制度的继续存在，在很大程度上与体制改革未能到位有关。而非交易领域内的公共产品的供给和公共产品分配中的公平问题，也只有在深化体制改革中才能解决。可见，深化体制改革是同提高政府的公信力紧密联系在一起的。

第四，由于现代经济是一种信用经济，在这样的经济中，政府作为行为主体之一，无论是在交易领域内还是在非交易领域内，都必须讲诚信、守信用。然而，现代经济体系是一个信用体系，并不是单靠某一类行为主体就能构建完善的信用体系。政府不仅作为交易者，而且作为公共事务管理者和服务者，置身于这样的社会信用体系之中。因此，作为公共事务管理者和服务者的政府有责任帮助和促成社会信用的建设，这也是有助于提高政府与企业与公众之间的互信度的。换言之，建成社会信用体系是提高政府的公信力的措施之一。

究竟什么是社会信用体系，如何建设社会信用体系，以及政府在这方面可以发挥哪些作用，将在下文进行论述。

四、社会信用体系的建设

社会信用主要包括三个方面：一是个人信用，二是信用中介机构的信用，三是企业的信用。

个人的信用是指：个人作为社会成员和作为市场中的交易者，其信用究竟如何，应当被他人所了解，被信用中介机构所了解，这样才能在信用社会和信用经济中同别人交往，被交易对方所认可。要建设社会信用体系，就应当对个人的信用有合适的评估制度，并建立个人的信用档案。

信用中介机构的信用是指：从事信用调查、信用征集、信用咨询服务、信用评估、信用担保等信用中介业务的机构本身就有信用问题，它们是否可信，它们是否公平公正，以及它们作为信用评估机构所评估的结果是否具有权威性。它们的权利与责任是否对称，也同样被人们所关注。如果银行、保险、证券、信托等企业设立了有关收集个人、企业信用的征信部门，它们也应包括在信用中介机构体系之内。

企业的信用是指：除了信用中介机构以外的一切企业，包括银行、保险、证券、信托等行业的企业，都存在信用问题。对企业来说，企业

资产的实际状况、企业负债状况、企业负债的偿还能力、企业盈利状况、企业信誉状况及企业信用的管理状况等，都是社会关心的问题。对金融业的企业来说，除了上述企业的信用问题外，还有特殊的问题，例如，银行向企业贷款的风险，银行发出的信用卡的风险，银行向个人贷款的风险，银行可能遇到的国际金融冲击，银行的抗风险能力，等等。这些同样是社会所关心的。

因此，社会信用体系实际上由三个体系所组成，即由个人信用体系、信用中介机构信用体系和企业信用体系所组成。有一种看法是，信用中介机构信用体系的范围应当拓宽些，除了信用评估机构外，还应当把资产评估机构、会计师事务所、审计机构、律师事务所等包括在内，因为它们的工作也涉及信用评估问题，它们工作的结果之一也是向社会表明某些个人和企业的信用状况，因此，这些机构自身的信用是十分重要的。一个自身的信用不可靠的中介机构的工作结果能有多大的可信度呢？

那么，政府在社会信用体系的建设中应当发挥什么样的作用？政府本身的信用是否也应纳入社会信用体系呢？这是两个性质不同的问题，需分别论述。

首先，政府在社会信用体系的建设中应当发挥什么样的作用？扼要地说，政府应在以下四个方面发挥作用：第一，通过法律法规，为建设社会信用体系提供良好的法制环境，使得个人信用体系、信用中介机构信用体系、企业信用体系有法可依，有规可循；第二，为社会信用体系的建设提供技术支持，其中最为重要的是，在政府支持下加快信用数据库的建设，也就是说，仅有信用中介机构关心信用数据库的建设是不够的，必须在政府主导下完成社会的信用数据库建设，并实现信息资源的社会共享；第三，以政府工作人员提高诚信、增进政府公信力作表率，带动全社会各行各业从事信用业务的人员提高诚信，坚守从业者的法律底线和道德底线，增加从业者和公众的相互信任；第四，政府应当加强对社会信用的监管工作，目前尤其需要对信用中介机构的信用状况和企业的信用状况进行监管，政府在这方面的作用是任何社会团体（包括行业协会）所无法替代的，这是因为，企业的信用信息分散于银行、税务、海关、质检、司法、工商管理等多个部门内，如果不把这些来自各部门的信息综合起来，统一整理和分析，就难以了解某一个具体企业的实际信用状况，也就难以对这个企业的信用作出符合实际的评估。政府

的这种作用是任何信用中介机构无法胜任的，何况任何一家信用中介机构自身的信用状况也在政府有关部门的监管之列。

其次，政府本身的信用是否也应纳入社会信用体系呢？对这个问题，可以从两个角度进行论述。

一个角度是：政府信用就是国家信用，为了维护国家信用，对内要取信于民，对外要取信于世界各国和国际组织，但这些并不是上述所要建立的社会信用体系所要解决的问题。从技术上看，我们可以依靠各种信用中介机构对企业信用进行评估，可以依靠政府有关部门的信息整合来监管企业信用状况和信用中介机构的评估结果，并且可以根据一定的标准对企业信用状况和信用中介机构的信用状况作出评估，但我们怎样给政府信用打分评级呢？信用中介机构能胜任这项任务吗？它们对政府信用的评估用什么标准可以作为量化的依据？即使有了某种评估，可信吗？这是一个至今尚未解决的难题，有待于深入研究。国外的评估机构如果对中国国家信用作出评估，又有多大的可信度？这个问题，不经过深入研究和讨论依旧是一个难题。

另一个角度是：任何一名政府工作人员的信用状况都不能代表整个国家的信用状况，任何一个地方政府的信用状况也都不能代表国家和中央政府的信用状况。道理是清楚的：政府工作人员个人有自己的操行，有廉洁奉公的政府工作人员，也会有违法、违规、渎职、贪污受贿的政府工作人员。假定出现了后者，可以认为他们损害了政府的形象；假定他们工作于涉外机构，可以认为他们毁坏了国家的形象，但这同国家、政府的信用状况不是一回事。再说，地方政府（从省、市直到县、乡、镇）有违约、撕毁合同、欠账不还等情况，这也会损害地方政府自身的形象；假定这涉及外商的利益，也会毁坏国家的形象，但不能简单地把这些同国家的信用状况画上等号。这是因为，任何一个地方政府的信用代替不了中央政府的信用和整个国家的信用。

当然，对政府工作人员的操守和行为是要进行考核和监督的，不允许他们损坏政府的形象；对地方政府失信于中外企业的状况，要关注，要依法处理，不允许他们作出损坏政府形象、国家形象的事情。这是提高政府公信力和国家信用所必需的。特别是在外商看来，他们总是同某些具体的政府工作人员打交道的，总是同某个具体的地方政府洽谈的，这些政府工作人员和地方政府的违法失信行为，或索贿行为，不可避免地会损害国家的形象。

最后，有必要对行业协会在社会信用体系建设中的作用再做一些分析。行业协会、商会是社会中介组织，它们在建设社会信用体系方面可以发挥更大的作用，如推动行业的自律和行业的自我管理，开展本行业内企业互信、互律、互保、互贷等活动，并主动承接政府某些职能的转移，填补政府职能转变后所出现的空缺。在本行业的部分企业甚至多数企业遇到各种原因造成的信用方面的损失时，行业协会、商会可以代表行业和行业成员的权利，反映行业的诉求，维护行业的权益。同时，行业的发展较快，新行业不断出现，应当推动新的行业协会、商会的筹建。筹建行业协会、商会的原则应当是：自愿发起、自选会长、自筹经费、自聘人员、自主会务。总之，为了增强企业的自律性，支持和鼓励民营企业的发展，提高民营企业家的素质，为了建设完善的社会信任体系，行业协会是可以发挥更大作用的。

CONCLUSION

I believe, on the basis of the foregoing, most readers will agree that regulation by custom and morality should be a focus of academic study in economics research.

Normally, morality and ethics are not in themselves the objects of economic studies, since the main issue of concern to economics is allocation of resources. The efficacy of resource allocation directly influences the degree and fluctuation of efficiency, which in turn has a bearing on normal social and economic operation and improvement or decline in living standards. Therefore, for a long time academic economists have focused on the following questions:

(1) In certain productivity conditions, what kind of economic system or mechanism can bring about more effective resource allocation, more regular social and economic operation and faster improvement in living standards?

(2) Under a certain economic system or mechanism, what means of regulation can bring about more effective resource allocation , more regular social and economic operation and faster improvement in living standards?

(3) In certain productivity conditions, how to make the existing economic system or mechanism transit to a system or mechanism capable of bringing about more effective resource allocation, more regular social and economic operation and faster improvement in living standards?

(4) Under a certain economic system or mechanism, how to make existing means of regulation transform into means capable of bringing about more effective resource allocation , more regular social and economic operation and faster improvement in living standards?

Those questions of interest to economists are beyond the sphere of scholars in other fields including that of ethics. Each discipline has

its own specific research subject and topics.

However, as expounded in this book, what affects resource allocation, socio-economic operations and living standards is not just the power of market or government, but that of custom and morality, not only regulation by market and government, but regulation by custom and morality. Thus, it is impossible for economists to exclude from their research the economic role of regulation by custom and morality. In this sense, research on regulation by custom and morality, like that on regulation by market and government, will bring greater depth, thoroughness and realism to the study of resource allocation, socio-economic operation and living standards. Obviously, such study can be taken as a task of economists or at least a common task of economists and scholars of ethics.

The important role of regulation by custom and morality in resource allocation, socio-economic operation and living standards is reason enough for economists to include it in their research. For further understanding, we can examine the question from two more perspectives, namely the mission of economics and the levels of economics research.

Let us first talk about the mission of economics. In *Economics and Political Science of Socialism*, I have a paragraph: "Having studied economics, one should know what 'is worth aiming for,' what 'ought to be fought for,' what 'is not worth aiming for' and what 'ought not to be fought for' in economy. To be specific, to study economics is for telling right from wrong in economy and for defining what one should approve and what one should deny. Only in this way can one have direction and a sense of right and wrong. This is the social instruction function of economics....Having studied economics and knowing what 'is worth aiming for' and what 'ought to be fought for,' one should further learn how to go about making those aspirations reality as soon as possible. This is the social design function of economics."¹

Therefore, we define economics as a science of social instruction and social design. Proceeding from this definition, we are clear that

things such as moral norms, ethical standards and criteria for judging right and wrong play important roles not only in economic life but in economics research too. As we know, both prescriptive research and empirical research are indispensable for economics. And each method has its application scope. But in economics, prescriptive research is different from empirical research in the fact that the former only involves the judgment of right and wrong whereas the judgment of right and wrong is the precondition of the latter. If prescriptive research has ascertained whether certain economic behaviors should be affirmed or condemned from a moral standpoint, then the empirical research on such economic behaviors will be very meaningful. That is to say, only when there are established criteria for judging right and wrong can economics combine these two kinds of research and play its due role of social instruction and social design.

From a macro perspective, economics as a science of social instruction tells us how to evaluate a system or mechanism, how to formulate and realize social development targets, including how to mobilize initiative and creativity so that people will spontaneously work hard for these targets. The role of moral factors finds full embodiment in such spontaneous effort. As a science of social design, economics tells us how to make reality of the goals that ought to be fought for and how to work out feasible measures. Here the judgment of economic right and wrong is still indispensable: what meaning could such measures have if we cannot explain what social development targets we should be striving for?

Now, let us analyze the levels of economics research and explain why we must give weight to moral factors in economic research.

On this question, I refer readers to what I said in *System, Target & People: Challenges of Economics*: "The reason we call the three research levels of system, target and people the key research topic of our time is because, from the perspective of the rapid development of science and technology, each level reflects a specific aspect of the relation between science and technology and socio-economic change and each

level has a direct bearing on the development of science and technology. Take research on 'system' as a case in point. What kind of economic system can effectively allocate resources and spur the development of science and technology? What new requirements will non-stop development of science and technology make on their economic system? In the course of developing science and technology, in which direction will economic mechanisms evolve? ...Now take research on 'target' as an example. When considering the development of science and technology, how does one integrate economic demands with social demands when drawing up development targets? How to be more realistic when drawing up enterprise targets and suit them to actual state of development of science and technology? ...Take the research on 'people' for example. When science and technology are developing all the time, how will the connotations of welfare change? How are we to understand quality of life? How to ensure that development of science and technology benefits rather than sacrifices the development of people? ..."²

Of these three research levels, the "people" level is seen as the highest. For many years post-1949, when "standard old culture" still existed and the "old culture in new clothes" dominated behavior and distorted minds, all research on "people" was forbidden, as was any discussion on the subject. Referring once more to *System, Target & People: Challenges of Economics*, I ask: "Is 'not starving to death' the meaning of 'welfare'? If people have consumer goods that can maintain the lowest living standard, is that enough? Should workers be satisfied with their life and never ask for better, provided that life now compares favorably with pre-Liberation times when people survived on chaff? What kind of logic is that? Asceticism should never be taken as the moral standard of socialist society. The basic living standard should not be a frontier that people can never cross. In those unprecedented times, many acts violating the interests of the people and of the revolution were performed 'in the name of the people' and 'in the name of revolution.' The formula 'in the name of the people,' so

righteous and convincing, spread asceticism among workers and required them to be self-restrained, while people spending the country's wealth so lavishly 'in the name of revolution' always seemingly so justified and at ease. Your enduring hardship is 'in the interests of the people,' and his unrestrained indulgence is 'in the interests of the people' too. For making things like this seem reasonable, obscurantist policy was essential. Under the rule of such ideology, it is meaningless to talk about improving living standards or realizing socialist production targets."³

In view of this, economics research must foreground the question of concern for, respect for and cultivation of people. In economics, many questions of a fundamental nature can be explained only when they are examined at the level of "people." We should also remember that economic research is conducted by "people," and that they are subjects as well as objects of such study. In other words, economics research is "people-on-people" research, the former being the subjects carrying it out and the latter the objects. But both people are "social people," who live in reality, have their own ideas, aspirations and sentiments and their own judgment of right and wrong, their own choices, experience and lessons. At the same time, people always live as members of one or more groups, and must coordinate with the group, coexist with people around and work hard to realize group target on the basis of their identification with the group. In this process, moral factors keep on influencing them both as subjects and objects, adjusting their attitudes and actions. Without studying the role of moral factors in economics, it is obviously not easy to clarify "people-level" questions, nor will it be easy to offer correct and penetrative explanations to questions at the other two levels—"system" and "target." It follows that economics research cannot avoid going into morality and ethics.

结束语

我相信，读者在阅读了本书的前言和以上七章之后，大多会对经济学界是否应当研究习惯与道德调节问题有一个肯定的回答：应当进行这方面的研究。

照理说，道德、伦理问题本身并不是经济学的研究对象，经济学是不专门讨论这一领域的问题的，经济学关心的主要问题是资源的配置。资源配置的有效程度直接影响效率的高低与升降，进而关系到社会经济运行的正常与否，关系到社会生活水平的增长与否，因此，长期以来引起经济学界注意的主要问题一直是：

（1）在一定的生产力条件下，什么样的经济制度或经济体制可以使资源的配置较为有效，使社会经济的运行较为正常，以及使社会生活水平得以较快地增长？

（2）在一定的经济制度或经济体制之下，通过哪些调节方式或手段可以使资源的配置较为有效，使社会经济的运行较为正常，以及使社会生活水平得以较快地增长？

（3）在一定的生产力条件下，如果说某种经济制度或经济体制比现行的经济制度或经济体制较有助于资源的有效配置、社会经济的正常运行，以及社会生活水平的增长，那么，怎样才能从现行的经济制度或经济体制过渡到该种经济制度或经济体制呢？

（4）在一定的经济制度或经济体制之下，如果说某种调节方式或手段比现在采用的调节方式或手段较有利于资源的有效配置、社会经济的正常运行，以及社会生活水平的增长，那么，怎样才能从现在采取的调节方式或手段转变为该种调节方式或手段呢？

经济学家所关心的和研究的这些问题，正是包括伦理学家在内的其他学者们不研究的。每一门学科都有自己的特定研究对象、研究课题。

然而，正如本书中已经阐明的，对资源配置、社会经济运行，以及社会生活水平发生作用的，不仅仅是市场力量和政府力量，而且还有习惯与道德力量；能够使资源配置较为有效，使社会经济运行较为正常，以及使社会生活水平得以增长的，不仅仅是市场调节和政府调节，而且还有习惯与道德调节。这样，一直关心资源配置、社会经济运行和社会

生活水平的经济学界，就不可能不涉及对习惯与道德调节在经济中的作用的研究。从这个意义上说，经济学家对习惯与道德调节的研究同他们对市场调节、政府调节的研究一样，都是为了把资源配置、社会经济运行和社会生活水平增长问题研究得更深入、更透彻，也更接近于客观实际。这些研究显然可以被列为经济学的任务，至少可以认为这是经济学家和伦理学家共同的研究任务。

单凭习惯与道德力量对资源配置、社会经济运行和社会生活水平增长的作用来判断，就已经有足够的理由说明经济学界应当研究习惯与道德调节问题了。如果我们再从以下两个角度对这个问题进行考察，那将会有进一步的认识。这两个角度是：第一，从经济学的使命的角度来考察；第二，从经济学研究层次的角度来考察。

先谈谈经济学的使命。我在《社会主义政治经济学》一书中这样写道：

“学习了经济学之后，应当了解在经济中什么是‘值得向往的’、‘应该争取的’，什么是‘不值得向往的’、‘不应该争取的’。具体地说，学习经济学，是为了明辨经济中的是非，明确应该肯定什么，应该否定什么。因为只有这样，才会有方向，有是非感。这就是经济学的社会启蒙作用。

……

学习了经济学，并且在明确了什么是‘值得向往的’、‘应该争取的’之后，就应该进一步去了解，为了使那种‘值得向往的’或‘应该争取的’目标得以尽快地实现，应该怎么做，应该做些什么。这就是经济学的社会设计作用。”¹

因此，我把经济学定义为社会启蒙和社会设计的科学。根据这样的定义，我们可以十分清楚地了解到，道德规范、伦理标准、是非判断等，不仅在经济生活中有着重要作用，而且在经济研究中也起着重要作用。要知道，经济学中的规范研究和实证研究都是不可缺少的，各有各的适用范围，但经济学的规范研究之所以不同于实证研究，关键在于规范研究涉及了是非判断，而非判断往往是实证研究的前提。假定通过经济学的规范研究已经明确某种经济行为在道德上是应当予以肯定的或应当予以否定的，那么对这种经济行为的实证研究才更有意义。也就是说，只有在既定的是非判断的前提下，经济学的实证研究才能同规范研究一起，发挥应有的社会启蒙和社会设计的作用。

从宏观的角度来看，经济学作为社会启蒙的科学，告诉人们应当怎

样评价一种制度或体制，应当制定什么样的社会发展目标，并告诉人们如何去实现这一社会发展目标，包括激发人们的积极性、创造性，自觉地为这一目标的实现而努力。道德力量在这方面的作用是充分体现于人们的这种自觉性之上的。经济学作为社会设计的科学，告诉人们怎样把应当争取的社会发展目标变为现实，提出切实可行的实施方案。但这仍然离不开经济学中的是非判断，因为如果不能说明什么样的社会发目标是应当争取的，实施方案又有什么意义呢？

接着，让我们来分析一下经济学研究的层次，并由此说明经济学研究中重视道德力量的作用的必要。

关于这个问题，我在《体制·目标·人：经济学面临的挑战》一书中曾说过：

“我们之所以把‘体制’、‘目标’、‘人’这三个研究层次的问题称做时代所提出的重大研究课题，从科学技术迅速发展的角度来看，是因为其中每一个层次反映了科学技术同社会经济变化之间的特定方面，每一个层次的研究都与科学技术的发展直接有关。

以‘体制’的研究为例。什么样的经济体制能有效地配置资源，以促进科学技术的发展？科学技术的不断发展又将对经济体制提出哪些新的要求？科学技术发展过程中，经济体制将会朝着什么方向演变？……

以‘目标’的研究为例。考虑到科学技术的发展，在发展目标方面应当如何把经济上的要求与社会上的要求联结在一起？企业单位在制定目标时，应当如何趋于现实化，以适应科学技术发展的形势？……

以‘人’的研究为例。在科学技术日益发展的条件下，福利的含义会有什么样的变化？如何认识生活质量问题？怎样才能使科学技术的发展真正有益于人的发展，而不至于把人变成科学技术发展的牺牲品？……”²

在三个研究层次中，“人”这个层次被看成是最高层次。在1949年以后的很长时期内，在“标准的旧文化”依然存在而“改装的旧文化”却不断支配着人们的行动、腐蚀着人们的思想的年代里，对“人”的研究是一个禁区，不容许讨论与“人”有关的理论问题。在《体制·目标·人：经济学面临的挑战》一书中，我写道：

“难道‘饿不死人’就是福利的含义么？人们能有维持最低生活标准的消费品就行了么？劳动者的生活只要同解放前吃糠咽菜的日子回忆对比就理应满足，不必再提出生活质量提高的要求了么？这究竟是一种什么

样的逻辑呢？禁欲主义决不是社会主义的道德规范，起码的生活标准也决不当成为劳动者不可逾越的界限。何况，在史无前例的那些年内，不少违背人民利益、革命利益的事情，正是‘以人民的名义’或‘以革命的名义’进行的。‘以人民的名义’向劳动者宣传禁欲和要求他们在生活上一再克制的人，总是那么理直气壮，振振有词。‘以革命的名义’大肆挥霍国家财产的人，总是那么心安理得，处之泰然。你们吃苦，是为了‘人民的利益’；他恣意享受，也是为了‘人民的利益’。为了把当时的现实生活中所存在的这一切说成是合理的，愚民政策显然不可缺少。在这种意识形态的统治下，哪里还谈得上提高居民的生活质量，谈得上实现社会主义生产目的呢？”³

由此可见，经济学研究必须把对人的关心、尊重、培养放在突出的位置上：经济学中许多带有根本性的问题，只有提到“人”这个层次来考察时，才能最终说明。不仅如此，我们还应当懂得，经济学研究是由“人”来进行的，“人”既是经济学研究的主体，又是经济学研究的对象。换言之，经济学研究是“人”对“人”的研究，前一个“人”是指经济学研究的主体，后一个“人”是指经济学研究的对象。但无论是前一个“人”还是后一个“人”，都是“社会的人”，是一个生活在现实社会中，有自己的思考、自己的抱负、自己的喜怒哀乐的人，也是一个有自己的是非判断、自己的取舍、自己的经验和教训的人。同时，他总是生活在一定的群体之中，是这个或那个群体中的一员，他要同群体相协调，要同周围的人共处，还要在与群体认同的基础上为实现群体的目标而努力。道德力量对作为经济学研究主体的“人”和作为经济学研究对象“人”不断地施加影响，调整他们的观念，调整他们的行为。不研究道德力量在经济中的作用，“人”这个层次的问题显然不可能说清楚，即使是“体制”这个层次的问题或“目标”这个层次的问题，也可能不易得到正确的、深刻的解释。这就表明经济学研究不能回避道德伦理的研究。

9 In my book *The Shareholding System and Modern Market Economy*, I wrote: "'Sharing a big pot' was undoubtedly egalitarianism, but in reality it never meant 'eating from the same pot.' If you are curious enough, please read the novel *Outlaws of the Marsh*. Among the rebels gathered on Liangshan there were two big pots. Each pot itself meant egalitarianism, and two pots meant egalitarianism at two levels. Which pot you ate from depended on the level you belonged to." (See Li, Y. *The Shareholding System and Modern Market Economy*.

Nanjing: Jiangsu People's Publishing House, 1994: 69)

9 我在《股份制与现代市场经济》一书中曾这样写道：“吃大锅饭无疑是一种平均主义。但‘大锅饭’，从来不是一口锅里吃饭。如果读者有兴趣，不妨看一看《水浒传》……（梁山泊）有两口大锅，在每一口锅内部是平均主义。这是两口锅的‘大锅饭’……你属于那一个档次，就在那口锅里吃大锅饭；你属于这一个档次，就在这口锅里吃大锅饭。”（厉以宁：《股份制与现代市场经济》，江苏人民出版社1994年版，第69页）

10 "Under the planned economy, citizens actually stood in a subject-master relationship to administrators. Both the nature and place of work for individuals were fixed by labor or personnel departments without reference to personal preference. To resist the arrangement was to forfeit the change of a job." (See Li, Y. *The Shareholding System and Modern Market Economy*. Nanjing: Jiangsu People's Publishing House, 1994: 446)

10 “在计划经济体制之下，居民个人实际上也处于行政部门附属物的地位。个人作为劳动者，在什么工作岗位上就业和担任什么工作，都由劳动人事机构按计划安排好，流动难以如愿，抵制这种安排等于自己断送了再工作的机会。”（厉以宁：《股份制与现代市场经济》，江苏人民出版社1994年版，第446页）

王佐良（1916-1995），学者、诗人、翻译家，浙江上虞人。专于英国文学和中西文学比较研究。曾任北京外国语学院副院长、外国文学研究所所长，《外国文学》主编，国务院学位委员会外国文学评议组组长，全国政协委员，中国莎士比亚学会副会长，中国英语教学研究会会长等职。

主要代表作有《英国文学史》、《英国诗史》、《英国散文的流变》、《莎士比亚绪论》等

“博雅双语名家名作”出版说明

1840年鸦片战争以降，在深重的民族危机面前，中华民族精英“放眼世界”，向世界寻求古老中国走向现代、走向世界的灵丹妙药，涌现出一大批中国主题的经典著述。我们今天阅读这些中文著述的时候，仍然深为字里行间所蕴藏的缜密的考据、深刻的学理、世界的视野和济世的情怀所感动，但往往会忽略：这些著述最初是用英文写就，我们耳熟能详的中文文本是原初英文文本的译本，这些英文作品在海外学术界和文化界同样享有崇高的声誉。

比如，林语堂的*My Country and My People*（《吾国与吾民》）以幽默风趣的笔调和睿智流畅的语言，将中国人的道德精神、生活情趣和中国社会文化的方方面面娓娓道来，在美国引起巨大反响——林语堂也以其中国主题系列作品赢得世界文坛的尊重，并获得诺贝尔文学奖的提名。再比如，梁思成在抗战的烽火中写就的英文版《图像中国建筑史》文稿（*A Pictorial History of Chinese Architecture*），经其挚友费慰梅女士（Wilma C. Fairbank）等人多年的奔走和努力，于1984年由麻省理工学院出版社（MIT Press）出版，并获得美国出版联合会颁发的“专业暨学术书籍金奖”。又比如，1939年，费孝通在伦敦政治经济学院的博士论文以*Peasant Life in China—A Field Study of Country Life in the Yangtze Valley*为名在英国劳特利奇书局（Routledge）出版，后以《江村经济》作为中译本书名——《江村经济》使得靠桑蚕为生的“开弦弓村”获得了世界性的声誉，成为国际社会学界研究中国农村的首选之地。

此外，一些中国主题的经典人文社科作品经海外汉学家和中国学者的如椽译笔，在英语世界也深受读者喜爱。比如，艾恺（Guy S. Alitto）将他1980年用中文访问梁漱溟的《这个世界会好吗——梁漱溟晚年口述》一书译成英文（*Has Man a Future?—Dialogues with the Last Confucian*），备受海内外读者关注；此类作品还有徐中约英译的梁启超著作《清代学术概论》（*Intellectual Trends in the Ch'ing Period*）、狄百瑞（W. T. de Bary）英译的黄宗羲著作《明夷待访录》（*Waiting for the Dawn: A Plan for the Prince*），等等。

有鉴于此，外语教学与研究出版社推出“博雅双语名家名作”系列。

博雅，乃是该系列的出版立意。博雅教育（Liberal Education）早在古希腊时代就得以提倡，旨在培养具有广博知识和优雅气质的人，提高人文素质，培养健康人格，中国儒家六艺“礼、乐、射、御、书、数”亦有此功用。

双语，乃是该系列的出版形式。英汉双语对照的形式，既同时满足了英语学习者和汉语学习者通过阅读中国主题博雅读物提高英语和汉语能力的需求，又以中英双语思维、构架和写作的形式予后世学人以启迪——维特根斯坦有云：“语言的边界，乃是世界的边界”，诚哉斯言。

名家，乃是该系列的作者群体。涵盖文学、史学、哲学、政治学、经济学、考古学、人类学、建筑学等领域，皆海内外名家一时之选。

名作，乃是该系列入选标准。系列中的各部作品都是经过时间的积淀、市场的检验和读者的鉴别而呈现的经典，正如卡尔维诺对“经典”的定义：经典并非你正在读的书，而是你正在重读的书。

胡适在《新思潮的意义》（1919年12月1日，《新青年》第7卷第1号）一文中提出了“研究问题、输入学理、整理国故、再造文明”的范式。秉着“记载人类文明、沟通世界文化”的出版理念，我们推出“博雅双语名家名作”系列，既希望能够在中国人创作的和以中国为主题的博雅英文文献领域“整理国故”，亦希望在和平发展、改革开放的新时代为“再造文明”、为“向世界说明中国”略尽绵薄之力。

Degrees of Affinity

论契合

Studies in Comparative Literature

比较文学研究集

PREFACE

These essays, mostly written after 1980, a few dating back to the nineteen forties, all have one central idea: affinity between authors and between literatures. The idea must have been at the back of my mind for many years, but only recently did I fully realize its importance. Momentous changes often occur when a foreign literature satisfies a sore need of an indigenous literature, thus developing a strong affinity, which is however seldom purely literary, for social, cultural, economic and other factors are always at work. A more dramatic situation arises when an old literature meets a new, the former backed up by a long and resilient classical tradition, the latter armed with an innovative aesthetic or a militant ideology. Such has been the case of Chinese literature vis-à-vis Western literature in the twentieth century. Such, too, is my main enquiry in the essays in Part One.

Part Two deals with affinity of other kinds. The first essay, excerpted from my earlier book *The Literary Reputation of John Webster* (Salzburg, 1975), takes up the affinity between Charles Lamb and the Jacobean dramatists. The other two reveal a Chinese concern for Celtic works, itself a sign of this country's expanding interest in world literature.

Nearly all the essays have appeared in periodicals in China or abroad, including *Chinese Literature* (Beijing), *Life and Letters Today* (London), *O' Casey Annual* (London), *Studies in Scottish Literature* (University of South Carolina), *Wai Guo Yu* (Shanghai), *Waiyu Jiaoxue yu Yanjiu* (Beijing) and *Wen Yuan* (Beijing).

Various friends and colleagues have helped, in the course of my writing these essays, with suggestions, criticisms, or stimulating discussions. To my tutor at Nanyue and Kunming, the late Sir William Empson, I owe my initiation into poetics. My supervisor at Oxford,

Professor F. P. Wilson, also much missed, taught me the rigours and delights of literary scholarship. Still another teacher, Professor Qian Zhongshu, sets all of us an example of broad erudition that traverses many centuries and literatures. My boon companions in intellectual and other matters have been, since we were classmates together at Tsing Hua or Lianda, Professors Li Funing and Yang Zhouhan of Beijing University and Professors Xu Guozhang and Zhou Jueliang of Beijing Foreign Studies University. My wife, who edits and transcribes nearly all my MSS and typed portions of this one, has over the years shared with me the exhilaration of seeing a job finished as well as the dismay in finding it less than perfect afterwards. What she will think of this work a year hence I am not at all sure, but as with all my earlier publications I alone am responsible for all errors and deficiencies. I also owe a debt to my young colleagues in the Institute for Researches in Foreign Literatures, newly set up within the Beijing Foreign Studies University, where the lively sessions on Tuesday afternoons have never failed to sharpen my wits as well as to broaden my outlook. Indeed, it is to the young that one looks for bringing about greater affinity between literatures and peoples.

Wang Zuoliang

March 1985

Beijing Foreign Studies University

序言

本论文集集中的文章大多在1980年以后写成，有几篇可追溯至20世纪40年代，但所有的文章都围绕一个中心：作家之间、文学之间的契合。这个主题一定萦绕在我心头多年了，只是近期我才完全意识到其重要性。当外国文学的输入解决了本土文学的迫切需求时，本土文学就会应时而动，发生巨变，并同时与外国文学产生契合；而这时的契合就不仅是文学间，也涉及到社会、文化、经济和其他方面。倘若一种古老的文学与一种新兴的文学相遇一处，前者有着悠久而弹性十足的古典传统，后者又拥有富有创意的美学或激进的意识形态，契合与碰撞就会更加精彩。这即是20世纪中国文学与外国文学的相遇，也是本书第一部分主要探讨的内容。

第二部分探讨几类不同的契合。第一篇摘自我之前写的《约翰·韦伯斯特的文学声誉》（萨尔斯堡，1975），探讨查尔斯·兰姆和詹姆士一世时代剧作家 [1] 之间的契合。另外两篇探讨中国人对凯尔特文学的关注，这本身就体现了中国对世界文学愈发广泛的兴趣。

几乎所有这些文章都在中国或外国的期刊上发表过，比如《中国文学》（北京）、《今日生活与来信》（伦敦）、《奥凯西年鉴》（伦敦）、《苏格兰文学研究》（美国南卡罗来纳大学）、《外国语》（上海）、《外语教学与研究》（北京）和《文苑》（北京）。

我写作期间，很多朋友和同事给予了莫大的帮助，或给出建议，或提出批评，或促发讨论。感谢我在南岳和昆明的导师，已故的威廉·燕卜荪爵士，是他带我走进了诗学的大门。牛津的导师F. P. 威尔逊教授也是我常怀念的人，他教会了我文学研究的严谨与愉悦。另外还有一位导师是钱锺书教授，先生经年累月学贯中西的素养实为我们所有人的楷模。还要感谢从清华和西南联大以来就是学术上以及其他方面的良师益友——北京大学李赋宁教授、杨周翰教授，北京外国语学院许国璋教授、周珏良教授。

我的妻子几乎编辑和誊写了我的所有手稿，本书的一部分内容也是她打出的。这些年来她与我一起分享完成工作时的喜悦以及后来发现瑕疵时的沮丧。本书出版一年后，她将怎样看待它，我丝毫不知；但就如

同我之前出版的所有著作一样，我对书中的所有错误和不足负全责。我还要对北京外国语学院新创建的外国文学研究所的年轻同事们表示感谢。每周二下午，这里热烈的学术讨论都能让我开拓思路并产生新的思想火花。的确，文学之间、民族之间更多的契合要仰仗年轻人去开拓。

王佐良

1985年3月

于北京外国语学院

I ON AFFINITY BETWEEN LITERATURES

When one reads James Wright's poem, entitled: As I Step Over a Puddle at the End of Winter, I Think of an Ancient Chinese Governor, and comes to lines like:

Did you find the city of isolated men beyond mountains?
Or have you been holding the end of a frayed rope
For a thousand years?

one finds unmistakable affinity between an American poet writing about his solitude on the bank of the Mississippi in the 1960s and a Chinese poet sitting uneasily in a boat being towed upstream on the Yangtze in the ninth century. When one marvels at Dai Wangshu's Chinese translation of Baudelaire's *Fleurs du Mal* or of Federico García Lorca's "Romance de la Guardia Civil Española", one finds affinity too between translator and poet, though it varies in scope, depth or intensity from poem to poem.

Affinity works in all sorts of ways. It is not restricted to any one period, but can cut across centuries. Revival of interest in ancient authors shows affinity at work between one generation and another. Charles Lamb's *Specimens of English Dramatic Poets Who Lived About the Time of Shakspeare* revealed a Romantic interest in Jacobean drama which was to find a modernist sequel in T. S. Eliot's revaluation of Webster and Tourneur in the next century.

Perhaps the most thought-provoking kind of affinity is to be found where people least expect it: between literatures of widely divergent languages and traditions.

There has been such affinity between Chinese and European literature from 1900 onwards. On the face of it, nothing could be wider apart than these two, each with a distinct social and cultural background of its own.

Yet after the Chinese had suffered repeated military defeats at the hands of the Europeans in the second half of the nineteenth century, a cultural situation arose in China marked by a mounting interest in Western technology and institutions. From 1896 to 1908, Yan Fu took it upon himself to introduce to the scholar-mandarins a whole new ideology by translating some of its basic books, ranging from *De l'esprit des lois* and *The Wealth of the Nations* to *On Liberty*. There was still some doubt about whether the Europeans, devilishly clever as they appeared to be in building steamships and forging howitzers, had any polite literature. This was effectively dispelled by Lin Shu's translations of Western novels, ranging from Alexandre Dumas fils's *La Dame aux Camélias* to Charles Dickens's *David Copperfield*, which revealed the depth of their feeling as well as, in some cases, the refinement of their manners. Mrs. Harriet Stowe's "protest" novel, *Uncle Tom's Cabin*, which Lin also translated, made both the translator and his readers indignant over black slavery and apprehensive about yellow slavery, a fate that seemed to be hanging over the heads of the Chinese.

English Romantic poetry made its impact too, at first mainly by quotable lines of a political significance. Three Chinese versions of Byron's "Isles of Greece" appeared in quick succession in Shanghai at the turn of the century and the translators were, respectively, a half-Japanese monkpoet, a German-trained educationist and Dr. Hu Shih, a disciple of the American pragmatist philosopher John Dewey. These versions, of varying degrees of accuracy and poetic felicity, appealed to an intelligentsia who were getting daily more restive under the rule of the Qing emperors. Thus they were extraordinarily stirred when they came to lines like:

'Tis something, in the dearth of fame,
Though link'd among a fetter'd race,
To feel at least a patriot's shame,
Even as I sing, suffuse my face;
For what is left the poet here?
For Greeks a blush—for Greece a tear.

Must we but weep o'er days more blest?

Must we but blush?—Our fathers bled.

Soon enough, they also bled, in insurrections which eventually overthrew the Manchu Dynasty¹ and established a Republic.

Shelley's "Ode to the West Wind", translated somewhat later by the poet-historian Guo Moruo, stirred a new generation of Chinese intellectuals. The line most often quoted—and not by poets alone, but also by revolutionaries in prison and even on the eve of their execution—was the ending:

If Winter comes, can Spring be far behind?

Perhaps that was precisely the kind of effect Shelley meant to achieve, but did he have any idea that it would be so fully realized in distant China?

In all this, one sees affinity.

With the rise of the New Culture Movement of 1919, things took a more decisive turn. There occurred a gigantic language reform. All writings, except official notices, antiquarian essays, and polite verses for ceremonial occasions, were henceforth to be done in *baihua*, the plain speech, instead of *wenyan*, the literary medium which had remained virtually unchanged for over a thousand years. Many to this day lament this rash change, particularly poets of the old school, but it certainly facilitated, among other things, translation of foreign works, literary and otherwise. *The Communist Manifesto* was translated from a Japanese version in 1920, and soon China was convulsed in changes that shook the world. For that slim book showed the Chinese intelligentsia and the nascent working class that there could be a juster, more equitable society than the bourgeois democracy many of their elders had been hankering for. The immediate task, however, was to deal with problems arising out of a medievalism which was supposed to be moribund but actually still had plenty of kicks left. Here again translation of foreign literary works proved to be helpful. Ibsen's *A Doll's House* touched a chord in every feminist heart in China,

which however only caused the sardonic Lu Xun to ask, "What happened to Nora after she left her husband?"

For Lu Xun found affinity elsewhere, namely, between the suffering masses of Eastern Europe and those of China. He started his literary career by writing an essay on the "Satanic" Byron and translating the short stories from Poland and Russia. A medical man by training, he believed in Darwinian evolution but in his later years moved on to Marxism, translating with stubborn passion the treatises on art and literature by Lunacharsky and other Soviet theoreticians. In between he wrote his own stories which, classically Chinese in their economy of words, were European in their approach, structure, atmosphere, down to their direct, abrupt way of presenting dialogue, a novelty in Chinese fiction. He practised the art of earthbound realism, etching sharply a few significant details, but always managed to stop this side of dullness by his feeling for poetry. A giant bestriding both the classical Chinese and the surging modern worlds, he actively supported those new trends in art and literature that voiced the protest of the poor against the rich—the terrifying etchings of Käthe Kollwitz and the intense, vigorous woodcuts of the young left-wing artists of Shanghai. There were also bonds of sympathy between him and Bernard Shaw the iconoclast, as also between him and progressive American journalists—Agnes Smedley, Edgar Snow and Harold Isaacs.

Thus affinity between Chinese and Western literature in the twentieth century has had many manifestations, but never purely literary. Confronted with an acute problem of survival, China has been attracted by those elements in Western culture that answered to her needs and aspirations at a particular point of time. Many literary endeavours were impelled by a sense of crisis.

Has there not been repulsion also? Yes, of course. Different sections of Chinese writers were repulsed by different things in Western literature: some by its pandering to popular taste for sex and violence, others by its abstruse over-abstraction, still others by its

exaggerated sense of its own importance or enlightenment. But even in repulsion there was attraction of opposites, while the mainstream in both literatures had a lot in common, being subject to the same pressures of modern life and aspiring to express the same hopes for a better world.

How did China's long classical tradition react in these encounters and confrontations? It resisted change, of course. However, it had within itself elements that responded to calls from the outside world. The reason why it had such resilience was precisely that it could in some way or other accommodate modifications and reforms. Even when it failed to contain the onslaught of the new, it acted as a shock absorber and a sieve, for long experience had given it a rare critical sense. Thus when European modernism made its presence felt in the poetry of Dai Wangshu and Bian Zhilin in the thirties, of Feng Zhi and Mu Dan in the forties, the sense of values these poets had imbibed from their classical masters and the harsh realities of the country at the time combined to bring about a transformation which made their writings at once more polished and more earthbound than the European works they admired, so that that modernist phase was soon left behind and the poets went on to wider and greener pastures.

Yet the experience sharpened Chinese poetic sensibility. Dai Wangshu changed his own poetic style in the process of translating Baudelaire and *éluard*. When Bian Zhilin later turned to translating Shakespeare's tragedies, he trained on them an intelligence refined by his earlier acquaintance with Mallarmé and Valéry. Perhaps the most significant case is that of Mu Dan. An ardent admirer of Eliot and Auden, in mid-career he found he couldn't go on writing modernist poetry and so took refuge in translation. After trying his hand at rendering Pushkin and Shelley and Keats and getting creditable results, he achieved his master work in his translation of Byron's *Don Juan*, all 16 cantos of it, in a Chinese verse just as rhythmic, colloquial and spirited as the original. It is odd that it should have taken a Chinese modernist to appreciate the real qualities of Byron, in spite of

Eliot's strictures on his "schoolboy English". In any case, Zha Liangzheng (Mu Dan's real name) brings out to the full Byron's satirical power, conversational ease and unexcelled gift of telling a rattling good story.

The return to Western classics by Chinese translators after 1949, the year of the establishment of the People's Republic, has been on the whole salutary. On the eve of Liberation, the book markets of Shanghai and other cities had been inundated with translations of *Gone With the Wind*, *Forever Amber* and other American best sellers. They too satisfied a need of the common reader. But the deeper recesses of the mind could not be reached by them, nor the hungers of the spirit assuaged. Nor, for that matter, were they models of artistic innovation. Hence, in falling back upon the classical masters of Western literature, sensitive poets, now turned translators, were able to instil a higher sense of values, which also counterbalanced the spread of such Soviet rediscoveries of obscure English novels of a romantic, insurrectionary fervour as Ethel Lilian Voynich's *Gadfly* (1897).

But this does not mean that windows were shut against what was new in the outside world. Only the balance was shifted. All along there had been a strong current in twentieth-century Chinese literature, represented by Lu Xun and Mao Dun, which stressed communion with Eastern European literatures. After 1949, increased attention was paid to contemporary Soviet works, but the sphere was also enlarged to include all that was of lasting value in world literature or what Lenin called "the whole cultural heritage of man". In actual practice emphasis tended to be put on writers who either exposed the evils of the old social order or embraced utopian, socialist or communist ideals, lumped together under the name of "progressives" or "realists". In addition, respects were paid to the "cultural giants", chiefly writers praised or discussed by Marx himself—Homer, Aeschylus, Ovid, Lucretius, Dante, Shakespeare, Cervantes, Burns, Goethe, Cobbett, Shelley, Heine, Dickens, Balzac, etc., an

impressive list which bears out the width of reading of a real "citizen of the world".

Indeed, the idea of "world literature" has never before been taken up with such seriousness and such tangible results in published translations. To mention only a few recent ones: a *Complete Works of Shakespeare* in 11 volumes, *Ramayana* in 7 volumes, *Iliad*, *Odyssey*, *Aeneid*, *Manyoshu*, La Fontaine's *Fables*, Lessing's *Laocoon*, Rousseau's *Confessions*, Keller's *Der grüne Heinrich*, *Don Quixote*, *Don Juan*, *Ivanhoe* (a new version), selected poems of Burns, Wordsworth, Coleridge, Byron, Shelley, Pushkin, Emily Dickinson, anthologies of Sanskrit, Japanese, French, English, Scottish, American poetry, anthologies of English, American, Australian, Russian, French, German, Japanese, Burmese, Mexican short stories, selected plays of Brecht and O'Casey, a comprehensive anthology of *Modernist Writings* in 4 volumes, García Márquez's *One Hundred Years of Solitude* in two Chinese versions. Mention may also be made of the publication of the two volumes on "Foreign Literatures" of the first large-scale modern encyclopedia (still in progress) ever published in China, the proliferation of learned societies and journals devoted to the study and translation of foreign literatures and the spate of papers and articles that accompany such activities. Outside the printed page, there have been Chinese stage productions of Shakespeare's *Othello*, *Macbeth*, *Lear*, *Antony and Cleopatra*, *The Tempest*, *Merchant of Venice*, *Measure for Measure*, *Romeo and Juliet* (one of its several performances in Tibetan dialect), of Molière's *L'Avare*, Brecht's *Galileo*, Arthur Miller's *Death of a Salesman*, Eugene O'Neill's *Anna Christie*, not to mention TV showings of foreign films such as Tolstoy's *Anna Karenina*, Dickens's *David Copperfield* and *A Tale of Two Cities*, Charlotte Brontë's *Jane Eyre*, Hardy's *Tess* and *Mayor of Casterbridge*.

Thus affinity has become widespread, wider than at any time in the past. But how about the depth of understanding? In a sense, widening the field is a way of deepening one's understanding of it. Knowledge of English-language literature is now not confined to the

literature of England, as it used to be. Quite apart from the keen interest in American writers, Irish writers like Yeats and Joyce, Scottish writers like Hugh MacDiarmid and Sorley Maclean, Welsh writers like Dylan Thomas, Commonwealth writers like Patrick White, Margaret Atwood, Chinua Achebe, V. S. Naipaul, R. K. Narayan, Wole Soyinka have all been translated or read. For China's part, an ultra-leftist view of literature and the arts is being replaced by a more rational one, still socialist-oriented but far less dogmatic, which opens out to the world's literature, not closes in to brood on its own theoretical niceties.

Hence there will be deeper as well as wider affinities between Chinese and other literatures.

Literary traffic is rarely one-way. Here, only a Chinese view of the scene is sketched. Another book waits to be written to tell the view from the other side.

What next? Large questions remain. In an age marked by worldwide nuclear threat, how will literature survive? For the moment, how should literature cope with the tremendous technological advances? How will the rapid new means of communicating with each other and the use of ever more sophisticated computers affect the world's creative writing?

Those who believe in one world naturally look forward to the kind of literature that traverses languages and cultures, as is advocated by Hugh MacDiarmid in his later years:

Knowledge and, indeed, adoption (*Aneignung*)

Of the rich Western tradition

And all the wisdom of the East as well

Is the indispensable condition for any progress;

World-history and world-philosophy

Are only now beginning to dawn;

Whatever the tribulation may yet be in store for men

Pessimism is false.

—In Memoriam James Joyce 2

Yet the core remains the earth, the solid stones:

We must be humble. We are so easily baffled by appearances
And do not realise that these stones are one with the stars.
It makes no difference to them whether they are high or low,
Mountain peak or ocean floor, palace, or pigsty.
There are plenty of ruined buildings in the world but no ruined stones.
No visitor comes from the stars
But is the same as they are.

—On a Raised Beach 3

Perhaps one may add: not just stones for metaphysical contemplation or aesthetic enjoyment, but stones with people living on them. After all, it is the people's sufferings that have made literature poignant, as their aspirations have made it noble. Vast areas of the world are still ravaged by disease, hunger, oppression, exploitation, age-old problems that afflict people with a new ferocity. It is heartening to find a major contemporary writer like García Márquez wanting to end all this, to break the cursed century-old solitude in his part of the world, by "building a utopia"—a word that seems to have fallen out of use in these pragmatic days. Thus along with MacDiarmid's "world history and world philosophy", national literatures will endure, with their folk realism and their utopian ideals. Indeed, it is by the interplay between them that the world is enriched and made vastly more lovable.

壹 论文学间的契合

当我们手捧詹姆斯·赖特 [1] 的诗篇《冬末，越过泥潭，想到了古中国的一个地方官》，恰逢此句：

你在山那边找到孤独人的城市了吗？
还是紧握着那条磨损了
的纤绳的一头，
一千年都没有放手？

20世纪60年代，一位美国诗人在密西西比河畔写下己身的寂寥；九世纪，一位中国诗人惴惴不安地乘一叶小舟，被纤夫拉着船在长江上逆流而上——你无疑可以感觉到这两位诗人之间的契合。当你对诗人戴望舒所译之诗叹为观止，无论是波德莱尔的《恶之花》还是费德里科·加西亚·洛尔迦 [2] 的《西班牙宪警谣》，你会发现译者和诗人之间也有契合，尽管在不同的诗篇上契合的广度、深度和强烈程度有所不同。

契合有诸多呈现形式。它不囿于某一时代，可跨越数个世纪。对古代作者重燃兴趣意味着时代虽不同，作品仍可契合。查尔斯·兰姆的《莎士比亚同时代英国戏剧诗人之范作》从浪漫主义角度阐述了詹姆士一世时代的戏剧。无独有偶，一个世纪之后，艾略特也跨越时代，用现代主义视角对韦伯斯特和特纳 [3] 进行全新的评价。

也许最发人深省的契合见于最让人意想不到的文学之间：语言与传统都大相径庭的文学之间。

1900年以来的中国文学和欧洲文学间的契合就是如此。表面看来，它们各自有着独特的社会和文化背景，没有什么比这两者之间的差异更大的了。

但是中国人在19世纪后半叶多次败在欧洲列强手里之后，一种文化现象得以在中国萌生，即国人对西方科技和制度的兴趣日益浓厚。1896年至1908年间，严复敢为天下先，翻译了一系列介绍西方的重要著作，包括《法意》《原富》《论自由》等，从而担负起向旧式文人宣扬全新意识形态的使命。当时的国人依旧存有疑虑，认为欧洲人虽说在汽船和枪炮方面十分高明，却不一定有高雅的文学。而林纾翻译的西方小说有力地驱散了这一疑云。从小仲马的《巴黎茶花女遗事》到查尔斯·狄更斯

的《块肉余生述》，西方人丰富的情感和娴雅的举止（在某些情况下）展露无遗。林纾还翻译了斯托夫人的“反抗”小说《黑奴吁天录》。无论林纾本人还是广大读者都对黑人奴隶制度深恶痛绝，也为黄种人可能会沦为奴隶而忧虑不安，因为中国人似乎正面临着同样的命运。

英国浪漫主义诗歌也对国人产生了影响，起初主要是具有政治影响力的、脍炙人口的诗句。在这个世纪之交的上海，拜伦《哀希腊》的三个中译本接踵而至；译者一个是有一半日本血统的僧侣诗人，一个是有德国学习经历的教育家，一个是美国实用主义哲学家约翰·杜威的弟子——胡适博士。这些译本虽在准确性和诗性语言的贴切程度上各有千秋，但都受到对清政府统治日益不满的知识分子的推崇。因此，当他们读到如下诗句时，心中波澜起伏：

也好，置身在奴隶民族里，
尽管荣誉都已在沦丧中，
至少，一个爱国志士的忧思，
还使我的作歌时感到脸红；
因为，诗人在这儿有什么能为？
为希腊人含羞，对希腊国落泪。

我们难道只好对时光悲哀
和惭愧？——我们的祖先却流血。【4】

很快，知识分子揭竿而起，不惜流血牺牲，最终推翻了清政府，建立了中华民国。

此后不久，诗人兼历史学家郭沫若翻译了雪莱的《西风颂》，激发了新一代中国知识分子。最常被引用的——不仅诗人爱引用，监狱里的革命者也爱引用，他们甚至在行刑的前一晚都还在吟诵——是末尾一句：

冬天已经来了，春天还会远吗？

也许这正是雪莱想要的效果，然而他可曾料到自己的愿望竟是在遥远的中国才得以完全实现呢？

从这一切，我们看见了契合。

1919年新文化运动兴起，局势有了决定性转机，巨大的语言变革应运而生。除了官方公告、古籍、仪式颂词，所有写作都用简明的白话，而非千年未曾变化的文学介质——文言。时至今日，很多人还在哀叹那次的语言变革过于草率，特别是旧派诗人。不过这一变革确乎好处良

多，其中之一就是为外国文学或非文学作品的翻译提供了便利。《共产党宣言》于1920年经由日文版译成中文，中国很快陷入巨变，整个世界为之震动。因为这本薄薄的小书让中国的知识分子和新兴工人阶级看到，还存在一个比他们很多父辈期盼的资本主义民主还更加公正、更加平等的社会。但是眼下最紧要的问题是解决封建社会遗留的问题，因为封建社会虽然理应死亡，实却余孽未消。外国文学作品的翻译在此再次发挥了作用。易卜生的《玩偶之家》触动了中国每个女权主义者的心弦，虽然擅长嘲讽的鲁迅唱起了反调：“娜拉走后怎样？”

鲁迅则在同样受苦受难的东欧民众和中国民众之间发现了契合。他通过写一篇论述“恶魔诗人”拜伦的文章以及翻译一些波兰和俄国的短篇小说开启了自己的文学生涯。鲁迅原本学医，信奉达尔文进化论，后转向马克思主义，凭借顽强的意志和满腔的热情翻译了卢那察尔斯基^[5]和其他苏联理论家关于文学和艺术的论文。此间，他还进行文学创作。虽说其简练的言辞颇具中国语言的特色，但写法、结构、氛围甚至直截了当的对话呈现形式都是欧式的，在中国小说界实属创新。他采用现实主义写法，着重描写少量的重要细节，但总能运用诗歌上的造诣来抵消白描的无趣。鲁迅是横跨中国古典文学和现代文学界的巨人，他积极支持那些反映穷人对富人表示抗议的文学和艺术新趋势，如凯绥·珂勒惠支^[6]的悲凉蚀刻版画和上海左翼青年艺术家充满激情的木刻版画。他和反传统的萧伯纳惺惺相惜，和美国左翼进步记者艾格尼丝·史沫特莱、埃德加·斯诺以及伊罗生^[7]也有类似情谊。

因此，20世纪的中西文学间的契合在多方面表现出来，但从来就不仅仅体现在文学上。面临严峻生存问题的中国被西方文化中的某些因素吸引，这些元素能解决该国时的需求和向往。危机感也催生了大量的文学作品。

难道中国人对西方文学就没有反感吗？当然有。不同类型的中国作家反感的東西有所不同：有的反感西方文学中迎合大众喜好性爱或暴力的成分，有的讨厌其中过于抽象和艰深的部分，有的讨厌其过于夸大自身的重要性或启蒙性特征。但即便是反感，也掺杂着反向吸引。中外的主流文学之间有很多相似之处，毕竟两者都遭遇了现代生活的压力，且都满怀对更美好世界的向往。

面对这种相遇，中国悠久的古典文学传统又会作何反应呢？当然是拒绝变化。但是，它自身也带有对外来的呼唤作出回应的因子。中国文

学之所以如此灵活，正是由于它总有办法来适应变革。长久以来的积淀使它具有一种罕见的批判视野，即使未能同化入侵的外来文学，它至少也能荣辱不惊，并筛去相抵触的因素。因此，当欧洲现代主义于30年代出现在戴望舒和卞之琳的诗中，继而于40年代现于冯至和穆旦的诗中时，这几位诗人一方面从中国古典文学中汲取营养，一方面又直面当时中国的残酷现实，他们的作品因而兼具阳春白雪与下里巴人特征，比他们效仿的欧洲现代文学更精致，更接地气。因此欧洲现代主义在中国转瞬即逝，而受其影响的中国诗人则大踏步迈向更广阔、更浩瀚的天地。

但这次接触使中国诗人的触角变得更灵敏了。戴望舒在翻译波德莱尔和保罗·艾吕雅 [8] 的过程中改变了自身的诗风。卞之琳后来翻译莎士比亚的悲剧时，就带着自己早年因为翻译马拉美 [9] 和瓦雷里 [10] 而变得更加敏感的诗歌鉴赏力。可能还是穆旦的例子最有说服力。他是艾略特和奥登的狂热崇拜者，在事业中期发现自己不能再创作现代诗，于是偏安一隅，转而从事翻译。穆旦成功地翻译了普希金、雪莱、济慈之后，推出了自己的代表译作，拜伦《唐璜》的全部16个诗篇。译作和原作一样韵律优美，朗朗上口，极富灵动。说来也怪，竟会是穆旦这样的中国现代派诗人方能欣赏拜伦的真风采，尽管艾略特讥讽拜伦的英语是“小学生英语”。不管怎样，是查良铮（穆旦的本名）把拜伦的讽刺才能、随意的语体和无可比拟的叙事艺术全部展现给了国人。

1949年中华人民共和国成立之后，中国译者重拾西方经典的做法大体有益。在那之前，上海和其他一些城市的图书市场充斥着中文版的《飘》《除却巫山不是云》等美国畅销书。它们满足了大众的需要，但却不能拨动人们心灵深处的琴弦，抚慰心灵的饥渴，而且也非艺术创新的典范。因此，敏感的诗人们（现已成了译者）通过再次翻译西方经典文学，给中华民族输送了更有价值的外国文学作品。而且，这次翻译浪潮在一定程度上也可与当时苏联重新发现以伏尼契 [11] 的《牛虻》（1897）为代表的默默无闻的左翼浪漫主义英文作品的热潮相抗衡。

但这并不意味着他们对外界的新生事物关上了大门，只是天平的倾斜方向有所不同罢了。20世纪的中国文学一直有个很强的声音，以鲁迅和茅盾为代表，强调与东欧文学的紧密联系。1949年以后，这些作家对当代苏联文学作品的关注度越来越大，但同时也拓宽视野，关注着囊括了世界文学中所有经久不衰的作品，或者列宁所说的“人类全部的文化遗产”。在实际操作中，这些作家更重视那些揭露旧社会的丑恶或拥护乌托

邦、社会主义、共产主义理想的作家，即所谓的“进步作家”或“现实主义作家”。另外，他们还重视“文化巨人”，多为马克思本人赞赏或评论过的作家——荷马、埃斯库罗斯、奥维德、卢克莱修、但丁、莎士比亚、塞万提斯、彭斯、歌德、科贝特、雪莱、海涅、狄更斯、巴尔扎克等。这是一份令人赞叹的名单，展现了一个真正的“世界公民”是多么博览群书。

事实上，在此之前，“世界文学”从未受过如此重视，从未如此大规模地被译成中文。只举新近出版的一些译作为例：11卷《莎士比亚全集》、7卷《罗摩耶那》、《伊利亚特》、《奥德塞》、《埃涅阿斯纪》、《万叶集》、《拉封丹寓言》、莱辛的《拉奥孔》、卢梭的《忏悔录》、高凯勒的《绿衣亨利》、《堂吉珂德》、《唐璜》、《艾凡赫》（新版），彭斯、华兹华斯、柯尔律治、拜伦、雪莱、普希金、狄更生的诗选，梵文诗集，日本、法国、英国、苏格兰、美国的诗集，英国、美国、澳大利亚、俄国、法国、德国、日本、缅甸、墨西哥的短篇小说选集，布莱希特^[12]和奥凯西^[13]的喜剧作品选，4卷本详实的

《现代主义作品选》，加西亚·马尔克斯《百年孤独》的两个中译本。还值得一提的是中国第一部覆盖面极广的现代百科全书（尚在进行中）的两本外国文学卷已经出版，研究和翻译外国文学的学术团体和期刊大量涌现，学术论文也不甘落后，如雨后春笋般涌现。舞台剧演出的成绩也不同凡响。莎士比亚的《奥赛罗》《麦克白》《李尔王》《安东尼和克莉奥佩特拉》《暴风雨》《威尼斯商人》《一报还一报》《罗密欧与朱丽叶》（多次演出，其中一次用藏语），莫里哀的《悭吝人》，布莱希特的《伽利略传》，阿瑟·米勒的《推销员之死》，尤金·奥尼尔的《安娜·克里斯蒂》都被搬上了舞台。电视上也开始播映外国电影，比如托尔斯泰的《安娜·卡列尼娜》，狄更斯的《大卫·科波菲尔》和《双城记》，夏洛蒂·勃朗特的《简·爱》，哈代的《德伯家的苔丝》和《卡斯特桥市长》。

可见，契合发生的范围很广，广度上超过了以往任何一个时期。但在理解的深度上又如何呢？从某种程度上看，横向范围的拓展也意味着纵向理解的加深。如今，对英语文学的了解也不像过去那样只局限于英国文学了。国人除却对美国作家有着浓厚的兴趣外，还翻译和阅读爱尔兰作家叶芝和乔伊斯，苏格兰作家休·麦克迪尔米德和索利·麦克林，威尔士作家狄兰·托马斯，英联邦作家帕特里克·怀特、玛格丽特·阿特伍德、

切努亚·阿契贝、V. S.奈保尔、R. K.纳拉扬、沃莱·索因卡。中国文学和艺术上的极“左”思潮已被更理性的观点所取代，虽然仍沿着社会主义道路前进，但远不像以前那样教条。它不再幽居暗室，津津乐道于自己思想的细致精微，而是敞开大门，放眼世界文学。

因此，中国与他国文学间将会产生更深、更广的契合。

文学间的交流很少单向进行。这本书只是从中国人的角度来阐述这个问题。期待有从外国文学的角度论述与中国契合的著作产生。

接下来呢？还有诸多重要的问题。在一个全球核威胁的时代，文学如何生存？文学怎能和日新月异的科技进步抗衡？全新快速的沟通方式以及更精密的计算机的使用又会对文学创作产生何种影响？

那些世界大同的信奉者自然向往一种超越语言和文化界限的文学，正如休·麦克迪尔米德在晚年的一首诗中所倡导的那样：

了解，而且吸纳，
丰富的西方人文传统
以及一切东方的智慧
是任何进步的必要条件；
世界历史和世界哲学的光辉
才刚刚开始显现；
不管人类将面临什么磨难，
悲观都不可取。

——《悼念詹姆斯·乔伊斯》

但立足点还是大地，还是坚硬的石头：

我们要谦卑。我们很容易被表象欺骗，
意识不到这些石头与天上的星辰实为一体。
但石头就是石头，
不管它来自天上，还是地下，
来自山峰还是海底，来自琼楼还是茅舍，
亭台楼阁能变作颓垣败瓦，但顽石不会灰飞烟灭。
星辰上不会有访客下临尘寰，
但是石头依然如故。

——《一片凸起的海滩》

也许可以补充一句：这里说的不光是供人冥想或供美学鉴赏的石头，也是人们立足的地球。毕竟，是人的痛苦成就了文学的深度，是人的渴望成就了文学的崇高。世界上还有很多地方依然饱受疾病、饥荒、剥削和压迫之苦，这些由来已久的问题呈现出愈发猛烈的态势。看到加西亚·马

尔克斯那样的当代大家不遗余力地想要解决这些问题，想要用建构乌托邦的方式结束被诅咒的百年孤独，让人颇为欣慰，尽管“乌托邦”一词已经离当今务实的社会渐行渐远了。因此，各国的民族文学会同麦克迪尔米德的“世界历史和世界哲学”一道长存下去，不管其是描绘一方水土的现实主义还是表达理想的乌托邦主义。事实上，正是各国文学的交相辉映，才使得我们的世界更丰盈、更可爱。

PART ONE ACROSS LITERATURES 第一部分 文学之 间

II TWO EARLY TRANSLATORS

1

There had been a spate of translations of Western works, mostly thrillers and romances, running high in the book market of Shanghai in the 1880s, but the literati took little notice. Their interest was only aroused when two men of their own breed came on the scene.

Yan Fu (1853–1921) had gone to England to train as a naval cadet but soon found that building a navy was no solution to the problems confronting China. He returned to take up political journalism, founding in 1897 a periodical called *Guo Wen* in Tianjin, which published serially his own translation of Thomas Henry Huxley's *Evolution and Ethics* (1893). The famous rendering of the opening passage is worth quoting:

赫胥黎独处一室之中。在英伦之南。背山而面野。槛外诸境。历历如在几下。乃悬想二千年前。当罗马大将恺彻未到时。此间有何景物。计惟有天造草昧。人功未施。其借征入境者。不过几处荒坟。散见坡陀起伏间。而灌木丛林。蒙茸山麓。未经删治如今日者。则无疑也。……¹

Huxley's original reads:

It may be safely assumed that, two thousand years ago, before Caesar set foot in southern Britain, the whole countryside visible from the windows of the room in which I write, was in what is called "the state of Nature". Except, it may be, by raising a few sepulchral mounds, such as those which still, here and there, break the flowing contours of the downs, man's hands had made no mark upon it; and the thin veil of vegetation which overspread the broadbacked heights and the shelving sides of the coombs was unaffected by his industry.²

If we compare the two, we'll see that Yan Fu shakes the whole passage

loose and rearranges it, following not the English sentence order, but structuring it the Chinese way—notice the short sentences and the absence of syntactical subordination. His treatment of scientific terms is also noteworthy. While he avoids unnecessary jargon—thus Huxley's "state of nature" in this passage becomes 天造草昧—he is not afraid of coining new terms where they are called for, as may be seen in a few random examples culled from other passages:

nerve 涅伏

political nature 群性

ether 伊脱

Man's Place in Nature 化中人位论

logic 名学

pure reason 清静之理

Nature 性

He was keenly aware of the difficulty of doing this. In fact, there is a whole section in his Preface to the translation which deals with this specific problem:

新理踵出。名目纷繁。索之中文。渺不可得。即有牵合。终嫌参差。译者遇此。独有自具衡量。即义定名。……一名之立，旬月踟蹰。

(New ideas come one after another, with a multiplicity of new names. No equivalents can be found for them in Chinese. Straining for resemblances, one gets only contrarities. The translator is obliged to use his own discretion, doing his best to find a term suited to the sense.... A single term often took weeks and months of deliberation.)

But the result has been happy. For one thing, his translation of the key Darwinian phrase, "natural selection", as 物竞天择 has come to stay.

Stylistically, one notices in Yan's rendering a certain tendency towards dramatization. Huxley opens the chapter ponderously, impersonally:

It may be safely assumed that...

while Yan's rendering, if translated back into English, would read:

Huxley sits alone in a room, at a place south of London, with hills at its back and fields before it. From the window he commands a clear view, seeing everything as though they were on his desk. His thoughts carry him back to 2,000 years ago, when the Roman general Caesar had not yet arrived....

which is more lively, more like the opening of an historical account.

While there are other reasons behind the changes made—the switch from the first person "I" in Huxley's original to the third person "Huxley" in the translation, for instance, is done to conform with the stylistic requirements of classical Chinese prose³—the livening up, the dramatization, is Yan's own. To cite another instance, Huxley's simple statement, "unceasing struggle for existence", becomes in Yan's rendering almost a battle account:

战事炽然。强者后亡。弱者先绝。年年岁岁。偏有留遗。

(Fierce war raged. The weak became extinct. The strong perished later. This went on year after year, with few survivors.)

Why does Yan take the trouble to dramatize what purports to be a scientific-philosophical treatise? My guess is that, Sima Qian the historian being the model of all self-respecting Chinese prose writers, Yan wants to write like the master and heighten the historical sense—a perfectly legitimate thing to do in an important work on the evolution of mankind.

One aspect of Yan's work has received scant attention and that is his few sorties into the realm of English poetry. Here in this translation of *Evolution and Ethics*, one finds these famous lines from Pope's *Essay on Man*:

All Nature is but art, unknown to thee;
All chance, direction, which thou canst not see;
All discord, harmony not understood;
All partial evil, universal good:
And, spite of pride, in erring reason's spite,
One truth is clear, Whatever is, is right.

Rendered into Chinese, thus:

元宰有秘机。斯人特未悟。
世事岂偶然。彼苍审措置。
乍疑乐律乖。庸知各得所。
虽有偏沴灾。终则其利溥。
寄语傲慢徒。慎勿轻毁沮。
一理今分明。造化原无过。 ⁴

A very creditable translation indeed! Unlike some later translators, Yan renders verse as verse and manages to communicate some of

Pope's supreme assuredness and epigrammatic polish.

Having seen something of Yan's practice as a translator, we may now examine his translation theory. It is in this same Preface that Yan presents his three-point theory:

译事三难信、达、雅。求其信已大难矣。顾信矣不达。虽译犹不译也。则达尚焉。……

易曰修辞立诚。子曰辞达而已。又曰言之无文。行之不远。三者乃文章正轨。亦即为译事楷模。故信达而外。求其尔雅。

(Translation has to do three difficult things: to be faithful, expressive, and elegant. It is difficult enough to be faithful to the original, and yet if a translation is not expressive, it is tantamount to having no translation. Hence expressiveness should be required too....

The Book of Change says that the first requisite of rhetoric is truthfulness. Confucius says that expressiveness is all that matters in language. He adds that if one's language lacks grace, it won't go far. These three qualities, then, are the criterion of good writing and, I believe, of good translation too. Hence besides faithfulness and expressiveness, I also aim at elegance.)

Here we have the most influential translation theory in modern China, which has been quoted and requoted by nearly every writer on translation. However, few have seen fit to quote what comes immediately after:

此不仅期以行远已耳。实则精理微言。用汉以前字法句法。则为达易。用近世利俗文字。则求达难。往往抑义就词。毫厘千里。审择于斯二者之间。夫固有所不得已也。岂钓奇哉。

(I strive for elegance not just to make my translations travel far, but to express the original writer's ideas better, for I find that subtle thoughts are better expressed in the vocabulary and syntax of pre-Han prose than those of the vulgar writings of today. Using the latter often leads to distortion of meaning, which, however slight, results in vast misunderstanding. Weighing the pros and cons, I opted for the former, as a matter of necessity, not trying to be different.)

Leaving aside the question whether pre-Han prose is really a better vehicle for the communication of "subtle thoughts", we see that Yan's point about elegance is really closely related to his first and most important point, namely, faithfulness to the original. Perhaps elegance does not mean, as has so often been taken to mean, beautification, for

obviously it would be quite inappropriate to give elegance to a piece of writing which is in the original language inelegant, but signifies an effort to communicate something higher and subtler than the plain sense of words and phrases, a climate of mind, a heightened sense of the significance of the original. Yan's tendency towards dramatization, earlier commented on, is perhaps a move in that direction.

And perhaps the real point about pre-Han prose is not a linguistic or even a stylistic one, either. Yan took up translation with a purpose: to attract the attention of people who he thought really mattered, namely, the intelligentsia. Several milleniums of self-sufficiency had bred in these people a deep-seated xenophobia, so that even when repeated defeats in foreign wars made them look to the West for some quick, practical remedy for the country's ills, they did so with the greatest reluctance and not a little resentment. More far-sighted than these gentlemen, Yan knew that something more drastic, more fundamental had to be done—indeed, nothing short of a complete overhaul of Chinese society—and the task could only be approached by introducing a new ideology. The books he was translating—Adam Smith's *Wealth of Nations*, Montesquieu's *De l'esprit des lois*, John Stuart Mill's *On Liberty* and *System of Logic*, Herbert Spencer's *Principles of Sociology*, as well as Huxley's *Evolution and Ethics*, were the great basic books of modern Western thought which shaped an efficient capitalist society. He knew what a bitter pill these books contained for minds still taking refuge in medieval dreams and so he sugar-coated it with something they treasured, a polished antique style. Elegance, in other words, was Yan's salesmanship.

Within a few years, his translations won a large readership. His ideological onslaught proved successful, perhaps a trifle too successful. Even reform was to give way to revolution. The genii were out of the bottle, and there was no turning them back.

Shu(1852–1924) touched their heart. Like Yan, Lin was a master of classical prose. Unlike Yan, however, Lin knew not a word of English, or any other foreign language. His is the case of a great translator working at two or three removes from the original works. In fact, he had to work with the help of an oral interpreter. The interpreter read and explained: the master took down what he heard on the spot. He kept pace with the running interpretation; indeed, he often finished before the interpreter had quite uttered his last word, and the miracle was, what he put down in a hurry needed little revision, so ready was his pen and so flexible his style. They worked at a terrific pace, averaging 6,000 words for each 4-hour session.⁵ The products of such a collaboration could not be expected to be free of errors. Indeed, they abound, and not just verbal ones, for Lin treated some of the original works with scant respect—he invaded foreign literature like the proud mandarin-scholar that he was, and often slashed and added at will. But he tampered little with works that really impressed him. One such was Mrs. Harriet Stowe's *Uncle Tom's Cabin*. Lin was touched by the sufferings of the black people depicted in that book, but it also occurred to him that a similar or worse fate was hanging over the heads of the Chinese at that critical time around 1900. He wrote in the Translator's Preface:

黃人受虐或更甚於黑人。……就其原書所著錄者，觸黃種之將亡，因而愈生其悲懷耳。……而傾信彼族者又誤信西人寬待其藩屬，躍躍然欲趨而附之。則吾書之足以儆醒之者，寧可少哉。

(The yellow race has been subject to worse treatment than even the black.... I noted what the book relates about the Negroes and when I reflected that the yellow race too are facing subjugation, my indignation increased.... Some Chinese think too well of the white race and, believing that Western powers treat their vassal states leniently, are actively campaigning for affiliating with them. To such people, this book I have translated ought to serve as a necessary warning.)

Thus Lin took up translation with a patriot's anxiety and made no bones about it.

This does not mean, however, that Lin was blind to the literary

merits of the works he was translating. For he also praised *Uncle Tom's Cabin* for its superior structure. He applied to it the same criterion that he would apply to any piece of narration in classical Chinese prose—namely, that it should have a proper opening, good "veins" of development, anticipations and echoes, skilful "dovetailing", and so on—and found Mrs. Stowe not wanting. Indeed, he was not a little surprised that a Western work could acquit itself so well in that respect.

More than that, his heart was won over by another Western novel, Alexandre Dumas fils's *La Dame aux Camélias*. In a humorous sketch about himself, he refuted the charge that he was insensitive to love by referring to his translation of the Dumas work:

生平好著书，所译巴黎茶花女遗事，尤凄惋有情致。尝自读而笑曰：“吾能状物态至此，宁谓木强之人，果与情为仇也耶？”⁶

(He was fond of writing books. His translation of *La Dame aux Camélias* was an especially sad and moving book. Reading it again the other day, he said to himself with a chuckle: "If I can describe sentiment like that, should I be called 'cold', an enemy to love?")

La Dame aux Camélias was the first Western work he ever translated, and it was an immediate success. It not only established his fame as a superior translator, but made Chinese intellectuals aware of Western sentiment and Western art of fiction. That a courtesan could be capable of true love was nothing new in Chinese literature. One has only to recall the story of *Peach Blossom Fan*, a 17th-century drama, to see that the theme had been explored with great success in China. But Marguerite's special appeal lay in her self-sacrifice and her ailing health—Chinese readers have always had a weakness for fragile beauties succumbing to consumption. The locale of the novel, that glittering metropolis, Paris, also fascinated those Chinese readers just then witnessing the rise of treaty-port cities like Shanghai, with their veneer of cosmopolitanism. Dumas's craftsmanship, especially his masterly handling of the plot, attracted the more discerning of the Chinese critics. Tired of traditional Chinese novels which, with some notable exceptions, invariably contrive to end happily, they were

pleased to have a chance to shed tears over the heroine's tragic death.

For Lin Shu's part, he established firmly the superiority of classical literary prose as a medium for translating fiction. Some earlier translators, notably Zhou Guisheng (周桂笙) and Xu Nianci (徐念慈), had experimented on using the vernacular in translating detective stories and romances, but Lin's translations swept all their work aside not only by the superior literary qualities of the originals, but also by the translator's Chinese prose. It was not exactly the kind of prose that Lin would have used in writing his own essays.⁷ He had "modernized" it by loosening up the sentence structures and introducing a number of new words and expressions: colloquialisms like 小宝贝, 爸爸; facetious names like 梁上君子, 土馒头, 夜度娘; new terms like 程度, 热度, 社会, 个人, 反动之力, 活泼之精神; even phonetic coinages like 马丹, 密司脱, 安琪儿, 苦力, 俱乐部, 列底 (尊闺门之称也). But despite these and other concessions, Lin's Chinese remained literary, elegant and supple. The suppleness may surprise those who, following the earlier champions of the *bai hua* or vernacular literature, tend to think all classical prose stiff and unnatural. Lin proved the contrary. Not only did his prose cope successfully with all the intricateness of a Victorian romance like Rider Haggard's *She*, being equally adept in describing violent action as in depicting love, but its purity and appropriateness often improved on the original. Read Lin's rendering:

乃以恶声斥洛巴革曰：“汝何为恶作剧？尔非病当不如是。”（《斐州烟水愁城录》第五章）

and compare it with Haggard's original:

What meanest thou by such mad tricks? Surely thou art mad.

and one will be struck by the English author's laborious mixture of the archaic and the slangy in his dialogue, shown to particular disadvantage beside the translator's clean, efficient Chinese.⁸ That is perhaps why, while many more recent and more accurate Chinese versions of 19th century English novels make rather dull reading, Lin's earlier translations in classical prose remain eminently readable.

Indeed, Lin's skilful use of *wen yan*, seen in hindsight, makes those of us reared in the vernacular tradition look at that matchless, almost timeless literary medium with a new sense of wonder.

Rider Haggard was the best-selling Victorian novelist whose appeal still fascinates some of the most perceptive critics today.⁹ If Lin was unduly impressed by Haggard's romances, he and his collaborators showed taste and discernment in the range and quality of the other Western works they selected for translation. In less than 30 years (1896–1924), Lin accomplished the translation of over 180 works,¹⁰ averaging 6 a year—surely a proud record for any translator even without Lin's handicaps! The works translated included Cervantes's *Don Quixote*, Defoe's *Robinson Crusoe*, Swift's *Gulliver's Travels*, Scott's *Ivanhoe*, Hugo's *Quatre-vingt-treize*, Tolstoy's *Caucasian Prisoner*, a lot of Dickens, Ibsen's *Ghosts* adapted as a novel, *Aesop's Fables*, *Tales from Shakespeare* by the Lambs, Washington Irving's *Sketch Book*, as well as Stowe's *Uncle Tom's Cabin* and Dumas fils's *La Dame aux Camélias*. All in all, not a bad first list of Western fiction for any non-Western reading public!

Lin's prefaces to his translations contain interesting revelations and some literary criticism. They show the translator perpetually preoccupied with China's destiny, believing at the same time that his translation of the work on hand was going to do some good to his fellow countrymen—by enlightening their minds or boosting their morale. Lin also took the occasion to refute some of the charges levelled at China. In discussing Shakespeare, for instance, he pointed out that this poet, "whose genius matches that of China's Du Fu" (莎氏之诗, 直抗吾国之杜甫¹¹), often resorted to the supernatural in his plays but was not on that account condemned as superstitious by his countrymen. Lin also made known his disapproval of extreme measures in his preface to a French work called *Two Patriotic Boys*, where he urged Chinese students to work with greater application and not clamour for revolution or plot assassinations.

All this underlines once again the sense of crisis that never left

Lin Shu as he was taking down—with almost the speed of a modern shorthand expert—in elegant Chinese prose the running interpretation of his assistant. But the literary man was never wholly submerged in the patriot. We have seen that he admired *Uncle Tom's Cabin* for its structure. In his preface to *Ivanhoe*, he pays a glowing tribute to the art of Scott the novelist. He enumerates seven virtues of Scott's work, namely:

the ability to fill up a book of over 120,000 words with the events of only 15 days;

the ability to distinguish the characters by their speeches;

the ability to depict the Catholics in all their wickedness;

the ability to depict the Jews in all their wretchedness as a people without a country, which may serve as a warning to the yellow race as well;

the ability to depict the contrasting heroic and villainous types among the Saxons;

the ability to make the Jewish race shine in the moral character of Rebecca to further spite the Catholics;

and, finally, the ability to make the rebel leader eloquent even when he is openly agitating for seizure of power.

In conclusion, Lin finds that Scott has "a talented pen that is nothing short of magical" (文心奇幻) and would rank him with Sima Qian and Ban Gu, supreme masters of Chinese historical writing. Coming from a scholar-stylist like Lin Shu, this is very high praise indeed.

Even more perceptive is Lin's appreciation of Dickens, before whose brilliance the translator finds that even the best China can offer looks somewhat dim. In preface after preface, Lin discusses Dickens's unique strength:

余虽不审西文，然日闻其口译，亦能区别其文章之流派，如辨家人之足音。其间有高厉者，清虚者，绵婉者，雄伟者，悲梗者，淫冶者，要皆归本于性情之正，彰瘕之严，此万世之公理，中外不能僭越。而独未若却而司迭更司文字之奇特。天下文章，莫易于叙悲，其次则叙战，又次则宣述男女之情。等而上之，若忠臣孝子，义夫节妇，决媒溅血，生气凜然。苟以雄深雅健之笔施之，亦尚有其人。从未有刻划市井卑污龌龊之事，至于二三十万言之多，不重复，不支厉，如张明镜于空际，收纳五虫万怪，物物皆涵，涤清光而出，见者如凭栏之观鱼鳖虾蟹焉，则迭更司者，盖以至清之灵府，叙至浊之社会，令我增无数阅历，生无穷感喟矣。（《孝女耐儿传》序）

(Although I do not understand any Western language, yet listening daily to the oral interpretation, I have come to appreciate the different types of Western writers, just as I can distinguish people in my family by their footsteps. Their styles range from the shrill and severe, the serene and subtle, the soft and sentimental, the grand and eloquent, to the melancholic and meretricious, but all aim at purifying human nature by extolling virtue and condemning vice, a goal shared throughout the ages by writers of all countries. No one, however, has Dickens's strange fascination for me. Now sorrow is the easiest thing to write about, next war, still next love. Going up the scale of difficulty there is the portrayal of loyal ministers and filial sons, of courageous men and chaste women, with their resolute, heroic deeds. These are not beyond the reach of writers with a ready, powerful pen. But Dickens alone is capable of depicting the meanest and most sordid things in society at great length, running often to 200,000 or 300,000 words, without ever repeating himself or unduly branching out, but showing all the strange creatures he had collected in their true light, as though he were holding a mirror in the air, to make the readers see these creatures as clearly as if they were watching over a balustrade the fish, turtles, shrimps and crabs in a pond. Dickens, then, is a writer who describes the most hideous things in society with the noblest intelligence, thereby enriching our experience and provoking endless thoughts.)

Then, once again he resorts to comparisons:

中国说部，登峰造极者，无若《石头记》，叙人间富贵，感人情盛衰，用笔缜密，著色繁丽，制局精严，观止矣。其间点染以清客，间杂以村姬，牵缀以小人，收束以败子，亦可谓善于体物。终竟雅多俗寡，人意不专属于是。若迭更司者，则扫荡名士美人之局，专为下等社会写照，奸狻狙酷，至于人意所未尝置想之局，幻为空中楼阁，使观者或笑或怒，一时颠倒，至于不能自己。则文心之遯曲，宁可及耶？（《孝女耐儿传》序）

(Chinese fiction reaches its culmination in *The Dream of the Red Chamber*. In so far as it narrates the changes of fortune and the vicissitudes of life, in a refined, meticulous style, with rich, varied colourings and a carefully worked-out overall plan, it is perfection itself. The narration is also interspersed with the comings and goings of hangers-on, country women, servants and spendthrifts, all very lifelike. Still, the novel deals more with the well-bred than with the vulgar, since it does not aim at a full representation of the latter. Dickens, however, sweeps aside lords and ladies, to concentrate on depicting the low society, taking in the wicked, the crafty, the rough and the cruel, putting them in situations never before thought of, fantasy worlds that make the readers laugh with pleasure or shout in anger, quite in spite of themselves. Where could one find an equal to a writer with such a deep, ingenious mind?)

Indeed, Lin thinks that Dickens has done something even more difficult than whatever Sima Qian did in *Historical Records*, namely, depicting everyday life, particularly that of the lower orders, in all its unspectacular commonness.

As an example of the special Dickens touch, Lin singles out Nell's death in *The Old Curiosity Shop*:

而此书……精神专注在耐儿之死。读者迹前此耐儿之奇孝，谓死时必有一番死诀悲怆之言，如余所译茶花女之日记。乃迭更司则不写耐儿，专写耐儿之大父凄恋耐儿之状，疑睡疑死，由昏愤中露出至情，则又茶花女日记外别成一种写法。盖写耐儿则嫌其近于高雅，惟写其大父一穷促无聊之愚叟，始不背其专意下等社会之宗旨。此足见迭更司之用心矣。（《孝女耐儿传》序）

(This book focuses its attention on Nell's death. Since Nell is so devoted to her grandfather, readers would expect her to utter many sad words on her deathbed, perhaps something like what the Dame aux camélias confides to her diary, in the story I earlier translated. Dickens, however, does not deal with Nell, but concentrates on describing how the grandfather clings to her, seeing her only as asleep, refusing to think her dead, thus revealing by his dotage his true love for her. That marks a way different from Dumas's of treating death in literature. Had Dickens written about Nell, he would have had to use genteel language. Writing instead of the poor fond grandfather, Dickens succeeds in keeping to his original plan of depicting the low society. That shows Dickens's originality.)

Here we see Lin comparing Dickens with Dumas, as earlier he had compared him with Cao Xueqin and Sima Qian. Perhaps he wasn't quite aware of the fact that he was undertaking some of the earliest exercises in comparative literature in China.

Lin reserves his best analysis for *David Copperfield*:

此书为迭更司生平第一著意之书，分前后二编，都二十余万言。思力至此，臻绝顶矣！……大抵文章开阖之法，全讲骨力气势，纵笔至于灏瀚，则往往遗落其细事繁节，无复检举。遂令观者得罅而攻。此固不为能文者之病。而精神终患弗周。迭更司他著，每到山穷水尽，辄发奇思，如孤峰突起，见者耸目。终不如此书伏脉至细，一语必寓微旨，一事必种远因，手写是间，而全局应有之人，逐处涌现，随地关合，虽偶尔一见，观者几复忘怀，而闲闲着笔间，已近拾即是。读之令人斗然记忆，循编逐节以索，又一一有是人之行踪，得是事之来源。综言之，如善奕之着子，偶然一下，不知后来咸得其用，此所以成为国手也。（《块肉余生述》前编序）

(This is Dickens's own favourite among his novels. Divided into two books,

totalling over 200,000 words, it marks Dickens's crowning achievement.... The art of writing attaches great importance to force and sweep, but as the pen races along, it often leaves behind some incidents and details unattended, so that a careful reader can always pick holes in the writing. Hardly a real fault, this does show the difficulty of keeping up the effort throughout. Dickens has the knack of throwing off surprises just when he seems to be at the end of his tether, so that a reader is startled, finding himself looking at a new peak coming out of nowhere. Admirable as that is, this novel does something even better, namely, the planting of numerous little details either in anticipation or in response, so that every incident has its cause and effect, every word its significance, the writer having the whole plan in mind even as he is busy with one particular episode. The characters appear, some fleetingly, and then disappear, seemingly forgotten, yet readily, though unobtrusively, within call. The reader is suddenly reminded of something and when he looks back, chapter by chapter, he will see that many characters have left traces behind and every incident is accounted for. In short, Dickens is like a first-rate chess player whose every casual move contributes to the final effect. No wonder he is such a master!)

Beside such mastery, such sustained effort, Lin finds two of China's supreme novels, *Water Margin* and *The Dream of the Red Chamber*, inadequate, the former for failing to follow up the brilliance of its early chapters, after which the characters are less individualized; the latter for tackling a less difficult job, that of depicting love between men and women, to which "readers are naturally attracted". One is not sure how kindly the "Redologists" would take to such a view, but perhaps the real question here is: why did a haughty mandarin-scholar like Lin Shu come under the spell of an English novelist who specialized in depicting "the low society", something which, we have every reason to think, Lin would abhor?

No doubt he was fascinated by Dickens's unique power of "turning the putrescent into the magical,"¹² but I think he was even more impressed by Dickens's moral uprightness in exposing social abuses. Indeed, Lin was not a little surprised to find that England, the leading Western nation, had been afflicted with the same social ills that were then bedeviling China:

英伦在此百年之前，庶政之羸，直无异于中国，特水师强耳。迭更司极力抉摘下等社会之积弊，作为小说，俾政府知而改之。……天下之事，炫于外观者，

往往不得实际。穷巷之间，荒伦所萃，漫无礼防，人皆鄙之。然而豪门朱邸，沉沉中喻礼犯分，有百倍于穷巷之荒伦者，乃百无一知。此则大肖英伦之强盛，几谓天下观听所在，无一不足为环球法则。非得迭更司描画其状态，人又乌知其中尚有贼窖耶？顾英之能强，能改革而从善也。吾华从而改之，亦正易易。所恨无迭更司其人，能举社会中积弊，著为小说，用告当事，或庶几也。

(One hundred years ago, English misrule was no better than Chinese today, except for the fact that England had a powerful navy. In his novels Dickens did his best to expose social abuses in the underworld to call the government's attention to them, so that reforms might be introduced.... Now as the world goes, people are often dazzled by appearances and fail to grasp realities. All condemn what goes on in the slums, where ruffians gather and live without law or decorum. Yet few see the lawlessness and depravity, a hundred times worse, that lurk behind the vermillion doors of proud mansions. It was the same with England. Strong and prosperous, she gave the impression that she was a model for the world in everything she did. Had Dickens not described it, who would ever know that there existed in England a thieves' den? However, English authorities listened to advice and carried out reforms. That is why England has become strong. It would not be difficult for China to follow her example. Much to our regret, however, we have no Dickens in our midst, no one who can write novels to make the authorities aware of the social abuses in our country.)

Here, once again, spoke Lin Shu the patriot. He was really explaining why he had been translating Dickens with such passion. To him as to Yan Fu, translation was no idle pursuit, but something with a deadly serious purpose, an instrument of social and political reform.

Nor was his cry for a Chinese Dickens a voice in the wilderness. For, even as he was making these remarks, a number of Chinese novels, with such titles as *Bureaucrats Shown Up* and *Odd Things Witnessed over Twenty Years*, had already been published or written. They contributed, as did Lin's translations of Dickens and others, to the general climate of opinion that was severely critical of the bureaucratic abuses and the corruption and ineptitude of the officials then scandalizing all decent people. Indeed, then and in the succeeding decade, with more exposés pouring from the press, Chinese fiction reached a new peak of development.

Yet even these were soon to be replaced. A much bigger change was approaching. A literature of an entirely new kind—new in outlook

and new in the very medium used—was on the way. Just as Yan Fu's introduction of a capitalist ideology played a part in ushering in reform and revolution and civil war and a bigger revolution, so the translations of an old Chinese classical scholar prepared the ground for the radical social novels of the more turbulent times to come. Giants both, Yan Fu and Lin Shu brought on some vast change which Yan perhaps dimly foresaw but which Lin had certainly not bargained for. In the end, they both turned against what they had helped to initiate. Yan Fu the reformer became a Monarchist and Lin Shu bitterly attacked the new learning centred in Beijing University. They lived to rue the day when they first took up translation, but then translation has always been in the subtlest sense of the word an act of betrayal.

贰 两位早期的译者

(一)

19世纪80年代的上海图书市场上西方小说汉译本盛行，多为恐怖小说和爱情小说，但文人学士少有问津。待到严复、林纾这样的同道步入译坛，方才引起他们的关注。

严复（1853—1921）曾赴英国学习海军，但是发现建设海军无法解决中国面临的问题。回国后，他创办政治期刊，于1897年在天津创办《国闻报》，并将自己译的赫胥黎的《天演论》（1893）在上面连载。他那极富盛名的开头一段译文值得一引：

赫胥黎独处一室之中。在英伦之南。背山而面野。槛外诸境。历历如在几下。乃悬想二千年前。当罗马大将恺彻未到时。此间有何景物。计惟有天造草昧。人功未施。其借征入境者。不过几处荒坟。散见坡陀起伏间。而灌木丛林。蒙茸山麓。未经删治如今日者。则无疑也。

赫胥黎的原文是：

It may be safely assumed that, two thousand years ago, before Caesar set foot in southern Britain, the whole countryside visible from the windows of the room in which I write, was in what is called "the state of Nature". Except, it may be, by raising a few sepulchral mounds, such as those which still, here and there, break the flowing contours of the downs, man's hands had made no mark upon it; and the thin veil of vegetation which overspread the broad-backed heights and the shelving sides of the coombs was unaffected by his industry.

如果把原文与译文对比，我们就会发现严复把原文彻底打散，然后依汉语句序而非英语句序进行重组——译文以单句译复句，以平列代主从。他对科学术语的翻译也值得一提。他避免不必要的术语——因此赫胥黎原文中的“state of nature”被其译成了“天造草昧”——如有需要，他大胆造新词，仅从该书其他段落随意选取几个为例：

nerve 涅伏

political nature 群性

ether 伊脱

Man's Place in Nature 化中人位论

logic 名学

pure reason 清静之理

Nature 性

他深知这样的尝试何其艰难。事实上，在译者序中他用了整整一节谈这个问题：

新理踵出。名目纷繁。索之中文。渺不可得。即有牵合。终嫌参差。译者遇此。独有自具衡量。即义定名。……一名之立，旬月踟蹰。

但是结果喜人。比如，他将“natural selection”这个关键的达尔文术语译成“物竞天择”，此译法一直沿用至今。

从文体上看，严复的翻译有“化平实的叙述为生动的敷演”^[1]的倾向。赫胥黎原文第一章的开头生硬，客观：

我们可以有把握地设想……

而严复的译文，若回译成英文，则是：

Huxley sits alone in a room, at a place south of London, with hills at its back and fields before it. From the window he commands a clear view, seeing everything as though they were on his desk. His thoughts carry him back to 2,000 years ago, when the Roman general Caesar had not yet arrived....

这比赫胥黎的英文原文欢快很多，也更像历史著作的开头。尽管严复对原文意思的加工还另有原因——原文中的第一人称“我”，译文中变成了第三人称“赫胥黎”。这是为了使译文合乎中国古文的传统体式——但活泼的文风和“化平实的叙述为生动的敷演”则是严复个人的选择。再比如，赫胥黎笔下的一个简单表达“unceasing struggle for existence”，在严复的译笔之下就几乎成了战事描述：

战事炽然。强者后亡。弱者先绝。年年岁岁。偏有留遗。

严复为何费此周折把一篇本应是平实的科学-哲学论文文化为生动的敷演呢？我猜原因是他想效仿史学家司马迁的笔法来增加读者的历史感，因为司马迁是中国所有散文家的典范——这对一篇论述人类进化的重要著作而言，完全说得通。

严复译作有一点鲜有人关注，那就是他为数不多的几次涉笔诗歌的经历。在他翻译的《天演论》中，读者会发现蒲柏《原人》中的脍炙人口的诗句：

All Nature is but art, unknown to thee;
All chance, direction, which thou canst not see;
All discord, harmony not understood;
All partial evil, universal good:
And, spite of pride, in erring reason's spite,
One truth is clear, Whatever is, is right

严复翻译如下：

元宰有秘机。斯人特未悟。
世事岂偶然。彼苍审措注。
乍疑乐律乖。庸知各得所。
虽有偏沲灾。终则其利溥。
寄语傲慢徒。慎勿轻毁沮。
一理今分明。造化原无过。

的确是非常值得称道的译文！和后来的一些译者不同，严复以格律诗译格律诗，成功地把蒲柏无比的自信和充满警句的优雅呈献给国人。

领略了一番严复的翻译实践，我们现在不妨来看看他的翻译理论。也正是在这篇序言里，严复发表了他的“信达雅”论：

译事三难信、达、雅。求其信已大难矣。顾信矣不达。虽译犹不译也。则达尚焉。……

易曰修辞立诚。子曰辞达而已。又曰言之无文。行之不远。三者乃文章正轨。亦即为译事楷模。故信达而外。求其尔雅。

这是近代中国最有影响力的翻译理论，几乎每个翻译研究者都会引用、再引用。但很少有人记得严复接下来的话：

此不仅期以行远已耳。实则精理微言。用汉以前字法句法。则为达易。用近世世俗文字。则求达难。往往抑义就词。毫厘千里。审择于斯二者之间。夫固有所不得已也。岂钓奇哉。

且不论汉以前的文章是否真能更好地传达“精理微言”，但我们发现严复关于“雅”的观点同其第一条、也是最重要的一条宗旨紧密相连，那就是“信”。也许严复的“雅”并不像人们通常认为的那样，是为了美化（很显然，如果原文不美，却把它译成美的，就很不适宜）；而是为了超越原文的直白，传达出某种更高深更细微的东西，传达出一种心境，传达出原文的深意。前文讲到严复“化平实的叙述为生动的敷演”的倾向，或许就是在朝那个方向努力。

或许严复采用汉以前文章的字法句法并非真正出于语言或者甚至是文体上的考虑。严复从事翻译是有明确目的的：为了吸引那些他认为至关重要的人士，也即士大夫阶层。经过几千年的闭关锁国和自给自足，士大夫阶层的唯我独尊根深蒂固，即使对外屡战屡败，不得不向西方寻求解决本国弊病的快速实用的良方，他们也是不情不愿，满怀怨恨。严复比他们要有远见卓识，深知中国需要更激烈、更根本的变革——实际上，无异于对中国社会来个彻底大变革——只有引入一种全新的意识形态，方可达此重任。他翻译的书——亚当·斯密的《原富》、孟德斯鸠的《法意》、约翰·穆勒的《群己权界论》和《名学》、斯宾塞的《群学肆

言》^[2]，以及赫胥黎的《天演论》，都是西方现代思想的奠基著作，对一个高效资本主义社会的形成起了很大作用。严复知道这些书对仍然沉醉于“天朝大国”封建美梦的中国士大夫阶层来说无异于一剂苦药，因此他给这些书裹上糖衣，也即士大夫钟情的古雅文体。换言之，“雅”是严复的招徕之术。

几年之内，他的译作就赢得了大量读者。他引入西方意识形态的努力很是成功，或许过于成功了，连改革都要让位于革命。妖魔已逃出瓶子，再也收不回去了^[3]。

（二）

如果说严复致力于洗涤中国士大夫的头脑，林纾（1852—1924）则直抵他们的心灵。和严复一样，林纾也是古文大师。和严复不同，林纾不谙英语或其他任何一种外语。他创造了从其他语种转译再转译的神话。事实上，他得仰仗口译的帮助方可工作。口译朗读并解释，他则当场笔述。他的笔述与口译同步进行；事实上，往往口译话音还未落林纾译文就已完成。神奇之处在于，他飞速记下的文字几乎不需修改，浑然天成。他们翻译的速度极快，每4小时平均译6000字。当然不能指望这样的译文没有错误，事实上，错误很多，而且不仅仅是语言上的错误。因为林纾对某些原著不太尊重——他，一个骄傲的中国文人，涉入外国文学领地，经常肆意增删。但是对于真正打动他的作品，他从不轻加篡改。斯托夫人的《黑奴吁天录》就是一例。林纾深为书中描写的黑奴的悲惨遭遇所感动，同时也痛感国人在1900年前后的危机时刻也面临同样的命运，甚至有过之而无不及。他在译序中写道：

黄人受虐或更甚于黑人。……就其原书所著录者，触黄种之将亡，因而愈生其悲怀耳。……而倾信彼族者又误信西人宽待其藩属，跃跃然欲趋附之。则吾书之足以儆醒之者，宁可少哉。

因此，林纾以满腔的爱国热忱从事翻译，丝毫不加掩饰。

但这并不意味着林纾对其所译作品的文学美质视而不见。他也赞赏《黑奴吁天录》的高超构思。他用评价中国古体散文的标准评价这部小说——也即是，应有良好的开头，清晰的发展脉络，伏笔和呼应，切合实际，等等——发现《黑奴吁天录》完全符合这些标准。事实上，一部西方文学作品竟有如此优秀的品质，着实让他意外。

不仅如此，另一部西方小说，小仲马的《巴黎茶花女遗事》也赢得他的倾心。曾有人说他对爱情漠然，他援引自己翻译小仲马的这部著作

一事幽默地加以反驳：

生平好著书，所译巴黎茶花女遗事，尤凄婉有情致。尝自读而笑曰：“吾能状物态至此，宁谓木强之人，果与情为仇也耶？”

《巴黎茶花女遗事》是他翻译的第一部西方小说，一经出版，立刻引起轰动。这不仅奠定了他作为翻译大家的地位，而且也让中国学者知道了西方人的情感和西方的小说艺术。描写交际花的真爱，在中国文学史上并不鲜见。只需想想17世纪的戏剧《桃花扇》就可知道中国文学对于那一主题的诠释已经相当成功。但是茶花女玛格丽特的格外牵动国人之处在于她的自我牺牲和纤弱的体质——中国读者对患有肺病的弱柳扶风的女子总是情有独钟。故事发生的地点也起了作用，因为故事发生在巴黎，那个光鲜炫目的大都会，而当时的中国读者刚刚领略到像上海那样披着大都会浮光掠影的新兴沿海城市的风采。小仲马的精湛技艺，尤其是高超的情节设计，也引起了一些有见地的中国评论家的注意。中国的古典小说，除少数外，基本都是大团圆的结局。厌倦了这种传统叙事方法的评论家们，现在终于有机会为女主人公悲惨的离世洒下涟涟泪水了。

林纾根深蒂固地认为文言文是翻译小说的优势语言。更早一些的翻译家，比如周桂笙和徐念慈，尝试用白话翻译侦探小说和爱情小说，但是林纾的译作超越了他们所有人，不仅所选作品的文学水平一流，而且译文语言出色。林纾自己写文章未必就用这种文体。他把这种文体加以“现代化”，将原文结构弄散，引入一些新词汇：一些诸如小宝贝、爸爸之类的口语词，梁上君子、土馒头、夜度娘之类的滑稽称呼，程度、热度、社会、个人、反动之力、活泼之精神之类的新词，甚至还有马丹、密司脱、安琪儿、苦力、俱乐部、列底（尊闺门称也）之类的音译词。尽管有诸多朝现代化靠拢的努力，林纾的中文仍然精美、雅致、灵动。这种灵动可能会让早期白话文运动倡导者的追随者们大为吃惊，因为他们倾向认为所有的文言文都是生硬、不自然的。林纾的译文恰恰相反。他的古体散文不光能把爱情的美妙写得细致入微，同样也能成功地刻画暴力，譬如他所译的维多利亚时代的哈格德 [4] 的传奇《三千年艳尸纪》；而且语言纯正精准，比原文更上一层。读读林氏的译文：

乃以恶声斥洛巴革曰：“汝何为恶作剧？尔非病当不如是。”（《斐州烟水愁城录》第五章）

与哈格德的原文相比：

What meanest thou by such mad tricks? Surely thou art mad.

你会发现哈格德在对话中把古语与俗语混搭，造成文风艰涩，而林氏译文则干净妥帖。两相对比，高低立现。这可能解释了为什么很多更新、更准确的19世纪英语小说的中译本读起来索然无味，而林纾的古文译本却隽永异常。事实上，我们这些生于白话文长于白话文的现代人，今天再看林纾的文言，必满载惊叹，因为那是无法企及、永不褪色的文学语言。

哈格德是维多利亚时代的畅销小说家，至今仍在文学界魅力不减。如果说林纾对哈格德的传奇倾心得过了头，那他和助手在其他西方文学作品的选择上，无论是广度，还是原著的文学品质，都颇有品味和见识。在不到30年的时间里（1896—1924），林纾翻译了180多部作品，平均每年6部——对任何一个译者来说都是值得骄傲的事情，即便他没有林那样的不利因素！他翻译的作品包括：塞万提斯的《魔侠传》、笛福的《鲁滨孙飘流记》、斯威夫特的《海外轩渠录》、司各特的《撒克逊劫后英雄略》、雨果的《双雄义死录》、托尔斯泰的《现身说法》、狄更斯的多部作品、易卜生的《梅孽》（从舞台剧本改成的小说）、《伊索寓言》、兰姆姐弟的《莎氏乐府本事》、欧文的《拊掌录》，以及斯托夫人的《黑奴吁天录》和小仲马的《巴黎茶花女遗事》^[5]。总之，对任何非西方的读者来说，都堪比盛宴！

林纾会在译者序里透露一些有趣的心得和文学批评。从中可以看出他时时以国家前途为念，深信自己的译著有裨于同胞，可启发其心智，鼓舞其士气。林纾还利用翻译的机会反驳一些对中国的控诉。比如在谈到莎士比亚时，他指出“莎氏之诗，直抗吾国之杜甫”，却在戏剧中使用神灵意象，但其国人却不视其为迷信。在一部名为《爱国二童子传》^[6]的法语作品译序中，林纾表示了对极端革命措施的不满。他鼓舞中国学生把学到的知识更好地运用到中国实际，而不是走革命或暗杀之类的极端路线。

这一切再次表明，当林纾以几乎同现代速记员媲美的速度，随着助手的口译写下优雅的古文译文时，危机感从未离开过他。但是他的文学品味也并非完全被爱国热情所淹没。前文讲过他赞赏《黑奴吁天录》的精妙构思；在《撒克逊劫后英雄略》的译者序中，他也大力赞赏司各特的文学技巧，列举了七条优点：

虽每人出话，恒至千数百言，人亦无病其累复者，此又一妙也。书中主义，

与天主教人为难，描写太姆不拉壮士，英姿飒爽，所向无敌，顾见色即靡，遇财而涎，攻剽椎埋，靡所不有；其雅有文采者，又谲谏诡笑，以媚妇人；穷其丑态，至于无可托足，此又一妙也。《汉书·东方曼倩传》叙曼倩对侏儒语及拔剑割肉事。孟坚文章，火色浓于史公，在余守旧人眼中观之，似西文必无是诙诡矣。顾司氏述弄儿汪霸，往往以简语泄天趣，令人捧腹；文心之幻，不亚孟坚，此又一妙也。且犹太人之见唾于欧人久矣，狗斥而奴践之，吮其财而尽其家，欧人顾乃不怜，转以为天道公理之应尔。然国家有急，又往往假资于其族，春温秋肃之容，于假资还资时，斗变其气候。犹太人之寓欧，较幕乌为危，顾乃知有家，而不知有国；抱金自殉，至死不知国为何物。此书果令黄种人读之，亦足生其畏惕之心，此又一妙也。包本王裔之于拿破仑，漆身吞炭，百死无恤，又日为秦廷之哭；英俄怜之，挟以普奥之怒，因得复辟。虽为祚弗修，其复仇念国之心，可取也。今书中叙撒克逊王孙，乃嗜炙慕色，形如土偶，遂令垂老亡国之英雄，激发其哀厉之音，愚智互形，妍媸对待，令人悲笑交作，此又一妙也。吕贝珈者，犹太女郎也，洞明大义，垂青英雄，又能以坚果之力，峻斥豪暴，在犹太中，未必果有其人。然司氏既恶天主教人，特高犹太人以摧挫之，文心奇幻，此又一妙也。华德马者，合贾充、成济为一手者也，其劝喻诸将，虽有狡诈者，亦将为之动容。天下以义感人，人固易动，从未闻用篡窃之语宣之广众，竟似节节可听者；则司氏词令之美，吾不测其所至矣，此又一妙也。

总之，林纾认为司各特具有“文心奇幻”，并将之与司马迁和班固媲美，这两人都是中国杰出的历史学家。出自学者兼文体家的林纾之口，这可谓是极高的称赞了。

林纾对狄更斯的评价更具洞察力，他认为中国最优秀的作家在狄更斯面前也黯然失色。在一篇接一篇的译者序中，林畅谈狄更斯的独特长处：

余虽不审西文，然日闻其口译，亦能区别其文章之流派，如辨家人之足音。其间有高厉者，清虚者，绵婉者，雄伟者，悲梗者，淫冶者，要皆归本于性情之正，彰瘴之严，此万世之公理，中外不能僭越。而独未若却而司迭更司文字之奇特。天下文章，莫易于叙悲，其次则叙战，又次则宣述男女之情。等而上之，若忠臣孝子，义夫节妇，决胆溅血，生气凜然。苟以雄深雅健之笔施之，亦尚有其人。从未有刻划市井卑污齷齪之事，至于二三十万言之多，不重复，不支厉，如张明镜于空际，收纳五虫万怪，物物皆涵，涤清光而出，见者如凭栏之观鱼鳖虾蟹焉，则迭更司者，盖以至清之灵府，叙至浊之社会，令我增无数阅历，生无穷感喟矣。（《孝女耐儿传》序）

然后，他又一次进行对比：

中国说部，登峰造极者，无若《石头记》，叙人间富贵，感人情盛衰，用笔缜密，著色繁丽，制局精严，观止矣。其间点染以清客，间杂以村姬，牵缀以小人，收束以败子，亦可谓善于体物。终竟雅多俗寡，人意不专属于是。若迭更司者，则扫荡名士美人之局，专为下等社会写照，奸谗狙酷，至于人意所未尝置想

之局，幻为空中楼阁，使观者或笑或怒，一时颠倒，至于不能自己。则文心之遯曲，宁可及耶？（《孝女耐儿传》序）

事实上，林纾认为狄更斯所做的事情比司马迁写《史记》还要难，因为狄更斯描写的是寻常百姓的寻常生活，尤其是社会底层的民众。

为了向读者展现狄更斯的独特魅力，林纾选了《孝女耐儿传》中的耐儿之死作为例子：

而此书……精神专注在耐儿之死。读者迹前此耐儿之奇孝，谓死时必有一番死诀悲怆之言，如余所译茶花之日记。乃迭更司则不写耐儿，专写耐儿之大父凄恋耐儿之状，疑睡疑死，由昏愤中露出至情，则又茶花女日记外别成一种写法。盖写耐儿则嫌其近于高雅，惟写其大父一穷促无聊之愚叟，始不背其专意下等社会之宗旨，此足见迭更司之用心矣。（《孝女耐儿传》序）

这里，我们看到林纾把狄更斯与小仲马相比较，正如之前将之与曹雪芹和司马迁相比较一样。也许他没意识到自己是中国最早踏足比较文学研究的人。

林纾对《块肉余生述》的分析最为精彩：

此书为迭更司生平第一著意之书，分前后二编，都二十余万言。思力至此，臻绝顶矣！……大抵文章开阖之法，全讲骨力气势，纵笔至于灏瀚，则往往遗落其细事繁节，无复检举。遂令观者得罅而攻。此固不为能文者之病。而精神终患弗周。迭更司他著，每到山穷水尽，辄发奇思，如孤峰突起，见者耸目。终不如此书伏脉至细，一语必寓微旨，一事必种远因，手写是间，而全局应有之人，逐处涌现，随地关合，虽偶尔一见，观者几复忘怀，而闲闲着笔间，已近拾即是。读之令人斗然记忆，循编逐节以索，又一一有是人之行踪，得是事之来源。综言之，如善奕之着子，偶然一下，不知后来咸得其用，此所以成为国手也。（《块肉余生述》前编序）

面对如此杰作，林纾认为中国最优秀的两部小说，《水浒》和《红楼梦》，也难望其项背。《水浒》虎头蛇尾，后面章节不如前面精彩，人物也变得千人一面；《红楼梦》涉及的主题相对简单，男欢女爱本来就“很容易吸引读者”。不知红学家们能否平心静气地看待林纾的评论，但可能真正耐人寻味的是，为什么一个高傲的中国旧式文人会醉心于一个擅长描写“下层社会”的英国小说家呢？我们有理由相信林纾对此应该不以为然才对。

毫无疑问他是被狄更斯“化腐为奇”的独特魅力所吸引，但我认为他更欣赏狄更斯公正不阿地揭露英国豪门富户罪恶的做法。实际上，林纾震惊地发现，英国，这个西方的头号强国，竟然曾跟中国一样为同样的社会积弊所困扰：

英伦在此百年之前，庶政之窳，直无异于中国，特水师强耳。迭更司极力扶掖下等社会之积弊，作为小说，俾政府知而改之。……天下之事，炫于外观者，往往不得实际。穷巷之间，荒伦所萃，漫无礼防，人皆鄙之。然而豪门朱邸，沉沉中喻礼犯分，有百倍于穷巷之荒伦者，乃百无一知。此则大肖英伦之强盛，几谓天下观听所在，无一不足为环球法则。非得迭更司描画其状态，人又乌知其中尚有贼窰耶？顾英之能强，能改革而从善也。吾华从而改之，亦正易易。所恨无迭更司其人，能举社会中积弊，著为小说，用告当事，或庶几也。

这里再次显示了林纾的爱国热忱。他实际是在解释自己为何倾注如此情感来翻译狄更斯。对他而言，就像对严复一样，翻译不是无谓的消遣，而是相当严肃的事业，是实现社会和政治改革的手段。

他对中国狄更斯的呼唤也并非荒野之声。就在他作此呼唤之时，中国已有诸如《官场现形记》和《二十年目睹之怪现状》一类的小说出现。如同林纾的汉译狄更斯和其他小说一样，这些汉语小说也促成了新风气：人们群起揭露官场的腐败，谴责官吏的贪污无能。事实上，在此后十年中，随着媒体报纸越来越多的揭露，中国小说也进入了一个新的创作高潮。

但是，即便是这样的作品也很快被取代了。一场更大的变革悄然而至。一种全新的文学——新的观念，新的介质——正在兴起。正如严复引入的西方资本主义意识形态对中国的改革、革命、内战和更大的革命起到推波助澜的作用一般，一位旧式中国文人翻译的西方作品也为之后更加动乱的岁月中激进社会小说的兴起奠定了基础。严复和林纾都是时代的巨人，对自己引发的巨大变革，严复可能隐约预见，林纾则完全始料未及。最后，他俩都转而反对他们曾致力发动的变革。主张维新的严复转而拥护帝制；翻译西方文学的林纾则猛烈抨击发轫于北京大学的新文化运动。想必他们余生都在为自己开启翻译事业的那天追悔莫及吧，但翻译本身一直都是非常微妙的背叛。

III LU XUN

One must start from the point where Lu Xun is invariably launched by his critics, namely, that he is a satirist. He could not choose but be one. He wrote his *Ah Q* and his "miscellaneous essays" at a time when only satire could be effective. Satire is ever allied to surfeit; it thrusts open the inner corruption of a society at the very moment when the society has acquired, what with wigs and fine dress, wine and courtesans, a most civilized look. In the case of Lu Xun's China there was not even that surface glitter. A few lighthouses might be beaming decoratively on the eastern and southern coasts, a few railways might be stretching like phosphorescent ribbons into the dark plains of North China, but further inland, in the villages and small towns, taxes were being collected 60 years in advance, and family elders could still punish by death delinquent young females found guilty of illicit love. There, in spite of the easy revolution of 1911, Old China was still sitting pretty, though after the bad mauling it had received since the Opium War at the hands of English merchants and American missionaries, it was an Old China with its apparatus of torture intact but its humanism in fragments. The literary situation was hardly better. Hu Shih had made titanic efforts to make people write as they spoke, but the old *wenyan* Chinese was still government Chinese, business Chinese, newspaper Chinese. Some of the "new" intellectuals who were practising writing in the colloquial manner had put on airs of a different kind: they were precious, and would not bother to look beyond the shallow textbooks and second-rate poets they had read at Western universities. There was some effort at achieving a new pattern of things but for the moment the pattern adopted was only distinguished by its bizarre eclecticism.

It is before such a backdrop that Ah Q makes his bow. He is a figure of whom many Chinese are secretly ashamed, as they are

ashamed of the narrow, twisting streets and the pungent smells of their towns. For Ah Q is the typical little man of a Chinese small town, with all the faults inherent in the Chinese character, but withal an honest, harmless, even lovable person. Lu Xun leads him through the mock heroic of a put-up revolution and a speedy counter-revolution. It is not so much a time of falling towers, as one of swift shiftings of fronts. Ah Q does not change fast enough, and consequently is caught on the wrong side of the fence at the arrival of the hangman. When he is shot, the soldiers pass on, and the small town, having witnessed what is taken to be a New Order, sees the same round of courtesy calls among the same old faces of the local gentry.

They are the imperishable, the local gentry. But one is not allowed for a moment to suppose that they are the sort of urbane characters that occidental lovers of China have fondly taken the Chinese to be. There is no talk of art, of porcelain and landscape paintings in the world of Lu Xun. There is a flat provinciality. The gentry never miss an opportunity to flaunt their morality and their solid burgher virtues in all the ringing but vapid words only a Confucian is capable of mustering, and yet the moment they see a female beggar their first reaction is a gnawing regret. What wonders will not a good bath do to that outwardly dirty but none the less warm young body! Thus thinks Mr. Shih Ming, one of the imperishables who appear in the story "A Cake of Soap", and presently he could even hear the noise made by her soapy hand as it rubs now her back, now her neck, now her bosom, now her thighs. In a later story, in *Old Tales Newly Collected*, Lu Xun makes a gentry-scholar, one of the "scientific" historians, who easily reminds us of the savants on Swift's Flying Island, walk under the outsize legs of a giant goddess, whose mythological origin he has discredited. Coarse, one would say, though the word calls to one's mind the strange fact that almost all great satirists care for coarse details. Lu Xun is under no obligation to be shabby-genteel. He must go down to the base and the unpleasant. But through his art the base and the unpleasant, as well as the

dullness and ennui of a dusty Chinese town, suddenly take on "the huge proportions of immortality".

The trick, once again, is as old as satire itself. Lu Xun has been able to achieve all this because he is what all great satirists are, a story-teller and a stylist. He is economical with his means, executing in bold rapid strokes. His classicism in this matter is in sharp contrast to the verbosity of other Chinese writers: he has too much to say and no time to waste. For the subtle blending of fantasy and verisimilitude, of the bitter and the tender, of general situations and topical allusions, Lu Xun has been admired, imitated, but not equalled. But it is as a master of words that Lu Xun has fascinated even his bitterest enemies. Not, however, because he is a stylist in the esoteric, *avant-garde* sense. He has no love for newfangled terms, which the Western-educated academics are only too ready to counterfeit. Instead, he uses old words, even insists on using the old forms of common words—there is something definitely coquettish about his etymological pedantry—only he puts them in a totally colloquial, at times very Western, syntax. As a result, the old coinages from the classics not only shine with a rich antique glow, but have a keen new edge that cuts deep into the marrow.

This sense of style has come to the rescue of even his most occasional writings and made them a delight to read. China has abounded in literary quarrels, and in his time Lu Xun was the stormcentre of the particularly venomous ones. With his views that literature must be *engagée*, Lu Xun ran afoul of the university wits who were then talking languidly of Art in their perch in Beijing and Shanghai. His radical political opinions got him into serious trouble with the officials. To deal effectively with his enemies, who were thus many and powerful, he has invented a new genre of writing, of what his detractors call "miscellaneous"essays. These are short articles of a few dashing, biting lines, full of point, all teeth and claws, but also packed with innuendo of the most intriguing sort. They are the daggers for street-corner combats, the terrible commandoes out on a

sudden raid. In Lu Xun's hands they were so deadly that paper after paper, periodical after periodical, for which Lu Xun had written, had to be closed down by government orders. But always Lu Xun managed to find a new window somewhere in the sprawling city of Shanghai, from which, under a different penname, he continued to snipe and kill, until after a few rounds it too was overwhelmed. Many of his fellow writers were gaoled and shot, and Lu Xun himself barely avoided arrest by changing his address once every few hours. His was therefore the bitter, running fight waged under a hundred pseudonyms across the desert of despair. There is something heroic about the polemic literature of that period, because it was largely the literature of the underground. Many to this day lament Lu Xun's tremendous atrophy of energy in the writing of these disputatious essays, energy which might have been turned to the writing of more permanent literature. But perhaps one may also venture to suggest that lamentable as was the occasion that called forth these essays, they are not exactly dated. They are not the casualties of a polemic war, any more than the writings of Defoe and Swift, or the tracts of the passionate 17th-century English religious writers are the casualties of a pamphleteering war. There is the same vigour, the same human interest, the same firm mastery of the medium at hand. With Lu Xun, there is also an undying faith in the future of man.

This faith has taken the strange form of the many translations he has made of Russian and other Slav works. It must be confessed that to at least one reader a great part of these translations are unreadable. But translations are essentially Lu Xun's sorties into the regions of experimental writing, of which the first startling feature is his torture of the Chinese language. A good classical scholar, Lu Xun knows all the tricks of Chinese written characters. He is perhaps not a little fascinated by them. But he knows also that in this fascination lies the horror: more stubborn men than he have been softened beyond all recognition by the things that these square characters stand for. He strives, therefore, not merely for synonyms and adverbial phrases,

which he coins right and left with an abandon alarming probably to Hu Shih himself, but he must have an exact similarity in structure. Consciously and deliberately he tries to make the Chinese he employs in the translations read like a foreign language. It is as if he had thought that by breaking down the Chinese syntax, he was also breaking down the walls built round the Chinese spirit. He does not chime in with the Western-educated professors' eulogy of the merits of Anglo-American democracy. Instead, his translations have endeared to the Chinese imagination the collective farms basking in the warm Black Sea sun. He has become the main link between China and the deep, troubled mind of Eastern Europe. But to get there, what strange country one has to travel across! For the truth is, only the great name of Lu Xun could make his readers plod through those heavily written pages, difficult, halting, dark with an alien, imposed grammar. He is least readable when he is most consciously carrying out his own theories of translation. But there were times when even he seems to have been weary of keeping up the tremendous effort. In one of those relapses or releases, he turned out his most satisfying piece of translation, Gogol's *Dead Souls*. It is so good that one looks in vain for a like achievement among the translations of Western European and American works, in spite of the fact that most Chinese writers have acquired their English assiduously, while Lu Xun did not even understand Russian. He had to work through a Japanese version, but Gogol fits him with such a completeness that even at two removes Lu Xun's rendering has caught the soul of the original. Gogol, indeed, fits Lu Xun better than do the Soviet Neanderthals after the Flood. Both are what the true revolutionary would call prehistoric. Both are masters of the grey, torturing mood before the dawn. Both are unhappy, bitter, consumed by a tenderness toward the humble, inarticulate people in the small towns buried deep in the two vast, dark continents called China and Russia.

Here, however, Lu Xun begins to shed his disguise. For, with his visions of the future, and his intolerable wrestle with the past, Lu Xun

is only disguised as a satirist. He finds his own compassion for men so overpowering that in his *Wild Grass* he becomes lyrical, bursting out into a series of prose poems that have haunted many of his readers with their nostalgic, even fragile, beauty. It is perhaps not his best work, but it is symptomatic of the sentimentalism that has characterized China's new writing from the very outset. There is no self-pity in this sentimentalism, nothing tearful or mawkish, because it was born of a great humanitarian movement which, following in the wake of the Chinese Renaissance of 1919, demanded equal rights for women, advocated social justice, sought to narrow the gap between the well-fed, eloquent few in the cities and the dumb many in the countryside. However easily one may equate it with the rise of bourgeois culture in the coastal cities and condemn it as such, the movement started as a movement of love. It is this preoccupation with one's love of fellow men—itsself a way by the sons of the gentry to expiate the sins of their ancestors—that has made so many Chinese writers write with what to the cooler and perhaps happier world outside is undue warmth of feeling, that has deprived them of their native sense of humour, that, finally, has given a note of protest to the best that has been written in China in the past 30 years. With a sardonic grace Lu Xun has time and again tried to conceal this love but his readers have not been deceived. The feeling of fellowship has been amply reciprocated. Lu Xun loved to tell a little anecdote about two young students he met one afternoon at a bookshop. They had mistaken him for the shop clerk and handed him the money for a book they had taken. It turned out to be a copy of his *Wild Grass*. The coins had been fished out from a shirt pocket next to the skin, and when they were put into Lu Xun's hand, they were still warm with the warmth of the young man's body. This warmth was branded on Lu Xun's conscience; when he wrote, he could not afford to be trivial or frivolous. He once confessed that he was a cow who had to turn the bitter grass he ate into milk. When milk gave out he offered his heart's blood. He wrote himself out, but among the ten thousand men who, in

1936, walked in his funeral procession, amid the hush that had for once descended on the heartless city of Shanghai, many had put warm coins on the counter to buy his books.

* * *

Thus I wrote in 1949. Over 30 years have passed, but Lu Xun has defied the usual fate meted out by history to the heroes of yesterday: no eclipse, only added lustre.

And more surprises. Only the other day, turning over the volume of short stories he edited in 1935 for the *Comprehensive Anthology of Modern Chinese Literature 1917– 27*, I came upon such a passage in his Introduction:

The prevailing mood of the awakened young intellectuals of the time was one of enthusiasm mixed with bitterness. Even when they saw a ray of light, that only accentuated the surrounding darkness.... What nourishment they got from abroad, too, turned out to be the bitter fruit of the *fin de siècle*, administered by Oscar Wilde, Nietzsche, Baudelaire, Andreiev and the like. They were quite ready "to sink their boat", if only "to find a way out by risking all". Some of their works revealed the feeling that they were pleased with neither spring nor autumn. Indeed, black-haired, fair-complexioned youths were found singing songs of inexpressible grief, as if life's burden proved too much for them. This was a mood that neither the lyricism of Feng Zhi nor the pastoralism of Sha Zi could disguise....

However, the Sunken Bell Society remained China's toughest, sincerest, longest fighting group of writers. For a moment it looked as though they were...working themselves to death, like the maker of the Sunken Bell who even while drowning in water would make the bell ring with a huge sound by striking it with his very feet. This, however, they were destined not to do. They survived to see the world change and the times become different. They meant to sing again, only to find their listeners asleep, dead, or scattered, leaving a waste land before them. Buffeted by wind and dust, they laid up their lyre in loneliness and sorrow.

Unexpected lyricism? But then there was always the poet in Lu Xun, only he tried to suppress it, though not always successfully. Indeed, this whole Introduction surprises one with its many touches of tenderness and nostalgia and the sheer elegance of the writing. But

that's not all. There is also plenty of shrewd criticism expressed wittily:

Yang Zhensheng's pen became more lively... but in order to be "true to his subjectivity" he endeavoured to create idealized characters by artificial means.... He completed a novelette, called *Yu Jun*.... He had decided on "making Nature artistic", which he would do through "telling lies", for in his view "the fiction writer is one who tells lies". Following this rule and incorporating many people's suggestions, he created the character of Yu Jun. This much, however, is certain: Yu Jun was only a puppet and her birth also marked her demise. Since then we have not seen any more work from this writer.

Or this about Feng Wenbing, a writer noted for his delicacy:

Feng Wenbing, later known as Fei Ming, also made a fleeting appearance in *Qian Cao*, without showing his strengths. It was only when the *Tales from a Bamboo Grove* appeared in 1925 that readers became aware that behind his unadorned simplicity there lurked what he himself termed "discernible sadness". However, perhaps because the writer was over fond of his rather exclusive sadness, he soon refrained from showing his true feelings, so much so that he appeared, in the eyes of plain-speaking readers, to be deliberately laddish, a lone soul in love with his own shadow.

No one could have put it more gracefully, or with greater economy, or with more telling effect. But what's even more striking is the penetration and justness of Lu Xun's views. He is scrupulously fair, giving the pertinent facts, often letting the author speak for himself, but at the same time he leaves us in no doubt about what he thinks of the matter under discussion. Time after time, he winds up with a memorable sentence or two, placing the writer or work neatly in a niche which later history has found no cause but to endorse.

Altogether 47 writers are treated, over half of them in some detail, grouped according to the literary society or magazine with which they were associated. Thus we find, of magazines, *New Youth*, *New Tide*, *Modern Review* and the literary supplements of two Beijing dailies; of literary societies, the "Musai", the "Sunken Bell", the "Wild Plain" and the "Society of Unknowns". If the magazines listed are still dimly remembered, the literary societies are not. Thanks to the vivid account Lu Xun gives of them in the Introduction—the passage earlier

quoted on the Sunken Bell Society is a fair specimen—as well as the generous selections he makes of their works, many of the near-forgotten names have taken on a second lease of life.

Reading the Introduction today, one is also struck by the fact that writers were already debating in the 1920s some of the questions that are still with us today. For Lu Xun takes care to weave into his running account of writers and works another account, that of the major controversies of the time. These controversies eddied around four questions: literature for the sake of humanity, which means literature as a weapon of social reform; art for art's sake; native-land literature, or literature from the provinces or border areas; and satire in literature. Here again Lu Xun presents the relevant facts, the pros and cons, but never without comments of his own, such as this *aperçu* on satire:

Satirical literature can perish of its own effort at deliberate fun.

Coming as it does from a great satirist, this serves as a warning that satire should never degenerate into mere wisecracking.

Thus combining fact and comment, narrative skill and critical acumen, a firm grasp of the fundamentals and lyrical flights of the imagination, Lu Xun examines and interprets a whole decade's fiction within the short space of 17 gracefully written pages (no more than 14,000 words).

It is an astounding feat. For Lu Xun demonstrates in one unforgettable essay just how literary history should be written, an object lesson that is still badly needed today. No doubt, Lu Xun has his thesis, his historical perspective, which starts from the view that literature is to serve the people. No doubt, he uses the realist mode as his only criterion. But this has not prevented him from treating the works of writers of other literary persuasions with understanding and respect, or from treating literature as literature. His consistent critical position has only enhanced the unity of his treatment. But the balance and shapeliness of the essay are all his own. Where plenty of literary histories read like catalogues of names and titles, Lu Xun writes with a

leisurely pace, highlighting this, pinpointing that, savouring the fine things as he goes along. Where others deal out dry generalities, he is pleasingly factual—his skilful use of quotations alone is an inspiration—but factual only to illustrate his general point. And how well do his deftly drawn thumbnail sketches of individual writers fit into a masterly presentation of schools, movements and the general background! Finally, amid the almost universal lament over the undistinguished style of the literary historians of today, East and West, how our eyes catch fire at the sight of Lu Xun's prose, that unique blending of classical and modern!....

If a single essay has so much to offer, how much more the major works of Lu Xun.

1980

叁 鲁迅

提到鲁迅，不得不从他被评论家们一贯认定为讽刺家说起。鲁迅别无选择。他的《阿Q》和“杂文”都写于唯有讽刺才有效验的时代。讽刺与放纵向来形影相随；它猛然刺破一个社会在衣香鬓影花天酒地里幻化出的文明伪装，现出它腐朽的内里。而鲁迅所在的中国甚至连这点浮光都没有。东南沿海一带或许装点着几座灯塔，华北平原的黑土地上或许蜿蜒着几条微亮的缎带般铁路，然而内陆深处的村庄小镇仍然实行提前60年征税的制度，家族长老仍然可以自行处死偷情的少女。辛亥革命虽然迅速推翻了清王朝统治，但旧中国仍然得以安富尊荣，只不过在鸦片战争后受过英国商人和美国牧师粗劣摆弄的旧中国摧残人性的根本制度毫发无伤，人道主义却已支离破碎。文艺界的情形也好不到哪里去。胡适曾大力倡导用白话文写作，但当时文言文仍是官方、商务和媒体用语。一些用白话文写作的“新”知识分子却摆出另一副姿态：他们矫揉造作，视野仅局限于西方大学里接触到的肤浅教科书和二流诗作。也有人为了建立一种写作新模式而努力，然而一时间得以采用的新模式也只是一种奇怪的大杂烩而已。

阿Q就是在这样一个背景下面世的。这个人物是很多中国人私底下引以为耻的那种人，就像他们深以家乡小镇那狭窄弯曲的街道和刺鼻的气味为耻一般。因为阿Q就是中国小镇上一个典型的小人物，带着中国人的劣根性，大抵却还老实、无害，甚至有点可爱。鲁迅以戏仿英雄体把阿Q带进一场革命闹剧，其后又迅速让他走向反革命。这一时期与其说势力纷纷倒台，不如说阵营时时变换。阿Q倒戈得不够快，于是就被刽子手当作反革命抓了去。阿Q被处决了，革命党也走了，而在这个见识过所谓“新制度”的小镇里，仍是一样的乡绅在互道着一样的寒暄。

这些乡绅的形象是不朽的。但他们绝不是碰巧爱上中国的西洋人自作多情想象出来的那类中国市民。鲁迅笔下没有关乎艺术、瓷器和风景画的雅论，有的只是平实的乡土风情。乡绅们从不错过任何一个机会，以儒家独有的响亮而枯燥的字眼展现他们的伦理说教和根深蒂固的市民道德，可是一看见女乞丐他们即刻就感到一种揪心的惋惜。这年轻的姑娘外面看着脏，要是能给她咯支咯支遍身洗一洗，好得很哩 [1]！《肥

皂》里不朽的主人公四铭就是这样想的，他几乎能听见她满是皂沫的手擦洗后背、脖颈、前胸、大腿时发出的咯支咯支的声音。在后来的一则收入《故事新编》的故事中^[2]，鲁迅让一位古衣冠的小丈夫，一位很容易让人想起乔纳森·斯威夫特的飞岛中的学究，在女娲的两腿之间出现了^[3]，那女娲被刻意抹掉了神话色彩。你可以说这种写法粗俗，但怪异的是，几乎所有的讽刺家都喜欢粗俗的细节。鲁迅没有必要来酸文假醋那一套。他就是要深入到鄙俗的令人生厌的所在。而经过他的艺术加工，那些鄙俗的令人生厌的事物，连同那死气沉沉、灰扑扑的中国小镇，一下子沐上了“不朽的光芒”。

其中的玄机，也与讽刺的历史一般悠久。鲁迅之所以能做到这一切，是因为他与所有的讽刺大家一样，是个讲故事高手，是个文体家。他以精练的手法进行粗线条白描。他的古朴文风与其他中国作家的冗长繁琐形成鲜明对比：他要说的太多，没时间浪费。鲁迅那巧妙地融合了荒诞和写实、苦涩和温情、一般叙述和影射叙事的方式一直被景仰和模仿，却始终无人企及。鲁迅之所以连宿敌都能吸引是因为他是语言大师，并非因为他那晦涩前卫的文风。那些受过西方教育的学者热衷于模仿的时髦词，鲁迅从不青睐。相反，他使用旧词，甚至坚持使用常用词的旧形式——他在词源方面的墨守成规确乎有些矫情——只是他把旧词放在通俗化、有时还明显西化的句法结构中。这样一来，古书中的旧词不仅散发着丰富的古玩艳泽，又有了刺入骨髓的新锐角。

这种文风使得鲁迅的应景文都成了赏心悦目之作。中国向来不乏文学论战，而鲁迅当时正被最恶毒的批判推到了风口浪尖。鲁迅认为文学必须服务于社会，结果得罪了京沪两地那些安坐高椅、漫谈艺术的学院派文人。他激进的政治观点也触怒了当权者。为了有效地对付众多强大的敌人，鲁迅发明了一种新文体，即他的讨伐者所谓的“杂文”。这些文章有时短至几行，辛辣而振奋人心，观点鲜明直白，同时又巧妙地含沙射影。如同巷战中的一把把匕首，给人冷不防的骇人突袭。在鲁迅笔下它们致命的威力使得一家家他供稿的报纸杂志被政府勒令停刊。但鲁迅总能在当时恣意扩展的上海找到新窗口，换个笔名，继续狙击，继续射杀，直到几番下来这个窗口再次被封。鲁迅的很多同行被捕被杀害，他自己每几个小时换一个地方，才幸免于难。所以鲁迅是顶着上百个假名在绝望的荒漠打着艰苦卓绝的游击战。那时的论战文学有些英雄主义的意味，因为主要是在地下进行。很多人时至今日仍痛惜鲁迅当年为写这

类文章伤耗了巨大心力，而他本来可以创作更经久的作品。但或许我们也可以说，虽然那些杂文成文的背景让人叹惋，但也未必就是一时之物。它们并非论战的牺牲品，正如笛福和斯威夫特的作品或者17世纪英国虔诚的信徒作家的宗教册子并非宣传战的牺牲品一样。鲁迅的这些杂文同样充满活力，同样着眼于人性，同样技艺纯熟。此外，鲁迅也有着对人类未来的永恒信念。

这种信念以一种奇特的方式体现出来，即体现在鲁迅对俄国和其他斯拉夫民族诸多作品的翻译之上。不得不说，这些译作有很大一部分可读性差（至少对笔者而言），但从本质上讲翻译是鲁迅进行试验性创作的尝试，其首要的骇人特征是对中文的扭曲。作为一个传统文化造诣颇深的学者，鲁迅通晓汉字的奥妙，也许对之还很痴迷。但他也知道在这份痴迷之中还藏着恐惧：比他更倔强的人都曾在这硬挺挺的方块字所代表的含义面前软化成了绕指柔。因此在翻译过程中他不但极力寻找同义词和副词短语（他任意造词，或许到了连胡适都会为之骇然的地步），甚至连句法结构都要极为相像。他有意、甚至刻意把自己的译文弄得像外文。他似乎觉得，打碎中文的句法就是拆掉禁锢民族魂的藩篱。他并不附和受过西方教育的学院派教授对英美民主制的优越性加以赞美，而是通过翻译使国人通过想象对那沐浴在黑海暖阳下的集体农场产生亲近感。鲁迅成了中国与忧思深沉的东欧之间的主要纽带。可是要到达那里需要跨过多么奇异的国界啊！说实话，恐怕只有鲁迅的大名才能使读者肯在那样晦涩难通、充满生搬硬套的奇特文法的书页中艰难跋涉。他越是有意识地奉行自己的翻译理念，他的译文也就越难懂。有时似乎连他自己都厌倦了这种坚守。但也正是在他放弃了坚守或有所松懈之际，他最令人满意的译作，果戈理的《死魂灵》，出炉了。这本译作如此出色，以至于想在西欧和美国的汉译作品中找到类似之作，只能是徒劳，尽管大多数中国作家都苦心钻研过英语，而鲁迅甚至不懂俄语。他只能通过日译本转译，但果戈理与鲁迅精神上的完美契合使得哪怕经过两次语言的抽离，鲁迅仍能抓住原著的精髓。事实上，果戈理比“大洪水”之后的苏联蛮人更合鲁迅的意：二者都会被真正的革命者称为“史前人”；二者都善于刻画黎明前灰暗、痛苦的心境；二者都含悲忍怨，为中俄两国腹地深处小镇上的那些卑微、不善言辞的小人物寸寸柔肠。

然而，在这里鲁迅开始卸去伪装。在对未来的诸多想象中，在与过去那令人无法承受的搏斗中，鲁迅只是伪装成讽刺家罢了。他对人类如

此悲悯，以至于在《野草》中他成了抒情诗人，一篇篇散文诗喷薄而出，其怀旧柔美令很多读者无限缱绻。这也许不是鲁迅最好的作品，却从一开始就预兆着以感伤主义为标志的中国新文学的出现。这种感伤没有眼泪汪汪、无病呻吟的自怨自艾，因为它脱胎于1919年中国新文化运动之后的人道主义运动，要求妇女平权，倡导社会公正，力求缩小城乡差距。尽管人们很容易把它与沿海城市新兴的资产阶级文化等同起来，并加以责难，该运动自始都是以爱为宗旨的运动。正是这种对同胞的爱——本身就是绅士阶层的子孙替先辈赎罪的方式——才使得很多中国作家在写作时倾注了更冷静、或许也更快乐的外界看来，过于深切的情感；才削弱了中国人与生俱来的幽默感；才对中国过去30年来最优秀的作品发出了不谐音。含蓄嘲讽的鲁迅曾三番五次试图隐藏这种爱意，但读者的眼睛是雪亮的。他与读者惺惺相惜。鲁迅对某日下午在书店遇到两个青年学生一事津津乐道。他们误认为他是店员，付钱给他，买的正是《野草》。银元是从最里层衣衫的口袋里掏出来的，放入鲁迅掌心时还带着青年的体温。这温度深深烙印在鲁迅的心口上；他的写作因此不敢流于肤浅或琐碎。他曾说过自己是一只牛，吃的是草，挤出来的是奶【4】。奶挤完了，他便付出一腔热血。鲁迅为写作殚精竭虑，直至油尽灯枯。1936年上万人为他送葬，在无情的上海滩出现了一次难得的肃穆，这万人中很多都曾掏出带着体温的银元买他的书。

* * *

上文写于1949年。时间过去逾30年，鲁迅抵制住了历史通常赋予昔日英雄的宿命：不但没有褪色，反而愈焕光彩。

另外还有更多惊喜。就在前几天翻阅鲁迅1935年编纂的《〈中国新文学大系〉小说二集》时，我看到他在序中有这样一段话：

但那时觉醒起来的智识青年的心情，是大抵热烈，然而悲凉的。即使寻到一点光明，“径一周三”，却是分明的看见了周围的无涯际的黑暗。摄取来的异域的营养又是“世纪末”的果汁：王尔德（Oscar Wilde），尼采（Fr. Nietzsche），波特莱尔（Ch. Baudelaire），安特莱夫（L. Andreev）们所安排的。“沉自己的船”还要在绝处求生，此外的很多作品，就往往“春非我春，秋非我秋”，玄发朱颜，低唱着饱经忧患的不欲明言的断肠之曲。虽是冯至的饰以诗情，莎子的托辞小草，还是不能掩饰的……

……但在事实上，沉钟社却确是中国的坚韧，最诚实，挣扎得最久的团体。它好像真要如吉辛的话，工作到死掉之一日；如“沉钟”的铸造者，死也得在水底里用自己的脚敲出洪大的钟声。然而他们并不能做到，他们是活着的，时移

世易，百事俱非；他们是要歌唱的，而听者却有的睡眠，有的搞死，有的流散，眼前只剩下一片茫茫白地，于是也只好在风尘湮洞中，悲哀孤寂地放下了他们的箜篌了。

出人意料的抒情？其实鲁迅体内一直蛰伏着一位诗人，只不过他竭力压抑罢了，有时却也压抑不住。事实上，整篇序言语调之感伤怀旧，文笔之优雅十足都令人惊奇。但这不是全部。文中还有大量诙谐而敏锐的批评：

杨振声的文笔，却比《渔家》更加生发起来……他“要忠实于主观”，要用人工来制造理想的人物……这才完成一本中篇小说《玉君》……他先决定了“想把天然艺术化”，唯一的方法是“说假话”，“说假话的才是小说家”。于是依照了这定律，并且博采众议，将玉君创造出来了，然而这是一定的：不过一个傀儡，她的降生也就是死亡。我们此后也不再见这位作家的创作。

还有这段对以文风精巧而闻名的冯文炳的评价：

后来以“废名”出名的冯文炳，也是在《浅草》中略见一斑的作者，但并未显出他的特长来。在一九二五年出版的《竹林的故事》里，才见以冲淡为衣，而如著者所说，仍能“从他们当中理出我的哀愁”的作品。可惜的是大约作者过于珍惜他有限的“哀愁”，不久就更加不欲像先前一般的闪露，于是从率直的读者看来，就只见其有意低徊，顾影自怜之态了。【5】

没人能比鲁迅更委婉、更简练或达到更显著的效果了。但更惹人注目的是其论点的深刻和公正。他极为公平，摆出相关事实，让作者自行表达观点，但同时他对自己的立场也绝不含糊其辞。一次又一次他以一两句令人难忘的话来结束对某一作家或作品的点评，对其作出简练的定位，后人对此唯有心悦诚服。

鲁迅一共评价了47位作家，其中超过半数较为详尽。这些作家都按其当时所属的文学社团或供职的杂志来归类。我们看到被提及的杂志有《新青年》《新潮》《现代评论》和《北京日报》的两份文学副刊；文学社团有弥洒社、沉钟社、莽原社和未名社。人们对那些杂志或许还有些许模糊印象，而文学社团则早已湮没无闻了。幸而鲁迅在序中对它们进行了生动的描绘——前面关于“沉钟社”的引文就是很好的例证——并大量选用它们的作品，很多几乎被遗忘的名字才得以获得第二次生命。

现在读鲁迅的序，我们也会惊讶地发现20世纪20年代的作家已经在争论一些今天仍然困扰我们的话题了。鲁迅着意在对作家和作品的叙述中交织另外一条线，即当时争论的焦点。这些争论围绕四个问题：肩负社会使命的文学，即作为社会改革工具的文学；为艺术而艺术的文学；乡土文学，即地方文学或边界地区的文学；讽刺文学。鲁迅再一次摆出

相关事实，分析各自优缺点，但绝不会没有自己的观点，例如这一条对讽刺的评价：

讽刺文学是能死于自身的故意的戏笑的。

这句话出自讽刺大家之口，自是向人们警示讽刺永远不应沦为纯粹的插科打诨。

这样事实与论点结合、叙述技巧与批评锐度结合、对基本原理的牢牢把握与抒情想象的自由驰骋结合，鲁迅在短短17页内（不超过14,000字）笔调优雅地分析了整整十年的小说。

这是一个惊人的成就。鲁迅在一篇令人难以忘怀的散文中展示了应该如何书写文学史，而这至今仍是个难题。毫无疑问，鲁迅的论题和他的历史视角都出自文学应该服务于人民这一根本观点。毫无疑问，他把写实作为唯一的标准。但这并未妨碍他用理解与尊重的心态去对待其他文学派别的作品，也未妨碍他客观地看待文学本身。他一贯的批评立场只是增强了他评论的一致性，而其协调平整的文风仍是他独有的。太多文学史读起来都像姓名和头衔组成的流水账了，鲁迅写来却游刃有余，此处一突出，彼处一点明，一路行着细致的鉴赏。别人枯燥地泛泛而谈，鲁迅却善用生动的事实——熟练地穿插引文——但事实还是为了阐释观点。他对个体作家娴熟的简描与他巧妙呈现的文学流派、文学运动和时代大背景又是多么相得益彰！最后，当时下的文学史家，无论东方还是西方，那毫无特点的文风惹来一致浩叹之时，鲁迅将古典与现代融为一体的独特文风，多么让我们双目为之一眩啊！……

一篇散文便能令人收获如许，鲁迅的主要著作更该让我们如何受益！

IV LU XUN AND WESTERN LITERATURE₁

Literary history of a near contemporary period is notoriously difficult to write. It often reads like a catalogue of names and titles or the sort of annual summary one finds in the *New York Times Book Review*. The writers and works covered are not "distanced" enough to be seen in true perspective, and yet not near enough so as not to require too much background knowledge. As literary fashions come and go, literary reputations have their ups and downs, and the particularly popular names of one generation often suffer a particularly bad eclipse in the generation immediately after.

However, so far as modern Chinese literature is concerned, one name has not eclipsed and that is Lu Xun. Indeed, the more one reads him, the more firmly becomes one's conviction that his is an achievement that has not been equalled, much less surpassed.

Not just as a short story writer, though in that genre his penetration and his economy of means remain to be studied and emulated. Nor just as a writer of essays, which many have derided as "miscellaneous", though they contain the best literary criticism, the most pungent political satire and the most daring translation theory of his time. Nor yet as an acute textual critic with several definitive editions of classical works to his credit, or as a literary historian—indeed, many seem to have forgotten that he has ever been one, despite his *Outline History of Chinese Fiction* (1920), a seminal work displaying a classical scholarship beyond the reach of most of his contemporaries and nearly all latter-day writers on the subject.

He is a combination of all these and something more. Whoever has read him and not come under the strange fascination of his style, that unique blending of classical and modern? Nor should we forget the poet and the artist in the pamphleteer. He didn't think much of the

poems he wrote in the classical mode, yet they rank among the best of the modern period. A motive force behind some of the most daring art movements of the 1930s, he encouraged and nurtured the new woodcuts and, almost simultaneously, published a large collection of the traditional prints of Beijing. His lyricism comes out in some of the least expected places—for instance, in that astounding introduction he wrote to a volume of short stories he edited in 1935 for the *Comprehensive Anthology of Modern Chinese Literature 1917-27*:

但那时觉醒起来的智识青年的心情，是大抵热烈，然而悲凉的。即使寻到一点光明，“径一周三”，却更分明的看见了周围的无涯际的黑暗。摄取来的异域的营养又是“世纪末”的果汁：王尔德（Oscar Wilde），尼采（Fr. Nietzsche），波特莱尔（Ch. Baudelaire），安特莱夫（L. Andreev）们所安排的。“沉自己的船”还要在绝处求生，此外的许多作品，就往往“春非我春，秋非我秋”，玄发朱颜，低唱着饱经忧患的不欲明言的断肠之曲。虽是冯至的饰以诗情，莎子的托辞小草，还是不能掩饰的……

……但在事实上，沉钟社却确是中国的坚韧，最诚实，挣扎得最久的团体。它好象真要如吉辛的话，工作到死掉之一日；如“沉钟”的铸造者，死也得在水底里用自己的脚敲出洪大的钟声。然而他们并不能做到，他们是活着的，时移世易，百事俱非；他们是要歌唱的，而听者却有的睡眠，有的稿死，有的流散，眼前只剩下一片茫茫白地，于是也只好在风尘湮洞中，悲哀孤寂地放下了他们的筇篻了。

——《〈中国新文学大系〉小说二集序》（1935）

(The prevailing mood of the awakened young intellectuals of the time was one of enthusiasm mixed with bitterness. Even when they saw a ray of light, that only accentuated the surrounding darkness—as the old saying goes, one in diameter yields three in circumference. What nourishment they got from abroad, too, turned out to be the bitter fruit of the *fin de siècle*, administered by Oscar Wilde, Nietzsche, Baudelaire, Andreev and the like. They were quite ready "to sink their boat", if only "to find a way out by risking all". Some of their works revealed the feeling that they were pleased with neither spring nor autumn. Indeed, black-haired, fair-complexioned youths were found singing songs of inexpressible grief, as if life's burden proved too much for them. This was a mood that neither the lyricism of Feng Zhi nor the pastoralism of Sha Zi could disguise....

However, the Sunken Bell Society remained China's toughest, sincerest, longest fighting group of writers. For a moment it looked as though they were, in the words of George Gissing, working themselves to death, like the maker of

the Sunken Bell who even while drowning in water would make the bell ring with a huge sound by striking it with his very feet. This, however, they were destined not to do. They survived to see the world change and the times become different. They meant to sing again, only to find their listeners asleep, dead, or scattered, leaving a waste land before them. Buffeted by wind and dust, they laid up their lyre in loneliness and sorrow.)

Pithy, elegant, in the best tradition of Chinese classical criticism—one is reminded of Cao Pi's essay *On Writing* and Zhong Rong's preface to his *Ranks of Poetry*—and yet fully alive to the changing moods and manners of the young, Lu Xun is able to evoke an atmosphere even as he makes his shrewd comments. How rarely does one come across this kind of writing in the works of critics and literary historians of today!

Lu Xun, then, is a giant of many accomplishments. Against this background one may perhaps speak about the part he played in the exchanges between Chinese and Western literature.

At first sight Lu Xun appeared to be the least likely sort of person to have much to do with Western literature. Indeed, the Western-educated professors of literature generally looked upon him as a country cousin, at best a stolid scholar of the old type. Others have accused him of indulging in petty literary squabbles, a trait they ascribed to the fact that he had been born in the town of Shaoxing, in East Zhejiang, proverbially the home of captious, hair-splitting drafters of legal briefs.

His friends on the left didn't treat him any more kindly—certainly not at first. When he went to Shanghai to live by writing around 1930, the group of left-wing romantics already entrenched there, who called themselves the Creationists, jeered at him for his alleged ignorance of Marxism. These people had mostly gone to study in Japan, where they had made a heterogeneous collection of Western authors, from Oscar Wilde, Poe, Baudelaire to Herzen and Tolstoy. They were aesthetes turned revolutionaries. They, too, dismissed Lu Xun as a provincial.

Sniped at from both right and left, Lu Xun felt not so much embittered as saddened. He had more important things in mind than mere contentions between one literary group and another. Yet when

he surveyed the cultural scene, this was what he saw:

We know too little and have too few materials to help us to learn. Liang Shiqiu has his Babbitt. Xu Zhimo has his Tagore. Hu Shih has his Dewey. Oh yes, Xu Zhimo has Katherine Mansfield too, for he wept at her grave. And the Creationists have revolutionary literature, the literature now in vogue.

—Some Thoughts on Our New Literature (1929)

To Lu Xun, none of these new gods—Irving Babbitt, Rabindranath Tagore, John Dewey, the lot—would do for China. He found the hullabaloo of their worshippers offensive. He was particularly disgusted with the Western-educated academics, and for a crucial reason:

There were the gentlemen-scholars who had studied in America, who took literature to be the prerogative of ladies and gentlemen. If not ladies and gentlemen, then the chief characters in literary works must be men of letters, scholars, artists, professors, socialites—and they must all speak English, just to show they are the elite. [One of these gentlemen-scholars...] wrote an article saying he could not understand why some people liked to write about the lower orders.

—A Glance at Shanghai Literature (1931)

To write for the élite or for the lower orders: that was the real quarrel between Lu Xun and the gentlemen-scholars. On the other hand, he would give only of his best to the lower orders and not try to pass off a few intellectuals' emotional outpourings as genuine proletarian literature, as he found the Creationists were doing at the time. Hence his conclusion:

That is why, as I always say, if we want to increase our understanding we must read more foreign books, to break through the cordon around us.... After reading more foreign theoretical and literary works we'll be able to assess our new Chinese literature with a clearer head.

—Some Thoughts on Our New Literature (1929)

It is significant that for all his earthbound qualities and his vast classical Chinese learning, he yet looked to "foreign books" for inspiration and a sense of direction.

This conviction did not come to him all of a sudden. Years back,

in 1908, while yet a young student in Tokyo, he had written a long article in a little known magazine, under the title "The Power of Satanic Poetry". The hero of the piece was Byron. Now Byron had been made known to Chinese readers through several translations of his "Isles of Greece",² an extract from *Don Juan*, Canto III. That song had moved Chinese readers deeply, but no one had yet given Byron's poetry an intelligent appraisal.

This Lu Xun did, in his essay. Reading the essay today, one marvels at its scope. It treats of Byron's rise to eminence in the turbulent years following the French revolution. It reviews Byron's activities and works. It highlights Byron's love of liberty and hatred of hypocrisy, in these words:

English society then was full of hypocrites, who held up affectation and ceremoniousness as a moral code. Any liberal-minded person who questioned this was denounced as a blackguard. Byron, rebellious and frank by nature, would not keep silent but used Cain as his mouthpiece when he made him say, "Satan is a man who tells the truth". Thus he antagonized the public and incurred the opposition of all moralists.

The essay, however, doesn't stop with Byron's own work but goes on to deal with Byron's impact on Europe, particularly Eastern Europe. Country after country is examined to trace the spread of Byron's "Satanic" poetry. We are told how it inspired Pushkin and Lermontov in Russia, Mickiewicz in Poland, Petofi in Hungary. These were no ordinary names; indeed, they were to loom large in the Chinese consciousness as translations of their works began to pour out from the printing presses in Shanghai and Beijing in the fateful years to come.

Just before the essay ends, the author springs us a surprise. For in the summing-up he refutes the very name "Satanic":

For the truth is that despite the name "Satanic", Byron and Shelley were men of this earth. There was no such thing as a "Satanic school", only kindred spirits, such as are always to be found in this world, who were awakened by the same earnest voice and united by the same sincere conviction.

Finally, Lu Xun winds up the whole essay by casting a look back

at China:

Now when we look back at China, where are those who fight for the human spirit? Where can we hear the voice of conviction that can lead us to the good, the beautiful and the strong? Where is the voice of love that can lift us out of the desolation of spirit?

A cry of pain from the very depth of a young patriot's heart. From the very beginning, for Lu Xun, literature is not just words, imagery, form, structures, but something closely bound up with the destiny of a people.

In this light we can perhaps better understand his impatience with the academics and the aesthetes. We also see his consistency. The young man eating his heart out over the desolation of the human spirit matured into the writer voicing his disgust with the gentlemen-scholars who wanted to put literature out of the reach of the lower orders. Twenty years had passed, but he remained steadfast to his original conviction.

He set the pattern, too, for later people, writers and translators, in what he did with foreign works. After translating a number of Japanese works, he retranslated, largely through Japanese versions, East European short stories and, later on, Russian novels like Gogol's *Dead Souls* and Fadeyev's *Débauché*. He looked for a theory of literature and towards that end read and translated the treatises on art by the Marxist critics Plekhanov and Lunacharsky. Gaining experience as a translator, he also formed a translation theory of his own, which, for once not repeating the parrot cry of Yan Fu's three principles, namely, fidelity, expressiveness and elegance, stressed accuracy at all cost, even to the extent of imposing an IndoEuropean syntax on the Chinese language. He didn't work all alone, but gathered around himself a number of young translators. To help to get their work published, he founded in 1934 a literary magazine devoted exclusively to translation. This magazine, *Yi Wen* or *Literature in Translation*, played a vital role in acquainting Chinese readers with the writings of many countries, particularly those of left-wing and minority groups.

Here clearly was a bias towards politically orientated literature, above all that of Eastern Europe. Also a bias towards works that may be loosely described as realist. Both tendencies had been found among the more serious-minded Chinese translators long before Lu Xun, but he gave them a new emphasis. His prestige and example—his version of *Dead Souls* was hailed as an outstanding achievement—helped to bring about a new translation boom and a greater interest in world literature.

But why were Lu Xun and his friends so attracted by the heavy, brooding works of the Russians?

Lu Xun himself provided an answer. He wrote:

Russian literature is our guide and friend, because in it we see the good soul of the oppressed, their anguish and their struggles. Russian works of the 1840s light us up with hope, while those of the 1860s sadden us. Not that we forget that in those years the Russian Empire was an aggressor to China; but the point is, we have learned from Russian literature an important fact, namely, that there are two sorts of people in the world, the oppressors and the oppressed.

—Celebrating the Literary Friendship Between China and Russia (1932)

Now of course Russian writers also have their intrinsic excellences. There is something deeply moving about their ceaseless strivings, some spiritual quality that gives their works a rare profundity. And, artistically, who among us, however hypercritical, would dare to gainsay the towering genius of a Tolstoy, a Dostoevsky, or a Gorky? Chinese intellectuals were sensitive to these qualities, yet they were more curious about the use to which literature had been put by the great Slav writers. They thought that the vast masses in Russia and other East European countries had been, and many still were, in a political situation analogous to their own—an absolutist regime at home and a ruthless foreign foe threatening or actually occupying their territory. What did their literature do to bolster and cheer them up? In other words, the Chinese were looking for a literature that answered to the sore needs of a nation faced with the problem of

survival. They had looked for it in Western Europe and America, but in vain; they found it in Eastern Europe and Russia. The October Revolution gave the Russians the added lustre of an example, that of a real, tangible, at first sight altogether different society rising out of the ruins of a vast backward empire resembling China. With their own yearnings also for a better society, great numbers of Chinese intellectuals devoured Russian works to find solace and hope. Hence the many translations.

But Lu Xun's mind was never shut against other literatures. His interest in Western literature did not stop with that youthful encounter with Byron. Indeed, even in that earliest of his essays, he had discussed, along with Byron, also Burns, Scott, Shelley. The section on Shelley was especially perceptive. Keats was also mentioned, though he took care to point out that Keats didn't really belong to the "Satanic" school.

Now it was the 1930s, a particularly difficult time for any upright writer in China. Living largely in the underground, dying slowly of tuberculosis, in the thick of the grim fight against the White Terror, Lu Xun yet found time to read and comment on two major Western writers.

There is first the preface he wrote to a Chinese translation of Mark Twain's *Eve's Diary*, published in Shanghai in October 1931. Lu Xun calls Twain's piece "a minor work", and his own preface is equally a slight thing, no more than 1,000 words in length. Yet it throws light on his knowledge of American writings. He divides U.S. literary history into two periods, with the Civil War as the watershed. He mentions Poe, Hawthorne and Whitman as belonging to the first period, when writers "did not have to put up a false front". After the Civil War, however, "the United States became an industrial society which would put all individuals into one mould". Self-expression was discouraged and writers had to find ways of winning readers. Or "they exiled themselves to Europe, like Henry James, or told jokes, like Mark Twain".³

Lu Xun goes on to say:

Twain became a humorist, then, by force of circumstances. Yet there is resentment and satire in his humour, which shows that he was discontented with life. Because of this little note of protest, the children of the new lands say amid laughter: Mark Twain belongs to us.

As to *Eve's Diary* itself, Lu Xun takes a judicious view:

A minor work, it shows that innocence has its failings. The author packs satire into the narration, so that the portrait of the American girl of the time, which he takes to be the image of all women, is really dated, despite the smile on her face. Twain's superb skill, however, makes this difficult to detect and so the work remains lively.

Lu Xun lays no claim to an intimate knowledge of American literature, but he is nobody's fool.

When Bernard Shaw visited Shanghai in 1933, Lu Xun met him at a reception given by Madame Sun Yat-sen. Since Lu Xun spoke no English and Shaw no Chinese, they couldn't have had much conversation with each other. Rather Lu Xun used the occasion to observe with amusement how others, mostly foreign pressmen and Chinese gentlemen-scholars, disported themselves before the Irishman. He wrote three articles on that occasion, in one of which he declared: "I am an admirer of Shaw". But the most perceptive appraisal is to be found in a fourth article, the one written to commemorate the first anniversary of a magazine founded by his friend, Lin Yutang. Lu Xun began by saying that he disagreed with Lin on many things, including the founding of that magazine, one devoted exclusively, like *Punch*, to humorous writings, because China being what she was, the oppressed people could not afford that kind of luxury. However, he thought the magazine's special number on Shaw a very good thing. Then he reflected on the different receptions accorded by the Chinese to Shaw and Ibsen:

In 1919 Ibsen was introduced to Chinese readers and he was well received. This year Shaw was introduced, and he was thought to be outrageous. To this day many people can't stomach him.

The cause lay, according to Lu Xun, in the Irish playwright's total ruthlessness in exposing sham and hypocrisy. He wrote:

他们的看客，不消说，是绅士淑女们居多。绅士淑女们是顶爱面子的人种。易卜生虽然使他们登场，虽然也揭发一点隐蔽，但并不加上结论，却从容的说道“想一想吧，这到底是些什么呢？”绅士淑女们的尊严，确也有一些动摇了，但究竟还留着摇摇摆摆的退走，回家去想的余裕，也就保存了面子。至于回家之后，想了也未，想得怎样，那就不成什么问题，所以他被绍介进中国来，四平八稳，反对的比赞成的少。萧可不这样了，他使他们登场，撕掉了假面具，阔衣装，终于拉住耳朵，指给大家道，“看哪，这是蛆虫！”连磋商工夫，掩饰的法子也不给人有一点。这时候，能笑的就只有并无他所指摘的病痛的下等人了。在这一点上，萧是和下等人相近的，而也就和上等人相远。

这怎么办呢？仍然有一定的古法在。就是：大家沸沸扬扬的嚷起来，说他有钱，说他装假，说他“名流”，说他“狡猾”，至少是和自己们差不多，或者还要坏。

——《〈论语〉一年——借此又谈萧伯纳》（1933）

People who go to Ibsen's and Shaw's plays are no doubt mostly ladies and gentlemen. Now ladies and gentlemen are the most respectable, face-loving species in the world. When Ibsen puts them on the stage, he exposes them somewhat, but doesn't pass any judgement on them, only asks in a mild tone, "Now please think. Why all this?" Ladies and gentlemen find their composure somewhat shaken, but are nevertheless left with the recourse of withdrawing with some show of dignity to reflect on the question in the privacy of their homes. In that way, their face is saved. Whether they really think about the question at home and, if so, what answers they've found is then nobody's business. That is why when Ibsen was introduced to China, he had a smooth passage, meeting more admirers than opponents. Not so Shaw. He lines up ladies and gentlemen in the limelight, tears off their masks, strips them of their fine clothes and then, grabbing each by the ear, announces triumphantly to the audience, "Look! A vermin!" He won't allow them even time for manoeuvre or disguise. No wonder on such occasions only the lower orders can afford to laugh, for they happen to be free from the ugly diseases just shown up. For this reason Shaw endears himself to the lower orders and alienates all superior people.

Now what can one do with a chap like that? Well, there is a way yet, an old way—that is, kick up a row, say that Shaw is a rich man, a fraud, a VIP, a sly fellow, not a bit better than the ladies and gentlemen themselves, indeed, much worse.

—Lun Yu's First Anniversary, and Further on Shaw (1933)

I think Shaw himself, had he been able to read Chinese, would have appreciated such incisive writing as this, so like Shaw's own in

language and tone, yet so different in background and outlook.

Lu Xun's connection with Western writers, however, was not confined to meeting them at parties and writing occasional articles about them. He was also closely associated with three Americans in their literary work, but this time in an entirely new undertaking, namely, the introduction of twentieth-century Chinese literature to the Englishspeaking world, which meant, in the context of the turbulent history of the time, the introduction of left-wing Chinese literature.

Of the trio, Agnes Smedley, the author of *Daughter of the Earth*, was perhaps the most deeply involved in the revolutionary movement in China. She was indefatigable in reporting both the savage repression of left-wing intellectuals in Shanghai and the successful battles being fought by the nascent Red Army in Central China. A close friend of Madame Sun Yat-sen, she joined in the latter's efforts to shield and rescue young writers from the White Terror. She knew Lu Xun well and through him contacted some of the younger men active on the literary front. As a result, she was able to put together a small volume of *Short Stories from China* (London, 1934), which contains six pieces, including the "Slave Mother" by Rou Shi (柔石), a young Communist executed by the Kuomintang authorities in 1931. In her last years, despite the McCarthyite witchhunt, her own ill health and poverty, she completed her book *The Great Road*, a biography of General Zhu De, one of the truly heroic figures of twentieth-century China.

More widely known perhaps as a reporter of the China scene, the Kansas-born Edgar Snow not only wrote the influential book *Red Star Over China*, but compiled an anthology of modern Chinese short stories called *Living China*, published in New York in 1936. He had taken up the project with one question in mind: "What is happening to the creative mind of modern China?" Looking for an answer, he met with almost insurmountable difficulties and nearly gave up the whole thing. However:

It was meeting Lu Hsun and Lin Yutang that finally decided me to

undertake the task myself. Lu Hsun as a personality so impressed me with his breadth of humanity, his warmth of sympathy, and his keen perceptivity of the life around him that I felt sure his writing would provide interpretations of interest. And Lin Yutang's wit and a facile way with words in English, his skilful and mature and penetrating satire and good-natured "old-roguism" (to borrow Lin's own phrase), were a promise that equally important talent must lie hidden in recent writing in the Chinese language, and be worth bringing into English.⁴

With the help of Lu Xun, Lin Yutang and others, Snow was able to produce the first comprehensive collection of contemporary Chinese stories in English, comprising seven by Lu Xun, two each by Mao Dun, Ding Ling and Tian Jun, and one each by Ba Jin, Shen Congwen, Lin Yutang, Guo Moruo, Rou Shi, Xiao Qian, Sha Ting, etc., making up a total of twenty four. There were some surprises, such as the inclusion of Guo Moruo and Lin Yutang, neither of them noted for short stories. But by and large, this was a representative anthology, unquestionably, as Snow himself writes in the Introduction, "a wholly fresh and authentic expression of a decisive new cultural stage, attained by a process of history in its march of centuries across the vast and wonderful country within whose borders dwells a fifth of the family of men."⁵

While Snow's *Living China* was in the making, another young American, also a journalist, Harold R. Isaacs, started to compile another anthology under the title *Straw Sandals*. This contains 25 titles, five stories by Lu Xun, three by Mao Dun, two each by Ding Ling and Shi Yi, and one each by another fifteen writers, but it also includes an abridged version of a three-act history play, *Zhuo Wen Jun*, by Guo Moruo and a poem by Yin Fu, another young writer executed in 1931. Again, Lu Xun was generous with help to the young American. He made suggestions about what to include, supplied background information on the authors included, wrote a foreword as well as the Chinese characters of the title in his elegant calligraphy, but declined to accept any remuneration, not even the fee paid by the American magazine *Story* for the use of his work "Gust of Wind". He and Mao Dun corresponded with Isaacs and in one of the letters Lu

Xun wrote:

We are happy to hear that you plan to translate more Chinese works. We feel there has been nothing in the West like your collection of Chinese short stories, *Straw Sandals*. Revolutionary youths of a literary bent will certainly thank you for the meaningful work you are doing. We, too, thank you for the effort you've made to have our rather feeble works translated. Revolutionary young writers keep emerging and they are making steady progress. We hope that when you start translating again, there will be more and better new works ready for you, so that you won't have to bother with oldsters like us but can concentrate on introducing the new men. That is our sincere wish and we trust it's yours too.

—Letter dated August 22, 1934

Characteristic is Lu Xun's modesty about his own writings—calling them "feeble"—and the great hopes he places on the young, on those who "would walk into the literary garden wearing straw sandals", to use Lu Xun's own phrase from which the American editor has derived the title of his anthology.

But precisely because they wear straw sandals—and not "the shiny leather boots" of the intellectual aristocrats—the young writers have had to wage a long and bitter fight against repression and persecution. Lu Xun writes feelingly in the Foreword:

After some ten years, as with the raising of their class consciousness progressive writers became revolutionary writers, this oppression became even more severe. Publications were banned. Books were burned. Writers were executed. In this darkness many young people paid with their lives for what they wrote.

...Since we have just started new experiments, it is only natural that there is some immaturity. Still, these stories may be seen as young plants growing under a big rock. They do not exactly thrive but, twisting this way and that, they grow nevertheless.

This explains why Lu Xun was ever so ready to do what he could to help his fellow writers, particularly the younger ones, for he had taken it upon himself to protect the "young plants". But there were also others in this world who were indifferent or even hostile to young plants of this dangerous kind. No wonder it took Isaacs forty years to

find a publisher for his anthology.⁶

The story of Lu Xun's connections with Smedley, Snow and Isaacs seems unrelated to our enquiry, yet in fact it is not. In the first place, as Lu Xun himself says, again in the Foreword to *Straw Sandals*, "the appearance of the writer of fiction [in China]... has come about partly as a response to the social demands of the time and partly to the influence of Western literature." The new fiction of China bears witness to the fact that the work of translators like Lu Xun has borne fruit in a field most important, namely, China's creative literature. In the second place, to Lu Xun's mind, all good literature, East and West, serves the same social purpose. Steeped as he is in classical Chinese literature, he is yet eager to absorb the new and significant in the art and literature of all lands, from Käthe Kollwitz's stark lithographs depicting the sufferings of the German unemployed to the Black writings of America. The only criterion he uses is whether the story, poem, essay, play or drawing or woodcut represents an earnest effort to help man see his world a little more clearly and to support and cheer him on his difficult journey ahead.

In the end, we see that the heart-rending cry lamenting the desolation of the human spirit was never really muffled in Lu Xun. He cast about for an answer and found it in the revolutionary movement of his day. He was glad that he had moved on with the younger writers. He had no idea of what lay ahead; he died too early to have a glimpse of the shape of things to come. But he had known too much of that desolation, that despair, to ever want to retrace a single step. There was no going back for him and literature must serve the forward cause, whatever the consequences.

肆 鲁迅与西方文学

一部近乎当代的文学史向来难写，写不好，就会像由姓名和头衔组成的流水账，或《纽约时报书评周刊》上的年度总结。所涉及的作家、作品与我们“若即若离”，既非遥远得令人能置身事外、见庐山真容，又非熟稔得无需相应的背景知识。而且，文学思潮一波波更替，文学家的声名起起伏伏：最受一代人欢迎的作家在紧接着的一代人眼中光彩骤逝，也是家常便饭。

然而以现代中国文学而论，有一位作家的光环却从未褪去，他就是鲁迅。事实上，越是读他的作品，就越让人深信鲁迅无人能及，遑论超越。

他不只是个短篇小说家，虽然他的短篇小说洞见之深刻、笔法之精炼值得研究并效仿；他也不只是个杂文家，虽然他那被很多人揶揄为“杂文”的文章蕴含最出色的文学批评、最尖锐的时事针砭和那个时代最前卫的翻译理论；他也不只是个编纂了数本可堪信赖的中国古典文学选集的敏锐评论家或文学史家——事实上，很多人似乎全然忘记了他这方面的成就，尽管他那部极具影响力的《中国小说史略》（1920）中表现出的古典学识令多数同时代的与几乎所有后来的文学史家都望尘莫及。

鲁迅是上述所有身份的集合体，还不止于此，哪一个读过鲁迅的人不为他集古典和现代于一身的独特风格所折服？我们也不该忘记这位檄文执笔者同时还是诗人和艺术家。尽管他从不认为自己的古体诗能登堂入室，那些诗却在现代同类诗中位列翘楚。作为20世纪30年代一些最为大胆的文艺运动的发起人，他倡导并扶持了新兴的木刻艺术，几乎还在同一时期出版了厚厚一册北京传统版画。他的抒情也会在最令人意想不到的处自然流露，例如他为1935年编纂的《〈中国新文学大系〉小说二集》而写的惊世骇俗的序：

但那时觉醒起来的智识青年的心情，是大抵热烈，然而悲凉的。即使寻到一点光明，“径一周三”，却更分明的看见了周围的无涯际的黑暗。摄取来的异域的营养又是“世纪末”的果汁：王尔德（Oscar Wilde），尼采（Fr. Nietzsche），波特莱尔（Ch. Baudelaire），安特莱夫（L. Andreev）们所安排的。“沉自己的船”还要在绝处求生，此外的很多作品，就往往“春非我春，秋非我秋”，玄发朱颜，低唱着饱经忧患的不欲明言的断肠之曲。虽是冯至的饰以诗情，莎子的托辞小草，还是不能掩饰的……

.....但在事实上，沉钟社却确是中国的坚韧，最诚实，挣扎得最久的团体。它好象真要如吉辛的话，工作到死掉之一日；如“沉钟”的铸造者，死也得在水底里用自己的脚敲出洪大的钟声。然而他们并不能做到，他们是活着的，时移世易，百事俱非；他们是要歌唱的，而听者却有的睡眠，有的稿死，有的流散，眼前只剩下一片茫茫白地，于是也只好在风尘湮洞中，悲哀孤寂地放下了他们的筌篲了。

——《〈中国新文学大系〉小说二集序》（1935）

精辟，优雅，传承了中国古典批评的最优传统——可与曹丕的《典论·论文》和钟嵘的《诗品》序相媲美——又能完全体察青年人不断变化的精神面貌和行事方式。即便出语犀利，鲁迅也能制造一种氛围。如今的文学批评与文学史中哪里见得到这样的文笔！

因此可以说，鲁迅是集多项成就于一身的巨匠。或许可以在此前提之下谈谈他在中西文学交流方面所作的贡献。

乍一看鲁迅似乎是最不可能与西方文学产生交集的那类人。事实上，受过西方教育的文学教授们通常认为鲁迅不过一介乡佬，充其量是个古板的旧式文人。还有的人指责鲁迅沉溺于打无谓的嘴仗，因他生于浙江绍兴，便说他的这一特质得益于出了名的“绍兴师爷”吹毛求疵、琐碎到家的本领。

鲁迅的左翼同行们对他也不见得好到哪里去，尤其是刚开始。1930年前后鲁迅前往上海卖文为生时，因自称对马克思主义无知，便遭到当时已在沪扎根的一批自称“创造社”左派浪漫主义作家的嘲笑。这批作家大都曾留学日本，收罗了门类纷杂的西方作家的作品，从王尔德、爱伦·坡、波特莱尔到赫尔岑、托尔斯泰。这些脱胎于美学家的革命者们同样不屑一顾地将鲁迅视为“乡佬”。

左右两派的抨击带给鲁迅的，与其说是恼火不如说是悲哀。他自有比肤浅的文学派别之争更重要的事需要考虑。当他审视当时的文坛现状，看到的却是：

我们知道得太不多，而帮助我们知识的材料也太少。梁实秋有一个白璧德，徐志摩有一个泰戈尔，胡适之有一个杜威，——是的，徐志摩还有一个曼殊斐儿，他到她坟上去哭过，——创造社有革命文学，时行的文学。

——《现今的新文学的概观》（1929）

对鲁迅而言，此类文学新偶像——欧文·白璧德、拉宾德拉纳特·泰戈尔、约翰·杜威一千人等——对中国全无用处，因而他很反感对这些人的盲目

崇拜。他尤其厌恶受过西方教育的学者，关键原因在于：

一方面是留学过美国的绅士派，他们以为文艺是专给老爷太太们看的，所以主角除老爷太太之外，只配有文人，学士，艺术家，教授，小姐等等，要会说Yes，No，这才是绅士的庄严，那时吴宓先生就曾经发表过文章，说是真不懂为什么有些人竟喜欢描写下流社会。

——《上海文艺之一瞥》（1931）

文章是写给上等人看还是写给“下流社会”看，这是鲁迅和绅士派作家之间的真正分歧。另一方面，鲁迅会尽其所能将最好的文艺奉献给“下流社会”，而不是像当时的创造社那样，拿几个知识分子的情感宣泄充作真正的无产阶级文艺。他因此得出结论：

因此我想，倘要比较地明白，还只好用我的老话，“多看外国书”，来打破这包围的圈子……多看些别国的理论和作品之后，再来估量中国的新文艺，便可以清楚得多了。

——《现今的新文学的概观》（1929）

值得注意的是，鲁迅尽管讲求实际，又有着深厚的中国古典修养，却仍通过“多看外国书”来寻求灵感和方向。

鲁迅的这一信念也并非从天而降。早在1908年在东京求学时，他就曾在一个不知名的杂志上发表过一篇名为《摩罗诗力说》的长篇论文，讨论的中心人物是拜伦。当时节选自《唐·璜》第三章的《哀希腊》已有几个中文译本，也深深打动了中国读者，但还从未有人从学术的角度对拜伦的诗作过任何评价。

鲁迅的这篇论文讨论的就是拜伦的诗。今日读来，我们仍不由感叹其涉猎之广：文章介绍了拜伦如何在法国大革命之后的动荡年月里崭露头角，拜伦的社会活动和文学作品，并在如下一段中强调了拜伦对自由的热爱和对虚伪的痛恨：

盖英伦尔时，虚伪满于社会，以虚文缚礼为真道德，有秉自由思想而探究者，世辄谓之恶人。裴伦善抗，性又率真，夫自不可以默矣，故托凯因而言曰，恶魔者，说真理者也。遂不恤与人群敌。世之贵道德者，又即以此交非之。

然而，鲁迅的这篇文章并不止于评论拜伦的作品，而是进一步探讨了拜伦对欧洲、尤其是东欧的影响。文章一一追踪他的“恶魔”诗歌在这些国家的传播情况。我们从而得知拜伦如何启发了俄国的普希金和莱蒙托夫，波兰的密茨凯维奇，匈牙利的裴多菲。这些人都非等闲之辈，在此后决定中国命运的那些年月，他们作品的中译本将通过京沪两地的出版社大量涌现，而他们的名字也将深深烙在国人心中。

接近篇尾时，鲁迅笔锋一转，反驳了“恶魔”这一叫法：

顾裴伦修黎，虽蒙摩罗之谥，亦第人焉而已。凡其同人，实亦不必口摩罗宗，苟在人间，必有如是。此盖聆热诚之声而顿觉者也，此盖同怀热诚而互契者也。

最后，鲁迅回顾彼时之中国，以此结篇：

今索诸中国，为精神界之战士者安在？有作至诚之声，致吾人于善美刚健者乎？有作温煦之声，援吾人出于荒寒者乎？

这是一位青年爱国者发自内心的疾呼。从一开始，对鲁迅而言，文学就不仅仅是文字、意象、形式、结构，而是某种与民族命运息息相关的东西。

明白了这一点，我们或许可以更好地理解鲁迅为何无法容忍学院派和为艺术而艺术的作家学者了。我们也可看出他的一贯性：那个面对荒芜的人性而心如刀割的热血青年已经成长为一位作家，其憎恶的笔端直指把文学与下层民众完全隔离的绅士派学者们。时光荏苒二十年，鲁迅还是初衷不改。

鲁迅在翻译外国作品方面也给后来者，无论是作家还是译者，树立了典范。在翻译几部日文著作之后，鲁迅又间接重译（主要通过日语）了一些东欧短篇小说，后来还间接重译了一些俄国小说，比如果戈理的《死魂灵》和法捷耶夫的《毁灭》。为寻求一种文学理论，他阅读并翻译了马克思主义批评家普列汉诺夫和卢那察尔斯基关于艺术的文论。通过翻译积累，他还形成了自己的一套翻译理论，头一次没有鹦鹉学舌地重复严复的信达雅三原则，而是绝对强调翻译的精准，甚至到了将印欧语系的句法套在中文上的程度。鲁迅并非孤军作战，他聚拢了一批青年译者。为了帮助他们发表作品，他于1934年创办了一份专登译文的文学刊物——《译文》。该刊在向中国读者介绍外国作家，尤其是各国的左派作家和少数群体作家方面，发挥了重大作用。

这里可以清楚地看到，鲁迅偏好有政治倾向的文学，尤其是东欧国家的此类文学，同时也偏好那些大体上可划入现实主义类别的文学。早在鲁迅之前，一些忧国忧民的译者就有此种关注，但鲁迅赋予了其新的意义。他的威望与榜样作用——他译的《死魂灵》被誉为翻译绝笔——带动了中国新一轮的翻译热潮，并激发国人对世界文学的更大兴趣。

但鲁迅和其同仁究竟为何对沉闷的俄国大部头如此着迷？

对此鲁迅给出了自己的答案：

那时就知道了俄国文学是我们的导师和朋友。因为从那里面，看见了被压迫

者的善良的靈魂，的酸辛，的掙扎；還和四十年代的作品一同燒起希望，和六十年代的作品一同感到悲哀。我們豈不知道那時的大俄羅斯帝國也正在侵略中國，然而從文學里明白了一件大事，是世界上有兩種人：壓迫者和被壓迫者！

——《祝中俄文字之交》（1932）

當然俄國作家也有卓越之處。他們不懈的抗爭動人心弦，某種內在的精神特質使得他們的作品別具深意。且以藝術水準來論，再挑剔的讀者也无法否認托爾斯泰、陀思妥耶夫斯基或高爾基的驚世才華。中國的知識分子雖能感知上述優點，卻對這些偉大的斯拉夫裔作家如何將文學運用於實際更感興趣。他們認為俄國及其他東歐國家的民眾曾經經歷的或正在經歷的政治形勢與中國相似——內遭專制壓迫，外受強敵威脅或領土侵犯。這些國家的文學是如何鼓舞民眾士氣、使之振作起來的呢？換言之，中國人當時正力圖尋找一種能在生死存亡關頭救民族於水火之中的文學。他們在西歐與美國尋之未果，終得之於東歐與俄國。十月革命的成功更為俄國平添了一份榜樣的光輝：一個真實的、觸手可摸的、乍看上去迥然不同的社會從一個如中國一般沒落的大帝國的廢墟上拔地而起。同樣渴求美好新社會的眾多中國知識分子貪婪地從俄國作品中尋求慰藉和希望，因此湧現出大量的譯作。

但魯迅從來就不排斥其他類型的文學。他對西方文學的興趣也並未止於早年對拜倫的研究。事實上，就在那篇最早寫成的論文中，除了拜倫，他也對彭斯、司各特、雪萊一一作了評價，其中對雪萊的評價尤見洞察力。另外對濟慈也有提及，不過他著意指出濟慈並不是嚴格意義的“惡魔”派詩人。

時值20世紀30年代，對任何一個具有剛正人格的中國作家來說都是尤為困窘的時代。魯迅當時大部分時間住在地下室，為肺結核所累，病體沉痾，又與“白色恐怖”鏖戰，但仍抽出時間閱讀並評論了兩位西方大家的著作。

首先是他在1931年10月在上海出版的馬克·吐溫《夏娃日記》的中譯本作的序。魯迅稱馬克·吐溫這部作品為“小品”，他的序也是不足1000字的小文。篇幅雖短，卻折射出魯迅對美國文學的熟悉程度。他以美國內戰為分水嶺將美國文學劃為兩個階段：愛倫·坡、霍桑和惠特曼屬於第一階段，這一時期的作家“都不是這麼表里兩樣的”；但在內戰之後，“美國已成了產業主義的社會，個性都得鑄在一個模子里”，作家們不能再自我主張了，而是要設法去迎合讀者。或者“有的跑到外國，如詹謨士

（Henry James），有的讲讲笑话，就是玛克·士温”。

鲁迅接着说：

那么，他的成了幽默家，是为了生活，而在幽默中又含着哀怨，含着讽刺，则是不甘于这样的生活的缘故了。因为这一点点的反抗，就使现在新土地里的儿童，还笑道：玛克·士温是我们的。

对于《夏娃日记》这篇“小品”，鲁迅的评价颇有见地：

虽然不过一种小品，但仍是在天真中露出弱点，叙述里夹着讥评，形成那时的美国姑娘，而作者以为是一切女性的肖像，但脸上的笑影，却分明是有了年纪的了。幸而靠了作者的纯熟的手腕，令人一时难以看出，仍不失为活泼泼的作品。

鲁迅并未自诩精通美国文学，但他显然独具慧眼。

1933年萧伯纳访问上海时，鲁迅在宋庆龄举办的欢迎宴上见到了他。鲁迅不说英文，萧伯纳不通汉语，彼此想必对话寥寥。鲁迅倒是利用这次机会带着几分消遣的心情看足了其他人，主要是外国媒体人和中国绅士派学者，如何在这位爱尔兰作家面前耍宝似地卖弄。有关这次会面鲁迅写过三篇文章，在其中一篇中他声称：“我是萧伯纳的崇拜者”。但他对萧伯纳最有见地的评价是在第四篇，那是他应友人林语堂之邀为纪念林创办的刊物《论语》一周年而写的文章。在那篇文章中，鲁迅首先说，他和林语堂在很多事情上意见不一，包括创办这份类似英国 *Punch* 的专侍幽默的期刊，因为这是当时受压迫的中国民众尚无福消受的奢侈品；但他却认为《萧伯纳游华专号》办得很好，接着他就国人给予萧伯纳和易卜生的不同对待进行了反思：

五四时代介绍了一个易卜生，名声倒还好，今年介绍了一个萧，可就糟了，至今还有人肚子在发胀。

鲁迅认为原因在于萧伯纳揭露伪装和虚伪时毫不留情：

他们的看客，不消说，是绅士淑女们居多。绅士淑女们是顶爱面子的人种。易卜生虽然使他们登场，虽然也揭发一点隐蔽，但并不加上结论，却从容的说道“想一想吧，这到底是些什么呢？”绅士淑女们的尊严，确也有一些动摇了，但究竟还留着摇摇摆摆的退走，回家去想的余裕，也就保存了面子。至于回家之后，想了也未，想得怎样，那就不成什么问题，所以他被介绍进中国来，四平八稳，反对的比赞成的少。萧可不这样了，他使他们登场，撕掉了假面具，阔衣装，终于拉住耳朵，指给大家道，“看哪，这是蛆虫！”连磋商工夫，掩饰的法子也不给人有一点。这时候，能笑的就只有并无他所指摘的病痛的下等人了。在这一点上，萧是和下等人相近的，而也就和上等人相远。

这怎么办呢？仍然有一定的古法在。就是：大家沸沸扬扬的嚷起来，说他有钱，说他装假，说他“名流”，说他“狡猾”，至少是和自己们差不多，或者还要

坏。

——《〈论语〉一年》——借此又谈萧伯纳》（1933）

我想如果萧翁通晓中文，必定会赞赏鲁迅非同一般的洞察力，二人尽管文化背景和人生观相去甚远，文笔、口气却相像如斯。

然而鲁迅与西方作家的关联绝不仅仅限于宴会上的碰面和偶尔写几篇评论文章。他还与三位美国作家有着密切的联系，不过这次是为了一项新任务，即是将20世纪中国文学介绍到讲英语的国家，而在当时的动荡年代，也就是介绍中国的左翼文学了。

在这三位作家中，《大地的女儿》的作者艾格尼丝·史沫特莱与中国革命事业的关系也许最为密切。她坚持不懈地报道上海左翼知识分子遭受的残酷压迫和初期革命红军在华中取得的战果。作为宋庆龄的密友，她协同后者致力于保护和营救青年作家，使其免受“白色恐怖”之灾。她与鲁迅相熟，通过他结识了一些活跃在文学前线的青年，因此得以集结一小本《中国短篇小说集》（1934年版于伦敦），收录了六篇小说，包括1931年被国民党政府杀害的年轻共产党员柔石的代表作《为奴隶的母亲》。晚年的史沫特莱虽遭“麦卡锡”迫害，兼之贫病交加，却依然完成了她为中国20世纪一代伟人朱德写的传记——《伟大的道路》。

另一位是以报道中国而更闻名的美国记者，出生于堪萨斯的埃德加·斯诺，不仅著有名震中外的《红星照耀下的中国》，还编译了中国现代短篇小说集《活的中国》（1936年版于纽约）。他着手这项工作是因为想了解“现代中国创作界在做什么”。为找到答案，他遇到了几乎无法克服的巨大阻力，险些全盘放弃。但：

我是在会见了鲁迅和林语堂之后，才决定由我本人来担负起这项任务的。鲁迅那胸襟宽广的人道主义精神，对人的满腔热情以及对周围事物的洞察力，给我留下了深刻的印象。我相信他的作品一定很有意思。林语堂的机智和他流畅的英语，他那巧妙、成熟和入骨三分的讽刺以及他那“狂荡不羁的诙谐”（借用他本人的话），都使我感到新近中国文学界一定也有同样重要的、有才华的作家，并且写下了值得译成英文的作品。

在鲁迅和林语堂等人的帮助下，斯诺编译了第一部覆盖全面的近代中国短篇小说英译集，包括鲁迅作品七篇，茅盾、丁玲、田军作品各两篇，巴金、沈从文、林语堂、郭沫若、柔石、萧乾、沙汀等作品各一篇，总共二十四篇。郭沫若和林语堂的作品入选颇令人意外，因他二人皆不以短篇小说闻名。但总体看来，这本选集无疑是很有代表性的精品荟萃，

正如斯诺本人在编者序里所说：“至少也可以了解到这个居住着五分之一人类的幅员辽阔而奇妙的国家，在经过几千年漫长的历史进程而达到一个崭新的文化时期后，具有怎样簇新而真实的思想感情。”

当斯诺忙于编译《活的中国》时，另一位同为记者的美国青年哈罗德·伊罗生也开始编译一部名为《草鞋脚》的文集，共收录二十五篇作品，其中短篇小说有鲁迅五篇，茅盾三篇，丁玲、楼适夷各两篇，其他十五位^[1]作家每人各一篇；另外还收录了郭沫若所著三幕历史剧《卓文君》的精编版，以及一位于1931年被杀害的青年作家殷夫的诗作一则。鲁迅同样也给予了伊罗生大力支持。他对甄选哪些作品给出建议，提供入选作家的相关背景信息，为文集写引子，还以优雅的字体书赠“草鞋脚”这个书名，但却拒绝任何酬谢，甚至包括美国《故事》杂志刊登他的《风波》应付的稿费。他和茅盾两人多次与伊罗生通信，在其中一封信中鲁迅写道：

您说以后打算再译些中国作品，这是我们很喜欢听的消息。我们觉得像这本《草鞋脚》那样的中国小说集，在西方还不曾有。中国的革命文学青年对于您这有意义的工作，一定是很感谢的。我们同样感谢您费心力把我们的脆弱的作品译出去。革命的青年作家时时刻刻在产生，在更加进步，我们希望一年半载之后您再提起译笔的时候，已经有更新更好的作品出世，使您再也没有闲工夫仍旧找老主顾，而要介绍新人了，——我们诚心诚意这么希望着，想来您也是同一希望罢！

——《致伊罗生的信》，一九三四年八月廿二日

此处可见鲁迅一贯的自谦（把自己的作品说成是“脆弱的”），以及他对年轻一代的殷切希望，用他自己的话说，是对“穿着草鞋踏入文艺园地”的人的希望，而这也正是伊罗生文集名字的由来。

但正因为他们穿的是草鞋——而非资产阶级文人光亮的“皮鞋”——青年作家们才必须与压制和迫害长久苦战。鲁迅在小引中动情地写道：

大约十年之后，阶级意识觉醒了起来，前进的作家，就都成了革命文学者，而迫害也更加厉害，禁止出版，烧掉书籍，杀戮作家，有很多青年，竟至于黑暗中，将生命殉了他的工作了。

……因为在我们还算是新的尝试，自然不免幼稚，但恐怕也可以看见它恰如压在大石下面的植物一般，虽然并不繁荣，它却在曲曲折折地生长。

这也解释了鲁迅为何总是不遗余力地帮助扶持同行，尤其是青年作家，因为他将保护“幼苗”视为己任。但这个世界总有另外一些人漠视、甚而仇视这种危险的幼苗，也难怪伊罗生花了四十年才找到愿意出版这

本文集的出版社。

鲁迅与史沫特莱、斯诺和伊罗生的交往表面看来似乎与我们探讨的话题无关，但事实并非如此。首先，正如鲁迅在《草鞋脚》小引中所说：“（在中国）小说家的侵入文坛……一方面是由于社会的要求的，一方面则是受了西洋文学的影响。”中国的新小说见证了像鲁迅这样的译者的工作对中国原创文学这一极为重要的领域所作的贡献。第二，对鲁迅而言，所有好的文学，无论东西方，其服务于社会的宗旨都是一致的。他虽精通中国古典文学，但却也热衷于吸收各国文艺中重要的新东西，从凯绥·珂勒惠支表现德国失业者困境的悲凉版画，到美国的黑人作品。鲁迅评判外国文学的唯一标准是：视乎小说、诗歌、散文、戏剧、绘画或版画是否为帮助人们看清世界以及给予他们在荆棘路上前行的勇气方面作了切实的努力。

最后，我们可以看到鲁迅悲叹人类精神荒芜的痛心疾呼从未真正停止过。他四处寻觅，终在当时的革命运动中找到了答案。他为自己能和青年作家一同进步而快慰。他不能预知未来会怎样，英年早逝的他没能看到后来的情形。可是他太了解那种荒凉、那种绝望了，所以从不愿撤回一步。他无法回头，而文学必须为前进的事业服务，无论结果如何。

V MODERNIST POETRY IN CHINA

Modernism may have spent its force as a literary movement, but there are still repercussions. The on-going debate in China over "obscure poetry" and the stream-of-consciousness technique in fiction is a case in point. Listening to the arguments for or against, one sometimes gets the feeling that the Chinese seem never to have known modernism. Yet that is not the case. For quite a few Chinese writers, modernism was once a direct, intimate experience.

1

Take the case of the "new poetry". The literary revolution around 1919 was a tremendous event by any standard. For one thing, all of a sudden poets turned their backs on the classical tradition and started to write a colloquial free verse. The classical tradition, however, was not to be repudiated so easily. Except for some of Liu Fu's work, which used the vernacular with some degree of success, most of the "new" poems read like poor imitations of the *ci* poetry of the Song Dynasty. Hence, when a younger generation of poets came on the scene, they found that, unless they were content to write insipid prose poems or vernacular doggerel, they would have to find new models and perhaps a completely new aesthetic. Hitherto all the talk had been about using the spoken language to treat new themes demanded by a democratic new age; no one had bothered to look into aesthetic problems. Now people found Guo Moruo, leader of the Creationists in Shanghai, imitating Walt Whitman, Xu Zhimo and the Crescent group imitating the English Romantics, and Wen Yiduo, the painter-poet, trying, by imposing discipline as regards metre and rhyme, to give a formal beauty to the new poetry. But there were other aesthetics, other voices. Soon some of the younger Creationists were borrowing cadences and motifs from the French Symbolists:

我从café中出来

身上添了
中酒的
疲乏.....

——王独清：《我从Café中出来》

(I step out from a café
My body afflicted
With the fatigue of drink

—I Step Out From a Café)

Thus Wang Duqing, striking the pose of a *fin-de-siècle* Parisian decadent, spotlighted the novel typographical device of inserting the French word *café* into his Chinese lines. Also, Feng Naichao was heard singing "Life's Elegy", thus:

今霄轮到我唱生命的哀歌
外间哀哀哭泣的夜雨成河
怎得心里的泪泉如注地再涌
洗涤我哀愁浸蚀的心窝

——冯乃超：《生命的哀歌》

(Tonight it's my turn to sing life's elegy
Outside it's pouring floods of bitter tears
Oh that I could open my fountain of tears too
To wash my heart eroded by sorrows)

Which is surely an echo, or re-echo, of Verlaine's lines:

Il pleure dans mon coeur
Comme il pleut sur la ville;
Quelle est cette langueur
Qui pénètre mon coeur?

—Ariette

The borrowing is obvious. All the same, to have discovered a poetry of modern sensibility, of new nuances and resonances, at a time when most other Chinese poets were copying a tired English romanticism, was something of an achievement.

Two other poets also wrote in the Symbolist mode—with better results. Li Jinfa packed startling images into elliptical lines:

我们散步在死草上，
悲愤纠缠在膝下。

粉红之记忆
如道旁朽兽，发出奇臭。

——李金发：《夜之歌》

(We stroll on dead grass,
Sorrow and bitterness entangling our legs.

Pink memories,
Like animals decaying by the roadside, emitting stench.)

These come from a poem entitled, appropriately, "Nocturne". Li was capable of turning out lines worthy of Baudelaire himself:

夕阳之火不能把时间之烦闷
化成灰烬

——《弃妇》

(No fire of a setting sun can burn
Time's ennui to dust.

—Forsaken Woman)

But it was a Baudelaire who had learned his mother tongue the wrong way. While indubitably Li had a fine sense of form and his metaphors were arresting, his Chinese was a medley of archaisms and colloquialisms, strung together somehow with the antique connective "之". This was a weakness immediately pounced on by his detractors, who were offended by his exotic "decadence" anyway.

Li's confrère, Dai Wangshu, wrote more elegant Chinese, being steeped in the classical tradition. He started out with rather conventional stuff, then, having read French poetry, evolved a new music:

撑着油纸伞，独自
彷徨在悠长，悠长
又寂寥的雨巷，
我希望逢着
一个丁香一样地
结着愁怨的姑娘

——戴望舒：《雨巷》

(Holding a paper umbrella, alone,
Wandering in the long, long,
Deserted alley in the rain,
I hope I may meet
A girl lilac-like
With sorrow in her heart.

—The Alley in the Rain)

The resonant, melodic lines, with its long syllables, remind one of Verlaine's "Chanson d'automne":

Les sanglots longs
Des violons
De l'automne
Blessent mon coeur
D'une langueur
Monotone

But the situation and the atmosphere in Dai's poem are classical-Chinese, calling a Chinese reader's mind back to the well-known lines of the Tang and Song dynasties:

丁香空结雨中愁

小楼一夜听春雨
深巷明朝卖杏花

There is thus a blending of Chinese-classical and French-Symbolist qualities. Soon, however, the poet announced:

Poetry should not rely on music, but should do away with the musical element altogether.¹

And, sure enough, a new manner emerged, colloquial, prose-like, rhythmically loosened up:

我底记忆是忠实于我的，
忠实甚于我最好的友人。

——《我底记忆》

(My memory is faithful to me,
More faithful than my best friends...

—My Memory)

It is a speaking, rather than singing, voice that is addressing us. This

loosening-up yielded some very good poems: "Nostalgia for Heaven" "Autumn Dream" "Country Girl" "Autumn Fly" "Paradise Bird", etc. The poet seemed to have acquired a new ease, which enabled him to try out experiments, such as putting classical quotations into a very modern context:

士为知己者用，
故承恩的灯，
遂做了恋的同谋人。

——《灯》

(A scholar gives glad service to those who value him.
So the much-favoured lamp
Becomes a conspirator in love.

—Lamp)

Or striving for a *haiku* effect:

木叶的红色，
木叶的黄色，
木叶的土灰色：
窗外的下午！

——《秋蝇》

(Leaves in red,
Leaves in yellow,
Leaves in earth-grey:
Afternoon outside the window!

—Autumn Fly)

Or adapting a French philosophe's maxim:

我思想，故我是蝴蝶，
万年后小花的轻呼，
透过无梦无醒的云雾，
来振撼我斑斓的彩翼

——《我思想》

(I think, therefore I'm a butterfly...
Flowers' whispers across ten thousand years
Will pierce mists where one doesn't dream or wake up
To flutter my bright-hued wings.

Here, in the first line, Descartes (*Cogito ergo sum*) meets Zhuang Zhou, the third-century B.C. Chinese philosopher who is supposed to have in a dream seen himself transformed into a butterfly. Reading these poems, one finds it hard not to speculate a little on what would have happened to Chinese poetry if Dai had gone on experimenting like this?

Experimentation stopped, however. The causes were domestic strife—the poet's wife left him—as well as the general political situation: the White Terror in Shanghai, the Kuomintang suppression of progressive literature and the counter measures adopted by the Left-wing Writers League, Japanese armed invasion and, finally, the full-scale Sino-Japanese war. Dai couldn't help but be drawn in. The magazine *Xian Dai*, or *Les Contemporains*, to which Dai Wangshu contributed, assumed an outwardly neutralist stance, but the poet himself underwent a slow but perceptible change. The poem "A Finger Cut Off" marked the beginning of this change:

关于他的“可怜又可笑的爱情”我是一些也不知道，
我知道的只是他是在一个工人家里被捕去的；
随后是酷刑吧，随后是惨苦的牢狱吧，
随后是死刑吧，那等待着我们的死刑吧。

——《断指》

(I know nothing of his "ridiculous, pitiful love affairs",
Only that he was arrested in a worker's place,
And there followed torture, and horrible prison,
And execution, a fate which awaits us all.)

If here the poet was just beginning to see that beyond the world of his imagination there existed another, harsh world of realities, soon he had a full taste of the latter when he wrote:

我用残损的手掌
摸索这广大的土地：
这一角已变成灰烬，
那一角只是血和泥……

——《我用残损的手掌》（1942）

(I let my mangled palm
Move over the vast map of our land:
One corner I touch is in ashes,
Another just blood and mire...

—I Let My Mangled Palm, 1942)

For Dai had, following the outbreak of the hostilities in Shanghai, moved to Hong Kong and when the latter city fell to the Japanese in the initial stage of the Pacific war, he was persecuted by the occupation forces. Hence the "mangled palm". But the poem does not end on a note of lamentation:

无形的手掌掠过无限的江山，
手指沾了血和灰，手掌沾了阴暗，
只有那辽远的一角依然完整，
温暖，明朗，坚固而蓬勃生春。
在那上面，我用残损的手掌轻抚，
像恋人的柔发，婴孩手中乳。
我把全部的力量运在手掌
贴在上面，寄与爱和一切希望，
因为只有那里是太阳，是春，
将驱逐阴暗，带来苏生，
因为只有那里我们不像牲口一样活，
蝼蚁一样死.....那里，永恒的中国！

(My invisible palm moves over our infinite land,
Fingers smeared with blood and ashes, palm soiled by darkness.
One remote corner alone is intact,
Warm, bright, solid, thriving.
I caress that corner with my mangled palm,
It feels soft as a girl's hair to her lover, or a mother's breast to her baby.
I put all my strength into my palm
And place it over that corner, with all my love and hope,
Because only there is found sunshine and spring,
Which will dispel darkness and bring back life,
Because only there we do not live like beasts,
Or die like ants. There, the eternal China!)

This is a poem admired by many of his fellow poets. Ai Qing comments thus:

In the poem "I Let My Mangled Palm" the poet relates how he moves his

palm over a map of China. In highly concise language, he gives an overview of the vast areas under enemy occupation, his grief filling every line of the verse. Later on, however, his mood suddenly changes, when he expresses his deepest love for the Communist-led liberated areas (I think by "that corner" he means Yan'an).²

Bian Zhilin adds:

This poem must be considered one of a dozen or so best poems written by Dai Wangshu throughout his poetic career, even if judged by artistic standards alone.³

Significantly, both Ai Qing and Bian Zhilin underwent a similar change, each in his own way, but eventually leading to the same destination.

Ai Qing is still actively writing poetry. Only a few months ago, his volume *Songs of Return* was awarded first prize for poetry by the AllChina Writers Association. People are apt to forget, though, that he had gone to Paris to study art in the early thirties and, while there, started to write poetry under the influence of Emile Verhaeren and G. Apollinaire. Two lines of Apollinaire stuck in his memory and he used them as the epitaph of one of his own poems:

J'avais un mirliton que je n'aurais pas échangé
Contre un baton de marechal de France

What a proud affirmation of the glory and integrity of poetic art! But Ai Qing's own poem has a different tale to tell:

我从你彩色的欧罗巴
带回了一支芦笛，
同着它
我会在大西洋边
象在自己家里般走着，
如今
你的诗集“Alcool”是在上海的巡捕房里，
我是“犯了罪”的，
在这里
芦笛也是禁物。

——艾青：《芦笛——纪念故诗人阿波里内尔》

(From your many-coloured Europe
I brought back a reed pipe.

It had kept me company
When I wandered on the shores of the Atlantic
As though I was walking about in my own home.
Now
Your volume *Alcool* is in the police office of the
Shanghai International Settlement,
And I am a "convicted *criminal*",
Here
Even a reed pipe is forbidden.

—Reed Pipe, in Memory of the Poet G. Appollinaire)

That was the sort of situation a poet found himself in in a Shanghai ruled jointly by foreign bankers and Kuomintang officers. Any talk about the integrity of poetic art became just silly when there wasn't the least security for the poet's person. Ai Qing came to this realization much earlier than Dai Wangshu, his later poetic career also differed from Dai's, but both went through the same kind of change—from adoption and then renunciation of European symbolism to reaffirmation of Chinese realities, and in the process their reed pipes gave out different melodies.

Bian Zhilin, too, treasured his reed pipe. Avid for the new, he laid himself wide open to nearly all the modernist poetic voices from Western Europe: Baudelaire, Verlaine, Eliot, Yeats, Rilke, Valéry, Auden, Aragon, Brecht. This list and the order in which the names are placed are Bian's own.⁴ These, he recalls, have been the influences he had been subjected to in various stages of his writing career. However, Bian is also steeped in classical Chinese poetry. His early work, he tells us himself, had been affected "by the end-of-the-world mutterings of the poetry of late Tang and Southern Song dynasties as much as by the *fin-de-siècle* moods of the West."⁵ Later on, he absorbed largely from contemporary English poetry. A line like

伸向黃昏的道路象一段灰心

——卞之琳：《归》

(The road stretches into the dusk like a twinge of despair

—Return)

is obviously inspired by

Streets that follow like a tedious argument

Of insidious intent

To lead you to an overwhelming question...

—T. S. Eliot, The Love Song of J. Alfred Prufrock

Only the Chinese poet wrote with greater concision, the result of being brought up on classical Chinese poetry, with its concern for neatness, polish and formal beauty.

By the middle 1930s, Bian, a young man still in his twenties, reached the peak of his poetic art. He wrote a very modernist poem entitled "Distances Organized", with a last line that astounded his readers:

友人带来了雪意和五点钟。

(A friend brought the feel of snow and five o'clock.)

So many readers complained about its incomprehensibility that Bian felt obliged to append notes, to wit, seven notes to a poem of no more than ten lines, probably a record in the ratio of notes to lines in any twentiethcentury poem, East or West! But he could very well write a good poem without the aid of a single note, as in "Fragment":

你站在桥上看风景，

看风景人在楼上看你。

明月装饰了你的窗子，

你装饰了别人的梦。

——《断章》

(You watched the sight from a bridge,

As a sightseer watched you from a tower.

The moon adorns your window,

And you adorn another's dream.)

His best work of the period is indubitably "Chiba":

象候鸟衔来了异方的种子，

三桅船载来了一支尺八，

从夕阳里，从海西头。

长安丸载来的海西客

夜半听楼下醉汉的尺八，

想一个孤馆寄居的番客

听了雁声，动了乡愁，
得了慰藉于邻家的尺八，
次朝在长安市的繁华里
独访取一支凄凉的竹管……
（为什么霓虹灯的万花间
还飘着一缕凄凉的古香？）
归去也，归去也，归去也——
象候鸟衔来了异方的种子，
三桅船载来了一支尺八，
尺八乃成了三岛的花草。
（为什么霓虹灯的万花间
还飘着一缕凄凉的古香？）
归去也，归去也，归去也——
海西人想带回失去的悲哀吗？

（1935年6月19日）

(Like a migrant bird bringing seeds from afar,
A three-masted ship brought a *chiba*
From the evening sun, from the ocean's west shore.
Choan Maru brought a passenger from the ocean's west shore.
He sat up at midnight listening to a drunken man playing a *chiba*
downstairs,
And imagined a foreign lodger in a lone hotel in Chang'an
Feeling homesick when he heard the wild geese cry,
And finding relief in the music of a *chiba* played next door,
So that the next morning he walked the streets of the thronging metropolis,
Looking solely for that sad-sounding bamboo instrument...
(Why is there a wisp of sadness, an ancient scent
Floating in a neon-lit, flower-decked hall?)
Homeward, homeward, homeward bound!—
Like a migrant bird bringing seeds from afar,
A three-masted ship brought a *chiba*
Which has since become a plant of the Three Isles.
(Why is there a wisp of sadness, an ancient scent
Floating in a neon-lit, flower-decked hall?)
Homeward, homeward, homeward bound!—
Does the stranger from the ocean's west shore want to take home some
forgotten sadness?)

Chiba is a 5-or-6-holed clarinet made of bamboo, now rarely seen in

China, its place of origin, but still played a lot in Japan where it had been introduced in the 7th century.⁶ The poet heard it played during his short stay in Japan in 1935, and the music made him homesick. But the homesickness, he confides, is not unmixed with "regret over China's sad decline in national power".⁷ He had gone to Japan to see for himself the true face of Japanese militarism:

The more the other side inflicted gunfire on us, the more I wanted to see what was going on in their rear. Thus I experienced at first hand how detestable and ludicrous were the police and secret agents of a militarist regime, and how wretched and withal how good were the common people under the fascist yoke.

This mood was shared by many other twentieth-century Chinese poets. However dedicated to the perfection of their art—and in this Bian's sensitivity and fastidiousness were unparalleled—they felt deeply about their country's plight, a feeling not often found in the modernist poetry of Western Europe and North America. Also, the poem testifies to another phenomenon in contemporary Chinese poetry, namely, the presence, as yet strong and all pervading, of the classical poetic tradition. The poet adopts a Western form, free verse, and a 3-or-4-pause line, rather in the manner of the English iambic pentametre, but the poem is structured around three refrains, chiefly the line totally archaic in diction:

归去也，归去也，归去也

(Homeward, homeward, homeward bound!)

which has refrains within a refrain: three cries, desolate but determined, conveying with its medieval resonance the special quality of the instrument as well as the emotional response of the poet on hearing it played.

Thus the poem reveals the change the poet was undergoing. When the anti-Japanese war eventually started, Bian went to where Dai Wangshu had longed, but failed, to go: Yan'an. It was in early 1938. The whole nation was in an elated mood, because at last China was locked in full-scale war with the long-hated enemy. Bian toured the front and wrote a series of poems later collected in *Letters of Salutation*, a volume which has perhaps not received its due credit.

Here is war poetry of an original kind. Each "letter" is a vignette of someone involved in the war effort: a sharpshooter, a new recruit, two kids on guard-duty, a girl who had the quickness of mind and hand to puncture an intruder's bicycle tyre with a sewing needle, villagers evacuated into the hills, villagers tearing up and carrying off sections of a railway used by the enemy, people building a military airfield, youths opening up new land, a commissar, a general, the chief strategist himself:

《论持久战》的著者

手在你用处真是无限。

如何摆星罗棋布的战局？

如何犬牙交错了拉锯？

包围反包围如何打眼？

下围棋的能手笔下生花，

不，植根在每一个人心中

三阶段：后退，相持，反攻——

你是顺从了，主宰了辩证法。

如今手也到了新阶段，

拿起锄头来捣翻棘刺，

号召了，你自己也实行生产。

最难忘你那“打出去”的手势

常用以指挥感情的洪流

协入一种必然的大节奏。

(1938年11月20日)

(The Author of *On Protracted War*

Hands have infinite uses for you.

How place the pieces on the checkerboard of a war?

How keep the enemy interlocked as with dog's teeth?

How counter encirclement with a prior move?

The go-master is also skilled in using a pen.

Implanted in everyone's mind your "three stages"—

Retreat, stalemate, counterattack.

You obey and so master dialectics.

Now your hands have also reached "the new stage",
When they lift a hoe to overturn brambles.
You urge others to produce as you do it yourself.

Most unforgettable your hands thrusting out for a "breakthrough",
A gesture you use in conducting the floodtide of emotion
Into the rhythm of an inevitable harmony.)

This is addressed to Mao Zedong—admiring, but without any feeling of awe, just one poet talking to another, and so wholly different from the thousands of hymns that would appear in the years to come. Bian also manages to put in the major happenings of the time: the mobile guerrilla war, the master strategy, the campaign for everyone to take a hand in producing more food, the titanic organization work for the eventual counter offensive—all within the small compass of a short poem and through one central image: hands, hands playing the chess of war, hands writing the strategic plans, hands working in the fields, hands gesticulating before a mass meeting. Yet the form of the poem is thoroughly Western—in fact, a neatly written sonnet, with not a single rhyme out of order in its fourteen polished lines!

At almost the same time, a young English poet was also writing a sonnet sequence to record his impressions of the fighting in China. This was W. H. Auden and the sonnets appeared in the book *Journey to a War* on which he collaborated with Christopher Isherwood. A little later, Bian Zhilin translated several of these sonnets into Chinese, apparently a labour of love, performed with neither condescension nor unctuousness, but with a new assurance acquired from a difficult task just completed: he had succeeded, in his *Letters of Salutation*, in filling a compact literary form of the West with the floodtide of emotion surging on the China front.

What ensued, however, was a long silence. Bian came out of the

mountains of the northwest to arrive at Kunming in 1939 and for the next eleven years he did not write a single poem. But he wasn't wholly lost to poetry. Teaching at the Southwest Associated University, he gave courses on poetry and translated Auden and other Western modernists; indeed, he arrived just in time to witness a new wave of Chinese modernism arising out of the campus of that wartime institution.

For the Southwest Associated University, or Lianda for short, was a university of refugees. It was made up of three of China's most prestigious universities from the north, namely, Peking and Tsing Hua in Beiping and Nankai in Tianjin. Driven out of their original sites by the advancing Japanese army in autumn, 1937, they had moved, by stages, to the country's southwestern corner, the province of Yunnan, where eventually they settled down in its capital city, Kunming. Conditions were appalling: cramped quarters, no proper equipment and, what hurt most, almost no books. But people, particularly the young, didn't mind the hardships too much in the first flush of a national war. There was a wartime camaraderie and a sharpened sense of intellectual quest. The faculty had many noted writers: Wen Yiduo, Zhu Ziqing, Shen Congwen, Feng Zhi, Li Guangtian, etc. Qian Zhongshu lectured on European Renaissance literature and 20th-century Western novel, and the Englishman William Empson gave a course on contemporary English poetry. From among the students emerged poets like Mu Dan, Du Yunxie, Zheng Min and a host of others.

Modernism did not exactly take over the university, but it became a powerful trend there and this time, along with French symbolism and Pound-Eliot modernism, Rainer Maria Rilke also made his influence felt.

This last was seen in the work of Feng Zhi. Feng was no newcomer, but had established his fame back in the 1920s, when Lu Xun, leading light of the new literature, praised him, perhaps on the strength of his long poem *Northbound Journey* (1929), as "China's most

outstanding lyric poet"⁸. Then he dropped out of sight, burying himself in Goethe studies at Heidelberg. When he surfaced in Kunming around 1940, he had acquired a new poetic voice. He began to write sonnets, completing twenty-seven of them within the year 1941. Sonnet 27 would be a fair specimen:

从一片泛滥无形的水里
取水人取来椭圆的一瓶，
这点水就得到一个定形；
看，在秋风里飘扬的风旗，
它把住些把不住的事体，
让远方的光、远方的黑夜
和些远方的草木的荣谢，
还有个奔向远方的心意，
都保留一些在这面旗上，
我们空空听过一夜风声，
空看了一天的草黄叶红，
向何处安排我们的思想？
但愿这些诗象一面风旗
把住一些把不住的事体。

——冯至：《十四行》之二十七

(When from an expanse of flowing water
A carrier takes a round bottleful,
He is giving the formless form.
Look, the vane fluttering in the autumn wind
Is catching what is uncatchable.
Let far lights and far nights
And plants growing and decaying in far places,
And a mind that soars into far space,
All leave something on the vane.
We listened to the wind all night,
And watched all day grass yellowing and leaves reddening,
Without finding a place to settle our thoughts.
Will these verses act like the vane
And catch what is uncatchable?)

Here one finds the poet not only musing, but also exploring into the ways of artistic abstraction. Hence the metaphors, which are unusual for Chinese poetry: a round bottle to give form to the formless, a vane

to catch what is uncatchable. There is, however, enough of the ordinary and tangible to reassure the reader: autumn wind, far lights, plants growing and decaying, while the poet's voice, low, unhurried, slightly sad, is wholly enticing. At the same time, one hears echoes of Rilke's *Duineser Elegien*:

... also

lauter Unsägliches...

Bringt doch der Wanderer auch vom Hange des Bergrands
nicht eine Hand voll Erde ins Tal, die Allen unsäglich, sondern
ein erworbenes Wort, reines, den gelben und blaun Enzian...

—Die Neunte Elegie

Both poets are intent on expressing the inexpressible—Feng's "uncatchables" and Rilke's "purely untellable things". Feng's water carrier plays much the same role as Rilke's wanderer, personae speaking for the poets themselves. Both look to man's creative writing—Feng's "these verses" and Rilke's "pure word"—for a way out. Above all, there is the same atmosphere of impassioned contemplation.

Feng has other moods, less Rilkean but equally modernist, as may be seen in Sonnet 21:

我们听着狂风里的暴雨，
我们在灯光下这样孤单，
我们在这小小的茅屋里
就是和我们用具的中间

也有了千里万里的距离：
铜炉在向往深山的矿苗，
瓷壶在向往江边的陶泥，
它们都象风雨中的飞鸟

各自东西。我们紧紧抱住，
好象自身也都不能自主。
狂风把一切都吹入高空，

暴雨把一切又淋入泥土，
只剩下这点微弱的灯红

在证实我们生命的暂住。

(Listening to the rough wind and the pelting rain,
We feel so lonely beside the lamp.
In this tiny thatched hovel of ours,
Even between the utensils and ourselves

There is a distance of ten thousand miles:
For the copper kettle is looking back to the ore in the mountains,
And the china pot to the clay on the river bank.
They are like the birds tossed by the storm

Each to his own destiny. Tightly we cling to each other,
Not sure if we are our own masters.
The rough wind sends everything flying to the sky:
The heavy rain pelts them back again to the earth,

With only this dim glow of a lamp remaining
To confirm the transience of our lives' stay.)

Man's helplessness in a hostile universe: a theme pretty well worked over by various European poets. The original thing is perhaps the point about the utensils, the dialectical relationship between the raw material and the finished product, between nature and art, expressed in images that are quite Chinese: the copper kettle, the china pot, the ore in the mountains, the clay on the river bank. And if we scrutinize the sonnet a bit more closely, we'll find poems within the poem, made up of something left over from Du Fu's famous lamentation over the West Wind breaking into his thatched cottage and echoes of a thousand classical Chinese 8-line poems dealing with "Night Thoughts". Of the latter, two specimens may be cited, both written around 1900, another crisis hour:

千声檐铁百淋铃，雨横风狂暂一停。
正望鸡鸣天下白，又惊鹅击海东青。
沉阴噤噤何多日，残月晖晖尚几星。
斗空苍茫吾独立，万家酣梦几人醒。

(After a thousand sounds from the eaves bells buffeted by the rains, The storm has subsided for the moment.

Time after time scanning the sky for the dawn,
Only to be shocked by the eagle striking in the east.
Dull and cloudy days seem never ending,
Only a few stars glimmer around the waning moon.
Under a boundless sky I stand alone, wondering
How many are awake as the multitudes sleep?

—Huang Zunxian: Rising at Night)

苦月霜林微有阴，灯寒欲雪夜钟深。
此时危坐管宁榻，抱膝乃为梁父吟。
斗酒纵横天下事，名山风雨百年心。
摊书兀兀无睡，起听五更孤角沉。

——谭嗣同：《夜成》

(Wan moon, shrivelled frost, a little cloud,
The lamp feels cold, with snow coming and the nighthours deepening.
Bolt upright I sit on my recluse's couch.
Holding my knees, I sing a dirge of hopes abandoned.
A measure of wine induces reckless talk about affairs of the world.
Storm-swept, the famed mountain yet holds my everlasting longing.
Opening a book, sick with thoughts, all sleep gone,
I rise to hear a lone bugle announcing five o'clock.

—Tan Sitong: Composed at Night)

Feng Zhi may not have actually read these two poems, but the point is, there is in his innermost ear the insistent whisper of hundreds of classical poems dealing with a similar situation, poems which moreover urge on him certain moods, reflections, even stock phrases, as well as certain requirements of form. Why did Feng, and Bian Zhilin for that matter, choose the sonnet as a favourite form? Was it not because there are certain similarities between the sonnet and the Chinese 8-line poem in both form and content structure? Even the medial balanced couplets of the latter are not absent from Feng's Sonnet 21, to wit:

狂风把一切都吹入高空
暴雨把一切又淋入泥土

(The rough wind sends everything flying to the sky:

The heavy rain pelts them back again to the earth)

Willy-nilly, he was writing a sonnet in the manner and spirit of a Chinese *lvshi*!

There are of course differences. While the two classical poets directed their night thoughts to national affairs, Feng Zhi was concerned with an individual's uneasy feeling in an alien universe. The former, politically conscious, wrote to reach the public's ear; the latter, inwardly drawn, wrote to express his private feelings. Yet it isn't private enough, when one remembers the case of Rilke. Feng speaks only of "a mind that soars into far space", while Rilke's elegies are a record of some tremendous spiritual adventure, a long, sustained quest of one single, timeless event in which life and death are just two aspects of the same process. Hence he has an intensity not found in Feng, who is much milder, as befitting a Chinese scholar reared in the humane Confucian tradition. In the final analysis, Rilke's influence on Feng was but skin-deep, while the Chinese classical poetic tradition had long been working, unobtrusively but subtly, in his bones.

Nor did his feeling of cosmic loneliness last. Even as he was writing the sonnets cited above, he was aware of the mutterings of a world of suffering and strife outside. Sonnet 14 seems to be concerned with art, revealing his impressions of the paintings of Van Gogh, yet he tells how his eye is caught, not only by the sunflowers and cypresses, but also by the wretched prisoners "peeling potatoes in a prison yard", who are "lumps of ice never to be melted", not even by the fierce burning sun of a passionate genius like Van Gogh, a situation which draws a query from the poet:

这中间你画了吊桥，

画了轻盈的船：你可要

把那些不幸者迎接过来？

——《十四行》之十四

(In the middle you've painted a hanging bridge

And several lithesome boats. Did you want

To ferry over some of the unfortunate ones?)

A query light in tone, almost a whisper, but really a cry, much like E. M. Forster's: Only connect!

And connect he did. When enemy air raids caused the populace of Kunming to take to the hills behind the university, Feng Zhi was elated by the "togetherness":

和暖的阳光内
我们来到郊外，
象不同的河水
融成一片大海。……

——《十四行》之七

(Under the warm sun
We came outside the city,
Like many rivers flowing
Into one harmonious ocean...

—Sonnet 7)

The short, staccato lines—a new note—sound like the quick footsteps of people dodging the Japanese bombers. The nation was united in the face of foreign invasion. The poet was enthused, but he also raised the warning: Let us not fall apart again the moment we're out of danger! Like Dai Wangshu, Ai Qing and Bian Zhilin before him, Feng Zhi had now completed his metamorphosis, from a poet of private concerns to one filled with anxiety about the nation's future. But the warning went unheeded. Almost immediately after victory over Japan, civil strife came to a head again. Then, in December 1945, government soldiers shot to death four students at the gate of the university's Teachers College. This was the sort of situation that drew the poet-scholar Wen Yiduo into the fight for democracy which soon cost him his life; it also caused Feng Zhi to stop writing his Rilkean sonnets altogether.

Among the students, there were also poets writing in the modernist mode. Du Yunxie resorted to Audenesque irony in writing about his misadventures as an army interpreter on the chaotic Burma road. Zheng Min, a woman student of the philosophy department, another devotee of Rilke's, wrote quiet, sensitive metaphysical poetry

admired by many. But the person who gave modernism a boost was Mu Dan, who majored in foreign languages. He excelled in expressing a mood of anguish and self-torture:

我知道
一个更紧的死亡追在后头。
因为我听见了洪水，随着巨风，
从远而近，在我们的心里拍打，
吞噬着古旧的血液和骨肉！

.....

在一瞬间
我看见了遍野的白骨
旋动

——穆旦：《从空虚到充实》

(I feel
A more binding death behind my ear,
As I hear the waters and the winds,
Beating from afar and in our hearts,
Devouring our ancient blood and bones.

.....

In an instant
I see the white bones on the plain
Whirling

—From Void to Fullness)

Alongside this preoccupation with death, almost Jacobean in its intensity, there was also a fascinated absorption in violence:

勃朗宁，毛瑟，三号手提式，
或是爆进人肉去的左轮，
它们能给我绝望后的快乐，
对着漆黑的枪口，你就会看见
从历史的扭转的弹道里
我是得到了二次的诞生

——《五月》

(Browning, Mauser and Model Three
Or the revolver which explodes into man's flesh,
All give me the sudden joy of a moment's despair.
Looking into the dark muzzle, you will see

From the twisted rifle-groove of history
I get another incarnation.

—May)

Which at once plunges us into the 20th century, an age of *Angst* and terrorism. And there is nothing *literary* about it; for Mu Dan's generation had experienced exile and war. The young poet himself had walked all the way from Hunan to Yunnan, a distance of over one thousand kilometres, which enabled him to see an interior China made up of villages and small towns. Then he took part in the fighting against the Japanese in Burma, surviving the disastrous retreat into India by a fluke. Hence the bitterness. Hence also the abandon.

His love poetry, too, was different from the usual sort:

你底眼睛看见这一场火灾，
你看不见我，虽然我为你点燃；
唉，那燃烧着的不过是成熟的年代，
你底，我底。我们相隔如重山！

——《诗八首》之一

(Your eyes have seen this disaster of fire
But not me, though I have been ignited by you.
Alas, what is burning is only our mature years,
Yours and mine. We are separated by mountains!

—Eight Poems, I)

静静地，我们拥抱着
用言语所能照明的世界里，
而那未成形的黑暗是可怕的，
那可能和不可能的使我们沉迷。

——《诗八首》之四

(Quietly, we embraced
In a world lit up by words,
Frightened by darkness yet unformed,
Fascinated by what's possible and impossible.

—Eight Poems, IV)

When one reads these lines with one's memory still fresh of the elegant, tentative love poems of the Chinese classical poets, or even of

an earlier vernacular poet like Xu Zhimo, one senses the impact of European modernism.

Compared with his teachers like Feng Zhi and Bian Zhilin, Mu Dan seems to have had the least to do with the Chinese classical tradition. His diction, imagery and syntax are all westernized, e.g. "death's womb" "the jungle of ideas" "I hanged my erring youth" "I cry from the wilderness of my heart" "You gave us abundance and the pangs of abundance" "Water flowing down mountain rocks deposited you and me", etc.⁹ When he made an occasional sortie into Chinese classical poetry, it was to appropriate moods and modes of an antique quaintness to set off the new and modern:

负心儿郎多情女
荷花池旁订誓盟
而今独自倚栏想
落花飞絮满天空

而五月的黄昏是那樣的朦朧！
在火炬的行列叫喊過去以後，
誰也不會看見的
被恭維的街道就把他們傾出，
在報上登過救濟民生的談話後，
誰也不會看見的
愚蠢的人們就撲進泥沼里，
而謀害者，凱歌着五月的自由，
緊握一切無形電力的總樞紐。

——《五月》

(The disdainful man and the sentimental girl
Pledged to love beside the lotus pond.
Leaning on a balustrade, lost in thought,
She saw a sky full of falling flowers.

But the May evenings are such a blur.
When the shouting torchlight processions have passed,
The flattered street, without anybody noticing,
Empties them all into the gutters.
After the papers reported speeches of poor relief,

The dupes immediately plunged into the puddle,
While the Murderer, singing gleefully of the freedom of May,
Held tight the main switch of all unseen electricity.

—May)

How like the early Auden are the last two lines—the personification, the industrial metaphors, the ironical political touch! Yet Auden, coming from a Western, and so less old, tradition, did not hear so many ancient poetic voices as Mu Dan inevitably did—he was captivated by them even as he consciously rebelled against them. It is also questionable whether the English poet was as seriously concerned. For his part Mu Dan had an earnestness positively Shelleyan, which however didn't make him Romantic, only more complex.

Complexity is a mark of modernism, but in Mu Dan's case it was a complexity that came first of all from the condition of China. If Feng Zhi and Bian Zhilin had to pass through a period of artistic self-perfection before they succumbed, so to speak, to the pull of Chinese realities, the younger poet was keenly aware, throughout his poetic career, of the strife and contradictions in life. He had grown up with the Japanese threat and lived through the years of war and exile in constant anxiety. He was in the thick of the real, rough world from beginning to end. But this doesn't mean that he stood still; he too had developed. Emotionally he outgrew mere helpless anger to become aware of more fundamental questions, and self-torture soon gave way to self-examination, which combined to give his poetry greater depth. Stylistically he purified his poetic language, so that the early rude "abundance and the pangs of abundance" evolved into a stage where he could "light up a world with words", where, indeed, he became one of the most original users of modern Chinese, least afflicted with the age-old problem of clichés. This two-fold development yielded a number of good poems, like "Fissure" "May" "Precursor" "Eight Poems", etc.

But he was destined not to write any more poetry. For all his

brilliance, his work had been flawed by a certain lack of focus, reflecting a lack of a sense of direction. In 1946, when jubilation over victory in the foreign war was being rapidly replaced by worries about the renewal of the civil war, Mu Dan, who had been a dreamy idealist at the beginning of his poetic career, now found himself "lodged between two darknesses, one past, the other to come".¹⁰ Just turned 30, he felt old, "consumed by the fires of destruction".¹¹ He had come to the end of his tether, emotionally as well as poetically. His fellow poets dispersed. His readers, never numerous in any case, soon turned to poetry of other modes.

Thus the second wave of modernism subsided, leaving only some eddies in Beiping and Shanghai. Meanwhile, the main stream of the new poetry surged ahead. This was the poetry which Ai Qing, after renouncing French symbolism, had helped to nurture, until now it became a powerful, mass-based literature in the Liberated Areas and in cities where the internal conflict was particularly sharp, like Chongqing and Guilin. Its impact was felt even in the university in Kunming. One man in particular listened to the distant voices. He was the one-time singer of the Crescent Group, the poet-scholar Wen Yiduo. He read and was impressed by the poems of Tian Jian, an activist in Yan'an. Wen called Tian "the Drummer of Our Time" and commented on his work thus:

Here there is nothing hidden between the lines, no lingering effect, no half-rhyme, no stylistic tricks, only plain words, straightforward, sincere, brief but full of matter; indeed, only drum beats, monotonous perhaps, but loud, powerful, forcing their way into your ears and your heart...

It is a roll of drums, goading you to love, inciting you to hate, urging you to live with the maximum heat and strength, on this earth of ours.¹²

Here, Wen not only praised the poetry of Tian Jian, but also criticized, if only by implication, other kinds of poetry, certainly those that had resorted to "hiding between the lines" "lingering effects" "half-rhymes" "stylistic tricks". Did the latter also include the works of the Kunming modernists? We only know that Wen selected a number of poems by Mu Dan, Du Yunxie and others for the *Anthology of Modern Chinese*

Poetry he was then compiling.¹³ He had stopped writing poetry himself, but was still keenly interested in what the young poets around him were doing. Indeed, he was generous with help to anybody in or out of the university who approached him on questions of poetry. Yet his own views on poetry were never in doubt. He had all along advocated—and himself practised—writing poetry to express one's feelings about the larger issues confronting the nation. The erstwhile Chicago art student who had returned to China to shock the bourgeoisie by once painting his rooms all black, never really went in for art for art's sake; all his famous poems, from the chants of a Chinese laundryman in America to "Dead Water" and "Cold Night", were the outpourings of a stout patriotic heart. Now, in the midst of intense activities for the democratic cause, he once more came out to commend, in speeches and writings, a vernacular poetry rooted in the soil of the vast territories of the northwest, where alone the Chinese people could, as he put it, "live with the maximum heat and strength". He spoke these words in reference to that combative, massbased poetry, but, given the time and the place, could he not also have had in view the modernist productions of his younger colleagues at the university?

It would be unhistorical, however, to dismiss the modernist trend as consisting only of a technique of suggestiveness or stylistic tricks. Modernism meant more than that. It brought a sense of the new to China, which sharpened the poetic sensibility of two generations. Yet it did not develop into a powerful movement. It had come to China at a crisis hour, when the country, engulfed in war and revolution, wanted desperately to ward off foreign aggression and to find ways to feed its vast population. Chinese poets were seriously concerned with these problems. Many of them, then or later, joined in the effort to build a just society. Moreover, they had been reared in one of the most splendid and longest-living poetic traditions in world literature. Thus there never arose a situation where a superior, more enlightened poetry descended from Western Europe to succour an outworn native

poetry, either ideologically or artistically. Even from the point of view of technique, European modernism had surprisingly little to teach the Chinese poets. Apart from urban rhythms, industrial metaphors and some novel theories of psychology, a cultivated Chinese found most of the Western modernist ways of writing *déjà-vu*. He thought his own classical masters had achieved similar effects by ways more economical a long time ago. This explains why it was relatively easy for Chinese poets to adopt the European modernist mode. This also explains why they could pick and choose, keeping what they found useful and rejecting the rest, and why in the end their Chinese qualities reasserted themselves. All the important poets discussed above—Dai Wangshu, Ai Qing, Bian Zhilin, Feng Zhi, Mu Dan—underwent this process of change and each wrote his more enduring work when his modernist sensibility responded, sympathetically and intimately, to Chinese realities.

伍 中国的现代诗 [1]

现代主义作为一种文学运动也许风头已减，但余波还未止。如今中国人对“朦胧诗”和意识流小说技巧的争论就是明证。支持也好，反对也罢，有时让人感觉中国人似乎从未弄明白现代主义为何物似的。但情况并非如此。很多中国作家都曾与现代主义有过直接的、亲密的接触。

(一)

以“新诗”为例，1919年前后的文学革命无论按照哪个标准来看，都算是影响深远的大事。首先，诗人们突然摒弃了古典传统，转而去写白话自由诗。然而古典传统不是能够轻易推翻的。除了刘复的诗作比较成功地运用口语以外，多数读来像是不甚高明的宋词仿作。因此，当又一代诗人踏入文坛，他们看到，除非自己愿意写淡而无味的散文诗或白话打油诗，否则就得寻找新的典范，以及一整套新的美学。在此之前，人们谈的主要是用白话去表达一个民主的新时代的新题材，没人考虑过美学问题。现在大家发现创造社的领袖郭沫若在模仿沃尔特惠特曼，新月派的徐志摩等在学英国浪漫主义诗人，诗人兼画家的闻一多在用英语诗的格律约束新诗，赋予新诗格律美。另外还有别的声音，别的美学观。不久，创造社里的年轻一代借用了法国象征派的节奏和主题。

我从café中出来
身上添了
中酒的
疲乏……

——王独清：《我从Café中出来》

因此，王独清带着世纪末巴黎的颓废调子，在中文诗里用了一个法文单词café。冯乃超则唱《生命的哀歌》：

今宵轮到我唱生命的哀歌
外间哀哀哭泣的夜雨成河
怎得心里的泪泉如注地再涌
洗涤我哀愁浸蚀的心窝

——冯乃超：《生命的哀歌》

自然是呼应、再呼应法国诗人魏尔伦 [2] 的诗句：

泪流在我心里，

雨在城上淅沥：
哪来一阵凄楚
滴得我这般惨戚？【3】

——《泪流在我心底》

借用的痕迹是很明显的。尽管如此，想想当时大多数中国诗人都毫无新意地一遍遍模仿英国浪漫主义，冯乃超则能发现法国诗中的现代特征，识别出别样的细微与精妙，已是不菲的成就了。

另外还有两位诗人也学象征派而写下了更好的诗。李金发把惊人的意象置于简短的诗行之中：

我们散步在死草上，
悲愤纠缠在膝下。

粉红之记忆
如道旁朽兽，发出奇臭。

——李金发：《夜之歌》

这首诗的题目《夜之歌》也恰如其分。李金发的诗句可与波德莱尔的相媲美：

夕阳之火不能把时间之烦闷
化成灰烬

——《弃妇》

但他却是个用错误的方式学习母语的波德莱尔。尽管李金发无疑对诗体颇有感觉，比喻的运用也很高超，但他文白掺杂，用一个“之”字将两者串联。反对者立刻抓住这一点对他进行抨击，对其异域的“颓废”很是不满。

李金发的同伴戴望舒写出的文字更优雅，古典造诣颇深。起初戴的诗作都是些寻常俗套，后来受法国诗歌的影响，奏出了一种新的乐感：

撑着油纸伞，独自
彷徨在悠长，悠长
又寂寥的雨巷，
我希望逢着
一个丁香一样地
结着愁怨的姑娘

——戴望舒：《雨巷》

其响亮、律动的诗句以及曳长的韵律宛如魏尔伦的《秋歌》：

秋日里
呜咽的
小提琴
单调的
忧郁里
慰我心。【4】

但《雨巷》中的意境则是中国古典的，令人想起脍炙人口的唐宋名句：
丁香空结雨中愁【5】

小楼一夜听春雨
深巷明朝卖杏花【6】

因此，《雨巷》是中国古典与法国象征派的结合。但戴望舒不久就宣称：

诗不能借重音乐，它应该去了音乐的成分。

果然也出现了一种新风格：口语化，散文化，把原来严谨的韵律放松了：

我底记忆是忠实于我的，
忠实甚于我最好的友人。

——《我底记忆》

不再是歌唱的声音，而是絮谈的声音。这种放松的韵律倒是产生了一连串好诗：《对于天的怀乡病》《秋天的梦》《村姑》《秋蝇》《乐园鸟》等。诗人显得自由自在，在语言上也进行了各种试验，例如把古典引语放进现代语境中：

士为知己者用，
故承恩的灯，
遂做了恋的同谋人。

——《灯》

或追求一种日本和歌式的效果：

木叶的红色，
木叶的黄色，
木叶的土灰色：
窗外的下午！

——《秋蝇》

或改造法国的哲学名言：

我思想，故我是蝴蝶……

万年后小花的轻呼，
透过无梦无醒的云雾，
来振撼我斑斓的彩翼

——《我思想》

诗的第一行，是把笛卡尔（“我思故我在”）同庄子（庄周梦蝴蝶）合而为一了。看着这些作品，我们不禁悬想：如果戴沿着这条路继续实验下去，中国新诗又会出现什么局面？

然而，实验停止了，而其原因除了诗人家庭生活上的波折——妻子离开了他——就是中国的现实：上海的“白色恐怖”，文艺上的围剿和反围剿，日本的武力侵略，以及终于到来的抗日战争的全面爆发。诗人想要避免卷入而不可得。《现代》杂志登出了标榜“第三种人”的文章，但是为这个杂志写作的戴望舒却在经历着缓慢然而明显的变化。《断指》一诗已见其端：

关于他的“可怜又可笑的爱情”我是一些也不知道，
我知道的只是他是在一个工人家里被捕去的；
随后是酷刑吧，随后是惨苦的牢狱吧，
随后是死刑吧，那等待着我们的死刑吧。

——《断指》

如果说在这里诗人还只是开始意识到在他的想象世界之外，还存在着一个残酷的现实世界的话，那么不久他就对于这残酷有了亲身体验：

我用残损的手掌
摸索这广大的土地：
这一角已变成灰烬，
那一角只是血和泥……

——《我用残损的手掌》（1942）

戴望舒在上海发生“白色恐怖”之后去到香港，而当香港在太平洋战争沦陷后，他又被日本占领军关押和迫害，因此写下《我用残损的手掌》。然而诗并不以哀叹告终：

无形的手掌掠过无限的江山，
手指沾了血和灰，手掌沾了阴暗，
只有那辽远的一角依然完整，
温暖，明朗，坚固而蓬勃生春。
在那上面，我用残损的手掌轻抚，
像恋人的柔发，婴孩手中乳。
我把全部的力量运在手掌

贴在上面，寄与爱和一切希望，
因为只有那里是太阳，是春，
将驱逐阴暗，带来苏生，
因为只有那里我们不像牲口一样活，
蝼蚁一样死……那里，永恒的中国！

几位有眼光的同行诗人赞赏这首诗。艾青就评论过：

诗人在《我用残损的手掌》里，写自己用手抚摸祖国的地图，用高度压缩的
词句，概括地描述了祖国的广大的陷落了土地，句句都充满了哀痛；到后来笔
锋一转，对解放区（我想他指的是延安）寄予极深的爱。

卞之琳也评论道：

这首诗应算是戴望舒生平各时期所写的十来首最好的诗篇之一，即使单从艺
术上看也是如此。

有意思的是，艾青和卞之琳经历了同样的虽然程度不同的变化，但
最后殊途同归。

此时的艾青仍积极作诗。就在几个月前，他的诗集《归来的歌》还
获得了全国作协一等奖。人们容易忘记这位诗人曾于30年代早期去巴黎
学习艺术，并在维尔哈仑 [7] 和阿波里内尔 [8] 的影响下开始创作诗歌。
阿波里内尔有两行诗句他深深铭记于心，还将之作为自己诗篇前面的引
句：

当年我有一支芦笛
拿法国大元帅的节杖我也不换 [9]

多么有气概的宣言，道出了诗歌艺术是何等的灿烂和气节！但艾青在自
己的诗中却有不同的故事要讲：

我从你彩色的欧罗巴
带回了一支芦笛，
同着它
我会在大西洋边
象在自己家里般走着，
如今
你的诗集“Alcool”是在上海的巡捕房里，
我是“犯了罪”的，
在这里
芦笛也是禁物。

——艾青：《芦笛——纪念故诗人阿波里内尔》

在外国列强和国民党联合统治的上海，这就是艾青当时的处境。连最起
码的人身安全都不能保证，更谈不上保持艺术的纯洁和独立性了。在这

一点上，艾青远比戴望舒觉醒得早，后来的诗歌创作道路也不同，但他们两个人都经历了同样性质的变化——从拿来后又放弃欧洲象征主义到重回中国现实，而在这过程里他们的芦笛改了调子，吹出了不同的声音。

卞之琳也是珍惜他的芦笛的，而且细心倾听来自西欧的几乎全部有新意的芦笛声：波德莱尔、魏尔伦、艾略特、叶芝、里尔克、瓦雷里、奥登、阿拉贡、布莱希特。这名单，连同名字的次序，是他自己开列的。据他回忆，这些人都在他不同的创作阶段影响过他。当然他也深受中国古典诗歌的熏陶。他自己就说过，他前期的诗“出现过晚唐南宋诗词的末世之音，同时也有点近于西方‘世纪末’诗歌的情调”。后来，他更多地从英国现代诗吸收，比如这句

伸向黄昏的道路象一段灰心

——卞之琳：《归》

就明显受艾略特的启发：

街连着街，象一场冗长的辩论
带着阴险的意图
要把你引向一个重大的问题……

——艾略特：《普鲁弗洛克的情歌》

只不过这位中国诗人写得更简练，而这正是讲究整齐、优雅、形式美的中国传统格律诗多年熏陶的结果。

20世纪30年代中期，二十几岁的卞之琳达到了他诗艺上的高峰。他写了非常现代主义化的诗篇，题名《距离的组织》，末行令人惊叹：

友人带来了雪意和五点钟。

很多读者抱怨这首诗难懂，卞之琳不得不加注说明用意，结果一首不过十行的短诗加了七个注。这在20世纪诗歌史上，无论东方还是西方，可能是自注比例最大的诗篇了。但他也能写出不需任何注解的好诗，例如《断章》：

你站在桥上看风景，
看风景人在楼上看你。
明月装饰了你的窗子，
你装饰了别人的梦。

——《断章》

他这时期的最好作品，无疑是《尺八》：

象候鸟衔来了异方的种子，
三桅船载来了一支尺八，
从夕阳里，从海西头。
长安丸载来的海西客
夜半听楼下醉汉的尺八，
想一个孤馆寄居的番客
听了雁声，动了乡愁，
得了慰藉于邻家的尺八，
次朝在长安市的繁华里
独访取一支凄凉的竹管……
（为什么霓虹灯的万花间
还飘着一缕凄凉的古香？）
归去也，归去也，归去也——
象候鸟衔来了异方的种子，
三桅船载来了一支尺八，
尺八乃成了三岛的花草。
（为什么霓虹灯的万花间
还飘着一缕凄凉的古香？）
归去也，归去也，归去也——
海西人想带回失去的悲哀吗？

（1935年6月19日）

尺八是五孔或六孔的竹管乐器，原产于中国，七世纪时传到日本，现在在中国已很少见，但在日本却还盛行。卞之琳1935年在日本暂住期间听过有人在吹奏它，动了乡愁。但是他承认，这乡愁之中，也有“对祖国式微的哀愁”。因为他在日本见到了日本军国主义的真实面目：

对方越是凶猛地朝我们开枪，我越想看看他们身后是何等的软弱。我第一次看到了军国主义的警察和特务是多么可鄙和可笑，也看到了法西斯统治下的百姓是多么可怜和善良。

很多20世纪的中国诗人情同此心。但无论多么追求艺术的完美——卞对艺术的敏感和对完美的追求是少有的——中国诗人仍心系祖国的命运，这在西欧和北美的现代主义诗人当中是少见的。而且这首诗还揭示了中国当代诗歌的另一个特征，即中国的古诗传统仍然强大有力。卞之琳虽采用西洋的自由体和一行三或四顿的英国式格律，诗的支柱却在三个复句，特别是那用纯粹的旧文体、旧词句写出的一行：

归去也，归去也，归去也

复句本身又有复句：三声呼叫，哀怨而又毅然决然，其响亮的长音和中世纪的余韵表达了这一乐器的特点和诗人听它时的心情。

因此，诗作显示了诗人正经历的变化。抗日战争爆发后，卞之琳去了戴望舒神往而未能到达的地方：延安。那是1938年初。当时全中国情绪激昂，因为终于和中国人民痛恨的敌人全面开战了。卞之琳在战斗第一线遍地考察，写下了《慰劳信集》，但这部诗集似乎并未受到应有的重视。其中都是很具创造力的战争诗。每封“信”都是生动的参战人员的侧影：神枪手、新兵、两个哨兵娃、用绣花针扎破敌人自行车胎的眼疾手快的姑娘、被转移到山里的村民、拆毁敌人铁路线的村民、造军用机场的人们、开荒的青年、政委、将军，还有大战略家本人：

《论持久战》的著者

手在你用处真是无限。

如何摆星罗棋布的战局？

如何犬牙交错了拉锯？

包围反包围如何打眼？

下围棋的能手笔下生花，

不，植根在每一个人心中

三阶段：后退，相持，反攻——

你是顺从了，主宰了辩证法。

如今手也到了新阶段，

拿起锄头来捣翻棘刺，

号召了，你自己也实行生产。

最难忘你那“打出去”的手势

常用以指挥感情的洪流

协入一种必然的大节奏。

（1938年11月20日）

这是写给毛泽东的——带着欣赏和佩服，但并无一丝畏怯，就像一位诗人跟另一位诗人在交谈，完全不同于后来出现的千万首颂歌。这首诗也涵盖了延安的大事：游击战、开荒种地、丰衣足食、最后的反围剿。他把这些全部写进一首小诗，通过一个“手”的意象：下围棋的手，指挥战役的手，开荒种地的手，在军民面前做着“打出去”手势的手。但诗的形式则完全是西方的，事实上，是一首格律整齐、一个韵脚也不出错的十四行！

几乎在同一时间，有一个青年英国诗人也在用十四行体写他在中国

战场的感受，那就是奥登，这些十四行诗发表在由他与伊修伍德^[10]合著的《战地行》中。之后不久，卞之琳译了其中几首，显然是出于喜爱，没有屈就，也没有高攀，而是带着自信，因为他刚完成了一项艰难的工作：在《慰劳信集》中用严谨的西欧诗体写出了中国战场上的“感情的洪流”。

（二）

而此后是长长的空白。1939年卞之琳离开西北山区，来到昆明，接下来十一年没写过一首诗，但是诗并没有完全离开他。他在西南联合大学讲诗，译诗（翻译了奥登和其他西方现代诗人的诗）；事实上，他正好看到另一个现代主义诗歌潮流在那所战时大学兴起。

西南联合大学，简称联大，是流亡者的大学，由中国北方最著名的三所大学，北平的北京大学、清华大学及天津的南开大学，共同组成。1937年秋，面对入侵的日军，三所大学的师生被迫一步步南迁，直至到达中国西南角的云南省，最终在省会昆明落脚。条件极其艰苦：校舍狭窄，没有必要的设备，最可怕的是几乎无书可读。但是师生，尤其是年轻师生，面对民族战争的第一次热潮，并不在意困难。大家同仇敌忾，求真知，为国强。教师中有不少著名作家：闻一多、朱自清、沈从文、冯至、李广田等。钱锺书教授欧洲文艺复兴时期的文学和20世纪西方小说，英国人燕卜苏开了一门当代英国诗。学生中也诞生了多位诗人，如穆旦、杜运燮、郑敏等等。

现代主义并没有真正风靡联大，但它有一种新锐的势头，而且这一次，在法国象征派和庞德-艾略特的现代主义之外，还出现了德语诗人赖内·马利亚·里尔克^[11]。

这影响见于冯至。冯至并不是新人，在20世纪20年代就已出名。当时作为新文学主将的鲁迅赞其为“中国最为杰出的抒情诗人”，可能归于他的长诗《北游》（1929）。接着他便销声匿迹了，去海德堡潜心研究歌德。待到1940年前后他出现在昆明时，其诗歌趣味已经有了改变。他开始写十四行诗，1941年一年间就写了27首。第27首是个很好的例子：

从一片泛滥无形的水里
取水人取来椭圆的一瓶，
这点水就得到一个定形；
看，在秋风里飘扬的风旗，

它把住些把不住的事体，
让远方的光、远方的黑夜
和些远方的草木的荣谢，
还有个奔向远方的心意，
都保留一些在这面旗上，
我们空空听过一夜风声，
空看了一天的草黄叶红，
向何处安排我们的思想？
但愿这些诗象一面风旗
把住一些把不住的事体。

——冯至：《十四行》之二十七

这里诗人不只在沉思，也有对艺术抽象的探索。因此便出现了中国诗中不常见的比喻：用椭圆的瓶子给泛滥无形的水以定形，又靠风旗把住一些把不住的事体。但是诗里有足够的实在东西来稳住读者：秋风、远方的光、草木的荣谢，而诗人低沉、不紧不慢、略带忧伤的声音又很动听。同时，这也让人听到了里尔克《杜伊诺哀歌》的回响：

……因此
纯粹是无法说出的事情……
漫游人从山坡带回山谷的
不是一把无法说出的土，而是
抓到了一个词，纯净的词，那黄蓝色的龙胆花。……

——哀歌之九

两位诗人都致力于表达无法表达的东西——冯至关注“把不住的事体”，里尔克关注“无法说出的事情”。冯至的取水人和里尔克的游荡者都起着同一作用，也即替诗人自己说话。两位诗人都把创作——冯至的“这些诗”，里尔克的“纯净的词”——看作出路。最重要的是，两者还有同样饱含感情的沉思气氛。

冯至还有其他特质，与里尔克不同，但仍很现代主义，比如第21首十四行诗：

我们听着狂风里的暴雨，
我们在灯光下这样孤单，
我们在这小小的茅屋里
就是和我们用具的中间

也有了千里万里的距离：

铜炉在向往深山的矿苗，
瓷壶在向往江边的陶泥，
它们都象风雨中的飞鸟

各自东西。我们紧紧抱住，
好象自身也都不能自主。
狂风把一切都吹入高空，

暴雨把一切又淋入泥土，
只剩下这点微弱的灯红
在证实我们生命的暂住。

人在一个有敌意的宇宙里的无助感：一个已被很多欧洲诗人写了又写的主题。创新之处可能在于对“用具”、原料和成品之间的辩证关系以及自然与艺术之间的辩证关系的处理。这一切都用颇具中国特色的意象传达出来了：铜炉、瓷壶、深山的矿苗、江边的陶泥。如果我们再加以细读，还会发现这里诗中有诗：有杜甫“茅屋为秋风所破歌”的遗痕，也有千百首写夜思的中国古诗的回声。后者可用两首大约作于1900年——另一个危机时刻——的律诗为例：

千声檐铁百淋铃，雨横风狂暂一停。
正望鸡鸣天下白，又惊鹅击海东青。
沉阴噤噤何多日，残月晖晖尚几星。
斗空苍茫吾独立，万家酣梦几人醒。

——黄遵宪：《夜起》

苦月霜林微有阴，灯寒欲雪夜钟深。
此时危坐管宁榻，抱膝乃为梁父吟。
斗酒纵横天下事，名山风雨百年心。
摊书兀兀了无睡，起听五更孤角沉。

——谭嗣同：《夜成》

冯至未必真读过这两首诗，但是他内心肯定有对这些和其他类似中国古诗的回响，不仅给他以某些场景、情调的暗示，而且使他对于某些惯用词句以及诗的形式也有一种特殊的约定目标。冯至和卞之琳为何选择十四行诗？难道不是因为十四行诗与中国传统律诗在结构和用意上有诸多相似？甚至连律诗中间的对仗在冯至的第21首十四行诗中也不难看到：

狂风把一切都吹入高空
暴雨把一切又淋入泥土

冥冥之中，冯至是把十四行当作中国的律诗在写！

他们当然有所不同。那两位古典诗人在深夜忧国忧民时，冯至则关心人在一个有敌意的宇宙里的不安心绪。前者抒写政治，是写给大众看的；后者吐露内心，是表达私密感受的。但如果说起里尔克，又不算太私密。冯至只写“还有个奔向远方的心意”，里尔克的挽歌则记录某种巨大的心路历程，一个漫长的、无尽追索的历程，生与死只是同一过程的两个方面。因此，里尔克具有冯志所没有的深度，冯至更温柔敦厚，正是受到儒家传统熏陶的中国文人应有的风范。总之，里尔克对冯至的影响只是流于表面，而中国古典诗歌传统的影响则是“润物细无声”般深入骨髓的。

冯至的那种人在宇宙间的孤独感也是不持久的。即使在写上面几首十四行诗时，他也没有忘记外面世界的苦难与纷争。第14首十四行诗看似是写艺术，写他对凡高画作的印象，但他的眼睛不仅看到了向日葵和柏树，也看到了“在监狱小院里剥着土豆”的不幸的囚徒。他们就“象永不消溶的冰块”，即使凡高这样激情如火的天才炽热的笔端也不能将其融化。这引得诗人问道：

这中间你画了吊桥，
画了轻盈的船：你可要
把那些不幸者迎接过来？

——《十四行》之十四

貌似轻轻的一问，几乎可说是喃喃自语，实则一声呐喊，如同E. M. 福斯特的呐喊一般：团结起来吧！

他的确做到团结了。当昆明遭遇日军空袭，师生不得不退到西南联大的后山时，冯至为民众的聚集而鼓舞：

和暖的阳光内
我们来到郊外，
象不同的河水
融成一片大海。……

——《十四行》之七

诗句的短促有力——一个新调子——使我们听到跑空袭警报的人们的脚步声。面对外敌的入侵，全国人民团结起来了。冯至满心鼓舞，但仍不忘警醒世人：国难结束时，我们别再一盘散沙了！同之前的戴望舒、艾青和卞之琳一样，冯至也从一个抒写个人情感的诗人变成了一个焦虑民

族命运的诗人。但是他的警钟无人聆听。几乎就在抗日战争结束的
同时，内战开始了。1945年12月，国民党在联大师范学院门口开枪打死
四名学生。就是这种时局使得诗人兼学者闻一多投入到争取民主的战斗
中，不久献出了生命；也是这种时局使得冯至从此再不写里尔克式的十
四行诗了。

联大的学生中也涌现出来一批现代派诗人。杜运燮用奥登式讽刺，
描写他在战火纷飞的滇缅公路上担任战地翻译的经历。哲学系女生郑敏
也是里尔克的崇拜者，她写的诗静谧、细腻、充满冥想，深受多人喜
爱。而把现代主义更加推进一步的则数外语系的穆旦。他擅长描写苦恼
和自我折磨：

我知道
一个更紧的死亡追在后头。
因为我听见了洪水，随着巨风，
从远而近，在我们的心里拍打，
吞蚀着古旧的血液和骨肉！

……

在一瞬间
我看见了遍野的白骨
旋动

——穆旦：《从空虚到充实》

伴随着对死亡的关注（强烈程度不亚于詹姆士一世时代的作家），还有
对暴力的凝思：

勃朗宁，毛瑟，三号手提式，
或是爆进人肉去的左轮，
它们能给我绝望后的快乐，
对着漆黑的枪口，你就会看见
从历史的扭转的弹道里
我是得到了二次的诞生

——《五月》

这一下子把我们推进20世纪，一个充满焦虑与恐怖主义的年代。没有任
何文学性可言，因为穆旦和其同代人都经历了流亡和战争。这位青年诗
人曾从湖南徒步一千多公里来到云南。途中他看到了中国内地的村庄和
小镇。接着他又参加了中国军队在缅甸同日本侵略军的作战，在随后向
印度丛林的大撤退中几乎丧了命。所以才有这样的沉痛，所以才会这样

的恣意纵情。

他所写的情诗也异乎寻常：

你底眼睛看见这一场火灾，
你看不见我，虽然我为你点燃；
唉，那燃烧着的不过是成熟的年代，
你底，我底。我们相隔如重山！

——《诗八首》之一

静静地，我们拥抱在
用言语所能照明的世界里，
而那未成形的黑暗是可怕的，
那可能和不可能的使我们沉迷。

——《诗八首》之四

如果你还记得中国古典诗人那些优美、朦胧的情诗，或者新月派里的徐志摩等人是怎样咏唱爱情的，我们就会看出西欧的现代主义已经在中国造成了多大的影响。

同他的师辈冯至、卞之琳相比，穆旦对于中国古典传统是摄取最少的。他用的词、形象、句法都明显欧化，譬如“死的子宫”“观念的丛林”“我缢死了我错误的童年”“我从我心的旷野里呼喊”“你给我们丰富和丰富的痛苦”“水流山石间沉淀下你我”，等等。当他偶有兴致写一首古诗时，也是为了借古衬今，突显新的、现代的元素：

负心儿郎多情女
荷花池旁订誓盟
而今独自倚栏想
落花飞絮满天空

而五月的黄昏是那樣的朦朧！
在火炬的行列叫喊過去以後，
誰也不會看見的
被恭維的街道就把他們傾出，
在報上登過救濟民生的談話後，
誰也不會看見的
愚蠢的人們就撲進泥沼里，
而謀害者，凱歌着五月的自由，
緊握一切無形電力的總樞紐。

——《五月》

这两行多么像奥登的早期诗！那拟人手法，那工业性比喻，那带着讽刺口气的政治笔触！但来自没有这般古老的西方传统文化的奥登不像穆旦那样听过这么多古诗——即便是有意抵触，穆旦也不免对之着迷。再说，奥登是否如穆旦一样对现实充满关切，也是个问题。穆旦像雪莱一样积极主动，但那并没让他成为一个浪漫诗人，只是让他更加变得复杂罢了。

复杂是西方现代主义的标志，但穆旦的复杂却首先是由中国的现状造成的。如果说冯至和卞之琳都要经过一段追求艺术至上的时期才能被中国的现实拉回的话，穆旦则在写诗的整个生涯里，都强烈地意识到现实世界里的矛盾和冲突。他在日军铁蹄的阴影下长大，在焦虑中度过战争和流亡的岁月，对残酷的现实世界有着切实的体会。但这并不意味着他没有发展。情绪上，他从无助的愤怒进到对更根本的问题有所体悟，自我折磨很快让位于自我反省，这一切都让他的诗更加深刻。诗歌语言上的逐渐净化，从初期的复杂——“丰富和丰富的痛苦”——进到能用言语“照明世界”，使他成为中国新诗里最少成语、套话的新颖的风格家。这两者的结合产生了像《裂纹》《五月》《先导》《诗八首》等出色作品。

但是他注定不会再写诗了。尽管满腹才华，他却缺少中心和方向指引。1946年，抗日战争的喜悦迅速被对内战的担忧所取代。从创作伊始就是爱做梦的理想主义者的穆旦，如今发现自己身处“过去和未来两大黑暗间”。刚到三十岁，他就感觉自己老了，落“在毁灭的火焰之中”。无论是情感上，还是诗艺上，他都精尽力竭。他的诗友们也散了，而他的读者们——在任何时期也是人数不多的——也很快转向了别种样式的诗歌。

就这样，现代主义的第二个浪潮消退了，只在北平和上海还有一点余波。同时，新诗的主流还在澎湃向前。这个主流就是艾青在放弃法国象征主义后帮助形成的，现在在解放区和重庆、桂林等内战尤其激烈的地区，以更强有力的声势滚腾着。甚至在西南联大，也有人听到了这远方浪潮的声音。这个人就是昔日新月派的倡导者，诗人兼学者闻一多。他深受延安活动家田间^[12]的诗歌启发，称其为“时代的鼓手”，并这样评价他的作品：

这里没有“弦外之音”，没有“绕梁三日”的余韵，没有半音，没有玩任何“花头”，只是一句句朴质、干脆、真诚的话，（多么有斤两的话！）简短而坚实的句

子，就是一声声的“鼓点”，单调，但是响亮而沉重，打入你耳中，打在你心上……

它只是一片沉着的鼓声，鼓舞你爱，鼓动你恨，鼓动你活着，用最高限度的热与力活着，在这大地上。

这里，闻一多在赞赏田间的同时，也间接批评了其他类型的诗，即那些有“弦外之音”“余韵”“半音”或玩了“花头”的诗。后者是否也包括联大现代派诗人的诗呢？我们只知道闻一多也把穆旦、杜运燮等人的作品多首收进了他编的《中国诗选》^[13]。那时，他自己已不写诗，但仍对周围的年轻诗人十分关注。事实上，联大内外无论谁就诗歌问题向他求助，他都不吝赐教。然而他自己的文学观又不容置疑。他始终主张——并且曾经出色地实践——诗歌要抒写对国家大事的关切。这位昔日芝加哥艺术系的学生回国后把自己的房屋刷得漆黑，着实吓到了小资产阶级，但他从没有为艺术而艺术。他所有的好诗，无论是在美国写的那首歌咏华侨洗衣工的诗，还是《死水》或《冬夜》，都出自一颗拳拳爱国之心。而现在国难当头，他又在讲演和文章里高度赞扬了生根于西北广大地区的白话诗，认为只有在那里中国人才能“用最高限度的热与力活着”。这些话是指着群众性的战斗诗说的，但是就时间和地点而言，也未必同他联大的年轻同事的现代主义诗毫无关联吧？

然而，仅仅把现代主义看成一系列有“弦外之音”或玩了“花头”的技巧，是不合乎历史进程的。现代主义当然不止如此。它为中国带来了新鲜事物，提升了两代人的诗歌敏感度。只是它没有发展成具有影响力的运动。它于一个危机时刻来到中国，当时处在战争与革命境况里的中国人迫切需要抵御外侵和保证民生的手段。中国的诗人也深切关心这些问题。他们当中的很多人都在为建造一个公正的社会而努力，而在他们背后则是世界文学里一个最最绚烂、最最持久的诗歌传统。这里并没有什么西欧先进诗歌降临落后地区的局面，思想上如此，艺术上也如此。即便从写作技巧上讲，欧洲现代主义诗人也几乎没有什么可以教给中国诗人的东西。除了大城市节奏、工业性比喻和心理学上的新奇理论之外，一个有修养的中国人会觉得大部分西方现代主义写作技巧都似曾相识，会认为中国古典文学大师们早已用更精简的方式达到相似的效果了。这足以说明为什么中国诗人能够那样容易地接受西方现代主义的风格技巧，这也说明为什么他们能够有所取舍，能够驾驭和改造外来成分，而最终则是他们的中国品质占了上风。本章讨论的所有重要的中国诗人

——戴望舒、艾青、卞之琳、冯至、穆旦——个个都经历了这一变化，而只有当他们饱含深情、感同身受地把对现代主义的感知与中国的现实结合起来时，才写下了他们最能持久的诗。

VI A CHINESE POET

A just estimate of wartime Chinese poetry must await better days of Chinese politics. A large tract of land north of the Yellow River remains to be explored. One hears vaguely that Yanan, where most poets of pre-war eminence are, has experimented on new forms. They are not academic, these forms, nor pretty-pretty ivory tower. They are, one hears, adaptations of folk songs, very often strung together with harvest dances. But here one must end one's hearsay, and come back to the young Kunming group.

This group is not very well-known. Most of them are printed in the ephemeral magazines; one or two have published their first volumes. But the thin copies of flimsy, yellowish native paper never get very far; there are still transport difficulties and postal restrictions. Their merit is, however, already recognized by friends, among whom can still be found circulating an occasional manuscript.

These poets have been in one way or another connected with the Southwest Associated University, the Lianda, where, despite the low roofs of the classrooms and dormitories, and the haggard, almost beggarly, appearance of the scholars, there is still the old excitement for things of the mind. The library was even smaller in the early years of the war, but what few books it had, especially the precious new books from abroad, had been devoured with the hunger and its attendant lack of table manners of a Dr. Johnson. These still lie dog-eared, crumpled all over, often with the title-pages gone. But the young poets of Lianda have not read their Eliot and Auden in vain. Perhaps the Western world will find its own ignorance of the cultural East shocking when the truth is told of how, with what gusto and what dreamy eyes, these two poets are being read in distant China. For the strange thing is that China, though lamentably out of touch with real political trends, is almost up to the minute in intellectual

matters.

Of an afternoon, over a cup of nothing better than plain China tea, amid the clatter and chatter of farmhands and small tradesmen, the young Chinese scholars discuss eagerly the technical details. The heated arguments sometimes stretch well into the evening, when they take long walks round and round the university campus. But life has not been easy for them. They lived on meagre government grants in their student days. After graduation, as junior members of the university faculty or middle school teachers or bank clerks or merely as loafers, they have had to wage a continual despairing fight against the rise of prices. Some of them got married and have since come under a back-breaking burden of debts and still more debts. They wash, they buy, they cook, they fetch the doctor to care for the sick in the family, they haggle, quarrel, and are disgraced at the market place and before the landlords. There has never developed among them an exclusive, aristocratic society. They are deep in the mud, but every now and then, when things ease a little bit, when the year runs its round to spring again, from among the grindings of daily routine, they steal time and mind out to write.

War, however, meant more than prices. Some of them got much nearer to it than that or dodging the air-raids in cities. Two joined the artillery. One fought with the American Volunteers Group. Several became Ministry of Information officials. Others helped build the Burma Road or cleared it of the enemy. But one man has gone through the bitterest experience of them all. That was the Burma Retreat in 1942. He fought hopeless, almost suicidal, rearguard actions. He was hotly pursued by the Japanese. His horse fell. His orderly died. He had been haunted for day on end by the staring eyes of dead comrades. His legs became swollen under the tropical monsoon. Fatigued as no one had ever thought man could be so fatigued, banished from time and almost from space as well, the gloom and silence of the Assam jungles growing every day heavier and more intolerable, sick with a deadly dysentery, bitten by leeches and huge jungle mosquitoes, and,

above all, driven crazy by starvation, this young man of twenty-three had yet dragged his battered body to India. He has never been the same person. Afterwards, he almost died of overeating in recuperation, which took him a good three months. But the slender, consumptive-looking poet had a toughness unexpected of him. He survived and has lived to tell of it all.

But no! He never did tell. In fact, he treats it all casually, or else is too shy even for that. Only once, when hard pressed and up to his neck in friends' requests, did he say anything about it and even then it was simply his horror of the earth, the elemental rains, the strange, sickly exuberance of jungle growths among which he found the skulls of the men who marched before him, perhaps his friends.

His name is Mu Dan. He has published two volumes and a third is appearing. But it is not so much his poetry as his mother that is on his mind these days. For eight years he has not seen her, and he is no longer a boy of eighteen.

This boy has not really grown up into a man. He is not sophisticated as most established Chinese poets are. He had a good education, but that has taught him only the necessary rudiments of technique. He is still eighteen years old in his curiosity, in his being able to see things as elementals:

当我呼吸，在山河的交铸里，
无数个晨曦，黄昏，彩色的光，
从昆仑，喜马，天山的傲视，
流下了干燥的，卑湿的草原，
当黄河，扬子，珠江终于憩息.....

(I breathe in the fusion of rivers and mountains,
When innumerable mornings, evenings and the lights of all colours,
Avalanche from the proud stare of the Kunlun, Tianshan and the Himalaya
ranges,

Across the arid and misty prairies,
Until reposeful become the Yellow, Yangtze and Pearl rivers...)

If it be said that there is the grandiloquent in it, it should be pointed

out that it was composed as early as 1939, when the country was still in the flush of the early upheavals of the war. What may be extraneous in others is an inner passion in this young, wild-eyed poet.

The pure lyric gift, for which our poet is noted, is hard to get, especially in China, where much of what is being written is a lifeless copy of the dubious masters of the West—dubious, because one of the commonplace ironies in comparative literature is that often the secondrate gains an influence in another tongue. Mu Dan has the best English poets at his fingertips, yet he rarely imitates and never writes with a voice not his own. His anguish is authentic:

我从我心的旷野里呼喊，
为了我窥见的美丽的真理。
而不幸，徬徨的日子将不再有了，
当我缢死了我的错误的童年，
(那些深情的执拗和偏见)

(I cry from the vastnesses of my heart,
Because I have a glimpse of the beautiful word.
But misfortune fell when the days of doubt came to an end,
When I hanged my erring youth,
The passionate stubbornness and fast-held ideas!)

The dominant tone is one of pain:

在坚实的肉里那些深深的
血的沟渠，血的沟渠，灌溉了
翻白的花，在青铜样的皮上！
是多大的奇迹，从紫色的血泊中
它抖身，它站立，它跃起，
风在鞭挞它痛楚的喘息。

(On the solid flesh the deep gullies
Of blood, where on greenish copper
The blood nourished flowers of white!
Through what miracle, from the purple red,
It shook, stood and of a sudden rose,
The wind beating out the rhythms of its agony.)

Indeed, it is this feeling for suffering which distinguishes Mu Dan from

other Chinese writers. One would expect modern Chinese literature to be poignant about life and death. Yet apart from flashes of the savagely biting wit of Lu Xun and a few solitary cases of bitter outburst, Westerneducated Chinese writers are singularly apathetic. Deaths are a common sight in the streets of China, yet many Chinese intellectuals choose to ignore them. Not so Mu Dan. He is a fiery Leftist, a veteran of many demonstrations and mass meetings. However, he distrusts verbal politics:

在犬牙的甬道中让我们反复
行进，让我们相信你句句的紊乱
是一个真理。而我们是皈依的，
你给我们丰富，和丰富底痛苦。

(You make us walk the long corridor, zigzagging,
To and fro, and accept your riot of words
As truth. Still, we are converted, because
You fill out our life and stuff it with agony.)

He goes deeper into the sources, where the death is one of the heart:

然而这不值得挂念，我知道
一个更紧的死亡追在后头，
因为我听见了洪水，随着巨风，
从远而近，在我们的心里拍打，
吞噬着古旧的血液和骨肉。

(But this does not matter. I feel
A more binding death behind my ear,
As I hear the waters and the winds,
Beating from afar and in our hearts,
Devouring our ancient blood and bones.)

Even when he is confronted with a contemporary situation, he is consumed by a dark passion:

勃朗宁，毛瑟，三号手提式，
或是爆进人肉去的左轮，
它们能给我绝望后的快乐，
对着漆黑的枪口，你们会看见
从历史的扭转的弹道里，
我是得到了二次的诞生。

(Browning, Mauser and the Model Three,
Or the revolver which explodes into man's flesh,
All give me the sudden joy of a moment's despair.
Looking into the dark muzzle, you will see
From the twisted rifle-groove of history
I get another incarnation.)

There is always something physical about him. Something that is there because the poet has "thought with his body". His senses are always sharpened, almost to kill:

在一瞬间
我看见了遍野的白骨
旋动

(In an instant
I see the white bones on the plain
Whirling)

Even with love he is best in sensuous images:

你底眼睛看见这一场火灾，
你看不见我，虽然我为你点燃，
唉，那燃烧着的不过是成熟的年代，
你底，我底。我们相隔如重山。

从这自然底蜕变底程序里，
我却爱了一个暂时的你。
即使我哭泣，变灰，变灰又新生，
姑娘，那只是上帝玩弄他自己。

(Your eyes have seen this disaster of fire
But not me, though I have been ignited by you.
Alas, what is burning is only our mature years,
Yours and mine. We are separated by mountains!
In this process of natural metamorphosis,
I have loved a transient you.
Though I sob, become ashes, become ashes and rejuvenate,
Madam, that is only God mocking himself.)

I don't know how others will take it, but to me, this blending of the

physical with the metaphysical is one of the best love poems to have come from modern Chinese writers.

But the really paradoxical thing to be said about Mu Dan is that while he expresses best the tortured and torturing state of mind of young Chinese intellectuals, his best qualities are not Chinese at all. He is definite and says things with a bang where other Chinese poets are vague and mealy-mouthed. Amid the general thinness, his richness of texture and associations is a bit offending. That, perhaps, explains why he is little read and definitely not acclaimed. The achievement is, however, also one of language. For the problem facing a contemporary Chinese poet is essentially the choice of a medium. The old style is abolished, but its clichés have come through to weigh down the new writings. Mu Dan triumphs by a wilful ignorance of the old classics. Even his conceits are Western. He manipulates the unwieldy Chinese characters and exposes them to new rigours, new climates. There are all kinds of unexpected juxtapositions and combinations. He makes a daring use of the spoken idiom. In such poems as "May", he deliberately contrasts the old and new styles to achieve the effect of "time is out of joint". The result is, there is a suddenness, a razor-edge sharpness:

负心儿郎多情女
荷花池旁订誓盟
而今独自倚栏想
落花飞絮满天空

而五月的黄昏是那样的朦朦，
在火炬的行列叫喊过去以后，
谁也不会看见的
被恭维的街道就把他们倾出，
在报上登过救济民生的谈话后，
谁也不会看见的
愚蠢的人们就扑进泥沼里，
而谋害者，凯歌着五月的自由，
紧握一切无形电力的总枢纽。

(The disdainful lord and the sentimental girl
Pledged to Love beside the lotus pond.
Leaning on a balustrade, lost in thought,
She saw a sky full of falling flowers.
But the evenings of May are such a blur.
When the shouting torchlight processions have passed,
The flattered street, without anybody noticing,
Empties them all into the gutters.
After the papers reported speeches of poor relief,
The dupes immediately plunged into the puddle,
And the Murderer, singing of the freedom of May,
Held tight the main switch of all unseen electricity.)

Mu Dan has renounced a language to get a language. The style suits his sensibility perfectly.

But by far the greatest contribution Mu Dan has made to the new literature of China is in the way of creating a God. He has no theological battles to wage for any church, or any of the accepted religions, but there is a hunger of his flesh and spirit that cries for relief and consolation from something outside man. He has noted with dissatisfaction the hollowness of many Chinese writers. They are not atheists, they simply believe in nothing. In this they are perfectly traditional. Religious poetry has not flourished in the climate of the extremely balanced mind of China. To this dearth of great spiritual upheavals can also be attributed the apathy I mentioned earlier. But Mu Dan, with his childlike curiosity, his sounding of the deeps of the soul, is at least alive to struggle and doubt:

虽然生活是疲惫的，我必须追求，
虽然观念的丛林缠绕我，
善恶的光亮在我的心里明灭。

(Though life is wearing, I must quest;
Though the jungles of ideas surround me,
There glimmers in my heart the light
Of Good and Evil.)

And a more straightforward resolution:

看见到处的繁华原来是地狱，

不能够挣脱，爱情将变做仇恨，
是在自己的废墟上，以卑贱的泥土，
他们匍匐着竖起了异教的神。

(Seeing that prosperity everywhere is only Hell
Where there is no escape and love becomes hate,
On their own ruins and from the humble soil
The prostrate erect the heathen God.)

And the problem of identity, expressed with such torturing, clogging
rhythm in the poem "I":

从子宫割裂，失去了温暖，
是残缺的部分渴望着救援，
永远是自己，锁在荒野里，

从静止的梦离开了群体，
痛感到时流，没有什么抓住，
不断的回忆带不回自己，

遇见部分时在一起哭喊，
是初恋的狂喜，想冲出樊篱，
伸出双手来抱住了自己
幻化的形象，是更深的绝望，

永远是自己，锁在荒野里，
仇恨着母亲给分出了梦境。

(Since the womb splitting, I have lost warmth,
An uncompleted part crying for help,
The forever I, locked in vastnesses.

In dreams of quiet I have left the body of Many,
Painfully conscious of the time-flow, gripping nothing,
Incessant recollection does not bring back me.

Meeting a part of me we cry together,
The mad joy of first love. Fleeing the prison,
I stretch both hands to hold.

My metamorphosed image, to find only deeper despair,
The forever I, locked in vastnesses,
Hating mother for separating me from the dreams.)

This is a strange poem and has baffled many. There is the element of sex. The mother-motif. The love of a girl, "a part of me", who looks like the mother. I am reminded of the dialogues of Plato which Mu Dan and I read together in 1936, on a university campus in Peking. Parenthetically, I wish also to call attention to the word "womb" which, though quite common in English poetry, has seldom been used in Chinese. But when a poet questions the secret of the womb, he is questioning the darkness of things. Sex and religion are related in blood.

For the time being, one must protest that the religion in Mu Dan is only a passive one. He knows suffering, but not beatitude. But that may be because he is only twenty-six this year. His mind is still groping. The fluidity is perhaps more satisfying for modern Chinese poetry than perfect piety. The God he eventually arrives at may not be a god at all, but Satan himself. The effort is laudable and the artistic process to climb such forbidding heights of the soul, almost totally new in China, will be worth watching.

陆 一个中国诗人^[1]

对于战时中国诗歌的正确的评价，大概要等中国政治局面更好的一天。黄河以北一大块土地尚待发掘。模糊地听见延安方面的一些诗人——在战前就建立了声誉的——曾实验过一些新的形式，既非学院气息，也不花花绿绿。有人说这些形式大体是民歌的改造，常常还以秧歌作为穿插。但是我们必须结束这些传闻，回到那年青的昆明的一群。

这一群不甚有名。他们的文章大都出现在很快就夭折的杂志上，有一两个人出了他们的第一个集子。但是那些印在薄薄土纸上的小书从来就无法走远，一直到今天，还是有运输困难和邮局的限制。只有朋友们才承认它们的好处，在朋友之间，偶尔还可以看见一卷文稿在传阅。

这些诗人多少与西南联大有关，联大的屋顶是低的，学者们的外表褴褛，有些人形同流民，然而却一直有着那对于心智上事物的兴奋。在战争的初期，图书馆比后来的更小，然而仅有的几本书，尤其是从国外刚运来的珍宝似的新书，是用着一种无礼貌的饥饿吞下了的。这些书现在还躺在那里，纸边都卷如狗耳，到处都皱叠了，而且往往失去了封面。但是这些联大的年青诗人们并没有白读了他们的艾略特^[2]与奥登。也许西方会吃惊地感到它对于文化东方的无知，以及这无知的可耻，当我们告诉它，如何地带着怎样的狂热，以怎样梦寐的眼睛，有人在遥远的中国读着这二个诗人。奇怪的是，中国虽然与真正的政治思潮严重脱节，在学术思想上却一直走在世界前列。

在一个午后，饮着普通的中国茶，置身于乡下来的农民和小商人的嘈杂之中，这些年青作家迫切地热烈讨论着技术的细节。高声的辩论有时伸入深夜：他们离开小茶馆，而围着校园一圈又一圈地不知休止地走着。但是对于他们，生活并不容易。学生时代，他们活在微薄的政府公费上。毕了业，作为大学和中学的低级教员、银行小职员，或仅仅是一个游荡的闲人，他们同物价作着不断的、灰心的抗争。他们之中有人结婚，于是从头就负债度日，他们洗衣，买菜，烧饭，请医生来家里看病人，同人还价，吵嘴，在市场上和房东之前受辱。他们之间并未发展起一个排他的、贵族性的小团体。他们陷在污泥之中，但是，总有那么些次，当事情的重压比较松了一下，当一年又转到春天了，他们从日常琐

碎的折磨里偷出时间和心思来——来写。

战争，自然不仅是物价。也不仅是在城市里躲警报，他们大多要更接近它一点。二个参加了炮兵。一个帮美国志愿队作战，好几个变成宣传部的人员。另外有人帮忙修建过滇缅公路，或将敌人从这路上打退。但是最痛苦的经验却只属于一个人，那是1942年的滇缅撤退，他从事毫无希望的、几乎是自杀性的殿后战。日本人穷追，他的马倒了地，传令兵死了，不知多少天，他给死去战友的直瞪的眼睛追赶着，在热带的毒雨里，他的腿肿了。疲倦得从来没有想到人能这样疲倦，放逐在时间——几乎还在空间——之外，胡康河谷【3】的森林的阴暗和死寂一天比一天沉重了，更不能支持了，带着一种致命性的痢疾，让蚂蝗和大得可怕的蚊子咬着。而在这一切之上，是叫人发疯的饥饿。但是这个二十三岁【4】的年青人结果是拖了他的身体到达印度。虽然他从此变了一个人，以后在印度三个月的休养里又几乎因饥饿之后的过饱而死去，这个瘦长的、外表脆弱的诗人却有意想不到的坚韧，他活了下来，来说他的故事。

但是不！他并没有说。事实上，他本人对于这一切淡漠而又随便，或者便连这样也觉得不好意思。只有一次，被朋友们逼得没有办法了，他才说了一点。而就是那次，他也只说到他对于大地的惧怕，原始的雨，森林里奇异的、看了使人害病的草木怒长，而在繁茂的绿叶之间却是那些走在他前面的人的腐烂的尸身，也许就是他的朋友的。

他的名字是穆旦。他已经有了二个集子，第三个快要出了，但这些日子他所想的可能不是他的诗，而是他的母亲。有整整八年他没见到母亲了，而他已不再是一个十八岁的孩子。

这个孩子实际上并未长大成人。他并没有普通中国诗人所有的派头。他有一个好的正式的教育，而那仅仅给了他技术方面的必要的知识。在好奇心方面，他还只有十八岁；他将一些事物看作最初的元素：

当我呼吸，在山河的交铸里，
无数个晨曦，黄昏，彩色的光，
从昆仑，喜马，天山的傲视，
流下了干燥的，卑湿的草原，
当黄河，扬子，珠江终于憩息……

如果说是这里有些太堂皇的修辞，那么让我们指出：这首诗写在1939年，正当中国激动在初期的挫败里。在他人那里应该是外在的陌生的东

西，在这个年青的无经验的手中变成了内在的情感。

我们的诗人以纯粹的抒情著称，而好的抒情是不大容易见到的，尤其在中国。在中国所写的，有大部分是地位不明白的西方作家的抄袭——之所以说他们地位不明白，是因为比较文学的一个普通的讽刺是：只有第二流的在另一个文字里产生了真正的影响。最好的英国诗人就在穆旦的手指尖上，但他很少模仿，而且从来不借别人的声音唱歌。他的焦灼是真实的：

我从我心的旷野里呼喊，
为了我窥见的美丽的真理。
而不幸，徬徨的日子将不再有了，
当我缢死了我的错误的童年，
（那些深情的执拗和偏见）

主要的调子却是痛苦的：

在坚实的肉里那些深深的
血的沟渠，血的沟渠，灌溉了
翻白的花，在青铜样的皮上！
是多大的奇迹，从紫色的血泊中
它抖身，它站立，它跃起，
风在鞭挞它痛楚的喘息。

事实上，是这一种受难的品质，使穆旦显得与众不同的。人们猜想现代中国写作必将生和死写得分明生动，但是除了几闪鲁迅的凶狠地刺人的机智和几个零碎的悲愤的喊叫，受过西方教育的中国作家大多是冷淡的。死在中国街道上常见景象，而中国的很多知识分子选择视而不见，穆旦却不是这样。他是愤怒的左派，经常参加各种集会和群众大会，但是他不信任口头式政治：

在犬牙的甬道中让我们反复
行进，让我们相信你句句的紊乱
是一个真理。而我们是皈依的，
你给我们丰富，和丰富底痛苦。

他更深入，更钻进根底，问题变成了心的死亡：

然而这不值得挂念，我知道
一个更紧的死亡追在后头，
因为我听见了洪水，随着巨风，
从远而近，在我们的心里拍打，
吞噬着古旧的血液和骨肉。

即使在谈论当下的状况时，他也是在让一个黑暗的情感吞噬着：

勃朗宁，毛瑟，三号手提式，
或是爆进人肉去的左轮，
它们能给我绝望后的快乐，
对着漆黑的枪口，你们会看见
从历史的扭转的弹道里，
我是得到了二次的诞生。

他总给人那么一点肉体的感觉，这感觉，所以存在是因为他“用身体思想”。他的五官锐利如刀：

在一瞬间
我看见了遍野的白骨
旋动

就是关于爱情，他的最好的地方也是在那些官能的形象里：

你底眼睛看见这一场火灾，
你看不见我，虽然我为你点燃，
唉，那燃烧着的不过是成熟的年代，
你底，我底。我们相隔如重山。

从这自然底蜕变底程序里，
我却爱了一个暂时的你。
即使我哭泣，变灰，变灰又新生，
姑娘，那只是上帝玩弄他自己。

我不知道别人怎样看这首诗，对于我，这个将肉体 and 形而上的玄思混合的作品是现代中国最好的情诗之一。

但是穆旦的真正的谜却是：他一方面最善于表达中国知识分子的受折磨而又折磨人的心情，另一方面他的最好的品质却全然是非中国的。在别的中国诗人闪烁其词，像羽毛般轻轻细语时，他却掷地有声，言之凿凿。在普遍的单薄之中，他的组织和联想的丰富有点似乎要冒犯别人了。这一点也许可以解释他为什么很少读者，而且无人赞誉。然而他的在这里的成就也是属于文字的。现代中国作家所遭遇的困难主要是表达方式的选择。旧的文体是废弃了，但是它的词藻却逃了过来压在新的作品之上。穆旦的胜利却在他对于古代经典的彻底的无知。甚至于他的奇幻也是新式的。那些不灵活的中国字在他的手里给揉着，操纵着，它们给暴露在新的严厉和新的气候之前。他有很多人家所想不到的排列和组合。他还大胆使用了白话俗语。在《五月》这类的诗里，他故意将新的和旧的风格相比，来表示“一切都在脱节之中”，而结果是，有一种猝

然，一种剃刀片似的锋利：

负心儿郎多情女
荷花池旁订誓盟
而今独自依栏想
落花飞絮满天空
而五月的黄昏是那样的朦朦，
在火炬的行列叫喊过去以后，
谁也不会看见的
被恭维的街道就把他们倾出，
在报上登过救济民生的谈话后，
谁也不会看见的
愚蠢的人们就扑进泥沼里，
而谋害者，凯歌着五月的自由，
紧握一切无形电力的总枢纽。

穆旦之得着一个文字，正由于他弃绝了一个文字。他的风格完全适合他的敏感。

穆旦对于中国新写作的最大贡献还是在他的创造了一个上帝。他自然并不为任何普通的宗教或教会而打神学的仗，但诗人的皮肉和精神有着那样的一种饥饿，以至喊叫着要求一点人身以外的东西来支持和安慰。大多数中国作家的空洞他看了不满意，他们并非无神主义者，他们什么也不相信。而在这一点上，他们又是完全传统的。在中国式极为平衡的心的气候里，宗教诗从来没有发达过。我们的诗里缺乏大的精神上的起伏，这也可以用前面提到过的“冷漠”解释。但是穆旦，以他孩子似的好奇，他的在灵魂深处的窥探，至少是明白冲突和怀疑的：

虽然生活是疲惫的，我必须追求，
虽然观念的丛林缠绕我，
善恶的光亮在我的心里明灭。

以及一个比较直接的决心：

看见到处的繁华原来是地狱，
不能够挣脱，爱情将变做仇恨，
是在自己的废墟上，以卑贱的泥土，
他们匍匐着竖起了异教的神。

以及“辨识”的问题，在《我》这首诗里用了那样艰难的、痛苦的韵律所表示的：

从子宫割裂，失去了温暖，
是残缺的部分渴望着救援，

永远是自己，锁在荒野里，

从静止的梦离开了群体，
痛感到时流，没有什么抓住，
不断的回忆带不回自己，

遇见部分时在一起哭喊，
是初恋的狂喜，想冲出樊篱，
伸出双手来抱住了自己

幻化的形象，是更深的绝望，
永远是自己，锁在荒野里，
仇恨着母亲给分出了梦境。

这是一首奇异的诗，使很多人迷惑了。里面所牵涉到的有性，母亲的“母题”，爱上一个女郎，自己的一“部分”，而她是像母亲的。使我想起的还有柏拉图的对话，在1936年穆旦与我同时在北平城外一个校园里读的。附带的，我想请读者注意诗里“子宫”二字，在英文诗里虽然常见，中文诗里却不大有用过。在一个诗人探问着子宫的秘密的时候，他实在是问着事物的黑暗的神秘。性同宗教在血统上是相联的。

就眼前说，我们必须抗议穆旦的宗教是消极的。他懂得受难，却不知至善之乐。不过这可能是因为他今年还只二十六岁^[5]。他的心还在探索着。这种流动，就中国的新写作而言，也许比完全的虔诚要更有用些。他最后所达到的上帝也可能不是上帝，而是魔鬼本身。这种努力是值得赞赏的，而这种艺术的进展——去爬灵魂的禁人上去的山峰，一件在中国几乎完全是新的事——值得我们注意。

VII THE POET AS TRANSLATOR₁

Verse translation is thriving in China today. A publishing house in Hunan has launched a whole series of foreign poetical works in Chinese translation₂ ranging from Sanskrit Vedas to Japanese *haiku* and is, from all reports, doing brisk business on them. The literary journals, too, are giving generous space to poetry from abroad. A rough check of some of the Beijing-based magazines published in the last six months or so finds the following names among the poets translated: Margaret Atwood, Baudelaire, Robert Bly, Burns, Giosuè Carducci, T. S. Eliot, Kenneth Koch, Robert Frost, Hugh MacDiarmid, Sorley Maclean, Mallarmé, Yunna Moritz, Edwin Muir, Bulat Okudzhava, Giuseppe Ungaretti, Valéry, Yuri Voronov, William Carlos Williams, etc.

Does a parallel situation exist in any Western country as regards Chinese or Asian poetry? One doesn't know. But in China, verse translation has always been a prominent feature of the new poetry, itself the child of the New Culture Movement of 1919. Many poets have tried their hand at translating. A number have turned out good translations. A few, like Bian Zhilin in connection with Shakespeare, Zha Liangzheng in connection with Byron, have had a second lease of their poetic lives as accomplished translators.

What follows is a study of one of these poet-translators, Dai Wangshu.

1

Dai was a major poet who had won many admirers in the 1930s with his symbolist poems. Recently a volume of his collected verse translations₃ came out to remind us that he had all along been translating other people's poetry even as he was writing his own. Indeed, it is surprising to find this volume a good deal thicker than the rather slim collected edition of his own poems, being 340 and 165

pages respectively. Particularly important work was done around 1940, when he translated Baudelaire and García Lorca.

The twenty-four items from *Les Fleurs du Mal* which he translated included such well-known pieces as "l'Albatros" "Correspondences" "l'Homme et la Mer" "Harmonie du Soir" "l'Invitation au Voyage" "Chant d'Automne", etc. Baudelaire had never been translated adequately into Chinese; but Dai managed to capture his quintessence in passage after passage of a rare felicity:

A travers ma ruine allez donc sans remords,
Et dites-moi s'il est encor quelque torture
Pour ce vieux corps sans ame et mort parmi les morts!

—Le Mort Joyeux

请毫不懊悔地穿过我臭皮囊，
向我说，对于这没灵魂的陈尸，
死在死者间，还有甚酷刑难当！

——《快乐的死者》

Le Poète est semblable au prince de nuées
Qui hante la tempête et se rit de l'archer;
Exilé sur le sol au milieu des huées,
Ses ailes de géant l'empêchent de marcher.

—L'Albatros

诗人恰似天云之间的王君，
它出入风波间又笑傲弓弩手；
一旦堕落在尘世，笑骂尽由人，
它巨人般的翼翅妨碍它行走。

——《信天翁》

Il me semble, bercé par ce choc monotone,
Qu'on cloue en grande hate un cercueil quelque part.
Pour qui?—C'était hier l'été; voici l'automne!
Ce bruit mystérieux sonne comme un départ.

—Chant d'Automne

为这单调的震撼所摇，我好象
什么地方有人匆忙把棺材钉……
给谁？——昨天是夏；今天秋已临降！
这神秘的声响好象催促登程。

He learned to deal with Baudelaire's abstractions and personifications, always a problem to translators:

—Et de long corbillards, sans tambours ni musique,
Défilent lentement dans mon ame; l'Espoir,
Vaincu, pleure, et l'Angoisse atroce, despotique,
Sur mon crâne incliné plante son drapeau noir.

—Spleen (LXXVIII)

——而长列的棺材，无鼓也无音乐，
慢慢地在我灵魂中游行；“希望”
屈服了，哭着，残酷专制的“苦恼”
把它的黑旗插在我垂头之上。

——《烦闷（二）》

He could be terse and sharp as the original:

Race d'Abel, dors, bois et mange;
Dieu te sourit complaisamment.

Race de Caïn, dans la fange
Rampe et meurs misérablement.

.....

Race d'Abel, vois tes semailles
Et ton bétail venir à bien;

Race de Caïn, tes entrailles
Hurlent la faim comme un vieux chien.

.....

—Abel et Caïn

亚伯的种，你吃，喝，睡；
上帝向你微笑亲切。

该隐的种，在污泥水
爬着，又可怜地绝灭。

.....

亚伯的种，你的播秧
和牲畜，瞧，都有丰收；
该隐的种，你的五脏

在号饥，象一只老狗

.....

——《亚伯和该隐》

He could also be warm and erotic, with Baudelaire's own sublime hankerings:

Quand, les deux yeux fermés, en un soir chaud d'automne,
Je respire l'odeur de ton sein chaleureux,
Je vois se dérouler des rivages heureux
Qu'éblouissent les feux d'un soleil monotone;

—Parfum Exotique

秋天暖和的晚间，当我闭了眼
呼吸着你炙热的胸膛的香味，
我就看见展开了幸福的海湄，
炫照着一片单调太阳的火焰；

——《异国的芬芳》

He conformed religiously to Baudelaire's verse forms, rhyme schemes, structural shifts, all the startling images:

Car je serai plongé dans cette volupté
D'évoquer le Printemps avec ma volonté,
De tirer un soleil de mon coeur, et de faire
De mes pensers brûlants une tiède atmosphère.

—Paysage

因为我将要沉湎于逸乐狂欢，
可以随心任意地召唤回春天。
可以从我心头取出一片太阳，
又造成温雾，用我炙热的思想。

——《风景》

The superiority of Dai's rendering will be seen more clearly when compared with two other Chinese versions of the same passage:

1. 心田种火生红日，
思路涵春起暖烟。
窗外喧嚣关底事？
低头澄念写诗笺。⁴

Thus Wang Liaoyi's, which bears little resemblance to the original, quite apart from the translator's deliberate choice of the metre and

diction of classical Chinese verse as the fit medium to present this precursor of European modernism in.

2. 这欢乐会使我沉醉、入迷，
随意啜饮着春风，多么欢愉，
它将使我的心头升起来一个太阳，
用我燃烧的思想制造暖热的空气。 5

Thus Chen Jingyong's, which is the newest version so far, being published only in the summer of 1984. The translator is a poetess of no mean stature and yet here she is wordy and woolly where the original is hard and clear. Neither Wang nor Chen translates the crucial image

De tirer un soleil de mon coeur

which is kept in Dai's

可以从我心头取出一片太阳

just as he keeps the original rhyme scheme—the only one to do so in the three versions compared.

Above all, Dai reproduced wholes as wholes. Indeed, there is hardly a single one of these twenty-four poems that doesn't come over as a unified whole, with its mood and atmosphere intact. One more example must suffice:

Chant d'Automne

II

J'aime de vos longs yeux la lumière verdâtre,
Douce beauté, mais tout aujourd'hui m'est amer,
Et rien, ni votre amour, ni le boudoir, ni l'âtre,
Ne me vaut le soleil rayonnant sur la mer.
Et rien, ni votre amour, ni le boudoir, ni l'âtre,
Ne me vaut le soleil rayonnant sur la mer.
Et pourtant aimez-moi, tendre coeur! soyez mère,
Même pour un ingrat, même pour un méchant;
Amante ou soeur, soyez la douceur éphémère
D'un glorieux automne ou d'un soleil couchant.
Courte tache! La tombe attend; elle est avide!
Ah, laissez-moi, mon front posé sur vos genoux,
Goûter, en regrettant l'été blanc et torride,

秋歌

二

我爱你长睛碧辉，温柔的美人，
可是我今朝觉得事事尽堪伤，
你的爱情和妆室，和炉火温存，
看来都不及海上辉煌的太阳。
然而爱我，温柔的心！做个慈母，
纵然是对刁儿，纵然是对逆子；
恋人或妹妹，请你做光耀的秋
或残阳的温柔，由它短暂如此。
短工作！坟墓在等；它贪心无厌！
啊，容我把我的头靠在你膝上，
怅惜着那酷热的白色的夏天，
去尝味那残秋的温柔的黄光。

Superb! As evocative, as full of autumn sunshine, and as suggestive of approaching decay, as the original.

What made Dai succeed where the others failed?

There were many reasons. Two may be mentioned here.

First, he took Baudelaire seriously and verse translation seriously. Second, he was aware that what mattered most in verse translation was how the translator solved the problem of poetic language.

These are his own words:

I should like to make two points as regards the significance of translating Baudelaire.

First, this is an experiment—to see how much of Baudelaire's qualities and his exquisite, pure forms can be kept when he is transformed into Chinese. Second—which follows from the first—to let the readers of our country see something actually written by a modern, rather special poet whom they have heard about so much but read so little.

To let Baudelaire appear in his true light, the translator expended great, perhaps futile, efforts. The differences between the two language systems and between the two ways of thinking often made it extremely difficult to try to reproduce the original qualities and forms—more so in the case of Baudelaire than that of any other foreign poet. Still, an experiment, once launched, is not deterred by thoughts of failure. The translator has no regrets if he has done his

He went on to deal with the technical details—how he rendered the alexandrin, décasyllabe and octosyllabe in 12-, 10-, and 8-character lines and kept all the rimes suivies, rimes croisées and rimes embrassées—"a stupid thing to do, no doubt, even ridiculous," he admitted, insisting however that Baudelaire was worth all the trouble, because he was "a modern classic".

By contrast, Wang Liaoyi, one of the two other translators just cited, sounded casual:

频年格物叹偏枯，
偶译佳诗只自娱。
不在文辞呆刻画，
要将神态活描摹。 7

(To relieve tedium of studious years,
Rendering fine verse only to please self,
Aiming not at stiff word-for-word translation,
I strive to catch the live expression.)

But the "live expression" cannot be caught with the over-familiar rhythm and worn-out phraseology of classical Chinese poetry chosen by Wang; indeed, Baudelaire himself had dismissed all attempts at classical revival as "pastiche inutile et dégoûtant" and stressed the special quality of his own poetry thus:

Toute notre originalité vient de l'estampille
que le temps imprime à nos sensations. 8

This was a point grasped by Dai, who moreover saw, with a poet's rapport with another poet, that the special fascination of Baudelaire lay in a curious combination of two seemingly opposing qualities, classicism and modernism. He was a classicist in his delicacy, fastidiousness and sense of form; he was a modernist in his tireless search for new rhythms, new images, new confrontations and juxtapositions, indeed in a whole new way of writing that would give full expression to the new sensibility. Dai felt a special kinship with Baudelaire because he himself was that kind of poet, at once a

classicist and a modernist. Translation was an affirmation and a continuation of what he had all along been doing in his own poetry. Hence the happy results.

2

Dai had other triumphs.

The Russian poet Sergei Yesenin, for instance, comes out surprisingly well in Dai's rendering:

Если голоден ты—будешь сытым.
Коль несчастен—то весел и рад.
Только лишь не гляди открыто,
Мой земной неизвестный брат.
Как подумал я—так и сделал,
Но увы! Всё одно и то ж!
Видно, слишком привыкло тело
Ощущать эту стужу и дрожь.
Ну, да что же? Ведь много прочих,
Не один я в миру живой!
А фонарь то мигет, то захохочет
безгубой своей головой.
Только сердце под ветхой одеждой
шепчет мне, посетившему твердь:
"друг мой, друг мой, прозревшие вежды
Закрывает одна лишь смерть"

如果你饥饿

如果你饥饿，你会饱的，
不幸的人，你会愉快而满意；
可是不要望着那张开的眼睛
我世上的陌生的弟兄啊。

我做了我所想过的事。
可是啊，那总是一般无二；
我的躯体无疑是太习惯于
感到寒冷，太习惯于战栗。

没有关系，别的人多着呢……
我不是世上唯一的活人；
那生着没有嘴唇的老头的街灯，

一会儿眯眼睛，一会儿笑。

唯有在我的旧衣衫下面的心
对升到苍穹上去的我低语：
“我的朋友，那张开的眼睛，
只有死亡能合上它们！”

One is astounded on coming to such a stanza:

Догорит золотистым пламенем
Из телесного воска свеча,
И луны часы деревянные
Прохрипят мой двенадцатый час.
.....

—Я последний поэт деревни

脂蜡的大蜡烛
将发着金焰烧尽，
而月的木钟，
将喘出了我的十二时。

——《最后的弥撒》

which should please all modernists!

There are also renderings of Pushkin, Blake, Ernest Dowson ("In Tem Pore Senectutis", etc.), in varying degrees of accuracy, but all readable. It is not clear where Dai learnt his Russian, probably he had consulted other translations. The languages he was most at home in were French and, perhaps to a less degree, Spanish. Certainly the bulk of his translations were from these two languages.

In addition to Baudelaire, Dai had translated a host of other French poets. Some famous names are only represented by single poems: Hugo (1 poem), Valéry (1), Apollinaire (1). But the symbolists and post-symbolists appear in impressive quantity: Remy de Gourmont (11), Paul Fort (6), Francis Jammes (7), Pierre Reverdy (5), Jules Supervielle (8) and Paul Eluard (14).

He made various experiments with poetic language. He translated the musical Verlaine with versions equally musical:

Le ciel est, par-dessus le toit,
Si bleu, si calme!

Un arbre, par-dessus le toit,
Berce sa palme.

—Le Ciel Est, Par-Dessus le Toit

瓦上长天
柔复青！
瓦上高树
摇娉婷。

——《瓦上长天》

O bruit doux de la pluie
Par terre et sur les toits!
Pour un coeur qui s'ennuie
Oh! le chant de la pluie!

—Ariette

霏霏窗外雨；
滴滴淋街宇；
似为我忧心，
低吟凄楚声。

——《泪珠飘落萦心曲》

However, the diction and the phrases are a trifle too refined, and the metrical arrangement too much like classical Chinese poetry, so that they verge on preciousness. In fact, they are in Dai's own earliest poetic manner, which may be exemplified by the following:

来到此地泪盈盈，
我是飘泊的孤身，
我要与残月同沉。

——《流浪人的夜歌》

There is the same kind of diction and metrical arrangement, there is the same mood, saved from sentimentality only by the poet's sincerity. (The last line, which may be rendered as "I want to sink with the wan moon", reminds one of what another poet wrote:

The wan moon sets behind the white wave,
And time is setting with me, O:

which is from Burns's poem, "Open the Door to Me, O". There are of course great differences between the tightly controlled Chinese verse

and a more open Scots folk song. Still, both are wonderful poetry and use the same image.)

When Dai came to Remy de Gourmont and other post-symbolists, he had acquired a new manner, more colloquial and more relaxed, which comes out in his translations as well:

Tu auras l'odeur des pommes
Sur ta robe et sur tes mains,
Et tes cheveux seront pleins
Du parfum doux de l'automne
Les pommiers sont pleins de pommes
Allons au verger, Simone,
Allons au verger.

—Remy de Gourmont: Le Verger

你将有林檎的香味
在你的衫子上和你的手上，
而你的头发将充满了
秋天的温柔的芬芳。
林檎树上都已结满了林檎，
到果树园去吧，西莱纳，
到果树园去吧。

——果尔蒙：《果树园》

Read this side by side with Dai's own lines:

——给我吧，姑娘，那朵簪在发上的
小小的青色的花，
它是会使我想起你的温柔来的。
.....
——给我吧，姑娘，你的像花一样燃着的，
象红宝石一般晶耀着的嘴唇，
它会给我蜜的味，酒的味。

——不，它只有青色的橄榄的味，
和未熟的苹果的味，
而且是不给说谎的孩子的

.....

——戴望舒：《路上的小语》

and one can see that there was a parallel development as regards style

and poetic language, in addition to affinity in mood.

How much affinity was there between Dai and Eluard, fourteen of whose poems he had translated? Well, they had both experienced a transformation—from being avant-garde in artistic sensibility to being avant-garde in the anti-fascist fight. Certainly at the time, both were confronted with a similar situation—war and enemy occupation. Whatever the reason, Eluard inspired Dai to reach a new height in translation. Take the very first poem in his collection:

Avis

La nuit qui précéda sa mort
Fut la plus courte de sa vie
L'idée qu'il existait encore
Lui brûlait le sang aux poignets
Le poids de son corps l'écoeurait
Sa force le faisait gémir
C'est tout au fond de cette horreur
Qu'il a commencé à sourire
Il n'avait pas UN camarade
Mais des millions et des millions
Pour le venger il le savait
Et le jour se leva pour lui.

—Au Rendez-Vous Allemand

公告

他的死亡之前的一夜
是他一生中最短的
他还生存着的这观念
使他的血在腕上炙热
他的躯体的重量使他作呕
他的力量使他呻吟
就在这嫌恶的深处
他开始微笑了
他没有“一个”同志
但却有几百万几百万
来替他复仇他知道
于是阳光为他升了起来

All preciousness, all sentimentality, all over-refinement are gone, but there is no undue looseness either. The tone is colloquial, but the structure is compact. Poetic language is used in its essence: bare, clear, resonant, with the sole image emerging at the very end, to round up the poem and also to open triumphantly onto a fresh day:

Et le jour se leva pour lui

于是阳光为他升了起来

Naturally all that is in the original, but much would have been lost if the translator had not got the sensibility or the poetic language to reproduce it.

3

In translating García Lorca, Dai tackled a new problem—how to bring out his folk element. Lorca must have appealed to Dai in all sorts of ways—he had colour, music, verve, a very pleasing sense of form and the contemporary European sensibility both artistic and political, but these were all fused together by his love of the old ballads. His stanzas are usually short, as in the ballads. His diction is simple and striking, as in the ballads. His repetitious key phrases, his catching melodies, his dramatic effects, all come from his roots in the Andalusian ballad tradition. But Dai seems never to have written that kind of poetry. He had been nurtured on a different poetic tradition, which had by his time become over-literary, cliché-ridden, burdened with a thousand years of allusiveness.

Linguistic problems were also formidable. Dai's friend Shi Zhecun has remarked on his inability to bring out the full musicality of some of Lorca's lines. Thus the line from the "Romance de la Guardia Civil Española"

en la noche platinoche,

noche que noche nochera

is rendered by Dai as

在这白金的夜里，

黑夜遂被夜色染黑。

which strikes Shi as "very clumsy".⁹

Yet all this did not prevent Dai from turning out beautiful
versions such as:

Arbolé arbolé
seco y verdé.

树呀树，
枯又绿。

La niña del bello rostro
está cogiendo aceituna.
El viento, galán de torres
la prende por la cintura.

脸儿美丽的小姑娘
正在那里摘青果，
风，高楼上的浪子，
来把她的腰肢抱住。

Pasaron cuatro jinetes,
sobre jacas andaluzas,
con trajes de azul y verde,
con largas capas de oscura.
"Vente a Córdoba, muchacha"
La niña no los escucha.

走过了四位骑士，
跨着安达路西亚的小马，
披着黑色的长大氅，
穿着青绿色的短褂。
“到哥尔多巴来呀，小姑娘。”
小姑娘不听他。

Pasaron tres torerillos
delgaditos de cintura,
con trajes color naranja
y espadas de plata antigua.
"Vente a Sevilla, muchacha"
La niña no los escucha.

走过了三个青年斗牛师，
腰肢细小够文雅，
佩着镶银的古剑，
穿着橙色的短褂。
“到塞维拉来呀，小姑娘。”
小姑娘不理他。

Cuando la tarde se puso
morada, con luz difusa,
pasó un joven que llevaba
rosas y mirtos de luna.
"Vente a Granada, muchacha"
y la niña no lo escucha.

暮霭转成深紫色，
残阳渐暗渐西斜，
走过了一个少郎，
带来了月亮似的桃金娘和玫瑰花。
“到格拉那达来呀，小姑娘。”
小姑娘不睬他。

La niña del bello rostro
sigue cogiendo aceituna,
con el brazo gris del viento
ceñido por la cintura

Arbolé arbolé
seco y verde.

脸儿美丽的小姑娘，
还在那里摘青果，
给风的灰色的胳膊，
把她的腰肢缠住。

树呀树，
枯又绿。

The beauty, of course, must first be ascribed to Lorca, whose use of the folk tradition and the ballad form is seen here at its quintessential best. At the same time, one marvels at the translator's ability in bringing the poem across, with its gaiety, its colour and verve, all intact. The refrain

树呀树，
枯又绿。

is simple and very terse, consisting of only three characters—three sounds—in each line; colloquial without being loquacious, familiar without being cheap, concrete, transparent, opening onto fresh pastures—just the kind of poetic language every sensitive poet has been looking for, over and above all the diversities of style, period and nationality.

The story—for as in nearly all ballads, there is a story—is told with parallel structures and subtle variations, again a Lorca forte, here matched by the translator's artistry—notice the neatness of the rendering and the gradation in his use of verbs in the parallel lines:

小姑娘不听他。
小姑娘不理他。
小姑娘不睬他。
来把她的腰肢抱住。
把她的腰肢缠住。

There is thus a cumulative dramatic force fully in accord with the original.

How was Dai able to achieve all this?

Naturally his own poetic sensibility and experience accounted for much of the success. But curiously enough, one also finds his earlier poetic education, his steeping in classical Chinese poetry, playing a hand here. Phrases like "高楼上的浪子" "腰肢" "佩着镶银的古剑" "少郎", etc. savor of the atmosphere of some old Chinese songs, reminding one of snatches like:

青青河畔草，郁郁园中柳，
盈盈楼上女，皎皎当窗牖。……

何用识夫婿？白马从骊驹。
青丝系马尾，黄金络马头。
腰中鹿卢剑，可值千万余。……

——陌上桑

Echoes of this kind add to the resonance of the Chinese version, evoking a richer, more romantic mood.

Such loveliness, however, never lasts, in China or in Spain. Lorca's idyllic world was soon intruded by a force that combined old cruelty with new ruthlessness:

Sobre el rostro del aljibe
se mecía la gitana.
Verde came, pelo verde,
con ojos de fría plata.

那吉卜赛姑娘
在水池上摇曳着
绿的肌肉，绿的头发，
还有银子般沁凉的眼睛。

Un carámbano de luna
la sostiene sobre el agua.
La noche se puso íntima
como una pequeña plaza.
Guardias civiles borrachos
en la puerta golpeaban.

——Romance Sonámbulo

一片冰雪似的月光
把她扶住在水上。
夜色亲密得
象一个小小的广场。
喝醉了的宪警
正在打门。

——《梦游人谣》

Notice the shift from the green flesh, the green hair, the eyes of cold silver and that icicle of a moon—all images of purity and beauty

—to something urban and promiscuous—"The night became as intimate as a little square"—and then the end comes with a bang: "Drunken civil guards were knocking at the door!" The sequence is crucial, and the imagery all important. The translator reproduces all these. Indeed, he packs more dramatic force into the last line by making it extra short—only four characters as against the usual seven or eight.

His handling of the "Romance de la Guardia Civil española" is equally effective:

Los caballos negros son.
Las herraduras son negras.
Sobre las capas relucen
manchas de tinta y de cera.
Tienen, por eso no lloran,
de plomo las calaveras.
Con el alma de charol
vienen por la carretera.
Jorobados y nocturnos,
por donde animan ordenan
silencios de goma oscura
y miedos de fina arena.
Pasan, si quieren pasar,
y ocultan en la cabeza
una vaga astronomía
de pistolas inconcretas.

黑的是马。
马蹄铁也是黑的，
他们大氅上闪亮着
墨水和蜡的斑渍。
他们的脑袋是铅的
所以他们没有眼泪。
带着漆皮似的灵魂
他们一路骑马前来。
驼着背，黑夜似的，
到一处便带来了
黑橡胶似的寂静

和细沙似的恐怖。
他们随心所欲的走过，
头脑里藏着
一管无形手枪的
不测风云。

One notices in the poem a montage-like technique, as well as a different kind of poetic language, marked by a more conversational tone and a number of surrealist metaphors. The folk element is still there, in the descriptions of gipsy life—flags, festoons and so on—but the modernist sensibility informs all. It is a sensibility as much political as artistic, for the poet was concerned with combating fascism, then rearing its head in Western Europe. Dai, who also hated fascism, turned out a version that caught the spirit of the original and he did this by overcoming a special difficulty, namely, reproducing the startling images without recourse to a private language acceptable only to a few. Thus expressions like 漆布似的灵魂, 黑橡胶似的寂静, 细沙似的恐怖 are at once surrealist and intelligible, while the phrase 一管无形手枪的不测风云 combines the very real "pistol" with the elusive but wide-ranging "fateful astronomical changes": a good example of poetic telescoping with all the dramatic force of the original.

When he came to the "Llanto por Ignacio Sánchez Mejias", another memorable poem of Lorca's, Dai did something more than reproducing the original effects: he presented to his Chinese readers a new poetic form and a new hero.

For although Chinese poetry was full of short poems that mourn the death of loved ones and friends, there had been no elegies of some length, nothing to compare with *Lycidas*, *Adonis*, *In Memoriam*, or even "In Memory of W. B. Yeats". These latter had come from a European tradition. What added to the novelty of Lorca's elegy, in Chinese eyes, was that it was devoted to a bullfighter.

Once again the translator rose to the occasion. He reproduced Lorca's praise of the toreador with an equal combination of exultation

and sorrow:

No hubo príncipe en Sevilla
que comparársele pueda,
ni espada como su espada
ni corazón tan de veras.
Como un río de leones
su maravillosa fuerza,
y como un torso de mármol
su dibujada prudencia.
Aire de Roma andaluza
le doraba la cabeza
donde su risa era un nardo
de sal y de inteligencia.
¡Qué gran torero en la plaza!
¡Qué buen serrano en la sierra!
¡Qué blando con las espigas!
¡Qué duro con las espuelas!
¡Qué tierno con el rocío!
¡Qué deslumbrante en la feria!
¡Qué tremendo con las últimas
banderillas de tiniebla!

塞维拉没有一位王爷
能比得上他，
也没有一柄剑比得上他的，
也没有他那样一颗热心。
他的惊人的膂力
象一条狮子的洪流，
他的细致如画的机敏
象一尊大理石的胴体雕像。

安达路西亚式的罗马的风
给他头上镀了金，
这个头颅的微笑，
是一枝智慧的玉簪花。
在场上他是个多伟大的斗牛师！
在山上他是个多卓越的爬山家！
他对麦穗多么温和！
对马距又多么刚强！

在露水里多么娇嫩！
在节日里又多么光辉！
对黑暗的最后一支短矛
又显得多么惊人！

There is but one false note, the rendering of *serrano* as 爬山家 (mountaineering expert), an example of Dai's occasional overreaching himself for effect.

He was all sensibility again in coping with the unusual third section, "Cuerpo Presente" ("The Laid Out Body"), Lorca's reflections on life and death, sober, probing, metaphysical:

con una forma clara que tuvo ruiseñores
y la vemos llenarse de agujeros sin fondo.

一个曾经和夜莺做伴的光明的肉体，
现在我们看它充满了无底的创伤。

All the astounding metaphors are kept:

Yo quiero ver aquí los hombres de voz dura.
Los que doman caballos y rominan los ríos:
los hombres que les suena el esqueleto y cantan
con una boca llena de sol y pedernales.

我要在这里看见声音刚强的人，
那些能够降服野马和大江的人，
那些躯干响亮的人，和那些
用一张充满了太阳和燧石的嘴唱歌的人。

Some of these metaphors had never before been seen in Chinese poetry, yet Dai not only made them stand out, as rightly they should, but also phrased them in such a way that they did not sound unduly exotic in a Chinese text. They would impress, indeed astound, but not repel an ordinary Chinese reader.

This showed Dai's own accomplishment in poetic language. But other factors were also at work. The flexibility of the Chinese language was one. However, had it not gone through a literary revolution, a shift from the classical *wenyan* to the spoken idiom, the *baihua*, as a literary medium, it would not have become so accommodating to

foreign metaphors, particularly of a complicated kind, like:

los hombres que les suena el esqueleto y cantan
con una boca llena de sol y pedernales.

那些躯干响朗的人，和那些
用一张充满了太阳和燧石的嘴唱歌的人。

or, like the earlier example:

una vaga astronomía
de pistolas inconcretas.

一管无形手枪的
不测风云。

As it happened, persistent experiments made by Dai himself and earlier poets in new ways of writing, modelled mostly on European masters, had so familiarized Chinese lovers of poetry with strange collocations and startling images that they were ready for almost anything.

But how did Lorca appeal to Chinese readership in general? Did he make much of an impact? Hardly. In spite of the efforts made by Dai and other translators, Lorca remained an honoured name, but not much read outside a small circle of left-wing poets. One explanation lies in the circumstances of the day. Dai's translations of Lorca came out at a time when both Spain and China were busy with a war that had been inflicted on them by powerful foreign states allied with traitorous elements within. The problem of survival was so acute that no one was in a mood to pay much attention to artistic innovations.

What remains is the question: how did the translation of Lorca affect Dai's own work? We have seen that, in connection with other European poets translated, there was often a parallel development in the translator's own poetry. But one finds few verbal echoes of Lorca in Dai's work of this period or any time afterwards.

Still, no major literary effort would go for nothing. Perhaps the response was more subtle and the effect more pervasive than people at first thought. Certainly in the late nineteen thirties, after translating

Lorca and other anti-fascist poets of Spain, Dai began to write a less self-centred, more public-oriented poetry expressing his hatred of the Japanese aggressor. As lyrical as ever, he acquired a new power, even a hard-hitting militancy, in lines like:

元旦祝福

新的年岁带给我们新的希望。
祝福！我们的土地，
血染的土地，焦裂的土地，
更坚强的生命将从而滋长。

新的年岁带给我们新的力量。
祝福！我们的人民，
坚苦的人民，英勇的人民，
苦难会带来自由解放。

一九三九年元旦日。

(The new year brings us new hope.
Greetings! Our earth,
Blood-stained earth, cracked earth,
Tougher life will come out of it.

The new year brings us new strength.
Greetings! Our people,
Hardy people, heroic people,
From suffering will come your freedom and liberation.

—New Year Greetings, 1939)

This was certainly a far cry from the days when he wrote like Baudelaire:

心头的春花已不更开，
幽黑的烦忧已到欢乐之梦中来。

我的唇已枯，我的眼已枯，
我呼吸着火焰，我听见幽灵低诉。

去吧，欺人的美梦，欺人的幻象，
天上的花枝，世人安能痴想！……

(No flower blooms again in my heart.
Grey ennui invades my sweet dreams.

My lips parched, my eyes dry,
I breathe fumes and hear ghosts whisper.

Go! deceitful dreams, deceitful fantasies!
How dare earthly beings reach for heavenly flowers!

—Ennui)

While it would be going too far to say that Dai owed all this transformation to Lorca alone, would it be entirely fanciful to claim that the Spanish poet had a hand in turning his attention to new themes as well as in shaping his new poetic style?

4

Having come to the end of this lengthy study, and in the light of not just Dai Wangshu's performance alone, one may perhaps risk a few general observations.

The first obvious thing to be said is: it takes a poet to translate poetry.

Second, translation of poetry does good to both the original poet and the translator. The former wins readers in new territory. The latter opens himself up to new influences, even as he is subjected to new rigours.

It takes all a translator has got to turn out a good verse translation. He needs the right kind of sensibility and the right kind of poetic language. But translation is also a good school to cultivate the requisite sensibility and fashion the needed language, which in turn will affect the translator's own writing.

The case of Dai is also illuminating in that it shows under what conditions the best results are achieved in verse translation. Other than the translator's own poetic gift, the language he uses must be fluid enough to take on any change and virile enough to withstand

any rough handling. The Chinese language was in a particularly open state when Dai started to translate; there had just occurred a literary revolution of the first magnitude. No revolution, however, could have wiped out at a stroke the classical heritage of a country like China, and that too helped matters. Early steeping in the classics kept alive in the translator some of the old virtues such as good sense, a feeling for form, an emphasis on quality, which prevented his translations from becoming too raw, too rough, too lacking in depth and resonance so as to repel readers who would otherwise be well disposed to what's new in art and literature. Thus tradition and innovation meet in a good translation.

In a deeper sense, translation benefits the very fabric of any national literature, indeed, any culture. It does something more than opening new windows; it helps rejuvenate a culture, in a way that touches the very inner being of it, by giving its language a shakeup and a sharpening so that it becomes sensitive and alive again. Any culture would be immeasurably impoverished if it were to be stripped of the translations, particularly those of the poetical works, from a different culture. Indeed, the whole world would become shabbier without the splendid translations of literary works from all nationalities.

Hence no translator of verse need lose heart. In the teeth of all the talk by all the sensible and knowledgeable people, from Goethe downwards, that poetry cannot be translated, Dai Wangshu showed, quietly and without fanfare, that it can be done. To this day people regret that he died just when, after his successes in translation, he seemed to be poised for a new poetic leap. Fate denied him this, but not before he had communicated the best of contemporary European poetry to a small but grateful Chinese readership. He had certainly written some of his best poetry in his translations; in fact, his translations are an extension of his own poetry. Just as Arthur Waley's translations of Chinese Tang poetry have become classics of twentieth-century English verse, so will Dai Wangshu's translations of Verlaine,

Baudelaire, Eluard, Francis Jammes, Rafael Alberti, Pedro Salinas, Gerardo Diego and García Lorca rank among the glories of modern Chinese literature.

柒 译诗与写诗^[1]

诗歌翻译在今天的中国很兴盛。湖南一家出版社已经组织起了外国诗歌的汉译工作，从梵文的吠陀经到日本的和歌都有涉及，据各方消息，市场形势还不错。文学期刊也大篇幅介绍外国诗歌。以北京的期刊为例，过去六个多月中文译的外国诗人有玛格丽特·阿特伍德、波德莱尔、罗伯特·勃莱、彭斯、乔祖埃·卡尔杜齐、艾略特、肯尼思·科克、罗伯特·弗罗斯特、麦克迪尔米德、索利·麦克林、马拉美、云娜·莫里茨、埃德温·缪尔、布拉特·奥库扎瓦、朱塞培·翁加雷蒂、瓦雷里、尤里·沃洛诺夫、威廉·卡洛斯·威廉斯等。

西方国家也如此大量地译介中国或其他亚洲国家的诗人吗？谁也不知道。但是在中国，诗歌翻译一直是新诗的重要组成部分，新诗本身就是1919年新文化运动的产物。很多中国诗人也译诗，不少人有翻译佳作呈现。有些人更是通过杰出的诗歌翻译获得了第二次诗歌生命，如卞之琳译莎士比亚，查良铮译拜伦。

接下来将探讨其中的一位诗人兼译者，戴望舒。

（一）

戴望舒是个重要诗人，在20世纪30年代以象征主义诗歌赢得众多仰慕者。最近出版了他的一部译诗集，让我们知道他在写诗的同时，也在翻译别人的诗。实际上，他的诗集只有165页，但这本译诗集却有340页之厚，着实让人吃惊。他的译诗以1940年前后为重中之笔，此间他翻译了波德莱尔和加西亚·洛尔迦。

他译了《恶之花》中的二十四首，其中包括一些著名诗篇：《信天翁》《应和》《人和海》《黄昏的和谐》《邀旅》《秋歌》等。波德莱尔诗作的汉译情况从来就不理想，但戴望舒深得波德莱尔的精髓，将一篇篇译得出神入化：

A travers ma ruine allez donc sans remords,
Et dites-moi s'il est encor quelque torture
Pour ce vieux corps sans ame et mort parmi les morts!

—Le Mort Joyeux

请毫不懊悔地穿过我臭皮囊，

向我说，对于这没灵魂的陈尸，
死在死者间，还有甚酷刑难当！

——《快乐的死者》

Le Poète est semblable au prince de nuées
Qui hante la tempête et se rit de l'archer;
Exilé sur le sol au milieu des huées,
Ses ailes de géant l'empêchent de marcher.

—L'Albatros

诗人恰似天云之间的王君，
它出入风波间又笑傲弓弩手；
一旦堕落在尘世，笑骂尽由人，
它巨人般的翼翅妨碍它行走。

——《信天翁》

Il me semble, bercé par ce choc monotone,
Qu'on cloue en grande hate un cercueil quelque part.
Pour qui?—C'était hier l'été; voici l'automne!
Ce bruit mystérieux sonne comme un départ.

—Chant d'Automne

为这单调的震撼所摇，我好象
什么地方有人匆忙把棺材钉……
给谁？——昨天是夏；今天秋已临降！
这神秘的声响好象催促登程。

——《秋歌》

波德莱尔的抽象和拟人手法通常对译者是个挑战，戴望舒却应付自如：

—Et de long corbillards, sans tambours ni musique,
Défilent lentement dans mon ame; l'Espoir,
Vaincu, pleure, et l'Angoisse atroce, despotique,
Sur mon crâne incliné plante son drapeau noir.

—Spleen (LXXVIII)

——而长列的棺材，无鼓也无音乐，
慢慢地在我灵魂中游行；“希望”
屈服了，哭着，残酷专制的“苦恼”
把它的黑旗插在我垂头之上。

——《烦闷（二）》

他可以做到和原诗一样简洁、尖锐：

Race d'Abel, dors, bois et mange;
Dieu te sourit complaisamment.

Race de Caïn, dans la fange
Rampe et meurs misérablement.

.....

Race d'Abel, vois tes semailles
Et ton bétail venir à bien;

Race de Caïn, tes entrailles
Hurlent la faim comme un vieux chien.

.....

—Abel et Caïn

亚伯的种，你吃，喝，睡；
上帝向你微笑亲切。

该隐的种，在污泥水
爬着，又可怜地绝灭。

.....

亚伯的种，你的播秧
和牲畜，瞧，都有丰收；
该隐的种，你的五脏
在号饥，象一只老狗

.....

——《亚伯和该隐》

他亦可以热情而魅惑，保留了波德莱尔本身崇高的渴望：

Quand, les deux yeux fermés, en un soir chaud d'automne,
Je respire l'odeur de ton sein chaleureux,
Je vois se dérouler des rivages heureux
Qu'éblouissent les feux d'un soleil monotone;

—Parfum Exotique

秋天暖和的晚间，当我闭了眼
呼吸着你炙热的胸膛的香味，
我就看见展开了幸福的海湄，
炫照着一片单调太阳的火焰；

他虔心地忠于波德莱尔的诗体、韵律、结构转换以及所有那些新奇的意象：

Car je serai plongé dans cette volupté
D'évoquer le Printemps avec ma volonté,
De tirer un soleil de mon coeur, et de faire
De mes pensers brûlants une tiède atmosphère.

—Paysage

因为我将要沉湎于逸乐狂欢，
可以随心所欲地召唤回春天。
可以从我心头取出一片太阳，
又造成温雾，用我炙热的思想。

——《风景》

与另外两个中译本相比，戴望舒的精彩，一望便知：

1. 心田种火生红日，

思路涵春起暖烟。窗外喧嚣关底事？低头澄念写诗笺。

王了一的译文与原文几无相似之处，尽管译者有意采用中国古典诗词的韵律和语言来译这位欧洲现代主义先驱的诗作。

2. 这欢乐会使我沉醉、入迷，

随意啜饮着春风，多么欢愉，
它将使我的心头升起来一个太阳，
用我燃烧的思想制造暖热的空气。

这是陈敬容的译文，迄今为止最新的版本，1984年夏刚出版。译者也算是名气不小的女诗人了，但坚硬、清朗的原文却被她译得冗长、混沌。

王了一和陈敬容都没有把关键的意象

De tirer un soleil de mon coeur

翻译出来，而戴的译文：

可以从我心头取出一片太阳

不仅保留了原来的意象，还保留了原来的韵律——在上述三种译文中，只有戴做到了。

最重要的是，戴还原了诗歌的整体风貌。实际上，他译的这二十四首中，几乎没有一首不是浑然一体的，原作的情感和意境完好无损。再举一例足矣：

J'aime de vos longs yeux la lumière verdâtre,
 Douce beauté, mais tout aujourd'hui m'est amer,
 Et pourtant aimez-moi, tendre coeur! soyez mère,
 Même pour un ingrat, même pour un méchant;
 Amante ou soeur, soyez la douceur éphémère
 D'un glorieux automne ou d'un soleil couchant.
 Courte tache! La tombe attend; elle est avide!
 Ah, laissez-moi, mon front posé sur vos genoux,
 Goûter, en regrettant l'été blanc et torride,
 De l'arrière-saison le rayon jaune et doux.

秋歌

二

我爱你长睛碧辉，温柔的美人，
 可是我今朝觉得事事尽堪伤，
 你的爱情和妆室，和炉火温存，
 看来都不及海上辉煌的太阳。
 然而爱我，温柔的心！做个慈母，
 纵然是对刁儿，纵然是对逆子；
 恋人或妹妹，请你做光耀的秋
 或残阳的温柔，由它短暂如此。
 短工作！坟墓在等；它贪心无厌！
 啊，容我把我的头靠在你膝上，
 怅惜着那酷热的白色的夏天，
 去尝味那残秋的温柔的黄光。

好极了！与原诗一样令人产生共鸣，眼前满是秋日的残阳，暗示着渐进的萧索。

戴望舒为什么能为他人所不能为？

原因很多。在此谈两点。

第一，他认真钻研波德莱尔，亦认真钻研诗歌翻译。第二，他领会到诗歌翻译最重要的是译者如何处理诗的语言。

下面是他自己的话：

对于我，翻译波特莱尔的意义有这两点：

第一，这是一种试验，来看看波特莱尔的质地和精巧纯粹的形式，在转变成中文的时候，可以保存到怎样的程度。第二点是系附的，那就是顺便让我国的读者们能够看到一点他们听说了长久而见到得很少的，这位特殊的近代诗人的作

品。

为了使波特莱尔的面目显示得更逼真一点，译者曾费了极大的、也许是白费的苦心。两国文字组织的不同和思想方式的歧异，往往使同时显示质地并再现形式的企图变成极端困难，而波特莱尔所给与我们的困难，又比其他外国诗人更难以克服。然而，当作实验便是不顾成败，只要译者曾经努力过，那就是了。

接下来他谈技巧上的细节——他如何把alexandrin, décasyllabe, octosyllabe译作十二言、十言、八言的诗句，又把rimes suivies, rimes croisées, rimes embrassées都照原样押韵的——“也许笨拙到可笑，”他承认，但波德莱尔这样一位“现代经典诗人”值得他呕心沥血。

相形之下，王了一就显得随意了：

频年格物叹偏枯，
偶译佳诗只自娱。
不在文辞呆刻画，
要将神态活描摹。

但是在王了一稀松平常的韵律和用词中实难见“神态活描摹”；事实上，波德莱尔自己对古典的复兴很不以为然，认为那是“无用且令人作呕的模仿”，并指出自己诗歌的特殊性就在于：

几乎所有的与众不同都来自
时间在我们感觉上打下的烙印。

戴望舒牢牢抓住了这一点。因为一个诗人与另一个诗人的契合，他看出了波德莱尔最吸引人的地方在于两种似乎相对抗的品质的结合——古典主义和现代主义的结合。他的古典主义见于他的精致，严格，对形式的关注；他的现代主义见于他对于新的音韵、新的形象、新的拼合和对照方式的不倦的追求，也就是用新的诗歌语言来表达新的敏感的巨大努力。戴望舒对波德莱尔有一种特别的亲近感，因为他自己也是这样的一位诗人，在他身上也有古典主义和现代主义的结合。对于戴，译诗是写诗的一种延长和再证实，因此他取得了非凡的成就。

(二)

戴望舒还有其他出色译文。

比如，俄国诗人叶塞宁，在戴的译笔之下就让人觉得出乎意料般精彩：

Если голоден ты—будешь сытым.
Коль несчастен—то весел и рад.

Только лишь не гляди открыто,
Мой земной неизвестный брат.
Как подумал я—так и сделал,
Но увы! Всё одно и то ж!
Видно, слишком привыкло тело
Ошущать эту стужу и дрожь.
Ну, да что же? Ведь много прочих,
Не один я в миру живой!
А фонарь то мигет, то захохочет
безгубой своей головой.
Только сердце под ветхой одеждой
шепчет мне, посетившему твердь:
"друг мой, друг мой, прозревшие вежды
Закрывает одна лишь смерть"

如果你饥饿

如果你饥饿，你会饱的，
不幸的人，你会愉快而满意；
可是不要望着那张开的眼睛
我世上的陌生的弟兄啊。

我做了我所想过的事。
可是啊，那总是一般无二；
我的躯体无疑是太习惯于
感到寒冷，太习惯于战栗。

没有关系，别的人多着呢……
我不是世上唯一的活人；
那生着没有嘴唇的老头的街灯，
一会儿眯眼睛，一会儿笑。

唯有在我的旧衣衫下面的心
对升到苍穹上去的我低语：
“我的朋友，那张开的眼睛，
只有死亡能合上它们！”

看到这样的诗节你会惊诧：

Догорит золотистым пламенем
Из телесного воска свеча,
И луны часы деревянные

Прохрипят мой двенадцатый час.

.....

—Я последний поэт деревни

脂蜡的大蜡烛
将发着金焰烧尽，
而月的木钟，
将喘出了我的十二时。

——《最后的弥撒》

这样的译文会让所有的现代主义者叹服！

戴还译了普希金、勃莱克、道生（“In Tem Pore Senectutis”等），虽准确程度各异，但都还算上口。戴在哪里学的俄文，不得而知，也许他参考了其他译本。他最拿手的语言是法语，其次是西班牙语。当然，他译得最多的也是这两种语言。

除了波德莱尔，戴还译了其他很多法语诗人。有些著名诗人的诗，他只译了一首：雨果（1首）、瓦雷里（1首）、阿波里奈尔（1首）。但是他译的象征派和后象征派的诗歌数量惊人：果尔蒙（11首）、保尔·福尔（6首）、雅麦（7首）、比也尔·核佛尔第（5首）、苏佩维艾尔（8首）、保罗·艾吕雅（14首）。

他在诗歌语言上也有诸多尝试。比如，他用同样具有乐感的语言翻译乐感十足的魏尔论：

Le ciel est, par-dessus le toit,
Si bleu, si calme!
Un arbre, par-dessus le toit,
Berce sa palme.

—Le Ciel Est, Par-Dessus le Toit

瓦上长天
柔复青！
瓦上高树
摇娉婷。

——《瓦上长天》

O bruit doux de la pluie
Par terre et sur les toits!
Pour un coeur qui s'ennuie
Oh! le chant de la pluie!

霏霏窗外雨；
滴滴淋街宇；
似为我忧心，
低吟凄楚声。

——《泪珠飘落紫心曲》

但是用词过于雕琢，韵律太像中国古诗，以至有矫饰的嫌疑。事实上，戴早期的诗风也是如此，请看下例：

来到此地泪盈盈，
我是飘泊的孤身，
我要与残月同沉。

——《流浪人的夜歌》

同样的用词和韵律，同样的情愫，只因诗人情感真挚，才使此诗不至流于伤感。（最后一句，可译成英语：“I want to sink with the wan moon”，让人想起彭斯的诗《为我打开门，哦》：

残月沉落白水中，
时间也随我沉落，哦。【2】

当然，这首牢牢把控的中国诗和那首开放的苏格兰民歌之间存在很大差异，但两者无疑都是好诗，也都使用了同样的意象。）

待到翻译果尔蒙和其他后象征派诗人的时候，戴已有了新的诗风，韵律松散，絮语口气，这在其译作中也有体现：

Tu auras l'odeur des pommes
Sur ta robe et sur tes mains,
Et tes cheveux seront pleins
Du parfum doux de l'automne
Les pommiers sont pleins de pommes
Allons au verger, Simone,
Allons au verger.

—Remy de Gourmont: Le Verger

你将有林檎的香味
在你的衫子上和你的手上，
而你的头发将充满了
秋天的温柔的芬芳。
林檎树上都已结满了林檎，
到果树园去吧，西茉纳，

到果树园去吧。——果尔蒙：《果树园》

与戴望舒自己的诗句放在一起读：

——给我吧，姑娘，那朵簪在发上的
小小的青色的花，
它是会使我想起你的温柔来的。

.....

——给我吧，姑娘，你的像花一样燃着的，
象红宝石一般晶耀着的嘴唇，
它会给我蜜的味，酒的味。

——不，它只有青色的橄榄的味，
和未熟的苹果的味，
而且是不给说谎的孩子的

.....

——戴望舒：《路上的小语》

就会发现，除了意境的契合，戴的译诗和写诗在风格和语言上也有了同步发展。

戴译了14首艾吕雅，两人有多少契合之处呢？呃，两人都经历了同样的转变——从追求先锋派艺术到成为反法西斯先锋诗人。当然，他们两个当时都面临同样的时局——战争和外敌入侵。且不管什么原因，总之是艾吕雅让戴登上了一个新的译诗高峰。以其《译诗集》中的第一首为例：

Avis

La nuit qui précéda sa mort
Fut la plus courte de sa vie
L'idée qu'il existait encore
Lui brûlait le sang aux poignets
Le poids de son corps l'écoeurait
Sa force le faisait gémir
C'est tout au fond de cette horreur
Qu'il a commencé à sourire
Il n'avait pas UN camarade
Mais des millions et des millions
Pour le venger il le savait
Et le jour se leva pour lui.

—Au Rendez-Vous Allemand

他的死亡之前的一夜
是他一生中最短的
他还生存着的这观念
使他的血在腕上炙热
他的躯体的重量使他作呕
他的力量使他呻吟
就在这嫌恶的深处
他开始微笑了
他没有“一个”同志
但却有几百万几百万
来替他复仇他知道
于是阳光为他升了起来

所有的矫饰、感伤、过分雕琢都不见了，但也没有过分松散凌乱。絮语口气，但结构紧实。语言取其精华：利索、清澈、悠扬，唯一的意象到最后一行方才出现，以此结束全诗，并得意洋洋地开始新的一天：

Et le jour se leva pour lui
于是阳光为他升了起来

当然，所有这些皆因原作极佳，但如果译者没有这份敏感或语言的驾驭能力，原诗的韵味将会大减。

（三）

翻译加西亚·洛尔迦时，戴要解决一个新的问题——如何把洛尔迦的民歌特征传达出来。洛尔迦方方面面都让戴喜欢——他有色彩，有音乐，有气韵，有对诗歌形式的良好把握，还有当时欧洲的现代性，在艺术和政治上皆然，而这一切都因他对古民歌的热爱而被糅合在了一处。同民歌一样，他的诗节很短，他的用词简单有力。关键词汇的重复使用、有感染力的旋律、戏剧化的效果都源于他深深根植的安达路西亚民歌传统。而戴本人似乎从未写过那样的诗。他深受另外一种诗歌传统的熏陶，而彼时那一传统已变得文雅得过了度，满是陈词滥调，充斥着积淀千年的互文暗指。

语言转换问题也不好处理。戴的朋友施蛰存就说过戴没能力完全传达出洛尔迦诗句的乐感。《西班牙宪警谣》中的两行

en la noche platinoche,
noche que noche nochera

被戴译成：

在这白金的夜里，
黑夜遂被夜色染黑。

施认为“这就显得非常笨拙”。

但所有这些都没妨碍戴译出好诗：

Arbolé arbolé
seco y verdé.

树呀树，
枯又绿。

La niña del bello rostro
está cogiendo aceituna.
El viento, galán de torres
la prende por la cintura.

脸儿美丽的小姑娘
正在那里摘青果，
风，高楼上的浪子，
来把她的腰肢抱住。

Pasaron cuatro jinetes,
sobre jacas andaluzas,
con trajes de azul y verde,
con largas capas de oscura.
"Vente a Córdoba, muchacha"
La niña no los escucha.

走过了四位骑士，
跨着安达路西亚的小马，
披着黑色的长大氅，
穿着青绿色的短褂。
“到哥尔多巴来呀，小姑娘。”
小姑娘不听他。

Pasaron tres torerillos
delgaditos de cintura,

con trajes color naranja
y espadas de plata antigua.
"Vente a Sevilla, muchacha"
La niña no los escucha.

走过了三个青年斗牛师，
腰肢细小够文雅，
佩着镶银的古剑，
穿着橙色的短褂。
“到塞维拉来呀，小姑娘。”
小姑娘不理他。

Cuando la tarde se puso
morada, con luz difusa,
pasó un joven que llevaba
rosas y mirtos de luna.
"Vente a Granada, muchacha"
y la niña no lo escucha.

暮霭转成深紫色，
残阳渐暗渐西斜，
走过了一个少郎，
带来了月亮似的桃金娘和玫瑰花。
“到格拉那达来呀，小姑娘。”
小姑娘不睬他。

La niña del bello rostro
sigue cogiendo aceituna,
con el brazo gris del viento
ceñido por la cintura

Arbolé arbolé
seco y verde.

脸儿美丽的小姑娘，
还在那里摘青果，
给风的灰色的胳膊，
把她的腰肢缠住。

树呀树，
枯又绿。

——《树呀树》

诗的美，当然首先要归功于洛尔迦，他对民歌传统和民歌体的驾驭在此有了绝佳的呈现。但同时，戴能把原诗的欢快、色彩和气韵完整地传达出来，也着实让人惊叹。这个叠句

树呀树，
枯又绿。

简洁明快，每行只有三个字——三个音；通俗但不碎叨，熟稔但不轻浮，具体，透明，清新——正是每个敏感诗人都梦寐以求的那种语言，不论哪种风格，哪个国家，哪个时期。

个中的故事——几乎所有的民歌里都有个故事——用平行结构讲述，每节只有微妙的变化，这又是洛尔迦的特长，此处译者的巧妙传达与之相得益彰——请注意译文的匀称和平行诗行中逐层推进的动词：

小姑娘不听他。
小姑娘不理他。
小姑娘不睬他。
来把她的腰肢抱住。
把她的腰肢缠住。

戏剧化的效果层层递进，与原诗完全一样。

戴是如何做到这一切的？

他的诗感以及写诗经历当然起了很大的作用。但奇怪的是，我们也发现，他早期接受的诗歌教育，他的中国古典诗歌造诣，在此也发挥了作用。比如“高楼上的浪子”“腰肢”“佩着镶银的古剑”“少郎”等都带着中国古诗的味道，唤起了我们对某些古诗的回忆：

青青河畔草，郁郁园中柳，
盈盈楼上女，皎皎当窗牖。……

——古诗十九首

何用识夫婿？白马从骊驹。
青丝系马尾，黄金络马头。
腰中鹿卢剑，可值千万余。……

——陌上桑

这种回声增强了中译本的效果，唤起一种更丰富、更浪漫的情怀。

但是这样美好的意境在中国和西班牙都没能长久。洛尔迦的田园世界很快就被旧的残酷与新的无情构成的合力所侵扰：

Sobre el rostro del aljibe
se mecía la gitana.
Verde came, pelo verde,
con ojos de fría plata.

那吉卜赛姑娘
在水池上摇曳着
绿的肌肉，绿的头发，
还有银子般沁凉的眼睛。

Un carámbano de luna
la sostiene sobre el agua.
La noche se puso íntima
como una pequeña plaza.
Guardias civiles borrachos
en la puerta golpeaban.

—Romance Sonámbulo

一片冰雪的月光
把她扶住在水上。
夜色亲密得
象一个小小的广场。
喝醉了的宪警
正在打门。

——《梦游人谣》

注意，诗人从绿的肌肉，绿的头发，银子般沁凉的眼睛，冰雪似的月光——全都是纯与美的意象——转到城市和色情——“夜色亲密得象一个小小的广场”——最后砰地一声：“喝醉了的宪警正在打门！”诗歌的情节顺序很关键，意象也都重要。译者把这一切全都传达了出来。事实上，他把最后一句处理得极短，使之更有戏剧感染力——通常每行有七八个字，这里只有四个字。

他译的《西班牙宪警谣》也同样有力：

Los caballos negros son.
Las herraduras son negras.
Sobre las capas relucen

manchas de tinta y de cera.
Tienen, por eso no lloran,
de plomo las calaveras.
Con el alma de charol
vienen por la carretera.
Jorobados y nocturnos,
por donde animan ordenan
silencios de goma oscura
y miedos de fina arena.
Pasan, si quieren pasar,
y ocultan en la cabeza
una vaga astronomía
de pistolas inconcretas.

黑的是马。
马蹄铁也是黑的，
他们大氅上闪亮着
墨水和蜡的斑渍。
他们的脑袋是铅的
所以他们没有眼泪。
带着漆皮似的灵魂
他们一路骑马前来。
驼着背，黑夜似的，
到一处便带来了
黑橡胶似的寂静
和细沙似的恐怖。
他们随心所欲的走过，
头脑里藏着
一管无形手枪的
不测风云。

我们注意到诗中用了一个类似蒙太奇的技巧以及另外一种诗歌语言，兼之轻松家常的语气和几个超现实主义的比喻。民歌情调依旧还在，在描绘吉普赛人的生活时——旗子、花彩等等——但现代主义情愫占据主导。这种情愫不仅是艺术上的，也是政治上的，因为洛尔迦正与在西欧露头的法西斯主义作斗争。戴也痛恨法西斯主义，所以能够抓住原诗的灵魂。他克服了一个特殊的困难，也即没有采用只有少数人听得懂的私密语言，但同样再现了诗中的惊人意象。因此，诸如“漆布似的灵

魂”“黑橡胶似的寂静”“细沙似的恐怖”这样的词汇既超现实，又明白晓畅，而“一管无形手枪的不测风云”这种表达，却把实体的“手枪”和无形但外延极广的“不测风云”结合起来：一个极好的压缩诗句，完全保有了原诗的戏剧力。

待到翻译洛尔迦的另一首令人难忘的诗《伊涅修·桑契斯·梅希亚思挽歌》时，戴不单单再现了原诗的效果，还向中国读者呈现了一种新诗体和新英雄。

中诗中尽管也有不少哀悼爱人或友人长辞的短诗，但却没有长点篇幅的挽歌能与《利西达斯》【3】、《阿多尼斯》【4】、《悼念》【5】或甚至短一点的《怀念叶芝》【6】相媲美。这是来自欧洲的文学传统。更让中国读者感到新奇的是，洛尔迦的挽歌还是献给一个斗牛士的。

戴望舒再一次出色地应对了挑战。他用悲喜参半的心情再现了洛尔迦对斗牛士的赞美：

No hubo príncipe en Sevilla
que comparársele pueda,
ni espada como su espada
ni corazón tan de veras.
Como un río de leones
su maravillosa fuerza,
y como un torso de mármol
su dibujada prudencia.
Aire de Roma andaluza
le doraba la cabeza
donde su risa era un nardo
de sal y de inteligencia.
¡Qué gran torero en la plaza!
¡Qué buen serrano en la sierra!
¡Qué blando con las espigas!
¡Qué duro con las espuelas!
¡Qué tierno con el rocío!
¡Qué deslumbrante en la feria!
¡Qué tremendo con las últimas
banderillas de tiniebla!

塞维拉没有一位王爷
能比得上他，

也没有一柄剑比得上他的，
也没有他那样一颗热心。
他的惊人的膂力
象一条狮子的洪流，
他的细致如画的机敏
象一尊大理石的胴体雕像。

安达路西亚式的罗马的风
给他头上镀了金，
这个头颅的微笑，
是一枝智慧的玉簪花。
在场上他是个多伟大的斗牛师！
在山上他是个多卓越的爬山家！
他对麦穗多么温和！
对马距又多么刚强！
在露水里多么娇嫩！
在节日里又多么光辉！
对黑暗的最后一支短矛
又显得多么惊人！

但是有一处错误，那就是把serrano译成“爬山家”，这说明戴为了营造效果偶尔也会过度发挥。

在处理那别具一格的第三节“存在的肉体”时，戴又变得感性起来。
洛尔迦在此谈论生死，冷静，深刻，充满形而上的玄思：

con una forma clara que tuvo ruiseñores
y la vemos llenarse de agujeros sin fondo.

一个曾经和夜莺做伴的光明的肉体，
现在我们看它充满了无底的创伤。

原诗中所有新奇的比喻都被保留了下来：

Yo quiero ver aquí los hombres de voz dura.
Los que doman caballos y rominan los ríos:
los hombres que les suena el esqueleto y cantan
con una boca llena de sol y pedernales.

我要在这里看见声音刚强的人，
那些能够降服野马和大江的人，
那些躯干响亮的人，和那些
用一张充满了太阳和燧石的嘴唱歌的人。

其中有些比喻从未在中国诗歌中出现过，戴不仅让它们突显出来了，而且措辞也不显得太过异域，会让中国的普通读者留下深刻印象，实际上还会让他们瞠目结舌，但不会惹他们反感。

这证明了戴本人在诗歌语言上的造诣。但其他因素也在起作用，汉语本身的灵活性是为其一。如果没有经过新文化运动，没有从文言变成白话，汉语作为一种文学语言也就不会如此到位地传达外国的比喻，尤其是那种复杂的比喻，譬如：

los hombres que les suena el esqueleto y cantan
con una boca blena de sol y pedernales.

那些躯干响朗的人，和那些
用一张充满了太阳和燧石的嘴唱歌的人。

或者前面提过的例子：

una vaga astronomía
de pistolas inconcretas.

一管无形手枪的
不测风云。

事实上，戴望舒和其他早期诗人对新的作诗方式的不断尝试（大都以欧洲先驱为师），已经让中国的诗歌爱好者对任何奇怪的搭配和新奇的意象都见怪不怪了。

但洛尔迦何以吸引中国的普通读者呢？是否影响巨大呢？几乎是否定的。尽管戴和其他译者付出了巨大努力，洛尔迦依然只是个受人尊重的名字而已，除了一小群左翼诗人外，鲜有其他读者。一个原因是时机问题。戴译洛尔迦的时候正是西班牙和中国忙于战争，外有强敌，内有叛贼，民族生存的紧要关头。生存问题如此紧迫，没人有心情去关注文艺创新。

那接下来的问题就是：翻译洛尔迦对戴自己的诗歌创作有何影响呢？以上我们看到，在翻译其他欧洲诗人时，译者自己的诗作通常也会有同步发展，但是戴此时和以后的诗歌创作中却鲜有洛尔迦的痕迹。

虽如此说，翻译洛尔迦付出的巨大心血不会白费，也许这影响更为隐秘，不易察觉吧。当然，20世纪30年代晚期，在翻译了洛尔迦和其他西班牙反法西斯诗人的作品之后，戴不再那么关注“小我”，而是有了公众意识，开始写诗表达自己对日本侵略者的愤恨。尽管与往日一样抒

情，他却有了一种新的力量，甚至是一种斗志昂扬的士气：

元旦祝福

新的年岁带给我们新的希望。

祝福！我们的土地，
血染的土地，焦裂的土地，
更坚强的生命将从而滋长。

新的年岁带给我们新的力量。

祝福！我们的人民，
坚苦的人民，英勇的人民，
苦难会带来自由解放。

一九三九年元旦日。

这当然与他早年模仿波德莱尔而作的诗大相径庭：

心头的春花已不更开，
幽黑的烦忧已到欢乐之梦中来。

我的唇已枯，我的眼已枯，
我呼吸着火焰，我听见幽灵低诉。

去吧，欺人的美梦，欺人的幻象，
天上的花枝，世人安能痴想！……

——《忧郁》

如果把戴的所有这些转变都归功于洛尔迦一人有点言过其实，那说这位西班牙诗人在促使他关注新主题、形成新诗风方面起到一定的作用，应该不为过吧？

（四）【7】

长篇论述至此，从戴望舒的例子扩展开来，我们或许可以大胆得出几个结论：

首先显而易见的一点：只有诗人才能把诗译好。

其次，译诗对原作者和译者都有益处。原作者有了新读者，译者接触了新的影响力量，尽管受限于新的格律。

译者必须殚精竭虑，需要恰当的感知和恰当的诗歌语言。但翻译本身亦可使诗人练就感知，打磨语言，反过来又会对诗人自己的创作产生

影响。

戴的成就还告诉我们在什么情况下译诗能取得最好的效果。除了译者个人的天才之外，他所使用的语言必须处于活跃状态，即一方面有足够的灵活性能够适应任何新的用法；另一方面又有足够的韧性能够受得住任何粗暴的揉弄。在戴着手译诗的时候，汉语正处于那样一种活跃、开放的状态，因为刚刚发生了意义非凡的文学革命。然而任何革命都不能一下子抹掉中国这种国家的古典传统，而这也有助于翻译，因为译者早年所受的古典诗的熏陶会使他保有高尚的趣味，对于形式的严格追求，对于质的强调等等，这些形成了一种价值标准，使他的译文不至于变得太幼稚，太生硬，太无深度与余音，因而也不会使好心的读者望而却步，这样也就有助于树立和推广文艺上的新事物。因此，在好的译作里面，传统同创新是并存的。

更深一层看，诗的翻译对于任何民族文学、任何民族文化都有莫大好处。不仅仅是打开了若干朝外的门窗；它能给民族文学以新的生命力，由于它能深入语言的中心，用新的方式震撼它，磨练它，使它重新灵敏、活跃起来。如果去掉翻译，尤其是诗歌翻译，每个民族的文化都将大为贫乏；整个世界也将失去光泽。

因此，诗歌译者无须自馁。面对着从歌德以来的所有“明智、懂事”的人所有关于诗无法译的断言，戴望舒用他的实践默默地回答了他们：诗是可以译的。至今人们都在惋惜戴望舒的早逝；正当他在经历了一段译诗的巨大收获之后，像是创作上要有一次飞跃的时候，命运制止了他。然而命运却夺不走他的翻译成果。他在搁下诗笔以前，已经把现代西欧诗歌的精华传达给了中国爱诗的人群——他们人数也许不多，然而真正是热心者。他在所译的诗中写下了自己的佳作；实际上，译诗延续了他写诗的生命。正如亚瑟·威利译的唐诗成了20世纪英语诗歌中的经典一样，戴望舒翻译的魏尔伦、波德莱尔、艾吕雅、耶麦、阿尔倍谛、沙里纳思、狄戈和洛尔迦等人的作品也位于现代中国文学的经典之列。

VIII ON TRANSLATING JOYCE, BURNS AND OTHERS₁

What was the first book you translated and when was that?

The first book I translated was written by James Joyce. It was *Dubliners*, a collection of his short stories. I did that in the early forties, when I was a young instructor at the Southwest Associated University in Kunming, which was called "Associated" because it was made up of three universities from the north, Beijing, Tsing Hua and Nankai. They had been driven out of their original sites by the Japanese, who were then occupying north China. I was a junior member of the English faculty. One day I got hold of this volume of short stories by Joyce. I was curious. I'd heard so much about his novel *Ulysses*. I wanted to know what his short stories were like. Well, they turned out to be excellent. One story in particular fascinated me. It was "The Dead" and it was a real masterpiece. I thought I'd like to translate it into Chinese and before I knew I'd translated all the stories in the volume.

Did you get your translation published?

Well, no. I sent the manuscript to a publisher in Guilin. Guilin is the resort city in Guangxi where you see all those strange-shaped hills. One day the Japanese sent their bombers over the city. Parts of the city went up in flames, my manuscript with them.

What a pity! ... What other works did you translate after that?

I translated Burns in 1958. That was the year when we were getting ready to celebrate the two hundredth anniversary of Burns's birth, which fell due in 1959. A publishing house in Beijing wanted to put out a new volume of Burns in Chinese and I was commissioned to do the translation. I'd never translated Burns before but as I liked his poetry I didn't mind having a try. I found the work challenging but also exhilarating. In the end, I got something like forty of his poems

translated and they made a slim volume, which was published in 1959.

What were some of the poems included in that volume?

They included the usual lyrics, like "Scots Wha Hae" "A Man's a Man for A' That" "A Red Red Rose" "Auld Lang Syne" "Comin Thro' the Rye", and so on. But I also managed to put in a few other things, such as his epigrams. You know, sometimes Burns wrote a few lines for a special occasion. There is an interesting piece called "Lines Written on a Banknote", which I translated. But these were not the main thing. The main thing was, I translated some of his longer works, such as "The Twa Dogs" "The Jolly Beggars" "Tam o' Shanter", and that wonderful satirical poem, "Holy Willie's Prayer". This last group of poems opened the eyes of the Chinese reading public to an aspect of Burns's genius hitherto not revealed—to the Chinese, I mean. His lyrical quality and his musical quality had always been appreciated in China. After Liberation, the fact that he was a farm labourer, an actual tiller of the land, increased his appeal. But no one, I believe, had translated any of his narrative poems. Yet there is a special quality in them which you don't find easily in other people's works—a dramatic quality, a kind of verve, a playfulness, which is extremely delightful.

One can see how you enjoyed your work. Then you went on to translate other poets?

After Burns I translated several of Bacon's *Essays*. That was an interesting experience too. Here you have an epigrammatist writing a very terse prose. What sort of Chinese are you going to use to put him across? That was the problem. Well, I tried out a sort of *wenyan*, or classical prose, and my friends rather liked the result. However, that was the only time I resorted to *wenyan*. Otherwise I've stuck to the contemporary spoken language. And on the whole I haven't had much to do with prose works. The only other prose work I translated was parts of William Cobbett's *Rural Rides*, which is another book I love. So delightfully English in a John Bull sort of way and also so tender-hearted. With these two exceptions, all my translations have been

from the poets.

Who, for instance, other than Burns?

Shelley, among others. Some Wordsworth too, and a bit of Blake, mainly in quotations to illustrate some point or other in the *History of English Poetry* I've been writing in Chinese for some time.

Any twentieth-century poets? You seem to be interested only in the Romantics.

I like the Romantics all right, but I've also translated some contemporary poets. Hugh MacDiarmid, for instance. He's Scottish and he's very good. I like the way he combines the Scots folk tradition with a modern European sensibility. He's also a Marxist who wrote the three Hymns to Lenin. I translated ten of his poems and had them published in the magazine *World Literature* in 1979.

How about contemporary American poetry? Have you translated any?

I've translated two American poets. There is first of all Robert Bly. I met Bly in Australia in 1980, when we were attending the Adelaide Festival of the Arts. One night he came into our hotel and started to recite a poem called "Seclusion", accompanying himself on a strangelooking instrument which he called dulcimer. He's a big tall fellow, wearing a red waistcoat and a large red cravat, very friendly, exuding warmth and enthusiasm wherever he went. I had read some of his poems before I went to Australia, so I was very pleased to meet him there. Then, after a few weeks, I met him again, this time in Minneapolis, for after Adelaide I went to the States to teach for a spell at the University of Minnesota. My wife and I spent a long evening in his house near a lake—Lake Harriet, if I remember right. Oh, how we talked! About poetry, of course. He told me he and some of his friends in Minnesota had learned from Latin American poets like Neruda and Vallejo and also from classical Chinese poets like Bai Juyi (Po Chu-i). In fact, "Seclusion", which he recited in my hotel room in Adelaide, is a poem by Bai.

How interesting! ... And who's the other American poet you translated?

The other one is James Wright, a good friend of Robert Bly's, who unfortunately died of cancer in 1979. One of his poems I translated has a long title: "As I Step Over a Puddle at the End of Winter, I Think of an Ancient Chinese Governor". The poem is about Bai Juyi. It begins almost playfully:

Po Chu-i, balding old politician,
What's the use?
I think of you,
Uneasily entering the gorges of the Yang-Tze,
When you were being towed up the rapids
Towards some political job or other
In the city of Chungchou.

It ends reflectively, wistfully:

Did you find the city of isolated men beyond mountains?
Or have you been holding the end of a frayed rope
For a thousand years?

The frayed rope refers to the rope used by the trackers in towing a boat upstream. They do it against the pitiless might of the rushing current, and the rope gets frayed with time and usage, so that it may snap at any moment. Thus both the boat and the old poet are in a precarious position. The "I" in the poem, the American poet asking the question, fares no better. For the poem is also about his feeling of loneliness as he stands looking at the Mississippi near Minneapolis. Indeed, it is this feeling of loneliness that links up the two poets across the vast differences of time and place. This I think is very good writing. Another poem of James Wright's, which I also translated, is the well-known anthology piece "A Blessing", with its tremendous ending:

Suddenly I realize
That if I stepped out of my body I would break
Into blossom.

I liked that very much. Certainly I did my best to keep these tremendous metaphors, the frayed rope and the blossom, in my translation.

What exactly do you mean by "keeping the metaphors"?

I mean, if there is a striking metaphor in the original poem, it should be translated literally, so that its impact and freshness will not be lost. But there is a bit of problem here. Sometimes a metaphor may be fresh in the original language but becomes quite hackneyed when it comes out in the target language, usually because the translator has used a familiar phrase which conveys more or less the same idea. In Burns's poem "A Red Red Rose", you remember, there is a line where the man says that his love for his girl will still be there even after all the seas have gone dry and the rocks have melt with the sun. I suppose this metaphor about the seas and the rocks is something fresh in the original poem. Well, we happen to have in Chinese a familiar phrase which also says, "I will remain faithful to my love even after the sea has gone dry and the rocks have decayed". You might say that here we have a perfect equivalent. Yet the phrase has been used so often and so widely that it's become a cliché. So in my translation I deliberately avoided using it. I adopted a less idiomatic formulation but kept the metaphors intact.

However, the problem is a bit more complicated than that. What if an author one is translating uses a cliché himself? After all, clichés are part of life and no author can be original throughout. Also in the poem "A Red Red Rose", there are two lines which go like this:

And I will luvve thee still, my dear,
While the sands o' life shall run.

Now the phrase "sands of life" is suspect. I wouldn't exactly call it a cliché, but it isn't fresh—it wasn't when Burns used it, for people had used it before, Shakespeare in the sixteenth century and Pope in the eighteenth. It was Burns's momentary lapse into genteelism, a kind of concession to the prevailing literary taste of his time. When I came to translate it, I did not try to keep the metaphor but used an equally familiar, unfresh expression, something like "while there is still breath in me".

I see. Language certainly works in mysterious ways.

Anyway, this simple lyric "A Red Red Rose" gave me more trouble

than other poems. Even after repeated revisions, I still felt my version wasn't adequate. As a translator, I always feel I must keep my Chinese clean and sharp-edged. Also, I think one should translate only writings that are akin to one's own in style. No one can be a master of all styles. Generally a translator is good for one kind of writing only. He should stick to that and not try to venture out too much.

But I should think the ideal translator is one who can adapt himself to whatever comes his way.

How many of us have this chameleon quality? Besides, in the course of adapting oneself, one also imposes one's own personality, which would produce a deadly sameness to whatever one's hand has touched. Imagine Shakespeare, Milton, Donne, Dryden, Pope, Wordsworth, Byron, Shelley, Keats all reading alike! That would be the end of translation, or of literature, for that matter.

What other things do you think a translator should pay attention to?

I think it important for a translator to get the tone right. If the work is satirical, then his translation should also be satirical; if it succeeds merely in being facetious, then it must be considered a failure.

One last point: the importance of the whole. Too often too much attention is given to details, and not enough to the work as a whole. Yet a poem or story has a unity of its own. And when a translator has grasped the atmosphere or impact of the whole poem, he sometimes finds he can take liberties with certain details that do not exactly contribute to the total effect. In that way he acquires a new freedom, a lifting of the spirit which will make him daring and innovative. He will begin to feel that translation is no hack work but something creative.

捌 我译乔伊斯、彭斯和其他

您译的第一本书是什么，是在什么时候？

我译的第一本书是詹姆斯·乔伊斯的短篇小说集《都柏林人》，是40年代早期我还在昆明西南联大做年轻教员时译的。西南联大之所以叫“联大”，是因为它是由北方三所大学（北大、清华、南开）联合组成的。当时日军已经占领华北，这三所大学被迫南迁。我当时是英语系的青年教师，有一天看到了乔伊斯的这本短篇小说集，很好奇。之前听说过很多他的长篇小说《尤利西斯》，所以很想看看他的短篇小说怎样。嗯，结果还真不错。其中一个故事尤其让我着迷，那就是《死者》，真是佳作。我就想把这个故事译成中文，不知不觉就把这个集子中所有的故事都译了出来。

您的译稿出版了吗？

没有。我把译稿给了桂林一家出版社。桂林是广西一个旅游城市，到处奇山怪石。一天日军空袭桂林，城市的部分地区付之一炬，我的书稿也在其中。

真可惜！那之后您又翻译了什么作品？

1958年我译了彭斯。因为1959年是彭斯两百年诞辰，北京一家出版社想出一本新的中文版彭斯诗集，找我来译。在那之前我没译过彭斯，但我喜欢他，所以试试无妨。我发现这项工作很有挑战，但也令人振奋。最后我译了40来首，薄薄的一册，1959年出版。

那册诗集中都包括哪些诗？

有那些耳熟能详的抒情诗，比如《苏格兰人》《不管那一套》《一朵红红的玫瑰》《往昔的时光》《走过麦田来》等。但我还设法译了一些其他风格的，比如讽刺诗。你知道，彭斯有时也会在某些特殊场合有感而发写几句，比如我译的一首名叫《写在钞票上的诗行》的诗。但这不占主体，主要是我还译了他的一些长诗，比如《两只狗》《欢乐的乞丐》《汤姆·奥桑特》，还有那首著名的讽刺诗《威利长老的祷词》。这最后一组诗让中国读者看到了彭斯不为人知的天才的一面——我是说对中国读者而言。他的抒情性和音乐性一直为中国读者赏识。解放后，彭斯的农民身份，他真正耕过田的经历更是让他平添了几分魅力。但是我

相信，还没人译过他的任何一首叙事诗。他的叙事诗有一种别人的诗作没有的特质——一种戏剧效果，一种神韵，一种欢快，相当令人愉悦。

可以看得出您很享受翻译的过程，那接下来您还译过其他诗人吗？

彭斯以后，我又译了《培根随笔集》。那也是个很有趣的经历。这次我面对的是一个警句作者，写的是一种非常紧凑的散文。该用什么风格的中文来翻译他呢？是个问题。呃，我尝试用文言或古汉语，结果我的朋友很喜欢。但那是我唯一一次使用文言，其他都是现代汉语。总体来说我散文译得不多。除了培根，唯一还译过的散文就是威廉·科贝特的《骑马乡行记》的一部分，那是另外一本我很喜欢的散文。它那典型的英国特色非常让人愉悦，另外还相当温柔。除了这两个，我译的都是诗。

彭斯之外，还有哪些诗人？

比如雪莱、华兹华斯的一些诗，另外还有几首布莱克，主要是当初用中文写《英国诗史》时需要引用。

可有20世纪的诗人？您好像只对浪漫主义诗人感兴趣？

我是喜欢浪漫主义诗人，但也译了一些当代诗人。比如休·麦克迪尔米德，一个苏格兰诗人，非常好。我喜欢他把苏格兰民歌传统和现代欧洲特点相结合的做法。他还是个马克思主义者，为列宁写过三篇颂。我译了他的十首诗，1979年在《世界文学》杂志上发表。

当代美国诗歌呢？您译过吗？

我译过两个美国诗人。第一个是罗伯特·勃莱。1980年在澳大利亚的阿德莱德艺术节上，我见过勃莱。一天晚上他来到我们的宾馆，吟诵一首名为《想到〈隐居〉》的诗^[1]，并用一个怪模怪样的他称为杜西莫琴的乐器给自己伴奏。他又高又大，穿一件红色马夹，系一根红色大领结，非常友好，足迹所到之处无不洋溢着温暖与热情。在去澳大利亚之前，我读过一些他的诗，所以非常高兴在那里见到他。几周后，我又一次见到他，这次是在明尼阿波利斯，因为阿德莱德艺术节后我去美国明尼苏达大学短期讲学。我和妻子在他位于湖畔的家中彻夜长谈——是哈里特湖，如果我没记错的话。我们谈得真是酣畅淋漓！当然是谈诗。他告诉我，他和他明尼苏达的一些朋友从拉丁美洲诗人（比如聂鲁达和巴列霍）以及中国古代诗人（比如白居易）身上受到不少启发。事实上，他上次在我宾馆房中吟诵的就是仿白居易而写的《想到〈隐居〉》一诗。

真有趣！那您译的另外一个美国诗人是谁？

詹姆斯·赖特，罗伯特·勃莱的好友，1979年不幸死于癌症。我译过的他的诗中，有一首名字非常长，叫做“冬末，越过泥潭，想到了古中国的一个地方官”，是写白居易的，开头很欢快：

白居易，落发纷纷的老政客，
何苦徒劳呢？
我想起你
惴惴不安地进入长江三峡。
纤夫拉着你的船逆流而上，
送你去忠州城里，
混一个什么官差使。

诗以玄思结尾，怅然若有所失：

你在山那边找到孤独人的城市了吗？
还是紧握着那条磨损了的
纤绳的一头，
一千年都没有放手？【2】

“磨损的纤绳”指纤夫和无情的激流作战、逆流把船拉上岸时用的绳索。天长日久绳子磨损，随时可断。因此，船和老诗人处境都很危险。诗中的“我”，那位问问题的美国诗人，境况也好不到哪里去。这首诗也传达了他在近明尼阿波利斯的地方眺望密西西比河时的孤独。就是这种孤独，把两位时空相隔的诗人联系起来了。这首诗我认为好就好在这儿。我还译了赖特的另一首诗，是他的名诗，收在很多选集里，叫《祝福》，结尾很出彩：

我突然意识到，
如果我步出我的身体，我将
开出花来。

我非常喜欢。当然，我在翻译时，尽量把这些比喻（比如磨损的纤绳和花朵等）都保留下来。

您说的“保留比喻”究竟是什么意思？

我是说，如果原诗有独特的比喻，就要直译，以保留原诗的效果和鲜活的意象。但是也有难度。有时一个比喻在原文中是鲜活的，但在译文中就显得陈腐，通常因为译者选用了意思大体相同的熟语。在彭斯的那首《一朵红红的玫瑰》中，男孩说他对女孩的爱永不变，即使大海干枯，太阳把岩石烧成灰尘。我想，这海水和岩石的比喻在原文中是鲜活的，但我们汉语中恰巧也有“海枯石烂，永不变心”的类似说法。你可能

认为这样正好契合，但是“海枯石烂，永不变心”已被滥用。所以我在翻译时，故意避开这样的陈词滥调。我选了一个不那么常用、但又能完整保留比喻的说法。

但是，这样仍有问题。如果原作者就已用了陈词滥调呢？毕竟，陈词滥调是生活的一部分，任何作家都不可能从头到尾一直创新。《一朵红红的玫瑰》中，有这样的两行诗句：

亲爱的，我永远爱你，
只要我一息犹存。

“sands o' life”这个表达就有问题。我不是说它完全就是陈词滥调，但也不新鲜。因为它并非始于彭斯，16世纪的莎士比亚和18世纪的蒲柏都用过。彭斯在此处不幸落入了当时流行的高雅文学的俗套。所以我译的时候，就没有保留这个比喻，而是用了同样常见、不甚新鲜的说法“只要我一息犹存”。

明白了。语言可真神奇。

总之，这首小小的抒情诗《一朵红红的玫瑰》与其他诗比起来，让我感受到了更多的挑战。我改了多次，仍不满意。作为译者，我想把中文锤炼得干净、洗练。而且我觉得译者应选择与自己的风格相契合的作品来译。没人能够把握各种风格。一般说来，译者只能胜任一种风格，那就应该坚持走在这条路上，而不是尝试转向其他。

但我认为理想的译者应该是随时为原文而变身的。

这种变化多端的本领，有几人能有？而且，即使为原文而变身，译者也在译文中留下了自己的痕迹，这就形成了译千言、终一面的结局。想想看，莎士比亚、弥尔顿、邓恩、屈莱顿、蒲柏、华兹华斯、拜伦、雪莱、济慈都是一个模样！那就是翻译的末路，或者文学的末路了。

您认为一个译者还要注意什么？

调子要对。原文是讽刺的，译文也要讽刺。如果译文成了滑稽的，那就是失败。

最后一点，就是整体的重要性。我们太容易关注细节，而忽略整体了，但一首诗或一个故事有自己的整体性。当译者把握了全诗的气韵和效果，有时就可灵活地处理某些无关的细节。这样他就有了一种新的自由，能为诗歌的神韵而大胆创新。那时他也会觉得翻译不是苦差，而是创造。

PART TWO KINDS OF AFFINITY 第二部分 几类不同的 契合

IX CHARLES LAMB AND JOHN WEBSTER

1

With Charles Lamb, Webster came into his own. Hitherto he had been in the company of scholars and booksellers, and his fortunes had been made in the catalogues, the dictionaries, at best the anthologies. But Lamb was the first critic to approach Webster's plays seriously as literature.

While Swinburne's large claims¹ made for Lamb must be modified by our knowledge of the scholarly activities in Elizabethan research since Theobald, there is nothing to revise radically the old belief—and Lamb's own belief²—that Lamb came to the rescue of the old dramatists virtually single-handed. For it is wide of the mark to suggest, as Octavius Gilchrist³ did in Lamb's own time and some still do today,⁴ that there had been before Lamb such things as Dodsley's *Old Plays*, Thomas Hawkins's *Origin of the English Drama*, and Baker's *Biographia Dramatica*. Lamb readily confessed to a knowledge of these, but he knew that they did not attempt the task he had set himself, namely, to evaluate the old drama critically. The early collections were antiquarian in nature. When a stray remark escaped from their editors to reveal what they thought of the old drama, we today know at once that they did not look at it in the same way as Lamb did. Dodsley, for instance, loved the old drama for its comic wit. But listen to Lamb:

the kind of extracts which I have sought after have been, not so much passages of wit and humour, though the old plays are rich in such, as scenes of passion, sometimes of the deepest quality, interesting situations, serious descriptions, that which is more allied to poetry than to wit, and to tragic rather than to comic poetry.

There is nothing in common between Lamb and the early enthusiasts. Tragic poetry is not necessarily better than comic wit, but it is at least different. In placing emphasis on a quality hitherto only slightly, if at all, touched, and touched only to be denounced as "wild" and "untutored", and in glorifying it as one of the major reasons why these dramatists are as immortal as Shakespeare himself, lies the originality of Lamb. To say that he was in a field thoroughly tilled by the Oldyses and the Giffords is no less a confusion of issues and values. Apart from the fact that these diligent tillers were dull and not very much sought after by the common reader, their chief concern was with the biographical, bibliographical, and textual problems connected with the old dramatists, in none of which was Lamb interested. He did not accompany his selections with any biographical notices, for which he simply referred the readers to Dodsley and Baker. In textual matters, though Lamb exhibited his insight in assigning the first two scenes that he quotes from *The Two Noble Kinsmen* to Shakespeare,⁵ he did not hesitate to cut, "without ceremony", not only the superfluous lines, but "all that which the writers had better never have written". For these sins the scholars could go on crucifying him, but none of them did what he did with such success—to take the reader by the hand and show him in no uncertain terms the beautiful scenes in the old drama.

On the other hand, there are indications that he was more affected by the compilers of the popular anthologies immediately before him. Henry Headley's *Select Beauties of Ancient English Poetry*, 1787, and George Ellis's *Specimens of the Early English Poets*, 1790, were accorded a measure of success which could not have been a matter of complete indifference to Lamb. Ellis's work was expanded

into three volumes in 1801, when Lamb had got ready a second notebook, after the first was burned in 1796. The word "Specimens" was used again by Ellis for the companion volume, *Specimens of Early English Metrical Romances*, 1804, as well as by George Burnett for his *Specimens of Early English Prose Writers*, 1807.⁶ Southey himself, who wrote to Coleridge in June 1804 about an anthology which he said Lamb could very well edit,⁷ compiled *Specimens of the Later English Poets*, 1807, as a sequel to Ellis's anthology. The word "Specimens", in short, was common currency in Lamb's time, and this should at once dispose of William Watson's charge that Lamb treated the old writers as "museum" pieces.⁸ The attention Lamb gave to contemporary anthologies can be further borne out by his comment on Vicesimus Knox's *Elegant Extracts*, a series of school anthologies of prose and poetry in separate volumes which had gone through many editions in the last years of the eighteenth century.⁹ The two volumes published in 1796 are devoted to "useful and entertaining Pieces of Poetry, Selected for the Improvement of Young Persons", and contain a section of dramatic poetry. Writing to Coleridge at the end of June that year, Lamb said:

I wish you would try and do something to bring our elder bards into more general fame. I writhe with indignation when in books of Criticism, where commonplace quotation is heaped upon quotation, I find no mention of such men as Massinger, or B[eaumont] and F[letcher], men with whom succeeding Dramatic Writers (Otway alone excepted) can bear no manner of comparison. Stupid Knox hath noticed none of 'em among his extracts.¹⁰

Lamb was not really urging Coleridge. He was turning over in his own mind the idea of an anthology. The note-book he kept for dramatic passages was being steadily added to. But the *Specimens of English Dramatic Poets Who Lived About the Time of Shakspeare* came tardily, as twelve years had to elapse between the first conception of the idea and its final realisation in 1808.¹¹

Once published, however, the book made literary history. Though upon its first appearance the scholars snubbed it, yet all through the nineteenth century, in spite of hostile criticism, it remained *the*

anthology for the Elizabethan drama. The common reader was now able to read in one compact volume all the important old dramatists except Shakespeare. The manner of representation is a cross between the meagre epigrams of the early miscellanies and the complete plays of Dodsley. To follow Dodsley would make Lamb just another, and probably much inferior, Isaac Reed, and possibly Lamb's greatest objection to Dodsley and Isaac Reed is that the forbidding look of their solid eight or twelve volumes discourages, even repulses, the advances of timid readers. He, on the other hand, wants to hold their attention. So he thinks in terms of separate scenes, and selects only "scenes of passion, sometimes of the deepest quality, interesting situations, serious descriptions, that which is more allied to poetry than to wit, and to tragic rather than to comic poetry". His reader is forever kept on the crest of huge emotional waves, and there can be no better alias for the *Specimens* than "a collection of dramatic crises". But we must also note the word "poetry". Lamb's approach to the old drama is not that of a practitioner in the theatre; he treats the Elizabethan plays as literature fit for quiet reading in the solitude of a study. Not however because he is blind to the dramatic effects, to which no one can bring a keener and more discerning appreciation; but he believes that certain effects are so subtle that ordinary stage performance can only result in spoiling the wonderful illusion that one got during the reading of the plays. Even the great actors are of no avail:

Never let me be so ungrateful as to forget the very high degree of satisfaction which I received some years back from seeing for the first time a tragedy of Shakspeare performed, in which these two great performers[Kemble and Mrs. Siddons] sustained the principal parts. It seemed to embody and realise conceptions which had hitherto assumed no distinct shape. But dearly do we pay all our life after for this juvenile pleasure, this sense of distinctness. When the novelty is past, we find to our cost that instead of realizing an idea, we have only materialized and brought down a fine vision to the standard of flesh and blood. We have let go a dream, in quest of an unattainable substance.¹²

What is true of Shakespeare can only be doubly true of his fellow dramatists: he was by far the most dramatic of them all. Lamb's emphasis on the desirability of reading a play, and not seeing it, is understandable. A word-lover all his life, he was naturally more fascinated by the lasting beauty of the printed page. Nor can we object to his culling of memorable scenes, which was probably the best course open to him for a handy but comprehensive anthology of his kind. But, torn from the context of an anthology, his words and his practice have led to a belief that there can be a dichotomy between drama and poetry. While Archer sharply distinguishes between the dramatic effectiveness—or the lack of it—of the Elizabethan plays and their absolute poetic value, Swinburne and Gosse simply call them "poems".¹³

For the *Specimens*, however, his preoccupation with poetry has given Lamb those sudden flashes of insight into the characters and the situations in the plays, flashes that are happily crystallised into the form of notes. Dr. Johnson called notes evils, however necessary, but apparently he had reckoned without such fascinating evils as his own note on Polonius and all of Lamb's notes in this anthology. They are exactly what a helpless reader would expect of a literary critic. The critic should map out the paths that the reader is to take in his wanderings in the unknown country of an author's mind, but he should not do the walking or the thinking for the reader. Now the notes in the *Specimens* contain some of Lamb's happiest and most glorious writing—they are what give the anthology as anthology immortality—and yet they are no substitute for the reader's own judgement. By their fine exaggerations they stimulate the reader into an impatience to read the text for himself. For Lamb's enthusiasm is infectious. He glows as he talks, until finally he identifies himself with the suffering heroes and heroines. Here again we see the difference between the scholars and Lamb. The scholars were more concerned with history, with changes that mark one age off from another, while Lamb the critic pure and simple was passionately interested in the

universal values of literature.¹⁴ He had very little historical sense, and readily read himself into the dramatists. The dangers of this kind of criticism have been pointed out,¹⁵ but the greatest, as far as the *Specimens* is concerned, is the lack of a sense of proportion. Lamb's habitual use of Shakespeare as a yardstick is a case in point. Perhaps it is difficult not to compare them with Shakespeare, but in comparing them Lamb seems never to have made up his mind as to who comes nearest to him. Heywood is "a sort of prose Shakspeare". Ford is "of the first order of English poets" and "the man after Shakspeare". "All poets after Shakspeare yield to" Beaumont and Fletcher "in variety of genius". "Of all the English playwrights, Chapman perhaps approaches nearest Shakspeare in the descriptive and didactic, in passages which are less purely dramatic." And, of course, the famous comparison of Webster's dirge in *The White Devil* with Shakespeare's ditty in *The Tempest*. While it is true that we have been doing Lamb injustice by considering these utterings in isolation and without due regard for the modifications he carefully attaches to them, one's first impression is bound to be that poor Shakespeare is made too often to serve as avoirdupois on Lamb's critical balance. One explanation lies perhaps in that he is always absorbed in the dramatist of the moment. Once he takes a man up, he must pour out his whole heart before him. There can be no half measures. If this method is one of exaggeration, it is also the reason why he has been able to revive such tremendous interest where the antiquarians and anthologists created merely lukewarm curiosity. His notes, in short, were the greatest single factor in bringing attention again to the less familiar names of Marston and Heywood, Middleton and Rowley, Dekker and Tourneur and Webster, all of whom had not been edited properly by the scholars or known to the general public.

Lamb's method of selecting is particularly favourable to a dramatist like Webster. Webster has been, until very recently,¹⁶ looked upon as a dramatist of separate scenes of great power and beauty rather than one whose strength lies in the shapeliness of a complete

play. What Lamb has selected are exactly those startling scenes. Indeed, it is difficult to imagine that any one, given the same limited space to represent Webster in, could do better. No better specimens can be had. From *The Devil's Law-case*, Lamb quotes the scene in which Contarino and Ercole are getting ready to fight a duel, which strikes him as being "the model of a well-managed and gentlemanlike difference". *Appius and Virginia* furnishes him with the scene in which a father kills with his own hand his only and much beloved daughter. But fuller representation is rightly given to the two great tragedies on which Webster's name has since been built. Of *The Duchess of Malfi* we read not only the bed-chamber scene in which the Duchess secretly marries Antonio, but the greater part of the fourth act, from the sad spectacle of the waxen bodies, through the madmen's dance, to the strangling of the Duchess and the remorse of Ferdinand. From the equally rich mine of *The White Devil* Lamb quarries the dirge scene and the whole of the arraignment of Vittoria. Perhaps we can make the same selections from Webster, but assuredly we cannot write Lamb's notes to illustrate and illumine Webster's genius:

All the several parts of the dreadful apparatus with which the death of the Duchess is ushered in, the waxen images which counterfeit death, the wild masque of madmen, the tomb-maker, the bellman, the living person's dirge, the mortification by degrees,—are not more remote from the conceptions of ordinary vengeance, than the strange character of suffering which they seem to bring upon their victim is out of the imagination of ordinary poets. As they are not like inflictions of this life, so her language seems not of this world. She has lived among horrors

till she is become "native and endowed unto that element". She speaks the dialect of despair; her tongue has a smatch of Tartarus and the souls in bale. To move a horror skilfully, to touch a soul to the quick, to lay upon fear as much as it can bear, to wean and weary a life till it is ready to drop, and then step in with mortal instruments to take its last forfeit: this only a Webster can do. Inferior geniuses may "upon horror's head horrors accumulate", but they cannot do this. They mistake quantity for quality; they "terrify babes with painted devils"; but they know not how a soul is to be moved. Their terrors want dignity, their affrightments are without decorum.

This White Devil of Italy sets off a bad cause so speciously, and pleads with

such an innocence-resembling boldness, that we seem to see that matchless beauty of her face which inspires such gay confidence into her, and are ready to expect, when she has done her pleadings, that her very judges, her accusers, the grave ambassadors who sit as spectators, and all the court, will rise and make proffer to defend her in spite of the utmost conviction of her guilt; as the Shepherds in Don Quixote make proffer to follow the beautiful Shepherdess Marcela, "without making any profit of her manifest resolution made there in their hearing".

So sweet and lovely does she make the shame,
Which, like a canker in the fragrant rose,
Does spot the beauty of her budding name!

I never saw any thing like the funeral dirge in this play, for the death of Marcello, except the ditty which reminds Ferdinand of his drowned father in the Tempest. As that is of the water, watery; so this is of the earth, earthy. Both have that intenseness of feeling, which seems to resolve itself into the element which it contemplates.

That is Lamb at his very best. It is difficult to imagine how, having read these notes, one could stay long behind without wanting to tear into Webster at once. But they also share with his notes on Ford's *Broken Heart* the distinction of being the most controversial of all Lamb's writings. Roughly speaking, the Romantics have hailed these notes as containing some of the most inspired ideas on Webster, while the champions of modern realistic theatre have held them up as a particular example of how Lamb, an exquisite stylist, yet floundered most wretchedly as a critic. But pro or con, argument has raged most heatedly round a few points. Has Webster really moved horrors skillfully, has he not in fact mistaken quantity for quality, the very thing which Lamb praises him for not doing? Reviewing the *Specimens*, a critic in *The Annual Review* wrote:

The Duchess of Malfy is one of those plays which Mr. Lamb admires most warmly, yet surely it contains nothing half so fine as the praise he has misbestowed upon it... There is something as absurd as it is monstrous in what is thus commended. The brother of the duchess, to punish her for marrying an inferior, torments her with masks and mockeries of cruelty, waxen images representing the dead bodies of her husband and children are exhibited; madmen are turned loose to dance before her to mad music; a coffin, cords, and bell are produced; the grave-digger comes in: and lastly she is strangled. Is this

moving a horror skilfully!! The surgeon may as well be called a great master of the passions, for giving pain where he cuts to the quick, as a dramatist who can employ such means as these.¹⁷

This was said in 1808, and was to be echoed in 1893 by William Archer when he asserted, "My point is that in the *Duchess of Malfy* (and, to a minor degree, in *The White Devil*) the horrors are *un* skilfully moved—that they are frigid, mechanical, brutal."¹⁸ But the review as a whole was friendly, ending in such magnificent eulogy of Lamb:

Yet our dramatic writers have never been commented on with such kindred power: the remarks are even more original than the text.—The writers of that day were many, and spoke one language, but we have seen no such critic.

In fact, in the general conspiracy of silence over the *Specimens*— both *The Edinburgh Review* and *The Quarterly* were conspicuously silent— this represented the only favourable notice that had been taken of Lamb. Lamb himself believed the writer of the article to be Coleridge. Writing to Coleridge on June 7, 1809, he said, "I am also obliged, I believe, for a review in the 'Annual', am I not?"¹⁹ Coleridge does not seem to have replied to this, or if he did, the letter has not yet come to light. If, however, Lamb's identification of the writer is true, then the article also contains all that Coleridge has said on Webster, as the only other important mention of Webster's name occurs in connection with a passage imperfectly reported by a contemporary newspaperman at one of Coleridge's lectures:

In other words, the learned would have had English tragedians to be mere reflections of the Greek, or of the oratorical declamation in dialogue under the name of Seneca.²⁰

The passage was reported as a quotation from Webster made by Coleridge, but it is obvious that at best it was but a paraphrase of a part of Webster's "To the Reader" before *The White Devil*.

But Coleridge's favourable view of the notes²¹ was not shared by the only other contemporary reviewer. Writing in *The Monthly Review* ²² in 1809, the reviewer expressed his dissatisfaction with Lamb's opinion of Webster:

The notes before us, indeed, have nothing very remarkable; except the

style, which is formally abrupt, and elaborately quaint. Some of the most studied attempts to display excessive feeling we had noted for animadversion, but the task is unnecessary. We will not even say a word of comparison made between the *Dirge* in the *White Devil*, and the *Ditty* in Shakespeare's *Tempest*, "the one of the earth, earthy, the other of the water, watery: both have that *intenseness of feeling*, which seems to resolve itself into the elements which it contemplates";—nor will we discuss "the dilaceration of the spirit and the exenteration of the inmost mind", sustained by the light-heeled Calantha, or the "dignified terrors and *decorous* affrightments" which have *bewildered* Mr. Lamb into such unqualified and exaggerated admiration of the Duchess of Malfy. Such phrases may possibly have been adopted for their resemblance to the theatrical language of those times, and unquestionably the resemblance exists:—but the language imitated is that of Pistol and Holofernes, or the mock heroics of the play-king in *Hamlet*; as far removed from the gentlemanly eloquence which flows from the lips of Hamlet himself, as Mr. Lamb's satirical pleasantry is distant from the easy playfulness of Mercutio, Benedick, and Orlando.

The real grudge is against that other favourite habit of Lamb's, of comparing the lesser Elizabethans with Shakespeare himself. Webster is no Shakespeare just as the play-king is no Hamlet. It was this same reviewer who occasioned these of Lamb's words to Coleridge:

The "Monthly Review" sneers at me, and asks "if 'Comus' is not *good enough* for Mr. Lamb?" because I have said no good serious dramas have been written since the death of Charles the First, except "Samson Agonistes"; so because they do not know, or won't remember, that "Comus" was written long before, I am to be set down as an undervaluer of Milton! O Coleridge, kill those reviews, or they will kill us—kill all we like! Be a friend to all else, but their foe.²³

A rare outburst of temper on gentle Elia's part. But his comparison of Webster with Shakespeare has weathered the storms of opposition. All through the nineteenth century, many critics had been in the habit of naming Webster as second only to Shakespeare in tragic art. The same dirge in question, which Lamb compared with the song in *The Tempest*, reminded a writer in 1833 of another portion of Shakespeare. "It has" he wrote, "all the hopeless distress, the vague, bewildered, terrific sorrow of Ophelia. With what beauty and feeling is the dirge composed which she [Cornelia] mutters, as reason and misery are struggling for the mastery of her mind."²⁴ If the timid took care to

modify their statements, often couched in a web of inter-comparisons involving many other dramatists,²⁵ the bolder spirits of Swinburne, Gosse, and Symonds were ready to go to any length:

Webster is far beneath Ben Jonson in scope and freshness of invention, in learning, and in the more obvious forms of comedy; in versatility and in natural ease of dialogue we must confess him also inferior to that great master. But, like Shakespeare, he is transcendental; his strong muse wings itself out of the common world, and sees things with the eyes of a visionary.²⁶

He does not use the vulgar machinery of revenge and ghosts in order to evolve an action. In so far as this goes, he may even be said to have advanced a step beyond *Hamlet* in the evolution of the Tragedy of Blood.²⁷

...in the deepest and highest and purest qualities of tragic poetry Webster stands nearer to Shakespeare than any other English poet stands to Webster; and so much nearer as to be a good second; while it is at least questionable whether even Shelley can reasonably be accepted as a good third... For it is only with Shakespeare that Webster can ever

be compared in any way to his disadvantage as a tragic poet: above all others of his country he stands indisputably supreme. The place of Marlowe is indeed higher among our poets by right of his primacy as a founder and a pioneer: but of course his work has not—as of course it could not have—that plenitude and perfection of dramatic power in construction and dramatic subtlety in detail which the tragedies of Webster share in so large a measure with the tragedies of Shakespeare.²⁸

The last quotation is from Swinburne. In the same essay, he calls Webster "a limb of Shakespeare" and "the right arm". Elsewhere,²⁹ he spoke of Webster and Dekker as "gulfs or estuaries of the sea which is Shakespeare",³⁰ a statement which was to call forth the rebuttal of William Watson:

A gulf or estuary of the sea which is Shakespeare! The image is picturesque but hardly veracious, conveying as it does a suggestion of open sunlight and bracing briny air which is utterly foreign to Webster's talent. His art is no breezy inlet of any ocean, but rather a subterranean chamber where the breath and light of morning never penetrate. In the palace of life he seems to inhabit, by preference, some mouldy dungeon peopled with spectral memories, and odorous of death.³¹

But that is not all. Swinburne must also compare Webster with the Greeks.³² Webster is greater than Sophocles, because Sophocles lacks

that "instinctive righteousness" which is shared only by Aeschylus, Shakespeare, and Webster. As to Euripides? He is far lower in rank, being inferior to Webster not only in moral sentiments, but even in dramatic art. We see to what strange blind alleys of criticism Lamb has led the enthusiasts of Webster.

But if there is one phrase of Lamb's that has aroused more controversy than any other, it is the phrase "the innocence-resembling boldness" in his notes on the character of Vittoria. A harmless enough phrase, which would probably have been passed over with no comment by the critics of today. But Lamb wrote it at a time when critics and readers alike were busily prying into the hearts of the characters in the old plays. The London literary world had just been taken by storm by the vogue of character-study. The vogue, initiated by Whately and Morgann in the eighteenth century, established and sustained by such brilliant Shakespearean critics as Coleridge and Hazlitt, was not to abate until after the publication of *Shakespearean Tragedy* in 1904. The critics read their fellow critics with the same ingenious curiosity and minute care as they read the old poets. Even a casual remark, an aside, a careless slip of the pen, was pounced upon, provided it touched a dramatic character. Hence the amount of attention, of the learned and the pious alike, that had been focused on this simple phrase of Lamb's offered without ceremony or fanfare as an explanation of "this White Devil of Italy". Dyce, the first editor of Webster, loved the character of Vittoria, but questioned her "innocence":

For my own part, I admire the dexterity with which Webster has discriminated between that simple confidence in their own integrity which the innocent manifest under the imputation of a great crime, and that forced and practised presence of mind which the hardened offender exhibits when brought to trial. Vittoria stands before her judges, alive to all the terrors that surround her, relying on the quickness of her wit, conscious of the influence of her beauty, and not without a certain sense of protection, in case of extreme need, from the interposition of Brachiano. She surprises by the readiness of her replies; but never, in a single instance, has the author assigned to her any words

which were likely to have fallen from an innocent person under similar circumstances. Vittoria is undaunted, but it is by effort. Her intrepidity has none of the calmness which belongs to one who knows that a plain tale can put down his adversary; it is a high-wrought and exaggerated boldness,—a determination to outface facts, to brave the evidence she cannot refute, and to act the martyr though convicted as a criminal.³³

Henry Hallam, who in his *Introduction to the Literature of Europe in the Fifteenth, Sixteenth, and Seventeenth Centuries*, 1837-39, put Webster after Heywood, but nevertheless gave him the dignity of separate treatment, concurred with Dyce on the extravagance of Lamb's phrase. To him, the part of Vittoria "is rather a delineation of desperate guilt, losing in a counterfeited audacity all that could seduce or conciliate the tribunal".³⁴ The discussion, we see, had gradually drifted away from the character of Vittoria into the problem of evil. Evil could not be combated with more vigour and indignation than it was in the middle of the nineteenth century by Charles Kingsley. Naturally the Elizabethan dramatists as a whole and Webster in particular did not escape his attention. In his *Plays and Puritans*, Kingsley examined in some detail Webster's two tragedies as symptomatic of the dark, unhealthy mentality of the seventeenth century. They are conceded to be "the two best tragedies written since Shakspeare's time", and yet there is in them "no development of the human soul for good and evil, which is Shakspeare's especial power". Hereupon Lamb's phrase comes in amid the sighs of the impulsive parson-novelist: "Poor Elia, who knew the world from books, and human nature principally from his own loving and gentle heart, talks of Vittoria's 'innocence-resembling boldness'". Not that Lamb's words are not sincere, but Kingsley wonders if Lamb realises that "the strength of Webster's confest master scene lies simply in intimate acquaintance with vicious nature in general".³⁵ A. W. Ward supplied the academic verdict, pronouncing Lamb's phrase "utterly erroneous, and destructive of the consistency which the character throughout maintains".³⁶ Even Sir Edmund Gosse, whose fault was certainly not one of indifference to Webster, admitted that Lamb "exaggerates the effect of Vittoria's 'innocence-resembling

boldness' upon our minds; surely Monticelso's altogether extravagant abuse has as much to do with the favour we feel for her as her own rather brazen confidence".³⁷ But Swinburne was not to allow people to maul his Lamb and Webster without a protest. Discussing the objection of Dyce and Kingsley to the phrase, he said:

I should hesitate to agree with them that he has never once made his accused heroine speak in the natural key of innocence unjustly impeached: Mary's pleading for her life is not at all points incompatible in tone with the innocence it certainly fails to establish—except in minds already made up to accept any plea as valid which may plausibly or possibly be advanced on her behalf; and the arguments advanced by Vittoria are not more evasive and equivocal, in face of the patent and flagrant prepossession of her judges, than those put forward by the Queen of Scots. It is impossible not to wonder whether the poet had not in his mind the actual tragedy which had taken place just twenty-five years before the publication of this play: if not, the coincidence is something more than singular.³⁸

We are not for the moment concerned with the reputation of Webster among the poets and scholars of the later nineteenth century, but an acquaintance with some of their views on Lamb's criticism of Webster shows what an influential book the *Specimens* has been. People respect it even in their strong opposition to it. In the case of Webster, the very stimulating, not to say suggestive, nature of Lamb's notes has brought so much intelligent, even if at times hostile, attention to the dramatist that his position among the greater Jacobean playwrights is secure. Whether, as Lamb suggested, Webster comes nearest to Shakespeare in tragic intensity, whether he has moved horrors skillfully, whether his Vittoria pleads with an innocence-resembling boldness, his name is now firmly put back on the map of literature, the name of a major city with its myriad lighted windows and its dark, vicious archways.

2

In the meantime, there were many signs of increased interest in Webster in the years immediately following the publication of Lamb's *Specimens*. In 1810, Sir Walter Scott edited anonymously a collection of old plays under the title *The Ancient British Drama*, in the third and

last volume of which appear both *The White Devil* and *The Duchess of Malfi*. In the Preface, Webster's name is mentioned along with those of Beaumont and Fletcher, Jonson, Ford, and Massinger as fit to be put beside "the immortal Shakspeare", while Shirley, Marston, and Dekker are merely "lesser, yet respectable names". Scott must have been strongly impressed by Webster, as we find him quoting, in 1814,³⁹ before the ruins on the island of Iona, these two familiar lines:

You never tread upon them but you set

Your feet upon some ancient history

which we know to have come out from that favourite piece of eighteenth-century anthologists, namely, Antonio's speech on the "Ruins" in the fifth act of *The Duchess of Malfi*. This strong impression even followed Scott to his very grave, as years later, in 1831, not long before his death, writing to Dyce, Scott called Webster "one of the best of our ancient dramatists".⁴⁰ Even Webster's minor works began to be objects of attention. In 1812, Sir Egerton Brydges printed the madmen's song (*DM*, IV, ii, 65-76) in the second volume of *The British Bibliographer*.⁴¹ *Appius and Virginia*, a hitherto comparatively neglected work, was collected in 1815 by C. W. Dilke in his *Old English Plays*, and was subsequently to be reprinted in 1827 in the last volume of John Payne Collier's edition of Dodsley's *Old Plays*. When Nathan Drake came to write his *Shakspeare and His Times* in 1817, he saw fit to insert an account⁴² of Webster in the chapter entitled "A Brief View of Dramatic Literature and its Cultivators during Shakspeare's Connection with the Stage". Drake was a critic who had earlier written on Ossian poems and Highland superstitions. But if he had long been a lover of the Gothic and the melancholic, his conversion to the Elizabethans was slow, as in 1798, he was still taking Henry Headley to task for the anthologist's view that the moderns had lost forever "that Key...given by Nature to Shakspeare, and which was likewise in the hands of some few of his contemporaries, 'that oped the sacred source of sympathetic tears'".⁴³ Now, writing under the impact of a new enthusiasm for the old drama, he became aware of the

importance of assigning a place to the minor Elizabethans, if only because they made "the times". His ideas on Webster were definite and explicit. Webster he would put "immediately after Ford, as next, perhaps, in talent", but resembling Ford "in a predilection for the terrible and the strange, but with a cast of character still more lawless in impetus".⁴⁴ He too could not refrain from comparing Webster with Shakespeare:

...the fifth act of his *Vittoria Corombona* shows, also, with what occasional skill he could imbibe the imagination of Shakspeare, particularly where its features seem to breathe a more than earthly wildness. The danger, however, which almost certainly attends such an aspiration after, what may be called inimitable excellence, Webster has not escaped; for, where his master moves free and etherial, an interpreter for other worlds, he but too often seems labouriously striving to break from terrestrial fetters; and, when liberated, he is, not unfrequently, "an extravagant and erring spirit". Yet, with all his faults, his tragedies are, most assuredly, stamped with, and consecrated by, the seal of genius.⁴⁵

What is noteworthy here is the new treatment given to Webster by the men who wrote the "surveys" of literature. Before Lamb, the innumerable writers of the *Rise and Progress of English Poetry* rarely mentioned the name of Webster, even when they touched upon Elizabethan dramatic poetry; after Lamb, literary historians have not only mentioned Webster, but generally discussed him at some length. If Nathan Drake is not to be ranked among the historians, we have also the instance of Henry Hallam, whose work, mentioned on an earlier occasion, was at least European in scope. Hallam lumped together such men as Marston, Chapman, Rowley, Tourneur, and Middleton, and dismissed them summarily in one paragraph,⁴⁶ but to Webster he extended the courtesy of three pages.⁴⁷

The periodicals, too, felt more inclined to look in Webster's way. *Blackwood's Edinburgh Magazine* atoned for its earlier silence over the *Specimens* by doing several things at the same time. It made use of the opportunity of the publication of *The Works of Charles Lamb* in 1818 not only to review Lamb's achievement as a whole, but to discuss

Lamb's views on the old drama in particular.⁴⁸ In the same year, the periodical also printed a series of "Analytical Essays on the Early English Dramatists". The first three of these essays dealt with Marlowe, but the object for the discussion in the next two essays turned out to be Webster, whose two tragedies were considered at great length. The first article, appearing in the number for March,⁴⁹ dealing with the more popular *Duchess of Malfi*, starts with a general discussion of the differences between Shakespeare and his fellow dramatists. The writer, who signed himself "H. M.", thinks that though all write great poetry, yet none can compete with Shakespeare in the understanding of man. None can really draw characters. Least of all Webster, who, in spite of his "truly original genius", is essentially a dramatist of "some single scenes". He paints vices and crimes with an extravagance "which nevertheless makes them impressive and terrible". But there is nothing of "what Wordsworth calls 'a mighty stream of tendency' in the events of his dramas, nor, in our opinion, is there a single character that clearly and boldly stands out before us, like a picture". This being the case, the writer is reduced to present a few extracts from the play by way of illustrating the plot. Before he ends, however, "H. M." takes care to quote Lamb's passage on "all the several parts of the dreadful apparatus".

There is even less criticism in the second article, appearing in August,⁵⁰ which consists in the same manner of extracts from the play strung together by a few explanatory remarks, mostly on the plot. But the concluding paragraph is revealing:

There is great power in this drama, and even much fine poetry,—but on the whole, it shocks rather than agitates, and the passion is rather painful than tragical. There are, in truth, some scenes that altogether revolt and disgust,—and mean, abandoned, and unprincipled characters occupy too much of our attention throughout the action of the play. There is but little imagination breathed over the passions of the prime agents, who exhibit themselves in the deformity of evil,—and scene follows scene of shameless profligacy, unredeemed either by great intellectual energy, or occasional burstings of moral sensibilities. The character of Vittoria Corombona, on which the chief interest of

the drama depends, is sketched with great spirit and freedom,—but though true enough to nature, and startling by her beauty and her wickedness, we feel that she is not fit to be the chief personage of tragedy, which ought ever to deal with great passions, and with great events. There is, however, a sort of fascination about this "White Devil of Venice", which accompanies her to the fatal end of her career,—and something like admiration towards her is awakened by the dauntless intrepidity of her death.

I will not in my death shed one bare tear,
Or if look pale, for want of blood, not fear.

"H. M." preceded Kingsley in a few things, but we read with a smile the appellation "this 'White Devil of Venice'", because by this time Lamb had thoroughly vindicated himself in the cause of Webster. It can be asserted with what may seem undue boldness that all writers on Webster have since written with the ghost of Elia at their back.

His influence can be felt even where we do not expect it. Thomas Campbell's anthology, *Specimens of the British Poets*, published posthumously in 1819, would appear at first glance to have nothing in common with Lamb's work except for the "Specimens" in the title. It is a vast, sevenvolume collection, including all important English poets from Chaucer to Christopher Anstey. A poet himself, Campbell lacked neither discernment nor sensibility in his appreciation of early poetry. Yet we find him working, when he came to make his selections from Webster, in the large shadow of Lamb. For, with the exception of Vittoria's lines on her dream, all Campbell's selections from Webster can be found in the other and earlier *Specimens*. Campbell does not seem to have loved Webster dearly. The prefatory matter he wrote before the Webster passages betrays a somewhat satirical tone:

From the advertisement prefixed to his Duchess of Malfy, the piece seems not to have been successful in the representation. The author says, "that it wanted that which is the only grace and setting out of a tragedy, a full and understanding auditory". The auditory, it may be suspected, were not quite so much struck with the beauty of Webster's horrors, as Mr. Lambe seems to have been in writing the notes to his *Specimens of our old Dramatic Poetry*.⁵¹

But the satire loses much of its sting when we reflect that the satiriser has here moved, without authority, Webster's "To the Reader" from

The White Devil, its rightful owner, to the sister play.

That was the sort of mistake not likely to be made by John Payne Collier. With Collier, a "black-letter" reader, we return for a moment from aesthetic criticism to historical scholarship. Many scholars had quoted Gildon's statement that Webster was the parish clerk of St. Andrew's, Holborn. Dilke in 1815 searched into the records without finding anything.⁵² Now, in *The Poetical Decameron*,⁵³ published in 1820, Collier sought to identify the dramatist with John Webster, "the late Chaplain in the Army", who wrote *The Saint's Guide*, 1653, and *Academiæ Examen*, 1654. From this he was led to the further conclusion that the dramatist had been for a time a stage actor, because Thomas Hall wrote a reply to *Academiæ Examen* entitled *Histrionastix. A Whip for Webster (as 'tis conceived) the Quondam Player*. These assertions were to engage the attention of Dyce ten years later, who made a thorough investigation of the whole question and substantially disagreed with Collier.⁵⁴ Collier, it may be mentioned in passing, took up the biographical problem of Webster again in 1846, when he claimed to have discovered in the registers of St. Leonard's, Shoreditch, records of the marriage of a John Webster with Elizabeth Sutton on 25 July 1590, and of the baptismation of an Alice Webster, daughter of John Webster, on 9 May 1606.⁵⁵ Whatever the reliability of Collier⁵⁶ and the acceptability of his conclusions, his activities in this field indicated the new importance attached by scholarship to an understanding of the life and work of Webster.

3

But it was essentially an age of great Romantic writers. The year in which Collier speculated on the life of Webster also saw the publication of Hazlitt's *Lectures Chiefly on the Dramatic Literature of the Age of Elizabeth*. The lectures were delivered in the last two months of 1819 at the Surrey Institute. Before 1819 Hazlitt's knowledge of the lesser Elizabethans was probably indifferent, though he had discussed Shakespeare, Ben Jonson, and Beaumont and Fletcher. For he

consulted Lamb and borrowed books from Procter before he went down to Winterslow Hut, in Wiltshire, to prepare the lectures.⁵⁷ After a stay of six weeks, during which he must have spent the evenings reading the plays before his cottage fire,⁵⁸ Hazlitt emerged in London, flushed but triumphant, with the lectures written and his head full of the old dramatists. Like Lamb in the *Specimens*, Hazlitt is at his most readable in the *Lectures*. The style is of the Winterslow period, which is, as he defines himself,

apt to be redundant and excursive. At other times it may be cramped, dry, abrupt; but here it flows like a river, and overspreads its banks. I have not to seek for thoughts or hunt for images: they come of themselves, I inhale them with the breeze, and the silent groves are vocal with a thousand reflections—

And visions as poetic eyes avow,

Hang on each leaf, and cling to ev'ry bough.⁵⁹

The criticism is characterised by sweep as well as penetration. He starts with a general view of Elizabethan literature, rushes through Lyly, Marlowe, Heywood, Middleton, and Rowley in the second lecture, to linger for a while on Marston, Chapman, Dekker, and Webster in the third, and thence to pass on, like a whirlwind, to Beaumont and Fletcher, Ben Jonson, Ford, and Massinger, who make up the subject of the fourth. The fifth lecture is devoted to such early plays as *The Four P's*, *Return from Parnassus*, *Gammer Gurton's Needle*. Then there is a sudden plunge downward to the time of Drayton and Daniel, of Sir Francis Beaumont and Phineas Fletcher, but in the confusion, the *Arcadia* and the sonnets of the much earlier Sir Philip Sidney are also seized for questioning. The seventh lecture has even less to do with the drama, being essentially a comparison of the style of Bacon with that of Sir Thomas Browne and Jeremy Taylor. In the eighth and last lecture, Hazlitt rounds off the subject in the grand manner by an essay on the spirit of ancient and modern literature, illustrated by contrasting the Elizabethans with the German drama.

Our concern is, however, with Hazlitt on Webster. Webster he contrasts with Dekker. At first, we are not sure if he does not think Dekker the more satisfying of the two:

Webster would, I think, be a greater dramatic genius than Decker, if he had the same originality: and perhaps is so, even without it.

Then we know where he really stands when, once again, Shakespeare is used as the yardstick:

His White Devil and Duchess of Malfy, upon the whole perhaps, come the nearest to Shakespear of any thing we have upon record; the only drawback to them, the only shade of imputation that can be thrown upon them, "by which they lose some colour", is, that they are too like Shakespear, and often direct imitations of him, both in general conception and individual expression. So far, there is nobody else whom it would be either so difficult or so desirable to imitate; but it would have been still better, if all his characters had been entirely his own, had stood out as much from others, resting only on their own naked merits, as that of the honest Hidalgo, on whose praises I have dwelt so much above. Decker has, I think, more truth of character, more instinctive depth of sentiment, more of the unconscious simplicity of nature; but he does not, out of his own stores, clothe his subject with the same richness of imagination, or the same glowing colours of language. Decker excels in giving expression to certain habitual, deeply-rooted feelings, which remain pretty much the same in all circumstances, the simple, uncompounded elements of nature and passion:—Webster gives more scope to their various combinations and changeable aspects, brings them into dramatic play by contrast and comparison, flings them into a state of fusion by a kindled fancy, makes them describe a wider arc of oscillation from the impulse of unbridled passion, and carries both terror and pity to a more painful and sometimes unwarrantable excess. Decker is contented with the historic picture of suffering; Webster goes on to suggest horrible imaginings. The pathos of the one

tells home and for itself; the other adorns his sentiments with some image of tender or awful beauty. In a word, Decker is more like Chaucer and Boccaccio; as Webster's mind appears to have been cast more in the mould of Shakespear's, as well naturally as from studious emulation. The Bellafront and Vittoria Corombona of these two excellent writers shew their different powers and turns of mind. The one is all softness; the other "all fire and air". The faithful wife of a Matheo sits at home drooping, "like the female dove, the whilst her golden couplets are disclosed"; while the insulted and persecuted Vittoria darts killing scorn and pernicious beauty at her enemies. This White Devil (as she is called) is made fair as the leprosy, dazzling as the lightning. She is dressed like a bride in her wrongs and her revenge.

By this time, we have forgotten the question of who is the greater of

the two. Hazlitt does not have any definite idea as to who is, and the question is perhaps not so very important. The great thing is not to be side-tracked, when there is such wonderful criticism before us. Webster and Dekker represent two types, equally great, but vitally different. It is curious how people had not thought of comparing them before Hazlitt did,⁶⁰ as they set off each other's merits so perfectly when seen in company.

Hazlitt, of course, had the benefit of reading Lamb in 1819, as Lamb did not have of reading Hazlitt in 1808.⁶¹ But there are times when Lamb serves Hazlitt merely as a foil. The Cornelia scene in *The White Devil*, of which Lamb has sung the praise of the dirge, does not remind Hazlitt of *The Tempest*, but of *Lear*:

...the inmost folds of the human heart, the sudden turns and windings of the fondest affection, are also laid open with so masterly and original a hand, that it seems to prove the occasional imitations as unnecessary as they are evident.

Nor can Hazlitt agree with Lamb about Webster's ability "to move a horror skilfully, to touch a soul to the quick". *The Duchess of Malfi*, whose greater reputation in the eighteenth century we have noted, strikes Hazlitt as not "quite so spirited or effectual a performance as the *White Devil*", because, though containing "occasional strokes of passion" that are "even profounder and more Shakespearian", the play as a whole is more laboured. But an even greater objection is that in it "the horror is accumulated to an overpowering and insupportable height". The mad men and the dead man's hand are too much for Hazlitt, as they exceed

the just bounds of poetry and of tragedy. At least, the merit is of a kind, which, however great, we wish to be rare. A series of such exhibitions obtruded upon the senses or the imagination must tend to stupefy and harden, rather than to exalt the fancy or meliorate the heart. I speak this under correction; but I hope the objection is a venial commonplace.

Hazlitt put it apologetically, probably he was aware of how on this particular point Lamb had been harassed by friend and foe alike.

Hazlitt's business with Webster is by no means over when the

lectures are delivered and published. Webster is mentioned many times afterwards,⁶² and has even a share of the innumerable quotations and misquotations with which Hazlitt embellishes his writings.⁶³ But Hazlitt is never content with mere quoting. His is the true critic's job, to compare and judge. He is more concerned, if one may risk a generalisation, with the relative value of literature, as the narrower and purer Lamb is more with the absolute. In any case, with Webster he is not "holding himself in",⁶⁴ for presently we find him comparing Webster with another "Satanic" writer, Byron himself. Reviewing Byron's *Marino Faliero*, Hazlitt writes:

"One touch of Nature makes the whole world kin:"—one line of Webster, Decker, or Ford (to say nothing of Shakspeare), is worth all the didactic and descriptive paraphrases of what would neither be seen nor felt by men in a state of strong agitation as they occur in this play.⁶⁵

But a more definite comparison is made when he returns to Lord Byron's dramatic "ventures" in the essay "On Reason and Imagination", collected in *The Plain Speaker*, 1826:

Lord Byron has launched several of these ventures lately (if ventures they may be called) and may continue in the same strain as long as he pleases. We have not a number of *dramatis personae* affected by particular incidents and speaking according to their feelings, or as the occasion suggests, but each mounting the rostrum, and delivering his opinion on fate, fortune, and the entire consummation of things. The individual is not of sufficient importance to occupy his own thoughts or the thoughts of others. The poet fills the page with *grandes pensées*... As an instance of the opposite style of dramatic dialogue, in which the persons speak for themselves, and to one another, I will give, by way of illustration, a passage from an old tragedy, in which a brother has just caused his sister to be put to a violent death...

Hereupon what surprise could there be when we find Hazlitt quoting Ferdinand saying "Cover her face: mine eyes dazzle; she died young". Having quoted, he goes on, but this time the trouble will be where for us to stop him:

How fine is the constancy with which he first fixes his eye on the dead body, with a forced courage, and then, as his resolution wavers, how natural is his turning his face away, and the reflection that strikes him on her youth and beauty and untimely death, and the thought that they were twins, and his

measuring his life by hers up to the present period, as if all that was to come of it were nothing! Now, I would fain ask whether there is not in this contemplation of the interval that separates the beginning from the end of life, of a life too so varied from good to ill, and of the pitiable termination of which the person speaking has been the wilful and guilty cause, enough to "give the mind pause"? Is not that revelation as it were of the whole extent of our being which is made by the flashes of passion and stroke of calamity, a subject sufficiently staggering to have place in legitimate tragedy? Are not the struggles of the will with untoward events and the adverse passions of others as interesting and instructive in the representation as reflections on the mutability of fortune or inevitableness of destiny, or on the passions of men in general? The tragic Muse does not merely utter muffled sounds: but we see the paleness on the cheek, and the life-blood gushing from the heart!...

And gushing, Hazlitt reads Byron a lecture on the importance in tragic art of an understanding of humanity.

But Byron's mind about how to write a tragedy had long been made up. He was determined not to follow "the old dramatists, who are full of gross faults, pardoned only for the beauty of their language".⁶⁶ For his *Marino Faliero*, the model would be the "regular tragedies" of the Greeks:

...and do not judge me by your mad old dramatists, which is like drinking Usquebaugh and then proving a fountain: yet after all, I suppose that you do not mean that spirits is a nobler element than a clear spring bubbling in the sun: and this I take to be the difference between the Greeks and those turbid mountebanks—always excepting B. Jonson, who was a Scholar and a Classic.⁶⁷

We have no doubt that these mountebanks included Webster, whom Byron knew well—so well as to think of *The White Devil* even in the thick of the Guiccioli affair:

The next is that I have been the cause of a great conjugal scrape here—which is now before the *Pope* (seriously I assure you) and what the decision of his Sanctity will be no one can predicate. It would be odd that having left England for one Woman (Vittoria Corombona the "White Devil" to wit) I should have to quit Italy for another.⁶⁸

He could have read Webster in the old quartos, or else Dodsley, as his acquaintance with Lamb's *Specimens* came about slightly later. In 1821, in one of his conversations with Thomas Medwin, he said:

I have just been reading Lamb's *Specimens*, and am surprised to find in the

extracts from the old dramatists so many ideas that I thought exclusively my own. Here is a passage, for instance, from "The Duchess of Malfy", astonishingly like one in "Don Juan".⁶⁹

Then he went on to expose the lack of foundation of the charges⁷⁰ laid against him that he had plagiarised the old dramatists, because "these Specimens of Lamb's I never saw till today". But he was not going to be squeamish about borrowing from others. "If it be a fault, I do not pretend to be immaculate", he told Medwin, adding, "I will lend you some volumes of Shipwrecks, from which my storm in 'Don Juan' came".⁷¹

The old dramatists, Webster eminently included, were therefore merely so many bundles of phrases and images for Byron to invade and take "like a monarch". They had nothing to teach him in the art of playwriting. They were not models, he told Shelley:

I read *Cenci*—but, besides that I think the *subject* essentially undramatic, I am not an admirer of our old dramatists as models. I deny that the English had hitherto had a drama at all. Your *Cenci*, however, was a work of power and poetry.⁷²

But Shelley was apparently of a different mind about the old dramatists. He did not borrow verbally from them, only in spirit he wrote his tragedies like one of them. That is why it is difficult to substantiate the oft-made statement that *The Cenci* is Elizabethan, even Websterian, though of course one could point to the crime, the horror, the trial and conviction in the fifth act as tentative parallels to the incidents in *The White Devil*. Shelley himself, who would stock his library with all the old dramatists,⁷³ loved *The Duchess of Malfy* especially well. We have again the conversations recorded by the indefatigable Medwin:

Among English plays he was a great admirer of *The Duchess of Malfy*, and thought the dungeon scene, where she takes her executioners for allegorical personages, of Torture and Murder, or some such grim personifications, as equal to anything in Shakspeare, indeed he was continually reading the Old Dramatists—Middleton, and Webster, Ford and Massinger, and Beaumont and Fletcher, were the mines from which he drew the pure and vigorous style that so highly distinguishes *The Cenci*.⁷⁴

This must have been particularly soothing to the ears of Lamb, who, as we have seen, was virtually alone in his appreciation of the "allegorical personages".

There was the same fascination with the horrors in the old drama in Thomas Lovell Beddoes, whose *Bride's Tragedy* and *Death's Jest-Book* actually remind one of Webster, but consciously he was against what he called the Elizabethan "ghosts":

Say what you will—I am convinced the man who is to awaken the drama must be a bold trampling fellow—no creeper into worm-holes—no reviser even—however good. These reanimations are vampirecold. Such ghosts as Marloe, Webster, &c. are better dramatists, better poets, I dare say, than any contemporary of ours—but they are ghosts—the worm is in their pages—and we want to see something that our great-grandsires did not know. With the greatest reverence for all the antiquities of the drama, I still think that we had better beget than revive—attempt to give the literature of this age an idiosyncrasy & spirit of its own, & only raise a ghost to gaze on, not to live with—just now the drama is a haunted ruin.⁷⁵

Beddoes's case, however, was the interesting one of a divided mind. For he not only kept on reading the vampires and the worms, but actually printed lines⁷⁶ from Webster's *Appius and Virginia* as a sort of motto on the title-page of *The Improvisatore*, Oxford, 1821, a book of his poems. Further, he advised a friend of his to buy the new collections of the old plays now appearing in the market:

You are very unnecessarily & unsolicitously suspicious of No. 1 Ancient B. Drama. Turn to your Massinger Vol. 1. Preface [and] look at the list of Plays saved from the backsides of Warburton's pies. It is out of the Landsdowne collection, undoubtedly authentic, and contains some very fine things. It is to be followed by other most desirable reprints—The Devil's Law-Case—Marston's Insatiate Countess—Comedies of Middleton, & other precious scarcities. Moreover it is an extremely pretty little book, with a wood-cut of the Bull Theatre and superabundantly worth the last half-crown in your purse. You, who have bought Kirk White, to hesi[tate!]⁷⁷

But the comparison held not only with the forgotten Kirk White. There were times when Beddoes himself despaired of ever being able to write as well as the Elizabethans:

Read only an act of Shakspear, a bit of Milton, a scene or two of the

admirably true Cenci, something of Webster, Marston, Marlowe, or in fact anything deeply, naturally, sociably felt, and take to these Textbooks—you will feel at once how forced, artificial, insipid &c. &c. all such things are.⁷⁸

What we are witnessing at present is the gradual unfolding of a new situation of the reputation of the hitherto obscurer Elizabethans and Jacobean in general, and of Webster in particular. It might be said that, while in the past Webster's reputation rose and fell with the lesser Elizabethans, from now on their reputation was to rise and fall with his. Perhaps it would be over-ingenious to point out that in the several inventories of the old dramatists listed by Beddoes, Webster's name rushes into our eyes either first or close upon the first. He was of course not universally liked. But he was read, criticised, eliciting undying admiration in some, and utter disgust in others. Gone were the days when only a few scholars patronised him by adapting or printing his plays, and felt apologetic when they had to state their reasons for doing so. Now, on the contrary, even first-rate poets like Byron felt the unseen, unintended aggressiveness of Webster and his fellows. The very strong words Byron used against them indicated not merely a reaction, but a resistance, to the influence of these old writers which had now subtly spread into creative literature. The single most important agent to bring about this change was not the critics on the periodicals,⁷⁹ hardly the scholars, but Charles Lamb with his selections and notes in the *Specimens*.

And Lamb himself, now that his anthology was being read⁸⁰ and discussed by the right kind of people—for one has reason to believe that the general reading public of the *Specimens* remained small, the second edition being not printed until 1835—and his own serfdom to the dead wooden desk of East India House had come to an end, returned once again to "the princely apartments" of the British Museum to read the old plays in the Garrick Collection. His old habit of making extracts from them was still alive, and he sought to do greater justice to the works of Shakespeare's predecessors, men like Peele, Greene, and Lodge, by extracting more passages from them

than he did in 1808. These extracts, with rather sparser notes, began to appear in the *Table Book*, a weekly edited by William Hone, in 1827. In the interval between the two explorations of the treasures in the Museum, Lamb had not forgotten Webster. He quoted him:⁸¹

...Would Wilberforce give us our Tuesdays? No, d—n him.

He would turn the six days into sevenths,

And those 3 smiling seasons of the year

Into a Russian winter

Old Play

He paraphrased him:⁸²

...Never mind my dulness, I am used to long intervals of it. The heavens seem brass to me—then again comes the refreshing shower. "I have been merry once or twice ere now."

Now, "culling at will the flower of some thousand Dramas" again, he transcribed six passages from *The Devil's Law-case*. The note he appended to these passages is too short to be in his best manner, but is nevertheless suggestive:

Webster was parish clerk at St. Andrew's Holborn. The anxious recurrence to church matters, sacrilege, tombstones, with the frequent introduction of *dirges*, in this, and his other tragedies, may be traced to his professional sympathies.

Perhaps he did not know that records did not bear out Gildon's statement, or disprove it. But searching into the records was the job of the scholars, and scholars necessarily complemented Lamb's work, which was to brush off the dust that had settled on old reputations and to set the tone for critical appreciation. He performed both admirably on Webster as on other dramatists. For a long time to come, Webster was to be Lamb's Webster, that is, Webster as Lamb's selections and notes made him out to be. But the completer and in the textual sense purer Webster was also taking shape. Not long after Lamb's lines were written, a scholar not only looked into parish registers and examined the documents in the Prerogative Office for Webster's life, but collated diligently the texts of his plays. His labour soon yielded result, and Lamb lived to see the publication in 1830 of

the first complete edition of John Webster prepared by the Rev.
Alexander Dyce.

1949

玖 查尔斯·兰姆和约翰·韦伯斯特

(一)

有了查尔斯·兰姆，约翰·韦伯斯特也有了出头之日。一直以来，约翰·韦伯斯特与学者、书商为伍，他的名字也不过与目录索引、字典编撰、最多是文集选编相连。是兰姆第一次郑重其事地把韦伯斯特的戏剧作为文学来评论。

考虑到希尔伯德^[1]以来学术界对伊丽莎白时代的研究有了日新月异的变化，斯文本恩^[2]对兰姆的大力褒奖也要加以修正了，但那个由来已久的观点却无需大改——当然那也是兰姆本人的观点——即兰姆单枪匹马地拯救了昔日的剧作家^[3]。说什么在兰姆之前就有了多德斯雷的《昔日的戏剧》、托马斯·霍金的《英国戏剧的起源》和贝克^[4]的《戏剧传记》，可谓是不着边际。兰姆时代的吉尔彻斯特这么认为，现在依然有人这么认为。兰姆承认读过这些评论，但他知道他们都没做过他要做的事情，也即是从文学批评的角度来评价昔日的戏剧。之前的选集多把这些戏剧看作古文物。尽管那些选集的编者偶有只言片语透露自己对这些剧作的看法，今天我们一看便知他们看待戏剧的角度和兰姆不同。比如，多德斯雷喜欢昔日的戏剧，是因为其喜剧性诙谐。且听兰姆怎么说吧：

我所摘选的部分与其说以诙谐和幽默见长（虽然昔日的戏剧在这方面很出色），不如说是些深情的场景（有时极度深情）、有趣的场面、严肃的描写。这些部分与其说是诙谐，不如说更像诗，而且是悲剧诗，非喜剧诗。

兰姆和早期的戏剧迷毫无共同之处。虽说悲剧诗不见得就比喜剧性诙谐好，但是至少不一样。兰姆的独具慧眼在于他第一次强调了这些戏剧的某种特质，之前的评论家对此少有提及，或者即便提及，也多斥其为“狂野”和“无教养”。兰姆则极力推崇，视之为足以使这些剧作家与莎士比亚一样不朽的主要原因之一。如果说兰姆踏入的是一块奥迪塞斯们和吉福德们充分耕耘过的土地，那可谓是混淆了事情与价值的界限。这些勤劳的耕耘者们不光枯燥乏味，普通读者少有问津，而且其关注的也多是与那些剧作家相关的生平信息、文献考证和文本问题。所有这些兰姆都不感兴趣。兰姆没有在其选篇后附上任何剧作家的生平信息，只是推荐有

此需要的读者去读多德斯雷和贝克。在文本方面，他慧眼识出《两个贵族亲戚》的前两场出自莎士比亚之手，但他毫不犹豫地随意删减，不光删减冗余的内容，而且删减“所有那些作者还不如不写的句子”。由于这些“罪行”，学者们不断地对他严加指责，但他们当中没有谁能像他这样以确凿的口吻带领读者畅游在作品自身的美好之中。

另一方面，也有迹象表明他受不久前刚出版的大众选集之编者的影响更大。亨利·海德利的《英语古诗精品》（1787）和乔治·艾黎士的《早期英语诗人范作》（1790）都在当时取得了一定程度的成功，兰姆不可能充耳不闻。艾黎士的集子在1801年扩编成了三卷本，当时兰姆的第二本笔记已经准备就绪（他的第一本笔记于1796年付之一炬）。“范作”一词在1804年再次被艾黎士用在该系列的姊妹版《早期英语诗体传奇范作》的书名中；也出现在乔治·伯内特编写的《早期英语散文范作》一书的书名中。骚塞 [5] 在1804年6月给柯尔律治写的一封信中谈到一个选集，还说兰姆可以编得很好。1807年骚塞自己选编了《晚期英语诗人范作》，作为艾黎士那部选集的续编。简而言之，“范作”一词在兰姆时代是个流行词，这一点即能否定沃森对兰姆的批判，因为沃森说兰姆把剧作家们作为博物馆陈列品对待。兰姆对同时代选集的关注可以从其对诺思《雅萃集》的评价中进一步得到证实，这套教科书选集把散文和诗歌分别成卷，在18世纪晚期出过多个版本。1796年的两卷本致力于选些“对年轻人有益的，实用且又欢愉的诗歌”，并包含一章戏剧诗。同年六月底兰姆在给柯尔律治的信中写道：

我希望你能做些什么，以便让昔日的剧作家被更多人知晓。看到评论书籍中堆积一段段寻常的引文，竟都没提到马辛杰 [6]、鲍蒙特和弗莱彻，我火冒三丈，随后的剧作家（唯有奥特维除外 [7]）根本无法与之相比。愚蠢的诺斯却连一个也没选。

兰姆并非真在催促柯尔律治。他只是在脑中盘算着编一本选集。他那本记录优秀戏剧段落的笔记本不断在增厚。但是他的《莎士比亚同时代英国戏剧诗人之范作》却姗姗来迟，从最初萌生这个念头到1808年出书，整整用了12载。

但是一经出版，这本书就载入了文学史册。虽然起初学者们对它嗤之以鼻，但整个19世纪，它都是唯一权威的伊丽莎白时代的戏剧选，尽管也不乏带有敌意的批评。现在普通读者在一本小巧的集子里就可把莎士比亚以外的所有昔日重要剧作家的作品一览无余了。编选模式介于只

选少量名言警句的早期选集和多德斯雷的全剧收录之间。照搬多德斯雷的模式只会使兰姆成为第二个多德斯雷，甚至是逊色很多的艾萨克·里德[8]。或许，兰姆最反对多德斯雷和里德的地方就是他俩那令人生畏的大部头巨著（分别为八卷本和十二卷本）会把胆怯的读者吓跑，或让他们望而却步。而他兰姆要做的是把读者留下。所以他要一个场景一个场景来选，选“那些深情的场景（有时极度深情）、有趣的场面、严肃的描写。这些部分与其说诙谐，不如说更像诗，而且是悲剧诗，非喜剧诗。”他的读者始终颠簸在情感浪潮的巅峰，如果给他的《范作》起一个别名，最恰当的莫属“戏剧冲突集”了。但是我们也应注意“诗”这个词。兰姆并不是以剧院演员的视角看待昔日的戏剧，而是将其视为适合在书房潜心阅读的文学作品。但这并不是因为他无视其戏剧效果，实际上，没人能像他那样对戏剧有那么敏锐和充满洞见的感知了；而是因为他认为有些戏剧效果是如此微妙，普通的舞台演出只会毁掉人在阅读剧本时才有的美好想象，即便是最好的演员也不行：

我绝不会背着良心，说忘了数年前第一次看到莎士比亚的一出悲剧在舞台上演出时带给我的满足感，当时是两位出色的演员[肯布尔和西登斯夫人]担任主角。就好像之前朦胧无状的念头有了具体的显现一般。但是我们余生都要为这种幼稚的愉悦、这种具体感付出高昂的代价。新鲜感过去之后，我们会发现，与其说一个念头有了具体的显现，倒不如说我们只是把微妙的幻影具体化，使之降为具体有形而已。为了追求一个不可企及的东西，我们放弃了梦想。

莎士比亚尚且如此，其他剧作家就更可想而知了：莎翁可是迄今为止是最杰出的剧作家。因此，兰姆强调戏剧应该去阅读而不是去观看，也是可以理解的。一生热爱文字的他自然分外迷恋书面文字的永恒之美。我们也不能诟病他只选难忘场景的做法，因为要编一本即方便携带又涵盖全面的集子，这也许是他能想到的最佳方式了。但是如果抛开选集这件事不谈，他的观点和做法却容易让人误以为戏剧和诗歌是泾渭分明的。亚彻把昔日戏剧的戏剧效果——或者缺乏戏剧效果——同其绝对的诗学价值严格区分开来，斯文本恩和格斯则干脆把它们称作“诗”。

但是在选编《范作》时，兰姆对诗歌的专注使之对剧中的人物和场景不时有灵感闪现，这些灵感都恰如其分地写在了注释里。约翰逊博士曾说过注释是魔鬼，不管有多不可或缺。但他显然没把自己对波洛涅斯[9]的注释以及兰姆编撰这部选集的注释包括进去，因为这种注释正是无助的读者期望文学评论家所能提供的。评论家应该画出路线图，让读者得以畅游在作者大脑中的未知之乡，但是不能越俎代庖，替读者去

游、去想。这部《范作》的注释包括了兰姆的一些最自然、最辉煌的文字——正是它们成就了这部选集的不朽——但是这些注释并没取代读者自己的判断。恰如其分的夸张勾起了读者的胃口，让其迫不及待地去读原作，因为兰姆的激情颇具传染性。他兴致勃勃地侃侃而谈，最后与苦难的男女主角感同身受。此处，我们又一次看到了兰姆和学者的区别。学者们更关注历史，关注一个时代与另一个时代的不同，而兰姆这个纯粹、简单又满怀激情的评论家感兴趣的却是文学的普适性价值。他鲜有什么历史感，评论时往往带入主观之见。这种文学批评的不足之处已有评论家提及，但就《范作》而言，最大的不足是均衡感的缺失。兰姆惯把莎士比亚作为衡量的标准就是一例。或许要做到不把他们与莎士比亚相比也难，但是比来比去，兰姆似乎怎么也衡量不出谁更接近莎士比亚。海伍德 [10] 是“写散文的莎士比亚”，福特 [11] 是“英国一流的诗人”“仅次于莎士比亚”。“莎士比亚之后所有的诗人各方面的才情”都逊于鲍蒙特 [12] 和弗莱彻 [13]。“在所有的英国剧作家中，在描写和讲道理方面，在相对不那么戏剧性的篇章里，最接近莎士比亚的或许要数查普曼 [14] 了。”当然，还有他把韦伯斯特《白魔》中的挽歌和莎士比亚《暴风雨》中的短歌所作的出色对比。诚然，我们这样孤立地评价他的只言片语，而没有参考他随后的详细解释，显得有失公允，但读者的第一印象肯定是：在兰姆文学批评的天平上，可怜的莎士比亚被太过频繁地用作砝码了。一种解释也许就是兰姆一直就为那个时代最出色的剧作家所吸引。一旦喜欢上这个人，他就要对之和盘托出，决不能有所保留。若说这种方式有些夸张，这也解释了为何他能激起读者狂热的阅读兴趣，而那些老学究和选集编者却只能引来不温不火的好奇而已。一言以蔽之，他的注释是重新唤起大众去关注那些不太为人所知的名字的唯一重要因素，比如马斯顿 [15]、海伍德、米德尔顿 [16]、罗利 [17]、德克 [18]、特纳和韦伯斯特，这些人此前都没被学者以恰当的方式收入选集，也不为普通读者所知。

兰姆的选编方法对韦伯斯特这样的剧作家尤为有利。直到最近，评论界一向都还认为韦伯斯特写单个场景往往出彩，但整部剧的谋篇不够理想。兰姆选的恰恰就是那些出彩的场景。事实上，考虑到有限的篇幅，很难想象还有谁能比兰姆做得更好、还能选出更好的篇章。比如《魔鬼的案例》，兰姆选了其中康塔瑞诺和埃尔科莱准备决斗的场景，因为他认为那个场景“在描写有所把持、颇具绅士风度的争执方面堪称典

范”。他从《阿庇斯和弗吉尼亚》中选取的是父亲亲手杀死自己挚爱的女儿的场景。但是更充分的展示可见于让韦伯斯特从此得以青史留名的那两部伟大剧作。关于《玛尔菲女公爵》，我们不仅可以读到女公爵和安东尼奥偷偷结婚的卧房场景，还可读到第四幕的大部分，从蜡像尸体到疯人舞，再到女公爵被勒死以及费迪南德的追悔莫及。从另一部同样丰富的宝藏《白魔》中，兰姆选取的是那个哀悼场景和审讯维多利亚的全过程。或许我们亦可以选出同样的段落，但我们肯定写不出兰姆那种突显出韦伯斯特天资的注释来：

引入女公爵死亡的所有那些可怕的场景：蜡像的以假乱真，疯人的面具，造墓者，敲钟人，生者的挽歌，逐渐加深的屈辱——这些场景与我们通常想到的复仇手段可谓相距甚远了，但加诸于女主人公身上的离奇苦难与之相比，不可思议程度更是远甚，后者远不是一般的诗人所能构想出来的。女公爵经历的仿佛不是现世的磨难，所以她的语言也似乎不属于这个世界。她一直活在恐惧里，直到恐惧“成为她的一部分”。她说着绝望的语言，有如生活在地狱深渊的灵魂。巧妙地驾驭恐惧，触到灵魂深处，恐惧最大限度地叠加，折磨一个生命，直至其生命之花枯萎凋零，然后再用凡人的伎俩来个最后一击：这些都只有韦伯斯特写得出。二流的天才亦可以“恐惧堆积恐惧”，但却做不到韦伯斯特这样。他们误以数量为质量；他们“用画出的魔鬼吓唬孩子”；但他们不知道如何直击读者的灵魂。他们的恐惧缺少尊严，他们的恐吓不够得体。

这位意大利白魔做了一件貌似有理的错事，又用天真的大胆为自己辩护，我们仿佛看到了那张让她如此自信的无与伦比的美丽脸庞，在她结束辩护时几乎都希望法官、控诉方、旁听的严肃大使们以及整个法庭能站起来为她辩护了，尽管她罪证确凿；正如《堂吉珂德》中的牧羊人“毫不会理会她当面拒绝他们的决心”，愿意追随美丽的牧羊女马尔赛拉一样。

她的辩护是多么甜美和可爱，
就像芳香玫瑰花上的渍斑，
使她如花的美名蒙上污点！

我从没见过如此凄美的葬礼挽歌，哀悼马尔塞洛的挽歌，除了《暴风雨》中的那首让费迪南德想起溺水父亲的短歌。前一部是土，散着土息；后一部是水，泛着水汽。两个都是一样的情感强烈，仿佛化在了那个要素之中。

这些都让我们领略了最杰出的兰姆。很难想象，看完这样的注释谁还能够按兵不动，而不去把韦伯斯特疯狂地品尝呢。但是如同兰姆对福特的《破碎的心》所作的注释一样，这些注释也是兰姆最惹非议的文字。简而言之，浪漫派对这些注释大加赞赏，说个中包涵了对韦伯斯特最见洞

察力的真知；现实主义戏剧的拥护者则以此为例，证明兰姆这个精致的文体学家搞起文学评论来是多么蹩脚。赞成也好，反对也罢，最激烈的争论基本都围绕几个问题进行：韦伯斯特真把恐惧描写得如此巧妙？他真像兰姆称颂的那样，没有误以数量为质量？一个评论家在《年度回顾》上这样评论《范作》：

《玛尔菲女公爵》是兰姆先生最着力热捧的戏剧之一，但是它事实上连兰姆所称颂的一半都不如……被称颂的部分既荒诞又恐怖。女公爵的哥哥因为其下嫁而惩罚她，用残忍的面具和玩笑折磨她；把她死去的丈夫和孩子的蜡像陈列出来；把疯子放出来，伴着疯狂的音乐在她面前跳舞；准备好了棺材、绳索、丧钟；掘墓人上场；最后她被施以绞刑。这就是把恐惧描写得巧妙了！！如果这样写剧本也算大师，那操着手术刀、给人带来不可名状之痛苦的外科医生也堪称情感大师了。

该评论写于1808年。1893年威廉·亚彻也有类似的评论：“我认为《玛尔菲女公爵》（《白魔》稍好一些）把恐惧描写得并不巧妙——死板，机械，暴力。”但是这篇评论整体还算友好，并以慷慨的大赞兰姆结束全篇：

但是从没谁像兰姆这样跟剧作家惺惺相惜：他的评论甚至比原作还有创见——那时的作家层出不穷，而且众口一声，但兰姆这样的评论家却绝无仅有。

事实上，在评论界如同串通好一般对《范作》一致保持沉默时——《爱丁堡评论》和《评论季刊》尤其沉默——这篇是正面评论兰姆的唯一声音。兰姆自己认为此文出自柯尔律治之手。1809年6月7日在给柯尔律治的一封信中，他说：“我也应该对你在《年度回顾》上的文章深表感谢，对吗？”柯尔律治似乎没有回应，要么就是回应了，但那封回信尚未曝光。如果真如兰姆所说，作者是柯尔律治的话，那这篇文章也包含了柯尔律治对韦伯斯特的全部观点，因为另外唯一一次郑重提及韦伯斯特的名字是在柯尔律治的一个讲座上，据当时一位记者的一篇不甚完美的报道所言：

换言之，博学之士会希望英国悲剧作家只单纯地模仿古希腊悲剧家，或者演讲术只模仿塞内加。

这据说是柯尔律治引用韦伯斯特的话，但显然充其量也就是韦伯斯特《白魔》“致读者”中某句话的改述。

然而同时代唯一另外一位评论家却不认同柯尔律治对兰姆如此之高的评价。在1809年的《每月评论》上，这位评论家这样表达自己的异议：

说真的，摆在我们面前的注释实在不足为奇，除了风格出奇以外，正式得突

兀，精致得怪谲。有些注释极力突显原剧的滥情，我们反而觉得是在批评，他这么做实在徒劳。我们甚至都不会提及他把《白魔》中的挽歌和《暴风雨》中的短歌所作的对比，说什么：“前一部是土，散着土息；后一部是水，泛着水汽。两个都是一样的情感强烈，仿佛化在了那个要素之中”；也不会去讨论什么轻浮的卡兰萨所经历的“精神崩溃，内心撕裂”，或魅惑兰姆先生对《玛尔菲女公爵》大加赞赏的“有尊严的恐惧，得体的恐吓”。之所以用这些词汇，或许是因为它们很像当时的戏剧语言吧，毫无疑问有相似之处——但是他模仿的语言是皮特埃尔和赫罗弗尼斯的语言，或者《哈姆雷特》中假国王用的模仿英雄体。正如兰姆的讽刺性幽默与莎士比亚笔下的茂丘西奥、本尼迪克和奥兰多的轻松诙谐不可同日而语一样，这里所模仿的语言与哈姆雷特本人自如流畅的绅士用语亦不可同日而语。

这位批评家真正抱怨的是兰姆的另一个习惯，即他动辄把伊丽莎白时代的次要剧作家与莎士比亚相比。正如假国王不是哈姆雷特一样，韦伯斯特也不是莎士比亚。也同样是这位评论家引得兰姆给柯尔律治写道：

《每月评论》讥笑我，还问“难道兰姆先生觉得《司酒宴之神的面具》【19】不够好吗？”，因为我说过除了《力士参孙》，查理一世以后就没好剧了。所以，就因为他们不知道或不记得《司酒宴之神的面具》是在很早以前写的，我就成了低估弥尔顿的人了！柯尔律治啊，杀了这些评论吧，否则它们会把我们杀了的，把我们喜欢的一切都杀了的！其他什么都可以善待，但要把那些评论当作仇敌。

性格温和的伊利亚【20】还很少这样大发雷霆。但他把韦伯斯特和莎士比亚相比较的做法还是经受住了反对派的唇枪舌剑。整个19世纪，很多评论家都习惯于认为韦伯斯特在悲剧艺术上仅次于莎士比亚。那首被兰姆拿来与《暴风雨》中的短歌相比的挽歌，在1833年还让一位作家想起了莎士比亚的另一个剧本：“这个挽歌有着所有奥菲莉娅式的无助绝望，那种说不清、道不明、可怕的绝望。韦伯斯特笔下的可妮莉雅一字一句都那么美，那么富有深情，仿佛理性与痛苦都在试图控制她的神智。”如果说保守点的评论家为求妥帖着力控制言辞，常常将之与多位剧作家放在一起谈的话，那大胆如斯文本恩、格斯、赛蒙斯【21】者则是直言不讳：

论格局、创新、学识以及更显而易见的喜剧形式，韦伯斯特都远在本·琼森之下；论多才多艺和语言的自然流畅，我们也必须承认他不及琼森。但是同莎士比亚一样，他也是形而上的，他的缪斯翅膀超越于尘寰之上，他透过一双幽灵的眼睛看事物。

他没有为了推动剧情而借助那种俗不可耐的复仇和鬼魂把戏。我们甚至可以说，在推动流血悲剧这个门类的发展方面，他比《哈姆雷特》还前进了一步。

……论悲剧诗的深度、高度、纯度，韦伯斯特与莎士比亚之间的距离比其他任何一位英国诗人与韦伯斯特之间的距离都要近，近到足以使他成为次优；至少可以说，雪莱是否可以位居第三，都尚存疑问。只有跟莎士比亚相比，才显出韦

伯斯特作为悲剧诗人的不足：毋庸置疑，他比我国所有的诗人都好。马洛【22】因其奠基者和开拓者的身份，的确在我国诗人中的地位高些：然而他的作品没有——当然也不可能有——那么丰富和完美的戏剧效果，而韦伯斯特的悲剧在构思和细节的精妙处跟莎士比亚的悲剧是如此接近。

最后这段引文来自斯文本恩。同样在这篇评论中，他还说韦伯斯特是“莎士比亚的一个肢体”和“右臂”。在另一个地方他又说“如果莎士比亚是大海，韦伯斯特和德克就是港湾或入海口”，并为此遭到了威廉·沃森的反驳：

莎士比亚是大海，韦伯斯特和德克是港湾或入海口！如画的意象，但不甚属实，令人联想到一览无余的阳光和令人振奋的咸海水，但是韦伯斯特跟这些毫不沾边。他的才华不是任何海洋的入海口，而是清晨的气息和阳光永远也到达不了的地下密室。他似乎喜欢住在发霉的地窖里，与鬼怪的回忆和死亡的味道相伴。

然而这还不够。斯文本恩还得把韦伯斯特和古希腊的剧作家相比较。韦伯斯特比索福克勒斯【23】更伟大，因为索福克勒斯没有“本能的正直”，这种正直只在埃斯库罗斯【24】、莎士比亚和韦伯斯特身上能找到。那欧里庇得斯呢【25】？差得更远了，不仅在道德情操上逊于韦伯斯特，在写作技艺上也不如。可见兰姆把韦伯斯特的仰慕者们引到了怎样的死胡同。

但是如果说兰姆有哪个词引发了最多的争议的话，那就是他在注解中评价维多利亚时用了“无辜的大胆”一词。这个词并无什么害处，今天的评论家可能根本不会留意。但是在兰姆写作的时代，评论家和读者都热衷于探求昔日戏剧中的人物内心。伦敦的文学圈尽刮人物性格分析之风。这股风由惠特利【26】和摩根【27】开启于18世纪，后由杰出的莎士比亚评论家柯尔律治和黑兹利特【28】推动，直到1904年《莎士比亚悲剧》一书的出版才有减弱之势。那时的评论家读其他评论家的著作时，带着读原著一样的机警好奇和认真求索。随便一个词、一句无心的话甚至一个笔误都会被狠狠抓住不放，只要是跟戏剧人物有关。因此，兰姆此言一出，博学之士和狂热读者纷纷都去关注《白魔》。戴斯【29】，韦伯斯特的第一位编者，喜欢维多利亚这个人物，但却质疑她的“无辜”：

要我说，我赞赏韦伯斯特对这两种人的区分：一种是清白者在面对无端指控时自然流露的无辜，一种是不知悔改的罪犯在面对审判时拒不认罪的佯装之态。维多利亚面对审判者，清醒地知道一切的可怕，依赖己身的机智，意识到美貌的影响力，而且也没忘记，一旦情况紧迫，博卡诺会随时介入保护自己。她的机智敏捷让人瞠目，但是作者从没赋予她一个清白者在这种场合该说的话。维多利亚勇敢无畏，但她的勇敢是强力为之的。她缺少那种知道一个简单的真相就能把对

手打败的平静；她那是一种极力打造、高度夸张的大胆——面对事实、面对无可辩驳的证据强行狡辩，尽管罪证确凿却还表现得像个殉道者。

亨利·哈勒姆在其《十五、十六、十七世纪欧洲文学概论》（1837-39）中把韦伯斯特排在海伍德之后，但却也给足了韦伯斯特面子，单列一章专门讨论，表示认同戴斯对兰姆此语的评价。于他而言，剧中维多利亚那部分“实际上描写了一个绝望的罪人，因为佯装出来的大胆失去了本可以诱惑或安抚审判官的一切有利因素”。可以看出，讨论的焦点逐渐从维多利亚这个剧中人物转向了恶这个问题。说到恶，没有谁比19世纪中期的查尔斯·金斯利^[30]谈得更激烈、更愤慨了。昔日的剧作家这个群体和韦伯斯特这个个体自然也逃不过他的眼睛。在《戏剧和清教徒》一书中，金斯利详细剖析了韦伯斯特的两部悲剧，认为个中体现了17世纪那种黑暗的、不健康的心理特征。金斯利承认这是“莎士比亚以来写得最好的两部悲剧”，但“剧中人物的灵魂没有向善或向恶的发展，而这是莎士比亚的专长”。于是，教士兼小说家金斯利在连连叹息声中提到了伊利亚的那个评语：“可怜的伊利亚，从书本认识世界，多从自己善良的本性出发来认识人类，说什么维多利亚具有一种‘无辜的大胆’。”金斯利倒不是认为兰姆不真诚，而是疑惑兰姆是否意识到“韦伯斯特那个认罪场景的精彩之处恰恰在于其对罪恶人性的熟知”。沃德代表学院派作出了裁决，说兰姆的评语“完全错误，破坏了这个人物自始至终的一贯性”。就连一向对韦伯斯特并不冷漠的埃德蒙·格斯爵士也承认兰姆“太过夸大了维多利亚‘无辜的大胆’；毫无疑问，蒙特切尔索的恣意谩骂与她的不知羞耻有关，也与我们给与她的好感有关”。然而斯文本恩不会任由别人贬损他的兰姆和韦伯斯特的，在谈到戴斯和金斯利对兰姆这个用语的指责时，他说：

我不认同他们所说的韦伯斯特一次也没让其女主人公以那种遭受不公指控时所具有的不无辜的口吻说话：玛丽的求饶并不缺少那种无辜，尽管她未能获赦——除了在少数几个不管她的请求成立与否早已认定她无罪的人心中；在有着根深蒂固的先入之见的审判官面前，维多利亚的辩词并不比这位苏格兰女王^[31]的辩词更模棱两可和闪烁其词。很难不去想诗人当时是否想到了女王的真实悲剧，因为事情就发生在该剧发表的25年前：如果没有，那这也太巧合了。

在此我们关注的并不是韦伯斯特在19世纪晚期的诗人和学者中的名望，只是知道一些他们关于兰姆对韦伯斯特态度的看法，可以证明《范作》在当时多有影响力。即便是强烈反对，人们也对之怀有敬意。至于韦伯斯特，兰姆那些令人振奋的（即使说不上启发性的）注释引发了人们对

这位剧作家如此之多的绝妙评论（即便有些时候不无恶意），以至于牢牢奠定了其在詹姆士一世时代的重要剧作家当中的地位。是否果如兰姆所说，韦伯斯特在塑造悲剧效果方面仅次于莎士比亚，他巧妙地描写恐惧，他的维多利亚用一种无辜的大胆为自己辩护，这些都不重要；重要的是韦伯斯特的名字已牢牢印在了文学的版图上，印在了那个万家灯火与黑暗阴森的拱廊并存的大城市的文学版图上。

（二）

同时也有诸多迹象表明，兰姆的《范作》出版之后，人们对韦伯斯特的兴趣也随即浓厚起来。1810年司各特匿名选编了《古代英国戏剧选》。在第三卷（也是最后一卷）中，《白魔》和《玛尔菲女公爵》全都入选。在前言里，司各特把韦伯斯特的名字与鲍蒙特和弗莱彻、琼森、福特、马辛杰并排而放，指出他们都适合放在“永恒的莎士比亚”旁边；而雪利、马斯顿和德克却只是“次要但也值得尊敬的作家”。司各特一定对韦伯斯特印象颇深，因为我们发现他1814年在爱奥那岛^[32]的废墟前，引用了下面两行脍炙人口的诗句：

只要踏上这片土地
就是踏上古老的历史

我们知道这两行出自18世纪选集编者最爱的那一幕，即《玛尔菲女公爵》第五幕中安东尼奥在“废墟”前的演讲。这一至深印象竟追随司各特一生，因为多年后（1831年），司各特在去世前不久写给戴斯的信中，还说韦伯斯特是“我们昔日最好的剧作家之一”。就连韦伯斯特的次要作品也开始成为关注的对象。1812年埃杰顿·布里奇斯爵士^[33]把疯人之歌（《玛尔菲女公爵》第四幕，第二场，第65-76行）收进了《英国目录学家》第二卷。此前不大为人所知的《阿尼斯和弗吉尼亚》也于1815年被笛尔克收入《昔日的英国戏剧》，后又收入多德斯雷的《昔日的戏剧》的最后一卷（科利尔^[34]版，1827年）。内森·德雷克1817年动笔写《莎士比亚和他的时代》之时，觉得有必要在“莎士比亚时代的戏剧文学和戏剧家简述”那一章插入一个韦伯斯特的介绍。德雷克是个评论家，以前研究过莪相诗歌^[35]和苏格兰高原灵异文学。虽说他长久以来是个哥特文学和感伤文学迷，但他转向伊丽莎白戏剧的过程还是很慢的。1798年他还在批判选集编者海德利，因为后者认为现代剧作家已经永远失去了“大自然赐予莎士比亚的……灵感钥匙，莎士比亚同时代的少数剧

作家同样也掌握那把‘开启神圣的同情泪泉’的钥匙”。而现在呢，在人们对昔日的戏剧重燃激情的大潮影响下，德雷克也意识到应该给伊丽莎白时代的次要剧作家一席之地，哪怕只是因为他们缔造了“一个时代”。他对韦伯斯特的看法明确清晰。他认为韦伯斯特“仅在福特之下，或许，在天赋上略逊福特”，但是跟福特一样“青睐恐惧与奇特，只是其剧中人物更加无法无天”。他也不禁要把韦伯斯特与莎士比亚相比：

……《白魔》第五幕表明，韦伯斯特偶尔也会迸发莎士比亚般的想象，特别是写非尘世的野性时。但他也难逃这种灵感闪现（或许可以称之为无法企及的完美）之后的危险；因为，他的导师能够自由、空灵地游走，成为另一世界的阐释者，而他太多时候却仿佛在努力挣脱现世的枷锁。即使得以挣脱，他也经常是“奢侈无度、频频犯错的幽灵”。不过，尽管有这些缺点，他的悲剧也无疑是神圣的天才之作。

这里值得注意的是文学史家对韦伯斯特的态度的转变。兰姆之前，无数书写英国诗歌起源和发展史的学者都很少提及韦伯斯特，即使在谈论伊丽莎白时代的戏剧时也是如此；但在兰姆之后，文学史家不仅提到韦伯斯特，而且通常花不少篇幅。如果说德雷克算不上文学史家的话，那我们还有早先提到过的亨利·哈勒姆，其作品至少还具有欧洲视野。哈勒姆把马斯顿、查普曼^[36]、罗利、特纳和米德尔顿等剧作家放在一起，但这几位总共加起来才占一段，韦伯斯特一人就占了整整三页。

当时的期刊也对韦伯斯特青睐有加。《布莱克伍德的爱丁堡杂志》为弥补之前对《范作》的冷漠，现在数措并举。它利用1818年《兰姆全集》出版的机会，不光评价兰姆的总体成就，还特别谈到兰姆对昔日戏剧的看法。同年，该杂志还刊登了一系列“早期英国剧作家的评论文章”。前三篇讲马洛，接下来两篇则谈韦伯斯特，尤其用大篇幅谈他的两部悲剧。其中第一篇发表在三月刊上，讨论两部剧中更受欢迎的《玛尔菲女公爵》，先从莎士比亚与其同时代剧作家的区别谈起。署名为“H. M.”的文章作者，说虽然他们都写出了伟大的诗歌，但是论对人性的理解，无人能及莎士比亚。其他人连刻画人物都不会，韦伯斯特尤甚。虽然他是个“真正的天才”，但也只是描绘“某些单个场景”的高手。韦伯斯特用奢侈的笔墨刻画恶和罪行，“深切至深，可怕至极”。但是他笔下的事件并没有“华兹华斯所说的‘趋向性洪流’，其人物也没一个能如画一般明晰、傲然地站在我们面前。”如此一来，文章作者不得从剧中摘录几个片段来阐释情节。但是在文章结束之前，“H. M.”还特别提到兰姆对“引入女公爵死亡的所有那些可怕的场面”的评价。

登于八月刊的那第二篇文章评论性的文字甚至更少，同样也是从剧中摘录一些片段，加几句解释将其串联一处，大都关于情节。但最后一段透露了作者的立场：

这部剧很有感染力，甚至不乏优秀的诗句——但是总体上，它让人吃惊而非震撼。情感也是令人痛苦的，而非悲剧性的。事实上，有些场景让人作呕，整个剧中我们看到更多的是卑鄙、放纵、没有操守的戏剧人物。在描写主要人物的情感时鲜有什么想象力，他们表现出的只是扭曲的邪恶——一场接一场无耻的放荡，即使剧中有智慧的火花以及偶尔迸发的道德良知，都不能使这放荡减轻。描写主人公维多利亚时显得无比激情和随意——她虽然真实，又美丽、邪恶得惊人，我们仍然觉得她不适合做悲剧的主角，悲剧永远都应该写伟大的情感和伟大的事件。但是，人们对这个“威尼斯的白魔”总有那么点迷恋，这种迷恋伴随她走到人生的尽头——这仿佛归因于她在死神面前的无畏。

在死神面前，我不会流一滴泪，

就算面色苍白，也因无血色，不是恐惧。

“H. M.”在某些方面领先于金斯利，但是当我们读到“这个‘威尼斯的白魔’”时，不禁会心一笑，因为这时兰姆已经完全为自己对韦伯斯特的维护正了名。也许可以狂妄地说，此后所有对韦伯斯特的评论都带着伊利亚的印记。

甚至在我们意料不到的地方也能感受到兰姆的影响。1819年，堪贝尔^[37]死后出版的《英国诗人之范作》表面看上去与兰姆的《范作》没有任何共同之处，除了书名中的“范作”一词。这是一部七卷本的大部头，收录了从乔叟^[38]到克里斯托·弗安斯蒂^[39]的所有重要英国诗人。堪贝尔自己也是诗人，当然不缺对早期诗歌的见地和敏感。但是我们发现，他在选编韦伯斯特时还是难逃兰姆的影响。因为除却维多利亚关于梦境的诗行，他选的韦伯斯特全都在兰姆的《范作》中出现过。然而堪贝尔似乎并不是很喜欢韦伯斯特，他介绍韦伯斯特的前言就流露了几分讽刺：

从《玛尔菲女公爵》前面的宣传词来看，该剧本身似乎并不怎么成功。作者说：“它只缺悲剧之所以是悲剧的一样东西，那就是具有鉴赏力的观众。”但是我们怀疑，观众可能并没像兰姆在给《范作》写注时那样，被韦伯斯特的恐怖场景深深打动。

但是如果考虑到这位讽刺家擅自把韦伯斯特的“致读者”从原来的《白魔》挪到了另一部剧的前面，他的讽刺也就失却了诸多锋芒。

科利尔可就不太可能犯这种错误了。谈到科利尔，一个“不幸的”读者，我们暂时得从文艺批评转到历史研究上来。很多学者都引用过纪尔

登【40】关于韦伯斯特是圣安德鲁霍尔本的教区执事的论断。笛尔克1815年查过史学材料，一无所获。在1820年出版的《诗学十日谈》中，科利尔试图把剧作家韦伯斯特等同于“已故的军队牧师”约翰·韦伯斯特，后者写了《圣徒指引》（1653）和《审视大学教育》（1654）。据此他还进一步推断说韦伯斯特这位剧作家一度登台演出过，因为托马斯·豪尔写的一篇回击《审视大学教育》的文章，名字就叫“被鞭笞的演员，鞭笞韦伯斯特，据说从前是名演员”。十年后，这些推断引起了戴斯的注意，他深入展开调查，极不赞同科利尔的观点。顺便提一下，科利尔于1846年重拾韦伯斯特的生平问题，说自己在肖迪奇的圣伦纳德教区记事录中发现了一个名叫约翰·韦伯斯特的男人与伊丽莎白·萨顿在1590年7月25日登记结婚，并有其女爱丽丝·韦伯斯特在1606年5月9日受洗的记录。且不论科利尔的这一发现可信与否，他的研究至少反映了学术界对韦伯斯特的生平和作品的重视。

（三）

不过从本质上讲，那个时代是伟大的浪漫主义作家的时代。就在科利尔推断韦伯斯特生平的那年，黑兹利特的《伊丽莎白时代戏剧的演讲稿》也出版了。演讲于1819年的最后两月在萨里艺术设计学院进行【41】。1819年以前，黑兹利特对伊丽莎白时代次要剧作家的了解也许微乎其微，尽管他谈过莎士比亚、本·琼森、鲍蒙特和弗莱彻。他去威尔特郡的温特斯洛客栈准备演讲前，咨询过兰姆，并向普罗科特【42】借过书。在那待了六周后（他夜间一定伴着乡村炉火读剧了），他现身伦敦，红光满面，信心十足，准备好了讲稿，对昔日剧作家的剧作了了然于胸。如同兰姆在《范作》中最具可读性一样，黑兹利特在演讲稿中也最具可读性。风格是温特斯洛时期的风格，如他自己所述：

废话连篇，东拉西扯。在别的时期可能拘谨、干巴、突兀，但这里如同江河奔泻，破堤而出。我无需费心组织思绪或找寻意象：它们不请自来，我和着微风将其吮入胸中，寂静的树林也有了万千思绪——

诗人眼中的意象

挂在每片树叶，附着每根树枝。

他的评论全面而又深刻。第一讲概述伊丽莎白时代的文学；第二讲飞快地谈谈雷利【43】、马洛、海伍德、米德尔顿和罗利；第三讲谈了马斯顿、查普曼、德克和韦伯斯特；第四讲像旋风一样转向鲍蒙特和弗莱彻、琼森、福特、马辛杰。第五讲谈了诸如《四个P》、《帕纳塞斯归

来》和《古顿老婆婆的缝衣针》这样几部早期的剧作。然后突然转向德雷顿【44】和丹尼尔的时代、鲍蒙特和弗莱彻的时代，但是在忙乱中还把《阿卡迪亚》和更早时期的菲利普·锡德尼爵士【45】的十四行诗也拿来讲了。第七讲跟戏剧更没什么关系了，主要是把培根的文风拿来与托马斯·布郎爵士【46】和杰里米·泰勒的文风相比。在第八讲，也是最后一讲，黑兹利特通过对比伊丽莎白时代的戏剧和德国的戏剧阔谈古今文学的特点。

但是我们这里关注的是黑兹利特对韦伯斯特的看法。黑兹利特将之与德克相比。乍看之下，我们看不出两者之中他是否对德克更加青睐：

韦伯斯特，我认为，如果跟德克一样有创造力的话，或许比德克还要杰出；或者即便没有，也同样比他杰出。

接着，当他再度把莎士比亚作为标杆引入时，我们方才知道他真正的立场：

总体说来，可能《白魔》和《玛尔菲女公爵》是我们所有的作品中最为接近莎士比亚的了。唯一的缺点，唯一可以怪罪它们、说它们因而“暗淡失色”的地方就是它们太像莎士比亚了，往往是直接效仿，无论整体构思还是个性化表达。迄今为止，没有人比莎士比亚更难效仿、更值得效仿了。但是如果韦伯斯特的所有人物都是他自己独创，都以其独特的风貌展现在读者面前，像我上面花大量篇幅称颂的诚实的伊达尔戈那样，就会好很多。我觉得，迪克笔下有更真实的人物、更深厚的情感、更本真的人性。但是迪克没有动用自己的知识储备，没用同样丰富的想象和同样光彩夺目的语言来装扮自己的主题。迪克擅长刻画一些习惯性的、根深蒂固的情感，那种简单的、永恒的人性和情感；韦伯斯特则更倾向于刻画情感的多重组合和变化无常，将之正比，反比，使之产生戏剧冲突；他让情感肆意颤动和摇摆，让恐惧和怜悯升华成痛苦，哪怕做得太过。迪克满足于痛苦的历史性画面，韦伯斯特则更进一步，去设想痛苦的可怕。一个是直白地表达痛苦，另一个则用温情的美或可怕的美来装扮情感。总而言之，迪克更像乔叟和薄伽丘，韦伯斯特的头脑则更像用莎士比亚的模子刻出来的，既有天然的契合也有后天奋力的效仿。这两位杰出作家笔下的贝拉法朗特【47】和维多利亚各有不同的力量和性情。一个充满柔情，另一个“风风火火”。马修忠诚的妻子消沉地坐在那里，“当她的双韵诗被发现时，她温顺得像只雌鸽”；而受到侮辱和迫害的维多利亚则把恶毒的蔑视和致命的美，像梭镖一样投向敌人。这个“白魔”（她被人如此称呼）像麻风病人一样苍白，像闪电一般闪亮。她像个以屈辱和复仇为嫁衣的新娘。

至此，我们已经忘记这两者之中谁更突出了。黑兹利特自己也没有明确的答案，这个问题也许并没多么重要了。重要的是面对这样精彩的评论，我们不要偏离主题。韦伯斯特和迪克代表了两种同样伟大但又迥然

相异的风格。很奇怪之前竟没人想到把他俩相比，因为他们两人放在一处，各自的优势立现。

当然，黑兹利特在1819沾了读到兰姆的光，而兰姆在1808年却无缘读到黑兹利特。但也有时候兰姆对黑兹利特只是起到衬托作用罢了。比如《白魔》中可妮莉雅的那个场景，兰姆称颂过个中的挽歌，认为可与《暴风雨》媲美，黑兹利特却认为更像《李尔王》：

……内心深处的褶皱，深切情感的跌宕起伏，就那样独具匠心地展现在读者面前，仿佛偶尔的模仿并无必要（尽管模仿的痕迹很明显）。

黑兹利特同样也不认同兰姆所说的韦伯斯特能“把恐惧写得巧妙，使人痛入骨髓”。《玛尔菲女公爵》在18世纪享有更高的声誉，前面已经有所论述，但黑兹利特却认为“论热烈程度或效果它不如《白魔》”，因为这部剧尽管“偶有情感浓烈之处”，“甚至超过莎士比亚”，但总体上写得特别费力。而让黑兹利特更不能认同的是剧中的“恐惧堆积达到了不堪的地步”。疯人和死人的戏让黑兹利特难以忍受，因为这逾越了

诗和悲剧的正常界限。至少可以说，这种优点，无论有多了不起，也是我们不希望经常见到的。这种强加于观众的感官和想象力之上的描绘非但不会提升想象、美化心灵，反而会使石化、僵硬。我这种说法有待批评指正，但是希望还不至于太冒犯吧。

黑兹利特言语之间满含歉意，可能是意识到，兰姆在这一点上定是受尽了敌友的骚扰吧。

演讲结束、演讲稿付梓后，黑兹利特与韦伯斯特的交集并没有结束。此后他又多次提到韦伯斯特，而且无数次引用和误引韦伯斯特，用以装点自己的写作。但是黑兹利特从来都不满足于只是引用。他是个真正的评论家，他要比较和评论。他更关注文学的相对价值，如果我们斗胆去概括的话；而涉及面更窄、更纯粹的兰姆则更关注文学的绝对价值。但是不管怎样，黑兹利特对待韦伯斯特绝不“收敛”，很快我们就发现他在把韦伯斯特同另一个“恶魔诗人”——拜伦——相比。在评论拜伦的《马利诺·华立罗》^[48]时，黑兹利特写道：

“自然情感的流露，使整个世界亲近起来。”——韦伯斯特的一句，迪克的一句，或福特的一句（更不用说莎士比亚的一句了），都胜过拜伦这部剧里所有说教性的、描述性的絮絮叨叨，躁动不安的灵魂根本不会像剧里描写的那样去观察，去感知。

当他1826年在《朴言集》的一篇文章“论理性和想象力”中再次谈到拜伦在戏剧领域的“探险”时，说得更具直白：

拜伦勋爵最近有好几次这样的探险（如果可以称之为探险的话），可能还会继续下去，只要他愿意。但是我们没见到他剧中有几个人物触景生情，情由境生或应时而动的；相反，个个都郑重其事地登上讲台，发表关于命运和事物终极状态的演讲。单个的个体并不足以引起他自己或别人的注意。诗人满纸都是伟大的思想……为了演示一种完全不同风格的戏剧对话，以说明戏剧人物应该如何发表个人意见或与别人交谈，下面我将从一部昔日的戏剧中挑出一段，讲的是一个哥哥刚刚导致妹妹惨死……

当我们随即看到黑兹利特引用费迪南德所说的“遮住她的脸：我的眼睛眩晕；她太早陨落了”，也就不觉得太过突兀了。引用完之后，他又评论开了，但这次我们的麻烦在于不知该在何处将他打断：

起先他是多么忠诚地盯着死去妹妹的尸体，强行鼓起勇气，接着当勇气消失，他又是多么自然地扭过脸去，想起了她的年轻、美貌、夭亡，想起他们孪生兄妹相伴长大的岁月，想起至此为止他一直在用她的人生衡量自己的人生，仿佛结果如何都无关紧要似的。现在，我倒要问，当他在思考生死的界限，思考世事的无常，想到说话者本人正是这起悲剧的始作俑者时，难道都不足以“让心灵为之一震吗”？对我们生命整个过程的体悟，认识到它不过是由无常的悲喜组成，这种主题还不够震撼、还不足以在正统的悲剧中占有一席之地吗？难道那种跟不幸作斗争、跟别人的恶意向作斗争的意志不是跟对无常的命运、不可避免的宿命或者人类整体情感的思考同样有趣，同样有启发吗？在这里，司管悲剧的缪斯还不光呜呜咽咽：我们还看到了苍白的脸颊和从心中喷涌而出的生命之血！

黑兹利特同样也在喷涌，他在给拜伦上一堂关于理解人性对创作悲剧何其重要的课。

但是拜伦对于如何创作悲剧早就拿定了主意。他决意不去效仿“昔日的剧作家，他们满篇都是粗俗的错误，只因语言优美才可原谅。”在写《马利诺华立罗》时，他效仿的对象是古希腊的“正统悲剧”：

……不要用你们那些疯狂的昔日剧作家来衡量我的作品，那无异于试图证明威士忌是泉水。当然，我想你们也不会认为威士忌比阳光下咕咕作响的泉水还高贵：我认为这就是古希腊戏剧家和那些浑水摸鱼的骗子之间的区别——本·琼森一向例外，他是个真正的学者和古典主义者。

毋庸置疑，这里所说的“浑水摸鱼的骗子”也包括韦伯斯特，拜伦对他非常了解——了解到如此地步，以至于即便深陷圭契奥尼【49】丑闻，他仍能想起《白魔》：

接下来就是我成了一个重大婚外情事件的罪魁祸首——现在事情已闹到教皇那里（是真的），无人能够预知神圣的教皇会作何裁决。当年我为了一个女人（也即《白魔》里的维多利亚）离开英国，现在竟然又得为了另一个女人离开意大利，多奇怪啊。

拜伦很可能读过古四开本【50】的韦伯斯特或多德斯雷的选集，因为他接

触兰姆《范作》的时间要稍晚些。1821年他在跟托马斯·麦德文^[51]的交谈中说道：

我刚刚在读兰姆的《范作》，惊奇地发现他从昔日剧作家的剧作中节选的片段有很多观点跟我不谋而合，我还以为只有我会那么想呢。比如，《玛尔菲女公爵》中的这一段，就和《唐璜》中的诗句出奇地相像。

接着他就说人们对他抄袭昔日剧作家的指控完全缺乏依据，因为“今天我才读到兰姆的《范作》”。不过他也不准备去纠缠抄袭不抄袭的问题。“如果是个错误，我也没打算把它粉饰成无暇，”他告诉麦德文，接着还补充道，“我可以借你几卷‘沉船’，《唐璜》中的暴风雨就来源于此。”

因此对拜伦来说，包括韦伯斯特在内的昔日剧作家，都只是语言和意象的堆砌，拜伦可以“像帝王一样”随意拿来为己所用。他们在戏剧写作艺术方面没什么值得他学习的。他们不是楷模，他对雪莱说：

我读了《倩契》^[52]——但是，我认为主题不够戏剧化，我也不认为昔日的剧作家是我们的楷模。我不认为英国迄今有过一部戏剧。但你的《倩契》气势磅礴，堪称诗歌佳作。

但雪莱显然对昔日的剧作家有着不同的看法。他没有借用他们的语言，只是在精神上与他们其中的某位契合。那就是为什么虽然经常有人说《倩契》是伊丽莎白时代的风格或者甚至是韦伯斯特的风格，但却很难去证实的原因。当然，你也可以说《倩契》第五幕中的罪行、恐惧、审判、定罪都和韦伯斯特的《白魔》有些相似。雪莱的书房藏有昔日剧作家的所有剧作，他尤其喜欢《玛尔菲女公爵》。下面的对话还是来自那位不知疲倦的干将，麦德文：

在所有的英国戏剧中，他尤其喜欢《玛尔菲女公爵》。他认为那个她把行刑人员看成折磨狂、谋杀犯或者其他富有寓意的阴暗人物的地牢场景可与莎士比亚笔下的任何场景相媲美。实际上，他不断地去读昔日的剧作家——米德尔顿和韦伯斯特、福特和马辛杰、鲍蒙特和弗莱彻，他们都是无穷的宝藏，他从中撷取一种既纯粹又有活力的风格，正因如此，《倩契》才这么出众。

兰姆听了这话定会很受用，如前所述，他几乎是唯一欣赏“那些富有寓意的戏剧人物”的人了。

托马斯·洛弗尔·贝多斯^[53]同样喜欢昔日戏剧中描写的恐惧。实际上，他的剧作《新娘的悲剧》和《死亡的笑话》能让人想起韦伯斯特，但是他却有意地反对那些剧作家，称之为伊丽莎白时代的“鬼魂”：

随你怎么说——我可是确信唤醒戏剧之人一定得是个勇敢无畏的开拓者，不是书虫，甚至也不是修订者，不管修订得有多好。这些修订之作都是冰冷的吸血

鬼。马洛、韦伯斯特那样的鬼魂，我敢说，与我们同代人中的任何一个相比，都是更好的剧作家和诗人，但他们是鬼魂，字里行间爬满了虫蛆，而我们想看的是先辈没见过的东西。无论你对昔日的戏剧怀有怎样的敬意，我依然认为，与其复兴，不如创新，要努力赋予我们这个时代的文学独特的个性和特征。把鬼魂供奉起来，仅供瞻仰，不要与之共处。现如今的戏剧圈是一个被鬼魂萦绕的废墟。

然而贝多斯是个有趣的例子，他自相矛盾，因为他不仅继续读那些吸血鬼和虫蛆，还把韦伯斯特的《阿尼斯和弗吉尼亚》中的诗行作为题铭印在自己诗集《即兴诗人》的扉页（牛津，1821）。另外，他还建议一个朋友去买刚上市的昔日戏剧新编：

你这样怀疑昔日一流的戏剧实在是既没必要又乏热心。翻开马辛杰第一卷序言，看看那些曾被沃伯顿忽视掉的剧作名单。这本书是兰斯顿系列，无疑可堪信赖，所选篇目精妙。接下来还会重印其他一些精彩剧作：韦伯斯特的《魔鬼的案例》、马斯顿的《贪得无厌的伯爵夫人》、米德尔顿的喜剧以及其他一些珍品。而且这本书极其精美小巧，还有红牛剧院【54】的木版画呢，非常值得你花掉口袋里的最后半克朗。柯克·怀特【55】你都买了，这回竟然犹豫！

但这不仅限于与被人遗忘的怀特作对比，贝多斯还多次绝望地说自己无论如何也不能像伊丽莎白时代的剧作家写得那么好：

只需读上一幕莎士比亚，一点弥尔顿，一两场《倩契》，一部分韦伯斯特、马斯顿、马洛，或者任何具有深度的、自然的、真实感知的文字，然后再来读这些“教科书”，你会立刻觉得现在这些作品多么牵强、做作、无味，等等等等。

我们现在看到的是迄今为止不太为人所知的伊丽莎白时代和詹姆士一世时代的剧作家这个群体以及韦伯斯特这个个体，其声誉如何逐渐有了改观。或许可以说，如果过去是韦伯斯特的声誉随着伊丽莎白时代的那些次要戏剧家的变迁起起落落的话，那从现在开始，是他们的声誉要随韦伯斯特的变迁起起落落了。如果说在贝多斯列出的几个昔日的剧作家名单中，韦伯斯特的名字是第一个或近乎第一个映入我们的眼帘，可能显得太过夸张了。他当然不是人见人爱。但是他被阅读，被批评，有时激起永不褪色的崇拜，有时激起无比的厌恶。过去只有几个学者屈尊俯就地改编或印刷他的剧作，并且还在不得不解释这样做的理由时满怀歉意，这样的日子一去不复返了。现在，即便是拜伦这样的一流诗人也感到来自韦伯斯特及同时代剧作家那并非出于本意的挑战。拜伦用激烈的言辞谴责他们，传达出的不光是反对，也有抵制昔日这些剧作家影响成分在内，现在他们已潜移默化地影响了文学创作。造成这种变化的唯一重要因素不是期刊评论家，也不尽是学者，而是兰姆以及《范作》中的选篇和注释。

现在《范作》已经有了读者，也得到了恰当之人的品评——我们有理由相信《范作》的大众读者一直很少，因为直到1835年它才得以再版——加上他在东印度公司的任期【56】也已告终，兰姆于是回到大英博物馆的“豪华厅”，去读加里克藏室【57】的昔日戏剧。他还保持着摘录选段的老习惯，旨在给诸如皮埃尔【58】、格林【59】和洛奇【60】等莎士比亚之前的剧作家一个更为公正的评价，并且这次比1808年编选集时摘了更多的篇章。这些选篇，加上少得多的注释，开始发表在1827年霍恩【61】主编的周刊《茶几书品》上。在前后两次在大英博物馆探宝的间隔期，兰姆也没有忘记韦伯斯特。他引道：

……威尔伯福斯【62】能否把周二还给我们？不，他不会的。
他会把一周的六天变为七天。
把一年的春、夏、秋三季，
变成俄国的冬天。

《昔日的戏剧》

兰姆这样解读：

……请原谅我的迟钝。我已经习惯长久等待了。天空于我好似铜色——下场雨才不错。“我也有过几次欢乐。”

现在可以再次“从数千朵戏剧之花中随意采摘”了，他于是从《魔鬼的案例》中摘选了六段，附在这些选段之后的注释太短，不足以代表他的最佳风格，但也颇能管窥见豹：

韦伯斯特是圣安德鲁霍尔本的教区执事。在这部剧和其他悲剧中反复出现执事活动、亵渎神圣、墓碑、介绍《挽歌》等，大概都可归因于他的职业习惯吧。也许他并不知道查证并没有证实或否认纪尔登的论断。然而查证是学者的工作，学者确实也对兰姆的工作进行了补充，那就是拭去古老作品上的灰尘，帮它们重见天日，为之重新奠定评论的基调。兰姆为其他剧作家所做的工作也像他为韦伯斯特做的一样出色。长久以来，韦伯斯特都是兰姆的韦伯斯特。换言之，兰姆怎样选编韦伯斯特、怎样为韦伯斯特注释就成就了怎样的韦伯斯特。但是一个更全面、从文本角度来看更纯粹的韦伯斯特也逐渐成形。兰姆的注释问世不久，有位学者就不仅查阅了教区记事录和遗嘱登记办，以调查韦伯斯特的生平，而且勤勤恳恳地校勘了他的戏剧文本。他的努力很快见成效了，兰姆在有生之年见到了亚历山大·戴斯神父编写的第一部约翰·韦伯斯特全集出版（1830年）。

X SEAN O'CASEY IN CHINA

That the Chinese should have been interested in Irish drama as far back as the 1920s sounds incredible, yet the fact remains that in 1926, a collection of six plays by J. M. Synge, including *Riders to the Sea* and *The Playboy of the Western World*, translated by the poet-historian Guo Moruo, was published in Shanghai. Articles on Irish literature in general had appeared in the literary reviews in Shanghai and elsewhere even earlier. One notices, for instance, that Mao Dun, who was to become the best novelist of the ensuing decades wrote an essay entitled "A Countercurrent in Contemporary Literature—New Writing in Ireland" in the *Eastern Miscellany* (Vol. XVII, No. 6, March 1920). Somewhat later, Lu Xun, the famous story writer and essayist, translated a Japanese article entitled "Irish Literature: A Survey" for the magazine *Rushing Stream* (Vol. II, No. 2, June 1929). A curious fact: all three founding fathers of China's New Literature took a hand in directing Chinese attention to Irish new writing.

They were aware of the especial importance of Irish drama, the part played in the Irish Renaissance by the plays of Synge, Yeats and Lady Gregory. Lady Gregory, in particular, was well known for her one-acter, *The Rising of the Moon*. Not only did generations of Chinese students read it and perform it in English, but it was adapted for the Chinese stage. Indeed, the adaptation, entitled *San Jiang Hao*, was, with its patriotic theme and its simple but effective dramaturgy, one of the most popular plays in the early years of the anti-Japanese war (1937–45).

In this context it comes as no surprise that Sean O'Casey's name was known in China soon after he had won acclaim in the Abbey Theatre, Dublin. More than that: his play *Juno and the Paycock* was adapted for the Chinese stage by Zhang Min, a director of repute. Under its Chinese title, *Zui Sheng Meng Si* ("Intoxicated and Daydreaming"), it played to packed houses in Shanghai in 1936.

A period of relative neglect of O'Casey, along with that of most other Western authors, set in after 1949, the year of Liberation. But in the 1950s, things began to look up. Several factors contributed to O'Casey's appeal: his proletarian origins, his years of hard work as a common labourer, his commitment to communism, all spoke in his favour. The letter he wrote to the *Wen Yi Bao* (*The Literary Gazette*, No. 3, 1958) praising a Chinese play depicting the Chinese Red Army's heroism during the Long March, which O'Casey said he had followed with avid attention "so far as Western newspaper reporting could furnish him with any information", further endeared him to the Chinese. The cry then was for the progressive literature of the world, and O'Casey certainly rated as a progressive.

But his literary qualities also told. That O'Casey was a writer of unusual power became apparent when translations of his works began to come out. A Chinese version of his play *The Star Turns Red* was published in the Beijing magazine *World Literature* in 1959. The translators were myself (using the penname Zhu Yan) and Ying Ruocheng, an actor who had been a student of mine at Tsing Hua University.

A year earlier, in 1958, a Chinese translation of the first volume of O'Casey's Autobiographies, *I Knock at the Door*, had been published in Beijing. The translator was Zhong Songfan, about whom this writer has not been able to find out much. Another part of the Autobiographies, the chapter "Mrs. Casside Takes a Holiday" from the volume *Inishfallen, Fare Thee Well*, appeared in *World Literature* in 1962 in a Chinese translation by Zhao Luorui, a professor of Beijing University, who had achieved fame as far back as the 1930s with her brilliant translation of *The Waste Land*.

This is not a bad record, if one bears in mind that in those years only a handful of contemporary Western dramatists got published in China. Furthermore, O'Casey was read and discussed in the literature departments of the universities. But published criticism of O'Casey's work remained meagre. In fact, I think I am perhaps the only Chinese

critic who has committed his views of O'Casey to writing.

I came to O'Casey after having done some work on Eliot, Yeats, Shaw and, earlier still, the Jacobean dramatists, notably Webster. While, like everybody else, I found O'Casey's early Dublin tragicomedies fascinating, I was also attracted by his later work, particularly *The Star Turns Red* and *Red Roses for Me*. It was clear that from *Within the Gates* on, O'Casey, the restless spirit that he was, was looking for a new, fresh way of writing significant drama. He didn't want to repeat his early successes, nor could he reconcile himself to the sort of fashionable, "realistic" drama then being turned out by men like Noël Coward. Inevitably, he landed on poetic drama. Yet he differs from T. S. Eliot and Christopher Fry over what constitutes poetic drama. He wanted to see in it all the richness, all the glitter and colour, of life, including man's noble fight for a better society. Also, he would write this kind of poetic drama in a resonant, sinewy prose, though he would not rule out—indeed he often resorted to—bursts of poetry at the critical moments. He did not always succeed in putting his idea to work, but when he did, as in *Red Roses for Me*, he did magnificently.

That, in substance, is what I said in a long essay, "The Achievement of Sean O'Casey", published in the journal *Researches in Literature* (No. 1, 1958). This was followed by another article of mine in *World Literature* (No. 2, 1959), making the same points in less specialist language.

In yet another article on O'Casey, I reviewed his six-volume Autobiographies for *World Literature* (No. 3, 1962). I was glad of the opportunity, for I had read the volumes with deep interest. O'Casey's own life was full of incident, and the people he had associated with—Shaw, Yeats, Lady Gregory, and the men of Easter, 1916—were in their different ways heroic. The work also struck me as a new type of writing, fiction-like in its narrative technique, but freer in movement, allowing easy transition from recollection to reflection and back again, in a prose that is remarkable for its mixture of parody, invective,

lyricism and a kind of stream-of-consciousness reverie quite reminiscent of Joyce. *World Literature* carried my article alongside Zhao Luorui's translation, earlier mentioned, of "Mrs. Casside Takes a Holiday", certainly doing O'Casey proud by devoting so much space to him in a single issue.

After that, the Cultural Revolution intervened. For ten years all mention of O'Casey disappeared from Chinese publications.

In 1977 interest in Western drama revived. Soon the Beijing stage was busy with productions of Western plays such as Brecht's *Galileo*, Molière's *L'Avare*, Shakespeare's *Hamlet*, *Merchant of Venice*, *Measure for Measure*, *Macbeth* and *Romeo and Juliet*, the last performed by Tibetan graduates of the Shanghai Institute of Drama speaking their parts in Tibetan! However, no sign of any renewed interest in O'Casey. There has been no new translation of his works, nor any new critical study.

Will this state of affairs last? No one can say for certain, but personally I'd like to see some Chinese company make a bold try to perform one of his "poetic" plays, say, *Red Roses for Me*. Admittedly some things in O'Casey won't probably appeal to a contemporary Chinese audience—the events of the Dublin of the 1920s that make up the plot of many of his plays seem a bit remote—but his unique combination of realism and symbolism, of power and beauty, has not dated. Indeed, his ceaseless search for a new poetic drama should, if made known more widely in China, inspire feelings of admiration and gratitude in his kindred spirits in Beijing and Shanghai who, realists to a man, yet want to lift drama out of the merely realistic. So perhaps the first thing to do is to coax the publishing houses to make more of O'Casey's works available in Chinese.

Sequel: Well, the coaxing seems to have taken immediate effect. Just issued is a new collection, *Selected Plays of O'Casey*, published by the People's Literature Press in March, 1982. It comprises four plays, *Juno and the Paycock*, *The Plough and the Stars*, *Red Roses for Me* and the

拾 肖恩·奥凯西在中国

中国人竟然早在20世纪20年代就对爱尔兰戏剧感兴趣了，真是不可思议，但事实上，1926年一本收录辛格 [1] 六部戏剧的集子在上海出版，由诗人兼历史学家郭沫若翻译，其中收录了《骑马下海人》和《西方世界的花花公子》。关于爱尔兰文学的评论文章甚至更早就在上海和其他地方的文学评论期刊上发表过。比如，在接下来几十年成为中国最著名的小说家的茅盾就写过一篇名为《近代文学的反流：爱尔兰的新文学》的文章，载于《东方杂志》（第17卷，第6期，1920年3月）。稍后，著名的短篇小说家兼散文家鲁迅翻译了日文文章《爱尔兰文学之回顾》，载于《奔流》（第2卷，第2期，1929年6月）。一个奇怪的现象就是：这三位中国新文学的奠基者都在引导中国读者去关注爱尔兰新文学。

他们都意识到了爱尔兰戏剧的特殊重要性，也即辛格、叶芝、葛利戈里夫人所创作的戏剧在爱尔兰文艺复兴中的重要性。葛利戈里夫人尤以独幕剧《月亮上升的时候》闻名。一代代中国学生不仅用英语诵读和演出它，还将之改编呈献给中国观众。实际上，改编后的剧本（名为《三江好》），因其爱国主题和简单有效的演出技艺，还成了抗日战争（1937-45）早期最著名的剧本之一。

这也就不难理解为何肖恩·奥凯西在都柏林的阿比剧院赢得赞誉之后很快就在中国流传开来了。另外，他的剧作《朱诺和孔雀》也被著名导演章泯 [2] 改编搬上中国舞台。改编后名为《醉生梦死》，1936年在上海演出，座无虚席。

但是1949年新中国成立后，奥凯西同大部分西方作家一样，在中国也受到了冷遇。不过，在20世纪50年代情况有所好转。有几个因素促成了奥凯西的声望：他的无产阶级出身，他多年的辛勤劳动者的身份，他对共产主义的热忱，都有利于他作品的传播。他写给《文艺报》（1958年第3期）的信中赞扬一部刻画中国红军在长征中英雄气概的中国剧作，他说他如饥似渴地追着看“西方报纸上关于该剧的任何报道”，这使得他愈发受中国人喜爱。当时的中国迫切需要世界的进步文学，奥凯西自然被视为进步作家。

但他的文学素养也堪称一流。待到其作品被译成中文，他的非凡才能也就不言而喻了。1959年，其剧作《星星变红了》中译本在北京的《世界文学》上发表。是我（用笔名竹衍）和英若诚翻译的，英若诚是一名演员，我之前在清华的学生。

一年前（1958年），奥凯西的自传《我敲门》第一卷中译本在北京出版。译者为钟松藩，我没能找到多少关于这位译者的介绍。1962年，自传的另一部分，选自《英尼希法伦，再见！》那一卷的一个章节“卡西迪太太休假了”的中译本刊于《世界文学》，译者是赵萝蕤，北京大学的教授，早在20世纪30年代她就因出色地翻译艾略特的《荒原》声名远扬。

鉴于当时只有少数当代西方戏剧家的作品能在中国出版，这已经算是不错的成绩了。而且，奥凯西还在大学的文学系被讲授。但是关于奥凯西作品的评论文章依然很少，事实上，我觉得我可能是中国唯一一个写过奥凯西评论的人了。

我是在研究了艾略特、叶芝、萧伯纳以及更早的詹姆士一世时代剧作家（尤其是韦伯斯特）之后才去读奥凯西的。同其他人一样，我也觉得奥凯西早期描写都柏林生活的悲喜剧很是迷人，但我同时也被他晚期的作品所吸引，尤其是《星星变红了》和《给我红玫瑰》。很显然，从《众门之间》开始，不知疲倦的奥凯西就在探索新的戏剧创作方法。他不想重复以往的成功，也不想屈尊去写当时盛行的、诺埃尔·科沃德爵士[3]诸人所写的那种“现实主义”戏剧。他自然而然地选择了诗剧。但是他对诗剧的理解同艾略特和弗莱不同。他想在其中看到生命全部的丰富和光彩，包括人类为建设一个更美好的社会而作的崇高斗争。而且，语言要有乐感、有体魄，尽管他并不排斥——事实上他反而经常用诗歌写作——在关键时刻诗兴大发。他并不总能做到将理念付诸实施，但是当他做到时，比如《给我红玫瑰》，那就成果斐然。

这基本就是我那篇发表在《文学研究》（1958年第1期）的长文《肖恩·奥凯西的成就》所讲的内容。接着我又写了一篇文章，刊在《世界文学》（1959年第2期），用相对不那么专业的语言，把同样的内容又讲了一遍。

在另一篇有关奥凯西的文章（《世界文学》，1962年第3期）中，我为他六卷本的自传写了书评。很高兴有此机会，因为他的自传我是带着浓厚的兴趣读的。他的人生充满曲折，他接触的人——萧伯纳、叶

芝、葛利戈里夫人、复活节起义军 [4]——都以各自不同的方式诠释着英雄气概。这部自传让我惊奇的另一个原因是其全新的写作方式，虽是小说体叙事，但行走自由，从回忆到反思再到回忆，转换自如。语言上是滑稽模仿、猛烈抨击、温馨抒情、乔伊斯般的意识流冥想的杂合。

《世界文学》把我的文章与前面提到的赵萝蕤的译文《卡西迪太太休假了》放在一起，在同一期用如此之多的篇幅介绍他，足以让奥凯西引以为豪了。

此后，“文化大革命”到来。十年间，奥凯西在中国的出版界销声匿迹了。

1977年，国人对西方戏剧的兴趣重燃。很快，北京的剧场就忙着上演西方的戏剧，如布莱希特的《伽利略传》，莫里哀的《悭吝人》，莎士比亚的《哈姆雷特》《威尼斯商人》《一报还一报》《麦克白》和《罗密欧与朱丽叶》。《罗密欧与朱丽叶》是上海戏剧学院的藏族学生用藏语演的！但是，当时奥凯西没有任何升温的迹象。没有他作品的新译本，也没有任何新的关于他的文学批评。

这种状况会持续下去吗？谁也说不好，但我本人希望看到中国能有大公司大胆尝试把他的某部“诗”剧搬上舞台，比如《给我红玫瑰》。我承认奥凯西的有些内容未必能吸引现在的中国观众——他很多剧作的主要情节都是20世纪20年代在都柏林发生的事件，而这显然离中国观众很远——但是他的独特之处在于把现实主义与象征主义结合，把力与美结合，而这都不过时。事实上，他对新诗剧的不懈探索，如果能被更多的中国读者知晓，必将赢得北京和上海志士仁人的仰慕和感激，因为他们虽然无一例外都是现实主义者，但却又都想让戏剧高于现实。所以，也许首先要做的就是劝说出版社出版更多奥凯西的中译本。

后记：劝说似乎立刻有了效果。刚刚就新出了一本《奥凯西戏剧选》，1982年3月由人民文学出版社出版，收录了他的四部剧作：《朱诺和孔雀》《犁与星》《给我红玫瑰》《主教的篝火》。译者是黄雨石和林疑今。

XI THOUGHTS ON HUGH MACDIARMID¹

Hugh MacDiarmid is the pen name of Christopher Murray Grieve who came from the border between Scotland and England. Among his ancestors were tough men who sometimes committed robbery across the border; some were weavers of Scottish cloth. He proudly declared in one of his poems:

Reivers to weavers and to me. Weird way!
Yet in the last analysis I've sprung
Frae battles, mair than ballads...²

To many readers and critics MacDiarmid's most moving poems are those of his early years. About 1925 he and several of his friends initiated the "Scottish Literary Renaissance" movement, and he himself began to write poetry. During these years he wrote mainly lyrical poetry in a peculiar Scottish dialect called Lallans. Even today many people still enjoy these early poems such as "The Watergaw" "The Bonnie Broukit Bairn" "The Eemis Stane" "Moonlight Among the Pines" and "Empty Vessel." These are fresh, beautiful short poems, but not insubstantial ones. MacDiarmid always added something to a simple scene, to enlarge and deepen its significance.

In "Empty Vessel", for instance, the poet describes a country woman's agony upon losing her baby. She is driven insane, singing to her dead baby. The four-line ballad form which the poet uses gives this ordinary scene a style of primitive simplicity and a sense of eternity. A transition appears in the second stanza; the country setting of the first stanza changes into a more general scene of nature. This poem is based on an eighteenth-century folksong, but MacDiarmid enlarges the woman's agony to encompass the whole universe.

"The Eemis Stane" is a meditation on time and life and death. If the world is unsteady like a stone in the wind, then life is simply capricious. Fame and history are only moss and lichen, covering

everything. (This expression is novel—usually people say that fame will be buried by time, or that it will survive time and become immortal.) However, this is not a meditation in the abstract. The scene is concrete; it is surrounded in a desolate atmosphere with strongly infectious power, and the primary images of stone, earth, wind, sky and snow remind the reader of the universal circumstances of human existence.

"Moonlight Among the Pines" is a love poem of great momentum and tender feeling, in the fresh setting of the moon amidst the piney woods.

The poems mentioned above are only a few examples to show that MacDiarmid's lyrics are among the most outstanding works of Scottish literature. Here a key element is the use of the Scottish dialect. MacDiarmid strongly protests the "English ascendancy" in Scottish literature; at the same time he understands the predicament of Scottish poets:

Curse on my dooble life and dooble tongue,
—Guid Scots wi' English a' hamstrung—
Speakin' o' Scotland in English words
As it were Beethoven chirpt by birds:

(I, 236)

He is dealing with Scottish subjects and they must be expressed in the Scottish idiom otherwise the content will be distorted. This conclusion is drawn from the work of many other poets as well as from his own experience. What kind of Scottish dialect should be chosen, then? Burns had provided an example for others, but the bitter experience following his death gives a warning. Writers trying to follow the Burns tradition added a too sentimental and vulgar atmosphere which made the language sound more like that of a tipsy woman. MacDiarmid, however, would go a new way. He chose mainly the dialect from the lowland district of southeast Scotland, added some Scottish words and phrases collected from J. Jamieson's *Etymological Dictionary of the Scottish Tongue*. Consolidating these, he called it a "Lallans language,"

which he used as the language of his early poems. Using the Scottish dialect, absorbing the quintessence from the long tradition of Scottish country people, with the poet's modern sensibility which developed under the influence of the works of Mallarmé, Rimbaud and Rilke to correct any tendencies toward archaism, these poems broke away from the English literary tradition and struck against the "English ascendancy" while displaying the brilliant genius of the Celts. This is the key element which makes MacDiarmid's lyrical poetry fresh and powerful.

MacDiarmid did not rest content with just repeating what he had done. The long poem *A Drunk Man Looks at the Thistle*, published in 1926, marked a further development of his poetic skill. The work consists of several independent poems, including lyrics such as the famous "O wha's been here afore me lass" (I, 103) which made Yeats feel, when he was shown it by a friend, "amazed that there should be such writing and he unaware of it."³ There are also satirical poems, comic poems, philosophical poems, extempore poems, epistles, translations, and imitations. He also wrote his first political poem, the "Ballad of the Crucified Rose" (I, 119), which praised the General Strike of May 1926. What links the whole long poem is its theme: the condition of Scotland. The thistle is the symbol of Scotland, used as the pattern of the Scottish national emblem. It appeared in many places in the poem and the man who was observing it was a drunken person. The moonlight was very gentle, and everything was seen as dreamlike. The thistle underwent many marvelous changes in the drunken man's sleepy eyes. (For a while the thistle became an embryo in a test tube.) Each change represents one aspect of Scottish life, therefore while the drunken man was observing the changes, the poet was reflecting and criticizing the reality of Scotland. MacDiarmid's love for Scotland is beyond question. However, he is also aware of many of the weaknesses of his country. That is why his poetry is full of biting sarcasm and mockery particularly aimed at the upper-class Scottish people, castigating them for their neglect of traditions, their

selfishness, conceit, apathy and self-deception. Even the withering of the red rose of the mammoth demonstration was imputed to the body of the plant itself:

The vices that defeat the dream
Are in the plant itsel',
And till they're purged its virtues maun
In pain and misery dwell.

(I, 121)

MacDiarmid knew exactly what should be a Scottish poet's duty:

A Scottish poet maun assume
The burden o' his people's doom,
And dee to brak their livin' tomb.

(I, 165)

What is the way of salvation for Scotland? The poet, looking far into history, which appeared to him like "a huge moving wheel", then observing the reality of Europe, found that an unprecedented struggle was taking place in Russia. He hailed Dostoevsky:

I, in the thistle's land
As you in Russia where
Struggle in giant form
Proceeds for evermair,
In my sma' measure' bood
Address a similar task,
And for a share o' your
Appallin' genius ask

(I, 137–8)

The conclusion was clear:

—At a' events, owre Europe flaught atween
My whim (and mair than whim) it pleases
To seek the haund o' Russia as a freen'
In workin' oot mankind's great synthesis.

(I, 135)

The word "synthesis" will appear again in MacDiarmid's poems; here it represents the new political and social experiment, referring to the

Soviet system of workers, peasants and soldiers. Influenced by John Maclean, the leader of Scottish workers, MacDiarmid put more and more political meaning into his lyrics; actually he was experiencing an important development in political thought. In addition to the Scottish nationalism which he espoused before, he began to cherish the ideal of communism, and he attempted to achieve a new "synthesis" between these two.

As a result, during the thirties, MacDiarmid wrote his three hymns to Lenin. The first and second were written and published in 1931 and 1932 respectively. The third hymn was written at an unknown date, but it apparently belongs to a later period, to judge from its content and form, and was published in 1955.

In the Soviet Union, long hymns like Mayakovsky's "Vladimir Ilyich Lenin" had been published. By the thirties the Soviet system was well established, but the capitalist world had been shaken by an economic crisis. It was an offense to the bourgeoisie to praise the leader of the world proletariat; it needed not only political courage but also artistic courage to do so, because there would be difficulties in determining what to praise and how to praise.

MacDiarmid solved these difficult problems in his own particular way. He did it neither by shouting hollow words like "long live", nor by loading his writing with fulsome flattery. As he said in the "First Hymn to Lenin", his concern was to see "If first things first had had their richtfu'sway" (I, 298). The "first thing" is Lenin's position in human history. The poet compared Jesus with Lenin, and continued:

Christ's cited no' by chance or juist because
You mark the greatest turnin'-point since him
But that your main redress has lain where he's
Least use—fulfillin' his sayin' lang kept dim
That whasae followed him things o' like natur'
'Ud dae—and greater!

Certes nae ither, if no' you's dune this.
It maitters little. What you've dune's the thing,

No' hoo't compares, corrects, or complements
The work of Christ that's taen ower lang to bring
Sic a successor to keep the reference back
Natural to mak'.

(I, 297)

And the significance of Lenin is:

Great things, great men—but at faur greater's cost!
If first things first had had their richtfu' sway
Life and Thocht's misused poo'er might ha' been ane
For a' men's benefit—as still they may
Noo that through you this mair than elemental force
Has fund a clearer course.

(I, 298)

To MacDiarmid, nothing mattered so much as the development of people, and he especially extolled Lenin because the revolution that he had led enabled for the first time human beings to give full play to their own talents, not like "the traitors...through a' history" (I, 298) causing human beings to be bogged down forever in a state of childish ignorance.

In the "Second Hymn", MacDiarmid discussed the relation between poetry and politics. The poem attracted a good deal of attention from Western critics; some said that MacDiarmid claimed to be the equal of Lenin, and that poetry must be independent of politics. The example they cited was:

Sae here, twixt poetry and politics,
There's nae doot in the en'.
Poetry includes that and s'ud be
The greater poo'er amang men.

(I, 326)

Some quoted the concluding lines: "Ah, Lenin, politics is bairns' play / To what this maun be!" (I, 328) to show MacDiarmid's disrespectful attitude towards politics.

What did he mean by those words? If you reread the whole poem you will find that he was full of respect for and felt very close to

Lenin, therefore he felt that he could come out with what was on his mind, comrade to comrade. He showed this attitude from the beginning:

Ah, Lenin, you were richt. But I'm a poet
(And you c'ud mak allowances for that!)
Aimin' at mair than you aimed at
Tho' yours comes first, I know it.

(I, 323)

The respect that the poet felt for Lenin was fully expressed in the "First Hymn" and other poems written at the same time (e.g. "The Seamless Garment" "The Skeleton of the Future"). So when he wrote the "Second Hymn" one year later he felt no necessity to repeat himself. Instead he discussed poetry in depth. MacDiarmid held high hopes for poetry:

tho' Joyce in turn
Is richt, and the principal question
About a work o' art is frae hoo deep
A life it springs—and syne hoo faur
Up frae't it has the poo'er to leap

(I, 323)

Judging by such criteria he found that the present situation of poetry was not satisfactory. He spoke first of his own poetry:

*Are my poems spoken in the factories and fields,
In the streets o' the toon?
Gin they're no', then I'm failin' to dae
What I ocht to ha' dune.*

*Gin I canna win through to the man in the street,
The wife by the hearth,
A' the cleverness on earth'll no' mak' up
For the damnable dearth.*

(I, 323)

The situation was the same for other poets. They influenced "but a fringe o'mankind in ony way" (I, 324); their topics are too cramped to

attract large spirits; genuine great poetry should be "free and expansive".

Poetry, however, has good prospects, especially as it gains enlightenment from Lenin:

Poetry like politics maun cut
The cackle and pursue real ends,
Unerringly as Lenin, and to that
Its nature better tends.

Wi' Lenin's vision equal poet's gift
And what unparalleled force was there!
Nocht in a' literature wi' that
Begins to compare.

Nae simple rhymes for silly folk
But the haill art, as Lenin gied
Nae Marx-without-tears to workin' men
But the fu' course instead.

Organic constructional work,
Practicality, and work by degrees;
First things first; and poetry in turn
'll be built by these.

(I, 324–5)

This shows solid and concrete admiration of Lenin. How, then, can one say that the poet was joking about Lenin? MacDiarmid's style was at once lively and serious. He considered that poetry must deal with really important subjects instead of getting bogged down in trifles. Such stupid matters should be cut off like a monkey's tail! The poet must be mature, no longer naive—one may recall that this was also stated in the "First Hymn". Now Lenin had given poetry an opportunity to develop fully. As a result of the victory in the struggle which he led, human beings could for the first time be "Freein' oor poo'rs for greater things, / And fegs there's plenty o' them" (I, 325). At such a new level, poetry could be allencompassing, and become:

*The core o'a'activity,
Changin't in accordance wi'
Its inward necessity
And mede o' integrity.*

(I, 328)

Thus MacDiarmid looks forward to a new role for poetry in the future, and if you visualize what this future poetry will be, "politics is bairns' play". MacDiarmid might be right or wrong, but he was not setting himself up as greater than Lenin. He was seeking a new "synthesis" between poetry and politics. It was precisely Lenin's October Revolution which carried human history to a new stage and so made that "synthesis" possible.

"First Hymn" and "Second Hymn" have different emphases, but they are completely consistent in spirit—in the love for the revolutionary leader, in the central argument, even in key phrases (e.g. "first things first"), and both were written in Scottish dialect. In "First Hymn" each stanza consists of six lines (the shorter last line introduces a pause); in "Second Hymn" each stanza consists of four lines. These forms were chosen to suit MacDiarmid's free-flowing, lively style. The poems were not superficial and empty; in them he expounded some general principles of poetry. He wrote concretely but did not get bogged down in details; epigrams appear here and there; images are striking but not fantastic; his skillful use of rhythm takes full advantage of the subtleties of dialect. Thus these two hymns are outstanding in their artistry.

"Third Hymn to Lenin" was first published in *The Voice of Scotland* in 1955. The reason that it was mentioned as a work of a later period is that here MacDiarmid's style changes in comparison with the "First" and "Second Hymn". Scottish dialect and the short stanza disappear; this poem is characterized by free verse and standard English. Words and phrases gush out with a new tremendously eloquent momentum, revealing the poet's anxieties about the city Glasgow.

The poet introduces a seaman, then he asks rhetorically: Can a sailor know the flow of the waves as Lenin knew the flow of history? MacDiarmid then sings of Lenin:

You turned a whole world right side up, and did so
With no dramatic gesture, no memorable word.
Now measure Glasgow for a like laconic overthrow!
On days of revolutionary turning points you literally flourished,
Became clairvoyant, foresaw the movement of classes,
And the probable zig-zags of the revolution
As if on your palm;
Not only an analytical mind but also
A great constructive, synthesizing mind
Able to build up in thought the new reality
As it must actually come
By force of definite laws eventually,

(II, 894)

After this the poet proposes:

Be with me, Lenin, reincarnate in me here,
Fathom and solve as you did Russia erst
This lesser maze, you greatest proletarian seer!

(II, 895)

What was the problem that Glasgow was facing? The poet painted this scene:

A horror that might sicken your stomach even,
The peak of the capitalist system and the trough of Hell,
Fit testimonial to our ultra-pious race,
A people greedy, lying, and unconscionable
Beyond compare.—Seize on this link, spirit of Lenin, then
And you must needs haul upwards to the light
The whole base chain of the phenomena that hold
Europe so far below levels worthy of its might!

(II, 895)

Following this MacDiarmid described the stench of a Glasgow slum, and quoted a passage in prose from William Bolitho's *The Cancer of Empire*:

Door after door as we knocked was opened by a shirted

man, suddenly and softly as if impelled forward by
the overpowering smell behind him....Once in a
woman's shilling boarding-house it leapt out and
took us by the throat like an evil beast. The smell
of the slums, the unforgettable, the abominable smell!

(II, 896)

Despite such slums, however, many Scots were still content to leave
things as they were:

So long as we avoid all else and dwell,
Heedless of the multiplicity of correspondences
Behind them, on the simple data our normal senses give,
Know what vast liberating powers these dark powers disengage,
But leave the task to others and in craven safety live.

(II, 896)

As he did with the drunk men looking at the thistle, once again
MacDiarmid mercilessly castigated those apathetic people: Labour
M.P.'s, idle talkers, scholars and scientists. They allow the fascists to
run wild and even help to spread their rumours. For example,
MacDiarmid pointed to famous astronomers (e.g. Sir James Jeans)
who, instead of carrying forward their research into scientific truth
went back to the arms of the church. The poet shouted with rage at
this situation: "This is the lie of lies— the High Treason to mankind"
(II, 899).

Nor did MacDiarmid spare poets who aroused his disappointment
and anger:

Michael Roberts and All Angels! Auden, Spender, those bhoyos,
All yellow twicers: not one of them
With a tithe of Carlile's courage and integrity.
Unlike the pseudos I am *of*—not *for*—the working class
And like Carlile know nothing of the so-called higher classes
Save only that they are cheats and murderers,
Battening like vampires on the masses.

(II, 900)

A true poet, he pointed out, must be concerned with something

completely different:

Our concern is human wholeness—the child-like spirit
Newborn every day—not, indeed, as careless of tradition
Nor of the lessons of the past: these it must needs inherit.
But as capable of such complete assimilation and surrender,
So all-inclusive, unfenced-off, uncategorized, sensitive and tender,
That growth is unconditioned and unwarped...

(II, 900–1)

In order to accomplish such a prospect, the poet again appealed to Lenin:

...Ah, Lenin,
Life and that more abundantly, thou Fire of Freedom,
Fire-like in your purity and heaven-seeking vehemence,
Yet the adjective must not suggest merely meteoric,
Spectacular—not the flying sparks, but the intense
Glowing core of your character, your large and splendid stability,
Made you the man you were—the live heart of all humanity!
Spirit of Lenin, light on this city now!
Light up this city now!

(II, 901)

This concludes the "Third Hymn." In short, in this poem MacDiarmid called for the awakening of the Scottish people and he considered that the way Lenin pointed out was the only way to eradicate poverty and disease in cities like Glasgow. He adopted a Whitmanesque free verse using language closer to spoken everyday expression, with rapid shifts in diction. The entire poem was written in English, completely abandoning the Scottish dialect. This became a characteristic of his later period.

The change in style first revealed itself in the mid-thirties. The collection entitled *Second Hymn to Lenin and Other Poems*, published in 1935, consisted of about fifty poems. All of them, however, were written in English except "Second Hymn"; among these were several outstanding pieces such as "On the Ocean Floor" "The Storm-Cock's Song" and "Reflections in an Ironworks."

In addition to these, several short English poems are also worth mention. "The Skeleton of the Future" (from *Stony Limits*, 1943) is usually included in selections of the poet's work. In it he used the terminology of geology to describe the solidity and glitter of Lenin's coffin chamber as well as the light which was reflected from the snow outside to represent the Russian land and people, to end with "the eternal lightning of Lenin's bones" (I, 336), a line both realistic (describing the light on Lenin's remains) and symbolic (representing Lenin's undying influence on mankind); the title itself reinforces this theme.

"Of John Davidson" (from *Scots Unbound*, 1932) is another impressive poem. Every line is permeated with deep emotion, although the author unemotionally describes how he observed Davidson's lonely figure walking up to the edge of the sea, but suddenly there is "—A bullet-hole through a great scene's beauty". The serene world was violently torn apart: a talented poet, like other beautiful things, ended in a single moment. Meanwhile MacDiarmid detachedly points out the reason for the tragedy: a shortsighted view of the future, finding the wrong spiritual sustenance. Compared to this deeply felt elegy, many other modern poems that mourn the dead seem to be perfunctory, composed only for the occasion.

It was, however, the long poem that formed the main feature of MacDiarmid's work in the later period. *In Memoriam James Joyce*, published in 1955, was one of them. The poem consisted of 6,000 lines, but was only a part of a much longer poem, *A Vision of a World Language*, which was never completed. The content of *In Memoriam James Joyce* is complex; some parts of it are difficult to understand. At least two themes are clear: first, men must inherit and develop the whole human culture from ancient times to today (this has already been emphasized in "Second Hymn to Lenin"); secondly, a writer should bring his linguistic potential into full play as Joyce had done. MacDiarmid admired the Irish writer greatly. Many critics had frowned on the large number of new words which were created by

Joyce in *Ulysses* and *Finnegans Wake*, but MacDiarmid fully supported Joyce's effort because he (MacDiarmid) considered language as "the central mystery / Of the intellectual life" and thought that a writer should seek the language which best conveys his sensibility:

A language that can serve our purposes,
A marvellous lucidity, a quality of fiery aery light,
Flowing like clear water, flying like a bird,
Burning like a sunlit landscape.
Conveying with a positively Godlike assurance,
Swiftly, shiningly, exactly, what we want to convey,

(II, 822)

MacDiarmid considered that the attempt at originality which he and Joyce were making was significant:

That is what adventuring in dictionaries means,
All the abysses and altitudes of the mind of man,
Every test and trial of the spirit,
Among the débris of all past literature
And raw material of all the literature to be.

(II, 823)

This would be a kind of language that is understood by every nation, thus various cultures develop intercourse with one another and the development of human beings would be universal. It is evident that the poet's two themes are actually one, and that the first one is the prerequisite of the second.

MacDiarmid vigorously practiced what he advocated. *In Memoriam James Joyce* is an embodiment of this theme. He frequently adopted foreign words and quoted foreign writers, scientists and thinkers. In one short section, for example, you can find Sanskrit, Greek, Finnish, and eastern European languages. You will also find Chinese there. He not only quotes Chinese, but also mentions Chinese calligraphers such as Huai Su, Zhao Zi'ang, Huang Shangu, Wang Xizhi, specifying "The ostentatious vulgarity of the Emperor Chien Lung, / And, in the plump and chirpy strokes of Su Tungpo, / The loose flesh and easy manner of a fat person" (II, 765). In using a broad

range of quotations from ancient to modern times, from various countries, MacDiarmid is not doing exactly what T. S. Eliot did in *The Waste Land* and Ezra Pound did in *Pisan Cantos*. MacDiarmid was their friend, and he defended the *Pisan Cantos* in *The Company I've Kept* (1966, Chapt. 7). He enjoyed the poetry of the French Symbolists and such modern German poets as Rilke, and displayed a perfect "modern sensibility" so sedulously cultivated by modernist poets. On two important points, however, MacDiarmid differed from the modernists. Eliot and others depend on knowledge from classical literature, whereas MacDiarmid's poetry spreads its roots in the tradition of Scottish folkliterature, which is an old but vital tradition. Eliot and Pound went back to the past, whereas MacDiarmid looked to the future. In his view, bringing the capacity of language into full play is an indispensable prerequisite for the universal development of human beings, and that is why he was so enthusiastic about it. Following his remark about Su Tungpo, at the end of the section cited, he wrote:

The real humanity of the humane is departing from the world.
I am troubled by the tendency in science to-day
For the law to be derived from limited groups of observations
Rather than from the wide generalisations of understanding.
And I am haunted by the masses
In our great industrial centres,
Greedy for productivity and neglecting fertility.

(II, 765-6)

In MacDiarmid's opinion both "wide generalisations of understanding" and "fertility" are necessary qualities which people should have in a fully developed society. These concerns never troubled the bookish world of Eliot and Pound.

MacDiarmid's works of the later period arouse various responses. Many critics do not like his change of style. Readers enjoy the outstanding passages in these poems, but are puzzled by them as wholes. The poet himself clearly knew what he was doing and explained it in his usual forthright manner. For instance, he wrote:

The greatest poets undergo a kind of crisis in their art,

A change proportionate to their previous achievement.
Others approach it and fail to fulfil it—like Wordsworth.

(I, 614)

* * *

—I am forty-six; of tenacious, long-lived country folk.
Fools regret my poetic change—from my "enchanting early lyrics"—
But I have found in Marxism all that I need—

(I, 615)

He further declared in *The Kind of Poetry I Want*:

Utterly a creator—refusing to sanction
The irresponsible lyricism in which sense impressions
Are employed to substitute ecstasy for information,
Knowing that feeling, warm heart-felt feeling,
Is always banal and futile.

(II, 1021)

Here we can see that he no longer used the Scottish dialect, which is consistent with his abandonment of lyric poetry.

He clearly explained his reason for writing long poems in the essay "Ezra Pound" (*The Company I've Kept* [London, 1966], p. 171):

It is epic—and no lesser form—that equates with the classless society. Everything else—no matter how expressly it repudiates these in the mere logical meaning of what it *says* against what it *is*—belongs to the older order of bourgeois "values"...

MacDiarmid cited Heine as an example and pointed out how he had changed his style after the success of his early lyrics, and enlarged the range of his subjects, though his later poetry was not well received and had still not been correctly reassessed. The writing of epics is an inevitable trend, MacDiarmid thought. Epics were not created in ancient times only; today many progressive poets are writing them—Mayakovsky and Neruda, for instance, as well as "a Yugo-Slav shepherd [who wrote] *The Stormy Years of the 20th Century*"(*The Company I've Kept*, p. 179). They have all written magnificent epics. The appearance of the epic is inevitable, because "The grandeur of the

time requires grand syntheses—not only in fine arts or music, but also in literature, not only in prose, but also in poetry" (*The Company I've Kept*, pp. 178–9).

However, what kind of epic is desirable? There does not seem to be any criterion, but certain tendencies may be seen in MacDiarmid's own later poetry, namely:

"Marxization" of poetry—using poetry to attack and satirize class enemies with a violence hitherto rarely seen in verse, and placing one's hope in universal development, including a "greater synthesis" of human culture, which is what Lenin advocated.

"Scientificization" of poetry—for this MacDiarmid wrote "the poetry of facts", using many images drawn from science, frequently using scientific words.

Internationalization of poetry—for this he drew upon the quintessence of various cultures, quoting philosophical and literary works from various languages, and using large numbers of foreign words.

Establishing a new aesthetics—there are many discussions of poetry and poetics; he not only explained his own poetry and commented on others' poetry, but also explored the fundamental principles of poetry and art. He paid particular attention, as did many other modern poets, to the language of poetry, and he always strove to be original in his own poetic language.

Do these tendencies, or the subjects and artistic techniques used to accomplish them, necessarily lead to the production of epics? This requires further consideration. MacDiarmid's merit is that his poetic performance is far more brilliant than his theory; his practice often remedies the defects of his theory. His long poems may not be epics in the traditional sense—they are not even complete works; however, they represent an important poet's extensive experiments in art. Where experiments succeed, they succeed magnificently: his political poems blend power with beauty; he uses Whitmanesque free verse with cunning; his long stanzas are full of thrust; they shift continuously to

express his sinuous thoughts; he assimilates materials from many sources, making of them a rich and unified poetry. He inserts brilliant comments: the passages in which he talks about art, poetry, language and his own experience and feelings are among the most outstanding in modern European poetry. His exploration of the relation between science and poetry shows a good grasp of important issues in the modern world. He has taken a large step in broadening the range of poetry, and that step is the beginning of his search for a greater synthesis of human culture.

What is our final impression? Among modern British poets MacDiarmid is a master from the North. He followed a road which was trodden by the masses and yet particular to himself—mass-based because of his revolutionary enthusiasm and Communist ideals; particular because of his art. Whatever he wrote carries his own hallmark; it would be almost impossible to imitate his poetry. Even when some of his lines seem to be dull and redundant, suddenly a surprising image or epigram will light up the scene, or an unusual rhythm will soothe the ear. In his later poetry MacDiarmid wanted to repudiate his lyrical quality, but actually this is just the quality that makes him imperishable. This was evident not only when he wrote those enchanting lyrics but also when he wrote his later long poems. A poet's—any poet's—opinions may have great or small historical significance, but it is hard for anyone to escape from the ravages of time. Some scientific theories that MacDiarmid quoted in his long poems are obviously outdated now, and some of his understanding of Marxism may not be universally accepted, but the art of his lyrics will endure. These lyrics are not of a sweet, sentimental kind, but are of a higher order which has resulted from the fusion of deep feeling with an active imagination—the rhythm of a folksong wedded to a twentieth-century poet's sensitivity to language. This higher lyricism is to be found in his powerful eloquence, in the hymns to Lenin, in the homage to Joyce, in the prospect of the "greater synthesis" of human culture in the future.

Because he wrote with such lyricism his poetry will endure better than many modern English and American productions. When this great Scottish poet died in 1978 he had already seen that, with the publication of his *Collected Poems* in 1962, his poetry had finally broken through a long period of neglect and prejudice. Since then it has won more and more readers who wonder at its power and beauty. We can be sure that he laid down his pen with a final sense of triumph.

拾壹 论休·麦克迪尔米德^[1]

休·麦克迪尔米德是克里斯托弗·默里·格里夫的笔名，出生在苏格兰和英格兰交界的地方。祖辈中不乏坚韧之辈，有时会跨界抢劫，也有些是苏格兰织工。他在诗中无比自豪地直言不讳：

从盗贼到织工，再到我。不可思议！

但总而言之，与其说我

源于民歌，不如说我源于战争……

对很多读者和评论家来说，麦克迪尔米德最动人的诗是他早年写的那些。1925年左右，他和几个朋友发起了“苏格兰文艺复兴”运动，他自己也开始写诗。那几年，他主要用一种名为“拉兰斯语”的纯粹苏格兰方言写抒情诗。即便是今天，依然还有很多人喜欢他早年写的这些抒情诗，譬如《彩虹》《被忽略的好孩子》《摇摆的石头》《松林之月》和《空壶》。这些小诗清新美妙，但也并非虚无缥缈，他总是擅长把简单的场景扩展，绵延，赋予其深意。

举例来说，在《空壶》中，诗人描写了一个农妇失去孩子的痛苦。她丧失了理智，对着死去的孩子唱歌。诗人采用的四行民歌体诗节赋予了普通场景一种原始的素朴和永恒感。第二诗节笔锋一转，把乡村场景换成了一种更具普遍性的自然场景。这首诗源自一首18世纪的民歌，但麦克迪尔米德把一个女人的痛苦扩大化，大到囊括整个宇宙。

《摇摆的石头》是对时间、生命和死亡的思考。如果这个世界犹如风中摇摆的石头，那生命纯粹就是反复无常。名望与历史仅仅是石上青苔，遮住一切。（这个比喻很新鲜——人们通常会说名望终会被时间湮灭或名望会超越时间，终成千古。）但这首诗并不是抽象的玄思。场景是具体的：周围一片萧索，极具感染力，石头、泥土、风、天空、雪花等原始意象都会让读者想起人类普遍的境遇。

《松林之月》是一首气势磅礴、情感细腻的情诗，场景是松林中的一轮明月，很是新颖。

以上只是其中几首，但也足以说明麦克迪尔米德的抒情诗是苏格兰文学中的翘楚了。一个重要的因素是他使用了苏格兰方言。他强烈反对苏格兰文学中的“英语至上”，同时他也明白苏格兰诗人的困境：

诅咒我的双重生活！双重语言！

用英语的词汇来诉说苏格兰的事，
就像让乱叫的鸟来唱贝多芬的曲。

(I, 236)

既然谈苏格兰的事情，就该用苏格兰的语言，否则内容就会扭曲。他自身的经历以及其他诗人的经历，都能说明这一点。那该选哪种苏格兰方言呢？彭斯为大家提供了一个范例，但是他死后的悲惨状况对其他诗人又是个警醒。试图追随彭斯的诗人只会更感伤、更低俗，致使语言变得更像个烂醉如泥的女人。麦克迪尔米德要另择新路。他主要用苏格兰东南部的低地方言，然后再从贾米森编写的《苏格兰方言词源词典》里摘些苏格兰词汇。整合后，他称之为“拉兰斯语”，也即他早期诗歌中使用的语言。这些诗用苏格兰方言写成，吸收了苏格兰乡民悠久传统的精华，再加上因马拉美、兰波和里尔克的影响而发展起来的现代意识，诗人脱离了英国文学传统，反抗“英语至上”，同时又展现了塞尔特人的高超才华。这是麦克迪尔米德的抒情诗之所以新颖和有力的主要原因。

麦克迪尔米德没有自甘满足，停滞不前。他1926年发表的长诗《醉汉看蓟草》显示出他的诗艺又有了进一步升华。这部长诗由几首独立的诗组成，包括那首著名的抒情诗《呵，谁已先我而来，姑娘》(I, 103)。一位朋友拿给叶芝看，叶芝诧异“有这么好的诗，而我居然一点也不知道”^[2]。这部长诗中还包括讽刺诗、滑稽诗、哲理诗、即兴诗、书信体诗、译作和仿作。他还写了他的第一首政治诗《受难的玫瑰之歌》(I, 119)，赞扬1926年5月的大罢工。将这部长诗串在一处的是一个共同的主题：苏格兰的困境。蓟草是苏格兰的象征，用在苏格兰的国徽图案中，诗中多次出现，而盯着国徽的是个醉汉。月色温柔，周遭一片朦胧。蓟草在醉汉惺忪的睡眼中历经多次变化。（有那么一会，国徽变成了试管中的胚胎。）每一次变化都代表了苏格兰社会的一个方面，因此当醉汉在观察这些变化的时候，诗人也在审视和批判苏格兰的现实。麦克迪尔米德对苏格兰的挚爱由此可见一斑，但是他也意识到了祖国存在的问题。因此他的诗中到处都是尖锐的嘲讽，尤其是对上层社会，他谴责他们忽视传统、自私、自大、冷漠、自欺欺人。即使声势浩大的示威游行的吉祥物红玫瑰的凋谢也要归因于花朵本身：

毁灭梦想的罪恶
就在花朵本身，

在被清除之前
道德只能寄居于
痛苦和贫穷之中。

(I , 121)

麦克迪尔米德清楚地知道苏格兰诗人的职责所在：

苏格兰诗人要担起拯救
国人厄运的重担，
并打碎活人墓。

(I , 165)

苏格兰的救赎之路何在？诗人遥望历史，那与他就像“移动的大车轮”；接着他把目光投向当时的欧洲，发现俄国正经历前所未有的挣扎。他致意陀思妥耶夫斯基：

我在苏格兰国徽的国度里
你在俄国
面对同样
无比艰难的挣扎。
我可否问你要
一小捧你那
无与伦比的天赋，
因为面对同样的天涯。

(I , 137-8)

结论很清晰：

不管如何，我们的欧洲满载
我的向往（也许不只是向往）。
想抓住俄国的手，朋友的手
来创造人类的伟大结合。

(I , 135)

“结合”一词在麦克迪尔米德以后的诗中还会出现；此处代表新的政治和社会实验，指的是苏联的工人、农民和军人体系。受苏格兰工人运动领袖约翰·麦克林的影响，麦克迪尔米德的抒情诗也越来越有政治色彩；事实上，此时的他正历经政治思想的重要转变。除了之前拥护的苏格兰民族主义，他还开始拥抱共产主义理想，并试图用新的方式把两者结合起来。

结果，麦克迪尔米德在30年代写了三首列宁颂。第一首和第二首分

别写于1931年和1932年，并都于当年发表。第三首写作年份不详，但从形式和内容上看，显然更晚一些，发表于1955年。

在苏联，马雅可夫斯基的长篇《列宁颂》已经出版。到了30年代，苏联社会主义体系已建立完备，然而资本主义世界却遭受了经济危机的打击。当着资产阶级的面夸奖无产阶级的领袖，会引起反感，不仅需要政治上的勇气，也需要艺术上的勇气，因为夸什么，怎么夸，很难把握。

麦克迪尔米德用自己独特的方式解决了这些问题。他既没有空喊“永垂不朽”之类的空口号，也没有满纸谄媚奉承。正如他在《一颂列宁》中所说，他关心的是“首要事情是否放在了首要地位”（I，298）。“首要事情”即列宁在人类历史上的地位。他把列宁与耶稣基督相比：

我们提到耶稣不是偶然，也不是
因为你是耶稣以来历史的转折
是因为你教给我们根除罪恶的方法而耶稣却不好使。
耶稣说追随他的人将会像他一样或比他更好地行事，
这话因是梦想不被了解
而你却让它成为现实。

你还没完成的事，
无妨，你完成的事才要紧。
把你和耶稣比，说你更正或弥补耶稣，也不要紧。
要紧的是我们花了太久才找到耶稣的后继者，
你这个和耶稣并提，和耶稣映衬的人。

（I，297）

列宁的重要性在于：

伟大的事业需要伟大的人——以更大的牺牲为前提，
如果首要事情放在首要地位，
被滥用的思想和权力也可以
更早为大众服务——现在还来得及
由于你，最基本的力量有了真谛。

（I，298）

对麦克迪尔米德来说，没有什么比人的进步更重要了，他尤其拥护列宁，是因为列宁所领导的革命第一次让人得以充分发挥才能，而不是“做历史的叛徒”（I，298），致使人类永远陷入愚昧无知的境地。

在《二颂列宁》中，麦克迪尔米德讨论了诗与政治的关系。这首诗

受到西方评论界的广泛关注，有人说麦克迪尔米德自诩可与列宁平起平坐，并认为诗歌应摆脱政治的影响。他们援引的例子如下：

诗歌与政治相比，
毫无疑问，最终
诗歌包含了它，并必须是
人类更伟大的权力。

(I , 326)

有人引用该诗的结尾“啊，列宁，政治是小孩儿把戏，与这相比！”(I , 328) 来证明麦克迪尔米德对政治的不敬。

他的这些话是什么意思呢？如果你把这首诗从头再读一遍，就会发现他对列宁充满了敬意，并且很亲近，因此他觉得自己可以直言不讳，就像同志之间那样。从一开始他就表现出了这样的态度：

啊，列宁，你是对的。但我是诗人
(因此要请你多包涵，)
我的目标比你的更复杂，
虽然我知道，你的应当占先。

(I , 323)

诗人对列宁的敬意在《一颂列宁》和同时期写的其他一些诗(如《无缝的衣服》《未来的骨骼》) 中完全体现出来了。所以当一年后再写《二颂列宁》时，他觉得没必要自我重复。相反，他转而去深入地讨论诗歌。他对诗歌寄予了厚望：

虽然乔伊斯也对，
他认为就艺术品来说
主要的问题是它的生活源泉
有多深，其次是它能
跳出生活多远

(I , 323)

按照这样的标准，他发现如今的诗歌并不尽如人意。他先谈自己的诗：

有人在工厂和田地读我的诗么，
或在城市大街的中心？
如果没有，那我就不曾尽到
我该尽的本分。

如果我不能打动街上的老百姓
或者灶旁的家庭妇女，

那我纵有天下的一切聪明，
也救不了这该死的失误！

(I, 323)

对其他诗人来说亦是如此。他们“只用一种方式打动了边缘上一小撮”(I, 324)；他们的话题过于狭窄，不能吸引广大的人群；真正伟大的诗歌应该“自由而开阔”。

然而，诗歌仍有美好的前景，特别是因为有了列宁：

诗同政治都要斩断枝节，
抓紧真正的目的不放手，
要象列宁那样看得准，
而这也是诗的本质所求。

列宁的远见加上诗人的天才，
将要产生多大的力，
古今文学里所有的一切，
都不能同它匹敌。

不是唱小调去讨好庸人，
而是拿出全部诗艺，
就象列宁对工人不用速成法，
而讲了整套马克思主义。

有机配合的建设工作，
实干，一步一步前进，
首要事情放在首要地位，
诗也要靠这些产生。

(I, 324—5)

这里体现了麦克迪尔米德对列宁深深的崇拜。怎么会有人说他对列宁不敬呢？麦克迪尔米德的诗风既生动又严肃。他认为诗歌必须写真正重要的东西，而不是纠缠于细枝末节。这些细枝末节就像猴子尾巴，早该割掉！诗人应该成熟，不要再幼稚了——我们可能还记得诗人在《一颂列宁》中也这样说过。现在列宁给了诗歌一个全面发展的机会。由于他领导的革命取得了胜利，人类第一次能够“为更伟大的事情而斗争／争取自由”。在这种全新的背景下，诗歌要包含一切，并成为：

一切活动的中间。

随

内在的需要而变，
并由完整组建。

(I, 328)

因此，麦克迪尔米德对诗歌在未来扮演的新角色寄予了厚望，如果你想想象一下这种角色是什么，那就是“为政治服务”。不论麦克迪尔米德正确与否，他都没有自诩比列宁伟大。他是在寻找诗歌和政治之间的新“结合”。恰恰是列宁领导的十月革命把人类历史引向了一个新台阶，从而使得这种“结合”成为可能。

《一颂列宁》和《二颂列宁》强调的重点有所不同，但在主题上完全一致——在对革命领袖的热爱上，在中心思想上，甚至在关键词汇上（比如“首要事情放在首要地位”），并且两首诗都用苏格兰方言写成。

《一颂列宁》每个诗节六行（最后一行短些，是个停顿）；《二颂列宁》每个诗节四行。这样的诗节与麦克迪尔米德自由流畅、生动活泼的文体正相适宜。这些诗歌不肤浅，不空洞；在其中他阐述了诗歌的某些基本原理。他写得很具体，但没被细节牵绊；警句随处可见；意象惊人，但不怪异；他巧妙地运用韵律，方言的微妙得以全部显现。因此这两首颂的艺术成就斐然。

《三颂列宁》最先于1955年发表在《苏格兰之音》上。之所以被当成诗人晚期的作品，是因为与前两首相比，这首颂的风格有了变化。诗中不再用苏格兰方言和短小诗节，而是代之以自由诗体和标准英语。字句喷涌而出，带着一种全新的磅礴气势，表现出诗人对格拉斯哥这座城市的忧虑。

诗人介绍了一位海员，然后反问道：海员能否像列宁知道历史的走向一样，知道潮水的走向？接着他便开始歌颂列宁：

你改造了一个世界，
没有激烈的运作，或华丽的言语。
把格拉斯哥也来个如此简洁的改造！
在革命的转折点你高屋建瓴，
洞悉，预测着阶层的变动，
以及革命可能的方向，
好像一切都轻如反掌；
你不仅分析，而且
是建设，构建

新的世界。
新的世界终将实现
因为有确凿的定理。

(II , 894)

然后诗人请求道：

和我在一起，列宁，化为我身，
像你对俄国那样，对待
这里的浅层谜团，你这个最伟大的无产阶级巨人！

(II , 895)

格拉斯哥正面临什么问题呢？诗人描绘了当时的场景：

作呕的恐惧，
资本主义的罪恶，地狱的底层，
证实了过于虔诚的人类
贪婪、谎言、冷漠的无可比拟——
抓住这个支点，列宁的真谛，
向上升，即使超过力气，
也要升到有光处，
整个欧洲脱离地狱。

(II , 895)

接下来麦克迪尔米德描写了格拉斯哥贫民窟的恶臭，并从威廉·伯利梭的《帝国癌症》中引用了一段：

每敲一家，都是穿着上衣的男人开门。急促而又悄无声息，好像被身后的气味所驱使……这种气味有一次从一个女人寒酸的小屋传出，当时我们好像被恶兽掐住了喉咙。那种贫民窟的气味，让人难忘的恶心的气味！

(II , 896)

尽管存在这样的贫民窟，很多苏格兰人仍乐于现状：

我们对一切视而不见，只是存活，
不顾身后的复杂与喧闹，
只管向那感官去要，
黑暗力量虽促发了多少对解放的渴望，
把任务留给他人，把安全与暂居留给怯懦的自我。

(II , 896)

如同对待看国徽的醉汉一样，麦克迪尔米德又一次无情地谴责这些冷漠之人：工党议员、空谈家、学者和科学家。他们任由法西斯胡作非为，甚至还帮他们散布谣言。麦克迪尔米德指出一些著名宇航员（比如，詹

姆斯·琼斯爵士）不去从事科学研究，反而躲在教会的臂膀之下。诗人对此义愤填膺，大声疾呼道：“这是谎言中的谎言——对人类的最高叛逆”（II，899）。

麦克迪尔米德也没放过那些让他失望和愤怒的诗人：

迈克尔·罗伯特和其他的天使诗人！奥登，斯宾德，他们是
黄色的两面派：没有一人
能有卡里里十分之一的勇气和正直。
他们不为工人阶级，
眼中只有所谓的上层阶级
还是骗子和杀人犯，
靠民膏民脂养肥了自己。

（II，900）

他指出，真正的诗人应该关心另外一种完全不同的事情：

我们关心的是整个人类——像儿童
每天的新生——不是不顾传统，
也不是不管过去的经验：这些都必须继承。
而是完全同化和屈尊，
全面吸纳，不阻挡，不分级，充满敏感和温存，
那才是无条件的，笔直的成长。

（II，900-1）

为了实现这样的愿景，诗人再次请求列宁：

啊，列宁，
生命以及你自由的茂盛火种，
你的纯洁似火，你的热烈齐天，
不会只流星般消逝。
——不是火花四溅，而是你强烈的
光，持久的光与美，
使你成为了你——人类的心！
你的精神，点亮这座城市！
点亮这座城市！

（II，901）

这就是《三颂列宁》的结尾。简而言之，在这首诗中他呼吁苏格兰人民觉醒起来，并认为列宁指出的道路是根治格拉斯哥这类城市的贫穷和疾病的唯一办法。他采用惠特曼式的自由诗体，用一种更接近生活的口语，不断变换措辞。整首诗都用英语写成，完全摒弃了苏格兰方言。这

些都是他晚期诗歌的特征。

这种风格的转换在30年代中期就初见端倪。1935年出版的诗集《二颂列宁及其他》收录了大约50首诗，但除了《二颂列宁》外，全都用英语写成，其中包括《海底》《雨中公鸡之歌》《铁厂有感》等名篇。

此外，还要提一下他的几首短诗。《将来的骨骼（列宁墓前）》（选自《无情的界限》，1943），通常都会被选入他的各类诗集中。他在这首诗中用地质学词汇描述列宁墓室——坚硬又闪耀，用映雪之光来代表俄国的人民和土地，用“列宁遗骨的永恒的雷电”结束全诗，这一句既真实（光、影、墓），又满载象征（列宁的光对人类的照耀将永存）。诗的标题也进一步提升了主题。

《悼约翰·台维孙》（选自诗集《解放了的苏格兰人》，1932）也是一首感人至深的诗。^[3]每一行都饱含深情，尽管作者似乎不带感情地描述他如何看着诗人台维孙孤独地走向大海，只是突然间，“一颗子弹洞穿了美丽的风景”。寂静的世界猛然被撕碎：一个才华横溢的诗人，如其他美好的事物一样，在刹那间归于消亡。同时，麦克迪尔米德还冷静客观地指出悲剧的原因：对未来缺乏远见，没有找到正确的精神支柱。和这首饱含深情的挽歌相比，很多哀悼死者的现代诗都显得草率，应景之作罢了。

但最能体现麦克迪尔米德晚期创作特色的还是其长诗。1955年出版的《悼念詹姆斯·乔伊斯》就是其一。那首诗6000行，但还只是一首更长的诗《世界语言的幻象》的一部分，而《世界语言的幻象》最终也没有写完。《悼念詹姆斯·乔伊斯》内容复杂，有些部分很难读懂。但至少有两个主题很明确：第一，人类应继承并发扬从古至今的一切文化遗产（这在《二颂列宁》中已经强调过）；第二，作家要把自己语言上的潜能全部发挥出来，就像乔伊斯那样。麦克迪尔米德对这位爱尔兰作家非常崇拜。很多评论家都对乔伊斯在《尤利西斯》和《芬尼根守灵夜》里创造的大量新词不以为然，麦克迪尔米德却极力赞赏，因他认为语言是“智慧的神秘内核”，一个作家应该去找寻最能传达其情愫的语言：

语言像透明的水，闪耀的塔，
展翅的鸟，照耀大地的光，
——传达我们要传达的东西——
快，准，并以上帝的灵光。

麦克迪尔米德认为自己和乔伊斯对独创性的追求意义深远：

在字典里翻找
就像找寻人类思想的迷宫和分布，
以及接受精神的考验与检验，
在历史上的文学废墟里，
也在未来文学的荒地上。

(II, 823)

这应该是世界各民族都能理解的那种语言，正因如此各种文化之间才能彼此交流，人类才会共同进步。很显然诗人的两个主题实际是一个，第一个是第二个的先决条件。

麦克迪尔米德极力把他的主张付诸实践。《悼念詹姆斯·乔伊斯》就是一例。他在诗中不断地使用外来词，引用外国作家、科学家和思想家。比如，在短短的一节中，你能看到梵文、希腊语、芬兰语以及东欧各语，甚至还有中文。他不仅引用中国作家，还提到了书法家怀素、赵子昂、黄山谷、王羲之，并专门指出乾隆皇帝“炫耀自己的庸俗作风 / 苏东坡丰腴而活泼的笔法，象一个胖子肌肉松弛而态度潇洒”(II, 765) [4]。虽然麦克迪尔米德从古今中外的作品中大量引用，但他同艾略特写《荒原》与庞德写《比萨诗章》时不尽相同。麦克迪尔米德是他们的朋友，而且还在《我的同伴》(1966, 第7章)中为《比萨诗章》辩护过。他也喜欢法国象征派诗人，喜欢里尔克那样的德国现代诗人，并完全具备现代诗人孜孜以求的“现代意识”。但他与现代诗人有两点重要的不同。艾略特和其他现代诗人从古典文学中汲取营养，麦克迪尔米德则扎根于苏格兰的民间文学传统，那是一个古老而又充满生机的传统。艾略特和庞德回顾过去，麦克迪尔米德则放眼未来。在他看来，把语言的力量全部发挥出来是人类共同发展不可或缺的先决条件，那也是他为何对之如此热衷的原因。在前面我们引用的那节末尾，他谈完苏东坡后，写道：

人性已远离世界。
今日科学让人忧，
结论产生于有限观察
而非通识和认知。
人们生存在
工业的中心，
渴求生产力，忽略生命力。

麦克迪尔米德认为，一个社会要全面发展，“通识和认知”以及“生命力”是人必备的素质。而这些都是书生意气的艾略特和庞德从未考虑过的。

人们对麦克迪尔米德后期的作品褒贬不一。很多评论家不喜欢他诗风的改变。读者喜欢这些诗中的精彩段落，但作为整体这些诗又让他们困惑。诗人则清楚地知道自己在做什么，并以其一贯的率直加以解释。比如，他写道：

最伟大的诗人在艺术道路上都会经历危机；
之前成就多大，现在变化就有多大。
其他人也曾尝试，却以失败告终——比如华兹华斯。

(I , 614)

我46岁；顽强的乡巴佬。
庸人们惋惜我诗风的改变，说我抛弃了
“有魅力的早期抒情诗”——
可是我已马克思主义里找到了我所需的一切……

(I , 615)

他在《我要哪种诗》中接着说道：

我要新的诗——
我拒绝不负责的抒情诗，
因为狂喜的感觉，
只会使人忘却内质。
感情的，温暖的诗
毫无用处且毫无新意。

(II , 1021)

这里，我们可以看出他不再使用苏格兰方言，而这和他放弃写抒情诗也是相辅相成的。

在文章《庞德》（出自《我的同伴》[伦敦，1966]，第171页）中，他清楚地解释自己为何写长诗：

只有史诗——不是任何小点规模的诗——才能等同于没有阶级差别的社会。
别的诗——不管这些诗多么有力地批判那些逻辑混乱、词不达意的作品——都是
为资产阶级旧秩序服务的……

麦克迪尔米德把海涅作为例子，并指出他在早期抒情诗成功后如何转变风格，扩充主题，尽管其晚期的诗歌并不受欢迎，而且至今还未得到应

有的评价。麦克迪尔米德认为写长篇史诗是必然选择。不光古代人写史诗，今天很多进步诗人也在写史诗——比如马雅可夫斯基和聂鲁达，还有“[写]《二十世纪动荡岁月》的那个南斯拉夫牧羊人”（选自《我的同伴》，第179页）。他们都创作了伟大的史诗。史诗的出现也是必然，因为“伟大的时代需要伟大的结合——不仅是在美术和音乐中，而且在文学中，不仅在散文中，也在诗歌中”（选自《我的同伴》，第178-9页）。

但什么样的史诗为好呢？似乎没有什么标准，不过麦克迪尔米德的晚期诗歌中倒是有某些倾向：

诗歌的“马克思主义化”——用诗歌前所未有的力度，去攻击和讽刺阶级敌人，寄希望于人类的共同进步，包括列宁所倡导的人类文化的“伟大结合”。

诗歌的“科学化”——为此，麦克迪尔米德创作了一种“事实诗”，使用很多科学中的意象，经常使用科学术语。

诗歌的国际化——为此，他从各种文化中汲取营养，引用各种语言的哲学和文学经典，并大量使用外来词。

建立一种新美学——他对诗与诗学有诸多讨论；他不仅谈论自己的诗，评价别人的诗，还探讨诗歌和艺术的基本原则。同其他很多现代诗人一样，他对诗歌的语言尤为关注，总是力求语言的新颖。

那是否做到以上几点，或者选用这些主题与创作技巧，就一定能写出史诗了呢？尚需进一步斟酌。麦克迪尔米德的优点在于他的诗歌创作比理论好很多，他的创作常常可以弥补其理论的不足。他的长诗也许不是传统意义上的史诗——甚至都不是完整的作品，但它们标志着一个伟大诗人在艺术上的大力探索。探索若是成功，就非常成功：他的政治诗兼具力与美；他巧妙地运用惠特曼式的自由诗体；他的长诗节具有无限推动力，不断转变以表达诗人蜿蜒的思想；他整合多种资源，创作出丰富而又浑然天成的诗。他在诗中穿插精彩评论：他那些谈论艺术、诗歌、语言以及自己的经历和情感的章节是欧洲现代诗歌中的翘楚。他对科学和诗歌关系的探讨，显示出他对现代社会重要问题的很好把握。他扩充了诗歌的内容，向前迈了一大步，而这一步也是他探索人类文化如何更好结合的开始。

那我们最终的印象如何呢？在英国现代诗人中，麦克迪尔米德是一位来自北方的大诗人。他走的是一条大众化但又有自我特色的道路——

说大众化，是因为他的革命热情和共产主义理想；说有自我特色，是因为他的艺术造诣。他无论写什么都带有自己的印记，别人几乎无法模仿。即便某些诗行显得无味、累赘，突然间也会有一个意象或警句照亮全诗，或有一个出奇的韵律让人耳目一新。在其晚期的诗中，麦克迪尔米德想要摒弃抒情特征，但实际上正因这些特征他才光辉永存，不仅明显体现在他写这些令人陶醉的抒情诗的早期，也体现在后期的那些长诗中。一个诗人——任何诗人——的创作理念的历史意义或大或小，但谁也无法逃离时间的魔掌。麦克迪尔米德在长诗里引用的有些科学理论显然已经过时，他对马克思主义的一些理解也未必完全正确，但是他的抒情艺术将会长存。这些抒情诗不是甜美、感伤的那种，而是更上一层，是深切情感和丰富想象力的结合——苏格兰的民歌节奏与一个20世纪诗人对语言的敏感力相结合。这更上一层的抒情见之于他有力的雄辩，他的列宁颂，他对乔伊斯的敬佩，他对未来人类文化“更好结合”的愿景。

因为这样的抒情艺术，他的诗才能比很多英美现代派诗人的作品都更能经受住时间的考验。这位苏格兰大诗人在1978年去世前，已经看到了自己的诗走出长期被忽略、被非议的状态（他的《诗集》于1962年出版）。此后，越来越多的读者被他诗歌的力与美所打动。我们相信他最终是带着成功的喜悦放下诗笔的。

- 5 *Ibid.*, p. 17.
- 6 *Straw Sandals* was published by the M.I.T. Press in 1974.

伍 中国的现代诗

- 1 《诗论零札》，《戴望舒诗集》，四川人民出版社，1981，第161页（Dai Wangshu, *Poems*, Chengdu, 1981, p. 161）。
- 2 艾青：《望舒的诗》，《戴望舒诗集》，第7页（Ai Qing: "On Dai Wangshu's Poetry", in Dai Wangshu, *Poems*, p. 7）。
- 3 卞之琳：《序》，同上书，第8页（Bian Zhilin: Preface to Dai Wangshu, *Poems*, p. 8）。
- 4 卞之琳：《雕虫纪历》，增订版，香港三联书店，1982，第20页（Bian Zhilin, *Records of a Carving Insect*, Revised Ed., Hong Kong, 1982, p. 20）。
- 5 同上，第19页。
- 6 In Japan the instrument is called *shakuhachi*.
- 7 《雕虫纪历》，增订版，第6页（*Records*, p. 6）。
- 8 鲁迅：《〈中国新文学大系〉小说二集序》，《鲁迅全集》，北京人民文学出版社，1981，第6卷，第243页（Lu Xun: *Complete Works*, VI, 243）。
- 9 The Chinese originals are, respectively：死的子宫，观念的丛林，我缢死了我错误的童年，我从我心的旷野里呼喊，你给我们丰富和丰富的痛苦，水流山石间沉淀下你我。
- 10 Quoted from the poem 《三十岁诞辰有感》("Reflections on My Thirtieth Birthday").
- 11 *Ibid.*

- 12 闻一多：《时代的鼓手》，《闻一多全集》丁，235页与238页（Wen Yiduo, *Works*, IV, pp. 235 and 238). Cf. D. H. Lawrence: "Before everything I like sincerity, and a quickening spontaneous emotion. I do not worship music or the half-said thing." (Letter of 17 July 1908, in *The Collected Letters of D. H. Lawrence*, ed. Harry T. Moore, Vol. I, New York, 1962, p. 21)。
- 13 This Anthology is included in Wen's *Works*, IV.

柒 译诗与写诗

- 1 The author is indebted to several friends for helping to track down and elucidate the Spanish and Russian originals of some of the passages cited. Particular thanks are due to Professor Liu Zongci, Mr. Jiang Zhifang and Mr. Zhou Qiang.
- 2 《诗苑译林》，湖南人民出版社，1981（Verse Translations Series, Changsha, Hunan: Hunan People's Publishing House, 1981）。
- 3 《戴望舒译诗集》，湖南人民出版社，1983（*Poems Translated by Dai Wangshu*, Changsha: Hunan People's Publishing House, 1983）。
- 4 波德莱尔著，王了一译：《恶之花》，北京，外国文学出版社，1980，第173页（Charles Baudelaire, *Les Fleurs du Mal*, translated by Wang Liaoyi, Beijing: Foreign Literature Publishing House, 1980, p. 173）。
- 5 夏·波德莱尔著，陈敬容译：《太阳（外四首）》，《世界文学》，1984，第4期，第280页。（Charles Baudelaire, *Five Poems*, translated by Chen Jingrong, *World Literature* (Beijing), No. 4, 1984, p. 280）。
- 6 《戴望舒译诗集》，第153页（*Poems Translated by Dai Wangshu*, p. 153）。
- 7 《恶之花》（译者序），第2页（Preface to his version of *Les Fleurs du Mal*, p. 2）。
- 8 Quoted in Enid Starkie's Introduction to Charles Baudelaire, *Selected Poems*, London: The Falcon Press, 1946, p. 12.
- 9 《戴望舒译诗集》，第315页（*Poems Translated by Dai Wangshu*, p. 315）。

捌 我译乔伊斯、彭斯和其他

- 1 In January and April, 1981, the author was interviewed by Radio Beijing, which subsequently broadcast the recordings in its English programme "Culture in China". The present article is based on them.

玖 查尔斯·兰姆和约翰·韦伯斯特

- 1 Swinburne, "To him and to him alone it is that we owe the revelation and the

- resurrection of our greatest dramatic poets after Shakespeare", in "Charles Lamb and George Wither", *Miscellanies*, 1886, p. 199.
- 2 See Lamb's letter to William Upcott dated 10 April 1827 (*Letters*, ed. E. V. Lucas, 3 vols., 1935, III, 82).
 - 3 *A Letter to William Gifford*, Esq., 1811, shows the scholar's pique against the efforts of what he considered to be trespassers, men like Lamb and Weber. The first part is a review of the work done by Oldys, Dodsley, Thomas Hawkins, Isaac Reed and other scholars in rehabilitating the old drama.
 - 4 For instance, Robert D. Williams, in "Antiquarian Interest in Elizabethan Drama before Lamb", *PMLA*, LIII (1938), 434-444. Cf. however, F. S. Boas, "Charles Lamb and the Elizabethan Dramatists", *Essays and Studies*, XXIX (1943), 62-81. For a view, not shared by the present writer, of Lamb as a critic in the *Specimens*, there is R. C. Bald's "Charles Lamb and the Elizabethans" in *Studies in Honor of A. H. R. Fairchild*, ed. C. T. Prouty, Univ. of Missouri Series, 1946, pp. 169-174.
 - 5 As pointed out by Dr. Boas, *op. cit.*, p. 78.
 - 6 Burnett was an acquaintance of Lamb's, and very possibly he was helped by Lamb in the compilation of his anthology. Mary Lamb, writing to Sarah Stoddart on February 21, 1806, had this to say, "...Your friend Burnett calls as usual, for Charles to point out something for him...." (*Letters*, ed. *cit.*, I, 428).
 - 7 *Life and Correspondence of Robert Southey*, ed. C. C. Southey, 6 vols., 1849-50, II, 293-4.
 - 8 *Excursions in Criticism*, 1893, p. 83.
 - 9 Of the poetry volumes, the British Museum has the following editions: 1791, 1796, 1801, 1805, 1807 (*Poetical Epitome*), and 1816. To these E. R. Wasserman's Bibliography, *op. cit.*, adds those of 1780 (Dublin), 1789, and 1792.
 - 10 *Letters*, ed. *cit.*, I, 32; quoted by Edmund Blunden in *Essays on the Eighteenth Century Presented to David Nichol Smith*, Oxford, 1945, pp. 229-230.
 - 11 The history of the *Specimens* has been well told by Dykes Campbell, in *The Athenaeum* for August 1894, pp. 265-7. See also E. V. Lucas's continuation of it in his edition of *Works of Charles and Mary Lamb*, 7 vols., 1903-5, IV, 597-603, and F. S. Boas, *op. cit.*
 - 12 *Works*, ed. *cit.*, I, 98, in "On the Tragedies of Shakespeare".
 - 13 For Archer on this head, see especially his article "Webster, Lamb, and Swinburne" in *The New Review* for January 1893, pp. 96-107. The use of "poems" for plays has been so often and so widespread that one needs only instance

- Swinburne in *The Age of Shakespeare*, 1908, p. 3, where Marlowe's *Faustus* is called "that magnificent poem", and p. 4, where there is the phrase, "of all great poems in dramatic form". See, also, Gosse in *The Jacobean Poets*, 1894, pp. 161, 166, 169, 171.
- 14 This distinction between literary history and criticism is made by F. W. Bateson in *English Poetry and the English Language*, Oxford, 1934, pp. 4–5.
 - 15 Apart from the contemporary strictures of Gilchrist and Gifford, see Saintsbury's *A History of English Criticism*, 1911, pp. 349–351.
 - 16 F. L. Lucas, op. cit., I, 17, "And so all their Elizabethan playwrights, Shakespeare included, worked predominantly in scenes". Lucas, however, was still explaining away a weakness, which is seen as a triumph by William Empson and M. C. Bradbrook. See also U. M. Ellis-Fermor, *The Jacobean Drama: An Interpretation*, 1936, pp. 170–190. Even more interesting is the article "Tragedy of Blood" by James Smith in *Scrutiny*, VIII(1939), 265–280.
 - 17 *The Annual Review, and History of Literature*, Vol. VII, for 1808, published in 1809, p. 568.
 - 18 Archer's article in *The New Review*, already cited, p. 104. Cf. also Edmund Gosse, generally a eulogist, in *The Jacobean Poets*, 1894, p. 169, where he calls the horror scenes "blots on what is notwithstanding a truly noble poem, and what, with more reserve in this respect, would have been one of the first tragedies of the world".
 - 19 *Letters*, ed. cit., II, 73.
 - 20 Coleridge's *Shakespearean Criticism*, ed. T. M. Raysor, 2 vols., 1930, II, 87. No wonder the editor says that he fails to identify the quotation.
 - 21 Later, in *Biographia Literaria* (ed. J. Shawcross, 2 vols., Oxford, 1907, II, 61), Coleridge praises the *Specimens* again: "a fine and almost faultless extract...and deriving a high additional value from the notes, which are full of just and original criticism, expressed with all the freshness of originality."
 - 22 LVIII, 349–356.
 - 23 Letter dated June 7, 1809 (*Letters*, ed. cit, II, 73).
 - 24 *The Gentleman's Magazine* for May, 1833, p. 417.
 - 25 Such as Leigh Hunt in *Imagination and Fancy*, 1844, p. 220, "I take Webster and Decker to have been the two greatest of the Shakspeare men, for unstudied genius, next after Beaumont and Fletcher". What a tangle of comparisons!
 - 26 Edmund Gosse, *Seventeenth Century Studies*, 1883, 1913, p. 50.

- 27 J. A. Symonds, *Webster and Tourneur*, 1888, p. xi.
- 28 *The Age of Shakespeare*, 1908, pp. 45 & 47. But the article was first published in *The Nineteenth Century* for June, 1886, pp. 861–881.
- 29 *Essays and Studies*, 1875, p. 277.
- 30 Cf. his article "John Webster" in *Encyclopaedia Britannica* XXIV (1888).
- 31 *Excursions in Criticism*, 1893, pp. 18–19.
- 32 *The Age of Shakespeare*, already cited, pp. 35–36.
- 33 *The Works of John Webster*, 4 vols., 1830, I, viii–ix. I follow however the revised text of the 1857 ed., pp. xiii–xiv.
- 34 op. cit., III, 620.
- 35 *Plays and Puritans, and Other Historical Essays*, 1873, pp. 48 & 50. The article first appeared in *Miscellanies II*, 1859.
- 36 *A History of English Dramatic Literature*, 3 vols., 1875, new ed. 1899, III, 58.
- 37 *Seventeenth Century Studies*, 1883, p. 56.
- 38 *The Age of Shakespeare*, 1908, p. 40.
- 39 J. G. Lockhart, *Memoirs of Sir Walter Scott*, 5 vols., 1900 (Macmillan ed.), II, 433.
- 40 *Letters of Sir Walter Scott*, ed. H. J. C. Grierson et al., 12 vols., 1932–7, XII, 1.
- 41 p. 172.
- 42 II, 564–565.
- 43 *Literary Hours*, 1798, pp. 444 ff. The quotation from Headley appears originally in the Preface to *Select Beauties of Ancient English Poetry*, 2 vols., 1787, I, xxviii.
- 44 p. 564.
- 45 p. 565.
- 46 op. cit., III, 621–622.
- 47 *Ibid.*, III, 619–621.
- 48 Vol. III, No. 17, for August 1818. This is also the number which contains the fierce attack on Leigh Hunt and his "Cockney School of Poetry".
- 49 pp. 657–662.
- 50 pp. 557–562.
- 51 III, 215.
- 52 op. cit., V, 351. Dilke looked into the parish registers for the period 1624–1639.

- 53 I, 260–264.
- 54 op. cit., I, xiv–xlv.
- 55 *Memoirs of the Principal Actors in the Plays of Shakespeare*, 1846, p. xxxii.
- 56 See F. L. Lucas, op. cit., I, 49.
- 57 See *The Works of William Hazlitt*, ed. P. P. Howe, 21 vols., 1930–1934, VI, 385, the introductory note by the editor.
- 58 As he so gloriously describes at the end of Lecture III.
- 59 *Works*, ed. cit., XII, 121.
- 60 Leigh Hunt (*Imagination and Fancy*, 1844, p. 220) and Swinburne (*Essays and Studies*, 1875, p. 277) were to mention them together later.
- 61 Coleridge says that Hazlitt steals from him and Lamb. See his *Unpublished Letters*, ed. E. L. Griggs, 2 vols., 1932, II, 189–190. For Hazlitt's view of Lamb as a critic, see the article on "the occult school" (*Works*, ed. cit., VIII, 225–226) and also "Elia and Geoffrey Crayon" (*Works*, XI, 178–184).
- 62 *Works*, ed. cit., VIII, 192, 218n.; XII, 122, 320; XVI, 214; XVII, 130; XIX, 45.
- 63 *Ibid.*, XII, 53–54, for instance.
- 64 As he was when lecturing on Shakespeare in 1817. See H. W. Garrod, *The Place of Hazlitt in English Criticism* (Lecture delivered in 1925), p. 6.
- 65 The review first appeared in *The London Magazine* for May, 1821 (*Works*, ed. cit., XIX, 45).
- 66 Letters to John Murray dated 4 January 1821 (*Works of Lord Byron: Letters and Journals*, ed. R. E. Prothero, 6 vols., 1898–1901, V, 217).
- 67 *Ibid.*, (*Letters*, V, 218).
- 68 Letter to John Murray dated 6 July 1820 (*Letters*, V, 47).
- 69 *Journal of the Conversations of Lord Byron*, 2 vols., Paris, 1824, I, 147–148.
- 70 As for instance made by Hazlitt in *The London Magazine*, already cited.
- 71 op. cit., I, 148.
- 72 Letter dated 26 April 1821 (*Letters*, V, 268).
- 73 Thomas Medwin, *The Life of Percy Bysshe Shelley*, ed. H. B. Forman, 1913, p. 256.
- 74 *Ibid.*, p. 256.
- 75 Letter to Thomas Forbes Kelsall, dated 11 January 1825 (*Works of Thomas Lovell*

Beddoes, ed. H. W. Donner, 1935, p. 595).

- 76 The lines quoted are: I have sung / With an unskilful, but a willing voice (IV, i, 332–4).
- 77 Letter to Kelsall, dated 17 April 1824 (*Works*, p. 586).
- 78 Letter to Kelsall, dated 30 April 1829 (*Works*, p. 645).
- 79 There was an article, of negligible value, discussing Webster's plays in *The Retrospective Review* for 1823, pp. 87–120.
- 80 Wordsworth, who had asked others to quit their books, was struggling under failing eye-sight to read Lamb's extracts in 1830. See his letter to Lamb dated 10 January 1830 (*Letters: the Later Years*, ed. Ernest de Selincourt, 3 vols., Oxford, 1939, I, 446). John Clare praised Lamb for his reviving "our old bygone Bards with their warm homely phrase". See *Poems*, ed. J. W. Tibbie (1935), II, 112.
- 81 Letter to Bernard Barton, written in early spring, 1824 (*Letters*, ed. cit., II, 420). The quotation is from *The Duchess of Malfi*, IV, i, 117–8.
- 82 Letter to Bernard Barton, dated 23 January 1824 (*Letters*, II, 416). Cf. *DM*, IV, ii, 27, "Th'heaven ore my head, seemes made of moltn brasse."

拾壹 论休·麦克迪尔米德

- 1 Originally written in Chinese, the essay is translated into English by Ms Zha Jianying of the University of South Carolina. This is a version corrected by the author.
- 2 Hugh MacDiarmid: *Complete Poems 1920–1976*, eds. Michael Grieve and W. R. Aitken (London, 1978), Vol. II, 1150. All further quotations from MacDiarmid will be from this edition.
- 3 Oliver St. John Gogarty's letter of 4 Sept. 1951. See Kenneth Buthlay's *Hugh MacDiarmid* (Edinburgh, 1964), Chapt VIII.

译者注

序言

- 【1】 詹姆士一世时代即英王詹姆士一世统治的时代（1603-1625），以文学和哲学的蓬勃发展而著名。

壹 论文学间的契合

- 【1】 赖特（James Wright），1927-1980，美国著名诗人、“新超现实主义”诗歌流派主将之一。
- 【2】 洛尔迦（Federico García Lorca），1898-1936，西班牙诗人。
- 【3】 西里尔·特纳（Cyril Tourneur），1575-1626，英国剧作家和诗人。
- 【4】 查良铮译。
- 【5】 卢那察尔斯基（Lunacharsky），1875-1933，苏联文学家、教育家、美学家、哲学家和政治活动家。
- 【6】 凯绥·珂勒惠支（Käthe Kollwitz），1867-1945，德国版画家、雕塑家。
- 【7】 伊罗生（Harold Isaacs），1910-1986，美国新闻工作者、马克思主义历史学家。
- 【8】 保罗·艾吕雅（Paul éluard），1895-1952，法国著名诗人、社会活动家。
- 【9】 马拉美（Stéphane Mallarmé），1842-1898，法国诗人、文学评论家。
- 【10】 瓦雷里（Paul Valéry），1871-1945，法国诗人、文学评论家。
- 【11】 伏尼契（Ethel Lilian Voynich），1864-1960，爱尔兰小说家、左翼活动家。
- 【12】 布莱希特（Bertolt Brecht），1898-1956，德国剧作家、戏剧理论家、导演、诗人。
- 【13】 奥凯西（Sean O'Casey），1880-1964，爱尔兰剧作家。

贰 两位早期的译者

- 【1】 “化平实的叙述为生动的敷演”为原英文论文前王佐良先生的中文摘要中语。
- 【2】 斯宾塞有两部著作，英文原名分别为*The Study of Sociology*和*Principles of Psychology*。本书英文稿中此处为“Herbert Spencer's *Principles of Sociology*”，严复译的名字是《群学肆言》。由此可知，其对应的英文原名应该是*The Study of Sociology*，而非*Principles of Sociology*。

- 【3】 出自《一千零一夜》里阿拉丁神灯的故事。指事情已发生了决定性的变化，无法回头。
- 【4】 哈格德（Sir Henry Rider Haggard），1856–1925，英国小说家。
- 【5】 此处所列的译名，都以林纾所译的书名为准。
- 【6】 《爱国二童子传》，长篇小说，法国沛那著。

叁 鲁迅

- 【1】 这是鲁迅在《肥皂》中的原文。
- 【2】 指的是《故事新编》中的《补天》。
- 【3】 鲁迅在《故事新编》的序言中讲道：“……止不住有一个古衣冠的小丈夫，在女娲的两腿之间出现了”。
- 【4】 “我好像是一只牛，吃的是草，挤出的是奶、血”（鲁迅语，被许广平记录并载于《欣慰的纪念》）。
- 【5】 《〈中国新文学大系〉小说二集序》。

肆 鲁迅与西方文学

- 【1】 疑原文有误，按照上下文判断，应该是十一位。

伍 中国的现代诗

- 【1】 王佐良先生曾用中文写过一篇“中国新诗中的现代主义——一个回顾”，与本章的英文内容有诸多相似。因此，凡是与中文版明确对应的地方，都采用王公的原文；凡是不对应的（无论是多内容，少内容，还是不一致），都另行翻译，并在必要时加注解。
- 【2】 魏尔伦（Paul-Marie Verlaine），1844–1896，法国诗人。
- 【3】 梁宗岱译。
- 【4】 灵石译。
- 【5】 南唐皇帝李璟的《浣溪沙》：“青鸟不传云外信，丁香空结雨中愁。”
- 【6】 宋朝陆游的《临安春雨初霁》：“世味年来薄似纱，谁令骑马客京华？小楼一夜听春雨，深巷明朝卖杏花。”
- 【7】 维尔哈仑（Emile Verhaeren），1855–1916，比利时诗人。
- 【8】 阿波里内尔（G. Apollinaire），1880–1918，法国诗人。
- 【9】 艾青译。
- 【10】 克里斯托夫·伊修伍德（Christopher Isherwood），1904–1986，小说家，生

于英国，后入美籍。

- 【11】 里尔克（Rainer Maria Rilke），1875–1926，奥地利诗人，早期偏重主观抒情，后期转向以直觉形象象征人生和表现自己思想感情的“咏物诗”，对资本主义的“异化”现象表示抗议，提出乌托邦式的憧憬。
- 【12】 田间（1916–1985），原名童天鉴，安徽省无为县开城镇羊山人，著名诗人。
- 【13】 实际上这本诗选由冯至、闻一多、英籍教授白英共同选编。

陆 一个中国诗人

- 【1】 本章英文版的写作时间为1946年，译者发现王佐良同年也用中文写了一篇名为《一个中国诗人》的文章。经查，该中文文章与本章英文版的内容非常相似，因此，凡是与中文版明确对应的地方，都采用王公的原话。凡是不对应的（无论是多内容，少内容，还是不一致），进行翻译，并在必要处加注解。
- 【2】 王佐良在中文文章中称其为“艾里奥脱”。
- 【3】 阿萨姆邦丛林。
- 【4】 王佐良的中文文章中写的是二十四岁。
- 【5】 王佐良的中文文章中写的是二十八岁。

柒 译诗与写诗

- 【1】 本章英文标题为The Poet as Translator，王佐良先生曾写过一篇题为“译诗与写诗之间——读《戴望舒译诗集》”的中文文章，内容与本章的英文版有些相似，因此译者将标题译为“译诗与写诗”。
- 【2】 该诗句出自彭斯的《给我开门，哦！》，王佐良译。
- 【3】 《利西达斯》（*Lycidas*），是弥尔顿写的一首田园挽歌（1638）。
- 【4】 《阿多尼斯》（*Adonais*），是雪莱为悼念济慈而写的一首田园挽歌（1821）。
- 【5】 《悼念》（*In Memoriam*），是丁尼生为悼念好友亚瑟·亨利·哈兰姆而写的长篇挽歌（1850）。
- 【6】 《怀念叶芝》（"In Memory of W. B. Yeats"），是奥登为悼念叶芝而写的挽歌（1940）。
- 【7】 这部分与王佐良用中文写的那篇“译诗与写诗之间——读《戴望舒译诗集》”的最后几段措辞有诸多一致。因此，凡是与中文版明确对应的地方，都采用王公的原话；凡是不对应的（无论是多内容，少内容，还是不一致），都进行翻译。

捌 我译乔伊斯、彭斯和其他

- 【1】 布莱在澳大利亚参加阿德莱德艺术节的“作家周”活动时，向中国作家代表团朗诵了他的一首题为《想到〈隐居〉》的诗。
- 【2】 王佐良译。

玖 查尔斯·兰姆和约翰·韦伯斯特

- 【1】 希尔伯德（Lewis Theobald），1688–1744，18世纪英国莎士比亚戏剧评论家。
- 【2】 斯文本恩（Algernon Charles Swinburne），1837–1909，英国诗人。
- 【3】 本章多次出现old dramatists和old drama等提法，根据上下文，这里应该指的是伊丽莎白一世时代和詹姆士一世时代的剧作家及其剧作，本书统一译成“昔日的剧作家”和“昔日的戏剧”。
- 【4】 全名David Erskine Baker。
- 【5】 罗伯特·骚塞（Robert Southey），1774–1843，英国桂冠诗人。
- 【6】 马辛杰（Philip Massinger），1583–1640，英国剧作家。
- 【7】 应该是指（Thomas Otway）1652–1685，英国剧作家。
- 【8】 里德（Isaac Reed），1742–1807，英国莎士比亚戏剧选编者。
- 【9】 莎士比亚《哈姆雷特》中的人物。
- 【10】 应该是指托马斯·海伍德（Thomas Heywood），1570？–1641，英国剧作家。
- 【11】 约翰·福特（John Ford），1586–1640，英国剧作家。
- 【12】 鲍蒙特（Francis Beaumont），1584–1616，英国剧作家。
- 【13】 弗莱彻（John Fletcher），1579–1625，英国诗人、剧作家，他与鲍蒙特是英国文学史上一对著名的戏剧创作合作者。
- 【14】 查普曼（George Chapman），1559–1634，英国诗人、剧作家、翻译家。
- 【15】 马斯顿（John Westland Marston），1819–1890，英国剧作家和评论家。
- 【16】 米德尔顿（Thomas Middleton），1580–1627，英国剧作家。
- 【17】 罗利（William Rowley），1585–1626，英国剧作家。
- 【18】 德克（Thomas Dekker），1570–1632，英国剧作家。
- 【19】 约翰·弥尔顿的《司酒宴之神的面具》（1634）。
- 【20】 伊利亚是兰姆的别名。
- 【21】 赛蒙斯（John Addington Symonds），1840–1893，英国诗人和文学评论

家。

- 【22】 马洛 (Christopher Marlowe) , 1564-1593 , 英国文艺复兴时期的剧作家 , 代表作有《马耳他的犹太人》《浮士德博士的悲剧》等。
- 【23】 索福克勒斯 (Sophocles) , 约公元前496-前406 , 古希腊三大悲剧家之一。
- 【24】 埃斯库罗斯 (Aeschylus) , 约公元前525-前456 , 古希腊三大悲剧家之一。
- 【25】 欧里庇得斯 (Euripides) , 约公元前480-前406 , 与埃斯库罗斯和索福克勒斯一道被称为古希腊三大悲剧家。
- 【26】 应该是指Richard Whately , 1787-1863 , 英国修辞学家、逻辑学家、神学家。
- 【27】 应该是指Maurice Morgann , 1725-1802 , 莎士比亚评论家。
- 【28】 威廉·黑兹利特 (William Hazlitt) , 1778-1830 , 英国随笔作家。
- 【29】 戴斯 (Alexander Dyce) , 1798-1869 , 苏格兰戏剧评论家、编辑和文学史家。
- 【30】 查尔斯·金斯利 (Charles Kingsley) , 1819-1875 , 英国教士、学者、历史学家、小说家。
- 【31】 应该指苏格兰女王玛丽一世 (1542-1587) , 她的一生充满了爱与背叛、密谋与谋杀。
- 【32】 苏格兰海岸西部的圣徒小岛。
- 【33】 埃杰顿·布里奇斯爵士 (Sir Egerton Brydges) , 1762-1837 , 英国书志学家和系谱学家。
- 【34】 科利尔 (John Payne Collier) , 1789-1883 , 英国莎士比亚评论家。
- 【35】 莪相 (Ossian) , 传说中爱尔兰著名的吟游诗人。
- 【36】 乔治·查普曼 (George Chapman) , 约1559-1634 , 英国作家、戏剧家和翻译家,曾译过荷马史诗《伊利亚特》和《奥德赛》。
- 【37】 坎贝尔 (Thomas Campbell) , 1777-1844 , 苏格兰诗人。
- 【38】 杰弗里·乔叟 (Geoffrey Chaucer) , 1342-1400 , 英国中世纪著名作家 , 代表作为《坎特伯雷故事集》。
- 【39】 克里斯托弗·安斯蒂 (Christopher Anstey) , 1724-1805 , 英国诗人。
- 【40】 应该指评论家Charles Gildon , 约1665-1724。
- 【41】 应该指萨里艺术设计学院 (The Surrey Institute of Art and Design) , 英国最大的专业艺术、设计、传播教育学院之一。
- 【42】 应该是普罗科特 (Adelaide Anne Procter) , 1825-1864 , 英国诗人和慈善家。

- [43]** 雷利 (John Lyly) , 1554?-1606 , 英国散文家、诗人、剧作家。
- [44]** 德雷顿 (Michael Drayton) , 1563-1631 , 英国诗人。
- [45]** 菲利普·锡德尼爵士 (Sir Philip Sidney) , 1554-1586 , 英国文学家和文学批评家。
- [46]** 托马斯·布朗爵士 (Sir Thomas Browne) , 1605-1682 , 英国作家, 精通医学、神学、科学。
- [47]** 贝拉法朗特是迪克《诚实的妓女》(*The Honest Whore*) 中那个诚实的妓女。
- [48]** 该剧的全名是*Marino Faliero, Doge of Venice*。
- [49]** Guiccioli (1800-1873) 是拜伦的情妇, 当时拜伦在意大利创作《唐璜》。
- [50]** 伊丽莎白时代至17世纪上半期, 英国很多剧作家的剧作都是以四开本的形式出版。
- [51]** 托马斯·麦德文 (Thomas Medwin) , 1788-1869 , 英国诗人和翻译家, 为雪莱立传, 也是拜伦的好友。
- [52]** 《倩契》(*The Cenci*) , 雪莱的五幕悲剧, 作于1819年。
- [53]** 托马斯·洛弗尔·贝多斯 (Thomas Lovell Beddoes) , 1803-1849 , 英国诗人、剧作家、医生。
- [54]** 原文中的“Bull Theater”应该指The Red Bull Theater , 17世纪伦敦的剧院。
- [55]** 应该是Henry Kirke White , 1785-1806 , 英国诗人。
- [56]** 兰姆从1792年起开始在东印度公司任职, 直到1825年退休。
- [57]** 大卫·加里克 (David Garrick) , 1717-1779 , 是当时著名的演员、剧作家、剧院经理人等, 他收藏了大量英国早期的戏剧, 并于1779年将之捐给大英博物馆。
- [58]** 皮埃尔 (George Peele) , 1558-约1598 , 英国早期剧作家。
- [59]** 格林 (Robert Greene) , 1558-1592 , 英国剧作家。
- [60]** 洛奇 (Thomas Lodge) , 1558-1625 , 英国剧作家和杂文作家。
- [61]** 霍恩 (William Hone) , 1780-1842 , 英国作家、讽刺文体家、书商。
- [62]** 应该指William Wilberforce , 1759-1833 , 英国国会下议院议员、慈善家、废奴主义者。

拾 肖恩·奥凯西在中国

- [1]** 约翰·米林顿·辛格 (John Millington Synge) , 1871-1909 , 爱尔兰文艺复兴时期的主要剧作家。

- 【2】 章泯（1906–1975），戏剧、电影教育家。四川省乐山市峨眉县人。1931年当选为左翼剧联执委和编导部主任，是中国左翼话剧舞台的奠基人之一。
- 【3】 诺埃尔·科沃德爵士（Sir Noel Coward），1899–1973，英国演员、剧作家、流行音乐作曲家。
- 【4】 1916年复活节爱尔兰公民军与志愿军发动的反英起义，史称复活节起义。

拾壹 论休·麦克迪尔米德

- 【1】 王佐良先生讲的中文原文，译者始终没有查到，因此本章全部为译者所译。其中有三首诗查到了王佐良先生的译文，本章加以采用。这三首诗是《二颂列宁》（全诗42节，王佐良译了前23节）、《悼约翰·台维孙》、《未来的骨骼（列宁墓前）》。
- 【2】 王佐良在《英诗的境界》（三联书店，2012年，第154页）中指出，叶芝诧异“有这么好的诗，而我居然一点也不知道”这句评语是针对《呵，哪个新娘》那首诗的。
- 【3】 这首诗具体如下：我记得童年曾见一个人死去，/ 在回忆里比丧父更凄惨。/ 死去的不是女王，是你，台维孙，/ 从此我的心停住了，一直在看/ 你那小小的黑色背影/ 走上海边的沙岸——/ 一颗子弹洞穿了美丽的风景，/ 只因倒拿望远镜，把上帝错看。（王佐良译）
- 【4】 《苏格兰诗选》，王佐良译，长沙：湖南人民出版社，1986，第154页。

SELECT BIBLIOGRAPHY 参考书 目

Note: This is a very selective list, with emphasis on recent Chinese publications. English titles are confined to those consulted by the author. Chinese titles are arranged alphabetically according to *pinyin*. The list is in six parts:

1. Bibliographies
2. Periodicals
3. Encyclopedias, dictionaries
4. Anthologies
 - a. Comprehensive
 - d. Drama
 - b. Fiction
 - e. Essays
 - c. Poetry
 - f. Miscellaneous
5. General studies
6. Recent translations

1 Bibliographies

国家出版事业管理局版本图书馆编：

翻译出版外国古典文学著作目录1949-1979，中华书局，1980

Weisstein, Ulrich. *Comparative Literature and Literary Theory*. Bloomington: Indiana University Press, 1973

6 Recent translations of individual works

Note: This list, confined to the years 1978-1984, is even less complete than the rest.

Mainly it is based on the catalogues of three publishers, which are:

人民文学出版社 (abbrev. 人文)

People's Literature Publishing House, Beijing;

外国文学出版社 (外文)

Foreign Literature Publishing House, Beijing;

译文出版社 (译文)

Translations Publishing House, Shanghai.

While these are indubitably the major national publishers of translations of literary works, there are numerous provincial and municipal publishers which also put out translations from time to time. These latter are on the whole not represented. Further, some of the titles listed are new editions of old translations, with or without revisions. Looking over the entries again, however, the compiler is satisfied that most major translators and their recent productions are included. Enough has been given, perhaps, to show the range and diversity of the translations made in the period covered.

Akutakawa Ryunosuke: *Selected Fiction*, tr. Wen Jieruo et al

芥川龙之介著，文洁若等译：小说选 人文，1981

Hans Anderson: *Selected Fairy Tales*, tr. Ye Junjian

译后记

本书是依据外语教学与研究出版社1985年12月第1版的英文版 *Degrees of Affinity: Studies in Comparative Literature* 译出的。

本书的翻译过程充分体现了文学翻译和学术翻译的特质。讲文学翻译是因为王佐良先生的中英文功底，本书字字珠玑。讲学术翻译是因为：第一，本书是文学评论，涉及大量的文学和文学评论知识，王公深邃的洞见处处体现在书中，译者若不随时锱铢必究地查证和检索，根本无法读懂原文，遑论翻译。第二，王公著作等身。译者在翻译中要阅读大量他的著作和论文，方敢下笔，唯恐贻笑大方。举一个简单例子。谈到严复时，原文有一个词说严复的翻译作品有“dramatization”的倾向。译者按常理起初译成“戏剧化”。但后来在阅读王公其他的作品时发现他用的词是“化平实的叙述为生动的敷演”，觉得很有必要保留在译文中。第三，本文涉及很多回译问题。比如，艾青评价诗人戴望舒的话，译者当然不能自行翻译，必须要找到艾青的原话才可。这种情况在本书不时出现。第四，有几篇文章既有手头这个英文版，也有王公在别处发表的与该主题相关的中文可以参考。这样一方面似乎减少了译者的惴惴不安，但同时也意味着文本考证工作必须步步紧随翻译的整个过程。具体例子如下：

本书收录十一篇文章，其中有几篇很特殊。第二篇《两位早期的译者》和第四篇《鲁迅与西方文学》，王佐良先生都没有写过相应的中文文章，但却分别写过一个两三百字对该文的介绍。译者充分进行了参考。第六篇《一个中国诗人》最有趣。笔者译完后才发现有一篇中文论文，据称是这章的中文版。而且，英文版注明写作时间为1946年，而这篇中文也写于1946年。刹那间，百感交集，无法言表！仔细校对后发现这个中文版和英文版还是有许多地方不对应。有的内容中文版里有，英文版里没有；有的则相反。最后，译者完全以手头的英文版为基准呈现翻译终稿。第七篇文章《译诗与写诗》，翻译时也参考了王公写过的一篇中文文章《译诗与写诗之间》。后面的第八到第十一篇论文，都没有王公的中文文章可以参考。

第九篇《查尔斯·兰姆和约翰·韦伯斯特》着实让译者体会了翻译之

难。其他的章节，无论有没有中文可供参照，无论是谈中国还是谈外国，谈小说、诗歌还是戏剧，译者虽不敢称道翻译质量，但自觉还能大体应对。但是这一章，虽中文成文只有25,000字左右，但却包含了两百多个专有名词——人名、地名、作品名、戏剧术语、文学术语等。而且，文章主要目的是考证，内容是关于文学史，远不像一般的文本批评那么好懂。翻译的每一步都是伴随着查证和阅读外部资料进行的。本章的初译和修订稿就用了五周，编辑反馈后，重译和修订又用了三周。反复修改后，最终自觉做到了基本准确和通顺，欢迎业界人士批评指正。

根据王公的《苏格兰诗选》、《文学间的契合——王佐良比较文学论集》和《心智风采——王佐良随笔》等，小诗标题都用书名号，而不是引号。因此，本书涉及的诗歌以及戏剧的名称，均用书名号。

译者于2002年至2008年在美国普渡大学攻读比较文学的博士。翻译这本书随处可见王公对比较文学的创见和真知。比如王公谈到“比较文学的一个普通的讽刺是：只有第二流的在另一个文字里产生了真正的影响”；“在中国式极为平衡的心与气候里，宗教诗从来没有发达过”等等。译者一边翻译，一边记录，堪称美事和乐事。

原文小注译者全部保留。在此基础上，为了帮助读者理解，译者添加了小注，基本在后几篇文章中。

本书乃英语学术写作里的上上品，让译者叹为观止，也让译者译得一路诚惶诚恐。王佐良先生是造诣很深的教育家、散文家和翻译家。译者在翻译全书的过程中，切身感受到先生严谨的风范、深厚的学养、横溢的才情。书中王公讲过：“我觉得译者应选择与自己的风格相契合的作品来译。没人能够把握各种风格。一般说来，译者只能胜任一种风格，那就应该坚持走在这条路上，而不是尝试转向其他。”翻译本书，译者深切体会了这一点。希望译者的契合之感，能对译文有些许的帮助。如果有幸能把原作的精髓与韵味传达一二，也算功德圆满。

最后感谢外研社人文社科分社社长吴子桐先生、责任编辑易璐女士、执行编辑林红女士的全力信任和辛勤劳动。由于他们的信任，译者才有幸承接这份高度荣誉感的翻译任务。由于他们的精益求精，译者才心安地给这个任务画上句号。感谢原美国普渡大学的博士生、现居美国的徐冬梅女士，历时一个多月，帮助译者准备了第一部分两篇文章的部分初译稿。感谢原北京外国语大学高级翻译学院学生、现居广东的邹磊先生，也是用了一个多月的时间检查和校对了译者第一部分全部七篇文

章的译稿，并完成了繁重的修改工作。感谢美国普渡大学的Charles Ross教授把最后一章中麦克迪尔米德用苏格兰方言写的诗歌都转换成标准英语，否则译者根本无法翻译。感谢原北京外国语大学高级翻译学院学生、现居南京的张菁秋女士帮助查找了一些资料。感谢北京外国语大学高级翻译学院的学生王悦把《中国的现代诗》一章中里尔克的德语诗《杜伊诺挽歌》译成中文。感谢北京外国语大学高级翻译学院的学生吴炬把《译诗与写诗》一章中波德莱尔的法语译成中文。但借用王公前面序言的话，我本人对书中的所有错误和不足负全责。感谢家人，尤其是儿子的支持。儿子学游泳、学画画、打乒乓球、去动物园、看恐龙展等等都没有妈妈耐心的陪伴。最后感谢自己，初译五个月以及最后修改的三个月来，虽艰辛，但愉悦享受，找到了和王公这本书的契合，且努力地传达了它。

胡适（1891—1962），原名嗣糜，本名洪骅，字适之，安徽绩溪上庄村人，因提倡文学革命、思想革命而成为新文化运动的领袖之一。兴趣广泛，著述宏富，在文学、哲学、史学等诸多领域都有开创性的贡献；致力于向西方介绍中国历史文化，影响深远。历任北京大学文学学院院长、中国驻美国大使、北京大学校长、“中央研究院”院长等职。

“博雅双语名家名作”出版说明

1840年鸦片战争以降，在深重的民族危机面前，中华民族精英“放眼世界”，向世界寻求古老中国走向现代、走向世界的灵丹妙药，涌现出一大批中国主题的经典著述。我们今天阅读这些中文著述的时候，仍然深为字里行间所蕴藏的缜密的考据、深刻的学理、世界的视野和济世的情怀所感动，但往往会忽略：这些著述最初是用英文写就，我们耳熟能详的中文文本是原初英文文本的译本，这些英文作品在海外学术界和文化界同样享有崇高的声誉。

比如，林语堂的*My Country and My People*（《吾国与吾民》）以幽默风趣的笔调和睿智流畅的语言，将中国人的道德精神、生活情趣和中国社会文化的方方面面娓娓道来，在美国引起巨大反响——林语堂也以其中国主题系列作品赢得世界文坛的尊重，并获得诺贝尔文学奖的提名。再比如，梁思成在抗战的烽火中写就的英文版《图像中国建筑史》文稿（*A Pictorial History of Chinese Architecture*），经其挚友费慰梅女士（Wilma C. Fairbank）等人多年的奔走和努力，于1984年由麻省理工学院出版社（MIT Press）出版，并获得美国出版联合会颁发的“专业暨学术书籍金奖”。又比如，1939年，费孝通在伦敦政治经济学院的博士论文以*Peasant Life in China—A Field Study of Country Life in the Yangtze Valley*为名在英国劳特利奇书局（Routledge）出版，后以《江村经济》作为中译本书名——《江村经济》使得靠桑蚕为生的“开弦弓村”获得了世界性的声誉，成为国际社会学界研究中国农村的首选之地。

此外，一些中国主题的经典人文社科作品经海外汉学家和中国学者的如椽译笔，在英语世界也深受读者喜爱。比如，艾恺（Guy S. Alitto）将他1980年用中文访问梁漱溟的《这个世界会好吗——梁漱溟晚年口述》一书译成英文（*Has Man a Future? —Dialogues with the Last Confucian*），备受海内外读者关注；

此类作品还有徐中约英译的梁启超著作《清代学术概论》（*Intellectual Trends in the Ch'ing Period*）、狄百瑞（W. T. de Bary）英译的黄宗羲著作《明夷待访录》（*Waiting for the Dawn: A Plan for the Prince*），等等。

有鉴于此，外语教学与研究出版社推出“博雅双语名家名作”系列。

博雅，乃是该系列的出版立意。博雅教育（Liberal Education）早在古希腊时代就得以提倡，旨在培养具有广博知识和优雅气质的人，提高人文素质，培养健康人格，中国儒家六艺“礼、乐、射、御、书、数”亦有此功用。

双语，乃是该系列的出版形式。英汉双语对照的形式，既同时满足了英语学习者和汉语学习者通过阅读中国主题博雅读物提高英语和汉语能力的需求，又以中英双语思维、构架和写作的形式予后世学人以启迪——维特根斯坦有云：“语言的边界，乃是世界的边界”，诚哉斯言。

名家，乃是该系列的作者群体。涵盖文学、史学、哲学、政治学、经济学、考古学、人类学、建筑学等领域，皆海内外名家一时之选。

名作，乃是该系列的入选标准。系列中的各部作品都是经过时间的积淀、市场的检验和读者的鉴别而呈现的经典，正如卡尔维诺对“经典”的定义：经典并非你正在读的书，而是你正在重读的书。

胡适在《新思潮的意义》（1919年12月1日，《新青年》第7卷第1号）一文中提出了“研究问题、输入学理、整理国故、再造文明”的范式。秉着“记载人类文明、沟通世界文化”的出版理念，我们推出“博雅双语名家名作”系列，既希望能够在中国人创作的和以中国为主题的博雅英文文献领域“整理国故”，亦希望在和平发展、改革开放的新时代为“再造文明”、为“向世界说明中国”略尽绵薄之力。

对本书出版的支持和帮助

自序

我在这十几年中，因为深深的感觉中国最缺乏传记的文学，所以到处劝我的老辈朋友写他们的自传。不幸的很，这班老辈朋友虽然都答应了，终不肯下笔。最可悲的一个例子是林长民先生，他答应了写他的五十自述作他五十岁生日的纪念；到了生日那一天，他对我说：“适之，今年实在太忙了，自述写不成了；明年生日我一定补写出来。”不幸他庆祝了五十岁的生日之后，不上半年，他就死在郭松龄的战役里，他那富于浪漫意味的一生就成了一部人间永不能读的逸书了！

梁启超先生也曾同样的允许我。他自信他的体力精力都很强，所以他不肯开始写他的自传。谁也不料那样一位生龙活虎一般的中年作家只活了五十五岁！虽然他的信札和诗文留下了绝多的传记材料，但谁能有他那样“笔锋常带情感”的健笔来写他那五十五年最关重要又最有趣味的的生活呢！中国近世历史与中国现代文学就都因此受了一桩无法补救的绝大损失了。我有一次见着梁士诒先生，我很诚恳的劝他写一部自叙，因为我知道他在中国政治史与财政史上都曾扮演过很重要的脚色，所以我希望他替将来的史家留下一点史料。我也知道他写的自传也许是要替他自己洗刷他的罪过；但这是不妨事的，有训练的史家自有防弊的方法；最要紧的是要他自己写他心理上的动机，黑幕里的线索，和他站在特殊地位的观察。前两个月，我读了梁士诒先生的讣告，他的自叙或年谱大概也就成了我的梦想了。

此外，我还劝告过蔡元培先生、张元济先生、高梦旦先生、陈独秀先生、熊希龄先生、叶景葵先生。我盼望他们都不要叫我失望。

前几年，我的一位女朋友忽然发愤写了一部六七万字的自传，我读了很感动，认为中国妇女的自传文学的破天荒的写实创作。但不幸她在一种精神病态中把这部稿本全烧了。当初她每写成一篇寄给我看时，我因为尊重她的意思，不曾替她留一个副本，至今引为憾事。

我的四十自述，只是我的“传记热”的一个小小的表现。这四十年的生活可分作三个阶段，留学以前为一段，留学的七年（一九一〇—一九一七）为一段，归国以后（一九一七—一九三一）为一段。我本想一气写成，但因为种种打断，只写成了这第一段的六章。现在我又出国去

了，归期还不能确定，所以我接受了亚东图书馆的朋友们的劝告，先印行这几章。这几章都先在《新月》月刊上发表过，现在我都从头校改过，事实上的小错误和文字上的疏忽，都改正了。我的朋友周作人先生，葛祖兰先生，和族叔堇人先生，都曾矫正我的错误，都是我最感谢的。

关于这书的体例，我要声明一点。我本想从这四十年中挑出十来个比较有趣味的题目，用每个题目来写一篇小说式的文字，略如第一篇写我的父母的结婚。这个计划曾经得死友徐志摩的热烈的赞许，我自己也很高兴，因为这个方法是自传文学上的一条新路子，并且可以让我（遇必要时）用假的人名地名描写一些太亲切的情绪方面的生活。但我究竟是一个受史学训练深于文学训练的人，写完了第一篇，写到了自己的幼年生活，就不知不觉的抛弃了小说的体裁，回到了谨严的历史叙述的老路上去了。这一变颇使志摩失望，但他读了那写家庭和乡村教育的一章，也曾表示赞许；还有许多朋友写信来说这一章比前一章更动人。从此以后，我就爽性这样写下去了。因为第一章只是用小说体追写一个传说，其中写那“太子会”颇有用想象补充的部分，虽经堇人叔来信指出，我也不去更动了。但因为传闻究竟与我自己的亲见亲闻有别，所以我把这一章提出，称为“序幕”。

我的这部自述至今没写完。但这几年之中，国内出版了好几部很可读的壮年作家自传。自传的风气似乎已开了。我很盼望我们这几个三四十岁的人的自传的出世可以引起一班老年朋友的兴趣，可以使我们的文学里添出无数的可读而又可信的传记来。我们抛出几块砖瓦，只是希望能引出许多块美玉宝石来；我们赤裸裸的叙述我们少年时代的琐碎生活，为的是希望社会上做过一番事业的人也会赤裸裸的记载他们的生活，给史家做材料，给文学开生路。

胡适。

PROLOGUE MY MOTHER'S BETROTHAL

①

In our village the Princes' Fair held every autumn was one of the most festive of our religious observations. But this year the Princes' Fair was a source of disappointment to many.

Now we saw a troop of umbrella-bearers passing by in the procession. These were only the old satin umbrellas provided by the various families of the village, nothing very novel. Everyone was saying that folks at the Hengyu silk store had had a special umbrella made, studded with real pearls, but they were afraid to produce it for the occasion for fear of Master Three's disapproval.

There were four troops of K'unshan Opera singers this year, which was not a bad showing. The singers and musicians were all dressed in what was called "half-length gowns," with white bamboo-cloth tops and lower halves made of lake-colored silk. From the small finger of each performer was suspended an exquisite little fan of speckled-bamboo frame, and these fans dangled to and fro beneath the bamboo flutes and mouth-organs as the players marched playing along.

For theatricals this year there were six productions, all of them "straight dramas" and not one comedy. This was also in deference to Master Three's wishes. The boys in the back village had wanted to stage a selection from the naughty "Emerald-Screen Hill," but rather than risk being talked to by Master Three, had changed it to a heroic episode from *The Romance of the Three Kingdoms*. As it was, under the hot sun of the Seventh Month, even the sedate ladies of this show soon appeared bedraggled, and there would not have been much chance for saucy P'an Ch'iao-yün of "Emerald-Screen Hill" to have displayed herself to advantage. Still, in the heart of the assembled onlookers

there was this lingering regret: what a pity that that handsome lad Hsiao-Ti from back village was not to have been given a chance to impersonate P'an Ch'iao-yün!

But the greatest let-down of this year was that there were no "elevated floats" at all. The back village folks had long since rehearsed a couple of tableaux for the floats called "The Dragon-Tiger Battle" and "Sweeping the Tombs." No one had expected that when Master Three came home this year and saw the fair grounds he remarked that it would be quite dangerous for youngsters to be play-acting on those highly-raised platforms, lest they fall off under the effect of the heat. He had vigorously opposed it, and the elevated floats had to be dropped.

The noisy bands and the K'unshan Opera troupes passed by one after another, and so did the theatrical productions. Then came the sedan-chair bearing the shrine of the Princes. The onlookers by the wayside prodded their children and shouted to one another: "Bow down! Bow down!" And the multitude of men, women and children, in their homespun cloth of white-and-blue patterns, all clapped their hands together and made obeisance.

Right behind the shrine chair came the pilgrims. Some were dressed in long gowns of summer-cloth, holding the incense sticks cupped in their hands; some in short jackets, bearing incense-burners in which were burnt incense spirals. There were still others with deeper pledges to God which they were here today to redeem by the extreme sacrifice of "hanging incense." These people all wore white cotton jackets on top of red-and-green cotton skirts, so that from the distance you could hardly tell the men from the women. Their incense-burners were hung by brass hooks which were sunk into the flesh of their wrists, smeared with incense ashes to avoid bleeding. This year there were especially many pilgrims who came to "hang incense"—some with the burner hooked to the left wrist, some with one to each wrist, some with only a small incense-burner, while others even had two burners on one wrist in a greater effort to demonstrate

their faith by enduring suffering. These were all devout pilgrims with pledges to redeem: they walked for miles behind the shrine chair, the incense-burners hanging from their wrists, and although there were attendants following to cool them off with the fan now and then, a pilgrim would drop by the wayside, prostrate by the heat.

* * * * *

Feng Shun-ti held her little brother by the hand and stood beside her aunt on a stone ledge to watch the procession. She was a girl of fourteen, whose home was ten *li* away in Middle Village. This aunt of hers was married here in Upper Homestead, whose turn it was this year to conduct the fair, and she and her brother had been invited over by the relatives to see the fair.

A daughter of the farm, fourteen-year-old Shun-ti had learned much from the experience of poverty and had early acquired an adult's good sense. As she stood there by the wayside she listened to the various comments on the fair, and it seemed that every sentence had something to do with Master Three. "Master Three is home for the fair this year, and he sure spoils the fair for us all." "Isn't that the truth? No floats, even!" "Before Master Three got home the opium dens over in Eight Town had all closed down; the gambling places also didn't dare stay open. No gambling, no opium-smoking at a Seventh Month fair—that's something that has not happened in years."

The villagers gathered for the fair carried on with one comment after another, and all of this talk was absorbed by the attentive Shun-ti. She thought in her heart: Master Three must be quite a man, if he can make the gambling and opium places afraid to open their doors.

Now the procession of the fair was over, and the crowd slowly dispersed. Suddenly she heard a voice murmur: "Here comes Master Three!" She looked up, and saw that people were falling back right and left to make way for the newcomer and heard many voices raised in greeting, "Master Three!"

Two men walked up. One was a big, middle-aged man, with

bronzed complexion, some short whiskers, and a compelling light in his eyes that made people avoid his glance; he had on a loose-fitting jacket and trousers and a pair of hemp sandals, and in his hand he held a long pipe stick. Walking with him was an old man of lean frame and a graying beard, who wore the same type of short jacket and also held a long pipe.

Shun-ti's aunt whispered to her, saying, "The dark one is Master Three; the other is Master Yüeh-chi, whose school is right in front of our house. They say Master Three is a government official in the North, way beyond the Great Wall, where no human beings live and where it's so cold in the winter your nose gets frozen off and so hot in the summer mosquitoes are as big as flies. Master Three is a man who can stand all the hardships and fears no sun nor wind. He has lived these many years outside the Great Wall; his face got burnt as black as Lord Pao the Great Judge."

By this time, Master Three and Master Yüeh-chi had come up in front of the group and, having paused to exchange a final word, Master Three walked on down the slope by himself. Master Yüeh-chi turned to greet Shun-ti's aunt, and walked home with the three of them.

Seeing Shun-ti, Master Yüeh-chi asked, "Sister Ts'an, is this your Brother Chin-tsao's little girl?"

"Yes. Shun-ti! Ch'eng-hou! Come and greet Master Yüeh-chi."

Catching sight of Shun-ti's long braided hair, Master Yüeh-chi exclaimed, "Sister Ts'an, look at this young lady's hair, reaching all the way to the ground. It speaks of good fortune! Good fortune! Promised to any family yet?"

At this query Shun-ti's face flushed a deep red and, taking her little brother by the hand, she ran on ahead, oblivious of her aunt.

The good woman quickened her steps, calling after them, "Watch out you don't fall!" and, turning to Master Yüeh-chi, "No, not promised to anyone yet. She's a fine girl, that child, and quite understanding. Our Brother Chin-tsao always wanted to find her a nice husband, so

she is fourteen now and still not promised to any family."

"Why don't you look up her Eight Characters for me?" Master Yüeh-chi said to the aunt. "And let me take a reading for her and see. Don't forget about it."

When he reached his own home he turned around and reminded her: "Don't forget, now. Ask Brother Ts'an to have the girl's Eight Characters copied for me."

2

Shun-ti stayed in Upper Homestead until the end of the fair, and then her uncle took the sister and brother back to Middle Village. In the hot and long day of the Seventh Month, they did not start on their journey until about sunset and by the time they had walked the ten *li* or so to reach home it was not yet completely dark.

Shun-ti's mother had just locked the cow in the barn, and she now hustled to entertain the uncle and put him up for the night.

"Papa not home yet?" asked Shun-ti.

"*Chieh-chieh*, let's go and meet him!" Without waiting for the mother's reply, brother and sister dashed out of the house.

When they came to the edge of the village they spied their father coming toward the village with a load of rocks. They ran up calling, "Papa," and sister and brother each took a rock from the father's load and carried it after him. The father carried his load to an old building site on his land, where he emptied the rocks onto the slightly sunken ground. Then he jumped in and laid the rocks level before he shouldered his carrying-pole and empty baskets and made his way home.

"Was that the third load?" asked Shun-ti.

Her father nodded without comment, but only asked the children how they liked the fair and if the show was any good, as they walked home together.

Shun-ti's father was surnamed Feng, with the given name of Chin-tsao. His family, for generations peasants, had by dint of bitter struggle managed to acquire a modicum of property, consisting of a few *mou* of land and a house of their own. When Chin-tsao reached the age of thirteen or fourteen the "Long-Hair Bandits" of the T'ai'ping Rebellion descended on Hweichow, and Middle Village, being on the highway in the northern countryside of the town of Chich'i, was completely burned to the ground by the Long Hairs. All the members of Chin-tsao's family, old and young, were killed except himself, and he was kidnapped. In the army of the Long Hairs the men saw that he was a hardy, able little boy and so they had the words "T'ai'ping Heavenly Kingdom" tattooed on his face so that he would not run away. An army tailor took pity on the boy and took him in as an apprentice. Chin-tsao learned to have a fine hand at tailoring and he got by for years in the Long Hair camps, following the rebels from Chich'i to Ningkuo and to Kwangteh before he finally managed to make his escape. But because he had a tattooed face, which meant a reward for anyone who turned him in to the government, he did not dare show his face in broad daylight. Each day he would hide in broken-down houses until nightfall before he would dare take to the road. Thus he endured all hardships and finally made his way back to his native village, only to find that nothing was left but scorched earth and some charred ruins, and of able-bodied males in the village only twenty or thirty had survived.

Chin-tsao proved himself a hard-working young man. After his return home he searched out the neglected fields of the family farm and set about ploughing and planting with all his might. With his spare energy he worked the fields for other families and plied his tailoring trade. It was not ten years before he had built himself a home from the half-burnt remains of a brick house and had taken himself a wife. Now husband and wife both worked hard and ate

bitterness and in time managed to put away some money and raised a family of their own.

Their first-born was a daughter. Coming right after a great upheaval, daughters were not particularly welcome, so this one was named Shun-ti (Toward Brother) in the fond hope that she would bring a little brother at the next birth. Several years later it did come about that a son was born to the Feng family, and they were all very happy.

As a man, Chin-tsao was most good-hearted; he was much in demand in nearby villages for his workmanship as a tailor, and everybody knew him to be an honest, industrious man. People from other villages greeted him with respect and called him Brother Chin-tsao.

But all these years there was a great unfulfilled desire in Chin-tsao's heart. It had always been his wish to rebuild his family heritage, the old ancestral home that had been burned down by the Long Hairs. All his folks had been killed, leaving him alone to survive, and he felt that Heaven had spared him for just this purpose—to restore the ancestral property. He had made a secret pledge to himself: he would build on the site of the old house a new one that would be bigger and even more elaborate.

He had put in a great deal of his spare time, cleaning away the rubble from where the old house used to stand and digging up the ground, preparatory to raising a new foundation on which to erect a building that would be high and dry. He would rise every day before dawn; daybreak would find him by the village stream picking out rocks to carry home in big loads for the filling of his building site. He would go back and forth until he brought three loads each morning before he would go to work on the farm; in the evening after work-hours he would go back for three more loads before sitting down to his supper. When the busy season was over and he hired himself out to other villages to work as a tailor he would also fill his daily quota of three loads of rocks every morning before going about his trade and another three loads after the evening meal before he would rest for

the day.

This was the daily schedule he had set himself, the fulfillment of a pledge well known to his wife and children. The women of the family could not help him carry rocks and they could not persuade him to have more rest, and it would be of no use even if they tried. Sometimes when he was really fatigued after having moved his rocks, he would slump back on his bamboo chair and smoke his pipe stick, his eyes fixed on his teen-age daughter and small son, breathing a long quiet sigh.

Shun-ti was already a sensible girl, and she felt sick in her heart at the sight of her father bent over such toil and labor. She often hated herself for not being a man so that she could go to the stream to carry rocks for her father. All she could do was to be at the edge of the village each morning and evening to meet her father, and to take one or two rocks from his load and help carry them to the building site, in this way to share a bit of his chores.

Even as they watched it daily the ground level was raised higher and higher, but building materials like bricks and tiles and lumber were nowhere to be had. The new house that would be so magnificent remained in the family's dreams. Sometimes Shun-ti would actually dream that she was a man, and that she was returning home to visit her parents from her post as a high official. She was returning to the new house that had already been completed, and she alighted from her sedan-chair in front of its shiny black-lacquered doors. But once she stepped off the sedan-chair it seemed again that the high official was not she herself but her younger brother.

3

That year Shun-ti reached the age of seventeen.

One afternoon Chin-tsao was engaged in his tailoring over at Chang Family Shop, three *li* away, when in walked a middle-aged woman who called out, "Uncle Chin-tsao!" He recognized her to be

Sister Hsing-wu of Upper Homestead, whose maternal home was not far from Middle Village and whom he had known since childhood. She was Master Three's aunt on the paternal side; her husband Master Hsing-wu being one of Eight Town's well-known gentry, she was known everywhere as "Master Hsing-wu's Lady."

Chin-tsao invited her to sit down, and she forthwith announced: "What a coincidence! I was on my way to Middle Village to see you and when I had come as far as Chang Family Shop I was told that you are working here. Really a coincidence! Uncle Chin-tsao, what I wanted to see you about was to have your Shun-ti's Eight Characters written out for me."

Chin-tsao asked for whose family it was intended.

Master Hsing-wu's Lady said: "You know, we are thinking of our eldest nephew, Brother Three."

"Master Three?"

"Yes. Brother Three is forty-seven this year, and his first married, Jade-ring, has been dead these ten years or more. Jade-ring had left him a heap of children—three sons and three daughters—all grown up now. But being an official away from home, he found it really inconvenient without a helpmate. So he had written home and asked that we fixed him up to be married again."

Chin-tsao replied: "What call a farmer's daughter has to aim to be an official lady? I beg you not even to mention this thing."

Master Hsing-wu's Lady said: "This Brother Three of ours is rather odd-tempered. He wrote home this year particularly insisting that he wished to take the daughter of a farming family for a wife."

"What reason is there in that?"

"He said that the daughter of a farming family would have good health and would not be a consumptive like Jade-ring. He also said that one who comes from a farming family would know what it means to struggle against hardships."

Chin-tsao said: "This thing would never work. First of all, we are no match for any official family. Secondly, my old lady would not

think of giving her daughter to somebody for a second wife. Thirdly, Master Three's own children are all grown-up, the eldest son and daughter both several years older than Shun-ti. It would not be easy to act as step-mother in a family like that. So you might as well forget about the Eight Characters."

Master Hsing-wu's Lady said: "Now don't you be modest. Shun-ti is a sedate girl, and she is one blessed with good fortune too. Uncle Chin-tsao, please don't blame me for being frank. Shun-ti is seventeen this year; in the twinkling of an eye she will be all of twenty, and where would you expect to find her a black-haired youngster? And what's wrong with being a second wife? Brother Three says in his letter, once the bride comes over he will take her along to his new post. As for his children, the eldest daughter has been married off; the eldest son will marry this year and is staying at home; the second daughter has been given away for adoption since she was a baby; and the third daughter also is staying at home. When he goes to his post he will only have the fifteen-year-old twins with him, and they will be sent to school. There wouldn't be much trouble in taking care of that family."

Chin-tsao was a good man, and he could see that the woman had made some irrefutable points in her case. According to the custom of our native village, a daughter usually got engaged by the time she was thirteen or fourteen. A girl reaching seventeen or eighteen years of age would more often than not be married off as a second wife. But in their love and indulgence for Shun-ti he and his wife had always hoped to marry her into some bookish family, and thus unavoidably had delayed her. This happened to have been a load on the mind of the two parents, and it gave him pause today.

Perceiving his hesitation, Master Hsing-wu's Lady added: "Uncle Chin-tsao, now don't you be of many minds. You go back and consult Auntie Chin-tsao and have the girl's Eight Characters made out. I am going to my mother's today, and tomorrow I'll come by and pick them up. Nobody can tell whether or not the Eight Characters would match,

whether the birth dates and hours would be suited. Anyway, there's no harm in having the Eight Characters made out and seen."

Chin-tsao thought about it, and true enough there seemed to be no harm in having the Eight Characters made out, and so he promised.

* * * * *

When he came home from Chang Family Shop that day Shun-ti and her brother were still out grazing the cows. After setting down his packet of thread and needles and his iron, he seated himself on a bench by the door-step and puffed away at his pipe. His wife saw that there was something on his mind, and she lost no time questioning him about it. He related to her what Sister Hsing-wu had said.

Upon hearing it she became very angry, and she hastened to ask: "You didn't promise her to write out the Eight Characters, did you?"

He said: "I told her I would come home and talk it over. But there is no harm in having the Eight Characters made out for that family, it seems."

She said: "That won't do. I would not marry my daughter to an old man of nearly fifty. They have a heap of children in that family, and it's not going to be easy to be a step-mother there. Besides, these official families look down upon us farm folks, and in the future when people take advantage of our daughter who will be there to stick up for us? I won't give them the Eight Characters."

He mumbled his words slowly, "Shun-ti is seventeen this year, and it is not an easy thing to find the right family. Master Three is a fine man—"

His wife became angrier than ever. "All right, it's all my fault. I should not have aimed high, thus delaying our daughter's lifelong happiness. Since nobody is interested in our daughter, you are thinking of giving her away as a second wife, as a step-mother. It is all right to be a second wife, but not in Master Three's family. They are official folk, and people will say for sure that it is because we are achieving for prestige, not hesitating to sell out a daughter in order to

have some official for a son-in-law. I would not dare to endure this wicked name. Another family is all right, but I won't stand it if it is Master Three's family. So nobody wants our daughter, I am willing to support her for the rest of her life."

The husband and wife had a quarrel over this, and finally Chin-tsao said: "Let us not argue any more. This is Shun-ti's own affair. After supper let us ask her for her own opinion. How is that?" To which she consented.

When supper was over, Shun-ti saw that her brother went to bed and then seated herself beside the vegetable-oil lamp to stitch a shoe. Chin-tsao opened his mouth and started saying, "Shun-ti, there is something your mother wanted to ask you."

Shun-ti looked up to inquire of her mother what it might be, and her mother said, "It is your Pa wanted to ask you something; don't shove it on my shoulders."

Shun-ti saw that her mother was somewhat angry and, not knowing what it was all about, turned to her Pa. Her Pa said to her: "Master Three of Upper Homestead wanted to take a second wife, and somebody from his family was sent over for your Eight Characters. Your Ma did not like it because he is too old, forty-seven—thirty years older than you. They also have a heap of children in that family, and not easy to be a step-mother to. We fear it might be something that would ruin your whole life, so we would like to have your own opinion."

He went on and repeated what Sister Hsing-wu had told him that day.

Shun-ti had long since buried her head in her needlework, and did not utter a word for some time. Her Ma had also shut up without offering a word.

Her Pa did not add anything to what he had said.

Although Shun-ti did not open her mouth, in her heart she was busy thinking. It seemed that she had shut her eyes and saw her father carrying a heavy load of rocks at daybreak from outside the village;

she saw the big piece of land that was to be a building site on which was piled load after load of rocks; she saw her father in the evenings seated in the dark shadows, thinking and sighing. Then her thoughts flitted to that scene of her triumphant return as a high official, stepping down from her sedan-chair in front of the doors of the new house. Again, there appeared before her eyes the image of the bronzed face of Master Three, and the eyes with their compelling light. ...

She thought to herself as follows: Here at last comes the opportunity for her to help out her parents. To be a second wife usually means a larger wedding gift to the bride's family. Since this is an official family, with many children from the former marriage, the gift from the groom of money and such should be even more handsome. Maybe she could even find ways of helping her parents later. This means the dream of her father's lifetime, the new house, will have a chance to come true. ...And Master Three is a fine man; everybody respects him, and only those people who run the gambling places and opium dens fear him and hate him. ...

Her mother's voice raised in speech broke off her train of thought. Her Ma was saying, "To your parents what is there that you cannot say? Now, you speak up!"

Shun-ti lifted up her eyes and saw that both her Pa and Ma were watching her. She lowered her head and, flushing a deep red, said: "As long as you two think he is all right, you will please decide." Then she added this comment: "For a man, forty-seven is not considered very old."

Her Pa heaved a long sigh. Her Ma leapt to her feet in anger, and she said indignantly: "That's fine! You like to be an official lady! All right! It is just as you please!"

When Shun-ti heard this remark she felt both shame and anger; her sewing dropped to the floor, and she could not help her tears coming streaming down. She picked up her sewing and, without another word, went to her own room to cry.

From this family counsel Shun-ti's Ma knew that her daughter was willing; what she did not know was the girl's painful dedication of herself to the aid of her parents, and so she did not aim to see this marriage proposition succeed.

She was afraid that once the Eight Characters were written out for the family, if the birth dates and hours happened to match, it would be hard to refuse; and if the Eight Characters should prove unsuited, they would be the laughing-stock of the neighborhood for having tried in vain to marry into high officialdom. She made up her mind to fake a set of Eight Characters for the go-between. The next morning, she went to the school in the ancestral hall and ask the teacher to look up Shun-ti's Eight Characters, but in doing so purposely gave a wrong date and a wrong hour for the girl's birth. The teacher looked up the characters and the signs in his *Ten-Thousand-Year Almanac*, copied them down on a piece of paper, and gave it to her to take home to Chin-tsao.

In the afternoon, Master Hsing-wu's Lady repaired to Chang Family Shop, where she picked up the Eight Characters certificate and went home in great elation. Back in Upper Homestead, she sought out Master Yüeh-chi and requested that he pair up the respective Eight Characters of Shun-ti and Master Three and see if they matched.

Master Yüeh-chi looked at the certificate and inquired whose daughter it was.

"It's Brother Chin-tsao's Shun-ti over at Middle Village."

Master Yüeh-chi said, "Then these Eight Characters are wrong. To think a village school-teacher not knowing how to use an almanac even. He's got four of these characters wrong."

Master Hsing-wu's Lady asked: "How do you know that the Eight Characters are wrong?"

Master Yüeh-chi replied: "I happened to have looked up the girl's Eight Characters before, and I still remember them. Three years ago I

saw this young lass at the Seventh Month Fair. Isn't she the niece of Sister Ts'an? Roundish face, a bit of freckles, long hair reaching all the way down, is that the one? Not a pretty girl, but very sedate, not like the daughter of a farming family. At the time I remember asking Sister Ts'an for her Eight Characters to reckon with. The Eight Characters that I have looked up I do not forget in three to five years."

He pulled out a drawer of his writing desk and found a strip of paper, exclaiming, "Didn't I say so? Here it is!" He picked up his writing-brush and made the necessary corrections on Shun-ti's birth certificate, and at one side he wrote down Master Three's Eight Characters. He figured at it for a while, and then addressed Master Hsing-wu's Lady: "The Eight Characters matched all right. You don't have to check any further. Sister Hsing-wu, you have a good eye. This would make a good match for Brother Three. Looks are not important; even Eight Characters are not important, but I know there is good upbringing in Brother Chin-tsao's family. Why don't you get the gift list drawn up tomorrow. I shall write to Brother Three myself."

* * * * *

Two days later, Master Hsing-wu's Lady went over to Middle Village to talk over the "gift list" with Brother Chin-tsao. She started grumbling, "Your village teacher is really no good, even got the Eight Characters half wrong—almost spoilt a good match, he did."

Sister Chin-tsao knew very well in her heart what had caused the mistake, but she asked who it was who had discovered it. Thereupon Master Hsing-wu's Lady rendered an account of what Master Yüeh-chi had said, from beginning to end. Chin-tsao husband and wife were amazed at this, saying to each other that this must have been a match Fate had ordained. Now Sister Chin-tsao no longer held to her opposition. They promised to work out a gift list and bid her to come back for it in a few days.

Feng Shun-ti was my mother, and Master Three was my father

whose name was T'ieh-hua. In my father's diary there were the following entries:

"[The 15th Year of Kuanghsu (1889), Second Month] 16th, arrived home after traveling fifty *li*. ...

21st, dispatched go-between to the Fengs, fixed the date 12th of the Third Month for wedding. ...

11th, Third Month, dispatched sedan-chair to Middle Village of Seven Town to fetch the bride, née Feng.

12th, Miss Feng arrived. Wedding ceremony held. Paid respects in ancestral hall.

13th, 14th, reception for guests. ...

6th, Fourth Month, to Middle Village to pay respects to Father-in-law and Mother-in-law.

7th, returned from Middle Village. ...

9th, Fifth Month, started on journey to Shanghai. Rain. Lodged at Newbridge in Ching, after traveling fifty-five *li*."

序幕 我的母亲的订婚

太子会是我们家乡秋天最热闹的神会，但这一年的太子会却使许多人失望。

神伞一队过去了。都不过是本村各家的绦伞，没有什么新鲜花样。去年大家都说，恒有绸缎庄预备了一顶珍珠伞。因为怕三先生说话，故今年他家不敢拿出来。

昆腔今年有四队，总算不寂寞。昆腔子弟都穿着“半截长衫”，上身是白竹布，下半是湖色杭绸。每人小手指上挂着湘妃竹柄的小纨扇，吹唱时纨扇垂在笙笛下面摇摆着。

扮戏今年有六出，都是“正戏”，没有一出花旦戏。这也是三先生的主意。后村的子弟本来要扮一出翠屏山，也因为怕三先生说话，改了长坂坡。其实七月的日光底下，甘糜二夫人脸上的粉已被汗洗光了，就有潘巧云也不会怎样特别出色。不过看会的人的心里总觉得后村很漂亮的小棣没有扮潘巧云的机会，只扮作了糜夫人，未免太可惜了。

今年最扫兴的是没有扮戏的“抬阁”。后村的人早就练好了两架“抬阁”，一架是龙虎斗，一架是小上坟。不料三先生今年回家过会场，他说抬阁太高了，小孩子热天受不了暑气，万一跌下来，不是小事体。他极力阻止，抬阁就扮不成了。

粗乐和昆腔一队一队的过去了。扮戏一出一出的过去了。接着便是太子的神轿。路旁的观众带着小孩的，都喊道，“拜呵！拜呵！”许多穿着白地蓝花布褂的男女孩孩都合掌拜揖。

神轿的后面便是拜香的人！有的穿着夏布长衫，捧着柱香；有的穿着短衣，拿着香炉挂，炉里烧着檀香。还有一些许愿更重的，今天来“吊香”还愿；他们上身穿着白布褂，扎着朱青布裙，远望去不容易分别男女。他们把香炉吊在铜钩上，把钩子钩在手腕肉里，涂上香灰，便可不流血。今年吊香的人很多，有的只吊在左手腕上，有的双手都吊；有的只吊一个小香炉，有的一只手腕上吊着两个香炉。他们都是虔诚还愿的人，悬着挂香炉的手腕，跟着神轿走多少里路，虽然有自家人跟着打

扇，但也有半途中了暑热走不动的。

* * * * *

冯顺弟搀着她的兄弟，跟着她的姑妈，站在路边石磴上看会。她今年十四岁了，家在十里外的中屯，有个姑妈嫁在上庄，今年轮着上庄做会，故她的姑丈家接她姊弟来看会。

她是个农家女子，从贫苦的经验里得着不少的知识，故虽是十四岁的女孩儿，却很有成人的见识。她站在路旁听着旁人批评今年的神会，句句总带着三先生。“三先生今年在家过会，可把会弄糟了。”“可不是呢？抬阁也没有了。”“三先生还没有到家，八都的鸦片烟馆都关门了，赌场也都不敢开了。七月会场上没有赌场，又没有烟灯，这是多年没有的事。”

看会的人，你一句，他一句，顺弟都听在心里。她心想，三先生必是一个了不得的人，能叫赌场烟馆不敢开门。

会过完了，大家纷纷散了。忽然她听见有人低声说，“三先生来了！”她抬起头来，只见路上的人都纷纷让开一条路；只听见许多人都叫“三先生”。

前面走来了两个人。一个高大的中年人，面容紫黑，有点短须，两眼有威光，令人不敢正眼看他；他穿着芒布大袖短衫，芒布大脚管的裤子，脚下穿着麻布鞋子，手里拿着一杆旱烟管。和他同行的是一个老年人，瘦瘦身材，花白胡子，也穿着短衣，拿着旱烟管。

顺弟的姑妈低低说，“那个黑面的，是三先生；那边是月吉先生，他的学堂就在我们家的前面。听人说三先生在北边做官，走过了万里长城，还走了几十日，都是没有人烟的地方，冬天冻杀人，夏天热杀人；冬天冻塌鼻子，夏天蚊虫有苍蝇那么大。三先生肯吃苦，不怕日头不怕风，在万里长城外住了几年，把脸晒的像包龙图一样。”

这时候，三先生和月吉先生已走到她们面前，他们站住说了一句话，三先生独自下坡去了；月吉先生却走过来招呼顺弟的姑妈，和她们同行回去。

月吉先生见了顺弟，便问道，“灿嫂，这是你家金灶舅的小孩子吗？”

“是的。顺弟，诚厚，叫声月吉先生。”

月吉先生一眼看见了顺弟脑后的发辮，不觉喊道，“灿嫂，你看这姑

娘的头发一直拖到地！这是贵相！是贵相！许了人家没有？”

这一问把顺弟羞的满脸绯红，她牵着她弟弟的手往前飞跑，也不顾她姑妈了。

她姑妈一面喊，“不要跌了！”回头对月吉先生说，“还不曾许人家。这孩子很稳重，很懂事。我家金灶哥总想许个好好人家，所以今年十四岁了，还不曾许人家。”

月吉先生说，“你开一个八字给我，我给她排排看。你不要忘了。”

他到了自家门口，还回过头来说：“不要忘记，叫灿哥抄个八字给我。”

二

顺弟在上庄过了会场，她姑丈送她姊弟回中屯去。七月里天气热，日子又长，他们到日头快落山时才起身，走了十里路，到家时天还没全黑。

顺弟的母亲刚牵了牛进栏，见了他们，忙着款待姑丈过夜。

“爸爸还没有回来吗？”顺弟问。

“姊姊，我们去接他。”姊姊和弟弟不等母亲回话，都出去了。

他们到了村口，远远望见他们的父亲挑着一担石头进村来。他们赶上去喊着爸爸，姊姊弟弟每人从担子里拿了一块石头，捧着跟他走。他挑到他家的旧屋基上，把石子倒下去，自己跳下去，把石子铺平，才上来挑起空担回家去。

顺弟问，“这是第三担了吗？”

她父亲点点头，只问他们看的会好不好，戏好不好，一同回家去。

* * * * *

顺弟的父亲姓冯，小名金灶。他家历代务农，辛辛苦苦挣起了一点小产业，居然有几亩自家的田，一所自家的屋。金灶十三四岁的时候，长毛贼到了徽州，中屯是绩溪北乡的大路，整个村子被长毛烧成平地。金灶的一家老幼都被杀了，只剩他一人，被长毛掳去。长毛军中的小头目看这个小孩子有气力，能吃苦，就把他脸上刺了“太平天国”四个蓝字，叫他不能逃走。军中有个裁缝，见这孩子可怜，收他做徒弟，叫他跟着学裁缝。金灶学了一手好裁缝，在长毛营里混了几年，从绩溪跟

到宁国，广德，居然被他逃走出来。但因为面上刺了字，捉住他的人可以请赏，所以他不敢白日露面。他每日躲在破屋场里，挨到夜间，才敢赶路。他吃了种种困苦，好容易回到家乡，只寻得一片焦土，几座焦墙，一村的丁壮留剩的不过二三十人。

金灶是个肯努力的少年，他回家之后，寻出自家的荒田，努力耕种。有余力就帮人家种田，做裁缝。不上十年，他居然修葺了村里一间未烧完的砖屋，娶了一个妻子。夫妻都能苦做苦吃，渐渐有了点积蓄，渐渐挣起了一个小小的家庭。

他们头胎生下一个女儿。在那大乱之后，女儿是不受欢迎的，所以她的名字叫做顺弟，取个下胎生个弟弟的吉兆。隔了好几年，果然生了一个儿子，他们都很欢喜。

金灶为人最忠厚；他的裁缝手艺在附近村中常有雇主，人都说他诚实勤谨。外村的人都尊敬他，叫他金灶官。

但金灶有一桩最大的心愿。他总想重建他祖上传下来，被长毛烧了的老屋。他一家人都被杀完了，剩下他这一个人，他觉得天留他一个人是为中兴他的祖业的。他立下了一个誓愿：要在老屋基上建造起一所更大又更讲究的新屋。

他费了不少工夫，把老屋基扒开，把烧残砖瓦拆扫干净，准备重新垫起一片高地基，好在上面起造一所高爽干燥的新屋。他每日天未明就起来了；天刚亮，就到村口溪头去拣选石子，挑一大担回来，铺垫地基。来回挑了三担之后，他才下田去做工；到了晚上歇工时，他又去挑三担石子，才吃晚饭。农忙过后，他出村帮人家做裁缝，每天也要先担三担石子，才去上工；晚间吃了饭回来，又要挑三担石子，才肯休息。

这是他的日常功课，家中的妻子儿女都知道他的心愿，女流们不能帮他挑石头，又不能劝他休息，劝他也没有用处。有时候，他实在疲乏了，挑完石子回家，倒在竹椅上吸旱烟，眼望着十几岁的女儿和几岁的儿子，微微叹一口气。

顺弟是已懂事的了，她看见她父亲这样辛苦做工，她心里好不难过。她常常自恨不是个男子，不能代她父亲下溪头去挑石头。她只能每日早晚到村口去接着她父亲，从他的担子里捧出一两块石头来，拿到屋基上，也算是分担了他的一点辛苦。

看看屋基渐渐垫高了，但砖瓦木料却全没有着落，高敞的新屋还只存在她一家人的梦里。顺弟有时做梦，梦见她是个男子，做了官回家看

父母，新屋早已造好了，她就在黑漆的大门外下轿。下轿来又好像做官的不是她，是她兄弟。

三

这一年，顺弟十七岁了。

一天的下午，金灶在三里外的张家店做裁缝，忽然走进了一个中年妇人，叫声“金灶舅”。他认得她是上庄的星五嫂，她娘家离中屯不远，所以他从小认得她。她是三先生的伯母，她的丈夫星五先生也是八都的有名绅士，所以人都叫她“星五先生娘”。

金灶招呼她坐下。她开口道：“巧极了，我本打算到中屯看你去，走到了张家店，才知道你在这里做活。巧极了。金灶舅，我来寻你，是想开你家顺弟的八字。”

金灶问是谁家。

星五先生娘说：“就是我家大侄儿三哥。”

“三先生？”

“是的。三哥今年四十七，前头讨的七都的玉环，死了十多年了。玉环生下了儿女一大堆，——三个儿子，三个女，——现在都长大了。不过他在外头做官，没有个家眷，实在不方便。所以他写信来家，要我们给他定一头亲事。”

金灶说，“我们种田人家的女儿那配做官太太？这件事不用提。”

星五先生娘说：“我家三哥有点怪脾气。他今年写信回来，说：一定要讨一个做庄稼人家的女儿。”

“什么道理呢？”

“他说，做庄稼人家的人身体好，不会像玉环那样痨病鬼。他又说，庄稼人家晓得艰苦。”

金灶说：“这件事不会成功的。一来呢，我们配不上做官人家。二来，我家女人一定不肯把女儿给人做填房。三来，三先生家的儿女都大了，他家大儿子大女儿都比顺弟大好几岁，这样人家的晚娘是不容易做的。这个八字不用开了。”

星五先生娘说：“你不要客气。顺弟很稳重，是个有福气的人。金灶舅，你莫怪我直言，顺弟今年十七岁了，眼睛一眯，二十岁到头上，你那里去寻一个青头郎？填房有什么不好？三哥信上说了，新人过了门，

他就要带上任去。家里的儿女，大女儿出嫁了；大儿子今年做亲，留在家里；二女儿是从小给了人家了；三女儿也留在家里。将来在任上只有两个双胞胎的十五岁小孩子，他们又都在学堂里。这个家也没有什么难照应。”

金灶是个老实人，他也明白她的话有驳不倒的道理。家乡风俗，女儿十三四岁总得定亲了。十七八岁的姑娘总是做填房的居多。他们夫妇因为疼爱顺弟，总想许个念书人家，所以把她耽误了。这是他们做父母的说不出的心事。所以他今天很有点踌躇。

星五先生娘见他踌躇，又说道：“金灶舅，你不用多心。你回去问问金灶舅母，开个八字。我今天回娘家去，明朝我来取。八字对不对，辰肖合不合，谁也不知道。开个八字总不妨事。”

金灶一想，开个八字诚然不妨事，他就答应了。

* * * * *

这一天，他从张家店回家，顺弟带了弟弟放牛去了，还没有回来。他放下针线包和熨斗，便在门里板凳上坐下来吸旱烟。他的妻子见他有心事的样子，忙过来问他。他把星五嫂的话对她说了。

她听了大生气，忙问，“你不曾答应她开八字？”

他说，“我说要回家商量商量。不过开个八字给他家，也不妨事。”

她说，“不行。我不肯把女儿许给快五十岁的老头子。他家儿女一大堆，这个晚娘不好做。做官的人家看不起我们庄稼人家的女儿，将来让人家把女儿欺负煞，谁家来替我们伸冤？我不开八字。”

他慢吞吞的说，“顺弟今年十七岁了，许人家也不容易。三先生是个好人。——”

她更生气了，“是的，都是我的不是。我不该心高，耽误了女儿的终身。女儿没有人家要了，你就想送给人家做填房，做晚娘。做填房也可以，三先生家可不行。他家是做官人家，将来人家一定说我们贪图人家有势力，把女儿卖了，想换个做官的女婿。我背不起这个恶名。别人家都行，三先生家我不肯。女儿没人家要，我养她一世。”

他们夫妻吵了一场，后来金灶说，“不要吵了。这是顺弟自家的事，吃了夜饭，我们问问她自己。好不好？”她也答应了。

晚饭后，顺弟看着兄弟睡下，回到菜油灯下做鞋。金灶开口说，“顺弟，你母亲有句话要问你。”

顺弟抬起头来，问妈有什么话。她妈说，“你爸爸有话问你，不要朝我身上推。”

顺弟看她妈有点气，不知道是怎么一回事，只好问她爸。她爸对她说，“上庄三先生要讨个填房，他家今天叫人来开你的八字。你妈嫌他年纪太大，四十七岁了，比你大三十岁，家中又有一大堆儿女。晚娘不容易做，我们怕将来害了你一世，所以要问问你自己。”

他把今天星五嫂的话说了一遍。

顺弟早已低下头去做针线，半晌不肯开口。她妈也不开口。

她爸也不说话了。

顺弟虽不开口，心里却在那儿思想。她好像闭了眼睛，看见她的父亲在天刚亮的时候挑着一大担石头进村来；看见那大块屋基上堆着他一担一担的挑来的石头；看见她父亲晚上坐在黑影地里沉思叹气。一会儿，她又仿佛看见她做了官回来，在新屋的大门口下轿。一会儿，她的眼前又仿佛现出了那紫黑面孔，两眼射出威光的三先生。……

她心里这样想：这是她帮她父母的机会到了。做填房可以多接聘金。前妻儿女多，又是做官人家，聘金财礼总应该更好看点。她将来总还可以帮她父母的忙。她父亲一生梦想的新屋总可以成功。……三先生是个好人，人人都敬重他，只有开赌场烟馆的人怕他恨他。……

她母亲说话的声音打断了她的思想。她妈说，“对了我们，有什么话不好说？你说罢！”

顺弟抬起眼睛来，见她爸妈都望着她自己。她低下头去，红着脸说道：“只要你们俩都说他是个好人，请你们俩作主。”她接着又加上一句话，“男人家四十七岁也不能算是年纪大。”

她爸叹了一口气。她妈可气的跳起来了，忿忿的说，“好呵！你想做官太太了！好罢！听你情愿罢！”

顺弟听了这句话，又羞又气，手里的鞋面落在地上，眼泪直滚下来。她拾起鞋面，一声不响，走到她房里去哭了。

* * * * *

经过了这一番家庭会议之后，顺弟的妈妈明白她女儿是愿意的了，她可不明白她情愿卖身来帮助爸妈的苦心，所以她不指望这门亲事成功。

她怕开了八字去，万一辰肖相合，就难回绝了；万一八字不合，旁人也许要笑她家高攀不上做官人家。她打定主意，要开一张假八字给媒

人拿去。第二天早晨，她到祠堂蒙馆去，请先生开一个庚帖，故意错报了一天生日，又错报了一个时辰。先生翻开《万年历》，把甲子查明写好，她拿回去交给金灶。

那天下午，星五先生娘到张家店拿到了庚帖，高兴的很。回到了上庄，她就去寻着月吉先生，请他把三先生和她的八字排排看。

月吉先生看了八字，问是谁家女儿。

“中屯金灶官家的顺弟。”

月吉先生说，“这个八字开错了。小村乡的蒙馆先生连官本（俗称历书为官本）也不会查，把八个字抄错了四个字。”

星五先生娘说，“你怎么知道八字开错了？”

月吉先生说，“我算过她的八字，所以记得。大前年村里七月会，我看见这女孩子，她不是灿嫂的侄女吗？圆圆面孔，有一点雀斑，头发很长，是吗？面貌并不美，倒稳重的很，不像个庄稼人家的孩子。我那时问灿嫂讨了她的八字来算算看。我算过的八字，三五年不会忘记的。”

他抽开书桌的抽屉，寻出一张字条来，说，“可不是呢？在这里了。”他提起笔来，把庚帖上的八字改正，又把三先生的八字写出。他排了一会，对星五先生娘说，“八字是对的，不用再去对了。星五嫂，你的眼力不差，这个人配得上三哥。相貌是小事，八字也是小事，金灶官家的矩规好。你明天就去开礼单。三哥那边，我自己写信去。”

* * * * *

过了两天，星五先生娘到了中屯，问金灶官开“礼单”。她埋怨道，“你们村上的先生不中用，把八字开错了，几几乎误了事。”

金灶嫂心里明白，问谁说八字开错了的。星五先生娘一五一十的把月吉先生的话说了。金灶夫妻都很诧异，他们都说，这是前世注定的姻缘。金灶嫂现在也不反对了。他们答应开礼单，叫她隔几天来取。

冯顺弟就是我的母亲，三先生就是我的父亲铁花先生。在我父亲的日记上，有这样几段记载：

“[光绪十五年（一八八九）二月]十六日，行五十里，抵家。……
二十一日，遣媒人订约于冯姓，择定三月十二日迎娶。……
三月十一日，遣舆诣七都中屯迎娶冯氏。

十二日，冯氏至。行合巹礼。谒庙。

十三日，十四日，宴客。……

四月初六日，往中屯，叩见岳丈岳母。

初七日，由中屯归。……

五月初九日，起程赴沪，天雨，行五十五里，宿旌之新桥。”

十九，六，廿六。

I FAMILY EDUCATION

1

I was born in the Seventeenth Year of the reign of Kuanghsu, on the Seventeenth Day of the Eleventh Month (December 17, 1891). Our home at that time was a temporary one outside the Great East Gate in Shanghai. Two months after my birth, the Governor of T'aiwan, Shao Yu-lien, had petitioned the Emperor to have my father transferred there; the Governor of Kiangsu had petitioned against the transfer, but to no avail. My father proceeded to his new post and arrived in T'aiwan at the end of the Second Month in the 18th Year of Kuanghsu. Meanwhile, my mother and I moved to the town of Ch'wansha, near Shanghai, where we lived for a year. On the 26th of the Second Month, in the 19th Year (1893), the family (including my mother, Fourth Uncle Chieh-ju, Second Elder-Brother Ssu-chü and Third Elder-Brother Ssu-p'i) moved from Shanghai to T'aiwan. We lived at first in T'ainan for ten months. In the Fifth Month of the 19th Year, my father was appointed in charge of the prefecture of T'aitung and concurrently commander of the reserve army in Chenhai. T'aitung was a newly established prefecture and conditions were still rough, so my father went there without taking his family along. We did not move to T'aitung until the end of the 19th Year, and we lived there for exactly one year.

When the Sino-Japanese War broke out in 1894, T'aitung was within the war emergency zone. Fourth Uncle Chieh-ju happened to be visiting in T'aitung again, and my father took the opportunity to send the family back by him to our ancestral village in Hweichow, leaving only Second Elder-Brother Ssu-chü with him in T'aitung. We departed from T'aitung in the First Month of the year Yi Wei (1895), and on the 10th of the Second Month, proceeded from Shanghai back

to our native village of Chich'i.

In the Fourth Month of that year China concluded a peace treaty with Japan with the cession of T'aitung. The people of T'aitung were opposed to this transfer of territory and begged the then Governor, T'ang Ching-sung, to defend the island to the last. T'ang requested intervention by the Western powers, who refused to do so. Thereafter the T'aitung people petitioned T'ang to assume the title of President of the T'aitung Republic with his military aide Liu Yung-fu as generalissimo of the armies. My father in T'aitung was then engaged in supervising the defense works of Houshan, and already cut off in his funds and from telegraphic contact with the capital. He had contracted a foot disease which incapacitated his left foot. He held out until the third of the Fifth Month before he left Houshan for Anping; there Liu Yung-fu insisted upon his staying to assist in the armies. By the 25th of the Sixth Month he had lost the use of both feet, and only then did Liu reluctantly let him go. When he arrived in Amoy on the 28th of the Sixth Month all his limbs were paralyzed. On the third of the Seventh Month, he died in Amoy, sacrificing his life for the very first republic of the East Asia!

At the time I was aged three years and eight months. I seem to remember that when the letter bearing news of my father's death arrived, my mother was in the front room in the old family house, seated on a chair near the door-step. When the letter-reader read to the part about my father's death, she toppled backwards and fell on the door-sill in her chair. At the same time Aunt Chen who was listening from her door in the east room burst into a loud sob. Of a sudden the whole house was filled with crying and wailing, and it seemed to me that heaven and earth were crashing about us. This scene of sorrow is all I seem to remember; the rest I do not recall at all.

At the time of my father's death my mother was only twenty-three. My father had made his first marriage not long before the Taiping Rebellion, and his first wife, née Feng, died during the turmoil of war in the 2nd Year of Emperor Tungchih (1863). His second wife, née Tsao, bore him three sons and three daughters, and died in the 4th Year of Kuanghsu (1878). Because he was of a poor family, at the same time aspiring to travel far and wide in his career, my father had waited a long time before he re-married. It was not until the 15th Year of Kuanghsu (1889), when he was in the reserve official's rank for the province of Kiangsu and life was comparatively settled, that he married my mother. Three days after their wedding my Eldest Brother Ssu-chia took himself a wife. By that time my Eldest Sister had already been married and a mother. Eldest Sister was seven years older than my mother; Eldest Brother was two years older; Second Elder-Sister had been given away for adoption since childhood; Third Elder-Sister was three years younger than my mother; Second Elder-Brother and Third Elder-Brother (the twins) were four years younger. In the midst of such a family came this seventeen-year-old step-mother; one can imagine how difficult her position must have been and how painful a life she was to lead.

Not long after their marriage, my father sent for his young bride to live together in Shanghai. She was thus freed from the painful confines of the big family and she had the love of my father, who found time every day in his busy schedule to teach her to read—life for her in those few years was a happy one. As a child, I was also the object of my father's affection, and before I was quite three he started to teach me my first characters by using the red paper squares with which he had taught my mother. If my father was the tutor, my mother acted at one side as the assistant; when I learned my new characters my mother would review them for her own benefit—when he was too busy to teach, she would substitute for him. By the time we left T'aitung to return home, she had mastered nearly a thousand characters, and I had learned seven hundred or so. These characters

were all written by my father in his own hand on red stationery cut into squares; these were treasured by my mother throughout her life as sacred mementos of a life which the three of us had shared, all too briefly.

My mother became a widow at the age of twenty-three; thereafter she was to spend another twenty-three years in a life full of bitterness and sorrow. Because I was her only flesh-and-blood she endured all hardships and pinned her entire hopes on my remote and unknowable future. Such were the dim hopes that kept up her spirits for another twenty-three years of struggling existence.

About two months before my father died he had made his will in the form of several letters, addressed to my mother and his four sons, respectively. There were only a few words in each letter, the one addressed to my mother saying that Son Mên (my given name was Ssu-mên) was a precocious child and should be allowed a chance to study. The one addressed to me also adjured me to study hard and improve myself. These few words left to me by my father were to exert a tremendous influence for the rest of my life. One day when I was eleven years old, and while Second and Third Elder-Brothers were both home, my mother asked them: "Mên is eleven this year. Your dad wanted him to study. What do you think, do you think he could make anything of himself studying?" Second Elder-Brother did not open his mouth, but Third Elder-Brother sneered, "Hmm, study!" Second Elder-Brother maintained a silence throughout. My mother swallowed her feelings and sat there for a while, and only after she returned to her own room did she dare shed her tears. She did not dare offend my brothers in any way because the family finances were all in the hands of Second Elder-Brother, and if I were to leave home for schooling my tuition would have to come from him. That was why all she could do was to shed a few silent tears.

But after all my father's will was to be respected, and so I was to study. Besides, I had been an intelligent child, and it was well known to people in the neighboring villages that the youngest son of Master

Three had scholarly possibilities. And so two years later, when Third Elder-Brother went to Shanghai for his tuberculosis cure, I went with him to attend school.

③

When I was in T'aitung I had been seriously ill for a half year and had come out of it a very weak child. After our return to the village I was nominally five years old though still unable to negotiate a door-sill nine or ten inches high. In her eagerness to get me started on my studies, my mother had sent me as a pupil in the private school tutored by my Fourth Uncle Chieh-ju when I was actually only just over three years. Because I was too small to reach my desk I was seated on a high chair and, not being able to climb down myself, I had to be lifted off my perch when school was over. But intellectually I was not counted among the lower of the pupils, because I had already had a vocabulary of nearly a thousand characters before I enrolled in the school.

Not being a rank beginner, I was exempted from the study of such books as *The Three-Character Classic*, *The Thousand-Character Essay*, *The Hundred Family Names* and *Poems for the China Prodigy*. The first reader which was assigned to me was a book of four-character verses compiled by my father himself, entitled *On Learning to Be a Man*, and copied for me in his own hand. This book dealt with the proper way of human conduct, and the first few lines run as follows:

The way to be a man is to follow nature.
Son, subject, brother, or friend, there is a proper conduct;
To strive for the mean in words and deeds;
To be a man, to aspire to be the Sage. ...

There followed an exposition of the five human relationships. I copy here the last three verses of the book because they reflect my father's philosophy of life:

Among the five relationships, should there be change;
Names and positions should never be confused.
Faith must be kept, even at the sacrifice of life.
For if you seek virtue you end in virtue.

Our learned ancients, well versed in human relations,
Would have the Nine Clans live harmoniously as one family;
And regard Earth's ten thousand objects with the same love.
When nature is given full play, we find a Sage.

Be it recounted in the classic tomes, or taught by your scholarly teachers,
To be a man, there is naught else:
Exhaust the knowledge of men and things, then turn to self for application,
So study hard and hold fast to the Way.

The second book I ever studied, another of my father's compilation of four-character verses, was an elementary treatise on philosophy, entitled *On Learning*. Although both these texts were in simple rhymes they were beyond the ability of my teacher to interpret and, naturally, beyond my comprehension.

The third book which was given to me to study was a selection of *lü* poems, whose editor's name I do not recall. In the thirty-odd years since then I have never encountered this book again, and therefore have had no opportunity of tracing the editorship of this anthology—I have a notion it might have been the selections made by Yao Nai, but I would not insist on it. Again, I was totally unable to comprehend this volume of *lü* poems which I read aloud and learned to recite fluently. Thinking back now, I do not remember a word of it.

Although I did not have occasion to study books like *The Three-Character Classic* I had learned to repeat parts of these readers from listening day in and day out to the loud chanting of its words by the other pupils. I was especially familiar with *Poems for the Child Prodigy*, in its five- and seven-character lines, which I could almost repeat from beginning to end. For instance, the seven-character lines

toward the end of the book—

Jen hsin ch'ü-ch'ü wan-wan shui,

Shih shih ch'ung-ch'ung tieh-tieh shan.

(The heart runs crooked, crooked like a brook,

And man's affairs pile higher and higher than the mountains.)

Of course, I failed at the time to understand the meaning in these lines, but loved to mumble the words in my mouth, no doubt attracted by the verbal repetitions and alliterations.

* * * * *

From my fourth reader on I was given nothing but prose, with the exception of *The Classic of Poetry*. The list of books, in the order in which I studied them, is as follows:

(4) *Hsiao Ching (The Classic of Filial Piety)*.

(5) *Hsiao Hsiieh* of Chu-tze, annotated by Kiang Yung.

(6) *Lun Yü (The Analects of Confucius)*.

(7) *Meng-tze (The Book of Mencius)*.

(8) *Ta Hsiieh (The Great Learning)* and *Chung Yung (The Doctrine of the Mean)*. For the Four Books, the annotated edition of Chu-tze were used and the notes studied along with the texts.

(9) *Shih Ching (The Classic of Poetry)*, the Chu-tze edition, part of the notes studied along with the text.

(10) *Shu Ching (The Classic of History)*, as annotated by Ts'ai Shen. For this and the following two books the notes were not studied.

(11) *I Ching (The Classic of Changes)*, the Chu-tze edition.

(12) *Li Chi (The Record of Rites)*, as annotated by Ch'en Hao.

When my studies reached as far as the second half of *The Analects* Fourth Uncle Chieh-ju had been named monitor of the district of Fuyang, in Yingchow-fu, and was ready to leave for his post. He entrusted tutorship of the family school to a cousin of the clan, Master Yü-Ch'en. My Fourth Uncle was one of the village gentry, and was

frequently invited by the clan or by a neighboring village to take part in meetings or serve an arbitration in local disputes; he also loved to play cards (the Hweichow card-game, 155 cards to the pack), and was often called on for a game by Grand Uncle Ming-ta, Uncle Ying-chi, Uncle Chu-feng, or Uncle Mou-chang. As a result, our school work had been very lax: Fourth Uncle used to give us an advance assignment in our readers for us to study by ourselves before he excused himself from school; at the end of the day he would make a trip back to mark our hand-writing papers and let the school out before he went away again.

When Fourth Uncle was in charge of the school there were only two pupils, myself, and Fourth Uncle's own son Ssu-shu, several years older than I. Ssu-shu was adopted to Aunt Yü. (The two sons of my Grand Uncle Hsing-wu, Uncle Chen and Uncle Yü, were both without issue; my own Third Elder-Brother was adopted to Uncle Chen, while my schoolmate Brother Shu was adopted to Aunt Yü.) She doted upon her adoptive son and would do nothing to bring him up properly, so every time Fourth Uncle had to leave school Brother Shu would run away to play in the kitchen or in the back parlor. (He and his adoptive mother lived in the same house with Fourth Uncle, and our school was established in a small room in the east wing of the house.) My mother, on the other hand, held me in strict discipline and I, for my part, did not regard studying as a hardship. So many a time I was the only one to sit in that school, reading and reviewing until it was dark, when I was sent home.

After Master Yü-Ch'en took over the family school the number of pupils increased. There were five at first, and later we were more than ten altogether. The small room in Fourth Uncle's house became inadequate, and the school was moved into a larger room, named Lai Hsin (Come-New) Studio. Two of the first three new students were the sons of Uncle Shou-tsan, named Ssu-chao and Ssu-k'wei. Ssu-chao was two or three years older than I, not a dull boy by nature but with a born hatred for studying. He loved nothing better than to "dodge

school," which was "playing hookey" in our colloquy. During his escapes from school he would hide himself in the wheat fields or rice fields, would rather go hungry lying low in the fields than study books. The teacher used to send Ssu-shu out to fetch him; sometimes when Ssu-chao was captured and returned a beating would await him at school; at other times even Ssu-shu would go off somewhere and not return—he figured that he might as well, since he was "on an official mission" and would not be regarded as dodging school!

It often puzzled me, why Ssu-chao felt the need of dodging school? Why was it that a man would willingly expose himself to hunger, beating, scolding and ridicule, rather than study? It was not until later, when I had become better versed in the way of the world, that I could find the answer to this puzzle. Uncle Tsan had been in business in Kiangsi Province when he was young, and had a cotton-goods shop in Kiukiang, where he married and raised his family. The whole family spoke the Kiangsi dialect, which Ssu-chao and his brother found it hard to change after they returned to live in their ancestral home; even after they succeeded in correcting their dialect in conversation, in studying Ssu-chao would still find himself lapsing into the Kiangsi tone. For that he was often given the ruler or the "chestnut lumps" (a form of punishment consisting of a knuckled fist drilling on the head until, frequently, lumps were raised). So the source of trouble was an unsympathetic teacher; no wonder that the boy had lost his taste for studying.

There was another and more important reason. These elementary schools in our village charged a very low fee, with each pupil contributing only two silver dollars a year. Naturally the teacher did not have the patience to spend much time to "expound the book" for these pupils, but only bothered enough to teach them characters and to have them recite by rote. In the beginning the readers were in rhymed verses and the small pupils learned to chant them off readily enough, but when it reached the stage of such prose texts as *Yiu Hsüeh Ch'ung Lin* (*The Young Scholar's Anthology of Literature*) and the Four

Books, they naturally failed to evince any interest in the studies because of a total incomprehension of what the books were all about. For this reason, a good many pupils resorted to the "dodge"; at first there was Ssu-chao, then there was a boy named Shih-hsiang; both were well known as "born dodgers." These pupils all belonged to the two dollars per annum class. Because they liked to dodge school the teacher would be angry and would administer severe beatings; the more severe the beating, the more the boys would dodge school.

I was the only pupil who did not belong to this "two dollars" class. Because my mother thirsted after knowledge for me, she made it a point to be especially liberal with my tuition: the very first year my contribution was six dollars, with the amount increased every year, until the last year when I contributed a fee of twelve dollars—a "record-breaking" sum in the way of tuition in our village. I imagine my mother was carrying out the repeated wishes of my father when she entreated Fourth Uncle and, later, Master Yü-Ch'en to "expound the book" for me: after every word read and every sentence studied they must pause to explain the meaning. I had come to school already prepared with a vocabulary of nearly a thousand "square characters," each having been thoroughly explained to me by my parents, so now I did not have much trouble. Although among the books studied there were many passages which were beyond the ability of the village school-teacher to explain, each day in my lesson I would encounter a sentence here or phrase there which made sense to me. What I liked best were the parts in Chu-tze's *Hsiao Hsüeh* which recounted the lives of ancient figures, as these were the portions that were most easily understood, and therefore most interesting. Among my schoolmates some were studying *The Young Scholar's Anthology of Literature*, and I was often called upon to help them in their lessons. Thus I had occasion to borrow and look over their books, wherein they studied the large texts but I was attracted to the notes in small print because the notes to that book contained many fairy tales and anecdotes much more interesting than what is said in the Four Books and the Five

Classics.

One day a small incident suddenly made me realize what a great blessing it was that my mother had made it her policy to increase my tuition fees. The mother of one of my schoolmates had asked Master Yü-Ch'en to write a letter in the boy's name to her husband; and the finished letter was given to the boy to take home in the evening. After a while, when the teacher stepped out for a moment, my schoolmate pulled the letter out to steal a look at it. Before he had gone very far he turned to ask of me: "Mên, what's the meaning of the first sentence in this letter here—it says 'My honorable Father *hsi-hsia*'?" This boy was only a year younger than me, and he had completed the Four Books, and yet he did not understand what was meant by the phrase, "My honorable Father *hsihsia*!" It was then that it dawned on me that I had been a specially favored student, on the strength of the fact that I had contributed ten dollars to the teacher the previous year whereas the others only gave their regular two dollars. To have had my studies explained to me as I learned, rather than to commit them to memory by sheer mechanical processes, was to prove of immense benefit to me for the rest of my life. My parents had explained each square character before it became a part of my vocabulary, and the two family tutors had followed the practice by explaining the classics as they were taught to me. To make a child study ancient literature without expounding its meaning for him was a total loss to the intellect, equivalent to the meaningless chanting of the Chinese Buddhist monks.

4

When I was at the age of nine, I was one day playing in the small house in the east wing of Fourth Uncle's home. The front part of this small house was used as our school-room, and there was a bedroom in the rear which was used as an occasional guest-room. There was no class that day, and I happened to walk into the bedroom and spied the

corner of a book peeping out from some wastepaper inside a "Meifoo" (Standard Oil) crate underneath the table. I picked up this book and saw that it had been gnawed off at both ends by mice and its covers were torn. But in an instant this half-torn book was destined to open up a fresh new world for me, and was to bring me to new adventures of exploration in my childhood development!

What this book was was a block-print edition of the novel *Shui Hu Chuan* (All Men Are Brothers), known as *The Fifth Book of Genius*, printed in small. I still remember distinctly the first page of this stray volume which was the chapter headed "Li Kw'ei Beat to Death the Villain Yin." From my attendance at the village theatricals I knew who this character Li Kw'ei was, and there I stood next to the wooden Meifoo oil crate, and gobbled down that volume of *Shui Hu Chuan* in one breath. It would have been perfectly all right if I had let the book go without reading it, but once having read it it bothered me no end: What went on before this volume, what came after it? These two questions kept gnawing at me for an answer, an answer I was dying to have.

I went to my Fifth Uncle with this book because he was known for his knowledge of "jokes" (in our native parlance all "stories" were called "jokes," and novels were known as "joke books") and he would be the logical person to go to for this type of joke books. Unfortunately, Fifth Uncle did not have this book, but he sent me off to Brother Shou-huan. "I don't have *The Fifth Genius*," said Brother Shou-huan, "but I'll borrow a set for you; I have, however, a set of *The First Genius* here at home, would you like to read that first?" The First Book of Genius is *The Romance of the Three Kingdoms*, and this classic of Chinese fiction my cousin gravely handed to me and I as joyously lugged home to read.

Later I managed to obtain a complete set of *Shui Hu Chuan*, and in the meantime I had finished reading *The Three Kingdoms*. From then on, I started borrowing novels everywhere to read. In this research, both Fifth Uncle and Brother Shou-huan were of much assistance to

me. My Third Brother-in-Law (Chou Shao-chin), who kept a store in Choupoo in the suburbs of Shanghai, was an opium addict who loved to read novels. Every time he returned to our native village he would bring with him the latest fiction and, when he visited at my home, would make me presents of such books as *Emperor Chengteh's Tour South of the River* and *The Adventures of the Seven Swordsmen and the Thirteen Knights*. This started me on my career of assembling my own fiction library. My Eldest Brother, Ssu-chia, was something of a ne'er-do-well who also smoked opium, but the opium-lamp seemed to be a constant companion to popular literature—Fifth Uncle, Brother Shou-huan and Third Brother-in-Law all were opium-smokers—so he also had some novels in his possession. My Eldest Sister-in-Law could read a little, and in her dowry were found quite a few volumes of the storyteller's scripts, like *The Double-Pearl Phoenix* and others. All these books before long were appropriated into my library.

Among my brothers Third Elder-Brother stayed at home the most; he and Second Elder-Brother were both well grounded in the classics, having attended the Mei Ch'i Academy in Shanghai as well as the Nanyang Normal College. As an educated man, Third Elder-Brother was discriminating in his taste for fiction. On his bookshelves I found only three novels: *Hung Lou Meng* (*The Dream of the Red Chamber*), *Ju Lin Wai Shih* (*The Unofficial History of the Scholarly World*), and *Liao Chai Chih Yi* (*Strange Stories From a Chinese Studio*). On one of Second Elder-Brother's trips home, he brought back a newly published translation entitled *Ching Kuo Mei Tan* (*The Heroic Tale of a Nation's Founding*) which told a story of Greek patriots and was written originally by the Japanese. That was the first foreign novel which I ever read.

The most valiant efforts on behalf of my quest for fiction were made by Clan Uncle, Chin-jen, who was, incidentally, the Hu Chin-jen who in the Twelfth Year of the Republic (1923) engaged in a polemic on ancient history with Mr. Ku Chi-kang. A few years older than I, he had already started writing compositions in school and he passed the

Imperial Examination for *hsiu-ts'ai* (the first degree) when barely in his teens. Though not in the same school, we saw each other often and had become the best of friends. He was endowed with great natural talents and, being industrious in his studies, had read many more books than I. He had a good library in his home, and after he finished reading a novel he would lend it to me. I would in turn pass on to him such novels that I managed to borrow elsewhere. Each of us kept a small folding account-book in which we recorded the titles of the novels we had read; at various intervals we would compare notes and see who had read the most books. These account-books have long since been lost, but I seem to remember that by the time I left my village there were already thirty-odd titles listed in my log.

The term "fiction" as I use it here includes *t'an st'u* (story-teller's scripts), *ch'uan ch'i* (strange tales) as well as true stories recorded in personal accounts. It includes *The Double-Pearl Phoenix* as well as *P'i Pa Chi* (*The Chronicle of the Lute*); *Liao Chai*, *Yeh Yu Ch'iu Teng Lu* (*Tales on a Rainy Night in Autumn*), *Yeh T'an Hsui Lu* (*Informal Record of Nocturnal Talks*), *Lan Shao Kuan Wai Shih* (*Chronicles of the Orchid Studio*), *Chi Yüan Chi So Chi* (*Letters From a Sheltering Garden*), *Yü Ch'u Hsin Chih* (*The New Record of Yü Ch'u*) and many others. I read everything from the utterly nonsensical tales like *The Eastern Expedition of General Hsieh Jen-kwei*, *The Western Expedition of General Hsieh Ting-shan*, *Pacification of the West by the Five Tigers* and *The Boudoir Tower* to first class literary works such as *The Dream of the Red Chamber* and *The Unofficial History of the Scholarly World*, running a gamut from the sublime to the ridiculous. Up to the time I left home I still had not been able to appreciate the fine points of *The Red Chamber* and *Ju Lin Wai Shih*, nevertheless most of these novels are written in the plain vernacular and living among them I unconsciously assimilated much of the vernacular prose which was to stand me in good stead some ten or fifteen years later.

The greatest benefit I derived from reading novels was that it helped to teach me how to write. It was the era of transition when the

orthodox, eight-legged style of classical composition had already been abolished and the Imperial Examination System itself was beginning to shake. Second Elder-Brother and Third Elder-Brother, having come under the influence of modern thinking in Shanghai, did not desire that I should try my hand at the eight-legged essay or at the various forms of classical exposition; they only saw to it that the teacher expounded the meaning of what was taught to me. But the books that formed a part of our study at school became more and more difficult to understand. *The Classic of Poetry* at first was easy to understand, but when we reached the chapter "Ta Ya" it was more obtuse, and when we reached "Chou Sung" it was simply impossible to understand. There were several chapters in *The Classic of History*, such as "The Song of the Five Men," which I learned to rattle off with verve, but the three chapters of "P'an Keng" were ever beyond my ability to master. In my nine years in the family school "P'an Keng" was the only lesson which caused me to be punished by the teacher. It was not until more than ten years later that I learned that the book *Shang Shu* was supposed to be divided into two styles, the ancient and the contemporary. Scholars have always agreed that the chapters in the ancient style were forged, whereas the contemporary style represented the genuine work; "P'an Keng" being classified with the contemporary style was considered authentic. But my own research has shown that the pronouns used in the "P'an Keng" chapters are of the most heterogeneous and illogical kind, and accordingly I have always wondered if these three chapters were not something counterfeited by posterity. Sometimes I think that perhaps my skepticism toward "P'an Keng" was subconsciously moved by a sense of revenge for the "chestnut lumps" which I had received on its account!

Books like *Chou Sung*, *Shang Shu* and *Chou I* were not the kind which would be helpful to me in my own composition, but it remained for the novels to render me the greatest service in this regard. Although from *The Three Kingdoms* to the *Liao Chai* stories and *Yü Ch'u Hsin Chih* represented a great jump from the simple vernacular

to the involved classical style, I was able to concentrate and read it all word for word because the stories these words conveyed were undeniably absorbingly interesting. Since the lithographic edition of *Liao Chai Chih Yi* was punctuated with circles and dots, it was even more easy for me to read, and I could even re-tell these strange stories to the female cousins in the clan by the time I was twelve or thirteen. Fourth Uncle's daughter Ch'iao-chü, Master Yü-Ch'en's younger sisters Kuang-chü and To-chü, Uncle Chu-feng's daughter Hsing-hsien, and the Clan Nieces Ts'ui-p'ing and Ting-chiao were then all aged fifteen or sixteen, and they often invited me over to tell stories to them. When we used to beg Fifth Uncle to tell us a story we would get busy filling and lighting his pipe, or giving him a massage in the back, and rendering him various personal services; now it was my turn to be served. However, I demanded no pipe-filling or massage; when I finished my story-telling the girls would treat me with some roasted rice fluffies or scrambled eggs with rice. While they bent over their embroidery or shoe-sewing, I would repeat aloud the stories of *Feng Hsien*, *Lien Hsiang*, *Chang Hung-chien*, and *Chiang Ch'eng* (*The River City*). In telling these stories to my audience I was forced to translate the classical style in which they were written into the colloquialism of our native village, thus giving me an even more thorough understanding of the grammar of ancient Chinese. As a result, when I went to school in Shanghai at the age of fourteen and began to write compositions in the classical style, I was able to write a highly acceptable essay.

5

I was a weak-bodied child and not able to play in the company of the savage children of our neighborhood. My mother further forbade me to run wild and jump up and down with the other boys. From the time I was very small I had not had occasion to develop the habit of vivacious play, and no matter where I was I always presented an air of

gentle bookishness. The older folk in our village used to comment that I "look and act just like a hsien-sheng (scholar)," and they dubbed me with the title "Mên *hsien-sheng*." This nickname soon got around and most people knew that Master Three's youngest son was called Mên *hsien-sheng*. Having been saddled with this scholarly title, I felt obliged all the more to live up to it, which made me refrain even more from running "wild" with the other urchins. One day I was engaged in a game of "rolling coins" before our front door and when one of the elders happened by and saw me he laughed and said: "Don't tell me that Mên *hsien-sheng* also stoops to rolling coins?" At this remark I was so embarrassed that I flushed a deep red in the face and felt that, to be sure, I had gone and compromised my role as a " *hsien-sheng*."

With encouragement from the grown-ups for me to act as a *hsien-sheng* and my own lack in both the habit and prowess for play, plus the fact that I really was fond of books, one of the things that I have missed in my life is the childish enjoyment of play. Each autumn when I went with my grandmother down to the farm to "inspect the reaping" (in the case of harvest from the best and most fertile fields the tenant farmer would invite the landlord to come and inspect the reaping, after which the grain would be equally divided between the parties), I would always sit reading a novel under one of the small trees. When I was eleven or twelve I became a bit more active and went so far as to organize with a bunch of schoolmates a theatrical troupe of our own. We made ourselves some wooden swords and spears, borrowed a few of those long beards used in make-up, and staged our productions in the village fields. The roles I took usually were those of civil characters like Chu-ke Liang and Liu Pei(of *The Three Kingdoms*); only once I remember playing the part of Shih Wen-kung in *Shui Hu Chuan*, struck by an arrow from the deadly bow of Hua Yung and instantly tumbling down a chair. That was the most active I ever achieved in my play.

In the space of those nine years (1895-1904) I learned to master only two things, reading and writing. Thus I managed to lay some

foundation for myself in literature and in thought (see the following chapter). But I did not have an opportunity to develop in any other direction. One year it was the turn of our village to manage the Princes' Fair (there were five villages altogether in the district of Eight Town and the villages took turns each year to play host to the Fair), and someone proposed that I should be dispatched to join the K'unshan Opera troupe organized by the front village as a mouth-organ or flute player. But the elders of the clan opposed the idea on the ground that I was too young to take part in a parade that was to tramp through all the five villages. So I lost the only opportunity in my life for learning music. In all these thirty years I have not touched a musical instrument, nor do I know anything of music; whether I ever had any aptitude for music it was not for me to know unto this day. As to painting, the possibility that I would have a chance to learn it was even more remote. I used to like to place a sheet of thin bamboo paper over the lithographic illustrations in my novels and traced the outlines of the great heroes and beauties pictured there. One day I was caught at this by the teacher and suffered a severe tongue-lashing for it; all the drawings hidden in my desk-drawers were ferreted out and torn to bits. Thus it was that I also lost my opportunity to become an artist.

But these nine years of my life, besides spent in studying and reading books, did succeed in giving me a bit of training in how to be a man. In this respect I am indebted to my loving mother as my foremost mentor.

Each morning at the crack of dawn my mother would rouse me from slumber and have me sit up in bed with my jacket thrown over my shoulders. I never knew how long it had been since she got up and sat there by my side. When she saw that I was fully awake, she would start recounting to me what I had done wrong on the previous day and what I had said wrong, and she would have me avow once again my determination to study hard. Sometimes she would relate to me all the fine things about my father. "You must try to follow in your old man's footsteps," she would add. "In all my life I have known only one

perfect man like him, so you want to emulate his example and not lose face for him." She would sometimes say something that made her sad all of a sudden, and tears would come down her cheeks. When daylight fully dawned she would get me properly dressed and rush me off early to school. The key to the door of our school-room was kept at the teacher's home; I would take a quick look at the school-house first to make sure that nobody was there ahead of me and then ran over to knock on the teacher's door. Somebody inside would pass the key out through a crack in the door, and then I would run back to school, open up the door, and sit down to my day's assignment. Eight or nine days out of ten I would be the first to open the school. By the time teacher arrived I had memorized my lesson, which I recited for him before going back home for breakfast.

My mother held me in strict discipline: she was to me loving mother and stern father combined. But she never once scolded me or hit me in front of others. When I did wrong all she would do would be to give me a stern and disapproving look, at which instant I would desist. If the offense was small she would wait until the next morning to give me a lecture upon my awakening. If it was a serious offense she would wait until night when everything was quiet and she had shut the door to our room, and she would first reprimand me and then administer the punishment, making me kneel down or pinching me until it hurt. No matter how severe the punishment was, I was forbidden to cry aloud, because she punished me for my own good and not to let off steam for the edification of the others in the household.

One early autumn day in the twilight, I had finished my supper and was playing in front of our house, clad only in a light sleeveless jersey. My mother's younger sister, Auntie Yü-ying, who was visiting with us then came out with a short jacket for me to put on for fear that I would catch cold. When I refused to wear it, she said: "You'd better, it's getting cold (*liang*)!" I casually shot back in a pun: "What did you say about *liang*(mother)? I don't even have an old man!" No

sooner I made this crack than I raised my head and saw my mother coming out of the house. I quickly put the jacket on, but she had heard my flippant remark. At night when all was quiet, she made me kneel and administered a particularly severe punishment. She said: "So you don't have your old man, what a thing to boast about! You think you have a smart tongue, don't you?" She was so angry she sat there trembling, nor did she allow me to go to bed. I knelt there crying, and kept wiping the tears off with my hand, and I must have wiped into my eyes some kind of germs, for it later gave me a case of eye infection that lasted fully a year. We went to the doctors for different treatments, but the disease refused to be cured. This filled my mother's heart with remorse and anxiety. She then heard that the infection in the eyes could be cured by licking it with the tongue, and one night she woke me up and actually used her tongue to lick my infected eyes. This was my stern master, my loving mother.

* * * * *

My mother was a widow at twenty-three and was at the same time a step-mother charged with the running of a big household. The cruel heartaches of that life was ten thousand times beyond what my pen could convey. The family finances had never been sound, and everything depended on Second Elder-Brother's business management in Shanghai. Eldest Brother had been a ne'er-do-well since he was young, indulging in opium-smoking and gambling, and squandering what money he had as soon as he had it. Every time he was penniless he would come home to scheme for more, selling an incense-burner if he laid his hands on one or taking a pewter tea-kettle out to pawn. More than once my mother invited over the elders of the clan and in front of them fixed a monthly allowance for Eldest Brother, but he would always over-spend and leave behind him opium and gambling debts wherever he went. Each year on New Year's Eve there would always be a whole crowd of creditors gathered in our home, each with a lantern in his hand, waiting in our front parlor to be paid. Eldest

Brother would long since have made himself scarce. All we could see in the two rows of chairs that lined the walls of the front parlor were lanterns and creditors. My mother would walk in and out of the room, busy about her tasks, such as fixing the New Year's Eve dinner, laying out sacrifices for the Kitchen God, and wrapping up money-gifts for the children, seemingly oblivious of the pack of intruders in the house. Only when it was approaching midnight, the traditional hour for "sealing the door," that my mother would slip out of the back door and implore a neighboring relative to come over and help dispatch the creditors by giving them each some token payment. In this manner, and not without much reassurance and placating of ruffled feelings, were the creditors one by one induced to depart with their lanterns. Presently, there came Eldest Brother, knocking at the front door. Never would my mother give him one word of scolding and, being New Year's, she would not even show any sign of displeasure on her face. This was the way we passed our New Year's, and I remember passing the holiday like that six or seven times.

My Eldest Sister-in-Law was a most incompetent and utterly insensible person, and my Second Sister-in-Law were an able but narrow-minded woman. Between the two of them there were often misunderstandings and it was only on account of the congenial example kept before them constantly by my mother that they managed to avoid any open outbreak of quarrels or fights. When they were angry with each other they would only refrain from talking and make no replies when spoken to, the while pulling such a long face that it was uncomfortable to look at; when Second Sister-in-Law was angry her face would turn green, which was even more terrible. They did the same when they, for any reason, were angry with my mother. At first I did not understand at all what it was all about, but soon I began to appreciate the significance of the changing complexions in people's faces. More and more I grew to understand that there is nothing more hateful in the world than a long and angry face. There is nothing more despicable than to pull a silent long face on others; it is

more difficult to bear than harsh words or the blows of a fist.

My mother was tolerant and good-natured and, being a step-mother and step-mother-in-law, she was extra careful in everything and extra forbearing in her dealings. Eldest Brother had a daughter, only one year younger than I, who enjoyed the same treatment in food and clothing as that which was given to me. Whenever we fought over some little thing, it was always I who suffered because mother always blamed me and had me make the concession. Later both Eldest Sister-in-Law and Second Sister-in-Law had sons of their own, and when they were in bad temper they would let off steam by beating and scolding the children. They would invariably accompany their spanking with harsh and sharp words for the benefit of other ears. My mother would always pretend she did not hear. Sometimes, when she could not stand it, she would slip quietly out of the house, to visit for a while with Big Aunt Li whose house was next to ours on the left or to go for a chat with Sister Tu, the neighbor across the way from our back door. She managed never to engage in a quarrel with my two sisters-in-law.

When either of the sisters-in-law got herself in a bad mood it would sometimes last ten days to a half-month. During all that time they would walk in and out with their cold and long faces, keep their mouths tightly shut or beat and curse the children to let off steam. My mother would always bear it in silence, but if there should finally come a day that she could not bear it any more, she would make a way of her own to cope with the situation. On such a day she would stay in bed from daybreak and give vent to her feelings in a good, long cry. She would not rail at any one, but only cry for her husband and cry for her own bitter fate, for not having been able to keep her husband to take care of her. She would start crying very quietly, but gradually as she continued crying her sobs would be heard. When I woke up I would try to comfort her as best I could, though she would not stop. By that time I would hear a door opening in the front parlor (Second Sister-in-Law had the east room in the front parlor) or the

rear parlor (Big Sister-in-Law had the west room in the rear), and one of the sisters-in-law would come out and go into the kitchen. In a little while, the sister-in-law would be knocking at our door. When I opened it, she would come in with a bowl of hot tea in her hands for mother, and she would try to persuade mother to stop crying and have some hot tea. My mother slowly controlled her sobs and took the proffered tea, while the sister-in-law continued a while with her kind words before withdrawing from the room. In such an exchange, not a word would be mentioned about personalities, nor would there be the slightest allusion to the angry faces that had been there for the past ten or fifteen days yet; each knew very well in her heart, the sister-in-law who came in with the tea would invariably be the very same who was the cause of the late disharmony. It was a strange thing, every time my mother cried like that peace and tranquility would be restored under our roof for at least a month or two.

Although my mother was the kindest and gentlest soul and never did she speak a word that would hurt the feelings of others, when occasions called for she would display a great strength of character and would not brook the slightest insult to her integrity. The Fifth Uncle of our family, who was a loafer without a proper profession, was overheard one day shooting off his mouth in the opium den, to the effect that my mother was in the habit of invoking the assistance of a certain person whenever she needed help and that it must be that this person had received his due reward, too. When the story was circulated to within the knowledge of my mother she was so enraged that she cried bitterly. Straightway she hailed Fifth Uncle before an assemblage of the clan elders and demanded to his face to know what reward it was that she was supposed to have given this certain person. She inveighed so vehemently that Fifth Uncle had to withdraw his aspersions and tender his apologies then and there before she desisted.

For nine years I lived under the tutelage of my mother, and benefited deeply and greatly from her. I left her when I was fourteen (actually only twelve years plus two or three months) and for these

twenty-odd years since have made my way alone in this vast and infinite sea of humanity, without anyone to guide me. If I have the least bit of good in my nature, if I have learned to be at all kind in my dealings with others, if I am capable of tolerance and consideration to my fellows—I would have to thank my loving mother for it all.

壹 九年的家乡教育

—

我生在光绪十七年十一月十七日（一八九一年十二月十七），那时候我家寄住在上海大东门外。我生后两个月，我父亲被台湾巡抚邵友濂奏调往台湾；江苏巡抚奏请免调，没有效果。我父亲于十八年二月底到台湾，我母亲和我搬到川沙住了一年。十九年（一八九三）二月二十六日我们一家（我母，四叔介如，二哥嗣矩，三哥嗣桢）也从上海到台湾。我们在台南住了十个月。十九年五月，我父亲做台东直隶州知州，兼统镇海后军各营。台东是新设的州，一切草创，故我父不带家眷去。到十九年底，我们才到台东。我们在台东住了整一年。

甲午（一八九四）中日战事开始，台湾也在备战的区域，恰好介如四叔来台湾，我父亲便托他把家眷送回徽州故乡，只留二哥嗣矩跟着他在台东。我们于乙未年（一八九五）正月离开台湾，二月初十日从上海起程回绩溪故乡。

那年四月，中日和议成，把台湾割让给日本。台湾绅民反对割台，要求巡抚唐景崧坚守，唐景崧请西洋各国出来干涉，各国不允。台人公请唐为“台湾民主国”大总统，帮办军务刘永福为主军大总统。我父亲在台东办后山的防务，电报已不通，饷源已断绝。那时他已得脚气病，左脚已不能行动。他守到闰五月初三日，始离开后山。到安平时，刘永福苦苦留他帮忙，不肯放行。到六月廿五日，他双脚都不能动了，刘永福始放他行。六月廿八到厦门，手足俱不能动了。七月初三日他死在厦门，成为东亚第一个民主国的一个牺牲者！

这时候我只有三岁零八个月。我仿佛记得我父亲死信到家时，我母亲正在家中老屋的前堂，她坐在房门口的椅子上。她听见读信人读到父亲的死信，身子往后一倒，连椅子倒在房门槛上。东边房门口坐的珍伯母也放声大哭起来。一时满屋都是哭声，我只觉得天地都翻覆了！我只仿佛记得这一点凄惨的情状，其余都不记得了。

二

我父亲死时，我母亲只有二十三岁。我父初娶冯氏，结婚不久便遭太平天国之乱，同治二年（一八六三）死在兵乱里。次娶曹氏，生了三个儿子，三个女儿，死于光绪四年（一八七八）。我父亲因家贫，又有志远游，故久不续娶。到光绪十五年（一八八九），他在江苏候补，生活稍稍安定，他才续娶我的母亲。我母亲结婚后三天，我的大哥嗣稼也娶亲了。那时我的大姊已出嫁生了儿子。大姊比我母亲大七岁。大哥比她大两岁。二姊是从小抱给人家的。三姊比我母亲小三岁，二哥三哥（孪生的）比她小四岁。这样一个家庭里忽然来了一个十七岁的后母，她的地位自然十分困难，她的生活自然免不了苦痛。

结婚后不久，我父亲把她接到了上海同住。她脱离了大家庭的痛苦，我父又很爱她，每日在百忙中教她认字读书，这几年的生活是很快乐的。我小时也很得我父亲钟爱，不满三岁时，他就把教我母亲的红纸方字教我认。父亲作教师，母亲便在旁作助教。我认的是生字，她便借此温她的熟字。他太忙时，她就是代理教师。我们离开台湾时，她认得了近千字，我也认了七百多字。这些方字都是我父亲亲手写的楷字，我母亲终身保存着，因为这些方块红笺上都是我们三个人的最神圣的团居生活的记念。

我母亲二十三岁就做了寡妇，从此以后，又过了二十三年。这二十三年的生活真是十分苦痛的生活，只因为还有我这一点骨血，她含辛茹苦，把全副希望寄托在我的渺茫不可知的将来，这一点希望居然使她挣扎着活了二十三年。

我父亲在临死之前两个多月，写了几张遗嘱，我母亲和四个儿子每人各有一张，每张只有几句话。给我母亲的遗嘱上说糜儿（我的名字叫嗣糜，糜字音门）天资颇聪明，应该令他读书。给我的遗嘱也教我努力读书上进。这寥寥几句话在我的一生很有重大的影响。我十一岁的时候，二哥和三哥都在家，有一天我母亲向他们道：“糜今年十一岁了。你老子叫他念书。你们看看他念书念得出吗？”二哥不曾开口，三哥冷笑道，“哼，念书！”二哥始终没有说什么。我母亲忍气坐了一会，回到了房里才敢掉眼泪。她不敢得罪他们，因为一家的财政权全在二哥的手里，我若出门求学是要靠他供给学费的。所以她只能掉眼泪，终不敢哭。

但父亲的遗嘱究竟是父亲的遗嘱，我是应该念书的。况且我小时很聪明，四乡的人都知道三先生的小儿子是能够念书的。所以隔了两年，

三哥往上海医肺病，我就跟他出门求学了。

三

我在台湾时，大病了半年，故身体很弱。回家乡时，我号称五岁了，还不能跨一个七八寸高的门槛。但我母亲望我念书的心很切，故到家的時候，我才满三岁零几个月，就在我四叔父介如先生（名玠）的学堂里读书了。我的身体太小，他们抱我坐在一只高凳子上面。我坐上了就爬不下来，还要别人抱下来。但我在学堂并不算最低级的学生，因为我进学堂之前已认得近一千字了。

因为我的程度不算“破蒙”的学生，故我不须念《三字经》，《千字文》，《百家姓》，《神童诗》一类的书。我念的第一部书是我父亲自己编的一部四言韵文，叫做《学为人诗》，他亲笔抄写了给我的。这部书说的是做人的道理。我把开头几行抄在这里：

为人之道，在率其性。
子臣弟友，循理之正；
谨乎庸言，勉乎庸行；
以学为人，以期作圣。……

以下分说五伦。最后三节，因为可以代表我父亲的思想，我也抄在这里：

五常之中，不幸有变，
名分攸关，不容稍紊。
义之所在，身可以殉。
求仁得仁，无所尤怨。

古之学者，察于人伦，
因亲及亲，九族克敦；
因爱推爱，万物同仁。
能尽其性，斯为圣人。

经籍所载，师儒所述，
为人之道，非有他术：
穷理致知，返躬践实，

我念的第二部书也是我父亲编的一部四言韵文，名叫《原学》，是一部略述哲理的书。这两部书虽是韵文，先生仍讲不了，我也懂不了。

我念的第三部书叫做《律诗六钞》，我不记是谁选的了。三十多年来，我不曾重见这部书，故没有机会考出此书的编者；依我的猜测，似是姚鼐的选本，但我不敢坚持此说。这一册诗全是律诗，我读了虽不懂得，却背的很熟。至今回忆，却完全不记得了。

我虽不曾读《三字经》等书，却因为听惯了别的小孩子高声诵读，我也能背这些书的一部分，尤其是那五七言的《神童诗》，我差不多能从头背到底。这本书后面的七言句子，如

人心曲曲湾湾水，
世事重重叠叠山。

我当时虽不懂得其中的意义，却常常嘴上爱念着玩，大概也是因为喜欢那些重字双声的缘故。

* * * * *

我念的第四部书以下，除了《诗经》，就都是散文的了。我依诵读的次序，把这些书名写在下面：

- (4) 《孝经》。
- (5) 朱子的《小学》，江永集注本。
- (6) 《论语》。以下四书皆用朱子注本。
- (7) 《孟子》。
- (8) 《大学》与《中庸》。(四书皆连注文读。)
- (9) 《诗经》，朱子集传本。(注文读一部分。)
- (10) 《书经》，蔡沈注本。(以下三书不读注文。)
- (11) 《易经》，朱子《本义》本。
- (12) 《礼记》，陈澧注本。

读到了《论语》的下半部，我的四叔父介如先生选了颍州府阜阳县的训导，要上任去了，就把家塾移交给族兄禹臣先生（名观象）。四叔是个绅董，常常被本族或外村请出去议事或和案子；他又喜欢打纸牌

（徽州纸牌，每副一百五十五张），常常被明达叔公，映基叔，祝封叔，茂张叔等人邀出去打牌。所以我们的功课很松，四叔往往在出门之前，给我们“上一进书”，叫我们自己念；他到天将黑时，回来一趟，把我们的习字纸加了圈，放了学，才又出门去。

四叔的学堂里只有两个学生，一个是我，一个是四叔的儿子嗣林，比我大几岁。嗣林承继给瑜婶。（星五伯公的二子，珍伯、瑜叔，皆无子，我家三哥承继珍伯，林哥承继瑜婶。）她很溺爱他，不肯管束他，故四叔一走开，林哥就溜到灶下或后堂去玩了。（他们和四叔住一屋，学堂在这屋的东边小屋内。）我的母亲管的严厉，我又不大觉得念书是苦事，故我一个人坐在学堂里温书念书，到天黑才回家。

禹臣先生接收家塾后，学生就增多了。先是五个，后来添到十多个，四叔家的小屋不够用了，就移到一所大屋——名叫来新书屋——里去。最初添的三个学生，有两个是守瓚叔的儿子，嗣昭，嗣逵。嗣昭比我大两三岁，天资不算笨，却不爱读书，最爱“逃学”，我们土话叫做“赖学”。他逃出去，往往躲在麦田或稻田里，宁可睡在田里挨饿，却不愿念书。先生往往差嗣林去捉；有时候，嗣昭被捉回来了，总得挨一顿打；有时候，连嗣林也不回来了，——乐得不回来了，因为这是“奉命差遣”，不算是逃学！

我常觉得奇怪，为什么嗣昭要逃学？为什么一个人情愿挨饿挨打，挨大家笑骂，而不情愿念书？后来我稍懂得世事，才明白了。瓚叔自小在江西做生意，后来在九江开布店，才娶妻生子；一家人都说江西话，回家乡时，嗣昭弟兄都不容易改口音；说话改了，而嗣昭念书常带江西音，常常因此吃戒方或吃“作瘤栗”。（钩起五指，打在头上，常打起瘤子，故叫做“作瘤栗”。）这是先生不原谅，难怪他不愿念书。

还有一个原因。我们家乡的蒙馆学金太轻，每个学生每年只送两块银元。先生对于这一类学生，自然不肯耐心教书，每天只教他们念死书，背死书，从来不肯为他们“讲书”。小学生初念有韵的书，也还不十分叫苦。后来念《幼学琼林》，四书一类的散文，他们自然毫不觉得有趣味，因为全不懂得书中说的是什么。因为这个缘故，许多学生常常赖学；先有嗣昭，后来有个士祥，都是有名的“赖学胚”。他们都属于这每年两元钱的阶级。因为逃学，先生生了气，打的更利害。越打的利害，他们越要逃学。

我一个人不属于这“两元”的阶级。我母亲渴望我读书，故学金特别

优厚，第一年就送六块钱，以后每年增加，最后一年加到十二元。这样的学金，在家乡要算“打破纪录”的了。我母亲大概是受了我父亲的叮嘱，她嘱托四叔和禹臣先生为我“讲书”：每读一字，须讲一字的意思；每读一句，须讲一句的意思。我先已认得了近千个“方字”，每个字都经过父母的讲解，故进学堂之后，不觉得很苦。念的几本书虽然有许多是乡里先生讲不明白的，但每天总遇着几句可懂的话。我最喜欢朱子《小学》里的记述古人行事的部分，因为那部分最容易懂得，所以比较最有趣味。同学之中有念《幼学琼林》的，我常常帮他们的忙，教他们不认得的生字，因此常常借这些书看；他们念大字，我却最爱看《幼学琼林》的小注，因为注文中有许多神话和故事，比四书五经有趣味多了。

有一天，一件小事使我忽然明白我母亲增加学金的大恩惠。一个同学的母亲来请禹臣先生代写家信给她的丈夫；信写成了，先生交她的儿子晚上带回家去。一会儿，先生出门去了，这位同学把家信抽出来偷看。他忽然过来问我道：“糜，这信上第一句‘父亲大人膝下’是什么意思？”他比我小一岁，也念过四书，却不懂“父亲大人膝下”是什么！这时候，我才明白我是一个受特别待遇的人，因为别人每年出两块钱，我去年却送十块钱。我一生最得力的是讲书：父亲母亲为我讲方字，两位先生为我讲书。念古文而不讲解，等于念“揭谛揭谛，波罗揭谛”，全无用处。

四

当我九岁时，有一天我在四叔家东边小屋里玩耍。这小屋前面是我们的学堂，后边有一间卧房，有客来便住在这里。这一天没有课，我偶然走进那卧房里去，偶然看见桌子下一只美孚煤油板箱里的废纸堆中露出一本破书。我偶然捡起了这本书，两头都被老鼠咬坏了，书面也扯破了。但这一本破书忽然为我开辟了一个新天地，忽然在我的儿童生活史上打开了一个新鲜的世界！

这本破书原来是一本小字木板的《第五才子》，我记得很清楚，开始便是“李逵打死殷天锡”一回。我在戏台上早已认得李逵是谁了，便站在那只美孚破板箱边，把这本《水浒传》残本一口气看完了。不看尚可，看了之后，我的心里很不好过：这一本的前面是些什么？后面是些什么？这两个问题，我都不能回答，却最急要一个回答。

我拿了这本书去寻我的五叔，因为他最会“说笑话”（“说笑话”就是“讲故事”，小说书叫做“笑话书”），应该有这种笑话书。不料五叔竟没有这书，他叫我去寻守焕哥。守焕哥说，“我没有《第五才子》，我带你去借一部；我家中有部《第一才子》，你先拿去看，好吧？”《第一才子》便是《三国演义》，他很郑重的捧出来，我很高兴的捧回去。

后来我居然得着《水浒传》全部。《三国演义》也看完了。从此以后，我到处去借小说看。五叔，守焕哥，都帮了我不少的忙。三姊夫（周绍瑾）在上海乡间周浦开店，他吸鸦片烟，最爱看小说书，带了不少回家乡；他每到我家来，总带些《正德皇帝下江南》，《七剑十三侠》一类的书来送给我。这是我自己收藏小说的起点。我的大哥（嗣稼）最不长进，也是吃鸦片烟的，但鸦片烟灯是和小说书常作伴的，——五叔，守焕哥，三姊夫都是吸鸦片烟的，——所以他也有些小说书。大嫂认得一些字，嫁妆里带来了好几种弹词小说，如《双珠凤》之类。这些书不久都成了我的藏书的一部分。

三哥在家乡时多；他同二哥都进过梅溪书院，都做过南洋公学的师范生，旧学都有根底，故三哥看小说很有选择。我在他书架上只寻得三部小说：一部《红楼梦》，一部《儒林外史》，一部《聊斋志异》。二哥有一次回家，带了一部新译出的《经国美谈》，讲的是希腊的爱国志士的故事，是日本人做的。这是我读外国小说的第一步。

帮助我借小说最出力的是族叔近仁，就是民国十二年 and 顾颉刚先生讨论古史的胡堇人。他比我大几岁，已“开笔”做文章了，十几岁就考取了秀才。我同他不同学堂，但常常相见，成了最要好的朋友。他天才很高，也肯用功，读书比我多，家中也颇有藏书。他看过的小说，常借给我看，我借到的小说，也常借给他看。我们两人各有一个小手折，把看过的小说都记在上面，时时交换比较，看谁看的书多。这两个折子后来都不见了，但我记得离开家乡时，我的折子上好像已有了三十多部小说了。

这里所谓“小说”，包括弹词，传奇，以及笔记小说在内。《双珠凤》在内，《琵琶记》也在内；《聊斋》，《夜雨秋灯录》，《夜谭随录》，《兰苕馆外史》，《寄园寄所寄》，《虞初新志》等等也在内。从《薛仁贵征东》，《薛丁山征西》，《五虎平西》，《粉妆楼》一类最无意义的小说，到《红楼梦》和《儒林外史》一类的第一流作品，这里面的程度已是天悬地隔了。我到离开家乡时，还不能了解《红楼梦》

和《儒林外史》的好处。但这一大类都是白话小说，我在不知不觉之中得了不少的白话散文的训练，在十几年后于我很有用处。

看小说还有一桩绝大的好处，就是帮助我把文字弄通顺了。那时候正是废八股时文的时代，科举制度本身也动摇了。二哥三哥在上海受了时代思潮的影响，所以不要我“开笔”做八股文，也不要我学做策论经义。他们只要先生给我讲书，教我读书。但学堂里念的书，越到后来，越不好懂了，《诗经》起初还好懂，读到《大雅》，就难懂了；读到《周颂》，更不可懂了。《书经》有几篇，如《五子之歌》，我读的很起劲；但《盘庚》三篇，我总读不熟。我在学堂九年，只有《盘庚》害我挨了一次打。后来隔了十多年，我才知道《尚书》有今文和古文两大类，向来学者都说古文诸篇是假的，今文是真的；《盘庚》属于今文一类，应该是真的。但我研究《盘庚》用的代名词最杂乱不成条理，故我总疑心这三篇是后人假造的。有时候，我自己想，我的怀疑《盘庚》，也许暗中含有报那一个“作瘤栗”的仇恨的意味罢？

《周颂》，《尚书》，《周易》等书都是不能帮助我作通顺文字的。但小说书却给了我绝大的帮助。从《三国演义》读到《聊斋志异》和《虞初新志》，这一跳虽然跳的太远，但因为书中的故事实在有趣味，所以我能细细读下去。石印本的《聊斋志异》有圈点，所以更容易读。到我十二三岁时，已能对本家姊妹们讲说《聊斋》故事了。那时候，四叔的女儿巧菊，禹臣先生的妹子广菊、多菊，祝封叔的女儿杏仙，和本家侄女翠苹、定娇等，都在十五六岁之间；她们常常邀我去，请我讲故事。我们平常请五叔讲故事时，忙着替他点火，装旱烟，替他捶背，现在轮到我受人巴结了。我不用人装烟捶背，她们听我说完故事，总去泡炒米，或做蛋炒饭来请我吃。她们绣花做鞋，我讲《凤仙》，《莲香》，《张鸿渐》，《江城》。这样的讲书，逼我把古文的故事翻译成绩溪土话，使我更了解古文的文理。所以我到十四岁来上海开始作古文时，就能做很像样的文字了。

五

我小时身体弱，不能跟着野蛮的孩子们一块儿玩。我母亲也不准我和他们乱跑乱跳。小时不曾养成活泼游戏的习惯，无论在什么地方，我总是文绉绉地。所以家乡长辈都说我“像个先生样子”，遂叫我做“糜先

生”。这个绰号叫出去之后，人都知道三先生的小儿子叫做糜先生了。既有“先生”之名，我不能不装出点“先生”样子，更不能跟着顽童们“野”了。有一天，我在我家八字门口和一班孩子“掷铜钱”，一位长辈走过，见了我，笑道：“糜先生也掷铜钱吗？”我听了羞愧的面红耳热，觉得大失了“先生”的身分！

大人们鼓励我装先生样子，我也没有嬉戏的能力和习惯，又因为我确是喜欢看书，所以我一生可算是不曾享过儿童游戏的生活。每年秋天，我的庶祖母同我到田里去“监割”（顶好的田，水旱无忧，收成最好，佃户每约田主来监割，打下谷子，两家平分。），我总是坐在小树底下看小说。十一二岁时，我稍活泼一点，居然和一群同学组织了一个戏剧班，做了一些木刀竹枪，借得了几副假胡须，就在村口田里做戏。我做的往往是诸葛亮，刘备一类的文角儿；只有一次我做史文恭，被花荣一箭从椅子上射倒下去，这算是我最活泼的玩艺儿了。

我在这九年（一八九五——一九〇四）之中，只学得了读书写字两件事。在文字和思想（看下文）的方面，不能不算是打了一点底子。但别的方面都没有发展的机会。有一次我们村里“当朋”（八都凡五村，称为“五朋”，每年一村轮着做太子会，名为“当朋”。），筹备太子会，有人提议要派我加入前村的昆腔队里学习吹笙或吹笛。族里长辈反对，说我年纪太小，不能跟着太子会走遍五朋。于是我失掉了这学习音乐的唯一机会。三十年来，我不曾拿过乐器，也全不懂音乐；究竟我有没有一点学音乐的天资，我至今还不知道。至于学图画，更是不可能的事。我常常用竹纸蒙在小说书的石印绘像上，摹画书上的英雄美人。有一天，被先生看见了，挨了一顿大骂，抽屉里的图画都被搜出撕毁了。于是我又失掉了学做画家的机会。

但这九年的生活，除了读书看书之外，究竟给了我一点做人的训练。在这一点上，我的恩师就是我的慈母。

每天天刚亮时，我母亲就把我喊醒，叫我披衣坐起。我从不知道她醒来坐了多少了。她看我清醒了，才对我说昨天我做错了什么事，说错了什么话，要我用功读书。有时候她对我说父亲的种种好处，她说：“你总要踏上你老子的脚步。我一生只晓得这一个完全的人，你要学他，不要跌他的股。”（跌股便是丢脸，出丑。）她说到伤心处，往往掉下泪来。到天大明时，她才把我的衣服穿好，催我去上早学。学堂门上的锁匙放在先生家里；我先到学堂门口一望，便跑到先生家里去敲门。先生

家里有人把锁匙从门缝里递出来，我拿了跑回去，开了门，坐下念生书。十天之中，总有八九天我是第一个去开学堂门的。等到先生来了，我背了生书，才回家吃早饭。

我母亲管束我最严，她是慈母兼任严父。但她从来不在别人面前骂我一句，打我一下。我做错了事，她只对我一望，我看见了她的严厉眼光，就吓住了。犯的事小，她等到第二天早晨我眼醒时才教训我。犯的事大，她等到晚上人静时，关了房门，先责备我，然后行罚，或罚跪，或拧我的肉。无论怎样重罚，总不许我哭出声音来。她教训儿子不是借此出气叫别人听的。

有一个初秋的傍晚，我吃了晚饭，在门口玩，身上只穿着一件单背心。这时候我母亲的妹子玉英姨母在我家住，她怕我冷了，拿了一件小衫出来叫我穿上。我不肯穿，她说：“穿上吧，凉了。”我随口回答：“娘（凉）什么！老子都不老子呀。”我刚说了这句话，一抬头，看见母亲从家里走出，我赶紧把小衫穿上。但她已听见这句轻薄的话了。晚上人静后，她罚我跪下，重重的责罚了一顿。她说：“你没了老子，是多么得意的事！好用来说嘴！”她气的坐着发抖，也不许我上床去睡。我跪着哭，用手擦眼泪，不知擦进了什么微菌，后来足足害了一年多的眼翳病。医来医去，总医不好。我母亲心里又悔又急，听说眼翳可以用舌头舔去，有一夜她把我叫醒，她真用舌头舔我的病眼。这是我的严师，我的慈母。

* * * * *

我母亲二十三岁做了寡妇，又是当家的后母。这种生活的痛苦，我的笨笔写不出一万分之一二。家中财政本不宽裕，全靠二哥在上海经营调度。大哥从小就是败子，吸鸦片烟，赌博，钱到手就光，光了就回家打主意，见了香炉就拿出去卖，捞着锡茶壶就拿出去押。我母亲几次邀了本家长辈来，给他定下每月用费的数目。但他总不够用，到处都欠下烟债赌债。每年除夕我家中总有一大群讨债的，每人一盏灯笼，坐在大厅上不肯去。大哥早已避出去了。大厅的两排椅子上满满的都是灯笼和债主。我母亲走进走出，料理年夜饭，谢灶神，压岁钱等事，只当做不曾看见这一群人。到了近半夜，快要“封门”了，我母亲才走后门出去，央一位邻舍本家到我家来，每一家债户开发一点钱。做好做歹的，这一群讨债的才一个一个提着灯笼走出去。一会儿，大哥敲门回来了。我母

亲从不骂他一句。并且因为是新年，她脸上从不露出一丝怒色。这样的过年，我过了六七次。

大嫂是个最无能而又最不懂事的人，二嫂是个很能干而气量很窄小的人。她们常常闹意见，只因为我母亲的和气榜样，她们还不曾有公然相骂相打的事。她们闹气时，只是不说话，不答话，把脸放下来，叫人难看；二嫂生气时，脸色变青，更是怕人。她们对我母亲闹气时，也是如此。我起初全不懂得这一套，后来也渐渐懂得看人的脸色了。我渐渐明白，世间最可厌恶的事莫如一张生气的脸；世间最下流的事莫如把生气的脸摆给旁人看。这比打骂还难受。

我母亲的气量大，性子好，又因为做了后母后婆，她更事事留心，事事格外容忍。大哥的女儿比我只小一岁，她的饮食衣料总是和我的一样。我和她有小争执，总是我吃亏，母亲总是责备我，要我事事让她。后来大嫂二嫂都生了儿子了，她们生气时便打骂孩子来出气，一面打，一面用尖刻有刺的话骂给别人听。我母亲只装做不听见。有时候，她实在忍不住了，便悄悄走出门去，或到左邻立大嫂（绩溪称伯母为“嫚”）家去坐一会，或走后门到后邻度嫂家去闲谈。她从不和两个嫂子吵一句嘴。

每个嫂子一生气，往往十天半个月不歇，天天走进走出，板着脸，咬着嘴，打骂小孩子出气。我母亲只忍耐着，忍到实在不可再忍的一天，她也有她的法子。这一天的天明时，她就不起床，轻轻的哭一场。她不骂一个人，只哭她的丈夫，哭她自己苦命，留不住她丈夫来照管她。她先哭时，声音很低，渐渐哭出声来。我醒了起来劝她，她不肯住。这时候，我总听见前堂（二嫂住前堂东房）或后堂（大嫂住后堂西房）有一扇房门开了，一个嫂子走出房向厨房走去。不多一会，那位嫂子来敲我们的房门了。我开了房门，她走进来，捧着一碗热茶，送到我母亲床前，劝她止哭，请她喝口热茶。我母亲慢慢停住哭声，伸手接了茶碗。那位嫂子站着劝一会，才退出去。没有一句话提到什么人，也没有一个字提到这十天半个月来的气脸，然而各人心里明白，泡茶进来的嫂子总是那十天半个月来闹气的人。奇怪的很，这一哭之后，至少有一两个月的太平清静日子。

我母亲待人最仁慈，最温和，从来没有一句伤人感情的话。但她有时候也很有刚气，不受一点人格上的侮辱。我家五叔是个无正业的浪人，有一天在烟馆里发牢骚，说我母亲家中有事总请某人帮忙，大概总

有什么好处给他。这句话传到了我母亲耳朵里，她气的大哭，请了几位本家来，把五叔喊来，她当面质问他她给了某人什么好处。直到五叔当众认错赔罪，她才罢休。

我在我母亲的教训之下住了九年，受了她的极大极深的影响。我十四岁（其实只有十二岁零两三个月）就离开她了，在这广漠的人海里独自混了二十多年，没有一个人管束过我。如果我学得了一丝一毫的好脾气，如果我学得了一点点待人接物的和气，如果我能宽恕人，体谅人，——我都得感谢我的慈母。

十九，十一，廿一夜。

II THE MAKING OF AN AGNOSTIC

①

We bow and scrape before the snakes and the lizards,
And offer wines and flesh galore.
Were it true that these gods aided us,
Why did they not work when winter comes?

This poem was one of ten narrative poems written by my father at the time he was supervisor of the Yellow River works at Chengchow (the 14th Year of Kuanghsu, 1888). He annotated the poem himself in the following words:

Now that frost and snow have visited us, the so-called "Great Kings" and "Generals" (the snakes and lizards) who are supposed to protect and supervise the river works have all disappeared without a trace.

"Great Kings" and "Generals" are names given to the river gods in the sacrificial ceremony; in the regions where river works were undertaken water snakes and lizards were usually regarded as assumed forms of these deities and, as such, the object of the most solemn sacrifices and worship. To think that in an undertaking as important as water conservancy high officials of the government in charge of the river works should find it necessary to kowtow to these lowly forms of water life for favor—it was really the most humiliating commentary of the national intelligence. In this poem my father not only bluntly tilted at this kind of superstition but also, by citing an elementary evidence, proved how silly and laughable were the popular beliefs. This is quite indicative of the way in which my father's mind tended to run.

My father had not been exposed to the baptism of the modern natural sciences, but he was greatly under the influence of the Ch'eng Yi and Chu Hsi school of thought which exalted reason. This Rational School of philosophers had inherited our ancient naturalistic view of the universe and used the two basic conceptions of *ch'i* (matter) and *li* (reason) to exemplify the universe, to the extent that they dared make the assertion that "Heaven is reason" and that "Ghosts and Spirits are but the natural functioning of the two material forces (yin and yang)." Although such thinking fell short of being thorough-going, it had the effect of shattering much of our superstitions. Moreover, the Ch'eng-Chu school of philosophy strongly promoted the rule of *kê wu ch'üing li* (approach a thing and investigate its reason), which was the equivalent of the modern scientific attitude. In his book *On Learning*, my father stated at the outset:

In the murky atmosphere betwixt Heaven and Earth, the myriad objects evolved.

which is a distillation of the naturalistic view of the universe taught by the philosophers of reason. In his *On Learning to Be a Man* he reached the following conclusion:

To be a man, there is naught else:

Investigate reason and extend knowledge, then turn to self for practical application;

To strive and learn and hold fast to the Way.

This was in the best tradition of the scientific attitude toward learning of the Ch'eng-Chu school.

These words all constituted the grist in my mill when I was a mere schoolboy of four or five. How my tutor interpreted them I no longer can remember; it is safe to say that at the time I was totally ignorant of their significance. My father died too early—I was a mere three-year-old when we left him in T'aiwan—for me to come under

the direct influence of his thinking. What he had left me could be described as twofold: one was a natural heritage, for "I am my father's son"; the other was a bit of influence from the rational attitude of Ch'eng and Chu. It was under this rational influence that I was given as a child to study Chu-tze's *Hsiao Hsueh* with Fourth Uncle; and this same rational attitude was advertised in the form of a notice posted on the front-door of my Fourth Uncle's home and our own home, proclaiming the words: "seng tao wu yüan"—"No solicitation from (Buddhist) monks or (Taoist) priests."

I could still see this strip of paper with the four characters "*seng tao wu yüan*" posted on the front-door of our new house which elements had transmuted from its original crimson to a pale pink, and then to a greyish white, until finally it peeled off altogether. But womenfolk of our house were all devout believers. After the death of my father and with Fourth Uncle gone to take up his official post, the womenfolk went about freely in their worship of Buddha and the gods. The leader of this feminine movement for religion was Great Aunt Hsing-wu. In her declining years she became a habitual vegetarian and immersed herself in daily worship and prayers, and was not to be dissuaded from these pursuits by Fourth Uncle or my Third Elder-Brother (her adopted grandson). She was later joined in vegetarianism and daily worship by Second Elder-Brother's mother-in-law, who was a frequent house-guest in our home. These two venerable ladies became fast friends, and together they proselytized the rest of our womenfolk. Whenever there was sickness in the house they would be invited to offer prayers and make and redeem vows.

Second Elder-Brother's mother-in-law knew quite a few characters. She brought with her *Yü Li Ch'ao Chuan*, *Miao Chuang Wang Sutra* and other pious literature of this type, and often related to us such stories as Mu Lien's excursion into the Inferno to rescue his mother and how the Princess of the King of Miao Chuang (Kuan-yin) became a nun. I read all the books that she had brought, and also had occasion to witness enacted upon the stage the complete serialized

drama about *Lady Kuanyin Becoming a Nun*, and my little head was filled with the harrowing scenes of purgatory.

Later Third Elder-Brother contracted tuberculosis, and the several children he had begotten failed to live long. Great Aunt Hsing-wu took to the practice of offering prayers and repeating vows for Third Elder-Brother, sometimes going so far as to call in the Buddhist monks to conduct services at home for the departed spirits. Third Elder-Brother himself refused to take part in these rituals as to make his obeisance, and my Great Aunt would frequently summon me to substitute for Third Elder-Brother in kowtowing before the altar. Since I was a weak and sickly child myself, my mother would often ask Great Aunt to take me along in offering incense and praying before Buddha. Following the custom of our village, my mother also pledged me as a disciple to Kuanyin, the Goddess of Mercy, in the course of which I was given a Buddhist name consisting of two characters, one of which was "kuan" and the other I have already forgotten. In her compelling love for me, my mother never erased enjoining upon me the necessity of showing the greatest devotion in the worship of the Buddhist Gods. Every year when she walked me over the ten *li* distance on our way to my maternal grandmother's, she would make me pause and make obeisance at each and every temple and shrine along the way. One year when I was bothered at the same time with a stomach ailment and eye troubles she made a pledge for me that I should go to the Kuanyin shrine at Kut'angshan and there personally offer incense in redemption of the pledge. Afterwards, when I recovered, she herself together with Great Aunt took me on this pilgrimage to Kut'angshan. The mountain roads were extremely rugged and her feet had perennially caused her pain, but for the sake of her son she made the pilgrimage up the mountain on foot. Ascending every few steps she would sit down and rest her feet, but never once did she complain. Naturally, at the time I also worshipped with her with great devotion.

My mother was eager that I should study hard and make a name for myself; accordingly she never neglected to remind me to worship

Confucius. In Master Yü-Ch'en's school-house there was hanging on the wall a lithographic print in vermilion of Wu Tao-tze's portrait of Confucius to which the pupils would bow and make obeisance each evening before school was out. Once, visiting my Eldest Sister's to wish them a Happy New Year, I found a Confucian shrine erected by my nephew Cheng Yen-hsiang (who was, however, a few years older than myself). It was made out of a large cardboard box, with the name tablet cut out of red paper and a match-box sacrificial table, on which were pasted gold-foil cutouts of incense-burners, candlesticks and various sacrificial offerings; outside of the shrine were also pasted many strips of red and gold paper simulating the tablets and scrolls of the Holy Temple, with such wording as "Virtue matching heaven and earth; Truth unparalleled past and present." This little shrine filled me with envy, and returning home I proceeded to build myself a miniature Confucian temple. I found a container for "bird's nest" which I used as the main hall of the temple; a space was cut out in the middle of the box where I pasted a small herb-box to serve as the inner hall, with its sacrificial table, holy tablet, incense-burner, candlesticks, and such other paraphernalia. At the two wings of the temple I added my own innovations consisting of smaller shrines to the disciples of the Great Sage like Yen Yüan and Tze-lu, each with its own sacrificial table. Then I borrowed a *Classified Manual for Parallel Scrolls*, from which I copied many specimens of phraseology used to adorn Confucian temples; and these I had Uncle Chin-jen write out for me on strips of gold- and silver-foil and pasted where they were supposed to be. All in all, much time and thought was put into the construction of this replica of a Confucian temple. My mother was greatly delighted with this display of reverence for Master K'ung. She gave me a small table to be used exclusively as an altar for this shrine, also a brass incense-burner to be placed before it, and every first and fifteenth of the month she would instruct me to offer incense and prayers.

This miniature Confucian temple, thanks to my mother's

fastidious care, was still preserved intact when I was twenty-seven and already returned from abroad. Not so my religious faith, which had long since been shattered. For by the time I was eleven or twelve I had already become an agnostic.

2

It happened one day when I was reviewing the Philosopher Chu Hsi's *Hsiao Hsüeh*, wherein I came upon a passage from Ssuma Kuang's family credo with the following comments on the existence of purgatory:

When the body has decayed and disappeared, the spirit also scatters into thin air; wherefore, given all the fires and tortures of the nether world, there is nowhere that they could be applied. ...

Re-reading these words, suddenly I leapt up for joy. Though the harrowing scenes of purgatory from such books as *Mu Lien's Salvation of His Mother* and *Yü Li Ch'ao Chuan* re-appeared before my eyes, I no longer felt any fear. I also ceased to be afraid of the various atrocities pictured in the exhibits of Yenlo, the King of Hell, and of the Eighteen Purgatories which the Buddhist monks displayed on their altars when they conducted prayer-meetings in sinister scenes showing the sinners being impaled on three-pronged forks by the bull-headed and horse-faced minions of purgatory, to be shoved upon the sword hill or down pots of boiling oil or over the side of the Nevermore Bridge to be fed to ravenous dogs and poisonous snakes. Over and over again I read aloud to myself these words of utter reason: "When the body has decayed and disappeared, the spirit also scatters into thin air; wherefore, given all the fires and tortures of the nether world, there is nowhere that they could be applied." I was so delighted in my heart at this discovery that I felt as though the Buddha of Hell had opened wide the gates of salvation with one wave of his magic wand.

I am no longer quite sure about the year in which this incident took place; it was probably when I was eleven. At that time I was already able to read the ancient classics by myself. Among the books Master Yü-Ch'en had me study was *Kang Chien Yi Chih Lu*, which he substituted later with the *T'ung Chien Chi Lan with Imperial Commentaries*. The *Yi Chih Lu* was punctuated, so it was not difficult for me to read; with the *T'ung Chien Chi Lan*, however, I had to plod along at a slow pace, doing my own punctuation with a vermilion brush. On one of the occasions that Second Elder-Brother returned from Shanghai, he saw me poring over the latter text and expressed his disapproval of it; he suggested to Master Yü-Ch'en that it would be better if I were to study *Tzu Chih T'ung Chien* (The Mirror of History) by Ssuma Kuang in the 11th century. And so I punctuated and read my way through this classic of Chinese history. That was the first step which I took in my life in the study of Chinese history. It was not long before I was very fond of history books of this type. Having found it difficult to remember all the names given to the different imperial reigns in China's dynastic history, I conceived the idea of composing a "The Imperial Reign-names in Rhymes" to aid in memorization. Encouraged by Uncle Chin-jen in this task, I actually made a start at composing such a historical rhyme in seven-character lines. The manuscript has long since been lost and I no longer remember how many dynasties I did cover in this ambitious project. I record it here as marking my earliest effort at "historical research," something that was to take up a goodly portion of my later life. No one would have thought, however, that the study of Ssuma Kuang's *The Mirror of History* should result in a profound effect on my religious faith, to wit, in the making of me as an agnostic.

In Book CIIIVI of *The Mirror of History* I found a record of opposition to Buddhism by one Fan Chen (who lived during the era of Ch'i and Liang, and died circa A.D. 510). The passage reads as follows:

Fan Chen wrote an essay entitled "On the Destructibility of the Spirit,"

holding that "the body is what gives substance to the spirit; and spirit is what makes the body function. Spirit (soul) is to the body what the sharpness of a knife is to the knife itself. One never hears of a knife having gone with its sharpness still remaining, and how could one admit of the body having perished with spirit persisting?" The idea thus advanced created a furore in and outside of the Imperial Court, and though it was hotly contested none succeeded in proving his thesis to be wrong.

Having already encountered Ssuma Kuang's own ideas on purgatory, I found the above-quoted passage extremely lucid and reasonable. Ssuma Kuang taught me to disbelieve life in purgatory, and now Fan Chen enabled me to carry it a step further, onto the road of a regular unbeliever and atheist. Fan Chen's simple and homely example, likening the relationship between body and spirit to that which exists between the knife and its "sharpness," was just such a one as is capable of being grasped by a youthful mind in its first enlightenment. That is why the more I thought about it the more I was convinced by Fan Chen's reasoning. To think that a mere quotation in a history book on a theory of the nonexistence of the spirit was enough to banish out of my head the countless ghosts and goblins that had heretofore tenanted it! The fact is, from that day on I more or less developed into a man who does not believe in the supernatural.

Of course at the time I hardly knew that Fan Chen's essay "On the Destructibility of the Spirit" was collected in its entirety in *The Record of Liang* (Volume IVXIII), nor was I aware that many of the contemporary essays which attempted to refute his thesis were preserved in the *Hung Ming Chi*. But the mere passage of thirty-five characters which I read was enough to make a new man of me. Perhaps Ssuma Kuang was also influenced by Fan Chen, which was why he made the statement that "when the body has decayed and disappeared, the spirit also scatters into thin air"; perhaps, thankful to Fan Chen, he made it a point to insert the most brilliant passage from the essay "On the Destructibility of the Spirit" into his own immortal work of history. He would never have thought that, eight hundred

years later, the thirty-five characters that he quoted would inspire and awaken a boy of eleven or twelve, to the extent of altering the thinking of his entire life.

In *The Mirror of History* was also recorded Fan Chen's discussion with Hsiao Tze-liang, the Prince of Ching Ling, about the Buddhist theory of "Karma." This passage was also to exert a great influence on my mode of thinking, and I cite the original text as follows:

Tze-liang was a devoted admirer of Sakyamuni, and he frequently invited a galaxy of celebrated monks in conference on the Buddhist teachings. He was responsible for a vogue in that religion in a manner unparalleled anywhere south of the River, and sometimes he would personally attend to food and drinks for the ecclesiastics, which people regarded as unbecoming of his position as a Prince and Prime Minister.

Fan Chen had been well-known for his anti-Buddhist views. And Tze-liang said to him: "If you do not believe in karma, how can you explain the existence of the rich and the exalted, on the one hand, and the poor and lowly, on the other?" Said Fan: "Human existence is like the blossoms bursting forth alike from a tree; they are scattered with the wind, some fluttering down the window-shades and coming to rest on the verdant carpet, others, falling outside the fence or wall, ending in the filthy sewer. Your Highness is such as have come to rest on the verdant carpet, while your humble servant represents such as have fallen in the filthy sewer. They have indeed reached widely separated places, exalted or lowly, but I fail to see where karma—or, cause and effect—had to do with it?" Tze-liang was at a loss to refute this argument.

The substance of this discourse was also a mere figure of speech, but while I was reading it I could not help being struck by the clarity and force of reason of what Fan Chen said, which moved me to read it over and over again until I knew it by heart. Of course I was then not equipped to understand the underlying philosophical meaning of Fan Chen's teaching. What he advocated may be called a kind of "Accidentalism," with which he broke down the Buddhist teaching of the revolving wheel of *karma*. Ever since childhood I had had drummed into my head the Buddhist lesson of cause-and-effect and of reaping-what-you-sow, and had been mortally afraid that I would appear in the next incarnation as a pig or a dog. Now, in a flash, I was

made to see the truth in Fan Chen's parable against the idea of *karma*; I was extremely delighted and immediately became free. Fan Chen and Ssuma Kuang's theory of the destructibility of the soul taught me not to fear purgatory, and his argument against *karma* taught me not to fear reincarnation. I liked their theory because it taught me not to be afraid. And I believed in it, because it taught me not to be afraid.

3

Once my thinking had been thus emancipated, I found it no longer possible to worship the gods and the Buddha with the same devout faith. Before my mother, however, I dared not as yet advance any idea of my lack of faith. When she bade me attend the family temple for ancestral worship, or to offer incense and pledges before the gods, I would not dare refuse to go; though my heart was full of reluctance I was afraid to give her any inkling of it.

In the First Month in my thirteenth year I went to Eldest Sister's home for a New Year's visit and stayed for several days, until the morning of the Fifteenth when I brought my nephew Yen-hsiang home to observe the lantern festival. We were accompanied by one of their farmhands, following us with a load of New Year's cakes and other seasonal goodies.

On our way we stopped at my maternal grandmother's home in Middle Village to rest up and partake of some refreshments before resuming our journey. On the outskirts of the village there stood a shrine called Three-Gate Pavilion in which were ensconced several idols. Stepping into the pavilion, I pointed a finger at the idols and said to Yen-hsiang: "No one could see us now, how about tearing down these mud idols and throwing them into the out-house?"

This unexpected advocacy of overt iconoclasm left my nephew dumbfounded. Although he had had occasion to hear me expound my new-found agnosticism, he never dreamed that I would suggest practicing it then and there by destroying the deities in that wayside

shrine. His servant hastily tried to dissuade me by saying, "Oh, Uncle Mên, it won't do to offend the gods!" These words immediately aroused my displeasure, whereupon I perversely looked about for something with which to stone the idols. Some villagers happened on the scene at this moment, and Yen-hsiang and his man seized the opportunity and induced me to resume our journey.

Arriving home, my mother had boiled some noodles for us, but before I swallowed a few mouthfuls the noise of drums and gongs was heard out in the street and we laid down our noodles in our hurry to go and watch the lion dance. In the course of the day more guests arrived at our home to see the lantern parade and, with the grown-ups preoccupied with company, none paid any attention to the fact that I had gone practically without any lunch. As I stayed outdoors for the festivities the rest of the day in company of our visitors, I forgot my hunger. At dinner, where we entertained the guests, I also gulped down a cup or two of hot gin, and the liquor on my empty stomach felt a little funny. After dinner I again dashed outside and a gust of wind left me a little drunk. "Moon, moon, come down and watch the lanterns!" I shouted somewhat under the influence of liquor, and the neighboring children echoed me, shouting, "Moon, moon, come down and watch the lanterns!"

The children's outcries were heard inside, and my mother sent for me to go home. I ran away feeling vaguely guilty, and the more the messenger came after me the faster I went. Someone told my mother that they thought I was drunk because I had partaken of the hot gin at dinner-table. When my mother came out herself after me I was already being returned captive. I was now really a bit drunk from the chase, and I put up a stiff resistance, refusing to go indoors. My mother put her arms around me, but I kept up my noisy invitation for the moon to come down and watch the lantern parade. By this time a crowd had gathered around us, which acted as a stimulating effect on my incoherent outpourings. Mother dragged me into her room, followed by the onlookers who crowded in after her.

At this point the Chang's handyman who had accompanied us home came up to my mother and whispered to her ears: "Granny (he addressed my mother in the way that my nephew would), guess it be not the wine what's wrong with Uncle Mên tonight? We were coming out of Middle Village today and passing by Three-Gate Pavilion, and Uncle Mên would tear down the gods and toss them into the out-house. Guess, the way he is carrying on tonight, it be the gods feel offended and send down to chastise him."

These words, mumbled to my mother, were caught by my ears as I was cuddled there in her arms. I was, truth to tell, getting scared by the minute that mother would punish me for getting drunk; and the man's words gave me a brilliant idea. "Mother is sure to give me a beating by raising cane," I reasoned, "but if it were the gods who were causing all this mischief mother would not blame the gods." With this stratagem in mind, I proceeded more than ever to make a racket, mouthing a lot of wild talk, as though ghosts and goblins had actually got me!

My mother became worried and questioned Yen-hsiang about it, who confirmed the fact that during the day I did offend the gods. Mother immediately turned me over to the custody of someone else, while she washed her hands and burned a few sticks of incense, praying to the imaginary presence of the gods of the Three-Gate Pavilion to the effect that, in his youthful ignorance, her son had inadvertently trespassed on the gods; that the gods, in their infinite generosity, would forgive the sins of a mere child and not hold them against him; and finally the pledge to make a special trip to Three-Gate Pavilion on another day to offer incense and prayers in atonement.

By this time the neighbors all came around to watch me as some kind of a spectacle and the room was crammed with people, some of the womenfolk carrying their earthen hand-stoves with them making the room warmer and stuffier by the minute. My face was beginning to flush a deep scarlet, looking for all the world like a man possessed.

Suddenly, word was passed from outside the front-gate, saying, "The Dragon lantern is coming! The Dragon lantern is coming!" Men and women, old and young, made a rush for the door, in their hurry to take up positions at the cross-roads to watch the lantern parade. In an instant the roomful of people had dispersed, leaving only mother and me. The warm stuffiness of the room soon disappeared while I, thoroughly fatigued, dozed off to sleep.

The pledge which mother made with the gods seemed to have worked wonders. The next day, she gave me a lecture, admonishing me against shooting off my mouth especially in the presence of the gods. Much to my rejoicing, she neglected to punish me; what I did not know was that my real punishment would not come until a month afterward.

In another month, mother took me to visit my maternal grandmother in Middle Village. She spent some money to provide a sacrificial offering at grandmother's house, complete with a pig's head, incense, candles, and tin-foil money; at the same time she asked my maternal uncle to take me to Three-Gate Pavilion where I should offer thanks to the gods and redeem her vow. My maternal uncle was a devout believer; with the utmost gravity and reverence he arranged our offerings on the altar, lit up the incense and candles, and bade me kneel down and kowtow with him in thankfulness to the gods. I did all I could do to keep from laughing, but managed gravely to go through the ritual—in my heart I knew that I had myself to blame for not having thought of this form of punishment which was even more humiliating than a beating!

It was not until I reached the age of twenty-seven (25), when I returned home as a student from America, that I summoned up enough courage to own to my mother that it had not been the gods of Three-Gate Pavilion but only I myself who had possessed me and created all that turmoil on the night of the Lantern Festival so many years ago. Mother laughed when she heard this belated truth about it.

貳 从拜神到无神

—

纷纷歌舞赛蛇虫，
酒醴牲牢告洁丰。
果有神灵来护佑，
天寒何故不临工？

这是我父亲在郑州办河工时（光绪十四年，一八八八）做的十首《郑工合龙纪事诗》的一首。他自己有注道：

霜雪既降，凡俗所谓“大王”、“将军”化身临工者，皆绝迹不复见矣。

“大王”“将军”都是祀典里的河神；河工区域内的水蛇虾蟆往往被认为大王或将军的化身，往往享受最隆重的祠祭礼拜。河工是何等大事，而国家的治河官吏不能不向水蛇虾蟆磕头乞怜，真是一个民族的最大耻辱。我父亲这首诗不但公然指斥这种迷信，并且用了一个很浅近的证据，证明这种迷信的荒诞可笑。这一点最可表现我父亲的思想的倾向。

我父亲不曾受过近世自然科学的洗礼，但他很受了程颐朱熹一系的理学的影响。理学家因袭了古代的自然主义的宇宙观，用“气”和“理”两个基本观念来解释宇宙，敢说“天即理也”，“鬼神者，二气（阴阳）之良能也”。这种思想，虽有不彻底的地方，很可以破除不少的迷信。况且程朱一系极力提倡“格物穷理”，教人“即物而穷其理”，这就是近世科学的态度。我父亲作的《原学》，开端便说：

天地氤氲，万物化生。

这是采纳了理学家的自然主义的宇宙观。他作的《学为人诗》的结论是：

为人之道，非有他术：

穷理致知，反躬践实，
黽勉于学，守道勿失。

这是接受了程朱一系格物穷理的治学态度。

这些话都是我四五岁时就念熟了的。先生怎样讲解，我记不得了；我当时大概完全不懂得这些话的意义。我父亲死的太早，我离开他时，还只是三岁小孩，所以我完全不曾受着他的思想的直接影响。他留给我的，大概有两方面：一方面是遗传，因为我是“我父亲的儿子”。一方面是他留下了一点程朱理学的遗风；我小时跟着四叔念朱子的《小学》，就是理学的遗风；四叔家和我家的大门上都贴着“僧道无缘”的条子，也就是理学家庭的一个招牌。

我记得我家新屋大门上的“僧道无缘”条子，从大红色褪到粉红，又渐渐变成了淡白色，后来竟完全剥落了。我家中的女眷都是深信神佛的。我父亲死后，四叔又上任做学官去了，家中的女眷就自由拜神佛了。女眷的宗教领袖是星五伯娘，她到了晚年，吃了长斋，拜佛念经，四叔和三哥（是她过继的孙子）都不能劝阻她，后来又添上了二哥的丈母，也是吃长斋念佛的，她常来我家中住。这两位老太婆做了好朋友，常劝诱家中的几房女眷信佛。家中人有病痛，往往请她们念经许愿还愿。

二哥的丈母颇认得字，带来了《玉历钞传》，《妙庄王经》一类的善书，常给我们讲说目连救母游地府、妙庄王的公主（观音）出家修行等等故事。我把她带来的书都看了，又在戏台上看了《观音娘娘出家》全本连台戏，所以脑子里装满了地狱的惨酷景象。

后来三哥得了肺病，生了几个孩子都不曾养大。星五伯娘常为三哥拜神佛，许愿，甚至于招集和尚在家中放焰口超度冤魂。三哥自己不肯参加行礼，伯娘常叫我去代替三哥跪拜行礼。我自己幼年身体也很虚弱，多病痛，所以我母亲也常请伯娘带我去烧香拜佛。依家乡的风俗，我母亲也曾把我许在观音菩萨座下做弟子，还给我取了一个佛名，上一字是个“观”字，下一字我忘了。我母亲爱我心切，时时教我拜佛拜神总须诚心敬礼。每年她同我上外婆家去，十里路上所过庙宇路亭，凡有神佛之处，她总教我拜揖。有一年我害肚痛，眼睛里又起翳，她代我许愿：病好之后亲自到古塘山观音菩萨座前烧香还愿。后来我病好了，她亲自跟伯娘带了我朝拜古塘山。山路很难走，她的脚是终年疼的，但

她为了儿子，步行朝山，上山时走几步便须坐下歇息，却总不说一声苦痛。我这时候自然也是很诚心的跟着她们礼拜。

我母亲盼望我读书成名，所以常常叮嘱我每天要拜孔夫子。禹臣先生学堂壁上挂着一幅朱印石刻的吴道子画的孔子像，我们每晚放学时总得对他拜一个揖。我到大姊家去拜年，看见了外甥章砚香（比我大几岁）供着一个孔夫子神龛，是用大纸匣子做的，用红纸剪的神位，用火柴盒子做的祭桌，桌子上贴着金纸剪的香炉烛台和供献，神龛外边贴着许多红纸金纸的圣庙匾额对联，写着“德配天地，道冠古今”一类的句子。我看了这神龛，心里好生羡慕，回到家里，也造了一座小圣庙。我在家中寻到了一只燕窝匣子，做了圣庙大庭；又把匣子中间挖空一方块，用一只午时茶小匣子糊上去，做了圣庙的内堂，堂上也设了祭桌，神位，香炉，烛台等等。我在两厢又添设了颜渊子路一班圣门弟子的神位，也都有小祭桌。我借得了一部《联语类编》，抄出了许多圣庙联匾句子，都用金银锡箔做成匾对，请近仁叔写了贴上。这一座孔庙很费了我不少的心思。我母亲见我这样敬礼孔夫子，她十分高兴，给我一张小桌子专供这神龛，并且给我一个铜香炉；每逢初一和十五，她总教我焚香敬礼。

这座小圣庙，因为我母亲的加意保存，到我二十七岁从外国回家时，还不曾毁坏。但我的宗教虔诚却早已摧毁破坏了。我在十一二岁时便已变成了一个无神论者。

二

有一天，我正在温习朱子的《小学》，念到了一段司马温公的家训，其中有论地狱的话，说：

形既朽灭，神亦飘散，虽有剉烧舂磨，亦无所施。……

我重读了这几句话，忽然高兴的直跳起来。《目连救母》，《玉历钞传》等书里的地狱惨状，都呈现在我眼前，但我觉得都不怕了。放焰口的和尚陈设在祭坛上的十殿阎王的画像，和十八层地狱的种种牛头马面用钢叉把罪人叉上刀山，叉下油锅，抛下奈何桥去喂饿狗毒蛇，——这种种惨状也都呈现在我眼前，但我现在觉得都不怕了。我再三念这句

话：“形既朽灭，神亦飘散，虽有剉烧舂磨，亦无所施。”我心里很高兴，真像地藏王菩萨把锡杖一指，打开地狱门了。

这件事我记不清在那一年了，大概在十一岁时。这时候，我已能够自己看古文书了。禹臣先生教我看《纲鉴易知录》，后来又教我改看《御批通鉴辑览》。《易知录》有句读，故我不觉吃力。《通鉴辑览》须我自己用朱笔点读，故读的很迟缓。有一次二哥从上海回来，见我看《御批通鉴辑览》，他不赞成；他对禹臣先生说，不如看《资治通鉴》。于是我就点读《资治通鉴》了。这是我研究中国史的第一步。我不久便很喜欢这一类历史书，并且感觉朝代帝王年号的难记，就想编一部“历代帝王年号歌诀”！近仁叔很鼓励我做此事，我真动手编这部七字句的历史歌诀了。此稿已遗失了，我已不记得这件野心工作编到了那一朝代。但这也可算是我的“整理国故”的破土工作。可是谁也想不到司马光的《资治通鉴》竟会大大的影响我的宗教信仰，竟会使我变成一个无神论者。

有一天，我读到《资治通鉴》第一百三十六卷，中有一段记范缜（齐梁时代人，死时约在西历五一〇年）反对佛教的故事，说：

缜著《神灭论》，以为“形者神之质，神者形之用也。神之于形，犹利之于刀。未闻刀没而利存，岂容形亡而神在哉？”此论出，朝野喧哗，难之，终不能屈。

我先已读司马光论地狱的话了，所以我读了这一段议论，觉得非常明白，非常有理。司马光的话教我不信地狱，范缜的话使我更进一步，就走上了无鬼神的路。范缜用了一个譬喻，说形和神的关系就像刀子和刀口的锋利一样；没有刀子，便没有刀子的“快”了；那么，没有形体，还能有神魂吗？这个譬喻是很浅显的，恰恰合一个初开知识的小孩子的程度，所以我越想越觉得范缜说的有道理。司马光引了这三十五个字的“神灭论”，居然把我脑子里的无数鬼神都赶跑了。从此以后，我不知不觉的成了一个无鬼无神的人。

我那时并不知道范缜的《神灭论》全文载在《梁书》（卷四八）里，也不知道当时许多人驳他的文章保存在《弘明集》里。我只读了这三十五个字，就换了一个人。大概司马光也受了范缜的影响，所以有“形既朽灭，神亦飘散”的议论；大概他感谢范缜，故他编《通鉴》时，硬把

《神灭论》摘了最精彩的一段，插入他的不朽的历史里。他决想不到，八百年后这三十五个字竟感悟了一个十一二岁的小孩子，竟影响了他一生的思想。

《通鉴》又记述范缜和竟陵王萧子良讨论“因果”的事，这一段在我的思想上也发生了很大的影响。原文如下：

子良笃好释氏，招致名僧，讲论佛法。道俗之盛，江左未有。或亲为众僧赋食行水，世颇以为失宰相体。

范缜盛称无佛。子良曰，“君不信因果，何得有富贵贫贱？”缜曰，“人生如树花同发，随风而散，或拂帘幌，坠茵席之上；或关篱墙，落粪溷之中。坠茵席者，殿下是也。落粪溷者，下官是也。贵贱虽复殊途，因果竟在何处？”子良无以难。

这一段议论也只是一个譬喻，但我当时读了只觉得他说的明白有理，就熟读了记在心里。我当时实在还不能了解范缜的议论的哲学意义。他主张一种“偶然论”，用来破坏佛教的果报轮回说。我小时听惯了佛家果报轮回的教训，最怕来世变猪变狗，忽然看见了范缜不信因果的譬喻，我心里非常高兴，胆子就大的多了。他和司马光的神灭论教我不怕地狱；他的无因果论教我不怕轮回。我喜欢他们的话，因为他们教我不怕。我信服他们的话，因为他们教我不怕。

三

我的思想经过了这回解放之后，就不能虔诚拜神拜佛了。但在我在我母亲面前，还不敢公然说不信鬼神的议论。她叫我上分祠里去拜祖宗，或去烧香还愿，我总不敢不去，满心里的不愿意，我终不敢让她知道。

我十三岁的正月里，我到大姊家去拜年，住了几天，到十五日早晨，才和外甥砚香同回我家去看灯。他家的一个长工挑着新年糕饼等物事，跟着我们走。

半路上到了中屯外婆家，我们进去歇脚，吃了点心，又继续前进。中屯村口有个三门亭，供着几个神像。我们走进亭子，我指着神像对砚香说，“这里没有人看见，我们来把这几个烂泥菩萨拆下来抛到毛厕里去，好吗？”

这样突然主张毁坏神像，把我的外甥吓住了。他虽然听我说过无鬼无神的话，却不曾想到我会在这路亭里提议实行捣毁神像。他的长工忙劝阻我道：“糜舅，菩萨是不好得罪的。”我听了这话，更不高兴，偏要拾石子去掷神像。恰好村子里有人下来了，硯香和那长工就把我劝走了。

我们到了我家中，我母亲煮面给我们吃，我刚吃了几筷子，听见门外锣鼓响，便放下面，跑出去看舞狮子了。这一天来看灯的客多，家中人都忙着照料客人，谁也不来管我吃了多少面。我陪着客人出去玩，也就忘了肚子饿了。晚上陪客人吃饭，我也喝了一两杯烧酒。酒到了饿肚子里，有点作怪。晚饭后，我跑出大门外，被风一吹，我有点醉了，便喊道：“月亮，月亮，下来看灯！”别人家的孩子也跟着喊，“月亮，月亮，下来看灯！”

门外的喊声被屋里人听见了，我母亲叫人来唤我回去。我怕她责怪，就跑出去了。来人追上去，我跑的更快。有人对我母亲说，我今晚上喝了烧酒，怕是醉了。我母亲自己出来唤我，这时候我已被人追回来了。但跑多了，我真有点醉了，就和他们抵抗，不肯回家。母亲抱住我，我仍喊着要月亮下来看灯。许多人围拢来看，我仗着人多，嘴里仍旧乱喊。母亲把我拖进房里，一群人拥进房来看。

这时候，那位跟我们来的章家长工走到我母亲身边，低低的说：“外婆（他跟着我的外甥称呼），糜舅今夜怕不是吃醉了罢？今天我们从中屯出来，路过三门亭，糜舅要把那几个菩萨拖下来丢到毛厕里去。他今夜嘴里乱说话，怕是得罪了神道，神道怪下来了。”

这几句话，他低低的说，我靠在母亲怀里，全听见了。我心里正怕喝醉了酒，母亲要责罚我；现在我听了长工的话，忽然想出了一条妙计。我想：“我胡闹，母亲要打我；菩萨胡闹，她不会责怪菩萨。”于是我就闹的更凶，说了许多疯话，好像真有鬼神附在我身上一样！

我母亲着急了，叫硯香来问，硯香也说我日里的确得罪了神道。母亲就叫别人来抱住我，她自己去洗手焚香，向空中祷告三门亭的神道，说我年小无知，触犯了神道，但求神道宽洪大量，不计较小孩子的罪过，宽恕了我。我们将来一定亲到三门亭去烧香还愿。

这时候，邻舍都来看我，挤满了一屋子的人，有些妇女还提着“火筒”（徽州人冬天用瓦炉装炭火，外面用篾丝作篮子，可以随身携带，名为火筒），房间里闷热的很。我热的脸都红了，真有点像醉人。

忽然门外有人来报信，说，“龙灯来了，龙灯来了！”男男女女都往外跑，都想赶到十字街口去等候看灯。一会儿，一屋子的人都散完了，只剩下我和母亲两个人。房里的闷热也消除了，我也疲倦了，就不知不觉的睡着了。

母亲许的愿好像是灵应了。第二天，她教训了我一场，说我不应该瞎说，更不应该在神道面前瞎说。但她不曾责罚我，我心里高兴，万想不到我的责罚却在一个月之后。

过了一个月，母亲同我上中屯外婆家去。她拿出钱来，在外婆家办了猪头供献，备了香烛纸钱，她请我母舅领我到三门亭里去谢神还愿。我母舅是个虔诚的人，他恭恭敬敬的摆好供献，点起香烛，陪着我跪拜谢神。我忍住笑，恭恭敬敬的行了礼，——心里只怪我自己当日扯谎时不曾想到这样比挨打还更难为情的责罚！

直到我二十七岁回家时，我才敢对母亲说那一年元宵节附在我身上胡闹的不是三门亭的神道，只是我自己。母亲也笑了。

十九，十二，廿五，在北京。

III SCHOOLDAYS IN SHANGHAI

①

In the 甲辰 year of the reign of Emperor Kuanghsu (1904), Third Elder-Brother had reached a critical stage in his consumption. He decided to go to Shanghai for medical treatment, and at the same time my mother made up her mind to send me with him to Shanghai to attend school. I was nominally fourteen at that time, but actually only little more than twelve years old. In the fourteen years following this separation from my mother I was to return home only three times, spending with her a total of not more than six months' time. I was the only one she had at home, but because she loved me so deeply and had such high hopes for me she managed to harden her heart in order to send me far away from home in pursuit of knowledge. At the time we parted she made believe that she was in high spirits and did not shed one drop of tear. And so I left home, with my face turned toward that unfathomable sea of humanity where I was to seek my own education and my own life—a lone child, armed only with a mother's love a wee bit of studiousness, and a budding tendency toward skepticism.

I was to live in Shanghai for the next six years (1904–1910), and was to go through four different schools (the Meich'i School, the Ch'eng Chung School, the Public School of China, and the New Public School of China). And this was to be the second phase of my life's story.

* * * * *

During my father's lifetime one of his most admired friends was Mr. Chang Huan-lun of Shanghai. Mr. Chang had been a pioneer in the promotion of the new education, having founded his own school,

called the Meich'i Academy, later changed to the Meich'i School. Both Second Elder-Brother and Third Elder-Brother had boarded at the Meich'i Academy, and so it followed that when I came to Shanghai I was enrolled at the Meich'i School. Only once did I get to see Mr. Chang Huan-lun, before his death shortly afterward. Nowadays, speaking of the history of modern education in China, few of us know of this pioneer in the field. Twenty-two years after his death, I had the opportunity to meet in Paris one of his old and best pupils, Mr. Chao Yi-ch'ou. Mr. Chao told me that he had been at the Meich'i Academy for a long period of time, had been a great admirer of Mr. Chang's character, and owed a profound debt of gratitude to this old educator for his inspiration. Mr. Chang's lifelong aim as a teacher, he added, had been embodied in his saying: "Whatever happens do not give yourself up as lost." As I sat there on the green lawn in the countryside of Paris listening to Mr. Chao's reminiscences, and reflecting upon the arduous life my host and his wife were even then leading with such undaunted spirit, the thought came to me: What salutary influence one inspiring word from a respected teacher could accomplish in shaping the life of a student! No one could say that Mr. Chang had nothing to show for a lifetime devoted to educating the young.

The curriculum of the Meich'i School was by no means complete, consisting only of the three subjects, Chinese, Mathematics and English. Classes were divided on the basis of one's attainments in Chinese, so that whatever your level in English and Mathematics you did not graduate until you reached the top class in Chinese. On the other hand, students with only elementary knowledge of English and Mathematics were graduated who had completed the course in Chinese. This may not have been the best possible system, but along with the unbalanced emphasis missionary schools were then placing on English, it was but a special characteristic of a period of cultural transition.

When I first arrived in Shanghai I was totally ignorant of the Shanghai dialect. The first day I was taken to school to be received by

Mr. Chang I was wearing a lined robe with blue facing, topped by a horse-jacket of maroon-colored worsted, the picture of a young yokel. At sight of me a large group of schoolchildren gathered around to gaze at the country bumpkin. Because I did not understand the dialect, nor had I yet been "broken in" in literary composition, I was temporarily enrolled in the fifth grade, almost the lowest in the school. The textbooks used in this class were three: namely, the *Elementary Reader* of the Wen Ming Book Company, the *Chinese-English First Steps* and the *Written Mathematics*.

To me, who had already studied a number of the ancient classics, this *Elementary Reader* was of course a pushover, so I had much time to concentrate on English and Mathematics. Six weeks went by this way, and on my forty-second day at school came the great opportunity. Perhaps Mr. Shen who instructed us in the *Elementary Reader* also found it too elementary to tax his ability; anyway he had hardly expected to be corrected in his interpretation of the text by one of these young kids in his charge. It happened that day we came upon the following quotation in the lesson on which he was lecturing:

As the *Chronicles* (chuan) says, when two men are of one heart their strength is more invincible than gold; and when two men speak with one voice its fragrance is as that of the orchid.

Our teacher commented offhandedly that these words were quoted from *Tso Chuan* (*Tso's Chronicles*). As I could already manage at that time a few broken words in the Shanghai dialect, I waited until the class was dismissed before approaching his desk with the reader and murmured to him that the *Chronicles* referred to was not *Tso's Chronicles*, but "Hsi Tz'u Chuan" in *The Classic of Changes* (I Ching). Master Shen, blushing, asked me in the Shanghai dialect, "Have you studied *The Classic of Changes*?" When I replied in the affirmative, he further questioned, "Have you studied any other of the classics?" I told him that I had studied *The Classic of Poetry* (Shih Ching), *The Classic of*

History (Shu Ching), and *The Record of Rites*(Li Chi). He then asked if I had ever tried my hand at literary composition, to which I answered no. He said, "Let me give you a topic and see if you can write me a theme." The topic that he gave me consisted of the three characters, "On Filial Piety"; I returned to my seat and managed haltingly to write a composition of a hundred-odd characters around it; this I handed in to the teacher. Having looked it over, he turned and said: "Will you follow me?" I packed my books and followed him downstairs to the front hall, which opened east to the top class and west to the second grade. Master Shen led the way to the Second Grade classroom and spoke a few words to the teacher in charge, Master Ku. It was not until the latter instructed me to sit at a vacant desk in the last row that I realized that I had skipped four grades in one day and had now been promoted to be a Second Grade scholar.

But my rejoicing proved to be short-lived, for when I looked up again there was a worrisome problem staring me in the face. It was a Thursday, the scheduled day for Composition, and the two topics chalked on the blackboard were:

Essay theme: How Japan Came to be a Powerful Nation.

Classics theme: The ancients maintained their defenses in order to resist aggression whilst today defenses are maintained as an instrument of oppression.

The latter I dismissed as out of the question, for I had never been taught how to expound a "classics theme." As to the other, I had only the faintest notion in which corner of the earth Japan was located. Where would I begin, I asked myself, to discuss how Japan became a powerful nation? I neither dared ask the teacher any questions, nor did I knew anyone in that class to consult, and I began in my heart to blame Master Shen for his over-hastiness in giving me that quick and dizzy promotion.

At that moment an attendant at the school entered the classroom and handed a note to the teacher with a few words of explanation.

After a look at the note, the teacher turned to me and said that I was urgently wanted at home on an emergency and that someone was here to fetch me. The composition exercise I could complete at home to be handed in on the following Thursday. This came in the nick of time to relieve my nervousness and, after copying down the topics for the theme, I made a hasty exit and bolted to the janitor's house. There I was told that my Third Elder-Brother was dying and that Second Elder-Brother was still away in Hankow. In desperation, the manager of our store (our family in those years owned the Kung Yi Oil Station in the South City of Shanghai) had sent for me to go home.

When I arrived at the store, Third Elder-Brother was still able to speak. But in another few hours he died; he died with his head resting against my wrist. On the third day following, Second Elder-Brother rushed back from Hankow. After the funeral was over I told Second Elder-Brother about my promotion at school, ending by asking what reference books he could recommend for writing a theme on the subject of Japan becoming a strong nation. Second Elder-Brother sorted out a big stack of books including *Thirty Years of the Meiji Restoration* and the bound volumes of the *Hsin Min Ts'ung Pao* (The New Race Miscellany) and the like, which he stuffed into a basket and bade me take back to school to scan for material. I spent a good many days on this job before I managed to piece together an essay to fulfil my assignment. Before long I had learned also how to write on a "classics theme." In another few months, lo and behold! I became a member of the top class; still, in English, I had not finished studying the *Chinese-English First Steps*, and in Mathematics had only gone as far as the "Computation of Interest."

It was in that year that the Meich'i Academy was changed into the Meich'i School, and the first graduating class was scheduled to receive their diplomas at the end of the year. We had heard that the school planned to send four of the students—Chang Tsai-cheng, Wang Yen, Cheng Chang and myself—to take the official examination to be given by the County of Shanghai *yamen*. Along with Wang and Cheng, I did

not feel like taking that examination, and long before the date scheduled for the examination we chose to leave school.

Why were we unwilling to submit ourselves to the official examination of the County of Shanghai? During that year we had all been undergoing a kind of radical transformation in thought, and had come to regard ourselves as "modern personages." In the basketful of "modern books" which Second Elder-Brother gave me I found many works by Liang Ch'i-ch'ao and his group. That was an era in which Liang's writings exerted the greatest influence, and though he did not call for a national revolution in so many words he had sown not a few seeds of revolution in the minds of the young. One day my schoolmate Wang Yen showed us a book entitled *The Revolutionary Army* by Tsou Yung which he had borrowed; we passed it around among us and were all greatly inspired by its contents. Since the book had to be returned, we took turns making a copy of it by hand; we would wait until at night, after the dormitory proctor had made his rounds, and then get up stealthily to copy this work by candlelight. Can you imagine a group of young men whose imagination had been fired by a book like *The Revolutionary Army* submit themselves to examination by an official agency of the Manchu Court?

It was the first year of the Russo-Japanese War. The Shanghai newspapers were full of detailed reports of the war, and those of us young students who followed the papers experienced a feeling of the utmost exhilaration. Public opinion and popular psychology in China at the time were all sympathetic with Japan and held Russia in bitter hatred, which in turn was directed at the Manchu Government for its declaration of neutrality. Animosity for Russia furthered our anti-Manchu feeling to a considerable extent. In that year also there occurred in Shanghai several incidents which had the effect of arousing public sentiment. One was an attempt made by a revolutionary named Wan Fu-hua in the International Settlement to assassinate the former Governor of Kwangsi, Wang Chih-ch'un, who had been one of the pro-Russian clique. Another was the case of Chou

Sheng-yu, a carpenter from Ningpo, who was killed by a Russian sailor on the Bund without provocation. These two incidents were given much prominence in the Shanghai papers, especially the newly-published *Shih Pao*, which daily cried out for justice for Chou and denounced the Shanghai authorities in short and deeply-moving editorials. There was not one among us who was not stirred by these short commentaries when we first came upon them. The adjudication of the Chou Sheng-yu case left a large number of people disappointed; the three of us, Wang Yen, Cheng Chang and myself, in utter disgust with the Shanghai *taot'ai* Yüan Hai-kuan, jointly wrote him a long letter of bitter condemnation. Although we took care not to sign our names to the letter, we felt after all that this made it more impossible to go and take his examination. The upshot of this episode was that the three of us took our leave of the Meich'i School. (I have since lost track of Wang Yen, a native of I'hsien; Cheng Chang, who was a native of Ch'aoyang, later changed his name to Chung-Ch'eng, graduated from Fuhtan College, and died soon afterward.)

2

My second school in Shanghai was the Ch'eng Chung School. This school was founded by the rich Ningpo merchant Yeh Ch'eng-chung, originally with the purpose of providing education for Ningpo youngsters of poor families; later, as it expanded, it became one of Shanghai's better-known private schools and the student enrollment was no longer confined to Ningpo people. The superintendent of the school at the time was Mr. Chang I-shan, and the dean Mr. Pai Cheng-min. Mr. Pai, a schoolmate of my Second Elder-Brother, happened to see my Meich'i compositions and advised me to enter the Ch'eng Chung School. And so in the 乙巳 year of Kuanghsu (1905) I enrolled myself in that institution.

There were altogether twelve classes at Ch'eng Chung, housed in two rows of classrooms, with the top class known as East Studio No. 1,

the second grade West Studio No. 1, and so on down to West Studio No. 6. The school system had not yet been carefully drawn up, and there was no distinction between middle school and primary school. By our present-day terminology, the first six grades may be regarded as forming the middle school, and the six lower grades the primary school. The curriculum at Ch'eng Chung was however more complete, offering such subjects as Physics, Chemistry, Biology and Drawing, in addition to Chinese, English and Mathematics. A student was classified roughly on the basis of his average level of attainment in all subjects, except that those who were too poor in English and Mathematics were debarred from the upper grades.

Because I had had only the most rudimentary training in these two subjects upon entrance at Ch'eng Chung, I was admitted into East Studio No. 3 (the fifth grade). In the second semester I was promoted to East Studio No. 2 (the third grade), and the following year (1906) to West Studio No. 1 (the second grade). Administration at the Ch'eng Chung School was very strict, with monthly tests and a regular examination at the end of each half-year. The results of these monthly tests and regular examinations were posted on the bulletin board, and prizes were awarded to the first three ranking students. Because I frequently came out first in the class, I got to be promoted four classes before one year was up. In my first year and a half, I made the most progress in English and Mathematics, and was greatly benefited by my teachers—Mr. Hsieh Ch'ang-hsi, Mr. Ch'en Shih-hao and Mr. Chang Ching-jen in English, and Mr. Yu Yao-ch'ing in Mathematics.

At this stage I developed a great interest in Mathematics; often after the dormitory lights were off I would get up from bed to do my math problems. As tables were not provided in our bedrooms, I devised a means whereby I placed a candle on the bedstead outside of the mosquito-net while I lay on my stomach inside the bedding and used the pillow to prop up my slate. As I was due to skip a class in the second semester, I had to make up on Algebra. I bought an Algebra textbook compiled by Mr. Ting Fu-pao and went through Elementary

Algebra by myself in one summer, and in the second semester I made the upper grade without a hitch.

I had to study so hard that I never had enough sleep, and it soon told on my health. At one time both of my ears were near deaf from these adverse effects, but eventually I managed to recover physically and my hearing was restored. Although I was weak and sickly when a child, ever since I left home I had grown stronger physically. I believe this was mainly due to the fact that in the two and a half years when I was at Meich'i and Ch'eng Chung I did not once miss the Physical Culture class. I never participated in competitive sports, but during the Physical Training hour I always put in a lot of energy doing the various forms of calisthenics .

Of the faculty members at Ch'eng Chung, Mr. Yang Ch'ien-li had on me the greatest influence. When I was in East Studio No. 3 he was serving as instructor in Chinese in West Studio No. 2, and the report was that he was a man of very modern thinking. When I went to see him he gave me a lot of encouragement and wrote on my composition book the four words: "*yen lun tzu yu*" (freedom of expression). When later I was advanced to East No. 2 and West No. 1, I had him at different times for my Chinese teacher. One day he asked the class to get Yen Fu's translation of Huxley's *On Natural Selection* (as edited and abridged by Wu Ju-lun) to use as a reader; that was the first time in my life that I read this work, and I was simply delighted. Master Yang was also very original in the themes he gave us for composition, and once the topic was: "Expound the idea underlying the law of natural selection and survival of the fittest." (The paper I wrote on this subject was dug up from the school's files of student themes a few years ago by the then principal Mr. Ts'ao Hsi-chüeh and the present principal Mr. Ke Tsu-lan, and it has been preserved at the school up to this day.) Of course we teenage boys could hardly do justice to this type of composition themes, but the fact that we were asked to study the theory of Evolution and to write compositions on "Natural Selection" is a good index to the trend of the times.

It was but a few years after the publication of Yen Fu's translation of *On Natural Selection*, but it enjoyed such nation-wide popularity that even middle-school students were using it as a text. Few of us who studied the book could understand the contribution Huxley had made to the development of science and thought. What we did understand was the significance of the formula, "survival of the fittest," as applied to international politics. Coming as it did after China's repeated defeat in the hands of the foreign powers and after the great national humiliation suffered as a result of the Boxer Rebellion and the War with Japan, this law of "natural selection and the survival of the fittest" indeed acted as a dose of the right medicine and a most potent stimulant to countless number of Chinese. Within a few years this idea had spread like wild fire, inflaming the hearts of the young men of the nation. Such phrases as "natural selection," "survival of the fittest," and "liquidation of the weak" in time became oft-quoted newspaper clichés and patriotic slogans. It was also the vogue with many people to use such expressions for naming themselves or their children. For instance, Ch'en Chiung-ming took for his name the two words *Ching-ts'un* (compete and survive). One of my schoolmates was named Sun Ching-ts'un (Compete-and-Survive Sun); another was called Yang T'ien-tse (Natural Selection Yang). My own name is also a relic of this vogue. The name which I used at school was Hu Hung-hsing. One morning at home I asked Second Elder-Brother to think up something for my courtesy name. Second Elder-Brother was at his morning toilet and while washing his face, he remarked: "Why don't you use the word *shih* from the phrase 'wu ching t'ien tsê shih chê shêng ts'un' (natural selection and survival of the fittest)?" I was delighted with the idea, and proceeded to style myself, "Shih-chih" (the suffix *chih* being used in the courtesy names of both my brothers: Shao-chih for Second Elder-Brother and Cheng-chih for Third Elder-Brother). Subsequently, in writing for publication I occasionally adopted the two words "Hu Shih" as a nom de plume, and it was not until I took the examination for a government scholarship

to study in America (1910) before I formally adopted "Hu Shih" as my personal name.

I was a year and a half at Ch'eng Chung and had read a number of extra-curricular books. 群己权界论 translated by Yen Fu seems to have been one of the things I read during this period. Mr. Yen's style was too archaic to be enjoyed by most young people, who did not come under as great an influence from him as from Liang Ch'i-ch'ao. With Mr. Liang's writings, however, a warm and deep enthusiasm shone through great lucidity and reason, making it impossible for the reader not to follow the way to which he pointed and go along with his thinking. Sometimes, it is truth, following him to a certain point, we were all in readiness to strike out further when all of a sudden he would halt his steps or change his direction. On such occasions, we could not help being a little disappointed, but this kind of disappointment was precisely the greatest blessing he could have bestowed. For he had done his best to usher us into a new realm, fully expecting that we would be dissatisfied and would wish to forge ahead on our own. We should of course be thankful for the opportunity of following in his footsteps; even more, should we be thankful that he had aroused our curiosity and had pointed out a whole unknown world for us to explore on our own.

I for one had benefited endlessly from Mr. Liang. Thinking back, I could see two respects in which his influence on me were the most marked. One was derived from his book *The Theory of a New Race* and the other his *The Historical Development of Chinese Thought*. Mr. Liang had styled himself "Citizen of a New Chinese Race," also "Son of a New Race," and the magazine he edited was called *Hsin Min Ts'ung Pao (The New Race Miscellany)*—all evidence that herein lies the main emphasis of his life work. The significance of his "New Race" was to transform the Chinese nation from an ancient, sickly race of people into a fresh and lively one. He wrote that:

No man can hope to live if he is shorn of his limbs and if his internal organs

are diseased, his muscles atrophied and his bloodstream has run dry; so it is that no nation can hope to survive if its people are universally ignorant, cowardly, weak, muddled and disorganized. ...Should there be a new race of people what need be there to worry about not having a new system, a new government, or a new nation!(Introduction, *The Theory of a New Race*)

His fundamental thesis was expressed thusly:

I have thought it over and over: in order to obtain the rule of the people in the China of today there is not one respect in which we do not need a thoroughgoing purge and catharsis, banishing the old and spreading the new. (*Toward a New Race*)

In an even more painfully moving vein, he said:

In that case, what is the road to salvation and progress? The answer is, we must take our millennia-old body politic, with all its dark arrogance, and pulverize it, so that the tens of thousands of wolves and jackals and locusts and worms that are our bureaucrats would be dislodged from their parent body, before there is hope of getting onto the road of progress! We must take our millennia-old thought in all its weakness, softness and rancidity and thoroughly cleanse and expose it, so that the millions of parrots and jelly-fish and trained seals that are our scholars may not back up our public enemies with their manipulation of words, before we can bring forth new light by which to actually accomplish progress! And to reach this goal there are two methods of approach: namely, a bloodless destruction, or a bloody destruction. ... I fervently pray that China may be capable of a bloodless destruction. And I would grieve as one bereaved should it turn out that there is no other way but for China to undergo a bloody destruction. ("On Progress," in *The Theory of a New Race*)

Reading this kind of writing in an age such as we had then, there was not one of us who was not thrilled and inspired. Liang's advocacy of reform in that period was the most radical, his attitude the most vivid, and his influence the most deeply inspiring and powerful. Without mincing any words, he advanced this revolutionary call to revolution:

There will be destruction if we destroy; there will be destruction even if we don't destroy! (Ibid.)

Although later he did not persist in this attitude, yet many of his young men had already charged over the top and would never suffer themselves to be called back.

The greatest contribution made in *The Theory of a New Race* was its exposure of the fact that the Chinese race lacked in many of the virtues of the Western races. Without standing on ceremony, Liang pronounced:

In a comparison of the five difference races, the white race is found to be the finest. Among the white races, the Teutonic race is the finest. And among the Teutonic peoples, the Anglo-Saxons are the finest.(Introduction, ibid.)

He pointed out that what as a people we were most lacking and most in need of acquiring was such qualities as public spirit, a national consciousness, spirit of adventure, a conception of rights, as well as freedom, self-rule, progress, dignity, cooperativeness, productivity, constancy, a sense of duty, also martial spirit, personal morality, and political acumen. In his ten or fifteen essays collected in this book, he showed himself as brimful of warm-blooded sincerity and infinite faith, marshaling countless number of historical evidences with a "pen that is dipped in feeling," weaving the kind of writing that is capable of moving you to shed a tear or to dance with joy. For instance, there was the essay "On Constancy" by which, upon a re-reading twenty-five years afterward, I still could not help being enthralled. How then could I escape falling under the spell of its charm when I first read it as such an impressionable age?

The essays contained in *The Theory of a New Race* opened up a new world for me, leaving me thoroughly convinced that there were highly developed peoples and cultures outside of the Chinese. *The Historical Development of Chinese Thought*, similarly, opened up a new world and enabled me to know that China has in her heritage other

schools of thought than what was represented in the Confucian classics. In his book, Liang divided the history of Chinese thought into seven periods:

- (1) The Embryonic Age—prior to the Spring and Autumn period.
- (2) The Golden Age—the last stages of the Spring and Autumn period and the period of the Warring Kingdoms.
- (3) The Age of Preeminence of the Confucian School—the two Han dynasties
- (4) The Age of Taoism—the Wei and Chin dynasties.
- (5) The Age of Buddhism—the South and North dynasties and the T'ang dynasty.
- (6) The Age of Synthesis of Buddhism and Confucianism—the Sung, Yuan and Ming dynasties.
- (7) The Period of Decline—the last two hundred and fifty years.

Looking at this scheme of division today, we may not find ourselves thoroughly in agreement. (Liang was later to revise his own opinion, and in his subsequent work, *Outline of Ch'ing Dynasty Thought*, had already discarded the view that the 250 years of contemporary history represented a period of decline.) But twenty-five years ago, his work represented the first attempt at research and organization of ancient Chinese philosophy from a historical viewpoint, the first systematic presentation of a "history of thought." That was what made me love to read this particular book. Unfortunately, after having published a few chapters Mr. Liang suddenly discontinued his work, leaving me gravely disappointed. Subsequently, I was overjoyed to see that the book was resumed in the pages of the *Hsin Min Ts'ung Pao*. But the latest installment still left me far from being satisfied. First of all, in discussing "The Golden Age," he had only written an Introduction of some tens of thousand words, leaving that part of it which was to be the "main thesis" (a presentation of the background of the various schools of philosophy together with an evaluation of the respective merits) entirely unwritten. On this section, subsequently he only supplied one chapter, that dealing with "The Philosophy of Mo-

tze," but never did come around to treating of the others. The main body of the chapter on "The Age of Buddhism" also remained unwritten. Thirdly, not one word was mentioned about the sixth period in his outline, that which covered the three dynasties, Sung, Yuan and Ming. So, of his projected history of the development of Chinese thought, three vitally important parts were missing, a circumstance which caused me to wait patiently for a good many years. In my disappointment, I suddenly found myself with a wild ambition; I thought: "What a glorious task it would be if I could some day fill the gap for Mr. Liang in this history of Chinese thought?" The more I thought of it the more excited I became; although I did not dare announce it to others, to myself I had resolved to accomplish this task.

It was this seed of ambition which later resulted in my writing *The History of Chinese Philosophy*. For from that time on I had paid particular attention in my study of the various philosophers of the classic Chou and Ch'in periods. My Second Elder-Brother had induced me to read the *Chin Ssu Lu (Record of Recent Thoughts)* of Chu-tze, which was the first work I was to study of the Rational School. At about the same time Liang Ch'i-ch'ao also published his *Te Yü Chien (A Mirror of Ethical Culture)* and the abridged edition of *Ming Ju Hsüeh An (Teachings of the Neo-Confucianists of the Ming Dynasty)*. These books led me to reading the works of the Rational School of Sung and Ming, though I read no more than *Ch'uan Hsi Lu* of Wang Shou-jen and the discourses of Ch'eng Yi and Chu Hsi collected in the *Cheng Yi T'ang Library*. In my second year at the Ch'eng Chung School, all the Studios proposed organizing a Student Self-Government Society. One day I made a speech before the society on the subject of "Human Nature." In my talk I refuted the Mencian view that human nature is born good; at the same time I expressed my disagreement with the theory that human nature is originally bad as advanced by Hsün-tze. I affirmed my belief in the correctness of Wang Yang-ming's view that human nature is "neither good nor bad, and capable of being either good or

bad." I was then in the midst of studying the English-language text known as *The Science Readers*, and had acquired a modicum of scientific knowledge, which I did not hesitate to apply in support of my arguments. Mencius has said:

Human nature is good in the same manner as water naturally flows downward. There is no human being that is not good, just as there is no water but traces its course downward.

Mencius was ignorant of science, I claimed, and he did not know that there is such a thing as water maintaining its own level; neither was he acquainted with the law of gravity. That "there is no water but traces its course downward" does not signify the downward nature of water, but rather the force of gravity that pulls it downward. In the same way that gravity causes a downward flow, a water tower built on a high elevation can cause water to ascend by means of water-pipes. There is no downward or upward nature inherent in water, which maintains its own level, but it is capable of flowing either up or down even as human nature is neither good nor bad but capable of being either good or bad.

My discourse on human nature was enthusiastically applauded by my schoolmates, much to my own gratification, for I fancied that I was truly applying the method of scientific evidence to the theories on human nature as advanced in the Kao-tze chapter in *Mencius* and in Wang Yang-ming's writings.

* * * * *

Although I was a student at Ch'eng Chung for not more than a year and a half all of my foundation in English and Mathematics was laid there. What was praiseworthy about Ch'eng Chung as an intermediate school was its strictness in school management and in its periodic examinations. Another good point was the attention given by those who ran the school to the scholastic progress and conduct of

each individual student. Although the dean, Mr. Pai Cheng-ming, did not teach any classes himself he was personally acquainted with each and every student, who was often summoned before him for interview. Because the results of all examinations were recorded in detail, it was easy for the school authorities to know every student and his capabilities. Thus, it was possible for the especially gifted to skip two classes at a time, as it was for the average ones to advance at the regular pace each half-year semester, and for the inferior ones to be denied promotion and kept behind for another half-year. This system and management is worthy of being emulated by the intermediate schools of today.

When I attained the status of monitor to West One, time and again I had occasion to come into conflict with the school authorities. Once I protested in vain to Dean Pai over the issue of one of the classmates having been dismissed. When, later, I sent him a long letter in further protest, Mr. Pai marked a major demerit against me and posted my name as a reprimand. Though knowing full well that Mr. Pai had my best interest at heart, I could not help feeling aggrieved at the time and made up my mind not to continue at Ch'eng Chung. It happened that by summertime the newly-established Public School of China was holding an entrance examination for new students, and I took it at the behest of some friends. Upon passing the entrance examination, I moved into the dormitories of the Public School at the end of the summer vacation (1906).

叁 在上海（一）

—

光绪甲辰年（一九〇四）的春天，三哥的肺病已到了很危险的时期，他决定到上海去医治。我母亲也决定叫我跟他到上海去上学。那时我名为十四岁，其实只有十二岁有零。这一次我和母亲分别之后，十四年之中，我只回家三次，和她在一块的时候还不满六个月。她只有我一个人，只因为爱我太深，望我太切，所以她硬起心肠，送我向远地去求学。临别的时候，她装出很高兴的样子，不曾掉一滴眼泪。我就这样出门去了，向那不可知的人海里去寻求我自己的教育和生活，——孤另另的一个小孩子，所有的防身之具只是一个慈母的爱，一点点用功的习惯，和一点点怀疑的倾向。

我在上海住了六年（一九〇四——一九一〇），换了四个学校（梅溪学堂，澄衷学堂，中国公学，中国新公学）。这是我一生的第二个段落。

* * * * *

我父亲生平最佩服一个朋友——上海张焕纶先生（字经甫）。张先生是提倡新教育最早的人，他自己办了一个梅溪书院，后来改为梅溪学堂。二哥三哥都在梅溪书院住过，所以我到了上海也就进了梅溪学堂。我只见过张焕纶先生一次，不久他就死了。现在谈中国教育史的人，很少能知道这一位新教育的老先锋了。他死了二十二年之后，我在巴黎见着赵诒璜先生（字颂南，无锡人），他是张先生的得意学生，他说他在梅溪书院很久，最佩服张先生的人格，受他的感化最深。他说，张先生教人的宗旨只是一句话：“千万不要仅仅做个自了汉。”我坐在巴黎乡间的草地上，听着赵先生谈话，想着赵先生夫妇的刻苦生活和奋斗精神，——这时候，我心里想：张先生的一句话影响了他的一个学生的一生，张先生的教育事业不算是失败。

梅溪学堂的课程是很不完备的，只有国文，算学，英文三项。分班

的标准是国文程度。英文算学的程度虽好，国文不到头班，仍不能毕业。国文到了头班，英文算学还很幼稚，却可以毕业。这个办法虽然不算顶好，但这和当时教会学堂的偏重英文，都是过渡时代的特别情形。

我初到上海的时候，全不懂得上海话。进学堂拜见张先生时，我穿着蓝呢的夹袍，绛色呢大袖马褂，完全是个乡下人。许多小学生围拢来看我这乡下人。因为我不懂话，又不曾“开笔”做文章，所以暂时编在第五班，差不多是最低的一班。班上读的是文明书局的《蒙学读本》，英文班上用《华英初阶》，算学班上用《笔算数学》。

我是读了许多古书的，现在读《蒙学读本》，自然毫不费力，所以有工夫专读英文算学。这样过了六个星期。到了第四十二天，我的机会来了。教《蒙学读本》的沈先生大概也瞧不起这样浅近的书，更料不到这班小孩子里面有人起来驳正他的错误。这一天，他讲的一课书里有这样一段引语：

传曰，二人同心，其利断金。同心之言，其臭如兰。

沈先生随口说这是《左传》上的话。我那时已勉强能说几句上海话了，等他讲完之后，我拿着书，走到他的桌边，低声对他说：这个“传曰”是《易经》的《系辞传》，不是《左传》。先生脸红了，说，“你读过《易经》？”我说读过。他又问，“阿曾读过别样经书？”我说读过《诗经》《书经》《礼记》。他问我做过文章没有，我说没有做过。他说，“我出个题目，拨依做做试试看。”他出了“孝弟说”三个字，我回到座位上，勉强写了一百多字，交给先生看。他看了对我说，“你跟我来。”我卷了书包，跟他下楼走到前厅。前厅上东面是头班，西面是二班。沈先生到二班课堂上，对教员顾先生说了一些话，顾先生就叫我坐在末一排的桌子上。我才知道我一天之中升了四班，居然做第二班的学生了。

可是我正在欢喜的时候，抬头一看，就得发愁了。这一天是星期四，是作文的日子。黑板上写着两个题目：

论题：原日本之所由强。

经义题：古之为关也将以御暴，今之为关也将以为暴。

我从来不知道“经义”是怎样做的，所以想都不敢去想他。可是日本在天南地北，我还不很清楚，这个“原日本之所由强”又从哪里说起呢？既不敢去问先生，班上同学又没有一个熟人，我心里颇怪沈先生太卤莽，不应该把我升的这么高，这么快。

忽然学堂的茶房走到厅上来，对先生说了几句话，呈上一张字条。先生看了字条，对我说，我家中有要紧事，派了人来领我回家，卷子可以带回去做，下星期四交卷。我正在着急，听了先生的话，抄了题目，逃出课堂，赶到门房，才知道三哥病危，二哥在汉口没有回来，店里（我家那时在上海南市开一个公义油栈）的管事慌了，所以赶人来领我回去。

我赶到店里，三哥还能说话。但不到几个钟头，他就死了，死时他的头还靠在我手腕上。第三天，二哥从汉口赶到。丧事办了之后，我把升班的事告诉二哥，并且问他“原日本之所由强”一个题目应该参考一些什么书。二哥检了《明治维新三十年史》，壬寅《新民丛报汇编》……一类的书，装了一大篮，叫我带回学堂去翻看。费了几天的工夫，才勉强凑了一篇论说交进去。不久我也会做“经义”了。几个月之后，我居然算是头班学生了，但英文还不曾读完《华英初阶》，算学还只做到“利息”。

这一年梅溪学堂改为梅溪小学，年底要办毕业第一班。我们听说学堂里要送张在贞，王言，郑璋和我四个人到上海道衙门去考试。我和王郑二人都不愿意去考试，都不等到考试日期，就离开学堂了。

为什么我们不愿受上海道的考试呢？这一年之中，我们都经过了思想上的一种激烈变动，都自命为“新人物”了。二哥给我的一大篮子的“新书”，其中很多是梁启超先生一派人的著述；这时代是梁先生的文章最有势力的时代，他虽不曾明白提倡种族革命，却在一班少年人的脑海里种下了不少革命种子。有一天，王言君借来了一本邹容的《革命军》，我们几个人传观，都很受感动。借来的书是要还人的，所以我们到了晚上，等舍监查夜过去之后，偷偷起来点着蜡烛，轮流抄了一本《革命军》。正在传抄《革命军》的少年，怎肯投到官厅去考试呢？

这一年是日俄战争的第一年。上海的报纸上每天登着很详细的战事新闻，爱看报的少年学生都感绝大的兴奋。这时候中国的舆论和民众心理都表同情于日本，都痛恨俄国，又都痛恨清政府的宣告中立，仇俄的心理增加了不少排满的心理。这一年，上海发生了几件刺激人心的案

子。一件是革命党万福华在租界内枪击前广西巡抚王之春，因为王之春从前是个联俄派。一件是上海黄浦滩上一个宁波木匠周生有被一个俄国水兵无故砍杀。这两件事都引起上海报纸的注意；尤其是那年新出现的《时报》，天天用简短沉痛的时评替周生有喊冤，攻击上海的官厅。我们少年人初读这种短评，没有一个不受刺激的。周生有案的判决使许多人失望。我和王言、郑璋三个人都恨极了上海道袁海观，所以联合写了一封长信去痛骂他。这封信是匿名的，但我们总觉得不愿意去受他的考试。所以我们三个人都离开梅溪学堂了。（王言是黟县人，后来不知下落了；郑璋是潮阳人，后改名仲诚，毕业于复旦，不久病死。）

二

我进的第二个学堂是澄衷学堂。这学堂是宁波富商叶成忠先生创办的，原来的目的是教育宁波的贫寒子弟；后来规模稍大，渐渐成了上海一个有名的私立学校，来学的人便不限于宁波人了。这时候的监督是章一山先生，总教是白振民先生。白先生和我二哥是同学，他看见了我梅溪作的文字，劝我进澄衷学堂。光绪乙巳年（一九〇五），我就进了澄衷学堂。

澄衷共有十二班，课堂分东西两排，最高一班称为东一斋，第二班为西一斋，以下直到西六斋。这时候还没有严格规定的学制，也没有什么中学小学的分别。用现在的名称来分，可说前六班为中学，其余六班为小学。澄衷的学科比较完全多了，国文、英文、算学之外，还有物理、化学、博物、图画诸科。分班略依各科的平均程度，但英文、算学程度过低的都不能入高班。

我初进澄衷时，因英文、算学太低，被编在东三斋（第五班）。下半年便升入东二斋（第三班），第二年（丙午，一九〇六）又升入西一斋（第二班）。澄衷管理很严，每月有月考，每半年有大考，月考大考都出榜公布，考前三名的有奖品。我的考试成绩常常在第一，故一年升了四班。我在这一年半之中，最有进步的是英文、算学。教英文的谢昌熙先生，陈诗豪先生，张镜人先生，教算学的郁耀卿先生，都给了我很多的益处。

我这时候对于算学最感觉兴趣，常常在宿舍熄灯之后，起来演习算学问题。卧房里没有桌子，我想出一个法子来，把蜡烛放在帐子外床架

上，我伏在被窝里，仰起头来，把石板放在枕头上做算题。因为下半年要跳过一班，所以我须要自己补习代数。我买了一部丁福保先生编的代数书，在一个夏天把初等代数习完了，下半年安然升班。

这样的用功，睡眠不够，就影响到身体的健康。有一个时期，我的两只耳朵几乎全聋了。但后来身体渐渐复原，耳朵也不聋了。我小时身体多病，出门之后，逐渐强健。重要的原因我想是因为我在梅溪和澄衷两年半之中从来不曾缺一点钟体操的功课。我从没有加入竞赛的运动，但我上体操的课，总很用气力做种种体操。

澄衷的教员之中，我受杨千里先生（天骥）的影响最大。我在东三斋时，他是西二斋的国文教员，人都说他思想很新。我去看他，他很鼓励我，在我的作文稿本上题了“言论自由”四个字。后来我在东二斋和西一斋，他都做过国文教员。有一次，他教我们班上买吴汝纶删节的严复译本《天演论》来做读本，这是我第一次读《天演论》，高兴的很。他出的作文题目也很特别，有一次的题目是“物竞天择，适者生存，试申其义”。（我的一篇，前几年澄衷校长曹锡爵先生和现在的校长葛祖兰先生曾在旧课卷内寻出，至今还保存在校内。）这种题目自然不是我们十几岁小孩子能发挥，但读《天演论》，做“物竞天择”的文章，都可以代表那个时代的风气。

《天演论》出版之后，不上几年，便风行到全国，竟做了中学生的读物了。读这书的人，很少能了解赫胥黎在科学史和思想史上的贡献。他们能了解的只是那“优胜劣败”的公式在国际政治上的意义。在中国屡次战败之后，在庚子辛丑大耻辱之后，这个“优胜劣败，适者生存”的公式确是一种当头棒喝，给了无数人一种绝大的刺激。几年之中，这种思想像野火一样，延烧着许多少年人的心和血。“天演”“物竞”“淘汰”“天择”等等术语都渐渐成了报纸文章的熟语，渐渐成了一班爱国志士的“口头禅”。还有许多人爱用这种名词做自己或儿女的名字。陈炯明不是号竞存吗？我有两个同学，一个叫做孙竞存，一个叫做杨天择。我自己的名字也是这种风气底下的纪念品。我在学堂里的名字是胡洪骅。有一天的早晨，我请我二哥代我想一个表字，二哥一面洗脸，一面说：“就用‘物竞天择适者生存’的‘适’字，好不好？”我很高兴，就用“适之”二字。（二哥字绍之，三哥字振之。）后来我发表文字，偶然用“胡适”作笔名，直到考试留美官费时（一九一〇）我才正式用“胡适”的名字。

我在澄衷一年半，看了一些课外的书籍。严复译的《群己权界

论》，像是在这个时代读的。严先生的文字太古雅，所以少年人受他的影响没有梁启超的影响大。梁先生的文章，明白晓畅之中，带着浓挚的热情，使读的人不能不跟着他走，不能不跟着他想。有时候，我们跟他走到一点上，还想往前走，他倒打住了，或是换了方向走了。在这种时候，我们不免感觉失望。但这种失望也正是他的大恩惠，因为他尽了他的能力，把我们带到了境界，原指望我们感觉不满足，原指望我们更朝前走。跟着他走，我们固然得感谢他；他引起了我们的好奇心，指着一个未知的世界叫我们自己去探寻，我们更得感谢他。

我个人受了梁先生无穷的恩惠。现在追想起来，有两点最分明。第一是他的《新民说》，第二是他的《中国学术思想变迁之大势》。梁先生自号“中国之新民”，又号“新民子”，他的杂志也叫做《新民丛报》，可见他的全副心思贯注在这一点。“新民”的意义是要改造中国的民族，要把这老大的病夫民族改造成一个新鲜活泼的民族。他说：

未有四肢已断，五脏已瘵，筋脉已伤，血轮已涸，而身犹能存者；则亦未有其民愚陋怯弱涣散混浊而国犹能立者。……苟有新民，何患无新制度，无新政府，无新国家！（《新民说叙论》）

他的根本主张是：

吾思之吾重思之，今日中国群治之现象殆无一不当从根柢处摧陷廓清，除旧而布新者也。（《新民议》）

说的更沉痛一点：

然则救危亡求进步之道将奈何？曰，必取数千年横暴混浊之政体，破碎而齑粉之，使数千万如虎如狼如蝗如蝻如蛆之官吏失其社鼠城狐之凭借，然后能涤荡肠胃以上于进步之途也！必取数千年腐败柔媚之学说，廓清而辟之，使数百万如蠹鱼如鹦鹉如水母如畜犬之学子毋得摇笔弄舌舞文嚼字，为民贼之后援，然后能一新耳目以行进步之实也！而其所以达此目的之方法有二：一曰无血之破坏，二曰有血之破坏。……中国如能为无血之破坏乎？吾馨香而祝之。中国如不得不为有血之破坏乎？吾衰经而哀之。（《新民说论进步》）

我们在那个时代读这样的文字，没有一个人不受他的震荡感动的。他在那时代（我那时读的是他在壬寅癸卯做的文字）主张最激烈，态度

最鲜明，感人的力量也最深刻。他很明白的提出一个革命的口号：

破坏亦破坏，不破坏亦破坏！（同上）

后来他虽然不坚持这个态度了，而许多少年人冲上前去，可不肯缩回来了。

《新民说》的最大贡献在于指出中国民族缺乏西洋民族的许多美德。梁先生很不客气的说：

五色人相比较，白人最优。以白人相比较，条顿人最优。以条顿人相比较，盎格鲁撒逊人最优。（《叙论》）

他指出我们所最缺乏而最须采补的是公德，是国家思想，是进取冒险，是权利思想，是自由，是自治，是进步，是自尊，是合群，是生利的能力，是毅力，是义务思想，是尚武，是私德，是政治能力。他在这十几篇文字里，抱着满腔的血诚，怀着无限的信心，用他那枝“笔锋常带情感”的健笔，指挥那无数的历史例证，组织成那些能使人鼓舞，使人掉泪，使人感激奋发的文章。其中如《论毅力》等篇，我在二十五年后重读，还感觉到他的魔力。何况在我十几岁最容易受感动的时期呢？

《新民说》诸篇给我开辟了一个新世界，使我彻底相信中国之外还有很高等的民族，很高等的文化；《中国学术思想变迁之大势》也给我开辟了一个新世界，使我知道四书五经之外中国还有学术思想。梁先生分中国学术思想史为七个时代：

- （一）胚胎时代 春秋以前
- （二）全盛时代 春秋末及战国
- （三）儒学统一时代 两汉
- （四）老学时代 魏晋
- （五）佛学时代 南北朝，唐
- （六）儒佛混合时代 宋元明
- （七）衰落时代 近二百五十年

我们现在看这个分段，也许不能满意。（梁先生自己后来也不满意，他在《清代学术概论》里已不认近二百五十年为衰落时代了。）但在二十五年前，这是第一次用历史眼光来整理中国旧学术思想，第一次

给我们一个“学术史”的见解。所以我最爱读这篇文章。不幸梁先生做了几章之后，忽然停止了，使我大失望。甲辰以后，我在《新民丛报》上见他续作此篇，我高兴极了。但我读了这篇长文，终感觉不少的失望。第一，他论“全盛时代”，说了几万字的绪论，却把“本论”（论诸家学说之根据及其长短得失）全搁下了，只注了一个“阙”字。他后来只补作了《子墨子学说》一篇，其余各家始终没有补。第二，《佛学时代》一章的本论一节也全没有做。第三，他把第六个时代（宋元明）整个搁起不提。这一部学术思想史中间阙了三个最要紧的部分，使我眼巴巴的望了几年。我在那失望的时期，自己忽发野心，心想：“我将来若能替梁任公先生补作这几章阙了的中国学术思想史，岂不是光荣的事业？”我越来越高兴，虽然不敢告诉人，却真打定主意做这件事了。

这一点野心就是我后来做《中国哲学史》的种子。我从那时候起，就留心读周秦诸子的书。我二哥劝我读朱子的《近思录》，这是我读理学书的第一部。梁先生的《德育鉴》和《节本明儒学案》，也是这个时期出来的。这些书引我去读宋明理学书，但我读的并不多，只读了王守仁的《传习录》和《正谊堂丛书》内的程朱语录。

我在澄衷的第二年，发起各斋组织“自治会”。有一次，我在自治会演说，题目是“论性”。我驳孟子性善的主张，也不赞成荀子的性恶说。我承认王阳明的性“无善无恶，可善可恶”是对的。我那时正读英文的《格致读本》（*The Science Readers*），懂得了一点点最浅近的科学知识，就搬出来应用了！孟子曾说：

人性之善也，犹水之就下也。人无有不善，水无有不下。

我说：孟子不懂得科学，——我们在那时候还叫做“格致”，——不知道水有保持水平的道理，又不知道地心吸力的道理。“水无有不下”，并非水性向下，只是地心引力引他向下。引力可以引他向下，高地的蓄水塔也可以使自来水管里的水向上。水无上无下，只保持他的水平，却又可上可下，正像人性本无善无恶，却又可善可恶！

我这篇性论很受同学的欢迎，我也很得意，以为我真用科学证明告子、王阳明的性论了！

我在澄衷只住了一年半，但英文和算学的基础都是在这里打下的。澄衷的好处在于管理的严肃，考试的认真。还有一桩好处，就是学校办事人真能注意到每个学生的功课和品行。白振民先生自己虽不教书，却认得个个学生，时时叫学生去问话。因为考试的成绩都有很详细的记录，故每个学生的能力都容易知道。天资高的学生，可以越级升两班；中等的可以半年升一班；下等的的不升班，不升班就等于降半年了。这种编制和管理，是很可以供现在办中学的人参考的。

我在西一斋做了班长，不免有时和学校办事人冲突。有一次，为了班上一个同学被开除的事，我向白先生抗议无效，又写了一封长信去抗议。白先生悬牌责备我，记我大过一次。我虽知道白先生很爱护我，但我当时心里颇感觉不平，不愿继续在澄衷了。恰好夏间中国公学招考，有朋友劝我去考；考取之后，我就在暑假后（一九〇六）搬进中国公学去了。

IV MORE SCHOOLDAYS IN SHANGHAI

①

The Public School of China was founded in Shanghai in the 乙巳 year of Emperor Kuanghsu (1905) by a group of Chinese students who returned from Japan. The Education Ministry of the Japanese Government had previous to that proclaimed a number of discriminatory regulations designed to curtail the entry of Chinese students. This was considered a grave insult to China by the Chinese students in Japan who, in a spirit of protest, returned to start their own school. When the protest campaign was at its height, a Chinese student from Hunan named Ch'en T'ien-hua committed suicide by throwing himself into the ocean in order to encourage his fellow countrymen at home to a greater national consciousness and patriotism. This event shocked the public into greater awareness, and caused many of our students in Japan to come home. The upshot was, everybody agreed that an institution of higher education for the general public should be established in China. In the Twelfth Month of the 乙巳 year, representatives from thirteen provinces met in conference and decided on the school, which was to be called *Chung Kuo Kung Hsiueh* (Public School of China). In the following spring (1906), the school opened its doors in a hired house at Huangpanch'iao on New Range Road in Shanghai. But by that time the anti-discrimination campaign had already shot its bolt, and many government scholarship students were returning to Japan to resume school. In those days, Shanghai was still a port city of very limited horizons, and the sight of so many young men in foreign-style clothes and without queues running their own school (at the Public School of China) was universally considered a strange phenomenon. The Qing

officials suspected them of being Revolutionaries and society in general called them monsters, with the result that few contributed money or otherwise aided the undertaking, and the school was plunged into a desperate crisis scarcely a month and half following its inauguration. In a fit of indignation and despondency, Mr. Yao Hung-yeh, managing-director of the School and a native of Yiyang, Hunan, committed suicide by drowning himself in the river on the 13th of the Third Month. In a letter of several thousand words he left behind he said: "I am dying so that the Public School of China may live." When this moving document was published it once again shocked public opinion into attention, and more and more people came forward with support. It was only then that the Public School began to find its precarious footing.

I was one of those youngsters who read and were greatly moved by the last testament of the patriot, Yao. That summer I applied at the school to take its entrance examination, and I remember the supervisor of the examination was Mr. Ma Chün-wu, the chief of instruction. The topic for the Chinese Composition test was "My Ambition." I do not recall what I wrote in my paper, but some time afterward I was happy to have Mr. Ma tell me that he had been so impressed with my paper that he had passed it around among the other members of the faculty and all had agreed that the new School was to enroll for itself a promising student.

After I moved into the Public School I found that most of my schoolmates wore no queues and affected Japanese-style kimonos and wooden slippers; others, I saw, were elderly gentlemen from the interior who wore old-fashioned thick eyeglasses and sported water-pipes. They were all many years my senior, and for me who had been used to being monitor it was my first realization that I was a mere kid. It did not take me long to find out that the standard of English and Mathematics at the Public School was extremely low, and I did not have to exert myself at all as a member of the top class. In those years Chinese educational circles were extremely deficient in science, and

although the Public School of China was at most comparable to the present junior and senior middle schools in its curricula, Japanese instructors had to be engaged for many of the courses offered. Such subjects as Higher Algebra, Analytical Geometry, and Biology at first were all taught by Japanese, with a Japanese-speaking student serving as interpreter in the class. Of my fellows in the top class, men like Chu Ching-nung and Li Ch'in-ho had all served as interpreters, while several other schoolmates even served concurrently as faculty or staff members; for instance, Tan Mou-hsing was our Physical Culture instructor. Among my contemporaries only Chou Lieh-chung, Li Chün, Sun Ts'ui-ts'un, Sun Ching-ts'un and a few others were about my age. Our instructors and senior schoolmates regarded us all as their kid brothers, favoring us with special care and encouragement. Association with these comparatively senior and more experienced teachers and schoolmates left its effect particularly on me. In my life heretofore there had been lacking a period of childhood anyway; now mingling daily with these older persons, I had the feeling all the more that I was no longer a child.

Among the faculty members and student body at the Public School of China there were not a few Revolutionary Party members. Therefore, I had ample opportunity here of following the *Min Pao* (*People's Journal*) published from Tokyo. During the summer and New Year's vacations many schoolmates had back issues of this paper sewed into their pillows in order to take them home and pass them around among acquaintances. There were other more radically-inclined students who would take to forcing their schoolmates to cut off their queues. But during my stay of more than three years at the Public School, nobody ever forced me to get rid of my queue or induced me to join the T'ungmenhui. It was not until twenty years later that Mr. Tan Mou-hsing revealed to me that at the time the T'ungmenhui members at the school did discuss me but the consensus was that I would be of greater usefulness in the future in scholarly pursuits and, out of their affectionate regard for me, they had decided

not to induce me to participate in revolutionary activities. Nevertheless, many of their activities at that time were not concealed from me. One evening around ten, when I was about to go to bed, Mr. Tan came to seek me, imparting the news that a girl student returning from Japan had been held up by the Customs because she had been unable to produce a key to open for inspection a suitcase she had brought back for a friend. Because I could speak a few words of English, Mr. Tan wished that I would go to the Customs to negotiate with the officers there. Knowing that the suitcase contained contraband, I went with Tan to the Customs jetty. It was already past 11 o'clock, and not a soul could be found; so we turned back rather dejectedly. The next day, the girl student decided to leave herself, abandoning her suitcase at the Customs unclaimed.

Nowadays, with classes in all the Shanghai schools conducted in mandarin, one can hardly conceive that the Shanghai of twenty years ago was still a world of the Shanghai dialect, which was the universal medium of instruction in all the schools. Students from different parts of the nation all had to learn to speak the Shanghai dialect. The Public School of China, however, was the first to adopt the "national language" for purposes of instruction. Of our student body, the largest number were from the provinces of Szechuan, Hunan, Honan and Kwangtung, together with a sprinkling from practically every other province of the nation. We all spoke in the "national tongue," and our teachers also taught in the "national tongue." Even instructors from Kiangsu and Chekiang whose native tongues are variations of the Shanghai dialect, such as Messrs. Sung Yao-ju, Wang Hsien-hua and Shen Hsiang-yün, had to affect a kind of mandarin in class. When I first entered I could only handle my native Hweichow and the Shanghai dialects; but before long I had acquired an acceptable "national tongue." There were mostly Szechuanese among my schoolmates, and I loved above all to learn the Szechuan dialect, which was a most clear-cut variety of the mandarin; that is why the mandarin that I came to speak was closest to Szechuanese. Two or

three years later, when I used to call on my friends at some of the local Szechuan hostels (such as the Yüan and Hou houses), I was only asked, "Is your honorable hometown East Szechuan or West Szechuan?" being invariably taken to be a fellow provincial.

At the time the Public School of China was founded, all the students were also founders, and there were no distinctions between staff members and the student body because the staff was elected from among the students. The founders of this institution were all men of revolutionary ideas and they thought that they would put into practice in the school a democratic system. This idea was brought out in the letter left behind by Yao Hung-yeh, the martyr, in which he mentioned about "practicing democratic methods with utmost justice and unselfishness." The school was organized into two departments, the "Executive" and the "Legislative." Officers of the executive department (Dean of Studies, Business Manager, and Dormitory Proctor) were all elected for specific terms of office by the Legislative Department and responsible to it. The Legislation Department was composed of the various class monitors and dormitory prefects, and endowed with the power to supervise and impeach the officers. Whenever the Legislative Department met in session, there would always be heated debates, sometimes carried on right up to the time of roll-call and "lights out" before the meeting adjourned. Among the Legislators, the best known was a Szechuanese named Kung Ts'ung-lung, who made a fine Speaker of the House, extremely articulate and with a polished parliamentary manner. It was an extremely profitable training for us all. Because I was too young in age to serve as a Legislator in my first year, I would sometimes listen to their debates from outside the meeting hall; I could not help thinking what child's play the Student Self-government Society at the Ch'eng Chung School had been in comparison.

During my first semester several of my roommates came from the districts of P'inghsiang in Kiangsi and Liling in Hunan. These are neighboring districts and they spoke a dialect that was not too intelligible to me. But before one month was up we had become well acquainted. They were all men of between twenty and thirty; one gentleman, named Chung Wen-hui was already sporting a beard, and was known to everybody as "Chung the Beard." He told me that they had just organized an academic society with the name of Ching Yeh Hui (The Vie-for-Works Society), so called because its object would be to "vie for reforms in society and improvements in oneself." He wanted to recommend me for membership in the society, to which I consented. Mr. Chung, which was chairman of the society, took me around to its headquarters and introduced me to some of the people there. The society met outside the school at an address in Hou Fu Lane on North Szechuan Road. Members who lived in the clubhouse were mostly Revolutionary Party members. There was one Yang Cho-lin and one Liao Teu-fan, who were both to be killed for their revolutionary activities. The most enthusiastic workers in the society, aside from Chung, were Hsieh Yin-chieh and Ting Hung-hai, who between them were responsible for carrying on the business of the society for the longest period.

The first of the activities of the Ching Yeh Hui was to publish a periodical which came out every ten days written in the vernacular. They had invited a man named Fu Chün-chien to be the editor. The aim of the Ching Yeh Journal, said Mr. Fu, were four: (1) To promote education; (2) to develop public morale; (3) to reform society; and (4) to advocate self-government. Actually, these were all window-dressing, with the real aim one of propaganda for the revolution. Their idea was to have the revolutionary spirit "spread among the youthful citizens of the primary schools;" that was why it had been decided to write the Journal in pai-hua, or the vernacular tongue. In the "Inaugural Message" written by Mr. Hu Tze-fang (who was to make a name for himself later as the poet Hu Shih-lu), there was the

following passage:

Nowadays those who call themselves intellectuals would insist on writing essays in an obtrusive style in which are presented high-flown ideas for the edification of the literati, rather than think of bringing light to the younger generation in the towns and villages whose numbers are hundreds of thousands times greater. In this way the educated would become ever more educated, whilst the ignorant would become ever more ignorant; the former dwindling in number every day, whilst the latter daily multiplying. Can this be the way to a better rule?

Another member of the society who signed himself under the pseudonym of "Ta Wu," contributed an article on the subject, "On the Advantages of Learning the Mandarin," saying:

Gentlemen, to save China we must first unite all Chinese. To unite the Chinese people, we must first achieve a unification of the Chinese language. ... But the thing is, today one hardly knows how many different dialects there are in the Chinese language, and how are we to combine them and make them uniform? ... There is no other method save by popularizing the mandarin. But there are even many varieties of mandarin, such as the Southern mandarin, the Northern mandarin, and the Peking mandarin. As long as some kind of mandarin or other is at present spoken throughout the nation, by making it conform to the Peking mandarin, we will naturally have a common national tongue.

These writers had all been in Japan and, being students at the Public School of China, most of them felt the need for a "common national tongue." "Kuo yü" (national language) as an ideal was repeatedly mentioned in the first issue of the *Ching Yeh Journal*; it must have been the earliest conscious promotion of a revolutionary change which was to come about a decade or so later.

The inaugural issue of the *Ching Yeh Journal* made its appearance on the 11th of the Ninth Month, 1906. My roommate Chung, having noticed that I was fond of reading novels and at the same time able to write in the classical style, began to talk me into contributing for the Journal in the vernacular style. The first issue contained an article by

me popularizing the science of "Geography," signed with the nom de plume, "Ch'i Tzu Sheng Sheng" (Young-Man-Who-Would-Improve-Himself). I was just then in the midst of studying Lao-tze, and was enamored of one of his phrases, "Those who can improve themselves will prevail"; hence, I gave myself the name "Hsi Ch'iang" (Hoping-to-be-Strong), otherwise styling myself "Young-Man-Who-Would-Improve-Himself." This article was the first I ever wrote in the vernacular style, so here I quote a passage from it dealing with "the fact that the earth is round," to be preserved as a memento:

Let us suppose a man standing by the sea and gazing at the ships passing to and fro in the distance. The incoming ships would be seen to reveal first of all their top masts, and then their sails, and finally their bodies. As to the outgoing ships, it is directly the opposite: first the body of the vessel would disappear, next its sails, and the last to be seen would be its masts. How do we account for this? Because the earth is round, therefore incoming ships are in fact slowly climbing upwards, naturally revealing to our eyes the top of the masts first. The same theory applies to the outgoing ships, only in reverse. ... If my extreme readers still find it incredible, just catch a fly and place it on an apple so that it will climb up from the bottom. Is it not true that its head would first come into view and only afterwards its legs? ...

This passage already demonstrates thoroughly the strengths and the weaknesses of my style of writing. My strength lies in the clarity and intelligibility of my writing; my weakness is its superficiality and simplicity. When I wrote this I was hardly fifteen years of age. In the twenty-five years that have intervened, I have clung to this one principle, that in writing it is of the utmost importance that people understand you. That is why I have never been afraid to have people consider my writing too easy and too simple.

After having written in the vernacular style for a month I was getting bolder, and suddenly one day I resolved to write a long novel. The title I gave to my novel was *Isle of Make-Believe*; its theme, "to enlighten the people and sweep away popular superstitions." I mapped out the headings for the forty chapters that were to constitute my

novel and began writing. The first chapter appeared in the third issue of the *Journal* (1st Day of the Tenth Month, 1906) under the heading:

Yü Shan-jen Becomes Ill, a Prey to His Own Imaginations.

Sun Shao-wu Dispels Superstitions with the Light of Truth.

The opening passage of the novel read:

Once upon a time in the district of Kweich'i, in the city of Kuanghsin, in Kiangsi Province, there was a populous and prosperous township known as Shench'üanchen (Town of the Gods) with a thoroughfare running through it named Fu-erhchieh (Blessed-Child Street). At one end of this street there stood a large and imposing house. One afternoon, two men were engaged in conversation on the second floor of this house. One of them was an old man in his middle fifties with graying hair, lying heavily covered in bed with his head near its edge, and looking emaciated as if seriously ill. The other was a young man of eighteen or nineteen who had regular features and a spirited manner, seated in a chair beside the bed and listening to the old man talk. ...

I had early conceived a bitter hatred for the Taoist religion. So I set the opening chapter of this novel against superstition in the home town of Chang the Heavenly Master. I was, however, unfamiliar with the local geography and customs of the district of Kweich'i, so not long afterwards I moved my hero Sun Shaowu to my native Hweichow.

The *Ching Yeh Journal* suspended publication after ten issues, and my novel went as far as Chapter VI. The Journal was not revived until the 11th of the Third Month, 1908, when its eleventh issue came off the press. But by then Fu Chün-chien had left, and there being no responsible editor. I myself was no longer interested in contributing. By the Seventh Month of that year, when the Journal reached its 24th issue, the editing job was entrusted to me. From No. 24 to No. 38 of the magazine I did a lot of writing, sometimes writing practically an entire issue, from the editorials to notes on current events. Beginning No. 24, the serialized *Isle of Make-Believe* had also been resumed and I

carried the story down to Chapter XI, when the *Journal* finally suspended for good and my novel ended with it. During this period I changed my pen-name to "T'ieh-erh."

During its lifetime the issues of the *Ching Yeh Journal* provided me with an excellent opportunity for free expression, making it possible for me to sort out what little knowledge and opinion I had acquired at home and in schools and recount them in clear and concise language. Those who were responsible for the management of the *Journal* never interfered with my expression, thus I was enabled to develop my thoughts to the fullest, especially what I thought of religion and superstition. For instance, in Chapter VIII of the novel *Isle of Make-Believe*, Sun Shao-wu was made to discuss the question of "karma" in the following terms:

It is pretty hard to talk about the two words "cause" and "effect." In ancient times someone had said: "Let us look at this tree outside the window: each and every one of its blossoms was exactly alike, with no difference of good or bad about them whatever. Presently, there came a violent gust of wind, blowing the tree-full of flowers hither and yon; some of the petals were blown off the window-blinds on to the velvety green, others were scattered outside the wall and fell into the sewer. These scattered blossoms met with varying ends, good and bad, but can we claim that there is any cause-and-effect relationship in it and that each is reaping what it has sown?" This is very correctly said, but my view of the matter goes beyond it. I guess there is such a thing as cause-and-effect, and that every cause must produce its own effect. For instance, you eat and feel satiated, you drink and feel intoxicated. Given eating and drinking as the respective causes, there is produced the natural effects of satiation and intoxication. But in eating it is the effect produced by what you eat that satisfies you; just as, in raising melons, it is the growth from melon seeds that produces the melons. In neither case is there any arbiter in the matter. If there should exist a higher arbiter in everything, what is called God or Buddha, then as long as they can punish the sinner after the fact, why not prevent him from committing the sin in the first place? ... If "Heaven" really is as allpowerful as that, why not make everyone under heaven into a good man? ... Having given birth to sinners and suffered them to do evils in this world, why should "Heaven" then turn around and make them reap the evil results of their evil deeds? Is this not a great inconsistency described as "Now you do and now you don't"? ... In short, as long as "Heaven" is unable to prevent people from doing

evil it follows that it is equally incapable of punishing the evil-doers. ...

The parable of the scattered blossoms cited above was based on the writings of Fan Chen (see Chapter II), and the rest represented my own thinking. It was frankly a statement of atheism. At about the same time I also published in the *Journal* a compilation of "Notes On the Non-Existence of Ghosts." The very first entry in this article was the passage from Ssuma Kuang already quoted—"When the body has decayed and disappeared, the spirit also scatters into thin air; wherefore, given all the fires and tortures of the nether world, there is nowhere that they could be applied"—and the one from Fan Chen to the effect that "spirit is to form what the sharpness of a knife is to the knife itself." (See Chapter II). For the second item, I quoted this poem of Su Tung-p'o:

In spring planting you want the rains to come, at harvest time you want the
rains to go,
Happy the wind is with you or resenting bucking against it, as you travel to
and fro.
Should all and sundry get that for which they pray,
The Creator would have to order a thousand changes in one day!

The third item contained, in the literary style, my bitter denunciation of *Hsi Yu Chi* (*Mission to the West*) and *Feng Shen Pang* (*The Honor Roll of the Gods*), for their use of supernatural themes. This article was published in the Eighth Month, 1908; who would have dreamed that fifteen years later (in 1923) the same young man who mouthed these opinions should be so enthusiastically engaged in a piece of historical research as long as twenty thousand words for the same novel, *Hsi Yu Chi*! And there is a good chance that he would do the same for *Feng Shen Pang* if only he could gather enough material for his research.

In the fourth entry in these atheistic "Notes," I wrote:

People have criticized me for holding to the view that there are no ghosts, claiming that in demolishing all arguments for hell and punishment I was in fact

encouraging evil-doing and going against the best intentions of our ancient religious institution. This charge I feel I cannot accept. For today the talk of hell and retribution is still very much prevalent, and yet the wicked has multiplied in numbers and public morals deteriorate every day, and what effects have our ancient religious institutions produced? In this day of fierce competition of ideas, unless we wipe away all these supernatural encumbrances in our minds, how would new ideas find a way to be born?

Coming from a mere child of seventeen, such boastful talk would probably bring a smile of condescension to the reader's lips. But looking back on it now, I cannot help thinking that the views I expressed then had after all been crystallized from several years of independent thinking; I feel I have no reason to be ashamed of it when I compare myself with the youths of today who spend their time performing mental gymnastics in the realm of abstract terminology.

I had long since forgotten these things that I wrote for the *Ching Yeh Journal*. Two years ago I saw in the papers that the Propaganda Department of the Kuomintang Central Executive Committee was advertising for a complete set of the back numbers of this magazine—probably they were unaware that a major portion of the contents therein had been written by one Hu Shih—but did not appear to have succeeded. I have, with the assistance of some of my old friends, been seeking everywhere for the past few years but still failed to complete my own set. Looking back on some of these writings now, I have the feeling indeed that a world of time has elapsed between then and now. But what made me wonder is that some of the ideas which were later to become important points of departure for me were already plainly revealed during this period when I was not more than seventeen or eighteen. One example could be found in an article on "The Slipshod Habit" which I wrote for No. 36 of the *Journal*. In it I delivered myself of a scathing denunciation of the lazy, slipshod habit of thought, comparing "Slipshoddism" to a great scourge in Chinese history, a scourge which had killed off a national spirit of thousands of years' glory. Again, in Chapter XI of my novel *Isle of Make-Believe* (the

Journal, No. 37) I had the following to say on the popular superstition in connection with divination by means of the ouija board:

Just think about it, Ch'eng Cheng-weng, even if there were ghosts and spirits, how could men of such great dignity as Kuan Ti and Lü Tsu be made to answer the summons of a mere amulet or two? The logic of this is so simple that it could be grasped by anybody upon the least bit of reflection. The pity is we Chinese people are never willing to think; we only know enough to follow the tide and echo the other fellow. The fact that the ignorance of our national citizenry has reached this new low, in my opinion, is entirely attributable to our unwillingness to think. As the great Confucian scholar of the Sung dynasty, Ch'eng Yi-ch'uan said, "All knowledge stems from thinking"—there has never been expressed a greater truth. When Mr. Cheng reached this point in his discourse, he turned and, addressing Yi-hua and Yi-huang, said: It will be worthwhile for you two to mark these words of Master Ch'eng as your motto.

This phrase, "All knowledge stems from thinking," had caught my attention when I was studying Chu-tze's *Chin Ssu Lu (Record of Recent Thoughts)* at the Ch'eng Chung School. That, later, my thinking was to follow the direction of Huxley and Dewey can also be explained by the fact that as early as my adolescence I had already paid so much attention to the importance of a correct method of thinking.

Another instance may be found in an article entitled "On the Inhumanity of Adopting Children" (reprinted in the *Journal*, No. 29) which I wrote during the same period for the paper *Anhui Vernacular* published by Li Hsing-po. I was not only against the idea of adopting sons, but went further to raise the fundamental question: "Why must one have sons?" One of the concluding passages of this essay had this to say:

And now I wish to recommend a son to my 400 million fellow countrymen, one who will prove to be most filial and permanently filial. The name of this son is "Society." ...

Just look at the glorious names of all the brave heroes and the great and good men of our history, handed down to us through the generations without their lustre being diminished in any degree; their memory is forever worshiped and revered by our entire society, whether or not they have left behind them

any descendants; and it is only for what they had done for society that society forever cherishes their names. Good heavens! What multitudes of filial sons and grandsons have these heroes and great men of history! ... When a man can perform something that benefits the masses and contribute to the general good, he will be able to regard the entire posterity as his descendants. Gentlemen, let us remember this: we cannot count upon any sons or grandsons, whether of your own flesh-and-blood or adopted. Only the kind of filial offspring that I recommend here can be a foolproof guarantee of your own continuity.

I had conceived these ideas originally out of my observation of the painful experience undergone by my Third Elder-Brother when he was adopted by Elder Uncle Chen; they were the conclusions drawn from an actual, concrete problem. Four or five years later, my reading of Bacon's essays touched off these thoughts, as a result of which I recorded in my diary an "Anti-Offspring Doctrine." Ten years later, the death of my mother again caused me to reflect on this problem and to write an essay entitled, "My Religion: Immortality," in which I developed my thesis of "social immortality."

For the duration of the *Ching Yeh Journal*, I found an opportunity not only to sort out and give expression to my thoughts on various subjects but also to have an excellent training in writing in the vernacular. Toward the end of the Ch'ing dynasty there were published a number of vernacular periodicals, such as *The China Vernacular*, *The Hangchow Vernacular*, *The Anhui Colloquial*, *The Ningpo Vernacular*, and *The Chaochow Vernacular*, none of which enjoyed a long life. In the years of Emperor Kuanghsu and Hsüant'ung, Fan Hung-hsien and his group published a paper called *Citizen's Vernacular Daily* and Li Hsing-po published his *Anhui Vernacular* both containing my contributions, but each lasted for only a few months. Only the *Ching Yeh Journal* published as many as forty issues, one of the longest-lasting of the vernacular publications. With the exception of a brief interval, its columns, from the inaugural issue to the time of its final suspension, were never without my contributions. Of others who worked on the editorial end of the Journal—men like Fu Chün-chien,

Chang Tan-fu, and Yeh Teh-cheng—none had maintained relations with the publication over as long a period as I did, nor received as lengthy a period of training. I do not know what influence my articles might have exerted at the time, but one thing I know, my year or so of journalistic apprenticeship had been of the utmost benefit to myself. Ever since then the vernacular language became my greatest instrument of expression. It was this instrument which was to enable me to be one of the first to open a road in the movement for China's Literary Revolution.

③

I had been enrolled in the Public School of China not quite a half year when I came down with a case of athlete's foot and found it necessary to ask for sick leave. I took up my lodgings in the Jui Hsing Tai Tea Shop in the South City of Shanghai where I tried to cure myself of the disease, when one day I happened to stumble upon a textbook reader of ancient classics selected by Wu Ju-lun, of which Volume IV consisted entirely of ancient songs. It was the first time in my life that I had read any ancient songs and I was tremendously enthusiastic. In my sickbed I committed to memory a few of these songs every day and before long finished the entire volume. In my younger days I had studied the form of poetry known as lü, which had left me flat; now that I discovered these ancient lyrics and songs of five- or seven-word lines I began to realize how free versification can be and how unnecessary it was to be chained to rigid metrical parallelisms to write poetry. The very first song I learned to recite was *The Ode to Mu-lan*, the second was *The Horse-Drinking Song of the Great Wall*, and the third, *Nineteen Ancient Songs*, and so on all the way down to the poems of T'ao Ch'ien and Tu Fu; everything was hugely enjoyed. When I got through with the Wu Ju-lun selection I found in Second Elder-Brother's library *The Collected Poems of T'ao Yüan-ming* and *The Selected Poems of Pai Hsiang-shan*; later I bought for myself a

set of *The Annotated Edition of the Poems of Tu Fu*. During this period I concentrated on the study of these ancient-style songs and odes, refusing to look again at the artificial *lǐ* form, although occasionally I included some five- or seven-word *chüeh chü* in my poetry reading.

One day, returning to school after I got well, I passed by the offices of the *Ching Yeh Journal* and dropped in to see Fu Chün-chien, who told me that he would soon be leaving to return to his native Hunan. Back in my dormitory, I composed a farewell poem which I personally took to Chün-chien and asked him whether it could pass for poetry. I no longer recall how the poem goes but remember it opens with the lines: "What happy fate has given me, To have a friend in Fu Chün-chien." My friend praised the poem highly without giving me enough confidence in this maiden effort. A day later, he sent around a poem that he wrote under the title, "For Shih-chih, some parting lines in echo to his farewell." It was copied neatly on fine Japanese roll-stationery, and my heart gave a leap of joy upon unfolding it. In his poem there were these lines which said, "Great minds have met in thee and me, Friend, mentor, a kindred literary spirit," which constituted unbelievable high praise in the eyes of a youngster hardly rounding his fifteenth birthday! "Could it be that he was just saying this to fool a kid?" I could not help asking myself. I quickly put away this sheet of paper and did not dare reveal it to any other eyes. Nevertheless, for a long time afterwards these words which he had written in a spirit of encouragement to his young friend remained the bane of my existence. I resolved then and there to live up to his highest expectations and become a poet. Sometimes, in the classroom, when the teacher was working out on the blackboard a problem in higher algebra I would be stealthily turning over the leaves of my *Thesaurus of Rhymes* under cover of Smith's *Higher Algebra*; in my exercise book were written not mathematical problems but unfinished lines of a travel poem. My enthusiasm for mathematics of only a couple of years ago, which had caused me to burn midnight oil working out algebraic problems in bed, was now completely replaced

by this new-found enthusiasm for poetry writing! A few months' of athlete's foot had opened up for me this bright new world, at the same time determining the course of my life-work. It was thus that I have embarked on the road of literary and historical research from which, in spite of repeated efforts of self-correction in the direction of the natural sciences, I was not to be turned back—so great was my enthusiasm and so deeply ingrained my newly-acquired habit was to be.

In February of 1907 (丁未正月), I went on an excursion to Soochow, and in April I went with the entire student body of the Public School on a trip to Hangchow; both occasions were duly recorded by me in poetry. I was still completely ignorant of the matter of "rhymes," and only tried to rhyme my lines according to the way words sound in my native dialect. One of my *chüeh chü* composed on the West Lake had only two rhymed endings in it, both incorrect, which drew a big laugh from Mr. Yang Ch'ien-li. He pointed out the mistakes for me and re-wrote two of my lines to fit the rhymes, in doing so altering my meaning completely. It was then that I knew that the technique of rhyming in versification is a matter of sheer memorization and, furthermore, the poet's intent may if necessary be changed in order to make the rhymes fit.

In June of that year (丁未五月), I had a recurrent attack of athlete's foot, and took a long leave to go home for the cure. (It was the custom for natives of Hweichow contracting athlete's foot in Shanghai to hurry home; by the time one went as far as the upper reaches of the Ch'ient'ang valley one's swollen feet would gradually return to normal.) I spent two months at home, much to my mother's delight. After this visit I was to be absent from home for a period of ten years continuously (1907–1917), something which neither my mother nor I had quite anticipated. On this visit home I spent much time with my Younger Uncle Chin-jen, who gave me fresh encouragement in my poetry-writing. I had poems recording my impressions both on the way home and during my stay at home. I was

then reading extensively in the works of Pai Chü-yi, and my poetic offerings of this period, such as one about my late father, showed the great influence of this Yüan dynasty poet.

For some time after 1907 (丁未) I enjoyed at school the reputation of a young poet, and we often wrote poems back and forth among the schoolmates, echoing one another's rhymes. Once I wrote a lü poem of five-character lines, with a rhyme on the character " *ch'ih*," which was echoed by as many as ten or fifteen poems from among my schoolmates and teachers. Among my schoolmates such men as T'ang Pao-min, Chu Ching-nung, Jen Hung-chün, and Shen I-sun were all adept at versification; and among the teachers there were Messrs. Hu Tze-fang and Shih I-shen. The former was to distinguish himself years later as the well-known poet Hu Shih-lu, but at that time he was serving as our English instructor, and it was characteristic of the Public School of China that one of its English instructors was sufficiently grounded in Chinese literature to be able to write poetry. We had another English teacher by the name of Yao K'ang-hou, a pupil of Mr. Ku Hung-ming, who was also well-versed in Chinese literature. The famous *Song of the Madman on Horseback* translated by Mr. Ku had actually been polished up by Mr. Yao and some of his fellow-pupils. In his classes, Mr. Yao was fond of instructing us in the art of translation, whether from English to Chinese or Chinese to English. Sometimes we would select our favorite English poems from our readers and had different Chinese translations made by a group of fellow students who wrote poetry. We would submit the results for criticism and correction by Mr. Yao and Mr. Hu. Mr. Yao often advised us to study the English translation of the Confucian *Analects* by Ku Hung-ming, which he held up as a model of the translator's art. However, five or six years later, I happened to read Ku's translation of *The Doctrine of the Mean* and was greatly disappointed with it. Perhaps in those days emphases were placed on free translations, in which the translator frequently strove after an "elegance of style" often at the expense of the original in language or spirit. And so our exercise in

translation served its own purpose of reminding us constantly of the differences and similarities between the Chinese and the Western languages, trying to decide how best to render a certain phrase in order to achieve elegance of style and at the same time communicate the original idea. I remember once we tried to translate an English poem in which occurred the word "scarecrow." Try as we might, for several days none of us could think of an apt equivalent for the word in Chinese that would be elegant as well as idiomatic. Recalling that experience now, I do not think our time was entirely wasted.

In my first attempts at versification, I shied away from the *lǔ* form because I thought it must be extraordinarily difficult, not having learned the art of matching parallelisms. After 1908, I occasionally tried my hand at a five-character *lǔ* poem to present to my friends, and discovered that it was not as difficult as all that; thereafter I frequently indulged in five-or seven-character *lǔ* compositions. Having become an initiate, I began to realize that the fine points of this game were actually much easier than they appeared to be; no content, emotion, or ideas were necessary; all it required was a kind of play on words, an ability to juggle allusions, a master of the meter, and a skill at matching parallel phrases, to string together the requisite lines of a *lǔ* poem. This particular form of poetry is most suitable to poems for all conventional social occasions, whether you are dedicating your lines to a royal patron or writing in farewell to a school friend; all you need to do is to sway your head back and forth a few times, think up the two middle lines in parallel construction, add a top and a bottom, and you have a poem. If it is to be a poem of specified rhyme or in echo of somebody else's rhyme, it would be even easier: just try to fit your lines to the rhymes. It is just because it is nothing but a convenient word-game that the *lǔ* form of poetry has come down to us through the ages without being able to abolish its rigid structural and rhyming rules. I was then reading more of Tu Fu's five-character *lǔ* poems than anyone else's, and my own five-character *lǔ* compositions showed his influence more than anyone else's. As to seven-character *lǔ*

poems, I found I could never write a single one to my own satisfaction, and so I abandoned the experiment after a few tries.

肆 在上海（二）

—

中国公学是因为光绪乙巳年（一九〇五）日本文部省颁布取缔中国留学生规则，我国的留日学生认为侮辱中国，其中一部分愤慨回国的人在海外创办的。当风潮最烈的时候，湖南陈天华投海自杀，勉励国人努力救国，一时人心大震动，所以回国的很多。回国之后，大家主张在国内办一个公立的大学。乙巳十二月中，十三省的代表全体会决议，定名为“中国公学”。次年（丙午，一九〇六）春天在上海新靶子路黄板桥北租屋开学。但这时候反对取缔规则的风潮已渐渐松懈了，许多官费生多回去复学了。上海那时还是一个眼界很小的商埠，看见中国公学里许多剪发洋装的少年人自己办学堂，都认为奇怪的事。政府官吏疑心他们是革命党，社会叫他们做怪物。所以赞助捐钱的人很少，学堂开门不到一个半月，就陷入了绝境。公学的干事姚弘业¹先生（湖南益阳人）激于义愤，遂于三月十三日投江自杀，遗书几千字，说，“我之死，为中国公学死也。”遗书发表之后，舆论都对他表敬意，社会受了一大震动，赞助的人稍多，公学才稍稍站得住。

我也是当时读了姚烈士的遗书大受感动的一个小孩子。夏天我去投考，监试的是总教习马君武先生。国文题目是“言志”，我不记得说了一些什么，后来君武先生告诉我，他看了我的卷子，拿去给谭心休、彭施滌先生传观，都说是为公学得了个好学生。

我搬进公学之后，见许多同学都是剪了辫子，穿着和服，拖着木屐的；又有一些是内地刚出来的老先生，带着老花眼镜，捧着水烟袋的。他们的年纪都比我大的多；我是做惯班长的人，到这里才感觉我是个小孩子。不久我已感得公学的英文数学都很浅，我在甲班里很不费气力。那时候，中国教育界的科学程度太浅，中国公学至多不过可比现在的两级中学程度，然而有好几门功课都不能不请日本教员来教。如高等代数，解析几何，博物学，最初都是日本人教授，由懂日语的同学翻译。甲班的同学有朱经农、李琴鹤等，都曾担任翻译。又有几位同学还兼任学校的职员或教员，如但懋辛便是我们的体操教员。当时的同学和我年

纪不相上下的，只有周烈忠、李骏、孙粹存、孙竞存等几个人。教员和年长的同学都把我们看作小弟弟，特别爱护我们，鼓励我们。我和这一班年事稍长，阅历较深的师友们往来，受他们的影响最大。我从小本来就没有过小孩子的生活，现在天天和这班年长的人在一块，更觉得自己不是个小孩子了。

中国公学的教员和同学之中，有不少的革命党人。所以在这里要看东京出版的《民报》，是最方便的。暑假年假中，许多同学把《民报》缝在枕头里带回内地去传观。还有一些激烈的同学往往强迫有辫子的同学剪去辫子。但我在公学三年多，始终没有人强迫我剪辫，也没有人劝我加入同盟会。直到二十年后，但懋辛先生才告诉我，当时校里的同盟会员曾商量过，大家都认我将来可以做学问，他们要爱护我，所以不劝我参加革命的事。但在当时，他们有些活动也并不瞒我。有一晚十点钟的时候，我快睡了，但君来找我，说，有个女学生从日本回国，替朋友带了一只手提小皮箱，江海关上要检查，她说没有钥匙，海关上不放行。但君因为我可以讲几句英国话，要我到海关上去办交涉。我知道箱子里是危险的违禁品，就跟了他到海关码头，这时候已过十一点钟，谁都不在了。我们只好快快回去。第二天，那位女学生也走了，箱子她丢在关上不要了。

我们现在看见上海各学校都用国语讲授，决不能想象二十年前的上海还完全是上海话的世界，各学校全用上海话教书。学生全得学上海话。中国公学是第一个用“普通话”教授的学校。学校里的学生，四川、湖南、河南、广东的人最多，其余各省的人也差不多全有。大家都说“普通话”，教员也用“普通话”。江浙的教员，如宋耀如²、王仙华、沈翔云诸先生，在讲堂上也都得勉强说官话。我初入学时，只会说徽州话和上海话；但在学校不久也就会说“普通话”了。我的同学中四川人最多；四川话清楚干净，我最爱学它，所以我说的普通话最近于四川话。二三年后，我到四川客栈（元记、厚记等）去看朋友，四川人只问，“贵府是川东，是川南？”他们都把我看作四川人了。

中国公学创办的时候，同学都是创办人，职员都是同学中举出来，所以没有职员和学生的界限。当初创办的人都有革命思想，想在这学校里试行一种民主政治的制度。姚弘业烈士遗书中所谓“以大公无我之心，行共和之法”，即是此意。全校的组织分为“执行”与“评议”两部。执行部的职员（教务干事，庶务干事，斋务干事）都是评议部举出来的，有一

定的任期，并且对于评议部要负责任。评议部是班长和室长组织成的，有监督和弹劾职员之权。评议部开会时，往往有激烈的辩论，有时直到点名熄灯时方才散会。评议员之中，最出名的是四川人龚从龙，口齿清楚，态度从容，是一个好议长。这种训练是很有益的。我年纪太小，第一年不够当评议员，有时在门外听听他们的辩论，不禁感觉我们在澄衷学堂的自治会真是儿戏。

二

我第一学期住的房间里有好几位同学都是江西萍乡和湖南醴陵人，他们都是邻县人，说的话我听不大懂。但不到一个月，我们很相熟了。他们都是二三十岁的人了；有一位钟文恢（号古愚）已有胡子，人叫他做钟胡子。他告诉我，他们现在组织了一个学会，叫做竞业学会，目的是“对于社会，竞与改良；对于个人，争自濯磨”，所以定了这个名字。他介绍我进这个会，我答应了。钟君是会长，他带我到会所里去，给我介绍了一些人。会所在校外北四川路厚福里。会中住的人大概多是革命党。有个杨卓林，还有个廖德璠，后来都是因谋革命被杀的。会中办事最热心的人，钟君之外，有谢寅杰和丁洪海两君，他两人维持会务最久。

竞业学会的第一件事就是创办一个白话的旬报，就叫做《竞业旬报》。他们请了一位傅君剑先生（号钝根）来做编辑。《旬报》的宗旨，傅君说，共有四项：一振兴教育，二提倡民气，三改良社会，四主张自治。其实这都是门面话，骨子里是要鼓吹革命。他们的意思是要“传布于小学校之青年国民”，所以决定用白话文。胡梓方先生（后来的诗人胡诗庐）作《发刊辞》，其中有一段说：

今世号通人者，务为艰深之文，陈过高之义，以为士大夫劝，而独不为彼什伯千万倍里巷乡闾之子计，则是智益智，愚益愚，智日少，愚日多也。顾可为治乎哉？

又有一位会员署名“大武”作文《论学官话的好处》，说：

诸位呀，要救中国，先要联合中国的人心。要联合中国的人心，先要统一中国的言语。……但现今中国的语言也不知有多少种，如何叫他们合而为一

呢？……除了通用官话，更别无法子了。但是官话的种类也很不少，有南方官话，有北方官话，有北京官话。现在中国全国通行官话，只须摹仿北京官话，自成为一种普通国语哩。

这班人都到过日本，又多数是中国公学的学生，所以都感觉“普通国语”的需要。“国语”一个目标，屡见于《竞业旬报》的第一期，可算是提倡最早的了。

《竞业旬报》第一期是丙午年（一九〇六）九月十一日出版的。同住的钟君看见我常看小说，又能作古文，就劝我为《旬报》作白话文。第一期里有我的一篇通俗《地理学》，署名“期自胜生”。那时候我正读《老子》，爱上了“自胜者强”一句话，所以取了个别号叫“希强”，又自称“期自胜生”。这篇文章是我的第一篇白话文字，所以我抄其中说“地球是圆的”一段在这里做一个纪念：

譬如一个人立在海边，远远的望这来往的船只。那来的船呢，一定是先看见他的桅杆顶，以后方能够看见他的风帆，他的船身一定在最后方可看见。那去的船呢，却恰恰与来的相反，他的船身一定先看不见，然后看不见他的风帆，直到后来方才看不见他的桅杆顶。这是什么缘故呢？因为那地是圆的，所以来的船在那地的低处慢慢行上来，我们看去自然先看见那桅杆顶了。那去的船也是这个道理，不过同这相反罢了。……诸君们如再不相信，可捉一只苍蝇摆在一只苹果上，叫他下面爬到上面来，可不是先看见他的头然后再看见他的脚么？……

这段文字已充分表现出我的文章的长处和短处了。我的长处是明白清楚，短处是浅显。这时候我还不满十五岁。二十五年来，我抱定一个宗旨，做文字必须要叫人懂得，所以我从来不怕人笑我的文字浅显。

我做了一个月的白话文，胆子大起来了，忽然决心做一部长篇的章回小说。小说的题目叫做《真如岛》，用意是“破除迷信，开通民智”。我拟了四十回的回目，便开始写下去了。第一回就在《旬报》第三期上发表（丙午十月初一日），回目は：

虞善仁疑心致疾 孙绍武正论祛迷

这小说的开场一段是：

话说江西广信府贵溪县城外有一个热闹的市镇叫做神权镇，镇上有一条街叫做福儿街。这街尽头的地方有一所高大的房子。有一天下午的时候，这屋的楼上

有二人在那里说话。一个是一位老人，年纪大约五十以外的光景，鬓发已略有些花白了，躺在一张床上，把头靠近床沿，身上盖了一条厚被，面上甚是消瘦，好像是重病的模样。一个是一位十八九岁的后生，生得仪容端正，气概轩昂，坐在床前一只椅子上，听那个老人说话。……

我小时痛恨道教，所以这部小说的开场就放在张天师的家乡。但我实在不知道贵溪县的地理风俗，所以不久我就把书中的主人翁孙绍武搬到我们徽州去了。

《竞业旬报》出到第十期，便停办了。我的小说续到第六回，也停止了。（一九〇八）三月十一日，《旬报》复活，第十一期才出世。但傅君剑已不来了，编辑无人负责，我也不大高兴投稿了。到了戊申七月，《旬报》第二十四期以下就归我编辑。从第二十四期到第三十八期，我做了不少的文字，有时候全期的文字，从论说到时间，差不多都是我做的。《真如岛》也从二十四期上续作下去，续到第十一回，《旬报》停刊了，我的小说也从此停止了。这时期我改用了“铁儿”的笔名。

这几十期的《竞业旬报》给了我一个绝好的自由发表思想的机会，使我可以把在家乡和学校得着的一点点知识和见解，整理一番，用明白清楚的文字叙述出来。《旬报》的办事人从来没有干涉我的言论，所以我能充分发挥我的思想，尤其是我对于宗教迷信的思想。例如《真如岛》小说第八回里，孙绍武这样讨论“因果”的问题：

这“因果”二字，很难说的。从前有人说，“譬如窗外这一树花儿，枝枝朵朵都是一样，何曾有什么好歹善恶的分别？不多一会，起了一阵狂风，把一树花吹一个‘花落花飞飞满天’，那许多花朵，有的吹上帘栊，落在锦茵之上；有的吹出墙外，落在粪溷之中。这落花的好坏不同，难道好说是这几枝花的善恶报应不成？”这话很是，但是我的意思却还不止此。大约这因果二字是有的。有了一个因，必收一个果。譬如吃饭自然会饱，吃酒自然会醉。有了吃饭吃酒两件原因，自然会生出醉饱两个结果来。但是吃饭是饭的作用生出饱来，种瓜是瓜的作用生出新瓜来。其中并没有什么人为之主宰。如果有什么人为主宰，什么上帝哪，菩萨哪，既能罚恶人于既作孽之后，为什么不能禁之于未作孽之前呢？……“天”要是真有这么大的能力，何不把天下的人个个都成了善人呢？……“天”既生了恶人，让他在世间作恶，后来又叫他受许多报应，这可不是书上说的“出尔反尔”么？……总而言之，“天”既不能使人不作恶，便不能罚那恶人。……

落花一段引的是范缜的话（看本书第二章），后半是我自己的议论。这是很不迟疑的无神论。这时候我另在《旬报》上发表了一些“无鬼

丛话”，第一条就引用司马温公“形既朽灭，神亦飘散，虽有剐烧舂磨，亦无所施”的话，和范缜“神之于形，犹利之于刀”的话（参看第二章）。第二条引苏东坡的诗“耕田欲雨刈欲晴，去得顺风来者怨。若使人人祷辄遂，造物应须日千变”。第三条痛骂《西游记》和《封神榜》，其中有这样的话：

夫士君子处颓敝之世，不能摩顶放踵敞口焦舌以挽滔滔之狂澜，曷若隐遁穷遂，与木石终其身！更安忍随波逐流，阿谀取容于当世，用自私利其身？（本条前面说《封神榜》的作者把书稿送给他的女儿作嫁资，其婿果然因此发财。所以此处有“自私利”的话。）天壤间果有鬼神者，则地狱之设正为此辈！此其人更安有著书资格耶！（“丛话”原是用文言作的）。³

这是戊申（一九〇八）年八月发表的。谁也想不到说这话的小孩子在十五年后（一九二三）居然很热心的替《西游记》作两万字的考证！如果他有好材料，也许他将来还替《封神榜》作考证哩！

在“无鬼丛话”的第三条里，我还接着说：

《王制》有之：“托于鬼神时日卜筮以乱众者，诛。”吾独怪夫数千年来之掌治权者，之以济世明道自期者，乃懵然不之注意，惑世诬民之学说得以大行，遂举我神州民族投诸极黑暗之世界！嗟夫，吾昔谓“数千年来仅得许多脓包皇帝，混帐圣贤”，吾岂好詈人哉？吾岂好詈人哉？

这里很有“卫道”的臭味，但也可以表现我在不满十七岁时的思想路子。

⁴“丛话”第四条说：

吾尝持无鬼之说，论者或咎余，谓举一切地狱因果之说而摧陷之，使人人敢于为恶，殊悖先王神道设教之旨。此言余不能受也。今日地狱因果之说盛行，而恶人益多，民德日落，神道设教之成效果何如者！且处兹思想竞争时代，不去此种魔障，思想又乌从而生耶？

这种夸大的口气，出在一个十七岁的孩子的笔下，未免叫人读了冷笑。但我现在回看我在那时代的见解，总算是自己独立想过几年的结果，比起现今一班在几个抽象名词里翻筋斗的少年人们，我还不感觉惭愧。

《竞业旬报》上的一些文字，我早已完全忘记了。前年中国国民党的中央宣传部曾登报征求全份的《竞业旬报》，——大概他们不知道这

里面一大半的文字是胡适做的，——似乎也没有效果。我靠几个老朋友的帮忙，搜求了几年，至今还不曾凑成全份。今年回头看看这些文字，真有如隔世之感。但我很诧异的是有一些思想后来成为我的重要出发点的，在那十七八岁的时候已有了很明白的倾向了。例如我在《旬报》第三十六期上发表一篇《苟且》，痛论随便省事不肯彻底思想的毛病，说“苟且”二字是中国历史上的一场大瘟疫，把几千年的民族精神都瘟死了。我在《真如岛》小说第十一回（《旬报》三十七期）论扶乩的迷信，也说：

程正翁，你想罢。别说没有鬼神，即使有鬼神，那关帝吕祖何等尊严，岂肯听那一二张符诀的号召？这种道理总算浅极了，稍微想一想，便可懂得。只可怜我们中国人总不肯想，只晓得随波逐流，随声附和。国民愚到这步田地，照我的眼光看来，这都是不肯思想之故。所以宋朝大儒程伊川说“学原于思”，这区区四个字简直是千古至言。——郑先生说到这里，回过头来，对翼华翼璜道：程子这句话，你们都可写作座右铭。“学原于思”一句话是我在澄衷学堂读朱子《近思录》时注意到的。我后来的思想走上了赫胥黎和杜威的路上去，也正是因为我从十几岁时就那样十分看重思想的方法了。

又如那时代我在李莘伯办的《安徽白话报》上发表的一篇《论承继之不近人情》（转载在《旬报》廿九期），我不但反对承继儿子，并且根本疑问“为什么一定要儿子？”此文的末尾有一段说：

我如今要荐一个极孝顺的儿子给我们中国四万万同胞。这个儿子是谁呢？便是“社会”。……

你看那些英雄豪杰仁人义士的名誉，万古流传，永不湮没；全社会都崇拜他们，纪念他们；无论他们有子孙没有子孙，我们纪念着他们，总不少减；也只为他们有功于社会，所以社会永远感谢他们，纪念他们。阿哈，这些英雄豪杰仁人义士的孝子贤孙多极了，多极了！……一个人能做许多有益于大众有益于大众的事业，便可以把全社会都成了他的孝子贤孙。列位要记得：儿孙，亲生的，承继的，都靠不住。只有我所荐的孝子顺孙是万无一失的。

这些意思，最初起于我小时看见我的三哥出继珍伯父家的痛苦情形，是从一个真问题上慢慢想出来的一些结论。这一点种子，在四五年后，我因读培根（Bacon）的论文有点感触，在日记里写成我的《无后主义》。在十年之后，又因为我母亲之死引起了一些感想，我才写成《不朽：我的宗教》一文，发挥“社会不朽”的思想。

这几十期的《竞业旬报》，不但给了我一个发表思想和整理思想的机会，还给了我一年多作白话文的训练。清朝末年出了不少的白话报，如《中国白话报》，《杭州白话报》，《安徽俗话报》，《宁波白话报》，《潮州白话报》，都没长久的寿命。光绪宣统之间，范鸿仙等办《国民白话日报》，李莘伯办《安徽白话报》，都有我的文字，但这两个报都只有几个月的寿命。《竞业旬报》出到四十期，要算最长寿的白话报了。我从第一期投稿起，直到他停办时止，中间不过有短时期没有我的文字。和《竞业旬报》有编辑关系的人，如傅君剑，如张丹斧，如叶德争，都没有我的长久关系，也没有我的长期训练。我不知道我那几十篇文字在当时有什么影响，但我知道这一年多的训练给了我自已绝大的好处。白话文从此形成了我的一种工具。七八年之后，这件工具使我能够在中国文学革命的运动里做一个开路的工人。

三

我进中国公学不到半年，就得了脚气病，不能不告假医病。我住在上海南市瑞兴泰茶叶店里养病，偶然翻读吴汝纶选的一种古文读本，其中第四册全是古诗歌。这是我第一次读古体诗歌，我忽然感觉很大的兴趣。病中每天读熟几首。不久就把这一册古诗读完了。我小时曾读一本律诗，毫不觉得有兴味；这回看了这些乐府歌辞和五七言诗歌，才知道诗歌原来是这样自由的，才知道做诗原来不必先学对仗。我背熟的第一首诗是《木兰辞》，第二首是《饮马长城窟行》，第三是《古诗十九首》。一路下去，直到陶潜、杜甫，我都喜欢读。读完了吴汝纶的选本，我又在二哥的藏书里寻到了《陶渊明集》和《白香山诗选》，后来又买了一部《杜诗镜诠》。这时代我专读古体歌行，不肯再读律诗；偶然也读一些五七言绝句。

有一天，我回学堂去，路过《竞业旬报》社，我进去看傅君剑，他说不久就要回湖南去了。我回到了宿舍，写了一首送别诗，自己带给君剑，问他像不像诗。这诗我记不得了，只记得开端是“我以何因缘，得交傅君剑”。君剑很夸奖我的送别诗，但我终有点不自信。过了一天，他送了一首《留别适之即和赠别之作》来，用日本卷笺写好，我打开一看，真吓了一跳。他诗中有“天下英雄君与我，文章知己友兼师”两句，在这刚满十五岁的小孩子的眼里，这真是受宠若惊了！“难道他是说谎话哄

小孩子吗？”我忍不住这样想。君剑这副诗笺，我赶快藏了，不敢给人看。然而他这两句鼓励小孩子的话可害苦我了！从此以后，我就发愤读诗，想要做个诗人了。有时候，我在课堂上，先生在黑板上解高等代数的算式，我却在斯密司的《大代数》底下翻《诗韵合璧》，练习簿上写的不是算式，是一首未完的纪游诗。一两年前我半夜里偷点着蜡烛，伏在枕头上演习代数问题，那种算学兴趣现在都被做诗的新兴趣赶跑了！我在脚气病的几个月之中发见了一个新世界，同时也决定了我一生的命运。我从此走上了文学史学的路，后来几次想矫正回来，想走到自然科学的路上去，但兴趣已深，习惯已成，终无法挽回了。

丁未正月（一九〇七）我游苏州，三月与中国公学全体同学旅行到杭州，我都有诗纪游。我那时全不知道“诗韵”是什么，只依家乡的方音，念起来同韵便算同韵。在西湖上写了一首绝句，只押了两个韵脚，杨千里先生看了大笑，说，一个字在“尤”韵，一个字在“萧”韵。他替我改了两句，意思全不是我的了。我才知道做诗要硬记诗韵，并且不妨牺牲诗的意思来迁就诗的韵脚。

丁未五月，我因脚气病又发了，遂回家乡养病（我们徽州人在上海得了脚气病，必须赶紧回家乡，行到钱塘江的上游，脚肿便渐渐退了）。我在家中住了两个多月，母亲很高兴。从此以后，我十年不归家（一九〇七——一九一七），那是母亲和我都没有料到的。那一次在家，和近仁叔相聚甚久，他很鼓励我作诗。在家中和路上我都有诗。这时候我读了不少白居易的诗，所以我这时期的诗，如在家乡做的《弃父行》，很表现《长庆集》的影响。

丁未以后，我在学校里颇有少年诗人之名，常常和同学们唱和。有一次我做了一首五言律诗，押了一个“赧”字韵，同学和教员和作的诗有十几首之多。同学中如汤昭（保民），朱经（经农），任鸿隼（叔永），沈翼孙（燕谋）等，都能作诗；教员中如胡梓方先生，石一参先生等，也都爱提倡诗词。梓方先生即是后来出名的诗人胡诗庐，这时候他教我们的英文，英文教员能做中国诗词，这是当日中国公学的一种特色。还有一位英文教员姚康侯先生，是辜鸿铭先生的学生，也是很讲究中国文学的。辜先生译的《痴汉骑马歌》，其实是姚康侯先生和几位同门修改润色的。姚先生在课堂上常教我们翻译，从英文译汉文，或从汉文译英文。有时候，我们自己从读本里挑出爱读的英文诗，邀几个能诗的同学分头翻译成中国诗，拿去给姚先生和胡先生评改。姚先生常劝我

们看辜鸿铭译的《论语》，他说这是翻译的模范。但五六年后，我得读辜先生译的《中庸》，感觉很大的失望。大概当时所谓翻译，都侧重自由的意译，务必要“典雅”，而不妨变动原文的意义与文字。这种训练也有他的用处，可以使学生时时想到中西文字异同之处，时时想某一句话应该怎样翻译，才可算“达”与“雅”。我记得我们试译一首英文诗，中有scarecrow一个字，我们大家想了几天，想不出一个典雅的译法。但是这种工夫，现在回想起来，不算是浪费了的。

我初学做诗，不敢做律诗，因为我不曾学过对对子，觉得那是很难的事。戊申（一九〇八）以后，我偶然试做一两首五言律诗来送朋友，觉得并不很难，后来我也常常做五七言律诗了。做惯律诗之后，我才明白这种体裁是似难而实易的把戏；不必有内容，不必有情绪，不必有意思，只要会变戏法，会搬运典故，会调音节，会对对子，就可以诌成一首律诗。这种体裁最宜于做没有内容的应酬诗，无论是殿廷上应酬皇帝，或寄宿舍里送别朋友，把头摇几摇，想出了中间两联，凑上一头一尾，就是一首诗了；如果是限韵或和韵的诗，只消从韵脚上去着想，那就更容易了。大概律诗的体裁和步韵的方法所以不能废除，正因为这都是最方便的戏法。我那时读杜甫的五言律诗最多，所以我做的五律颇受他的影响。七言律诗，我觉得没有一首能满意的，所以我做了几首之后就不做了。

现在我把我那时做的诗抄几首⁵在这里，也算一个时期的纪念：

秋日梦返故居（戊申八月）

秋高风怒号，客子中怀乱。

抚枕一太息，悠悠归里闾。

入门拜慈母，母方抚孙玩。

齐儿见叔来，牙牙似相唤。

拜母复入室，诸嫂同炊爨。

问答乃未已，举头日已旰。

方期长聚首，岂复疑梦幻？

年来历世故，遭际多忧患。

耿耿苦思家，听人讥斥鷃。

（玩字原作弄，是误用方音，前年改玩字。）

军人梦（戊申）

（译Thomas Campbell's *The Soldier's Dream*）

笳声销歇暮云沉，耿耿天河灿列星。

战士创痍横满地，倦者酣眠创者逝。
枕戈藉草亦遽然，时见刍人影摇曳。
长夜沉沉夜未央，陶然入梦已三次。

梦中忽自顾，身已离行伍，
秋风拂襟袖，独行殊踽踽。
惟见日东出，迎我归乡土。
纵横阡陌间，尽是钓游迹。

时闻老农刈稻歌，又听牛羊噪山脊。
归来戚友咸燕集，誓言不复相离别。
娇儿数数亲吾额，少妇情深自呜咽。
举室争言君已倦，幸得归休免征战。
惊回好梦日熏微，梦魂渺渺成虚愿。

（刍人原作刍灵，今年改。）

酒醒（己酉）

酒能销万虑，已分醉如泥。
烛泪流干后，更声断续时。
醒来还苦忆，起坐一沉思。
窗外东风峭，星光淡欲垂。

女优陆菊芬演《纺棉花》（己酉）

永夜亲机杼，悠悠念远人。
朱弦纤指弄，一曲翠眉颦。
满座天涯客，无端旅思新。
未应儿女语，争奈不胜春！

秋柳 有序（己酉）

秋日适野，见万木皆有衰意。而柳以弱质，际兹高秋，独能迎风而舞，意态自如。岂老氏所谓能以弱者存耶？感而赋之。

但见萧飏万木摧，尚余垂柳拂人来。
西风莫笑长条弱，也向西风舞一回。

（西风莫笑，原作“凭君漫说”，民国五年改。长条原作“柔条”，十八年改。）

V BEFORE GOING ABROAD

1

In the month of October, 1908 (戊申九月), a great student trouble took place in the Public School of China, the upshot of which was the withdrawal from school of the majority of the students, who organized separately a New Public School of China. This student trouble was precipitated by a constitutional question.

In its early stages the Public School was entirely modeled on a Republic, with the Legislative Department its highest legislative organ and officials of the Executive Department selected through general election. Unfortunately, after being in force for nine months the system was revised. There were several reasons for this revision: First of all, the number of the Japanese-returned students who were founders of the school had gradually decreased, with a corresponding increase of newly-enrolled students, so that there could no longer be such a complete identification of administration personnel and student body. Secondly, the government and the public at large had always been intensely suspicious of this kind of democratic system. Thirdly, having neither buildings nor endowments of its own, the School felt the need for requesting official subsidies, and thus could not afford to invite public distrust as to its internal administration.

For these various reasons, those responsible for the Public School had in the winter of 1906 invited a number of prominent public figures such as Cheng Hsiao-hsü, Chang Ch'ien, and Hsiung Hsi-ling to serve as Directors for the School, having amended its constitution to make the Board of Directors instead of the student body the governing organ of the school. On basis of the new constitution, the Board of Directors had elected Cheng Hsiao-hsü as superintendent of the School; and following Cheng's resignation a year later, Hsia Chin-kuan

was elected to serve in the same capacity. Both these gentlemen were celebrated poets; they seldom came to the school, and had not been particularly aware of any objections to the superintendent system.

However, under the Board of Directors and the Superintendent, the executive officers of the School could no longer be elected by and from among the students. The new constitution did not provide for Legislative Department, and the elective officers were now full-time personnel appointed by the school to serve as Dean, Business Manager, Dormitory Proctor, etc. These officers, having been saddled with the dual responsibility of fund-raising and school administration, naturally desired to have a reasonable job security in order to discharge their duties. Furthermore, as I have mentioned, the amendment of the constitution had not been without its legitimate reasons. But that was not the way we young people looked at it. The Constitution of the Public School of China had explicitly stated that, "Amendments are not to be made unless by a two-thirds majority of the entire student body." That was the one and only way provided by our Constitution whereby it may be amended, and it was unlawful for three of the Executive Officers to have taken it upon themselves to change the Constitution, as it was unlawful to abolish the Legislative Department. There were of course questions of personalities involved also, since "familiarity breeds contempt," and the fact is, many of the students were contemporaries and old friends of the chosen officers. Those who had devoted themselves to studying naturally had shown great progress in scholarship, while on the other hand those elected to be officers could not have helped neglecting their studies in the discharge of their academic duties, thus causing them to suffer by comparison with their erstwhile schoolmates. When questions of law and personalities got mixed up like this, trouble was inevitable.

With the representative system of school-government abolished, the student body organized a new "Alumni Association," which was in fact equivalent to the present-day student self-governments. After months of controversy between the Alumni Association and the three

Executive Officers, the latter consented to submit the Constitution for amendment by the student body. Another few months' time was consumed during which the Alumni Association produced a draft amendment embodying the various amendments proposed, which was finally adopted as the Constitution of the School after repeated conferences. This product of year-long debates and negotiations was rejected by the new superintendent Mr. Hsia as well as the Executive Officers.

On the 3rd of the Ninth Month, 1908, the Alumni Association held a mass meeting to report on the progress of the negotiations. Before the meeting dispersed the Superintendent posted a notice completely denying the students any right to amend the Constitution, which in fact totally contradicted the previous notice issued by the Executive Officers recognizing the right of the student body to amend the Constitution. There followed two more notices from the school authorities. One of them stated: "It is a rule of the School strictly to forbid any assembly and speech-making. ... The Alumni Association is hereby warned against any further meetings." The other claimed student representatives Chu Ching and Chu Fu-hua to be "ringleaders and agitators in inflaming student opinion by secretly distributing handbills, and insulting officers of the school by demanding publication of their self-amended Constitution. For willful conduct designed to destroy the school despite repeated warnings," they were to be "dismissed immediately according to school regulations and allowed one day to move out of the school."

On the 4th the entire student body pledged to go on a strike and held a mass meeting on the athletic field. In the afternoon another notice was posted in the name of the Executive Officers, ordering the dismissal of seven of the student leaders, adding that "in the event the threatened strike is carried out all students participating in it will be dismissed and the student body will be reorganized." On the 5th, some of the instructors came out to mediate, hoping to ask the Board of Directors to take a hand and salvage the situation. But the Board of

Directors refused to meet, and at a students' mass meeting held on the 7th, a resolution was passed to prepare for the necessary measures in the event the school was disbanded.

On the 8th one of the Directors, Mr. Ch'en San-li assumed the role of mediator, but the sentiment of the entire school had been aroused to a point where it was difficult to pacify. On the 9th, the school authorities posted a notice to the following effect: "It has been decided that the dining hall will temporarily suspend all meals beginning Sunday. All students involved in the present trouble against their wishes will withdraw from school and seek temporary lodgings outside. As of 1 p.m. today expenses for room and board will be issued at the headquarters of the World Student Fellowship Association. When the present affair has been settled the administration of the school will make a public announcement for the resumption of classes."

This oppressive measure immediately aroused a public ire from among the preponderant majority of the students. They decided to quit school in a body, and forthwith formed a committee to prepare for the establishment of a school of their own. On the appointed day of mass withdrawal, it was raining cats and dogs, though it did not dampen the spirits of all concerned, nor deter them from moving their belongings to a few makeshift school-rooms newly rented at an address in Ch'ing Hsiang Lane in Elgin Road. A cook was hired to set up the school-kitchen, but there were not even enough tables and benches or bowls and dishes for the dining hall. But everybody felt that this was his own school so, instead of complaining, was happy to dig down into his own pockets for money to get the new institution started. Some of the students pawned their silken clothing and gold watches for money to contribute to the incipient school.

Within ten days arrangements had been completed to open the new school, and even a faculty had been assembled and a curriculum fixed in readiness to hold classes. The name of the establishment was decided to be "The New Public School of China"; it started with an

enrollment of one hundred sixty or seventy students. During the course of this student trouble, I refrained at first from participating in the controversies between my fellow students on the one hand and the Executive Officers on the other, because I was only a first year student and had in addition been away on a prolonged sick leave. But by the time the demonstrations had reached their height, I was elected to be the secretary of the mass meeting, and much of the writing for the minutes and the manifestoes was from my hand. Although not included in the list of the dismissed, I was among those who withdrew from school. In the new school, the three student leaders, Chu Ching, Li Ch'in-huo and Lo Chün-i were elected Executive Officers, and many of our former instructors signified their willingness to teach. The rebel school had started with the sympathy of a part of the public; still few people actually came out with contributions of money, and the question of financial maintenance was a serious one. Mr. Li Ch'in-huo, who served as Executive Officer in charge of studies, one day invited me for a chat in his room and told me he wished to have me undertake the English instruction for the lower grades, with thirty hours of class work a week and a monthly salary of eighty dollars. But he made it plain in advance that with us fellow students turning teachers we could not expect to draw the full salary because the finances of the school were such that part of our pay would always be in arrears.

At this time I had not yet reached my seventeenth birthday; I had switched schools three times and was still without a diploma to show for my years of study, and by resuming school now I would be able to count on graduating the following year. On the other hand, my circumstances were such as would make it impossible for me to resume schooling. Ours had been a poor family to start with; my father had died leaving us only a few thousand taels in savings, invested in some business of our hometowners, on the modest dividends of which our whole family had depended for a living. Later, the businesses in which we had an interest failed and all the family

managed to salvage was some portion of the assets. Fortunately, my Second Elder-Brother was a man of business acumen; he took to commuting between Hankow and Shanghai, and succeeded, within a few years with the help of some money invested with him by his schoolmates, in "parlaying" what little we had into a fairly sizable partnership called the Jui Shing T'ai Tea Shop. More recently, however, he had undergone a personal change, from a serious-minded and careful merchant into a dissolute seeker of pleasure; with his personal expenses increased and his energies diverted from his business, he had to entrust the management of the tea shop more and more in other and less reliable hands, with the result that the business had been losing ground every year. Eventually, our family was so heavily in debt that the Shanghai store had to go into receivership. By the latter half of 1908, all that was left to our name was an unprofitable distillery business in Hankow, known as the Liang I Chan. There followed months during which I could not afford the fees to live in the dormitories, and had to find lodgings in the offices of the *Ching Yeh Journal* (also located in Ch'ing Hsiang Lane). Beginning July, when I took over the editorship of the Journal, the publication gave me an honorarium of \$10 for every issue published, in addition to room and board. But my mother, who remained at home, was soon to look for remittance from me for her support. With bankruptcy staring our family in the face, Mother thought it necessary for me to get my marital problem out of the way, and so sent me a letter to that effect. To this proposition I did not hesitate to give an unequivocal no, giving the ostensible reason that my studies should come first, but in reality I was well aware of the fact that we did not have the money for the family to take care of my wedding, nor did I have any money with which to support a family.

It was at this juncture that the proposal came from Mr. Li Ch'in-huo for me to serve on the teaching staff of the New Public School. After a moment thinking it over, I accepted. Thereafter, I taught English six hours a day and in addition had composition papers to

correct. But for a youthful and energetic person of seventeen or eighteen, it did not seem too heavy a load, and so I carried it on until the winter of the second year(1909) when the New Public School of China was disbanded.

So far as my own knowledge of English was concerned, I was far from qualified to teach. But I was a conscientious teacher, willing to put in a lot of time and go through much drudgery in preparing my lessons, and so managed not to meet with any embarrassment in the course of that year. From the ranks of my two classes of students, there were several who were later to become famous: Jao Yü-t'ai, Yang Hsing-fu, Yen Chuang, these had all learned English under my instruction. Later I even took a few students from outside the school, among whom was one Chang Hsi-jo. It was a pity that none of these went on to make English Literature his major field of study; otherwise, I would have really claimed the credit upon myself!

After the *Ching Yeh Journal* ceased publication, I moved into the living quarters of the New Public School. It was a hard life for me, this year of teaching, but it proved to be vastly beneficial. In my two years at the Public School of China I had been influenced greatly by two English instructors, Yao K'ang-hou and Wang Yün-wu, both of whom laid especial emphasis on the analysis of English grammar. That was why, though I spoke very little English at the time, I was fond of analyzing its grammatical construction, particularly as contrasted with Chinese grammar. Now that I became an English instructor myself, I felt the need even more for straightening out my grammar, word by word and phrase by phrase. That was why in that one year of teaching, although I did not read much in English literature, I had a splendid opportunity of practicing in the construction of the English language.

* * * * *

The New Public School of China struggled along for more than a year under conditions of the utmost difficulty—it was a chapter that

had in it something of the epic of tragedy. In those days, no schools bothered much with such educational accoutrements as libraries and laboratories; all they hoped to attain to qualify as a good school was to have good instructors, stiff courses and a strict discipline. Because of the circumstances attending the birth of the school, all the students had vowed to "make good" and they managed to do well in both school work and administration. But there was no dodging the fact that funds were woefully lacking; the faculty regularly could only draw partial salaries, and the Officers frequently were forced to swallow bitter humiliation from the landlord and the municipal rate-collector for inability to pay the bills: many was the time we schoolmates had to pool our resources for a loan to the school authorities to pay these bills. Eventually, one of the Officers, Mr. Chu Ching-nung (Chu Ching), driven to the end of his ropes in matters of school finances, almost plunged himself into tragedy. In a fit of nervous worry, he had wandered outside in the streets as far as Siccawei where he threw himself into a small river. Fortunately, he was rescued by passersby and failed to drown.

By this time the original Public School of China had begun construction on its new buildings in Woosung, but it could attract but a few students. Students from the interior, upon arriving in Shanghai and learning about the feud between the two Public Schools, were in the main sympathetic with the new school. As a consequence, the New Public School always had a larger enrollment than the old Public School. For instance a group of students from Shensi Province, headed by Chang Hsi-jo, had arrived in Shanghai to find that they were too late for the entrance examinations of the new school; they chose to hire rooms for themselves in the neighborhood of the New Public School to study on their own, rather than register at the old school. So the situation was such that as long as the New Public School remained in business, so long the original Public School of China would be insecure in its development. It was utterly out of the expectation of the administration of the old school that we could have held out for so

long. They were also aware that we had dispatched our own fund-raisers to different provinces, including Chu Fu-hua, Chu Ching-nung, Hsüeh Ch'uan-pin and others, who, armed with strong letters of recommendation, might well succeed in obtaining large official subsidies to carry on the new school. Should our fund-raising campaign become a success it would have been even more difficult to resolve the deadlock.

Among the three Executive Officers of the old Public School, there was one, Mr. Chang Pang-chieh, who had been traveling on a fund-raising campaign in other provinces when the student trouble had been in progress. When he returned, he tried his utmost to advocate a peaceful settlement of the controversy and to reinstate those of us students who had voluntarily withdrawn from school. It was a matter of regret that, overworked and in ill-health as a result of his part in the school's building program, Mr. Chang had not lived long enough to see the merger of the two schools. Meanwhile, the Chairman of the Board of Trustees for the New Public School, Mr. Li P'ing-shu had also come out in favor of a peaceful settlement and merger in view of the difficulty in maintaining the new school financially. The conditions for settlement, as were eventually worked out, were to the effect that: All students of the New Public School who desired to go back were allowed to do so, with full credit for work done while in the new school; and all indebtedness of the New Public School would be assumed by the old school. In the period of one year the New Public School had incurred obligations to the tune of ten thousand dollars or more, and the situation was too desperate for any long-range fund-raising program to save. Nor could those who had assumed the responsibility of running the school find it within their power to hold on indefinitely, being themselves young men who had taken up the task of education at the expense of their own studies. For all these reasons, in the Tenth Month of 1909 (乙酉十月), the conditions for settlement were accepted by the New Public School and a resolution was passed to disband. All those who wanted to do so were free to

return to the old school. I wrote three poems for the occasion, two five-character lü and one seven-character lü, as inscription to some group photographs of the entire student body and faculty of the soon-to-be-dissolved school.

In these lines, which were hardly poetry, I expressed a sense of sadness at the imminent end of what was to be a noble experiment in academic freedom and sounded a reminder to our pledge never to capitulate. These feelings were shared by many of my schoolmates, who felt it impossible to return to the fold after the merger of the two schools. The experience of that one year, dedicated to an ideal, to a group spirit and cooperative life, had left an indelible mark on all of the one hundred and sixty-odd of us who had had a part in it.

* * * * *

When the idealism of youth suffers a setback the reaction is likely to be an extreme one. During the two years 1908-1909, our family affairs had deteriorated beyond salvaging. In the latter year my Eldest Brother and Second Elder-Brother went home and decided to divide the few paternal acres among us; I wrote home saying that, being able to make my own living, I would not want my share. Actually, there had been precious little left of the family property to divide, and each one of us was to come in for a share of only part of a house and a few *mou* of land. In that year my mother lost her dearly beloved younger sister and a younger brother, and she herself also came down with illness. Upon the disbandment of the New Public School there came to me two or three hundred dollars in back salary and a prospect of uncharted future and rudderless sailing. I could not muster up enough courage to go home. Instead, I stayed on in Shanghai, hoping to find some job whereby to feed myself and support my family. In the midst of all that worry and ennui I found myself mixed up with a bunch of loose-living friends, and with them I had my taste of dissipation.

There had been a German instructor at the New Public School named Ottomeir, whose father was German and mother Chinese. He spoke mandarin as well as the Cantonese and Shanghai dialects, and was adept at anything Chinese. When I left the new school I moved into a house next door to his; the two houses were linked with a passage, with our German friend occupying the east apartment and a few Szechuan friends and I occupying the west apartment. Among my roommates were Lin Chün-mo, Tan Nu-kang (Mou-hsing) and others, and not far from us resided T'ang Kuei-liang, who was a son of Mr. T'ang Ts'ai-ch'ang. These people were all Japanese-returned students, connected with the Revolutionary Party; it was a period during which revolutionary attempts at various places were uniformly abortive, resulting in the death of many party members, and these men were in uniformly low spirits, seeking a release in anything and everything. Ottomeir used to ask them to join in a game of *mah jongg*, which I soon learned to play. We did not gamble with money but the winner would stake everybody to a dinner at Ya Hsü Yüan. All of us fellows boasted fine drinking capacities, and would each have a large jug of wine in front of him from which he would help himself from time to time. From gambling to drinking, from drinking to the summoning of sing-song girls, and from sing-song girls to visiting brothels—inside of a couple of months I became an old-hand at them all.

Fortunately, we were all short of money and were constrained to indulge in no more than a few of the poor man's pastimes: in gambling, we went as far as staking dinners; in visiting brothels, we stopped short at the more sedate pleasures of throwing a dinner party and playing a few rounds of *mah jongg* on the premises. Occasionally, we would go in a group to the theater. Soon Lin Chün-mo and T'ang Kuei-liang proposed that we study opera-singing, and a professional with the stage name of Hsiao Hsi Lu (Little Joyful Blessing) was engaged to give us lessons. Among the schoolmates was one Ouyang

Yü-ch'ien, who later was to become a famous exponent of the Chinese theater. But I proved to be the worst pupil of the lot; try as I might I could hardly master a single bar of melody, and in less than two days I gave up the attempt. In addition, I had a circle of younger friends, including my fellow-provincials Hsü I-sun, Ch'eng Lo-t'ing and Chang Hsi-lü, and my former schoolmates such as Cheng Chung-Ch'eng, Chang Shu-ch'uan and Cheng T'ieh-ju. I-sun tried every now and then to talk me out of my bitterness and willful apprentice in dissipation. But he was going to school at Fuhtan College in Woosung and did not get to see me as often as my daily cronies in play, so I continued for a period of months muddling through my days and making a mess of my life. Sometimes we had all-night sessions of *mah jongg*; at other times, we would have drinking bouts that lasted through days.

* * * * *

One night I got myself into trouble. In the evening we had been drinking rather heavily in a brothel, from where we went to another place for a "night-cap." It was raining heavily that night, and the rain had kept up for several hours without let. Chün-mo and Kuei-liang wanted me to stay for a game of *mah jongg*, but I declined because I had to teach in the morning (I was then employed by the Shanghai Municipal Council's Public School For Chinese, teaching Chinese to little boys). So I hired a rickshaw and left the party by myself. My companions, having heard me talk sensibly and having been treated to a display of my poetic talents on the back of a stack of "sing-song girl tickets," were satisfied that I wasn't drunk, so they suffered me to go home alone.

The fact is I was quite drunk; my sparkling conversation and verification had all been the work of the sub-conscious, which were to be totally lost to my memory. As soon as I stepped outdoors and onto the rickshaw I fell asleep.

I did not wake up until the following morning, but I had hardly opened my eyes before I realized I was not lying in bed by on the

hardness of the floor! I suspected that I had been drunk the night before and had wound up on the floor of my apartment; I gave a yell: "Lao P'eng!"—for that was the name of a Hunanese servant I had at my service. After one or two tries without response I managed to sit up and work my eyes open.

Strange! I was lying in a small and dark room, and the only light seemed to be coming from in front of me and no doors seemed to be visible to my gaze. I took a better look, and seemed to perceive a row of iron grilling not far beyond the doorway. I kept still and listened, and heard the noise of leather-boots walking outside the grilling. Presently, rise and fall of the footsteps came near, and I found them to be those of a Chinese policeman.

Then it began to dawn on me, this was probably the police-station, though I was at a loss to explain my own presence there. I thought to rise and make an inquiry, when I discovered that one of my feet was unshod and that all my clothes had been wet through. I groped around in the dark for some time without finding my other shoe; finally I resigned to standing up in one stockinged foot, felt my way out along the wall and hailed the policeman across the grilling. I asked him where I was.

"This is the police-station," he said.

"How did I get in here?"

"You were brought in here after midnight," he said. " You had been drunk and you had assaulted and wounded a policeman."

"When can I go out?"

"It's just daybreak; there's plenty of time! Somebody will come at eight o'clock, and then you'll know."

In the light I observed that the old fur-lined robe which I had on was completely wet through and splattered with mud. I felt also a little pain in my face which was also muddy to the touch of my hand besides being scratchy with cuts and bruises. Could it be possible that I really had got into a fight with somebody?

It was a fine spring morning, and soon eight o'clock arrived. And

sure enough, I was summoned to appear outside.

Behind a writing-desk, a police chief was seated listening to the report of a policeman who was standing to one side covered with mud from head to toe. The police chief asked:

"Is this the man?"

"It's him all right."

"Well, continue."

The mud-covered policeman continued, saying:

"About twelve o'clock last night I was on duty at Haining Road, and the rain was falling heavy. Suddenly he (and he pointed his finger at me) came along, banging on the wall with a leather shoe, making a big racket. I flashed my police lamp on him and right away he opened his mouth and started cursing."

"What did he say?"

"He called me a 'damned foreign slave'! I saw that he was drunk and was afraid he would cause trouble, so I wanted to bring him in. He started hitting me with his leather shoe, and with the lamp in my hand I could not grab him, and was beaten by him several times. When I got a hold of him and wrested away his shoe he started giving me a tussle. Neither of us let go and we rolled into the street. The street was full of water from the heavy rain and the two of us rolled around in the muddy slush. My lamp was shattered to pieces, and I got hit by him on my face and body. The cuts on his face were from scratching against the stone. I blew my whistle and stopped an empty hansom cab. The two grooms helped me to catch him and shut him in the cab before we brought him in here. My clothes I have dried before the fire, but I did not dare scrape off the mud. I got all this from rolling in the street with him."

I looked at his face and saw that there were bruises all right, but they appeared also to be from scuffling in the street and not the wound inflicted by my shoe. He then opened up his upper garments, nor did we see any sign of injury there.

The police chief questioned me, and I told him my real name and

occupation; when he heard that I was a teacher at the municipal school he naturally felt disinclined to offend me. Finally he said it would be necessary to have the case go through court, with a promise of a few dollars' fine for me.

He then returned to me the leather shoe and a belt which were lying on his desk. As I was putting on my shoe I remembered that I had been wearing a satin Chinese jacket the previous evening. I asked him about that garment, and he in turn asked the mud-covered policeman, and the latter replied: "He didn't have any Chinese jacket last night."

Then everything seemed clear to me.

My home was in Nanling Lane on Haining Road, a neighborhood that could be very lonely at midnight on a rainy night. I had of course fallen sound asleep as soon as I got into the rickshaw. When we reached the neighborhood of Nanling Lane the rickshaw man must have asked me my exact address and I probably was so sound asleep that I failed to make any reply. When the rickshaw man failed to wake me by calling, and perhaps pushing me, he was tempted to relieve me of the money I had on me as well as my Chinese jacket. As to my hat, perhaps it had also gone as part of his loot, or perhaps I had lost it somewhere on the way. It was likely that he had wanted further to strip me of my fur-lined robe, but at this point I must have emerged from my sub-conscious and offered resistance. It was a part of town that seldom saw a policeman, and the rickshaw man probably got away with his carriage and, unable to overtake him, I probably decided to walk away myself. My shoes were the kind that had no shoe-laces, known as pumps, which slipped off easily; perhaps I had lost it as I leaped off the rickshaw, and then picked it up as I attempted to give chase to my assailant. When the rickshaw man got beyond my reach, I started to make my way home with the one shoe in my hand, still following my sub-conscious. As drunkards usually cared most for "face," it was likely that, having been robbed, I decided to put on a nonchalant front by starting to sing. But more likely this

singing part was the policeman's invention, because I could not sing a note even in my conscious life.

All this of what must have transpired I supplied through my imagination, for there was no way of verifying it. But when I thought what could have happened to endanger my very life when I was sound asleep in my drunken stupor in the rickshaw I could not help giving a shudder of fear and congratulated myself on coming out of the escape with no more than soaking wet body and a few scratches on the face.

The police chief allowed me to send a short message home. At that time Cheng T'ieh-ju (later to be manager of the Bank of China Hongkong Branch) was staying with me, and in my message I asked him to bring some money to pay my fine.

The court hearing took place before noon and lasted a matter of few minutes; I was fined five dollars to pay for medical expenses for the policeman and the damage of his lamp.

When I reached home and took off my fur-lined robe, I found my padded undergarment also wet through and steaming with the body heat; to think that I had slept through the night wrapped in these wet clothes! I looked into the mirror and reassured myself that what I had suffered was no more than superficial cuts. So what was really to be feared was the chill I must have caught from sleeping in my wet clothes.

In our house lived a doctor from Szechuan named Hsü who was known to be quite skillful. I asked him to prescribe some strong medication for me to get rid of the chill, and he gave me a heavy dosage of laxative, which had its effect for a number of days; still, in time, I broke out with cold sores all over my fingers and wrists.

* * * * *

When I peered into the mirror that day and saw myself bruised in the face and splattered all over with mud I could not help, with a sigh, thinking of the poet's line— "Heaven must have meant me for something useful!"—and I was filled with remorse. I felt that I had let

my mother down, the loving mother who was even then thinking of me from our native village and entertaining great expectations for my future! I shed not a tear, but spiritually I had already rounded a turning.

That very day from my bed I composed a letter of resignation, which I dispatched to my employer, the Public School for Chinese; I felt that my conduct had sullied the reputation of the school. Moreover, I had made up my mind to quit teaching.

That year (1910) was the second year in which the Boxer Indemnity Scholarship examination was held for sending students to study in America. I had heard that even those who gained conditional acceptance in this examination would be matriculated to the Tsinghua College for preparatory study. I decided to shut myself up and prepare for this examination.

When my friend Hsü I-sun came to see me he was also strongly of the opinion that I should go to take the government examination for a scholarship to study in America. What worried me, however, was the following money considerations: First, for the support of my mother; secondly, to repay certain small loans; and thirdly, to raise my living expenses for these two months and my traveling expenses to the North. I-sun forthwith promised to make the necessary arrangements for me. Subsequently, outside of himself, others who aided me included Ch'eng Lo-t'ing's father Mr. Ch'eng Sung-t'ang and a grand-uncle of my clan, Mr. Hu Chieh-p'u.

I then shut myself up at home and studied for two months in preparation for the examination, at the end of which time I journeyed North with my Second Elder-Brother Shao-chih. Upon arrival in Peking I was so glad to have my Second Elder-Brother's good friend Mr. Yang Ching-su look after me. Through his recommendation I obtained lodgings in the newly-built dormitory of the Girls' Normal School (later Women's Normal College), where my expenses were kept to a minimum. In the one month I stayed in Peking I did not once attend the theater.

Mr. Yang gave me the benefit of his helpful advice on the study of ancient classics; he had me apply myself to fundamentals, beginning with the *Annotated Thirteen Classics*. This was the first time that I ever studied the Confucian classics of the Han dynasty.

The examination for scholarships to America was divided into two sessions. The subjects for the first session were Chinese and English, and only those who successfully passed these tests were permitted to take the test in the different scientific subjects which constituted the second part. The composition theme for the Chinese examination was the classical quotation, "One cannot make a square or a circle without the use of a ruler or a compass." I pondered over it a while and concluded that it would not be an easy topic to develop. For this reason, and the added fact that my reading had always been of a miscellaneous kind, when I set to work I put together a short essay in the manner of historical research. I opened my theme with this statement:

The origin of the ruler was lost in earliest antiquity. It is plausible to assert, however, that the first pair of compass was made in the last stages of the Chou dynasty.

Following this statement I proceeded to cite the method of making a circle as described in *The Classic of Mathematics* of the Chou dynasty, to show that at the time of that book the use of the compass was still unknown. Another piece of evidence I adduced to prove the later invention of the compass was that in *The Analects* Confucius was quoted as saying, "... not going beyond the bounds of the kuei (ruler)" without making any mention of *kuei chü* (compass and ruler) together, and it was not until the works of Mo-tze and Mencius that the two words *kuei chü* were used side by side. All this was rather a novel and improvised piece of historical research, but it was my luck that the scholar who graded our papers also happened to have been addicted to the method of historical evidence and verification. He was

wonderfully impressed with my short essay, and gave it a mark of 100 per cent. I got 60 in my English examination, and came out No. 10 with an average grade of 80. For every one of the subjects included in the second part of the examination, such as Western History, Biology, Physics, etc., I had no more knowledge than what I had managed to cram at the last moment; as a result, my performance here was nothing to be proud of. Fortunately again, on the strength of my excellent grades in the first part I came out No. 55 in the second part. Altogether seventy were accepted to go abroad, and so I was pretty near the tail-end of the list of successful candidates.

The money for my return trip was also advanced by Mr. Yang Ching-su. Back in Shanghai, Grand-Uncle Chieh-p'u assured me that any time, when necessary, he would advance what money was needed for my mother's living expenses. My friend I-sun, once again, offered his help. Without the help of these good people, I would not have been able to make the trip North, nor could I go abroad with my mind at ease.

During my entire scholastic career I had been using the name Hu Hung-hsing; but when I went to Peking to take the examinations I changed it at the last moment to Hu Shih for fear of being laughed at should I fail to make the grade. Ever since then I have been known as Hu Shih.

伍 我怎样到外国去

戊申（一九〇八）九月间，中国公学闹出了一次大风潮，结果是大多数学生退出学来，另组织一个中国新公学。这一次的风潮为的是一个宪法的问题。

中国公学在最初的时代，纯然是一个共和国家，评议部为最高立法机关，执行部的干事即由公选产生出来。不幸这种共和制度实行了九个月（丙午二月至十一月），就修改了。修改的原因，约有几种：一是因为发起的留日学生逐渐减少，而新招来的学生逐渐加多，已不是当初发起时学生与办事人完全不分界限的情形了。二是因为社会和政府对于这种共和制度都很疑忌。三是因为公学既无校舍，又无基金，有请求官款补助的必要，所以不能不避免外界对于公学内部的疑忌。

为了这种种原因，公学的办事人就在丙午（一九〇六）年的冬天，请了郑孝胥、张謇、熊希龄等十人作中国公学的董事，修改章程，于是学生主体的制度就变成了董事会主体的制度。董事会根据新章程，公举郑孝胥为监督。一年后，郑孝胥辞职，董事会又举夏敬观为监督。这两位都是有名的诗人，他们都不常到学校，所以我们也不大觉得监督制的可畏。

可是在董事会与监督之下，公学的干事就不能由同学公选了。评议部是新章所没有的。选举的干事改为学校聘任的教务长、庶务长、斋务长了。这几位办事人，外面要四出募捐，里面要担负维持学校的责任，自然感觉他们的地位有稳定的必要。况且前面已说过，校章的修改也不是完全没有理由的。但我们少年人可不能那样想。中国公学的校章上明明载着“非经全体三分之二承认，不得修改”。这是我们的宪法上载着的唯一的修正方法。三位干事私自修改校章，是非法的。评议部的取消也是非法的。这里面也还有个人的问题。当家日子久了，总难免“猫狗皆嫌”。何况同学之中有许多本是干事诸君的旧日同辈的朋友呢？在校上课的同学自然在学业上日日有长进，而干事诸君办事久了，学问上没有进境，却当着教务长一类的学术任务，自然有时难免受旧同学的轻视。法

的问题和这种人的问题混合在一块，风潮就不容易避免了。

代议制的评议部取消之后，全体同学就组织了一个“校友会”，其实就等于今日各校的学生会。校友会和三干事争了几个月，干事答应了校章可由全体学生修改。又费了几个月的时间，校友会把许多修正案整理成一个草案，又开了几次会，才议定了一本校章。一年多的争执，经过了多少度的磋商，新监督夏先生与干事诸君均不肯承认这新改的校章。

到了戊申（一九〇八）九月初三日，校友会开大会报告校章交涉的经过，会尚未散，监督忽出布告，完全否认学生有订改校章之权，这竟是完全取消干事承认全体修改校章的布告了。接着又出了两道布告，一道说“集会演说，学堂悬为厉禁。……校友会以后不准再行开会”。一道说学生代表朱经、朱绂华“倡首煽众，私发传单，侮辱职员，要挟发布所自改印章程，屡诫不悛，纯用意气，实属有意破坏公学。照章应即斥退，限一日内搬移出校”。

初四日，全体学生签名停课，在操场上开大会。下午干事又出布告，开除学生罗君毅，周烈忠，文之孝等七人，并且说：“如仍附从停课，即当将停课学生全行解散，另行组织。”初五日，教员出来调停，想请董事会出来挽救。但董事会不肯开会。初七日学生大会遂决议筹备万一学校解散后的办法。

初八日董事陈三立先生出来调停，但全校人心已到了很激昂的程度，不容易挽回了。初九日，校中布告：“今定于星期日暂停膳食。所有被胁诸生可先行退出校外，暂住数日。准于今日午后一时起，在环球中国学生会发给旅膳费。俟本公学将此案办结后，再行布告来校上课。”

这样的压迫手段激起了校中绝大多数同学的公愤。他们决定退学，遂推举干事筹备另创新校的事。退学的那一天，秋雨淋漓，大家冒雨搬到爱而近路庆祥里新租的校舍里。厨房虽然寻来了一家，饭厅上桌凳都不够，碗碟也不够。大家都知道这是我们自己创立的学校，所以不但不叫苦，还要各自掏腰包，捐出钱来作学校的开办费。有些学生把绸衣，金表，都拿去当了钱来捐给学堂做开办费。

十天之内，新学校筹备完成了，居然聘教员，排功课，正式开课了。校名定为“中国新公学”；学生有一百六七十人。在这风潮之中，最初的一年因为我是新学生，又因为我告了长时期的病假，所以没有参与同学和干事的争执；到了风潮正激烈的时期，我被举为大会书记，许多记录和宣言都是我做的；虽然不在被开除之列，也在退学之中。朱经、

李琴鹤、罗君毅被举做干事。有许多旧教员都肯来担任教课。学校虽然得着社会上部分人的同情，捐款究竟很少，经常费很感觉困难。李琴鹤君担任教务干事，有一天他邀我到他房里谈话，他要我担任低级各班的英文，每星期教课三十点钟，月薪八十元；但他声明，自家同学作教员，薪俸是不能全领的，总得欠着一部分。

我这时候还不满十七岁，虽然换了三个学堂，始终没有得着一张毕业证书。我若继续上课，明年可以毕业了。但我那时确有不能继续求学的情形。我家本没有钱。父亲死后，只剩下几千两的存款，存在同乡店家生息，一家人全靠这一点出息过日子。后来存款的店家倒帐了，分摊起来，我家分得一点小店业。我的二哥是个有干才的人，他往来汉口上海两处，把这点小店业变来变去，又靠他的同学朋友把他们的积蓄寄存在他的店里，所以他能在几年之中合伙撑起一个规模较大的瑞兴泰茶叶店。但近几年之中，他的性情变了，一个拘谨的人变成了放浪的人；他的费用变大了，精力又不能贯注到店事，店中所托的人又不很可靠，所以店业一年不如一年。后来我家的亏空太大了，上海的店业不能不让给债权人。当戊申的下半年，我家只剩汉口一所无利可图的酒栈（两仪栈）了。这几个月以来，我没有钱住宿舍，就寄居在《竞业旬报》社里（也在庆祥里）。从七月起，我担任《旬报》的编辑，每出一期报，社中送我十块钱的编辑费。住宿和饭食都归社中担负。我家中还有母亲，眼前就得要我寄钱赡养了。母亲也知道家中破产就在眼前，所以寄信来要我今年回家去把婚事办了。我斩钉截铁的阻止了这件事，名义上是说求学要紧，其实是我知道家中没有钱给我办婚事，我也没有钱养家。

正在这个时候，李琴鹤君来劝我在新公学作教员。我想了一会，就答应了。从此以后，我每天教六点钟的英文，还要改作文卷子。十七八岁的少年人，精力正强，所以还能够勉强支持下去，直教到第二年（一九〇九）冬天中国新公学解散时为止。

以学问论，我那时怎配教英文？但我是个肯负责任的人，肯下苦功去预备功课，所以这一年之中还不曾有受窘的时候。我教的两班后来居然出了几个有名的人物：饶毓泰（树人），杨铨（杏佛），严庄（敬斋），都做过我的英文学生。后来我还在校外收了几个英文学生，其中有一个就是张奚若。可惜他们后来都不是专习英国文学；不然，我可真“抖”了！

《竞业旬报》停刊之后，我搬进新公学去住。这一年的教书生活虽

然很苦，于我自己却有很大的益处。我在中国公学两年，受姚康侯和王云五两先生的影响很大，他们都最注重文法上的分析，所以我那时虽不大能说英国话，却喜欢分析文法的结构，尤其喜欢拿中国文法来做比较。现在做了英文教师，我更不能不把字字句句的文字弄的清楚。所以这一年之中我虽没有多读英国文学书，却在文法方面得着很好的练习。

* * * * *

中国新公学在最困苦的情形之下支持了一年多，这段历史是很悲壮的。那时候的学堂多不讲究图书仪器的设备，只求做到教员好，功课紧，管理严，就算好学堂了。新公学的同学因为要争一口气，所以成绩很好，管理也不算坏。但经费实在太穷，教员只能拿一部分的薪俸，干事处常常受收房捐和收巡捕捐的人的恶气；往往因为学校不能付房捐与巡捕捐，同学们大家凑出钱来，借给干事处。有一次干事朱经农君（即朱经）感觉学校经费困难已到了绝地，他忧愁过度，神经错乱，出门乱走，走到了徐家汇的一条小河边，跳下河去，幸遇人救起，不曾丧命。

这时候，中国公学的吴淞新校舍已开始建筑了，但学生很少。内地来的学生，到了上海，知道了两个中国公学的争持，大都表同情于新公学，所以新公学的学生总比老公学多。例如张奚若（原名耘）等一些陕西学生，到了上海，赶不上招考时期，他们宁可在新公学附近租屋补习，却不肯去老公学报名。所以“中国新公学”的招牌一天不去，“中国公学”是一天不得安稳发展的。老公学的职员万不料我们能支持这么久。他们也知道我们派出去各省募捐的代表，如朱绂华、朱经农、薛传斌等，都有有力的介绍，也许有大规模的官款补助的可能。新公学募款若成功，这个对峙的局面更不容易打消了。

老公学的三干事之中，张邦杰先生（俊生）当风潮起时在外省募款未归；他回校后极力主张调停，收回退学的学生。不幸张先生因建筑吴淞校舍，积劳成病，不及见两校的合并就死了。新公学董事长李平书先生因新校经济不易维持，也赞成调停合并。调停的条件大致是：凡新公学的学生愿意回去的，都可回去；新公学的功课成绩全部承认；新公学所有亏欠的债务，一律由老公学担负清偿。新公学一年之中亏欠已在一万元以上，捐款究竟只是一种不能救急的希望；职员都是少年人，牺牲了自己的学业来办学堂，究竟不能持久。所以到了己酉（一九〇九）十月，新公学接受了调停的条件，决议解散：愿回旧校者，自由回去。我

有题新校合影的五律二首，七律一首，¹可以纪念我们在那时候的感情，所以我抄在这里：

十月题新校合影时公学将解散
无奈秋风起，艰难又一年。
颠危俱有责，成败岂由天？
黯黯愁兹别，悠悠祝汝贤。
不堪回首处，沧海已桑田。

此地一为别，依依无限情。
凄凉看日落，萧瑟听风鸣。
应有天涯感，无忘城下盟！

相携入图画，万虑苦相萦。十月再题新校教员合影
也知胡越同舟谊，无奈惊涛动地来。
江上飞鸟犹绕树，尊前残烛已成灰。
昙花幻相空余恨，鸿爪遗痕亦可哀。
莫笑劳劳作刍狗，且论臭味到岑苔。

这都算不得诗，但“应有天涯感，无忘城下盟”两句确是当时的心理。合并之后，有许多同学都不肯回老公学去，也是为此。这一年的经验，为一个理想而奋斗，为一个团体而牺牲，为共同生命而合作，这些都在我们一百六十多人的精神上留下磨不去的影子。二十年来，无人写这一段历史，所以我写这几千字，给我的一班老同学留一点“鸿爪遗痕”。

* * * * *

少年人的理想主义受打击之后，反动往往是很激烈的。在戊申己酉（一九〇八——一九〇九）两年之中，我的家事败坏到不可收拾的地步。己酉年，大哥和二哥回家，主张分析家产；我写信回家，说我现在已能自立了，不要家中的产业。其实家中本没有什么产业可分，分开时，兄弟们每人不过得着几亩田，半所屋而已。那一年之中，我母亲最心爱的一个妹子和一个弟弟先后死了，她自己也病倒了。我在新公学解散之后，得了两三百元的欠薪，前途茫茫，毫无把握，那敢回家去？只好寄居在上海，想寻一件可以吃饭养家的事。在那个忧愁烦闷的时候，又遇着一班浪漫的朋友，我就跟着他们堕落了。

【注】²这一段是去年（一九三一）夏间写的，写成之后，我恐怕我的记载有不正确或不公平的地方，所以把原稿送给王敬芳先生（抔沙），请他批评修改。

他是我们攻击的干事之一，是当日风潮的一个主要目标。但事隔二十多年，我们都可以用比较客观的眼光来回看当年的旧事了。他看了之后，写了一封几千字的长信给我，承认我的话“说的非常心平气和，且设身处地的委曲体谅，令我极端佩服”，又指出一些与当日事实不符的地方。他指出的错误，我都改正了。所以这一段小史，虽是二十多年后追记的，应该没有多大的错误。我感谢王先生的修正，并且盼望我的老同学朱经农、罗君毅诸先生也给我同样的修正。

王先生在他的长信里说了几句很感慨的话，我认为很值得附录在此。他说：“我是当初反对取缔规则最力的人，但是今日要问我取缔规则到底对于中国学生有多大害处，我实在答应不出来。你是当时反对公学最力的人，看你这篇文章，今昔观察也就不同的多了。我想青年人往往因感情的冲动，理智便被压抑了。中国学校的风潮，大多数是由于这种原因。学校中少一分风潮，便多一分成就。盼望你注意矫正这种流弊。”

我是赞成这话的，但是我要补充一句：学校的风潮不完全由于青年人的理智被感情压抑了，其中往往是因为中年人和青年人同样的失去了运用理智的能力。专责备青年人是不公允的。中国公学最近几次的风潮都是好例子。

廿一，九，廿七。

二

中国新公学有一个德国教员，名叫何德梅（Ottomeir），他的父亲是德国人，母亲是中国人，他能说广东话，上海话，官话。什么中国人的玩意儿，他全会。我从新公学出来，就搬在他隔壁的一所房子里住，这两所房子是通的，他住东屋，我和几个四川朋友住西屋。和我同住的人，有林君墨（恕），但怒刚（懋辛）诸位先生；离我们不远，住着唐桂梁（蟠）先生，是唐才常的儿子。这些人都是日本留学生，都有革命党的关系；在那个时候各地的革命都失败了，党人死的不少，这些人都很不高兴，都很牢骚。何德梅常邀这班人打马将，我不久也学会了。我们打牌不赌钱，谁赢谁请吃雅叙园。我们这一班人都能喝酒，每人面前摆一大壶，自斟自饮。从打牌到喝酒，从喝酒又到叫局，从叫局到吃花酒，不到两个月，我都学会了。

幸而我们都没有钱，所以都只能玩一点穷开心的玩意儿：赌博到吃馆子为止，逛窑子到吃“镶边”的花酒或打一场合股份的牌为止。有时候，我们也同去看戏。林君墨和唐桂梁发起学唱戏，请了一位小喜禄来教我们唱戏，同学之中有欧阳予倩，后来成了中国戏剧界的名人。我最不行，一句也学不会，不上两天我就不学了。此外，我还有一班小朋

友，同乡有许怡荪、程乐亭、章希吕诸人，旧同学有郑仲诚、张蜀川、郑铁如诸人。怡荪见我随着一班朋友发牢骚，学堕落，他常常规劝我。但他在吴淞复旦公学上课，是不常来的，而这一班玩的朋友是天天见面的，所以我那几个月之中真是在昏天黑地里胡混。有时候，整夜的打牌；有时候，连日的大醉。

* * * * *

有一个晚上，闹出乱子来了。那一晚我们在一家“堂子”里吃酒，喝的不少了，出来又到一家去“打茶围”。那晚上雨下的很大，下了几点钟还不止。君墨桂梁留我打牌，我因为明天要教书（那时我在华童公学教小学生的国文），所以独自雇人力车走了。他们看我能谈话，能在一叠“局票”上写诗词，都以为我没有喝醉，也就让我一个人走了。

其实我那时已大醉了，谈话写字都只是我的“下意识”的作用，我全不记忆。出门上车以后，我就睡着了。

直到第二天天明时，我才醒来，眼睛还没有睁开，就觉得自己不是睡在床上，是睡在硬的地板上！我疑心昨夜喝醉了睡在家中的楼板上，就喊了一声“老彭！”——老彭是我雇的一个湖南仆人。喊了两声，没有人答应，我已经坐起来了，眼也睁开了。

奇怪的很！我睡在一间黑暗的小房里，只有前面有亮光，望出去好像没有门。我仔细一看，口外不远还好像有一排铁栅栏。我定神一听，听见栏杆外有皮鞋走路的声响。一会儿，狄托狄托的走过来了，原来是一个中国巡捕走过去。

我有点明白了，这大概是巡捕房，只不知道我怎样到了这儿来的。我想起问一声，这时候才觉得我一只脚上没有鞋子，又觉得我身上的衣服都是湿透了的。我摸来摸去，摸不着那一只皮鞋子；只好光着一只袜子站起来，扶着墙壁走出去，隔着栅栏招呼那巡捕，问他这是什么地方。

他说：“这是巡捕房。”

“我怎么会进来的？”

他说：“你昨夜喝醉了酒，打伤了巡捕，半夜后进来的。”

“什么时候我可以出去？”

“天刚亮一会，早呢！八点钟有人来，你就知道了。”

我在亮光之下，才看见我的旧皮袍不但是全湿透了，衣服上还有许

多许多污泥。我又觉得脸上有点疼，用手一摸，才知道脸上也有污泥，并且有破皮的疤痕。难道我真同人打了架吗？

这是一个春天的早晨，一会儿就是八点钟了。果然有人来叫我去。

在一张写字桌边，一个巡捕头坐着，一个浑身泥污的巡捕立着回话。那巡捕头问：

“就是这个人？”

“就是他。”

“你说下去。”

那浑身泥污的巡捕说：

“昨夜快十二点钟时候，我在海宁路上班，雨下的正大。忽然（他指着我）他走来了，手里拿着一只皮鞋敲着墙头，狄托狄托的响。我拿巡捕灯一照，他开口就骂。”

“骂什么？”

“他骂‘外国奴才’！我看他喝醉了，怕他闯祸，要带他到巡捕房里来。他就用皮鞋打我，我手里有灯，抓不住他，被他打了好几下。后来我抱住他，抢了他的鞋子，他就和我打起来了。两个人抱住不放，滚在地上。下了一夜的大雨，马路上都是水，两个人在泥水里打滚。我的灯也打碎了，身上脸上都被他打了。他脸上的伤是石头上擦破了皮。我吹叫子，唤住了一部空马车，两个马夫帮我捉住他，关在马车里，才能把他送进来。我的衣服是烘干了，但是衣服上的泥都不敢弄掉，这都是在马路当中滚的。”

我看他脸上果然有伤痕，但也像是擦破了皮，不像是皮鞋打的。他解开上身，也看不出什么伤痕。

巡捕头问我，我告诉了我的真姓名和职业，他听说我是在华童公学教书的，自然不愿得罪我。他说，还得上堂问一问，大概要罚几块钱。

他把桌子上放着的一只皮鞋和一条腰带还给我。我穿上了鞋子，才想起我本来穿有一件缎子马褂。我问他要马褂，他问那泥污的巡捕，他回说：“昨夜他就没有马褂。”

我心里明白了。

我住在海宁路的南林里，那一带在大雨的半夜里是很冷静的。我上了车就睡着了。车夫到了南林里附近，一定是问我到南林里第几弄。我大概睡的很熟，不能回答了。车夫叫我不醒，也许推我不醒，他就起了

坏心思，把我身上的钱摸去了，又把我的马褂剥去了。帽子也许是他拿去了的，也许是丢了的。他大概还要剥我的皮袍，不想这时候我的“下意识”醒过来了，就和他抵抗。那一带是没有巡捕的，车夫大概是拉了车子跑了，我大概追他不上，自己也走了。皮鞋是跳舞鞋式的，没有鞋带，所以容易掉下来；也许是我跳下车来的时候就掉下来了，也许我拾起了一只鞋子来追赶那车夫。车夫走远了，我赤着一只脚在雨地里自然追不上。我慢慢的依着“下意识”走回去。醉人往往爱装面子，所以我丢了东西反唱起歌来了，——也许唱歌是那个巡捕的胡说，因为我的意识生活是不会唱歌的。

这是我自己用想象来补充的一段，是没有法子证实的了。但我想到在车上熟睡的一段，不禁有点不寒而栗，身上的水湿和脸上的微伤那能比那时刻的生命的危险呢？

巡捕头许我写一封短信叫人送到我的家中。那时候郑铁如（现在的香港中国银行行长）住在我家中，我信上托他带点钱来准备做罚款。

上午开堂问事的时候，几分钟就完了，我被罚了五元，做那个巡捕的养伤费和赔灯费。

我到了家中，解开皮袍，里面的棉袄也湿透了，一解开来，里面热气蒸腾：湿衣裹在身上睡了一夜，全蒸热了！我照镜子，见脸上的伤都只是皮肤上的微伤，不要紧的。可是一夜的湿气倒是可怕。

同住的有一位四川医生，姓徐，医道颇好。我请他用猛药给我解除湿气。他下了很重的泻药，泄了几天；可是后来我手指上和手腕上还发出了四处的肿毒。

* * * * *

那天我在镜子里看见我脸上的伤痕，和浑身的泥湿，我忍不住叹一口气，想起“天生我材必有用”的诗句，心里百分懊悔，觉得对不住我的慈母，——我那在家乡时时刻刻悬念着我，期望着我的慈母！我没有掉一滴眼泪，但是我已经过了一次精神上的大转机。

我当日在床上就写信去辞了华童公学的职务，因为我觉得我的行为玷辱了那个学校的名誉。况且我已决心不做那教书的事了。

那一年（庚戌，一九一〇）是考试留美赔款官费的第二年。听说，考试取了备取的还有留在清华学校的希望。我决定关起门来预备去应考试。

许怡荪来看我，也力劝我摆脱一切去考留美官费。我所虑的有几点：一是要筹养母之费，二是要还一点小债务，三是要筹两个月的费用和北上的旅费。怡荪答应替我去设法。后来除他自己之外，帮助我的有程乐亭的父亲松堂先生，和我的族叔祖节甫先生。

我闭户读了两个月的书，就和二哥绍之一同北上。到了北京，蒙二哥的好朋友杨景苏先生（志洵）的厚待，介绍我住在新在建筑中的女子师范学校（后来的女师大）校舍里，所以费用极省。在北京一个月，我不曾看过一次戏。

杨先生指点我读旧书，要我从《十三经注疏》用功起。我读汉儒的经学，是从这个时候起的。

留美考试分两场，第一场考国文英文，及格者才许考第二场的各种科学。国文试题为“不以规矩不能成方圆说”，我想这个题目不容易发挥，又因我平日喜欢看杂书，就做了一篇乱谈考据的短文，开卷就说：

矩之作也，不可考矣。规之作也，其在周之末世乎？

下文我说《周髀算经》作圆之法足证其时尚不知道用规作圆；又孔子说“不逾矩”，而不并举规矩，至墨子孟子始以规矩并用，足证规之晚出。这完全是一时异想天开的考据，不料那时看卷子的先生也有考据癖，大赏识这篇短文，批了一百分。英文考了六十分，头场平均八十分，取了第十名。第二场考的各种科学，如西洋史，如动物学，如物理学，都是我临时抱佛脚预备起来的，所以考的很不得意。幸亏头场的分数占了大便宜，所以第二场我还考了个第五十五名。取送出洋的共七十名，我很挨近榜尾了。

南下的旅费是杨景苏先生借的。到了上海，节甫叔祖许我每年遇必要时可以垫钱寄给我的母亲供家用。怡荪也答应帮忙。没有这些好人的帮助，我是不能北去，也不能放心出国的。

我在学校里用胡洪骅的名字；这回北上应考，我怕考不取为朋友学生所笑，所以临时改用胡适的名字。从此以后，我就叫胡适了。

汤一介（1927-2014），中国当代哲学家、哲学史家，原籍湖北黄梅。主要研究魏晋玄学、早期道教、儒家哲学、中西哲学比较等，著述宏富。曾任教育部哲学社会科学研究重大课题攻关项目“《儒藏》编纂与研究”首席专家、北京大学儒学研究院院长、中国文化书院创院院长、中华孔子学会会长等职。

“博雅双语名家名作”出版说明

1840年鸦片战争以降，在深重的民族危机面前，中华民族精英“放眼世界”，向世界寻求古老中国走向现代、走向世界的灵丹妙药，涌现出一大批中国主题的经典著述。我们今天阅读这些中文著述的时候，仍然深为字里行间所蕴藏的缜密的考据、深刻的学理、世界的视野和济世的情怀所感动，但往往会忽略：这些著述最初是用英文写就，我们耳熟能详的中文文本是原初英文文本的译本，这些英文作品在海外学术界和文化界同样享有崇高的声誉。

比如，林语堂的*My Country and My People*（《吾国与吾民》）以幽默风趣的笔调和睿智流畅的语言，将中国人的道德精神、生活情趣和中国社会文化的方方面面娓娓道来，在美国引起巨大反响——林语堂也以其中国主题系列作品赢得世界文坛的尊重，并获得诺贝尔文学奖的提名。再比如，梁思成在抗战的烽火中写就的英文版《图像中国建筑史》文稿（*A Pictorial History of Chinese Architecture*），经其挚友费慰梅女士（Wilma C. Fairbank）等人多年的奔走和努力，于1984年由麻省理工学院出版社（MIT Press）出版，并获得美国出版联合会颁发的“专业暨学术书籍金奖”。又比如，1939年，费孝通在伦敦政治经济学院的博士论文以*Peasant Life in China—A Field Study of Country Life in the Yangtze Valley*为名在英国劳特利奇书局（Routledge）出版，后以《江村经济》作为中译本书名——《江村经济》使得靠桑蚕为生的“开弦弓村”获得了世界性的声誉，成为国际社会学界研究中国农村的首选之地。

此外，一些中国主题的经典人文社科作品经海外汉学家和中国学者的如椽译笔，在英语世界也深受读者喜爱。比如，艾恺（Guy S. Alitto）将他1980年用中文访问梁漱溟的《这个世界会好吗——梁漱溟晚年口述》一书译成英文（*Has Man a Future?—Dialogues with the Last Confucian*），备受海内外读者关注；此类作品还有徐中约英译的梁启超著作《清代学术概论》（*Intellectual Trends in the Ch'ing Period*）、狄百瑞（W. T. de Bary）英译的黄宗羲著作《明夷待访录》（*Waiting for the Dawn: A Plan for the Prince*），等等。

有鉴于此，外语教学与研究出版社推出“博雅双语名家名作”系列。

博雅，乃是该系列的出版立意。博雅教育（Liberal Education）早在古希腊时代就得以提倡，旨在培养具有广博知识和优雅气质的人，提高人文素质，培养健康人格，中国儒家六艺“礼、乐、射、御、书、数”亦有此功用。

双语，乃是该系列的出版形式。英汉双语对照的形式，既同时满足了英语学习者和汉语学习者通过阅读中国主题博雅读物提高英语和汉语能力的需求，又以中英双语思维、构架和写作的形式予后世学人以启迪——维特根斯坦有云：“语言的边界，乃是世界的边界”，诚哉斯言。

名家，乃是该系列的作者群体。涵盖文学、史学、哲学、政治学、经济学、考古学、人类学、建筑学等领域，皆海内外名家一时之选。

名作，乃是该系列的入选标准。系列中的各部作品都是经过时间的积淀、市场的检验和读者的鉴别而呈现的经典，正如卡尔维诺对“经典”的定义：经典并非你正在读的书，而是你正在重读的书。

胡适在《新思潮的意义》（1919年12月1日，《新青年》第7卷第1号）一文中提出了“研究问题、输入学理、整理国故、再造文明”的范式。秉着“记载人类文明、沟通世界文化”的出版理念，我们推出“博雅双语名家名作”系列，既希望能够在中国人创作的和以中国为主题的博雅英文文献领域“整理国故”，亦希望在和平发展、改革开放的新时代为“再造文明”、为“向世界说明中国”略尽绵薄之力。

I . AN INQUIRY INTO THE POSSIBILITY OF A THIRD-PHASE DEVELOPMENT OF CONFUCIANISM

Is there the possibility for Confucianism to have a third-phase development? In saying this we mean to regard the school of thought advocated by Confucius, Mencius, and Xunzi during the Spring and Autumn Period and the Warring States as the first-phase development of Confucianism. After the Han Dynasty Buddhism spread to China. Under the impact of Buddhist ideas, a Confucian school of idealist philosophy emerged during the Song and Ming dynasties. It greatly pushed forward the Confucian doctrines and constituted the second-phase development of Confucianism. Over the last century, Western civilization has found its way into China. Especially around the time of the May Fourth (1919) Movement, Marxism was also disseminated into our country. That gave an even bigger and more serious impact on China's traditional thought and culture. Under such circumstances, is it possible for Confucianism to have a third-phase development? Can it be brought back to life? Can it still have a role to play in China in particular and the world at large? In my opinion, it is perhaps too early to conduct an all-round discussion of this issue. However, to raise questions and opinions from certain angles in an attempt to push the inquiry forward may prove helpful.

In discussing whether it is possible for Confucianism to have a third-phase development, we must, first of all, acquire a clear understanding about the basic spirit of Confucianism. Regarding this basic spirit, there have been in the past, and may be in the future, a

variety of different views. The existence of different views is not necessarily a bad thing; it may help deepen the study of this issue. In clarifying the basic spirit, I think attention should be paid to two parts: the part of thoughts that have been constantly effective in the entire course of development of Confucianism, and the part of thoughts that still have vitality today. To combine the two for consideration, we may perhaps find out whether a third-phase development of Confucianism is possible from a certain aspect.

Running through the entire course of development of Confucianism, I believe, are two basic elements that still bear a major significance to us today: one is idealism, the other humanism; and the two are connected.

Confucianism is a kind of idealism. Starting from Confucius, this school of thought has cherished the ideal of having a society in which "right principles prevail" and has made every effort to materialize the ideal in the real world. Despite its acknowledgment of the unattainability of such a goal, it still insists that one should foster the ideal and dedicate oneself to realize it in the spirit of "doing the impossible." Therefore when Zigong asked Confucius: "What if one can generously give to the people and provide relief to them? Can that be called benevolence?" Confucius answered: "One who behaves with benevolence must be a saint! Even Yao and Shun fell short of that." Evidently Confucius did not regard the society of Yao and Shun's time as a society of man's highest ideal. Thus it involves the problem of what we should see as an ideal society. According to the Confucians, an ideal society is an ideal, which has the possibility, and not the necessity, of being realized. Despite the fact that an ideal society has never been realized before, it is a matter of fundamental importance, a problem of one's attitude toward life, whether or not one should seek to realize it. It is the Confucians' belief that one should ceaselessly seek after it. This is why, as I see it, people at that time criticized Confucians as "being ignorant of world affairs." Though it is not necessary that an ideal society be realized in the real world, it can be,

as far as the Confucian philosophers are concerned, realized in their minds. Why is it that *West Inscription* by Zhang Zai was so highly respected by later Confucians? It was that, as I see it, *West Inscription* embodied the Confucian spirit of seeking to realize an ideal society, plus that Zhang Zai had already built in his mind the ideal society. True, whether the ideal society in which "the people are my brothers and I share my things with them," as Zhang Zai conceived, could be realized in the real world was important to him, but more important was whether one could have a world outlook of pursuing an ideal society. Therefore the last sentence of *West Inscription* says: "I carry on my pursuit when alive, and rest at ease when I die." While one lives, one has a duty to fulfill. The duty is to exert oneself for the realization of the ideal "world of commonweal." It can be said that this is an attitude of "concerning oneself only about the cultivation instead of the gains." Whoever holds such an attitude toward life has a clear conscience. Don't we today need to have an attitude like this more than ever?

Confucianism is a kind of idealism that has humanism as its prerequisite. Why is it that man must have an ideal and seek to build an ideal society? According to the Confucians, man is the most important factor in the world, because he can "formulate ethics for the universe, provide sustenance for the people, carry forward consummate learnings into posterity, and win peace for thousands of generations to come." Confucius said: "Man can enhance the Way and not the reverse." The "Way" or the "Way of Nature" is an objective existence. But it needs to be enhanced and carried forward by man; it has to be effected by man through practice. How can man embody the "Way of Nature"? If, as the Confucians envisaged, man can understand how "Heaven is integrated with man," "knowledge is integrated with practice," and "feeling is integrated with scenery," man can then attain the loftiest realm of being a man. In other words, man can congeal in his heart the ideal of the true, the good, and the beautiful.

The integration of Heaven with man, knowledge with practice,

and feeling with scenery are the three basic propositions the Chinese traditional philosophy made about the true, the good, and the beautiful; they are the ideal realms the Confucian school has been trying to attain. Why is it that Confucianism is in pursuit of the three integrations? In my opinion, Confucianism is nothing more than a teaching that teaches one how to behave oneself; namely, one should set a demand on oneself and hold oneself responsible to the world and the nation. This is a very common question, but involves a task extremely difficult to fulfill. Whoever has attained such an ideal realm of the true, the good, and the beautiful is a saint.

Although the proposition of integrating Heaven with man is designed to illustrate the relations between man and the entire universe, it begins with man as the center of the universe. *Zhongyong (The Golden Mean)* stated: "Being honest is the Way of Heaven. Striving to be honest is the Way of man. An honest man hits the right Way without difficulty and understands it without deliberation. One who conforms oneself to the Way of Heaven without qualm is a saint." Therefore a saint not only behaves himself in conformity with the requirements of the Way of Heaven but also assumes as his responsibility the fulfillment of such requirements. In living a life in this world, one should not behave oneself with a passive attitude; rather, one should "make unremitting efforts to improve oneself" in order to embody the ceaseless flow and evolution of nature. In this way, man will set a demand on himself; he will find a reason for his existence and foster a lofty ideal. Since one has set a demand on oneself and found a reason for one's existence, the most important thing is for one to "integrate one's understanding with one's behavior" so that one can have a unified viewpoint on understanding and behavior in terms of morality and self-cultivation. The three programs and eight articles outlined in *Daxue (The Great Learning)* tell us exactly what this is about. It is said in *Daxue*:

The Way of the great learning lies in shedding light on the bright

principles, being close to the people, and stopping at nothing but the utmost good. Those in ancient times who wanted to shed light on the bright principles for the world had to first bring order to their own kingdoms. To bring order to their kingdoms they had to first bring their own houses to order. To bring their houses to order they had to first cultivate their own moral character. To cultivate their own moral character they had to first set their minds straight. To set their minds straight they had to first foster a sincere desire. To foster a sincere desire they had to first carry knowledge to the utmost degree. To carry knowledge to the utmost degree they had to first inquire into the properties of things. Having inquired into the properties of things, they were able to carry knowledge to the utmost degree. Having carried knowledge to the utmost degree, they were able to foster a sincere desire. Having fostered a sincere desire, they were able to set their minds straight. Having set their minds straight, they were able to cultivate their own moral character. Having cultivated their own moral character, they were able to bring their houses to order. Having brought their houses to order, they were able to bring order to their kingdoms. Having brought order to their kingdoms, the whole world would be at peace.

This is a process of cognizance, still more a process of moral practice. Man must have an ideal, and the highest ideal is to "achieve peace" so that human society can attain a realm of "Great Harmony." And the world of "Great Harmony" requires that everyone should set for himself a demand for being a man, a reason for being a man, and "not do to others what one does not wish done to oneself." Noted Confucius: "To implement my principle is nothing more than being honest and just." Whether the ideal society of "Great Harmony" can be attained or not remains a question, of course. But a Confucian must have such a goal and find pleasure in pursuing it. To lead an existence in the world and be a man, one must find pleasure in doing it and appreciate the creation of the universe. And to have a true appreciation of Nature one must be able to display creativity and man's spiritual realm in reproducing the "creation of the universe." One must be able to show why man should be a man, to create poetry and prose "masterpieces," paintings of "superb work," and music like "sounds of nature." This is why art requires that "feeling be integrated with scenery." Wang Fuzhi observed: "In name feeling and scenery are

two things, but in reality they are inseparable. Those gifted in writing poetry are capable of unlimited wit. A witty line naturally has feeling in the midst of scenery and scenery in the midst of feeling." "Once feeling is integrated with scenery, a witty remark is ready at hand." When one enters the realm of creation, it will be a realm in which the true, the good, and the beautiful are integrated with one another. This is precisely where the meaning of life and the highest ideal of mankind lie. Confucius described himself as "doing things at will without violating rules at the age of seventy." Probably it was the ideal realm as mentioned above. Indeed, it must be the realm of a saint when whatever one says and does is in harmony with the entire universe, society, and one's own frame of mind.

That Confucianism still has a value for its continued existence is perhaps due to the sole fact that it provides us a reason for being a man. It is most difficult for one to be a man, still more to maintain a harmony between oneself and nature, society and others, or between one's inside and outside in body and soul. Is such a requirement unnecessary in today's world? As Confucianism only tells us the reason for being a man, we should not set demands on it in other aspects. And it should come as no surprise that it suffers from some inadequacies.

壹 关于儒家思想第三期发展可能性的探讨*

儒家思想有没有第三期发展的可能性，这是把春秋战国时期孔孟荀等看成儒家发展的第一期；汉朝以后佛教传入中国，在经过佛教思想的冲击之后，到宋明产生了理学，儒家思想有了很大发展，成为儒家思想发展的第二个时期；近百年来，西方文明的传入，五四运动前后马克思主义又传入中国，这一冲击比佛教对中国传统思想文化的冲击更大、更严重，在这样的情况下，儒家思想有没有第三期发展的可能性？它会不会“死而复生”？它还能不能在中国、在世界上起作用？我想，全面地讨论这个问题或者为时过早，但试图从某些方面提出一些问题和看法，也许对于推动这一问题的探讨是有益的。

讨论儒家思想第三期发展的可能性，首先应弄清儒家思想的基本精神。对于儒家思想的基本精神过去有各种各样不同的看法，今后仍然会有各种各样不同的看法。有不同的看法并不一定是坏事，它会推动对儒家思想的基本精神的研究。弄清儒家思想的基本精神，我觉得可以注意两点：一点是要注意贯穿儒家思想整个发展过程中经常起作用的某些思想；另一点是它到目前为止仍然有活力的那一部分。把这两个方面统一起来考虑，也许可以从某一侧面看到儒家思想有没有第三期发展的可能性。

我认为贯穿整个儒家思想发展过程中有两个基本精神对我们今天仍有很大意义，一是理想主义，二是人本主义，而这两者又是结合在一起的。

在中国传统思想中有一种理想主义，从孔子起就向往着“天下有道”的社会，并且极力想把它实现于现实社会之中，甚至并不认为它完全能够实现，但却认为人们应有这种理想，应有“知不可而为之”的精神而致力于此。所以当子贡问孔子“如有博施于民而能济众，何如？可谓仁乎？”的时候，孔子回答说：“何事于仁，必也圣乎！尧舜其犹病诸。”可见孔子并没有认为尧舜时期的社会就是人类最高的理想社会。因此，就

有一个对于理想社会应如何看的问题。照儒家看，理想社会就是一种理想，它只有实现的可能性，但并不一定能把这种可能性变成现实性。尽管理想社会从来没有实现过，但要不要追求它却是一个根本性问题，是一个人生态度问题。孔孟认为，对于它应去不断地追求，所以当时人批评儒家“迂阔”。我看问题就在于此。理想社会虽然不一定能在现实中实现，但对于古代的哲人来说，却可以在他们的心中实现。为什么张载的《西铭》那么受后来宋明理学的重视？我想就在于《西铭》体现了古代思想家追求理想社会的精神，而且在他的心中已经建立了这个理想社会。张载理想中的“民，吾同胞；物，吾与也”的社会是否能实现，这对他来说固然很重要；但更重要的是人能不能有一种追求理想社会的人生态度，所以《西铭》的最后一句是“存，吾顺事；没，吾宁也。”人生在世必须去尽自己的责任，这个责任就是如何为实现理想的“大同世界”而奋斗，为这个理想可以说是“只问耕耘，不问收获”，这样的人生态度是问心无愧的。今天难道我们不是更加需要这种人生态度吗？

儒家思想是一种理想主义，这种理想主义又是以它的人本主义为前提的。人为什么要有一个理想，要追求建立一理想社会？照儒家看，人在天地中是最重要的，他能“为天地立心，为生民立命，为往圣继绝学，为万世开太平”，所以孔子说：“人能弘道，非道弘人。”“道”（或“天道”）是客观存在的，但“道”要人来发扬光大它，要人在实践中体现它。人怎样体现“天道”？儒家认为，如果能了解“天人合一”“知行合一”“情景合一”，那么人就有了一种做人的最高境界，也就可以把其美好的理想凝聚于心中。

“天人合一”“知行合一”“情景合一”是中国传统哲学关于真、善、美的三个基本命题，也是儒家所要追求的理想境界。儒家思想为什么要追求这三个“合一”呢？我认为，儒家思想无非是教人如何做人，对自己应有一个要求，对天下国家应有一个责任感，这是一个很普通的问题，但也是一个极难做到的问题。达到了这个“天人合一”“知行合一”“情景合一”的真、善、美的理想境界的人是圣人。

“天人合一”的问题虽然是说明人和整个宇宙的关系，但它是把人作为宇宙中心来考虑的，《中庸》中说：“诚者，天之道也；诚之者，人之道也。诚者，不勉而中，不思而得，从容中道，圣人也。”因此，圣人的行为不仅应符合“天道”的要求，而且是以实现“天道”的要求为己任。人生活在天地之中，不应取消极态度，而应“自强不息”，体现宇宙大化的

流行，这样人就会对自己有个要求，有个做人的道理，有个高尚的境界。既对自己有个要求，要有个做人的道理，最重要的是要做到“知行合一”，有个道德修养上的知行统一观。《大学》的三纲领八条目就是告诉我们这个道理，它说：“大学之道，在明明德，在亲民，在止于至善”；“古之欲明明德于天下者，先治其国。欲治其国者，先齐其家。欲齐其家者，先修其身，欲修其身者，先正其心。欲正其心者，先诚其意。欲诚其意者，先致其知。致知在格物。物格而后知至，知至而后意诚，意诚而后心正，心正而后身修，身修而后家齐，家齐而后国治，国治而后天下平。”这是一个认识过程，更是一个道德实践的过程。人应该有理想，最高的理想是“致太平”，使人类社会达到一个“大同”的境地。而“大同”世界的基本要求就是每个人对自己有个做人的要求，要有个做人的道理，要能“己所不欲，勿施于人”，孔子说：“吾道一以贯之”，“忠恕而已矣。”理想的“大同”世界能否达到自然是个问题，但儒者应有这个要求，并从中得到做人的乐趣。盖人生活在天地之中，要做人，也要有做人的乐趣，要能领略天地造化之功；而真正能领略天地造化之功的，就必须能于再现“天地造化之功”中表现人的创造力，表现人的精神境界，表现人之所以为人者，使诗文成为“至文”，使绘画成为“神品”，使音乐成为“天籁”。所以艺术的要求是“情景合一”的，王夫之说：“情景名为二，而实不可离。神于诗者，妙合无垠。巧者则有情中景，景中情”；“情景一合，自得妙语。”当人进入这一创造的境界，这将是真、善、美合一的境界；人生的意义、人类的最高理想正在于此。孔子说他“七十而从心所欲不逾矩”，大概就是这样一种境界，自己的一切言行和整个宇宙、社会、自己的身心都和谐了，这种境界是真、善、美合一的境界，自然也就是圣人的境界了。

儒家思想之所以仍有存在的价值，也许就仅仅在于它告诉我们一个做人的道理。做人是最不容易的，做到和自然、社会、他人以及自己的身心内外的和谐更是不容易的，难道今天的世界不应有这样的要求吗？正因为儒家思想只是告诉我们一个做人的道理，就不应从其他方面要求它。它有不足的方面，也不应该奇怪。

II . CONFUCIANISM

CONSTRUCTIVE

POSTMODERNISM

&

I . What Kind of Age Are We in Now?

From a world perspective, our current age can possibly be seen as the transition from modern capitalist society beginning with the first, 18th-century, Enlightenment toward a postmodern society of a "second enlightenment." From a China perspective, our age will be seen as a crucial moment for realizing great national revival in the context of globalization. All in all, for human society, this age represents a precious opportunity to enter a totally new era.

Since the 18th-century Age of Enlightenment, Western capitalism has a history of almost 300 years, during which period the Western world achieved dazzling "modernization." But now, "modernized society" is suffering from more and more intractable problems. Immanuel Kant(1724-1804) proposed that reason should be the watchword of the Enlightenment, but these days "reason" faces its own problems. Originally, "reason" contained two related aspects: "instrumental reason" and "value reason," both aspects with an extremely important role in advancing human progress, but the present-day reality is that "scientifically omnipotent" "instrumental reason" outshines humanistic "value reason," and the latter has become marginalized. As a result, everything becomes an "instrument": people become instruments for others and the natural world has become an instrument to be used by human beings as they see fit.

The normal and harmonious relation between man and nature has

been severely harmed by man's unrestrained exploitation, destruction and waste of natural resources. In turn, man's own survival is threatened by deteriorating natural conditions such as depletion of the ozone layer, poisoned oceans, polluted environment and unbalanced ecoenvironment. Although the Kyoto Protocol for limiting air pollution was signed in Kyoto, Japan, in as early as December 1997, certain developed countries in the capitalist world set various obstacles on its path. One example is Canada's recent announcement of its intention to withdraw from the Protocol. This illustrates that the "reason" advocated by the Enlightenment is being changed by some Western leaders into a "non-rational" and utilitarian "tool."

With the growth of industrialization, "free market economy" has promoted the huge increase of human wealth and people have won great material benefit from it. But there is no denying that it has also caused serious polarization between the rich and the poor (including country-to-country, ethnic group-to-ethnic group, class-to-class within a country). If "free market economy" continues to grow like a rapacious monster, without effective supervision, control or restraint, sooner or later it will cause economic crisis and social disturbance. The global financial crisis that first appeared in the USA in 2008 was still ongoing when the debt crisis began to sweep Europe in 2011. According to Professor Paul Kennedy of Yale University, liberalism freed people from the shackles of the pre-market-economy age, but it has also put people in danger of financial crisis and social disasters.¹

Another Enlightenment watchword, "liberation of the individual," originally targeted religious superstition and vulgar ignorance, encouraging people to be fully aware of their own strength so as to fully deploy their "free" creativity. Today, however, this notion has become an instrument for the domination of others, a tool that imperialist countries in particular use to support their own hegemony and impose their own value systems on other countries and people, pushing a universalist doctrine.² The distorted development of today's capitalist society has resulted in people no longer in pursuit of

"reason," but indulging themselves in the lust for power and worship of money. Consequently, all groups of people live in pain and mental conflict: ordinary people struggle to survive harsh conditions; intellectuals experience constant guilt because of their inability to settle social chaos; unable to win people's trust, politicians exist in a state of self-deception; entrepreneurs wrestle to figure their way around mutually contradictory rules and systems. Regardless of rank or identity it seems the happy life to which all aspire is out of reach and happiness eludes all. But this is not a problem caused by any individual: rather, it is an unavoidable pain for a society in the throes of a major transitional period. Therefore, it is incumbent on each and every one of us to work hard for the coming of a new age.

II . The Rise of Two Trends of Thought in China in the 1990s

In the 1990s, there emerged in China's ideological and cultural circles two ideological trends opposing the concept of "monism." One trend is "postmodernism," an idea originating in the West and aiming to deconstruct "modernity." In the early 1980s, "postmodernism" had already come to China, but it made little impact at the time; by the 1990s, however, Chinese scholars were suddenly showing it great interest. Another trend is the "*Guoxue* tide"—the ardent pursuit of revitalizing traditional Chinese culture. In truth, in the 1980s, China's thinkers had advocated greater emphasis on traditional Chinese culture, but it did not coalesce into a surge tide until in the 1990s when *Guoxue* rose quietly in Peking University. What does the rise of these two trends mean for us?

In the 1960s, to save human society and cancel out modernity's concomitant negative impact, the trend of "postmodernism" first emerged in the West. In its early period, postmodernism was "deconstructive postmodernism," posited as a way of dealing with

problems produced in the course of modern society's development. The aim was to deconstruct modernity, to oppose monism and advocate pluralism, to shatter all authority and to cast the "authoritativeness" and "dominant nature" of modernity into the shade. But, postmodernism of the deconstructive kind produced neither positive standpoints, nor any designs for a new age.

At the turn of the 21st century, "constructive postmodernism," a concept based on process philosophy, proposed integrating the positive elements of the first Enlightenment with postmodernism and thus called for a "second enlightenment." For instance, according to Whitehead's process philosophy, "man" should not be taken as the center of everything. Rather, "Man and nature should be regarded as a closely related living community."³ According to John B. Cobb, a major founder of process philosophy, "Constructive postmodernism takes a critical attitude towards deconstructive postmodernism. . . we have introduced ecologicalism into postmodernism. In a postmodern age, man and man will co-exist harmoniously, as will man and nature. It is an age which will retain something positive of modernity while transcending dualism, anthropocentrism and male chauvinism, an age that aims to build a postmodern society for the common good." According to process philosophy, if the rallying cry of the first Enlightenment was "to free the self," then the second enlightenment's watchword should be "to care about others" and "to respect differences" (in a postmodern society). In their opinion, when people use their personal "freedom" in ways that diminish the community, they are bound to weaken their own "freedom." Therefore, it is necessary to reject an abstract concept of freedom in favor of a profound and responsible freedom by bringing in the notions of responsibility and duty and by revealing the inner relation between freedom and duty. In the West, constructive postmodernism is a tiny branch stream with very little influence, but in China it has attracted the attention of a group of scholars who are passionate for national revival.

Karl Theodor Jaspers wrote in *The Origin and Goal of History*: "Until today mankind has lived by what happened during the Axial Period, by what was thought and created during that period. In each new upward flight it returns in recollection to this period and is fired anew by it. Ever since then it has been the case that recollections and re-awakenings of the potentialities of the Axial Period—renaissances—afford a spiritual impetus. Return to this beginning is the ever-recurrent event in China, India and the West."⁴ This is exemplified in the " *Guoxue* tide" in the late 1990s, when China was experiencing a process of national rejuvenation, and for this the support of a revitalized national culture was essential.

In my opinion, it is precisely because traditional Chinese culture (*Guoxue*) has had over a century of impact from Western culture that Chinese scholars have had the chance for reflecting on our own traditional culture. We have gradually come to realize what of our culture should be promoted, what abandoned and what absorbed. For over one hundred years, Chinese scholars have been trying to absorb and digest "Western learning," and this most certainly laid the foundation for the transformation of *Guoxue* in the traditional sense to its modern counterpart. The new or modern *Guoxue* must be a spiritually significant power for China's revival as well as for the "peace and development" of human society. It will help China to realize "modernization" in an all-round way, and also to avoid the predicament that Western society currently experiences.

In other words, the new *Guoxue* should stick to the principle of *Fanben Kaixin*. Only through *Fanben* (return to the source) are we able to *Kaixin* (open up new territory). *Fanben* requires of us a deep understanding of *Guoxue*'s essence and insists on the mainstay nature of our own culture, whereas *Kaixin* requires of us a systematic understanding of the new problems facing China and human society, problems in need of urgent resolution. The two aspects are inseparable: Only by digging deeper into the true essence of *Guoxue* can we open up new territory at the appropriate time. Only by

squarely addressing the problems of human society can we better promote and update the essence of *Guoxue*, so that in the 21st century, the flame of *Guoxue* will once more be ignited by the *Fanben Kaixin* principle and contribute to human society.

What are the prospects of these two trends of thought in China? Will they exert a positive impact on Chinese society and on human society as a whole? To answer these questions, we must fully investigate the possibility of integrating the two.

III . In the New Historical Period of Chinese Revival and in the Context of Globalization, Traditional Chinese Culture May Well Make an Epochal Contribution to Human Society.

China is in the process of national revival, and this must have the support of revitalized national culture. However, in this globalized age, the revitalization of our traditional culture requires us not only to address our own social problems, but world problems also. It follows that while developing our traditional culture we must keep in mind that it belongs to both China and the world at large. It requires us not only to pay close attention to the actual development of our own culture, but also to incipient tendencies in Western culture. Here the author would like to offer a possible trend for discussion, namely: Could a combination of *Guoxue* and constructive postmodernism—the former traditional Chinese learning and the latter of Western origin and still in the bud—have something to offer to the healthy and rational development of China and the rest of the world?

i . "Man and Nature as a Closely Related Living Community" and "Unity of Man and Heaven"

According to John B. Cobber, "Today we recognize that man is a part of nature and that we live an ecological community." This idea, although coming directly from Whitehead, is very similar to a

traditional Chinese notion—the unity of Man and Heaven, Heaven implying the laws of nature. As a core traditional Chinese value, it is a mode of thinking that differs from the "man-nature dichotomy" idea that long prevailed in the West.

In 1992, 1,575 scientists from around the world signed and published a document named "World Scientists' Warning to Humanity." Its first line reads: "Human beings and the natural world are on a collision course." Why has nature been so devastated? There is no getting away from the fact that the long prevalence of the "man-nature dichotomy" mindset has made nature a victim.⁵ Fortunately, the "unity of Man and Heaven" way of thinking offers us a feasible way towards tackling the destruction of the natural world.

As early as 2,500 years ago, Confucius was exhorting people to both "know Heaven" and "fear Heaven." The first admonition requires us to learn more about nature and thus consciously use it to improve the welfare of human beings. The second requires us to hold nature in awe and fulfill our duty of protecting it. According to Zhu Xi, another great thinker of ancient China, "Heaven is inseparable from man and man from Heaven." What he is telling us is that, after Heaven gives birth to man, man and Heaven have formed an inseparable relation, one that requires man to embody the laws of Heaven and to be responsible for it.

As we have seen, in dealing with the relation between man and nature, traditional Chinese philosophy takes a road similar to that of constructive postmodernism. As Léon Vandermeersch put it, "Western humanism that brought the world such a perfect thought as the concept of human rights now faces many challenges from modern society that as yet it has been unable to answer. Why, then, not give some consideration as to whether Confucian thinking might indicate a way forward for the world, for example: respect for nature as proposed in the 'unity of Man and Heaven' concept; and the philanthropic spirit that 'all men are brothers'? We can and should bring to bear the essence of Confucian teaching on current world

problems, to examine them afresh from a new perspective."⁶

Why does Vandermeersch put Western thought on human rights together with the three concepts from Chinese thinking as mentioned above? As we know, human rights are very important to us, because man should not be deprived of the right of freedom, and social progress can only be realized with "freedom of thought," "freedom of speech," "freedom of belief," "freedom of movement," etc. However, the question of how to protect human rights is often subject to interference by external forces, to removal even. This has been the case in China and overseas. Some Western thinkers and politicians widen the concept of human rights to the extent that there are no limits and that man can destroy nature at will. Hence Vandermeersch asserted that there should be some constraints on man's rights over nature, and to do that we should use the significant philosophical asset of the concept of their unity.

According to Christian belief, God created the world in its complete form and man can do nothing further to it. However, in Vandermeersch's opinion, once God created a complete world, the rest was man's problem and for man to address. Just as André Gide, the French writer, said, "God proposes and man disposes." The Confucian view that "all men are brothers" is linked to another traditional Chinese idea, namely "world outlook." This considers that man's loftiest ideal is "the world being One"(or the world is in Great Harmony). As written in *The Great Learning*, it is important to cultivate one's moral character, to take good care of one's family, to run the State well and thence make the whole world peaceful and harmonious. For any country or nation, it is important to consider not just its own interests, but "peace in the world" (i.e. common interests of mankind), which, in my opinion, should be an intrinsic meaning of "human rights." In other words, Western thinking on human rights would do well to look into the traditional thought and culture of other nations(such as China) for valuable elements that could supplement and enrich its own approach, and thereby set human society on a

more reasonable path.

ii . Constructive Postmodernism, a Second Enlightenment and Confucian "Renxue" (Learning of Goodness)

According to constructive postmodernism, if the watchword of the first Enlightenment was "liberty of the individual," then those of the second should be "care about others" and "respect for differences."⁷ The former can be described as *ren* (goodness), a core value of the Confucian school. The starting point and basis of *ren* is "love of family," but according to Confucius we should not only extend *ren* to family members but beyond the family, too. Similarly, as taught by Mencius, an important successor of Confucius, "Apart from taking good care of the elderly and children of one's own kin, one should extend concern for the elderly and children of other families." He also asserted that love for family was a prerequisite for loving others, and loving others a prerequisite for loving all creatures.

Mencius' thought is also in line with the "care about others" line proposed by constructive postmodernism. According to constructive postmodernism scholars, their philosophy is to try to "construct a postmodern world where all living communities get due attention and concern" on the basis of "retaining some positive factors of modernity"(mainly valuable concepts such as "freedom," "democracy," "human rights," etc., as proposed by Western thinkers on the basis of reason).⁸ This can be regarded as a more comprehensive description of "care about others." In the development of human society, culture always undergoes a process of accumulation, inheritance and creation. A postmodern society must retain the positive factors of modernity such as "freedom," "democracy," "human rights," etc., before the significance of "constructing a postmodern world in which all living communities get due attention and concern" can be fully displayed. "Respect for differences" can be taken as a different way of expressing the Confucian proposition "the Ways move in parallel and do not interfere with each other."

Different ideological and cultural traditions often have different

features. Fortunately, such differences can be meaningful to human society to an extent and are by no means necessarily at odds.⁹ For example, to allow that the concept of "democracy" proposed by the West as having positive meaning in specific social conditions, is not to deny traditional Chinese thinking such as *Minben* (people as the root) as also having positive meaning in specific social conditions too; nor do we deny the "universal value" of our traditional thoughts such as "Do not do to others what you do not want done to yourself." Only by acknowledging that every ideological and cultural tradition has its positive effect on human society can different countries and nations co-exist and co-prosper. Absorbing and digesting the strong points of different cultural systems as a means of achieving real comprehension of them is an essential path for the development of culture. Just as Russell said, "Contacts between different civilizations have often in the past proved to be landmarks in human progress."¹⁰ We should remember that as human beings, we face common problems. We may adopt different ways to tackle those problems but we often come to the same end via different routes. Therefore, "respect others" and "the Ways move in parallel and do not interfere with each other" have equivalent value to us.

iii . Defining "Human" and Examining "Human Rights" from the Standpoint of "Li"—a Traditional Chinese Concept

The human rights concept is a very important one for modern society. But each ideological and cultural tradition should discuss deeply how to have the concept play a positive role in building a healthy and rational society. As written in *Thinking Through Confucius*, co-authored by Hall and Ames, two well-known American philosophers, "What we need to do is not only to study Chinese traditions but also to use them as a cultural resource to enrich and restructure our own. The Confucian school defined 'man' from a societal perspective. Can we use it to modify and strengthen the Western mode of liberalism? Can we find some useful resource from a society built on *li* [rites, courtesy, ceremony, etc.] to help us better

understand our insufficiently rooted but indeed valuable outlook on human rights?"¹¹

This paragraph discusses three issues: One, that the West should not stop at studying China's thinking and culture, but go on to apply those things so as to "enrich and restructure" its own; Two, the necessity of understanding the significance of "man" as defined from a societal perspective in traditional Chinese culture; Three, that China's *li* contains elements that could well be valuable if brought into the Western concept of human rights.

In my opinion, the three issues raised by Hall and Ames are for treating the condition of some of Western philosophical concepts being "insufficiently rooted." It is precisely because of the great importance attached to man's right of liberty in modern society (since the first Enlightenment) that human society has developed by leaps and bounds. The right of liberty is a great creative force. That said, the misuse of right of liberty by an individual, a country or a nation can, in certain circumstances, constitute a threat to, suppression or violation of the rights of other individuals, countries or nations. To define "human" from a societal perspective as traditional Chinese culture does means "not defining it from the isolated angle of 'the individual'" because "humans" have to live and grow up in various relations since the moment of birth. It is much like what Karl Marx said in *Theses on Feuerbach*, "The essence of man is no abstraction inherent in each single individual. In reality, it is the ensemble of social relations."¹²

How then are we to handle the complex "social relations of man"? In ancient China, great emphasis was placed on *li* in dealing with these relations. Although *li* was a conceptual thing, it did have a restricting power on man's behavior. As written in *The Analects of Confucius*, "In practicing the rules of *li*, harmony is to be prized." The most important role of *li* is to promote social harmony as a normalizing power over society. As written in the *Book of Rites*, ". . . rulers use *li* to protect morality and laws to prevent people from

committing crimes." Rulers created *li* for preventing moral norms being ruined and made laws for keeping social order. As written in "Explaining Government" by Jia Yi of the Former Han Dynasty, " *Li* is put into practice before people do something wrong whereas law is executed after people do bad things. The role of law is visible whereas the role of *li* is invisible and hard to perceive." Another reason that *li* is greatly valued in our tradition is, as advocated by the Confucian school, the importance of reciprocal relationships among people. As written in the *Books of Rites*, "What is human righteousness? It involves ten (or five pairs of) person-to-person relations: A father is kind to children and children show filial obedience to parents; brothers are kind to each other; a husband is responsible to wife and wife obedient to husband; the older children are kind to younger siblings and the younger respect the older; a ruler is benevolent and his subjects are loyal." That is to say, according to the Confucian school, the moral relation between people should be a relation of rights and corresponding obligations rather than one-sided enjoyment of rights without fulfilling obligations. China's *li* was created precisely in order to balance the rights and obligations of those social relations. Therefore, in my opinion, is it possible to call premodern China a society under "rule of *li* and law"? This, of course, is an ideal of the Confucian school.

From this one could envisage, in establishing a "convention on human rights" also establishing a "convention on obligations" at the same time, so as to keep a balance between rights and obligations. This would accord with what Hall and Ames believed a possible role for *li*— "enriching and restructuring" the Western concept of human rights. One might envisage a "convention of obligations" to protect and strengthen a "convention on human rights."

According to John B. Cobber, "Traditional Chinese ideology is very attractive to constructive postmodernism, but we should not just return to it. Instead, our postmodernism should renew itself by serious scientific means and by adjusting itself to the changing society. The

pre-modern tradition should absorb the positive factors of the Enlightenment such as concern for and respect of individual rights before it can contribute something to the postmodern society."¹³ This paragraph has great significance for study of our ideology and culture. Traditional or pre-modern Chinese culture needed to absorb rather than exclude all valuable fruits achieved by modern society since the Enlightenment, such as freedom, democracy, human rights, etc., concepts that embody "concern and respect for individual rights." In addition, we must work hard to put into practice those positive concepts before we can successfully align traditional or pre-modern Chinese culture with postmodernism and promote the transformation from modern to postmodern society.

It is good to note that some Chinese scholars have had extensive contact and satisfactory cooperation with Western scholars of constructive postmodernism. The representative figures of constructive postmodernism have also realized the value of traditional Chinese culture to their research and are absorbing nutrition from it. Similarly, some Chinese scholars have noticed the practical significance of constructive postmodernism in helping human society out of predicament and are paying close attention to the development of this thought. If an organic synthesis between the widely influential " *Guoxue* tide" and constructive postmodernism can be achieved, then pioneered deeply in Chinese society and developed further, China could perhaps proceed smoothly to complete the mission of its own "first enlightenment," realize modernization, and then rather rapidly enter a postmodern society marked by a "second enlightenment." If this does come to pass, the fruits achieved in China's current cultural revival will be of great significance to human history.

In this paper, the author explores the possibility of communication and integration of Western and Chinese cultures. Whether this possibility can become reality hinges mainly on how China's *Guoxue* can adapt to healthy social development and whether constructive postmodernism, currently a minor branch of thinking in

the West, can become more mainstream and win widespread acceptance. The author stresses that this paper is simply a theoretical foray—a try-out—and would welcome any comments.

贰 儒学与建构性后现代主义*

一、当前我们处在一个什么样的时代？

从全世界来说，将可能是自18世纪以来第一次“启蒙运动”开始的资本主义现代社会向第二次“启蒙”的后现代社会转型。从中国说，将是处在全球化背景下实现伟大的民族复兴的关键时刻。这个时代对人类来说将是走向新时代的一次难得的机遇。

我们知道，西方资本主义自18世纪“启蒙运动”到现在已有近三百年的历史，这三百年的历史也是西方取得辉煌的“现代化”的历史。但到现在，“现代化社会”的矛盾日益显露，出现了许多深层的难以克服的问题。康德（1724—1804）提出“要敢于用理性”作为“启蒙运动”的口号，但是“理性”现在发生了问题。本来“理性”包含着两个相互联系的方面：“工具理性”和“价值理性”，它们对人类社会的发展有着极大的推动作用，然而现在的情况是“科学万能”的“工具理性”一枝独秀，而具有人文精神的“价值理性”被边缘化了。这样使一切都变成了“工具”，不仅“人”对“人”是一种“工具”，而且“人”把“自然界”也变成了可以任意利用的“工具”。

当前对“自然界”的无量开发和破坏，自然资源的浪费，臭氧层变薄，海洋毒化，环境污染，生态平衡失调，严重地损害了“人”和“自然界”的正常和谐关系，威胁着人类自身生存的条件。1997年12月在日本京都通过了一份限制大气污染的《京都议定书》，但一些发达的资本主义国家对此设置了种种障碍，近日加拿大又宣布退出《京都议定书》。这说明，“启蒙运动”提出的“理性”已被西方国家的某些主政者变成“非理性”的功利化“工具”。

“自由经济”（自由的市场经济）曾使工业化以来人类社会的财富极大增长，人们在物质生活上受益巨大。但不可讳言，“自由经济”发展到现在却使贫富两极（包括国家与国家、民族与民族以及同一国家内部的各阶层）分化日益严重。如果“自由经济”不受到一定程度的有效监督和控制，将会像贪婪的猛兽一样不受约束地发展，定会引起经济危机和社会混乱。2008年首先发生在美国的金融危机还没有走出，2011年接着

在欧洲又发生了“欧债危机”，真是在劫难逃。美国耶鲁大学教授保罗·肯尼迪说：“自由主义使人们免于市场经济之前时代的束缚，也使人们承受着金融和社会灾难的危机。”¹

“启蒙运动”的另一口号“个性解放”，这本来是针对宗教的迷信和世俗的蒙昧，使人认识到自我的力量，以便使“自由”的创造力得到充分发挥，但是“个性解放”发展到今天也异化成对他人宰制的工具，特别是帝国主义依仗他们的霸权，强行把他们的“价值观”加给其他国家和民族，推动“普遍主义”。²资本主义现代社会的畸形发展，导致人们追求的不再是“理性”，而是权力欲望的放纵和对金钱的崇拜。因而使各个人群都生活在矛盾与痛苦之中，老百姓在艰难的生活条件下为谋生而苦苦挣扎，知识分子面对社会种种乱象而无能为力，日夜受到良心的谴责，政治家（政客）为得不到人们的信任而自我欺骗，企业家因各种相互矛盾的制度与规则而千方百计地想对策。各阶层、各人群希望得到幸福生活的到来似乎遥遥无期，大家都不快活。这不是哪个人的问题，而是人类社会一次重大转型时期的不可避免的阵痛。为此，我们每个人都应义不容辞地担当起促进新社会早日到来的责任。

二、上个世纪90年代两种思潮在中国的兴起

上个世纪90年代在中国思想文化界出现了两股反对“一元化”的思潮。一股是来自西方消解“现代性”的“后现代主义”。“后现代主义”在上个世纪80年代初已经进入中国，但在那时没有什么影响，而到90年代突然被中国学术界关注了。另一股是追求复兴中国传统文化的“国学热”思潮。其实，在80年代中国学术思想界已经提出应重视中国的传统文化，但并未形成热潮，90年代“国学在燕园悄然兴起”而渐渐形成热潮。这两股思潮的兴起，说明什么问题？

为了挽救人类社会，消除“现代化”带来的负面影响，因而在上个世纪60年代在西方有以消解“现代性”的“后现代主义”思潮的出现。初期的“后现代主义”是“解构性的后现代主义”，它是针对现代社会发展过程中所产生的缺陷提出的，他们所做的是对“现代性”的解构，反对一元化，主张多元化，要求粉碎一切权威，使“现代性”的权威性和宰制性都黯然失色，但是解构性的“后现代主义”却并未提出新的建设性主张，也没有策划一个新时代。

在20世纪末，将进入21世纪之初，以“过程哲学”为基础的“建构性的后现代主义”提出将第一次“启蒙”（即18世纪的“启蒙运动”）的积极因素与“后现代主义”整合起来，召唤第二次“启蒙”。例如，怀德海的过程哲学认为，不应把“人”看成一切的中心，而应把“人和自然视为密切联系的生命共同体”。³过程哲学中心创始人小约翰·柯布说：“建构性后现代主义对解构性后现代主义的立场持批判态度，……我们明确地把生态主义引入后现代主义中，后现代是人与人、人与自然和谐共处的时代。这个时代将保留现代性中某些积极性的东西，超越其二元论、人类中心主义、男权主义，以建构一个所有生命共同福祉都得到重视和关心的后现代社会。”他们还提出，如果说第一次“启蒙”的口号是“解放自我”，那么第二次“启蒙”的口号是“关心他者”、“尊重差异”（指进入后现代社会）。他们认为，当用自身的“自由”专权削弱共同体的时候，其结果一定会削弱其自身的“自由”。因此，必须拒绝抽象自由观，走向有责任的深度自由，要把责任和义务观念引入自由中，揭示出“自由”与义务的内在联系。目前建构性的后现代主义在西方仅仅是一股涓涓细流，影响很小，但却被中国的一批祈望民族复兴的学者所关注。

卡尔·雅斯贝尔斯在《历史的起源与目标》中说：“人类一直靠轴心期所产生、思考和创造的一切而生存。每一次新的飞跃都回顾这一时期，并被它重燃火焰。自那以后，情况就是这样。轴心期潜力的苏醒和对轴心期潜力的回忆，或曰复兴，总是提供了精神力量。对这一开端的复归是中国、印度和西方不断发生的事情。”⁴在上个世纪90年代，即将进入21世纪之际，由于中华民族正处在伟大的民族复兴的过程之中，民族的复兴必须由民族文化的复兴来支撑，因此，“国学热”的出现是必然的。

我认为正是中国的传统文化（国学）经过了一百多年西方文化的冲击，使我国学术界得到一个对自身传统文化自我反省的机会。我们逐渐知道，在我们的传统文化中应该发扬什么和应该抛弃什么以及应该吸收什么。因此，在长达一百多年中，我们中国学术界一直在努力吸收和消化“西学”，这为“国学”从传统走向现代奠定了基础。新的“国学”必须是能为中华民族在当代得以复兴、能为当今人类社会“和平与发展”的前景提供有意义的精神力量的“国学”。它将是使我国全面实现“现代化”，而又可以避免陷入当前西方社会的困境的“国学”。

也就是说，新的“国学”应该是“反本开新”的“国学”。“反本”才能“开

新”，“反本”更重要的是为了“开新”。“反本”要求我们对“国学”的真精神有深刻的领悟，坚持自身文化的主体性。“开新”要求我们全面系统地了解当前中国社会和人类社会所面临的亟待解决的新问题。“反本”和“开新”是不可分割的，只有深入发掘“国学”的真精神，我们才可能适时地开拓“国学”发展的新局面；只有敢于面对当前人类社会存在的新问题，我们才能使“国学”的真精神得以发扬和更新，使“国学”在21世纪的“反本开新”中“重新燃起火焰”，以贡献于人类社会。

这两股新的思潮在中国的兴起，它们的发展前景如何，对中国社会和人类社会能否起决定性的积极作用？为此，我们必须全面考察这两股思潮能否有结合的可能性。

三、中国传统文化在中华民族伟大复兴的历史新时期，它面对全球化的态势下很可能对人类社会作出划时代的新贡献。

中华民族正处在伟大民族复兴的过程之中，民族的复兴必须由民族文化传统的复兴来支撑。但是在全球化的时代，中华民族的传统文化复兴不仅要面对自身社会的问题，而且要面对当前世界存在的问题，这就要求我们在发展中华民族传统文化的同时，必须注意到它既是民族的，又是世界的。因此，我们不仅要关注中国社会文化自身发展的现实，同时我们必须关注在当前西方社会文化中发现的苗头。在这里我们提出一种可供讨论的可能的趋势，即中国传统的国学与西方刚刚萌芽的建构性的后现代主义思潮的结合，是否能对当今中国和世界的健康、合理发展有所贡献。

1. “人与自然是—生命共同体”与“天人合一”理论

建构性后现代主义的代表人物柯布说：“今天我们认识到人是自然界的一部分，我们生活在生态共同体中”，这个思想是从哪里来的呢？虽然直接来自怀德海，但它无疑是和中国的“天人合一”理念有着密切的关系。“天人合一”是中国传统思想的核心价值理念之一。它和在西方长期流行的“天人二分”理论是两种不同的思维模式。

1992年世界1575名科学家发表了一份《世界科学家对人类的警告》，在开头有这样一句话：“人类和自然正走上一条相互抵触的道

路”。自然界为什么惨遭破坏，这不能不说它与在西方长期有着影响的“天人二分”的思维模式有着密切的关系。⁵与西方这种思维定式不同的“天人合一”思维方式可以说正是为解决自然界惨遭破坏提供了可行的思路。

我们可以看到，早在2500多年前的孔子提出既要“知天”，又要“畏天”的思想。“知天”是要求人们认识自然界，以便使人们可以自觉地利用自然界为人类社会谋福祉；“畏天”是要求人们对自然界有所敬畏，认识“天”的神圣性，要自觉地尽到保护自然的责任。朱熹对“天人合一”思想的解释说：“天即人，人即天。人之始生，得之于天；既生此人，则天又在人矣。”意思是说，在“天”把“人”产生之后，“天”和“人”就存在着一种相即不离的内在关系，因而“天”的道理就要由“人”来彰显，“人”对“天”就有了不可推卸的责任。

我们可以看到，在解决“人”与“天”（自然界）的关系上，中国传统哲学和建构性的后现代主义走着相同的道路。所以正如法国大儒汪德迈说：“曾经给世界完美的人权思想的西方人文主义面对近代社会以降的挑战，迄今无法给出一个正确答案。那么，为什么不思考一下儒家思想可能指引世界的道路，例如‘天人合一’提出的尊重自然的思想、‘远神近人’所倡导的拒绝宗教的完整主义以及‘四海之内皆兄弟’的博爱精神呢？可能还应该使儒教精神在当今世界诸多问题的清晰追问中重新认识。”⁶

为什么汪德迈把西方的“人权”思想和中国的“天人合一”“远神近人”“四海之内皆兄弟”联系起来考虑？我们知道，“人权”对人类来说无疑非常重要，这是由于“人”的自由权力是不应被剥夺的，社会发展只能靠“思想自由”“言论自由”“信仰自由”“迁徙自由”等等来实现。但是如何保障“人权”，往往受到外在的力量干扰，甚至剥夺，无论中外都有这种情况。西方某些思想家或政客把“人”的权力无限扩大，以至于把“人”的权力扩大至可以去无序地破坏自然界。因此，汪德迈认为“人”对自然界的权力应该受到限制，这样就应该从中国的“天人合一”思想中取得有意义的思想资源。

在西方由于基督教认为上帝已经把世界完整地创造了，似乎“人”再无能为力了。汪德迈则认为虽然上帝把世界完整地创造好了，剩下的事就是“人”的问题，要“人”来做主了。正如法国文学家安德烈·纪德所说：“神出主意，人做主意”。在中国儒家所说的“四海之内皆兄弟”是和中国传统思想的“天下观”相联系的，它认为，人类最高的理想是“天下大

同”（协和万邦），《大学》说“修身、齐家、治国、平天下”，因此任何民族和国家要考虑的不仅是自己的国家（治国），而且最终要考虑“天下太平”（即全人类的共同利益），这应是“人权”中的应有之义。这就是说，西方的“人权”思想应可以在其他民族思想文化传统（如中国的文化传统）中找到某些补充和丰富其原有价值思想因素，以便人类社会走向更加合理之路。

2. 建构性后现代主义的第二次“启蒙”与儒家的“仁学”理论

建构性的后现代主义提出，如果说第一次“启蒙”的口号是“解放个人”，那么第二次“启蒙”的口号则是“关心他者”“尊重差异”。⁷“关心他者”的思想如果用中国儒家思想来表述，那就是“仁者爱人”。“仁爱”是孔子儒家学说的核心价值。儒家提倡的“仁爱”虽是从“亲亲”（爱自己的亲人）出发，如孔子所说：“仁者，人也，亲亲为大”，仁爱之心是人本身所具有的，爱自己的亲人是“仁爱”精神的出发点和基础。但是孔子认为，“仁爱”不能只停留在爱自己的亲人上面，要推己及人，“老吾老以及人之老，幼吾幼以及人之幼。”孟子也说：“亲亲而仁民，仁民而爱物。”从爱自己的亲人出发必须推广到对老百姓的“仁爱”，由爱护他人才会对一切事物都有爱心。

这样的思想又可以和建构性的后现代主义“关心他者”接轨。建构性的后现代主义认为，他们的哲学是在“保留现代性某些积极的东西”（主要是西方思想家依据理性提出的极有价值的“自由”“民主”“人权”等理想性思想）的基础上“以建构一个所有生命共同体福祉都得到重视和关心的后现代世界”，⁸这正是对“关心他者”的更为全面的表述。因为，人类社会的发展，其文化是要不断积累，总是在传承中创新。因此，后现代社会必须是在保留“现代性”社会的“自由”“民主”“人权”等等中的积极因素，这样“建构一个所有生命共同体福祉都得到重视和关心的后现代世界”的意义才得以充分显现。建构性的后现代主义提出的“尊重差异”，它正是儒家思想所主张的“道并行而不相悖”的另一种表述。

不同的思想文化传统往往是各有其特点而不相同，但这种不同可以说对人类社会都有一定的意义，并不是要相互排斥的。⁹例如肯定西方近代提出的“民主”思想在特定的社会条件下的积极意义，并不要否定中国思想文化传统中的“民本”思想在特定的社会条件下也具有某种积极意义，更不应否定中国传统文化中的“己所不欲，勿施于人”对人类社会的“普遍价值”。只有承认在不同思想文化传统中都有其对人类社会有积

极贡献的部分，这样在不同国家和民族之间才可以“共存”“共荣”。吸收和消化不同文化传统中的优长，以达到“会通”是人类文化发展的必由之路，正如罗素所说：“不同文明之间的交流，过去已经多次证明是人类文明发展的里程碑。”¹⁰我们应该看到，同为人类就有着共同要解决的问题，如何解决人类所面对的共同问题，道路可能不同，方法可能有异，但往往目标是殊途同归的。所以“尊重他者”和“道并行而不相悖”有同等的价值。

3. 如何定义“人”与中国传统文化中“礼”的“人权”观

“人权”观念对现代社会来说是非常重要的，但如何使“人权”观念真正对建设健康、合理的社会起积极作用是应该在不同的思想文化传统中进行深入讨论的。美国著名哲学家安乐哲、郝大维写了一本书叫作《通过孔子而思》，这本书中有以下一段话：“我们要做的不止是研究中国传统，更要设法使之成为丰富和改造我们自己的一种文化资源。儒家从社会角度来定义‘人’，这是否可用来修正和加强西方的自由主义模式？在一个以‘礼’建构的社会中，我们能否发现可以利用的资源，以帮助我们可以更好地理解我们的根基不足却富有价值的人权观念？”¹¹

这段话大体上说，讨论了以下三个问题：第一，西方不应仅仅研究中国思想文化，而且应用中国思想文化来“丰富和改造”西方的思想文化；第二，要理解中国传统文化是“从社会角度来定义‘人’”的意义；第三，在中国的“礼”文化中包含着极富有价值的“人权”观念的可资利用的因素。

我认为，安乐哲提出的三个问题正是为了对治“西方哲学的根基不足”而发的。正是近现代社会特别重视人的自由权利（第一次启蒙后的历史），才使得人类社会有了长足的发展。这是因为“人”的“自由权利”是一种巨大的创造力。但是，个人的“自由权利”和某一国家和民族“自由权利”的滥用，在一定情况下对其他人的“自由权利”或者其他国家和民族的“自由权利”将构成威胁和遏制，甚至侵犯。中国传统文化中的“从社会的角度定义‘人’”，意思是说“不是从孤立的‘个人’的角度来定义‘人’”，因为“人”一出生就是在各种关系中生活和成长，这颇有点像马克思在《关于费尔巴哈的提纲》中说的：“人的本质不是单个人所固有的抽象物，实际上，它是一切关系的总和。”¹²

那么，如何处理这种种复杂的“人的社会关系”呢？在中国古代社会特别注意用“礼”来处理“人”在社会中的种种关系。“礼”虽然是观念形态

的东西，但它带有对“人”的行为有着约束性的意义。在《论语·学而》中说：“礼之用，和为贵。”“礼”的作用最重要之点就在于促使社会和谐，这就是说中国传统文化中的“礼”是一种带有对社会规范性的力量。在《礼记·坊记》中说：“君子礼以坊德，刑以坊淫”，君子制“礼”是为了防止败坏社会的道德规范，制刑（刑法）是为了防止祸乱社会秩序。汉贾谊《陈政事疏》中说：“夫礼者禁于将然之前，而法者禁于已然之后，是故法之所用易见，而礼之所为生难知也。”可见，在中国传统中，对“礼”是特别重视的。这是因为中国儒家认为，在人与人之间应有一种相互对应的关系，如《礼记·礼运》中说：“何谓人义？父慈子孝，兄良弟弟，夫义妇听，长惠幼顺，君仁臣忠，十者谓之人义。”这是说，什么是人与人之间的道义关系，儒家学说认为在人与人之间应有一个权利和义务（责任）相对应的关系，不应只有单方面的权利而不需对所应承担的相对应的义务负责任。中国的“礼”正是为协调社会关系的权利和义务所设。因此，我认为中国前现代社会是不是可以称为“礼法合治”的社会，这当然是一种儒家的理想。

从这里，我们可以设想，在确立“人权公约”的同时是否应有一“责任公约”，以便使得“权力”和“责任”之间得到平衡。这也就是安乐哲他们所说“礼”对西方颇有价值的“人权”观念可以起着“丰富和改造”的作用。从这里，甚至可以看到“责任公约”或许会对“人权公约”起着保护和提升的作用。

小约翰·柯布说：“中国传统思想对建构性的后现代主义非常有吸引力，但我们不能简单地回到它。它需要通过认真对待科学和已经发生的变革的社会来更新自己。前现代传统要对后现代有所裨益，就必须吸收启蒙运动的积极方面，比如对个体权利的关注和尊重。”¹³柯布的这段话对我们研究中国思想文化应说是颇有意义。作为前现代的中国传统文化是需要认真吸收启蒙运动以来现代社会的一切积极成果，如自由、民主、人权等“对个体权利的关注和尊重”的思想，我们决不能企图排斥“自由”“民主”“人权”等“极富有价值”的思想，而且必须认真实现“第一次启蒙”有积极意义的理念，这样前现代的中国传统文化才能和建构性的后现代主义结成联盟推进现代社会向后现代社会的转型。

我们已经注意到，中国一些学者和西方建构性后现代主义的学者之间不仅有了广泛的接触，而且开始了良好的合作。建构性的后现代主义的代表人物已经注意到中国传统文化对建构性后现代主义颇有吸引力，

并已从中吸取营养；同样中国的一些学者也已经注意到建构性后现代主义对当前人类社会走出困境的现实意义，并认真地关注着该学说的发展。在中国已经发生广泛影响的“国学热”和建构性的后现代主义这两股思潮的有机结合如果能在中国社会中深入开展，并得到新的发展，也许中国可以比较顺利地完成任务，实现现代化，而且会较快地进入以“第二次启蒙”为标帜的后现代社会。如果真能如此，当前中华民族文化的复兴所取得的成果，在人类社会的发展史上将是意义重大的。

本文只是对当前中西文化交流与会通可能有的一种趋势的探讨，这一可能的趋势是否能真正出现，无疑要看中国的“国学”如何适应现代社会健康的发展以及建构性的后现代主义能否在西方从涓涓细流变成滚滚大江大河，而得到广大人群的赞同，这样理想才可以成为现实。在这里我必须说明，本文只是一种理论上的尝试，请大家批评指正。

III . THE CONTEMPORARY SIGNIFICANCE OF CONFUCIANIS

I

I have delivered speeches on the topic "The Contemporary Significance of Confucianism" several times, including in the 80s and 90s of the last century. Now, I will continue to address it in the 21st century. In addition to me, more and more scholars have started to address this topic. Why? I think there are two important reasons: One is that we are on the eve of the great revival of the Chinese nation. So now, we must review our historical and cultural tradition. Karl Jaspers presented the notion of "the Axial Age." He thought that great thinkers emerged in Ancient Greece, Israel, India, China and other countries almost simultaneously around 500 BC, and they all presented unique ideas on problems which concern all human beings. Aristotle and Plato in Ancient Greece, Prophets of Judaism in Israel, Shakyamuni in India, and Laozi and Confucius in China independently initiated and formed distinctive cultural traditions. Through 2,000 years of development, these cultural traditions have become central to human intellectual wealth, but these different cultures in different regions developed independently at the beginning, and did not originally influence each other. He says, until today mankind has lived all by what was thought and created during the Axial Age. In each new upward leap it returns in recollection to this period and is fired anew by it. Even since then it has been the case that recollections and reawakening of the potentialities of the Axial Period—renaissances—always afford a spiritual impetus. The return to the root is the continuous thing in China, India, and West (see Jaspers 1989, p. 14).

For instance, the Europeans in the Renaissance looked back at the origin of their culture, Ancient Greece, which revived European civilization and left its mark on global culture. Similarly, Song and Ming Neo-Confucianism in China was stimulated by Indian Buddhism; the Confucian thinkers, by "recalling" Confucius and Mencius in the pre-Qin Period, had promoted the ingenious Chinese philosophy to a new height. When we enter into the new millennium, the world's intellectual circle has started to appeal for the arrival of "a New Axial Age." Thus, it has become important to review and research ancient thoughts and wisdom, and recall the origin of our own culture in order to respond to the new, diverse world culture. Secondly, in the new century, our country has brought forward a great project to build a "harmonious society." Fei Xiaotong has raised the issue of "cultural self-consciousness." In order to build a "harmonious society," we have to know our own "culture." What is "cultural self-consciousness"? Fei Xiaotong in *Reconsideration on Humanistic Value* said:

Cultural self-consciousness denotes that people who live in a context of some culture have "self-knowledge" of their own culture, and can explain its origin, development, characteristics, and its trend. It does not mean that people "return to the original culture," and "return to the ancients," and it does not mean "complete Westernization" or "complete *tahua* 他化 (otherization)" at the same time. The request for self-knowledge intends to strengthen the ability of self-determination in the process of cultural transformation, and grasp the initiative status of cultural choice in the process of adaptation to new conditions and new era (Fei 2005, p. 248).

It means that we have to have "self-knowledge" of our culture and establish our place in our culture in the great historical era when we are building our "harmonious society." Our place in our culture does not mean "completely returning to the ancients" and "complete Westernization"; instead, it means assuring that our own culture can take deep root in society, like leaves which flourish if the roots are deep. So we have to persist in our cultural understanding in order to be able to absorb and digest the outstanding cultures of other nations

to nourish our own culture.

In this situation when we study our history and the prospect of our national culture, we have to adapt to the new trend of the contemporary development of world culture, that is, the "New Axial Age." We have to have cultural self-consciousness in order to meet the goal of building a "harmonious society." In the new historical era, what problems face the world and our society? Which issues should we address in order to realize "the New Axial Age" and our "harmonious society"?

II

Entering into the 21st century, the learning of the Chinese classics becomes popular. There are various opinions and explanations on this phenomenon. The so-called "learning of the Chinese Classics" can be found in *Zhouli* · Chunguan · Yueshi 周礼·春官·乐师, which is the earliest record: "The duty of the official in charge of music is to administer the affairs of nation-owned school, and to teach the offspring of high-ranking officials music and dance." But, now, the "learning of the Chinese classics" seems to be the opposite of "Western learning." The reason is that as we face the influence of "Western learning," we encounter the problem of how to protect and develop our own traditional culture. The development of Chinese culture faces a dual task. One is that we must protect our culture, and maintain our cultural foundation. And the other is how we deal with Western culture. This has been the basis of the cultural dispute of "China and the West, the Ancient and the Modern" for the past hundred years. But today, in the time of globalization, we must go out of the dispute, synchronize the teachings of "China and the West, and the Ancient and the Modern," and realize the ability of different cultures to coexist and prosper.

Today, there are various points of view about the "learning of the Chinese classics," especially Confucianism, in academic and cultural

circles. I will give a brief introduction in the following passages.

i . Some scholars propose the outline as "the reconstruction of Chinese Confucianism." They think that we "must revive Confucianism omni-directionally in order to fight against the omni-directional challenge of Western civilization" and "the revival of Confucianism is an urgent affair to revive Chinese culture and reconstruct Chinese civilization." Therefore, they advocate establishing Confucianism as the national religion and realizing the so-called "combination of politics and religion" of China's ancient times (Jiang 2005, pp. 3-7).

ii . There are two critiques of this point of view: One is from "the school of liberalism." The critics believe that "the theory that Confucianism can save the nation" counteracts contemporary democratic politics and is harmful to the idea of "equality." The critics assume that their purpose is to establish "Confucianism" as "the national religion," and they "attempt to ideologize Confucianism and make use of Confucianism as the instrument of dictatorship" (Chen 2006, p. 6). Another critique is from Marxist scholars. They think that "the essence of salvation in Confucianism is an exaggeration of moral function," and "to apply the ontological *Dao* of Heaven and ontological nature and destiny to pursue the kingliness *Dao* of politics, but this only leads to the trap of feudal dictatorship again." "The real savior can only be Marxism" (Ibid.).

iii . Some scholars fully affirm "Confucianism" in order to maintain and develop Confucian thoughts. For instance, modern neo-Confucians think that "the *Dao* of kingliness without," which can adapt to modern democratic politics, can be developed from the learning of the sageliness within. They also think that the system of epistemology can develop from the Confucian "learning of mind and nature." Others think that " *san gang wu chang* 三纲五常 (the Three Bonds and the Five Moral Rules) in human relationships" still have value. In the 1994 conference, Tu Weiming gave up his former belief that the Three Bonds still had value for the belief that "the Five Moral Rules in human relationships still had value." His opinion on "cultural China" is

important for making Chinese culture known to the world. But he divided "cultural China" into several circles, with the core circle including Chinese mainland, Taiwan, etc. The second circle includes the overseas Chinese. And the third circle includes those countries which have been influenced by Chinese culture. The fourth circle covers foreigners who study and enjoy Chinese culture. But one of his beliefs is debatable. He said: "The category of cultural China is very broad. Some persons who have no consanguineous relationship with China, but have a great impact on China are also a part of cultural China"(Tu 2002, p. 430). This is questionable. From this logic, we can infer the categories of "cultural Europe" and "cultural America," and that Chinese thinkers like Confucius, Mencius, Laozi, and Zhuangzi had an impact on them, so they are also a part of "cultural Europe" and "cultural America," too.

iv . Of course, some scholars think that the May Fourth Movement refuted Confucianism and to once again raise Confucianism to a high status is a historical regression.

How should we look at Confucian thoughts? There are various answers. Today, the many perspectives to this issue indicate that our society is progressing, because academic and cultural questions can only be raised in an environment of free discussion and improved by rational dialogue.

Of course, I myself have my own opinion on "Confucianism," and debates will determine whether my opinion is right or not. It is just one voice. I have several opinions on academics and culture. First, there is no absolutely right way of thinking and culture in history, because each of them contains internal contradictions, including Confucianism. So, some aspects of Confucianism inevitably have historical limitations, and cannot adapt to the needs of modern society. The universal significance of Confucianism also needs to be interpreted in a modern way. Second, although thinking and culture are moving forward, the issues raised by ancient philosophers and their thoughts are the same as today because some philosophical

issues last forever. For instance, the problem of "the relationship between human and nature" is still discussed in contemporary Chinese philosophy. Third, Bertrand Russell said: "Contacts between different civilizations have often in the past proved to be landmarks in human progress" (Russell 1922, p. 195). Any culture that wants to have continuous historical development must absorb and digest other nations' cultures, and a culture can only keep up with other cultures through mutual exchanges, especially in the era of globalization. Looking at Chinese history, the entry of Indian Buddhism has proven this. Chinese culture has benefited from Indian Buddhism; Indian Buddhism was further developed and promoted in China. It was absorbed by Chinese culture and had a profound impact on neo-Confucianism in the time of the Song and Ming dynasties. Today, we must absorb and digest Western culture and other nations' cultures, fully and systematically in the time of globalization. Only in this way can Chinese academics and culture adapt to the demands of contemporary human society and our own nation's development. Therefore, our culture must be national and international. Fourth, cultural subjectivity should be established. Any national culture must take root in its own soil because it is necessary to understand, comprehend, protect and develop a native culture fully in order to rationally and healthily develop as well as have the capacity to absorb other nations' cultures in depth. A culture that is unable to maintain its autonomy and is unable to absorb other nations' cultures to enrich and develop its own will be wiped out or completely assimilated.

Based on the above discussions, we may analyze "Confucianism" from three different perspectives: political Confucianism, orthodox Confucianism, and academic Confucianism.

Confucianism has been intertwined with politics in past dynasties; undoubtedly, it played an important role in feudal dictatorship. Confucianism pays special attention to its function in moral cultivation, which has a positive side, but the negative side leads to absolute rule, making China a society of "the rule of man," and making

it difficult for China to achieve "the rule of law." Confucians often moralized politics and glorified political rule; and they also politicized morality, making it an instrument of politics. Of course, some of the political philosophy in Confucianism limited dictatorship. For instance, "to resist high-ranking official with virtue," "people are the most valuable" and "to kill a dictator"(King Xuan of Qi asked: "Is it tolerable if a government official kills his king?" Mencius said: "He who destroys benevolence and righteousness is called a dictator. I just heard about King Wu of Zhou, the first king of Zhou Dynasty, who killed the dictator Zhou 纣, the last ruler of the Shang Dynasty, and I have never heard that he killed his king as an official.")(Mencius 1980, Liang Huiwang Xia). It was also typical of Confucians to apply "*tian* 天 (Heaven)" in restricting the emperor's power. Confucians proposed that humans should revere "Heaven" and fate. In some circumstances, "the interaction between Heaven and man" can also restrict the "emperor's power." For instance, when natural disasters or strange phenomena happened, officials would write to the emperor to warn him. Then the emperor would have to publish an imperial self-criticism. But speaking as a whole, the negative function of political Confucianism is more obvious because it was used by politics. In any case, the thoughts of "stupid loyalty" and "my majesty is holy and wise, and your subject commits intolerable crime and should be put to death" are not advisable. So when Confucianism is manipulated by politicians, many problems arise.

Orthodox Confucianism: the development and influence of schools with systematic traits and a successive heritage must have their own tradition whether it is in the West or in China. In China, Confucianism, Buddhism and Daoism all have their own traditions. Because schools with traditions continuously develop, among them, Confucianism is especially conscious of inheriting its tradition, and Confucians regard the inheritance of the cultural traditions of the Xia, Shang and Zhou dynasties as their responsibility. Confucius inherits "the *Dao* of Yao and Shun and imitates King Wen and King Wu of

Zhou" (Zisi 1980, Chapter 30). Therefore, today we should consciously inherit our own cultural tradition. But if Confucianism overemphasizes its "orthodox tradition," it might exclude other schools and suppress heterodoxy. Heterodoxy is to oppose and overthrow mainstream thought, and blaze a new path for new ways of thinking. Confucianism as a whole is relatively inclusive. For instance, Confucians hold that "the myriad things grow equally without harming each other and the circulation of the four seasons, the travel of the sun and the moon go smoothly without interference" (Ibid.). But sometimes there is also a strong sense of exclusiveness in Confucianism. For instance, Mencius rejected Yang Zhu and Mozi, and he criticized Yang Zhu's lack of filial piety to his father because he advocated universal and equal benevolence and Mozi's lack of loyalty to the emperor because he insisted that individuals came first. Here, Mencius goes too far. Another example is Han Yu's exclusion of Buddhism. At that time, Buddhism had caused some problems, including a tremendous waste of national wealth. But Han Yu suggested "the government should secularize Buddhism monks and nuns, burn off sutra, and transform Buddhism temples to civilian houses" (Han 1991, p. 174). His words go too far. It is not good if factionalism is too strong.

"The academic tradition of Confucianism" is about the history of Confucian learning and its academic ideals. In this aspect, the positive value of Confucianism can be seen, and Confucianism can offer significant resources for human society. Now and in the future, Confucianism should not be ideologized. Learning is learning, and it should not depend on politics. No school of learning should be viewed as the ruling one and the "contention of a hundred schools of thought" should be put into practice. Of course, we must analyze the thoughts offered by sages and outstanding men in history, and interpret them according to contemporary circumstances in order to uncover resources which can assist in the great rejuvenation of the Chinese nation and be universally significant for the rational and all-around

development of human society. In order to achieve this goal, Confucianism should be renewed in order to make it a source of real spiritual wealth.

III

We may judge the value of learning from many perspectives, such as politics, economics, science and technology. Perhaps it is most important to make a philosophical judgment on the value of a school. Therefore, we must learn about the main problems faced by our society, nation, and mankind. These issues should be the starting point for considering philosophical questions.

What are the main issues in contemporary human society? In my opinion, there are three: one is the relationship between man and nature, a conflict which is quite serious. The second is the relationship between man and man, including relationships between man and self (man and society), nation and nation, and people and people. The third problem is the relationship between body and mind. The biggest problem facing mankind is the conflict between man and nature, man and man (man and society), and the conflict within oneself. These issues are related to building a "harmonious society" and human society's "peaceful coexistence." In my opinion, the three philosophical propositions, "the unity of nature and man," "the unity of self and others" and "the unity of body and mind," can provide some valuable approaches and important philosophical resources to resolve the three conflicts. Of course, I do not mean that these problems can only be solved by Confucianism.

As we enter the 21st century, we will see that the past century was a century of rapid development, a progressive century, but it was also a tragic century full of conflict and fighting. In one hundred years, there were two world wars, and more than a hundred million people died unnaturally due to war. Many cultural artifacts made by mankind several centuries ago were destroyed. China has experienced

much suffering, but has also made great progress in the past one hundred years. In this process, we nearly completely negated our cultural tradition, and we refused to absorb some progressive Western cultures for a long time, too. It led to social problems, such as "a crisis of belief," "moral vacuum," "environmental pollution" and "money worship." How should we tackle these problems? I, and not only me, but other scholars, too, think that we can find philosophical resources from the past 5,000 years to deal with these problems. Many scholars have looked for answers to these problems. Of course, we should not think that thoughts and culture can solve all problems. If we think that thoughts and culture can tackle all problems, it will lead to "cultural determinism." Then it will be like the belief that science and technology can tackle human and social problems, leading to the trap of "the omnipotence of science," of "scientism." Therefore, when we discuss "the significance of Confucianism," we simply want to find resources and approaches which can be applied to contemporary human and social problems, and a way to deal with these problems.

IV

On the problem of "conflict between man and nature," in 1992, 1,575 scientists, including half the Nobel laureates, signed the "World Scientists' Warning to Humanity," which stated that human beings and the natural world are on a collision course. In my opinion, the warning signaled that human kind will encounter a serious crisis if the world continues as it is now. Advanced science and technology can benefit people, but as a part of nature, people not only control a lot of instruments to destroy nature, but also control weapons which can be used to destroy human beings in the process of conquering nature. The never-ending exploitation and destruction of nature results in consequences such as the waste of natural resources, the depletion of the ozone layer, the poisoning of the ocean, environmental pollution, the sudden and sharp growth in the human population, and ecological

imbalance. The result is the destruction of "a harmonious nature" and "the harmonious relationship between man and nature," threatening conditions for human existence. These situations have a relationship with the subject-object dichotomy in Western philosophy. For instance, in *A History of Western Philosophy*, Russell said: "The philosophy of Descartes. . . it brought to completion, or very nearly to completion, the dualism of mind and matter which began with Plato and was developed, largely for religious reasons, by Christian philosophy. . . the Cartesian system presents two parallel but independent worlds, that of mind and that of matter, each of which can be studied without reference to the other" (Russell 1972, p. 567). It means that for a long time, spirit and matter have been regarded as independent and isolated in Western philosophy. Therefore, this kind of philosophy is established on an "external relationship" ("man" and "nature" are two unrelated factors), or it can be said that they regard "mind" and "matter" as two independent dual factors, and when Western philosophers study one, they do not involve the other (but Western philosophy has changed, for instance, Whitehead criticizes the dualism in the traditional way of thinking in his *Process Philosophy*). It means that Western thought involves the dualism of "subject-object" ("mind" and "matter," or "nature" and "man") from Plato in the Axial Age. But Chinese philosophy is different because it is based on "the unity of Heaven and man" (subject and object are connected and cannot be divided).

One of the origins of Chinese philosophy is *Zhou Yi* 周易 (*The Book of Changes*). There is an important passage on the Bamboo Slips unearthed in Jingmen, Hubei Province, in 1993. It states (Jingmen 1998, Yucong yi 语丛一):

The Rituals describes the manners of intercourse.

The Music is used to enjoy or educate.

The Book of History is □□□□ [sic].

The Book of Odes is a collection of poems of the past and the present.

The Book of Changes is to communicate the *Dao* of nature and the *Dao* of man.

The Spring and Autumn Annals is a collection of affairs of the past and the present.

These bamboo slips were written around 300 BC. They say that change communicates the *Dao* of nature and the *Dao* of man. It means that *The Book of Changes* studies the *Dao* of Heaven (law of Heaven or nature) and the *Dao* of man (order in society) and why they are connected through a comprehensive study of the subjects. That is, people in ancient times had already realized that they had to include "man" when studying "nature," and when studying "man," they had to involve "Heaven," too. This is "the unity of nature and man." In fact, this had already been revealed in Confucius' *Analects*. Zi Gong said: "I cannot hear Master Confucius' saying about nature and the *Dao* of nature" (Confucius 1980, Gongye Chang). Although Zi Gong had never heard Confucius speak about "nature and the *Dao* of nature," he brought forward this issue, which indicates that there was great interest in the relationship between "human nature" (man) and "the *Dao* of Heaven (nature)." When looking at the development of human society, people originally came across the relationship between "man" and "nature (Heaven)" because humans cannot live without "nature." Therefore, the ancient Chinese always paid attention to "the relationship between man and nature."

Of course, there are various attitudes and methods to deal with "the relationship of man and nature." Some scholars held that man should comply with nature; some scholars thought that man should make use of "nature" to serve man, "know and apply nature to serve people"; and some scholars held that "both man and nature have their own laws and advantages." But the mainstream Confucian thinkers believed in "the unity of man and nature." The so-called "unity of man and nature" means that "nature" is inseparable from "man," and "man" is inseparable from "nature," too.

Why is there such a belief? Well, it has a long history. We know

that *The Book of Changes* was originally a fortune-telling book used to predict good or bad luck, and misfortune or good fortune. Who was asked to answer people's fortunes? " *Tian*" 天 (Heaven). "Man" asks "*tian*" about good or bad luck, and misfortune or good fortune. *The Book of Changes* recorded these answers, and so it became a book on the relationship between "Heaven" (*tian*) and "man." Subsequently, various interpretations of this book formed a new one, that is, *Yizhuan* 易传 (*The Appendices to the Book of Changes*). Among them, *The Appended Remarks* in particular can be regarded as a philosophical interpretation of *The Book of Changes*. *The Book of Changes* solves the problem of the relationship between "Heaven" and "man," then what is the relationship between "Heaven" and "man"? *The Appended Remarks* answers this. It argues that *The Book of Changes* includes everything, and the book not only includes "the *Dao* of Heaven," "the *Dao* of earth," but also includes "the *Dao* of man." Although "the *Dao* of Heaven" is manifested by *yin* and *yang*, "the *Dao* of earth" is presented as "hardness" and "softness," and "the *Dao* of man" is manifested as "benevolence" and "righteousness." The principle of the three is united, and the three are the manifestation of *qian* 乾 and *kun* 坤. The Confucian Zhang Zai in the Song Dynasty said: "Heaven, earth, and man all have the *Dao* of *qian* and *kun*. The Change penetrates in Heaven, earth, and man, and *yin* and *yang* are its substance (*qi*), hardness and softness are its form, and benevolence and righteousness are its nature" (Zhang 1978, p. 235). From the example in *The Book of Changes* that unites Heaven (earth) and man, we can see that Heaven and man are a connected entity. The reason that "*qian*" and "*kun*" are used to describe the unity of "Heaven," "earth" and "man," is that "*qian*" denotes vigorous movement and "*kun*" denotes generosity and virtue in the *Appendices to the Book of Changes*. Therefore, "man" has a special responsibility for "Heaven and Earth" (Heaven). "Man" should know what is demanded by Heaven and Earth in the spirit of "constantly striving for self-improvement" and "with profound generosity to contain things or complete things." Zhang Zai said, "the

Dao of Heaven" and "the *Dao* of man" is similar in the sense of "reason or truth." If we want to know the principle of being a man, we have to know the *Dao* of "Heaven and Earth," and if we know the truth of "Heaven and Earth," we can know the principle or law of "man" (society).

Confucians in the Song Dynasty developed "the unity of nature and man." For instance, Cheng Yi said: "Is it allowable to know the *Dao* of man but do not know the *Dao* of nature? The *Dao* is one. Is it right if the *Dao* of man is one, and the *Dao* of nature is another one?" (Cheng 2004, *Er Cheng Yishu*, Vol. 18). According to the Confucian thinking, "nature" and "man" cannot be divided, and they cannot be regarded as an external and opposite relationship, and we cannot study only one of the two. Zhu Xi expressed this idea much clearer. He said: "Nature is man, and man is nature. At the beginning of human birth, they are produced from nature; and after the birth, nature is human, too" (Zhu 1990, Vol. 17). Zhu Xi held that "nature" cannot be independent of "man," and "man" cannot be independent of "nature." At the time of birth, humans come from nature, but when there is a human being, the *Dao* of "nature" (Heaven) is embodied by "man." In other words, "humans" are responsible for "nature." If there were no "humans," how would the lively atmosphere of "nature" be embodied, how would "the constantly striving to become stronger" of "nature" be embodied and how would "containing things or completing things with profound generosity" of the "earth" be embodied? So man should know that "the work to establish mind or heart for Heaven and Earth" and "the work to establish life for people" is the same and cannot be separated. Therefore, the Yucong yi of *Guodian Zhuajian* 郭店竹简·语丛 — (*Collection One of the Guodian Bamboo Slips for Writing*) said: "The *Dao* can be mastered after knowing what Heaven (nature) does and what man does. If we know the *Dao*, then we know what fate is" (Jingmen 1998). If we know "the *Dao* of nature (Heaven)" (the law of nature), and the *Dao* of man (the law of human society and life), then we can know the unified principle or reason for "nature or Heaven"

and "man," and the development of "nature or Heaven" (the *Dao* of nature or Heaven) and "man" ("the *Dao* of man," society). Confucius said: "It is necessary to know destiny or fate mandated by Heaven" (Confucius 1980, Weizheng). He means that "man" should know about "nature or Heaven." Confucius also said: "Man should have reverence for fate or destiny as mandated by Heaven or nature" (Ibid., Jishi), and cannot randomly destroy the law of development of "nature or Heaven." A Chinese philosopher never regards "nature or Heaven" as a dead thing. Instead, it is organic, constantly developing, growing, and united with man as an entity. It is common sense that the existence of "man" cannot be separated from "nature or Heaven," but why does "man" regard "nature or Heaven" as an opposing object, and recklessly destroy and conquer "nature" ? It is because he regards the relationship between "nature" and "man" as external, and does not know that the relationship between "nature" and "man" is close and internal. "The internal relationship" is different from "the external relationship" because "the external relationship" denotes that "nature" and "man" are independent and unrelated. But "the internal relationship" denotes that "nature" and "man" have a close relationship. Therefore, "the unity of nature and man" is an ancient philosophical proposition in Chinese philosophy, and it is the cornerstone of Chinese Confucian thought as well as a proposition which needs to be continuously re-interpreted by human society. When we consider the problems of human beings and our relationship with nature, we should bear in mind the idea of "the unity of nature and man," and we must deepen our discussion of the close relationship between "nature" and "man." Human society has neglected the close relationship between "nature" and "man" for a long time, and so are we now being punished by nature? Why have we chosen a confrontational relationship with nature?

The idea of "the unity of nature and man" (the thought, " *yi* 易 (change) is to communicate the *Dao* of nature with the *Dao* of man"), which originated from *The Book of Changes*, supplies a way of thinking

that resolves the current conflict between nature and man. It can inspire us in the following three aspects.

Firstly, "the unity of nature and man" as a way of thinking says that people ought not to regard "man" as the opposite of "nature" because "man" is a part of "nature" and "the birth of man is from nature." Acts to destroy "nature" are the same as destroying "man," and "man" will be punished by "nature." Therefore, "man" should "know nature" (know nature in order to reasonably make use of nature) and should "revere nature" (revere nature and regard work to protect nature as a holy obligation). Now, we emphasize only "knowing nature" and blindly use "knowledge" to exploit and conquer "nature" and even destroy "nature." But man does not know that we should revere "nature." It is definitely an extreme manifestation of "scientism" (the omnipotence of science and technology). "Scientism" denies the holiness of "nature or Heaven," and consequently denies the transcendence of "nature or Heaven." Thus, humanist spirit loses its foundation. The Chinese thought of "the unity of nature and man" holds that "knowing nature" is the same as "revering nature." If we "know nature" but do not "revere nature," we will regard "nature" as a dead thing, not knowing that it is organic, alive, and vigorous. "Revering nature" but not "knowing nature" leads man to regard "nature or Heaven" as a mystical power outside of "man," and does not help man gain the real favor of nature. "Knowing nature" is united with "revering nature," and it is an important manifestation of "the unity of nature and man," reflecting the inner obligation of "man" to "nature." The philosophical proposition, "the unity of nature and man," symbolizes the complicated relationship between "nature" and "man," which not only includes how "man" should understand "nature," but also that "man" should revere "nature" because of its holiness. This is the reason why Chinese Confucianism has not become a universal religion (like Buddhism and Christianity), but Confucianism possesses a certain "religiosity." Confucian thought has a religious function in China, that is, Confucians think that the "inner" morality of "man,"

which is mandated by "nature," needs moral cultivation to realize its "transcendence" as "transcendence from an ordinary person to the level of a sage." Therefore, "the unity of nature and man" is not only a recognition of "nature," but also a realm of life that "man" should pursue. The reason is that " *tian*"(nature, Heaven) does not just mean nature; it also means "Heaven" in the sense of holiness. "Human nature" should be asked to reach a transcendent sphere which is "equal to *tian* (Heaven, nature). In this sense, "man" and "nature" are not in opposition. Instead, "man" is united with "Heaven and Earth." For instance, Mencius said, "The people of the place where the superior man has visited will be influenced and educated; the impact at the place where the superior man has stayed is miraculous, and the sage acts along with Heaven and Earth" (Mencius 1980, Jinxin Shang). In this way, the superior man realizes personal transcendence. This way of thinking not only helps us get rid of the problem of "the division between Heaven and man" (the antagonism of Heaven and man), but also opens a way for human beings to attain the ideal human realm.

Secondly, we cannot regard the relationship between "Heaven(nature)" and "man" as a kind of external relationship, because "Heaven is man, and man is Heaven" and so "Heaven" and "man" are inherently connected. "Man" cannot be separated from "Heaven," and "man" cannot survive without "Heaven"; "Heaven" cannot be separated from "man," without "man," the reason of "Heaven" cannot be embodied, and so who can realize "the *Dao* of Heaven"? Understanding the relationship between "Heaven" and "man" is a characteristic of Chinese philosophy. On this point, Wang Fuzhi made an important observation. He reviewed ancient scholars' theories and concluded that they had merely grasped the outer phenomena of the pre-Qin Confucianism, and thought that *The Book of Changes* was only about "the *Dao* of Heaven," but did not know that *The Book of Changes* had been the root or foundation of "the *Dao* of man" since the Han Dynasty (Wang 1975, Vol. 9, Qiancheng Shang). Zhou Dunyi's

doctrine of " *taiji* picture" is about the root (origin) of "the unity of Heaven and man," which explains that the birth of man is the result of a change in "the *Dao* of Heaven." While changing into "the *Dao* of Heaven," Heaven gives its essential part to "man" and makes "man" possess "human nature," which is different from other things. Then, man can discover that all the principles of moral human relations of "the *Dao* of man" (the rules of human society) are in the order of the *yin-yang* movement of "the *Dao* of Heaven" (the law of the universe). "The *Dao* of man" and "the *Dao* of Heaven" should be united. "The *Dao* of man" is based on "the *Dao* of Heaven" because "man" is a part of Heaven (nature), so a discussion of "the *Dao* of man" cannot be separated from "the *Dao* of Heaven," and discussion of "the *Dao* of Heaven" must also take "the *Dao* of man" into consideration because "the principle of daily life and things" of "the *Dao* of man" is in the order of the *yin-yang* movement of "the *Dao* of Heaven." Zhang Zai said that *the Book of Changes* "contains the principle of Heaven, and also includes the *Dao* of man" (Zhang 1978, p. 65).

Thirdly, why does Confucian philosophy hold that there is an "internal relationship" between "Heaven and man"? From the Western Zhou Dynasty, there is an intellectual tradition described as "the ear of Heaven is the ear of my people, and the eye of Heaven is the eye of my people" (Mencius 1980, Wanzhang Shang). The tradition can be traced from Confucius and Mencius to Cheng Hao, Cheng Yi, Zhu Xi, Lu Jiuyuan and Wang Yangming. On this point, Zhu Xi's saying reflects Confucius' consistency on "the learning of benevolence." He said: "The man of benevolence" "should have the heart to produce abundantly in the sense of nature, in sensing the heart of tender affection for man and beneficence for things; the benevolent man's heart includes four morals(benevolence, righteousness, rituals, and wisdom) and penetration into the four beginnings of the four morals" (Zhu 1936, Vol. 13). "The *Dao* of Heaven" continuously produces, and regards benevolence as the heart. "Heaven" (nature) can make myriad things grow well, so "man" should follow the example of "Heaven"

(nature), and show kindness to man and benefit myriad things. The reason is that "Heaven and man is united as a whole" and "man" obtains the essence of "Heaven" to become a "man," so man should realize the function of "nature" (Heaven) and "the tender affection for other man, and bring benefits to things." "The heart of Heaven" and "the heart of man" is actually the same heart. "Man" must realize "the *Dao* of Heaven" and sense "the *Dao* of Heaven." The value of life is to realize "the destiny (fate) of Heaven," so the relationship between "Heaven" and "man" is actually internal. We discuss the proposition of "the unity of Heaven and man" and understand it philosophically on the above points to see its real spirit and value. It is a kind of world view, a way of thinking that is applied to an interpretation of "the unity of Heaven and man." Its significance is that it endows "man" with an inescapable responsibility. "Man" can realize its own transcendence, and achieve the ideal "unity of Heaven and man" only in the process of "imitating Heaven(nature)" (enhancing to the sphere of "Heaven").

Of course, the Confucian idea of "unity of Heaven and man" probably cannot directly solve specific problems in human society's "conflicts between man and nature." However, as a philosophical proposition, the thought of "the unity of Heaven and man" holds that "Heaven" and "man" cannot be separated; instead, "Heaven" and "man" should be regarded as an inherent union. There is an internal communication between "Heaven" and "man," which undoubtedly provides a positive way of thinking for philosophically resolving the relationship between "Heaven" and "man."

V

"The conflict between man and man" that exists in contemporary society is more complicated than "the conflict between man and nature." Interpersonal conflict is not only related to the various conflicts between "self and others," "man and community," "nation and

nation," "people and people" and "region and region." For instance, the pursuit of material needs and power, the struggle for natural resources, and the expansion of possession and ambition cause conflict and war between nations, peoples, and regions, and lead to "imperial hegemony" and "terrorism." Excessive preoccupation with the pursuit of money and the enjoyment of material goods, especially the ruling class' corruption and their oppression of ordinary people, causes tensions in the relationships between people, a negative social atmosphere, numerous factions, and factionalism. In society, children, youth, and the aged all have their own problems. Misunderstandings and hostility in daily life, the isolation of souls, then lead to the dissolution of social harmony. This trend will result in the collapse of human society. Does Confucianism provide a helpful intellectual resource for contemporary society's faults? In my opinion, the Confucian "learning of benevolence" may have much significance for the formation of harmony "between man and man," between nations, peoples, and regions, or "harmonious society."

The volume of "*xing zi ming chu* 性自命出 (nature coming out of fate)" in *Guodian Zhujuan* says that "*Dao* originates from affection (feeling, emotion), and affection comes from nature. The beginning is close to affection, and the end is close to righteousness." It means that interpersonal relationships are initially founded on affection (feeling), and affection comes from human nature. Therefore, at the start of interpersonal relationships, affection is more important (such as the affection between a mother and child), and later on, morality and justice (*Dao*, or the way, and justice or righteousness) become more important than affection. Here, "the *Dao*" denotes "the *Dao* of man," which means the law of interpersonal relationships or principles of social relations. It is connected with "the *Dao* of Heaven," but different from "the *Dao* of Heaven," which means the law of nature (or the external world beyond "man"). "*Dao* originates from affection," meaning that interpersonal relationships are initially founded on affection. It is the starting point of Confucius' "learning of

benevolence." Confucius' disciple Fan Chi asked him what "benevolence" was, and Confucius answered, "to love people." Where does the moral command "to love people" come from? *Zhongyong* quotes Confucius: "Benevolence is the character of man, and it is foremost to love family" (Zisi 1980, Chapter 20). The moral character of benevolence is inborn, and it is essential to love one's own family. But Confucians think that the spirit of benevolence cannot just rest on the love of one's own family. The *Guodian Zhujuan* says, "It is affection to love family sincerely, but benevolence is understood as a broad affection for ordinary people, not only affection for one's father" (Jingmen 1998). It is natural to have much love for one's own family; love (affection) that is extended to other people can be regarded as "benevolence." There is also the saying, "filial piety should be extended to affection for ordinary people under the sky" (Ibid., Tang yu zhi dao). However, affection for one's family is the foundation of affection for others. It means that the Confucian "learning of benevolence" requires an extension of the affection for one's family to the affection of ordinary people. The principle, "put oneself in the place of another," and the practice, "treat the aged with respect in my family, and extend that respect to the aged outside of my family; treat the young in my family with tenderness and then extend that tenderness to the young outside of my family" (Mencius 1980, Liang Huiwang Shang), reflect benevolence. It is not easy to abide by the principle "put oneself in the place of another." One must take "the *Dao* of *zhong* 忠 (the full development of one's original good mind) and *shu* 恕 (the extension of that mind to others)," described as "you do not do to others what you do not want them to do to you" (Confucius 1980, Yanyuan), "if you wish to establish your own character, also establish the character of others, and if you wish to be prominent, also help others to be prominent" (Ibid., Yongye), to be the principle for carrying out "benevolence." (Zhu Xi's *Sishu Jizhu* explains: "To realize one's good to the best is *zhong*, and the extension of one's good is *shu*.") If "benevolence" is extended to society (all human society), it is

like Confucius' saying, "To master oneself and return to ritual is benevolence. If a man (the ruler) can for one day master himself and return to the rites(ceremony), all under Heaven will return to benevolence. To practice benevolence depends on oneself. Does it depend on others?" (Ibid., Yanyuan). In the past, "overcome selfish desire" and "revive the ritual" had always been explained as two parallel acts, but such an understanding is not correct in my opinion. Overcoming selfish desire and reviving the ritual are benevolence means that it is "benevolence" if "reviving the ritual" is based on "overcoming selfish desire." Fei Xiaotong explains this well. He said: "Only overcoming selfish desire, the ritual can be revived. To revive the ritual is a necessary condition for entry into society and becoming a social person. To limit one's selfish desire or to raise one's selfish desire may be the key difference between Western and Eastern cultures" (Fei 2002, p. 4). This is a reasonable explanation. If one enters society, he must require something of himself. For instance, he should ask himself to abide by the principle, "you do not do to others what you do not want them to do to you," then he can follow social criterion (the ritual) and become a social person. A nation is the same; it must abide by the requirements of the world "pact" and the general rules. Then the world pact and general rules can be preserved. Fei Xiaotong thought that "the restriction of selfish desire" in Chinese culture was good for interpersonal relationships, while "the encouragement of selfish desire" in Western culture, which placed the self above other persons or other nations, surely and easily led to conflict and war. According to Zhu Xi, the saying can be understood as "conquering selfish desire and returning to the rituals, which represent the principle of Heaven" (Zhu 1983). He means that we should restrict our own selfish desire in order to conform to rituals and criterion in our behaviors and actions. "Benevolence" is man's innate characteristic ("affection is originated from nature"); in the sense of social life, "the ritual (ceremony)" is the external system which regulates people's behavior, and its function is to regulate interpersonal relationships in

order to ensure harmony. It symbolizes that "the importance of the use of rites (ceremony) is harmony." Demanding that people obey the ritual (ceremony) must be based on their internal heart (mind) of "the affection for others," which conforms to "benevolence." Confucius says: "To practice benevolence depends on oneself. Does it depend on others?" (Confucius 1980, Yanyuan). On the relationship between "benevolence" and "rites (ceremony)," Confucius clearly said: "If a man is not benevolent, what has he to do with rites (ceremonies, etc.)? If he is not benevolent, what has he to do with music?" (Ibid., Bayi). Without the heart (mind) of benevolence, the system of rites (ceremony) and music is deceptive, and is for cheating. Therefore, Confucius held that society can be harmonious and peaceful if people consciously pursue "benevolence," base "the heart (mind) of benevolence" on certain criterion, and put it into practice in daily society. This is the meaning of the saying "if a man (the ruler) can for one day control himself and return to the rites (ceremony), all under Heaven will return to benevolence" (Ibid., Yanyuan). The action of pursuing benevolence in daily practice is similar to "seeking to reach the greatest height and brilliancy and follow the *Dao* of the Mean" in *Zhongyong*. "Seeking to reach the greatest height and brilliancy" (Zisi 1980, Chapter 27) means that people should pursue the highest principle, the ideal of benevolence, in life; "To follow the *Dao* of the Mean" asks people to realize the spirit of "benevolence" in daily life ("the doctrine of the mean, denotes the use of the mean.") "Seeking to reach the greatest height and brilliancy" and "to follow the *Dao* of the Mean" cannot be separated into two parts, and "the *Dao* of sageliness within and kingliness without" is the highest Confucian ideal. Today, we are trying to build a harmonious society, so Confucius' sayings are very important. There are many explanations of "benevolence" in the Confucius *Analects*, but there are no words for "benevolent governance." However, "to lead the people with virtue and regulate them by the rules of ceremonies (rites, property)," "to love people widely," "to elect the virtuous and able talents," "to extensively bring

benefit to the people and bring salvation to all" etc. are all about "benevolent governance." There are many discussions of "benevolent governance" in *Mencius*, and the meaning of "benevolent governance" is broad. Some of the explanations are not compatible with the needs of contemporary human society, but two of them are important in helping us to build a harmonious society and achieve world peace. One is that "the practice of benevolent government" should ensure people to have fixed property. Mencius said: "The people follow the right *Dao*, because they have fixed property and stable hearts, and without fixed property, there cannot be stable hearts" (Mencius 1980, Teng Wengong Shang). He means that ordinary people should have some fixed property in order to ensure that they have certain moral and behavioral principles. Without fixed property, a person will not have moral ideas and behavioral guidelines. Mencius said: "Benevolent governance should start with the private ownership of land" (Ibid.). He means that a benevolent government should ensure that ordinary people have their own land first. I believe that we must ensure that ordinary people have some fixed property if we truly want to build a harmonious society. At the international level, every nation and people should possess the wealth that they deserve; powerful nations should not exploit other nations' wealth and resources or pursue power politics. The second point of Mencius' "benevolent governance" opposes unjust war. He said, "Those who carry out the kind and right *Dao* will gain more support; otherwise, others will find scant support who lose the kind and right *Dao*." Here, "the *Dao*" means "morality and justice." In Gongsun Chou Xia there is a passage saying that favorable weather is less important than advantageous terrain, and advantageous terrain is less important than the support of the people. It reads:

It is not needed to confine civilians by a national boundary, not necessary to protect a nation with a dangerous mountain, and to threaten the world by the weapons of destruction. Those who carry out the kind and right *Dao* will gain more support. Others who give up the kind and right *Dao* will find scant

support. He who has the least support, his family and relatives will all oppose him, and all the people under the sky will come and pledge allegiance to he who has the most support. The just superior man will win if he launches a war against those who are opposed by all supporting forces, even by his family and relatives, or he need not launch the war (Mencius 1980, Gongsun Chou Xia).

The passage tells us that it is not necessary to have national boundaries to restrict civilians, to depend on advantageous terrain to protect a nation, and to rely on weapons of mass destruction to threaten the world. Confucians usually divide war into two kinds: "the just war" and "the unjust war." Mencius says, "there is no just war in the Spring and Autumn Period" (Ibid., Jinxin Xia), and "those who lose public support will lose the regime" (Ibid., Lilou Shang). This idea also applies to the ruler of a nation. In the early Han Dynasty, Jia Yi wrote an article, *Guo Qin Lun* 过秦论 (An analysis of the fall of the Qin Dynasty). In his article, he concluded that the Qin Dynasty fell because "the Qin government did not carry out the policy of benevolence and righteousness after it had established a united nation, so it lost sovereignty even though it had taken over national power and had many advantages" (Jia 1989, Vol. 1). He quoted the proverb, "the past events are today's lesson." Isn't that the wisdom we should absorb today? Such Confucian thoughts should have some meaning to the rulers of a nation and for the ruling group of the world's developed nations. "Manage state affairs and pacify the world" for "benevolent governance" and "the *Dao* of kingliness," instead of "arbitrariness" and oppression.

Since Samuel P. Huntington presented his thesis on the conflict of civilizations in 1993, it has been hotly debated by scholars from all countries. In human history, it is not uncommon to find conflicts and war caused by cultural differences (for instance, differences in philosophy, religion, values). Having entered the 21st century, there is no world war, but regional wars frequently break out between nations, peoples, and regions, with political and economical problems being important reasons, but culture is also an important reason. To

resolve conflicts and even wars due to cultural differences, perhaps Confucius' notion of "harmony without sameness" might be a very important principle.

In Chinese history, there are two concepts, " *he* 和 (harmony)" and " *tong* 同 (sameness)," which are regarded as different, so there is the so-called "discrimination of harmony and sameness." According to the records on Zhaogong ershi nian of *Zuozhuan* 左传·昭公二十年 (the 20th year of the Duke Zhao, *Zuozhuan*), "Duke Zhao asked, 'Is only Liang Qiuju harmonious with me?' Yanzi (Yan Ying) answered, 'Ju is the same as you. Is it harmonious with you?' The Duke said, 'Is harmony different from sameness?' Yan answered, 'It is different. It is like cooking a thick soup, which needs water, fire, vinegar, catsup, salt, and plum to cook fish or meat, firewood to burn, and then the cook will get it seasoned to assure a fine taste. If the taste is too mild, the cook will add seasoning, and if the taste is too thick, he will add water to dilute the taste. When the superior man has the soup, he will find it delicious. The relationship between the emperor and his officials is alike. . . . Now Ju is different, because he always agrees with you no matter what decisions you make. It is like adding water to improve the flavor of water. Who would want this? If musical instruments always play the same tone, who would listen to it? This is why sameness should not be advocated'" (Zuo 1980, Zhaogong ershi nian). In Zhengyu of *Guoyu* 国语·郑语, "The harmonious relationship between things is helpful to produce new things, while sameness cannot. To add one with another is called harmony, so it can create something new; while if the same things are put together, all will lose their vital force. So the past kings used earth, metal, wood, water, and fire to produce the myriad things" (Zuo 1997, Vol. 16). Therefore, "harmony" and "sameness" are not the same. If different and related things can harmoniously grow, then things will develop. If the same things are put together, the result is the suppression of vital force. The highest ideal in traditional Chinese culture is "ten thousand things grow together without harming each other; their *Dao* move in parallel

without mutual interference" (Zisi 1980, Chapter 30).("Ten thousand things growing together" with "their *Dao* moving in parallel" expresses a "lack of sameness"; "they do not damage" or "interfere with each other"—this is "harmony.") This can be a rich source of ideas for the coexistence of many cultures.

Different nations and countries should have cultural exchanges and dialogue in order to achieve a common understanding, that is, a process of mutual recognition from difference to a sense of commonality. This kind of mutual recognition does not mean that one side exterminates the other or that one side is completely assimilated by another. It means the search for junctures where different cultures can come together and develop. This is harmony. Therefore, we must diligently strive for harmonious coexistence among different cultures through dialogue. Now, many scholars in China and the West have recognized the importance of pursuing mutual understanding among different cultures through dialogue. For instance, Habermas puts forward the notions of "justice" and "solidarity" (Habermas 1996). I think these should be used as principles in the relationship between different nations and cultures. Habermas' "principle of justice" can be understood as that every national culture should be independent and self-determining; the "principle of solidarity" can be understood as that one nation should regard other national cultures with a sympathetic attitude and respect other cultures. Only through continuous dialogue and communication and other means can good communication between different national cultures be established. The German philosopher Gadamer pointed out that "understanding" should be extended to a "broad dialogue" (Pan 2002, pp. 65-68). It is to increase "understanding" to the level of "broad dialogue," then the subject and object can become equal. In other words, dialogue can only be truly carried out under the condition of mutual equality. It can be said that Gadamer's consciousness of subject-object equality and his theory on cultural dialogue are important and necessary ideas for our age. The idea is in inspiration for us to correctly understand Sino-foreign

cultural relationships and national relationships. Habermas' principles of justice and solidarity and Gadamer's theory of broad dialogue both recognize, as their premise, the need for harmony without sameness. It is only if we recognize that nations and states with different cultural traditions can achieve harmonious coexistence will it be possible for them to have equal rights and duties; it is only under such conditions that "broad dialogue" can truly and smoothly accomplish its ends. Thus, Confucius' principle of "harmony without sameness," based on the notion that harmony is valuable, should become a basic principle for handling relations between different cultures.

VI

If we use the Confucian notion of "the unity of Heaven and man" as a philosophical resource to resolve "the contradictions between man and nature" and "the unity of self and others" to resolve "the contradictions among men," we may then use the "integration of the inner and the outer" to moderate the contradictions within ourselves. There are pressures in modern society. In particular, the unlimited pursuit of sensual pleasure results in psychological imbalance and a split in the human personality. Psychological imbalance induces spiritual disturbances, alcoholism, murder, suicide, etc. This distortion of the human body and mind has become a social disease that seriously affects social peace. The reason for this is the withering of morality; people no longer have a sense of harmony between body and mind. Many perceptive scholars have proposed theories and policies about how to cure the disease. In traditional Chinese culture, much attention has been given to this in the Confucian practice of cultivating the person and nurturing the mind. *Xing Zi Ming Chu* in *Guodian Zhujian* says: "if you intend to know the *Dao*, you should return to the innate goodness within yourself, it is called moral cultivation" (Jingmen 1998). *Daxue* 大学 (*The Great Learning*) stresses that people's moral practice is important to building a harmonious

society. In the first chapter of the book, it says: "The *Dao* of learning to be great consists in manifesting the clear character, renovating the people, and abiding (staying, resting) in the highest good" (Zeng 1980, Chapter 1). Zhu Xi commented, "the word, renovate, means remove from old. And if I am clear about myself and clean, I should help others to abolish the former pollution in the similar way as mine. . . To manifest the clear character and renovate, people should stay at the highest good and not change" (Zhu 1983, Daxue). The purpose of showing a clear character and shaping the people is to reach the highest good and achieve man's highest realm. Therefore, *The Great Learning* holds that "From the Son of Heaven to common civilians, all must regard moral cultivation as the root or foundation. There has never been a case when the root is in disorder and the branches are all in order" (Zeng 1980, Chapter 1). It means that according to Confucianism, if everyone (from the Son of Heaven to common people) cultivated their morality well, "family" could be regulated, "state" will be in order, and there will be peace throughout the "world." Or if moral cultivation, the root or foundation, is disordered, it is definitely impossible to manage "family," "state" and the "world" well. In the *Doctrine of the Mean*, "Social governance depends on man, the choice should be made according to their moral cultivation, the standard of moral cultivation is the *Dao* (the top *Dao*, harmony), and the heart(mind) of benevolence and love is necessary for realizing a harmonious society" (Zisi 1980, Chapter 20). Here, the connection of an individual's moral cultivation to "benevolence" proves the consistency of Confucian thought. Confucianism's attention to "moral cultivation" is not aimless; instead, it is to regulate family, govern the nation, and unite the world, that is, to build a "harmonious society." The ideal of the commonwealth of great unity in the *Records of Rites* is aimed at building a harmonious society politically, economically, and culturally. Confucianism's ideal of a harmonious society is based on personal moral cultivation, so Confucians lay particular emphasis on personal cultivation of the body and mind. Confucians think that life

and death, riches and honor should not be the final life goal, and people should pursue moral perfection and knowledge. Confucius said: "I am uneasy that people do not cultivate their moral character, do not learn and teach knowledge, do not behave according to righteousness, and do not correct their mistakes although they know they are wrong" (Confucius 1980, Shuer). This tells us the reason for being a man. It is not easy to cultivate our moral character unless we have great dreams and the willingness to improve the welfare of humankind. It is also not easy to study knowledge because we not only need to improve our own wisdom, but also need to show culture and education to society. People always make mistakes, but we should have the courage to correct our mistakes, benefiting social harmony. "Be apt to goodness" means that we should strive in the direction of goodness everyday, improve ourselves day to day, and then we can reach the state of being in the highest good. All of the above are reasons to be an upright person, as advocated by Confucianism, and they are necessary for maintaining harmony between the body and the mind, the inner and the outer. Mencius said: "To preserve one's mind and nourish one's nature is the way to serve Heaven. Not to allow any double-mindedness regardless of longevity or brevity of life, but to cultivate one's person and wait for *ming* 命 (destiny, fate, Heaven's decree or mandate) to take its own course is the way to fulfill one's destiny" (Mencius 1980, Jinxin Shang). If one can preserve his compassionate heart and cultivate his moral character to realize the *Dao* of Heaven, then the length of one's life does not matter. But he must be sure of being conform to the *Dao* of Heaven through individual moral cultivation. It is one's peace and calmness and the establishment of destiny.

Confucian self-cultivation has a goal. *The Book of Changes* says, "Make use of personal moral cultivation in order to honor virtue" (*Zhouyi*, Xici Xia). People's actions should benefit society, and this should be their main pursuit. An individual undergoes self-cultivation in order to elevate his spirit and "set his mind on Heaven and Earth,

establish his life's destiny, and continue to study to achieve sage, so that all things in the world are at peace" (Zhang 1978, p. 320). This is to "establish the great root or foundation and so carry out the *Dao*." What the Confucians in the Song Dynasty pursued is that, as far as an individual is concerned, he will be at peace with himself both in his inner thoughts and emotions and in his external relations. In *A Letter to Zhang Jingfu*, when Zhu Xi discussed "the meaning of the mean and harmony" with Jingfu, he said: "From now on, I know I have a safe place, that is, the place for the peace and calmness of a person, the establishment of destiny, and for the domination of consciousness in the vast transformation of the universe. So the key for us to establish our big root (foundation) and carry out the great *Dao* is described as that substance and function have one source and there is no gap between the apparent and the hidden" (Zhu 1936, Vol. 10). Confucians hold that it is very important for a person to find peace and calmness, and to establish his destiny for the harmony of body and mind, inner thoughts and emotion, and external factors. Therefore, Zhu Xi said: "If a person can be harmoniously centered within himself, even though the world at large is in chaos, the inner world, its Heaven and Earth and the myriad things, remains peaceful and unharmed. If someone is unable to attain this, even though there is order in the world at large, within oneself one will be perturbed, even if no harm comes to him from without. It's the same for a country or a family" (Ibid.). If our internal and external beings are harmonious, the chaos of a disordered world cannot disturb our inner peace. If we are not centered and harmonious in our internal and external beings, even if there is a very well-ordered world outside, we will still be troubled, worried, or perturbed. We must work hard at cultivating our own virtue whether the world at large is in chaos or in order. In this way, we can fulfill our life's duty and when it is time to leave the world, we can go with a sense of peace and fulfillment. Thus, the last two sentences in Zhang Zai's *Ximing* 西铭 (*Western Inscription*) says: "In life I fulfill my duty as a member of society and as

a member of the universe, and when death comes, I rest" (Zhang 1978, p. 63).

Confucians consistently give much attention to an individual's peace and calmness and the establishment of destiny. This comes from selfcultivation. In this way, we can bring harmony to our own hearts and minds and to our internal world and its external manifestations. Our words and actions conform to the "principle of being human." And in this way, our persons will be at peace and our destiny established. We should remove all obstacles in the way of our personal harmony. Zeng Zi says: "Everyday I examine myself on three points: whether in counseling others I have not been loyal; whether in intercourse with my friends I have not been faithful; and whether I have not repeated again and again and practiced the instructions of my teacher" (Chan 1963, p. 20). As a man of honor, everyday one should be aware of himself and examine whether his behavior and actions are moral and just. If there is something immoral and unjust, he should sacrifice his life to realize humanity and defend justice. Confucius said, "A resolute scholar and a man of humanity will never seek to live at the expense of injuring humanity. He would rather sacrifice his life in order to realize humanity" (Confucius 1980, Weiling Gong). Mencius said: "If I do not act according to humanity and justice, I choose self-abandonment"(Mencius 1980, Lilou Shang). It is not easy to carry out the Confucians' "principle of being human," but this is something people should ardently strive for. And the purpose of achieving this personal peace is to bring about social harmony.

Sima Qian says: "For one to make a record of the *Dao* of the ancients today is to make a mirror for ourselves; it is not that the two ages are necessarily identical in all things" (Sima 1997, Vol. 18). We have been reviewing the thoughts of Confucius and his school in order to search for resources that human society today can use. This is undoubtedly important. But the thoughts and ideas of the sages and worthies of ancient times are not fully able to solve all the problems of the present time; nor do they all accord with the demands of

contemporary society. They can only show us a path for thinking, hints on how to make use of these resources, giving us a new foundation for addressing the concerns of the present time. It is in this way that they contribute to building a harmonious human society. "Though Zhou is an ancient state, its Mandate is ever-new" (*Shi Jing*, Daya). Our Chinese nation is an ancient nation with 5,000 years of history and culture. Our mission is to assure that our society constantly revitalizes itself and makes contributions to all mankind.

叁 儒学的现代意义*

—

《儒学的现代意义》这个题目，我曾讲过多次，上世纪80年代讲过，90年代也讲过，现在到21世纪还讲。不仅我讲，而且越来越多的学者都在讲，为什么今天我们要讲？我想，有两个重要的原因：一是我们中华民族正处在伟大的民族复兴的前夜，在此时此刻，我们必须回顾我们的历史文化传统。雅斯贝尔斯（1883—1969）曾提出“轴心时代”的观念。他认为，在公元前500年前后，在古希腊、以色列、印度和中国等地几乎同时出现了伟大的思想家，他们都对人类关切的根本问题提出了独到的看法。古希腊有苏格拉底、柏拉图，以色列有犹太教的先知们，印度有释迦牟尼，中国有老子、孔子等等，形成了不同的文化传统。这些文化传统经过两千多年的发展，已经成为人类文明的主要精神财富，而这些地域的不同文化，原来都是独立发展出来的，最初并没有互相影响。“人类一直靠轴心期所产生、思考和创造的一切而生存。每一次新的飞跃都回顾这一时期，并被它重燃火焰。自那以后，情况就是这样。轴心期潜力的苏醒和对轴心期潜力的回忆，或曰复兴，总是提供了精神动力。对这一开端的复归是中国、印度和西方不断发生的事情。”¹例如，欧洲的文艺复兴就是把目光投向其文化的源头古希腊，使欧洲文明重新发出新的光辉，而对世界产生重大影响。中国的宋明理学（新儒学）在印度佛教文化冲击之后，再次回到孔孟而把中国文化提高到一个新的阶段。在这踏入新千年之际，世界思想界已出现对于“新的轴心时代”的呼唤，这就要求我们更加重视对古代思想智慧的温习与发掘，回顾我们文化发展的源头，以响应世界文化发展的新局面。二是在新的世纪，我们的国家提出建设“和谐社会”的要求之际，费孝通先生提出“文化自觉”的问题。也就是说，我们要建设“和谐社会”也必有个对自身“文化”上的自觉。什么是“文化自觉”？费孝通先生在《人文价值再思考》中说：

文化自觉只是指生活在一定文化中人们对其文化有“自知之明”，明白它的来历、形成过程，所具有的特色和它发展的趋向，不带任何“文化回归”的意思，不

是要“复古”，同时也不主张“全盘西化”或“全盘他化”。自知之明是为了加强对文化转型的自主能力，取得决定适应新环境、新时代文化选择的自主地位。

这就是说，在我们建设“和谐社会”的伟大历史时期，我们必须有“文化自觉”，要确立“文化”上的自主地位。我们的文化上的自主地位，既不是“复古”，也不是“全盘西化”，而是要使我们自身文化的根基牢固，根深才可以叶茂，必须坚持文化自主性，并且也要充分吸收其他各民族的文化滋养我们自身。

在这种情况下，来研究我们民族文化的历史和它发展的前景，就必须适应当代世界文化发展的新形势，即“新的轴心时代”到来的文化发展的新形势；就必须适应我们国家建设“和谐社会”的目标，而必须有一个文化自觉的要求。那么在这样一个新的历史时期，全人类社会和我们自己的社会，到底遇到了什么问题，我们需要努力解决什么问题，才能促使“新的轴心时代”和我们的“和谐社会”早日到来呢？

二

进入21世纪，可以说在我们国家出现了“国学热”的情况。对这种情况存在着各种各样不同的看法和解释。所谓“国学”最早见于《周礼·春官·乐师》：“掌管国学之政，以教国子小舞。”意思是说：乐师的职责是管理国学的事务，这个国学事务是教国子的音乐舞蹈的。但是现在我们说的“国学”是对“西学”而言。这是由于，我们面对“西学”的输入，如何保护和发展我们的传统文化，也就是说：中国文化的发展面对着双重任务，一是要保护自身文化，维护我们自身文化发展的根基；二是如何对待和吸收、消化“西方”文化，这就形成了百多年来文化上的“中西古今”之争。而在这个全球化的时代，我们必须走出“中西古今”之争，会通“中西古今”之学，以实现不同文化之间的共存共荣。

对“国学”，特别是“儒学”，现在学术文化界有种种的看法，我简单作点介绍：

1. 有的学者提出“重建中国儒教的构想”：他们认为“必须全方位的复兴儒教，以应对西方文明的全方位的挑战”，“复兴儒教是复兴中华文化重建中华文明的当务之急”。因此，主张把儒教立为国教，在我们国家实现所谓的自古以来的“政教合一”²。

2. 对这种观点来自两个方面的批评：一是来自“自由主义派”，他们认为，“儒教救国论”是对当代民主政治的反动，是对“平等”观念的践踏。把“儒教”立为“国教”会让中国成为一个儒教的伊朗，“企图将儒教意识形态化，为专制主义服务”³。另一是来自马克思主义学者的批判，他们认为：“儒教救世的想象实质是道德作用的自我夸大”，也是“以天道性命的形上学来追求王道政治，这样只能重踏封建专制的陷阱”，“真正的救世主只能是马克思主义”⁴。

3. 还有一些学者从维护和发扬儒家思想出发，对“儒学”作充分的肯定，例如现代新儒家认为内圣之学可以开发出适合现代民主政治的“外王之道”，而且认为儒家的“心性之学”（所谓“良知的坎陷”）可以发展出认识论的系统。也还有认为，“三纲五常”仍有其价值。1994年杭州会议上，杜维明放弃了认为“三纲”有价值的看法，而“五常”还有价值，这是他的一个改变。还有关于“文化中国”的问题，杜维明提出这一想法，对中国文化走向世界有其意义，但他把“文化中国”分成若干圈，核心圈为“大陆”“台湾”等；第二圈为海外华人；第三圈为受中国文化影响的各国；第四圈是研究和欣赏中国文化的外国人等等。但他有个观点是可讨论的，他说：“文化中国的范畴很广，有一批与中国没有血缘关系，但对中国人影响很大的，也是文化中国的一部分，像释迦牟尼，马克思等。”这也许很成问题。如此类推，可以有“文化欧洲”“文化美国”，而中国的思想家，如孔、孟、老、庄等等，在他们那里有影响，也就是他们的一部分。

4. 当然还有一些学者认为，孔子的儒家学说在五四时期已被否定，今天再把它推崇到至高的地位，无疑是历史的倒退等等。

到底对儒家思想应如何看，这是仁者见仁，智者见智的问题，今天对它有多种看法，说明我们的社会在进步，因为学术文化问题只能在自由讨论、在贯彻“百家争鸣”的方针中实现，在不断的理性的对话中前进。

当然，我自己对“儒学”也有自己的看法，是否对，要在讨论中得到检验，它也只是众多之家的一家之言。对于学术文化，我有几点根本的看法：第一，任何历史上的思想文化没有绝对正确的，其自身往往包含着内在矛盾，儒学也是一样；因此，“儒学”必然有某些方面有其历史的局限性，不可能都适合现代社会生活的要求。即使是其中具有普适意义的精粹部分也往往要给以现代的诠释。第二，虽然思想文化是在不断发

展的，但是，古代哲学家提出的哲学问题和他们的哲学思考并非都不如我们今天，有些问题很可能是万古常新的，例如中国哲学中讨论的“天人关系”（人与自然关系）的问题，仍然是我们现代中国哲学讨论的主题之一。第三，罗素说：“不同文明之间的交流，过去已经多次证明，是人类文明的发展的里程碑。”任何文化要在历史长河中不断发展，必须不断地吸收其他民族的文化，在相互交流中才能适时地发展，特别是在今天全球化时代。从我国历史上看，印度佛教的传入已经证明这一点。中国文化曾受惠于印度佛教，印度佛教又在中国得到发扬光大，后为中国文化所吸收，而深刻地影响了宋明理学。今天，在全球化的形势下，我们必须充分地系统地吸收和消化西方文化和其他各民族的文化，当然是他们的优秀文化，中国学术文化才能适应人类社会要求和我们民族自身的新发展。因此我们的文化必须是民族的又是世界的。第四，要有文化的主体性，任何一个民族文化必须扎根在自身文化的土壤中，只有对自身文化有充分理解和认识，保护和发扬，它才能适应自身社会合理、健康发展的要求，它才有深厚的吸收其他民族的文化的能力。一个没有能力坚持自身文化的自主性，也就没有能力吸收其他民族的文化以丰富和发展其自身的文化，它将或被消灭，或全盘同化。

基于以上看法，我认为，要对“儒学”进行分析，也许可以从不同角度来对待它。我们可否从三个角度来看“儒学”：一是政统的儒学，一是道统的儒学，一是学统的儒学。

儒学曾长期与中国历代政治结合在一起，无疑它对封建集权专制统治起过重要作用。在儒家思想中特别注重道德教化的作用，这虽有可取的一面，但却流于把道德的作用绝对化，而使中国一直是“人治社会”，而很难实现“法治社会”；而且很容易使政治道德化，而美化政治统治；又使道德政治化，使道德为政治服务。当然儒家思想中的某些政治哲学也对消解专制统治起限制作用，如“以德抗位”“民为贵”“诛一夫”（曰：“臣弑其君可乎？”曰：“贼仁者谓之贼，贼义者谓之残，残贼之人，谓之一夫。闻诛一夫纣矣，未闻弑君也。”⁵）往往也可以用“天”来压制君权。“畏天命”，要对“天”有所敬畏，甚至“天人感应”在一定条件下，也可以起抑制“皇权”的作用，利用天降灾异，有臣子就上书警告皇帝，于是皇帝不得不下罪己诏。但总的说来儒学在历史上被政治利用起的消极作用更明显。特别是“愚忠”“吾皇圣明，臣罪当诛”，无论如何是不可取的。所以对儒学在受政治利用的情况下，问题较多。

“道统”的儒学：任何一个成系统有历史传承的学术文化派别，其学术文化的发展和影响，必有其传统，西方如此，中国也是如此，从中国历史上看有儒释道三家，都有其传统。因为有传统的学术文化它才能不断发展，儒家是更为自觉的继承着其传统，它以继承夏、商、周三代的文化传统为自任。“祖述尧舜，宪章文武。”因此，我们今天当然也应自觉地继承我们的文化传统。但是对自身“道统”的过分强调就可能形成对其他学术文化的排斥，而形成对“异端”思想的压制，而在历史上某些异端思想的出现，恰恰是对主流思想的冲击，甚至于颠覆，这将为新的思想开辟道路。儒家从总体上说，是比较有包容性的，如他们主张“万物并育而不相害，道并行而不相悖”，但有时也存在强烈的排他性，例如孟子的“拒杨墨”，批评杨朱和墨子“无父、无君”这就过分了。如韩愈的排佛，佛教在当时确有问题，浪费国家财力过大，但韩愈提出“人其人，火其书，庐其居”（让僧尼都还俗，佛经都烧掉，佛寺都改为民居），也有点过分吧！因此，派性过强不大好。

“学统”的儒学是指其学术传统，是指它的学术理念，也许在这方面，儒学的正面价值比较多，它可以为人类社会提供比较有意义的思想资源。在当前甚至以后，都不应把它意识形态化。学术最好归学术，不应依附于政治，不能定于一尊，要贯彻“百家争鸣”的方针。当然，我们对古来圣贤为我们提供的思想资源必须经过分析，并给以现代诠释，以揭示其既能对我们当前民族的伟大复兴、建设“和谐社会”提供有积极意义的思想资源，又能对全人类社会合理和全面的发展有普世意义，儒学必须“日日新，又日新”才能成为我们的真正精神财富。

三

对于一种学说作出价值判断，当然我们可以从多种角度来考虑，可以从政治的、经济的、科学技术的等等方面来考虑，但是也许最重要的应是对它的价值作哲学的判断。为此，我们必须了解我们的社会国家、当前全人类面临的重大问题，以此作为我们思考哲学问题的出发点。

当前人类社会存在的重大问题有什么？我想，归纳起来有三大问题：一是，人与自然的关系问题，目前人与自然的矛盾已发展到了十分严重的地步；二是，“人与人”之间关系的问题，这包括人我问题（人与社会）、国与国、民族与民族之间的问题；三是，人自身身心内外关系

的问题。也就是说，当前人类遇到的最大问题就是人和自然的矛盾，人与人（人与社会）的矛盾，人自身的矛盾。而这三个问题应和我们建设“和谐社会”和当今人类社会的“和平共处”有着极为重要的关系。我认为，我国儒家的“天人合一”“人我合一”“身心合一”这三个哲学命题，也许可以说为我们解决上述三大矛盾提供了某些宝贵的思路和应该特别重视的思想资源。当然，我没有意思说，这些问题光靠儒家思想都可以解决。

在人类社会进入21世纪时，我们回头看看20世纪的历史，可以发现过去这个世纪是人类社会飞速发展的世纪，取得辉煌成就的世纪，但同时又是充满矛盾斗争的悲惨世纪。在这百年中，发生了两次世界大战，因战争非正常死亡的人何止几千万，大量破坏了人类多少世纪辛勤建造的文化遗产。而我们的国家，在百多年来经历了种种苦难，同时也取得了很大的进步。但在这个过程中由于种种原因，从文化上说在相当长的一个时期，我们对传统几乎全盘否定，而又拒绝吸收西方的某些先进文化，致使我们的社会出现了“信仰危机”“道德真空”“环境污染”“金钱拜物教盛行”等等，这些已经到了相当严重的地步，不能不引起世人高度重视。那么如何办？我想，不仅我这样想，而且许多学者都这样想，我们能不能从我们长达五千年的历史中发掘出解决这些问题的某些思想资源？许多学者在努力寻求。当然，必须注意，我们决不能认为思想文化可以解决一切问题，如果认为思想文化可以解决一切问题，就可能导致“文化决定论”，这就像认为科学技术可以解决人类社会问题一样，而导致“科学主义”的“科学万能”歧途。因此，我们讨论“儒学的现代意义”只是说，它有些什么样的资源和思路，可以对当前人类社会存在的问题给以某种可以思考的路径，给以一种为解决问题的提示方向。

四

关于“人和自然矛盾”的问题，1992年世界1575名科学家发表了一个《世界科学家对人类的警告》，在其开头就说，人类和自然正走上一条相互抵触的道路。我认为，这话深刻地认识到人类社会如果如此发展下去，将会遇到严重的危机。科学技术高度发达，虽然可以给人们造福，但作为自然的一部分的人，在他们征服自然的过程中，不仅掌握了大量破坏自然的工具，而且也掌握了毁灭人自身的武器。对自然界的无量的

开发和破坏，资源的浪费，臭氧层变薄，海洋毒化，环境污染，人口暴涨，生态平衡的破坏，不仅造成“自然和谐”的破坏，而且破坏了“人与自然的和谐”，这些已严重地威胁着人类自身生存的条件。这种情况的存在，应该说和西方哲学“主—客”（认识的主体与认识的客体）二分的思维方式有关，正如罗素在《西方哲学史》中说：“笛卡尔的哲学……他完成了或者说几近完成了由柏拉图开端而主要因为宗教上的理由经基督教哲学发展起来的精神、物质二元论，……笛卡尔体系提出来精神界和物质界两个平行而彼此独立的世界，研究其中之一能够不牵涉另外一个。”这就是说，西方哲学长期把精神和物质看成是各自独立的，互不相干的，因此其哲学以“外在关系”（“人”和“自然”是互不相关的二元）立论，或者说其思维模式以“心”“物”为独立的二元，研究一个可以不牵涉另外一个。这就是说欧洲（西方）的思维模式从轴心时代的柏拉图起就是以“主—客”（即“心—物”或“天—人”）二分立论。然而中国哲学在思维模式上与之有着根本的不同，也是在轴心时代就以“天人合一”（即“主客相即不离”）立论。

中国哲学的源头之一可以说是《周易》，在1993年于湖北荆门出土的“楚简”有一段非常重要的记载：

礼，交之行述也。

乐，或生或教者也。

书，□□□□者也。

诗，所以会古今之诗是也，

易，所以会天道、人道也。

春秋，所以会古今之事也。

这些竹简大概是在公元前300年前写的东西。从这个记载看，“易，所以会天道、人道也，”是说《周易》是研究天道（天的规律）和人道（人类社会的秩序）会通道理的书。这就是说，在中国古代很早就注意到，研究“天”不能不牵涉到“人”，研究“人”也不能不牵涉到“天”，这就是“天人合一”思想。其实在《论语》中也已经透露出这一消息，子贡说：“夫子之言性与天道，不可得而闻也。”子贡虽然没有听到过孔子讲“性与天道”的言论，但他把这个问题提出来就说明当时人对“人性”（人）与“天道”（天）的关系问题十分关注。从人类社会的发展上看，人们最初遇到的问题就是“人”与“自然界”（天）的关系问题，因为人要生存就离不开“自然界”。所以在中国古代一直都在关注“天人关

系”问题。

当然对如何处理和看待“天人关系”自古就有各种不同的看法：有的学者主张应顺应自然；有的学者认为应利用“天”来为人服务，“制天命而用之”；有的主张“天人交相胜”等等。但儒家思想的主流多主张“天人合一”。所谓“天人合一”是说“天”离不开“人”，“人”也离不开“天”。

为什么有这样的思想，可以说其起源很早。我们知道，《周易》本来是一部卜筮的书，它是人用来占卜、问吉凶祸福的。向谁问？是向“天”问，“人”向“天”问吉凶祸福，《易经》记述了这些，所以这就成为“天”“人”关系的书。后来，出现了对这部书的种种解释，这就是《易传》。特别是其中的《系辞》可以说是对《易经》的一种哲学解释。既然《易经》所要解决的是“天人”关系问题，那么“人”和“天”究竟是个什么关系？《系辞》就是要回答这个问题。它认为：《易经》这部书无所不包，既包含“天道”“地道”，也包含“人道”，虽然“天道”表现为阴和阳，“地道”表现为“刚”和“柔”，“人道”表现为“仁”和“义”，但是这三者的道理是统一的，都是乾坤的表现。宋儒张载说：“三才两之（三才指‘天’‘地’‘人’），莫不有乾坤之道也。易一物而合三才，天（地）人一也，阴阳其气，刚柔其形，仁义其性。”⁶《易》把天（地）和人统一起来看，所以天人是一个相互关联的统一体。为什么用“乾”“坤”来表述“天”“地”“人”的统一，这是由于《易传》有个看法，因为“乾”是指“天行健，君子以自强不息”的，“坤”是指“地势坤，君子以厚德载物”的。因此，“人”对“天地”（天）负有特殊的责任。“人”应以“自强不息”“厚德载物”的精神来担当天地所要求的大任。张载说，“天道”和“人道”从“道理”上说是统一的，如果要知道做人的道理不能不知道“天地”的道理，能知道“天地”的道理，也就可以知道“人”（社会）的道理。

所以宋儒对“天人合一”思想发挥得更加深刻了，例如程颐说：“安有知人道而不知天道者乎？道，一也。岂人道自是一道，天道自是一道？”照儒家看，不能把“天”“人”分成两截，更不能把“天”“人”看成是一种外在的对立关系，不能研究其中一个而不牵涉另外一个。朱熹说得更明白：“天即人，人即天。人之始生，得之于天也；既生此人，则天又在人矣。”⁷“天”离不开“人”，“人”也离不开“天”。人初产生时，虽然得之于天（由天产生的），但是一旦有了人，“天”的道理就要由“人”来彰显，即“人”对“天”就有了一个责任。如果没有“人”如何能体现“天”的活泼气象，如何体现“天”的“自强不息”，“地”的“厚德载物”呢？所以人应该知

道“为天地立心”就是“为生民立命”，不能分割为二。所以《郭店竹简·语丛一》中说：“知天所为，知人所为，然后知道。知道然后知命。”知道了“天道”（自然运行的规律）和“人道”（人类社会生活的规律），这样才叫作知道“天”和“人”有一个统一的道理，然后才可以知道“天”（天道）和“人”（“人道”，社会）发展的趋向。孔子说：“知天命”。“知天命”就是说“人”应知道“天”的运行发展的趋势。孔子又说：“畏天命”，要对“天”有所敬畏，不能随便破坏“天”的发展规律。因为中国哲学一向不把“天”看成一死物，而把它视为是有机的，连续性发展的，有生意的（生生不息的），与人为一体的。“人”的存在离不开“天”，这是大家都能懂得的道理，但是为什么“人”有时把自己置于与“天”对立的地位，肆意地破坏“天”，把“天”作为征服的对象呢？这是由于他们把“天”和“人”看成只存在着一种外在的关系，而不了解“天”和“人”之间的关系是一种息息相关的内在关系。“内在关系”与“外在关系”不同，“外在关系”是说在“天”与“人”二者之间是各自独立的，各不相干的；而“内在关系”是说在“天”“人”二者之间存在着相即不离的关系。因此，“天人合一”虽是中国哲学中的一个很古老的哲学命题，它是中国儒家思想的基石，它同时也是一常新的人类社会需要不断给以新的诠释的命题。我们在考虑人类自身问题时，必须考虑与“天”（自然界）的关系问题，而且应是接着“天人合一”的观念来不断深入探讨“天”和“人”存在着的相即不离的内在关系。当前人类社会不正是由于长期严重地忽略了“天”与“人”的相即不离的内在关系正在受惩罚吗？不是“人类”和自然正走上一条相互抵触的道路吗？

由《周易》开出的“天人合一”思想（即“易，会天道，人道也”的思想）对解决当今“人与自然”的矛盾作为一种思维模式，或者可以给我们以下三点启发：

第一，“天人合一”作为一种思维模式，它要求人们不能把“人”看成是和“天”对立的，这是由于“人”是“天”的一部分，“人之始生，得之于天”。破坏“天”就是对“人”自身的破坏，“人”就要受到惩罚。因此，“人”不仅应“知天”（认识自然，以便合理地利用自然），而且应该“畏天”（对自然界应该敬畏，要把保护“天”作为一种神圣的责任）。现在人们只强调“知天”，只是一味用“知识”来利用“天”，征服“天”，以至无序地破坏“天”，而不知对“天”应有所敬畏，这无疑是“科学主义”（科技万能）极端发展的表现。“科学主义”否定了“天”的神圣性，从

而也就否定了“天”的超越性，这样就使人们的人文精神失去了依托。中国人的“天人合一”学说认为，“知天”和“畏天”是统一的，“知天”而不“畏天”，就会把“天”看成一死物，不了解“天”乃是有机体的，生生不息的刚健的大流行。“畏天”而不“知天”，就会把“天”看成是外在于“人”的神秘力量，而使人不能真正得到天的恩惠。“知天”和“畏天”的统一，正是“天人合一”的重要表现，从而表现着“人”对“天”的一种内在责任。“天人合一”这个哲学命题，体现着“天”与“人”的复杂关系，它不仅包含着“人”应该如何认识“天”，同样也包含着“人”应该尊敬“天”，因为“天”有其神圣性。这也许正是由于中国儒家没有成为一般意义上的宗教（如佛教和基督教等），但是它却具有一定的“宗教性”。也许正因为如此，在中国，儒家思想可以起着某种宗教的功能，这就是它认为“人”依“天”所具有的“内在”品德经过自我德行修养而实现其“超凡入圣”的“超越性”。因此，“天人合一”不仅是“人”对“天”的认知，而且是“人”应追求的人生境界。因为“天”不仅仅是自然意义上的天，而且也是神圣意义上的“天”，“人性”就其内在要求上说，以求达到“同于天”的超越境界。就这个意义上说，“人”和“天”不仅不是对立的，而且“人”应与“天地”为一体，如孟子所说：“君子所过者化，所存者神，上下与天地同流，”以实现其自身的超越。这样一种思维路径，不仅对我们走出“天人二分”（天人对立）的困境有十分重要的意义，而且也为人走向理想人生境界开辟了道路。

第二，我们不能把“天”和“人”的关系看成是一种外在关系，这是因为“天即人，人即天”，“天”和“人”是相即不离的。“人”离不开“天”，离开“天”，则“人”无法生存；“天”离不开“人”，离开“人”，则“天”的道理无法彰显，谁来担当实现“天道”的责任呢？这种对存在于“天”和“人”之间的内在关系的认知正是中国哲学的特点。王夫之对此有一重要的说明。他说：我们考察自古以来学者的学说，从汉朝以来，他们对先秦儒家的学说只抓住其外在的现象，而认为《易经》只是讲“天道”的，而不知《易经》也是“人道”的根本，自从周敦颐首先提出“太极图”的学说，这个学说是研究“天人合一”的根源的，它阐明了人之始生是“天道”变化产生的结果，在“天道”的变化之中把它的精华部分给了“人”，使人具有了不同于其他事物的“人性”，这样就可以发现“人道”（人类社会的规则）的一切日用伦常之理，就是“天道”（宇宙规律）阴阳变化的秩序。“人道”和“天道”是统一的，这点是不能违背的。“人道”本于“天

道”（因“人”是“天”的一部分），讨论“人道”不能离开“天道”，同样讨论“天道”也必须考虑“人道”，这是因为“人道”的“日用事物当然之理”，也是“天道”的阴阳变化的秩序。所以张载说：《周易》这部书“得天而未始遗人”。

第三，为什么说儒家哲学认为，在“天”和“人”之间存在着一种相即不离的“内在关系”？盖自古以来，至少由西周以来，在中国的思想中有“天听自我民听，天视自我民视”的思想传统，从孔孟到程朱陆王都是这样认识的。在这个问题上，朱熹有个说法也许反映出孔子“仁学”的一贯思想，他说：“仁者”，“在天则盎然生物之心，在人则温然爱人利物之心，包四德而贯四端者也。”⁸“天道”生生不息，以仁为心，“天”有使万物良好的生长发育的功能，故“人”要效法“天”，要对人慈爱，要使万物得益。这是因为“天人一体”，“人”得“天”之精髓而为“人”，故人生在世当以实现“天”的“盎然生物之心”，而有“温然爱人得物之心”，“天心”“人心”实为一心。“人”有其实现“天道”的责任，人生之意义就在于体证“天道”，人生之价值就在于成就“天命”，故“天”“人”关系实为一内在关系。就以上几点来讨论“天人合一”，我们对之作哲学的理解，这样才能洞见其真精神，真价值。它是作为一种世界观和思想方式，一种思考问题的路径来看“天人关系”的，它的意义在于赋予“人”一种不可推卸的责任。“人”必须在“同于天”的过程中（提高到“天”的境界），实现“人”的自身超越，达到理想的“天人合一”的境界。

当然，儒家的“天人合一”思想不大可能直接具体地解决当前人类社会存在的一个一个“人与自然矛盾”的问题。但是，“天人合一”作为一哲学命题，一种思维模式，认为不能把“天”“人”分成两截，而应把“天”“人”看成相即不离的一体，“天”和“人”存在着内在的相通关系，无疑会从哲学思想上为解决“天”“人”关系，提供一有积极意义的思路。

五

当今人类社会存在的“人与人之间的矛盾”较之于“人与自然的矛盾”更为复杂，它不仅涉及“自己与他人”“人与社会群体”“国家与国家”“民族与民族”“地域与地域”之间的种种矛盾，例如：对物欲和权力的追求，对自然资源的争夺、占有和野心的膨胀，造成国家与国家、民族与民族、地域与地域之间的对立和战争，而且有“帝国霸权”和“恐怖主

义”等等。过分注重金钱的追求和物质的享受，特别是统治者的贪污腐化，欺压老百姓，造成人与人之间关系的紧张，社会的冷漠，帮派林立，黑社会的猖狂等等。在人类社会，现在儿童有儿童的问题，青年有青年的问题，老年有老年的问题，人与人之间在日常生活中的互不理解和仇视，心灵上的隔膜，使社会的和谐全失，这样发展下去终将导致人类社会的瓦解。儒学是否能对现代社会存在的种种弊病提供某些有意义的思想资源呢？我认为，也许孔子儒家的“仁学”能对造就“人与人”，扩而大之国家与国家、民族与民族、地域与地域之间的和谐，即造就“和谐社会”有重要意义。

《郭店竹简·性自命出》中说：“道始于情，情生于性。始者近情，终者近义。”意思是说，人与人的关系开始时是建立在感情基础上，而感情是生于人的本性。因此，人与人的关系开始时更加根据情（如母子之情），到后来则更加根据道义。这里的“道”是指“人道”，即处理人与人之间关系的规律，或者说是处理社会关系的原则，它虽然和“天道”有联系，但也和“天道”不一样，“天道”指自然界的（或指相对于“人”的外界）运行规律。“道始于情”是说人与人的关系的建立是由感情开始的，这正是孔子“仁学”的出发点。孔子的弟子樊迟问“仁”，孔子回答说：“爱人。”这种“爱人”的品德从何而来呢？《中庸》引孔子的话说：“仁者，人也，亲亲为大。”“仁爱”的品德是人本身所具有的，爱自己的亲人是最基本的。但儒家认为“仁”的精神不能仅仅停留在爱自己的亲人上面，《郭店竹简》中说：“亲而笃之，爱也；爱父，其继之爱人，仁也。”对自己亲人爱到极点，那也只能叫“爱”；爱自己的父亲，扩大到爱别人，这才叫作“仁”。又说：“孝之放，爱天下之民。”对父母的孝顺要放大到爱护天下的老百姓。不过爱自己的亲人无论如何是爱别人的基础，“爱亲则方其爱人”。这就是说，孔子儒家的“仁学”要由“亲亲”扩大到“仁民”。也就是说，要“推己及人”，要做到“老吾老以及人之老”“幼吾幼以及人之幼”，才叫作“仁”。做到“推己及人”并不容易，必须把“己所不欲，勿施于人”，“己欲立而立人，己欲达而达人”的“忠恕之道”作为实现“仁”的准则。（朱熹《四书集注》：“尽己之谓忠；推己之谓恕。”）如果把“仁”推广到社会（全人类社会），这就是孔子说的：“克己复礼为仁。一日克己复礼，天下归仁焉。为仁由己，而由人乎哉？”古来曾把“克己”（克服私欲）和“复礼”（复兴礼制）解释为平行的两个方面，我认为这不是对“克己复礼”的好的解释。所谓有“克己复礼为仁”是说只有在“克

己”基础上的“复礼”才叫作“仁”。费孝通先生对此有一解释，他说：“克己才能复礼，复礼是进入社会，成为一个社会人的必要条件。扬己和克己也许正是东西方文化的差别的一个关键。”我认为这话很有道理。一个人要进入社会，必须对自己有个要求，例如说自己应该要求做到“己所不欲，勿施于人”，这样你才可以遵守社会的规范（礼），而成为社会的人；一个国家也一样，你必须对自己有个遵守世界的“公约”和“公理”的要求，这样世界公约、公理才得以维护。费先生认为，中国文化主张“克己”，对于人与人之间相处较好；而西方文化主张“扬己”，把自己抬高到别人、别国之上，这怎么能不发生冲突和战争呢？朱熹对“克己复礼为仁”的解释说：“克，胜也。己，谓身之私欲也。复，反也。礼者，天理之节文也。”这就是说，要克服自己的私欲，以使之做人行事能符合礼仪制度规范。“仁”是人所具有的内在品德（“爱生于性”）；就社会生活说，“礼”是规范人的行为的外在的礼仪制度，它的作用是为了调节人与人之间的关系使之和谐相处，“礼之用，和为贵”。要人遵守礼仪制度必须是出于其内在的“爱人”之心，才符合“仁”的要求，所以孔子说：“为仁由己，而由人乎哉？”对“仁”和“礼”的关系，孔子也有非常明确的说法：“人而不仁如礼何？人而不仁如乐何？”没有仁爱之心的礼乐那是虚伪的，是为了骗人的。所以孔子认为，人们如果有了追求“仁”的自觉要求，并把这种“仁爱之心”按照一定的规范实现于日常社会之中，这样社会就会和谐安宁了，“一日克己复礼，天下归仁焉”。这种把追求“仁”的信念实践于日常实际生活之中，就是《中庸》所说的“极高明而道中庸”。“极高明”要求追求人生上的最高原则，即“仁”的理想；“道中庸”要求人们按照规则把“仁爱”精神实现于日常生活之中（“中庸”，用中的意思）。“极高明”和“道中庸”不能分为两截，这就是儒家的最高理想“内圣外王之道”。我们今天要求建设“和谐社会”，孔子的这些话无疑对我们有重要的价值。《论语》中讲了许多“仁”的道理，但没有出现“仁政”这两字，但是他说“导之以德，齐之以礼”“泛爱众”“举贤才”“博施于民，而能济众”等等都是讲的“仁政”。“仁政”在《孟子》一书中讲得很多，意义也很广泛，其中有些虽已不适合今日人类社会的要求，但其中也许有两点很重要，对我们今天建设和谐社会和实现世界和平仍然有重要意义。一是孟子认为“行仁政”就要使民有恒产，他说：“民之为道也，有恒产者有恒心，无恒产者无恒心。”⁹孟子的意思是说：对民的道理是，要使每个人都有一定的稳固产业，他才能有一定的道德观念和行为准则。没有一

定稳固产业的人，便不会有一定的道德观念和行准则。所以孟子说：“夫仁政，必自经界始。”意思是说：“仁政”首先要使老百姓有自己的土地。我想，我们要真正建立“和谐社会”就必须“使民有恒产”。就全人类社会说，就要使各国、各民族都能自主拥有其应有的财富才行，强国不能掠夺别国的财富和资源以及推行强权政治。二是孟子的“仁政”要求反对非正义战争，他认为“得道多助，失道寡助”，这里的“道”是“道义”的意思，在《公孙丑下》中有一段记载，他认为：天时不如地利，地利不如人和。他说：

域民不以封疆之界，固国不以山谷之险，威天下不以兵革之利，得道者多助，失道者寡助。寡助之至，亲戚畔之，多助之至，天下顺之。以天下之所顺，攻亲戚之所畔，故君子有不战，战必胜矣。¹⁰

这段话的意思是说：限制老百姓不必用国家的疆界，保护国家不一定靠山川的险固，威行天下不必凭兵器的锐利，得道多助，失道寡助。少助到了极点，连亲戚都反对他；多助到了极点，全天下都归顺他。拿天下都归顺的力量来攻打连亲戚都反对的人，那么合乎道义的君子或者不必用战争，若用战争，最后必然是会胜利的。所以儒家往往把战争分为“正义战争”和“非正义战争”，孟子说：“春秋无义战”，“失民心者，失天下”。这个道理对一个国家内的统治者说也一样。汉初的贾谊写过一篇《过秦论》，他总结秦亡之因在于“仁义不施，攻守之势异”。并引用了一句谚语：“前事不忘，后事之师。”这不也是我们今天应该借鉴的吗？孔子儒家这些思想，对一个国家的“治国”者，对于世界上的那些发达国家的统治集团不能说没有意义。“治国、平天下”应该行“仁政”，行“王道”，不应该行“霸道”，不能压迫老百姓。

自1993年亨廷顿提出“文明的冲突论”之后，引起了各国学术界的广泛讨论。在人类历史上看，由于文化（哲学、宗教、价值观念）的不同引起的冲突和战争并不少见，就是进入21世纪虽未发生世界性的大战，但局部地区的战争则不断，其中无疑政治、经济是冲突和战争非常重要的一个原因，但文化确也在相当大的程度上是国家与国家、民族与民族、地域与地域之间冲突和战争的原因，如何化解这种因文化上的原因引起的冲突甚至战争，也许孔子提出的“和而不同”是一条非常有意义的原则。

在中国历史上，一向认为“和”与“同”是不同的两个概念，有所谓有“和同之辨”。《左传·昭公二十年》记载：“公曰：唯据与我和夫？晏子对曰：据亦同也，焉得为和？公曰：和与同异乎？对曰：异。和如羹焉，水火醯醢盐梅以烹鱼肉，燂之以薪。宰夫和之，齐之以味，济其不及，以泄其过。君子食之，以平其心。君臣亦然。……今据不然。君所谓可，据亦曰可。君所谓否，据亦曰否。若以水济水，谁能食之？若琴瑟之专一，谁能听之？同之不可也如是。”¹¹《国语·郑语》：“夫和实生物，同则不继。以他平他谓之和，故能丰长而物归之；若以同裨同，尽乃弃矣。故先王以土与金、木、水、火杂，以成百物。”可见“和”与“同”是两个不同的概念。“以他平他”，是以相异和相关为前提，相异的事物相互协调并进，就能发展；“以同裨同”，则是以相同的事物叠加，其结果只能窒息生机。中国传统文化的最高理想是“万物并育而不相害，道并行而不相悖”。（“万物并育”和“道并行”是“不同”；“不相害”“不相悖”则是“和”。）这种思想为多元文化共处提供了取之不尽的思想源泉。

不同的民族和国家应该可以通过文化的交往与对话，在对话（商谈）和讨论中取得某种“共识”，这是一由“不同”到某种意义上的相互“认同”的过程。这种相互“认同”不是一方消灭一方，也不是一方“同化”一方，而是在两种不同文化中寻找交汇点，并在此基础上推动双方文化的发展，这正是“和”的作用。因此，我们必须努力追求在不同文化之间通过对话，实现和谐相处。现在中西许多学者都认识到，通过对话沟通不同文化之间的相互理解的重要性。例如哈贝马斯提出“正义”和“团结”的观念。我认为，把它们作为处理不同民族文化之间关系的原则，应该是很意义的。哈贝马斯的“正义原则”可理解为，要保障每一种民族文化的独立自主、按照其民族的意愿发展的权利；“团结原则”可理解为，要求对其他民族文化有同情理解和加以尊重的义务。只有不断通过对话和交往等途径，才可以在不同民族文化之间形成互动中的良性循环。2002年去世的德国哲学家伽达默尔提出，应把“理解”扩展到“广义对话”层面。正因为“理解”被提升到“广义对话”，主体与对象（主观与客观或主与宾）才得以从不平等地位过渡到平等地位；反过来说，只有对话双方处于平等地位，对话才可能真正进行并顺利完成。可以说，伽达默尔所持的主体—对象平等意识和文化对话论，正是我们这个时代所需要的重要理念。这种理念，对我们今天如何正确而深入地理解中外文化关系、

民族关系等等，具有重要的启示！¹²。无论哈贝马斯的“正义”和“团结”原则，或者是伽达默尔的“广义对话论”，都要以承认“和而不同”原则为前提。只有承认不同文化传统的民族和国家可以和谐相处，不同的文化传统的民族与国家才能获得平等的权利和义务，“广义对话”才能“真正进行并顺利完成”。因此孔子以“和为贵”为基础的“和而不同”原则应成为处理不同文化之间的一条基本原则。

六

如果我们以儒家的“合天人”（天人合一）的观念来为解决“人和自然”之间的矛盾提供某些思想资源，以“同我”（人我合一）的观念来解决“人与人”之间的矛盾，那么我们可以用“一内外”（身心合一）来调节自我身心内外的矛盾。现代社会，由于种种内外的压力，特别是人们无止境地追求感官之享受，致使身心失调，人格分裂。由于心理的不平衡引起精神失常、酗酒、杀人、自杀等等，造成了自我身心的扭曲，已经成为一种社会病，而严重影响了社会的安宁，其原因正在于道德沦丧，致使人失去了自我身心内外的和谐。对这样一种情况，许多有见识的学者都为此提出救治的理论和策略。从中国传统文化看，可以说儒家对人的身心道德修养和人格培育给以特别的重视。

在《郭店竹简·性自命出》中说：“闻道反己，修身者也。”意思是说，知道了“道”，就应该反求诸己，这就是“修身”。《大学》这部书更加特别强调人的道德实践对于建设理想的和谐社会的重要意义。它的第一章中说：“大学之道，在明明德，在新民，在止于至善。”朱熹注说：“新者，革其旧之谓也。言既自明其明德，又当推己及人，使之亦有以去其旧染之污也。……言明明德、新民，皆当止于至善之地而不迁。”（明德：真实无妄的道理），明明德、新民的目的在于止于至善，达到做人的最高境界。所以《大学》中认为，修身、齐家、治国、平天下，“自天子以至于庶人，壹是皆以修身为本，其本乱而末治者否矣”。这就是说，儒家认为每个人（自天子以至庶人）的道德修养好了，那么“家”可以齐，“国”可以治，“天下”可以太平，如果自己的道德修养这个根本混乱了，“家”“国”“天下”能够治好，那根本是不可能的。所以在《中庸》一书中也说：“为政在人，取人以身，修身以道，修道以仁。”治理社会是要靠人来治理，让什么人来治理就要看他自身的道德修

养，道德修养是以合不合“道”为标准，这里的“道”是指“天下之达道”，即“和谐”（和），而做到使社会和谐就要有“仁爱”之心。这里，把个人的道德修养（修身）与“仁”联系起来，正说明儒家思想的一贯性。儒家讲“修身”不是没有目标的，而是为了“齐家”“治国”“平天下”，即为了建设“和谐社会”。《礼记·礼运》中所记载的“大同”社会的理想，就是要求建立一在政治、经济、文化上诸多方面的和谐社会。儒家把和谐社会的理想建立在人的道德修养的提的基础上，因此，儒家特别重视人的自我身心内外的修养。儒家认为，生死和富贵等等不是人应追求的最终目标，而道德学问才是人所应追求的。孔子说：“德之不修，学之不讲，闻义而不能徙，不善不能改，是吾忧也。”孔子这段话告诉我们的是做人的道理：“修德”（修养道德）并不容易，必须有崇高的理想，有关怀人类社会福祉的胸襟。“讲学”（讲究学问）也不容易，它不但要求自己提高智慧，而且要负起对社会进行人文教化的责任。“改过”，人总是会犯这样那样的错误，但要能勇于改正错误，这样才可以有助于社会的和谐。“向善”，是说人生在世，应日日向着善的方向努力，做到“日日新，又日新”，这样就可以达到“止于至善”的境地。“修德”“讲学”“改过”“向善”是孔子儒家提倡的做人的道理，是使人自我身心内外和谐的有意义的路径。所以孟子说：“存其心，养其性，所以事天也。夭寿不贰，修身以俟之，所以立命也。”如果一个人能保存他的恻隐之心，修养他的善性，以实现天道的要求，寿命的长短都无所谓了，但一定要通过对自身的修养保持和天道的一致，这就是安身立命了。

儒家的“修身”是有目的的，《周易·系辞下》中说：“利用安身，以崇德为。”人们为人事要益于社会而安身，以达到对道德的推崇。个人通过道德修养，以使其精神境界得以升华，来实现“为天地立心，为生民立命，为往圣继绝学，为万世开太平”的大事业，实践“立大本行达道”的大事业。这对个人自身说，其人生境界自有一内外和谐的“安身立命”处，也就是宋儒所追求的“孔颜乐处”了。朱熹在其《答张敬夫书》中与敬夫讨论“中和义”时说：“而今而后，乃知浩浩大化之中，自家自有个安宅，正是自家安身立命、主宰知觉处，所以立大本行达道之枢要，所谓体用一源，显微无间，乃在于此。”¹³儒家认为，找一“安身立命”处，对自己的身心内外之和至为重要，所以朱熹说：“但能致中和于一身，则天下虽乱，而吾身之天地万物，不害而为安泰；其不能者，天下虽治，而吾身之天地万物，不害而为乖错。其间一国一家，莫不然。”如果

自我的身心内外能够做到中正和谐，即使天下大乱，在自己和天地万物之间，对自己的身心安宁康泰就不会有什么影响；如果自我的身心内外做不到中正和谐，即使天下治理得很好，自己的身心也将是不安和错乱的。无论治世、乱世，自己都应修德敬业，这样就可以在活着的时候尽伦尽职，在离开人世的时候将是很安宁的，所以张载《西铭》的最后两句话说：“存，吾顺事；没，吾宁也。”

儒家一向都非常看重“安身立命”。所谓“安身立命”就是要对自己有个道德修养上的要求，这样才能使自己身心和谐，内外调适，使自己的言行符合“做人的道理”，这样身才能安，命才能立。至于那些有碍自我身心内外和谐的外在影响，应该排除。曾子说：“吾日三省吾身。为人谋，而不忠乎；与朋友交，而不信乎；传，不习乎。”做个君子人，每天都应时时警惕自己，看看自己为人行事，是否合乎道义。对于那些不合乎道义的事，甚至应该做到“杀身成仁，舍生取义”，所以孔子说：“志士仁人，无求生以害仁，有杀身以成仁。”孟子说：“吾身不能居仁由义，谓之自弃也。”要做到儒家提倡的“做人的道理”，很不容易，但应该是人们努力去追求的，这样自己才可以有个“安身立命”处，其身心内外自然和谐了。而追求自我身心内外的和谐其目的是为了现实社会的和谐。

司马迁说过：“居今之世，志古之道，所以自镜也，未必尽同”，我们今天温习阐发孔子儒家的思想，发掘其中对当今人类社会有意义的资源，无疑是重要的。但古来圣贤的思想、理念并不能全然解决当今社会存在的所有问题，也并不能全都适应现代社会的要求，它只能给我们一些思考的路子，启发我们去用这些思想资源，在给以适应现代社会生活要求的新的诠释的基础上，才有可能为建设和谐的人类社会做出贡献。“周虽旧邦，其命维新。”¹⁴我们中华民族是一个有着长达五千年的历史文化的古老民族，我们的使命是使我们的社会不断革新，从而对全人类做出贡献。

IV . IMMANENCE AND TRANSCENDENCE IN CHINESE CHAN BUDDHISM

From its transmission into China till Sui (581-618) and Tang (618-907) dynasties, Buddhism had developed into several schools: Tian-tai, Consciousness-only, Vinaya, Pure Land, Hua yan, Chan¹, etc. Since Tang Dynasty, Chan Buddhism has become increasingly influential and even has been particularly thriving to surpass all the other schools that declined early or late. No doubt there are many reasons for its thriving, perhaps one of the reasons is that Chan Buddhism can particularly reflect the characteristic of Chinese philosophy—"immanent transcendence," to which scholars probably should pay more attention.

As a religion, Buddhism has its doctrinal scriptures, its regular rituals, its precepts, its worshiped objects and so on, but Chan Buddhism after Hui Neng (638-713) renounced all things above. So in Chan Buddhism there is no need to chant scriptures, observe precepts, follow any rituals and worship any images, and even leaving home and becoming a monk or nun becomes dispensable, hence to become a Buddha and attain the state of nirvana can only rely on the awareness of one's own mind. It says: "One who can be aware within one thought is a Buddha, but confused within one thought a sentient being." That is to say, to become a Buddha and attain the transcendental state completely depends on the role of the immanent essential mind.

**I . Chinese Chan Buddhism neither valued
scriptures nor established words, but claimed**

everything should listen to the essential mind

There is a Chan story called "Buddha twirls a flower and Maha-Kashapa smiles," which is recorded in *Zhi Yue Lu (Record of Fingers Pointing to the Moon)*:

When Buddha was in Grdhrakuta mountain he turned a flower in his fingers and held it before his listeners. Every one was silent. Only Maha-Kashapa smiled at this revelation, although he tried to control the lines of his face. Buddha said: "I have the eye of the true teaching, the heart of Nirvana, the true aspect of non-form, and the ineffable stride of Dharma. It is not expressed by words, but especially transmitted beyond teaching. This teaching I have given to Maha-Kashapa."

Chan Buddhism considered itself as "transmitted beyond teaching," and proclaimed itself as distinguished from the other schools by telling such stories. At the beginning of Buddhism in India, it was quite simple and originally a philosophy of life, in which Shakyamuni Buddha avoided discussing those theories unrelated with real life, say, concerned little about the following problems—"whether the universe is permanent or impermanent," "whether the universe is limited or unlimited," "whether life exists or not after death," "whether life and body are one or not," etc—which were often heatedly discussed at his time in India. Later Indian Buddhism became more and more complicated during its developing, further and further away from real life, and its system became larger and larger, its worshiped images more and more, its technical terms innumerable, which were completely incompatible with Chinese traditional thoughts. After Sui and Tang dynasties, many Chinese Buddhist schools were trying every possible way to get over this complication of Indian Buddhism, such as, "one billion worlds entered into one thought" in Tian Tai School and "principle and matter integrated into one real mind" in Hua Yan School both emphasized the role of the essential mind. This tendency was further intensified in Chan Buddhism after Hui Neng, hence its insistence on establishment in no words and renunciation of all

scriptures.

Hui Neng himself did not renounce the scriptures and advocate establishment in no words yet. It is recorded in *Platform Sutra* that Hui Neng taught his disciples about *Diamond Sutra* and *Lotus Sutra*, but he maintained that "all scriptures and books exist and tell something in accordance with people" (*Platform Sutra*) and are only the tools to conduct people; hence one should not cling to the scriptures because one cannot become a Buddha by chanting the scriptures, and one can be liberated only by relying on one's essential mind. The reasons are: on the one hand, the principles and methods of becoming a Buddha originally exist in one's own essential mind, so "the twelve-part canons of the Buddhas of past, present, and future are originally inherent in one's nature" (*Platform Sutra*). Thus there is no need seeking outside, no need to search the Buddha out of mind, because to be a Buddha and become enlightened totally depends upon oneself, and the extrinsic words just have nothing to do with it. On the other hand, words are outside things. If one attaches to these outside things, one "attaches to the forms." "One's own essential nature inherently has the insight of *Prajñā* (wisdom), and if one is continually observant, use one's own insight; therefore one does not depend on words" (*Platform Sutra*). In order to break the bondage of the scriptures, Chan masters after Hui Neng were simply against chanting the scriptures, and even against all kinds of words. It is recorded in *Wu Deng Hui Yuan* (*The Five Lamps Meet at the Origin*): Wei Shan (771-853) asked Yang Shan (814-890), "*Nirvana Sutra* has forty volumes. How many are said by Buddha? How many by *mara* (devil)?" (Vol. 9). Yang Shan answered: "All are said by *mara* (devil)." If one attaches the sutras as Dharma itself, one has already been bewitched and hoodwinked by devils. *Gu Zun Su Yu Lu* (*Recorded Sayings of the Ancient Worthies*) records: "As to those things which are considered as Buddhas, interpreted as Buddhas, if one sees something, finds something and attaches something, all of these are called dung of intellectual play, coarse words and dead language" (Vol. 2). *Jing De Chuan Deng Lu* (*Record of the Transmission*

of the Lamp) records: Lin Ji (787?-867) "went to Huang Bo mountain (where his master lived) in a mid-summer, and saw his master Huang Bo (?-850) reading a sutra. He said, 'I thought there is a man but actually an old monk who puts black soy beans into his mouth'" (Vol. 12). All scriptures are nonsense. By attaching to these nonsense, how can one be liberated and become a Buddha? Since Buddhist scriptures are "dead language" and "said by *mara* (devil)," not the tools to awaken, naturally they are not to be fallen back on to attain the goal of becoming a Buddha. *Gu Zun Su Yu Lu* records Nan Quan (748-834) saying: "The Way does not belong to the category of knowing or not knowing, because knowing is false awareness and not knowing is no memory. If one really attains the Way of no-doubt which is like great emptiness, wide, vast and open, how can one tell right or wrong?" (Vol. 13). The Way does not belong to the category of knowledge, which have the difference between subject and object, but the enlightenment to the Way relies on the self-awareness of the mind. If so, the self can't be not self-aware; if the self isn't self-aware, it is "*avidya* (ignorance)." Therefore "not knowing is no memory."

Chan masters thought that words were unnecessary and language cannot be beneficial to the enlightenment and becoming a Buddha. Only through language one cannot comprehend the Buddhist Dharma. Someone asked Wen Yi (885-958): "What is the first meaning (of Buddhist Dharma)?" Wen Yi replied: "If I tell you, it is already the second meaning" (*Wen Yi Chan Shi Yu Lu* [*Recorded Sayings of Chan Master Wen Yi*]). The Dharma is ineffable, and what has been said is already not the Dharma itself. Therefore, is there any method that may lead people to the enlightenment? As far as Chan Buddhism sees, hardly is there any other method for becoming enlightened but through one's own awareness. However, Chan Buddhism also used very special methods, such as "stick and shout" to instruct disciples. It is recorded in *Wu Deng Hui Yuan*:

A monk asked: "What is *bodhi* (awakening)?" Master (De Shan, 782-865)

struck him and said: "Get out! Don't shit here!" One asked: "What is Buddha?" Master said: "Buddha is an old *bhiksu* (monk) in India." Xue Feng (822-908) asked: "By inheriting from patriarchs before, do you still have discriminations?" Master struck him with a stick and asked: "What does this mean?" Xue Feng answered: "I can't understand." On the next day, Xue Feng asked for more teaching. Master said: "There are neither languages nor sentences taught in our school, and I have no Dharma to give." Hence Xue Feng became aware. (Vol. 7)

It is also recorded in *Jing De Chuan Deng Lu*:

(Lin Ji came to) see Jing Shan. When Jing Shan just raised his head to see who was coming, Master (Lin Ji) shouted. When he just intended to open his mouth to say, Master left with a flick of his sleeve. (Vol. 12)

This is so-called "De Shan's stick and Lin Ji's shout." These special methods are intended to break down people's attachment, and bring them back to the essential mind. As far as Chan Buddhism sees, one loses one's essential nature because one always attaches to something, therefore a sudden shout and an unexpected strike on the head would make one suddenly become enlightened and attain the Buddhahood by oneself. As Yuan Wu (1063-1135) said in *Yuan Wu Fo Guo Chan Shi Yu Lu (Recorded Sayings of Chan Master Yuan Wu Fo Guo)*: "De Shan's stick and Lin Ji's shout are both thorough and complete, and directly cut off the root of the old attachment. They are great knacks and uses, reaching the same end by innumerable means, and could remove bondages from the disciples" (Vol. 14). Lin Ji's master, Huang Bo, said in his *Chuan Fa Xin Yao (Essential Teachings on the Transmission of Mind)*:

This spiritually enlightening nature. . . cannot be looked for or sought, comprehended by wisdom or knowledge, explained in words, contacted materially or reached by meritorious achievement. All the Buddhas and Bodhisattvas, together with all wriggling things possessed of life, share in this great Nirvanic nature. This nature is Mind, Mind is the Buddha, and the Buddha is the Dharma.

Since this spiritually enlightening nature everyone has cannot be revealed by knowledge and language, the only way is to use stick and shout to break down the attachment (of course not necessarily to use stick and shout; any other method could make it if only they could break down the attachment), hence the mind has nothing to observe and one attains the transcendental state denying object and mind.

II . Chinese Chan Buddhism broke outmoded conventions and abolished sitting in meditation,⁵ but only valued seeing the nature and accomplishing the Buddhahood

Sitting in meditation is a practicing method used in every Buddhist schools. Shakyamuni Buddha became enlightened under the *bodhi* (awakening) tree by sitting in meditation for forty-nine days; Bodhidharma came to China and faced the wall by sitting in meditation for three years. After Hui Neng, there has been a great change in Chinese Chan Buddhism. In *Platform Sutra*, Hui Neng said: "It is only a matter of seeing the nature, not a matter of meditation or liberation." It is clear that Hui Neng insisted on "seeing the nature and accomplishing the Buddhahood," and believed only through meditation one cannot be liberated. Hence he said:

Deluded people stick to the appearances of things: they cling to the idea of absorption in one practice as only meaning constantly sitting unmoving, not letting the mind be aroused at random. They identify this with absorption in one practice, but those who make this interpretation are equivalent to inanimate objects. This is a condition that obstructs the Way. The Way should be fluid, free-flowing. Why then do you stagnate? When the mind does not dwell on things, then the Way is fluid. If the mind dwells on things, that is called self-binding. If you say constant sitting is right, that is contradicted by the fact that Shariputra was scolded by Vimalakirti for sitting quietly in the forest (*Platform Sutra*).

Those who attach to sitting in meditation and believe deluded thought cannot arise through their sitting actually regard a human being as a dead thing, and know nothing about "the Way should be fluid." The mind should move and not dwell on things, otherwise the mind is bound, and then how could one be liberated? *Gu Zun Su Yu Lu* records: Ma Zu(709-788) "lived in Nan Yue Chuan Fa Monastery (where his master Huai Rang [677-744] presided) and stayed in a hut alone by practicing sitting in meditation without paying attention to the visitors (even to his master Huai Rang). . . . One day, (in order to instruct Ma Zu) Huai Rang put a tile in front of the hut and began to grind it. Ma Zu didn't pay attention to it at the beginning, but after a long time, Ma Zu got very curious and then asked: 'For what by grinding?' Huai Rang said: 'Grinding into a mirror.' Ma Zu laughed: 'How can a tile become a mirror by grinding?' Huai Rang retorted: 'If a tile cannot become a mirror by grinding, how could one become a Buddha by sitting in meditation?'" (Vol. 1). Ma Zu sat in meditation and was bound by it, hence Huai Rang used "grinding a tile into a mirror," a metaphoric method, to inspire him to be enlightened. This is an example freeing from one's bondage by relying on others. Another example is Hui Leng (854-932) who had worn seven cattail hassocks by sitting in meditation for more than twenty years but still did not see the nature. Until one day when rolling up a curtain by a chance, he suddenly got enlightened, and composed a verse: "It was really a mistake, really a mistake, until I see the world when rolling up a curtain. If one asks me what kind of teaching I know, I shall pick up a whiskbroom and strike right toward his head" (*Wu Deng Hui Yuan*, Vol. 7). Hui Leng rolled up a curtain accidentally and saw that one billion worlds are just as they are, and then "witnessed the mind and saw the nature." He released the bondage of sitting in meditation, suddenly saw the whole thing in a clear light and became enlightened. It is said in *Platform Sutra*: "Those who cannot realize it themselves because of the wandering of the conditioned mind need a good knowing advisor to point it out and guide them to perception of

essential nature; those who can realize it themselves don't have to turn outward for enlightenment." Ma Zu was inspired by Huai Rang, but Hui Leng became enlightened by himself. In any case, both Ma Zu and Hui Leng have to "realize the good knowing advisor within the essential mind." That is to say, one has to rely on one's immanent essential mind to attain the transcendental state. The saying "until I see the world when rolling up a curtain" in Hui Leng's verse is the crux of his enlightenment, because as far as Chan Buddhism sees, there is no need to deliberately make a certain thing to be enlightened and become a Buddha. One should naturally see the Way in ordinary daily life, just like "clouds floating in the blue sky and water filling in the bottle," and everything goes naturally and ordinarily. There is a verse in *Wu Men Guan* (*Gateless Gate*) written by Wu Men (1183-1260):

In spring, hundreds of flowers; in autumn, a harvest moon; in summer, a refreshing breeze; in winter, snow will accompany you. If useless things do not hang in your mind, any season is a good season for you.

This spiritual state of Chan Buddhism is a state going with the nature: one views the blooming of hundreds of flowers in spring, enjoys serenity under a harvest moon in autumn, feels the sudden coming of a refreshing breeze in summer, and watches thickly falling snowflakes swirling in winter. Let everything goes by itself at ease and without any obstruction, then "every daytime is a good day," and "every nighttime is an enjoyable night." If one attaches to sitting in meditation, one is bound by the method itself and cannot be liberated. Lin Ji said: "There is no place in Buddhism for deliberate effort. Just be ordinary and nothing special. Relieve your bowels, pass water, put on your clothes, and eat your food. When you are tired, go and lie down. Ignorant people may laugh at me, but the wise will understand" (*Gu Zun Su Yu Lu*, Vol. 11). If one wants to become a Buddha and attain the state of nirvana, one should not rely on the extrinsic practice, but be enlightened suddenly as Hui Leng experienced. A

monk asked Ma Zu: "How to cultivate the Way?" Ma Zu said: "The Way cannot be cultivated. If one says it can be cultivated, even if it has been cultivated, it will disappear eventually" (*Gu Zun Su Yu Lu*, Vol. 1). How can the Way be cultivated? By relying on so-called "cultivation," one has to manage it with a contrived effort; certainly "it will disappear eventually." Therefore cultivating the Way cannot be searched deliberately out of ordinary life. A Vinaya Master You Yuan asked Hui Hai: "Do you make efforts in your practice of the Way?" Hui Hai answered: "Yes, I do." The Vinaya Master asked: "How?" Hui Hai answered: "When hungry, I eat; when tired, I sleep." The Vinaya Master asked: "And does not everybody do the same things, master?" Hui Hai answered: "Not in the same way." The Vinaya Master asked: "Why not?" Hui Hai answered: "When they are eating, they think of a hundred kinds of necessities, and when they are going to sleep they ponder over affairs of a thousand different kinds. That is how they differ from me." An ordinary person eats with preference of the fat or the lean in the food, sleeps with going off into wild flights of fancy, and has different preferences and attachments and there is no chance for liberation. Those who truly know Chan should "sleep if need to sleep and sit if need to sit," "enjoy the cool if hot and warm at a fire if cold." A monk told Zhao Zhou (778-897): "I have just entered the monastery. Please teach me." Zhao Zhou asked: "Have you eaten your rice porridge?" The monk replied: "I have." Zhao Zhou said: "Then you had better wash your bowl." At that moment the monk was enlightened (*Zhi Yue Lu*, Vol. 11). After eating, naturally it is time to wash the bowl. This is so ordinary. Only through this can one meditate when sitting, meditate when sleeping, meditate when resting, and meditate when moving, therefore eating and sitting are both fine Way. If meditation is not necessary, there is no necessity to keep all kinds of precepts. Lu Xisheng asked Yang Shan: "Do you still observe precepts, master?" Yang Shan said: "I don't" (*Wu Deng Hui Yuan*, Vol. 9). Li Ao (772-841) asked Yao Shan (751-834): "What are *sila* (precepts), *dhyana* (meditation) and *Prajñā* (wisdom)?" Yao Shan

said: "We don't have these idle fitments here!" (*Jing De Chuan Deng Lu*, Vol. 14) *Sila* (precepts), *dhyana*(meditation), and *Prajñā* (wisdom) are the "three practices" of Buddhism, an indispensable gateway for Buddhists, but Chan masters see them as something useless. It seems that this negation means that every practicing method is unnecessary; hence Chan Buddhism negates anything extrinsic and formal. The reason why Chan Buddhism seems like this is based on "the mind of everyday life is the mind of the Way." There is no "mind of the Way" apart from the mind of everyday life, and also no need to live any special life apart from everyday life. With this realization, the immanent mind of everyday life can be the transcendental mind of the Way. It is just as Yin Shun (1906-2005) put in his *The History of Chinese Chan Buddhism*: "The nature is both transcendental (away from all forms and its body pure and clear) and immanent (all Dharma cannot be different from the nature). Only when one gets enlightened from everything here and now, at the same time not different from everything, and completely realizes that everything is just no other than the magical application of the nature, can one go into the world or renounce the world at one's will, get the substance and its application, integrate the matter with its principles, and have one's feet firmly planted on the ground."¹⁶

III . Chinese Chan Buddhism did not worship images, rather abused the Buddhas and berated the masters, and claimed "one who is enlightened in one thought is a Buddha"

Indian Buddhism cannot keep from the influence of Indian culture which is strongly marked the character of mysticism, especially after Shakyamuni Buddha. For example, there are so-called "twenty-eight heavens" and "eighteen hells," attached to which are adjacent heavens or hells, and there are also innumerable Buddhas and Bodhisattvas who

have supernatural powers. Certainly all these are influenced by Indian traditional culture. Even the much simpler Indian Chan which is considered as "transmitted beyond teaching" is still of mystical character. It is said that all twenty-eight masters of Indian Chan have so-called "Six Supernatural Powers": (1) the power of divine audition; (2) the power of divine vision; (3) the power of awareness of the minds of others; (4) the power of the knowledge of previous lifetimes; (5) unimpeded bodily action; (6) the power of the extinction of contamination. Even four meditative states—"The Four Meditation Heavens"—Indian Chan practiced are also very mystical. Chinese Chan Buddhism after Hui Neng is very different. Hui Neng said: "My mind inherently has a Buddha in it; and the inner Buddha is the real Buddha" (*Platform Sutra*). Based on this, Chan Buddhism was against supernatural powers and worshiping images. *Wu Deng Hui Yuan* records: Dao Ying (?-902) "built a house near a place called San Feng, and did not go to hall for ten days. Dong Shan (807-869) asked him: 'Why didn't you go to have meals recently?' Dao Ying said: 'A heavenly god served the food everyday.' Dong Shan told him: 'I thought you are a man, but still have this kind of idea. Come to my place at night.' Dao Ying came to Dong Shan's place at night. Dong Shan called his name: 'Dao Ying!' Dao Ying replied. Dong Shan said: 'If you neither think of good nor think of bad, then what leaves?' Dao Ying came back and sat silently. Since then Dao Ying couldn't find the heavenly god any more. After three days, there was completely no such a thing in Dao Ying's idea" (Vol. 13). The point Dong Shan criticized Dao Ying lies in how could a man like Dao Ying believe these mystical supernatural powers. What is the meaning of "neither think of good nor think of bad"? This is the teaching from Hui Neng that one should never attach to those things created by one's imagination. It is recorded in *Chan Zong Zhuan* (*A Biography of Chan Buddhism*): "Hui Ming asked the Dharma from Hui Neng. Hui Neng said: 'You should shut out all desires and not conceive a single thought of good or bad.' Hui Ming did what Hui Neng told him to do. Hui Neng told him: 'When you neither think of

good nor think of bad, what is your original face?' At these words, Hui Ming was greatly enlightened and said to Hui Neng with his deep gratitude: 'I am like a man who takes a drink of water and knows for himself whether it is cold or warm.'" The so-called "a heavenly god served the food" was just an illusion of Dao Ying; once he became aware, the illusion disappeared and the heavenly god couldn't be found any longer. A man is essentially a man and has his original appearance; therefore everything has to count on the man himself, and does not need any help from the extrinsic transcendental powers at all. In *Platform Sutra* (Qi Song Edition), there is a verse called *Wu Xiang Song* (*Verse on Freedom from Forms*):

When the mind is even, why bother to keep precepts?
When action is straightforward, what's the need to practice meditation?
If you are grateful, you take care of your parents respectfully;
If you are dutiful, above and below are mentally sympathetic.
If you are deferential, high and low harmonize amicably;
If you are tolerant, myriad evils cause no disturbance.
If you can drill wood and produce fire, you will produce red lotuses from
the mud.
Harsh words are clearly good medicine;
If it offends the ear, it's surely faithful speech.
Reform your errors, and you will develop wisdom;
Defend your faults, and you betray an unsound mind.
Always practicing altruism in your daily life;
Attaining the Way does not come from donating money.
Enlightenment is only to be sought in the mind;
Why bother seeking mysteries outside?
Hearing my explanation, practice on this basis,
And the Heaven is right before your eyes.

This verse not only denies the existence of the extrinsic mystical powers, but also denies the existence of so-called Heaven and Hell, believing that one should live in the real life ordinarily and responsibly, and by means of one's own Buddha nature (immanent essential nature) in the life here and now can one become a Buddha. It is just as Da Hui(1089-1163) said: "Dharma of secular world is Buddha

Dharma and vice versa" (*Da Hui Pu Jue Chan Shi Yu Lu*, Vol. 27).

It is recorded in *Wu Deng Hui Yuan*: Tian Ran (739-824) "met a bitter cold weather when visiting Hui Lin Temple, so he burned a wood Buddha statue for warmth. The head of the temple bawled him out: 'Why did you burn my wood Buddha?' Tian Ran prodded the ashes with his staff and said humorously: 'I am looking for *sharira* (relics) by burning it.' The head retorted: 'How can a wood Buddha statue have *sharira* (relics)?' Tian Ran laughed: 'Now that it doesn't have *sharira* (relics), take two more statues and burn them'" (Vol. 5). A wood Buddha statue is an image, how could it have Buddha *sharira* (relics)? Burning a wood Buddha is only burning a wood-made statue. The denial of the image in his mind is the realization that "my mind inherently has a Buddha in it; and the inner Buddha is the real Buddha." Lin Ji climbed up into the loft of Xiong-er Tower, and the guard of the tower asked him: "Do you prostrate yourself first before the Buddhas or first before the masters?" Lin Ji said: "Neither of them" (*Jing De Chuan Deng Lu*, Vol. 12). Chan masters paid no respect to the Buddhas and masters at all and even abused the Buddhas and berated the masters. De Shan said: "There are neither Buddhas nor masters down here. Bodhidharma is an old foul foreigner, Shakyamuni Buddha is a pile of dried dung, and Bodhisattva Manjusri and Samantabhadra are men who carry the dung" (*Wu Deng Hui Yuan*, Vol. 7). As Chan Buddhism sees, everyone is originally a Buddha himself, and elsewhere can a Buddha be found? What are abused and berated are nothing but the images in one's mind, the worship of which would certainly obstruct the development of one's essential nature. It is recorded in *Jing De Chuan Deng Lu*: "Someone asked Huai Hai (720-814): 'What is Buddha?' Huai Hai retorted: 'Who are *you*?'" (Vol. 7). In the same book, it is also recorded: "Ling Xun just came to study with Gui Zong, and asked Gui Zong: 'What is Buddha?' . . . Gui Zong said: 'Just *you* are'" (Vol. 11). Everyone by himself is a Buddha. How can one ask "what is Buddha"? By asking "what is Buddha," one is searching Buddha outside of one's mind. Nevertheless, one should not

attach to this idea of becoming a Buddha. Huang Bo said: "If you will conceive of a Buddha, you will be obstructed by that Buddha!" (*Wan Ling Lu* [*Recorded Sayings in Wan Ling*]). If one bears the idea of becoming a Buddha in one's mind constantly, one cannot live naturally and obstructs himself from becoming a Buddha by this searching. A monk asked Dong Shan when he was weighing some flax: "What is Buddha?" Dong Shan said: "This flax weighs three pounds" (*Wu Deng Hui Yuan*, Vol. 15). A monk asked Ma Zu: "What is the intention of Bodhidharma to come to China?" Ma Zu struck him and said: "If I don't strike you, those who know would laugh at me" (*Jing De Chuan Deng Lu*, Vol. 6). Dong Shan gave a reply far from the mark in order to break down the attachment of becoming a Buddha, and Ma Zu even tried to prevent the searching of extrinsic Buddhist Dharma, because as Ma Zu saw, "you all should believe that your essential mind is the Buddha, and right this mind is the mind of Buddha" (*Ibid.*). This is the essential spirit of Chan Buddhism, as it is said in *Platform Sutra*: "Buddhahood is actualized within your own nature; do not seek it outside the body. If your own nature is confused, a Buddha is an ordinary person; if your own nature is awakened, every ordinary person is a Buddha."

As discussed above, we can see that the central thoughts or fundamental subject of Chinese Chan Buddhism is "witnessing the mind and seeing the nature" and "seeing the nature and becoming a Buddha." The fundamental concepts used in *Platform Sutra* are "mind" and "nature." "Mind" is also called "one's own mind" (*zi-xin*), "the essential mind" (*ben-xin*), "one's own essential mind" (*zi-ben-xin*), etc.; "nature" is also called "one's own nature" (*zi-xing*), "the essential nature" (*ben-xing*), "the Dharma nature" (*fa-xing*), "one's own Dharma nature" (*zi-fa-xing*), etc. "Mind" and "nature" have quite similar meaning and both refer to the subjective in everyone's immanent life. They are originally pure and empty, but transcend the phenomenal world. At the same time their activities can appear as all kinds of different things. As *Platform Sutra* says: "The extent of mind is vast as

space. . . the emptiness of physical space contains the colors and forms of myriad things, the sun, the moon, and stars, the mountains, oceans, rivers, and lands, the springs and valley streams, the grasses, trees, and forests, bad people and good people, bad things and good things, Heaven and Hell—all are within space. The emptiness of the essential nature of people in the world is also like this." It also says: "The essential nature of human beings is originally pure. All things come from the essential nature; when you think about all evil things, it produces bad behaviors; when you think about all good things, it produces good behaviors. Thus all things are in your own nature, and your own nature is always clear." Good and bad, Heaven and Hell, the mountains, rivers, and lands, the grasses, trees, insects and fishes, and so on—all are realized from your own nature by means of "thinking" (*si-liang*) function of "the mind." The appearance of everything cannot deviate from "one's own nature," just as everything is within space. If one's "mind" is confused, one cannot see "one's own nature," hence only an ordinary person; if one's mind is always clear, one "sees the nature" and becomes Buddha or Bodhisattva. It is said in *Platform Sutra*: "My mind inherently has a Buddha in it; and the inner Buddha is the real Buddha. If there were no Buddha-mind, where would we look for the real Buddha?"

As Chan Buddhism sees, one's own nature (or one's own mind) is originally a vast space without anything, and it is not a deathly stillness but rather it can "think" and everything comes from this "thinking." If this activity of "thinking" goes without any trace, it lays no influence on one's "own nature" and one's own nature can always stay in the clear state. "One's own nature always clear" is just like the sun and the moon always shining, only that sometimes it's covered by clouds and appears dim when seen from the ground, since one cannot see the original face of the sun and the moon. If a sudden wind of wisdom (the instruction and inspiration of a good knowing adviser) blows off the clouds or mists, the always shining sun and moon would appear naturally. It is said in *Platform Sutra*: "The nature of worldly

people is always drifting, like the clouds in the sky. Wisdom is like the sun, insight is like the moon: knowledge and insight are always light, but when you fixate on objects outside, you get your own essential nature covered by the drifting clouds of errant thoughts, so you cannot have light and clarity. If you meet a spiritual benefactor and hear truly authentic teaching, you'll get rid of confusion so that inside and outside are thoroughly clear, and myriad things appear within your own essential nature." A good knowing adviser can only provide some inspirations. Whether one can be enlightened or not counts on oneself. "What is meant by liberating yourself through your own essential nature? That means the beings in false views, afflictions and ignorance are liberated by accurate insight. Once you have accurate insight, you get the *Prajñā* (wisdom) to break through the beings in folly and delusion, so each one is self-liberated" (*Platform Sutra*).

The phrase "Buddha nature" appeared only a few times in Dun Huang edition of *Platform Sutra*, but many times in Zong Bao edition. "Buddha nature" mentioned in two places of *Platform Sutra* is quite important: one is the verse Hui Neng composed when he studied with his master, "Buddha nature is always clear"; another is when Hui Neng answered the question of Governor Wei, he said "building temples, charity, sustaining, etc. . . haven't any virtue actually," and "virtue lies in *dharmakaya* (truth body), not in field of merit; one's own Dharma nature is the inside virtue and honesty is the outside virtue. While one sees the Buddha nature inside, one will naturally hold in reverence outside." The first place shows that the essence of "Buddha nature" that has the same quality as "one's own nature" is "always clear," hence "Buddha nature" is "one's own nature," which is the essential nature of human being and the subjective in everyone's immanent life. The second place shows that "Buddha nature" is "one's own Dharma nature" which is also the immanent essence in everyone. Based on the ideas above, Chan Buddhism established its theory of "witnessing the mind and seeing the nature" and "seeing the nature and becoming a Buddha." "Witnessing the mind and seeing the nature" tells that if one

can realize one's own essential mind, "one's own nature is always clear"; attaining "one's own nature always clear" means the revelation of the immanent essential nature as the transcendental Buddha nature. Hence it is true that "witnessing the mind and seeing the nature, attaining the Way of Buddhahood by oneself" lie in "the wisdom is accomplished when enlightening."

In that case how can one "witness the mind and see the nature"? Chan Buddhism pointed out a direct and simple practicing method that they established, that is, "freedom from thought as the source, freedom from form as the substance, and freedom from fixation as the basis." It is said in *Platform Sutra*:

Since time immemorial this school of ours has first established freedom from thought as the source, freedom from form as the substance, and freedom from fixation as the basis. Freedom from form means detachment from forms in the midst of forms. Freedom from thought means having no thought in the midst of thoughts. As for freedom from fixation, while the basic nature of humanity is in the midst of the world, with good and bad, beauty and ugliness, enmity and familiarity, words and speech, offense and attack, deception and contention, one considers it all empty and does not think of retaliation, not thinking about the objects in the surroundings. If thought after thought, previous, present, and subsequent thoughts, go on uninterrupted, this is called bondage. When thought after thought does not dwell on things, then there is no bondage. Thus freedom from fixation is basic.

"Freedom from form" means no attachment to any phenomenon(detachment from form), because ordinary people always attach the phenomena as the substance. For example, one may think that by sitting in meditation one can become a Buddha, which is certainly attached to sitting in meditation; one may think that by worshiping Buddhas one can become a Buddha which is certainly attached to the worshiping of Buddhas; all these are "taking form and attaching to it." "Taking form and attaching to it" can obstruct one's own nature just as the clouds and mists can cover the bright empty sky. When one "detaches from appearances while in the midst of

appearances," one can suddenly see the original clearness of the body of nature, just as the clouds and mists are blew off and the bright clean empty space is revealed. Therefore, freedom from form not only means no attachment to any phenomenon, but also means detachment to appearances and revelation of "one's own nature always clear." It is said in *Platform Sutra*: "If you can be detached from forms and appearances, then the substance of nature is pure. Thus freedom from form is the substance." "Freedom from fixation" means one's own nature originally has no fixation thought by thought, that is, the previous, present, and subsequent thoughts are consecutive, and if once dwelling on one object, it is not going on uninterrupted but fixing on every single thought, hence "the mind" is "bound." "When the mind does not dwell on things, the mind is fluid. If the mind dwells on things, the mind is bound" (*Platform Sutra*). If the mind is not dwelling on anything, once a thing has gone, it has gone and left no trace. It is like a wild goose flying across the vast sky leaving no trace at all; and also like a white screen on which a movie is projected for viewing, once the movie ends, nothing is left on the screen. Only by this can one not be bound, hence one should regard "freedom from fixation as the basis." "Freedom from thought" does not mean "not thinking of anything at all, and get rid of all thoughts entirely"(Ibid.), but when getting in touch with objects the mind is not affected by the external objects, that is, "the mind does not arouse over objects"(Ibid.). "Thought" is the function of the mind, and what the mind faces is the external objects. Ordinary people's thoughts arouse over the external objects. If the objects are nice, thoughts arouse over them and cling to them; on the contrary, thoughts again arouse and get angry. Therefore, the "thoughts" of ordinary people just arouse along with the objects and move in accordance with the objects, and the "thoughts" of this kind are "erroneous thoughts," always driven by the objects without freedom. "When the mind is not influenced by objects" (Ibid.), one could not be disturbed by the external world. Although one lives in the secular world, one is still not defiled and contaminated but

comes and goes at ease, always has one's own clear nature and attains the Buddhahood by oneself. "Freedom from form," "freedom from fixation" and "freedom from thought" discussed above are the functions of "the only mind," and the difference between the ignorant and the awakened just lies in one thought, hence attaining the Buddhahood should rely on the sudden enlightenment.

According to the discussions above, we may conclude as follows:

First, the reason why Chinese Chan Buddhism belongs to Chinese traditional thoughts, distinguishable from Indian Buddhism lies in its "immanent transcendence," which is also the characteristic of Chinese Confucian and Taoist philosophy. The reason why it could deeply influence Neo-Confucianism of Song (960-1279) and Ming (1368-1644) dynasties (especially Universal Mind School of Lu-Wang) also lies in the "immanent transcendence" of its thought. If it can be said that the quest of Confucian thought with the characteristic of "immanent transcendence" is a morally ideal personality which transcends "the self" and becomes "a saint," and the quest of Taoist philosophy with the characteristic of "immanent transcendence" is the spiritually absolute freedom which transcends "the self" and becomes "an immortal," then the quest of Chinese Chan Buddhism with the characteristic of "immanent transcendence" is a mystical state in momentary eternity which transcends "the self" and becomes "a Buddha." On this point, Chan Buddhism still has some smack of religion.

Second, although Chan Buddhism still has some smack of religion, by virtue of its releasing all extrinsic bondage such as chanting scriptures, sitting in meditation, worshiping Buddha, it is bound to contain the implication of denying itself as a religion. That is to say, the secularization of Chan Buddhism makes it an unreligious religion that has exerted profound influence on China, and it leads people to realize the purpose of transcending the reality in the real life by denying the supernatural concepts of Heaven and Hell, suggesting the secular spirit of "Dharma of secular world is Buddha Dharma and vice

versa."

Third, as a religion, Chan Buddhism not only breaks all rules of traditional Buddhism, but also believes that it relies not on extrinsic power but rather the immanent self-awareness of Chan masters themselves to attain the Buddhahood. Therefore, it transforms a religion with the characteristic of "extrinsic transcendence" into an unreligious religion with the characteristic of "immanent transcendence," turns the direction from renouncing the world to going into the world, and hence avoids the inclination of duality. Whether or not this transformation means Chan Buddhism has some inclination to get out of traditional religious mode? If this can be deduced, certainly it would be significant to study the history of Chan Buddhism for investigating the religions in real social life.

Fourth, it is said there was a tradition strongly imprisoning the mind of people in China, and then can we say that there were still some resources to be appealed to for breaking everything imprisoning the mind of people? If there were such resources, Chan Buddhism must be an important one of them. Chan Buddhism denies all extrinsic bondages, breaks all attachments, removes the traditional and realistic authority, and lets everything listen to the essential mind; it is in this sense that one can be the master of oneself. This open-mindedness is very valuable in the feudal despotic society in China and deserves our attention. Of course, Chan Buddhism thereby built the authority centered by the immanent subjective of the "self" and made up the infinite transcendental power of the "self," whereby one could again be bound by the immanent subjective of the "self." This probably is an inextricable paradox to Chan Buddhism.

Fifth, the ideological system of Chan Buddhism with the characteristic of "immanent transcendence" is of obvious subjectivism, and inevitably leads to the denial of any objective criterion and validity, which is a disadvantage to the investigation of the extrinsic world and establishment of objective valid social system and legal order, and has defects in the investigation of ultimate care of the

universe and human life. Therefore, we may suggest: is it possible to build a better philosophical system which contains the thought with the characteristic of "immanent transcendence" and the thought with the characteristic of "extrinsic transcendence"? I think this issue deserves due attention in the development of Chinese philosophy.

Sixth, if it is possible to build a Chinese philosophical system which contains the thoughts of both "immanent transcendence" and "extrinsic transcendence," then is it possible to find the resources within Chinese traditional philosophy itself? I think Chinese traditional philosophy has this kind of resources. There are two aspects in the thought of Confucius: on the one hand, he advocated the idea "human-heartedness is something that must have its source in oneself" (*Analects*, 12.1) and "it is man that can make the Way great, and not the Way that can make man great" (*Analects*, 15.29) which can be considered as the aspect of "immanent transcendence"; on the other hand, he insisted that one should "fear the will of Heaven, fear great men, and fear the word of the sages" (*Analects*, 16.8), which can be considered as the aspect of "extrinsic transcendence" or at least a suggestion of it. Later Confucianism has developed the former aspect while leaving the later one undeveloped at all. Is it possible to build a Chinese philosophical system which contains the thoughts of both "immanent transcendence" and "extrinsic transcendence" from the direction of Confucius by developing and combining both aspects of Confucius' thoughts? In my opinion, it is an issue that deserves our study. Born shortly later than Confucius, there was another philosopher Mo Zi, whose philosophy features "extrinsic transcendence." Mo Zi's philosophy includes two interrelated parts: "all-embracing love" being humanistic and "the will of Heaven" being religious. It seems that there is a little bit of contradiction between the two parts, but actually "all-embracing love" is the fundamental principle of "the will of Heaven," therefore "the will of Heaven" is the kernel of Mo Zi's thoughts. Mo Zi's "the will of Heaven" means "Heaven" has wills which are the supreme and ultimate standard to

judge everything, can reward the good and punish the bad, and are the transcendental power outside of human or, we may say, are of obvious "extrinsic transcendence." Therefore, the later Mohist School suggested a scientific view and had the thought of logic and epistemology, but it is a pity that these thoughts were left undeveloped after the Warring States (403-221 BC) in China. Is it possible to use Mohist thought as resources to build a Chinese philosophical system which contains the thoughts of both "immanent transcendence" and "extrinsic transcendence"? I think it is also an issue we can study.

肆 论禅宗思想中的内在性与超越性*

佛教传入中国至隋唐分为若干宗派：天台、唯识、律、净土、华严、禅等等。至唐以后，其他宗派均先后衰落，而禅宗的影响越来越大，终至独秀，究其原因或有许多方面，但就禅宗更能体现中国哲学以“内在超越”为特征这点说，似应为研究者所注意。

佛教作为一种宗教自有其宣扬教义的经典、一套固定的仪式、必须遵守的戒律和礼拜的对象等等，但自慧能以后的中国禅宗把上述一切都抛弃了，既不要念经，也不要持戒，没有什么仪式需要遵守，更不要去礼拜什么偶像，甚至连出家也成为没有必要的了，成佛达到涅槃境界只能靠自己一心的觉悟，即所谓“一念觉，即佛；一念迷，即众生。”这就是说，人成佛达到超越的境界完全在其内在本心的作用。

一、中国禅宗不重经典、不立文字，一切自任本心

中国禅宗有一个公案——“释迦拈花，迦叶微笑”的故事，据《指月录》载：

“世尊在灵山会上，拈花示众。是时众皆默然，唯迦叶尊者，破颜微笑。世尊曰：吾有正法眼藏，涅槃妙心，实相无相，微妙法门，不立文字，教外别传，付嘱摩诃迦叶。”

禅宗自称其宗门为“教外别传”，即依此类故事以说明他们和佛教其他宗派的不同。印度佛教开始在释迦牟尼时也是比较简单，本是一种人生哲学，对一些与人生实际无关的理论往往避而不论，如当时印度讨论的“宇宙是常还是无常”“宇宙有边还是无边”“生命死后是有还是无”“生命与身体是一还是异”等等，均少论及。但印度佛教在发展过程中越来越繁琐，越来越远离实际人生，体系越来越庞大，礼拜的对象越来越多，名词概念多如牛毛，这与中国传统思想全然不相合。到隋唐以后，中国的

一些佛教宗派都已在想方设法克服印度佛教的这种繁琐，例如天台宗纳三千于一念，华严宗融理事于真心，都强调人的本心的作用，这一趋势到禅宗慧能以后更是变本加厉了，而有不立文字，废除经典之说。

慧能本人还没有简单地否定经典和倡导不立文字，据《坛经》记载，慧能尝为门人说《金刚经》《法华经》，但他认为“一切经书，因人有说”，只是引导人们的工具，不能执着经典，不能靠诵读经典成佛，解脱只能靠自己的本心。这是因为：一方面，成佛得解脱的道理和路径本来就在你自己的本心之中，“三世诸佛，十二部经，亦在人性中本自具有”（《坛经》），不必外求，不必到心外觅佛，成佛的觉悟全在自己，外在的文字是没有用处的。另一方面，文字是一种外在的东西，如果执着了外在的东西就是“着相”，“本性自有般若之智，自用智慧观照，不假文字。”²慧能以后的禅宗大师破除经典的束缚，干脆反对念经，反对一切语言文字。汾山灵佑问仰山慧寂：“《涅槃经》四十卷，多少是佛说？多少是魔说？”仰山回答说：“总是魔说。”³如果把佛经持着为佛法本身，这本身就是着了魔，为魔所蒙蔽，所以《古尊宿语录》中说：“只如今作佛见，作佛解，但有所见所求所著，尽是戏论之类，亦名粗言，亦名死语”（卷二）。《景德传灯录》（卷十二）中记义玄“因半夏上黄檗山，见和尚看经。曰：我将谓是个人，元来是庵黑豆老和尚。”一切经典全是废话，执着这些废话，人如何得以解脱，如何得以成佛？既然佛教经典为“死语”“魔说”，非悟道的工具，那么自然不能靠它来达到成佛的目的。《古尊宿语录》中说：“（南）泉（普愿）云：道不属知不知，知是妄觉，不知是无记，若真达不疑之道，犹如太虚，廓然荡豁，岂可强是非也”（卷十三）。道不属知识，知识有主体和对象即有分别心，悟道在心之自觉；悟道既在自觉，自不能是不自觉的，如为不自觉，即是“无明”，故“不知是无记”。

禅宗的大师们不仅认为文字不必要，就是语言对得道成佛也是无益的。语言并不能使人了解佛法，有问文益禅师：“如何是第一义？”文益回答说：“我向汝道，是第二义。”⁴佛法是不可说的，说出的已非佛法本身。那么用什么方法引导人们觉悟呢？照禅宗看，几乎没有什么方法使人悟道，只能靠自己的觉悟。不过禅宗也常用一些特殊的方法，如棒喝之类。《五灯会元》卷七《德山宣鉴禅师》中载：

“僧问：如何是菩提？师打曰：出去，莫向这里屙。问：如何是佛？师曰：佛

是西天老比丘。雪峰问：从上宗来，学人还有分别也无？师打一棒曰：道什么？曰：不会。至明日请益，师曰：我宗无语句，实无一法与人。峰因此有省。”

《景德传灯录》卷十二载：“（临济义玄）见径山，径山方举头，师便喝；径山拟开口，师拂袖便行。”

这就是所谓“德山棒，临济喝”。这种方法是破除执着的特殊方法，目的是要打断人们的执着，一任自心。照禅宗看，人们常因有所执着而迷失本性，必须对之大喝一声，当头一棒，使之幡然觉悟，自证佛道，故佛果禅师说：“德山棒，临济喝，并是透顶透顶，直捷剪断葛藤，大权大用，千差万别，会归一源，可以与人解粘去缚。”⁶义玄的老师在其《传法心要》中说：

“此灵觉性……不可以智识解，不可以语言取，不可以景物会，不可以功用到，诸佛菩萨与一切蠢动众生同大涅槃，性即是心，心即是佛，佛即是法。”⁷

人所具有的这一灵觉性，既然不是能用知识、语言等使之得到发挥，那只能用一棒一喝（当然不一定必须用棒喝，其他任何方法都可以，只要能打断执着即可）打破执着，使心默然无对，而达到心境两忘的超越境界。

二、中国禅宗破去陈规，废去坐禅，唯论见性成佛

坐禅本是原来佛教一切派别所必需的一种修持法门，释迦牟尼在菩提树下证道，一坐四十九天；达摩东来，仍有三年面壁，都是坐禅。但到慧能以后，中国禅宗起了很大变化，《坛经》记载慧能说：“惟论见性，不论禅定解脱。”盖慧能主张“见性成佛”，认为靠禅定并不能得到解脱，所以他说：

“迷人著法相，执一行三昧，直言坐不动，除妄心不起，即是一行三昧。若如是，此法同无情，却是障道因缘，道须通流，何以却滞？心不住法即通流，住即被缚，若坐不动是，维摩诘不合呵舍利弗宴坐林中。”⁸

执着坐禅，以为可以妄心不起，这实是把人看成如同死物，而不知“道须通流”，心不能住而不动，住而不动就是心被束缚住了，那怎么

能得到解脱呢？《古尊宿语录》卷一记马祖道一“居南岳传法院，独处一庵，惟习坐禅，凡有来访者都不顾，……（怀让）一日将砖于庵前磨，马祖亦不顾，时既久，乃问曰：作什么？师云：磨作镜。马祖云：磨砖岂能成镜？师云：磨砖既不能成镜，坐禅岂能成佛？”马祖坐禅，被坐禅所束缚，怀让用“磨砖作镜”这种比喻的方法启发他使之觉悟，这叫作依他人之“解缚”。又有长庆慧稜禅师，二十余年来坐破了七个蒲团，仍然未能见性，直到有一天，偶然卷帘时，才忽然大悟，便作颂说：“也大差，也大差，卷起帘来见天下，有人问我解何宗，拈起拂子劈头打。”⁹慧稜偶然卷帘见得三千大千世界原来如此，而得“识心见性”，解去坐禅的束缚，靠自己豁然贯通，而觉悟了。《坛经》中说：“不能自悟，须得善知识示道见性；若自悟者，不假外善知识。”道一是靠怀让的启发，而慧稜是靠自悟，但无论前者还是后者都必须“识自心内善知识”，也就是说必须靠自己的内在本心才可以达到超越境界。慧稜颂中“卷起帘来见天下”是他悟道的关键，因照禅宗看，悟道成佛不要去故意作着，要在平常生活中自然见道，就像“云在青天水在瓶”那样，自自然然，平平常常。无门和尚有颂说：

“春有百花秋有月，夏有凉风冬有雪，
若无闲事挂心头，便是人间好时节。”

禅宗的这种精神境界正是一种顺乎自然的境界：春天看百花开放，秋天赏月色美景，夏天享凉风暂至，冬天观大雪纷飞，一切听其自然，自在无碍，便“日日是好日”“夜夜是良宵”。如果执着坐禅，那就是为自己所运用的方法所障，而不得解脱。临济义玄说：“佛法无用功处，只是平常无事，屙屎送尿，着衣吃饭，困来即卧，愚人笑我，智乃知焉。”¹⁰要成佛达到涅槃境界，不是靠那些外在的修行，而是得如慧稜那样忽然顿悟。有僧问马祖：“如何修道？”马祖说：“道不属修，言修得，修成还坏。”¹¹道如何能修得，靠所谓“修”就是要勉强自己，这种不自然的做法，当然会“修成还坏”。所以修道不能在平常生活之外去刻意追求。有源律师问大珠慧海禅师：“和尚修道还用功否？”慧海说：“用功。”源律师问：“如何用功？”慧海回答说：“饥来吃饭，困来即眠。”源律师又问：“一切人总如是，同师用功否？”慧海说：“不同。”源律师问：“如何不同？”慧海说：“他吃饭时，不肯吃饭，百般须索；睡时不肯睡，百般

计较，所以不同也。”¹²平常人吃饭，挑肥拣瘦；睡觉胡思乱想，自是有所取舍、执着，不得解脱。真正懂得禅的人“要眠即眠，要坐即坐”“热即取凉，寒即向火”。有僧问赵州从谏：“学人乍入丛林，乞师指示。”从谏说：“吃饭也未？”僧曰：“吃粥了也。”从谏说：“洗钵去。”其僧因此大悟。¹³吃过饭自然应洗碗，这是平平常常的，唯有如此，才能坐亦禅，卧亦禅，静亦禅，动亦禅，吃饭拉屎，莫非妙道。禅定既非必要，一切戒律更不必修持了，陆希声问仰山：“和尚还持戒否？”仰山说：“不持戒。”¹⁴李翱问药山：“如何是戒定慧？”药山说：“这里无此闲家俱。”¹⁵戒定慧本是佛教“三学”，学佛者必须之门径，但照禅宗大师看这些都是无用的东西。禅宗的这一否定，似乎所有的修持方法全无必要，从而把一切外在的形式的东西都否定了。禅宗如是看是基于“平常心是道心”，在平常心外再无什么“道心”，在平常生活外再不须有什么特殊的生活。如有此觉悟，内在的平常心即可成为超越的道心，正如印顺法师的《中国禅宗史》中所说：“性是超越的（离一切相，性体清净），又是内在的（一切法不异于此），从当前一切而悟入超越的，还要不异一切，圆悟一切无非性之妙用。这才能入能出，有体有用，事理如一，脚跟落地。”¹⁷

三、中国禅宗不拜偶像，呵佛骂祖，一念悟即成佛

印度文化中颇多神秘主义色彩，印度佛教也不能不受印度传统文化这种神秘主义影响，特别是释迦牟尼以后更是如此。例如在佛教中有所谓二十八重天，十八层地狱，每个层次又有无数天堂和地狱，以及众多的具有超自然伟力的佛和菩萨，这些当然都是受印度传统文化的影响而有。即使是比较平实的“教外别传”的印度禅也有不少神秘色彩，传说印度禅的二十八祖都有所谓六神通：天耳通、天眼通、他心通、宿命通、神足通、漏尽通等。就是印度禅修行的四种境界“四禅天”也颇具神秘性。而中国禅自慧能以后却不如此。慧能说：“我心自有佛，自佛是真佛。”基于此，禅宗反对神通和偶像崇拜。《五灯会元》卷十三载，有云居道膺禅师“结庐于三峰，经旬不赴堂。洞山（良价）问：子近日何不赴斋？师曰：每日自有天神送食。山曰：我将谓汝是个人，犹作这个见解在。汝晚间来。师晚至。山召：膺庵主。师应诺。山曰：不思善，不思恶，是什么？师回庵，寂然宴坐，天神自此觅寻不见，如是三日乃绝”。

良价批评道膺的基本点，就在于道膺是个人怎么会相信那些神秘的神通呢？“不思善，不思恶”是什么意思？这正是慧能叫人不执着那些自己想象出来的莫须有的东西。《禅宗传》载：“明上坐向六祖求法。六祖云：汝暂时敛欲念，善恶都莫思量。明上坐乃禀言。六祖云：不思善，不思恶，正当与时么，还我明上坐父母未生时面目。明上坐于言下，忽然默契，便拜云：如人饮水，冷暖自知。”所谓“天神送食”只是道膺的幻想，当他一旦觉悟，幻想尽除，再无天神可寻觅了。人本来应是人，有人之本来面目，一切全靠自己觉悟，根本不需要外在的超越力量的帮助。契嵩本《坛经》有《无相颂》：

心平何劳持戒，行直何用修禅，
恩则孝养父母，义则上下相怜。
让则尊卑和睦，忍则众恶无喧，
若能钻木出火，淤泥定生红莲。
苦口的是良药，逆耳必是忠言，
改过必生智慧，护短心内非贤。
日用常行饶益，成道非由施钱，
菩提只向心觅，何劳向外求玄。
听说依此修行，天堂只在目前。

这首颂不仅否定了外在的神秘力量的存在，而且否定了所谓的天堂和地狱的存在，认为人们只是要在现实生活中平平常常地尽职尽责地生活，在眼前生活中靠自己所具有的佛性（即内在的本性）即可以成禅。宗杲大慧禅师说：“世间法则佛法，佛法则世间法。”

《五灯会元》卷五载：天然禅师“于慧林寺遇天大寒，取木佛烧火向，院主呵曰：何得烧我木佛。师以杖子拨灰曰：吾烧取舍利。主曰：木佛何有舍利？师曰：既无舍利，更取两尊烧。”木佛本是偶像，哪会有佛舍利，烧木佛无非烧木制之像而已，否定了自己心中的偶像，正是对“我心自有佛，自佛是真佛”的体证。临济义玄到熊耳塔头，塔主问：“先礼佛，先礼祖？”义玄曰：“佛祖俱不礼。”¹⁸禅宗对佛祖不仅全无敬意，还可以呵佛骂祖。德山宣鉴说：“这里无佛无祖，达摩是老臊胡，释迦老子是干屎橛，文殊普贤是担屎汉。”¹⁹照禅宗看，自己本来就是佛，哪里另外还有佛？他们所呵所骂的无非是人们心中的偶像，对偶像的崇拜只能障碍其自性的发挥。《景德传灯录》卷七载：“问：如何是佛？师云：他是阿谁？”卷十一载：“灵训禅师初参归宗，问：如何是

佛？……宗曰：即汝便是。”每个人自己就是佛，哪能问“如何是佛”，问“如何是佛”就是向心外求佛了。而且对自身成佛也不能执着不放，黄檗说：“才思作佛，便被佛障。”一个人念念不忘要成佛，那就不能自自然然地生活，而有所求，这样反而成为成佛的障碍。有僧问洞山良价：“如何是佛？”答曰：“麻三斤。”²⁰或问马祖：“如何是西来意？师便打，曰：我若不打汝，诸方笑我。”²¹良价所答非所问，目的是要打破对佛的执着；马祖更是要打断对外在佛法的追求，因为照马祖看：“汝等诸人，各信自心是佛，此心即是佛心。”²²这正是禅宗的基本精神，正如《坛经》中说：“佛是自性作，莫向身外求。自性迷，佛即众生；自性悟，众生即佛。”

据以上所述，可知中国禅宗的中心思想或基本命题是“识心见性”“见性成佛”。在《坛经》中应用的基本概念是“心”和“性”。“心”或叫“自心”“本心”“自本心”等；“性”或叫“自性”“本性”“法性”“自法性”等。“心”和“性”大体是一个意思，都是指每个人的内在生命的主体，它本来清净、空寂，又是超越于现象界的，但它的活动可变现为种种不同的事物，如《坛经》说：“心量广大，犹如虚空，……虚空能含日月星辰，大地山河，一切草木，恶人善人，恶法善法，天堂地狱，尽在空中，世人性空，亦复如是。”又说：“世人性本自净，万法在自性，思量一切恶事，即行于恶；思量一切善事，便修于善行。知如是一切法尽在自性，自性常清净。”善与恶，天堂与地狱，山河大地，草木虫鱼等等都是因“心”之“思量”作用而从自性中变现出来的。一切事物的出现，都不能离开“自性”，就像万物在虚空中一样。如果人的“心”迷误了，就不能见自性，只能是凡夫俗子；如果人的自心常清净，就是“见性”，则是佛菩萨。《坛经》说：“我心自有佛，自佛是真佛；自若无佛心，向何处求佛。”

照禅宗看，人的自性（或本心）本来是广大虚空一无所有，但它并不是死寂的，而是能“思量”的，一切事物皆由“思量”出。如果这些“思量”活动一过不留，那么对自己的“自性”就无任何影响，则自性常处于清净状态。“自性常清净”，就好像日日常明一样，只是有时为云覆盖，在上面的日月虽明，但在下面看到的则是一片昏暗，致使看不到日月的本来面目。如果能遇到惠风（按：指大善知识的指点和启发）把云雾吹散卷尽，那么常明之日月等等自然显现。《坛经》中说：“世人性净，犹如青天，惠如日，智如月，智慧常明。于外著境，妄念浮云盖覆，自性不

明，故遇善知识开真法，吹却迷妄，内外明彻，于自性中，万法皆见。”善知识只能对人们有启发作用，觉悟不觉悟还在自己。“自有本觉性，将正见度，般若之智，除却愚痴迷妄，各自自度。”²³

敦煌本《坛经》“佛性”一词很少见，但元宗宝本“佛性”则多见。

《坛经》有两处说到“佛性”较重要：一是慧能在黄梅五祖处所作的偈：“佛性常清净”；另一处是答韦使君问，说“造寺、布施、供养”等“实无功德”时说：“功德在法身，非在福田；自法性有功德，平直是德。内见佛性，外行恭敬。”前一条说明“佛性”的本质是“常清净”，这与“自性”一样，所以所谓“佛性”即“自性”，亦即为人之本性，它是每个人的内在生命的主体。后一条说明“佛性”即“自法性”，而为人之内在本质。基于此，禅宗即可立其“识心见性”、“见性成佛”的理论。“识心见性”是说，如对自己的本心有所认识就可见到“自性常清净”；得其“自性常清净”就是使其内在的本性显现为超越的佛性，“识心见性，自成佛道”²⁴，这一切皆在“悟即成智”也。

那么人如何能“识心见性”？禅宗指出了一条直接简单的修行法门，这就是他们所立的“无念为宗，无相为体，无住为本”的法门。《坛经》中说：

“我此法门，从上以来，顿渐皆立无念为宗，无相为体，无住为本。何名无相？无相者，于相而离相。无念者，于念而不念。无住者，为人本性，念念不住，前念、今念、后念，念念相续，无有断绝；若一念断绝，法身即离色身，念念时中，于一切法上无住，一念若住，念念即住，名系缚；于一切法上，念念不住，即无缚也。此是以无住为本。”

“无相”是说，对于一切现象不要去执着（离相），因为一般人往往执着现象以为实体，如以坐禅可以成佛，那就是对于坐禅有所执着；如以拜佛可以成佛，那就是对拜佛有所执着，这都是“取相着相”。“取相着相”障碍自性，如云雾覆盖明净的虚空一样。如能“于相离相”则可顿见性体的本来清净，就像云雾扫除干净而现明净虚空。所以无相不仅仅是不要执着一切现象，而且因离相而显“自性常清净”，《坛经》说：“但能离相，性体清净，是以无相为体。”所谓“无住”是说，人的自性本来是念念不住的，前念、今念、后念是相续不断的，如果一旦停留在某一物上，那么就不能是念念不住而是念念即住了，这样“心”就被“系缚”住了，“心不住法即通流，住即被缚”。如能对一切事物念念不住，过而不留，如雁

过长空，不留痕迹，放过电影，一无所有，这样就不会被系缚，“是以无住为本”。“无念”不是“百物不思，念尽除却”，不是对任何事物都不想，而是在接触事物时，心不受外境的任何影响，“不于境上生心”。“念”是心的作用，心所对的是境（外境，即种种事物），一般人在境上起念，如境美好，那么就在境上起念，而有贪；如境不好，那么就在境上起念，而有嗔。因此一般人的“念”是依境而起，随境变迁，这样的“念”是“妄念”，经常为境所役使，而不得自在。如果能“于诸境上心不染”，这样就可以不受外境干扰，虽处尘世，却可无染无杂，来去自由，自性常清静，自成佛道。以上所论“无相”“无住”“无念”实均一心的作用，且迷与悟均在一念之间，故成佛道当靠顿悟。

据以上所说，我们或可得出以下结论：

1．中国禅宗之所以是中国的思想传统而区别于印度佛教，正因其和中国的儒家和道家哲学一样也是以“内在超越”为特征。它之所以深深影响宋明理学（特别是陆王心学），正在于其思想的“内在超越性”。如果说以“内在超越”为特征的儒家学说所追求的是道德上的理想人格超越“自我”而成“圣”，以“内在超越”为特征的道家哲学所追求的则是精神上的绝对自由，超越“自我”而成“仙”，那么，以“内在超越”为特征的中国禅宗则是追求一种瞬间永恒的神秘境界，超越“自我”而成“佛”，就这点说，禅宗仍具有某种宗教的形式。

2．禅宗虽然仍具有某种宗教的形式，但由于它要求破除念经、坐禅、拜佛等一切外在的束缚，这样势必又包含着否定其作为宗教本身的意义。这就是说，禅宗的世俗化使之成为一种非宗教的宗教在中国发生影响，它把人们引向在现实生活中实现超越现实的目的，否定了在现实世界之外与之对立的天堂与地狱，表现出“世间法则佛法，佛法则世间法”的世俗精神。

3．禅宗作为一种宗教，它不仅破除一切传统佛教的规矩，而且认为在日常生活中不靠外力，只靠禅师的内在自觉，就可以成佛，这样就可以把以“外在超越”为特征的宗教变成以“内在超越”为特征的非宗教的宗教，由出世转向入世，从而克服了二元的倾向。这样转变，是否可以说禅宗具有某种摆脱传统的宗教模式的倾向。如果可以这样说，那么研究禅宗的历史，将对研究现实社会生活中的宗教有着重要的意义。

4．如果说在中国有着强大的禁锢人们思想的传统，那么是否也有要求打破一切禁锢人们思想的资源呢？如果确有这样的资源，禅宗应是

其中重要的一部分。禅宗否定一切外在的束缚，打破一切执着，破除传统的权威和现实的权威，一任本心，从这个意义上说人自己可以成为自己的主宰，这样的思想解放作用在我国长期封建专制社会中应是难能可贵的，似乎应为我们注意。当然禅宗由此而建立了以“自我”的内在主体性为中心的权威，虚构了“自我”的无限的超越力量，而又可以为以“自我”为中心的内在主体性所束缚，这可能是禅宗无法解决的矛盾。

5. 禅宗这种以“内在超越”为特征的思想体系，有着鲜明的主观主义特色，它必然导致否定任何客观标准和客观有效性。这既不利于对外在世界的探讨和建立客观有效的社会制度和法律秩序，同时在对探讨宇宙人生终极关切问题上也不无缺陷。因此，我们是否可以提出一个问题，既能否建立一个包容以“内在超越”为特征的思想，同时也包容以“外在超越”为特征的思想的更完满的哲学体系呢？我认为，这个问题或者是中国哲学发展应受到重视的问题。

6. 如果说有可能建立一包容“内在超越”和“外在超越”的中国哲学体系，那么能否在中国传统哲学中找到内在资源？我认为，中国传统哲学中是有这方面内在资源的。本来在孔子思想中就有两个方面：一方面有“为仁由己”“人能弘道，非道弘人”的说法；另一方面也有“畏天命，畏大人，畏圣人之言”的说法。前者是孔子思想中的“内在超越”方面；后者是孔子思想中“外在超越”方面，或者说从后者可以看出孔子思想也有“外在超越”的因素。但后来儒家发展了前一方面，而后一方面没有得到发展。如果能使上述孔子思想中的两个方面同时发展，又有所结合，是否可以沿着孔子思想发展出一包容“内在超越”和“外在超越”的哲学体系呢？我想，这是一个值得我们探讨的问题。比孔子稍后的哲学家墨子，他的哲学可以说是以“外在超越”为特征的哲学体系。墨子哲学可以说由两个相互联系的部分组成：一是具有人文精神的“兼爱”思想；另一是具有宗教性的“天志”思想。这两方面看起来似乎有矛盾，但在墨子思想体系中却认为“兼爱”是“天”的意志最根本的体现，所以“天志”应是墨子思想的核心。墨子的“天志”思想认为“天”是有意志的，它的意志是衡量一切事物最高和最后的标准，它可以赏善罚恶，它是一外在于人的超越力量，或者说它具有明显的“外在超越性”。因此，墨家哲学发展到后期墨家就更具有科学因素和逻辑学和认识论思想。可惜在战国以后墨家思想没有得到发展。墨家思想是否可以成为我们建立一包容“内在超越”和“外在超越”的中国哲学体系的内在资源呢？我想也应是我们可以研究的一个

课题。

V . THE ORIGIN AND CHARACTERISTICS OF DAOISM

Religion is a social phenomenon and studying it with a view to understanding its historical development has special significance today. We can see similar trends in other countries where the rapid developments of science and technology do not in any significant way lessen the people's sense of, or interests in, religion. Even the people of China, for some reason or other, show similar interests in the development of religion. This phenomenon is enough to raise several theoretical questions concerning the need for a better understanding of religion: what is the nature of religion? Does the human psyche require a religious faith? Is religion synonymous with religious belief? Is religious belief beneficial to social life? Is science complementary to, or inconsistent with, religious belief? Can religion be a modernizing agent? and so forth. This paper does not pretend to deal specifically with these questions, but, why do we study the history of religions? Should an ideal history of religions be time-conscious? Can such an history help people think seriously about the problems of religion that exist in the world today? All historians of religions need to address themselves to these kinds of problems.

The religions which had been popular in Chinese history include Buddhism, Daoism (Taoism), Islam, Christianity and Zoroastrianism. However, of all these religious traditions, only Daoism (Taoism) is indigenous to China. To be sure, Daoism (Taoism) is a Chinese religion; it has characteristics peculiar to the Chinese. Besides, it has exercised considerable influence on the development of Chinese culture and psychology, customs and habits, science and technology, philosophy and thought, medicine and hygiene, and even political life.

Can our investigation into one of the more influential religions—the origin of Daoism (Taoism), its development and characteristics—help us deepen our understanding of Chinese culture, personality and way of thinking? Can it indirectly help us understand, more intimately, the theoretical and practical problems of religion in the world today? I think it can and toward this end the present discussion is an attempt to analyze and discuss the following issues.

I . General Background

The development of Daoism (Taoism) was an attempt to orientate the Han Chinese to their social, political, economic, moral and psychological lives at the end of the Eastern Han.

Why did Daoism (Taoism) develop only at the end of the Eastern Han period? Historically, such Daoist ideas as "immortality" and "sanctification of the bodies" had already existed during the time of the Warring States (Zhanguo). They became even more popular during the Qin and Han dynasties—why? We know that not just any kind of superstition can be called religion, although religion often embodies a good deal of superstitious elements. Neither can we say that any theistic discourse can become a religion, even if it is capable of extending its influence over a sizeable cross-section of the population. Its growth and development were directly related to the social life of the people, their history, and other objective facts. The development of Daoism (Taoism) during the Eastern Han may be attributed to the following factors.

First, the reality of social life at the end of the Eastern Han had laid fertile grounds for the growth of Daoism (Taoism). The social and political conditions, since Shundi of the Eastern Han, had begun to deteriorate. There was outside interference in the day-to-day administration and the administrative machinery was in the hands of a bureaucracy. Debauchery, unruly behavior and social strife, both from within and without, were the order of the day. Finally there were

crop failures due to severe drought, and large numbers of people died in ditches (Zhong Changtong, *Changyan*). Undue economic exploitations and political pressure at that time had made it impossible for the populace to lead a decent life; bankruptcy and emigration were common. The conflict between the ruling class and the ruled was intense and acute. According to historical records, from Shundi's time, peasant uprisings were rampant. At that time, apart from the common class-interest that united them in social movements, their leaders resorted to magic and superstitions as organizing agents. That is why, in history books, the rebels after Shundi's time were often called *yaozei*, or "the goblin thieves."

Two conclusions may be drawn from the above discussion. First, a period of economic and political unrest, as well as spiritual and moral decay, provided an objective vantage for the development of religion. Second, as the leaders of the peasantry had used magic and superstitions to rally support in their movements, they knew that these could be used as tools for mobilizing the people, thus paving the way for the widespread development of religion. As is always the case, social turbulence often caused great hardship and suffering to the lower class. Thus, when people became desperate they tended to hinge their hopes upon some kind of spiritual power, or *shenling*. This was one of the most common avenues through which people, in antiquity, reconciled themselves with their social reality. This also explains why a majority of the early Daoist believers were members of the lower social strata.

Second, the social conditions at the end of the Eastern Han had provided useful material for the founding of Daoism (Taoism). Since the time of Han Wudi, when Dong Zhongshu pointed out that "of the hundred schools, only Confucianism is the most revered," Confucian thought had adapted itself to the needs of building a unified feudal society and serving as an ideology for the ruling class. From then on the development of Confucianism depended primarily on the teaching of a reciprocal relationship between Heaven and man, followed by an

increased interest in the development of theology and metaphysics. Though ideally a religion is theistic, not any form of theism is adequate or sufficiently meaningful to become a religion. This is because such a religion (namely, the religion of the masses) must include not only the worship of spiritual beings, but also possess a body of canon together with an endurable form of church organization, doctrines and dogmas, and an historical medium for the dissemination of religious knowledge. Generally, religion must see the world in two forms: the real and the supernatural. Based on this premise, human beings feel that they can only disengage themselves from the problems of social life in a supernatural world—believing that an ideal life can manifest itself only in the yonder shore of the supernatural world.

Despite the fact that Confucianism acknowledged the existence of *Shen* or God, especially during the Han Dynasty, it had never thought it necessary that its ideals be fulfilled outside the world, but required rather that the ideals of "governing the state and pacifying the world" (*zhi-guo ping tianxia*) be actualized in the real world, even though this were merely an illusion. Although religion had played a very important role in feudal China, it had never become a force to reckon with. Instead it had, many a time, occupied a secondary position, which state of affairs clearly bespoke as well the dominance of Confucian ideology.

From the developmental point of view, after the Eastern Han Confucianism could very well have become a religion, because its metaphysics together with the conception of the sacred could be easily converted into religion. However, Confucianism did not become a religion during the Han Dynasty for the simple reason that it attempted to materialize the ideals of "governing the state and pacifying the world" in the real world. Thus, following the decay of the Han Dynasty, Confucian ideology not only fell short of becoming a religion but its position as an ideology of the ruling class continued to decline. Because of this decline, Confucian thought had given way to

the growth of Daoism (Taoism). History shows that, whenever the dominant ideology of the ruling class lost its power, it often signalled the growth and dominance of a countervailing religion.

Even though Confucianism had declined at the end of the Eastern Han, certain facets of its ideology could still be absorbed and put to good use by an ongoing religion. The fact that Confucian ideas are found in Daoism (Taoism) is clear proof that such assimilation did take place. For example, the idea of "the ultimate peace in the unity of the three (Heaven, earth and man) in one" (*tian-di-ren san heyi zhi taiping*) shows that the Confucianists were concerned about political reality and the notion of *sancai* (three endowments) mentioned in *Yi Zhuan*. The idea that the sky and the universe were formed by breath (*qī*) could have derived from the knowledge of world creation as well as the *yin-yang* principles and the five elements mentioned in the apocryphal texts. All these ideas were closely connected to Han Confucian thought. That most of the scholars who studied the development of Daoism (Taoism) focused their attention on its relationship with Daoist sources and overlooked the nexus between Daoist and Confucianist ideas is a bias.

Daoism (Taoism) could have another source in its gradual mingling with the tradition of the saints. Although there was a connection between the Daoists and the saints of the early Qin, both seem to belong to quite different schools of thought. Until the beginning of the Western Han, the popular Huang-Lao learning was essentially Daoist. It frequently emphasized the exemplary qualities of the sage and was thus deemed capable of exercising its power over the state and the cosmos. That is why Sima Qian, in his preface, commented that the importance of the Huang-Lao learning lies in the doctrine of "self-actualization through non-action, and self-correction through expiation" (*wuwei zihua, qingjing zizheng*).

The Huang-Lao Daoist learning underwent a change during the Eastern Han: part of its adherents sought the help of the gods installed in shrines, thus becoming unified with the saints. Huandi, for

example, made sacrifices to Laozi (Lao Tzu) at the latter's shrine with the aim to "preserve *shen* for the uplift of character and the ultimate ascent to Heaven," thus signalling the initial transformation or Huang-Lao's Daoist teaching. Also, as early as the end of the Western Han, there was already in existence what was known as "Huang Lao's *Dao*" (the Way of Huang-Lao) and later on, the "Fangxian's *Dao*" (the Way of the Saints), both of which actually belonged to the immortalist sects. Further, the saints' underlying objective was to attain "eternal life" (*changsheng busi*) and to cause the bodies to be sanctified (*routi chengxian*). Thus, once it merged with the Daoist ideas of "attaining peace through inaction, and remaining in peace through abstinence" (*qingjing wuwei, tiandan guayu*), it increasingly began to attract the masses and became a powerful social force. Lastly, the basic tenets of Daoism (Taoism), such as "immortality" and "the sanctification of the bodies," although derived from the Way of the Saints, became part of the Daoist system. Hence, its transformation also represents an important factor contributing to the growth of Daoism(Taoism).

From the above viewpoints, Daoism (Taoism) as a religion may be said to have deviated from the Confucianists' and Daoists' schools of thought. However, its source of ideas was inseparable from both. Hence, from the beginning, it had distinguished itself as a religious system in which Confucian and Daoist ideas supplemented each other. This system represents some of the characteristics typical of Chinese culture, psychology and way of thinking.

Third, the introduction of Buddhism into China had greatly stimulated the development of Chinese religion. From the time Buddhism spread to China during the Western Han till after the middle of the Eastern Han, it maintained a steady level of propagation. Buddhism, acting like a catalyst, escalated the development of Daoism (Taoism). Actually, the school of the saints was already popular during the Western Han, and disciples frequently had given tributes to Huang-Lao. This was evidenced in the existing learnings of "Huang-Lao's *Dao*" and "Fangxian's *Dao*." The former

sanctified Huangdi and worshipped him in shrines dedicated to him; the latter talked about "non-death and everlasting life" (*changsheng busi*). *Shiji* records that the teacher of the river elder, Le Jugong, learned about Huangdi. *The Book of Fengshan* records that Huangdi became an immortal because of *fengshan*. Yuji (more appropriately, Ganji), who compiled the Daoist scripture *Taiping Jing*, suggested that the book was originally by Laozi (Lao Tzu). During Han Mingdi, Ying, King of Chu, had already worshipped Huang-Lao and Futu. Ying recited Huang-Lao's words and honored Futu's shrine. Huangdi erected Huang-Lao's and Futu's shrines in his palace. The fact that Huang-Lao and Futu were worshiped manifestly shows that Huangdi was at that time regarded as a deity or a Buddha. Sainthood was in fact a form of sagehood. Living the life of an immortal is but a human discipline. There was no formal, nor endurable form of organization to be used as a base for the interaction of the religious community. But after the spread of Buddhism to China, it became an organized form of religion, possessing not only a set of teaching which differed from that of traditional China, but also an organized church, with a religious canon and a spiritual community, all of which served as a blueprint for the founding of Daoism(Taoism).

It is true that Buddhism had served as a model for the establishment of Daoism (Taoism). Of even greater importance is that Buddhism was alien to Chinese culture, and its propagation in China was greeted with protests by the bearers of Huaxia's cultural tradition. This defensive attitude acted as a stimulus spurring the Chinese to strive even harder towards establishing an indigenous religion. When an ethnic culture encountered an alien culture it often gave rise to mutual absorption or rejection. This situation was particularly marked in the case of the Chinese response to Indian Buddhism. We can provide evidence to show how it was actually reflected in the earliest Daoist scripture, *Taiping Jing*. In this scripture, we see how some Buddhist ideas, like *benqi* (the primal beginning) and *sanjie* (the three worlds), had their origins in the Buddhist canon. On the other hand,

there were criticisms about Buddhism, for example, the talks that "the conduct of the four destructions collectively denigrates the spiritual way of Heaven" (*Sihui zhi xing, gong wuru huangtian zhi shendao*). Moreover, upon the establishment of Daoism(Taoism), its adherents circulated the story about Laozi (Lao Tzu)'s role in bringing about a renaissance among the northern Chinese (Laozi [Lao Tzu] huahu). This was designed not only as a blow to Buddhism but also as an attempt to boost the image of Daoism (Taoism). All this suggests a kind of antagonistic reaction against the entry of the alien culture.

Therefore, it is not at all surprising that the end of the Eastern Han period saw the need for the development of an indigenous religion. The founding of this religion could be traced to the existing tradition of the saints. The fact that it adopted Confucian and Daoist ideas as a basis for the development of Daoism (Taoism) is even less surprising. Once it emerged, it immediately became charged with an intense ethnic fervor and came into direct conflict with the alien Buddhist religion. The outcome is, precisely, a manifestation of an indigenously endowed Chinese culture.

II . The Development of Daoism

The Process through which Daoism (Taoism) developed into an organized religion also a clear manifestation of how a religious community came into being.

What is the nature of religion? It can be defined in a great number of ways. Even in Marxists' writings, religion is conceived differently under different circumstances. Marx said, "religion is the opiate of the people," which is interpreted in terms of the use of religion as a way of hypnotising the masses. This statement came not from Marx but from Feuerbach. It means that the purveyors of religion who claimed that it could bring comfort to humankind were not being honest. Lenin conceived of "religion as the workers' groaning sound," which is interpreted as relating to the agony of the proletariat.

Plekhanov said, "Religion has a countless number of definitions. . . . It may be interpreted as a form of relationship that helps to realize the existence of the mystical superhuman power, for humans believe that they can depend on this power." Plekhanov's definition seems to be more relevant and practical, but is there such a mystical power? How do we adjust to the existence of such a power? Why do people find it necessary to believe in such a power? Is belief in a mystical superhuman power superstitious? This raises some philosophical problems, viz., the problems of religion vis-à-vis superstition and belief.

Is religion a superstition? This question can be debated for a long time and no one knows when it will end, but devout believers most certainly will reject the pronouncement that "religion is superstition." Why? It is because believers frequently rely upon certain ideal principles to interpret what often is called the "mystical superhuman power" in the form of ultimate "truth, goodness, and beauty" (*zhen, shan, mei*), or else they often look upon the ideals of "truth, goodness, and beauty" as a form of "mystical superhuman power." They sincerely believe it to be true and try very hard to apply these ideals in their social life. Probably the belief in, and dependence upon, this ultimate "truth, goodness and beauty" in the guise of a "mystical superhuman power" is a matter of the human psyche's response to specific social conditions. But believers of the "mystical superhuman power" assume superstition and religion to be two different things. To them, "superstition" can only be a trick played upon those who lack scientific knowledge, i.e. a manifestation of spiritual poverty due to a lack of ideals. Devotees who believe that the "mystical superhuman power" is a manifestation of "truth, goodness, and beauty" may perhaps accept the idea that "religion is synonymous with belief" but certainly will not accept that "religion is superstition." According to them, people should have faith: even the agnostics believe in agnosticism.

Religion and belief are undoubtedly related. Religion is based on belief, but whether belief is based on religion, in the classical sense, is

a different matter. As a matter of illustration we can say that "we believe in the scientific explanation of atheism" or even accept that "we believe in Confucian philosophy." Nonetheless, there is no doubt that atheism is not a religion, but a scientific doctrine. Even Confucianism may be said to have embodied certain religious elements, although it is not a religion. Therefore, we should distinguish not only between "religion" and "belief," but also between "religion" and "religious thought." Otherwise, almost any kind of philosophical discourse could be regarded as a religion, and if that be the case, it would be as good as abnegating the existence of religion.

Based on our understanding of the human psyche, we may postulate that human beings really need a certain kind of belief. The question is whether there is the need for a religious belief. If we could divide belief into two categories—one a scientific belief and another a non-scientific belief—religion may be said, generally, to belong to the latter category. What follows immediately will be questions like whether human spiritual life requires a certain kind of self-satisfaction obtained from a non-scientific discipline, or whether social life looks upon religious belief itself as a psychological need. This is too gigantic a problem to be discussed here. We can only postulate that for a non-scientific belief to become an organized religion, it must offer some kind of theoretical bases or support. Also, these arguments must be able to reflect the spirit of the time. If there were no religious teachings to be used as a theoretical system, non-scientific beliefs could not become an established religion. Besides, as an established religion, especially one that had colored the history of the social masses, there must be a perduring church organization, a religious canon, a community of devotees, and a history of religion.

In history, there were thousands of the so-called "religious sects," but not all of them could be regarded strictly as "religious organizations." In fact, a number of them could only be looked upon as "superstitious cults." If that be the case, what then may be thought to be an organized religion? We shall analyze the growth of Daoism

(Taoism) first before illuminating the really meaningful form of religious organization.

An organized religion must have a canon with a philosophical base of its own. The religious teachings should not be nonsensical, but must contain a well-organized system of ideas for the advancement of humankind. The reason why Indian Buddhism has become an influential world religion is that it provides an impressive system of thought which is capable of enlightening the human mind. If Daoism (Taoism) merely confined itself to a haphazard way of thinking, as is represented in the *Taiping Jing*, it would have been difficult to become an established religion in China. Thus, from the end of the Han Dynasty, through the Three Kingdoms, till after the Western and Eastern Jin, there emerged Daoists like Ge Hong, Lu Xiuqing, Kou Qianzhi, Tao Hongjing and others who, in an attempt to fulfill the requirement of the time, not only integrated some of the Daoist and Confucian ideas but also absorbed some of the Buddhist elements to enrich Daoism (Taoism).

A really meaningful and influential religious community must have a formal or more serious form of church organization. Even though the ideas of "immortality" and "the sanctification of the bodies" were subsequently incorporated into the Daoist religion, the saints relied heavily on personal devotion without developing a distinctive church, and so they failed to develop a religion. It was not until the end of the Han Dynasty that Daoism (Taoism) became an established religion with a permanent membership of disciples, together with a body of clergy and church leaders. However, the regimes of the Three Kingdoms and the Western Jin banned this organization, subjecting it to dissolution until the Eastern Jin when Du Zigong and others revived it and once again set it on course.

An organized religion must also have a more permanent set of religious teaching and canon. Although Daoism (Taoism) had its own precepts and canon when it was first instituted at the end of the Eastern Han, they were rather simple and impermanent in nature.

From the Eastern Jin onward, Daoism (Taoism) gradually became more firmly established under the impact of Buddhism and with the tireless efforts of Lu Xiuqing, Kou Qianzhi and others.

An organized religion must have its own canon and scriptures for the guidance of its believers. Although there were a number of Daoist books, like the *Laozi* (*Lao Tzu*) and the *Zhuangzi*, before the Wei and the Jin dynasties, these books came to be accepted as scriptures only after being popularized by the devotees. All these books were written by Daoist philosophers of the early Qin, and they had hardly any connection with Daoist religion. It was due to the believers' attempt to look for historical evidences that they decided to upgrade them as scriptures. *Taiping Jing*, for example, was written before the inception of the Daoist religion. Hence, it served only as a groundwork for the development of Daoism (Taoism). However, by the time of the Eastern Jin and the Northern and Southern dynasties, when Daoism (Taoism) was firmly rooted and a church was organized, a large quantity of scriptures expounding the Daoist canon began to appear (Ge Hong's *Pao Pozi*). This period saw the appearance of three distinctive categories of scriptures: *Sanhuang Jing* (*The Three Emperors Scripture*), *Shangqing Jing* (*The High Pure Scripture*), and *Lingbao Jing* (*The Spirit Protected Scripture*). All these scriptures subsequently combined to form the "three caves" (*sandong*) of the Daozang, namely: the cave of the real (*dongzhen*), the cave of the gods (*dongshen*), and the cave of the occult (*dongxuan*).

An established religion must have a spirit being, or *shenling*, as specific object of worship and a history of its own. When Daoism (Taoism) was first instituted it had inherited part of the saints' tradition. The Daoist disciples claimed that it was imparted to them by the immortals, mostly with Laozi (Lao Tzu)'s assistance. Until the Northern and the Southern dynasties, Daoist disciples created the "rank of the real being" based on the conception of the social hierarchy prevailing at the time. Tao Hongjing' s *Zhenling Yewei tu* (*Real Spirit's Occupational Status Chart*) divided the immortals into

seven classes, the highest of which was occupied by the first three: the Primal Lord of Heaven (*Yuanshi Tianzun*), the Daoist Lord on High (*Gaoshang Daojun*), and the First Divine Daoist Lord (*Yuanhuang Daojun*). From then on, these three deities became the most honored in the objects of worship in the Daoist temples (*daoguan*). Since a religion always finds it necessary to undermine the existence of other competing religions, it has to create a history of its own in order to raise its own status. Thus, being an indigenous Chinese religion, Daoism (Taoism) had to tackle the entry of alien Buddhism. Besides emphasizing the differences between "Chinese" and "non-Chinese" (*huayi zhi bian*) to undermine Buddhism, Daoists also spread the story of "Laozi (Lao Tzu) huahu" and elevated Laozi (Lao Tzu)'s position to that of Buddha Shakyamuni's teacher. Consequently, both Buddhism and Daoism(Taoism) remained in conflict for a long time.

However, it was not until the Eastern Jin and the Northern and Southern dynasties that Daoism (Taoism) finally became an established religion. The various stages of its development may be summarized as follows: First, from the Eastern Jin onward, the Daoists began to revive their religion by reorganizing the Daoist community which had become scattered and unstable. At the same time, in order to overcome the inadequacy of Daoist teaching and theoretical formulations, Ge Hong and others had provided a body of Daoist canon and precepts. Thereafter, as an attempt to consolidate the founding of the Daoist church, a set of religious teaching was formulated; and in order to propagate Daoist teaching the required scriptures were made available. Lastly, so as to set the religion on a proper footing, a compendium of fairy tales and legendary stories was kept alive. The various phases involved in the development of Daoism (Taoism) may thus be said to be characteristic of the circumstances under which a religious body came into existence. One of our aims of studying the history of religion is to use it as a source for illuminating the various phases of its development so as to enable us to assess, more accurately, the role it played in society.

III . Characteristics of Daoism

As a form of religious philosophy Daoism (Taoism) has special characteristic, which can be illuminated only through comparison with other religions.

An established religion has characteristics which are distinctively different from those of other religions. Besides such external forms as church organization, religious doctrines and canon, as well as its conception of the sacred, its characteristics should be reflected in the theoretical system which forms the core of the religion. This theoretical system usually contains a body of basic ideals and conceptual schema. For instance, the ultimate reality of the Buddhist belief, as embodied in the concepts of self-denial, transcendentalism and nirvana, is the insignia which distinguishes it from other religions. The three doctrines of the medieval Christianity—namely, "the existence of God," "the resurrection of the soul" and "free will"—form its religious philosophy and conceptual schema. If that be the case, does Daoist philosophy contain any doctrines and tenets which differ from those of other religions? I think it does, especially in the earlier form of Daoism (Taoism). Whilst almost all religions ask the question "what happens after the demise of a person?", Daoism (Taoism) wanted to know "why humans don't die?". This basic question serves as the key to the theoretical system of Daoism (Taoism). All this shows that it has characteristics different from those of other religions. The early form of Daoism (Taoism) held that its body of belief was made up of the tenet of "the ascent of the three in one," that is, "the unity of Heaven, earth, and man for the attainment of the Great Peace" (*tian-di-ren, sanzhe heyi yi zhi taiping*); "the blending of the essence, breath, and shen to become a saint" (*jing-qi-shen, sanzhe hunyi er cheng shenxian*). From this it evolves into "non-death and eternal life" (*changsheng busi*), "resurrection of the bodies" (*routi feisheng*), and "transformation of the breath into the three pure ones" (*qihua sanqing*), thus forming the basis of Daoism (Taoism).

To understand the tenets of the Buddhist philosophy, one must know the meaning of nirvana. Hence, a Russian Buddhist scholar wrote a book analyzing the meaning of nirvana. In Mou Zongsan's book, he analyzed the concept of nirvana from the Chinese Buddhist viewpoint. In studying Christianity, one should analyze the concept of "God." Thus, Aurelius Augustinus (354-430) in his *The City of God* formulated his thesis regarding the "godliness" of the "Almighty." In his *Shenxue Daquan*, Thomas Aquinas (1225-1274) put forward five parameters to prove that "God exists." In Daoist philosophy, the basic concept is breath (*qi*), the existence of which may be proved by the following:

First, "the unity of the three in one" refers to the unity of Heaven, earth and man (*tian-di-ren*), and the reason why "Heaven, earth and man" can be unified is due to the fact that the breaths of them are the same. The essence, breath and god (*Jing-qi-shen*) blend to become one, and the reason why they can be fused in one is due to the fact that the breaths of them are the same.

Second, the so-called "one breath giving birth to the three pure ones" means the three most respected worthies of Daoism (Taoism) were the manifestations of the breath, or the three layers of the most sacred Heaven were manifested by breath, or *qi*. This also shows how the basic concept of Daoism (Taoism) came to be formed.

Third, although *dao* (the way) is the highest form of Daoist doctrine, its early period identified three circumstances under which the relationship between *dao* and *qi* was highlighted. The first circumstance was that *dao* is more basic than *qi*, but *dao* cannot be isolated from *qi*. Another circumstance showed that *qi* is more basic than *dao*, because Daoism (Taoism) used *qi* as its prime mover—for example, Liu Xie in his "*Miehuo Lun*" ("On the Extinction of Illusion"), while citing "*Sanpo Lun*" ("The Three Breakthroughs"), said "*qi* is the prime mover of *dao*." The third circumstance was the synthesis that *dao* is *qi*—for example, Tao Hongjing in his *Yangsheng Yanming Lu* cited *Fuqi Jing* (*Breathtaking Scripture*) that "*dao* is *qi*." In studying the

philosophical basis of the Daoist canon, if one could analyze the meaning of *qi* and the conceptual base upon which it is built, one would be able to gain further insight into the various salient features of Daoism (Taoism).

Hegel in his *Lectures on the History of Philosophy* said, "the difference in cultures is due to the difference in the systems of ideas, even more so is that in philosophy." If we compare Daoism (Taoism) with other religious systems, the doctrines formulated by Daoist ideas, and the school of thought which formed the basis of these doctrines, we would be able to understand more clearly the characteristics of Daoism (Taoism). Although Daoism (Taoism) is indigenous to the Chinese, it actually owes its development to the inspiration of Buddhism when the latter spread to China. Thus, we are able to identify the rival relationship between Buddhism and Daoism (Taoism) as one of its special characteristics.

The earliest Daoist scripture, *Taiping Jing*, on the one hand, shows that it was influenced by Buddhism. For example, it relates to the question of conformity, a concept which was already in use in traditional Chinese thought. But in *Taiping Jing* this was discussed in such a detailed and outstanding manner that it became obvious that it was influenced by the Hinayanist Zen Buddhist concept of "mind control" or "control of desire." On the other hand, the scripture also shows that it was antagonistic to Buddhism. For example, *Taiping Jing's* satirical expression, "the way of the four destructions" (*sihui zhi xing*), was clearly aimed at Buddhism. It also put forward the argument that "one's burden is one's responsibility" (*chengfu*) as a direct confrontation to the Buddhist concept of "reincarnation" (*laishi baoying*). After the Eastern Jin, Daoism (Taoism) gradually developed into a full-fledged religion. It had a theoretical system of its own, and consequently its differentiation from Buddhism became more and more pronounced. At that time, the differences between Buddhism and Daoism (Taoism) might be related to the following problems: (i) life and death and the form of god; (ii) the cause and effect of one's

deeds and misdeeds (*yinguo baoying*); and (iii) this-worldly and other-worldly orientations. By analyzing of all these issues, we would be able to appreciate the special characteristics of Daoism (Taoism) as a religion.

In comparing Buddhism and Daoism (Taoism), we may encounter yet another question: why does not Daoism (Taoism) become a world religion as did Buddhism rather than remaining merely a Chinese religion? From the historical point of view, it is possible that Daoism(Taoism) could have spread to Korea at the end of the Northern and the Southern dynasties. *Sanguo Shiji (The History of the Three Kingdoms)* recorded how Daoism (Taoism) spread to Korea at the beginning of the Tang Dynasty but, shortly afterwards, Buddhism became popular in Korea and very soon it outran Daoism (Taoism), which thenceforward ceased to retain its foothold there. During the same period, Daoism(Taoism) passed through Korea to Japan, where it might have exercised some influence on Japan's Shinto, though this does not mean that the development of Shinto was due to the Daoist influence. Unlike Buddhism, however, Daoism (Taoism) also failed to spread its wing over Japan. In history Daoism (Taoism) had even less influence on other countries(notwithstanding its continuing impact on Chinese devotees who made their homes outside China).

In my opinion, the main reason why Daoism (Taoism) could not become a world religion is that it not only contains defects in its system of beliefs and practices, but also carries a heavy load of sentiments which are peculiarly Chinese. The goal Daoism (Taoism) seeks to achieve is "non-death and eternal life" and "the sanctification of bodies." All this differs from the monotheistic doctrine that "the soul does not die." On the one hand, its theoretical arguments, such as "the sanctification of bodies" and "non-death and eternal life" are too crude and difficult to be absorbed. Consequently, Daoism (Taoism) had no alternative but to take in some Buddhist ideas, such as "when the form ceases, its spirit remains" (*xingjin shen bu mie*) and "the three kalpas' wheel of karma" (*sanshi lunhui*). Thus, the spread of Daoism (Taoism)

has been seriously restricted, whereas wherever it goes Buddhism has been able to take the place of Daoism (Taoism) wherever the latter goes. On the other hand, Daoism (Taoism) is too closely related to science. For the sake of preserving life, ensuring "non-death and eternal life" and sanctifying the dead it emphasizes a great deal of physical conditioning for lifting the breath (*qi*) of material reality to the highest level. Consequently, China's science and technology, especially medicine, came to be developed alongside Daoism (Taoism). Daoism (Taoism)'s use of science was bound to curtail its dynamism as a religion. Thus, the "non-science" and "anti-science" components, in conjunction with the basic qualities of science, began to contradict each other. Religion usually emphasizes "otherworldly orientations," but Daoism (Taoism) seems to insist on "this-worldly orientations" instead. Its adherents believe that they could blend "the three (*jing, qi, shen*) to become saints" (*sanzhe hunyi er chengxian*). But as a religious system Daoism (Taoism) also advocates the unity of the three (*tian, di, ren*) in one to ensure the Great Peace (*sanzhe heyi er zhi taiping*) and for this reason can be a potent disruptive force in the political process. In thus fabricating the supernatural world of the saints, Daoism (Taoism) hopes to translate the real world into an ideal one—this undeniably is a conflict of ideas.

The study of the characteristics of Daoism (Taoism) is of great importance for it enables us to understand the difference between Daoism (Taoism) and other religions. By analyzing its characteristics we are able to illuminate the salient features of Chinese culture, psychology and philosophy, as well as the direction of developments in science and technology, medicine and hygiene, and the ensuing shortcomings hidden therein. For a people to succeed in development, they must know not only the present and the future, but also the past. They must come to grips not only with the reality of political life and economic exigencies, but also with their traditional culture, religious belief and pattern of thought. Herein lies the reason why serious research must be conducted on Daoism (Taoism) so as to enable us to

understand its role as a Chinese religion.

伍 论道教的产生和它的特点*

宗教是一种社会意识形态。把宗教作为意识形态来研究它的发展历史，在今天不仅有其一般性的意义，而且有着某种特殊的意义。我们可以从国外大量的事实看到，科学技术在飞速发展，并没有使宗教意识衰退，反而加强了人们对宗教的追求；就国内情况看，也因种种原因信仰宗教的人有着一一种发展的趋势。这样一种现象就向我们提出若干应该认真研究的有关宗教的理论问题，如“宗教的本质是什么”“人类的心理特性是否需要有一种宗教性的信仰”“宗教和宗教性的信仰是否是一回事”“宗教信仰是否有益于社会生活”“宗教与科学是矛盾的还是互补的”“宗教能否现代化”等等。上述这些问题当然不是本文应该研究的范围，本文不可能也不应该直接讨论这些问题。但是，为什么要研究宗教史，一部好的宗教史是不是应有强烈的时代感，它能不能使人们在读了之后而认真考虑当今世界存在的宗教问题，我想写宗教史的人是应该想到这些问题。

在我国历史上曾经流行过的有佛教、道教、回教、天主教、基督教以及祆教等等，但其中只有道教是中国本民族的宗教。说得确切些，道教是中国本民族宗教的一种，因此它具有中国本民族的特色，它对中国的民族文化、民族心理、风俗习惯、科学技术、哲学思想、医药卫生甚至政治经济生活都有相当大的影响。我们研究作为中华民族本民族的一种有较大影响的宗教——道教——的产生和发展的历史以及它的特点，能否加深我们对自己民族文化、民族心理以及思维方式的特征的了解？能否从一个侧面使我们更加认真地考虑当今世界的宗教理论和实际问题呢？我认为应是可能的。为此，本文将对下述三个问题作一些分析和探讨。

一、道教的产生是适应了东汉末期中国本民族（主要是汉族）的社会、政治、经济、道德以及人们的心理的需要。

道教为什么到东汉末年才产生，而道教所崇信的某些思想如“长生不

死”“肉体成仙”等等在战国时期已经有了，到秦汉后更为流行，这是为什么呢？我们知道，并非任何迷信思想都可以称为宗教，当然宗教中总是包含着大量的迷信成分；也并不能说任何“有神论”都能成为宗教，虽然一般地说宗教也是“有神论”。宗教，特别是一种有影响的宗教，它的产生和发展必定有其社会生活、历史条件的原因，它的发展总也有着某种客观规律。道教在东汉末年产生是由以下几个条件促成的：

第一，东汉末年的现实社会生活为道教提供了有利于产生的土壤。

东汉自顺帝以后，社会政治日益腐败，外戚专政，宦官当权，“凡贪淫放纵，僭凌横恣，挠乱内外，螫噬民化”，无恶不作，致使“农桑失所，兆民呼嗟于昊天，贫穷转死于沟壑”（仲长统《昌言》）。由于当时政治统治者的残酷经济剥削和政治压迫，使广大人民群众无法生存，破产、逃亡已成为当时普遍现象，所以当时广大人民群众与统治者的矛盾是十分尖锐的。据史书记载，自顺帝以后农民起义此起彼伏，一直不断。当时的起义农民除了阶级利益一致而使他们自发地联合在一起之外，已见农民起义的领导者们利用方术、迷信思想作为组织群众的纽带，故在史书中多称顺帝以后的起义农民为“妖贼”。

从这里我们也许可以得出两点结论：一是在汉末这个经济、政治、精神和道德普遍瓦解的时代里，它为一种宗教的产生提供了客观条件；二是起义农民普遍利用某些方术迷信，这就说明他们已经意识到方术迷信思想可以作为他们组织群众的思想武器，因而为一种宗教的产生创造了广大的群众基础。

社会的危机给下层人民带来的苦难最为深重，在对现实的绝望中走向乞求超现实的神灵，自是古代人民最现实的可能。道教徒最初也是来源于广大下层人民。

第二，东汉末年为道教的产生准备了可以利用的思想材料。自汉武帝以后，董仲舒提出“罢黜百家，独尊儒术”之后，儒家思想适应着封建大一统的需要而成为我国封建社会的统治思想，此后儒家思想的发展沿着天人感应目的论而有神学意味越来越浓厚的谶纬迷信之类。宗教一般说总是有神论，但是是否任何有神论都能成为一种完备意义的宗教呢？那却不一定。因为一种完备意义上的宗教（这里指的是阶级社会里的宗教），它不仅要有对神灵的崇拜，而且应有一套教义的理论体系和较为固定的教会组织、教规教仪以及传授历史等等。一般地说，宗教总是要把世界二重化为现实世界和超现实世界，在其教义中认为人们只有在超现

实世界里才能永远摆脱现实社会生活中存在的种种苦难，人们的美好、幸福的生活最后只能在那超现实的彼岸世界中实现。

我国的儒家思想特别是两汉的儒家思想尽管也承认“有神”，但它并不认为必须在现实世界之外实现其理想，而是要求在现实世界之中实现其“治国平天下”的理想，虽然这只能是幻想。在我国长期的封建社会中，宗教虽然有过大影响，但始终没有能成为独占的统治思想，并且常常居于次要地位，这一情况不能不说和作为正统思想的儒家思想的这一特点有关。

儒家思想到东汉以后从发展上看也很可能成为一种宗教，因为从有神论、谶纬迷信发展成为一种宗教并不是很困难的。但儒家在汉朝始终也没有成为宗教，这和它要求在现实社会中实现其“治国平天下”的理想有着直接联系。因此，随着汉王朝的衰落，儒家思想本身既然不能成为一种宗教，而其统治地位又走了下坡路，由于儒家统治地位的削弱从而为一种宗教的产生提供了条件。历史的进程向我们表明，每当对统治阶级的统治思想发生信仰危机的时候，也往往是宗教意识易于滋生和广泛发生影响的时候。

儒家思想到东汉末虽然衰落了，但它的思想中的某些部分却可以为宗教吸收和利用。这点我们可以从道教思想中找到它吸收某些儒家思想的事实得到证实。例如关于“天地人三合一致太平”的思想，它表现了儒家强烈的关心现实政治的倾向和《易传》中关于“三才”的思想，可以说直接来源于纬书的关于世界创化的模式以及阴阳五行思想等等，这些都和两汉流行的儒家思想有密切关系。我们应该看到，一般研究道教史的学者往往只注意它和道家的渊源关系，而忽视了道教和儒家在思想上的联系，这是一种偏见。

道教的另一思想来源可以说是逐渐与神仙家思想相结合的道家思想。先秦道家与神仙家虽然有着某种联系，但它们毕竟是两种不同的思想体系。到西汉初年，当时流行的黄老之学仍属道家，它所注重的往往是君人南面之术，成为一种治国经世的工具，所以司马迁在他的《自序》中谓，汉初黄老之学的要点在于“无为自化，清静自正”。

降至东汉，黄老道家之学为之一变，其一支走向祠祀求神而与神仙家结合。桓帝祠祀老子，欲“存神养性，意在凌云”，故已见黄老道家之变化。而早在西汉末已有所谓“黄老道”，后又有“方仙道”等，实已是神仙家的流派，而神仙家的思想在于追求“长生不死”“肉体成仙”，它一经

与道家思想“清静无为，恬淡寡欲”的思想结合，更加为世人所重视，而在社会上发生影响。后来道教的基本信条“长生不死”“肉体成仙”虽来自神仙家，却和道家某些思想结成不解之缘了，所以道家思想的蜕变也是道教产生的一个重要原因。

从以上两方面看，道教作为一种宗教不同于作为一种学术流派的儒家和道家，但就其思想渊源说它却离不开儒道两家，因此它一开始就是以儒道互补为特征的宗教派别。这一以儒道互补为特征的宗教派别不能不在极大程度上表现着我们这个民族文化、心理和思维方式上的某些特色。

第三，佛教的传入大大地刺激了我国本民族宗教的建立。佛教自西汉末传入中国，到东汉的中叶以后它有了一定程度的流传。佛教如同催化剂，加快了道教建立的过程。本来，神仙家在西汉就很流行，而神仙家又往往托言黄老，例如原来就有所谓“黄老道”和“方仙道”等。前者把黄帝老子神化而礼拜祠祀；后者则言“长生不死”。《史记》载，河上丈人的老师乐巨公学黄帝老子，甚至在《封禅书》中记载着有所谓黄帝因封禅而长生不死。道教经典《太平经》的编纂者于吉（或说应作“干吉”）托言此书得之于老君。汉明帝时，楚王英已对黄老和浮屠同样礼拜，“楚王英诵黄老之微言，尚浮屠之仁祠”，桓帝于宫中“立黄老浮屠之祠”。这种把黄老和浮屠同样礼拜，就说明当时把黄帝老子看成和佛一样的“神”。神仙家本来是一种方术，养生求成仙也只是个人修炼的事，并没有什么组织，特别是没有什么固定的组织形式，成为一种宗教团体。但佛教传入以后，佛教作为一种完整形态的宗教，它不仅有一套不同于中国传统思想的教义，而且是一个有教会组织的团体，还有一套教规教仪和礼拜祠祀的对象等等，这就给道教的创立提供了一个可以参考的样板。

佛教的传入对于道教的建立固然有着样板的作用，但更为重要的是，佛教作为一种外来文化进入中国传播和发生影响，必然引起华夏文化系统的反抗，这更是当时要求建立一种民族宗教的动力。一种民族文化在和传入外来文化相遇时，往往同时产生吸收和排斥两种势力，这样一种情况对中华民族来说尤为明显。关于这点，我们可以从最早的道教经典《太平经》的内容所反映的情形得到证实。在《太平经》中，我们可以发现它一方面吸收了某些佛教思想，如“本起”“三界”等即是采自佛教的名辞；另一方面又批评了佛教，有所谓“四毁之行，共污辱皇天之神

道”的说法。特别是道教一建立就提出“老子化胡”的故事，用以打击佛教，抬高道教，而表现了一种抗拒外来文化的民族心理。

从以上三方面看，在东汉末年出现一种为中华民族本民族所需要的宗教绝非偶然。而且出现的这种宗教又是来源于中国固有的神仙家，并以儒道互补为其思想基础的道教则更非偶然了。这种宗教一经出现就表现了它的强烈的民族特色，而和外来的宗教——佛教——相抗衡，这也正是中华民族的民族文化特性的一种表现。

二、道教发展成一种完整意义的有重大影响的宗教的过程表明了一种完整意义上的宗教团体发展的一般规律。

宗教的本质是什么？大家都知道它有各种各样的定义，就是在马克思主义的经典著作中，在不同情况下对宗教也有不同的说法。马克思说：“宗教是人民的鸦片”，这是就利用宗教对人民进行欺骗方面说的，而且这样的意思最早不是出自马克思，而是出自费尔巴哈，它的意思是说一些维护宗教的人说宗教可以安慰人是一种欺骗。列宁说：“宗教是劳动者的呻吟”，则是就劳动者对自己命运的哀叹方面说的。普列汉诺夫说：“什么是宗教？宗教有无数定义。……把宗教理解为用以实现其对超人的神秘力量——人认为自己依赖于这种力量——的关系的形式。”普列汉诺夫这个定义也许比较切合实际，但是我们的问题是，有没有一种超人的神秘力量以及对此超人的神秘力量应如何理解？人们为什么要相信一种超人的神秘力量？信仰一种超人的神秘力量是否即是迷信？在这里涉及一些有意义的哲学问题，即宗教与迷信同信仰的关系问题。

宗教是否就是迷信，这个问题可以长期争论下去，到什么时候可以说这个问题已经解决了，我想是不得而知的。但是我们可以相当肯定地说，虔诚的宗教徒都不可能接受“宗教即迷信”的论断。为什么呢？我想，某些虔诚的宗教徒往往是用一种理想主义的观点把所谓“超人的神秘力量”看成是超越性的“真、善、美”的化身，或者说他们往往把他们关于“真、善、美”的理想看成是一种“超人的神秘力量”。他们真诚地相信是如此，并努力致力于把他们这种关于“真、善、美”的理想实现于社会生活中。信仰和依赖这种体现超越性的“真、善、美”的“超人的神秘力

量”，大概是人们在一定历史条件下的一种心理特性。然而信仰“超人的神秘力量”的虔诚的宗教徒认为，迷信和宗教不同，“迷信”只能是对缺乏科学知识者的愚弄，没有“理想”的人精神贫乏的表现，虔诚地相信“超人的神秘力量”是“真、善、美”的化身的宗教徒也许可以接受“宗教是一种真诚的信仰”这个观点，而决不愿意接受“宗教即迷信”的论断。照他们看，人们总应该有个信仰，即使是最彻底的怀疑主义者，他们也信仰自己的“怀疑”。

宗教和信仰当然可以说有着必然的联系。宗教总是一种信仰，但是否信仰都是宗教，特别是否是古典意义上的宗教？那却并非如此。例如，我们可以说：“我们信仰科学的无神论”，或者说：“我们信仰儒家哲学”，这大概都是可以的。当然科学的无神论不是宗教，而是一种科学；就是儒家学说也最多只能说是带有某种宗教性的哲学思想体系，但它本身并非宗教。因此，我们不仅应把“信仰”和“宗教”区别开来，而且必须把带有某种宗教性的“学说”和“宗教”区别开来，否则几乎任何哲学学说都可以被说成是宗教，这样也就等于取消了宗教。

我们是否能假设，就人类的心理特性看人们确实要求有某种信仰。但问题在是否要求有一种宗教信仰。如果说可以把信仰分成两大类：一类是理性主义的信仰（或者说是理性的信仰）；一类是非理性主义的信仰（或者说是非理性的信仰）。宗教从总体上说则是属于后一类。紧接着就会有这样的问题：人类的精神生活到底也是否必须从“非理性主义”方面得到某种自我满足，或者说在社会生活中对宗教的信仰也是人们的某种心理需要。这当然是个大问题，在这里我们不可能去讨论它。我们只想说明，非理性主义的信仰要想成为一种完备意义上的宗教信仰，必须用某种理论体系为它作论证，而其理论体系又必须是能反映当时时代精神的。如果没有一套对其宗教教义作论证的理论体系，这种非理性的信仰就不可能是一种完整意义上的宗教。不仅如此，作为一种完整意义上的、特别是对人类社会历史有着长期影响的宗教还必须有固定的教会组织、教规教仪、礼拜的对象和传授的历史等等。

在历史上创立的所谓“宗教教派”何止千百万个，但并不是都可以称得上严格意义上的“宗教团体”，而许多这种组织只能称之为“迷信组织”。那么一种完整意义上的宗教团体应该是怎样的呢？我们这里将通过分析道教的发展来揭示一种完整意义上的宗教团体发展的一般规律。

完整意义的宗教必须有其宗教教义的理论体系，这个体系要有它的

哲学基础，因而它的宗教教义的思想体系决不能是纯粹的胡说八道，而总是有某种对人生理解的深刻思想内容，有成系统的哲学理论。印度佛教之所以成为影响很大的世界性宗教，正因为它有一套相当深刻的对人生理解的理论体系。道教的教义如果只是停留在如《太平经》那样一些杂乱无章的内容上，就很难成为在中国较有影响的宗教团体。因此，从汉末三国西晋到东晋以后，才有一些道教徒如葛洪、陆修静、寇谦之、陶弘景等根据时代的需要把道家老子的思想和儒家的某些学说又吸收了佛教的一些内容，结合在一起创造了道教的理论思想体系。

一种完整意义上的、有影响的宗教团体必然有其较为严密的教会组织。秦汉时的神仙家讲“长生不死”“肉体成仙”的思想尽管为后来的道教所继承，但是神仙家均以个人修炼为目的，而没有建立固定的教会组织，因此也没有成为一种宗教。东汉末年，道教已形成为有教会组织的宗教团体，它有了固定的教徒和神职人员以及教会的领袖，三国和西晋政权对道教采取了取缔的政策，致使道教组织瓦解，到东晋才为杜子恭等所逐渐恢复和发展起来。

一种完整意义的宗教还必须有一套较为固定的教规教仪。在东汉末年，道教初创时虽也有一些教规教仪，但不仅简单，而且也不固定。自东晋以后，在佛教的影响下，经过陆修静、寇谦之等人的炮制，使道教的教规教仪日趋完善。

一种完整意义的宗教必定有阐发其宗教教仪的经典，以便使信奉者的信仰有所依托。在魏晋以前，虽然已经有若干道教经典，但严格地说这些书实是为以后的道教徒所推崇才成为道教的经典的，如《老子》

《庄子》等，这些书本来是先秦道家的著作，与道教无关，而道教徒为了从历史上和理论上找他们的根据，而把这类书推尊为经典。又如《太平经》，它本成书于道教正式成立之前，因此也只能说它为道教的建立作了若干思想上的准备。但到东晋南北朝时，由于道教理论体系的建立（葛洪著《抱朴子》）和道教教会组织的发展而出现了大量阐发道教教义的经典。这个时期出现了道教三个系统的经典，即《三皇经》系、《上清经》系、《灵宝经》系。这三个系列的道教经典以后就组成了“道藏”的“洞真”“洞神”“洞玄”的所谓“三洞”三大部。

一种完整意义的宗教必定有其固定的崇奉的神灵和其教派的传授史。道教初创时已继承神仙家的故技，说自己是神仙所传授，且多托言老君。至南北朝时，道教徒更根据当时门阀等级观念而创造了“真灵之阶

位”。有陶弘景著《真灵位图》把“神仙”分为七级，最高一级的三位神仙是，居中的“元始天尊”，其左右为“高上道君”和“元皇道君”，自此以后在道观里大都以这三位尊神为最高崇拜对象。一种宗教必然要对其他宗教进行排斥，因而往往要创造自己的宗教历史，来抬高其地位。道教作为中华民族本民族创造的宗教，面对外来的佛教，除了利用“华夷之辨”等来打击佛教外，还提出了所谓“老子化胡”的故事，把自己的教主老子抬高为佛教教主释迦牟尼的老师的地位，从而引起了佛道二教长期的争论。

道教成为一完整意义上的宗教团体是在东晋南北朝时才最后完成的，它的发展完成过程大体如下：东晋以来，先是在其对已经涣散和不固定的道教组织进行重建和整顿，建立起了较为固定的教会组织；在此同时，为弥补其缺乏系统的宗教教义及其理论体系之不足，葛洪等创造了道教教义的理论体系；接着为巩固道教的教会组织而制定了一套教规教仪，为阐发其宗教教义而构造了相应的经典；最后为把道教建立成一完备的宗教团体而编造了固定的神仙谱系和虚构的传授历史。道教这样一个发展过程或者说是一种完备意义上的宗教团体发展的一般情形。我们研究宗教史的目的之一就是要把它作为一种社会意识形态来揭示其发生发展的规律，以便我们更深刻地认识它在社会生活中的作用。

三、道教哲学作为一种宗教哲学有着它明显的特点，其特点只能在和其他宗教对比中加以揭示。

一种完备意义的宗教必定有其不同于其他宗教的特点。它的特点除了表现在某些外在的形式上，如教会的组织形式、教规教仪以及尊崇的神灵等等之外，更深刻地则应表现于其理论体系的层面，这是属于宗教内容的方面。而其理论体系往往是由若干基本命题和一系列的概念范畴所表现的。如佛教的理论体系最终要论证的是“诸法无我”“诸行无常”“涅槃寂静”等“三法印”，说这是佛教和其他教派的根本区别的标志。中世纪的基督教有所谓“上帝存在”“灵魂不死”和“意志自由”等三大命题，围绕着这三大命题而有宗教哲学和它的范畴体系。那么道教哲学有没有某些不同于其他宗教派别的基本命题以及构成其哲学体系的基本范畴呢？我们认为有的，特别在早期道教中表现得更为明显。几乎所有宗教提出

的都是“关于人死后如何”的问题，然而道教所要讨论的是“人如何不死”的问题。道教的理论体系就是围绕着这个问题，从两个方面表现了它与其他宗教派别不同的特点。早期道教说它自己的思想体系是以“三一为宗”，即“天、地、人三者合一以致太平”；“精、气、神三者混而成神仙”，并从这里演变出“长生不死”“肉体飞升”“气化三清”等观念，而构成了道教的思想体系。

要了解佛教哲学的究极问题，从根本上说必须了解“涅槃”这个概念的涵义，所以俄国的佛教学专家彻尔巴斯基写了一本书专门分析“涅槃”这个概念的涵义；而牟宗三则写了《般若和涅槃》一书，结合中国佛教的特点解剖了“涅槃”这一概念。研究基督教一般说应从分析“上帝”这一概念着手，奥古斯丁（Aurelius Augustinus，354—430）作《上帝之城》论证所谓“上帝”的“神性”；经院哲学的代表托马斯·阿奎那（Thomas Aquinas，约1225—1274）著《神学大全》对“上帝存在”这个命题作了五大论证，也就是所谓本体论的论证。道教哲学的基本概念可以说是“气”，对此能从下列几个方面得到明证：

第一，所谓“三一为宗”，指的是天、地、人三者合一；而“天”“地”“人”之所以能“合一”，就在于它们同为不同性质的“气”；“精、气、神三者混一”，而“精”“气”“神”之所以能“混一”，也在于它们同为不同性质的“气”。

第二，所谓“一气化三清”，即认为道教的三位最高真神是由“气”变化而成，或者认为三重最高最神圣的“天”是由“气”变化而成，这也是以“气”作为道教的基本概念。

第三，在道教中虽也有以“道”为最高范畴，但在早期道教讲到“道”与“气”的关系大体有三种情况：一种情况是认为“道”比“气”更根本，但“道”不能离“气”；另一种情况是“气”比“道”更根本，因为道教以“气”作为宗主，如刘勰《灭惑论》引《三破论》谓：“道以气为宗”；第三种情况是认为“道”即是“气”，如陶弘景《养生延命录》引《服气经》说：“道者，气也。”研究道教教义的哲学基础，如果能把它关于“气”的概念涵义以及由“气”这一概念演变出来的概念范畴体系作出认真的分析，将会对道教的特殊本质有深入的了解。

黑格尔在《哲学史演讲录》中说：“文化上的区别一般基于思想范畴的区别，哲学上的区别更是基于思想范畴的区别。”如果我们把道教和其他宗教相比较，从道教所使用的概念范畴方面、由概念范畴形成的命题

方面以及由一系列命题形成的思想体系方面进行比较，我们就可以比较清楚地看到道教的特点。道教是中华民族本民族的宗教，但它的产生却受到佛教传入的刺激，因此我们可以通过对早期道教的历史发展中佛道之争来看道教作为一种宗教的特点何在。

道教最早的经典《太平经》一方面表现了它所受佛教某些方面的影响，如其中讲到“守一”的问题，“守一”一词虽在中国传统思想里已经有了，但在《太平经》中讲得那么多，那么突出，显然是受到汉时传入的小乘佛教禅法“安般守意”的影响。另一方面也表现了它对佛教的批判和排斥，例如《太平经》中所谓“四毁之行”，显然是针对佛教而发的；又提出“承负”的学说和佛教的“来世报应”相对立。到东晋以后，道教逐渐发展成为完全意义上的宗教，有了它的理论体系，因而和佛教的分歧就越来越明显了。那时佛教和道教的不同大体表现在三个问题上：即生死、神形问题；因果报应问题；出世、入世问题等。对这些问题加以分析，我们就可以认识到道教作为一种宗教的特点。

在我们把道教和佛教作比较中，还会遇到一个问题，即为什么道教没有像佛教那样成为世界性的宗教，而只是中华民族本民族的一种宗教呢？从道教的历史看，道教在南北朝末期或者已经传到朝鲜地区，在《三国史记》中已经记载有唐初道教传入朝鲜的情形。但不久之后，佛教在朝鲜更为流行，战胜了道教，从此道教在朝鲜几乎灭迹。这一时期，道教也经过朝鲜传入日本，它对日本原有的“神道”或者有些影响，但日本的“神道”绝不是因道教传入才有的。道教在日本也没有像象教那样流传开来。道教在历史上对其他国家就更没有什么影响了。

照我看，道教之所以没有能成为世界性的宗教，主要是由于它作为一种宗教其理论和实践都有很大缺陷，且带有过于强烈的民族性。道教作为一种宗教所追求的目标是“长生不死”和“肉体成仙”，这和其他宗教派别讲“灵魂不死”根本不同，而其宗教理论对“肉体成仙”“长生不死”的论证，一方面说太粗糙，很难令人相信，因此后来道教也不得不吸收佛教关于“形尽神不灭”和“三世轮回”等思想，这样道教的流传就大大受到限制，而佛教则可以在道教流传所到之处取而代之；另一方面，它又太接近科学，道教为了养生，要求“长生不死”“肉体成仙”，不得不注重身体的炼养，因而就把实质上是物质性的“气”抬到最高的地位，所以中国的科学技术，特别是医药学的发展和道教结上了不解之缘。道教利用科学就必然限制它作为宗教可能发生的作用，因而在道教中的“非科学”“反

科学”的成分和它中间的科学因素，就形成了一个极大的矛盾。宗教本应要求“出世”，而道教作为中华民族的一种民族的宗教却深深打上了“入世”的烙印，从每个道教徒个人说，他们要求“精、气、神”三者混一而成仙；但道教作为一宗教团体学说又提倡“天、地、人”三者合一而“致太平”，所以它有着强烈地干预政治的愿望。道教在虚构了超现实的神仙世界的同时，又希望把现实世界变成为理想世界，这也不能不是一极大的矛盾。

研究道教的特点十分重要，它不仅可以使我们了解它和其他宗教派别的不同所在，而且可以通过对其特点的分析，来了解中华民族的民族文化、民族心理和思维方式的特色，了解我们这个民族科学技术、医药卫生发展的道路及其缺陷所在。一个民族要得到发展，不仅要了解它的今天和明天，而且要了解它的昨天；不仅要了解它现实的政治、经济等方面的状况，还应了解这个民族的传统文化、传统的宗教信仰和思维方式，对中国本民族的宗教道教应该进行认真的研究，其原因也就在于此了。

VI . THE ATTEMPT OF MATTEO RICCI TO LINK CHINESE AND WESTERN CULTURES

When introduced into another country or nation a foreign culture is confronted by the problem of how to treat that cultural tradition. If it wishes to spread easily and exert influence in the country in which it is introduced it must identify with that country's native culture. Hence, as the attitude of Matteo Ricci towards traditional Chinese culture is related to his missionary goals in contacting Chinese and especially Confucianist culture, he developed an intensive knowledge of that culture and recognized its very positive value. Therefore, his missionary work is related to an important issue in the history of culture: how effectively to blend not only into one but to communicate between two cultural traditions with different backgrounds. This is the heart of the problem of cultural transplantation. Most probably, he appreciated well the significance of solving the problem and on the whole took a positive attitude towards Confucianist culture. We may observe this problem in two aspects: one is his own description of the problem; the other is how the literati of the period or a little later looked upon Matteo Ricci.

Matteo Ricci not only had a good command of Chinese, but also knew a great deal about Chinese customs and etiquette. He not only dressed in Confucianist style and called himself a "Western Confucianist" (*xiru*) with a square piece of cloth on his head, but also followed the etiquette of a Chinese scholar when meeting visitors. He made a careful study of ancient Chinese classics and records and regarded Confucius as a great man of wide knowledge. Of The Four Books (*sishu*) which he translated he wrote that it "was written by the

four great philosophers and is full of reasonable ethical thought."¹ To his mind, "it is no use at all just to know our learning without the knowledge of theirs."²

But how did he treat Chinese culture? In a letter of February 15, 1609, to another missionary he wrote:

As I have gradually illustrated, they (the Chinese) also appreciate very much the principle of filial piety, although one might hold different views. To date from its very beginning, they faithfully followed natural law in ancient times, just like the case in our country. In 1500 years, this nation did not simply worship any idols. Even though they did worship some, these idols were not so detestable as those worshipped by our Egyptians, Greeks and Romans. Some of the gods were even very moral and well-known for their good conduct. As a matter of fact, in the most ancient and authoritative works of the literati, they only worshipped Heaven and Nature and their common master. When making a careful study of all these works, we may find few things contrary to reason, but instead, most of them are corresponding to reason. And their natural philosophers are no worse than anyone else.³

The above quotations make clear the following: (1) Ricci knew very well traditional—especially Confucian—Chinese culture. As in ancient society, China was dominated by the patriarchal clan system and moral importance was attached to filial piety based on the principle of blood relation and "natural law." In China worship of Heaven and Nature is also moral and hence naturally "reasonable." Being quite knowledgeable regarding Chinese culture, Ricci regarded Confucianism not as a kind of religion, but rather as based on "natural law." (2) Ricci highly appreciated China's Confucianist culture. He saw that the idolatry in ancient Chinese culture was not like that of the Egyptians, Greeks and Romans and hence that ancient Chinese philosophy, in speaking of human nature and heavenly principles, transcended Western philosophy. This appears in his answer to Xu Guangqi's question, "China now, when virtue and rite and cultural relics are all prevailing, really flourishes culturally as though it has dispelled clouds and seen the sun again."⁴ This may be due to the fact

that as a Catholic he attached great importance to opposing idolatry and advocating morality. Matteo Ricci was strongly against the idolatry of Buddhism and Daoism (Taoism), but he did not regard Confucian worship as a kind of idolatry. Thus we can say, that, on the whole, Matteo Ricci agreed with and appreciated the orthodox Confucianist thought of Chinese culture.

As Xu Guangqi believed in Catholicism through his contact with Ricci, he respected Ricci both for his learning and for his morality. He noted that in Ricci's speech, "you cannot find even a single word which runs counter to the principle of loyalty and piety, nor can you find one harmful to the will of the people and the world."⁵ That Xu Guangqi should attach special importance to "loyalty and piety" was influenced strongly by traditional Chinese ideas and it is on this basis that Matteo Ricci preached the Catholic doctrines and received Chinese culture. One passage in *Ten Discourses by a Paradoxical Man* describes the statement of Gong Dacan made on Matteo Ricci:

On hearing his wise talk, I feel that the Confucian classics of China and those of his country corroborate each other. Thus those who believe in the real sages, either from the East or from the West, from the North or from the South, are actually all the same.⁶

All the Chinese scholars mentioned above think that what Ricci preached corresponded to traditional Chinese thought, especially to that of Confucianism, the most fundamental linking point of which lies in "the principle of loyalty and piety." As far as we know, although the Chinese intellectuals at the time set store in Ricci's knowledge of astronomy, almanac, science and technology, they valued even more highly his attempt to combine Western with Chinese culture. This probably is one of the earliest manifestations of "regarding Chinese learning as the body and Western learning for use." I shall discuss this problem later on.

I . Modes of Relating Oriental and Occidental Cultures

Judging from the above two aspects we see that, while doing missionary work in China, Matteo Ricci actually was trying to link Oriental and Occidental cultures. On this premise, we would conclude that his attempt adopted the methods of "linking Catholicism with Confucianism" (*heru*), "using the Catholic doctrines as a complement to Confucianism" (*buru*), "making in some respects the Catholic doctrines transcend the Confucian ones" (*chaoru*) "and making some revisions of the Catholic doctrines so that they would concord with the Confucianist ones" (*furu*). In short, on the above bases Ricci attempted to discover the point at which Oriental and Occidental cultures could be linked.

i . Linking Catholicism with Confucianism (*heru*)

Matteo Ricci wrote three important books on Catholic doctrines: *The True Meaning of the Lord of Heaven, Ten Discoursed by a Paradoxical Man and Twenty-five Sayings from Epictetus*. The original title of the first one is "The True Meaning of the Learning of Heaven." Obviously, he first thought of avoiding the name "the Lord of Heaven" because there is no such thing in China, to facilitate its reception by the Chinese. Feng Yingjing explains in the Preface as follows:

This book is about the questions and answers between Matteo Ricci and his fellow friends and us Chinese. What is the Lord of Heaven? It is God. It does exist.

The edition of *The True Meaning of the Lord of Heaven* in the Ming Dynasty often used the titles "God" and "Heaven" for "the Lord of Heaven" or "the Lord of Supremacy," while the present edition often uses instead "the Lord of Heaven" and "the Lord of Supremacy" simply because Ricci used those titles in order to be easily received by the Chinese. Thus in ancient times the Chinese people worshipped

Heaven, their state and their forefathers, but not "the Lord of Heaven." He tries to conform to this by quoting the classics to show that in ancient China "the Lord of Heaven" is God himself. The Chinese classics which he quotes include *The Book of Songs (Shi)*, *The Book of History (Shu)*, *The Book of Rites (Li)*, *The Book of Changes (Yi)* and *The Doctrine of the Mean (Zhongyong)*. These quotes appear more frequently in *The True Meaning of the Lord of Heaven*. For instance, in Discourse VI of Vol. II, where he answers the question about "rewarding the good and punishing the evil," he more than once quotes Chinese classics to confirm that the doctrines of Catholicism should be combined with those of Confucianism.(1) Matteo Ricci is quite aware of the existence of a supreme personal "God" in ancient China, regarding which he argues that the "Lord of Heaven" in Western Catholicism and "God" in China are one thing with different names. (2) Criticizing Zhu Xi's explanation, he argues that there is only one "supreme lord," not two (Heaven and earth). In his Introduction to *The True Meaning of the Lord of Heaven* he notes that the ancient sage advised that the subject should be faithful, but that they cannot be faithful to two lords. Of the three Cardinal Guides, ruler guiding subject stands first for since a state has its head, how can Heaven and earth not have their lord? As a state should be unified, how can Heaven and earth have two lords? All these ideas obviously show his interpretations of the Catholic doctrines in relation to Confucianism. (3) Quoting the ancient classics he also states that God wills to impose fortune and misfortune on humanity. (4) So God has his own "sphere" (*ting*) which is different from the "Heaven" (*tian*) in nature. From all these we can see that what Matteo Ricci attempts to prove is that Catholicism coincides with Confucianism and the ancient Chinese classics.

ii . Complementing Confucianism (buru)

Lettere dalla China is a note written by Matteo Ricci in Italian in China. Later a British missionary translated it from Italian into Latin and added something concerning the history of missionary work as

well as of Matteo Ricci, the missionary. It also has an appendix relating the missionary's posthumous glory and pathos. One passage in the book reads as follows:

In answering what the main content of Christianity is, Dr. Xu Guangqi sums it up very exactly in four Chinese characters: "expelling Buddhism and complementing Confucianism" (*qufo buru*). That is to say, it wants to expel the idol of Buddhism and add something to the doctrines of Confucianism.⁷

As generally any religion is characterized by excluding others, Ricci criticized Buddhism and Daoism (Taoism), especially the former, since he wanted to bring Catholicism to China; this shows signs in nearly all his works. St. Augustine once pointed out that the main content of a heathen religion should resolutely be given up, but that the ideas put forward by some heathen philosophers should be taken into account, accepted or approved if they were really reasonable. Matteo Ricci took this approach to the doctrines of Confucianism. He declared that Confucianism had nothing to do with religion, but was rather a kind of philosophy. He particularly esteemed Confucius, noting that as Confucius lived five centuries before the birth of Jesus Christ he could not know what was to happen 500 years later. "Ricci just quotes the classics of Confucianism in their own terms, saying nothing of how they should be evaluated after the death of Confucius."⁸ In *Ten Discourses by a Paradoxical Man* there is a passage about Gong Dacan's discussion with Ricci on the issue "whether good or evil will be rewarded posthumously." Gong first notes that the Chinese classics, because Emperor Qin Shihuang burned books and persecuted scholars after the death of Confucius, lost the records of the paradise, hell and retribution, which are still in a good state of preservation in the West: "Thus the stories about the paradise and hell are well preserved." In China, the story of retribution in later ages "is both vague and strange to scholars, who half believe and half doubt its existence." Gong also tries to prove the probable existence of the paradise by quoting ancient classics, but he still doubts the idea that

"bestowing charity is bound to be rewarded a place and stand long." Ricci explains this according to the doctrines of Catholicism in which retribution to those who bestow favor does not consist in "place" or "life span." A man living in the world should work hard for the Lord of Heaven instead of intending to be rewarded in his lifetime; he should be confident that he will finally go to the paradise. Therefore, answering Xu Guangqi he says: "Those who suffer simply for benefit and emolument or fame and official rank or lasciviousness rather than the sacred cause are actually tragic. But those who suffer for the Lord of Heaven are obviously happy and seem to live in the paradise."⁹ It is apparent that he wants to complement the thought of Confucianism with Catholic doctrines, but the approach he adopts is not to negate the Confucian classics but to extend and develop them so as to show that the Confucian ideas do not run counter to those of Western religions but may be complemented by them.

In *The True Meaning of the Lord of Heaven* many passages deal with the "retribution of good and evil." In Discourse VI "On Man's Being Rewarded with Heaven or Punished with Hell after Death," he more or less complements and revises the Confucianist concept that "the family always doing good is bound to be fortunate, whereas the family always doing evil is doomed to misfortune." To him, there is not only retribution in one's lifetime or to one's descendants (he seems not to be in favor of that to one's descendants). What is more important is posthumous retribution: those who do good will go to Heaven instead of going to Hell after death. But as their purpose is not just this, Ricci adds:

All those who do good usually have three intentions: (1) to go to Heaven instead of going to Hell; (2) to reward the kindness bestowed by the Lord of Heaven; and (3) just to follow the imperial edict given by the Lord of Heaven.¹⁰

The first intention serves as a bridge in order for one to reach the third; that is, doing good is after all following the imperial edict.

However, the Confucianists did not know this, and even criticized the concepts of Heaven and Hell simply because they could not understand their deep significance: "The Confucianists criticize the concepts of the Heaven and Hell because they do not know truth."¹¹ We can see roughly the difference between Catholicism and China's Confucianist tradition. Since the Confucianists talk about "the retribution of good or evil" just from personal moral cultivation, so everyone should "have self-cultivation" or "stick to morality" only for the purpose of reaching one's inner moral accomplishment. In this sense, it is pursuing a kind of "inner transcendence." But the Catholic doing good is after all for "the Lord of Heaven," which is a kind of power of "outer transcendence." So it pursues or follows a kind of "outer transcendence." I shall discuss this problem later on.

iii . Transcending Confucianism (*chaoru*)

The aim of China's Confucianist theory is to pursue "inner transcendence," whereas that of Catholicism is to pursue "outer transcendence." In *The True Meaning of the Lord of Heaven* Matteo Ricci points out this shortcoming of Confucianism and criticizes it.¹²

As far as we know, traditional Chinese philosophy, Confucianist philosophy in particular, is strikingly different from Western philosophy and religion. The Greek philosophy of Plato and Aristotle had already divided the world into two parts: a transcendental noumenon and a real world. Thereafter Christianity was concerned especially with an outer transcendent God, whereas traditional Chinese philosophy was characterized by "inner transcendence." What Confucius means by "nature and the doctrine of Heaven" is a matter of inner transcendence, and what Mencius meant by "thinking hard, knowing nature and Heaven" is also a matter of "inner transcendence." There is a sentence in *Xici* saying: "A feminine (*yin*) and a masculine (*yang*) equal a world, and it is followed by virtue (*shan*) and will have a nature," which is a matter of "inner transcendence." According to this, one may reach a realm leading to a transcendental "way of Heaven" through one's own inner moral cultivation, without the help

of an outer transcendent power. But for Ricci, one can hardly reach the culminating realm just through one's inner moral cultivation; one must be pushed by an outer transcendent power or God; thus it is necessary to believe in God. That is to say, Ricci considers the doctrines of Catholicism to be more perfect than those of Confucianism.

iv . Concordance with Confucianism (furu)

This concept means that it is necessary to make some revisions of the Catholic doctrines or to yield to some of the Confucianist ideas in order to concord or chime in with China's traditional Confucianist thought. The editor's Preface to the French 1978 edition of *Lettere dalla China* says:

Immediately before Ricci's death, the methods adopted by the Chinese missionary group led by him had already become an issue argued both at home and abroad. It was disputed with two objections. In practice, he was accused of paying too much attention to developing his relation to the Confucianist elite instead of pushing forward the missionary cause. In theory, he was also opposed for his positive evaluation of Confucianism. Some people even pointed out that, if so, it would run a risk of sullyng the purity of Christianity. Only by means of a heightened religious emphasis can the missionary preach the Gospel to the broad masses of people and make evident the characteristics of Christianity.¹³

I have already pointed out that Matteo Ricci had some opinions of China's Confucianist tradition and attempted to link Western and Eastern cultures. Naturally, he knew clearly that there were many differences and conflicts between Confucianism and Catholicism and probably would have dealt with these by the methods of "complementing Confucianism" and "transcending Confucianism." If his missionary work were completely according to Catholic doctrines, however, he would have been confronted with more difficulties. Therefore, he had to make some revisions of the Catholic doctrines so as to cater to the Chinese tradition and it is not strange that he was criticized. As to how he adapted Catholicism to Confucianism, the following should be noted.

(1) In order to fit Catholicism to Chinese society, he explained its differences from Chinese society. In the Italian edition of his *Lettere dalla China*, there is a passage describing how the Confucianist offers sacrifices to gods.

However, according to an old law, there is a grand Confucian temple in every big city where the literati gather, with a figure of Confucius enshrined and his name; every year, the literati offer sacrifices to him four times, with a candle burning and a beast is killed. However, as they do not think of him as godly or want anything of him, such a rite cannot be called a real offering.¹⁴

In Matteo Ricci's books, there are many signs of the Catholic stance against idolatry; the criticism of Buddhist idolatry is particularly strong. However, he never criticizes Confucian offerings to the Sage, nor does he criticize the Chinese offerings to their ancestors. The issue concerning offerings is an important reason why China later forbade the preaching of Catholicism. In 1704, the Vatican gave orders that Chinese Catholics should not follow traditional Chinese rites that did not conform to Catholicism. Obviously, offering sacrifices to Confucius as well as to ancestors is especially counter to Catholicism; this led the Chinese government to limit and even forbid the preaching of Catholicism. Since Matteo Ricci well understood Chinese conditions, he adopted the method of compromising with the Chinese tradition for the sake of adapting to Chinese society as well as his missionary work, although the attempts did not conform to the doctrines of Catholicism.

(2) He makes some Catholic ideas conform to traditional Chinese Confucianist thought so as to enable the Chinese to accept Catholicism. As mentioned previously, the "Lord of Heaven" in Catholicism is, of course, the supreme personified God, but Ricci's *The True Meaning of the Lord of Heaven* does not mean this according to its original title. In that book he often uses such words as "God" and "Heaven" of Chinese origin, instead of the "Lord of Heaven." According to Fang Hao's *Collected Essays on the History of Chinese Catholicism*, in

contrast to the edition of the Ming Dynasty, it is found that the later edition has changed the words "God" or "Heaven" in the Ming to "Lord of Heaven" or "Supreme Lord" in 79 places.¹⁵ In the Chinese language there are already such words as "God" (*shangdi*) and "Heaven" (*tian*), but in traditional Chinese thought *tian* has several meanings. Among these Ricci takes the meanings "God," "Heaven" and the supreme personified God, but for the Chinese people there may be some other meanings. In 1715, after Ricci's death, the Pope gave an edict that the name "Lord of Heaven" was a legal one and such names as "God" and "Heaven" should no longer be used because they could be interpreted in different ways.

Also, according to Professor Luo Guang, "Ricci's *Twenty-five Sayings from Epictetus* is actually composed of 25 chapters. Every chapter is short and concise. It advises people to live simply and to restrain desire and feeling. Happiness lies in one's secure state of mind without being stirred either by good fortune or misfortune. The purpose of human life lies in one's obedience to the Lord of Heaven. . . ." It is apparent then that the book is intended to conform to Chinese conditions.

(3) Ricci made some revisions in the "idea of sin" in order that it should approach more closely the "idea of virtue" in China's Confucianist tradition. As the "idea of sin" in Catholicism implies, human nature cannot be considered "virtuous," which is entirely different from the "idea of human nature being virtuous" in China's traditional Confucianist thought. In accordance with St. Augustine's interpretation, man is born to be "sinful" because of his rational choice. In the final analysis, what causes man to choose evil with reason is his vanity, or an ego-centric desire that puts himself over God. Such a desire usually drives him into following his own intention and holding in contempt God's decree, which is particularly apparent in human desire. Augustine then adds that, since man intentionally chooses evil and commits sins violating God, he can never recover his original state with his own effort. For such a "sin" causes him to

degenerate inevitably, being characteristically ego-centric in willing and desiring and able only to choose "committing sin" or tending to "evil."

In this regard in the 7th discourse of *The True Meaning of the Lord of Heaven*, Ricci thinks that the "human nature" refers to what differentiates man from metal and stone, grass and wood, bird, beast and even spirit, and this is why man "can reason things out." So he says: "What can reason things out is alone called human nature, which is different from other creatures." "Virtue and morality come after reason, which itself is something dependent, and not human nature itself." Thus, "reasoning things out" refers simply to this virtuous "ability," and "human nature is born to be virtuous." This obviously caters to Confucianist ideas. But since Matteo Ricci could not completely violate the doctrines of the Lord of Heaven, he thinks that man is "able to reason things out." How can he get such an ability? Just as farmers plough, weed, remove the stones and irrigate before they sow seeds in order to get good harvests, so "learners should first of all get rid of evil before they could be virtuous. Only by standing aloof from worldly success can they be successful." As this idea is associated with that of "sin" in Catholicism, it could not but conflict with the so-called idea of "good ability." Thus it is quite difficult to reconcile one cultural tradition with another.

From the above four points we can see that Matteo Ricci preached the doctrines of Catholicism for the purpose of linking Oriental and Occidental culture together. Whether his attempt was successful or not will not be evaluated here, but that he was the very first Westerner to make such an attempt is certainly of historical importance.

II . "Body and Use" and the Correlation of Chinese and Western Harmony

In trying to link Western and Chinese culture, often we encounter

the problem of the "body and use" (*tiyong*), of Chinese learning and Western learning. In preaching Catholicism in China, Matteo Ricci could not but consider his relation to traditional Chinese thought and culture. Similarly, in receiving Catholicism, the Chinese had to consider such a relation. Above I have discussed how he dealt with this problem. Now let us consider how the Chinese intellectuals at the time received Catholicism. In my opinion, such receivers of Catholicism at the time as Xu Guangqi, Li Zhizao and others in receiving or studying Western learning took the attitude: "Chinese learning as body and Western learning for use." We know that although the Protestants were active at that time even at the court in Beijing, yet "the Chinese court made use of them only by employing their techniques." "For example, Ricci once repaired clocks and other machines in the court, and Tang Ruowang (Johann Adam Schall von Bell), Nan Huai ren (Ferdinand Verbiest) and others joined in revising the calendar." "What China's enlightened literati were particularly interested in was to learn from them their science and knowledge." "They did not have great success in shaping China's intellectuals,"¹⁶ for few Chinese intellectuals received the doctrines of Catholicism. As these were received chiefly due to his association with traditional Chinese thought, especially the Confucianist morality, his attempt can be regarded as another earlier form of "regarding Chinese learning as body and Western learning for use" formulated in the 1860s.

During subsequent centuries there have been various attempts to correlate "Chinese learning" and "Western learning" with that between "body" (*ti*) and "use" (*yong*), such as "Chinese learning as body and Western learning for use," or "Western learning as body and Chinese learning for use" and even "both the learnings as body and for use interchangeably." Those who regard "Western learning as body and Chinese learning for use" are called "all-Westernizers" (*quanpan xihua pai*); those who regard "Chinese learning as body and Western learning for use" are called "Chinese culture supremacists" (*guocui pai*). Such confusions are caused by the attempt to describe the relationship

between "Chinese learning" and "Western learning" with that between "body and use." As a matter of fact, none of the above ideas are tenable.

As a pair of important categories in the history of Chinese philosophy, "body" and "use" are not substantial categories, but rather fundamental relations. "Body" (*ti*) generally refers to the "inner transcendental spirit" or "transcendental noumenon." It corresponds to what Mencius means by "conscience" (*liangzhi* or *liangneng*) and Wang Yangming by "mind" (*xin*), etc.; the latter corresponds to "God's will" (*tianming*), " *taiji*," "God's word" (*tianli*) and "logos" (*dao*), etc. "Use" (*yong*) refers to the various functions demonstrated by such an "inner transcendental spirit" or "transcendental noumenon." According to traditional Chinese philosophy, *ti* and *yong* are unified, with the former presenting the latter for, as Wang Bi in the Wei-Jin dynasties pointed out, there would be no corresponding *yong* without *ti*. The so-called concept of "Chinese learning as body and Western learning for use" is nothing but an effort to preserve the inner transcendental noumenon in Chinese tradition, so as to reject the Western spirit. For how could we make "Western learning for use" if we should do like that? Similarly, it is impossible to regard "Western learning as body and Chinese learning for use." The former will inevitably result in "Chinese learning both as body and for use" and, the latter, "Western learning both as body and for use."

As for "both the learnings as body and for use interchangeably," it can be interpreted as: if something in Chinese learning is good we should regard "Chinese learning as body and Western learning for use"; also, if something in Western learning is good we should in turn regard "Western learning as body and Chinese learning for use." Such an idea is obviously untenable. It will do nothing but include both attitudes in the so-called concept of regarding "both learnings as body and for use interchangeably," which is just eclectic. Professor Fang Keli involves himself in a confused eclectic situation although he criticizes the above two attitudes in his "Chinese Learning as Body

and Western Learning for Use' and 'Western Learning as Body and Chinese Learning for Use.'" ¹⁷

It would give rise to "stealthily substituting one culture for another" if we use the relation of *tiyong* to explain the relationship between Chinese culture and Western culture. If we do not improve the cultural soil and other conditions, but just stealthily substitute one culture for another, the cultural foundation will not be solid. Thus to my mind, our modern society should have its modern spirit and various systems embodying such a spirit. If we use the relation of *tiyong* to explain this problem, we might probably regard "the modern spirit as body and the systems and their functions embodying such a spirit for use." If so, one might ask: what is the "modern spirit"? And what are the "systems and their functions embodying the spirit"? Here I would refer to the point of view put forward by Mr. Yan Fu, who once criticized the idea of regarding "Chinese learning as body and Western learning for use." He also points out that body and use should be unified rather than dual. Particularly, he lays emphasis on the significance of science and puts forward a very meaningful proposition: "liberty as body and democracy for use." I do think that such an idea of his is probably of certain modern significance. So in my opinion, "liberty" is the concentrative embodiment of the modern spirit, or an inner spirit in the modern era and a universal ideal that the people in modern society are pursuing; whereas "democracy" consists of various systems of modern society ensuring everyone "liberty," rather than certain people only. We now live in Chinese society. It is most important to give everyone "liberty" and have a set of democratic systems ensuring its realization if we want to enable our society to become modernized. Only in this way, can people give full play to their enthusiasm and creativity, and our country set foot on the road not only of the "four modernization" but also of all-around modernization.

陆 论利玛窦汇合东西文化的尝试*

从历史上看，一种外来文化在它开始传入另一国家或民族时，必然会遇到如何对待原有文化传统的问题。如果想使外来文化在所传入的国家或民族能比较容易流传和发生影响，就必须与原有文化有所认同。利玛窦对中国传统文化持什么态度，其目的虽与他的传教有关，但是在他与中国文化（主要是儒家思想）接触的过程中，对中国文化有了相当的了解，并对儒家文化的价值有了肯定的正面认识。因此，利玛窦的传教活动就涉及文化史上的一重要问题：即如何调和两种不同背景的文化传统，它们不仅是接触而且是融会贯通成为一体。这就是文化的移植问题。利玛窦很可能了解解决这个问题的重要意义。因此，在总体上利玛窦对儒家文化采取了肯定的态度。这个问题我们可以从两个方面来看：一是看看利玛窦本人对此问题的说法；二是看看当时或稍后的知识分子（士大夫）对利玛窦是如何看的。

利玛窦不仅精通汉语，而且懂得中国的礼仪和风俗，他不仅全身着儒装，头戴方巾，自称“西儒”，而且见客时用秀才礼节。他对中国典籍进行了深入钻研，认为孔子是一位博学的伟大人物；他翻译了《四书》，认为《四书》“是四位很好的哲学家写的，书里有很多合理的伦理思想”，¹因此他认为“仅知道我们的学术，不通晓他们的学术，毫无用处”。²

那么利玛窦如何看待中国文化呢？在1609年2月15日他给另一位传教士的信中说：

“正如我逐步说明的那样，他们（按：指中国人）同样地倾慕着孝道，尽管其他人可以持相反的看法。如果从头说起，他们在古代就像在我们的国家里那样忠诚地遵循自然法则。在1500年中间，这一民族简直没有崇拜过偶像，而他们崇拜的那些偶像也不像我们的埃及人、希腊人和罗马人的偶像那样可憎。某些神灵甚至很有德性，并以他们的善行而享有盛名。事实上，在文人们最古老的、成为权威的著作中也仅仅崇拜天地和这两者的共同主宰。当我们仔细研究一下所有这些著作时，我们就会发现其中很少有什么东西是和理性之光相反的，而大量的倒是与之相一致的，他们的自然哲学家并不比任何人差。”³

从上面引的这段话中，我们可以看出：（1）利玛窦对中国传统文化，主要是儒家思想有比较深入的了解。中国古代社会是以宗法制为纽带的，所以重孝道，以“亲亲”为原则，所以“自然法则”（按：罗光《利玛窦传》译为“天理”）也是带有某种道德性的，而中国对天地和祖先的崇拜也只是某种道德性的，所以是合乎“理性”的。可见利玛窦对中国文化有相当认识，所以他不把儒家看成是一种宗教，而以为它是建立在“自然法则”基础上的哲学。（2）利玛窦对中国的儒家文化的评价是很高的。他认为，中国古代文化在对偶像崇拜上不像埃及人、希腊人和罗马人那样，所以中国古代哲学在讲人性天理的问题上超西方古代。他在回答徐光启时有一段话可以说明他对中国文化的看法，他说：“比至中华，获瞻仁义礼乐声明文物之盛，如复拨云雾见青天焉。”⁴我想，这一点是与天主教也把反对偶像崇拜和伦理道德问题看得很重有关。所以利玛窦极力反对佛教和道教的偶像崇拜，而不把对孔圣人的崇拜和祖先崇拜看成为偶像崇拜。因此，我们可以说，利玛窦对中国文化的正统儒家思想从总体上是肯定的和赞赏的。

徐光启由于结识利玛窦而信奉了天主教，他很敬重利玛窦的学问和道德，说利玛窦的言谈“百千万言中，求一语不合忠孝大旨，求一语无益于人心世道者，竟不可得。”⁵徐光启看重“忠孝”实是深受中国传统思想的影响，谓利玛窦所传天主教义之基本点亦在“忠孝”，利玛窦接受中华文化当是事实。在《畸人十篇》中有一段记录龚大参对利玛窦言论评论的话说：

“窃听精论，即心思吾中国经书与贵邦经典，相应相证，信真圣人者，自东自西，自南自北，其致一耳。”⁶

以上中国学者大都认为利玛窦所宣讲的学说和中国传统思想，特别是儒家思想相合，而最基本的相合点就在“忠孝大旨”。我们知道，当时的中国知识分子对利玛窦的天文、历算、科技等知识虽甚看重，但他们更为重视的实是利玛窦所言与中国文化相合者。这也许正是“中学为体，西学为用”的一种最早表现形式，这个问题我们后面再讨论。

一、天主教与儒家文化汇合的尝试

从以上两个方面看，利玛窦在中国传教时，实际上在作着使东西文化汇合的尝试。有了这个前提，我们就可以进而讨论利玛窦汇合东西文化的尝试了。我以为，利玛窦采用了“合儒”，即以天主教义与儒家学说相合；“补儒”，天主教义可以补充儒家学说；“超儒”，天主教义某些方面超过儒家学说；“附儒”，对天主教义作某些修改，以附会儒家思想。利玛窦大体从这些方面搜东西文化的结合部。

1. 合儒

利玛窦有三部讲天主教教义的重要著作：《天主实义》《畸人篇》《二十五言》。《天主实义》这部书原名《天学实义》，看来利玛窦最初考虑避免用中国原来没有的“天主”这一名称，而“天学”本身又无多大宗教性，中国较易接受。冯应京序中对这部书有如下的说明：

“《天主实义》，大西国利子及其乡会友，与吾中国人问答之词也。天主何，上帝也；实云者，不空也。……是书也，历引吾六经之语，以证其实，而深诋谭空之误。”

明版《天主实义》多用“上帝”与“天”之名命名“天主”或“上主”，而今本多改“上帝”与“天”为“天主”或“上主”，可见利玛窦为使中国人便于接受，采用了“上帝”或“天”这样中国原有的名称。对中国人来说，古代有祭天、祭社稷、祭祖先，但没有对“天主”的崇拜，对这个问题利玛窦引经据典论证“天主”就是中国古代的“上帝”。他引用的中国古书包括《诗》《书》《礼》《易》和《中庸》等。这样的情况在《天主实义》中还有多处，如下卷第六篇回答“赏善罚恶”问题，亦多引中国经典以证天主教义与儒家思想相合，不详述。上面引的一段话说明：（1）利玛窦确实觉察到我国古代有一至高无上的人格神“上帝”，他以此论证西方天主教的“天主”和中国的“上帝”不过是名称不同，实际上是一回事。（2）为此他又论证“至高无上者”只能是一个，而不能是两个（天地），并批评了朱熹的解释。在他作的《天主实义引》中说：“平治庸理，惟竟于一，古贤圣劝臣以忠。忠也者无二之谓也；五伦甲乎君，君臣为三纲之首。……邦国有主，天地独无主乎？国统于一，天地有二主乎？”此均为用中国儒家思想来解释天主教义者也。（3）又引经典说明上帝是有意志的，可以降祸福人间；（4）所以上帝有“庭”，和自然界的“天”不是一回事。从这些看，利玛窦无非是要证明天主教和儒家学说、中国古代经

典是相合的。

2. 补儒

《利玛窦中国札记》是利玛窦用意大利语在中国写的札记，后来一位传教士金民阁把它从意大利文译成拉丁文，并增添了一些有关传教史和利玛窦本人的内容，附有利玛窦死后荣哀的记述。在这部书中有一段话：

在问到基督教法的主要内容是什么时候，徐光启博士就非常确切地用四个字来概括：‘驱佛补儒’。这就是说：它驱除佛教的偶像，并补足儒生的教法。⁷

任何宗教都有排斥其他宗教的特性，因此利玛窦要想使天主教进入中国，他就必然要批评佛教和道教，特别是佛教，这点在他的各种著作中都表现出来。圣·奥古斯丁曾经提出，对异教徒的信仰主体而言，应该坚决摒弃；而对异教徒他们代表某些异教哲学家的教诲说，则应予以考虑，或接受或赞同，假如它们是合乎理性的。利玛窦实际上是采用了这种方法对待儒家学说。他宣称儒家与宗教无关，而是一种哲学。他特别推崇孔子，并且说孔子是生活在耶稣五百年以前，他不可能知道五百年以后的事情和道理，因此“利玛窦就把儒家经典引为己用，只讲孔夫子以后所应增补的东西。”⁸在《畸人十篇》中有一段龚大参与利玛窦讨论“善恶之报在身后”的问题。龚大参首先提出：由于中国经典在孔子之后经过秦始皇焚书，因而记载天堂地狱报应的文献散失了，而西方经典常存，“故天堂地狱之说，至为详备”。在中国后世报应之说“且不明不谳焉。因而使儒者，疑信半混之，有无之间也”。龚大参虽也引古代经典说明可有天堂，但仍对“大德必得其位，必得其寿”有所疑问。于是利玛窦据天主教义为之解。他认为对有德者的报应并不在于“位”与“寿”，一个人生活在世界上应为天主而劳苦，并不要求得到今生的善报，他应相信终归可以进入天堂。所以在他回答徐光启时说：“为义被窘难者……若为利禄，为功名，为邪淫，又种种非义者，徒劳苦也。若为天主为义，而受窘难，此乃真福也，故谓已得天国矣。”⁹这显然是企图用天主教义补充儒家思想，但利玛窦采用的方法不是否定儒家经典，而是顺着它加以引申发挥，说明中土学说与西方教义并不相悖，只是还可以补充而已。

在《天主实义》中讨论“善恶报应”的地方很多，第六篇“论死后必有天堂地狱之赏罚以报”，其中对儒家的“积善之家，必有余庆；积不善之

家，必有余殃”的观念也有所补正。照利玛窦看，不仅可以有现世之报或由子孙受报（利玛窦似不赞成“子孙受报”），但重要的是死后受报。行善事死后可登天堂免地狱，否则要入地狱，但行善事并非仅仅是为了“登天堂免地狱”，故利玛窦说：

“凡行善者有正意三状：下曰，因登天堂免地狱之意；中曰，因报答所重蒙天主恩德之意；上曰，因翕顺天主圣旨之意也。”¹⁰

“下意”是引导人们达到“上意”的桥梁，人们行善最终应是顺应上帝的意旨。但是儒家不了解这一点而对天堂地狱的说法加以批评，那是因为它对其中的深刻道理还不了解，“儒者攻天堂地狱之说，是未察此理耳。”¹¹从这里我们已大体可以看出天主教与中国儒家传统不同。盖儒家讲“善恶报应”是从个人的道德修养上讲的，因此，每个人应该“修身”，或者说应该“明明德”，这仅仅是求得个人内在的道德上的完善，就这一意义说它是追求一种“内在的超越”。但天主教行善终目的应是为了“天主”，而“天主”是一种“外在的超越”力量，所以它所追求的，所崇奉的是一种“外在的超越”。这个问题下面再进一步讨论。

3. 超儒

中国儒家学说以追求“内在超越”为目标，天主教则以追求“外在超越”为目标，利玛窦《天文实义》在批评儒家缺点时指出了这一点。¹²

我们知道中国传统哲学（特别是儒家哲学）和西方哲学与宗教很不相同。古希腊哲学，在柏拉图、亚里士多德那里大体上把世界二分为超越性的本体和现实世界，其后基督教更是要有一个外在的超越性的上帝，而中国传统哲学则是以“内在的超越性”为其特征。孔子的“性与天道”问题是一内在超越的问题，孟子的“尽心知性，知天”更是一由内在而超越的“内在超越性”问题；《系辞》中说：“一阴一阳之谓道，继之者善，成之者性”则是一由超越而内在的“内在超越性”问题。这一“内在超越性”问题认为，人们可以通过其内在道德修养（因为人性善）而达到与超越的“天道”汇通的境界，不需要有一外在的超越力量来促使他们如此。但上面所引的利玛窦那段话，显然他认为仅仅靠人自身的内在道德修养是很难达到完满的境界，必须有一外在的超越力量上帝来推动，因此信仰上帝是完全必要的。这就是说，利玛窦以为天主教教义比儒家的学说更圆满。

4. 附儒

所谓“附儒”就是说，为了附会中国儒家传统思想，而对天主教义作某些修改或牵就某些儒家思想。1978年利玛窦的《利玛窦中国札记》法文版序言中说：

早在利玛窦的生命临终时，他领导的中国传教团的方式就已经成为中外聚讼纷纭的对象，人们提出两个反对意见。在实践方面，人们指责利玛窦过分关注发展与儒家杰出人物的关系，而不是布教事业的进展；在理论方面，他对儒家的积极评价也受到非议。有人提出，这样做则会冒有损于基督教义纯洁性的危险，而更明确的宗教方法才可以使传教士们直接向人民大众传播福音并突出基督教的特点。¹³

上面我们已经讲过利玛窦对中国儒家传统的某些看法，以及他对汇合东西文化所作的若干尝试。当然，利玛窦也知道儒家学说与天主教也有相当多的冲突处，他或者可以用“补儒”和“超儒”的办法来补救，但是如果他的传教要完全按照天主教义的一套，那肯定会遇到更多的困难。在此，他为了迎合中国传统也不得不对天主教某些方面有所修改，所以上面引用的那段话中对他的批评也不是无的放矢的。利玛窦如何使天主教附会儒家学说，我认为有以下几点可以注意：

（1）为中国传统与天主教不合处开脱，以便使天主教适合中国社会。在《利玛窦中国札记》意大利原文本中有一段说，它对儒家的祭祀作了简明的叙述，他说：

然而，根据一条古老的法则，在文人荟萃的各大城市中，都建有一座庄严的孔庙以供他的塑像，写着他的姓名和尊号；在每次朔望以及一年四次，文人们都要向他奉献一次祭祀，点燃香烛并供一只已宰杀的牲畜，尽管他们不承认他有任何神性，也丝毫无求于他。所以，这种礼节不能称之为真正的祭祀。¹⁴

天主教反对偶像崇拜，在利玛窦书中比比皆是，例如对佛教和道教偶像崇拜的批评十分严厉。但利玛窦从不批评儒家对孔子的祭祀，甚至也不批评中国人对祖先的祭祀。关于祭祀问题是后来中国禁止天主教传教的一个重要原因。1704年，罗马教廷曾有命令要求中国天主教的信徒不得遵照与天主教不合的中国传统的礼仪，其中的主要问题就是祭孔和祭祀祖先的问题，这样就引起了当时中国政府对天主教传教的限制和禁止。看来，利玛窦比较了解中国的国情，为适应中国社会和便于他们传

教，他采用了向中国传统妥协的办法，虽然这种做法与天主教义不甚相合，利玛窦也这样做了。

（2）使天主教某些思想附会中国传统的儒家思想，以便中国人能接受。前面我们已经说过，天主教的“天主”当然是至高至尊的人格神，但利玛窦的《天主实义》原名《天学实义》，而书中“天主”常采用“上帝”和“天”这样中国原有的名称，据方豪的《中国天主教史论丛》中说：他取明版与后来的版本相对照，发现后来的版本改明版“上帝”或“天”为“天主”或“上主”共七十九处。¹⁵原中国有“上帝”和“天”之名词，但“天”在中国传统思想中实有多种涵义，利玛窦虽取“上帝”、“天”即至高至尊人格神的涵义，但在中国人看来仍可有其他的涵义。这个问题到利玛窦死后的1715年教皇格来孟第十一世下令规定“天主”二字为法定名称，不准再采用“上帝”与“天”这样的名称，就是因为“上帝”和“天”可以引起不同的解释。

又如利玛窦的《二十五言》，据罗光教授分析，认为：“《二十五言》为二十五章，每篇简短，书中劝人终日乾乾，克制欲情，人生的幸福，在人平生心常安定，不为祸福所动。人生的目的，为事奉天主……”可见《二十五言》是有意适应当时中国人的需要而作如是说。

（3）对天主教的“原罪说”作了某些修改，以便它接近中国儒家传统的“性善说”。照天主教的“原罪”学说，人性不可谓“善”，这和中国传统的儒家思想的“性善说”相径庭。据圣·奥古斯丁说，人类之所以有“原罪”，是人类用理性选择的结果，究其根本，导致人运用理性去选择罪恶的是人的骄傲心，一种把自己置于上帝之上的自我中心的欲望。这种欲望驱使他顺从自己的意向蔑视上帝的旨意。它特别表现在人性的欲望中。奥古斯丁接着论证，自从人有意识地选择了恶，犯下了违抗上帝的罪行，人类便再也没有可能通过自己的努力来恢复他堕落的状态，因为这种“原罪”使他无可挽回地向下堕落，总想以自己为中心，顺从自己的意志和欲望，只能选择“犯罪”或倾向于“罪恶”。

关于这个问题，在《天主实义》第七篇“论人性本善而述天主门士正学”中，利玛窦认为，所谓“人性”是指人区别于金石、草本、鸟兽以至于鬼神的，这就是人“能推理论者”。他说：“能推理论者，立人为本类，而别其体于他物，乃所谓人性也。”而像“仁义礼智，则在推理之后。理也，乃依附之品，不得为人性。”因此，所谓“能推理论者”是说有这样的为善的“良能”，就此意义说“人性本善”。这自然是为了迎合儒家的观点

而有的。但利玛窦又不能全然违背天主教义，他又认为人虽有此“能推理论者”（得到理的能力，理即仁义礼智等），但如何才能得到，照他看应如农夫先耕地、除草、除瓦石、灌水，然后再播种，才会有好收获。因此，“学者先去恶，而后能致善，所谓有所不为，方能有为焉。”这一观点又和天主教“原罪说”联系起来，从而不能不与关于所谓“良能”的说法形成矛盾。看来，要把两种不同文化传统全然调和起来是有相当困难的。

由以上四点可以看出，利玛窦的传播天主教义，实想通过汇合东西文化而达到其目的。他的汇合东西文化的尝试是否成功，姑且不论，不过他毕竟是西方人士的一个最早尝试者，总是有其历史意义的。

二、“中学”“西学”与“体”“用”之辨

在探讨中西文化的汇合或沟通时，我们常常会碰到中学和西学的“体用”问题。利玛窦在中国传播天主教不得不考虑它和中国传统思想文化的关系；同样中国人接受天主教也不得不考虑它和中国传统思想文化的关系。上面我们已经讨论过利玛窦如何处理这个问题，下面我们再来看看当时中国知识分子是如何接受天主教的。我以为，那时接受天主教义的如徐光启、李之藻等以及其他知识分子大都实际上也是用“中学为体，西学为用”的态度接受或者了解西学的。我们知道，那时耶稣会士在华活动，尽管也进入北京宫廷，但“中国朝廷利用他们严格限于利用他们的技术”，“如利玛窦之入宫修理钟表机械，汤若望、南怀仁等人之参与历局修订历法等等，正有如中国开明士大夫真正感兴趣的，主要也仅限于向他们学习科学知识”，“他们在归化中国知识分子方面并没有获得多少成功”。¹⁶至于对天主教义，中国极少数知识分子接受它，主要认为它和中国传统思想，特别是儒家伦理相合才被接受下来。因此可以说，它是较之19世纪60年代以后更早的“中学为体，西学为用”的一种形式。

长期以来，有所谓用“体用”关系来论证“中学”与“西学”的关系的种种说法，有“中学为体，西学为用”，有“西学为体，中学为用”，还有“中学西学互为体用”等。所谓“西学为体，中学为用”，一切都应照搬西方，这也许就是“全盘西化”派的主张；“中学为体，西学为用”，一切西方好的东西，中国古已有之，这大概是“国粹”派的观点。为什么在“中学”和“西学”关系上造成种种不同说法和各种混乱，我以为主要就是企图

用“体用”关系来说“中学”与“西学”的关系造成的，因此我认为无论上述哪种说法都难以成立。

“体”和“用”在中国哲学史上是一种重要的范畴，但它不是一对实体性的范畴，而是一对带有根本性质的关系性范畴。“体”一般是指“内在性的超越精神”或“超越性的本体”，前者如孟子的“良知”“良能”，王阳明的“心”等等；后者如“天命”“太极”“天理”“道”等等。“用”是指此“内在超越精神”或“超越性本体”所表现的种种功能。照中国传统哲学的看法，“体”和“用”是统一的，“用”是表现“体”的。这一点早在魏晋时王弼已经提出：“虽贵以无为用，不能舍无以为体”，也就是说离开了“体”就无相应的“用”。所谓“中体西用”，无非是想保存中国固有的内在精神或超越本体，以便排斥西方精神，这样如何能以“西学为用”呢？同样，“西学为体，中学为用”也不可能。前者实质上必然导致“中体中用”，后者必然也只能是“西体西用”。

至于“中西互为体用”，据说它的意思是：中国的好东西就以“中学为体，西学为用”；西方的好东西就以“西学为体，中学为用”。这样的说法显然是很难成立的。它无非是要把“中学为体，西学为用”和“西学为体，中学为用”都包容在所谓“互为体用”之中。这不过是一折中主义东西。方克立在他的《“中体西用”和“西体中用”》一文中批评了“中体西用和西体中用”，但他自己却陷入了一种十分混乱的“互为体用说”的折中主义之中。¹⁷

因此，我认为用“体用”关系来解释中西文化的关系只能造成文化上的“移花接木”。如果不改良文化生长的土壤和其他种种条件，用“移花接木”的方法，其根基是不行的，总难以长成参天大树。所以我想，对我们现代社会来说，这个社会应有其现代化的精神和体现这种现代精神的种种制度。如果要用“体用”关系来说明这个问题，那也许可以说以“现代精神为体，保证体现现代精神的制度及其功用为用”。也许有人会问：什么是“现代精神”？什么是体现“现代精神的制度及其功用”？这里我想借用严复的说法，他曾批评“中体西用”，并指出体用不能二元，应是统一的，特别强调了科学的意义，同时他又提出一非常有意义的命题：“自由为体，民主为用”。我认为，严复这个提法或许有现代意义。照我看，“自由”是现代精神的集中体现，或者说它是一种现代内在精神，是现代社会人们所追求的一种普遍理想；而“民主”是现代社会的各种各样的保证人们“自由”的制度，它应是保证每一个人应有的“自由”，而不光

保证某一个人或者几个人的“自由”的制度。我们生活在中国今天的社会中，要使我们的社会成为现代的社会，最重要的就是要给每个人应有的“自由”，并以一套民主的制度来保证他的实现。只有这样，人们的积极性和创造性才能得到充分发挥，我们的国家才能不仅走上“四个现代化”的道路，而且是全面现代化的道路。

VII . QUESTIONS CONCERNING THE CATEGORICAL SYSTEM OF TRADITIONAL CHINESE PHILOSOPHY

Aristotle's *Categories* outlined the philosophical categories of Ancient Greece, putting forward and thoroughly analyzing ten categories. Hegel's *Logik* outlined contemporary Western philosophical categories in a comparatively complete categorical system. Did China's traditional philosophy (China's ancient philosophy) have a categorical system? Why and how should we study the question of traditional Chinese philosophy's concepts and categories? This essay attempts to contribute to the discussion of these questions.

I . The Significance of Studying the Categorical System of Traditional Chinese Philosophy

The study of the categorical system of traditional Chinese philosophy has its general and particular significance. Its general significance can be expounded in at least the following three aspects:

First, while the study of the history of philosophy necessarily requires the study of the historical function of philosophers and philosophical schools, the ultimate value of such a study is to reveal the necessary logic that determined the specific development of certain philosophical thinking in history. For instance, what is the necessary logic of the development of the pre-Qin philosophical thinking from Confucius to Mencius to Xunzi? A scientific history of philosophy with Marxism as its guiding thought should reveal not

only the developmental causes of philosophical thought but also the inner logic of the growth of such thought. Since philosophy is a science of the most general laws of nature, society and human thought presented in the form of abstractions, the development of the content of philosophical thought is therefore a history of the continuous advancement of concepts and categories and of their continuous clarification, enrichment and growth. We should study how concepts and categories were advanced in the history of philosophy, how their contents became clearer, richer and more systematic, and how the categorical system became more complicated, more comprehensive and more systematic. We should conduct a concrete analysis of the development of concepts and categories. This will enable us to discover the laws governing the development of philosophical thought and reveal its inner logic.

Second, when we say that the history of philosophy is one of the struggle between materialism and idealism we do not mean to imply that this struggle and the development of man's cognition are two separate processes. It was the one and same process through which man's knowledge of the world has been developing in the struggle between materialism and idealism which manifests the law of the development of man's knowledge. As the process of knowledge calls for the use of concepts and categories, every stage of development in the history of philosophy is marked by differing explanations of certain basic concepts and categories out of which emerged materialism and idealism. In the history of Chinese philosophy, for example, the struggle between materialism and idealism before the Qin Dynasty generally centered around the differing explanations of the Heavenly way and the human way, name and content, knowledge and conduct, and the variable and the constant. During the Wei and Jin dynasties it centered around such pairs of concepts as being and non-being, essence and function, word and idea, ethical code and spontaneity. During the Song and Ming dynasties it focused on principle and force, mind and matter, mind and nature, subject and

object. A study of the development of concepts and categories is a key to the exposure of the law governing the struggle between materialism and idealism.

What is more, this study will enable us to understand the necessity of the emergence of certain concepts and categories in the history of cognition and to overcome the shortcomings of maintaining an oversimplified negative attitude toward idealism which can be found in the past studies of the history of philosophy. Wang Bi was an idealist philosopher, but it was he who advanced some categories such as essence and function, the one and the many, word and idea "which help us recognize and master the focal point in the web of natural phenomena." Despite his incorrect presentation of these categories, his advancement of them marked a step forward in man's knowledge, which deserves recognition for its position in the history of philosophy. Only after Wang Bi first posed the concepts of "taking nonbeing as essence" and "forget the words having grasped the concept" did there appear Ouyang Jian's later theory of "The Word Expresses the Concept" (*Yan jin yi lun*) and Pei Wei's "On the Exaltation of Being" (*Chong you lun*). Therefore the study of the concepts and categories in the history of philosophy and their development constitutes an indispensable link in correctly appraising materialism and idealism in the history of philosophy.

Third, Engels believed that the study of philosophies of the past was the only way to temper one's theoretical thinking. A scientific history of philosophy can certainly play such a role, and a scientific history of man's knowledge essentially would be the history of the development of concepts and categories. Since concepts and categories in the history of philosophy reflect man's deepening knowledge, when we study its development we are rethinking in our own thought the process of man's coming to know the world. Of course we discard the accidental and secondary factors and grasp the essential, normative content. This process of rethinking inevitably deepens our own thought. In our study of the development of concepts and categories,

we not only relive the process of mankind using concepts and categories to understand the world, but invariably use certain methods to revisualize them. That method can only be one of making a theoretical analysis of the contents of the concepts and categories and the relationships between them and the logical relationships in their development. Such a process of analysis itself is a kind of theoretical thinking. In this sense, this study can help us improve our ability for theoretical thinking.

The above-mentioned three points give only the general significance of studying philosophical concepts and categories, for that significance exists in the study of the history of any philosophy (e.g., the Western or Indian). However, the study of the categories of traditional Chinese philosophy and its history of development also has its particular significance; namely, it will enable us to understand the characteristics and level of development of traditional Chinese philosophy. Western philosophy has its own categorical system; its characteristics and the different levels of development of its philosophical thinking at different historical stages are reflected in the development from Aristotle's *Categories* to Hegel's *Logik*. The categories used in the primitive Indian Buddhism and the categories of the Kunya and Bhava sects of Mahayana, more or less in succession and each with its striking features, represent the fairly high level Indian Buddhism attained in logical thought and categorical analysis. Traditional Chinese philosophy has its own concepts and categories which gradually formed a fairly comprehensive system. Because of this it will not do just to take them in terms of the concepts and categories of Western philosophy, nor will it do to take them in terms of the Marxist philosophical concepts and categories.

Except for a few concepts taken from Indian Buddhism, the concepts and categories which have taken form in the long history of Chinese philosophy basically developed independently, hence their striking features. For example, the Heavenly way (*tian dao*) and the human way (*ren dao*) as a pair of categories were very important in

the history of Chinese philosophy. Therefore traditional Chinese philosophy not only paid considerable attention to the study of the relationship between the Heaven and man, but paid special attention to the study of the relationships between man and man (society). Another example is the pair of categories *ti* and *yong* which contain the meanings of not only noumenon and phenomenon, but also base and function, whole and part, and abstract and concrete. Such series of pairs of concepts and categories reflect not only the characteristics of traditional Chinese philosophy, but also the level of theoretical thinking at a certain stage of historical development. To make a not completely apt comparison: traditional Chinese medicine certainly has its own particular tradition with its own particular theoretical system, particular medical terms and concepts. Despite the fact that we have not found clear scientific explanations for some of the theories and achievements, since it does achieve good results in medical treatment it must reflect certain aspects of objective reality and contain fairly profound truths. Since concepts and categories are necessary conditions for the formation of knowledge and play a pivotal role in linking the subjective to the objective, definite concepts and categories reflect definite achievements made by man in recognizing certain aspects of objective reality through his theoretical practice; hence, different concepts and categories mark different depths of man's cognition. Therefore, when we study the concepts and categories at different stages of the development of traditional Chinese philosophy, we can see the level of theoretical thinking at the different stages of development of Chinese history.

In the history of Chinese philosophy, there are three periods during which schools made major contributions to the formation of the categorical system of traditional Chinese philosophy, namely, the various pre-Qin schools, the metaphysical school (*Xuanxue*) of the Wei and Jin, and the Neo-Confucianism (*Lixue*) of the Song and Ming dynasties. When we compare the categorical system of traditional Chinese philosophy in the three stages with those of the Western

philosophy, we are impressed by its distinct features and fairly high level. This comparison between the categorical system of traditional Chinese philosophy and those of other countries, nations and regions constitutes an important subject in comparative philosophy.

II . How to Study the Concepts and Categories of Traditional Chinese Philosophy

Fundamentally speaking, the study of the concepts and categories of traditional Chinese philosophy requires the scientific analytical method of Marxism. Merely to pose the concepts and categories used in the history of Chinese philosophy is contrary to the goal of our study. For that will not uncover the laws governing the development of philosophical thought, nor will it help us better to understand the laws of the struggle between materialism and idealism, or to improve our theoretical thinking; in particular, we will be unable to recognize the characteristics and level of traditional Chinese philosophy. To achieve our goal, it is necessary to use the scientific analytical method of Marxism to: 1) analyze the meaning of the concepts and categories, 2) investigate the development of those meanings, 3) analyze the systems of concepts and categories of philosophers or philosophical schools, and 4) study the similarities and differences between the concepts and categories of Chinese and foreign philosophies. It is only on the basis of such an analysis that it is possible to advance the study of the history of Chinese philosophy along a scientific path.

i . Analysis of the Meaning of Concepts and Categories

The advancement of one or of a pair of concepts (categories) marks the level of man's understanding of the world, yet it is up to us to make an analysis of the meaning of such a concept or pair of concepts. When ancient philosophers advanced a new concept they did not have as clear and scientific an understanding of its meaning as we do today; this is particularly true of the concepts they used to

explain the origin of the world. For instance, Laozi (Lao Tzu) was the first man to advance the "way" (*dao*) as the paramount category in his philosophical system. This concept of the "way" he advanced as an antithesis to the contemporary concept of "respecting Heaven." By taking the "way" as the origin of the world, Laozi (Lao Tzu) certainly raised the level of ancient Chinese philosophical thinking. But what was the meaning of the "way"? Laozi(Lao Tzu) himself found it difficult to give a clear definition. He said: "I do not know its name; I call it *Dao*. If forced to give it a name, I shall call it Great." Therefore he used quite a number of adjectives to describe the "way," such as "soundless and formless," "eluding and vague" and "deep and obscure." Obviously, with the limitations of the objective conditions and their level of knowledge, the ancient philosophers found it difficult to give lucid definitions of the concept of the origin of the world. Thus it is necessary for us to investigate the meaning of the concept of the "way" in the light of the book *Laozi (Lao Tzu)*.¹ The term "spontaneity" (*ziran*) was widely used by ancient Chinese philosophers but each had his own definition. It was Laozi (Lao Tzu), too, who was the first to use "spontaneity" as a philosophical concept, by which he generally meant non-activity. Wang Chong of the Han Dynasty continued this usage when he wrote: "The Heavenly way is spontaneous non-activity." By the time of the Wei and Jin dynasties, the proponents of non-activity such as Wang Bi and Xiahou Xuan practically took "spontaneity" for the "way"—that is, the primal stuff of the universe. Xiahou Xuan wrote: "Heaven and earth operate with spontaneity and the sage functions following spontaneity. Spontaneity is the way, which originally had no name and Laozi (Lao Tzu) was forced to give it a name."

Even the same philosopher had different definitions for "spontaneity." We can use Guo Xiang's definitions of "spontaneity" as an example for analysis. He identified at least five connotations for "spontaneity." First, the actions of Heaven and man are "spontaneous." In his *Annotations of Zhuangzi* (the chapter, The Great Teacher) he

wrote: "He who knows the deeds of both Heaven and man is a sage,"—knowing the deeds of Heaven and man is spontaneity." Thus, Guo Xiang looked not only at the natural phenomena but also at man's deeds as in a sense spontaneous; in what sense could this be so? Second, "working for oneself" (*ziwei*) is "spontaneity." Guo Xiang said: "To say that matter is spontaneous means non-activity." He also wrote: "We value this non-activity and matter's working for itself." Then why is "working for itself" a kind of "non-activity"? Third, "being self-willed" is "spontaneity." Guo Xiang held that "working for oneself" is "spontaneity," but "working for oneself" does not mean acting wilfully, but "acting by one's nature," namely, "acting in accordance with one's nature, that is spontaneity, thus called nature (*xing*)." "According to spontaneity" means "according to one's nature," that is, neither making others succumb to oneself nor allowing oneself to succumb to another. Fourth, "inevitability" is "spontaneity." Guo Xiang wrote: "Knowing the reality of destiny one will not seek what lies beyond it, but just to fulfill one's nature." One who "knows his destiny" will not ask for what cannot be done—this is called "spontaneity." Destiny here means "inevitability." Fifth, "chance is spontaneity." Guo Xiang wrote: "Things are all spontaneous, acting without knowing why or how it should be so." By not knowing the reason of action, "spontaneity" implies "chance." Therefore, when the philosophers were trying to explain "self-generation" they often employed such terms as "suddenly" or "abruptly"—all meaning that things exist without reason, the causality being beyond explanation.

According to Guo Xiang, "spontaneity" has the above-mentioned five inter-connected meanings, of which the last two are most important, that is, "spontaneity" has the meaning of both "inevitability" and "chance." Actually, they are a pair of antagonistic concepts and, from the dialectical point of view, are mutually connected and transform themselves into each other, with inevitability manifesting itself through chance. Guo Xiang used the term "spontaneity" to explain both "inevitability" and "change," precisely

because he saw the relationship of mutual dependence between them: that a matter so exists is "inevitable" in one respect because "things emerge by themselves abruptly." In Guo Xiang's philosophical system, things must have these two aspects. From this analysis of Guo Xiang's definition of the concept of "spontaneity" we can see the general characteristics and level of the philosophy of Guo Xiang.

ii . Analysis of the Development of the Meanings of Concepts and Categories

Not only do the meanings of concepts and categories differ from one philosopher to another, at different times they also differ in meaning. Nevertheless, if philosophical thoughts follow one another, it is always possible to discover the relationship of succession between these concepts and categories. The study of their development is extremely important for understanding the laws of the development of man's knowledge. In the following, we will analyze the growth of the concept of *qi* (often translated as material force, ether, or fluid— *tr.*) in traditional Chinese philosophy.

Some thinkers as early as the Spring and Autumn Period already discussed the impact of *qi* on man. For example, the *Zuo Zhuan* mentioned "the six *qi*" in the medical theory recorded in the first year of the reign of Duke Zhao of Lu (541 BC). By the Warring States Period, *qi* became a general concept. People not only believed that the body of man was made of *qi*, but some believed that the spirit of man also was made of *qi*. In "White Heart," "Inner Function," and "Mechanism of the Heart" of the book *Guanzi*, it was said: "As for essence (*jing*), it is the essence of *qi*;" "the *qi* of all things changes and thus becomes life;" "when *qi* goes to the ground, grains grow; when it goes into the heavens, there emerge the constellations; when it floats in the air, it becomes ghosts and spirits; when it goes into a man's chest, the man becomes a sage" and "therefore when there is *qi*, there is life; when there is no *qi*, there is death," etc. According to these thinkers, among the " *qi*" there is an "essential *qi*," the life-giver. When such an "essential *qi*" enters the body of a man, he becomes wise and

turns into a sage.

During the Warring States Period this unscientific theory of "essential *qi*" was used to explain man's spirit. If we considered it materialist, it would be a materialist viewpoint with grave defects which, under certain circumstances, was used by idealists and turned into a component part of their system. It could also be utilized by the supernaturalists who transformed it into a basis for advocating "life without end." We know that Mencius also talked about *qi*, and posed a sort of *qi* called the " *qi* of vastness" (*haoran zhi qi*). The "White Heart" chapter of the book *Guanzi* mentions the "essential *qi*" that can give man wisdom and "this *qi* should not be checked by strength but should be accommodated by moral power (*de*)," which is to say, *qi* itself possesses an intelligence which should be consolidated by moral power. And in the theory of Mencius, his " *qi* of vastness" is "obtained through accentuating righteousness." Obviously, *qi* in Mencius' theory has already become spiritual. By the Han Dynasty, Dong Zhongshu went a step further and moralized and mystified *qi* which became the manifestation of the will and power of God. Dong Zhongshu held that *qi* had the power of meting out punishment and award, that there were good and vicious *qi* and that *qi* had emotions such as happiness, anger, grief and joy. So *qi*, though still retaining material appearance, already lost its material substance. Later, during the Han period, there were all sorts of superstitious explanations of *qi* which were indeed the outgrowth of the viewpoint of Dong Zhongshu.

From the historical data of the pre-Qin period and the Han Dynasty, we can see that the concept of *qi* is closely linked with questions of spirit and form, and thus has much to do with the question of the preservation of health, which often was deemed a means to becoming a deity. In *Zhuangzi* the "true man" (*zhenren*), the "spiritual man" (*shenren*) and others were often described as "with the spirit guarding the form to achieve longevity," "drinking dew and breathing the wind instead of eating grain," "unifying their nature and preserving their *qi*." They made their spirit integrate with their form

so that they could accomplish the goal of "keeping their form perfect and replenishing their spirit to be merged into one with Heaven and earth." The *Lü Shi Chun Qiu* includes numerous discussions of the "preservation of good health" and considers that to "achieve longevity," *qi* should be made to flow constantly within the body, and "with essential *qi* renewed daily, the vicious *qi* will go and a full life span will be reached; this is called truth." In *Huai Nan Zi* the preservation of *qi*, of form and of nature are the same thing; moreover all are linked together with *qi*. The writers of both of these two books were influenced by the "theory of essential *qi*" in "White Heart" and other philosophical works. They all thought that "spirit" (*jingshen*) is also a kind of *qi*, or "essential *qi* which can reside or leave the body and that when spirit and body are at one, there will be long life."

Meanwhile, some philosophers of the pre-Qin and Han periods held a materialist view of *qi* and considered it to be the matter that constitutes the world. Xunzi held that everything in the universe, including man, was made of *qi*. He wrote: "Water and fire have *qi* but no life, plants have life but no senses, birds and beasts have senses but know not righteousness and man has *qi*, life, senses and also righteousness." The chapter "On Spirit" of the book *Huai Nan Zi* says that the universe was originally a murky body of original *qi* without any shape and that later the interaction of the positive and negative forces gave birth to everything, so "the dirty *qi* became worms and the pure essential *qi* became human beings." Wang Chong put it with even greater clarity. He wrote: "The merging of the *qi* of Heaven and earth gave birth to everything," and that was the result of the movement of *qi*. He said: "When Heaven moves, it gives *qi*. . . *qi* comes out and it gives birth to things." In order to oppose Dong Zhongshu's idealist view of *qi*, Wang Chong particularly pointed out that *qi* has no will, no aim. He said: " *Qi* is void of ambition, purpose or scheme"; " *qi* is like smoke and cloud, how can it listen to man's request?" Nevertheless, like the book *Huai Nan Zi*, Wang Chong took the spirit of man (or the phenomenon of life) as "essential *qi*." He said: "Man lives because he

has essential *qi*; when man dies, the essential *qi* vanishes." An analysis of the contents of the concept *qi* in the history of ancient Chinese philosophy reveals clearly the development of this concept. The three doctrines, or rather definitions, mentioned above, however, were all merged into the thought of Daoism (Taoism) toward the end of the Eastern Han Dynasty, which we will not discuss here.

iii . Analysis of the Systems of Concepts and Categories of Philosophers (or Philosophical Schools)

Historically major philosophers, in establishing their philosophical systems, have invariably used a series of concepts and categories. Thus the study of the relationships between these concepts and categories is necessary for us to make a thorough analysis of their theoretical systems. The level a philosopher's thought reaches often can be judged by how richly and systematically his concepts and categories reflect the essential relationships between the objects they are meant to reflect. Divergent views in the study of a past philosopher (or philosophical school) sometimes arise from the lack of a comprehensive, systematic study of the system of concepts and categories of that philosopher or school. For example, if we merely take into account Guo Xiang's concepts of "being" and "nonbeing" and their relationship, we might conclude that he was a materialist. But the reason why Guo Xiang's philosophy was the zenith of the Wei and Jin metaphysical school was not that he put forth a view different from that of Wang Bi's on the relationship between "being" and "nonbeing," but that he had a fairly complete philosophical system, an analysis of which reveals that it comprises the following four groups of basic concepts. (Though there are other important concepts in Guo's philosophical system, we will not deal with them here.)

"Being" and "nonbeing": The central topic of discussion among the Wei and Jin metaphysicians was the question of "origin and outcome, being and nonbeing." The philosophy of Guo Xiang might be considered to originate from the discussion on this topic. Guo believed that "being"(the "being of everything") is the only thing that exists; it is

constantly present; "although being undergoes infinite changes and transformations, it cannot in any instance become nonbeing," and "we say the Heaven and earth constantly exist because there is no time they have not existed." As for "nonbeing," he held that the creator above "being," or "the nonbeing" serving as noumenon, is non-existence, that is, "nothing." Thus he said: "Nonbeing is simply nonbeing, it cannot produce being," and "I venture to ask whether there is a creator or not? If not, how can he create things?" Therefore, from the very beginning, Guo Xiang denied the existence of a "creator" above the being of "everything," or a "nonbeing" which is the antithesis of "being" which as the primal body serves as the basis for the existence of being. However, Guo Xiang's philosophy did not stop here, but went further.

"Nature" and "destiny": Since the existence of things is not based on "nonbeing" as the primal body, then is there an inherent cause for the existence of things? According to Guo Xiang, one cannot say that the being of "everything" is groundless. Since things exist, their very existence is the basis for their existence. Specifically, the basis of their existence is their own "nature": "Everything has its own nature and every nature has its limit." "The nature" Guo Xiang meant is "the reason that things are what they are" which has the sense of "necessity." Thus he said: "Each gets what he deserves by nature; there is no avoiding it nor adding more." He also said: "Things have their own nature, so the wise stays wise till his last day while the dull goes on being dull till his death, neither able to change halfway." As for "destiny" Guo Xiang defined it as "inevitability"; as he put it "destiny means things all act spontaneously without anything acting on them," and "being aware of the impossible." Obviously, his "nature" and "destiny" are two concepts he employed to prove the point that "being" alone exists and that "nonbeing" as creator or primal body is absolutely non-existent.

"Self-generated" and "self-sufficient": The "nature" of things is the basis for their existence, but how does this "nature" originate? Is its

emergence with some purpose, or condition? Guo Xiang said: "Things exist by themselves without a source; this is the way of Heaven" and "the emergence of things is just out of their own accord." If the "nature" of a thing is not "self-generated," then it must be given by others or intentionally produced by a creator. Yet this thing becoming this thing and that thing becoming that thing is not something else making this or that thing emerge and exist, nor even making itself emerge and exist; therefore "self-generation" can only be produced "unexpectedly," "abruptly" and "spontaneously" by itself. Were there any reason or purpose for the emergence and existence of a thing, it would inevitably lead to the admission of the existence of an initiator. Then what is the relation between one "self-generated" thing and another "self-generated" thing? Guo Xiang held that everything is "self-generated" and its existence is "entirely in keeping with its own nature" and therefore is "self-sufficient" (*wudai*). On the one hand, "self-sufficiency" is possible because "things produce themselves"; "things produce themselves without relying on anything else." On the other hand, anything can be "self-sufficient" as long as it "conforms with its own nature," and "is content with its own nature," "for when satisfied with its own nature, a giant roc does not despise the sparrow and the sparrow does not covet the heavenly lake and both are quite satisfied. Thus, big or small, all live in complacency." So, to insist on the premise that the "nature" of things is the only basis for their existence, one must recognize that it is "self-generated" and "self-sufficient."

"Self-transformation" and "mutual indispensability": To support the concepts of "self-generated" and "self-sufficient" requires the solution of another question. Suppose everything exists by itself, this being this and that being that with one differing from another, then are not all the things related? Suppose all the things are relative, then are not they limited? Suppose they are limited, then are not they "insufficient" (*you dai*)? To answer this question, Guo Xiang advanced the concept of "self-transformation" (*duhua*). By "self-transformation,"

he meant that everything emerges and generates independently, hence "self-sufficiency" is absolute. If we try to seek the cause and basis of the emergence and generation of things, ostensibly we can pursue this question infinitely, but ultimately we can come only to the conclusion of "self-sufficiency." Thus he said: "If we try to find out what a thing relies on and what is the cause of its creation, there will be no end and finally we will come to self-sufficiency and the working of self-transformation will be obvious." In his "Annotations on (Zhuangzi's) *Qi Wu Lun*" Guo Xiang cited an absolute example. He said that the bodily form, the shadow and the penumbra are all beings of absolute independence, for "thus throughout the realm of things, there is nothing, not even the penumbra, which is not 'self-transformed.'"

If one thing does not exist independently, then everything else is not independent, which will inevitably lead to the existence of a primal body(or creator) above "everything," serving as the basis of their existence and inevitably recognized as "a cause of creation and generation." Although things exist independently and self-sufficiently, as long as everything fully realizes its "nature," brings it into full play and "the wise stays wise till his last day and the dull goes on being dull till his death," then the ideal realm will be achieved where "Heaven and earth are not so long-lived but live along with me, and things in the world are not divergent, but the same as me." Relating this way to every other thing has the greatest function; that is, "the greatest function of mutual indispensability is the perfection of self-transformation." Seen from another angle, everything is indispensable as long as it exists. Guo Xiang said: "A man, though only seven feet tall, possesses the five constant virtues; thus this mere body is provided with everything in the universe. Therefore none of the things in the world can be dispensed for one day. With one thing lacking, the living will not have means to live; with one law lacking, the living cannot fulfill their natural life-span." Thus, everything existent is rational, inevitable and not mutually exclusive. This view appears to contradict the doctrine of "self-transformation," but it does not.

According to Guo Xiang, everything that exists is rational, inevitable and not mutually exclusive precisely because, as the condition for the existence of everything else, everything fully and absolutely brings its "nature" into full play, creates itself and generates self-sufficiently.

From this analysis of Guo Xiang's system of philosophical categories, we can see that his philosophy finally arrives at the doctrine of "self-transformation," and the concept of "exalted being" (*chongyou*) is merely a bridge to "self-transformation." What is more, in Guo Xiang's system, only after the establishment of the doctrine on "self-transformation" can one support "sublime being" and a relatively thorough refutation of a "nonbeing" above everything as the basis of the latter's existence.

If we want to know whether a philosopher is a materialist or idealist, or the characteristic of his philosophy, its ideological relations with its predecessors and successors and its place in history, we must first make an analysis of his categorical system.

iv . Analysis of the Similarities and Differences Between the Concepts and Categories of Chinese and Foreign Philosophies

A comparison between the categorical systems of Chinese and foreign philosophies will undoubtedly enable us to have a better understanding of the characteristics and level of traditional Chinese philosophy. Because of the breadth of this topic and the limited study conducted by this author, we can make only a rather superficial comparison here between Wei and Jin metaphysics and the Buddhist doctrine of *Prajñā* introduced into China in that period.

The central theme of Wei and Jin metaphysics is the question of "being and nonbeing, origin and outcome." Therefore "being" and "nonbeing" are two basic categories in the Wei and Jin metaphysics. The Buddhist *Prajñā* doctrine also discussed the question of "being" and "nonbeing" (or the "void," *kong*), hence Dao-an said: "Of the twelve books, *Vaipuliya* is most copious and its doctrine on the void of being and non-being is similar to the teachings of Laozi (Lao Tzu) and Zhuangzi, thus the doctrine of Mahayana has been easy to spread in

China." The concept of the "void" (or "nonbeing") of the Buddhist *Prajñā* school is actually different from the "nonbeing" advocated by Wang Bi and other Chinese metaphysicians, despite their apparent similarity. The Buddhist concept of original nonbeing, or *Tathata* in Sanskrit, has the meaning that "all the different *dharma*s are in their original nature void and empty" and that all things have no original actual forms. Wang Bi and other metaphysicians also talked about "original nonbeing" by which, however, they meant that everything "is based on nonbeing as its origin." Although the two concepts of "original nonbeing" cannot be considered to be entirely different, they do have vast differences in meaning. In Wei and Jin metaphysics, Wang Bi's thought succeeded the doctrines of Laozi (Lao Tzu). In his philosophical system, the category "nonbeing" is one and the same thing as "the way" or "principle"; as he said: "The extreme of greatness is nothing but the way! . . . though it is important that it has nonbeing as its phenomenon, yet it cannot do without nonbeing as its noumenon"; "nothing exists without principle; everything operates according to its own law." Obviously, the "nonbeing" used by Wang Bi is not the "void" or "non-existence," but the "substance" of a thing. The "original nonbeing" of the Buddhist *Prajñā* doctrine on the void only means that "all the different *dharma*s are in their original nature void and empty. "They held that everything is void of nature, but created through the association of *hetupratyaya*. From this one can see that the Buddhist *Prajñā* School in its discourse on the void refers not to "substance," but to "non-existence." As for the content of "being," the Wei and Jin metaphysicians usually referred to "universal being," namely, all sorts of actually existing things, whereas, on the other hand, in the translation of Buddhist scripts, terms denoting different meanings of "being" (existence) were all translated into the term "being."

After its introduction into China, Buddhism first attached itself to Daoist necromancy during the Eastern Han Dynasty and then to Wei and Jin metaphysics. The various schools of the *Prajñā* doctrine

formed by Chinese monks during the Eastern Jin period generally still used metaphysical thought to explain the teachings of *Prajñā* until the arrival in China of Kumarajiva whose translations of *Madhyamika-sastra*, *Sata-sastra* and *Dvadasa-mikaya-sastra* of the *Mahaprajñāparamita-sastra* provided Chinese Buddhist with the material for understanding the true meaning of *Buddhist Praj* Seng Zhao's *On No Real Non-Existence* is more or less close to the original meaning of "neither being nor nonbeing" of the Buddhist *Prajñā* doctrine.

A comparison and analysis of the Chinese and foreign philosophical concepts and categories can thus show their characteristics and level of development as well as the impact of foreign culture on indigenous traditional culture and the process of a foreign culture being assimilated and becoming a component of the culture of the country (nation, or region) into which the foreign culture was introduced.

III . A Tentative Theory of the Categorical System of Traditional Chinese Philosophy

The term category has myriad definitions in the history of philosophy in the West. Aristotle in his *Categories* treated it as the basic mode of being and put forward ten categories such as substance, quantity, quality, relation, place, time, state, action and passion. And Kant described his twelve categories as principles related to cognition or as the precondition for constituting experience. Lenin said: "Categories are stages of distinguishing, i.e., of cognizing the world, focal points in the web, which assist in cognizing and mastering it."⁴ A *Dictionary of Philosophy* published in the Soviet Union defines category as "the basic concept that reflects the most general and most essential character, aspect and relationship of the various phenomena and knowledge of reality." "Category" then is generally explained from the two aspects of the existence and knowledge of reality: from the aspect

of existence it is defined as "the basic mode of existence" or "the most general and most essential character, aspect and relationship of the phenomena of reality"; from the aspect of knowledge it is defined as the "precondition for constituting experience" or "focal points in the web, which assist in cognizing and mastering it." The necessary precondition for knowledge is certainly the reflection and manifestation of the "basic mode of existence" while the "basic mode of existence" is meaningful only in the process of man's knowledge. From what we listed above, we can see the relationship between "category" and "concept": a category is a basic concept whereas a concept is not necessarily a category. Thus, what we are discussing here is what are the categories or basic concepts of traditional Chinese philosophy. If, using the basic concepts of classic Chinese philosophers, we can form a system which shows how traditional Chinese philosophy identified and explained "the basic mode of existence" and which reveals the line of development of the traditional Chinese philosophical thinking, then we have proven that traditional Chinese philosophy does have a categorical system. This is presented first in the following diagram and further explained below.

In this diagram, twenty pairs of basic concepts make up the categorical system of traditional Chinese philosophy. This is certainly a very preliminary proposition. However, despite its many possible defects, it is intended to initiate discussion and study on this question. Here the author would like to explain some points:

i . This diagram is divided into three major parts. Part I is intended to indicate what basic concepts are used in traditional Chinese philosophy on the question of the existence of the world; Part II is meant to show what basic concepts are used to present the form of being; and Part III is meant to show what basic concepts are used to denote the existence and knowledge of man. The relationship between "Heaven" (or the Heavenly way) and "man" (or the way of man) has always been a central theme for discussion in traditional Chinese philosophy and it is around this question that the struggle between materialism and idealism has been waged in the history of Chinese philosophy. Zi Chan was the first Chinese philosopher to make a proposition on the relationship between the two when he wrote: "The way of Heaven is remote, whereas the way of man is near." Confucius attached importance to the "mandate of the Heaven" but he gave even greater attention to the "affairs of man." Although he mentioned that he "began to know the mandate of Heaven at the age of fifty," he seldom discussed this question. "The master was seldom heard discussing the question of nature and the Heavenly way," reports the *Analects* which, however, extensively records Confucius' sayings on the question of the "way of man." Mencius talked about "obeying nature, and knowing fate and Heaven," and the *Doctrine of the Mean* says: "Sincerity is the way of Heaven; knowing sincerity is the way of man." Xunzi said: "Grasp the way of Heaven and man." Laozi (Lao Tzu), the founder of Daoism (Taoism) said: "The Heavenly way is spontaneous non-activity," and he played down the importance of "humanness and righteousness"(the way of man). And Zhuangzi "was misguided by Heaven and ignorant of man." Dong Zhongshu, the Confucian master of the Han Dynasty, described his research as a study of "the relationship between Heaven and man." Sima Qian who was much influenced by Daoist thinking said that his *Historical Records* was a work of "investigations into the relationship between Heaven and man and the changes past and present." The Wei and Jin metaphysicians concentrated on the question of "spontaneity" (the way of Heaven) and

"ethics" (the way of man). Hence, He Yan said: "Only with people like Wang Bi, can you discuss the question of the relationship between Heaven and man." The Song Neo-Confucians of both the School of Principle (*Lixue*) and School of Mind (*Xinxue*) strongly believed: "The supreme ultimate (the principle of Heaven) is simply an utterly excellent and supremely good normative principle"; the supreme ultimate is an appellation for "all that is good in heaven and on earth, and among men and things." The "principles of Heaven" and the "desires of man" are still a question of the relationship between Heaven and man. Even Wang Fuzhi still made this a focal point in his philosophical discourse. He held that "Rites, no matter how pure they are, are merely expressions of the principles of Heaven inevitably to be found in the desires of man," and that "the desire of man, when reaching superb altruism is the perfection of the principle of Heaven." Thus, traditional Chinese philosophy proceeded from the discussion of the pair of categories: (the way of) Heaven and (the way of) man, an indication of the main attention and particular content of traditional Chinese philosophy.

ii . This diagram shows the development of the categories of traditional Chinese philosophy and their relationships. Proceeding from the study of the relationship between Heaven and man, traditional Chinese philosophy branches out into two parts: Daoism (Taoism) and Confucianism. Laozi (Lao Tzu) advanced the relationship between the "way" and "all things." He said: "The way creates one, one creates two, two create three and three create all things." He also said: "All things in the world are produced by being and being is produced by nonbeing," therefore the relationship between the "way" and the "thing" is also represented by the pair of categories "being" and "nonbeing." The Confucian School however proposed the categories the "way" and the "instrument" in the *Commentary on the Book of Changes*, which says: "That which shapes and is above is called the way and that which shapes and is below is called the instrument," and adds: "Change contains the supreme ultimate which produces two

extremes," and "the alternation of *yin* and *yang* is called the way"; thus the relationship between the way and the instrument is reflected in the categories of the supreme ultimate and *yin* and *yang*. The Han Dynasty witnessed some development in philosophical thought, but it seems that practically no new and influential philosophical categories were advanced. The Wei and Jin metaphysics upheld three philosophical classes, *Laozi* (*Lao Tzu*), *Zhuangzi* and *Zhou Yi*, which brought a gradual merging of Daoism(Taoism) with the Confucianism of the *Zhou Yi* system. This established the theory of a primal body as the origin of the universe, a theory with Laozi (Lao Tzu)'s and Zhuangzi's thought as the framework. The Wei and Jin metaphysicians used categories such as "essence" and "function," "stem and branch," the "one" and the "many" to illustrate "nonbeing" (the primal) and "being" (everything or the various manifestations of this substance). They used "spontaneity" (essence) and "ethics" (function) to present the relationship between the "originality of the universe"(primal body) and "human social relations" (the various social positions and codes), and used the pair of categories "idea" and "word" to explain questions on understanding the substance of the universe. From the Wei and Jin dynasties and the Northern and Southern dynasties onward, traditional Chinese philosophical thought, under the impact of Buddhism introduced from India, evolved into the Neo-Confucianism of the Song Dynasty. If the Wei and Jin metaphysical doctrine on substance has the thought of Laozi (Lao Tzu) and Zhuangzi as the framework, then Neo-Confucianism of the Song-Ming period alternately were based on an objective idealism (represented by Zhu Xi), a subjective idealism(represented by Wang Yangming) and a fairly high level materialism(represented by Wang Fuzhi). The philosophical categories of this period succeeded Wei and Jin metaphysics and also absorbed Tang Buddhist thought in the Sui and Tang periods. Thus, there was a confluence of the thinking of Confucianism, Daoism (Taoism) and Buddhism within a Confucian framework. The most basic philosophical categories of the time became "principle" and *qi*,

"mind" and "matter"; the question of "mind" and "nature" grew into the question of whether "mind is principle" or "nature is principle." Categories such as "subject" and "object," "investigation of things" and "fulfillment of principle" were used in the discussion of the question of knowledge and the categories "Heavenly principle" and "human desire" were used to discuss social issues. Lenin in his *On the Question of Dialectics* wrote:

"Circles" in philosophy: (is a chronology of persons essential? No!) Ancient: from Democritus to Plato and the dialectics of Heraclitus. . . . Modern: Holbach—Hegel (via Berkeley, Hume, Kant). Hegel—Feuerbach—Marx.⁵

In his "Conspectus of Hegel's Book *Lectures on the History of Philosophy*," he wrote:

Comparison of the history of philosophy with a circle. . . a circle on the great circle (a spiral) of the development of human thought in general.⁶

Hegel's comparison of the history of philosophy with a circle, as pointed out by Lenin, is a penetrating reflection of the law of development of the philosophical thought. This is of tremendous importance in our study of the development of traditional Chinese philosophic thought.

From the above diagram, we can see that the development of traditional Chinese philosophy is roughly made up of three spiraling circles. The first covers the period prior to the Qin Dynasty: the Confucian School, including Confucius, Mencius and Xunzi (or the *Commentary on the Book of Changes*); Daoism (Taoism) including Laozi(Lao Tzu), the School of Jixia (i.e., the "White Heart" and other works) and Zhuangzi, with the two Han dynasties forming a transitional period. The second circle was the period of the Wei and Jin dynasties represented by Wang Bi, Xiang Xiu, and Guo Xiang (or Wang Bi, Guo Xiang, and Seng Zhao). Buddhism was in vogue from the Northern and Southern dynasties through the Sui and Tang

dynasties and after a period of development, Buddhism in China grew into several sects such as the Huayan (*Avatamsaka*) Sect and the Chan (Zen) Sect. The third circle covers the Song and Ming dynasties represented by Zhang Zai, Zhu Xi, and Wang Fuzhi.

iii . In the second column of the diagram only three pairs of categories are listed, of which the most fundamental is the pair "quiescence" and "movement," whose manifestation is the pair "constant" and "variable," though in fact "positive" and "negative" are also peculiar manifestations of "quiescence" and "movement." Although many philosophers of traditional Chinese philosophy discussed the question of "quiescence" and "movement," little discussion on the question of "time" and "space" was conducted among Chinese philosophers (except for the pre-Qin philosophers of the School of Names and philosophers of the later Mohist School). Philosophical propositions in traditional Chinese philosophy seem not to have been restricted by time or space and they paid little attention to the question whether movement took place in time and space. That is why we have not included the categories "time" and "space" in our diagram.

iv . The question of man (the way of man) was much discussed in traditional Chinese philosophy which was especially characterized by the study of the question of "morals" (ethics). Therefore careful consideration should be given to what should be included in the categorical system of traditional Chinese philosophy. In this diagram (column III) five pairs of categories (in fact not all of them are related to the way of man) seem to be sufficient as basic concepts. "Spirit" and "form," or the relationship between spirit and body, are used for the study of the phenomena of the human life. This was discussed from pre-Qin days onward, with materialists and idealists holding different views. The question of "nature" and "emotion" might be looked at as the key ethical issue. There have been divergent views on the question of "nature" ever since the pre-Qin days, such as "man is born good by nature"; "man is born evil by nature"; "man is born with a mixed

nature both good and evil"; "man is born neither good nor evil by nature" and "man is born good or evil by nature, all depending on the specific man," etc. On the question of nature and emotion, there were views that "nature is good whereas emotion is bad," "nature is quiescent and emotion is active," etc. The Wei and Jin metaphysicians paid considerable attention to this question, but concentrated on a discussion of the difference and similarity between the sage and the ordinary man. The Song and Ming Neo-Confucians divided nature into "the universal nature" and "the humoral nature," with the former stemming from the "principle of Heaven" and the latter from man's inherent emotion and desire or from the *qi* that makes up the body. Hence, this is still a question of nature and emotion and the importance of ethical education is to "maintain the principle of Heaven and suppress human desire." The question of "knowledge" and "action" also occupies a very important position in traditional Chinese philosophy. Most of the past Chinese philosophers upheld both "acknowledge" and "action" and thought the latter was even more important. The categories "name" and "actuality" were always contained in traditional Chinese philosophy and the categories "subject" and "object" were borrowed from Buddhism, but all four are related to the question of knowledge. Therefore column III of the diagram contains categories involving existence and knowledge.

IV . Discussion

As the categorical system of traditional Chinese philosophy is a rather broad and complicated issue, it calls for an earnest and extensive discussion. The following are only preliminary views on some of the questions:

i . Should the categories in the categorical system be in pairs?

This question should be discussed in two aspects. On the one hand, in the history of philosophy, the philosophical categories used by a philosopher may not be in pairs. For example, the concept

"spontaneity" used by Laozi (Lao Tzu) seems not to have its opposite in the book *Laozi (Lao Tzu)*. The concept *qi* used as the most general concept in the "White Heart" chapter of *Guanzi* did not seem to have its opposite either. However, taking the development of traditional Chinese philosophy as a whole, the categories are in pairs. For example, the concept "spontaneity" is paired with "ethics," and "principle" with *qi*. On the other hand, everything is contradictory, with two contradictory aspects, of which one does not exist without the other. Therefore, the categories which reflect the essential relationships of things must be in pairs of opposites. Some of the philosophical concepts and categories of traditional Chinese philosophy indeed seem to have no pairs of opposites, such as the "mean." We certainly cannot say there is a "counter-mean." Yet an analysis of the meaning of the mean may possibly lead to the solution to this question. Confucius advanced his "doctrine of the mean" to oppose "excess"; he said: "Excess amounts to insufficiency." Thus, the "mean" has the sense of "middle" or "correct." Therefore it would be sufficient to have the concepts of the "positive" and the "negative" in traditional Chinese philosophy since "mean" is included in the meaning of "positive."

Not all the categorical systems used by Western philosophers necessarily reflect the unity of opposites. Among the ten categories used by Aristotle, some can be paired up as opposites such as "quality" and "quantity," but "substance" has no specific opposite, though the other nine categories might be considered to be the opposites of "substance." The twelve categories used by Kant and the categories of the categorical system of Hegel's *Logik* are mostly pairs of opposites. Though divergent in their views on the categorical system, all Marxist philosophers agree that categories are in pairs, for instance, essence and phenomenon, content and form, necessity and chance, possibility and actuality, etc. Marxist philosophy holds that categories must be pairs of opposites; this is certainly a correct view and reflects the reality of things. Thus when we today study the categorical system of

traditional Chinese philosophy and try to make it more systematically and scientifically reflect the characteristics and level of traditional Chinese philosophy, we should try to find out the law of unity of opposites in its categorical system.

ii . How many categories should the categorical system of traditional Chinese philosophy contain in order to be sufficient to indicate "the basic pattern of being" or "the basic concepts that reflect the most fundamental characteristics, aspects and relationships of the phenomena and knowledge of the reality"? The twenty pairs of opposite basic concepts of the categorical system of traditional Chinese philosophy are merely a tentative proposition. They indicate mostly what the "world" and "man" are; for example, the existence of the "world" comprises "principle" and *qi* and the existence of "man" comprises "spirit" and "form." The categories used by Western philosophers, however, generally show the mode of existence and the "principles of knowledge." The contemporary categories of Marxist philosophy as a whole also show the characteristics and aspects of being and do not include the most basic concepts such as "mind" and "thing" in the categorical system. By this criterion, some of the categories listed above should not be included in the categorical system of traditional Chinese philosophy and some other concepts should be added. However, the way we have indicated the system of traditional Chinese philosophy might be just one approach, for the various categories listed in the diagram do indicate the "basic mode of existence" so far as their contents are concerned, and are also "focal points in the web" of man's knowledge. Would not, then, our way seem to be better suited to reflect the characteristics and level of traditional Chinese philosophy? Of course it would be even better if we could use less basic concepts to indicate traditional Chinese philosophy, such as the following diagram.

iii . Can "the categorical system of traditional Chinese philosophy" reflect its characteristics and level? This is a major question because serious research and thorough discussion are needed to ascertain the characteristics of traditional Chinese philosophy and its level. Could we venture to say that our diagram of the categorical system more or less reflects the characteristics and level of traditional Chinese philosophy? Apparently, traditional Chinese philosophy paid special attention to the study of the basic mode of existence and the existence of man and the relationships between things; that is, the identity of things, hence the multitude of concepts such as the "Heaven and man combine as one," the "knowledge and action combine as one," "essence

and function are like one," "nonbeing originates in being," the "spirit and form combine as one," and "mind and matter are not two." Although traditional Chinese philosophy did not devote much discussion to such concepts as time and space, cause and effect which are not included in our diagram, yet as a categorical system, traditional Chinese philosophy already attained a fairly high level as compared with ancient Western and Indian philosophy in that it covered a vast scope, with basic concepts all in pairs and the development of the meaning of its concepts reflecting the world with increasing depth.

The categorical system of traditional Chinese philosophy has not been widely discussed and is a fairly new topic. Here, the author has ventured to propose some preliminary propositions with the aim of arousing interest in the discussion of this topic in the hope that the study of the history of Chinese philosophy, under the guidance of Marxism, will advance even more scientifically.

柒 论中国传统哲学范畴体系的诸问题*

亚里士多德的《范畴篇》对古希腊哲学的范畴作了总结，提出十个范畴并进行了深入分析。黑格尔的《逻辑学》对西方近代哲学的范畴作了总结，提出了一个较完整的范畴体系。中国传统哲学（即中国古代哲学）有没有一个范畴体系？为什么要研究和如何研究中国传统哲学的概念、范畴问题？本文打算对这些问题作一初步的讨论。

一、研究中国传统哲学范畴体系的意义

研究中国传统哲学的范畴体系有它的一般意义和特殊意义两个方面。就其一般意义说至少有以下三点：

1. 研究哲学史当然要研究某一哲学家或哲学派别在历史上的作用，但哲学史的研究最终要解决的问题应该是揭示历史上哲学思想如此发展的逻辑必然性。比如说先秦哲学由孔子而孟子而荀子的哲学思想这样发展有什么逻辑必然性。一部以马克思主义为指导的科学的哲学史应当是既能揭示哲学思想发展的动因，又能揭示出哲学思想这样一种理论思维发展的内在逻辑。哲学是关于自然、社会、人类思维最一般规律的科学，它是以抽象思维形式表现出来的，因此可以说哲学思想的发展就其内容说是概念、范畴的提出，概念、范畴涵义的明确、丰富和不断发展的历史。我们研究哲学史上的概念、范畴是如何提出的，它的涵义如何由不明确、不很丰富到比较明确、比较丰富，概念、范畴的体系如何由简单到复杂、由不完整、不系统到比较完整、比较系统，对概念、范畴的发展过程进行具体的分析，就可以掌握哲学思想发展的规律，揭示出其发展的内在逻辑。

2. 我们说，哲学史是唯物主义与唯心主义斗争的历史，并不是说唯物主义与唯心主义的斗争和人类认识发展的规律是两个过程，而是同一个过程。人类认识世界的历史是在唯物主义和唯心主义斗争中发展的，也就是说唯物主义和唯心主义的斗争就表现了人类认识发展的规

律。而认识必然要使用概念和范畴，所以哲学史上的每一发展阶段都是围绕着对某些基本的概念或范畴的解释而展开，从而形成唯物主义和唯心主义的斗争的。例如，从中国哲学史上看，在先秦唯物主义和唯心主义的斗争，大体上是围绕着天（道）人（道）、名实、知行、变常等的不同解释而展开的；魏晋时期则是围绕着有无、体用、言意、名教和自然等几对概念而展开的；宋明是围绕着理气、心物、心性、能所等的不同看法而展开的。研究概念、范畴发展的历史，正是揭示唯物主义和唯心主义斗争规律的关键。

不仅如此，而且可以认识某些概念、范畴在认识史上出现的必然性，有助于克服在以往哲学史的研究中所出现的对唯心主义持简单否定态度的缺陷。王弼是个唯心主义哲学家，但他首先提出了若干“帮助我们认识和掌握自然现象之网的网上纽结”的范畴，如体用、一多、言意等，尽管他的解释是不正确的，而他能提出这些范畴毕竟表现了人类认识的深化，这在哲学史上就应该肯定，给以应有的地位。有王弼“以无为本”“得意忘言”这样的思想的提出，才会有欧阳建的《言尽意论》和裴頠的《崇有论》的出现。所以研究哲学史上的概念、范畴和它的发展历史，也是正确评价哲学史上唯心主义和唯物主义不可缺少的一环。

3. 恩格斯说：“迄今为止，学习哲学史是锻炼人们理论思维的唯一方法。”恩格斯这里说的哲学史并没有限定必须是科学的哲学史，倘若学习科学的哲学史当然更能起这样的作用。科学的哲学史必然是能揭示人类认识在唯物主义和唯心主义斗争中发展的规律的，而人类认识发展的历史最基本的内容则是概念、范畴发展的历史。由于概念、范畴在哲学史中的发展反映着人们认识的深入，我们研究它的发展历史就是把人类认识世界的过程在自己的思想中再想一次，当然是排除了种种偶然的、次要的因素，而抓住本质的、带规律性的内容的。这个重新思想的过程，必然使我们自己的思想也深化了。在我们研究概念、范畴发展的历史时，不仅要使人类使用概念、范畴认识世界的过程再现，而且必然要用某种方法使之再现，它只能是对概念、范畴的涵义、诸概念范畴之间的关系以及前后发展的逻辑联系进行理论上分析的方法，这种对概念、范畴的理论分析本身就是一种理论思维活动，就这一方面说，它也会有助于提高我们的理论思维能力。

以上三点都说的是研究概念、范畴的一般意义，因为研究任何哲学发展的历史（如西方的、印度的）都有这样的意义。而研究中国传统哲

学的概念范畴和它发展的历史还有其特殊的意义，这就是可以使我们了解中国传统哲学的特点和发展的水平。西方哲学有它自己一套范畴体系，从亚里士多德的《范畴篇》到黑格尔的《逻辑学》表现了西方哲学的特点和不同历史时期哲学思想发展的水平。印度哲学也有它自己的一套范畴体系，就印度佛教说，从原始佛教到大乘空有二宗所使用的范畴大体上是前后相继，有其鲜明的特点，并表现了印度佛教在运用逻辑思维、分析概念涵义上的较高水平。中国传统哲学确有它自己的一套概念、范畴，并且逐渐形成了一个较系统的体系。正因为中国传统哲学有自己一套概念、范畴，对这些概念、范畴就不能简单地用西方哲学的概念、范畴去套，甚至也不能简单地和马克思主义哲学的概念、范畴等同。

在我国哲学史上，长期形成的一套概念、范畴，除少量吸收了印度佛教的概念之外，基本上是独立发展的，所以它的特点也是很鲜明的，例如，在中国哲学史上，“天（道）”和“人（道）”这对范畴就非常重要，因此在中国传统哲学中不仅对天人关系的问题比较重视，而且特别重视人和人（社会）之间关系问题的研究。又如“体”和“用”这对范畴，它不仅包含有“本体”和“现象”的意思，而且有“根据”和“功用”、“全体”和“部分”、“抽象”和“具体”等等的意思，这样一些成对的概念、范畴及其体系自然充分地表现了中国传统哲学的特点，并反映了一定历史发展阶段上的理论思维水平。用一个不十分恰当的比方说，中国医学有其独特的传统，有着特殊的理论体系，使用着特殊的医学名词概念，尽管有些理论和成就我们还不能作出明确的科学解释，但既然在医疗实践上能取得良好的效果，它肯定反映了事物本质的某些侧面，包含着相当深刻的道理。就概念、范畴是知识成立的必要条件，是主观对客观联系的枢纽来说，一定概念、范畴的提出总是人们在思维实践上对客观事物某些侧面的认识获得的一定成果的反映，有什么样的概念、范畴就标志着人们的认识深化到什么程度。因此，我们研究中国传统哲学各个历史发展时期的概念、范畴，就可以看到我国历史上各个时期的理论思维水平。

在中国哲学史上，有三个时期的哲学对中国传统哲学范畴体系的形成有着较大的意义：一是先秦的诸子学；二是魏晋的玄学；三是宋明的理学。如果把这三个时期我国传统哲学的范畴体系和西方同期相比较，应当可以看到它有明显的特点和较高的水平。这样把我国传统哲学和其

他国家、民族、地域哲学的范畴体系相比较，是比较哲学应当研究的重要课题。

二、怎样研究中国传统哲学的概念、范畴

研究中国传统哲学的概念、范畴，从根本上说必须用马克思主义的科学分析方法，我们如果仅仅提出在中国哲学史上曾经使用过哪些概念、范畴，这远不是我们研究中国传统哲学的概念、范畴所要达到的目的。因为那样并不能揭示出哲学思想发展的规律、了解唯物主义与唯心主义斗争的规律和使我们的理论思维得到提高，特别是不能认识中国传统哲学的特点和水平。要达到上述目的就必须用马克思主义的科学方法：（1）分析概念、范畴的涵义；（2）分析概念、范畴涵义的发展；（3）分析哲学家（或哲学派别）的概念、范畴体系；（4）分析中外哲学概念、范畴的异同。只有在作了这样一些具体的分析研究的基础上，才有可能使中国哲学史的研究在科学化的道路上前进。

1. 分析概念、范畴的涵义

一个或一对哲学概念（范畴）的提出，反映着人们对世界认识的水平，但是这个或这对概念的涵义是什么则要去分析。古代哲学家提出一新的概念，其涵义往往不如我们今天科学、明确，特别是在说明世界的本原时所用的概念更是不确定，而且有时含糊不清。例如，老子是第一个把“道”作为他的哲学体系的最高概念提出来的。他提出“道”这个概念，在春秋战国时期具有和“尊天”思想相对立的意义。他把“道”作为世界的本原，这当然是提高了中国古代哲学的思想水平，但“道”的涵义如何？老子自己也感到难以说清，他说：“吾不知其名，字之曰道，强为之名曰大”，所以他用了许多形容词来说明“道”：“寂兮寥兮”“恍兮惚兮”“窈兮冥兮”等等。看来，古代哲学家限于当时的客观条件和认识水平，要给表明世界本原的概念作出明确说明是多么不容易呀！因此，这就要求我们根据《老子》一书对“道”这一概念的涵义进行分析。²“自然”这一概念在中国哲学史上被广泛地使用，但各个哲学家对它的解释却不相同。最早把“自然”作为一哲学概念使用的也是老子，他的“自然”大体上是“无为”的意思，汉朝王充继承了这个意思，说“天道自然无为”。到魏晋，王弼、夏侯玄等“贵无派”，把“自然”看成就是“道”——宇宙本体。夏侯玄说：“天地以自然运，圣人以自然用。自然者道也，道本无

名，故老氏强为之名。”

而且同一哲学家对“自然”的解释也并不一致，往往从几个方面去解释。这里我们以郭象的“自然”概念为例作些分析。郭象的“自然”至少有五点相互联系的涵义：第一，天人之所为皆“自然”。郭象注《庄子·大宗师》“知天之所为，知人之所为者，至矣”，说：“知天人之所为皆自然”。这就是说，郭象不仅把“天然”看成是“自然”，而且“人为”从某种意义上说也是“自然”。那么在什么意义上说“人为”也是“自然”呢？第二，“自为”是“自然”。郭象说：“言物自然者，无为之者也”，又说：“贵其无为而物之自为也”，可见他的“自然”有“任物之自为”的意思。那么为什么“自为”是一种“无为”呢？第三，“任性”即“自然”。郭象认为“自为”是“自然”，但“自为”并非任意而为，而是“率性而动”，即“任性而为”，“自然耳，故曰性”。“任自然”就是“任性”，既不使人从己，亦不舍己从人。第四，“必然”即“自然”。郭象说：“达命之情者，不务命之所无可奈何也，全其自然而已”，“知命”的不做“无可奈何”的事这就叫“自然”，这里所谓“命”即“必然性”的意思。第五，“偶然”即“自然”。郭象说：“物各自然，不知其所以然而然”，就“不知其然”说，“自然”又有偶然性的意思。所以，在说明事物的“自生”时往往用“突然”“掘然”等等，都是说事物的存在是没有道理、说不出原因的。

按郭象“自然”概念的涵义有以上相互联系的五点，而其中最重要的是后面两点，即“自然”既有“必然”又有“偶然”的意思。必然和偶然本是一对相对立的概念，但从辩证的观点看必然和偶然是相互联系的，是能互相转化的，必然性又是通过偶然性表现出来。郭象用“自然”一词既说明“必然”又说明“偶然”，正是因为他认识到“必然”和“偶然”的相互联系：此一事物作为此一事物如此地存在，从一方面说是“必然”的，“物各有性”；从另一方面说又是“偶然”的，“忽尔自生”。在郭象的体系中，事物的存在必须兼有这两方面，缺一方面就无郭象哲学。从对郭象的“自然”概念涵义的分析，我们大体可以看到郭象哲学的特点和水平。

2. 分析概念、范畴涵义的发展

不仅每个哲学家的概念、范畴的涵义不同，而且各个时代的概念、范畴的涵义往往也不相同。尽管如此，如果这种哲学思想是前后相承的，那么总可以发现概念、范畴涵义之间的继承关系。研究概念、范畴发展的历史，对于了解人们认识发展的规律是非常重要的。下面就中国传统哲学中“气”概念的涵义的发展作些分析，以便说明分析概念、范畴

涵义发展的重要性。

早在春秋时期，就有思想家提出“气”对人的影响问题，如《左传·昭公元年》所记载的医知论“六气”。到战国，“气”成一普遍概念，不仅多以为人的形体由“气”构成，而且有以为人的精神也是由“气”构成。在《管子》书中有《白心》《内业》《心术》等篇，中说：“精也者，气之精者也”“凡物之精，化则为生”“下生五谷，上为列星，流于天地之间谓之鬼神，藏于胸中谓之圣人”“故有气则生，无气则死”等等。这就是说，“气”之中一种叫“精气”，凡是能得到它的似乎就有生命，这种“精气”如果到人的身体中，就会有聪明智慧，可以使人成为圣人。

战国时期，这种对“精神”作不科学解释的“精气说”，如果说仍是一种唯物主义，那么这种唯物主义观点已包含了很大的缺陷，致使在一定条件下可以被唯心主义所利用而成为其体系的组成部分；也可以为神仙家所吸收而改造，使之成为其鼓吹“长生不死”的根据。我们知道，孟轲也讲“气”，提出有一种“气”叫“浩然之气”。在《白心》等篇中说，“精气”能给人以聪明智慧，且“此气也，不可止之以力，而安之以德”，“气”本身就有聪明智慧，要由道德力量巩固它。到孟轲那里，他所说的“浩然之气”，就是“集义所生”的了。显然，孟轲所讲的这种“气”就成为精神性的。到汉朝，董仲舒进一步把“气”道德化、神秘化，致使“气”成为上帝的意志和力量的表现。他认为“气”有刑、赏的能力，有善、恶的分别，有喜、怒、哀、乐的感情，这就使它虽保存了物质的外观，而失去了物质的特性。后来两汉谶纬迷信中关于“气”的种种说法，大体都是沿着董仲舒的观点发展的。

从先秦到两汉的一些史料中我们还可以看到，“气”和神形问题相联系多与“养生”有关，而“养生”则往往又是“成神”的一种手段。在《庄子》书中，所描写的“真人”“神人”等多是“神将守形，守形乃长生”者，他们“吸风饮露，不食五谷”，“一其性，养其气”，神与形合，即可达到“形全精复，与天地为一”的境界。《吕氏春秋》亦多载“养生”之谈，认为要做到“长生久视”则“气”必能在身体中不断流通，而“精气日新，邪气尽去，及其天年，此之谓真。”在《淮南子》中把“养气”“养形”“养性”往往看成是一回事，而且都和“气”的作用联系在一起，无论《吕氏春秋》还是《淮南子》都受到《白心》等篇“精气说”的影响，认为“精神”也是一种“气”（精气），它可以自由出入于身体，神形不离则可长生久视。

与此同时，从先秦到两汉也有继承此前把“气”看成是物质性的、构成天地万物的东西的哲学家。荀子认为天地万物包括人都是由“气”构成，“水火有气而无生，草木有生而无知，禽兽有知而无义，人有气有生有知亦且有义”。《淮南子·精神训》说宇宙最初是没有具体形象的混沌未分的元气，后由阴阳二气的互相作用而产生天地万物，“浊气为虫，精气为人”。王充更明确地说“天地合气，万物生焉”，而且万物的产生正是“气”运动的结果，“天之动行也，施气也；体动气乃出，物乃生矣”。为了反对董仲舒对“气”的唯心主义观点，王充特别提出“气”是无意志、无目的的，“气也，恬澹无欲，无为无事者也”“气若云烟，安能听人辞”。但是，王充和《淮南子》书中的观点一样，仍然把人的精神（或生命现象）看成是“精气”，他说：“人之所以生者，精气也，死而精气灭”。可见在我国古代哲学史上关于“气”的学说，从对这个概念涵义的分析上，就可以明显地发现其间的前后继承关系了。上述三个方面关于“气”的学说，或者说关于“气”的几种涵义，到东汉末都汇合在道教的思想之中，兹不详述。

3. 分析哲学家（或哲学派别）的概念、范畴体系

在哲学史上，比较重要的哲学家在建立其哲学体系时，必然要使用一系列的概念、范畴，因此研究其概念、范畴相互之间的关系，是我们深入解剖其思想体系的基本要求。一个哲学家思想体系水平的高低往往和他使用概念、范畴是否丰富、是否成体系，以及其概念、范畴的涵义是否反映事物之间的本质联系有关系。从对哲学史上的哲学家（或哲学派别）的研究方面说，有时看法不同或者也是由于没有对其概念、范畴体系作全面而系统的分析引起的。例如，郭象的哲学如仅从他分析“有”和“无”这对范畴的关系看，或者说他的思想是唯物主义的，但是郭象的哲学之所以成为魏晋玄学发展的高峰，并不是由于他对“有”和“无”的关系提出了和王弼不同的看法，而在于他有一比较完整的思想体系。郭象的哲学思想体系分析起来，大体上可以说是由下述四组基本概念构成的（当然在郭象哲学中还有其他一些重要概念，这里就不说了）。

“有”和“无”：魏晋玄学所讨论的中心是“本末有无”问题，郭象的哲学也可以说是从讨论这个问题开始的。郭象认为，“有”（或“万有”）是唯一的存在，是“常存”的，“夫有之为物，虽千变万化，而不得一为无”，“言天地常存，乃无未有之时”。至于“无”，他则认为在“有”之上的

造物主或作为本体的“无”是不存在（non-existence），就是“无物”（nothing），所以他说：“无则无矣，则不能生有”；“请问造物者，有邪无邪？无也则胡能生物？”“无”既然是“无”，怎么能生物？所以郭象哲学一开始就否定在“万有”之上有一个“造物主”，或者说有一个与“有”相对立的本体之“无”作为它存在的根据。但是，郭象哲学并未就此止步，而是继续讨论下去了。

“性”和“命”：事物的存在既然不是以本体的“无”为根据，那么事物的存在有没有什么根据呢？照郭象看，不能说“万有”的存在是没有任何根据，万物既然存在了，其存在本身就是其存在的根据，具体地说，其存在的根据就在于其“自性”，“物各有性，性各有极”。郭象的所谓“性”就是指“此物之所以为此物者”，有“规定性”的意思，所以他说：“天性所受，各有本分，不可逃，亦不可加。”“物各有分（性分），故知者守知以待终，而愚者抱愚以至死，岂有能中易其性？”所谓“命”，郭象则把它解释为“必然性”，如他说：“命也者，言物皆自然而无为之者”，“知不可奈何者命也”。很明显，他的“性”和“命”两概念的涵义都是为了论证“有”是唯一的存在，而作为造物主或本体的“无”是根本不存在的。

“自生”和“无待”：事物的“自性”是其存在的根据，而此“自性”又是如何产生的？它的产生是不是有目的、有条件的？郭象说：“物各自生，无所出焉，此天道也”，“物之生也，莫不颓然而自生。”如果事物的“自性”不是“自生”的，那么就是其他事物所给予的，是造物主有目的创造的。然而此事物之所以成为此事物，彼事物之所以成为彼事物，是没有什么使它这样或那样地产生和存在，甚至也不能认为是它自己使它这样或那样地产生和存在，所以“自生”只能是“欬然自生”“突然自生”“自然而生”。事物的产生和存在如有什么原因和目的，则必然导致承认有主使者。那么“自生”的事物和其他“自生”的事物是个什么关系呢？郭象认为，任何事物都是“自生”的，其存在都是“自足其性”的，所以是“无待”的。一方面“无待”之所以可能是因为“物各自造”，“物各自造，而无所待焉”；另一方面只要“适性”“安性”，则“无待”对于任何事物来说都是可以达到的，“苟足于其性，则虽大鹏无以自贵于小鸟，小鸟无羨于天池，而荣愿有余矣。故小大虽殊，逍遥一也。”所以要坚持事物存在的根据除其自身的“自性”外，再没有其他任何根据和条件，就必须承认它是“自生”的“无待”的。

“独化”和“相因”：要把“自生”和“无待”的观点坚持下去，还有一个重要问题要解决。如果说，每个事物都是一个个的存在，此事物就是此事物，彼事物就是彼事物，互相分别，那么所有的事物岂不都是相对的？如果都是相对的，那么岂不还要受到限制？如果要受到限制，那么岂不仍是“有待”的？为了解决这个问题，郭象提出了“独化”的概念。所谓“独化”是说任何事物的生生化化都是独立自足的，因此“无待”是绝对的。如果要追求事物生生化化的原因和根据，表面上看来可以无穷无尽地追求下去，但追求到最后只能得出“无待”的结论来，所以他说：“若责其所待，而寻其所由，则寻责无极，卒至乎无待，而独化之理明矣”。郭象在《齐物论注》中举了一个极端的例子，他说形、影和罔两（影外之阴）都是独立自足的、绝对的存在，“是以涉有物之域，虽复罔两，未有不独化于玄冥者也”。

如果有一物不是独立自足的存在，那么其他任何事物也都不能独立自足的存在，这样就必然引出在“万有”之上仍有一作为其存在根据的本体（或造物主），而势必承认有“生化之本”了。事物尽管是独立自足的存在，只要每个事物都完满地实现其“自性”，充分地发挥其“自性”，“知者守知以待终，而愚者抱愚以至死”，那么就可以达到“天地未足为寿，而与我并生；万物未足为异，而与我同得”的境界。这样对其他任何事物就有最大的功用，“相因之功，莫若独化之至”。从另一个角度看，任何存在着的事物，只要是存在着的它就是不可少的，就不能不存在，郭象说：“人之生也，形虽七尺，而五常必具，故区区之身，乃举天地以奉之。故天地万物，凡所有者，不可一日相无也。一物不具，则生者无由得生；一理不至，则天年无缘得终。”因此，凡是存在的都是合理的、必然的，而且是不互相排斥的。这个观点似乎与“独化”说有矛盾，其实不然。因为照郭象看，存在着的事物都是合理的、必然的，而不是互相排斥的，正是以每一事物都能充分地、绝对地发挥其“自性”、独立自足地生生化化为条件。

从对郭象哲学范畴体系的分析看，他的哲学最后要建立的是“独化”说，而“崇有”不过是达到“独化”说的阶梯。而且在郭象的体系中唯有建立其“独化”学说，才可以坚持“崇有”，而较为彻底地否定在“万有”之上还有一作为其存在根据的“无”。

我们要了解一个哲学家是唯物主义还是唯心主义、他的哲学的特点以及他的哲学思想的前后继承关系和历史地位，都必须通过对其范畴体

系的分析才可以得到。

4. 分析中外哲学概念、范畴的异同

在对中外哲学概念范畴的分析比较中，可以更好地认识中国传统哲学的特点和水平，这点是毫无疑义的。由于这个问题比较大，作者又没有作过仔细、深入的研究，这里只就魏晋玄学和当时传入的印度佛教般若学这一个问题作一点粗浅的比较分析。

魏晋玄学所讨论的主要问题是“本末有无”问题，所以“无”和“有”两个概念是玄学的最重要的基本概念。佛教般若学所讨论的问题是“有”和“无”（或“空”）的问题，所以道安说：“于十二部，毗目罗部最多，以斯邦人老庄教行，与方等经兼忘相似，故因风易行耳。”但佛教般若空宗讲的“空”（或“无”）虽与玄学家王弼等讲的“无”有相似处，实并不相同。汉末灵帝光和二年（179年）支娄迦谶译出《道行般若波罗蜜经》中有“本无品”，“本无”是梵文Tathatā的意译，后来译为“真如”，而在《道行经·本无品》中所说的“本无”是“诸法本无自性”的意思，所有的事物都没有实在的自体。玄学家王弼等也讲“本无”，意思是说万物“以无为本”，所有的事物都以“无”为本体。这两种“本无”思想虽不能说全然不同，但其涵义却有很大差别。从魏晋玄学说，王弼的“本无”思想是继承了老子的学说，在他的哲学体系中“无”这一概念和“道”或“理”是同一的，“夫大之极也，其唯道乎！……虽贵以无为用，不能舍无以为体”；“物无妄然，必由其理”，所以王弼的“无”不是说“虚空”或“不存在”（non-existence），而是指事物的“本体”（substance）。佛教般若空宗的“本无”只是讲的“诸法本无自性”，他们认为任何事物都是因缘和合而成，并无实在的自性。从这里看，般若空宗说的“空”不是指的“本体”（substance）而是说的“虚空”（non-existence）。至于“有”的涵义，魏晋玄学所讲的“有”一般都是说“万有”，即形形色色的具体存在物，但在我们所翻译的佛经中，把佛教中不同涵义的“有”（存在）往往都译为同一个“有”。³

佛教传入中国，在东汉先是依附于中国的道术，到魏晋玄学流行以后又依附于玄学，东晋时所出现的我国僧人的般若学各派大体上也还是用玄学思想了解般若学，一直到鸠摩罗什来华，译出《般若经》的释论《大智度论》和《中论》《百论》《十二门论》等，在中国才对印度佛学的般若学的原意了解了。僧肇的《不真空论》是比较近印度佛教般若学讲“非有非无”的原意的。

我们在对中外哲学概念、范畴的比较分析中，可以看到它们各自的特点和水平，也可以看到一种外来文化思想的传入对原有的传统文化思想发生影响的过程，以及外来文化思想如何被吸收而成为所传入的国家（民族、地域）文化思想的一个组成部分。

三、关于中国传统哲学范畴体系的构想

“范畴”从西方哲学史上看有种种解释，亚里士多德的《范畴篇》把它看作是存在的基本样式（mode），他提出十个范畴：本质（substance）、量（quantity）、质（quality）、关系（relation）、位置（place）、时（time）、占有（state）、作用（action）、遭受（passion）等。康德的12范畴说是与认识有关的原则或说是构成经验的条件。列宁说：“范畴是在区分过程中的一些小阶段，是帮助我们认识和掌握自然现象之网的网上纽结。”苏联《哲学辞典》说：“反映现实世界各种现象和认识的最一般的和最本质的特性、方面和关系的基本概念。”看来，对“范畴”大体上是从现实界的存在和认识两个方面来说明的：说它是“存在的基本样式”或“现实界各种现象的最一般的和最本质的特性、方面和关系”，是就存在方面说的；说它是“构成经验的条件”或“认识和掌握自然现象之网的网上纽结”，是就认识方面说的。而认识的必要条件必然是反映和表现“存在的基本样式”；而“存在的基本样式”又只是在人们的认识过程中才有意义。从上述一些说法中，我们还可以看出“范畴”和“概念”的关系，范畴是基本概念，概念并不都是范畴。因此，在这里我们要讨论的是，中国传统哲学的基本概念即范畴应有哪些。如果我们能根据中国古代哲学家所使用的基本概念构成一个能表现中国传统哲学是如何用以认识和说明“存在的基本样式”的体系，并能从中揭示中国传统哲学思想发展的线索，那就证明中国传统哲学确有其范畴体系。下面先用一图表（见下图）来表明，然后再作一些必要的说明：

在这个图表中共用了20对中国传统哲学的基本概念构成中国传统哲学的范畴体系，这当然是一个很初步的构想，问题一定很多，目的是想引起大家进一步地研究和讨论。对这个中国传统哲学范畴体系的构想图表，我想说明以下几点：

1. 这个构想图表分为三大栏，第一栏（I）是想说明中国传统哲学

中用了哪些基本概念表述世界的存在；第二栏（II）是想说明用了哪些基本概念表述存在的形式；第三栏（III）是想说明用了哪些基本概念表述人的存在和认识。“天（道）”和“人（道）”的关系问题一直是中国传统哲学讨论的中心，中国哲学史上的唯物主义和唯心主义的斗争大都也是围绕这个问题进行的。子产第一个明确地提出这两者之间关系的命题：“天道远，人道迩”。孔子一方面很重视“天命”，而另一方面更重视“人事”。他“五十而知天命”，却比较少讲这个问题，“夫子之言性与天道，不可得而闻也”，可是《论语》大量记载他讲“人道”的问题。孟子讲“尽心，知性，知天”，《中庸》说“诚者天之道，诚之者人之道”，荀子讲“制天命而用之”，都是讲的“天人关系”问题。道家的老子讲“天道自然无为”，而压低“仁义”（人道）；庄子“蔽于天而不知人”。汉朝的儒家大师董仲舒说他自己讲的是“天人相与之际”的学问；受道家影响比较深的司马迁也说《史记》是“究天人之际，通古今之变”的著作。魏晋玄学讨论的“本末有无”问题，就其内容说仍是“自然”（天道）与“名教”（人道）的关系问题，所以何晏说：“若王弼者，始可与言天人之际。”宋儒无论理学还是心学，都把“人心惟危，道心惟微，惟精惟一，允执厥中”称为“十六字心传”。朱熹认为“太极（天理）只是个极好至善底道理”，“是天地人物万善之好底表德”，“天理”和“人欲”问题仍是天人关系问题。直到王夫之仍然把这个问题作为他讨论的重点，他认为“礼虽纯为天理之节文，而必寓于人欲以见”，“人欲之大公即天理之至正矣”。所以，中国传统哲学是从讨论“天（道）”和“人（道）”这对范畴的关系开始而展开的，它反映了中国传统哲学所注重的问题和特殊内容。

2. 这个构想图中表述了中国传统哲学范畴的发展及诸范畴之间的关系。中国传统哲学从研究“天（道）”和“人（道）”的关系开始，而分为两支：一支为道家，老子提出“道”和“万物”的关系，他说：“道生一，一生二，二生三，三生万物”，又说：“天下万物生于有，有生于无”，因此“道”和“物”的关系又以“无”和“有”这对概念表现；另一支是儒家，在《易传》中提出“道”和“器”这对范畴，说：“形而上者谓之道，形而下者谓之器”，又说：“易有太极，是生两仪”，“一阴一阳谓之道”，所以“道”和“器”的关系又以“太极”和“阴阳”这对概念表现。两汉时哲学思想虽有发展，但似乎没有提出新的有影响的范畴。魏晋玄学主三玄（《老子》《庄子》《周易》），而使道家系统的思想和儒家《周易》系统的思想渐结合，而实是以老庄思想为骨架而建立了关于宇宙本原问

题的本体论。魏晋玄学用“体”“用”、“本”“末”、“一”“多”等概念说明“无”（本体）和“有”（万物，本体的种种表现），用“自然”（体）和“名教”（用）这对概念表述“宇宙本然”（即本体）和“人类社会关系”（即名分教化之类）的关系，用“意”和“言”这对概念说明对宇宙本体的认识问题。自魏晋南北朝以后，中国传统哲学经过印度佛教的冲击，到宋形成理学。理学实是吸收了佛教的思想而形成的新儒学体系。如果说魏晋玄学讲的本体论是以老庄思想为骨架，那么宋明理学确为儒家学说建立了客观唯心主义体系（朱熹）、主观唯心主义体系（王守仁）和较高水平的唯物主义体系（王夫之）。这个时期的哲学概念继承了魏晋玄学的，又吸收了隋唐佛学的，而使儒、道、佛三家在儒家思想基础上汇合了。“理”和“气”、“心”和“物”成为当时哲学的最基本的概念；“心”与“性”展开为“心即理”和“性即理”的问题；“能”和“所”、“格物”和“穷理”等是认识论的问题；“天理”和“人欲”是社会问题。列宁在《谈谈辩证法问题》中说：

“哲学史上的圆圈：古代：从德谟克利特到柏拉图以及赫拉克里特的辩证法。……近代：霍尔巴赫——黑格尔（经过贝克莱、休谟、康德）。黑格尔——费尔巴哈——马克思。”

在《黑格尔〈哲学史讲演录〉一书摘要》中说：

“把哲学史比做圆圈……”

“每一种哲学思想 = 整个人类思想发展的大圆圈（螺旋）上的一个圆圈。”

列宁所指出的黑格尔关于“把哲学史比做圆圈”的思想，深刻地反映了哲学思想发展的规律，这对我们研究中国传统哲学思想发展有非常重要的意义。

从这个范畴体系的构想图中，我们可以看到中国传统哲学基本上是由三个螺旋上升的圆圈构成的：第一个是先秦，从儒家说是孔子—孟子—荀子（或《易传》）；从道家说是老子—稷下学派（即《白心》等篇）—庄子，两汉是个过渡阶段。第二个是魏晋，王弼—向秀—郭象（或王弼—郭象—僧肇）。南北朝到隋唐佛教盛行，经过一段时间的发展形成了中国的宗派如华严宗、禅宗等。第三个是宋明，张载—朱熹—王夫之。

3. 在构想图中的第二栏(II)只列了3对范畴,而最根本的一对范畴是“静”和“动”,“常”和“变”是“静”和“动”的表现,其实“正”和“反”也是“静”和“动”的一种特殊表现形式。中国传统哲学中虽然讨论“静”和“动”的哲学家很多,但“时”“空”问题除先秦名家和后期墨家有较多的讨论外,以后讨论的则不太多,也不普遍。从中国传统哲学看,它的哲学命题似乎不受时、空的限制;运动是否在时空中也不注意。所以,在这里我们没有把“时”“空”这类概念列在这个范畴体系构想图中。

4. 在中国传统哲学中,关于“人(道)”方面的问题研究得比较多,特别是“道德”(伦理)问题的讨论更是中国传统哲学的特点,因此到底在范畴体系中应列入哪些,要很好地研究。在这个构想图中(见III栏)只列了5对(有些也不全是“人(道)”问题),作为哲学的基本概念是不是大体也够了。“神”和“形”是说“精神”和“身体”的关系问题,是讨论人的生命现象,这个问题从先秦一直讨论下来,有唯物主义的和唯心主义的不同看法。“性”“情”问题可以说是伦理道德的核心问题,对“性”自先秦以来就有种种不同看法,有“性善说”“性恶说”“善恶混说”“无善无不善说”“善恶以人异说”等等;而“性”和“情”的关系又有“性善情恶”“性静情动”等不同说法。到魏晋玄学对这个问题仍很注意,它成为讨论“圣人”与“一般人”的异同的一个重要问题。宋明理学分“性”为“天命之性”和“气质之性”,而所谓“天命之性”是从“天理”来的;“气质之性”是生来固有的感情、欲望等,是从构成身体的“气”得来的,这还是一个“性”“情”问题,而道德教化的重要就在“存天理,灭人欲”。“知”“行”问题在中国传统哲学中占有很重要的地位,就中国传统哲学看,多数哲学家都主张既要“知”又要“行”,而且以为“行”更重要。“名”“实”问题是中国传统哲学原来就有的,而“能”“所”这对概念则是从佛教中吸取的,都是关于人的认识问题。因此,构想图的第三栏(III)所列是表明人的存在和认识的概念。

四、问题讨论

关于中国传统哲学的范畴体系是个很复杂、又涉及很多方面的问题,因而需要大家来切实地研究讨论,这里提出几个问题作一点初步的讨论:

1. 范畴体系中的范畴是否应成对?

关于这个问题要分成两个问题来讨论，一个问题是从哲学史上说一个哲学家使用的概念、范畴并不一定都成对，例如老子提出“自然”这个概念，在《老子》书中或者还没有另一与之相对的概念；在《管子》书《白心》等篇中“气”作为最一般的概念似乎也没有一相对的概念。但是，从整个中国传统哲学的发展看，范畴都是成对的。如“自然”和“名教”就构成一对范畴；“气”和“理”就构成一对范畴。另一问题是，就任何事物来说都是矛盾的，都有矛盾的双方，决没有只有一方而无另一方，因此反映事物本质联系的范畴也应是成对的。在中国传统哲学中有一些概念、范畴似乎并不成对，例如“中庸”，我们当然不好说“反中庸”和它构成了一对相对的概念。但是，我们从“中庸”的涵义方面来分析，这个问题或者可以解决。孔子提出“中庸之道”是为了反对“过”的，他说：“过犹不及。”所以就“中庸”的涵义说是“中”或“正”的意思，因此中国传统哲学的范畴体系中有“正”和“反”这对范畴就可以了，“正”可以包含“中庸”。

从西方哲学史上看，一些哲学家的范畴体系似乎也并不都是根据对立统一而表现的，在亚里士多德的10个范畴中有的是成对的，例如“质”和“量”，但“本质”（substance）则没有一具体相对的范畴，当然也可以说其他9个范畴都和“本质”构成一对范畴。康德的12范畴和黑格尔的《逻辑学》的范畴体系分析起来，所列范畴大都是成对的，马克思主义哲学家关于范畴体系的看法虽不一致，但都认为范畴应是成对的，例如“本质和现象”“内容和形式”“必然性和偶然性”“可能性和现实性”等等，马克思主义哲学认为范畴必然是成对的，这无疑是正确的，它反映了事物的本来面貌。因此，我们今天研究中国传统哲学的范畴体系，使中国传统哲学的范畴系统化，比较科学地反映中国传统哲学的特点和水平，也应该在它的范畴体系中体现对立统一的规律。

2. 中国传统哲学范畴体系中应包含多少对范畴就足够表明“存在的基本样式”或“反映现实界各种现象和认识的最一般的和最本质的特性、方面和关系的基本概念”？这里提出20对基本概念构成中国传统哲学的范畴体系，只是一个尝试，可能不能成立。这20对范畴大都说“世界”和“人”是什么，如说“世界”的存在有“理”有“气”，“人”的存在有“形”有“神”等等。西方哲学家所说的范畴往往是说的“存在的样式”或“认识的原则”。就目前马克思主义哲学的范畴说，一般也是说的存在的特性方面和关系，而并不把“心”和“物”这样的最基本的概念放在范

畴体系中。如果用这个标准看，上面所列中国传统哲学范畴体系中有些范畴就不能列入，而应补充另外一些概念。但是，我们这样来表述中国传统哲学的范畴体系是不是也是一种方式，因为图表中所列诸范畴从它们的涵义说是表明“存在的基本样式”的，也是人们认识事物之网的网上纽结。这样表述是不是更适合反映中国传统哲学的特点和水平？当然，如果用更少一些基本概念来表述中国传统哲学的范畴体系应该说是更理想的，比如说也可以如下图只列12对：

3. “中国传统哲学的范畴体系”是否能反映出中国传统哲学的特点和水平？这个问题比较大，因为中国传统哲学的特点有哪些，和怎样看一种哲学水平的高低，都是要进行认真研究和充分讨论的。但我们这个构想图，是不是也可以说多少反映了中国传统哲学的特点和水平呢？看来，中国传统哲学比较重视研究存在的基本样式和人的存在问题，而且

注重事物之间的联系，即其同一性的方面，所以在中国传统哲学中讲“天人合一”“知行合一”“体用如一”“无因于有”“神形合一”“理气一元”“心物不二”等等比较多。在这个构想图中虽然没有列“时”“空”、“因”“果”等概念（在中国传统哲学中讨论这方面问题确实比较少），但作为一个范畴体系相对于西方古代或印度古代哲学来说它并不逊色，它包含的范畴很广，基本概念都是成对的，而且从它的发展上看概念的涵义是越来越深刻地反映世界，都表明了中国传统哲学已有较高的水平。

关于中国传统哲学范畴体系问题过去研究讨论得不多，还是一个较新的课题，这里只是提出一些不成熟的看法，希望能引起讨论，使中国哲学史的研究在马克思主义指导下进一步科学化。

VIII . A RECONSIDERATION OF THE QUESTION OF "THE TRUE, THE GOOD, AND THE BEAUTIFUL" IN TRADITIONAL CHINESE PHILOSOPHY

What is the highest ideal in spiritual life human beings quest for? I believe it is "the true, the good and the beautiful" and the unity of the three in one system. Of course, ideas of philosophers are different regarding what constitutes each of these three ideals. As far as how these are unified in one system, opinions differ from each other. There cannot be any final conclusion to this discussion, and actually there is no need for such one. As long as people quest for truth, goodness and beauty, thinkers will undoubtedly want to construct systems unifying the concepts. In my opinion, the quest for spiritual realm of life in Chinese traditional philosophy can be referred to as ancient philosophers' quest for "the true, the good, and the beautiful" in another way. I wrote an article entitled "The Question of the True, the Good and the Beautiful in Traditional Chinese Philosophy"¹ which was largely a historical discussion of the Confucian view about the question. This article is, however, not confined to a discussion of the Confucians and is not historical in its approach because such an approach would entail too unfocussed and lengthy an article. We will therefore analyze and discuss selected representative thinkers.

Influence on the development of Chinese philosophy has always been exerted by China's pre-Qin philosophers, among whom Confucius, Laozi and Zhuangzi have been the most influential. If we

regard these three as typical and through them discuss the question of the different spiritual realm of life (*rensheng jingjie*) advanced by different traditional Chinese philosophies, we may perhaps be able to derive a unified understanding of spiritual realm of life held by traditional Chinese philosophy.

Forty years ago, Shen Youding, who was engaged in research at Oxford University, wrote to friends in China, saying:

The value theories of Kant and of Hegel have one important difference which we can represent as follows:

Kant: the good $\leftarrow$ the beautiful $\leftarrow$ the true

Hegel: the true $\leftarrow$ the beautiful $\leftarrow$ the good

From this we can see that Kant was perhaps closer to the Chinese, while Hegel was closer to the Indian or Greek.²

This conclusion of Mr. Shen is particularly insightful and innovative. From Confucian thought, which formed the mainstream in the development of traditional Chinese philosophy, we can see that this scheme holds, but if we examine the different schools of thought and philosophies which make up traditional Chinese philosophy we find that it does not. As I see it, in traditional Chinese philosophy there were in fact three different systems integrating the true, the good and the beautiful. The systems of Confucius, Laozi and Zhuangzi are set out below:

Confucius:	the good	$\leftarrow$	the beautiful	$\leftarrow$	the true
Laozi:	the true	$\leftarrow$	the good	$\leftarrow$	the beautiful
Zhuangzi:	the beautiful	$\leftarrow$	the good	$\leftarrow$	the true

Drawing analogies from this diagram we can say in overall terms that in terms of value regarding the question of the true, the good and the beautiful, Confucius approximates Kant, Laozi approximates Hegel, while in a limited way Zhuangzi approximates Schelling or Aristotle. Of course such analogies are limited and we cannot

extrapolate them to all other aspects of the ideas of these thinkers, but they do serve to direct the lines along which we can think.

I . Confucius' Demands of the Realm of Life

In the section of *The Analects* entitled "Wei Zheng" (Practicing Government) the following statement is attributed to Confucius:

At fifteen I set my heart upon learning, at thirty I had established myself, at forty I was not subject to doubt, at fifty I came to know the commands of Heaven, at sixty I could immediately discriminate the truth or falsity of what others said, and at seventy I followed my heart's dictates, but did not transgress the rules.

We know that Confucius and later Confucians believed that life and death or wealth and honor were not attained by mere individual efforts, but that the level of a person's morality or learning could differ because of the amount of individual effort. These words of Confucius are at one and the same time a description of the course of his life, an outline of the process of self-cultivation he pursued, and a summation of his quest for and understanding of the true, the good and the beautiful. The years from fifteen to forty can be seen as the preparatory stage for his assumption of sagehood, and the statements that he was "not subject to doubt" and that he could "follow" his "heart's dictates, and not transgress the rules" reveal that deepening of the process whereby he acquired sagehood. The statement that he had come "to know the commands of Heaven" explains how he acquired knowledge and understanding of "Heaven" (the ultimate questions of life and the universe), which may perhaps be considered to fall within the scope of the quest for the true. Here Confucius sees Heaven as a cognitive object and he has not attained the stage where he is "one with Heaven," having not yet entered that realm of unity. In his "Preface to *Zhuangzi*," Guo Xiang wrote:

Zhuangzi can be said to have known the origin. . . . although he said he did not have that understanding, he alone responded to it. To respond without understanding is, however, to have no need to apply effort.

To be able to respond to the noumenon of Heaven, Earth and the myriad things can be called knowing "the root," but this entails the cognitive subject being apart from the noumenon of Heaven, Earth and the myriad things and to see this noumenon as the object of cognition necessarily means that one has not yet attained oneness with that noumenon. While this noumenon exists on a higher realm, Zhuangzi was not yet able to "follow" his "heart's dictates, but did not transgress the rules."

Confucius' statement that at sixty he "could immediately discriminate the truth or falsity of what others said" (*liushi er ershun*) has, in fact, been subject to varying interpretations over the ages. Yang Bojun, whose interpretation presented in *Lunyu Yizhu (Analects, Vernacular Translation and Annotation*, Beijing: Zhonghua Shuju, 1958) is used here, writes that the expression *ershun* "is extremely difficult to explain. Many have sought to do so, but I feel all their explanations to be forced. . . ." I believe that Yang's interpretation is close to what Confucius intended by the statement. Yang's interpretation is probably based on the explanation of Li Chong of the Jin Dynasty who wrote that *ershun* means "the heart and the ear follow each other" (*xinyu' er xiangcong*). Sun Chuo, also of the Jin Dynasty, provided a more metaphysical explanation when he wrote:

Ersun means to discard the logic which governs listening, to intuit the mystery of the meaning, and not to pursue but nevertheless obtain—what can be termed following the principle of the supreme one unconsciously and unknowingly.

This is the intuitive understanding which transcends experience of the entirety of the principles governing the universe, and is in the realm of "inner transcendence." According to the views of modern

hermeneutics all explanations of our predecessors' ideas contain within them the ideas of the explicator; by definition, there must be connections between the person doing the explanation and what he is explaining. Most of the explanations of Confucius' thought by thinkers throughout the ages reveal this to be the case. I would like to turn to Zhu Xi's explanation of these words of Confucius. He wrote:

As the sounds enter, the heart communes with them, finding nothing in them to evade or oppose, thereby understanding their ultimate sense, acquired without any thought.

Zhu Xi's "sounds" (*sheng*) relate to voice (*shengyin*) and they encompass both the "articulated sounds" (*yousheng zhi yin*) and the "unarticulated sounds" (*wusheng zhi yin*). "Understanding their ultimate sense" should transcend the realm in which Confucius knew the commands of Heaven, and so this realm "acquired without any thought" transcends knowledge. I believe that this can be explained as an intuited aesthetic realm, and what is thereby acquired is an intuited image transcending experience. This can also be explained as an artistic realm, the realm of "beauty." This explanation of Confucius' statement may also be "forced," but as Yang Bojun asserts that most explanations of this line have, throughout history, been forced, I see no harm in building on this legacy. But I also believe that such an explanation does have a basis, particularly from the viewpoint of philosophy, in which it may have a new sense. We know that Confucius regarded music as a form of cultivation and that "when in the kingdom of Qi he heard the music of Shao" he was "unable to savor the taste of meat for three months," a detail revealing that he had entered a sublime aesthetic realm "acquired without any thought." Confucius had his own explanation of this realm he had attained: "I had not anticipated that music could transport me to such a state." He thus unintentionally attained a realm in which he enjoyed a form of transcendental beauty.

Zhu Xi commented as follows on Confucius' statement that at

seventy he "followed" his "heart's dictates, but did not transgress the rules":

Ju, the carpenter's square, is an instrument for measuring patterns, but here it refers generally to pattern or custom. While following his heart's dictates, Confucius did not transgress his pattern, and so he was at ease in his deeds and attained the mean without effort.

The passage from *The Analects* being commented on here therefore refers to a realm at one with Heaven, Earth and the myriad things, where one "knows truth" (*zhi zhen*), "acquires beauty" (*de mei*), and later arrives in a perfect realm of "ultimate goodness" (*zhi shan*). Confucius believed that "perfect beauty" could not compare with "perfect beauty combined with perfect goodness." *The Analects* contains the following passage in "The Eight Yi":

Discussing the music of Shao, Confucius commented: "It possesses perfect beauty, as well as perfect goodness." Of the music of King Wu, he commented: "It has perfect beauty, but does not possess perfect goodness."

To say that something possesses perfect goodness is, to a certain extent (at least for the Confucians), connected with a judgment concerning ethical value. Mencius said: "Complete truthfulness is called beauty." "Beauty" here contains the idea of ethical evaluation. Zhu Xi annotated this line as follows:

When one has strenuously implemented goodness until it is filled to completion and has accumulated truth, then the beauty will reside within it and will not depend on externals.

"Goodness" here is a form of internalized "beauty," the highest beauty of character. It can be seen that Zhu Xi believed that "goodness" in one respect can encompass "beauty." "Perfect goodness" was held to be superior to "perfect beauty" because "perfect goodness" was in fact both "perfect goodness and perfect beauty." We would now

seem to be able to assert that Confucius' realm of life (or his realm of the sage) proceeds from "knowing truth" and "acquiring beauty" to a realm of perfect goodness in which "one can be at ease in one's deeds and attain the mean without effort." In other words, from "truth" we proceed to "beauty" and then we finally attain "goodness."

"The good←the beautiful←the true" was the special characteristic of Kant's philosophy. As Kant saw it, practical reasoning was superior to speculative reasoning. In his *Kritik der reinen Vernunft* (*Critique of Pure Reason*) the object of research was the phenomenal world and it was subject to the control of the laws of necessity of nature. In his *Critique of Practical Reasoning* the object of research was the noumenon of rational functioning, which was not subject to laws of necessity, and so was free. The former was nature, the latter morality. The former belonged to the realm of theoretical knowledge, the latter to the realm of ethical belief, and there was no direct channel connecting the two. The question, therefore, was how to build a bridge between theoretical knowledge(epistemology) and ethical belief (ethics); and to resolve the question of how to connect the two, Kant wrote his *Kritik der Urteilkraft* (*Critique of Judgment*), at the beginning of which he said:

Hence an immense gulf is fixed between the domain of the concept of nature, the sensible, and the domain of the concept of freedom, the supersensible, so that no transition from the sensible to the supersensible (and hence by means of the theoretical use of reason) is possible, just as if they were two different worlds, the first of which cannot have any influence on the second; and yet the second is to have an influence on the first, i.e., the concept of freedom is to actualize in the world of sense the purpose enjoined by its laws. Hence it must be possible to think of nature as being such that the lawfulness in its form will harmonize with at least the possibility of [achieving] the purposes that we are to achieve in nature according to laws of freedom. So there must after all be a basis uniting the supersensible that underlies nature and the supersensible that the concept of freedom contains practically, even though the concept of this basis does not reach cognition of it either theoretically or practically and hence does not have a domain of its own, though it does make possible the transition from our way of thinking in terms of principles of nature

Kant believes that it was the power of judgment which united reason (pure reason) and rationality (practical reasoning), yet while judgment had something of the nature of each of these forms of reasoning, it was not the same thing as them. Kant divided man's soul into intelligence, feeling and idea. The cognitive ability of intelligence was pure reason, the cognitive ability of idea was rationality or practical reasoning which transcended experience, and the cognitive ability of feeling was what Kant called "judgment." Because feeling was the intermediary between intelligence and idea, it, like intelligence, was moved by external stimuli, and like idea it played its role regarding external things, and thus judgment functioned as an intermediary between reason and rationality.

In one respect, judgment, like reason, confronted incomplete phenomena. In another respect, like rationality, it aimed to reconcile incomplete aspects with a totality. Thus, the understanding of confronted incomplete phenomena and the rationality which addresses itself to a totality meet in judgment. Judgment seeks to include the parts within the whole and then subjects them to reflection, so judgment is able to act as a bridge between reason and rationality.⁴ Thus Kant constructed his philosophical trilogy of "the good ← the beautiful ← the true."

Of course, while there are similarities in value between the philosophies of Confucius and Kant, their aims in constructing their philosophies were dissimilar. Confucius established a philosophy of life, whereas Kant constructed a complete rational philosophical system. This is perhaps one of the differences between Chinese and Western philosophy. If we compare Confucius' process which led him from knowing the commands of Heaven to being able to immediately discriminate the truth or falsity of what others said and then on to "following his heart's dictates without transgression," with the basic theme of the true, the good and the beautiful in traditional Chinese

philosophy, then we can say that Confucius' statement that "at fifty I came to know the commands of Heaven" represents the stage of seeking "the unity of Heaven and Man" (*tian ren heyi*). His statement that "at sixty I could immediately discriminate the truth or falsity of what others said" represents attaining the stage of "the unity of feeling and scene" (*qing jing heyi*), and his statement that "at seventy I followed my heart's dictates, but did not transgress the rules" represents the stage at which he was able to realize "the unity of knowledge and action" (*zhi xing heyi*).

The unity of Heaven and Man belongs to the domain of "intelligence"(knowledge). The unity of feeling and scene belongs to the domain of "appreciation" (feeling), and the unity of knowledge and action belongs to "praxis" (idea or intention). According to the Confucians, these three were inseparable. Being human entailed an understanding of the flow of the cosmos and creation, as well as an ability to appreciate the achievements of the cosmos and creation. Moreover, in one's life practice one should re-manifest the perfect beauty and the perfect goodness of the cosmos. The process that Confucius outlined represented the demands made by the human in the realm of life. This was the summation of Confucius' personal quest for the true, the beautiful and the good.

II . Laozi's Quest in the Realm of Life

Laozi seems to have upheld an attitude of denial regarding the demands of most people (including the Confucians) for the true, the good and the beautiful. His call to "deny the sages and discard knowledge" (*juesheng qizhi*) would seem to be a denial of the quest for ordinary knowledge. His statement that "the five colors blind one's vision" (*wuse ling ren mu mang*) is an opposition to the general quest for beauty; and his assertion that "when the Great Way declines, compassion and righteousness come into existence" (*dadao fei, you ren yi*) is an opposition to the general moral concept of goodness. Does

Laozi therefore not argue for any quest for the true, the good and the beautiful in the human realm? I disagree with this proposition. He called for a quest after such ideals which would transcend the banal, a quest that for him was within a realm "equal with the Way" (*tongyu dao*). We can see that Laozi regarded "the Way" as the unity of the true, the good and the beautiful.

The 25th chapter of *Dao De Jing* (*The Classic of the Way and Power*) contains the following passage: "The model for man is the earth, the model for earth is Heaven, the model for Heaven is the Way, and the model for the Way is Nature." This is a description of Laozi's views of the quest of the realm of life. He believed that man's highest ideal was imitation of the Way, while the Way itself was natural and spontaneous. What was the Way he discussed? *Dao De Jing* contains a number of definitions, but the most basic is of a transcendental highest criterion.⁵ Chapter 14 of that classic reads:

Viewing it, it cannot be seen and so it is described as "beyond color;" listening to it, it cannot be heard and so it is described as "beyond sound;" grasping for it, it cannot be grasped and so it is described as "formless." These three are beyond imagination, all being aspects of the one chaotic whole. Upwardly, it emits no light; downwardly, no darkness. It is endless, so that words cannot describe it, and it returns to nothingness. This is formless form, shape without matter, and is called seemingness. Meeting it, it has no front; pursuing it, it has no rear. Cleave to the eternal Way, to govern what exists in the present; if one can understand its ancient origin, one finds the laws governing the Way.

Examining this we find it contains three levels of meaning:

i . "The Way" transcends sensory experience and this transcendence is described as "beyond color," "beyond sound" and "formless." Monk Deqing in the Ming Dynasty wrote in his *Dao De Jing Jie* (*Explanation of The Classic of the Way and the Power*): "The one chaotic whole" which cannot be imagined is the Way.

ii . While the Way is transcendental, it is nevertheless based on the existence of real things, i.e. "formless form, shape without matter."

Wang Bi comments on this line:

One may want to say that it is nothingness, but from it things can be formed; one wants to say that it exists, but one cannot see its form. . . .

That which is without form and without name is the basic principle of the myriad things.

The seemingness" which is formless form and shape without matter can constitute the basic principle underlying the existence of all forms and shapes. Wang Bi comments that "seemingness" means "one cannot grasp and define it."

In other words, the Way has no specificity. All things which possess specificity fall within the realm of experience and that which lacks specificity transcends experience. In Chapter 21 of *Dao De Jing* we read:

This Way is seemingness, but within this seemingness forms can be discerned and real things do exist. In this darkness there is essence. This essence is exceptionally real and can be authenticated.

Therefore while the Way lacks specificity, from it all "things" possessing specificity can be formed, and so it constitutes the most real existence, being the noumenon of things.

iii . The Way is the basis of the existence of all things and is the highest criterion of transcendence. "The laws governing the Way" are said to be "principles."⁶ "The laws governing the Way" are then the Way as the highest criterion of the myriad things from ancient times to the present.

The above three points show that Laozi's philosophy was a quest for the origin of Heaven, Earth and the myriad things and for the basis of their existence, from which he created a philosophical system in which the Way was the highest criterion of transcendence. Laozi's discussion of the noumenon of the cosmos in fact falls within the scope of the quest for truth.

Laozi made the Way the highest category in his philosophical system. If man grasped the Way then he grasped the truth, and this was in fact the aim of life. Thus for Laozi "being one with the Way" was the highest aim in life. He said: "Serving the Way is being one with the Way." Wang Bi commented:

The Way relies on non-form and non-action to form the myriad things and so if, in serving the Way, one relies on non-action, then one will be a superior man and teach without words. In the continuity of seeming existence things will follow their reality, and the Way will be one with the body. This is called being one with the Way.

"Being one with the Way" is thus equivalent to being of one body with the Way. It can be seen that Laozi believed that the relationship between man and the Way did not entail man regarding the Way as an ordinary object of cognition (because the Way lacked name and form). Rather it involved man becoming one with the Way. Therefore being one with the Way was merely the highest realm man's life could assume, a realm in which man could transcend the mundane and "acquire the Way" (*de Dao*). This was the supreme realm after which Laozi sought.

How then did Laozi regard the good and the beautiful? We know that Laozi regarded the basic character of the Way as "nature and nonaction" (*ziran wuwei*), and this then was his criterion for goodness and beauty. He said: "When the Great Way declines, compassion and righteousness arise." Because moral concepts such as compassion and righteousness are man-made, not only are they incompatible with the principles of "nature and non-action," but also destroy the Way. Only when these man-made things are discarded can man acquire true "goodness." Therefore he said: "Only when compassion is terminated and righteousness discarded can people return to genuine filial piety and kindness." Only when all man-made moral concepts are discarded can people return to their natural relationships. Chapter 8 of *Dao De Jing* contains the following passage:

Those who possess supreme goodness are like water. Water serves to nourish the myriad things and does not harm them; if one remains in the lowest place that people most loathe, one is closest to the Way.

Ethical persons have the nature of water. Water may benefit the myriad things, but it does not strive for high places. It is content to remain in the lowest place and therefore it approaches the Way. In Chapter 66 we read:

The rivers and oceans are the kings of the waterways, because they choose the lowest places. Because everything flows into them, the oceans and mighty rivers are called the rulers of the valleys.

This is Laozi's explanation of how persons possessing morality are close to the realm of the Way, while not yet being one with the Way. To use Feng Youlan's exposition of "the four realms" in his *Xin Yuanren* (*A New Exposition of Man*), those who possess the highest goodness belong only to "the realm of morality," while those who are one with the Way belong to "the realm of Heaven and Earth." Thus, in terms of value, the good is on a lower level than the true.

In Chapter 12 of *Dao De Jing* we read:

The five colors dazzle and blind the eyes; the five sounds deafen the ears; the five flavors numb the palate; indulgence in hunting them leads to dissipation and craziness.

Wang Bi comments:

The eyes, mouths and hearts all follow their own nature; one acts not to follow their nature, then one harms nature, and blindness, deafness, numbness and madness result.

In other words, the five colors, the five sounds and the five flavors are all "man-made" and have lost the original character of

Nature. Laozi regarded plain simplicity as beauty (*jian su bao pu*).⁷ One should heed what is natural. Artifice results in a loss of the beauty of original nature and a lack of artifice preserves natural beauty. Thus in Chapter 41 of *Dao De Jing* the following passage occurs:

The supreme note has no sound, the supreme image has no form, the Way loses itself in anonymity, yet it alone excels in starting and completing.

Wang Bi commented:

One listens to the supreme note, but cannot hear it, because it has no sound. A note that has sound will fall, necessarily, into either the second note on the pentatonic scale or the first. When it is thus discriminated, it cannot assemble a crowd. Therefore a note that has sound is not the supreme note.

If an image has form then there will be discrimination, and if there is discrimination then it will either be warm or burning. If not burning, it will be cold. And so an image that has form is not the supreme image.

All these good things are completed by the Way. In terms of image, it is the supreme image among all images, and is image without form. In terms of note, it is the supreme note among notes, and is the note of silence.

The music which is one with the Way is supreme music and the image which is one with the Way is supreme image. The supreme music encompasses all music, while the supreme image encompasses all forms. Music is dependent on sound and painting is dependent on form, but for Laozi the supreme music is without sound and the supreme painting lacks all forms. Because lack of sound or form harmonizes with the principles of "nature and non-action," they constitute true beauty. From this we can see that for Laozi the good and the beautiful derive from the true (the Way) and are specific manifestations of the Way. In the final chapter of *Dao De Jing*, Chapter 81, the following passage occurs:

Faithful words are not beautiful,
Beautiful words are not about faithful.

Good persons don't argue,
Those who argue are not good.
Men of knowledge are without depth,
Those who have depth do not (seek) knowledge.

I believe that this passage expresses Laozi's hierarchy of the good, the true and the beautiful. "The beautiful" is spoken of in terms of speech(which can stand for literature), "the good" is spoken of in the context of deeds or actions, and "the true" is spoken of in terms of intelligence. "True knowing" is superior to "true goodness," which in turn is superior to "true beauty," thereby creating a hierarchical series of criteria. This is the model of Laozi's quest in the realm of life.

When we say that Laozi's view of "the good, the true and the beautiful" has certain points in common with Hegel's philosophy, we are only saying that there are certain similarities in the arrangement of these three criteria of value orientation. In Hegel's philosophical system, "morality," "art," and "philosophy" all belong to the realm of spiritual philosophy. Spiritual philosophy is the third part of Hegel's philosophical system; it constitutes the third great stage of self-development in the direction of pure spirit—the description of the spiritual stage. The spiritual stage is the unity of the logical and natural stages, and it is self-existing and self-acting. During the transition from self-existing to self-acting, spirit experienced a complicated developing process which consists of three stages: (1) Subjective spirit, (2) Objective spirit, and (3) Absolute spirit. "Morality" belongs to objective spirit. Objective spirit means the spirit that manifested itself in the external objective world, which refers not to the natural world, and only to the spiritual world, say, different spheres of human social life and human history. It consists of (1) Abstract law(property law), (2) Morality, and (3) three ethic (family, citizen society, country) developing stages. Objective spirit is inferior to absolute spirit in the stage of spirit development, thus also inferior to "art" and "philosophy" which belong to absolute spirit. To Hegel, both subjective spirit and objective spirit are partial: Subjective spirit

such as soul, sense, consciousness, mind, will, etc. is inner conscious state of individuals, not yet actualized as the reality of existence. Objective spirit such as property, law, morality, politics, family, society, country, etc. is objective though, with no self-consciousness. The essence of spirit is unlimited, absolute, and free, therefore it has to keep on developing to avoid the partiality of subjective spirit and objective spirit and to prevent the incident of their opposition between each other, as a result of which spirit could ascend to the supreme stage. Absolute spirit is the complete and full realization of spirit unto itself. It is both subjective and objective. And apart from taking itself as the object and manifesting its essence self-consciously, it has no other purpose, hence truly unlimited, absolute, and free. "Art," "religion," and "philosophy" as three developing stages of the absolute spirit are identical as far as their contents are concerned, for their differences are only forms. Hegel said: "The element of the universal spirit's existence (Dasein) is characterized by intuition and image in art, feeling and representational thought in religion, and pure and free thought in philosophy."⁸ By listing those three stages of absolute spirit as such, Hegel tries to show that the self-realization of absolute spirit also accords to the process from sensuous intuition, through the representational thought (he also names it as "pictorial thinking"), and to abstract thinking. Therefore, philosophy is the highest, freest, wisest state of absolute spirit. He said, "The most perfect method of knowledge proceeds in the pure form of thought, and here the attitude of man is one of entire freedom."⁹ By saying "pure form of thought," he means pure conception and logical category. The sensuous form of art can not fully embody infiniteness, absoluteness and freeness of absolute spirit (idea), because it was confined by the sensuous form somehow. "This at the same time makes it plain that the manifestation of truth in a sensuous form is not truly adequate to the spirit."¹⁰ Only philosophy is the perfect way to realize "truth." According to Hegel's philosophy of mind, "philosophy" is the most accomplished form of truth, the supreme one; and the

quest of "beauty" ("art") being the sensuous manifestation of the idea, only in the developing stage, apparently inferior to "philosophy." Being the inner belief of good or bad, "morality" is even inferior to the developing stage of "art."¹¹ That is to say, as far as the value theory is concerned, Hegel's idea about the sequence of "the true, the good, and the beautiful" can be referred to as "the true ← the beautiful ← the good." In this sense, his point is not the same as Laozi's philosophy, but they share the same view that "the true" is superior to both "the beautiful" and "the good." As we have said before, Chinese traditional philosophy tends to actually reach a kind of spiritual realm of "the true, the good, and the beautiful," while Western philosophy tries to establish a kind of thought system to rationalize the value of "the true, the good, and the beautiful." Arguably, the former is pursuing a kind of enlightenment, and the latter is only discussing about its quest for "knowledge."

III . Zhuangzi's Quest in the Realm of Life

Like Laozi, Zhuangzi made the Way the highest category in his philosophy, but Zhuangzi's philosophy did not concentrate on proving the limitlessness, absoluteness and eternity of the Way (even though he devoted quite a bit of space in his writings to these questions), but rather on proving the spiritual limitlessness, absoluteness and eternity of those persons, such as perfected men, spirits and sages, who had acquired the Way.

The first chapter of his *Zhuangzi* is entitled "Roaming Free" (*Xiaoyao You*) and the theme of this chapter is a discussion of the question of how man can attain absolute spiritual freedom. According to Zhuangzi, while the roc (*peng* creature) had a wing span of three thousand *li* and could rise to a height of ninety thousand *li* and Liezi could ride on the wind over eight hundred *li* in a day, actions which would seem sufficiently free, they did not in fact constitute true freedom. For the roc to fly ninety thousand *li* a vast expanse of space

was required; to travel those eight hundred *li*, Liezi had to rely on the force of the wind. These actions were "conditional" (*you dai*), and only the "unconditional" (*wu dai*) can be described as the attainment of true freedom. Thus he said: "If one is able to follow the laws of nature and grasp the transformations of the six breaths and roam freely in a limitless domain, what does one need to rely on?" Relying on nothing, this "roaming free" was "unconditional." It constituted absolute freedom. But how could one attain this realm? Zhuangzi believed that ordinary mortals could not attain this realm. Only perfected men, deities and sages could do so, because "perfected men have no self, deities exert no effort and sages know no name." To have no self (*wu ji*) is to "extinguish the self" (*sang wo*) and in "Discussion of the Equality of Things" (*Qiwu Lun*) Zhuangzi wrote: "Now I have extinguished myself." In the chapter entitled "Great Master" (*Da Zongshi*) there is a passage which describes "sitting in forgetfulness" (*zuowang*), which can be called a description of "having no self" in this realm of absolute freedom:

"I have made progress," Yan Hui said.

"How have you progressed?" Confucius asked.

"I have forgotten benevolence and righteousness," Yan Hui replied.

"Fine, but that's not enough," Confucius said.

Several days later Yan Hui again saw Confucius, and said, "I have made progress."

"How have you progressed?" Confucius asked.

"I have forgotten the rites and music," Yan Hui replied.

"Fine, but that's not enough," Confucius said.

Several more days passed, and Yan Hui again saw Confucius and announced, "I have made progress."

"How have you progressed?" Confucius asked.

"I sat in forgetfulness," Yan Hui replied.

"What do you mean by saying you sat in forgetfulness?" Confucius asked in alarm.

Yan Hui replied, "My limbs fell away, I cast aside my intelligence, I left behind my body, and I forgot all that I know. I merged with the Great Way. That is what I meant by saying that I sat in forgetfulness."

"To be of one body with the myriad things and to have no preferences, and

to participate in the transformations of the myriad things and to depend on no things—this means you have become a sage! I wish to follow in your footsteps."

The realm to which Zhuangzi's "sitting in forgetfulness" belongs is the realm in which he describes one as "transcending self" or "having extinguished the self." In the text quoted above, Yan Hui sets out from a denial of mundane morality, then enters a state in which the various fetters imposed on the spirit by the body and knowledge which befuddles the spirit are all eliminated. He then finally attains a mental realm in which "his body is like desiccated timber and his mind is like cold ashes," a realm which transcends material gain, morality, life and death, and in which there are no restrictions from internal and external truths, untruths, likes, hatreds, beauty, and ugliness. That realm was, moreover, typified by "the oneness of Heaven and Earth" and "unity with the Way." The most significant feature of that realm was "the rejection of knowledge," which was the elimination of all discriminatory and conceptual cognitive activities, what Zhuangzi elsewhere called "mental fasting," or "following the inner channels of the ear and eye, yet being beyond the knowledge of the mind."

"The perfected men, deities and sages" Zhuangzi describes had all transcended the mundane world in this way and had achieved an absolute spiritual freedom conferred by "sitting in forgetfulness" and "mental fasting." In the chapter entitled "Tian Zifang" we read:

The perfected man looks down from the blue sky above, conceals himself in the Yellow Springs below, and soars in every direction, his expression remaining unchanged.

The "deities" are described in the chapter entitled "Heaven and Earth":

The supreme deities ride on the light and their form vanishes. This is called abandoning space. To exhaust life and scatter the emotions, to share in the delight of Heaven and Earth and to be unencumbered by the myriad things so that the myriad things return to their true feelings—this is called merging with the dark mystery.

In the chapter "Curbing the Mind" we read:

The sage in life moves with Heaven and in death blends with external matter. . . . he rejects all knowledge and deceit and follows the constant laws of nature. . . . he is empty and indifferent to gain, and is one with the power of Heaven.

The ability of perfected men, deities and sages to transcend time and space and roam freely beyond the coordinates of space was the result of their ability to "leave their bodies and discard knowledge," to rely in everything on nature and non-action, and to make no demands of the real world. Thus they were able to roam freely in "a land of nothingness." Such roaming could, of course, only take place in the spirit. This spiritual realm of absolute freedom could only be an aesthetic realm of art. In the section entitled "Zhi's Journey to the North" (*Zhi Bei You*) we read:

Heaven and Earth possess great beauty, but speak no language. The seasons move in accordance with clear laws which they do not discuss. The myriad creatures have reasons for their lives but do not speak. The sages can go to the source of the great beauty of Heaven and Earth and commune with the reasons of the myriad creatures, and thus do the perfected men possess non-action. The great sages do not act, and so are said to partake of the reasons of Heaven and Earth.

And in *Tian Zifang*:

To attain that realm is to gain supreme beauty and supreme joy. The gaining of supreme beauty and roaming in supreme joy define the sage.

The attaining of "truth" in the above passage admits the sage into the realm where "one can wander in the heart to the beginnings of things." This is the realm of nature's inarticulate non-action. The highest form of beauty is "the supreme beauty of Heaven and Earth." "Sages, the perfected and the divines" are waiting to "go to the source

of the beauty of Heaven and Earth" (or "prepared for the beauty of Heaven and Earth"). Because of the very existence of Nature and non-action, "the abandonment of form and the rejection of knowledge," one can gain "ultimate beauty and roam in the midst of ultimate pleasure," this realm of "ultimate beauty and ultimate pleasure" also constituting the highest aesthetic realm of art.

In the philosophy of Zhuangzi the relationship between "truth" and "beauty" is also discussed. There is a passage in "Autumn Floodwaters" (*qiushui*):

Horses and oxen have four hooves, which are from Heaven. Bridle the horse's head, and pierce the bull's nostrils, this is the work of a human being. So we say: do not use human powers to destroy Heaven, do not use reason to destroy a good name, and do not use gain to harm the people. If one diligently keeps this rule and does not lose it, this is to return to the *Dao*.

Zhuangzi's emphasis on "imitating Heaven and respecting truth" (*fatian guizhen*) was opposition to all "human actions" (*renwei*) which ran counter to original nature. The authenticity of the horse is its "chewing the pasture and drinking water, raising its hooves and shaking them," but if the horse's head is bridled and the bull's nostrils are pierced, then horses and bulls lose their original nature (authenticity), and lose their freedom, thereby losing beauty and their truth. Truth and beauty are one and the same in Zhuangzi's philosophy, but truth must be "follow the way (*Dao*) of nature." "Truth" is defined in the chapter entitled "The Venerable Fisherman" as "the acme of the spirit, and that which is not spirit is not sincere, and so cannot influence man's feelings." The ability to "influence man's feelings" exists when there are true feelings which cause man to gain an appreciation of beauty. "Accomplished beauty is not uniform in its traces," but the most accomplished beauty is not contrived and is able to freely manifest its authenticity. Therefore Zhuangzi's "quest for truth" was also in order to "seek beauty." If there is no beauty, then there is also no truth to speak of. "The quest for truth" is a quest for a

spiritual realm of untrammelled freedom.

Zhuangzi rarely affirmed morality and his thought was characterized by an anti-ethical trend. He believed that all ethical restraints were "man-made" and that they destroyed man's authenticity. Therefore he opposed "using humaneness and righteousness to transform man's nature." Zhuangzi believed that the realization of the freedom of the individual personality was not only "great beauty" (*damei*) but the highest form of "morality" (*de*) and supreme goodness (*shan*). In the chapter entitled "Curbing the Mind" (*Ke Yi*) we read:

If we do not hone the intellect but are noble, if we do not practice humaneness and righteousness but are self-cultivated, if we have no great achievements but rule, if we have no rivers and oceans to roam among but roam as if we did, if we practice no breath techniques but possess longevity, we forget everything and possess nothing, then we have no limits and all beauty follows us. This is the Way of Heaven and Earth and the complete virtue of the sage.

Cheng Xuanying explains:

When the heart is not impeded by a single obstacle, and the traces of darkness complement the Five Elements, then we have unlimited peace, are empty and expansive and arrive at the Way that cannot be exhausted. The beauty of true virtue follows and resides in the self.

By this he means that when the mind is not trapped, follows nature and practices non-action, then one sits in forgetfulness, and in total freedom. Thus one attains the ultimate whereby every beauty gathers about and follows the self. This is the movement of natural spontaneity of Heaven and Earth, as well as being the path by which the sage perfects his goodness. According to this interpretation, the "good" for Zhuangzi encompasses the highest beauty ("great beauty") within it.

From the above discussion we can see that in Zhuangzi's

philosophy, "the true, the good and the beautiful" are a unity and they are unified in an aesthetic realm of spiritual freedom. Zhuangzi, like Laozi, sought "oneness with the Way," but Laozi's unity with the Way entailed understanding and realizing the Way, which were both epistemological concerns, as well as being a form of philosophical enlightenment. For Zhuangzi, however, "unity with the Way" was an appreciation of, and reflection on the Way, which involved direct aesthetic perception. From this we can see that the question of "the true, the good and the beautiful" in the philosophy of Zhuangzi differed from that in the philosophy of Laozi, and for Zhuangzi "the beautiful" was paramount.

The quest for the good, the true and the beautiful in the philosophical axiology of Western philosophy can be seen to have some points in common with the views of Zhuangzi. The philosophy of Aristotle, and more especially that of Schelling, would seem to be similar to that of Zhuangzi regarding this question.

Regarding the quest for the unity of truth, goodness and beauty, Aristotle stated: "Beauty is goodness, and the keen perception it imparts is in fact because it is goodness." But the manifestation of good conduct and beautiful art requires the cognition of things as its basis. From the perspective of values (axiology), Aristotle did not impart the same significance to goodness, truth and beauty. In demarcating human activities, he believed that of the three activities of cognition, practice and creation, cognition was the highest form of activity, because it was only on the basis of this particular activity that man could confront highest truths. But from the perspective of the products resulting from these three activities, Aristotle believed that the fruits of "the quest for truth" were theoretical sciences (such as mathematics, physics and metaphysics), knowledge for the sake of knowledge; the quests for goodness and beauty yielded the practical sciences (including politics and ethics) and the creative sciences (including poetics and rhetoric), all of which have higher external goals. The former directs action, the latter directs creation. Aristotle

believed that the basic nature of art was creation. He said: "The arts are a form of creative ability, which encompasses the true process of inference." Here, creative activities become those activities most able to realize man's basic nature, which is logical reasoning (Aristotle once defined the parameters of man's nature as rationality). Accordingly, it would seem that we could say that in Aristotle's philosophy artistic creation which can manifest beauty itself attains the highest value, followed by actions with an external aim (such as moral practice, which belongs to the realm of the "good"), and then followed by knowledge for knowledge's sake which constitutes an activity involving "the quest for truth."¹²

Schelling proposed the philosophical problem of "absolute unity." According to his view, "absolute unity" was neither subject nor object, but "the absolute undifferentiated unity of both subject and object." This "unity" can only be realized within an "intellectual direct perception." "Intellectual direct perception" is the activity producing the directly perceived object. The unity of the two (subject and object) is, in fact, an activity of direct perception. By means of direct perception, the ego unites the self with the cosmic spirit which has unconsciously produced the natural world. Schelling believed that even the activity of "intellectual direct perception," which is possible only with a philosophical genius, but not with just any one, cannot be regarded as achieving an absolute unity of subject and object because a discrepancy still exists between the direct perceiver and the directly perceived object (although this directly perceived object is produced by the free action of the direct perceiver). Thus, Schelling also believed that only within "the direct perception of art" could a truly undifferentiated absolute unity between subject and object be realized.

This "truly undifferentiated absolute unity" is analogous in some aspects to Zhuangzi's concept of the realm entered through "mental fasting" and "sitting in forgetfulness." Schelling believed that "the direct perception of art" is derived from inspiration and from an

intense yearning of great internal power within the inner spirit. This can only be described as a mysterious spiritual realm of direct perception. Thus, for Schelling, art constitutes a supreme undifferentiated ideal world. On the basis of the view that "the direct perception of art" is a higher "intellectual direct perception," Schelling regarded "beauty" as the highest value. As he saw it, "truth" was a question of necessity, "goodness" was a question of freedom, and "beauty" was the synthesis of the two. "Beauty" synthesized in art the scientific knowledge of "truth" and the ethical behavior of "goodness." Schelling said: "I believe that the highest ideal activity encompasses all idealized aesthetic activities. Truth and goodness can only be brought into proximity within beauty. Philosophers, like poets, must have aesthetic powers." Thus, from the perspective of the theory of value, "the beautiful" for Schelling constitutes a higher value than "the true" or "the good." ¹³ This schema reveals some similarities with Zhuangzi's view of these values.

IV . Brief Conclusion

i . In the world of man Confucius, Laozi and Zhuangzi pursued three different quests, and their philosophies manifest three different value orientations. I believe that in philosophical systems embodying any value we find a quest for the unity of truth, goodness and beauty, but philosophers have different views on how to effect and attain this unity. From the perspective of the development of mankind's culture, we cannot demand that philosophies are similar. In China's pre-Qin period, philosophy richly flowered because of this very diversity of value orientation. Philosophers at that time were able to approach the ultimate questions of life from an unusually broad perspective and realm, and this enabled Chinese philosophy to take its place beside that of other great contemporary cultures, such as Indian and Greek. It is right because it is pluralistic, not monistic. It can quest the issue of ultimate concern about universe and life from different approaches. If

the development of pre-Qin philosophy could have some value nowadays, I believe one of the important elements is its plurality. Plurality of philosophy could make itself fully developed, and "centralization" would only suffocate the vitality of philosophy eventually. Currently, world culture and philosophy are showing the tendency of pluralistic development under the global consciousness; we can follow with this developing tide to establish the Chinese modernized philosophy.

ii . If the historical philosophies could betray its modern implication, and be practiced in reality in society, we have to give them a modern interpretation. The interpretation of the philosophical thought of Confucius, Laozi, and Zhuangzi above is an attempt doing this. The interpretation of their thought can only be "both their philosophy and yet not their philosophy." Because what we said in this article is the interpretation derived from the philosophy of Confucius, Laozi, and Zhuangzi, and its foundation is the philosophy of Confucius, Laozi, and Zhuangzi, thus we can say it IS "the philosophy of Confucius, Laozi, and Zhuangzi." Also it is "the interpretation derived from the philosophy of Confucius, Laozi, and Zhuangzi," since it is an inferred interpretation, hence it is NOT (or not totally) the philosophy of Confucius, Laozi, and Zhuangzi. Only by this can we extend the implication of the philosophy of Confucius, Laozi, and Zhuangzi. Right because it is derived from the philosophy of Confucius, Laozi, and Zhuangzi nowadays, the modern implication has actualized, and philosophy has developed. Making a comparative study of the philosophy of Confucius, Laozi, and Zhuangzi from the point of axiology, and revealing their different orientation in the axiology of their philosophy, can not only show us what "plurality" means to the cultural and philosophical development, but also make an example of distinctive type of philosophical system and respective orientation of life value. Meanwhile it can also show our attention and comprehension to "the true, the good, and the beautiful" today. Undoubtedly, this would be very meaningful for the philosophical

studies today.

iii . It is significant to understand (interpret, study) the characteristics of Chinese philosophy with Western philosophy as a frame of reference. In the history of traditional Chinese philosophy, although there had never been a particular philosopher who explicitly elaborated on "the true, the good and the beautiful," it on no accounts means these concepts are nowhere to be found in traditional Chinese philosophy. This article is an endeavor to demonstrate the rich content concerning "the true, the good, and the beautiful" in traditional Chinese philosophy, with Western philosophy as a frame of reference. By so doing, the connotations of traditional Chinese philosophy get extended against the background of Western philosophy; the same can be said of Western philosophy as well. In comparison and juxtaposition with each other, the characteristics of traditional Chinese philosophy and of Western philosophy can be brought into high relief, despite their own peculiarities. Thus the two can be complementary to each other. If we can say the discussion about "the true, the good, and the beautiful" on the part of Western philosophers belongs to the sphere of knowledge (or belief, say, Christianity), the Chinese philosophers' quest in that regard, generally falls within the spiritual realm. All in all, traditional Chinese philosophy and Western philosophy, though each having its own peculiar characteristics, can also enrich and enlighten each other.

捌 再论中国传统哲学的真善美问题*

人类的精神生活的最高追求是什么？我想应该是追求“真”“善”“美”，并使三者在一系统中统一起来。当然，什么是“真”，什么是“善”，什么是“美”，不同的思想家的看法肯定是不相同的，而“真”“善”“美”如何统一在一个系统中，更可能是仁者见仁，智者见智了。这样的问题没有办法有什么共同的定论，也不需要有什么定论。但是，人们要去追求真、善、美，思想家们要建构真、善、美统一的系统，则是无可怀疑的。中国传统哲学对人生境界的追求也可以说是中国古代哲学家对真、善、美的追求。过去我写过一篇《论中国传统哲学中的真善美问题》，¹主要是讨论儒家对真、善、美问题的看法，而且是一种历史性的论述。现在这篇文章将不仅限于儒家，也不想用历史论述的写法，因为那样不易集中，而且文章将会很长。因此，本文将选有代表性的典型哲学家的思想来进行分析。

我国先秦哲学家们的思想一直影响着中国哲学的发展，其中孔子、老子、庄子的思想影响可以说是最大。如果我们把这三位大哲学家作为典型，并通过他们来讨论中国传统哲学中不同类型哲学家的人生境界问题，也许会对中国传统哲学关于人生境界的问题有一总体的了解。

四十年前，沈有鼎先生在英国牛津大学作研究时，曾给国内朋友写过一封信，他在信中说：

康德的价值论和黑格尔的价值论有一个重要不同点，如下所示：

康德：善←美←真

黑格尔：真←美←善

从这里可以看出康德是中国人，黑格尔是印度人（或希腊人）。²

沈先生的这个论断非常有见地，并富有启发性。从中国传统哲学的主流儒家思想来看确实如此，但如果从中国传统哲学价值论的角度看不同学派或不同哲学家就不全然如此了。照我看，中国传统哲学在真、

善、美问题上大体可以分为三大系统，这就是孔子、老子和庄子的思想在真、善、美问题上有如下的不同：

孔子：善←美←真

老子：真←善←美

庄子：美←善←真

照这个图式，如果我们作点比附，大体可以说在真、善、美问题的价值论上，孔子接近于康德，老子接近于黑格尔，庄子从一个有限的方面看则接近于谢林或者亚里士多德。当然比附总是有局限性的，不可能照顾到各个方面，但它或者能给人们提供一个思考的方向。

一、孔子对人生境界的追求

在《论语·为政》篇中记载着孔子的一段话，他说：“吾十有五而志于学，三十而立，四十而不惑，五十而知天命，六十而耳顺，七十而从心所欲不逾矩。”我们知道，孔子和以后的儒家都认为，人们的生死和富贵不是能靠其自身的努力而追求到的，但人们的道德和学问的高低却因其自身努力的不同而有不同。上面引的孔子的那段话可以说是孔子对他一生的生活道路的描述，或者说是他一生修养的过程，也就是孔子本人对真、善、美的追求和了解的过程。从“十有五而志于学”到“四十而不惑”，可以说是他成圣成贤的准备阶段，从“知天命”到“从心所欲不逾矩”可以说是他成圣人的深化过程。“知天命”可以解释为对“天”（宇宙人生的终极关切问题）有了一种认识 and 了解，这也许可以算是“求真”的范围，因为这一阶段孔子仍然把“天”看成认识的对象，还没有达到“同于天”的阶段，也就是说还没有达到与“天”合一的境界。郭象在《庄子序》中说：“夫庄子者，可谓知本矣……言虽无会而独应者也。夫应而非会，则虽当无用。”盖能与天地万物之本体相应者可谓“知”本。既为“知”本，则仍与天地万物之本体为二，仍把天地万物之本体视为认识的对象，尚未与天地万物之本体会合为一。此境界虽高，但还不能“从心所欲不逾矩”。

“六十而耳顺”，这句话向来有不同解释，杨伯峻先生在《论语译注》中说：“‘耳顺’这两个字很难讲，企图把它讲通的人也有很多，但都

觉牵强……”我认为，杨先生的注解大概是符合孔子原意的。晋李充曾说“耳顺”是“心与耳相从”，这也许是杨先生的解释所本。晋孙绰用玄学思想解释这句话说：“耳顺者，废听之理也，朗然自玄悟，不复役而后得，所谓不识不知顺帝之则。”这应是一种超乎经验的直观而得宇宙大全之理的境界，是一种“内在超越”的境界。照现代解释学的看法，凡是对前人思想的解释，都有解释者的意见在内；不过，解释和被解释之间总有某些联系，否则也就无所谓“解释”了。历来的思想家对孔子思想的解释大都如此。这里，我再引用朱熹对这句话的解释，他说：“声入心通，无所违逆，知之之至，不思而得也。”“声入心通”当和“声音”有关（“有声之音”和“无声之音”都可以包括在内）；“知之之至”应是超于“知天命”的境界，这种境界是“不思而得”的，所以是超于认识的。我想，它可以解释为一种直觉的审美境界，它所得到的是一种超乎经验的直觉意象，也可以说是一种艺术的境界、“美”的境界。这种对“六十而耳顺”的解释或许“牵强”，但照杨伯峻的看法，自古以来的“解释”大都牵强，我的这一解释无非是在诸种“牵强”的解释中再增加一种而已。但我自信这种解释不能说全无道理，特别是由哲学的观点看，它或许是有新意的。我们知道，孔子对音乐很有修养，他“在齐闻韶”“三月不知肉味”；“三月不知肉味”自然是“不思而得”的一种极高的审美境界。孔子还对他所达到的这种境界有所说明，他说：“不图为乐之至于斯也。”即想不到听音乐竟能达到如此境界。这种境界是一种超越的美的享受。

“七十而从心所欲不逾矩”，朱熹注说：“矩，法度之器，所以为方者也。随其心之所欲，而自不过于法度，安而行之，不勉而中。”这是一种与天地万物为一体的境界，它是在“知真”“得美”而后达到的一种圆满的“至善”的境界。孔子认为“尽美”比不过“尽善尽美”，《论语·八佾》篇中记载：“子谓韶，‘尽美矣，又尽善也’；谓武，‘尽美矣，未尽善也’。”这里的“尽善”是说“极好”，但说事物“极好”总在一定程度上（至少在儒家那里）是和道德的价值判断联系在一起的。孟子说：“充实之谓美。”此处的“美”实也含有某种道德价值判断的意义。朱熹注说：“力行其善，至于充满而积实，则美在其中，而无待于外矣。”“善”是一种内在的“美”，极高的人格美。看来，朱熹认为“善”从某方面说可以包含“美”。“尽善”之所以高于“尽美”，实因为“尽善”即“尽善尽美”。这里我们似乎可以说，孔子的人生境界（或圣人的境界）是由“知真”“得美”而进于“安而行之，不勉而中”的圆满至善的境界，即由“真”而达

于“美”再达于“善”。

“善←美←真”正是康德哲学的特点。照康德看，实践理性优于思辨理性。他的《纯粹理性批判》所研究的是以理智行使职能的现象界为对象，它受自然的必然律支配；《实践理性批判》所研究的是以理性行使职能的本体为对象，它不受必然律支配，它是自由的。前者是自然，后者是道德。前者属于理论认知的范围，后者属于道德信仰的范围，两者之间无法直接沟通。因此就有一个问题，即如何在理论认知（认识论）与道德信仰（伦理学）之间架起一座桥梁，使之得以沟通，这就是康德哲学所必须解决的一个问题，于是他又写了《判断力批判》。在该书的开头处他写道：“在自然概念的领域，作为感觉界，和自由概念的领域，作为超感觉界之间，虽然固定存在着一不可逾越的鸿沟，以致从前者到后者（即以理性的理论运用为媒介）不可能有过渡，好像是那样分开的两个世界，前者对后者绝不能施加影响；但后者却应该对前者具有影响，这就是说，自由概念应该把它的规律所赋予的目的在感性世界里实现出来；因此，自然界必须能够这样地被思考着：它的形式的合规律性至少对于那些按照自由规律在自然界中实现目的的可能性是互相协应的——因此，我们就必须有一个作为自然界的基础的超感觉界和在实践方面包含于自由概念中的那些东西的统一体的根基。虽然我们对于根基的概念既非理论地、也非实践地得到认识的，它自己没有独特的领域，但它仍使按照这一方面原理的思想形式和按照那一方面原理的思想形式过渡成为可能。”³康德认为，正是判断力把理智（纯粹理性）与理性（实践理性）联合起来，而判断力既略带有理智的性质，也略带有理性的性质，又不同于二者。康德把人的心灵分为知、情、意三个部分。有关“知”的部分的认识能力是理智，这是纯粹理性；有关“意”的部分的认识能力是理性，这是超于经验之上的实践理性；有关“情”的部分的认识能力则正是康德所说的“判断力”。由于“情”介于“知”和“意”之间，它像“知”一样地对外物的刺激有所感受，它又像“意”一样地对外物发生一定的作用，所以判断力介于理智与理性之间。

一方面，判断力像理智，它所面对的是个别的局部的现象；另一方面，它又像理性一样，要求个别事物符合于一般的整体的目的。这样，面对局部现象的理解力和面对理念整体的理性，就在判断力上碰头了。判断力要求把个别纳入整体中来思考，所以判断力能够作为桥梁来沟通理智和理性。⁴从而康德建构了他的“善←美←真”哲学的三部曲。

当然，孔子的哲学和康德的哲学从价值论上看虽然确有其相似之处，但是他们建构哲学的目标则是不相同的。孔子建构的是人生哲学的形态，而康德则要建构一个完满的哲学理论体系。这也许可以视为中西哲学的一点不同吧。如果我们把孔子这一由“知天命”到“耳顺”再到“从心所欲不逾矩”的过程和我们所概括的中国传统哲学关于真、善、美的基本命题相对照，也许可以说“五十而知天命”是追求“天人合一”的层次，“六十而耳顺”是达到“情景合一”的层次，“七十而从心所欲不逾矩”则是实践“知行合一”的层次。

“天人合一”属于“智慧”（知）的方面，“情景合一”属于“欣赏”（情）的方面，“知行合一”则属于“实践”（意）的方面。照儒家看，这三者是不可分的。做人既要了解宇宙大化之流行，又要能欣赏天地造化之功，更应在生活实践中再现宇宙的完美和完善。就以上的分析看，孔子的“知天命”、“耳顺”和“从心所欲不逾矩”都是就人生境界的追求说的，这是孔子对自己追求真、美、善的总结。

二、老子对人生境界的追求

对一般人（包括儒家）所追求的真、善、美，老子似乎都持否定态度。如他说“绝圣弃知”，反对追求一般的知识；“五色令人目盲”，反对一般的对美的追求；“大道废，有仁义”，反对一般的道德观念的“善”。是否老子就不主张追求真、善、美的人生境界呢？我想不是的。他追求的是一种超越世俗的真、善、美，这就是所谓“同于道”的境界。看来，老子把“道”视为真、善、美的统一。

《道德经》第二十五章中说：“人法地，地法天，天法道，道法自然。”这可以说是老子对人生境界追求的叙述。他认为，人最高的理想是效法“道”，而“道”是自然而然的。他所说的“道”是什么？在《道德经》中有多种涵义，但最基本的涵义应是指超越性的最高的准则。⁵《道德经》第十四章中说：“视之不见，名曰夷；听之不闻，名曰希；搏之不得，名曰微。此三者不可致诘，故混而为一。其上不皦，其下不昧，绳绳不可名，复归于无物。是谓无状之状，无物之象，是谓惚恍。迎之不见其首，随之不见其后，执古之道，以御今之有。能知古始，是谓道纪。”这段话分析起来有以下三层意思：

1. “道”是超于感官经验的，“无色”（夷）、“无声”（希）、“无

形”(微)都是用以说明“道”的超越性。明释德清《道德经解》：“致诘，犹言思议。”“不可致诘”，即不可思议。此“不可致诘”的“混而为一”者就是“道”。

2.“道”虽是超越性的，但它却是最真实的事物存在的根据，“无状之状，无物之象”。王弼注说：“欲言无耶，而物由以成；欲言有耶，而不见其形”，“无形无名者，万物之宗也”。“宗”者主宰义、根据义。“无状之状，无物之象”的“惚恍”可以作为一切“状”“象”存在之根据。“惚恍”，王弼注谓：“不可得而定也。”这就是说，“道”无规定性。凡有规定性者，均在经验之中；而无规定性者，则超越于经验之外。所以《道德经》第二十一章说：“道之为物，惟恍惟惚。惚兮恍兮，其中有象；恍兮惚兮，其中有物。窈兮冥兮，其中有精；其精甚真，其中有信。”“道”虽无规定性，但可做成一切有规定性之“物”，故为最真实的存在，亦即事物之本体。

3.“道”作为一切事物存在的根据，是就其为超越性的最高准则说的。“纪者，理也。”⁶“道纪”，即“道”作为从古至今天地万物的最高准则。

从以上三点可以说明，老子的哲学是要探求天地万物之本源、存在之根据，从而创造了以“道”为超越性的最高准则的哲学体系。老子的这种对宇宙本体的讨论，实属对终极“真理”探求的范围。

老子把“道”作为他的哲学体系的最高范畴，人掌握了“道”也就是掌握了“真理”，而人生的目的正在于此。因此，老子把“同于道”作为人生的最高追求，他说：“从事于道者同于道。”王弼注说：“道以无形无为成济万物，故从事于道者以无为为君，不言为教，绵绵若存，而物得其真，与道同体，故曰同于道。”“同于道”即是“与道同体”。看来，老子认为人和道的关系不是把“道”作为一般认识的对象（因“道”无名无形），而是应“体道”，即与“道”合一，所以“同于道”只是一种极高的人生境界，一种超越世俗的“得道”的境界。这正是老子所追求的最高境界。

那么老子对“善”和“美”又如何看呢？我们知道，老子的“道”的基本特性是“自然无为”，所以他也把“自然无为”作为“善”和“美”的标准。他说：“大道废，有仁义。”因为“仁义”等等都是“人为”的，不仅不合“自然无为”的原则，而且破坏了“道”，只有把这些“人为”的东西去掉，人们才可以有真正的“善”，所以他说：“绝仁弃义，民复孝慈。”只有抛弃掉“仁义”等一切“人为”的道德观念，人们才可以恢复自然而然的人际关系。

《道德经》第八章中说：“上善若水，水善利万物而不争，处众人之所恶，故几于道。”有道德的人其性如水，水对万物都有利，可是并不争说于万物有利，它能处于在下的地位（第六十六章说：“江海所以能为百谷王者，以其善下之，故能为百谷王”），因此近于“道”。这说明有道德的人只是接近于“道”的境界，而不是“同于道”的境界。如果用冯友兰先生《新原人》中的“四种境界”的说法，“上善”的人只是“道德境界”，而“同于道”者才是“天地境界”。所以，从价值论上看，“善”较“真”为低一层次的。

《道德经》第十二章中说：“五色令人目盲，五音令人耳聋，五味令人口爽，驰骋畋猎令人心发狂。”王弼注说：“耳目口心皆顺其性也，不以顺性命，反以伤自然，故曰盲、聋、爽、狂也。”这就是说，“五色”“五音”“五味”等都是“人为”的，是失去“自然”本性的。老子把朴素看成是“美”，“见素抱朴”，一切都应听其自然，按其本然，有做作则失去其本然之“美”，无做作才可存其自然之“美”。因此《道德经》第四十一章中说：“大音希声，大象无形，道隐无名，夫唯道，善贷且成。”王弼注说：“听之不闻曰希，不可得闻之音也，有声则有分，有分则不宫而商矣，分则不能统众，故有声者非大音也。”“有形则有分，有分者不温则炎，不炎则寒，故象而形者非大象。”“凡此诸善，皆是道之所成也。在象则为大象，而大象无形；在音则为大音，而大音希声。”合乎“道”的音是“大音”，合乎“道”的象是“大象”，“大音”可以统括一切“音”，“大象”可以成就一切“形”。就音乐看必有声音，就绘画看必有图形，但老子认为最高超的音乐应是无声的，最绝妙的绘画应是无形的。因为“无声”“无形”合乎“自然无为”的原则，所以是真正的“美”。从这里看，老子的“善”和“美”都是由“真”（“道”）派生的，都是“道”的特性的表现。

《道德经》的最后一章即第八十一章中说：

信言不美，美言不信；
善者不辩，辩者不善；
知者不博，博者不知。

我认为，这一由“美”（言词“美”的标准在于平实）而“善”（行为“善”的标准在于诚实）而“真”（智慧“知”的标准在于真实）也许是老子对“真”“善”“美”的一种次第的安排。“美”是就言词（可作文学的代

表)说的,“善”是就行为(可作道德的代表)说的,“知”是就智慧(可作知识的代表)说的。“真知”高于“真善”,又高于“真美”,这样就构成了一个层次的序列。这是老子对人生境界追求的一个模式。

我们说老子哲学关于真、善、美的看法和黑格尔哲学有某些相似之处,这仅仅是就他们对真、善、美在价值取向的安排上有某些相似之处而言。在黑格尔哲学体系中,“道德”“艺术”“哲学”都是属于精神哲学的范围。精神哲学是黑格尔哲学体系的第三部分,它是对于绝对精神在其自身发展的第三大阶段——精神阶段的描述。精神阶段是逻辑阶段和自然阶段的统一,它是自在而又自为的。精神从自在到自为也有一个复杂的发展过程,这个过程包括三个阶段:(1)主观精神;(2)客观精神;(3)绝对精神。“道德”属于客观的精神。所谓“客观精神”是指精神把自己体现在外在的客观世界中,但这客观世界不是指自然界,而是指具有精神性的世界,即人类社会生活和人类历史的不同领域,它包括:(1)抽象法(财产法);(2)道德;(3)伦理(家庭、市民社会、国家)三个发展阶段。客观精神在精神发展的阶段上低于绝对精神,因而低于属于绝对精神的“艺术”和“哲学”。照黑格尔看,主观精神和客观精神都各有其片面性:前者如灵魂、感觉、意识、理智、意志等等都是个人的内在的意识状态,没有实现为现实的存在;后者如财产、法律、道德、政治、家庭、社会、国家等等,虽然是客观的,但没有意识到自己。但是,精神的本性是无限的、绝对的、自由的,因而它就必须继续向前发展,以克服主观精神和客观精神的片面性和两者的对立,从而上升到精神的最高阶段。绝对精神是精神对它自己的完全和充分的认识,它既是主体又是客体,它除去以自身为对象和自觉地表现其本质以外,再没有别的目的,从而它是真正无限的、绝对的、自由的。而“艺术”“宗教”“哲学”是绝对精神发展的三个阶段,这三者在内容上是一致的,它们的不同只是在形式方面。黑格尔说:“在艺术中是直观和形象,在宗教中是感情和表象,在哲学中是纯自由思想。”⁸黑格尔如此排列绝对精神发展的三个阶段,是要表明绝对精神对它自身的认识也要遵循从感性直观经过表象(他又称之为“图像式的思维”)上升到抽象思维的过程。所以“哲学”是绝对精神的最高的、最自由的和最智慧的形态。他说:“认识真理最完善的方式,就是思维的纯粹形式(引者按:指纯粹概念、逻辑范畴而言)。人采取纯思维方式时,就最为自由。”⁹艺术的感性形式不能完全体现绝对精神(理念)的无限、绝对和自由,因为它毕竟要受到

感性形式的限制，“用感性形式表现真理，还是不能真正适合心灵的表现方式。”¹⁰只有哲学才是认识“真理”的最完善的形式。从黑格尔的精神哲学看，他把“哲学”作为真理最完善的方式，看成是最高的；而把“美”的追求（“艺术”）作为“理念的感性显现”，视为低于“哲学”的发展阶段；“道德”作为行为主体对善与恶的内在信念，则又低于“艺术”的发展阶段了。¹¹这就是说，如果从价值论上看，黑格尔对“真”“善”“美”的看法就是“真←美←善”。这在层次上虽与老子哲学不完全相同，但把“真”看得高于“美”和“善”，则是与老子相同的。不过，正如我们在前面讨论孔子思想时所说，中国传统哲学所注重的是追求一种达到“真”“善”“美”的境界，而西方哲学所注重的是建立一种论证“真”“善”“美”的价值的思想体系。前者可以说主要是追求一种觉悟，而后者则主要是对“知识”的探讨。

三、庄子对人生境界的追求

和老子一样，庄子也把“道”作为他的哲学的最高范畴，但庄子哲学主要不在于论证“道”的无限性、绝对性和永恒性（虽然他对此也颇花费了不少笔墨），而主要论证的是得道之人（如至人、神人、圣人等）在精神上的无限性、绝对性和永恒性。

《庄子》书的第一篇叫《逍遥游》，这篇的主旨是讨论人如何达到精神上的绝对自由的问题。照庄子看，大鹏击水三千、扶摇九万，列子御风日行八百，看起来是够自由的，但实际上并不是完全自由。大鹏飞行九万里，需要有广大的空间；列子日行八百，也得靠风力。这些都是“有待”的，而只有“无待”才可以说达到真正的自由。所谓“无待”是不需要任何条件，所以他说：“若夫乘天地之正，而御六气之辩，以游无穷者，彼且恶乎待哉！”这种“逍遥游”是无所待的，从而是绝对和自由的。但是如何才能达到这一无待的绝对自由的境界呢？庄子认为，这不是一般人可以达到的，只有“至人”“神人”“圣人”等才可以达到，因为“至人无己，神人无功，圣人无名”。“无己”就是“丧我”，《齐物论》中说：“今者吾丧我”。在《大宗师》中有一段话讲到“坐忘”，可以说是对“无己”这种精神绝对自由境界的描述：

颜回曰：“回益矣。”仲尼曰：“何谓也？”曰：“回忘仁义矣。”曰：“可矣，犹

未也。”他日，复见，曰：“回益矣。”曰：“何谓也？”曰：“回忘礼乐矣。”曰：“可矣，犹未也。”他日，复见，曰：“回益矣。”曰：“何谓也？”曰：“回坐忘矣。”仲尼蹴然曰：“何谓坐忘？”颜回曰：“堕肢体，黜聪明，离形去知，同于大通，此谓坐忘。”仲尼曰：“同则无好也，化则无常也，而果其贤乎！丘也请从而后也。”

庄子“坐忘”的境界就是他所说的“无己”或“丧我”的境界。上引文说明，颜回从否定世俗的道德开始，“忘仁义”“忘礼乐”，进而消除身体对精神的种种束缚，消除知识对精神的困扰，达到“形如槁木，心如死灰”的超脱耳目心意，超功利，超道德，超生死，不受任何内在外在的是非、好恶、美丑等等的限制，和天地融合为一、“同于道”的境界。这一境界以“去知”最为重要，“去知”即去掉分解性和概念性的认识活动，也即庄子“心斋”所谓的“徇耳目内通，而外于心知”。这种纯粹的直觉活动，我们说它是一种审美的活动。

《庄子》书中所描述的“至人”“神人”“圣人”等就是这样一些超越世俗，达到“坐忘”或“心斋”的精神上绝对自由的人。如《田子方》篇中说：

夫至人者，上窥青天，下潜黄泉，挥斥八极，神气不变。

而所谓“神人”，如《天地》篇所说：

上神乘光，与形灭亡，此谓照旷。致命尽情，天地乐而万事销亡，万物复情，此之谓混冥。

《刻意》篇中说：

圣人之生也天行，其死也物化……去知与故，循天之理……虚无恬淡，乃合天德。

“至人”“神人”“圣人”之所以能超越时空的限制，逍遥游放于六合之外，正因为他们能“离形去知”，一切任其自然而无为，对现实世界无任何要求，从而能逍遥游于“无何有之乡”。这当然只能是精神上的逍遥游放了。这种精神上的绝对自由的境界只能是一种艺术上的审美的境界。

《知北游》篇中说：

天地有大美而不言，四时有明法而不议，万物有成理而不说。圣人者，原天地之美而达万物之理。是故圣人无为，大圣不作，观于天地之谓也。

《田子方》篇中说：

夫得是，至美至乐也。得至美而游乎至乐，谓之至人。

“夫得是”按上文是说“游心于物之初”的境界。此境界为不能言说的自然无为的境界。最高的美为“天地之大美”。“圣人”“至人”“神人”等“原天地之美”（或“备于天地之美”），正是由于自然无为，“离形去知”，所以可得“至美而游乎至乐”，这一“至美至乐”的境界也就是极高的艺术的审美境界。

在庄子哲学中对“真”和“美”的关系也有所讨论，《秋水》篇中说：“牛马四足，是谓天；落马首，穿牛鼻，是谓人。故曰：无以人灭天，无以故灭命，无以得殉名，谨守而勿失，是谓反其真。”所谓“反其真”就是返回到自然而然的本来状态。庄子主张“法天贵真”，反对一切违反自然本性的“人为”。“斲草饮水，翹足而陆”是马之真性，而“落马首，穿牛鼻”使牛马失去其自然本性（真性），这样牛马就没有自由，从而也失去其“美”，失去其“真”。在庄子哲学中“真”与“美”是一致的，而“真”必须是“顺性命之情”的。《渔父》篇中说：“真者，精诚之至也。不精不诚，不能动人。”“能动人”在于有真情，使人得到美的享受。“成功之美，无一其迹也”，最成功的美不是做作的，而是能自由自在地表现其真性情，所以庄子的“求真”也是为了“求美”，无“美”也就无所谓“真”。“求真”是追求一种自由自在的精神境界。

庄子很少肯定道德，他有反道德的倾向。他认为一切道德规范都是“人为”的，它们破坏人的真性情，所以他反对“以仁义易其性”。庄子认为，个体人格的自由的实现不仅是“大美”，而且是最高“德”，最高的“善”。《刻意》篇中说：“若夫不刻意而高，无仁义而修，无功名而治，无江海而闲，不道引而寿，无不忘也，无不有也，澹然无极而众美从之。此天地之道，圣人之德也。”

“澹然无极而众美从之”，成玄英疏说：“心不滞于一方，迹冥符于五行，是以澹然虚旷而其道无穷，万德之美皆从于己也。”此谓心无所执着，自然无为，坐忘无己，自由自在，以达到至极则众美就会聚于己

身。这既是天地自然而然的运行，也是圣人成就其善的路径。据此，庄子的“善”是包含在其最高的“美”（大美）之中的。

就上所言，在庄子哲学中“真”“善”“美”是统一的，它们都是统一于精神自由的审美境界上。庄子和老子一样都追求“同于道”，但老子的“同于道”是了解“道”、体会“道”，它仍属于认知的范围，是一种哲理的觉悟；而庄子的“同于道”则是对“道”的欣赏、观照，这就是审美的直觉了。从这里我们可以看出，庄子哲学在“真”“善”“美”问题上和老子不同，他是以“美”为最高。

西方哲学有两个哲学家从价值论上看在“真”“善”“美”问题上和庄子有某些相似之处，一是亚里士多德，一是谢林，也许谢林与庄子更为相近。亚里士多德哲学追求真、善、美的统一，他说：“美即是善，其所以引起快感正因为它是善”，而善的行为与美的艺术表现则需要以对事物的认识为基础。从价值论的角度看，亚里士多德并没有赋予真、善、美同样的意义。在对人类活动进行划分时，他认为在认识、实践和创造这三种活动中，认识是最高的，因为只有借助这种活动，人才能面对最高真理。但就三种活动的产物而言，在亚里士多德看来，“求真”的活动所得是理论性科学（如数学、物理学、形而上学），只是为知识而知识；“求善”与“求美”的活动所得则是实践性科学（包括政治学、伦理学）和创造性科学（包括诗学和修辞学），它们都有更高的外在目的，前者指导行动，后者指导创造。亚里士多德认为，艺术的本质就是创造。他说：“艺术就是创造能力的一种状况，其中包括真正的推理过程。”这里，创造活动成了最能体现人的本质即理性的活动（亚氏曾将人的本质界定为理性）。据此，我们似乎可以说，在亚里士多德哲学中，表现美的艺术创造从而美本身获得了最高价值，其次是有外在目的的行动（即道德实践，这属于“善”），再次才是为知识而知识的“求真”的活动。¹²

谢林的哲学提出“绝对同一”的问题。照他看，“绝对同一”既不是主体，又不是客体，而是“主体和客体的绝对无差别的同一”。要达到这种“同一”只能在一种“理智的直观”中实现。所谓“理智的直观”就是产生直观对象的活动，二者是同一的，这实际上是一种直觉活动。通过这种直觉活动，自我就把自己和无意识地产生自然界的宇宙精神合二而一。谢林认为，这种“理智的直观”不是任何人的意识都可以有的，只有哲学上的天才才能具有。谢林甚至认为，即使“理智的直观”活动也还不算完全地达到了主体和客体的绝对同一，因为在那里还有直观者和被直观者

的差别（尽管这个被直观才是直观者的自由活动产生的）。因此，谢林又提出只有在“艺术的直观”中才能真正实现主体与客体的绝对无差别的完全同一。

这种“绝对无差别的完全同一”很接近于庄子的“心斋”和“坐忘”的境界。谢林认为，“艺术的直观”来自灵感，来自内心精神的一种内在力量的强烈追求。这只能说是一种直觉的神秘的精神境界了。这样，在谢林那里艺术就成了没有差别的至高无上的理想世界。基于这种“艺术的直观”高于“理智的直观”的看法，谢林把“美”视为有最高价值。照他看，“真”是必然性的问题，“善”是自由的问题，而“美”是二者的综合，“美”把“真”的科学知识和“善”的道德行为综合实现于艺术之中。他说：“我相信，最高的理性活动是包括一切理念的审美活动。真和善只有在美中才能接近。哲学家必须像诗人一样，具有审美的能力。”因此，从价值论的方面看，在谢林那里，“美”高于“真”和“善”。¹³这与庄子对“真”“善”“美”问题的看法从价值论上看有相似处。

四、简单结论

1. 上述孔子、老子、庄子三种不同的人生境界的追求是三种不同的价值哲学，而这三种哲学表现了三种不同的价值取向。我认为，任何有价值的哲学体系总在追求着“真”“善”“美”的三者的统一，但如何统一以及达到统一的过程并不相同。从人类发展看，我们也不必求其相同。在我们的先秦时代，哲学之所以丰富多彩，正是因为它有着多元化的价值取向。当时的哲人能从非常广阔的领域来讨论宇宙人生终极关切的问题，这样就使得我国的哲学放在当时世界范围内，和世界其他地区（希腊、印度等）相比实不逊色，这正是因为它是“多元”的，而不是“一元”的，它是能从不同的路径来探讨宇宙人生的终极关切问题。如果我们说，我国先秦哲学的发展对我们今天有什么意义，我认为其中重要的一条就是它的“多元化”。哲学的多元化才能使哲学得到充分发展，“一元化”最终将窒息哲学的生命力。当今世界文化与哲学正呈现为全球意识下多元化发展的趋势，我们应顺应这一发展趋势来创造中国的现代化哲学。

2. 对历史上的哲学，如果要使它具有现代意义，能在现实社会中发生作用，就必须给以现代的解释。上面对孔子、老子、庄子哲学思想

的解释，就是一种对他们思想的一种现代解释的尝试。对孔子、老子、庄子思想的解释只能是“既是孔子、老子、庄子的哲学，又不是孔子、老子、庄子的哲学”。因为这篇文章中所讲的是根据孔子、老子、庄子哲学引发出来的解释：它的根据是“孔子、老子、庄子的哲学”，因此它是“孔子、老子、庄子的哲学”；它是根据“孔子、老子、庄子哲学引发出来的解释”，既是一种引发出来的解释，因此它又不是（或不全是）孔子、老子、庄子的哲学。只有这样，我们才扩大了孔子、老子、庄子哲学的意义。也正因为它是我们现时代“根据孔子、老子、庄子哲学引发出来的”，所以它才有现代意义，哲学才有发展。我们从价值论方面来比较孔子、老子、庄子的哲学，说明他们的哲学在价值论上的取向不同，除了说明“多元化”对文化和哲学的发展意义之外，还可以为我们提供不同类型的哲学体系的式样和不同取向的人生价值的追求；又可以表示我们今天的一种对“真”“善”“美”的意义的关注和了解。这无疑对我们今日的哲学研究是有意义的。

3. 用西方哲学作为参照，来了解（解释、研究）中国哲学的特点应是有重要意义的。在中国传统哲学史上虽然没有哪个哲学家对“真”“善”“美”问题作过专门的讨论，但在中国传统哲学中却不能说不包含“真”“善”“美”的内容。我们用西方哲学作为参照来揭示中国历史上的哲学家的哲学中同样包含着“真”“善”“美”的丰富内容：这一方面，使中国传统哲学从西方哲学的观点来看，它的意义扩大了；另一方面，使西方哲学从中国哲学的观点来看，它的意义也扩大了。虽然中西哲学都有其自身的意义，但是在它们的差异和比较中使它们各自的特性更加鲜明地呈现出来，因而或者可以互相补充。如果说西方哲学家对“真”“善”“美”的问题的讨论，基本上是属于知识（或信仰，如基督教）的问题；那么中国哲学家对“真”“善”“美”的追求，则基本上是属于境界问题。因此，中西哲学各有各的意义，在互相参照中又可以互相发明。

IX . ON THE CLASH AND COEXISTENCE OF HUMAN CIVILIZATIONS

I . "The Clash of Civilizations" and the "New Empire" Theory

In 1993, an essay entitled "Clash of Civilizations?" was published on the summer issue of *Foreign Affairs* by Samuel Huntington. In 1994, I criticized the American Hegemonism represented by Huntington in an essay titled as "On Huntington's 'Clash of Civilizations?'" , published in *Philosophical Studies*¹. Between the publications of the two essays, Huntington's theory was widely discussed and criticized in all aspects by many scholars at home and abroad. To respond to these challenges as well as to amplify and revise his own theory, Huntington published his chef d'oeuvre, *The Clash of Civilizations and Remaking of World Order*, in 1996, which had marked some changes in his arguments. For example, in the Foreword to the Chinese translation, he writes: "The global politics, for the first time in human history, has become multipolar and multicultural."² In the section of "The Commonalities of Civilization," he points out:

Some Americans have promoted multiculturalism at home; some have promoted universalism abroad; and some have done both. Multiculturalism at home threatens the United States and the West; universalism abroad threatens the West and the world. Both deny the uniqueness of Western culture. The global monoculturalists want to make the world like America. The domestic multiculturalists want to make America like the world. A multicultural America is impossible because a non-Western America is not American. A multicultural world is unavoidable because global empire is impossible. The preservation of the United States and the West requires the renewal of Western identity. The

Though there are still some arguable points in the above-quoted paragraph, the opinion that "the security of the world requires acceptance of global multiculturality" is undoubtedly prudent enough. Why did this change occur in Huntington's point of view? It was because he had felt the global challenges and threats endangering the Western (or American *de facto*) hegemony, and the domestic problems of racism and the like, that he proposed the "remaking of world order." In the section of "Renewal of the West?" Huntington claims:

The West obviously differs from all other civilizations that have ever existed in that it has had an overwhelming impact on all other civilizations that have existed since 1500. It also inaugurated the process of modernization and industrialization that have become worldwide, and as a result societies in all other civilizations have been attempting to catch up with the West in wealth and modernity. Do these characters of the West, however, mean that its evolution and dynamics as a civilization are fundamentally different from the patterns that have prevailed in all other civilizations? The evidence of history and the judgments of the scholars of the comparative history of civilizations suggest otherwise. The development of the West to date has not deviated significantly from the evolutionary patterns common to civilizations throughout history. The Islamic Resurgence and the economic dynamism of Asia demonstrate that other civilizations are alive and well and at least potentially threatening to the West. A major war involving the West and the core states of other civilizations is not inevitable, but it could happen. Alternatively the gradual and irregular decline of the West which started in the early 20th century could continue for decades and perhaps centuries to come. Or the West could go through a period of revival, reverse its declining influence in world affairs, and reconfirm its position as the leader whom other civilizations follow and imitate.⁵

We conclude from the above quotation that, on the one hand, Huntington has felt "the gradual and irregular decline" of the Western leadership in the world and the potential threat to the West coming from those countries undergoing or having undergone the process of modernization and industrialization by imitating the West. Surely this

is a reality unacceptable for him and some other Western scholars, especially for certain political leaders (Mr. George W. Bush, the current American president, for instance), involved with an unsolvable complex of theirs: why do those resurgent Islamic movements or rising Asian countries which have accepted the western way of modernization and industrialization become a threat to the West instead? According to their reasoning, these countries should and could only play the role of Western adherents or loyal subjects in all spheres, especially in politics and culture. Nevertheless, the reality contradicts their expectations, resulting consequently in an anxiety in the Western mind. On the other hand, the deep-seated dream Huntington really cherishes is the "renewal of the West," to "reconfirm its position as the leader whom other civilizations follow and imitate." The performance of the Bush administration after "9.11" incident can be regarded from this standpoint as an attempt to reconfirm American hegemonic leadership on other civilizations.

After Huntington's *The Clash of Civilizations and the Remaking of World Order*, another book, *Empire*, coauthored by Antonio Negri (Italy) and Michael Hardt (USA), was published in 2000. The basic judgment of this work on current global situation is as follows: "Empire is materializing before our very eyes; it presents its rule as a regime with no territorial or temporal boundaries; this new global form of sovereignty is what we call Empire"; "the political subject that effectively regulates these global exchanges, the sovereign power that governs the world."⁷ Embracing this doctrine, many scholars in the United States propagate the "New Empire" theories. For example, John J. Mearsheimer, professor of politics in the University of Chicago, puts forward in his *Tragedy of Great Power Politics* (New York, 2002) the following theory: as every state seeks the maximization of its share of world power, no balancing structure could exist, and the best defense is to offend (which provides a theoretical basis for President Bush's "Preemptive Strike" theory). Another "post-modern state" theorist is Robert Cooper, Foreign Office adviser of British Prime Minister Tony

Blair, who divides all states into three types: first, post-modern states, e.g. North American and European countries and Japan; second, modern states, i.e. nation-states like China, India, Brazil and Pakistan; third, pre-modern states, e.g. African and Middle East countries and Afghanistan. A concept put forward and reiterated by Cooper is "New Imperialism," which means post-modern states should use their national power (including military power) to control modern states, meanwhile to contain the barbaric acts in pre-modern states such as mass slaughter.⁸ More aggressive still, the American neoconservatists in the 21st century have advocated three core creeds: 1. the extreme adoration of military force; 2. the claim of an American "benign hegemony"; 3. the emphasis on the exportation of American democracy and values. In accordance with this tone, President George W. Bush delivered his speech at the commencement of West Point on June 1, 2002, which could be summarized as three basic principles: first, America should maintain its power of "preemptive strike"; second, American values are universal; third, the United States should maintain an unchallengeable military force.¹¹ This "New Empire" doctrine would inevitably arouse "clashes" among the states and nations of other civilizations, and its central rhetoric has already been echoed by Huntington's theory of the "clash of civilizations." Two basic proposals are made in the latter's "Clash of Civilizations?": 1. to "limit the expansion of the military strength in Islamic and Confucian states"; to "maintain the military superiority of the West in East and Southwest Asia"; to "exploit the differences and conflicts among Islamic and Confucian states"; 2. to "strengthen international institutions that reflect and legitimate Western interests and values and to promote the involvement of non-Western states in those institutions."¹² From these proposals we conclude that because of the "clashes of civilizations" kindled by the West, headed by the United States, on cultural differences (values, for example), the world has become a pandemonium with the upgrading of regional wars.

Should civilizations survive only in "clashes," in order to

materialize the universal "New Empire" doctrine? Why couldn't they "coexist" in peace?

II . "Coexistence of Civilizations" and New Axial Age

Human history has recorded enough cases of clashes caused by cultural (or religious) differences among states, nations or regions. Nevertheless, in view of the general tendency of history, we find that the development of civilizations among different states, nations and regions should be dominated by mutual absorption and convergence. In my opinion, most conflicts among these states, nations and regions were not provoked by cultural differences. As my knowledge about Western culture (both civilization and culture concern with a comprehensive life style of a nation, thus civilization is a magnified culture) is limited, I am not authoritative enough to speak on this issue. Here I would like to quote Bertrand Russell to justify a proposition that the present Western civilization is formed by absorbing and syncretizing several cultural elements. In 1922, after Russell's visit to China, he wrote in an essay titled as "Chinese and Western Civilization Contrasted" the following words:

Contacts between different civilizations have often in the past proved to be landmarks in human progress. Greece learnt from Egypt, Rome from Greece, the Arabs from the Roman Empire, medieval Europe from the Arabs, and Renaissance Europe from the Byzantines.¹⁴

Though it might be arguable whether Russell was accurate enough on every point of his views, two of which, however, are undoubtedly correct: 1. contacts between different cultures are important dynamics for the progress of human civilizations; 2. the European culture today has absorbed many elements from other national cultures, including some from the Arabian. Another

observation based on the progress of Chinese culture would be even more forceful to prove that clashes of civilizations are always temporal, whereas mutual absorption and convergence are far more important.

In Spring and Autumn and Warring States periods, different local cultures existed in China, including Central Area (Henan) culture, Qi-Lu (Shandong) culture, Qinlong (Shaanxi) culture, Jingchu (Southern) culture, Wu-Yue (South-east) culture and Ba-Shu (South-west) culture. All of them were amalgamated later into a generally unified Chinese(Huaxia) culture. The possibility of the coexistence of two cultures would be especially illuminated by the importation of Indian Buddhism in the first century AD. Buddhism culture spread in China peacefully; its cultural differences with indigenous Confucianism or Taoism had never brought their disciples into war. Only on three occasions had the Chinese imperial courts suppressed Buddhism, which were caused without exception by political or economic factors. Generally speaking, Confucian, Taoist and Buddhist cultures coexist well in China. A famous French sinologist (Kristofer Schipper) once asked me: "Why is China multicultural?" I pondered for a while and then answered: Perhaps there are two reasons. First, from the ideological point of view, the Chinese always advocate "harmony in diversity," i.e. the harmonious coexistence of diverse cultures. Secondly, in terms of political systems, the Chinese emperor was the highest authority dominating the fates of religious, philosophical and ethical cultures in China. For the sake of social stability, the emperor did not want to see conflicts or wars provoked by cultural differences. Thus he usually sponsored the "debate of three schools," summoning the representatives of Confucian, Taoist and Buddhist scholars to debate in imperial court, arbitrating their respective statuses according to the degree of success in debate, instead of allowing any conflicts or even wars.

From the above arguments and historical experiences, I conclude that Huntington's "clash of civilizations" theory is, at any rate, *ex parte*,

serving merely for American international politics. He says as follows:

It is my hypothesis that the fundamental source of conflict in the new world will not be primarily ideological or primarily economic. The great divisions among humankind and the dominating source of conflict will be cultural. Nation states will remain the most powerful actors in world affairs, but the principal conflicts of global politics will occur between nations and groups of different civilizations. The clash of civilizations will dominate global politics. The fault lines between civilizations will be the battle lines of the future.¹⁵

Huntington's observation is insightful in certain cases, such as Palestinian-Israel conflict in the Middle East, Kosovo conflict, or even the Iraqi War, where some cultural (religious and ethical) elements catalyzed the outbursts of wars. Yet in closer analysis, the basic causes of wars or conflicts are not cultural, but political and economic: Palestinian-Israel conflict was a contest for regional hegemony, Iraqi War was mainly for oil, and Kosovo conflict for the strategies of power politics. But on the other hand, cultural differences have not provoked conflicts between many nations, such as in Sino-Indian, Sino-Russian, or even Sino-European relations. In fact, there have been no serious conflicts or wars(for whatever reason) between them, especially in the last decade. Thus the "clash of civilizations" theory hardly fits the present global situation, nor will it be the future perspective of mankind. Instead, the "coexistence of civilizations" should be the only outlet for human society, and a future goal we should strive for.

Perhaps a clearer picture of our age may help to illuminate this problem. In my opinion, we find ourselves in a New Axial Age.

The idea of Axial Age was proposed by German philosopher Karl Jaspers (1883-1969). According to his theory, around 500 BC, great thinkers appeared almost simultaneously in Ancient Greece, Israel, India and China, and they contributed their original ideas to the solution to the problems which are of great concern to humankind. Distinctive cultural traditions were then formed respectively by Socrates and Plato in Ancient Greece, Laozi and Confucius in China,

Shakyamuni in India, and Jewish prophets in Israel, which, after more than two thousand years of progress, have become the principal part of human intellectual wealth. These regional cultural traditions were independent in their births and developments, without mutual influence. "Until today mankind has lived by what happened during the Axial Period, by what was thought and created during that period. In each new upward flight it returns in recollection to this period and is fired anew by it. Even since then it has been the case that recollections and reawakenings of the potentialities of the Axial Period—renaissances—afford a spiritual impetus."¹⁶ For example, the Europeans in Renaissance had traced the origin of their culture back to Ancient Greece, which had rekindled the European civilization and left its mark in world history. Similarly, the Song and Ming Neo-Confucian thinkers in China, stimulated by the impacts of Indian Buddhism, rediscovered Confucius and Mencius of the pre-Qin Period, and elevated the indigenous Chinese philosophy to a new height. In a certain sense, the current development of world multiculturalism might become a new leap forward on the basis of the Axial Age 2,000 years ago. Has the contemporary human cultures created, or will create, a New Axial Age? Judging from certain evidences, we may well draw such a conclusion.

First of all, since World War II, with the gradual collapse of colonialism, the once colonized and oppressed nations have taken upon themselves an urgent task to re-affirm their independent identities by all means. Their unique cultures (such as languages, religions and social values) were the most important means for this justification. We know that Malaysia after World War II insisted on using Malay as their national tongue to emphasize the nation's unification; and after the establishment of Israel, the Israeli decided to revive Hebrew as a vernacular, though for a long period of time in the past, Hebrew had only been used in religious ceremonies. "The central elements of any culture or civilization are language and religion."¹⁷ Some political leaders and scholars in Eastern countries also put

forward the "Asian values" centered on community to distinguish themselves from the Western "universal values" centered on individual. So on and so forth. Even Huntington began to understand that "non-Western civilizations generally are re-affirming the value of their own cultures."¹⁸

Secondly, the Axial Age around 500 BC was a time when axial civilizations entered the Iron Age, and a time of great leaps forward in productivity, which in consequence produced great thinkers. Now we have entered the Information Age, when another great leap forward in human society is just happening. Because of the economic globalization, the integration of science and technology, and the progress of information network, different regions all over the world are tightly connected, and local cultural progress could no longer be independent as they once were in the "Axial Age" two thousand years ago. Instead, they will be developed in the midst of discords, conflicts, and through mutual influences or mutual absorptions. The self-understanding of each culture is undoubtedly limited, as is described in a famous poem of Su Shi (1037-1101):

They know not Lushan Mountain's real face;
So long as they continue to stay in her embrace.²²

This couplet tells us, a different perspective from another cultural system, i.e. from a cultural "other," might provide us with a more comprehensive view of our own culture. In an essay entitled "Why Is China Necessary for Us Westerners in Studying Philosophy?", François Jullien, a French scholar, writes: "We have chosen departure, which means a choice for leaving here, in order to create a space for thinking from a distant perspective. This detour in steady steps distinguishes itself from exoticism. We have made our trip traversing China in this manner in order to better understand Greece, which, though curtained off from our knowledge by a lapse of time, is something inborn and inherited by us through birthright. For the purpose of enhancing this

perspective, we have to cut off this umbilical cord and constitute an exterior viewpoint."²³ This kind of intercultural study in the spirit of intersubjectivity and inter-reference, together with its methodology of judging one's own culture from the standpoint of a culture "other," is gradually accepted by scholars at home and abroad. Why, then, should we understand our culture from another's perspective? Just because we desire to inherit and develop the cultural tradition of our own. In this case, it undoubtedly becomes a serious problem in how to preserve the proper traits of a culture and pass on its lifeline. As we know, economy can be globalized, science and technology can be integrated, but cultures can never be monoculturalized. In the history of the progress of human society to date, it is neither possible nor wise enough for any culture to reject all external influences; but only when the essence of the target culture is sufficiently digested could it better absorb foreign cultures to nourish its domestic culture. "When we keep in contacts and exchanges with Western world," Mr. Fei Xiaotong said, "we should make our own treasures part of the world cultural heritage. Indigenization first, globalization second."²⁴ That is to say, our own cultural root should be protected when learning from other cultures. Thus, the cultural progress in the 21st century concerning all human societies should be both national and universal.

Thirdly, judging from the status quo of human societies and cultures, a new pattern of cultural diversity with a global consciousness has already been formed or is still being formed. Perhaps the 21st century would be dominated by four principal cultural systems: the Euro-American, the East Asian, the South Asian, and the Islamic (Middle Eastern and North African). Each of the four cultures has a long tradition and a population of over a billion. Of course there are other cultures influencing the future of human society in the 21st century as well, for example, the Latin American and the African; nevertheless, at least in the present, the influence of these cultures are far less than that of the four principal cultures mentioned above. If human society hopes to terminate the present chaos, it

should especially criticize the cultural Hegemonism and cultural Tribalism, it should not only face this new cultural Axial Age but also make unremitting efforts to promote the dialogues among states or nations belonging to different cultural traditions, in order to coordinate all the cultures into a project of solving the common problems challenging human society. Undoubtedly, the four principal cultures are burdened with a major responsibility for the current human society. At present, human society is standing on a historic turning point, and every nation or country should seriously reexamine its own culture in the historical perspective. This is especially true for those nations in Euro-American, East Asian, South Asian or Islamic cultural regions, because of the crucial functions they perform in contemporary human civilization. This kind of reexamination is surely quite necessary for the future of human society. The culture tradition is a reality *de facto* for every nation or state, especially for those nations and states with a long history and having crucial influence on contemporary human society, for it is deeply rooted in the hearts of its people, forming the spiritual prop of this particular nation or state.

Let us return to our own cultural tradition, make it a starting point, and seek in it the source of our power and our spiritual prop, in order to promote the development of our contemporary culture, and to solve the pressing problems existing in human society. In this sense, the Euro-American, East Asian, South Asian and Islamic cultures, with their long historical traditions, might help to promote the human society in the 21st century to the level of a "New Axial Age," comparable to the Axial Age 2,500 years ago. Different cultural traditions would subsist in this New Axial Age, each with a population too large to be eliminated—even with wars, there would be only little or temporary effects. Thus, in the long run, the coexistence of civilizations is predictable.

III . Can Chinese Culture Make Contributions to

the Coexistence of Civilizations?

If Chinese people want to make contributions to the "coexistence of civilizations" in contemporary human society, they must first know their own culture well, which means they must have a cultural self-consciousness. The so-called "cultural self-consciousness" refers to the fact that people in a certain cultural tradition can give serious consideration or make earnest reexamination of their own culture's origin, history, characteristics (including both merits and weakness) and its tendency of progress. It is fair to say that the Chinese nation is on the eve of a national renewal. To achieve this goal, we must have some self-knowledge about Chinese culture, make a proper estimation of its place in human civilizations, and try to ascertain the genuine spirit of this ancient culture, in order to present its true essence to contemporary human society. On the other hand, we must analyze the weak points of our own culture as well, to better absorb other cultures' essences, and to give a modern reinterpretation of Chinese culture, so that it can adapt to the general tendency in the development of modern society. Only in this way may our country become a vanguard in the development of a global culture, and create a brave new world together with other cultures.

Confucianism and Taoism were two principal schools of thinking in traditional Chinese culture, and generally considered to be complementary to each other. Of course, since Indian Buddhism was introduced into China, Buddhism has also played an important role in Chinese society and culture. Now I would like to discuss whether the Confucian and Taoist thinking can provide meaningful resources to the doctrine of "coexistence of civilizations."

i . The Confucian Doctrine of *Ren* (仁 , benevolence, virtue) Is a Resource of Thinking with a Positive Meaning for the "Coexistence of Civilizations."

"The Way originates in Emotion" (道始于情), as prescribed in "Destiny is the resource of Human nature" (性自命出), a manuscript

text in *Guodian Bamboo Slips* (《郭店竹简》). "The Way" here means "the Way of Humanity" (人道), i.e. the principles in dealing with human(or in other words, social) relationships, which is different from "the Way of Heaven" (天道), i.e. the laws of nature or of universe. Human relationships are established on the basis of emotion, which is the starting point of the Confucian doctrine of *Ren*. Once a disciple named Fan Chi asked Confucius: "What is *Ren*?" The answer was: "To love people." Where is the origin of this idea—"to love people"? In *The Doctrine of the Mean* a saying of Confucius was quoted as: "*Ren* is the characteristic element of humanity, and the great exercise of it is in loving relatives."²⁷ The spirit of Benevolence and Love (仁爱) is rooted in human nature, and to love one's relative is the most basic exercise of it. But the spirit of *Ren* goes far beyond this level. To quote *Guodian Bamboo Slips*: "To love and love deep, that is love; but to enlarge the love for one's father to the love for human being, that is *Ren*."²⁸ "The enlargement of filial piety is to love all the people below Heaven."²⁹ From these sayings we observe that the Confucian Doctrine of *Ren* demands to enlarge "the love for relatives" to "the benevolence on people," i.e. to "enlarge one's self-concern to the concern for others" (推己及人), to "treat with the reverence the elders in your own family, so that the elders in the families of others shall be similarly treated; to treat with the kindness due to youth the young in your own family, so that the young in the families of others shall be similarly treated"³⁰—that is *Ren*. It is not easy to practice the doctrine of "enlarging one's self-concern to the concern for others," which requires a "practice of *Ren*" rooted in "the Way of Loyalty and Forgiveness" (忠恕之道), i.e. "never do to others as you do not wish done on yourself,"³¹ "wishing to be established himself, he seeks also to establish others; wishing to be enlarged himself, he seeks also to enlarge others."³² ("Loyalty is the complete devotion of oneself; forgiveness is the deduction of one's self-concern"朱熹：《四书集注》).

If *Ren* is to be extended to the whole society, it would be as what Confucius once said: "To subdue one's self and return to propriety, is

perfect virtue. If a *junzi* (君子: gentleman, nobleman) can for one day subdue himself and return to propriety, all under Heaven will return to *Ren* (after his example). Is the practice of *Ren* from a man himself, or is it from others?"³³ "To subdue one's self" and "to return to propriety" are usually interpreted as two parallel teachings, but I do not consider this the best explanation of this doctrine. "To subdue one's self and return to propriety is perfect virtue" actually means the behavior of "returning to propriety" based on the "subduing of one's self" can be regarded as *Ren*. Mr. Fei Xiaotong had his own interpretation about this doctrine: "Only after one has subdued one's self could one return to propriety. The return to propriety is the prerequisite for one to enter the society and become a social man. Perhaps it is just on this point Western and Eastern civilizations have parted, that is, whether to expand or to subdue one's self."³⁴ I think Mr. Fei's remark makes a lot of sense. Zhu Xi also had an exegesis on this doctrine. "To subdue means to conquer," he said, "and the self means one's personal desires. To return means to restore, and the propriety means the laws and patterns of the Principle of Heaven." According to this exegesis, one should subdue one's personal desires to abide by proprieties and social criteria. *Ren* is one's natural virtues ("Love is born in nature."³⁵); and propriety is exterior conventions to rule one's behavior, the function of which is to adjust social relationships so that people could live in harmony, as is summed up in one of Confucius' old saying: "The most valuable function of propriety is harmony."³⁶ Only if one abides by proprieties and social criteria willingly, i.e. by an innate will to love people, can one fulfill the demands of *Ren*. Thus Confucius asked: "Is the practice of *Ren* from a man himself, or is it from others?" He made a distinction between *Ren* and propriety: "If a man be without *Ren*, what has he to do with the rites of propriety? If a man be without *Ren*, what has he to do with music?"³⁷ He who performs the rites or music without a heart of Benevolence and Love is a hypocrite, and is serving a purpose of cheating. It is in this sense that Confucius thought, if people would

pursue *Ren* self-consciously and practice what a heart of Benevolence and Love demands according to the proprieties in everyday life, then harmony and peace would be achieved in a society,— "If a *junzi* can for one day subdue himself and return to propriety, all under Heaven will return to *Ren*." In my opinion, this teaching of Confucius is not totally meaningless for the political leaders of a state or the ruling class in developed countries (United States in particular). "The politics of *Ren*" (仁政), or "the Way of a virtuous emperor" (王道) instead of "the Way of hegemony" (霸道), is indispensable to "rule the state" (治国) and to "harmonize all under Heaven" (平天下). If "the politics of *Ren*" or "the Way of a virtuous emperor" is practiced, different cultures would be able to coexist and develop in peace; while "the Way of hegemony" will bring forth the "clash of civilizations," resulting in monoculturalism and cultural Hegemonism. If Confucian doctrine of *Ren* is applied to the regulating of intercultural relationships, clash or war of civilizations will be avoided, and the coexistence of civilizations, achieved.

Of course, even the Confucian doctrine of *Ren* is no miracle drug to solve all the problems about the existence of civilizations in contemporary society. Nevertheless, as a set of moral self-regulations based on Benevolence and Love, it would undoubtedly be of some practical significance to harmonize the coexistence of civilizations if practiced as a principle to regulate intercultural and cultural relationships.

It is not easy to make different cultures get along in harmony and thus to make states and nations in different cultural traditions coexist in peace. Probably the Confucian doctrine of "Harmony in Diversity" (和而不同)³⁹ could provide us with an illuminating resource of thinking. According to Confucius, "The virtuous (*junzi*) get on in harmony without agreeing to each other; the base (*xiaoren*) agree with others without harmony."⁴⁰ *Junzi*, as intellectuals with moral discipline practicing the Way of Loyalty and Forgiveness, should try to get on with others in harmony in spite of their different opinions; but those

with no morality or discipline always force others to accept their opinions, thus could not maintain a harmonious relationship with others. If this doctrine of "Harmony in Diversity" could be applied as a principle in dealing with intercultural and cultural relationships, it can play a very positive role in resolving the conflicts among states or nations. It would be especially true in dealing with those discords and conflicts provoked by cultural differences (e.g. the differences in religious beliefs or social values) among states or nations, if we practice the teaching of "Harmony in Diversity" as principle to resolve these conflicts.

"Harmony" and "Sameness" are generally regarded as two different concepts in traditional Chinese thinking. There was even "a debate on the differences between Harmony and Sameness" in China's history. As a passage in *Zuo Zhuan* relates, once the Duke of Qi asked Yan-zi: "Is there only Ju who can get along with me in harmony?" The reply of Yanzi was: "Ju merely expresses the same opinion with Your Highness, —how can it be called harmony?" "Is there any difference between Harmony and Sameness?" asked the Duke. "They are quite different," replied Yan-zi. "Harmony is like well-cooked dish, you must concoct fish and meat with water, fire, vinegar, sauce, salt and plum, and then cook the dish with firewood. The cook harmonizes these flavors to make it moderate. If it is too light, then salt should be added; if too salty, then water. When *junzi* dines with such a dish, his heart would be pacified. This is analogous to the relationship between the King and his magistrates. . . . But Ju is different from it. When Your Highness say that something is right, he agrees; when Your Highness say the opposite, he agrees as well. It is as if to moderate water with water,—who could tolerate to eat such a dish? Or as if a zither always plays the same tune,—who could tolerate to enjoy such music? This is why Sameness differs from Harmony" (《左传·昭公二十年》). Another saying of Shibo (史伯) was recorded as follows: "In fact, only Harmony can activate the growth of lives, and Sameness would stop it on the contrary. Harmony is to moderate something with heterogeneous

things—only in this way, the lives would flourish and find their belongings. If something is supplemented by homogeneous things, it can only be abandoned after its exhaustion. Thus the ancient virtuous emperors had concocted Earth with Metal, Wood, Water and Fire⁴¹, to transform it into miscellaneous lives."⁴² (《国语·郑语》) From the above quotations, we understand that Harmony and Sameness are totally different concepts. Only under the presupposition of difference and correlation could things "be moderated with heterogeneity," and the diverse things progress together in harmony with one another. "To supplement something with homogeneity" is to aggregate the sameness, which would only suffocate the lives. The supreme ideal of traditional Chinese culture is that "miscellaneous lives are nourished together without harming each other; miscellaneous ways are practiced together without counteracting each other."⁴³ The "miscellaneous lives" and "miscellaneous ways" refer to Diversity; and the "without harming each other" and "without counteracting each other" refer to Harmony. This doctrine would provide us with inexhaustible resources of thinking for the coexistence of diverse cultures.

Now in Western countries, people of insight have already admitted the possibility of coexistence of civilizations, that the clash or war provoked by mere cultural differences should be avoided. They believe that different nations and states should be able to achieve common understanding through cultural exchanges, dialogues, and discussions. This would be a process moving from "Diversity" to mutual understanding. This mutual understanding is neither to extinct nor to assimilate the individual cultures, but to find a cross point in two different cultures and to use it as the basis to promote the progress of both cultures,—such is the function of "Harmony." It is just because of the differences of diverse cultures that human civilizations have become so colorful, and that the complementary and interactive setup is formed gradually in the ever-flowing river of human history. Cultural differences might lead to clashes or even wars, but not all

differences are destined to cause clashes or wars. Especially in an era when science and technology are rapidly developing, a massive war, if it really happens, would easily destroy humankind itself. Thus we must endeavor to maintain a harmonious coexistence through intercultural dialogues. Many scholars at home and abroad have recognized the importance of mutual understanding achieved through dialogues between different cultures. Habermas, for instance, begins to emphasize the concepts of justice and solidarity. In my opinion, they are significant principles in dealing with international cultural relationships. Habermas' "Principle of Justice" can be understood as follows: every national culture has a right to protect its independence and autonomy and to develop freely according to the will of its people. His "Principle of Solidarity," on the other hand, can be interpreted as an obligation to sympathize, understand and respect other national cultures. By uninterrupted dialogues and communication between different national cultures, there will be a time, sooner or later, when a positive cycle of interactions can be formed.⁴⁴ Another advocator of this principle is Gadamer, the German philosopher who passed away only recently. He proposed that "understanding" should be extended to the level of "universal dialogue." Because of this extension, the relationship between subject and object (as cognitive or grammatical concepts) is possible to be transformed from inequality to equality; in other words, only when the dialogues are conducted on equal basis, can there be any meaningful dialogue and fruitful result. Gadamer's consciousness of equality between subject and object and his theory of "cultural dialogue" are important ideas urgently needed in our time,⁴⁵ illuminating enough for us to understand properly and thoroughly the cultural or national relationships between China and other nations. Nevertheless, whether it is Habermas' principles of justice and solidarity or Gadamer's theory of universal dialogue, their common presupposition should be the principle of "Diversity in Harmony," since only when nations and states in different cultural traditions

coexist in harmony through dialogues, can they acquire equal rights and obligations and only then the "universal dialogue" between them may become meaningful and fruitful. Thus, the Confucian principle of "Harmony in Diversity" based on the belief that "harmony is the most valuable"⁴⁶ should be practiced as one of the basic principles in dealing with intercultural relationships. This principle, if adopted by all states and nations, would become a positive factor not only in eliminating the discords, conflicts and even wars, but also as a dynamics in promoting the development of all states and nations through exchange and communication. It is just in this sense that Bertrand Russell said: "Contacts between different civilizations have often in the past proved to be landmarks in human progress."⁴⁹ The contemporary human society needs different cultures to develop their traditional characters through mutual absorption and convergence, in order to bring about the coexistence of civilizations on a new basis.

ii . The Taoist Doctrine of the Way (tao) Can Provide Significant Resources of Thinking to Prevent "the Clash of Civilizations."

If Confucius is a "man of virtue" (仁者), then Lao-zi is a "man of wisdom" (智者). The Way is the fundamental concept in Lao-zi's *Tao Te Ching*, while "the spontaneity and doing-nothing" (自然无为: to obey natural laws without offences) are the basic features of the Way. "The spontaneity and doing-nothing are the Way of Heaven," said Wang Chong in his *Lun Heng*.⁵⁰ All kinds of conflicts in contemporary human society are undoubtedly caused by the greedy desires for power and wealth. Those great powers, in their pursuit of selfish gains and expansion of power, exploit the resources of underdeveloped countries and practice power politics, which is the fundamental cause of global chaos. Lao-zi's doctrine of "spontaneity and doing-nothing" could be interpreted as to do nothing against people's will, which will render the society and the world peacefulness. Lao-zi once quoted the saying of an ancient sage: "As I do nothing, the people will reform by themselves; since I like quiet, they will keep order by themselves;

when I seek no trouble, the people will prosper by themselves; when I have no desire, they will live in austerity by themselves."⁵¹ It means: the ruler with political powers should neither interfere with his people (doing-nothing), nor disturb their everyday life (liking quiet), nor act against their will (seeking no trouble), nor exploit them insatiably (having no desire); thus, the people will reform by themselves, keep order by themselves, prosper by themselves, and live in austerity by themselves. If we give a modern interpretation of this teaching and apply it to the administration of contemporary society, it will not only bring peace to a country but also function significantly in eliminating the clash of civilizations. We can interpret the above-quoted teaching as follows: in international politics, the more a country interferes with the affairs of other countries, the more chaotic the world will become; the more those great powers threaten others with military force, the more turbulent and disorderly the world will become; the more those great powers exploit the underdeveloped countries under the pretext of international aids, the poorer those underdeveloped countries will become; the more those developed countries desire and fight for the world dominance of wealth and power, the more immoral and terrorized the world will become. Therefore, in my opinion, the doctrine of "doing-nothing" may be an effective prescription for the leaders of the so-called "new empire." If they would accept this prescription, the world will enjoy peace. Nevertheless, the "new empire" always bully other states and nations by means of "willful acts" (有为), such as interference, exploitation or military threat, which are undoubtedly determined by its greedy nature as an empire. According to Lao-zi, "No calamity is worse than to be discontented. Nor is there a sin more dreadful than coveting. He who knows how to be content, truly he will always be so."⁵² Isn't the "new empire" discontented and coveting? Lao-zi said again: "Isn't the Way of Heaven much like a bow bent? The upper part has been disturbed, pressed down; the lower part is raised up from its place; the slack is taken up; the slender width is broader drawn. For thus the Way of Heaven cuts

people down when they have had too much, and fills the bowls of those who are in want. But the way of man will not work like this: the people who have not enough are spoiled, for tribute to the rich and the surfeited."⁵³ Why is the human society in this world today in a state of turbulence and disorder? Isn't it totally caused by human beings themselves, especially those leaders of the "new empire" acting against the "Way of Heaven" and losing the "hearts of men," practicing a policy of spoiling those who have not enough, in order to pay tribute to the rich and the surfeited? Isn't it the root of discords, conflicts and wars in contemporary world? Thus we find that the "clash of civilizations" theory is closely related to the theory of "new empire" hidden behind its back.

Lao-zi strongly opposed wars for the sake of preserving peace in the world. In Chapter 31, *Tao Te Ching*, he said: "Weapons at best are tools of bad omen, loathed by all. Thus those of the Way avoid them."⁵⁴ In wars there are always people killed, production interrupted and social orders broken, thus Lao-zi thinks that war is evil, because people hate it, and virtuous statesmen would not push the country into war to solve their problems. Again Lao-zi said: "To those who would help the ruler of men by means of the Way: let him not with his militant might try to conquer the world; this tactic will be revenged by Heaven. For where armies have marched, there do briars spring up; where great hosts are impressed, years of hunger and evil ensue."⁵⁵ This is generally true in the history of all nations. In China, after every major war, the population would be reduced dramatically, farmland dissipated, production interrupted, and robbers and thieves infesting. The two world wars both ended in this way, and the current war in the Middle East is no exception. Whenever the leaders of the "new empire" provoke a war anywhere, they will surely be bogged down there, since the people in the conquered countries will not surrender, they will fight without the fear of death, as Lao-zi said: "The people do not fear at all to die; what's gained therefore by threatening them with death?"⁵⁶ And: "As for those who delight to do murder, it is certain

they can never get from the world what they sought."⁵⁷ We see from history that those who had initiated wars, though momentary successes they might get, would finally fail and be dishonored. Hitler was such an example, and Japanese Militarism, another. As a "man of wisdom," Lao-zi could observe the latent converse side with his wisdom, as he said: "On bad fortune the good fortune always leans; in good fortune the bad fortune always hides."⁵⁸ Now people in some countries are suffering, but it would be a necessary precondition prepared for their nation's renewal in future. Take the past hundred years of China's history, for example, it is just after being beaten repeatedly that the Chinese people had finally waken up. Today we may say that the Chinese nation is on the eve of a great renewal. In my opinion, leaders of every country, especially those of the "new empire," should learn some wise teachings from *Tao Te Ching*, and realize that, in the long run, the politics of great powers and Hegemonism will have no future. Therefore, I consider the thinking of Lao-zi valuable in refuting the theories of "clash of civilizations" and of the "new empire." We advocate the theory of "coexistence of civilizations" and are in agreement with Lao-zi's idea of "doing-nothing," in the expectation of a world of Great Harmony, with peace and security, general progress and common wealth for humankind. Of course, as Lao-zi was born two thousand years ago, his philosophy cannot be used to solve all the problems that contemporary human society is confronted with (including the discords and conflicts among nations), but his wisdom should be of important value to illuminate our way. Our task is to rediscover and develop the essence of his thinking, to give it a modern interpretation, so that the general public can benefit from the edifications in the treasury of ancient Chinese philosophy.

Differences in religious beliefs, values and ways of thinking may lead to conflicts among nations and states; and conflicts can breed wars. However, we may ask: Are these conflicts inevitable? Would it be possible that these conflicts be resolved peacefully, without a war

for cultural differences? We have to find a common resource of thinking in all national cultures advocating the coexistence of civilizations, in order to prevent any possible conflict or war. As argued above, the Confucianism and Taoism in Chinese culture could provide significant resources of thinking to bring about the peaceful coexistence of civilizations. I believe that the same kind of resources can be found in cultures of other nations and states as well. At the turn of the 21st century, we must make a careful choice whether to practice the theory of "clash of civilizations" in dealing with the problems among nations and states, or the theory advocating the "coexistence of civilizations" to bring peace to human society. It would be a blessing to humankind if we choose not the clash but the coexistence of civilizations. *The Book of History* teaches us: "All the states under Heaven should be harmonized."⁵⁹ Like many other nations, the Chinese nation is a great one with a long and brilliant tradition of history and culture. Chinese culture is undoubtedly one of the most valuable treasures for mankind. With this cultural heritage, we should be able to make contributions to the peaceful coexistence of human civilizations, promote cultural exchanges, so that harmony might befall on this world of diverse cultures.

玖 “文明的冲突”与“文明的共存”*

一、“文明的冲突”论与“新帝国”理论

1993年夏季号美国《外交事务》发表了塞缪尔·亨廷顿的《文明的冲突？》一文，我于1994年撰写了《评亨廷顿〈文明的冲突？〉》（刊于《哲学研究》，1994年第3期），批评了以亨廷顿为代表的美国“霸权主义”，在此期间中外许多学者都对亨廷顿的理论从各个角度进行了讨论或提出了批评。1996年，亨廷顿为了回答对他的批评，并补充和修正他的某些观点出版了《文明的冲突与世界秩序的重建》。可以看出他的某些观点有所改变，例如在他为中文版写的《序言》中说：“在人类历史上，全球政治首次成了多极的和多文化的。”在《文明的共性》一节中，他说：

一些美国人在国内推行多元文化主义，一些美国人在国外推行普世主义，另一些美国人则两者都推行。美国国内的多元文化主义对美国 and 西方构成了威胁，在国外推行普世主义则对西方和世界构成了威胁。它们都否认西方文化的独特性。全球单一文化论者想把世界变成像美国一样。美国国内的多元文化论者则想把美国变成像世界一样。一个多元文化的美国是不可能的，因为非西方的美国便不成其为美国。多元化的世界则是不可避免的，因为建立全球帝国是不可能的。维护美国和西方需要重建西方认同，维护世界安全则需要接受全球的多元文化性。⁴

虽然这段话也还有一些可商榷处，但他提出“维护世界安全则需要接受全球的多元文化性”，应该说是比较明智的考虑。亨廷顿的观点有这样的变化，正是由于他感到在世界范围内西方（实际上是美国）的“霸权”地位受到挑战和威胁，在国内又受到“种族”等问题的困扰，因此提出了“世界秩序的重建”问题。在该书“西方的复兴”一节中亨廷顿说：

西方与所有已经存在过的文明显然是不同的，因为它已经对公元1500年以来存在着的所有文明都产生了势不可挡的影响。它开创了在世界范围内展开的现代化和工业化的进程，其结果是，所有其他文明都一直试图在财富和现代化方面赶上西方。然而，西方的这些特点是否意味着，它作为一种文明的演进和变动根本不同于所有其他文明中普遍存在的模式？历史的证据和比较文明史学者的判断却

表明并非如此。迄今为止，西方的发展与历史上诸文明共同的演进模式和动力并无重大不同。伊斯兰复兴运动和亚洲经济发展的势头表明，其他文明是生机勃勃的，而且至少潜在地对西方构成了威胁。一场涉及西方和其他文明核心国家的大战并不是不可避免的，但有可能发生。而西方始于20世纪初的逐渐而且无规律的衰落，可能持续几十年，甚至几百年。或者，西方可能经历一个复兴阶段，扭转它对世界事务影响力下降的局面，再次确立它作为其他文明追随和仿效的领袖的地位。⁶

这段话一方面反映了亨廷顿感到西方领导世界的地位正在“逐渐而且无规律”地“衰落”，而那些向西方学习走上或正在走上“现代化”和“工业化”的国家已经“潜在地对西方构成了威胁”，这当然是他和西方某些学者、特别是政治领袖（如现任美国总统小布什）不愿接受的。这里包含着亨廷顿和某些西方学者、政治家的一个不可解的情结：为什么那些伊斯兰复兴运动和亚洲兴起的国家走上了他们创造的“现代化”和“工业化”的道路，反而对他们构成了威胁？照他们看，这些兴起的国家在一切方面（政治的、文化的）本应跟着他们走，听命于他们才是“合理”的。但是现实的情况并非如此，因而表现出西方世界的忧心忡忡。另一方面，在亨廷顿内心真正希望的是西方文明的“复兴”，“再次确立它作为其他文明追随和仿效的领袖地位”。“9·11”以后美国布什政府的所作所为，可以说正在试图确立其作为其他文明的霸主的领导地位。

继亨廷顿的《文明的冲突与世界秩序的重建》之后，2000年出版了意大利安东尼奥·奈格里与美国迈克尔·哈特合著的《帝国——全球化的政治秩序》一书，该书对当前世界形势的基本看法是：“就在我们眼前，帝国主义正在成长、形成。无边无垠，永无止境，这就是全球政治新秩序——一种新的主权形式：帝国。”“新的主权形式正在出现。帝国是一个政治对象，它有效控制着这些全球交流，它是统治世界的最高权力。”⁹基于这一理论，在美国有众多学者在大力宣扬这种“新帝国”论。例如2002年美国芝加哥大学的米尔斯海默教授在《大国政治的悲剧》中指出：任何一个国家都要寻求权力的最大化，因此不可能有权利均衡的机制，最好的防御就是进攻（这就是布什的“先发制人”的理论基础）。另外还有一位“后现代国家理论”者英国首相布莱尔的顾问罗伯特·库珀，他把世界上的国家分为三类：第一类是后现代国家，即北美、欧洲国家和日本；第二类是现代国家，即他们还是民族国家，如中国、印度、巴西、巴基斯坦等；还有一类是前现代国家，如非洲国家、阿富汗、中东

国家。库珀提出并一再讲的一个概念就是“新帝国主义”，其意思是，后现代国家首先要动用它们的国家力量（包括军事力量）来控制现代国家，同时也制止前现代国家那些诸如屠杀之类的行为。¹⁰更有甚者21世纪的美国新保守主义提出三项核心内容：（1）极度崇尚军力；（2）主张建立美国“仁慈霸权”；（3）强调输出美国式的民主与价值观。据此，布什总统2002年6月1日在西点军校毕业典礼上提出三大原则：第一，美国要保持“先发制人”的权力；第二，美国价值观是普适全球的；第三，保持不可挑战的军事力量。¹³依据这种“新帝国”论，在不同文化传统的国家和民族中不可能不引起“冲突”。而亨廷顿的“文明冲突”论实际上早就为这种“新帝国”论提供了最基本的策略。在他的《文明的冲突？》中，有两条基本的主张：（1）“抑制伊斯兰与儒家国家的军事扩张”，“保持西方在东亚、东南亚国家的军事优势”，“制造儒家与伊斯兰国家之间的差异与冲突”；（2）“巩固能够反映西方利益与价值并使之合法化的国际组织，并且推动非西方国家参与这些组织。”依据这些理论，我们可以看到，由于西方，主要是美国，利用着文化上的差异（例如在价值观上的差异），挑起文明之间的冲突，已使当前的世界陷入一片混乱之中，局部战争越演越烈。

那么“文明”难道只能在“冲突”中，以实现一统天下的“新帝国”的理论吗？在不同“文明”之间难道不可以“共存”吗？

二、“文明的共存”与新轴心时代

在人类以往的历史上并不缺乏由于文明（例如宗教）的原因引起国家与国家、民族与民族、地域与地域之间的冲突。但是，我们从历史发展的总体上看，在不同国家、民族和地域之间的文明发展更应该是以相互吸收与融合为主导。照我看，国家与国家、民族与民族、地域与地域之间的冲突主要并不是由文明的原因引起的。我对西方文化（文明与文化都涉及一个民族全面的生活方式，文明是放大的文化）了解很有限，没有多少发言权，这里只引用罗素的一段话来说明今日西方文明是在吸收与融合多种文化成分而形成的。1922年，在罗素访问中国之后，写过一篇题为《中西文明之比较》的文章，其中有这样一段：

不同文明之间的交流过去已经多次证明是人类文明发展的里程碑。希腊学习

埃及，罗马借鉴希腊，阿拉伯参照罗马帝国，中世纪的欧洲又模仿阿拉伯，而文艺复兴时期的欧洲则仿效拜占庭帝国。

罗素的这段话是否十分准确，可能有不同看法，但他说：（1）不同文明之间的交流是促进人类文明发展的重要因素；（2）今日欧洲文化是吸收了许多其他民族文化的因素，而且包含了阿拉伯文化的某些成分，这两点无疑是正确的。如果看中国文化的发展，就更可以看到在不同文化之间由于文化原因引起冲突总是暂时的，而不同文化之间的相互吸收与融合则是主要的。

中国在春秋战国时代本来存在着多种不同的地域文化，有中原文化、齐鲁文化、秦陇文化、荆楚文化、吴越文化、巴蜀文化等等，但后来才合成一个大体统一的华夏文化。特别是到公元1世纪初印度佛教文化的传入，更加说明两种不同文化可以共存。印度佛教文化是以和平的方式传入中国的，外来的印度佛教与本土的儒、道两家从来没有因文化的原因发生过战争，只有三次因政治经济的原因有着冲突，当时的朝廷曾对佛教加以打击，但在大多数的时间里，在中国儒、道、释三种文化是同时并存的。一位法国的著名汉学家（施舟人）曾问我：“为什么中国文化是多元性的”。我考虑了一下，我说，我认为也许有两个原因：一是思想观念上的原因，这就是中国一向主张“合而不同”，文化虽可以不同，但能和谐相处，这个问题下面我会较多地说明；二是制度上的原因，中国以皇帝为最高权威，一切文化（宗教、哲学、伦理），都以皇帝的意志为中心，而皇帝往往为了社会的稳定，不希望因不同文化而引起冲突，甚至战争。因此，皇帝常采用“三教论衡”的办法，把儒、道、释召到朝廷上来辩论，哪一派辩论赢了就排在前面，然后是第二、第三。不允许他们之间互相残杀，发动战争。

从以上情况看，根据历史经验，我认为亨廷顿的“文明的冲突”理论无论如何是片面的，而且是为美国战略服务的。他说：“我认为新世界的冲突根源，将不再侧重意识形态或经济，而文化将是截然分隔人类和引起冲突的主要根源。在世界事务中，民族国家仍然举足轻重，但全球政治的主要冲突将发生在不同文化的族群之间，文明的冲突将左右全球政治，文明之间的断层线将成为未来的战斗线。”

虽然亨廷顿的“文明的冲突”论可以说，他敏锐地观察到某一些由于“文明”引起冲突的现象，例如中东地区的巴以冲突、科索沃地区的冲

突，甚至伊拉克战争等等，都包含着某些文化（宗教的和价值观的）的原因，但是分析起来，最基本的发生冲突和发生战争的原因不是由文化引起的，而是由“政治和经济”引起的，巴以冲突是为了争夺地区的控制权，伊拉克战争主要是为了石油，科索沃地区冲突主要是为了大国的战略地位。但是，我们应看到另一方，在不少不同文化之间现在并没有因为文明（文化）的不同而引起冲突，例如中印之间、中俄之间，甚至中欧之间，都在相当长的一个阶段，特别是近十余年里，并没有什么严重冲突，更没有发生过战争。所以“文明的冲突”论并不能正确说明当前世界现存的形势，更不是人类社会发展的前景，而“文明的共存”才应是人类社会的出路，是人类社会必须争取的目标。

为了弄清这个问题，我想也许，我们先了解一下当前是一个什么样的时代。照我看，也许我们正处在一个新的轴心时代。

德国哲学家雅斯贝尔斯曾经提出“轴心时代”的观念。他认为，在公元前500年前后，在古希腊、以色列、印度和中国几乎同时出现了伟大的思想家，他们都对人类关切的问题提出了独到的看法。古希腊有苏格拉底、柏拉图，中国有老子、孔子，印度有释迦牟尼，以色列有犹太教的先知们，形成了不同的文化传统。这些文化传统经过两千多年的发展已经成为人类文化的主要精神财富，而且这些地域的不同文化，原来都是独立发展出来的，并没有互相影响。“人类一直靠轴心时代所产生、思考和创造的一切而生存，每一次新的飞跃都回顾这一时期，并被它重新燃起火焰。自那以后，情况就是这样。轴心期潜力的苏醒和对轴心期潜力的回忆或曰复兴，总是提供了精神动力。”¹⁹例如，欧洲的文艺复兴就是把目光投向其文化的源头古希腊，使欧洲文明重新燃起火焰，而对世界产生重大影响。中国的宋明理学（新儒学）在受到印度佛教文化冲击后，再次回到先秦的孔孟，而把中国本土哲学提高到一个新水平。在某种意义上说，当今世界多种文化的发展很可能是对两千多年前的轴心时代的又一次新的飞跃。那么，我们是否能说当今人类社会的文化正在或即将进入一个新的“轴心时代”呢？我认为，从种种迹象看也许可以这样说。

首先，自二次世界大战以后，由于殖民体系的逐渐瓦解，原来的殖民地国家和受压迫民族有一个很迫切的任务，就是要从各方面确认自己的独立身份，而民族的独特文化（语言、宗教、价值观等等），正是确认其独立身份的重要支柱。我们知道，二战后马来西亚为了强调民族的

统一性，坚持以马来语为国语。以色列建国后决定将长期以来仅仅用于宗教仪式的希伯来语重新恢复为常用语。“任何文化和文明的主要因素都是语言和宗教”。²⁰一些东方国家的领导人和学者为了强调自身文化的特性提出以群体为中心的“亚洲价值”以区别西方的以个体（个人）为中心的所谓“世界价值”。等等，等等。甚至亨廷顿也认识到“非西方文明一般正在重新肯定自己的文化价值”。²¹

其次，公元前500年前后那个轴心时代，正是上述各轴心国进入铁器时代的时候，生产有了大发展，从而产生了一批重要的思想家。而当今进入了信息时代，人类社会又将会有一个大飞跃。我们可以看到，由于经济全球化、科技一体化、信息网络的发展，把世界联成一片，各国、各民族文化的发展将不可能像公元前五六百年那个“轴心时代”是各自独立发展的，而是在矛盾、冲突和互相影响、互相吸收中发展。每种文化对自身文化的了解都会有局限性，“不识庐山真面目，只缘身在此山中”，如果从另外一个文化系统看，也就是说从“他者”看，也许会更全面地认识此种文化的特点。法国学者法朗索瓦·于连《为什么我们西方人研究哲学不能绕过中国》一文中说：“我们选择出发，也就是选择离开，以创造远景思维的空间。在一切异国情调远处，这样的迂回有条不紊。人们这样穿越中国也是为了更好地阅读希腊；尽管有认识上的断层，但由于遗传，我们与希腊有某种与生俱来的熟悉，所以了解它，也是为了发展它，我们不得不割断这种熟悉，构成一种外在观点。”²⁵这种以“互为主观”“互相参照”为核心，重视从“他者”反观自身文化的跨文化研究逐渐为广大中外学者所接受。从另外一种文化来了解自身文化，正是为了继承自己的传统文化，发展自己的传统文化。在这样的情况下，如何保存其文化的特性，传承其文化的命脉，无疑是必须认真考虑的问题。我们知道，经济可以全球化，科技可以一体化，但文化是不可能单一化的。从人类社会发展到今天看，任何文化不受外来文化的影响是不可能的，也是不可取的；但是只有充分发挥其原有文化的内在精神，才可以更好地吸收外来文化以滋养本土文化。正如费孝通先生所说：“在和西方世界保持接触、积极交流的过程中，把我们的好东西变成世界性的好东西。

首先是本土化，然后是全球化。”²⁶这就是说，在吸收外来文化的时候，必须维护我们自身文化的根基。因此，21世纪影响人类社会文化的发展必将既是民族的，又是世界的。

第三，就当前人类社会文化存在的现实情况看，已经形成了或正在

形成全球意识观照下的文化多元化发展的新格局。我们可以看到，也许21世纪将由四种大的文化系统来主导，即欧美文化、东亚文化、南亚文化、中东北非文化（伊斯兰文化），这四种文化不仅都有着很长的历史文化传统，而且每种文化所影响的人口都在十亿以上。当然还有其他文化也会影响21世纪人类社会发展的前途，例如拉丁美洲文化，非洲文化等。但就目前看，这些文化的影响远不及上述四种文化大。人类社会如果希望走出当前混乱纷争的局面，特别要批判文化霸权主义和文化部落主义，在文化上不仅要面对这个新的轴心时代，而且必须不断推动在不同文化传统的国家与民族之间的对话，使每种文化都能自觉地参与解决当前人类社会所面临的共同问题。无疑上述四种文化对当今人类社会负有特别重大的责任。当前人类社会正处在一个重大的历史转折关头，每个民族、每个国家对自身文化，特别是对当前人类文明有重大影响的欧美文化、东亚文化、南亚文化和伊斯兰文化，都应作一历史的严肃、认真的反思，对今后人类社会发展的前途无疑是十分必要的。对任何一个民族和国家来说，特别是对有较长历史而对当今人类社会有着重大影响的民族和国家来说，它的文化传统是已成的事实，是无法割断的，因为其文化传统已深入到这个民族和国家的千百万的人民心中，是这个民族或国家的精神支柱。

我们回到“传统”，以“传统”为起点，并从“传统”中找寻力量、找寻支点，以推进我们文化的发展，来解决当前人类社会存在的问题，就这个意义上说，21世纪也许将由有着很长历史文化传统的欧美文化、东亚文化、南亚文化、伊斯兰文化等推动人类社会进入再次回顾公元两千五百年前那个轴心时代的一个“新的轴心时代”。在这新的轴心时代，存在着不同的文化传统，而且这些文化传统仍然有着雄厚的人口资源基础，是绝不可能被消灭，即使用战争的办法，也只能暂时起一点作用，从长远看，文化仍然必须共存。

三、中国文化能否为“文明的共存”作出贡献？

中国文化要希望对当今人类社会的“文明的共存”作出贡献，必须对自身文化有所了解，这就是要对自身文化有一个“自觉”。所谓“文化自觉”是指在一定文化传统的人群对其自身的文化来历、形成过程的历史以及其特点（包括优点和缺点）和发展的趋势等等能作出认真的思考和反

省。应该说，中华民族正处在民族复兴的前夜，因此我们必须对中国文化有个自觉的认识，必须给中国传统文化一个恰当的定位，认真发掘我们古老文化的真精神所在，以便把我们优秀的文化贡献给当今人类社会；认真反省我们自身文化所存在的缺陷，以便我们更好地吸取其他国家和民族的文化精华，并在适应现代化社会发展的总趋势下给中国文化以现代的诠释，这样我们的国家才能真正地走在世界文化发展的前列，与其他各种文化共同创造美好的新世界。

中国传统文化中主要是儒、道两家，而且我们常说中国文化是儒、道互补的，当然印度佛教传入中国后，它对中国社会和中国文化也发生着重要影响。现在我想讨论一下儒、道两家的思想理论是否能对“文明的共存”提供有意义的资源。

1. 儒家的“仁学”为“文明的共存”提供了有积极意义的资源

《郭店竹简·性自命出》中说：“道始于情”。这里的“道”说的是“人道”，即人与人的关系的原则，或者说社会关系的原则，它和“天道”不同，“天道”是指自然界的运行规律或宇宙的运行法则。人与人的关系是从感情开始建立的，这正是孔子“仁学”的基本出发点。孔子的弟子樊迟问“仁”，孔子回答说：“爱人”。这种“爱人”的思想从何而有呢？《中庸》引孔子的话说：“仁者，人也，亲亲为大。”“仁爱”的精神是人自身所具有的，而爱自己的亲人最根本。但是“仁”的精神不能只停止于此，《郭店竹简》中说：“亲而笃之，爱也；爱父，其继之爱人，仁也。”非常爱自己的亲人，这只是爱，爱自己的父亲，再扩大到爱别人，这才叫作“仁”。“孝之放，爱天下之民”。对父母的孝顺要放大到爱天下的老百姓。这就是说，孔子的“仁学”是要由“亲亲”扩大到“仁民”，也就是说要“推己及人”，要做到“老吾老以及人之老，幼吾幼以及人之幼”，才叫作“仁”。做到“推己及人”并不容易，必须把“己所不欲，勿施于人”“己欲立而立人，己欲达而达人”的“忠恕之道”作为“为仁”的准则。（朱熹《四书集注》：“尽己之谓忠，推己之谓恕。”）

如果要把“仁”推广到整个社会，这就是孔子说的：“克己复礼为仁，一日克己复礼，天下归仁焉。为仁由己，而由人乎哉？”自古以来把“克己”和“复礼”解释为两个平行的方面，我认为这不是对“克己复礼”的好的解释。所谓“克己复礼为仁”是说，只有在“克己”基础上的“复礼”才叫作“仁”。费孝通先生对此也有一解释，他说：“克己才能复礼，复礼是取得进入社会、成为一个社会人的必要条件。扬己和克己也许正是东西方

文化的差别的一个关键。”³⁸我认为这话是很有道理的。朱熹对“克己复礼为仁”的解释说：“克，胜也。己，谓身之私欲也。复，反也。礼者，天理之节文也”云云。这就是说，要克服自己的私欲，以便使之合乎礼仪制度规范。“仁”是人自身内在的品德（“爱生于性”）；“礼”是规范人的行为的外在的礼仪制度，它的作用是为了调节人与人之间的关系使之和谐相处，“礼之用，和为贵”。要人们遵守礼仪制度必须是自觉的，出乎内在的“爱人”之心，才符合“仁”的要求，所以孔子说：“为仁由己，而由人乎哉？”对“仁”和“礼”的关系，孔子有非常明确的说法：“人而不仁如礼何？人而不仁如乐何？”没有仁爱之心的礼乐那是虚伪的，是为了骗人的。所以孔子认为，有了追求“仁”的自觉要求，并把这种“仁爱之心”按照一定的规范实现于日常社会之中，这样社会就会和谐安宁了，“一日克己复礼，天下归仁焉。”我认为，孔子和儒家的这套思想，对于一个国家的“治国”者，对于现在世界上的那些发达国家（特别是美国）的统治集团不能说是没有意义的。“治国、平天下”应该行“仁政”，行“王道”，不应该行“霸道”。行“仁政”“王道”可以使不同文化得以共同存在和发展；行“霸道”将引起文明的冲突，而使文化走向单一化，形成文化霸权主义。如果把孔子的“仁学”理论用于处理不同文明之间的关系，那么在不同文明之间就不会引起冲突，以至于战争，而实现“文明的共存”。

当然，孔子的这套“仁学”理论虽然不能解决当今人类社会存在的“文化的共存”的全部问题，但它作为一种建立在以“仁”为本之上的“律己”的道德要求，作为调节不同文化之间关系的一条准则，使不同文化得以和谐相处无疑仍有一定的现实意义。

要使“不同文化之间”和谐相处，从而使不同文化传统的国家、民族能和平共存，并不是一件容易的事，也许孔子提倡的“和而不同”可以为我们提供极有意义的资源，他说：“君子和而不同，小人同而不和”。他认为：以“和为贵”而行“忠恕之道”的有道德有学问的君子应该做到能在不同中求得和谐相处；而不讲道德没有学问的人往往强迫别人接受他的主张而不能与他人和谐相处。如果我们把“和而不同”用作处理不同文化之间关系的原则，它对于解决当今不同国家与民族之间的纷争，特别是在不同国家与民族之间，因文化上的不同（例如宗教信仰不同，价值观念上的不同）而引起的矛盾、冲突，应有非常积极的意义。

在中国历史上一向认为“和”与“同”是不同的两个概念，有所谓“和同之辨”。《左传·昭公二十年》记载：“公曰：唯据与我和夫！晏子对曰：

据亦同也，焉得为和？公曰：和与同异乎？对曰：异。和如羹焉，水火醯醢盐梅以烹鱼肉，燂之以薪。宰夫和之，齐之以味，济其不及，以泄其过。君子食之，以平其心。君臣亦然。……今据不然。君所谓可，据亦曰可。君所谓否，据亦曰否。若以水济水，谁能食之？若琴瑟之专一，谁能听之？同之不可也如是。”（齐侯说：只有据跟我很和谐啊！晏子回答说：据也只不过和你相同而已，哪里说得上和谐呢！齐侯说：和（谐）和（相）同不一样吗？晏子回答说：不一样。和谐好像做羹汤一样，用水、火、醋、酱、盐、梅，来烹调鱼和肉，再用柴烧煮，厨子加工以调和，使味道适中，味道太浓就加水冲淡。君子食用这样的羹汤，内心平静。君臣之间也是这样。……现在据不是这样。国君认为对的，他也认为对；国君认为不对的，他也认为不对。这就像用水去调剂水，谁能吃它呢？如同琴瑟老弹一个声音，谁能听它呢？不应该同的道理就像这样。）《国语·郑语》：“（史伯曰：）夫和实生物，同则不继。以他平他谓之和平，故能丰长而物归之；若以同裨同，尽乃弃矣。故先王以土与金、木、水、火杂，以成百物。”（实际上和谐才能生长万物，同一就不能发展。把不同的东西加以协调平衡叫作和谐，才能使万物丰盛发展而有所归属；如果把相同的东西相加，用尽之后就只能被抛弃。所以先王把土和金、木、水、火配合起来，做成千百种东西。）可见“和”与“同”是两个不同的概念。“以他平他”，是以相异和相关为前提，相异的事物相互协调并进，就能发展；“以同裨同”，则是以相同的事物叠加，其结果只能窒息生机。中国传统文化的最高理想是“万物并育而不相害，道并行而不相悖。”“万物并育”和“道并行”是“不同”；“不相害”“不相悖”则是“和”。这种思想为多元文化共处提供了取之不尽的思想源泉。

现在西方国家的有识之士都认识到不同文明之间应能共存，而不应因文化上的不同而引起冲突，以至于战争。他们认为，不同的民族和国家应该可以通过文化的交往与对话，在对话（商谈）和讨论中取得某种“共识”，这是一个由“不同”到某种意义上的相互“认同”的过程。这种相互“认同”不是一方消灭一方，也不是一方“同化”一方，而是在两种不同文化中寻找交汇点，并在此基础上推动双方文化的发展，这正是“和”的作用。不同民族和不同国家之间由于地理的、历史的和某些偶然的原因，而形成了不同的文化传统，正因为有文化上的不同，人类文化才是丰富多彩的，而且才在人类历史的长河中形成了互补和互动的格

局。文化上的不同可能引起冲突，甚至战争，但并不能认为“不同”就一定会引起冲突和战争。特别是在今天科学技术高度发展的情况下，如果发生大规模的战争，也许人类将毁灭人类自身。因此，我们必须努力追求在不同文化之间通过对话，实现和谐相处。现在中西许多学者都认识到，通过对话沟通不同文化之间的相互理解的重要性。例如哈贝马斯提出“正义”和“团结”的观念。我认为，把它们作为处理不同民族文化之间关系的原则，是有意义的。哈贝马斯的“正义”原则可理解为，要保障每一种民族文化的独立自主，按照其民族的意愿发展的权利；“团结”原则可理解为，要求对其他民族文化有同情理解和加以尊重的义务。只要不断通过对话和交往等途径，总可以在不同民族文化之间形成互动中的良性循环。⁴⁷不久前去世的德国哲学家伽达默尔提出，应把“理解”扩展到“广义对话”层面。正因为“理解”被提升为“广义对话”，主体与对象（主观与客观或主与宾）才得以从不平等地位过渡到平等地位；反过来说，只有对话双方处于平等地位，对话才可能真正进行并顺利完成。可以说，伽达默尔所持的主体—对象平等意识和文化对话论，正是我们这个时代所需要的重要理念。⁴⁸这种理念，对我们今天如何正确而深入地理解中外文化关系、民族关系等等，具有重要的启示。但是，无论哈贝马斯的“正义”和“团结”原则，或者是伽达默尔的“广义对话论”都要以承认“和而不同”原则为前提，只有承认不同文化传统的民族和国家通过对话可以和谐相处，不同的文化传统的民族与国家才能获得平等的权利和义务，“广义对话”才能“真正进行并顺利完成”。因此儒家以“和为贵”为基础的“和而不同”原则应成为处理不同文化之间的一条基本原则。用“和而不同”原则处理不同文化传统国家与民族之间的关系，不仅对消除矛盾、冲突甚至战争有着正面的积极意义，而且也是推动各国家、各民族文化交流中促使其发展的动力，所以罗素说：“不同文明之间的交流过去已经多次证明是人类文明发展的里程碑。”当今人类社会需要的是不同文化能在相互吸收和融合中发展不同的文化传统的特色，以期达到在新的基础上的“文化的共存”。

2. 道家的“道论”能为防止“文明的冲突”提供有意义的资源

如果说孔子是一位“仁者”，那么老子则是一位“智者”。老子《道德经》一书中，“道”是其基本概念，而“自然无为”（顺应自然的规律，不做违背自然规律的事）是“道”的基本特性，王充《论衡·初稟》：“自然无为，天之道也。”今日人类社会之所以存在着种种纷争，无疑是由于贪

婪地追求权力和金钱引起的。那些强国为了私利，扩张自己的势力，掠夺弱国的资源，实行强权政治，正是世界混乱无序的根源。也就是说帝国霸权正是“文明冲突”的根源。老子提倡“自然无为”。我们可以理解为：不要做（无为）违背人们愿望的事，这样社会才会安宁，天下才会太平。老子说，古代圣人曾经说过：“我无为而民自化，我好静而民自正，我无事而民自富，我无欲而民自朴。”这段话的意思是说：掌握权力的统治者不应该对老百姓作过多的干涉（无为），不要扰乱老百姓的正常生活（好静），不要做违背老百姓意愿的事（无事），不要贪得无厌地盘剥老百姓（无欲），这样老百姓就会自己教化自己（自化），自己走上正轨（自正），自己富足起来（自富），自己生活朴素。如果我们对这一段话给以现代诠释，那就不仅可以使一个国家内部安宁，而且对消除不同文明之间的冲突无疑有着重要意义。对这段话我们可以作如下诠释：在国与国之间对别国干涉越多，世界必然越加混乱。大国强国动不动用武力或武力相威胁，世界越是动荡不安和无序。大国强国以帮助弱国小国为名而行掠夺之实，弱国小国越加贫穷。发达国家以越来越大的欲望争夺世界财富和统治权，世界就会成为一个无道德的恐怖世界。据此，我认为“无为”也许对新帝国的领导者是一副治病良方，如果他们能接受，将会使世界得以和平和安宁。然而“新帝国”往往以干涉、掠夺、武力等等“有为”（为所欲为）手段来对待其他国家与民族，这无疑都是由其帝国贪欲本性造成的。老子认为：“祸莫大于不知足，咎莫大于欲得，故知足之足，常足矣。”（祸害没有比过于不知道满足的了，罪过没有比过于贪得无厌的了，知道满足的人，永远是满足的。）“新帝国”不正是“不知道满足的”“贪得无厌的”吗？老子还说：“天之道，其犹张弓欤？高者抑之，下者举之；有余者损之，不足者补之。天之道，损有余而补不足，人道则不然，损不足以奉有余。”（“天道”不就像张弓射箭吗？高了就把它压低一点，低了就把它升高一点，有余的加以减少，不足的加以补充。“天道”的规律是减少有余的，用来补充不足的。“人道”则不一样啊，往往要剥夺不足的，而用来供奉有余的）。为什么今日世界人类社会处在一种十分混乱不安定的状态？这完全是由人自身造成的，特别是那些“新帝国”的领导者造成的，他们违背了“天道”，他们失去了“人心”，他们奉行的是“损不足以奉有余”，这不正是今日世界不断发生矛盾、冲突、战争的根源吗？从这里我们可以看到，“文明冲突”论与其背后所隐蔽的“新帝国”论是有着密切联系的。

为了社会的和平和安宁，老子强烈地反对战争。《道德经》第三十一章中说：“夫兵者，不祥之器，物或恶之，故有道者不处。”（打仗用兵是不吉祥的东西，大家都厌恶它，所以有道德的人不使用它。）战争总要死人，总要破坏生产，总要使社会秩序被破坏，所以老子认为它不是什么好东西，老百姓都讨厌它，有道德的国家领导人是不使用战争的办法解决问题的。老子又说：“以道佐人主者，不以兵强天下，其事好还。师之处，荆棘生焉。大军之后，必有凶年。”（我们应该用道德来告诫领导者，不要用兵力逞强于天下。用兵这件事一定会得到报应。军队所到的地方，就会破坏一切，使荆棘丛生。大战之后，一定会是荒年。）我们反观各国历史，无不如此，在我国每次大战之后往往出现：人口大量减少，土地荒芜，生产破坏，盗贼多有。两次世界大战的结果是如此，当前的中东地区的战争也是如此。哪个新帝国的领导者到处发动战争，其结果处处陷入被动，这是因为被征服的国家的老百姓不服，他们会用不怕死来抗争，所以老子说：“民不畏死，奈何以死惧之。”（老百姓不怕死，用死来威胁他们又有什么用呢？）所以老子说：“夫乐杀人者，则不可得志于天下矣。”（喜欢杀人的人，就不能在天下成功）。我们从历史上看到，发动战争的人，虽然一时可以得逞，但最终总要失败，而落得身败名裂，希特勒是一个例子，日本军国主义也是一个例子。老子是一个“智者”，他用他的智慧能看到事物的相反方面，他说：“祸兮，福之所倚；福兮，祸之所伏。”（灾难，好运常常紧靠在它旁边；好事，灾祸往往会潜伏在它里面。）现在有些国家的人民正在受着苦难，这也就正是为他们将来的民族复兴准备了条件。从我们国家的百年历史来看，正是我们在处处挨打之后，我国的人民才有了觉醒，今天我们可以说，中华民族正处在民族复兴的前夜。我想，世界各国、特别新帝国的领导者应从《道德经》中吸取智慧，认识强权政治、霸权主义从长期的世界历史发展看是没有前途的。因此，我认为老子思想对消解“文明的冲突”论、新“帝国论”是十分有价值的理论。我们拥护“文明的共存”论、赞成老子的“无为”思想，以期待今日人类社会能处在一和平、安宁、共同发展、共同富裕的大同世界之中。当然，两千多年前的老子思想不可能全然解决当今人类社会的问题（包括各民族之间的矛盾、冲突等问题），但是他的智慧之光对我们应有重要启示。我们应该做的事，是如何把他的思想中的精华加以发掘和发挥，并给以现代的诠释，使之有利于人们从古代的思想文化的宝库中得到某些宝贵

启示。

在不同民族和国家之间，由于宗教信仰的不同、价值观念的不同、思维方式的不同可以引起冲突，甚至可以由冲突导致战争。但是，是否必然要引起冲突，能不能化解冲突、使之不因文化的不同而导致战争，这就需要我们各个不同民族的文化中找出可以使文明共存的资源，用以消解不同文明之间可以引起冲突的文化因素。如上所述，中国文化中的儒道两家可以为化解“文明的冲突”，并能为“文明的共存”提供有意义的资源。我相信，各民族、各国家的文化同样可以为化解“文明的冲突”，并能为“文明的共存”提供有价值的资源。在人类文明进入到21世纪之时，是用“文明冲突”的理论来处理各民族、各国家之间的问题，还是用“文明共存”的理论来引导人类社会走向和平共处，这是我们当前必须认真考虑和慎重选择的问题。反对“文明冲突”论，倡导“文明共存”论，这无疑是人类社会的福祉。《尚书·尧典》中说：“协和万邦。”中华民族和其他许多民族一样是一伟大的民族，有着悠久的灿烂光辉的历史文化传统，它的文化对人类社会无疑是极为宝贵的财富。我们对这笔财富应善于利用，使之对当前人类社会争取“和平共处”，实现不同文化之间的协调共存，推进世界各种文化之间的交流，作出应有的贡献。

X . THE COEXISTENCE OF CULTURAL DIVERSITY: SOURCES OF THE VALUE OF HARMONY IN DIVERSITY

I . Introduction

Though one cannot say that present world conflicts are mainly the result of cultural clashes, they certainly are related to clashes between cultures. A debate taking place in the world over cultural clashes and cultural coexistence might lead to greater mutual understanding, tolerance, and peace or, as a result of cultural isolation and hegemony, to political clashes. In either case, this debate will affect the destiny of humankind in the 21st century. Owing to the collapse of colonialism after the end of World War II, Western cultural imperialism gradually faded, and greater cultural diversity emerged in the world. In the past half century, developments in world trade and communication have led to ever more frequent cultural interactions between different peoples, nations, and regions, and have made the world an increasingly indivisible whole. In the present stage of world culture, two different tendencies have arisen: some Western theoreticians, seeking to protect their traditional interests and customs, continue to maintain a Western-centric perspective; others, adopting an indigenous romantic feeling toward an independent or revitalized people, create a nationalism that seeks to return to roots and preserve native culture, and a conservatism that seeks to return to past traditions. Some East Asian scholars, looking at the suffering wrought by Western culture throughout the world and the oppression

that they personally suffered, even suggest a cultural perspective focused on East Asia. A great problem that we presently face is how we can prevent these two conflicting tendencies from developing into a large-scale confrontation and how we can dispel confrontations that do arise. At the same time, we must be careful about conflicts that may arise between the West and East Asia owing to differences in cultures and traditions.

II . Harmony in Diversity

How do we enable peoples, nations, and regions of different cultural traditions to develop together while remaining different, and in this way create a globally conscious environment for the development of cultural diversity? I think that the Chinese principle of harmony in diversity (*he er butong*) provides us with a source of positive value for doing precisely this.

The *Zuo Commentary on the Spring and Autumn Annals* for the 20th year of Duke Zhao of Lu (522 BC), records the following conversation between Jing, marquis of Qi, and Yan Ying: The marquis of Qi said to Yan Ying, "Does only Liangqiu Ju (an official close to the marquis) act in harmony with me?" Yan Ying replied, "Ju conforms. How do you get harmony (*he*) from conformity (*tong*)?" The marquis said, "Is harmony different from conformity?" Yan Ying replied, "Yes. Harmony is like the blending of ingredients of a good soup. The chef uses various condiments to cook a thick meat soup over a blazing fire, blending them together, adjusting the flavor, adding to make up for deficiencies, and draining off excesses. The gentleman eats the soup to calm his mind. The relation between ruler and minister is similar. . . . Now Ju does not operate like this. Whatever you approve, Ju also approves, and whatever you reject, Ju also rejects. This is like adding water to water. Who can eat such 'soup'? Again, this is like a zither that can produce only one note. Who can listen to such 'music'? In all such cases, sameness/conformity (*tong*) is unacceptable." Also,

Discourses of the States (Guoyu), in the chapter "Discourses of Zheng," has Shi Bo's reply to Duke Huan of Zheng (771 BC): "Now blending (*he*) various substances can in fact produce many things, whereas things of the same (*tong*) substance do not maintain well. Balancing one substance with another is called blending. Things so produced are rich and long-lasting, and substances naturally come together in this fashion. Supplementing one substance with the same substance produces nothing but rubbish. Thus the kings of the past had clay mixed with metal, wood, water, and fire to produce ceramics of all kinds." These two passages make clear that *he* and *tong* are completely different in meaning. Confucius said this even more clearly: "The man of virtue harmonizes without conforming (*he er butong*). The narrow-minded man conforms without harmonizing (*tong er buhe*)" (*Analects*, "Zilu"). From the passages above, one can see that the significance of "harmony in diversity" (*he er butong*) is that when two different cultural traditions achieve a common understanding through cultural intercourse and dialog, they are in some sense attaining a commonality from their diverse perspectives. This commonality consists not of one side vanquishing the other side, nor of one side converting the other side, but of finding points in common in the two different traditions and on this foundation advancing both traditions. Precisely herein lies the power of harmony. We can see this effect in the development of Chinese culture. Confucians sought to establish propriety and create music to actively maintain (*you wei*) the harmony of society. Daoists, in contrast, sought to follow nature to passively maintain (*wu wei*) peace in society. These two originally very different cultural traditions, over the course of nearly two thousand years of development, achieved a certain common understanding through continuous dialog. In the Western Jin period (265-316), Guo Xiang, in an effort to harmonize the Confucian and Daoist traditions, proposed that active administration of government (*you wei*) is a form of passive administration of government (*wu wei*). In a comment on "Autumn Floods" in the *Zhuangzi*, he wrote, "Can men, in eking out a living,

forego plowing with oxen or riding horses? In plowing with an ox and riding a horse, can one avoid ringing the ox in the nose or bridling the horse? The ox does not resist being ringed in the nose, and the horse does not resist being bridled, because Heaven wills it. If this is mandated by Heaven, then though these beasts of burden are placed in the service of man, this circumstance is rooted in the will of Heaven." The point of this passage is that though the ox is ringed in the nose, and the horse is bridled, through the active efforts (*you wei*) of man, these relations conform to what is natural (*wu wei*). Both Confucians and Daoists could accept this perspective of Guo Xiang even though this view does not fit squarely within either the original Confucian or original Daoist tradition. Active engagement (*you wei*) and passive following (*wu wei*) are quite different concepts. If both perspectives are to be accepted to some extent, both sides must find, through a process of negotiation, points of commonality (points of harmony). These points of commonality can serve as universal principles that both sides can accept. These universal principles are principles that both sides can accept without their negating the distinguishing features of either side. This state of affairs would indeed be a case of harmony in diversity.

We can also illustrate the significance of harmony in diversity with developments resulting from the encounter of traditional Chinese culture and a foreign cultural tradition. Originally, Indian Buddhist culture and traditional Chinese culture (Confucianism, Daoism, etc.) were quite distinct, but from the Han (202 BC-220 AD) to Tang (618-907) dynasties, Chinese culture continuously strove to accept and adapt the quite alien culture of Buddhism, and Indian Buddhism, for its part, continuously strove to change aspects of itself ill-suited to the demands of Chinese society. As a result, during the nearly one thousand years in which Indian Buddhism was transmitted to China, Chinese culture highly benefited from Indian Buddhism. Indian Buddhism profoundly influenced Chinese philosophy, literature, art, architecture, and popular customs. At the same time, Indian Buddhism

was able to promote and perfect itself throughout the immense Chinese empire. During the Sui(581-618) and Tang dynasties, for example, there formed several more Sinitic sects of Buddhism (the Tiantai sect, Huayan sect, and Chan sect). Yet Chinese culture remained Chinese culture and did not lose its distinctive features because it adopted Indian Buddhism. Such cultural exchange and mutual influence serve as an excellent illustration of the principle of harmony in diversity. As a matter of fact, the development of European culture also exemplifies this principle. Bertrand Russell, in *The Problem of China* (1922), wrote, "Contacts between different civilizations have often in the past proved to be landmarks in human progress. Greece learnt from Egypt, Rome from Greece, the Arabs from the Roman Empire, medieval Europe from the Arabs, and Renaissance Europe from the Byzantines." The reason that one culture could adopt another culture was often because the notion of harmony in diversity was embedded in the interactions and negotiations of the two cultures.

III . Commonalities across Cultural Traditions

There are various circumstances under which the principle of harmony in diversity appears in the interactions of two different cultural traditions. One is that in the negotiations between cultures, the two cultures discover that they have similar concepts. For example, Christianity has the concept of love for humanity, Buddhism has the concept of compassion, and Confucianism has the concept of concern for the masses. In an abstract sense, all of these concepts signify love. Love can thus serve as a universal principle that all these different cultural traditions can accept. At the same time, love for humanity, compassion, and concern for the masses are concepts that preserve the distinct features of their respective traditions. Another circumstance is that one culture, in its intercourse with another culture, discovers that it lacks important ideas present in the latter

culture, and that these ideas can be accepted into the former culture. By accepting the new ideas through cultural interaction, transforming them, and fitting them into its culture, the receiving culture can enrich itself. For example, China originally lacked a clear notion of sudden enlightenment, but by the Song (960-1279) and Ming (1368-1644) dynasties, Cheng Hao, Cheng Yi, and Zhu Xi had adopted the notion of sudden enlightenment into their Rational School of Neo-Confucianism, as did Lu Jiuyuan and Wang Shouren (Yangming) in their School-of-Mind Neo-Confucianism. A third circumstance is that one culture, in its intercourse with another culture, discovers that it lacks significant ideas present in the latter culture, and that though these new ideas are incompatible with some ideas of the receiving culture, interactions with the other culture force it to forsake the old ideas and accept the new foreign ideas in order to develop. For example, after the idea of democracy penetrated China, it had to give up such traditional notions as the "three guides" (*san'gang*: the ruler guides the minister, the father guides the son, and the husband guides the wife). A fourth circumstance is that in the interaction of two or more cultures, these cultures discover, through repeated discussions, significant new ideas previously missing in their cultures—ideas such as peaceful coexistence and the coexistence of cultural diversity—that, when incorporated into a system of diverse cultures, are undoubtedly significant for the individual cultures. There may, of course, be other circumstances leading one culture to adopt ideas from another, but here I will say no more. When, as described above, different cultures create commonalities by harmonizing their differences, when they find common principles in their differences, when they find common understanding in their different circumstances, such indeed is realizing harmony in diversity through cultural interaction and negotiation.

IV . Regional Diversity and the Bidirectional

Nature of Cultural Selection

In this discussion of harmony in diversity as a principle of intercourse between different cultures, there are two other points worth noting. One is the issue of regional differences in cultural development. The other is the bidirectional nature of culture selection. Having persisted for a long period or having encountered some special cause, a culture may decline or even die out in one particular region or among a particular people and continue to develop in another region or among another people. For example, Buddhism, having been transmitted in India down to the fifth and sixth centuries, stagnated, but in China, having absorbed aspects of Chinese culture and having been developed at the hands of eminent monks during the Sui and Tang dynasties, it became more Sinified. Then from China it was transmitted to the Korean peninsula and Japan, where it blended in with the local cultures. In Japan especially, there developed some distinctly local sects of Buddhism. This is why I say that Chinese culture benefited from Indian Buddhism, and that Indian Buddhism was promoted and perfected in China. Such regional differences in development occurred not only in China but also in Europe. As Russell said in the passage quoted above, present-day European culture arose in Egypt, was transmitted to Greece, passed through Rome and Arabia, and reentered Europe. Such regional development of culture thus laid down the "landmarks in human progress." The reason for such development is that when culture *a* is transplanted within culture *b*, it may acquire aspects of culture *b*. These acquired aspects may be originally lacking in culture *a* or may have not received much development. After being added to culture *a*, these aspects then lead culture *a* to be developed within culture *b*. Such cultural development is perfectly consistent with the principle of harmony in diversity and is a good example of the idea that "blending various substances can in fact produce many things, whereas things of the same substance do not maintain well" ("Discourses of Zheng").

As for the bidirectional nature of culture selection, as we know, it is not the case that any alien culture transmitted to a region or a people at any time and under any circumstances will always be accepted and developed. For example, during the Sui and Tang dynasties, not only did Buddhism have a tremendous influence on Chinese society; "Buddhist sutras were over ten times more common among the populace than Confucian classics" (*Sui Shu* [*Book of Sui*], "Jingji Zhi" [Treatise on Classics and Books]). At this time Nestorianism (a type of Christianity) was transmitted to China and had a degree of influence, yet it could not establish itself. This failure was due to the bidirectional nature of culture selection. Even different sects of Indian Buddhism fared differently in China. For instance, Esoteric (Tantric) Buddhism flourished for a while in the area of Han society after the mid-Tang—a fact verified by the relics excavated from the underground palace at Famen Temple. But later, Esoteric Buddhism fell into decline and had little lasting influence on Han society. Yet in Tibet, Indian Esoteric Buddhism blended in with the local religion to produce Tibetan Buddhism, which has persisted down to the present as the religion of Tibetans. What brought about this difference? The first type of Buddhism to enter the area of Han society consisted of the Theravada meditation techniques associated with An Shigao (birth date unknown). Later, Lokaksema (b. c. 147 AD) brought Prajñā Buddhism to China. From the Jin Dynasty (265-420) on, the form of Buddhism that spread in China was Prajñā Buddhism, not the Theravada meditation techniques. The reason was that PrajñāBuddhism was similar to Neo-Daoism (whose core teachings were those of Laozi and Zhuangzi); that Chan Buddhism (which developed during the Tang Dynasty after Prajñā Buddhism was adopted during the Eastern Jin Dynasty (317-420) and the Southern Dynasties (420-589) was different from Indian meditation techniques, its philosophical foundation arising from Prajñā Buddhism; and that Chan Buddhism adopted not only some elements of Daoism but also some elements of Confucianism in order to adapt to the needs of

Chinese society. Here we see mutual selection between cultures. Moreover, such mutual selection between cultures is another typical manifestation of the principle of harmony in diversity.

V . Conclusion

In the early Tang period, Xuanzang (602-664) propagated the Consciousness-Only School of Thought, but this school of thought lasted only some thirty years. The reason that it was not respected by the Chinese is that this mode of thought was thoroughly Indian in style, and thus quite different from the Chinese manner of thinking. In contrast, Chan Buddhism spread quickly from the mid-Tang on because Chan thought was similar to Chinese thought and jelled into a Sinified sect of Buddhism. It then went on to influence the Rational School of Neo-Confucianism during the Song and Ming dynasties. This shows that in the intercourse between two different cultures, there is often mutual selection, and this mutual selection is to some extent a manifestation of the principle of harmony in diversity. For only if there is diversity between cultures can there be selection among diverse elements. If the thought of two cultures is entirely the same, there is nothing to select, and thought that is completely alike cannot add to preexisting thought any new ideas, and so cannot stimulate or promote the development of the preexisting culture. We can thus see that the principle of harmony in diversity has great significance for the mutual selectivity of interacting cultures.

We have seen that the principle of harmony in diversity can spur healthy cultural exchange and promote rational development of culture, in accord with the present world trend toward cultural diversity. If we want Chinese culture to develop for the better, if we want it to make a contribution to future world civilization, then we must approach the culture of other peoples, nations, and regions with an attitude of harmony in diversity, sufficiently absorb the achievements of other cultures, and renew our own traditional culture

so that we can create a new culture suited to modern social life.

拾 文化的多元共处——“和而不同”的价值资源*

今日世界的纷争虽然不能说主要是由文化之冲突引起的，但也决非与文化冲突无关。因此，关于文化冲突与文化共处的讨论正在世界范围内展开，是增强不同文化间相互理解和宽容而引向和平，还是因文化隔离和霸权而导致政治冲突，将影响着21世纪人类的命运。自从第二次世界大战结束之后，由于殖民体系的瓦解，文化上的“西方中心论”也逐渐随之消退，世界文化呈现出多元发展的趋势。近半个世纪以来，世界经济贸易、信息传递的发展，使民族与民族、国家与国家、地域与地域之间文化上的交往越来越频繁，世界日益成为一个不可分割的整体。目前，在世界文化发展中，出现了两股不同方向的文化潮流：某些西方国家的理论家从维护自身传统利益或传统习惯出发，仍然坚持“西方中心论”。与此同时，某些取得独立或复兴的民族，抱着珍视自身文化的情怀，形成一种返本寻根、固守本土文化的民族主义和回归传统的保守主义。甚至某些东方学者鉴于两个世纪以来西方文化对世界造成的灾难和自身所曾受到的欺压，而提出文化上的“东方中心论”。如何使这两股相悖的潮流不致发展成大规模的对抗，并得以消解，实是当前一大问题。同时，我们还须注意，在西方国家与民族、东方国家与民族之间由于文化传统的不同也会引起纷争和冲突。

如何使不同文化传统的民族、国家和地域能够在差别中得到共同发展，以便造成在全球意识下文化多元化发展的新形势呢？我认为中国的“和而不同”原则可能为我们提供有正面价值的资源。

《左传·昭公二十年》记载有齐侯与晏婴的一段对话，齐侯对晏婴说：“唯据与我和夫！”（按：“据”指梁丘据，齐侯侍臣）晏子对曰：“据亦同也，焉得为和？”公曰：“和与同异乎？”对曰：“异。和如羹焉，水火醯醢盐梅以烹鱼肉，燂之以薪。宰夫和之，齐之以味，济其不及，以泄其过。君子食之，以平其心。君臣亦然。……今据不然。君所谓可，据亦曰可。君所谓否，据亦曰否。若以水济水，谁能食之？若琴瑟之专

一，谁能听之？同之不可也如是。”又据《国语·郑语》，有史伯回答桓公的一段话说：“夫和实生物，同则不继。以他平他谓之和，故能丰长而物归之；若以同裨同，尽乃弃矣。故先王以土与金、木、水、火杂，以成百物。”这都说明，“和”与“同”的意义全不相同。孔子说得更为明确，他说：“君子和而不同，小人同而不和。”（《论语·子路》）从以上的几段话看，“和而不同”的意思是说，要承认“不同”，在“不同”基础上形成的“和”（“和谐”或“融合”）才能使事物得到发展。这种“同”不是一方消灭一方，也不是一方“同化”另一方，而是在两种不同文化中寻找交汇点，并在此基础上推动双方文化的发展，这正是“和”的作用。我们可以用中国文化自身发展为例：儒家要求“制礼作乐”，即要求“有为”以维护社会的和谐；道家追求“顺应自然”，即要求“无为”以保持社会安宁。它们本是两种很不相同的思潮，但经过近千年的发展，在不断对话中，取得了某种共识。到西晋，有郭象为调和孔老，提出了“有为”也是一种“无为”。在《庄子注·秋水》中有一段郭象的注说：“人之生也，可不服牛乘马乎？服牛乘马，可不穿落之乎？牛马不辞穿落者，天命之固当也。苟当乎天命，则虽寄之人事，而本在乎天也。”这里的意思是说，虽然“穿牛鼻”“落马首”是通过“人为”（人事）来实现，但它本来就是合乎“顺自然”的。郭象的这一观点，既是儒家可以接受，也是道家可以接受，但它又不全然是原来儒家和原来道家的思想了。“有为”（人为）和“无为”（天然）本不相同，但要使两者的意义都在某种程度上被容纳，就必须在商讨中找到交汇点（和），所找到的交汇点就可以成为双方能接受的普遍性原则，它并不要抹煞任何一方特点，而使双方能接受，这无疑体现了“和而不同”的思想的。

我们还可以用中国历史上中国传统文化与外来文化相遇后发生的情况为例，说明“和而不同”的意义。本来印度佛教文化与中国传统文化（如儒家、道家等）是两种很不相同的文化，但从汉到唐的几百年中，从中国文化自身方面说，一直在努力吸收和融化佛教这种异质文化；从印度佛教方面说，则一直在致力于改变着不适应中国社会要求的方面。因此，在印度佛教传入中国的近千年的历史中，中国文化在许多方面受惠于印度佛教。印度佛教深刻地影响着中国哲学、文学、艺术、建筑以及民间风俗习惯诸多方面。同时，印度佛教又在中国这块大地上得到了发扬光大，在隋唐形成了若干中国化的佛教宗派（如天台、华严、禅宗等）。然而中国文化仍然是中国文化，并未因吸收了印度佛教文化而失

去其特色。这种文化上的交流和互相影响，可以说是很好地体现了“和而不同”的原则。其实欧洲文化的发展也可以说明这一点。在罗素1922年写的《中西文明之比较》中有这样一段话：“不同文明之间的交流过去已经多次证明是人类文明发展的里程碑。希腊学习埃及，罗马借鉴希腊，阿拉伯参照罗马帝国，中世纪的欧洲又模仿阿拉伯，而文艺复兴时期的欧洲则仿效拜占庭帝国。”一种文化之所以能吸收他种文化，往往是在两种文化交往和商谈中体现“和而不同”思想的结果。

在不同文化传统的交往中体现“和而不同”的原则可能会有多种情况：一种情况是，在商谈中发现不同文化原来有相近或相似的观念，如在基督教中有“博爱”，在佛教中有“慈悲”，在儒家中有“泛爱众”，从抽象的意义上讲都是“爱”，“爱”就可以成为不同文化传统都可以接受的普遍原则。同时“博爱”“慈悲”“泛爱众”仍然保留其各自不同的特点。另一种情况是，在文化交往中发现此种文化不具有另一种文化某些重要观念，但另外那种文化中的这些观念和此种文化并非不能相容，这样就可以在交往中接受这些新的观念，并经过改造而逐渐使之融化在此种文化之中，从而丰富此种文化的内容。例如，在中国原来并没有明确的“顿悟”的观念，但到宋明时代，程朱理学和陆王心学都在某种程度上接受了“顿悟”的观念，使之融化在他们的体系之中。第三种情况是，在文化的交往中会发现，此种文化不具有彼种文化中的某些有意义的观念，而且这些有意义的观念和此种文化的某些观念不相容，从而在交往中不得不放弃此种文化中的某些旧观念，而接受外来的新观念，致使此种文化得到发展。例如在西方“民主”思想输入中国之后，中国人不得不放弃过去传统中的“三纲”等旧观念。第四种情况是，在两种或多种文化的交往中，经过反复的交谈会发现，双方或多方都未曾有过的，然而十分有意义的新观念，例如“和平共处”“文化多元共处”等观念，把这些观念引入不同文化体系中，无疑对各种文化都是有意义的。当然还会有其他种种不同情况，兹不赘述。上述不同传统文化之间因其“不同”通过“和”（调和；协调）的作用而达到某种“同”，在“不同”中找到可以共同接受的原则。

在讨论“和而不同”作为不同文化之间交往的原则时，似乎还有两点可以注意：一是文化的异地发展问题；另一是文化的双向选择问题。一种文化在一地（或一民族）发展日久或者遇到某种特殊的原因，会出现某种衰退甚至断绝的现象，而往往会在其传到另一地区（或民族）得到

发展，例如佛教在印度传到五、六世纪，以后似乎没有什么重大发展，但佛教在中国隋唐时期（七、八、九世纪），由于吸收了中国文化的某些方面而为中国的高僧大德发展了，形成了中国化的佛教宗派，并通过中国传到朝鲜半岛和日本，于是又和当地文化相结合，特别是在日本又创造了日本独特的佛教派别。所以我常说：“中国文化曾受惠于印度佛教，印度佛教又在中国得到发扬光大。”这种文化的异地发展的现象不仅发生在亚洲，而且也发生在欧洲。如前引罗素所说，今日欧洲的文化是由埃及而到希腊，中经罗马、阿拉伯再回到欧洲，正是这种文化的异地发展，形成了“人类文明发展的里程碑”。究其原因，甲种文化移植到乙种文化中往往会给甲种文化增加某些新因素，这些新因素或者是甲种文化原来没有的，或者是在甲种文化中没有得到充分发展的，它们加入甲种文化，从而使甲种文化在乙种文化中得到发展。这种情况正符合文化发展的“和而不同”原则，这正是“和实生物，同则不济”的体现。

关于“文化的双向选择”问题，我们知道，并不是任何异质文化传到某一地区（或民族）在任何时候和任何情况下都会被接受和得到发展。例如在隋唐时期不仅佛教对中国社会有着重大影响，《隋书·经籍志》中说：“佛经在民间数十百倍于儒经”。这一时期景教（基督教的一种）也曾传入中国，并产生过一定影响，但最终并未在中国站住脚，这就有个文化的双向选择问题。不仅如此，就是印度佛教的宗派在中国的命运也不相同。例如密教（密宗）在唐中期以后在中国汉地曾盛极一时，这点我们可以从扶风法门寺地宫出土文物得到证实，但以后密宗衰落了，在汉地几乎没有什么影响，可是印度密教在中国西藏地区与当地苯教结合而形成藏地佛教，它一直到现在仍是藏族人民信仰的宗教。这是为什么呢？就汉地佛教说，最初传入的是小乘禅法安世高系，其后支娄迦谶把般若学随之传入中国。自晋以后在中国流行的是般若学，而非小乘禅法。究其原因，盖因般若学与以老庄学说为骨架的玄学相近，而在东晋南朝选择了般若学，在唐朝发展起来的禅宗也并非印度禅法，而其思想基础仍可说是般若一支，且禅宗无疑不仅吸收了某些老庄思想，而且为适应中国社会的需要也吸收了某些儒家思想。这就看出，在文化间确存在着一种“双向选择”问题，而这种“双向选择”也是“和而不同”原则的另一种体现。

我们还可以看到，在唐初虽有玄奘大师宣扬佛教唯识学，但此学在中国唐朝仅流行了三十余年，就不为中国人所重视，这是因为唯识学的

思维模式完全是印度式的，与中国的思维模式大不相同。然而禅宗在唐中叶以后却很快流行了，这正因为禅宗的思维模式较接近于中国，成为中国化的佛教宗派，并影响着宋明理学。这说明，在不同文化交流中，文化之间常常存在着“双向选择”的问题，而这种“双向选择”也是在一定程度上表现着“和而不同”的原则。盖因文化之间总有“不同”，才有“选择”问题，如果是完全相同的思想，那就无所谓“选择”了，而且完全相同的思想的传入，对原有思想文化不会增加什么新的因素，因而也就不能刺激和推动原有文化的发展，可见“和而不同”原则对文化的“双向选择”有着非常重要的意义。

我们把“和而不同”看作是推动文化健康的交流，促进文化合理的发展的一条原则，这正符合当前世界文化多元化发展的趋势。如果我们希望中国文化得到更好的发展，如果我们希望中国文化今后能对人类文明有所贡献，就必须以“和而不同”的态度对待其他民族、国家、地域的文化，充分吸收它们的文化成果，更新自己的传统文化，以创造适应现代社会生活的新文化。

39 In this context, I translate this saying as "Harmony in Diversity," instead of "Unity in Diversity" —the latter is another popular translation of this term. Tong (同) means Agreement when applied on human relationships, or Sameness/Homogeneity on material objects. Thus the translator would use different translations according to the contexts, and translate "不同" as diversity, disagreement, or heterogeneity, etc. —Translator's note

40 《论语·子路》：“君子和而不同，小人同而不和。” Cf. *The Analects*, Chapter 12.—Translator's note

41 In ancient Chinese philosophy, Metal, Wood, Water, Fire and Earth are Five Processes(五行), i.e. five basic elements, to make up the world. —Translator's note

42 《国语·郑语》：“（史伯曰：）夫和实生物，同则不继。以他平他谓之和，故能丰长而物归之；若以同裨同，尽乃弃之。故先王以土与金、木、水、火杂，以成百物。”—Translator's note

43 《中庸》：“万物并育而不相害，道并行而不相悖。”Cf. *The Doctrine of the Mean*, Chapter 30. —Translator's note

“博雅双语名家名作”出版说明

1840年鸦片战争以降，在深重的民族危机面前，中华民族精英“放眼世界”，向世界寻求古老中国走向现代、走向世界的灵丹妙药，涌现出一大批中国主题的经典著述。我们今天阅读这些中文著述的时候，仍然深为字里行间所蕴藏的缜密的考据、深刻的学理、世界的视野和济世的情怀所感动，但往往会忽略：这些著述最初是用英文写就，我们耳熟能详的中文文本是原初英文文本的译本，这些英文作品在海外学术界和文化界同样享有崇高的声誉。

比如，林语堂的*My Country and My People*（《吾国与吾民》）以幽默风趣的笔调和睿智流畅的语言，将中国人的道德精神、生活情趣和中国社会文化的方方面面娓娓道来，在美国引起巨大反响——林语堂也以其中国主题系列作品赢得世界文坛的尊重，并获得诺贝尔文学奖的提名。再比如，梁思成在抗战的烽火中写就的英文版《图像中国建筑史》文稿（*A Pictorial History of Chinese Architecture*），经其挚友费慰梅女士（Wilma C. Fairbank）等人多年的奔走和努力，于1984年由麻省理工学院出版社（MIT Press）出版，并获得美国出版联合会颁发的“专业暨学术书籍金奖”。又比如，1939年，费孝通在伦敦政治经济学院的博士论文以*Peasant Life in China—A Field Study of Country Life in the Yangtze Valley*为名在英国劳特利奇书局（Routledge）出版，后以《江村经济》作为中译本书名——《江村经济》使得靠桑蚕为生的“开弦弓村”获得了世界性的声誉，成为国际社会学界研究中国农村的首选之地。

此外，一些中国主题的经典人文社科作品经海外汉学家和中国学者的如椽译笔，在英语世界也深受读者喜爱。比如，艾恺（Guy S. Alitto）将他1980年用中文访问梁漱溟的《这个世界会好吗——梁漱溟晚年口述》一书译成英文（*Has Man a Future? —Dialogues with the Last Confucian*），备受海内外读者关注；此类作品还有徐中约英译的梁启超著作《清代学术概论》（*Intellectual Trends in the Ch'ing Period*）、狄百瑞（W. T. de Bary）英译的黄宗羲著作《明夷待访录》（*Waiting for the Dawn: A Plan for the Prince*），等等。

有鉴于此，外语教学与研究出版社推出“博雅双语名家名作”系列。

博雅，乃是该系列的出版立意。博雅教育（Liberal Education）早在古希腊时代就得以提倡，旨在培养具有广博知识和优雅气质的人，提高人文素质，培养健康人格，中国儒家六艺“礼、乐、射、御、书、数”亦有此功用。

双语，乃是该系列的出版形式。英汉双语对照的形式，既同时满足了英语学习者和汉语学习者通过阅读中国主题博雅读物提高英语和汉语能力的需求，又以中英双语思维、构架和写作的形式予后世学人以启迪——维特根斯坦有云：“语言的边界，乃是世界的边界”，诚哉斯言。

名家，乃是该系列的作者群体。涵盖文学、史学、哲学、政治学、经济学、考古学、人类学、建筑学等领域，皆海内外名家一时之选。

名作，乃是该系列入选标准。系列中的各部作品都是经过时间的积淀、市场的检验和读者的鉴别而呈现的经典，正如卡尔维诺对“经典”的定义：经典并非你正在读的书，而是你正在重读的书。

胡适在《新思潮的意义》（1919年12月1日，《新青年》第7卷第1号）一文中提出了“研究问题、输入学理、整理国故、再造文明”的范式。秉着“记载人类文明、沟通世界文化”的出版理念，我们推出“博雅双语名家名作”系列，既希望能够在中国人创作的和以中国为主题的博雅英文文献领域“整理国故”，亦希望在和平发展、改革开放的新时代为“再造文明”、为“向世界说明中国”略尽绵薄之力。

外语教学与研究出版社
人文社科出版分社

序

萧乾曾说：“我的副业是沟通土洋。”他把翻译看作副业，写作才是他的正业。实际上，他毕生在翻译方面做出的成绩绝不亚于创作。萧乾从事文学翻译工作达67年（1931—1998）之久。不论中译英还是英译中都能胜任，对我国翻译事业的发展与中西文化交流起了推动作用。

一、三十年代

早在1930年秋，刚迈入辅仁大学西语系门坎的萧乾，就拉着美国青年威廉·阿兰，在文化古都北平策划起《中国简报》。那是我国最早向西方世界介绍中国现代文学的英文刊物之一。阿兰比萧乾略大几岁，是揣着母亲送给他的一笔钱，去闯荡世界的。然而在北京向萧乾学北京话，并听他讲解中国新文艺运动的情况（这些，萧乾是头一年在燕京大学读国文专修班时，从他的恩师杨振声教授那里学来的）后，阿兰认为将手头的钱悉数用来办刊物，远比周游各国有意义，遂逗留下来。那时上海有个英文的《密勒氏评论周报》，办得很成功。阿兰雄心勃勃地想办一份与之相媲美的刊物。为此，他还常向清华大学哲学系贺麟教授请教。

经过将近一年的准备，刊物问世了。目前珍藏于中国现代文学馆的《中国简报》（*China in Brief*）是一份英文周刊，创刊号发行于1931年6月1日，第8期则于7月29日与读者见面。它的宗旨是向关心中国社会、文化进展的英语世界“介绍现代中国文艺界的情势以及社会大众之趋向与其背景”。《中国简报》报头下面印着一行醒目的大字：“关于文学、社会、艺术动向的文摘周刊”。报纸发行人是美国人威廉·阿兰，文艺版主编是萧乾。

现存的《中国简报》1至8期，译载了鲁迅的《聪明人、傻子和奴才》、《野草》，郭沫若的《落叶》，茅盾的《野蔷薇》、《从牯岭到东京》，郁达夫的《日记九种》、《创作之回顾》，沈从文的《阿丽丝中国游记》，徐志摩的《自剖》、《灰色的人生》（诗），闻一多的《洗衣歌》（诗），章衣萍的《从你走后》，还对这些名作一一作了粗

浅的评介。除上述大家外，还译了一些《二月二来龙抬头》一类民间文艺作品，均出自萧乾之笔。

在第8期上，文艺版主编萧乾公布了专栏的蓝图：一、每期介绍一位中国当代作家，“述其身世、性格、作风，选择其代表作（指短篇）”。准备陆续介绍蒋光慈、叶绍钧（圣陶）、张资平、周作人、谢冰心、丁玲、胡适、谢冰莹、苏曼殊、胡也频。二、力求翻译介绍能够代表作者的文艺思想、作风特点及反映作者的生活背景的作品。三、计划出以下专号：“文学革命号”、“革命文学号”、“中国新诗坛号”、“南国戏剧运动号”、“北平小剧院运动号”、“国故派与白话文学派之战”、“语丝与新月社、创造社之论战”、“汉译西洋文学书目”。

计划后面写道：“通过以上简略介绍使欧美读者对中国文坛有初步认识后，就开始刊登新文学的短篇作品。因为对象是对东方文坛茫然的读者，所以评论不求深刻、透辟。计划虽然大得惊人，但只要文坛同道襄助，我们并不视为畏途。”

这个计划大体上包括了新文学运动第一个十年间的成就。由此可见，萧乾这个《中国简报》文艺主编的眼界是广阔的。他十六岁那年的夏季在北新书局当过一名练习生，曾大量阅读我国现代文学作品。十九岁考上燕大国文专修班，受教于杨振声教授，对“五四”以来的中国新文学有了基本知识。他从九岁起就跟着四堂嫂安娜（美国人）苦读英文，大学一年级时已开始帮助系主任雷德曼改同窗的卷子了，其实就是担任助教的工作。

可惜由于经费不足，《中国简报》夭折了，威廉·阿兰带着一批刊物回美国去了。他对萧乾说，再也没想到中国之旅能取得这么大的成果，真是不虚此行。

这份英文文艺周刊在当时旅居北平的西方读者当中产生了一定的影响。在辅仁大学西语系主任、爱尔兰裔美国神父雷德曼的鼓励下，萧乾将《王昭君》（郭沫若）、《艺术家》（熊佛西）和《湖上的悲剧》（田汉）等剧本译成英文，又用英文写了《棘心》（苏雪林）的书评，均发表在《辅仁学报》（*Fujen Magazine*, 1932）上。

1933年萧乾转学到燕京大学，改读新闻系。教他的美国记者埃德加·斯诺当时正在编译一部现代中国短篇小说选，也就是《活的中国》。斯诺也看过《中国简报》，知道萧乾热衷于向西方读者介绍中国现代文学，就邀萧乾参加《活的中国》的编选、翻译工作。结识萧乾之前，他

已经在上海完成了这部集子的第一部分，其中收录了鲁迅的六篇小说（《药》、《一件小事》、《孔乙己》、《祝福》、《风筝》、《离婚》）和一篇杂文（《论“他妈的！”》），都是由姚莘农翻译的。斯诺请萧乾来翻译第二部分。其中共收短篇小说17篇，作者14人，即郭沫若（《十字架》），茅盾（《自杀》、《泥泞》），巴金（《狗》），郁达夫（《紫藤与莺萝》），丁玲（《冰》、《消息》），柔石（《为奴隶的母亲》），沈从文（《柏子》），林语堂（《狗肉将军》），田军（《第三枝枪》、《在“大连号”轮船上》），张天翼（《移行》），沙汀（《法律外的航线》），孙席珍（《阿娥》），萧乾（《皈依》），杨刚（《日记拾遗》）。

杨刚后来也参加了一部分工作。在斯诺的执意要求下，萧乾和杨刚各自提供了一篇作品。杨刚那篇《日记拾遗》（署名“佚名”）就是她根据自己所写的短篇小说《肉刑》译出的。

萧乾译完初稿后，通过斯诺的修改学会了“文字经济学”，也就是语言的简练明快，真切自然。萧乾可以说是借着帮助斯诺来编译《活的中国》，从而完成了自己在《中国简报》第8期中提出的计划。

埃德加·斯诺所编《活的中国——现代中国短篇小说选》，英文版于1936年由伦敦乔治·G. 哈拉普有限公司出版。中文版于1983年由湖南人民出版社出版，由萧乾写了《斯诺与中国新文艺运动》作为序。

二、四十年代

1939年10月，萧乾抵伦敦，任伦敦大学东方学院讲师，兼《大公报》驻英特派记者，报道战时英伦。除了教书，他还积极参加伦敦笔会和国际笔会伦敦分会组织的活动，就中国现代文学频频发表演说。1941年5月9日，英国笔会在伦敦康伟厅为印度诗人泰戈尔举行追悼会。出席那次聚会并演讲的，有英国小说家爱·摩·福斯特。萧乾也应邀代表中国讲了话。他们二人就是这么结识的。同年，萧乾还应乔治·奥威尔的邀请在英国广播公司对印度广播中介绍中国文学的发展情况。

旅英七年间，萧乾在伦敦出版了以下五本深受英国读者喜爱的英文著作。

（一）《苦难时代的蚀刻》（*Etching of a Tormented Age*），国际笔会丛刊，乔治·艾伦与恩德公司1942年3月初版；有瑞士苏黎世德译

本，出版者：布尔-弗拉格社，1947年版。英国《泰晤士报》文学副刊（1942年3月21日）上刊载了无署名书评《评〈苦难时代的蚀刻〉》，有左丹译文（见《萧乾研究资料》，北京十月文艺出版社1988年版）。

（二）《中国并非华夏》（*China But Not Cathay*），引导出版社1942年10月初版，1944年1月第2次印刷。本书介绍中国历史、地理与抗日战争情况。强调国共合作坚持抗战的局面。全书共15章。在出版者的要求下，由当时的驻英大使顾维钧写了序。他还选译了3篇自己的特写：《鲁西流民图》、《刘粹刚之死》和《一个爆破大队长的独白》。最后一章谈战后中国的前景时，萧乾写道：“1842年以来签订的一系列不平等条约是中西方相互了解的最大障碍。这一障碍拆除后，中国与她的西方民主阵营的友人之间合作的前途将是灿烂的。中国在抵御外敌上得到了国际上的帮助。任何头脑清醒的中国人都不会设想战后中国将关起门来与世隔绝。那样的蠢举既不符合我们的政治哲学，又完全违背中国的民族性格。战后的中国将以其物质及文化潜力，协同各国一道为创造一个更幸福、更清醒的世界而努力。”¹

跨入二十一世纪的今天来回顾当时刚过而立之年的萧乾的话，不得不承认其中有一定的预见性。

（三）《龙须与蓝图》（*The Dragon Beards Versus the Blueprints*），引导出版社1944年5月初版。本书的副标题是“战后文化的思考”。书中收有萧乾的两篇演讲。《关于机器的反思》是谈英国小说以及中国知识分子对机械文明的反应的。《龙须与蓝图》作于伦敦华莱士图书馆，是由1942年作者在伦敦笔会中心所作的那次纪念弥尔顿《言论自由》的简短发言扩充而成。另有两篇对印度的广播稿：《易卜生在中国》和《文学与大众》。

（四）《千弦琴》（*A Harp with a Thousand Strings*），引导出版社1944年6月初版。这是一本从多棱角介绍中国和中国文化的文选，长达五百余页。书前有亚瑟·魏理写的一篇短序。他写道：“中国早期的《昭明文选》和《玉台新咏》确实曾把许多佚作或不经见之作，保存了下来。”他认为萧乾这本《千弦琴》的选编是做了件好事，并举书中的《孙中山伦敦遇难记》为例。序言最后说：“在中国，为人作序首先是友情的表示。此序虽不敢与中国古代那些优美的序言相比，但这也是发自友情的由衷之举。”全书共分6卷。第1卷是《英国文学中的中国》，分作诗歌、散文、随笔、传记及书简等项。诗歌从湖畔诗人柯勒律治做了

一场梦后所写的《忽必烈汗》，选到三十年代在北京大学任教的威廉·燕卜苏抗日战争爆发后随校赴内地时写的《南岳的秋天》。第2卷是《欧洲旅行家笔下的中国》，从十三世纪的马可·波罗一直选到英国诗人奥斯伯特·斯特威尔民国初年访华时所写的《北京的声与色》。第3卷是《人物画廊》，从以东汉的焦仲卿为男主角的古诗《孔雀东南飞》、沈复的《浮生六记》，一直选到四十年代项美丽所写的《宋氏三姐妹》。第4卷是中西文化交流。第5卷是有关中国文化及艺术的。哲学方面选了冯友兰的《中国哲学》。第6卷是民间文学，内分民歌、格言、儿歌等。

英国《观察家》报（1945年11月11日）上刊载了英国作家乔治·奥威尔的书评《评萧乾编的〈千弦琴〉》，有左丹译文（见《萧乾研究资料》）。

（五）《吐丝者》（*Spinners of Silk*）是萧乾自选自译的散文小说集，艾伦与恩德出版社1944年初版，1945年第2次印刷；有瑞士苏黎世德译本，出版者：布尔-弗拉格社，1947年版。收有《雨夕》、《蚕》、《篱下》、《雁荡行》、《栗子》、《矮檐》、《俘虏》、《破车上》、《印子车的命运》、《上海》、《邮票》及《花子与老黄》等十二篇。

英国杂志《今日之生活与文学》（1944年10月）上刊载了印度旅英学者穆尔克·拉贾拉南的书评《评〈吐丝者〉》，有左丹译文（见《萧乾研究资料》）。

三、五十年代至九十年代

新中国成立以后，萧乾任英文刊物《人民中国》副主编。1951年初，萧乾参加了湖南省岳阳县筲口乡一场轰轰烈烈的土地改革。全过程是四十二天，其间他跟农民同吃同住十来天，根据对外宣传的需要，用英文写下了《土地回老家》，曾连载于第3卷第8期至第4卷第3期的英文版《人民中国》。当年北京外文出版社出版了此书的英文单行本。萧乾本人把此作译成中文，由平明出版社于1951年11月出版，后收入《萧乾文集》第3卷（浙江文艺出版社1999年12月版）。此书有宫崎世民日译本（鸠书房，1993年7月版）以及俄、德、法、印尼、缅甸等十一种译本。

1952年，萧乾还曾把巴金的《生活在英雄们中间》译成英文，在英

文版《人民中国》上连载后出版单行本。

1953年，他被调到中国作家协会，任《译文》编委兼编辑部副主任。这之后，到1979年改革开放为止，主要从事翻译的工作（《莎士比亚戏剧故事集》、《大伟人江奈生·魏尔德传》、《好兵帅克》、《里柯克小品选》、《培尔·金特》等；与人合译的有《屠场》、《战争风云》、《弃儿汤姆·琼斯的历史》等）。

进入思想开放的时代后，萧乾重新拿起笔来。他在《未带地图的旅人》中写道：“可惜我的日记统统毁于‘文革’中，否则我本可以专就在英国演讲的经历写一本书，那不会是一本枯燥无味的书。”²“如今，太平日子来了，想写点回忆录，搞点研究，可旧时的书籍、笔记、日记、卡片，早就统统化为灰烬。”³

二十二年不正常的年月损害了他的健康。在这种情况下，我们接下了南京译林出版社社长李景端上门约的《尤利西斯》一书的翻译工作。合译《尤利西斯》的那四年（1990年至1994年），我们度过了一生中最富成果的一段岁月。1998年11月20日，他在北京医院病房里写了一篇《写到不能拿笔的那一天》。他是这么说的，也是这么做的。在病房里，在连字典都拿不动的情况下，他还坚持将《夜幕降临》初稿译完。我在这个基础上定稿，作为合译，由上海少年儿童出版社于1998年12月出版。这是莱斯·马丁所著美国新科技探案小说中的一种。关于住了将近两年医院的萧乾，我屡次听主任和大夫们说：“真是奇迹。”我知道他们指的是他神采奕奕，完全不像是个病人。耳聪眼明，不断地读书看报写文章。其实我知道，是对文字工作的执著和热爱化为精神力量在支撑他。他走后，我马不停蹄地整理他的遗著，《龙须与蓝图——中国现代文学论集》仅仅是其中的一部分。

最后，向为本书的编辑出版呕心沥血的吴浩、易璐、段会香同志表示由衷的感谢。

1. FAREWELL, OLD CURIOSITY SHOP!

Since 1911, the life of the Republican Chinese has undergone a transformation, perhaps unique in history. The civilization of ancient China was like a great river running quietly through a valley of virgin mountains. There had been vicissitudes, but nothing had affected any change in its course. It had been left alone until the end of the last century when this river, against its will, encountered the ocean of world culture. Terrific turmoil resulted, which became swollen into tumultuous rapids known as the Literary Revolution. The collapse of the Manchu Empire was almost immediately followed by the abandonment of the age-hallowed classical style. The vernacular was adopted in its stead. Before that, the only official and academic language in use was couched in the classical style. No one could hope to pass the imperial examinations, the only stepping-stone to any decent career, without being steeped in this style. But the classical was immeasurably different from the spoken language. It usually took a good quarter of a lifetime to master its rudiments. Hence, it was almost inaccessible to the man-in-the-street. This fact alone was insufferable to the Republican Chinese. It meant that the great masses of China had scant prospect of education in any near future, while the Republic urgently needed the support of intelligent citizens. It meant that China would have to sail on in picturesque junks while others kept fortifying ever new types of powerful guns on board their battleships. No science had a chance of development if the people were to be perpetually tethered to the white elephant. Threatened by a neighbour that was being rapidly modernized, the young Chinese reacted sensibly rather than sentimentally.

But the new style was not only more sensible. Being colloquial, it was more expressive and spontaneous. Republican sentiment was truly overflowing. Quite apart from aesthetic and linguistic considerations,

the fact that this innovation answered the demands of the young Chinese sufficiently justified its existence. The revolt actually began in 1917 and reached its climax in the Students' Movement of May 4, 1919. In the same year, about four hundred newspapers and magazines appeared in this new style. In the following year, the Ministry of Education decreed that the vernacular was to be adopted in all text-books for elementary schools. This overwhelmingly successful reform has been proudly called the Chinese Renaissance. In so far as it was an attempt to democratize the written language as a result of individual awakening, it was a Renaissance—and the first in five thousand years!

Many people think that the introduction of scientific inventions from the West changed the outlook of China. But the translation of Western literature in a broad sense, from Rousseau, Mill, Darwin, Spencer to Bertrand Russell, actually had more positive influence on the reforms. They taught Chinese intellectuals Science and Democracy: they revealed the basic rights of human beings. The overthrow of the imperial regime was a crowning success of political emancipation. The literary revolt was a refusal to copy the models of the ancients. In the words of Dr. Hu Shih, every age should have its own literature. The three principles expounded by the forerunners as aims of the movement were:

1. To destroy the painted, powdered and obsequious literature of the aristocratic few and to create the plain, simple and expressive literature of the people.

2. To destroy the stereotyped and monotonous literature of classicism and to create the fresh and sincere literature of realism.

3. To destroy the pedantic, unintelligible and obscurantist literature of the hermit and the recluse and to create the plain speaking and popular literature of a living society.

Why was China, a country with a glorious cultural background, living in proud seclusion from the rest of the world until the last century, so ready to succumb to such drastic changes? As a people, we

are by no means free from bigotry. Only half a century ago, we still chose to sign sheaves of unequal treaties rather than face the stark realities of the world situation. But the nineteenth century had become a nightmare to us. It was a period filled with humiliation from abroad and corruption at home, accompanied by poverty, illiteracy, contagious diseases, all the poisons of a decayed empire. The foreign powers were all sharpening their carving knives. It was like treading on thin ice, not only the great empire but all its inhabitants were ready to sink into oblivion. The young Chinese were appalled by the fates of India and Korea. History was marching with unfaltering steps. Aware of the impending danger, they naturally grew impatient with traditions that bound the feet of their women and bent the backs of their men. Social conventions established and tolerated since the days of the Yellow Emperor were suddenly challenged. An unprecedented upheaval, political, social and cultural, took place. The new literature led, reflected and recorded this upheaval.

Yet it should be borne in mind that this "new" style was in fact not new. It was just the age-old mother tongue of the people, from mandarin to country maid. Except for a corner of the southeastern coast, it has always been spoken by the bulk of the population. Actually from the tenth century on, a great body of magnificent literature had been written in this style, such as some of the Yü-lu of the Sung Dynasty, and certainly all our best novels. What Dr. Hu Shih, the leader of the movement, and his followers fought for was orthodoxy. And this was by no means easily achieved.

The triumph of the vernacular was not unchallenged. The diehard Lin Ch'in-nan wrote violent diatribes, from a satire, in which he maliciously caricatured Dr. Hu and other reformers, to a number of indignant letters. He wrote to the late Ts'ai Yuan-pei, then President of Peking University and guardian angel to the new movement, warning him that "it is against the natural course of human affairs to let expediency override the fundamental. There are advantages in Western civilization, but let us not inflict ourselves with its vices."

Wang Ching-hsüan, another old scholar, compared the young Chinese to fickle women who cast away their husbands as soon as they meet new lovers. He accused the reformers of servility because of their adoption of Western punctuation. But the actual pressure came from conservatives who once or twice got control of the Peking government. Under various pretexts they banned several new books, such as the *Collected Essays of Hu Shih* in 1924. Again, by exploiting "entrance examinations" either for civil service or for college, they tried to impose the classical style on the younger generation.

Hundreds of novels and thousands of poems and essays have been written in this democratic style in the last twenty-five years. They have eloquently shown its capacity to express all shades of human sentiment and to depict everything on earth, from a waterfall to the tremulous legs of an insect. The Chinese still love to see ancient scrolls of the Yangtse Gorges or pines spreading from dizzy crags on sacred T'aishan. But to-day there are motorboats steaming up the Yangtse and aeroplanes over T'aishan. While appreciating ancient scrolls, they realize the necessity of this more adequate medium to depict modern China. Hence, this living language has become the natural channel of contemporary Chinese writers. Twenty-five years is of course too brief a period for hasty critical verdicts. Contemporary Chinese literature is a sapling still in growth. Here, I shall attempt to give an account of this sapling.

壹 永别了，老古玩店

1911年以来，中国人的生活经历了一场也许是历史上独一无二的变革。中国的古老文明就像一条大河，静静流淌在处女山的深谷，虽经盛衰荣辱，却没有什麼能改变它的方向。直到上世纪末叶，这条河才不遂己愿地与世界文化的海洋邂逅。激烈的动荡很快产生了众所周知的文学革命。清帝国崩溃，紧接着古老神圣的文言形式被遗弃，白话取而代之。在此之前，官方和学术语言所用的都是传统的文言形式。如果不在这上边花大气力，便无法通过科举，而科举是获得相称生涯的惟一阶石。文言决然不同于口语，掌握基础通常就要花去人生的四分之一时间，普通大众几乎难以企及。这一事实是民国以来的中国人所难以忍受的：它意味着当民国急需知识阶层的支持时，中国的大众短期内却缺乏教育的前景。它意味着当别国都在战列舰的甲板上不断装备新式枪炮时，中国却不得不划着别致如画的舢板。倘若一个民族永被无用而又累赘的东西捆缚，科学便没有发展的机会。年轻的中国人在一个正迅速现代化的邻居的威胁下，作出了理性的反应，而没有感情用事。

新的文体不仅更理性、明智，作为口语，它还更富于表现力，自然而然发。民国人确实洋溢着感情，先不管美学及语言学上的考虑，光这一改革符合年轻中国人的要求事实本身，就足以证明它存在的合理性。反叛真正开始于1917年，到1919年的“五四”学生运动达到高潮。同年，大约四百份报纸刊物以这种新的文体出现。第二年，教育部宣布所有小学课本采用白话文。这一势如破竹的成功改革被骄傲地称为“中国的文艺复兴”。这一因个体觉醒而引起的推广书面语之努力，堪称五千年来的第一次文艺复兴！

许多人认为，从西方介绍科学发明改变了中国的视野，但广泛地翻译西方文学，从卢梭、穆勒¹、达尔文、斯宾塞到伯特兰·罗素，实际上给改革带来了更为积极的影响。他们教给中国知识分子科学与民主，展示作为人的基本权利。推翻清王朝是政治解放的最大成功，文学革命是对延袭旧模式的排拒。用胡适博士的话说，就是每一个时代都该有它自己的文学。文学革命的先驱们阐述了三条原则作为运动的目的：

1. 推倒雕琢的阿谀的贵族文学，建设平易的抒情的国民文学。

2. 推倒陈腐的单调的古典文学，建设新鲜的立诚的写实文学。

3. 推倒迂晦的艰涩的山林文学，建设明了的通俗的社会文学。

何以拥有悠久文化传统、直到上世纪还一直闭关自守的中国人，要进行这样剧烈的改革呢？作为一个民族，我们也曾固执过。直到上一世纪中叶，我们还宁可签订一系列不平等条约，也不愿面对世界局势所呈现出的严峻现实。对我们中国人来说，十九世纪是一场噩梦，它充满了来自国外的耻辱和国内的腐败，以及与一个衰落帝国相随相生的一切毒素：贫穷、愚昧、传染病。外国列强全都磨光了利刃。真是如履薄冰，这个伟大帝国及其所有臣民都即将被淹没。中国年轻一辈对印度和朝鲜的命运不寒而栗。历史前进的步伐不会迟疑，看到即将面临的危机，他们自然会对妇女缠足和男人打躬作揖的传统失去耐心。自黄帝时代创立且一直被容忍的社会习俗突然面临挑战，一场前所未有的政治、社会和文化动荡发生了，而新文学引导、反映并记录了这一变革。

事实上，我们头脑应该清醒，这“新”的形式并不新。它是一个民族从官僚到村妇的古老母语，除去东南沿海的一角，人口的绝大部分都在使用。其实从十世纪开始，大量非凡的文学作品就已在用这种形式创作了，如宋朝的“语录”以及毫无疑问地，我们最好的小说。文学运动领导人胡适及其追随者是为正统而战斗，这绝非易事。

白话的成功并非没有遇到挑战。顽固的林琴南写了一篇讽刺文章和大量愤愤不平的信，猛烈抨击并恶意讥讽胡博士及其他改革者。他给已故的时任北京大学校长、新文化运动的守护天使蔡元培写信，警告他以权宜之计践踏基本法则有违常情，西方文明有优势可言，但不能连带邪恶推给我们。还有一位守旧学者“王敬轩”把年轻一辈比成见异思迁的妇人，一旦觅到新欢，就把丈夫抛到一边。他责骂改革者奴性十足，因为他们采用了西式标点。但真正的压力来自曾一度掌管了北京政府的保守派，他们找出不同借口禁了许多新书，如1924年出版的《胡适文存》。另外，利用政府文职机构或学校的“录用考试”，企图强迫年轻一代接受旧式文言。

二十五年来用白话写就的成百篇小说、成千首诗歌及散文雄辩地证明，这一民主性文体可以表达人的一切感情，描绘地球上的一切事物，从一处瀑布到一只昆虫微微发颤的脚足。中国人仍然喜欢观赏描绘三峡或泰山悬崖峭壁上的古松的画卷，然而今天扬子江上已在跑着蒸汽船，泰山顶上也有飞机在翱翔。我们在欣赏古画的同时，认识到了这种最适

合描绘现代中国的媒介的必要性。因此，这一活的语言就成了中国当代作家的自然方向。二十五年当然是一个短暂的时期，不宜作草率的评估。中国现代文学是正在成长的一株幼树，这里，我将试图来描述这株幼树。

2. NOVELISTS AS REFORMERS

Thrillers and purely humorous fiction play an extremely insignificant part in modern Chinese fiction. Novelists regard it as a disgrace to write merely for the sake of popular entertainment. While this may be a serious disadvantage to technique, it shows how conscientious our writers are. In fact, most of our novelists are social reformers at heart. In tracing their motives of writing, the desire to ameliorate a corrupt society is evident. The Japanese may know the value of ancient Chinese porcelain and bronze, but they fatally underestimated the new spirit of self-assertion in all articulate young Chinese and how politically conscious they had become. Merciless self-analysis of national weakness and indomitable assertion of individual rights were the guiding forces of contemporary Chinese writers. Take the widely known Lu Hsün, author of *The True Story of Ah Q*. Actually he began his career as a medical student. This was because he had suffered much in his childhood from country quacks. He wanted to master the science of curing the ailments of his fellow-beings. One day in Tokio, at the end of a tedious anatomical lecture, the professor showed some non-medical lantern slides to amuse his students. One of these showed a group of Chinese who had acted as spies for the Russians in the Russo-Japanese War. They had been arrested and beheaded before a cheering crowd. Lu Hsün was cut to the quick. For it dawned on him that the disease of his compatriots was mental rather than physical. He gave up his medical career to become a writer. There was nothing rosy about the China he depicted. All his stories are caricatures of apathetic Chinese types, often biting effective.

There is no doubt that our finest literary harvest in modern times is that of fiction. And it is here that new writing contrasts most strikingly with the old. The change in the position of fiction in China

is as surprising as that from a pauper to a prince. Thirty years ago, *Hsiao Shuo* (the Chinese for "fiction", meaning "small talk") was regarded as a low and vulgar form of writing. The handful of novels written between the tenth and the nineteenth centuries were mainly by scholars who had been banished from imperial favour, or else had failed in the imperial examinations. Hence, their authorship is often a matter for conjecture. The abolition of imperial examinations in 1904 and the introduction of Western literature completely changed the situation. Fiction has since become a popular form of writing. While novels in the pre-Republican days were mere accidents, they are written with conscious and deliberate craftsmanship to-day.

The writers of new China take great pride in the hardships and vicissitudes of life. They are aware of the value of personal experience to a resourceful novelist. A life springing from the gutter may provide a wealthy store of material. Some of them were born in such humble conditions; some went out of their way to seek them. Whence, realism has become quite natural to modern Chinese writers. They are not only the reformers of a corrupt society: many of them were the victims of it. Miss Ts'ao Ming begins her *Confessions* thus: "In the first half of my ninth year, my pillow was seldom dry. I was the twenty-third child of a polygamous father, and my mother was his concubine. When I was ten years old, I was so peaky and thin that I looked like a girl of six. Often my mother clasped me tightly, playing with my queue and fondling my bony chin, saying, 'It is hard to be a woman, and when one is so thin...'" Miss Pai Wei in an autobiographical sketch pictured herself kneeling before her Confucian father, sobbing timidly, imploring him, "Father, give me a chance to study. Don't marry me off so soon!" She was to be married to a boy whom she had never seen and who was already lying on his deathbed. Indeed her sufferings were cruel. She was stripped, beaten, and literally tortured by her mother-in-law. Later she ran away, and managed to enter a school, without her parents' knowledge. But soon she was discovered.

In Ai Wu's case, a vagabond life was chosen rather than imposed

by circumstances. He trekked all the way from Ssŭchuan to Yünnan, and thence to Burma². *En route*, he worked as a groom in a wayside inn in the wild mountains on the border. He was even a cook to a monk in Rangoon. Often he was driven out of his lodgings for arrears of rent. But all the time he carried with him a copy of Gogol's *Overcoat*, a pen, and a bottle of ink swinging from a piece of rope. As he walked on mountainous journeys or swept up the dung of horses and mules, he carefully scrutinized the life around him. At night, by the faint light of an oil lamp, he jotted down the incidents of the day. There is in fact a quaint touch in his works beyond the reach of the more well-to-do.

The study of modern Chinese fiction can be approached from several angles. The regional novel has never been fully developed in China, partly because the tumultuous life never allowed any writer to settle down peacefully in one spot. But many Chinese writers naturally remain attached to the part of the country most intimate to them. In the works of Chou Wen, Sha Ting, and Lo Shu, you see all aspects of Ssŭchuan—villainous country squires, helpless wives of peasants, salt merchants and opium smugglers. Lu Fen has graphically depicted the villages of his native Honan, the people's militia, drunkards, or missionary hospitals. Hsiao Chün, the author of *Village in August*, and his former wife Hsiao Hung, chose the whole of Manchuria³ for a background, from Harbin to Dairen⁴. Writing about the guerrilla fighters in that part of the country, Hsiao Chün himself had been one. The setting of Tuan-mu Hung-liang's novels are naturally laid in the eastern part of Inner Mongolia, where he came from. In Wu Tsu-hsiang's stories, one sees the haggard faces of downtrodden tenants and the greed of the country gentry in Anhui. Nearly all the characters in Lu Hsün's works were taken from Wei Chuang, that town wherein the immortal Ah Q was born, lived and suffered. There are writers who sometimes use foreign countries as a background, either because of the exotic colour, as in the case of HsüTi-shan's India, Pa Chin's France, Ai Wu's Burma and the white Russian colony in Harbin as

appearing in Chin Yi's works, or because of their lengthy sojourn, as in the case of Kuo Mo-jo's in Japan.

The danger of classifying writers geographically is obvious. To start with, provincialism has been deprecated by modern Chinese writers. Though Lu Hsün and Chou Tso-jen were brothers, their approach to life was totally different. In Chou, one sees the ripples of gentle streams and the waving shadows of bamboo groves. In Lu Hsün, one sees China struggling against the clutches of a decadent tradition. Nevertheless, it remains the garden of nostalgic memories. As an ingredient in the formation of a writer's character, this is also significant. Shen Tsung-wên, for instance, admitted the influence of the River Ch'en in West Hunan on his whole literary career. He wrote:

"The foundation of my work was not built on a bundle of useful books; it was built on water. The tiny raindrops from the eaves, a little brook, or the immense deep—these are all great teachers to me. My ability to use my little brain was wholly due to the influence of water. I owe to it the habit of seeing beneath the surface.

"In childhood, the river was my refuge. From the age of fifteen, for the next five years, my life was spent on the bank of the River Ch'en. Now, each time I recall my past, the happiest of my reminiscences are watery. At least one tenth of my time was squandered on the main currents and the tributary streams of the river. I learnt much about the human world from flowing water. My imagination was given wings by the river.

"After five years, I left that river. I could then wield the brush, and began to write. I often used the riverside as my setting. I wrote about it with love. My characters are also those familiar faces on the river. If there is sadness in my writings, perhaps it was due to the gloomy weather in that corner of China fifteen years ago. If there is anything in my work worth noticing, it was also because people moving on that river spoke a rich and vivid language.

"After five years' sojourn in Peking, I went to live by the sea, the dazzling and boundless sea. I had a greater opportunity to see life from a remote angle. How lonely was the sea! It nourished my feeling of solitude, enlarged my soul and magnified my personality..."

(From *Literature and I*, 1934, Shanghai.)

In whatever shape, water has always charmed our writers. Miss Ping Hsin, one of the first of our women writers in the vernacular, was profoundly influenced by the sea. Not being a navigating country, we have produced no Joseph Conrad. To a Chinese writer, the sea is oftener a lyrical symbol. To Miss Ping Hsin, it symbolizes mother love. She spent her girlhood in a delightful fishing town on the Chiao Chou Peninsula where she often sailed on the sea. In her *Letters to My Young Readers* from America, she constantly sings in praise of the sea. "To look at a range of mountains on a hot summer afternoon", she wrote, "is like looking at an enormous ailing ox, with layers of darkness piling in front of our eyes. But the sea is always lively and glimmering with thousands of silvery flowers. She is my mother and the lake is my friend."

In the transitional period of reforming the family system, the relationship between the sexes was bound to arouse acute interest and controversy. Every youth became aware of his innate right to choose his own life companion. But the tradition of marriage by betrothal was still unbroken. Few authors were without matrimonial troubles, and literary confessions of these became a vogue. The more erotic type, like Yü Ta-fu, went so far as to vent his "sexual hunger". Obviously there was an instinctive craving in the hearts of young Chinese, long denied or repressed by social and ethical codes. That craving was most frankly expressed by Yü who had many of the traits of Rousseau and Dostoyevsky. In his "Recollections as a Writer", he said all literary works were autobiographical. It was undoubtedly true in his own case. He packed his notorious *Nine Diaries* with all the sins he committed. At the end of each sin, he took a turkish bath to wash it off. His outstanding novel was *Sinking* ("Ch'en Lun"), an analysis of a morbid youth. In one passage he characteristically wrote:

"...O my decayed life at twenty! My dead ashes twenty years! I'd sooner be transformed into a mineral. I shall never blossom in this incarnation. Knowledge I desire not, nor fame. I only yearn for a 'heart' that is tender and understanding

—a fervid heart bursting with sympathy, and with love from that very sympathy. What I really crave is love! Were there a beautiful woman who understood my agony, and if she desired my immediate death, I am ready. If there were only a woman, beautiful or ugly, as long as she loved me with a true heart, I would sacrifice my life for her. What I crave is love of the other sex..."

How naive, yet how expressive of the mood of repressed souls!

Yü's influence on the younger generation cannot be called good. But his emotions were genuine. Faithfully and without restraint, he expressed the particular sorrow of the youths of that time. But another novelist who chose nearly the same theme cannot be judged in the same light. Chang Tz-ping must have deeply regretted his opportunism. Perhaps he has been cursing the ingratitude of his readers. Only fifteen years ago, his novels of triangular and quadrangular love affairs were manufactured by the dozens. They were devoured by boys and girls all over the country. Writing must have brought him considerable profit. His plots were as alike as two peas. His characters seemed to have one common virtue, namely, sensuality. The endings were invariably tragic, either suicide as a result of being in love with a married person or a sudden discovery of pregnancy by parents. These stereotyped situations were soon denounced by all critics and disillusioned even his most enthusiastic readers.

But the question of "family oppression" has not been completely solved, and it has never failed to interest Chinese readers. The success of Pa Chin's novels is sound evidence of this. He is an anarchist whose uncompromising spirit has spoken much for the discontent of his generation. He has written scores of novels about miners and revolutionaries. His recent trilogy, *Spring, Autumn, Masses*, deals with the degeneration of a patriarchal family in Ssüchuan and the rebellion of the young. Pa Chin is a writer of conviction. While in France, he became a fervent student of the French Revolution. The spirit of *J'accuse* runs through his works. He writes to protest rather than to entertain. But he never makes any pretence to be an artist. In the

Preface to his *Electric Chair*, he wrote:

"I have no liberty, no joy, because a whip constantly lashes me. I cannot rest. It is the misery of mankind, and my own. When passion burns in me, my heart becomes restless, I must write something. When I write, I exist no longer. Gruesome pictures haunt me. They make my heart and my hand tremble at the same time. What is art after all, if it cannot bring more light to humanity; if it cannot strike a single blow against the demon? The whole city of Pompeii was once buried under ashes. One day, the ivory tower of art will also be consumed. No, I want to make a direct appeal to my readers, make them abhor darkness and love light. My writings need no connoisseur..."

This attack on the art-for-art's-sake group was more emphatically expressed in his *Recollections of My Life*:

"I am not lying when I say that part of my works are a mixture of tears and blood. I am no artist. My writing is just part of my existence. My life has been a painful struggle, my writing too. I write only about human aspirations. While I suffer, I envisage a rosy dawn for all mankind. Yes, life is short and art is long. But there is yet something longer than art and it is that which guides me."

Since 1927, the Northern Campaign of the Revolutionary Army, Chinese writers became more politically conscious. Personal introspection became less popular and novelists turned their eyes to a bigger canvas. Mao Tun was the first to attempt a monumental novel, portraying the revolution for which much blood had been shed. His *Disillusion*, *Mutation*, and *Pursuit* were a trilogy about that fateful year. Like André Malraux, the author of *La Condition Humaine* (translated into English as *Storm Over Shanghai*), Mao Tun was an active party member in Wuhan, then the seat of the Left-wing government. Being an enthusiastic disciple of naturalism, he drew his material from reality. This was followed by his *Twilight*, *A Romance of China in 1930*, in which he ambitiously presented a panorama of China, both rural and urban. An amazing feature of this novel is the graphic description of the Shanghai Stock Exchange. Some of his works tend to be

documentary, but he has taught younger writers to explore actual life.

The portrayal of the seamy side of Republican life is a universal theme. Yeh Shao-chün vividly writes about schoolteachers and middle-aged people, Chang T'ien-yi about civil servants and children. His *Knight of Yang Ching Pang* is one of our best picaresque novels. Miss Ting Ling's works are widely known. Her *In Darkness* and *The Mother* won many plaudits. Miss Ling Shu-hua has written a number of delightful stories. Being a painter herself, and the wife of Professor Ch'ên Hsi-ying, a learned but not pedantic critic, her creative talent is further enhanced by scholarship. I do not wish to pay all-round compliments to our women writers, but I really cannot omit Miss Lin Hui-yin, the author of *Ninety-nine Degree* and other charming stories. Being a versatile artist herself and a lover of experimental writers such as Virginia Woolf, she has made fiction a record of rapid flashes of life instead of static "facts". She has fished beneath the sea of consciousness and thus deepened the effect of her writing.

From 1916 to the formation of the League of Left-wing Writers in 1930, anything written in the vernacular style seemed acceptable. The criterion tended to be more linguistic than artistic. During the period of revolutionary literature, Left-wing critics were mostly concerned with ideology. Wang Shu-ming, one of the leading critics of the time, wrote how he became a literary critic: "I bade farewell to all the aesthetic theories of a capitalist society and made careful studies of socialism." Art was then contemptuously dismissed as "technique". Consequently many stories appeared bare skeletons of revolutionary tales or dramatizations of certain political ideas.

Shen Tsung-wên has often been described as a stylist. It is true that his choice of words is so deliberate that they sparkle. In his stories, the prevalent mood is that of a poet. He admits that all he attempts is to capture momentary sensations and images. They are often impressionistically fresh. For instance, in describing a timid youth, he would say he was as shy as a little apricot tree. But Shen's essential virtue is that he writes of a world entirely of his own—

soldiers, civil servants in the interior, peasants of West Hunan and the colourful tribesmen on the border. With his vivid pen he enlivens them all, their rich dialogue, their picturesque lives and their tragedies. He was born and bred among them. As a soldier, then as a tax-collector, he trod every inch of the soil. In his Preface to *Green Jade and Green Jade* (an English translation by Miss Emily Hahn and Shao Hsün-mei appeared in the *T'ien Hsia Monthly*, Hong Kong) he explains his creative attitude:

"For peasants and soldiers, I cherish an inexpressible love. This emotion is in all my writings. I never conceal it. I was born in the little town I write about. My grandfather, father, and brothers were all in the army. All died on active service. The living will end their lives in the same manner. This is the side of life I am most familiar with. I write about their loves and hates, their joys and sorrows. Clumsy as my pen is, it cannot distort too much, for these people are honest, straight forward, commonplace but big-hearted. In temperament, sometimes very beautiful, sometimes very petty. In the senseless civil wars lasting nearly twenty years, these peasants were the foremost sufferers. Their souls have been heavily oppressed, which has done much to destroy their original simplicity, industry, frugality, peacefulness and honesty. They have been transformed into quite a different kind of being, lazy and poverty-stricken. I am trying to record this dreadful transformation."

The war has been a blessing in disguise for Chinese literature in general, and for fiction especially. Previously, two lamentable symptoms existed among nearly all story-writers. They either lacked solid experience of national life or their diction was too remote from that of the people. The war has shown many writers the right direction. For the first time they inhaled the aroma of rice fields and saw the gorgeous orange groves, and the manifold marvels of the countryside. But above all, they came in direct contact with the people, the people untouched by European influence, who lived far away from the coastal ports. Beyond all this, they saw the war, its tragedy as well as its heroism. Consequently, we may hope for much from post-war Chinese novelists.

贰 作为改革者的小说家

惊险小说和纯幽默小说在现今的中国小说界完全没有地位。小说家们把纯粹为大众娱乐而写作当成一件丢脸的事。尽管这非常不利于技巧的运用，但可见我们的小说家是多么尽责啊！事实上，我们大部分小说家骨子里都是社会改革者。探求其创作动机，很明显是要努力改进一个腐败的社会。日本人或许知晓中国古老瓷器和青铜器的价值，但他们严重低估了能够清楚表达思想感情的中国年轻一辈的自信精神及其政治意识。对国家弱点无情剖析、对个人权利勇敢维护正是中国现代作家的指导力量。以《阿Q正传》的作者鲁迅为例，他原是个医科学生，因少年时代深受乡下庸医之苦，才想掌握为同胞治愈疾病的技术。在东京的一天，教授讲完冗长乏味的解剖课后，拿出一些与医学无关的幻灯片放给学生看，有一组展示的是日俄战争期间给俄国人充当间谍的中国人被捕，在一群喝彩的围观者前被斩首。鲁迅的心被刺痛了，他开始明白，他的同胞的病症是精神上的而非肉体上的。于是他放弃了医学生涯，成为一名作家。他所描绘的中国一片灰暗，小说都是对各类漠然的中国人进行无情的、常常是入木三分的讽刺。

我们现今最大的文学收获无疑是小说，新旧写作的对照也是在小说中最为引人注目。小说的地位在中国的变化就像一个人由贫民到王子那样令人吃惊。三十年前，小说还被认为是一种低级粗俗的写作形式。十到十九世纪间的少数几部小说主要出自那些遭官场贬逐或科举落第的文人之手。因此，对原作者常常只能推测。1904年科举的废除和对西方文学的评介完全改变了这种局面，小说从此成为一种大众喜爱的写作形式。民国以前，写小说只是出于偶然，而今天，艺术家是在有意识和深思熟虑地写小说了。

民国的作家为生活的贫困、沧桑而感到自豪，他们清楚个人经历对一个笔下有料的小说家的价值。源自社会底层的生活经历可以提供丰富的写作素材。他们中有的就出生在这种卑微的条件下，有的则特意去寻求这样的条件。如此一来，中国现代作家从事现实主义写作就是很自然的事了。他们不仅是腐败社会的改革者，许多人还曾是这个社会的受害者。草明在一段自述文字中写道：“在我九岁的头一半时间里，枕头很少

是干的。我是一夫多妻的父亲的第二十三个孩子。我母亲是他的妾。十岁的我长得瘦弱苍白，看上去就像一个六岁的女孩。母亲常抱紧我，抚弄着我的辫子，摸着我的皮包骨头的下巴，说“做女人真难，她是那么的微弱””白薇在她的一篇自传体小说里，描绘她自己跪在信奉儒教的父亲面前，胆怯地呜咽着，哀求他：“爸，给我个学习的机会吧，别让我这么快就嫁人！”她被强迫同一个从未见过面、已经快死了的男人结婚。她遭受的痛苦实在残忍，她要忍受婆婆的酷刑，被剥光衣服毒打。后来她出逃了，背着父母去上学，但很快就被发现了。

艾芜是自愿选择流浪生活，而非环境所迫。他徒步从四川到云南，再到缅甸。一路之上，他在边境荒山里的路边客栈刷洗过马匹，甚至在仰光给和尚做过饭。他常因欠房钱而被房东逐了出来。但他始终带着一本果戈理的《外套》、一支钢笔和一瓶用麻绳拴着的墨水。无论走在荒山野岭，还是在清扫马粪、骡子粪，他都细心观察周围的生活。入夜，他便就着昏暗的油灯，把白天发生的事情记录下来。事实上，他的作品显示出超乎寻常更宽裕之人的独特风格。

研究中国现代小说可从几个角度切入。中国的区域小说从来没有发达过，部分原因是乱哄哄的生活使得中国的作家无法在一处地方宁静地居住下来。但许多中国作家仍很自然地依恋着他们最熟悉的乡村某个地方。在周文、沙汀和罗淑的作品中，你能看到四川的全部生活形态：邪恶的乡绅，无助的农妇，盐商和鸦片贩子。芦焚生动地描绘出家乡河南的村庄面貌：民兵，酒鬼和教会医院。《八月的乡村》的作者萧军及其前妻萧红选择从哈尔滨到大连的广阔地域作为写作的背景。萧军还写那里的游击战士，他自己也曾是其中一员。端木蕻良的小说自然描绘的是他老家内蒙古东部的情景。吴组缃的小说展现出安徽被蹂躏的佃户憔悴的面容和地主乡绅的贪婪。鲁迅小说里的所有人物几乎都出自不朽的阿Q诞生于斯、生活于斯、受苦于斯的未庄小镇。也有一些作家有时以外国为背景，一方面因为可以增强作品的异国情调，像许地山笔下的印度、巴金笔下的法国、艾芜笔下的缅甸，以及靳以所描绘的哈尔滨的白俄聚居区；另一方面也因为他们曾长期旅居国外，像郭沫若在日本就住过很长时间。

把作家按地域分类很明显是危险的，中国现代作家从一开始就不赞同地方主义。尽管鲁迅和周作人是兄弟，但他俩的生活观截然不同。在周作人的笔底，小溪泛起涟漪，竹林暗影浮动。而在鲁迅的作品中，你

看到的是中国在颓废的道德传统桎梏中挣扎，但也有田园的怀旧情调在里边。作为形成作家风格的一个要素，这也是极为重要的。例如，沈从文承认湘西的辰河影响着他的整个文学生涯。他写道：

在我一个自传里，我曾经提到过水给我的种种印象。檐溜，小小的河流，汪洋万顷的大海，莫不对于我有过极大的帮助。我学会用小小脑子去思索一切，全亏得是水；我对于宇宙认识得深一点，也亏得是水。

.....

到十五岁以后，我的生活同一条辰河无从离开，我在那条河流边住下的日子约五年。这一大堆日子中我差不多无日不与河水发生关系。走长路皆得住宿到桥边与渡头，值得回忆的哀乐人事常是湿的。至少我还有十分之一的时间，是在那条河水正流与支流各样船只上消磨的。从汤汤流水上，我明白了多少人事，学会了多少知识，见过了多少世界！我的想象是在这条河水上扩大的。.....

再过五年，我手中的一支笔，居然已能够尽我自由运用了。我虽离开了那条河流，我所写故事，却多数是水边的故事。故事中所最满意的文章，常用船上水上作为背景，我故事中人物的性格，全为我在水边船上所见到的人物性格。我文字中一点忧郁气氛，便因为被过去十五年前南方的阴雨天气影响而来，我文字风格，假若还有些值得注意处，那只是因为我记得水上人的言语太多了。

再过五年后，我的住处已由干燥的北京移到一个明朗华丽的海边。海既那么宽泛无涯无际，我对人生远景凝眸的机会便较多了些。海边既那么寂寞，它培养了我的孤独心情。海放大了我的感情与希望，且放大了我的人格。

（摘自《我与文学》，1934年，上海）

无论何种形态，水总能使我们的作家陶醉。最早用白话写作的女作家之一冰心，深受大海的影响。我们不是航海的国家，无法产生约瑟夫·康拉德⁵。但大海常是中国作家抒情的象征。冰心用大海象征母爱。她的童年是在胶州半岛一个风光如画的渔镇上度过的，常去海上航行。她在美国写回的《寄小读者》里，不断地歌唱赞美大海。她写道：“夏日炎热的午后看山，就好像一群害病的牛黑压压地堆在眼前。但海总是可爱的，像有成千朵银亮的鲜花闪烁着微光。海是我的母亲，湖是我的朋友。”

在改革家庭体制的过渡期，两性之间的关系引起人们的强烈兴趣和争议。青年人逐渐意识到自主选择生活伴侣的天赋权利，但凭父母之命的传统婚姻尚未被打破。没有几个作家没在婚姻问题上碰到过麻烦，因此写文学自白成为一种时尚。郁达夫更是以情爱写作来发泄他的“性饥

渴”。很明显，年轻一代心灵中有一种本能渴望，长期受到社会和伦理的否定或压抑。具有卢梭和陀思妥耶夫斯基某些特性的郁达夫，对这种渴望表达得最为率直。他在《五六年来创作生活的回顾》一文中说，文学作品都是作家的自叙传。这无疑适于他自身。他那本声名狼藉的《日记九种》里边记满了他所犯的罪恶。在每次罪恶之后，他都要用蒸汽浴来冲刷。他最有名的小说是分析一个病态青年的《沉沦》。在其中一章里他这样写道：

槁木的二十一岁！死灰的二十一岁！我真还不如变了矿物质的好，我大约没有开花的日子了。知识我也不要，名誉我也不要，我只要一个能安慰我体谅我的“心”。一副白热的心肠！从这一副心肠里生出来的同情！从同情而来的爱情！我所要求的就是爱情！若有一个美人，能理解我的苦楚，她要我死，我也肯的。若有一个妇人，无论她是美是丑，能真心真意的爱我，我也愿意为她死的。我所要求的就是异性的爱情！

这是对一个受压抑的灵魂多么率真、多么明确的描写！

郁达夫对青年一代的影响称不上好，但他的情感是真诚的，忠实而毫无节制地表达出了那个时代青年人特有的悲哀。可另一位选择几乎同样主题的小说家却不能用同样的眼光来评判。张资平想必为他的机会主义深感后悔，也许他正在诅咒读者的忘恩负义。仅在十五年前，他制造的大量表现三角四边恋爱的小说，曾使全国的少男少女着迷。写作一定给他带来了可观的收入。他小说里的情节都一模一样，人物也似乎有着共通的长处，即性感。结尾恒定不变是悲剧性的，不是因爱上了已婚者而导致自杀，就是被父母突然发现怀了孕。这些老套子很快便遭到批评家的指责，甚至连最热心的读者都感到大失所望。

但是“家庭压迫”的问题没有完全解决，中国的读者从未对此失去兴趣。巴金小说的成功是最好的证明。他是位无政府主义者，以不妥协的精神道出了同代人的诸多不满。他在许多小说里写到矿工和革命者，最近的《家》、《春》、《秋》三部曲讲述的是四川一个家长制家庭的堕落以及年轻一代的反抗。巴金是位有信仰的作家，在法国留学时，成为法国大革命的热情支持者，并把谴责的精神贯穿于自己的作品。他写作不是因为兴趣，而是要抗议。但他从来不把自己假扮成一个艺术家。他在《电椅集》代序中写道：

我没有自由，我没有快乐。一根鞭子永远在后面鞭打我，我不能够躺下来休息。

这根鞭子就是大多数人的受苦和我的受苦。当热情在我的身体内燃烧的时候，我那颗心，我那颗快要炸裂的心是无处安放的，我非得拿起笔写点东西不可。那时候我自己已经不存在了，许多惨痛的图画包围着我，它们使我的手颤动，它们使我的心颤动。艺术算得什么？假若它不能够给多数人带来光明，假若它不能够打击黑暗。整个庞贝城都会被埋在地下，难道将来不会有一把火烧毁艺术的宝藏。……我的文章是直接诉于读者的，我愿意它们广泛地被人阅读，引起人们对光明爱惜，对黑暗憎恨。我不愿意我的文章被少数人珍藏鉴赏。

这一对“为艺术而艺术”创作的非难，在《写作生活的回顾》这段话中表达得更直白：

我时常说我的作品里面混合了我的血和泪，这并不是一句诳话。我不是一个艺术家，我只是把写作当作我的生活的一部分。……我的生活是一个苦痛的挣扎，我的作品也是的。我的每篇小说都是我的追求光明的呼号。光明，这就是我许多年来在暗夜里所呼叫的目标。它带来一幅美丽的图画在前面引诱我。同时惨痛的受苦的图画，象一根鞭子那样在后面鞭打我。……固然人说生命是短促的，艺术是长久的。然而我却始终相信还有一个比艺术更长久的东西。那个东西迷住了我，为了它我甘愿舍弃艺术……

1927年革命军北伐以后，中国的作家变得更关注政治了。个人自省式写作已不时兴，小说家开始把视野转向更大的生活画面。茅盾是第一个尝试写纪念碑式小说的作家，他的《幻灭》、《动摇》、《追求》三部曲描绘了灾难岁月里那场流血的革命。像《上海风暴》的作者安德烈·马尔罗⁶一样，茅盾在武汉时是一名积极的党员，武汉是当时左翼政府的所在地。作为自然主义的热心信徒，他从现实中汲取素材。他的《子夜》全景展现了中国城市和乡村的风貌，可说难度相当大，最独特的地方是生动描述了上海的证券交易。茅盾的有些小说趋向纪实，但他教会了青年一辈作家从现实生活中挖掘素材。

描绘民国生活的阴暗面也是作家普遍关注的一个主题。叶绍钧形象地描写学校老师和中年人，张天翼笔下多是公务员和孩子们。他的《洋泾浜奇侠》是我们最好的以流浪汉冒险为题材的小说之一。丁玲的创作广为人知，她的《在黑暗中》和《母亲》赢得了许多赞扬。凌叔华写了一些轻快的小说。她是陈西滢教授的太太，陈是一位知识渊博却非学究气的批评家。凌本人是位画家，她的学识进一步提高了她的创造性才能。我并不是想把所有的赞美都给予我们的女作家，但这里我还是不能

不提一下林徽因，她的《九十九度中》等小说同样迷人。她是位多才多艺的艺术家，并像弗吉尼亚·吴尔夫一样钟爱实验小说的写作，记录生活的闪光一瞬，而非静止的“事实”。她能够调动潜在的知觉，从而深化了创作效果。

从1916年到1930年“左联”创建，任何形式的白话写作似乎都被接受了。而评判标准也似乎更重视语言而非艺术。革命文学期间，左翼批评家们更关心的是意识形态。杰出的左翼批评家王淑明这样写道他如何成为一名文学批评家：“我跟资本主义社会的美学理论说再见，开始认真研究社会主义。”当时，艺术被作为“技巧”轻易地摒弃。结果许多小说沦为干瘪的革命故事或某种政治信念的戏剧化演绎。

沈从文常被描述成一个文体家。确实，他的用字是如此深思熟虑，魅力无限。读他的小说，你的心境好像是在读诗。他承认他所要做的就是捕捉瞬间的感觉和形象，这些常常都是那么的新鲜，充满印象色彩。例如，描绘一个胆怯的年轻人，他会说他害羞得如一株小杏树。沈从文最本质的特色是，他的写作世界完全是他自己的：士兵、内陆公务员、湘西农民和边界地区的部落成员。他用生花妙笔把这些人物丰富的对话、独特的生活及其悲剧故事活脱脱地展现出来。他就是在他们中间出生和成长的，他当过士兵，还当过税收员，踏遍了那里的每一寸土地。他在《边城》（英文由项美丽和邵洵美合译，在香港发表于《天下月刊》）序文里坦露出自己的创作心态：

对于农人与兵士，怀了不可言说的温爱，这点感情在我一切作品中，随处都可以看出。我从不隐讳这点感情。我生长于作品中所写到的那类小乡城，我的祖父，父亲以及兄弟，全列身军籍：死去的莫不在职务上死去，不死的也必然的将在职务上终其一生。就我所接触的世界一面，来叙述他们的爱憎与哀乐，即或这枝笔如何笨拙，或尚不至于离题太远。因为他们是正直的，诚实的，生活有些方面极其伟大，有些方面又极其平凡，性情有些方面极其美丽，有些方面又极其琐碎……来提到二十年来的内战，使一些首当其冲的农民，性格灵魂被大力所压，失去了原来的质朴，勤俭，和平，正直的型范以后，成了一个什么样子的新东西。他们受横征暴敛以及鸦片烟的毒害，变成了如何穷困与懒惰！我将把这个民族为历史所带走向一个不可知的命运中前进时，一些小人物在变动中的忧患，与由于营养不足所产生的“活下去”以及“怎样活下去”的观念和欲望，来作朴素的叙述。

总的来说，战争对中国文学尤其小说称得上祸中得福。抗战前，中

国作家身上大多存在着两种令人惋惜的症状：他们或者缺乏对现实生活的坚实基础，或者所用辞藻离人民太远。战事把作家赶到生活中去了。他们第一次闻到稻田里的香味，看到迷人的橘林，感受到农村形形色色有意思的生活。最重要的是他们跟人民——居住在远离沿海、完全不曾欧化过的人民，有了直接接触。此外，他们还经历着战争，目睹战争的残酷以及人们在战时所表现出的英勇。因此，我们可以寄厚望于战后的中国小说家。

3. POETRY: AT THE CROSSROADS

The modern Chinese poet has appeared to be very fidgety. The question of "form" has been an eternal paradox. When the poet feels like a nightingale, he longs to get rid of any restraining patterns. But when he realizes that poetry, like painting, needs to be framed, his desire for acquiring such a frame is equally strong. So many poetical forms have been invented and tested, either by individuals or by groups of writers. So far, no conclusion of any kind has been reached.

Dr. Hu Shih may be called the first vernacular poet. His pioneer collection of verses was entitled "Experiments", which appeared early in 1920. The early poems were nearly all experimental. Often they were composed with the flimsiest feelings and appear uncouth in form. There was every attempt to democratize poetry but scarcely any to ennoble it. However, their merit lies not so much in versification as in their revolutionary audacity. Except for men of great genius, Chinese prosody had for centuries been a very rigid yoke. Its metrical rules had become mechanical and its images hackneyed. The Experimentalists emancipated Chinese poetry from the traditional bondage. But in doing so, they also eliminated the frontier between poetry and prose.

Another achievement of the Experimentalists was to broaden the range of poetical themes. In the past, Chinese poetry seemed to exist only to celebrate "the wind, the flowers, the snow and the moon". While this concentration on nature explains why many of our classical poets are still enjoyed to-day, even outside of China, it certainly did not suit the Republican Chinese, who wished literature to play its part in the social movement. There was also the strong desire to explore new pastures. With their prose-like poetry, they broke the traditional limitations of subject-matter, thus freeing future poets to write as the spirit moved them. A few poets addicted to notoriety filled their lines

with political or erotic verbiage. But on the whole, nature's reflection on the human mind is still the favourite theme of Chinese poets.

This complete emancipation from form was soon found to be uncomfortable. Like a prima donna, poetry needed to be dressed, elegantly or magnificently. It began to feel ashamed of its nudity. A cloak was obviously in demand. Hsü Chih-mo, the leading poet of the Crescent Moon Society, and himself well read both in English and Chinese poetry, started the movement to restore musical qualities to verse. He made various bold attempts to introduce English metres into Chinese poetry, from Elizabethan sonnets to Byronic stanzas. Mr. Harold Acton, in his unique volume of *Modern Chinese Poetry* (Duckworth, London, 1936), wrote:

"When Hsü was consciously introducing the western rhapsody, he rushed to the antipodes of classical Chinese poetry, wallowing in overstatement and repetition and cumbering his lines with exuberant images which here and there ring false, here and there are exquisite. By exquisite we mean that they have that perfection of purely Chinese refinement which can only be communicated to foreigners by visual means, such as the finest examples of cut jade. Rhythmic vitality Hsü possessed; discipline, alas, he lacked."

The poets of the Crescent Moon Society, besides translating William Blake, Paul Valéry and other foreign masters, produced a number of original poets, such as Wen Yi-to, the author of *Dead Water*, Ch'en Mêng-chia and Pien Chih-lin. But the newly adapted frame became mechanical before it was well shaped. The symmetrical stanzas were sarcastically nicknamed "soya-bean-cake". The rigid sonnet seemed especially unpalatable to Chinese poets. So another mutiny began. This time, the impetus came from Walt Whitman and the French symbolists. Kuo Mo-jo, the leader of the Creation Society, revolted against it because his self-expression was strangled by such rigid forms. Instead of writing formal lines, weighing auditory and visual images of each word, he let his emotions pour forth in a passionate flood. For instance, he curses the modern metropolis thus:

"O pulse of the great city!
Throbs of life!
Beating, blowing and shouting,
Gushing, flying and jumping.
The horizon is veiled in mist!
My heart leaps out of my mouth!"

(*Modern Chinese Poetry*, p.87.)

The Creation Society first heralded romanticism, then socialism. In all activities, the versatile Kuo played the dominant part. During the romantic period", he assiduously translated the *Rubá'iyát*, *Faust*, and Shelley into verse. He wrote stories, plays, poems and literary criticism. The profuse passion in his poems did not please critics of the Anglo-American school, such as Professor Liang Shih-ch'iu who preferred restraint and decorum to inspiration. But that did not prevent Kuo from becoming popular. He was, in fact, regarded as a hero. What he revolted against was not only the rigidity of form imposed on free spirits. Like Lu Hsün, he revolted against the extravagant delicacy and dandyism of the Ivory Tower clique. But when the ivory was replaced by cheaper material, while remaining a tower, popular support was gradually withdrawn. However, I cannot help thinking that the "Poems for Recitation" which have become so popular a product of the Sino-Japanese war are a revival of Kuo's poems in the twenties.

Another group of rebels against "form" was of an aristocratic type. They seemed to hate form as much as lucidity. Li Chin-fa, a sculptor who had studied in Paris, was a fervent disciple of the French symbolists. With his magical fingers, he tried to chisel some verses. The result was that he created a new type of poem, filled with exotic images, remote metaphors, and frequent allusions to European mythology. Since the success of the vernacular, he was the first writer

who did all he could to mingle the vernacular with the classical. In the long run, Li's influence was beneficial. He extended the vocabulary of the "plain language". But what struck his readers most was his images. Often they were sensual, as in his "Tenderness":

"With my presumptuous finger,
I feel the warmth of your skin.
The young deer went astray in the wood,
While only the scent of the dead leaves remains."

Sometimes his lines showed a great tendency to contemplation, tinged with morbidity. He was very fond of antiquity, unlike most of the early rebels. However, the antiquity that he buried himself in was more European than Chinese. In "Never to Return", he begins:

"Go o, my lad,
To the cities of yore
—They sleep in the night of centuries.
The streams sing monotonous songs,
Like the sighs of an Oriental poet.
Their hearts were like rocks, Thickly covered with moss..."

Though Li himself went back to sculpture, this type of poem continued to develop. Combined with the later influence of Paul Valéry and T. S. Eliot, it flourished through the works of Tai Wang-shu, Pien Chih-lin and Ho Chi-fang. They maintained free verse as a form and the imagery of impressionism. The poetic content, however, became even more elusive. They are sometimes so suggestive that only readers capable of very far-reaching associative powers could read between the cryptic lines. Liu Hsi-wei, the impressionistic critic, made many successful adventures among the souls of contemporary authors. He tried, in his gaudy style, to interpret Pien's "Round Treasure Casket". Seizing the stanza:

"Never enter any watchmaker's shop,
To hear your youth nibbled away.
Never go to any antique shop,
To buy the trinkets of your grandpa..."

The adventurer imagined that the "treasure casket" symbolized the present, a bridge over the past and the future. When he reached the stanza:

"The moon has adorned your window,
And you somebody's dream,"

he concluded that the poet interpreted life as an embellishment. Poets usually are too aloof to speak to critics. But Pien could not contain himself. In an open letter to the sweating critic, he told him that he was "completely mistaken". The poet was thinking of relativity.

That Chinese readers complained of the growing ambiguity of the new poetry was only natural. Sometimes they blamed Mr. Paul Valéry, sometimes Mr. T. S. Eliot. The Japanese warplanes destroyed our people and buildings. They have also destroyed that ivory tower which the more privileged intellectuals in China had been building. In many ways, the aesthetes had helped to deepen the vernacular literature which was founded by people more socially than artistically conscious. The attempt to deepen it was natural and had been beneficial up to a point. But in view of the vast illiterate population, it was undoubtedly an oasis. The War has killed much literature for the introvert, but it has widened the horizon, and breathed vitality fresh from the good earth.

叁 诗歌：在十字路口

中国现代诗人显得非常烦躁不安，诗的“形式”是个永恒的难题。当诗人感到自己像是只夜莺时，他就希望摆脱任何拘束他的形式。然而当他意识到诗也像绘画一样，需要有个框框时，他同样强烈地希望回到这样一个框框。许多个人或流派发明并实验着如此多样的诗的形式，但到目前为止，并没得出什么结论。

胡适博士称得上是第一位白话诗人，早在1920年就出版了先锋诗集，起名叫《尝试集》。早期的白话诗几乎都带有实验性，这些诗常常感情肤浅，形式笨拙。人们用尽全力使诗歌大众化，但少有人努力抬高诗的地位。与其说白话诗的自身价值在诗律上的尝试，倒不如说就在其大胆革命性。除了伟大的天才，中国诗歌的韵律多少世纪以来一直被视为一种极其死板的束缚。它的格律规则是那么的机械，诗的意象也很陈腐。新诗实验者们把中国诗从传统的束缚中解放出来，但他们这样做，也消除了诗歌和散文之间的界限。

实验主义者的又一成就是拓宽了诗歌主题的范围。过去，中国诗似乎只为吟咏“风花雪月”而存在。我们许多旧体诗人因着这“风花雪月”，时至今日在国内外都为人所传诵，但它确实已不能适应希望文学在社会运动中起作用的民国人的需要。他们带着探索新领域的强烈愿望，以散文文化的诗歌创作，打破了主题思想上的传统限制，为后来的诗人解开束缚，笔随心走。当然，有些嗜恶成瘾的诗人诗行中充斥着政治或色情的冗长诗句。但总的来说，人类头脑对自然界的反映还是中国诗人最喜欢表达的主题。

人们很快发现这种诗歌形式上的彻底解放并不自在。就像歌剧的首席女演员，诗歌同样需要优雅或华丽的装扮。它开始对裸体感到羞臊，显然需要一件外套。新月社代表诗人徐志摩，熟谙英国和中国诗歌，提出诗歌创作还是要回到音乐性上来。他作了许多大胆尝试，把英国的韵律诗，从伊丽莎白时代的十四行到拜伦时代的诗歌，介绍给中国诗歌界。哈洛德·艾克敦先生在他那卷独特的《中国现代诗》（伦敦达克沃思1936年出版）里写道：

在徐志摩有意识地评介西方的狂想曲时，他已经走到了精致绝妙的中国古典诗歌

的反面。他沉迷于夸张和重复，字里行间过度堆砌意象，有的虚假，有的则精巧。说它们精巧，是指具有纯粹中国式的风雅，只能以视觉化的手段表达给外国人，比如最精美的玉雕。徐志摩掌握了韵律的生命力，可是，天哪，他缺乏约束。

新月社诗人在翻译威廉·布莱克⁷、保罗·瓦莱里⁸和其他外国著名诗人的诗作之外，还产生了几位原创诗人，如《死水》的作者闻一多、陈梦家和卞之琳。但新的诗歌框框在成形前显得那么机械，对称的诗节被讥讽为“豆饼”。严格的十四行似乎特别不适合中国诗人的口味。于是，新一轮反叛开始了。这一次，动力来自沃尔特·惠特曼⁹和法国象征派诗人。创造社的领导人郭沫若反抗十四行，是因为他的自我表现被这种严格的形式窒息了。他不拘泥诗行的形式，不估量每一个词听觉和视觉上的意象，而是任情感山洪暴发般喷涌。例如，他这样诅咒现代大都会：

大都会的脉搏呀！
生的鼓动呀！
打着在，吹着在，叫着在，
喷着在，飞着在，跳着在，
四面的天郊烟幕朦胧了！
我的心脏呀，快要跳出口来了！¹⁰

创造社最先预示了浪漫主义的到来，然后是社会主义。多才多艺的郭沫若在所有活动中都起着主导作用。在“浪漫派”时期，他刻苦翻译出《鲁拜集》、《浮士德》和雪莱的诗。他写小说、戏剧、诗，也写文学批评。像梁实秋教授那样的英美派批评家，并不喜欢他诗里的充沛激情，他们更喜欢灵感的节制和得体运用。但这不能妨碍郭沫若成为受欢迎的诗人。事实上，他被视为英雄。他所要反叛的不仅仅是影响自由精神表达的僵硬的形式。像鲁迅一样，他反叛的是象牙塔派的矫揉造作的时髦。当象牙被廉价的材料取代时，塔虽仍是塔，却已逐步失去大众的支持。然而，我禁不住想，抗日战争使“朗诵诗”如此受欢迎，真是二十年代郭沫若诗的复活。

另一派“形式”反叛者具有贵族气派，形式与简洁都是他们所嫌恶的。在巴黎学过雕塑的李金发，是法国象征派的热心信徒。他要用他的魔指雕塑出诗行。他创造出一种新形式的诗，充满了异国情调的意象和久远的隐喻，并时常借用欧洲神话典故。自从白话写作以来，他是第一

位尽其所能把白话和文言混在一起的作家。从长远来看，李金发的影响是有益的。他扩展了这种“无雕饰的语言”的词汇量。最触动读者的，是他的意象，这意象常是肉欲的，如《温柔》：

我以冒昧的指尖，
感到你肌肤的暖气，
小鹿在林里失路，
仅有死叶之声息。

有时，他的诗又显露出冥想的趋向，染上病态的气味。与大多数早期叛逆者不一样，他非常喜欢古代。但他专注的这个古代是欧化超过中国化，在《永不回来》诗中，他这样开头：

与我远去，孩子，
在老旧之中古的城里，
——他们睡眠于世纪之夜，——
流泉唱着单调之歌，
如东方诗人之叹息。
他们岩石似的心房，既生满苔痕。

虽然李金发回到他的雕塑中了，但这种形式的诗歌继续发展。在后来戴望舒、卞之琳、何其芳的诗作中，更兼具了保罗·瓦莱里和T. S.艾略特的影响。他们保持了自由韵的形式以及印象主义的意象。但诗的内容变得更难以把握，有时暗示性太强，以致只有具备相当联想能力的读者才能读出隐藏在诗行间的寓意。印象主义批评家刘西渭多次成功解读现代作家的心灵之歌。他试图以其绚丽的文风破译卞之琳的《圆宝盆》：

别上什么钟表店
听你的青春被蚕食，
别上什么古董铺
买你家祖父的旧摆设。

冒险家想象那“圆宝盆”象征现在，一座横跨过去与未来的桥。当他读到下面一节：

明月装饰了你的窗子，
你装饰了别人的梦。

他断定诗人是把生活喻为一种装饰。诗人通常都是远离批评家，不会说什么。卞之琳可不克制自己，他在致这位吃力不讨好的批评家的一封公开信中，告诉他，他想的“完全错了”。诗人想的是事物的相对性。

中国的读者抱怨新诗的多重解释是很自然的。他们有时责怪瓦莱里，有时责怪艾略特。日本轰炸机摧毁了我们的人民和建筑，还摧毁了享有特权的中国知识分子一直建造着的象牙塔。社会意识高于艺术意识的学者创造了白话文学，唯美主义者则以多种方式使白话文学得到深化。他们这种深化的努力是自然的，在一定程度上也是有益的。但由于中国未受教育的人口太多，它无疑只能是沙漠中的一块绿洲。战争毁掉了大量的内省文学，但也拓宽了文学的范围，带来富有泥土气息的鲜活生命力。

4. DRAMA: A LOUDSPEAKER

It is no exaggeration to say that the modern drama is a complete departure from the traditional drama. Plays with realistic scenery and dialogue in the daily spoken language are the orthodox form to-day, but were entirely foreign some thirty years ago. The conventional stage art was the equivalent of opera and ballet combined. Unlike other forms of vernacular literature, the modern Chinese drama originated in adaptations of European plays. The first experiment was *La Dame aux Camélias* in 1907, followed by *Uncle Tom's Cabin*. The choice was not difficult to explain. Young Chinese were then suffering acutely from parental oppression, especially where marriage was concerned, while they were bound to sympathize with the downtrodden Negroes. When a foreign play, with all its exotic appeal, reflected our own thoughts so much better than our native plays, it naturally provoked enthusiasm. The same was true of the popularity of Lady Gregory's *Rising of the Moon* after the Japanese invasion of Manchuria. But it was Ibsen's plays which led the young Chinese dramatists to the highway—the road of social reform.

The influence of Ibsen was not confined to our dramatists. As a social critic, an uncompromising rebel against conventions, he won the heart of every Chinese writer. For a time, "problem plays" shared the vogue of "problem novels". From this Norwegian dramatist, Chinese writers learned that the highest mission of the drama was to expose the defects and reveal the absurdities of existing society. One playwright apologetically wrote in an epilogue: "Although this play is worthless in technique, I am glad to say that it has dealt with marriage and rural bankruptcy, the two cardinal problems of the day." In those days, it sounded convincing enough. The People's Theatre, in its opening announcement in 1921, declared: "The age to look down upon drama as a form of recreation has definitely passed. The modern

theatre is a wheel to push forward social progress and a microscope to detect the diseases of our environment. It is a pitiless mirror in which all the seamy sides of our community life should be reflected."

In the course of transformation, dualism was unavoidable. Many early vernacular poems were really paraphrases of classical verse. The essayists did not even bother to make a thorough change in diction. Stock phrases used in the classics appeared from time to time, betraying the tenacity of human inertia. In the first period of modern Chinese drama, roughly between 1907 and 1915, the new plays were known as "reformed plays"(*wên ming hsi*). It was just the very beginning of the breakaway from an age-long tradition. The vital force of this period was the Spring Willow Society formed in 1907 by Chinese students in Tokio. Later, they toured the Yangtse valley and innumerable dramatic societies sprang up all over the country.

Most of these societies were anxious to make the new drama a success; at the same time they wanted it to serve as a loudspeaker for the emancipation movement. The blend of these twin motives was somewhat clumsily managed. Unfortunately, having broken off with the operatic tradition, the sole virtue of the new drama they grasped was the employment of plain dialogue. Except for some theatrical improvements, such as the ban on the shouting of "bravo, bravo!" in the middle of a play, which was the custom of old-fashioned audiences, the contribution of *wên ming hsi* to dramatic art was negligible. In fact, they sometimes even disposed of any written text. Actors and actresses were barely told the plot and what respective roles they were to impersonate. This resulted in the divorce of *wên ming hsi* from literature, and the more conscientious members left the group and became serious students of drama, such as Ou-yang Yu-chi'en, who later became actor, director and playwright. The rest went into vaudeville which still survives in modern Shanghai, producing endless "serial plays", such as *Fire over the Red Lily Abbey*, with demi-gods flying about the stage.

During this period Chinese dramatists seemed to be hesitating at

the crossroads. The "National Drama" school argued that our traditional operatic singing and symbolic scenery were really unique in the world. They were impressionistic and rhythmic, while Western realistic plays were merely mimic shows. At the other extreme, there were those who advocated abolishing the old form. Their contention was that singing could not possibly express the complicated feelings of modern man and that there was too much feudalism in the conventional drama. One thorough-minded critic curtly remarked that before establishing a republic, we had to overthrow the empire. Hence, to establish the new drama, all opera houses in the country should be closed at once. But there was yet a third group who, while admitting that traditional operas conflicted with the spirit of realism which was the backbone of vernacular literature, thought the traditional drama should be preserved as a form of entertainment for particular audiences and as a historic art for the students. This view was first expressed by the late Professor Liu Fu who must have seen the glories of Western opera in Paris. The Academia Sinica and other cultural institutions have done much to preserve and develop this traditional art. The visits of Mei Lan-fang to America and Moscow and of Ch'êng Yen-ch'iu to Europe were great events. But the orthodoxy of modern literary drama has definitely been established.

The decline of *wên ming hsi* taught the country a valuable lesson. To build a solid foundation for the new drama, we needed playwrights. Another reaction to their failure was the attempt to make drama entirely nonprofessional, so as to dissociate themselves from the vaudeville stage. "We refuse to be directed from the booking-office!" they solemnly declared. Many plays have been written by Hsiung Foo-hsi, Ch'ên Ta-pei and Hung Shên. *The Three Rebellious Women* of Kuo Mo-jo was a great success in combining modern ideas with historical themes. The late Hsü Chih-mo collaborated with his wife in a beautiful symbolic play, *The Pien K'un Hill*. Ting Hsi-lin's pleasantly satiric plays show the influence of A. A. Milne. Indeed, most dramatists, with the "problem play" in mind, worked quite

independently of their audience. The settings were often laid in some corner of the social inferno, a polygamous family or a village with a villainous squire. A play frequently meant a torrent of yelling and complaint against social evils. Then, the exposure and the cold but undramatic analysis of the social evil concerned, often in the form of a sermon. The more naive ones often ended with an idealist, holding a burning torch as he gazed with shining eyes towards the distant but rosy future.

In this immature stage, dramatic education was already progressing. The "New China Dramatic Society" in Peking had a membership of two thousand with forty-eight affiliated organizations. The Peking College of Fine Arts founded its drama department in 1925 and the Jên Yi Drama School, though enjoying a brief life of ten months only, was perhaps the first school to devote itself to drama proper. These worthy attempts sowed seeds for the future Little Theatre Movement. A number of successful film actors were trained at that time. Another interesting development was the popularity of women appearing with men on the stage. It probably began with Hung Shên's adaptation of *Lady Windermere's Fan* in 1924. Before that, the part of Nora in Ibsen's *Doll's House* was always played by a man and it was regarded as an honour to be chosen for the role. In 1926, the adaptation of James Barrie's *Dear Brutus* scored a success. The Education Board of Kiangsu Province were so pleased that they addressed an encomium to the producer acknowledging that "it is a very valuable play, with subtle philosophical implications, teaching men to preserve their original personality".

The amateur dramatists succeeded in ridding the theatre of its mercenary character, but they also deprived it of the power to entertain. Admittedly, the monotony of a certain type of play bored even the most enthusiastic of its patrons. In 1921, Wang Chung-hsien experienced a blow. He produced *Mrs. Warren's Profession* in Shanghai to a non-student audience. The performance was conspicuously advertised in the newspapers, but the booking was barely half that of

an ordinary variety show. And when Mrs. Warren began to relate her life story to Vivi in the second act, several fashionable ladies in the front stalls left the theatre—and not without grumbling. The good-humoured producer afterwards analysed his audience thus:

"Some wholly failed to understand what was happening on the stage. Some understood but found the plot lacking surprise. There were those who had moral objections to Mrs. Warren herself, and others who disliked the excessive repetition of such new terms as the equality of the sexes. To those who had seen the play acted abroad, our acting left much to be desired."

As a conclusion, Wang suggested a compromise. He wanted to have plays "with simple but progressive ideas, dramatized in rather complex plots. Thus we can assure the intelligentsia that we are on the right track while sparing the non-intellectual audience from yawning."

When the Northern Campaign of the Revolutionary Army reached the Yangtse in 1926, Kuo Mo-jo and many other dramatists joined the steadily growing force. Drama again served as a loudspeaker. This was followed by the immense popularity of the *Nan Kuo* Movement. T'ien Han, the leader, wrote tens of plays during their itinerary performances up and down the Yangtse. They were mostly very sentimental plays. *The Tragedy on the Lake*, for instance, dealt with a frustrating love affair. It was often rumoured that a number of suicides had been caused by it. The production of Oscar Wilde's *Salome*, with the courageous and talented Miss Yü Shan, was an outstanding success. Its violent erotic colour had a special appeal for the anti-Confucian younger generation of that time. But there was yet another foreign play which gained widespread popularity, namely, *Roar China!*, a Soviet Russian play about the massacre of Wan Hsien.

The Japanese invasion of Manchuria in 1931 did much to stimulate dramatic activities in China. Under a strict Government ban on anything anti-Japanese at the time, playwrights had to express their patriotism in a veiled form. The Amateur Theatre in Shanghai

made great strides in all aspects of the stage. Chen Baichen's *T'ai P'ing Rebellion* was quite exceptional. They also produced a number of classical plays of the West, such as Gogol's *Inspector* and A. Ostrovsky's *Storm*. Their production of *Romeo and Juliet* was also remarkable. In the past years, there had been a number of Chinese who went abroad to study stage design and other branches of theatrical technique. The Amateur Theatre rallied their combined efforts. The most amazing thing about their success was that the plays were mainly left as in the original, except the dialogue, which was rendered into Chinese. Compared with the audience of *Mrs. Warren's Profession*, Chinese theatre-goers seemed also to have become infinitely more receptive to foreign forms.

But the most fundamental progress still lies in playwriting. In this respect, there is no doubt that Ts'ao Yü achieved the peak. Being a celebrated amateur actor in North China and a professor of literature, he happily blended stagecraft with scholarship. Beside this, he is one of the most original and brilliant writers of the day. At Tsinghua University, Peking, he acquired a remarkable knowledge of European dramatic tradition, from Greek tragedies to the lyrical realism of Eugene O'Neill. His *Thunderstorm*, published and produced in 1936, was a memorable event. Technically it was the first full-length play, with a prologue and an epilogue superadded. But it was the dramatic force of this unusual tragedy that achieved an unprecedented popularity. Hundreds of performances of this play were given by the Travelling Dramatic Society and it was very soon adapted for the films. This was followed by *Sunrise* and two others. Ts'ao Yü was a profoundly conscientious playwright. He demonstrated how one can benefit from Europe without being Europeanized. Yet he has not fully succeeded in reconciling his artistic with his social consciousness. After being accused of fatalism in *Thunderstorm*, he effectively stressed his optimism in the last act of *Sunrise*, when he made the workers sing as the sun rises. But even in the portrayal of character, he has shown unsurpassed dexterity.

When the war against Japanese aggression broke out in 1937, drama was soon bundled into the publicity-van and was again employed as a loudspeaker. Patriotic repertory companies and the dramatic section of the political department of China's M. O. I. toured through the villages and towns of the interior. The attempt at experimenting with stage art dwindled and the writing of pure drama has not been greatly encouraged. Drama has also served as an effective weapon in time of national crisis in China since the Revolution of 1911. For the duration of the war, the function of drama was to awaken and arouse the people. As most performances were held in the open air, plays with the minimum of costume and practically no scenery were preferred for practical reasons. This led to the creation of street-plays, the best known of which is *Lay Down Your Whip!*. To serve their country at this crucial moment, dramatists not only sacrificed their technical equipment, often they had to risk their lives on tour behind the Japanese lines. But they realize that the country depends on them to maintain contact with Chinese people living in the guerrilla areas. One of these plays, written by Miss Ting Ling for the Chinese peasants, was translated into English and produced early last February at Santaniketan, the University of Peace, founded in Bengal by Tagore. Its title is *Reunion*. Professor Aaronson, producer of the play, wrote an article after its performance, saying: "We have not chosen this play just because of its political content. It has strong human interest. It is an episode of contemporary China. It may happen every day in the areas occupied by the Japanese troops. We do not wish to foment hatred towards the Japanese, but we hope to make it manifest how aggression can destroy the well-being of humanity.

肆 戏剧：扩音喇叭

毋庸夸张地说，现代中国话剧与传统中国戏剧截然不同。如今，背景逼真、使用日常语言对话的话剧是公认的标准形式，但这在三十年前却是非常陌生的。传统的舞台艺术相当于歌剧和芭蕾的混合体。与其他白话文学形式不同，现代中国话剧源于对欧洲戏的改编。最早的实验是1907年《茶花女》和《黑奴吁天录》的上演。这一选择不难理解。当时中国的年轻人深受父母的压制，尤其在婚姻问题上；与此同时，他们同情被蹂躏的黑奴。当外国戏以其异乎寻常的魅力，比我们自家的戏更能反映我们的思想时，自然就引起共鸣。同样，日本侵略东北之后，格雷戈里夫人的《月亮上升》也火了起来。然而把年轻的中国戏剧家引上社会改革大道的，是易卜生的戏剧。

易卜生不仅影响了我们的戏剧家，作为一个不屈反抗传统的社会批评家，他赢得了每一位中国作家的心。曾有一度，“问题剧”同“问题小说”一样流行。中国作家从这位挪威戏剧家身上学到了戏剧的最高使命在于揭露现行社会的弊端和荒谬。有位戏剧家在一篇跋文里写道：“尽管这出戏技巧上不足取，但我要说，它涉及了婚姻和农村破产这两个当今最基本的问题。”在当时，这已足够叫人信服了。人民剧院在1921年揭幕时宣告：“把戏剧贬成是一种消遣娱乐形式的时代已经成为过去。现代剧院是推动社会进步的车轮和发现社会病症的显微镜。它是一面无情的镜子，我们社会生活中所有丑恶的一面都将被反射出来。”

在转型期，双重性是难以避免的。许多早期的白话诗真的就是古诗的转译。随笔作者更是无心彻底改变措辞，古文中常用的固定词句不时出现，这也暴露了人类惰性的顽固。1907年到1915年是现代中国话剧的发端期，以“文明戏”著称的新戏开始脱离传统戏。由中国留日学生1907年在东京成立的春柳社，是这一时期最具活力的一股力量。后来，他们在长江流域巡回演出；紧接着，全国各地成立了无数的戏剧社团。

这些社团大多一方面希望新戏成功，一方面又想让新戏充当思想解放运动的扩音喇叭。但这两个目的的结合多少有些拙劣。不幸的是，脱离了歌剧式的传统以后，他们所把握的新戏的唯一特征就只剩下平实的对话了。除了一些剧场的改进之外，如禁止在演出中间像老派观众似的

喊“好，好！”，“文明戏”对戏剧艺术的贡献实在微不足道。事实上，他们有时连脚本也没有，男女演员很少知道剧情和各自所要扮演的角色。这导致“文明戏”从文学中脱离出来，结果尽责的成员离开社团，开始认真学习戏剧，像欧阳予倩，后来成为一名演员、导演和剧作家。其他人则跑去做歌舞杂耍表演，像《火烧红莲寺》那种永无休止的“连续剧”，半人半神地在舞台上满天飞，现代上海还能见到这种表演。

这一时期的中国戏剧家似乎处在十字路口，迟疑不决。“国剧”派提出，我们传统的歌剧式演唱和象征性的布景在世界上确实独一无二，那么富有音乐的韵律，富有印象主义的氛围，而西方的现实主义戏剧只是些模仿的表演。但反对派提出取消旧的形式又走向了另一个极端。他们认为，现代人复杂的情感不可能通过演唱表达出来，而且，传统戏里有太多封建主义的东西。一位极端的批评家直言，建立共和，得推翻帝制，因此，要建立新戏，全国的老式剧场应立即关门。还有第三股力量，在承认传统戏与白话文学的支柱——现实主义精神相矛盾的同时，认为该把传统戏作为娱乐特殊观众的形式，作为一种教学的历史艺术保存下来。这一观点最早由已故的刘复教授提出，想必他在巴黎目睹过西洋歌剧的辉煌。“中央研究院”和其他一些文化机构已经为保护和发展传统艺术做了许多，梅兰芳访问美国和莫斯科、程砚秋去欧洲都是大事件。然而，现代文学戏剧的正统观念无疑已经建立了起来。

“文明戏”的衰落给我们上了深刻的一课，要为新戏建立牢固的基础，我们需要剧作家。对“文明戏”失败的另一反应，是试图让新戏完全非职业化，以便把它从杂耍舞台上分离出来。他们庄严宣告：“我们拒绝受票房支配！”熊佛西、陈大悲和洪深写了许多戏。郭沫若的《三个叛逆的女性》把现代思想和历史主题糅合在一起，获得很大成功。已故的徐志摩和他的妻子合写出一部优美的象征剧《卞昆冈》。从丁西林愉快的讽刺剧可以看出A. A. 米尔恩¹¹的影响。确实，大多数剧作家是头脑中装着“问题剧”，完全独立于观众而创作。背景常被安置在一些社会地狱似的角落：一个一夫多妻制的家庭、一个有着腐败乡绅的村庄。一场戏常常意味着连珠炮似的揭露和对社会邪恶的控诉，接着是对该社会邪恶的暴露以及冷酷而非戏剧化的分析，通常是宣教式的。更天真的剧结尾处常是一个理想主义者手擎火炬，眼睛放光，凝视着远方光明的未来。

在这样未成熟的舞台上，我们的戏剧教育已经取得了进步。北京的“新中华戏剧协社”已经有四十八个附属机构和二千多个个人会员。

1925年，国立北京艺术专门学校成立了戏剧系，而只存在了十个月的“人艺戏剧专门学校”或许是中国最早的纯戏剧院校。这些有价值的努力为后来的“小剧场运动”撒播下种子。后来许多成功的电影演员正是在那时培养的。男女同台合演是又一有趣的进步，好像始自1924年洪深根据《温德米尔夫人的扇子》¹²改编的《少奶奶的扇子》。在此之前，易卜生《傀儡家庭》中的娜拉一角总是由男演员反串，能够担当此角是一种荣誉。1926年，根据詹姆斯·巴里¹³《亲爱的布鲁特斯》改编的《第二梦》获得成功。江苏省教育厅非常满意，给予高度赞扬：“这是一出有价值的戏，富有微妙的哲学内涵，教给人们保持自己原初的个性。”

业余剧作家们成功剔除了剧院的营利性质，但同时也剥夺了其娱乐能力。坦白地说，只上演某种类型单调的戏，即便最热心的支持者也会厌烦。1921年，汪仲贤遭受了一次沉重打击。他在上海为非学生观众上演《华奶奶之职业》¹⁴，报纸上登出显著的演出广告，但订票连一场普通杂耍表演的一半还不到。当第二幕华伦夫人开始向维维讲述自己的生活故事时，几位坐在前排的时髦太太吵吵嚷嚷地退场了。好幽默的汪仲贤后来这样分析那些观众：

有些人是完全不知所云，有些人看明白了，可觉得情节不够离奇。有些人在道德上是不赞成华伦夫人的，而另一些人并不喜欢过分强调像性别平等这样的新词。对那些在国外看过此剧演出的，我们的演出又差得太远。¹⁵

汪得出一个妥协的结论，他要“拿极浅近的新思想，混合入极有趣味的情节里面，编成功叫大家要看的剧本。以后的方针——我们演剧不能绝对的去迎合社会心理，也不能绝对的去求知识阶级看了适意”。

1926年，北伐革命军到了长江边，郭沫若同许多剧作家一起毅然加入日益壮大的队伍。戏剧再次充当了扩音喇叭。这之后，“南国艺术运动”开始受到普遍欢迎。“南国社”领导人田汉为在长江沿岸的巡回演出写了十几个剧本，这些大多是感情戏。例如，《湖上的悲剧》涉及的是一宗失败了的爱情事件，常有谣传说，一些人因看了这出戏而自杀。由于余珊小姐热情泼辣富有天赋的表演，使奥斯卡·王尔德《莎乐美》的演出获得极大的成功。它以其强烈的性爱色彩，对当时反对孔儒的青年一代具有极强的吸引力。还有一出外国戏赢得了广泛的关注，这就是一位苏联剧作家根据万县惨案写成的《怒吼吧，中国！》。

1931年日本入侵东北，极大地刺激了中国的戏剧活动。那时，政府严令禁止任何反日的行为，剧作家们只好以隐含的形式来表现爱国主义。上海业余实验剧团在舞台装置各方面迈进了一大步，在上演陈白尘的《太平天国》时收到独特效果。他们还演出过一系列西方的古典戏，像果戈理的《钦差大臣》、A. 奥斯特洛夫斯基的《大雷雨》，《罗密欧与朱丽叶》也非常出色。过去几年，一些国人曾去国外学习过舞台设计和戏剧技巧其他学科，业余实验剧团将这些人聚集起来，他们最令人惊异的成功，是最大限度地保持了外国戏的原貌，除了将对话译成中文。与观看《华奶奶之职业》的观众相比，现在的戏迷已变得更易接受外国戏剧的形式。

但最根本的进步还是在剧本的创作上，就此而论，曹禺无疑达到了顶峰。作为一名华北地区知名的业余演员和文学教授，他兼具舞台技巧与渊博学识。同时，他还是当时最具原创性和最富才华的作家之一。他就读清华大学时，学到了欧洲戏剧传统方面的丰富知识，从希腊悲剧到尤金·奥尼尔的抒情现实主义。1936年发表并上演曹禺的《雷雨》，是中国戏剧史上的重大事件。严格地说，它是第一部多幕剧，有序幕和附加的尾声。但使它受到空前欢迎的，是这出不同寻常的悲剧所产生的戏剧力量。《雷雨》被巡回剧团演出了上百场，并很快被改编为电影。紧接着，曹禺又创作出《日出》和其他两部戏。他是位极有责任感的戏剧家，他从欧洲戏剧汲取养分，而没有被欧化。但他没有使他的艺术和社会意识达到完全融合。“《雷雨》被指责有宿命论的表现之后，他在《日出》的最后一幕显然强调了一下乐观主义，”让工人们在日出的时候唱起了歌。在巧妙娴熟刻画人物性格这一点上，中国戏剧界没人能够超越他。

1937年抗战爆发，戏剧很快成为宣传先锋，再次充当起扩音喇叭。爱国的轮演团体和中宣部政治处戏剧组深入内地乡村和城镇进行巡回演出。人们逐渐减少舞台艺术方面的尝试，纯戏剧创作不太受鼓励。从1911年辛亥革命以来，每逢国家危难关头，戏剧便被当作一件有效的武器。战争旷日持久，戏剧的功能是唤醒和激发民众。绝大多数演出都在露天进行，考虑实际需要，戏装和舞台布景越少越受欢迎。街头剧的创作应运而生，最著名的是《放下你的鞭子！》。在民族危机时刻，戏剧家们要为国效力，不仅要牺牲掉艺术技巧，而且在敌后巡回演出，常要冒生命危险。但他们明白，国家得靠他们维持与生活在游击区的人民的

联系。丁玲为中国农民写的一出街头独幕剧《重逢》，还被译成英文，于去年2月在泰戈尔创建的孟加拉和平大学上演。这出戏的制作人阿伦森教授在演出之后撰文指出：“选择这出戏，并非只因为它的政治内容，它具有强烈的人文情调，是现代中国的一个小片段。这样的事在日军占领区每天都在发生着，我们并不想煽动对日本人的仇恨，只想让大家明白，战争是如何毁掉人类的和平与安宁。”

5. ESSAY: CHISEL OR SWORD

Of all forms of modern writing, the nearest to the Chinese literary tradition is the essay. This remark is by no means a compliment. The Chinese for "essay" is either *san wen*, meaning loose, non-metrical writing, or *hsiao p'in wen*, meaning little appreciation; both of which imply the absence of strict form. There are no epics in Chinese poetry and our national music has often been described as melody without harmony. Many of our novels tend to be documentary; they record life rather than reproduce it. There is a distinct lack of architectural beauty in Chinese literature; perhaps the flatness of our continent is to blame, perhaps stoical Confucianism. The essay, however, is admittedly suited to the kind of individualism fostered partly by Taoism throughout the ages. One of our leading essayists defines the modern essay as "the quintessence of personal literature, with all elements submerged in the soul of the creator". So the Chinese writer feels completely at home in the essay.

This loose form of writing is sometimes considered as a "primer" for the literary novice. While editing the Literary Supplement of *Takungpao*, in Tientsin, Shanghai, and Hong Kong, I received a large number of manuscripts daily. Of these, usually more than half were essays, sketches or "reportage" as they were later fashionably called. These were mostly descriptions of daily happenings, often reminiscent in character. They were excellent stepping-stones for an ambitious novelist, as miniature painting is to full-length canvas. But when they became a vogue, they tended to breed idleness. Now, in war time, few writers can sit down and concentrate on a novel, which requires vision and imagination to materialize. Hence, reportage appears to be the most popular form of writing at present. It is not only a convenient form for the writer, but easy reading for the common people. When an essay had to be shortened, the term "wall writing" came into being.

The most common form of essay in classical literature is the "scrapbook" type, and it still remains a favourite to-day. In *Miscellaneous Notes of a Mountain Trip*, a writer may freely jot down notes about his rambles, the caves he explored, some casual remarks about a book he read or some fleeting fancy while taking a meditative walk. "Letters" used to be another kind of miscellaneous writing until Miss Ping Hsin wrote her *Letters to My Young Readers*. They were contemplative and lyrical, and written with a deliberate plan. In 1924, Yü Ta-fu unconventionally wrote *An Open Letter to a Literary Youth* which was really a subtle satire. He understandingly analysed the situation of a college graduate who was unable to find a job—a very common predicament in those days. In one passage he eloquently exhorted him to rob, for "what is booty to the present society will be your fair share in the future one".

Even in this native art, influence from the West is not to be discounted altogether. The late Liang Yü-ch'ün, translator of *Selected English Essays*, borrowed Jerome K. Jerome's *Idle Thoughts of an Idle Fellow* for the title of a collection of his own essays which were clearly influenced by *Elia*. Li Kwang-t'ien is an admirer of W. H. Hudson and a lover of "a simple and intimate world". The vogue of "poems in prose" was definitely set by Turgenev. Even Lu Hsün, who generally appeared too intellectual to write lyrical compositions, could not help adopting this form for his *Wild Grass*. The influence of Baudelaire led young Chinese essayists into more elaborate labyrinths.

There are two types of essayists in China, the hermit and the knight-errant. The hermit essayist employs his pen as a sculptor does his chisel. He is often self-centred and sentimental. At heart, he is probably a Narcissist. He emotionalizes a bamboo hut he inhabited several years ago, or mourns over the death of a bird which gave him pleasure. The subject matter is often trivial personal recollections, lyrically woven, the very fruit and mainspring of human nostalgia. In the first number of *Jên Chien Shih*, a magazine containing mostly essays, Dr. Lin Yü-tang, the editor, announced that his magazine

would cover all subjects, "vast as the universe and trifling as a fly". One critic remarked that they caught the fly but completely missed the universe. To the knight-errant, an essay is a simple medium. It is a sword when the enemy is near and a spear when he is afar. While the chisel is good at chipping and carving, the primary virtue of a sword is sharpness. Critical essays, whether on social or literary subjects, never failed to be sardonic. Essays of appreciation do exist, but when an essay is used as a weapon, it must hit something. The interesting fact is that these two types of essays are best represented by writers who happened to be brothers—namely, Chou Tso-jên and Lu Hsün.

Being an admirer of Havelock Ellis, a painstaking translator and a fine scholar, Chou Tso-jên began as a modern rebel in a mandarin robe, calm, leisurely, but at first wholeheartedly supporting everything progressive. He did a great deal to introduce the literature of lesser-known countries in China, from the Baltic to the Balkans. But soon his individualism drove him towards the path of a perfect hermit. From his famous "Bitter Rain Studio" he wrote as an antiquarian and a connoisseur of wine, tea and fine letter-papers. At the time when the entire nation was enraged by the Japanese invasion of Manchuria, he built himself a little oasis, surrounded by the aroma of the past. To him, the importance of life had become a mere collection of souvenirs. He is one of the rebels who was unfortunately tamed by harsh reality. It might be a comfortable retreat for a middle-aged man, but its effect on Chinese youth was extremely unhealthy.

In the complete works of Lu Hsün published posthumously, there are four volumes of fiction but fourteen volumes of critical essays. Some critics think the genius of Lu Hsün was wasted in the writing of those essays. And since the subject matter of most of them has an ephemeral interest, it is doubtful how long they will live. But Lu Hsün never sought immortality in such compositions. Being the chief moving spirit of his age, he could not refrain from attacking things and people he thought rotten. His very first volume of critical essays, *The Hot Wind*, contained a number of curt, poignant essays satirizing

superstition, mental platitude, concubinage and all the sloppy side of our national life in the beginning of the Republic. He disapproved of writers who painted rosy pictures in the midst of darkness, who "have no courage to face the reality of existing society, but coyly welcome the magpie (Chinese symbol for good luck) and shun the owl (ominous), choosing only agreeable things to distract themselves". Lu Hsün demanded of Chinese writers the courage "to laugh, to weep, to curse and to strike. In this damned society, all these are matter for essays." His works represent the robust, analytical and satirical types. Decorativeness and lyricism were what he most despised. "At this hour when the windstorm roars outside and tigers and wolves are clamouring for our lives, who is in a mood to appreciate a coral earring or an emerald ringlet! Even if our people desire some visual delight, they wish to see the great solid mansions standing firm on its foundations against the windstorm." There is no doubt that such critical essays written in an intellectual mood have since become a very popular form of writing. Most literary magazines have several such "editorial paragraphs" on the front page, and after the death of Lu Hsün, a bimonthly called *Lu Hsün Wind* appeared in Shanghai. "Wind" is also metaphorical Chinese for "style".

The classification of essays may be closely paralleled with that of painting, viz. landscape, human figures, flowers, birds and insects, with the sole exception of "ideas". Of these, the favourite subject is landscape. There are many sacred mountains in the four corners of China and almost all over lake districts. Many delightful essays were devoted to them, either in Chinese ink, such as those by Yeh Shao-chün and Chu Tze-ch'ing, or in Western water-colour, such as Hsü Chih-mo, Lu Li, and Li Ni. There has been a tendency towards "surrealism" in essays before the outbreak of the Sino-Japanese war, such as Ho Chi-fang's *The Painted Dream* which won the literary prize of *Takungpao* in 1936. But on the whole most of them are very like miniature paintings, that is, simple sketches of what one sees, remembers or thinks.

Decorative beauty had always been one of the cardinal virtues of traditional "p'ien" essays. In Ho Chi-fang's *The Painted Dream* one sees the assimilation of the native art and the "poem in prose" introduced from abroad. Being a student of philosophy, Ho's essays naturally have strong contemplative colour. In an autobiographical essay, entitled "The Essay and I", published in the Literary Supplement of the *Takungpao*, he revealed that he was seeking a new kind of lyrical prose, wrought of pure harmony and beauty. His Preface to *The Painted Dream* began thus:

"Are not our visual and auditory senses most miserably limited?' 'Yes. One summer, I was walking with a colour-blind man on the farm. Casually I plucked a red flower for him and he said it was blue.' 'And did you grieve for him?' 'No, I was really sorry for myself.' 'Then you must believe in mysteries!' I am indeed fond of imagining things remote—some nonexistent people or names of nations not to be found on the map. For many days and nights I have lost myself completely in a fresco and walked into it. The wall was white but the portals were of gold. I did not know whether it was the door to Heaven or to Hell, but it opened once for me.'

"Then your outlook on life...?"

In life, I am only moved by its expressions. I am like a wisp of floating cloud. I like this to serve as a footnote for all my essays..."

Ou-yang Ching, a critic, remarked that Ho's attempt to make his works dance like poetry instead of walking like prose was a mistake. It only made them sound awkward. "Ho's use of artificial elements in his essays has been too lavish. We may sometimes be intoxicated by his array of pigments, designs and allusions. But the fascination of words alone cannot make a work live. It is he himself who has fallen into the labyrinth of words; hence, he lacks what we expect of him most, namely, vitality. While reading his works, I think of a certain biographer's remark on the Pre-Raphaelite poets: poor splendid wings!"

But it did not take long for Ho to acquire that vitality. One year after the publication of *The Painted Dream*, the war broke out. Ho was

compelled to leave Tientsin where he was teaching. He returned to his home in Ssŭchuan. The style of his *Return of the Native: A Diary* appeared far more lucid. Instead of the "expressions of life", meaning probably the abstract side only, he saw the incompetent rural quacks, the unjustly exploited peasants, and found that "this community formed by human beings is actually a dim, dirty and depressing little hell. I must write a book to prove that all other animals can make a better life than we human creatures do. Ideals, love, beauty and joy are what we find in books. They make us feel tender when sad and tearful when happy. But they are rare in the actual human world. I used to be accustomed to misery and squalor as a child, but by reading books, a golden door of illusion opened to me. After that I did all I could to avoid and forget the realities of this world. I loitered in a non-existent world. There must be an awakening after every dream, but mine comes rather too abruptly."

Shortly after, this author of *The Painted Dream* accompanied a group of political workers to the front. They walked several thousands of miles on foot across the plain of north China, seeing more misery, more stupidity and the indescribable fortitude of the Chinese peasants, whose heroism and endurance could not fail to move any sensitive writer. He came back with a volume entitled *The New Shansi*. The change in style and outlook was even more striking than in his *Diary*. His complete transformation is profoundly symptomatic of the effect of Japanese invasion on modern Chinese literature. The war has toughened the spirit of our writers and cemented their relationship with the soil and the people.

伍 散文：雕刀还是利剑

在所有写作形式中，最接近中国文学传统的是散文。这么说，绝不是恭维话。中文的“散文”是指散而无韵的文体，或叫小品文，没有严格的形式限制。中国诗里没有史诗性的作品，我们的国乐常被描述成是没有和声的旋律。我们的小说趋于记录，记录生活而非再现生活。中国文学明显缺乏建筑美，也许应归罪于我们生活的大陆过于平坦，也许要怪禁欲主义的儒家学说。然而，散文完全是一种在一定程度上受道家滋润的个人主义的写作。有位著名散文家把现代散文界定为私人文学的典范，蕴含着创作者灵魂深处的所有元素。因此，中国作家写起散文来，感觉完全舒松、畅快、闲适。

文学青年有时会把这种松散的写作形式当成“创作入门”。我在天津、上海、香港编《大公报》文艺副刊时，每天收到大量来稿，通常有超过一半的稿件是散文、短篇小说或（照后来时的叫法）特写。它们多带有回忆性质，主要描述日常所发生的事。对一位有雄心的小说家，这不失为很好的锻炼写作的方法，就像小画稿是为大幅油画作准备。但它一旦成了时尚，就会滋生出懒惰和闲散。现在，正值战时，没有几位作家能坐下来潜心小说创作，小说需要想象力和创造力。因此，特写成为目前最流行的写作形式，作家写起来方便，普通大众也易读。当散文的篇幅不得不缩短，就出现了“墙报”一词。

古典文学里最通常的散文形式是“随笔”，这在今天仍然流行。一个作家会在一本《山行杂记》中随意地匆匆记下自己的行踪，探过的洞穴，对读过的一本书的偶感，或漫步遐思时的瞬间灵感闪现。到冰心写出《寄小读者》，“书信体”被当成一种作家喜欢的杂记形式，这种沉思而抒情的文体，也是作家经过深思熟虑写成的。1924年，郁达夫打破常规，写过一篇《给一位文学青年的公开状》，这实际上是篇睿智微妙的讽刺文。他富有同情心地分析了一位没能找到工作的大生的情势，当时这样的窘境很普遍。他雄辩地劝告那位学生去抢劫，因为“在现在的社会里称为赃物，在将来进步了的社会里，就会成为你的应有之物”。

即便在这纯国粹的艺术里，也不能低估西方的影响。《英国随笔选》的译者，已故的梁遇春曾借用J. K. 杰罗姆¹⁶的《懒惰汉的懒惰想

头》作为他一篇散文的题目。他的散文明显受了《伊利亚随笔集》的影响。李广田非常欣赏W. H. 赫德森¹⁷并钟爱他那个“简单而个人的世界”。“散文诗”体的写作，则是屠格涅夫的影响。就连鲁迅，通常好像过于理性写不了抒情文章，也禁不住用散文诗的文体写了《野草》。波德莱尔的影响更把中国年轻一辈散文家引向精巧的迷宫。

中国有两类散文家，隐士和斗士。隐士散文家把手中的笔用作雕刻家手中的雕刀，常常是以自我为中心和多愁善感的，在感情深处大概就是一个纳克索斯¹⁸。他会为几年前住过的一间竹舍而动情，会为给他带来过快乐的小鸟的死而哀怜。内容上常是琐碎的个人回忆及人类怀乡病的抒情编织。主要登载散文的刊物《人间世》的编者林语堂博士，在开卷首期宣布，杂志内容上包罗万象，大到宇宙，小到飞虫。有批评家说他们是逮到了飞虫，却失掉了宇宙。而对斗士散文家来说，一篇散文只是一个简单的媒介，是刺向近敌的利剑和掷向远敌的投枪。雕刀擅长精雕细刻，利剑的品格却是锋利尖锐。他们的散文，无论批评社会还是文学抒写，必定是嘲弄和讽刺。他们也写小品文，可一旦把散文当武器来用时，就一定要有目标。有趣的是，鲁迅和周作人兄弟俩正好是这两种类型写作的最好代表。

作为哈夫洛克·蔼理斯¹⁹的崇拜者、辛勤的翻译家和出色的学者，周作人开始是以身穿长袍的现代反叛者面貌出现的，从容、悠闲，全身心支持一切进步的事物。他译介了从波罗的海到巴尔干半岛中国读者鲜知的国家的大量文学作品。但很快，他的个人主义把他带上隐士之路。从他在著名的“苦雨斋”所写的文章看，他像是一位古玩商，品鉴酒、茶和上好信笺的行家。当全民族对日本侵略东北表现出极大愤慨的时候，他却在营造自己的一小块绿洲，陶醉在往事的芳香里。生活的意义对他来说就是收集纪念品。他是那些被严酷的现实不幸驯服了的反叛者之一。对一个中年人，这或许是一种舒适的隐退，但它对中国青年的影响却是极其消极的。

在鲁迅死后出版的全集里，有四卷小说，散文、杂文则有十四卷。有批评家认为鲁迅把才华浪费在那些杂文写作上了，因为就其所涉及的内容来看多只能引起读者短暂的注意，便怀疑它们能否长久。但鲁迅从未在他的杂文中寻求永生。作为他那个时代的主要精神支柱，他从不克制自己去攻击凡他认为腐朽的人和事。《热风》是他较早的一本杂文集，文章大多简短而辛辣，对封建迷信、腐朽思想、一夫多妻和民国初

年所有污秽肮脏的社会生活的诸多层面，进行无情地讥讽。鲁迅反对身处黑暗却只顾粉饰太平的作家，批评他们“不敢正视社会现象，变成婆婆妈妈，欢迎喜鹊，憎恶枭鸣，只拣一点吉祥之兆来陶醉自己”。鲁迅要求中国作家要有胆量把对这个病态社会的嘲笑、悲叹、诅咒和攻击写进散文。他的散文正是这种尖锐有力、深刻解剖和无情讽刺的代表。他最鄙视那种雕饰性、抒情性的散文写作。他说：“在风沙扑面，虎狼成群之时，谁还有闲工夫，玩琥珀扇坠，翡翠戒指。即要悦目，当有大建筑，坚固而伟大，用不着雅。”鲁迅这种理性心智下的杂文创作，无疑已成为一种非常受欢迎的写作形式。大多数文艺刊物都在卷首加了几段这类“编者按语”。鲁迅去世后，上海还新创刊一份双月刊《鲁迅风》，“风”在中文里亦指“风格”。

散文的分类或许与中国的绘画相似。除了独特的“写意画”，有风景、人物、花、鸟、虫等。这里最受喜爱的是风景写作。中国遍布名山大川，描绘自然景致的散文很多，有如水墨画的，如叶绍钧、朱自清；也有如西洋水彩画的，如徐志摩、陆蠡和丽尼。抗战爆发前，还有一种“超现实主义”的散文写作，如1936年获得《大公报》文艺奖的何其芳的《画梦录》。但总体而言，它们大多数都像袖珍画，只是简单地描绘出个人的所见、所忆与所想。

中国传统的“骈”文，最具有散文的装饰美。在何其芳的《画梦录》里，我们能看到这种本土艺术与译介的西方“散文诗”的融合。何其芳学的是哲学，他的散文自然带有强烈的哲理色彩。他在发表于《大公报》文艺副刊的自传性散文《我与散文》中透露，他正在寻求一种具有精致和谐之美的新型抒情散文。他在《画梦录》代序中这样开头：

“你说我们的听觉视觉都有很可怜的限制吗？”

“是的。一夏天，我和一患色盲的人散步在农场上，顺手摇一朵红色的花给他，他说是蓝的。”

“那么你替他悲哀？”

“我倒是替我自己。”

“那么你相信着一些神秘的东西了。”

“我倒是喜欢想象着一些辽远的东西，一些不存在的人物，和许多在人类的地图上找不出名字的国土。我说不清楚有多少日夜，像故事里所说的一样，对着壁上的画出神遂走入画里去了。但我的墙壁是白色的。不过那金色的门，那不知是乐园还是地狱的门，确曾是为我开启过而已。”

“那么你对于人生？”

“对于人生我动心的不过是它的表现。于我如浮云。我喜欢它是我一句文章的好注脚……”

批评家欧阳竟认为，何其芳尝试让他的文字变成“跳舞的诗”，而不是“走路的散文”，是个错误，只会让它们听起来就别扭。“他人工的成分太多，我们会一时沉醉于他‘文字的彩色，图案，典故的组织’，可是单纯文字的吸引无法让作品鲜活。他‘坠入了文字的魔障’，忽略了我们所最重视的——生命力。读他的作品，使我想起一位传记家描写先拉斐尔派诗人的话：可怜的翅膀，美丽、辉煌，却飞不起来。”²⁰

但没过多长时间，何其芳就获得了这种生命力。《画梦录》出版一年之后，抗战爆发。何其芳不得不离开任教的天津，回到四川老家。

《还乡日记》在文风上更趋于明朗、清澈。不同于那种抽象的“生活的表现”，他在四川见到许多误人的乡下庸医，看到农民遭受着不公平的剥削，发现“这由人类组成的社会实在是一个阴暗的、污秽的、悲惨的地狱。我几乎要写一本书来证明其他动物都比人类有一种合理的生活。理想、爱、品德、美、幸福，以及那些可以使我们悲哀时十分温柔、快乐时流出眼泪的东西，都是在书籍中容易找到，而在真实的人间却比任何珍贵的物品还要希罕。当我是一个孩子的时候，我已完全习惯了那些阴暗、冷酷、卑微。然而后来书籍给我开启了一扇金色的幻想的门，从此我极力忘掉并且忽视这地上的真实。我沉醉、留连于一个不存在的世界。然而既是梦便有一个醒觉时，而我又醒觉得太快”。²¹

不久，这位《画梦录》的作者又陪同一组政工人员到了前线，徒步行走上千公里，横跨中国北部平原，更多地看到中国农民的悲惨、愚钝及其难以描述的坚韧不拔的精神。他们的英雄气概和忍耐品质足以感染任何一位敏感的作家。何其芳根据此行写成的《新的山西》，在文风和观点上比《还乡日记》有了更惊人的变化。何其芳的完全转变是日本侵华对中国现代文学影响的深刻表征。这场战争使我们的作家精神变得坚强，同时还强化了他们与土地和人民的关系。

6. TRANSLATION: AN ETERNAL VOGUE

Early in 1919, Professor Lo Chia-lun wrote that the literary revolution was the direct result of China's contact with Western culture. In historical perspective, this is undeniably true. The writing of nineteenth-century European thinkers inspired individual awakening in China. The unequal treaties imposed on us by the Western powers set flame to Chinese nationalism. These in fact are the principal changes, internal and external, which took place in China in the last fifty years or more. In stirring up the revolt against the traditional style, Wordsworth's Preface to *Lyrical Ballads* was a vital source of inspiration. It upheld the vulgar tongue. Above all, many contemporary writers in China are admirers of Western masters. Many of them do not know any foreign language. Hence, the translation of Western literature has been a work of paramount importance from the beginning of the new movement.

Besides the influence of English literature itself, the unchallenged popularity of the English language in China has had beneficial results. Many European masterpieces otherwise unavailable even to Chinese translators, such as Ibsen and Hans Andersen, were retranslated from English versions. It has often been said that Russian novels enjoy a preeminent popularity in China. They have certainly exerted great influence over our writers. This is not difficult to understand. Nineteenth-century Tsarist Russia, with all its social backwardness in contrast to a conscientious, progressive intellectual class, was similar to the situation in China during the civil war. Russian novels, especially those of Tolstoy, ponderous in size, moralistic in view, often dealing with family tragedies, naturally had a special appeal for Chinese readers. But throughout the last thirty years there have been only two or three people in China who translated Russian literature from the original. Most of them were retranslations from English

versions such as those of Mrs. Constance Garnett.

In this little essay I have given a rough sketch of Western influence over the various fields of writing in modern China. Our individual writers have been perfectly teachable. In a collection of autobiographical essays, *Literature and I*, published in 1935, nearly half the contributors appeared to be self-appointed pupils of certain Western masters. Hsiao Mo, the pseudonym of a well-known translator, began by describing his first contact with Western literature:

"It was like a visit to a strange exotic world, or tasting a glass of curaçao. The particular flavour lured me. My first contact was the *Sketch Book of Washington Irving*. I loved its quaint imagination, and the subtle diction..."

The first contact of Hsi Ju, a story-writer, was with Turgenev's *Father and Son*. "Almost at once, it excited my interest. I read it over and over again, seeing through it the ominous sign of the collapse of the 'father' generation of Tsarist Russia and the courageous scepticism of the 'son' generation. The story was so poignant and so full of life that for once I realized the greatness of art."

Curiously enough, our earliest translator of Western literature was unfamiliar with any Western language. Lin Ch'in-nan was one of the old diehards who stubbornly opposed the literary revolution. Being a classical scholar himself, his translations, though often inaccurate, read extremely well in Chinese. He had a collaborator who translated to him verbally. Between 1890 to his death in 1924, he had translated some one hundred and thirty Western works, including *La Dame aux Camélias*, Scott's *Ivanhoe*, *Robinson Crusoe*, and the *Pickwick Papers*. Sketchy and faulty as they were, they were the first arrivals of European literature in China. Lin's translation of Lamb's *Tales from Shakespeare* aroused so much curiosity among the young Chinese that many rushed to learn English in order to read the original plays. The fact that Chinese readers without the faintest knowledge of England shed tears in those days over the misfortunes of David Copperfield and laughed at jolly Sam Weller proved that great literature has no barrier.

Since then, we ceased to regard Europe as a great armament factory.

Up to 1932, we can safely say that most translations were enthusiastically but casually done. Our knowledge of the literary history of the world was also scanty. It was then solely a matter of personal interest and often the work overlapped. As a result, some books had several translations while many classics were left untranslated. To translate the complete works of certain established authors has always been the ambition, such as Kuo Mo-jo's Goethe and J. M. Synge, Chao Ching-shen's Chekov, and Li Ch'ing-ya's Maupassant. Nevertheless there are limitations to personal effort and few achieved their aim. Subsequently there was a tendency to turn to the authors of the moment, such as Upton Sinclair for a time, and later, Mrs. Pearl Buck.

It was realized that this state of affairs was far from satisfactory. Early in 1918, Dr. Hu Shih suggested that Western classic should be translated systematically. He proposed to allot five years for each period, during which a series of well-chosen works, say 100 novels, 500 short stories, 300 plays and works of 500 essayists were to be translated. However, various circumstances hindered this excellent plan until a few years before the outbreak of the war. Early in the last decade, two plans were launched. One was the China Foundation Series of English Literature under the editorship of Dr. Hu Shih. It contained the retranslation of Thomas Hardy's *Tess of the D'Urbervilles*, his *Return of the Native* by Professor Chang Ko-jo, Liang Yü-ch'un and Yuan Chia-hua's novels of Joseph Conrad, Pien Chih-lin's *Queen Victoria* of Lytton Strachey, and the complete works of Shakespeare by Professor Liang Shih-ch'iu which war has interrupted. The other attempt was Professor Cheng Chen-to's *World Classics*, a selection which covered European literature in general. The first series, for instance, included Tolstoy's *Anna Karenina*, Nietzsche's *Thus Spoke Zarathustra*, Gogol's *Dead Souls*, Dostoevsky's *Brothers Karamazov*, and Charlotte Brontë's *Jane Eyre*. Unlike previous translations, they were made by well-chosen scholars who undertook their task not by virtue

of zeal alone but by their competence in both languages. Nearly every work was preceded by a lengthy Introduction and followed by a carefully compiled glossary. For instance, in translating Hardy's *Return of the Native*, Professor Chang devoted nearly one-quarter of the two huge volumes to detailed annotations of such things as the English wild flowers appearing in the novel. He also made an ingenious attempt to translate Wessex dialect into the dialect of his home in western Shantung.

After finishing the Victorian and Georgian classics, our translators will certainly seize the first opportunity to transplant the finest flowers of contemporary English literature. We know there are no more Robin Hoods on the highways of the British Isles and the children are far better taken care of than in Dickens's days. But we wish to know all this more profoundly and in greater detail. We must read the living authors of contemporary England. Conversely, great changes have taken place in China, even in the last five years. There is one side of national life which is static, and another which is fluid—the mood, the attitude, and the inner voice of a people. This fluid side is generally expressed in the contemporary writing of that people.

The war which the Japanese expected to be so profitable has brought them little benefit. But it has dealt a heavy blow to the general cultural activities in China. The Rising Sun Bombers destroyed the last copy of Shakespeare in a college library. The shortage of paper made publication almost unattainable. And constant air raids on the undefended towns are hardly conducive to the translation of quiet scenes in a novel. War has made a mockery of everything. But it has also made us realize that we need better understanding among nations, to appreciate mutually the agonies, the problems and the aspirations of each nation. The Chinese can no more understand England through *Robinson Crusoe* or *King Lear* than the English can hope to know of dynamic China if they persist in poring over our T'ang poets, who died long before Alfred the Great burned his cakes. Here, I close this short account with a faint protest, and a fervid hope.

陆 翻译：永恒时尚

早在1919年，罗家伦教授就写道，文学革命是中国接触西方文学的直接结果。历史地看，无可否认，这是正确的。十九世纪欧洲思想家的著作启发了中国的个性觉醒。西方列强强加给我们的不平等条约，点燃了中国民族主义的火焰。事实上，这些内部外部的重要变化，在过去五十年或更长的时间里就已经发生了。华兹华斯的《抒情歌谣集》序言在激励反叛传统形式的过程中，成了灵感的重要源泉，因为它提高了平民语言的地位。总之，许多现代中国作家都是西方文学名家的赞美者、敬慕者，他们大多不懂外文，因此，从新文学运动一开始，翻译西方文学就是一项至关重要的工作。

除了英国文学自身的影响，英语在中国无可比拟的受欢迎程度也使其大受裨益。许多欧洲其他语种的文学名著，中国的翻译家不易得到，像易卜生和安徒生，就都是从英文本转译过来的。俄罗斯的小说在中国特别受欢迎，并对中国作家产生了深远影响，这其实不难理解。十九世纪社会落后的沙皇俄国同富有良知和进步思想的知识阶级形成了鲜明对照，这种情形和军阀混战时期中国的情形十分类似。俄国小说，尤其托尔斯泰那些从道德视角涉及家庭悲剧的长篇巨著，自然对中国读者产生了强烈的吸引力。但在过去三十年的时间里，只有两三个译者是从俄文直译，其他则都是从像康斯坦斯·加尼特夫人²²的英文译本转译的。

我只想在这篇小文里，就西方文学对现代中国文学创作不同领域所带来的影响，做个勾勒式的描述。我们那些富有个性的作家，绝对是可教的。在1935年出版的一本自传性散文集《我与文学》里，有近一半的撰稿者都自封是某位西方著名作家的学生。以萧牧为笔名的一位著名翻译家，这样描述他最早接触西方文学时的情景：“就像进入一个奇特的具有异国风情的世界，或者品尝一杯库拉索酒，一股特殊的风味引诱了我。我最先接触的是华盛顿·欧文的短篇小说，他那奇特的想象和绝妙的用词叫我着迷。”

小说家西居接触的第一部西方文学作品是屠格涅夫的《父与子》，“它马上就引起我的兴趣。我一遍又一遍地读，读透了沙俄时期‘父’那一代的衰败和‘子’那一代勇敢的怀疑主义态度。小说是如此的深

刻，富有生命力，我由此一下子意识到艺术的伟大。”

奇怪的是，中国最早翻译西方文学的人竟不懂西方语言。林琴南是顽固反对文学革命的保守的死硬派之一。尽管他的翻译常常出错，但作为一位传统学者，他的中译文相当出色。他是靠一位向他口译的合作者来翻译的。从1890年到他去世的1924年，他一共翻译了一百三十余部西方名著，包括《茶花女》、司各特的《艾凡赫》、《鲁宾逊漂流记》和《匹克威克外传》。这些译著虽然简略，错误很多，它们可是最早到达中国的欧洲文学。林琴南翻译的《吟边燕语》（后通译为《莎士比亚戏剧故事》）在中国青年中引起很大好奇，许多人为能读莎剧原作，争相学起了英文。事实上，对英国社会毫无了解的中国读者，照样会为狄更斯笔下大卫·科波菲尔的不幸遭遇而流泪，为《匹克威克外传》中快活的撒姆·惠勒而捧腹大笑。这说明伟大的文学是没有国界障碍的。从此，我们也不再把欧洲当成一座军工厂。

一直到1932年，我们可以确切地说，大多数翻译都倾注了译者极大的热情，但目的性不强。我们对世界文学史的了解也很缺乏，翻译主要是凭个人兴趣，因此，常常出现重复翻译。结果，许多古典名著还没有翻译，而有的书已有了好几个译本。要翻译某位自己选定的作家全集总是需要雄心和毅力，像郭沫若之于歌德、J. M.辛格，赵景深之于契诃夫，李青崖之于莫泊桑。然而，个人的努力毕竟有限，也很少有人能达到目的。不过现在又有转向翻译当前作家的趋势，如厄普顿·辛克莱，尔后是赛珍珠。

翻译在总体上远没有达到令人满意的程度。早在1918年，胡适博士就提出，翻译西方古典文学要有组织有系统地进行。他建议以五年为一个周期，选择一百部长中篇小说、五百篇短篇小说、三百部戏剧和五百位散文家的作品来翻译。但直到抗战爆发前几年，多变的环境使这项卓越的翻译计划搁浅。上一个十年倒是着手实施过两个计划，一是胡适博士主编的《世界文学丛书》，包括由张谷若教授重译托马斯·哈代的《德伯家的苔丝》和《还乡》，梁遇春、袁家骅重译约瑟夫·康拉德的小说，卞之琳重译利顿·斯特雷奇²³的《维多利亚女王》，还有梁实秋教授后因战争曾中断翻译的《莎士比亚全集》。二是郑振铎教授主持的欧洲文学选本《世界文库》，第一辑包括托尔斯泰的《安娜·卡列尼娜》、尼采的《查拉图斯特拉如是说》、果戈理的《死魂灵》、陀思妥耶夫斯基的《卡拉马佐夫兄弟》，以及夏洛特·勃朗特的《简·爱》。与以前的翻译不

同，这次是选择那些不光有热情，还要精通中英两种语言的出色学者来翻译。几乎每本译著前都有长篇序言，书后附有详细的集注。例如，张谷若教授翻译的那两大卷哈代的《还乡》，有近四分之一的篇幅是注，像小说中写到的英国的野花，他都加了注。他还富有独创性地把韦塞克斯²⁴方言译成了他老家山东的土话。

翻译完维多利亚时代和乔治时代的古典名著，我们的翻译家自然不会失时机地移植当代英国文学最美的鲜花。我们知道，英国的公路上不会再有罗宾汉，英国儿童也远比狄更斯生活的时代受到更好的照料。但要想深入细致地了解英国，就得读还在世的当代英国作家的著作。另一方面，中国在过去五年里就已经发生了巨大变化²⁵，民族生活有静止的一面，也有流动的另一面，这个民族的情绪、态度和内部声音都在变。这种流变的一面通常是会在那个民族的当代作品中得到表现的。

这场日本人原以为可大捞一笔的战争，并没给他们带来多少好处，然而对中国的文化活动则给予了沉重打击。涂着太阳徽的轰炸机毁灭了我们图书馆的一切藏书，其中包括莎士比亚的戏剧。纸张的奇缺使得出版困难万分。在无防御的城市里经常听到防空警报，当然无助于翻译一部小说中的幽静景象。战事嘲弄了一切。但也正是战争，使我们感到国与国之间深入了解的必要。我们需要知道每个国家当前的苦恼、问题和向往。中国不能通过《鲁宾逊漂流记》或《李尔王》来了解英国，正如英国也不能通过唐诗来了解富有活力的当代中国，毕竟唐代诗人生活的年代远远早于烤糊蛋糕的阿尔弗雷德大帝统治的时代。这里，我以微微的抗议和热切的希望来结束本书。

The Dragon Beards Versus the Blueprints

龙须与蓝图

Meditations on Post-war Culture

战后文化的思考

傅光明 中译

1. SOME REFLECTIONS ON THE MACHINE

—Its Treatment in the English Novel and Its Effect on Modern Chinese Intellectuals

The writer and the machine are natural antagonists. The machine by its nature is a persistent threat to every form of craft, and literature, whatever "progress" we achieve, must remain hand-made. So we should not be surprised when we find writers denouncing the machine: what we must discover is whether it is a disinterested hatred, and therefore noble, or whether it is simply egotistical. The former springs from reason, while the latter can only be sentimental.

Not long ago I had an argument with someone who has even less experience of housekeeping than I have. We were arguing whether or not the invention of the vacuum cleaner was a good thing. As she was an enemy of all machines, naturally she condemned the vacuum cleaner without reserve. But for two springs and three autumns I have watched my Cambridge bedmaker, a kind sweet soul, kneeling on the floor for hours on end, brushing the carpet, with the ash and the dust choking her nostrils. So I supported the vacuum cleaner as I would support anything that relieves the repetitive or sordid drudgery of my fellow-beings. But I should of course give the arguments of the other side. My friend said that if she had a house of her own, she would have an intimate feeling for it—a passionate love for every bit of paint and woodwork. She said that the introduction of a machine would harm everything that is valuable. I asked her what she would do if she had a house like Orlando's, with 365 rooms, which the master and mistress could not hope to clean themselves, however passionately they loved it? She said, rather obstinately, that she would expect a

maid to love the house as much as she did. All this is not very convincing, but what it does demonstrate is that efficiency and intimacy are both relative. In this connection, I must quote from a broadcast given by Dr. Margaret Mead, an American anthropologist, who came to Britain to lecture on the differences between the British and the Americans. She said:

"When I was being shown over some premises in a south-western British city, by an American and an Englishwoman, a counter was pointed out to me. 'We serve ten thousand meals a month over that inconvenient little counter,' said the American. 'Isn't it wonderful?' said the Englishwoman, thinking of the people serving. 'Isn't it ridiculous?' said the American, thinking of the counter. Because to an American the moral thing to do is not to alter your character and cope, but to go to work and alter the circumstances, fix, not cope. We believe that the good life is easier of attainment if there are no practical difficulties in the way, and all our labour-saving devices which seem to you either luxuries or else likely to soften the character, we regard as ways of setting people free to do other things.

"This means that there is a fundamental difference in the attitude towards things, towards possessions, towards money, in Britain and in the United States. For us, things are just means to an end, a way of freeing a mother to spend more time with her children, or a teacher to spend more time with pupils, a way of whisking father home in a hurry so that he has more time to play baseball with the kids. We are interested in getting things done quicker, more efficiently, so that people may be more human afterwards. But you are interested in making the job itself human; women in Britain are so occupied in a loving cherishing care for someone else that they don't stop to think whether they are saving themselves or not. As an American said to me recently, 'I'll always think of Britain as a country in which someone is lovingly bringing you a cup of tea up three flights of stairs.' When we talk about eliminating the stairs, by lifts or electric tea kettles or even making the family come downstairs all at the same time for breakfast, you think perhaps that we mean to eliminate the love which carried those devoted feet up those century-old stairs."

Well, in China that cup of tea would probably be brought to you from the next street.

Ever since the Industrial Revolution, writers in England have been

concerned with the effect of the machine on human life. Samuel Butler, Wells, Kipling, Bennett, Forster, Huxley, D. H. Lawrence, Virginia Woolf—all these have dealt with its impact.

Suspicion of the machine probably began soon after the Industrial Revolution. With my insufficient knowledge of English literature, I dare not dwell too much upon history. Certainly one senses a horror of industrial squalor in Dickens, though he was too robust a writer to philosophize about the machine. Even in the genteel Cranford, the power of the machine can be detected. How badly Miss Matty was let down by the enterprising brokers! But one of the first outspoken denunciations of the machine from an English novelist came in 1872, when Samuel Butler published his *Erewhon*. In that book, written forty years after a Chinese Utopian novel, *Ching Hwa Yuan*, a battle is waged between the machine-minded and the anti-machinists, which costs the lives of half the population. It is not hard to guess that the anti-machine faction wins the day. The Erewhonians are much more good-humoured in their dislike of the machine and in many ways contemplative than the rather hysterical citizens of Aldous Huxley's streamlined world. All the same, the Erewhonians are deeply worried about the domination of the machine, and by the possibility of being one day classified according to horse-power. Butler's objections were not so much objections to the machine itself as to human beings' disastrous reliance upon it. He feared that "To withdraw steam power suddenly will not have the effect of reducing US to the state in which we were before its introduction; it will be a general breakup and time of anarchy such as has never been known; it will be as though our population were suddenly doubled, with no additional means of feeding the increased number".

Mr. H. G. Wells's scientific romances are the blueprints of a whole-hearted believer in the machine. We realize when reading them that the sloverliness of the world infuriated him—he wanted to tidy it up, even at the expense of the individual. He called old-fashioned liberalism "mental habits acquired in an evil time". And in his

promised land, his "Modern Utopia", he wants the individual "Not only in good health, but in training. One rarely meets fat people, bald people, or bent or grey." Every person in his ideal world must be "promptly and certainly organized... anyone missing can be traced and found". He wants a file with entries for every one of the 1,500,000,000 members of the world state, like a biologist's card index. This regimentation applies not only to human beings but to buildings. "Any house, unless it be a public monument, that does not come up to its rising standard of health and convenience will be pulled down by the State at the expense of the owners. Any citizen indecently dressed or ragged or dirty or publicly unhealthy, or sleeping abroad homeless, will be arrested." At this point we begin to recognize a nightmare glimpse of contemporary Europe. Indeed, we should admire Mr. Wells's prophetic powers, for in 1903 he had already foreseen the inevitability of sacrificing the individual to the group. He prophesied that "the individual will dwindle as the State grows or organizes" and he accepted this frankly as a necessary evil. He even forecast the prospects for the artist in this new society, with "students in an art school working in competition to design an electric train".

But few of his contemporaries felt the same, and his juniors have taken the opposite point of view; Mr. Wells is a very eminent exception. From my reading of modern English literature I have gained the impression that every serious writer here is a twentieth century Rousseau, advocating an immediate, if not a complete return to nature. This I find most interesting, especially in view of the fact that Britain was the cradle of the Industrial Revolution.

The cornerstone of Mr. E. M. Forster's creed is personal relations. This is the starting point of his internationalism, the inspiration of his struggle for civil liberty. Above all, personal relations are the main theme of his novels. And the arch-enemy of personal relations is the machine, which is impersonal, automatic, incapable of feeling. He hates this world of sham and untenderness, but even his Mr. Wilcox,

in *Howards End*, can be saved by the angelic Margaret. But the machine in his story *The Machine Stops* is beyond either pity or salvation: it stands between Kuno and his mother, one of the most sacred of human relationships. In this mechanical world, a lecture only lasts for ten minutes; there are no books except the Book of the Machine. Human ears are deprived of their sensitivity; the duties of parents cease at the moment of birth. Everything is standardized, and travel becomes a futile affair because Peking is just like Shrewsbury. Men avoid nature and fear the light of dawn, they lose the powers of observation and understanding. They worship the machine, obey the machine, and adapt themselves to the machine's demands. In many ways the nightmare is more ghastly than Mr. Huxley's, and the final revolt against the machine is as moving as it is gallant.

There is no question of Virginia Woolf's dislike of the machine, although her dislike is only implied. Throughout her work one can find a fundamental dislike of the modern age, whose hallmark is to her the aeroplane writing advertisements in the sky, its drone interrupting quiet country voices. Mrs. Woolf was not a preacher, like Mr. Huxley, nor a self-appointed prophet, like Mr. Lawrence. She does not condemn. All the same, in *Orlando* she makes a clear distinction between her impression of the sordid, hectic modern age and the glory of the Elizabethans, the grandeur of the eighteenth century. We see Orlando amazed by the modern world. "Heaven help us," said Orlando, standing at the window and watching the pigeons at their pranks, 'what a world to live in! What a world to be sure!'" This was the nineteenth century, but already "Everything seemed to have shrunk" and "At a touch, a whole room was lit; hundreds of rooms were lit; and one was precisely the same as the other. One could see everything in the little square-shaped boxes; there was no privacy; none of those lingering shadows and odd corners that there used to be; none of those women in aprons carrying wobbly lamps which they put down carefully on this table and on that." I need not go into the story of Orlando shopping in Knightsbridge, miserable on an escalator,

for her degradation will move us to tears. One is inclined to see the end of *Between the Acts*, Mrs. Woolf's last, posthumously-published novel, as her message to her contemporaries, her summing-up of life. Unlike D. H. Lawrence, who became more and more bitter, she was mild in her criticisms, even self-apologetic. She mourns for To-day, rather than denouncing it. In her Pageant, just as the moderns are to take the stage, "the shower fell, sudden, profuse. No one had seen the cloud coming. There it was, black, swollen, on top of them. Down it poured like all the people in the world weeping. Tears. Tears. Tears." And in keeping with the new tempo "The tune changed; snapped; broke; jagged. Fox-trot was it? Jazz? Anyhow, the rhythm kicked, reared, snapped short...Oh the irreverence of the generation which is only momentarily—thanks be—'the young'. The young, who can't make, but only break; shiver into splinters the old vision; smash to atoms what was whole". And then comes the famous mirror in which each member of the audience sees his own reflection, and the impersonal Voice (which we may take for Mrs. Woolf's) pronouncing "Let's break the rhythm and forget the rhyme. And calmly consider ourselves. Ourselves. Some bony. Some fat. (The glasses confirmed this.) Liars most of us. Thieves too. (The glasses made no comment on that.) The poor are as bad as the rich. Perhaps worse.... Consider the gun slayers, bomb droppers here or there. They do openly what we do slyly...." While Mr. Huxley is exasperated to satire by the modern age, with its conditioned reflexes, its synthetic music and its doses of soma, while Lawrence denounces the stunting of virility, Mrs. Woolf feels for the modern age a harassed pity.

In attacking this mechanized world of ours, no one has been more violent than the hairy prophet of the 'thirties, D. H. Lawrence. The fact that he came from the home of a miner near Nottingham makes this attack all the more interesting; to others the machine was a symbol, to Lawrence it was an everyday reality. In a sense, he belonged to it, and there is a special taken-for-granted atmosphere about his descriptions of the Midlands. For example, in *The Rainbow*,

when Ursula went to the pit owned by her Uncle Tom for the first time, she had a real shock.

"But is this place as awful as it looks?" the young girl asked, a strain in her eyes.

"It is just what it looks," he said. "It hides nothing."

"Why are the men so sad?"

"Are they sad?" he replied.

"They seem unutterably, unutterably sad," said Ursula, out of a passionate throat.

"I don't think they are that. They just take it for granted."

"What do they take for granted?"

"This—the pits and the place altogether."

"Why don't they alter it?" she passionately protested.

"They believe they must alter themselves to fit the pits and the place, rather than alter the pits and the place to fit themselves. It is easier," he said.

...

"Every man his own little side-show, his home, but the pit owns every man. ... The woman gets the bit the shop can't digest. What is he at home, a man? He is a meaningless lump—a standing machine, a machine out of work."

The effect is more horrifying and more convincing than any scientific romance, because of its tragic resignation.

In *Sons and Lovers*, Paul explains to Clare:

"You see, I am so used to it I should miss it. No; and I like the pits here and there. I like the rows of trucks, and the headstocks, and the steam in the daytime, and the lights at night. When I was a boy, I always thought a pillar of cloud by day and a pillar of fire by night was a pit, with its steam, and its lights, and the burning bank—and I thought the Lord was always at the pit-top."

This of course is one of the many lyrics which flower throughout his novels. It does not imply a love of industrialism; on the contrary, Lawrence loathed it, but he attacked it without hysteria. Mellor, the gamekeeper in *Lady Chatterley's Lover*, gives a clue to Lawrence's attitude when he meditates on his relations with the lady. "It was not the woman's fault, not even love's fault, nor the fault of sex. The fault lay there, out there, in those evil electric lights and diabolical rattlings of engines." Finally, having put all the blame on the machine,

Lawrence dismissed it altogether and sang his Mexican hymns.

D. H. Lawrence's dismissal of the machine, or rather of science in general, is admirably heroic; it is not reasonable. But then Lawrence never reasoned; he hammered his way through arguments. His method is summed up in three short sentences of his own: "You tell me I am wrong. Who are you, who is anybody, to tell me that I am wrong? I am not wrong." (From "Pomegranate".) He does not argue with Darwin or Huxley; he simply throws them overboard. In his *Fantasia of the Unconscious* he declares:

"I do not believe in evolution, but in the strangeness and rainbow change of ever-renewed creative civilizations."

Towards the end of the book he again declares:

"It is time for the idealist and scientist (they are one and the same really) to stop his monkey jargon about the atom and origin of life and the mechanical clue to the universe. There isn't any such thing... I do not believe one-fifth of what science can tell me about the sun. I do not believe for one second that the moon is a dead world belched off from our globe... I know the sun is hot. But I won't be told that the sun is a ball of blazing gas which spins round and fizzes. No, thank you."

I am very glad that I haven't got to argue with Mr. Lawrence, but if I happened to hear him arguing with someone else in this strain, deep in my heart I would admire him, even if I agreed with his opponent. In Lawrence, we have the resentment of the modern man against the machine at its most articulate. He came from the pits, like Paul in *Sons and Lovers*. He does not see the poetry of *Othello* as a contrast to the soullessness of the machine, because unlike Mr. Huxley or Mrs. Woolf, he is not particularly in love with the past. (Nostalgia for the past is an easy form of escape.) Lawrence stands out as an individual, romantic, defying standardization and in his later years he even defied the laws of life by upholding the individual. He believes

wholly in intuition, and scorns analysis.

In one of his poems (I have no idea of its date), called "The Triumph of the Machine", Lawrence predicts the downfall of the machine. Because "in the hearts of some men there still is sanctuary where the larks nest safely".

"And at last
all the creatures that cannot die while one heart harbours them
they will hear a silence fall
as the machines fail and finish;
they will hear the faint rending of the asphalt roads
as the hornbeam pushes up his sprouts;
they will hear far, far away the last factory hooter
send up the last wild cry of despair
as the machine breaks finally down."

In 1932 Mr. Aldous Huxley warned the world against industrialization in his anti-Utopian romance *Brave New World*. In this novel he imagines the horrors of a completely mechanized world. Children are born and reared in the Central London Hatchery and Conditioning Centre. They are fed with tablets and synthetic music from the machine, and Westminster Abbey becomes a kind of cabaret with an organ spilling out scent and colour. Everyone is expected to worship a god named Ford. Then comes John the Savage—who, I suppose, is really John the Baptist, a prophet straight from the wilderness. Here is his argument with the Controller who speaks for the machine while Savage represents the child of nature. When the Controller said:

"We prefer to do things comfortably."

"But I don't want comfort" (said Savage), "I want God, I want poetry, I want real danger, I want freedom, I want goodness, I want sin."

"In fact," said Mustapha Mond, "you're claiming the right to be unhappy."

"All right then," said Savage defiantly, "I'm claiming the right to be unhappy."

"Not to mention the right to grow old and ugly and impotent; the right to have syphilis and cancer; the right to have too little to eat; the right to be lousy; the right to live in constant apprehension of what may happen to-morrow; the right to catch typhoid; the right to be tortured by unspeakable pains of every kind."

There was a long silence.

"I claim them all," said Savage at last.

Mustapha Mond shrugged his shoulders. "You're welcome," he said.

From this conversation one gathers that the Savage is not quite logical. Is it because Mr. Huxley's objection to the machine is sentimental, rather than rational? If the Savage (or Mr. Huxley for that matter) had been a miner, digging in the dark, hundreds of feet below ground, or a sailor, battling against waves and gales, he would almost certainly be willing to exchange danger for the safety offered by the machine. He would be glad of any device, a compass or a mechanical digger, which would safeguard his life. No doubt Mr. Huxley means his Savage to stand as a colourful contrast in the nightmare Utopia he has created. The Savage drinks only mustard and hot water, and escapes from the ordered modern world to a lighthouse in Guildford, Surrey. The Savage declares he does not mind where he goes—"Anywhere, so long as I can be alone."

If escape from the machine were as easy as taking a Southern Railway train to Guildford, I can assure you that I should be one of the first passengers—and with a single ticket. Unfortunately, this idea is as futile as China's attempt in the nineteenth century to keep her door shut upon the world.

In China we have felt the benefits of science in a different way from you. In the first place, the machine was derived from your own Renaissance, but we Orientals have never nurtured it. Science is alien to us, and we accepted it in its applied form only because of its obvious advantages of comfort and security. The London buses of to-day are a development of your Victorian horse-omnibus, and who knows, perhaps the next development will be air transport over

London, with aerial conductresses shouting "Hold tight, we're taking off." But the motor buses in Hong Kong or Shanghai have no tradition behind them. Your wireless sets are, in a way, the successor of your pianolas and your musical boxes, at least to a foreigner like myself, but the wireless sets in China seem just like miracles dropped from heaven. (I am speaking for my own generation and the one before). But our next generation will be machine-minded; they will take it all for granted. It is the business of the Chinese intellectuals to see that they do not take it for granted. They must study the benefits of science, and its potential dangers. The machine was introduced into Japan with a jerk; hence her present tragedy. China only escaped by not introducing the machine at all—thanks to her traditional bigotry. Now, having bled beneath the rage of the tanks, the devastating power of the Zero planes, she has begun to accept the machine in real earnest—though I would not say wholeheartedly. If the machine is accepted by China without some form of "control-switch" there is no reason why it should not produce the same result as in Japan. The installation of a control-switch is just as important as the introduction of the machine.

What force constitutes this switch? It is not a simple question. First of all, we can see it in its national aspects. In Britain, your traditional respect for the individual seems to me to be the switch. Britain remains a place fit for human beings in spite of the Industrial Revolution because there are certain things that people simply will not allow. Your liberalism has so far formed a kind of safeguard against the domination of the machine. To me, the English always seem to be saying, through Mr. Forster or somebody else, "Use the machine gently...gently...."

The Soviets have managed to control the machine by quite a different system. They do not mind its going full speed ahead provided the machine is not under the control of individuals. In other words, they feel that the machine is a safe tool in the hands of the State, when there is no question of one individual exploiting another what

the sociologists call capitalism.

China has indeed learned a lesson through the comi-tragedy of modern Japan: she is anxious to keep the machine under control. But which way will she choose?

It seems the Liberal way is to control the switch-board while the Socialist way is to control the hand. In a sense, the control of the hand is more thorough and dependable, but who is to control the hand? That remains to be settled. Here lies one of the major paradoxes of our time.

Many of our problems would be solved if all factory owners were fair-minded and kindly by nature, but that is an illusion in which we cannot indulge. Therefore it seems to me anything but safe to leave the matter in the hands of the temperamental individual.

One of Mr. Huxley's chief grudges is the present tendency of things to become automatic. As a Chinese, coming from a country where the social services are underdeveloped, I would not hesitate to advocate "automatic" social service. The matter is after all relative, and there is no doubt that the more "civilized" we are in the superficial and worldly sense, the more things must be systematized. While a Tibetan minstrel can earn an honourable living by singing and playing his lute from tent to tent, he would be a nuisance if he tried to do so in the city of London, where everyone is busy with their files and portfolios. Medical insurance schemes were not necessary in Elizabethan days, because there were still people with leisure enough to be philanthropic. Nowadays we are all too busy. The institutions which have become accepted in England, such as the receipt of the old age pension, are still in China dependent upon humane impulses—that is, upon charity. There, few can gain entry to a hospital simply because they are ill. They must qualify financially, or they are at the mercy of the medical authorities. If automatism brings an increase in the rights to which we are entitled, then for heaven's sake let automatism prevent me from being a beggar.

In China there are three different attitudes towards the machine;

in a sense one might say that they are three phases of the same reaction. There was the stage of violent opposition, the stage of condescension, and finally blind admiration. But I must warn you that until quite recently these reactions were chiefly influenced, if not entirely governed, by internal and external events.

In the seventeenth century Chinese resentment against science was purely a matter of national arrogance. We refused to adopt anything that came from the West, because we thought quite simply that if we were good enough as a people, then all our institutions must be good enough. So when a German astrologer, Schall, tried to introduce the Solar calendar into China, he was first rebuked by native scholars, and finally died in prison of a broken heart. That was in the sixteen-forties, and a scholar of the time, Yang Kwang-hsien, wrote, "We would rather live without an accurate calendar than adopt an alien one. Without an accurate calendar, we may miscalculate the cycle of the moon, or miss an eclipse, but the Empire will prosper just the same. Once we have foreigners muddling our affairs, I am afraid it will be like bringing fire to a heap of logs." Other scholars tried to discredit mechanical inventions by sheer sophistry. Wang Jen Chiu (1832-1916) wrote:

"What is a steamship but the clumsiest of ships, and field guns but the clumsiest of cannons. The virtue of a ship lies in its speed, and the best cannons should be easily manoeuvrable. Now, these barbarous ships cannot sail an inch without being fed with coal, and their guns cannot be raised or moved without involving several hands. If one meets a brave soldier in the battlefield who rushes at one with bloody sword, we cannot but be killed."

But events proved that the steamship was not clumsy; on the contrary, the steamship brought devastating changes, both from the economic and the military point of view. For some long time China was stunned; still disliking Western science, she was frightened by its achievements. When arrogance is mingled with fear, a curious mood results. There is a story of Hu Lin-yi (1812-1861), a famous Chinese

general at the time of the Taiping rebellion. During the siege of the city of Anching, he rode one day to the summit of Dragon Mountain to study the lie of the land. He came to the bank of the Yangtse, and there he caught sight of two foreign steamships, sailing westward as fast as a galloping horse and as light as the wind. Hu changed colour, and for a long time was unable to utter a word. Then he gathered up his reins and made for his barracks. On the ride back, he spat up blood and nearly fell from his horse. He had been ill for some time, but after this incident his disease became worse, and in a few months he died.

By 1900 the whole nation had realized that unless a compromise could be found between Chinese tradition and Western technique, the nation might cease to exist. So a high official, Chang Chih-tung, found the courage to write-

"To know the West without knowing China is to break one's heart. To know China without knowing the West is to be deaf and dumb."

He wanted it clearly understood that the West must be accepted only as a "technique". He wrote, "As long as one preserves the Confucian mind, observes the Confucian code, and as long as one obeys the Emperor and protects the people, then what harm can it do to ride in a railway carriage or to sail in a steamship?" This remark was not without point; shortly before, Tseng Chi-tse, another high official, had aroused the resentment of half the nation by making the journey to his native land, Hu-nan, by steamship. The watchword of the Manchu Dynasty⁶ (after its various defeats) was "Adopt the Western body, but preserve our Chinese soul". If you had gone to China before 1937, you would have found many embodiments of this idea. For example, an Oriental-Occidental architecture has been very popular in recent years. One sees buildings with the dignified exterior lines of ancient Chinese structures, with highly glazed roofs and carved or painted beams, and inside Western systems of electric lighting, plumbing and central heating. The Peking Union Medical

College, Yenching University, the National Library of Peking, the Ministry of Railways in Nanking, and the new Southwest Union University in Kunming, built in the last three years, are all on this plan.

A very accomplished artist of yours, Mr. Leon Underwood, in his book *Art for Heaven's Sake* (1934, Faber and Faber, London) says very sensibly, "By all means let the machine clean our boots and fill our larders, but not our dreams. If necessary, stick a mine shaft in your front garden—but keep a corner of your back garden into which you can retire from its noise to listen to the song of the thrush. The five chairs of your necessity shall be made by a machine, but not the sixth—make it yourself for your own pleasure. Type your circulars and keep a pen for your love-letters." This kind of adaptation within a homogeneous culture is comparably easier to achieve, but the assimilation of a heterogeneous culture creates quite a different problem.

But when this blending is introduced into music or painting, we feel a certain incongruity, if not actual incompatibility. Can one paint traditional Chinese subjects on rice paper after the Dutch school, or in the Venetian manner? The Albert Hall may be able to hold an international audience all shouting "V" for "Victory" but art is a much less robust business. It is fragile and hypersensitive, it demands a high degree of integrity, and cannot achieve perfection by makeshift methods.

While Chinese diplomats were debating the world's problems at Versailles, the Chinese at home were plunged in a furious philosophical battle with the anti-science idealists such as Mr. Liang Shou-yen on one side, and the materialists, headed by Dr. Hu Shih, Mr. Chen Tu-hsiu, and Mr. Li Ta-chao on the other. Mr. Li Ta-chao later became a Communist and lost his life as a martyr to his belief. The subject of this nation-wide controversy was the relation of science to life. The European war was constantly referred to, but the materialist contended that this war had been entirely due to the

Anglo-German clash over markets, and had had nothing to do with the evil effects of science. The controversy reached its height in 1922, when both sides enquired, pertinently enough, whether Chinese civilization could co-exist with that of the West, and if it could not, how and where adjustments could be made. Both sides were anxious that Chinese civilization should survive, but the materialists were even more anxious to see it become a part of world civilization.

The thinking Chinese have never been cured of their deep-seated mistrust of the machine. Each time a calamity befalls the West, their voices are raised. At the end of the last war, a Chinese scholar wrote:

"It is against the natural course of human affairs to let expediency override the fundamental. There are advantages in Western civilization, but let us not inflict ourselves with its vices. If Confucius had the control of aeroplanes and submarines, I am sure he would not employ them to harm the innocent."

Ku Hung-ming, a brilliant Chinese student in England who had translated a number of Chinese classics into English, became a fanatic against the machine, also at the time of the last war. He wrote:

"When the Westerner teaches you to be good, he makes you either fear God or fear the law. Without fear of either, even brothers and near neighbours cannot trust each other."

As the guns roared on the continent of Europe, an outcry for "Spiritual civilization" arose in China, and many prophets claimed that Western civilization was already collapsing. In 1919, Liang Chi-chao wrote his *Impressions of Europe* in which he described the Great War as "a nemesis of the purely materialistic, purely mechanistic view of life which the West was evolving".

Those suspicious voices can still be heard, even after thirty years. Since 1939, the whole globe has been aflame once more with the flash of guns and the glare of bombs, and Prof. Chien Mu, our well-known historian, wrote recently:

"The whole world is now passing through a new experience. The Europeans have reached saturation point in their attempt to turn knowledge into power and to seize the wealth of the earth. The machine has already shown its ghastly fangs more than once, ready to engulf the whole of mankind. The inequality of their society has also reached an acute degree. There is no more New World to be discovered, no more potential colonies to be shared out among the powerful. Hundreds of millions of lives are sacrificed in each war. Unless this war has extinguished the lamp of Western civilization altogether, they are bound to turn down a new path before long. They may either revert to the Greek way of living or formulate a Neo-Christianity, or even turn to the East for salvation. China has learnt her lessons at such colossal costs that it is inconceivable that she will repeat the disastrous process."

Although no one has yet tried to make out that the machine has a soul, it is nevertheless not quite the boggy that our grandparents in the nineteenth century thought it. I was once told a charming story about two Arabian gentlemen who came to this country on a visit, at the invitation of the British Government. They were of course shown all the sights, the Mersey Tunnel, a wireless station, television, and so on. It was a great treat for the two gentlemen from the desert. When they were leaving, your official asked them what they would like to take back with them, as a sort of souvenir; he probably expected a request for a television set, or a dictaphone to record the original of Omar Khayyám's *Rubáiyát*. But not at all. The two Arabian gentlemen looked around them for some time, but, to the disappointment of the official, could think of nothing of particular interest. Presently one of the visitors, thinking to himself that in the desert water is more precious than anything else, broke the awkward silence by asking for a couple of water-taps, one for cold water and one for hot, thinking how wonderful it would be to get water simply by turning a tap.

It is a ridiculous story, and for all I know it may not even be true, but it serves my purpose as an illustration of our conception of science in the last century. First we sneered at your useful taps. Then we admitted condescendingly that it might be a good idea to pick up one

or two of them. The Japanese not only got hold of the taps, but sent out a number of their people to be trained as plumbers. But their plumbers never learned how to turn off the water at the main. From 1898, the year of the Great Reform, men of a airs in China began to get hold of the taps, without knowing what to do with them, while the intellectuals held the pipes—long winding things—without connecting with the taps. But I must make my metaphors clear. By the taps, I mean the products of applied science. Long before we understood the principles of the locomotive, the aeroplane and the telephone, we had begun to enjoy the speed of the railway, the convenience of the telephone and the magic of the aeroplane. But until very recently we have not been able to manufacture any of them. By the pipes, I mean the scientific attitude—observation rather than contemplation, reason rather than intuition, analysis rather than synthesis. That change of attitude has been affecting our intellectuals for a long time. But I see as the latest and most mature manifestation of China's attitude towards the machine the realization that the tap must be connected with the pipes. In the early 'twenties, scholars were still arguing, while the warlords went on with their meaningless civil wars, each side equipped with the latest weapons, often purchased from the same source. It did not take long for us to realize that the tap must be connected with the pipes. We realized too that the machine was not the only asset of Western civilization, and that the machine itself had a wide background and a long tradition. Not long ago Prof. Yang Jen-pien pointed out in an article that up till now China's attitude towards science had been too utilitarian, too eager for practical benefits. "Western civilization," he wrote, "is based on a whole range of theoretic science. Although Newton was a great scientist, he invented no machine during his lifetime. The theory of gravity to-day forms an important pillar of modern science, but in his time it was of no practical value. And to go still further backward, had it not been for the emancipation of humanism during the Renaissance which enabled human beings to open their eyes to the phenomena of nature, not

even the genius of a Newton could have made the discovery. Darwin once regretted his inability to appreciate Shakespeare. We cannot enjoy science without acquiring the vast storehouse which is its background."

This sober attitude is a fairly new one, and in my opinion it represents a further evaluation of the West.

I have often thought about the invention of traffic lights. They are conspicuously placed, so that one cannot help looking at them, and for me they have a double symbolism. First, they represent the good and bad of democracy. Think of the boredom and waste of time when the red light holds you back, although there is no traffic to go through the other way. And if that happens at midnight when there are not many policemen about, anyone would be tempted to slip across. But when the traffic is heavy, think how safe you feel, cycling boldly across with enormous army lorries rattling and raging at your shoulder. In 1940, I think many people had lost their faith in democracy. They read about long-winded debates in Parliament and thought of the highly mechanized forces waiting on the shores of Calais. Many of us were impatient with the red light then. And some even tried to slip across, with or without success. But in the long run the way of democracy won the battle, because the German way, though efficient, is one-way only. And when a one-way street gets congested, heaven help everyone!

The second significance of the traffic light is its function of controlling the machine. It is a counter-invention, designed to tame speed and headlong power. Suppose the inventor of electric power had forgotten to invent the switch! Few of us would be here to-day. When trams were first introduced in Peking in the early 'twenties, I was still a child, and the trams were a real danger. I always used to think how terrible it would be if one of them changed its course and charged along one of the narrow *hutungs*, smashing up the little houses with their red wood furniture. When I was first taken for a ride I was reluctant to go, for I had heard a rumour that if the tram by some

accident became electrified all the passengers would lose their eyesight. I was an odd child, and I decided that I could not risk so much, just for a ride. It took me a long time to discover that the tramdriver had a number of levers with which he could control his vehicle. It was the same with the motor-cars—we used to call them street-tigers. Even to-day, when I come in contact with something highly mechanized, I am anxious first of all to see how the thing is controlled. All nightmares about machines are based on the fear of loss of control. Do you remember the eating machine in Charlie Chaplin's "Modern Times" when the man almost lost his teeth and half his head? Mr. Forster's machine got out of control; so did Mr. Huxley's. We say in China that one should not give up eating because of a choking-fit. What we need is a powerful and efficient switch for each powerful and efficient machine, ruthless traffic lights for ruthless speeding lorries.

Once things have been invented, it is futile to try to get rid of them again. It simply can't be done. How many radio sets could we smash up, you and I, even if we raided all the houses we pass each day? Therefore I am sure that the only safeguard is to encourage the counter-inventions, so as to keep the inventions under control. By so doing I feel that we can avoid the destruction of the individual and at the same time see that this irresistible progress is bearable. So, while the inventors are busy with new forms of speed, let the cautious produce more traffic lights. We may have political traffic lights, in the form of an enlightened constitution, or economic traffic lights, by controlling private capital. There is one basic safeguard we must make sure of—a liberal education and an adequate system of social service. The first will make sure that the individual is more than a cog in this gigantic modern world-machine, and the latter will see to it that no individual is at the mercy of another. Whither China? Whither Britain? Whither humanity? The answer can only be given by the silent history that ticks like a gas-meter behind us all. I am not a Government agent, and have never been one. I do not speak for

anyone but myself. But the China I want is neither an antique shop nor a workshop. I do not wish to see her shrink from progress. If necessary, I say to this infant of a New China, if necessary, take all the risks, brave all the impossibilities, but make your way, with a warm heart, a cool head and two skilful hands, against the cruelty of nature and the bonds of outworn institutions.

So far we have been examining the reaction of our Chinese writers towards the machine. Now we come to the question of the future of Chinese culture. I must confess that I am a dull person, and have neither the imagination nor the courage to indulge in glorious daydreams. I know that I should be a better propagandist, and you would be a more stimulated audience, if I could give you a rosy picture of post-war Chinese culture. But first of all we must ask ourselves "On what does a culture depend?"

In considering the prospects for Chinese culture, we must not forget the economic future and the question of political stability. We all know that a system of liberal education is the foundation of a flourishing culture, and political upheavals and social insecurity are both enemies of education. Poverty in China has been an immense obstacle in the progress of mass education. Again, if you study the subjects in which Chinese students abroad have specialized, you will discover that from 1931, the year of the invasion of Manchuria, technical subjects became more and more popular, until there were hardly any students taking general cultural subjects. For example, instead of taking biology, they would take a more narrowly specialized subject, animal husbandry; instead of general engineering, shipbuilding or steel construction. It is not that these young Chinese have no feeling for culture. I know at least one medical student who loves his gramophone records of classical music far better than his anatomy specimens. The explanation is that these young people have become more and more aware of the nation's pressing need, and have in many cases sacrificed their own inclinations.

Another indirect outcome of the Manchurian invasion (one which

even Lord Lytton did not discover) was the introduction of military training into Chinese schools and colleges. Up till then we had resisted the idea of regimenting our young people. We had introduced the pleasant make-believe of the Scouts and Guides, but we never dreamed that the throwing of hand-grenades could be included in a school's curriculum. During my last two years as an undergraduate, I was caught up in this new movement. How I fidgeted in that grey uniform, lying in ambush in the wheatfields, taking part in sham battles! Will military training still be a necessity for schools after this war? I think you will agree that the answer lies with the statesmen rather than with the schoolmasters.

Measures announced by government spokesmen in time of war are mostly a matter of expediency. But when the storm subsides, and calm returns, the weary, harassed young Chinese, like the young Britishers, will return to their war-scarred homes. As the ugly memories of pain and misery fade, their thoughts will begin to clarify.

If we believe that our long, rich heritage of civilization has any meaning, then we can trust their vision of the future.

[Lecture delivered at the China Institute, London.]

壹 关于机器的反思

——兼论英国小说对现代中国知识分子的影响

作家和机器自然是对立的。就其本质而言，机器对任何一种形式的手工艺都是一种持久不变的威胁，而无论我们在文学上取得何种“进步”，文学都必须是手工的。因此，当作家们极力谴责机器的时候，我们不必惊讶。但我们必须弄清楚，这种谴责是出于一种客观公正的仇恨，因而也算得上正直，抑或仅仅是一种自高自大。前者是事出有因，后者是感情用事。

不久前，我同一位比我还没有家务经验的女士争论真空吸尘器的发明是不是一件好事。她是所有机器的敌人，自然毫不留情地谴责真空吸尘器。因为我在近三年的时间里，总是见到剑桥为我打扫房间的和蔼可亲的工人，一连几个小时跪在地板上，在呛人的尘埃里刷地毯，我当然支持真空吸尘器的发明。凡能减轻我们单调、乏味、重复、肮脏工作的任何东西我都支持。但我当然也应给出一些对方的理由。我那位朋友说，如果她有一幢自己的房子，她就会生出一种亲昵的感情，会爱上每一片油漆和每一件木制品。她说，使用机器将危害一切有价值的事物。我问她，倘若她有一幢像奥兰多那样的房子，有三百六十五个房间，虽然男女主人都很爱惜房子，但他们不可能亲自打扫所有房间，那怎么办？她十分固执地说，她希望找位像她一样珍爱房子的女仆。这并不能令人信服，但它确实证明效率与温情是相对的。关于这一点，我想引用美国人类学家玛格丽特·米德博士在来英国的一次演讲中论及英国人和美国人的不同时所说的话：

一个美国人和一个英国妇女领我在英国西南的一座城市里转。美国人指着一个柜台对我说：“我们一个月就要在这么不方便的柜台提供一万份饭菜。”想着为人服务的英国妇女说，“这不是很好吗？”还在想着柜台的美国人说，“这不可笑吗？”因为对一个美国人来说，他的道德不是改变本性去将就，而是去改变环境，去解决问题，不是应付问题。我们相信，如果没有实际困难挡道，美好生活更易于达到。那些让你们觉得奢侈或很可能使人性情变温和的节省劳力的设备，在我们看来，只是一些将人们解放出来干其他事情的方式。

这意味着，英美两国人在对待事物、私人财物和金钱的态度上有着根本的不同。对我们而言，所有事情都只是达到目的的方式，一种使母亲从家务中解放出来更多陪

陪孩子的方式，一种让老师更有空指导学生的方式，一种让父亲飞奔回家以便有更多时间陪孩子玩棒球的方式。我们的兴趣在于做事快捷、有效，以使人们随后活得更像“人”。但你们的兴趣则在于把事情本身当作“人”；英国妇女如此热心忙于把别人照料得体贴入微，以至不能停下来想一想，她们有没有解救自己。最近，有位美国人对我说：“我感觉在英国这样的国家，有人会爬三层楼为你亲切地端上一杯茶。”但当我们谈到用电梯或电茶壶淘汰楼梯，甚至一家人在同一时间下楼来吃早餐，你们也许以为，我们是要消除你们辛劳的双脚爬上有百年历史的楼梯所承载的爱。

当然，在中国，这杯茶可能得从另一条街上给你端过来。

工业革命以来，英国的作家一直关注着机器对人类生活所产生的影响。塞缪尔·巴特勒、韦尔斯、吉卜林、贝内特、福斯特、赫胥黎、D. H. 劳伦斯、弗吉尼亚·吴尔夫等，都论及这种影响。

在工业革命发生之后不久，就出现了对机器的怀疑。以我对英国文学的有限知识，我不敢对这段历史深究。但人们能从狄更斯的小说中感受到一种对工业肮脏的恐惧。狄更斯太尖锐了，以致不能从哲理的角度来描写机器。在上流社会的克兰福德，机器的影响力也显现出来，马蒂小姐对那些富有事业精神的经纪人有多失望啊！但英国最早坦言指责机器的小说之一，是塞缪尔·巴特勒1872年出版的《埃瑞洪》¹。这部小说比中国的乌托邦小说《镜花缘》晚了四十年，讲述支持机器的人与机器反对者之间的战争，这场战争使一半的人口丧生。不用猜，机器反对派占了上风。比起奥尔德斯·赫胥黎笔下高效世界里歇斯底里的人们来，埃瑞洪人对机器的反感更为友善，而且他们会从多方面进行思考。但他们同样为机器的支配而深深苦恼，并担心将来有一天可能会被按马力分类。与其说巴特勒反对机器本身，不如说他更反对人类对机器灾难性的依赖。他担心“突然取消蒸汽力将不会让我们回到机器出现以前的状态；世界要全面崩溃，沦为前所未有过的混乱状态，仿佛人口突然翻倍，却没有养活所增人口的相应办法”。

赫·乔·韦尔斯的科学幻想小说成了机器的忠实信徒手中的蓝图。读他小说的时候，我们能感觉到他对这个不整洁世界的愤怒，即便牺牲个人，他也要使这个世界整洁起来。他称过时的自由主义为“邪恶时代养成的心理习惯”。在他描画的“现代乌托邦”里，每个人“不仅身体好，而且都得到锻炼，几乎遇不到胖子和秃头、佝偻腰和脸色暗淡的人”。生活在他理想世界里的人，“得到及时的组织，走失的任何人都能被寻踪找到”。他为这个大同世界十五亿人建立起个人登记档案，类似于一位生物

学家的卡片索引。这种编制不光对人，也应用在建筑上。“除了公共纪念馆，任何没有达到健康和便利标准的住房都将由房主自费拆除。不修边幅、衣衫褴褛、精神失常、露宿街头的人，都要逮捕。”从这一点，我们能够看出当今欧洲梦魇的一瞥。我们确实应当称赞韦尔斯先生的预见力，因为他在1903年就已经预见到为集体牺牲个人利益的不可避免性。他预言，“随着国家的有序发展，个人利益将减少”，而且，他把这作为必要的邪恶坦然接受下来。他甚至预见到艺术家们在这新社会的情景，“艺术院校的学生们为设计一列电力火车而展开竞赛”。

然而，韦尔斯先生的同代人中没有几个抱有同感，他的晚辈都反对他的观点，这使他成了非常特殊的人物。通过阅读现代英国文学作品，我得到这样一个印象，每一位作家都是一个二十世纪的卢梭，提倡直接回返（即便不是完全回返）自然。考虑到英国是工业革命的摇篮这一事实，我发现这实在太有趣了。

爱·摩·福斯特信条的基础是人际关系，这是他国际主义的起点，激励着他为公民自由而斗争。最重要的是，人际关系是他小说的主题，而人际关系的首要敌人就是机械、非人性和没有感官的机器。他憎恨这个虚伪、毫无温情的世界，不过即使是他笔下《霍华德别业》里的威尔科克斯先生也能被具有天使性格的玛格丽特拯救。但在他的小说《机器休止》里，机器超越了同情与拯救，它挡在孔诺母子之间，母子关系可是人类关系中最神圣的。在这个机器的世界里，演讲不能超过十分钟，除了机器规章没有旁的读物。人的听觉失去灵敏，父母的责任在生育那一刻即告终止。一切都标准化，旅游成为一种徒劳无益的事，因为北平和什鲁斯伯里²也没什么不一样。人们回避自然，害怕黎明的曙光，完全失去了观察力和理解力。他们崇拜机器，服从机器，适应机器的需要。这梦魇在很多方面比赫胥黎先生小说中描述的更可怕，而且，最后对机器的勇敢反叛是那么地动人。

弗吉尼亚·吴尔夫对机器的反感自不必说。虽然她的反感很含蓄，但读过她的作品便会发现她非常讨厌当今这个时代：飞机把广告写上蓝天，单调的嗡嗡声打破了田园的宁静。吴尔夫夫人不是赫胥黎先生那样的说教者，也不是像劳伦斯先生自封为先知。她不谴责。然而，在《奥兰多》里，她将现代的肮脏与喧嚣同十八世纪伊丽莎白时代的辉煌与壮丽鲜明对等。奥兰多为现代世界感到惊奇，“‘上帝啊，’他站在窗边看着嬉戏的鸽群说，‘我们生活在一个什么世界！这是一个怎样的世界！’”这

是在十九世纪，“一切似乎都已经缩小”，而且“轻轻一碰，一整间房子亮了，数百间房子亮了，一间房和另一间房是惊人地相似。人们在这些小方匣子里便能看到一切，没有了隐私；没有了逡巡的暗影和奇特的角落；没有了系围裙的女人把晃动的油灯小心地放到这个桌上，再放到那个桌上”。我无需多说那个去耐斯布瑞奇购物、在电梯上苦恼的奥兰多的故事，因为她的堕落已然感动得我们落泪。我们很容易从吴尔夫夫人死后出版的《幕与幕之间》的结尾，看出她是在为自己的生命作总结，给她的同时代人传达信息。这是她的最后一部小说。她不像劳伦斯那样批评越来越严厉，她的批评始终很柔和，甚至带有自我辩护的意味。与其说她在谴责今天，不如说她在为今天而悲伤。在她的露天剧场，现代人要登台时，“突然下起了阵雨。没有人看到大块的乌云移到了头顶。雨水倾泻下来，似乎全世界的人都在悲伤，流泪，流泪，流泪”。为与这新的节奏协调，“曲调变换，噼啪声，破裂声，一阵一阵的。是狐步舞曲？还是爵士乐？总之，乐曲到剧烈激昂处戛然而止哦，幸好年轻一代的傲慢无礼只是暂时的。这些不能制造只会破坏的年轻人，把古老的梦幻击得粉碎，把整个的东西打成碎片”。接着，那面有名的镜子出现了，每位观众都能从镜子里看到自己的影像。一个冷淡的声音（大概是吴尔夫夫人的）宣告：“让我们打破节奏，忘了韵律，静静地考量自身。我们自己。我们中的瘦子，胖子，能从镜子里得到映证。而我们中大多数人都是说谎者，也是小偷，但这无法从镜子里看出来。穷人像富人一样坏，或者更坏。想到到处都有持枪的凶手和丢炸弹的人，他们公开做着我们秘密做的事”赫胥黎先生对现代，连同现代的条件反射、虚假音乐和致人迷醉的苏麻液，进行激烈的讽刺，劳伦斯抨击对男性生殖力的阻碍，而吴尔夫夫人则对现代既怜且恼。

对我们这个机械化世界的抨击，没有谁比毛发浓密的先知劳伦斯更猛烈。他生在邻近诺丁汉的一个矿工家庭，这使他对工业社会的抨击越发有趣。机器对别人是个象征，而对劳伦斯却是每天的现实。在某种意义上他属于机器，因此，他对米德兰人的描述具有一种特别的理所当然的风格。例如，他在小说《虹》中写厄休拉第一次去她汤姆叔的煤矿时受到震动：

“这地方是不是像看上去的那么可怕？”年轻的厄休拉问道，眼神里有一丝紧张。

“这里就这样，没有隐藏什么呀。”他说。

“为什么这里的人都那么哀伤？”

“他们哀伤吗？”他答道。

“他们好像都有难言的忧伤，”厄休拉激动地说。

“我看他们不是这样。他们把这看成很自然的事。”

“把什么看成自然的事？”

“这个——煤矿和整个地方。”

“那他们为什么不把它改变一下？”她激动地提出异议。

“他们相信必须改变自己以适应煤矿和整个地方，而不是改变煤矿和整个地方来适应他们，这样做更容易。”他说。

.....

“每个男人都有自己的那点小节目，都有自己的家，但煤矿拥有每个男人。女人只是得到一点商店消化不了的零头。一个男人在家中是什么？是一堆毫无意义的肿块，一架站着的机器，一架赋闲的机器。”

因为劳伦斯揭示出人对于机器悲剧性的顺从，所以他的小说比别的科幻小说更叫人感到震惊，也更令人信服。

在《儿子与情人》中，保罗跟克莱尔解释说：“你看，我已经完全习惯了，我会怀念这一切的。不，我喜欢各处的矿井，喜欢成排的卡车、车头箱，喜欢白天的蒸汽和夜晚的灯火。小时候，我就总想，白天里的一缕云烟，夜晚的一片火光，是矿井升腾起来的蒸汽、灯光和燃烧的河岸。我想，上帝一直在矿井的顶端。”

这当然只是劳伦斯小说中许多抒情的精华段落之一，它并不暗指对工业主义的爱。相反，劳伦斯憎恨工业主义，只不过他的抨击不带有歇斯底里的狂热情绪。《查泰莱夫人的情人》中，猎场看守人梅勒在反思他和查泰莱夫人的关系时，为劳伦斯对工业主义的态度提供了线索：“这不是女人的错，更不是爱的错，也不是性的错。错全在这里那里那些邪恶的电灯和机器恶魔一般咔塔咔塔的响声。”最后，劳伦斯把罪责全部推给机器，唱出了他的墨西哥赞歌。

劳伦斯对机器的摒弃，更确切些说是对科学的摒弃，其勇敢精神值得钦佩，但这是非理性的。劳伦斯从不推理，他只是反复灌输他的论点，其方法可以用他自己的三句话来概括：“你跟我说我错了。你或者任何人凭什么说我错了？我没错。”（《石榴树》）他不同达尔文和赫胥黎争论，而是干脆把他们的书丢到水里。他在《潜意识幻想曲》中宣称：“我不相信进化论，倒是相信事物的奇异性，相信彩虹替换、花样翻新的创造性文明。”他在这本书的结尾再次表示：“理想主义者和科学家

们（他们是一码事），谈论原子、生命的起源和机器对宇宙的提示，该是让他们停止胡言乱语的时候了。没有这回事有关太阳的科学，我连五分之一都不信。说月亮是从地球喷发出来的一个死亡的世界，一秒钟我都不信。我知道太阳是热的，但要我相信太阳是一个转着圈旋转，嘶嘶作响，炽热燃烧的气球——不，谢谢。”

我很高兴没有和劳伦斯争论，但假如我有机会听到他在用这种调子同人争论，虽然我会站到他的对立面，可我还是从心底佩服他。劳伦斯的作品明显表达出现代人对机器的厌恶。像《儿子与情人》中的保罗，他出身于矿工家庭。他不认为诗剧《奥赛罗》与没有灵魂的机器形成对比，因为他不像赫胥黎先生和吴尔夫夫人，他对过去没有特别的爱恋（追忆往昔是一种容易的逃避形式）。劳伦斯是位浪漫的富于个性的人，蔑视一切标准化的事物。他在晚年甚至因坚持个人而反对生活规律。他完全相信直觉，而不屑于分析。

劳伦斯在一首题为《机器的胜利》（我忘了它的写作日期）的诗中，预言了机器的没落，因为“人的心灵仍是避难所，云雀在里边安然筑巢”。

最后

因被一颗心灵收藏而不死的造物

听到一声沉寂的降落

是机器的失败和终结；

听到柏油路轻微的撕裂

鹅耳枥树生出嫩芽；

听到远方工厂最后的汽笛

传递着最后绝望的狂喊

机器终于崩溃。

1932年，奥尔德斯·赫胥黎在他的反乌托邦科幻小说《美妙新世界》中，警告世界提防工业化。他在这部小说里想象描画出一个完全工业化世界的恐怖。幼儿在中央伦敦孵化与条件设置中心出生并得到抚育，他们的饮食是药片和从机器发出的人造音乐，西敏寺变成了歌舞表演的餐馆，一架管风琴迸泻出芳香和色彩。每个人都崇拜一个叫福特的上帝。还有野蛮人约翰，一位直接来自旷野的先知，我想他肯定是《圣经》中施洗的约翰。下面是一段代表儿童天性的野蛮人和机器代言人中心主管

的争论。

（主管说：）“我们喜欢愉快舒适地做事。”

“可我不要舒适，”（野蛮人说，）“我要上帝，我要诗歌，我要真正的危险，我要自由，我要善良，我要罪恶。”

“事实上，你是在要求不幸福的权利。”穆斯塔法·蒙德说。

“你说对了，”野蛮人挑衅地说，“我就是在要求不幸福的权利。”

“你还没说衰老、丑陋和病弱的权利；染上梅毒和癌症的权利；食不果腹的权利；浑身生满虱子的权利；生活中永远为明天担忧的权利；感染伤寒的权利；以及被各种难以言说的痛苦所困扰的权利呢。”

长时间的沉默。

“我也要这一切权利。”野蛮人最后说。

穆斯塔法·蒙德耸耸肩，说：“那就请便吧。”

由这段对话可以推断，野蛮人的逻辑十分混乱。是因为赫胥黎先生对机器的反对太过感性而非理性了吗？假使野蛮人（或赫胥黎先生）是个矿工，在地下几百尺的黑暗里挖煤，或者是名海员，要同狂风巨浪搏斗，他当然是愿意用机器提供的安全来替换危险。他会乐于接受能够保护他生命的任何设备，不论是一个指南针或是一架机器挖掘机。赫胥黎先生无疑是要让野蛮人站在他所创造的噩梦般乌托邦的鲜明对立面。野蛮人只喝芥末加热水，而且从有序的现代世界逃到了萨里郡吉尔福德的灯塔上。野蛮人声明，他并不在乎去哪里。“只要能一个人独处，哪儿都行。”

如果逃避机器像乘坐南线火车到吉尔福德那么容易，我向你们保证，我会买张单程车票去做第一批旅客。不幸的是，这个主意跟十九世纪的中国还试图闭关锁国一样无效。

在中国，我们已经以不同于你们的方式感受到科学的好处。第一，机器起源于你们的文艺复兴，我们东方人从来也没有养育过它。对我们来说，科学是异域的东西，我们接受它只因了它应用起来有舒适和安全等不同方面的好处。今天，伦敦的公共汽车是从维多利亚时代的公共马车发展而来的，下一步，谁知道呢，也许要发展覆盖伦敦的空中交通，那时，空中女售票员就得喊：“抓紧喽，我们起飞啦。”可香港和上海的公共交通背后没有这种传统。你们的无线电收音机，至少对像我这样的外国人来说，是替代了自动钢琴和八音盒，但中国的无线电收音机却像

是天上掉下的奇迹。（我说的是我这一代和我上一代），我们的下一代将具备机器头脑，并把这当成十分自然的事。中国知识分子的职责就是关注他们不要将其视为理所当然。他们必须学习科学的好处，并研究它的潜在危险。日本是猝然间引进的机器，所以导致她今天的惨剧发生。而中国因完全没有引进机器而逃避了惨剧的发生，这要感谢她固执的传统。如今，遭受过坦克蹂躏和零式战斗机摧残的中国，已经开始真心实意地，我还不能说是全身心地接受机器。倘若中国接受了机器，而没有某种“控制开关”，就没有理由不产生同日本一样的结果。安装一个控制开关，与引进机器同等重要。

这个开关是由什么力量构成的呢？这并非是个简单的问题。首先，我们来看看它所在国家的情形。在英国，我觉得你们尊重个人的传统就是开关。尽管英国发生过工业革命，但英国还是一个适合人类的地方，因为某些事是人们所不能容许的。到目前为止，你们的自由主义已经能够防护机器的支配。我似乎总觉得听到福斯特或别的英国人说，“使用机器悠着点儿悠着点儿”

苏联人以另一种迥然不同的体制来控制机器。只要机器没在个人的控制下，他们并不在乎机器的全速发展。换言之，在没有社会学家所称的资本主义的人剥削人的情况下，他们把机器看成掌握在国家手里一件安全的工具。

中国确实从现代日本的悲喜剧里得到一个教训，日本急欲要控制机器，可她选择的是怎样一条路呢？

社会主义的方法是控制手，而自由主义的方法似乎是要控制开关键盘。在某种意义上，对手的控制更为彻底，也更可靠，但谁去控制手？这是个留待解决的问题，也是我们这个时代主要自相矛盾的话题之一。

如果所有的工厂主天性公正、善良，那我们的许多问题都能解决。对这种错觉我们不能迁就。因此，我想，让一个喜怒无常的个人来掌握局面是绝不安全的。

赫胥黎先生怨恨的主要是目前事物的自动化趋向。我来自社会服务尚没有发展起来的中国，我作为一个中国人毫不犹豫地提倡“自动化”的社会服务。事物总是相对的，从表面和世俗的角度看，我们越是“文明”，越应更加系统化。一位西藏歌手可以通过一个帐篷一个帐篷地唱歌、弹奏六弦琴，挣得可观的收入，但他要是到伦敦城来表演，就会叫人讨厌，因为伦敦的每个人都忙于各类文件、档案。由于人们有足够的

空闲从事慈善工作，所以在伊丽莎白时代还用不着医疗保险。而我们现在都非常繁忙。英国已经建立起许多制度，诸如领取养老金，而这在中国仍要靠富有同情心的冲动之举，也就是仁慈的菩萨心肠。中国人因为没有钱，生病很少上医院，否则他们只得任由医务当局摆布。如果自动化带来公民权益的增长，那就让这种自动化看在老天的分上，让我避免沦为乞丐吧。

中国人对待机器有三种不同的态度，某种意义上也可说是同一种反应的三个阶段：激烈反对，屈尊俯就，最后盲目赞美。但我要提醒你们的是，直到最近，这三种反应即使不是完全受内部和外部事件的左右，也主要是受它们的影响。

中国人在十七世纪敌视科学纯然出于民族的傲慢自大。我们拒绝接受来自西方的任何东西，因为我们极其简单地认为，—作为一个民族，我们是足够好的，那我们所拥有的一切制度必定也是好的。所以，当德国的占星家汤若望想把太阳历介绍到中国来的时候，起初遭到中国学者的非难，最后心力交瘁，死在狱中。³那发生在十六世纪四十年代，当时有位叫杨光先⁴的学者写道：“宁可使中夏无好历法，不可使中夏有西洋人。无好历法，如汉家不知合朔之法，日食多在晦日，而犹享四百年之国祚。有西洋人，吾惧其挥金以收拾我天下之人心，如火于积薪之下，而祸发之无日也。”别的学者也都力图以十足的诡辩让机器的发明蒙羞。王壬秋（1832—1916）写道：“蒸汽船何其笨拙，野战炮何其粗笨。船要跑得快，大炮要易于移动才行。现在，要是不填煤，这些野蛮的船连一寸也无法航行，要是没几个人动手，大炮根本无法升高或移动。而如果战场上你遇到勇敢的士兵挥舞着淌血的战刀向你冲来，手起刀落就完事了。”⁵

然而，事实证明蒸汽船一点也不笨。相反，蒸汽船带来经济和军事两方面的重大变革。尽管中国仍然反感西方的科学，但她已被西方的成就吓昏了头，惊得目瞪口呆。傲慢混杂着恐惧，势必产生一种奇怪的心绪。这里有一则关于胡林翼（1812—1861）的小故事，胡是太平天国起义时期清廷的一位著名将领。那是安庆被围时，有一天，胡骑马登上龙山山顶查看地形。回到长江边上，忽然看见两条外国蒸汽船向西疾驰而过，快如奔马，轻若疾风。胡面色大变，老半天说不出一个字来。然后他拢紧马缰转回营盘。他在马背上吐血，险些掉下来。他本来就抱病多日，这件事以后，他的病情日益加重，几个月以后，就病死了。

到了1900年，整个民族已经认识到，若不在中国传统与西方技术之间寻求调和，将关系到民族的存亡。朝廷命官张之洞颇有勇气地写道：“知外不知中，谓之失心；知中不知外，谓之聋瞽。”

张之洞希望人们可以清楚地明白，西技只是为了“经世致用”。他写道：“如其心圣人之心，行圣人之行，以孝弟忠信为德，以尊主庇民为政，虽朝运沍机，夕驰铁路，无害为圣人之徒也。”这正说到点子上。就在此之前不久，另一朝廷高官曾纪泽乘蒸汽船回湖南老家，还曾激起极大的民愤。清帝国的口号是“中学为体，西学为用”。倘若你们在1937年以前到过中国，就能发现这一思想的许多具体体现。例如，近年来，西洋式东方建筑已非常流行。建筑外形还体现着中国传统建筑的威严，高高的琉璃瓦屋顶，雕梁画栋，内部构造已完全西洋化，电灯、水管装置和中央供暖。北平协和医院、燕京大学、国立北平图书馆、南京的铁道部，还有最近三年建立的昆明西南联大，都是采用这种建筑形式。

你们有位杰出的艺术家利昂·安德伍德，在他的《为上帝的艺术》一书中很明智地说：“总之让机器擦亮我们的高筒靴，填满我们的食品库，但不能干涉我们的梦。如果需要，你可以在前花园安置一座矿井，但别忘了在后花园保留一个角落，那里听不到矿井的噪音，却可以听画眉歌唱。必需的五把椅子可以用机器制造，但第六把椅子得留着自己打造以消闲通知可以打印，但要留一支笔用来写情书。”像这种同种文化里的适应较易获得，但异种文化的同化作用却会产生截然不同的问题。

当这种融和被带进音乐和绘画，即使不是真的不相融和，我们也能感到某种不协调。有谁能模仿荷兰画派或威尼斯画派在宣纸上表现中国的传统主题吗？阿尔伯特纪念堂⁷可以容纳喊“V”表示“胜利”的国际观众，但艺术却不是这样蓬勃的商业。它脆弱，过于敏感，要求高度的诚实，投机取巧无法达到完美。

当中国的外交官在凡尔赛就国际问题辩论的时候，中国国内也陷入一场激烈的哲学论战，一方是反科学的理想主义者，如梁漱溟⁸，另一方是以胡适博士、陈独秀和李大钊为首的唯物主义者。李大钊后来成为一名共产主义者，为信仰牺牲了生命。这场全国范围内论争的主题，是科学与生活的关系。第一次欧洲战争也始终是关注的焦点，唯物主义者把这场战争全然归于英德两国争夺市场的冲突，而与科学的邪恶影响毫不相关。这场论战到1922年达到高峰，双方均从相关立场出发提出质疑，中国文明能否与西方文明共存，如果不能，该如何和在什么地方进行调

节。论战双方都渴望中国文明存在下去，只是唯物主义者更热切盼望中国文明成为世界文明的一部分。

理性的中国人对机器的不信任根深蒂固，从来就没有得到治愈。每一次灾难降临到西方的头上，这种声音就会抬头。上次大战末期，一位中国学者写道：“以权宜之计践踏基本法有违常情。西方文明有不少长处，但我们必须保证不使我们自身蒙受西方文明的罪恶。如果孔子能开动飞机和潜艇，我敢肯定，他不会使用它们来伤害无辜。”⁹

卓越的留英学生辜鸿铭曾把一些中国古典名著译成英文，而在上次大战期间，他却成为了一位狂热的机器反对者。他写道：“西方人教你善良，是要使你要么恐惧上帝，要么恐惧法律。若没了这样的恐惧，就连兄弟和近邻都不能彼此信任。”¹⁰

在欧洲大陆枪炮轰鸣的时候，中国响起了“精神文明”的呼声，有许多预言家宣告，西方文明正在没落。1919年，梁启超在他的《欧游心影录》里，把第一次世界大战描述成是纯然唯物主义、西方人纯然机械论生活观的天惩报应。

三十年过去了，那些怀疑的声音仍能听到。1939年以来，整个地球再一次燃起枪弹炮火的闪光。中国著名历史学家钱穆教授近来写道：“整个世界正在获得一种新经验，欧洲人试图把知识变为权力，掠夺地球上财富的势力已经达到饱和点。机器好多次暴露出可怕的獠牙，急欲要吞没整个人类。已经再也没有新大陆可发现，再也没有潜在的殖民地可供列强分享。每一次战争，都要有成百上千万人丧生。除非这场战争把西方文明之灯完全熄灭，否则他们是不会接受一条新途径的，要么复归古希腊的生活方式，要么有系统地阐释一种新基督教，要么干脆转向东方寻求拯救。中国学习西方文明已经付出巨大的代价，重蹈覆辙是难以想象的。”¹¹

尽管没人能证明机器有灵魂，可它实在也不是十九世纪时我们的祖辈所想象的大妖怪。我曾听过一个有趣的故事，讲述两个阿拉伯绅士受英国政府之邀来访，自然大开眼界，参观了默西隧道、无线电台、电视等等。这对两位来自沙漠的客人来讲是难得的乐事，离开时，英国官员请他们选一件用得着的纪念品带回去，而且估计他们会想要一台电视机或能录《鲁拜集》原文的录音机。但根本不是这样。两位阿拉伯绅士环顾四周好一会儿。让官员失望的是，两人对这些并没有特别的兴趣。不久，其中一个阿拉伯人打破了尴尬的沉默，觉得在沙漠里没有比水更珍

贵的东西，于是他要了一对水龙头，一个冷水，一个热水。他想，只要一拧龙头，就有水喝，是多么美好啊！

这个故事很可笑，自然也不可信，但它可以作为我的例证来说明上个世纪中国人的科学观。最先，我们嘲笑你们那有用的龙头，尔后，我们屈尊地承认，能得到一两个龙头也许是个好主意。日本人不仅获得了龙头，还派出许多人接受培训成为管子工。但他们的管子工从未学会如何关掉总开关。从1898年戊戌变法以后，中国的实业家们开始接触龙头，却不知用它来干什么，而知识分子手里握着又长又卷的管子，又无法与龙头连接。我得明确这个隐喻了，龙头我是指实用的科学产品。我们了解机车、飞机和电话的原理之前，早就开始享受着铁路的速度、电话的方便和飞机的奇妙。但直到最近，我们才能够制造它们。管子我是用来指科学的态度：观察而非沉思，理性而非直觉，分析而非综合。这种态度的改变影响了中国知识分子很长时间。我觉得，中国知识分子认识到龙头必须与管子连接，是中国对机器的态度最新、最成熟的表现。二十年代初期，学者们辩论的时候，正值军阀们进行着毫无意义的内战，每一方都用从同一来源购得的最新式武器装备起来。我们没用多长时间就懂得了龙头要和管子连接。我们也认识到，机器不是西方文明的唯一财产，而且，机器自身有其广阔的背景和悠久的传统。不久前，杨人教授在一篇文章里指出，直到现在，中国对科学的态度还是十分功利性的，只求实际的好处。他写道：“西方文明是以全方位的理论科学为基础的。牛顿是位伟大的科学家，可他这一生并未发明机器，但在他那个时代没有实用价值的地心吸力理论，却构成今天现代科学的重要基石。再向上追溯，幸而有文艺复兴时期人文主义的解放，使人类在自然现象面前打开了视野，要不即便天才的牛顿也不会发现什么。达尔文曾经后悔无法欣赏莎士比亚。我们也不能在没有掌握丰富科学知识的情况下享受科学。”¹²

这种态度是种新的清醒客观的认识，我以为它体现出对西方更深意义上的评价。

我常想到交通灯的发明，置于路口显著位置，人们禁不住要看。对我，交通灯具有双重的象征意义。首先，它体现着民主的好与坏。如果红灯停时，另一条路上没有车辆通过，你会觉得交通灯讨厌，耽误时间。若是在半夜，附近没有警察，遇到这种情况，就有人想溜过去。但当交叉路口交通拥挤，庞大的军车队伍在你身旁吭哧吭哧等红灯，而你

骑着单车大胆穿行时，想想你会感到多么安全。1940年，我想许多人已经丢掉了民主的信仰。他们读着议会上冗长的讨论报告，想起集结在加来的德国机械化部队，许多人对红灯失去了耐心，有的甚至试图溜过去，有成有败。从长远考虑，民主之路会赢得战争。因为，虽然德国之路是高效的，却只是单行道。单行道拥塞不堪了，人人只能自求多福！

交通灯的第二个意义在于它控制机器的功能。这是一项反发明，是要控制速度和冲力。假如电力发明者忘了发明开关，那我们今天就剩不下几个人了。二十年代初，有轨电车刚出现在北京街头时，我还是孩子，真觉得那东西危险。我总想，要是哪辆车脱了轨，冲进一条窄胡同，撞毁许多房子和里面的红木家具，得有多可怕。我头一次坐有轨电车是非常不情愿的，因为我听传言说如果电车跑了电，乘客都会失明。我是个怪异的孩子，决定还是不为坐一次而去冒险。过了好长时间，我发现电车司机手里操纵着几个控制杆，像汽车一样——我们管汽车叫“街老虎”。即便现在，每当我接触高度机械化的东西，首先关心它能否受控制。我做的关于机器的噩梦，就是恐惧它失去控制。你们记得查理·卓别林《摩登时代》里那架差点叫他掉了牙、丢了半拉脑袋的机器喂食机吗？福斯特作品中的机器失去了控制，赫胥黎的也是。中国人常说不能因噎废食。我们需要的是为每一部强力高效的机器配置一个强力高效的开关，为那些无情的高速卡车，安装无情的交通灯。

东西一旦发明出来，想再摆脱它，总是徒劳无益，简直不可能办到。咱们，你们和我，纵然每天查抄所经过的每一幢房子，又能打碎多少收音机？因此，我确信，为使发明的东西得到控制，唯一的保护是鼓励反发明。我觉得，这么做能够避免个人的毁灭，同时也能使人承受得起这不可抗拒的进步。在发明家忙于发明新式变速器的时候，就让小谨慎者制造出更多的交通灯。我们有开明的宪法这一政治交通灯，也要有控制私人资本的经济交通灯，还应有一个基本的保护，即一种自由的教育和适当的社会服务机制。前者确保个人不仅仅是这个庞大的现代机器世界里的一个齿轮，后者确保个人不会任由他人摆布。中国向何处去？英国向何处去？人类向何处去？答案只能由在我们身后像煤气表一样嘀答前进的沉默的历史做出。我不是个政府代理人，从来也不是，我只代表自己讲话。我心目中的中国既不是一个老古玩店，也不是一个生产车间。我不想看到她止步不前。如果必要，我要把这称为一个“新中国”的婴儿，面对自然的残酷和陈腐制度的束缚，以热情的心、冷静的头

脑和灵巧的双手，冒尽风险，向一切不可能的事物挑战，走出自己的路。

到此，我们一直在探讨中国作家对机器的反应。现在，我们来谈论中国文化的未来。我得承认，我是个愚笨的人，没有想象力，也没有勇气沉醉在迷幻的梦想里。我想，如果我能向你们描画出战后中国文化的光明前景，我该是个不错的宣传员，而你们这些听众也能兴奋起来。但首先，我们必须自问“文化依赖的是什么？”

要研究中国文化的境况，决不能忘记经济前景和政治稳定的问题。我们都清楚，一个自由的教育体制是文化兴盛繁荣的基础，而政治动乱和不安全的社会因素都是教育的大敌。中国的贫穷对大众教育的进步是一大障碍。另外，如果你们留心中国留学生所学的科目，就会发现，自从1931年日本侵略东北，学习技术科目越来越流行，几乎没有人选修一般的文化科目。例如，他们选择更为狭窄的专业科目，像畜牧业，而不选生物学；选择造船业或钢铁建筑业，而不选一般的工程技术。这并不是说这些年轻的中国学生对文化没感情，至少，我认识这么一位医科学生，比起他的解剖标本，他更喜欢他那部能播放古典音乐的留声机。这只能解释为，这些年轻人越来越清楚民族的迫切需要，在许多情形下牺牲了自己的爱好。

日本侵略的另一间接结果，是中国的学校和大学引进了军事训练。（连利顿勋爵都没有注意到这一点。）曾几何时，我们还在反对把年轻人组织起来训练。我们曾愉快地假扮侦察员和向导，可从没有梦想学校的课程把投手榴弹包括进来。我在大学的最后两年，正好赶上这场新运动。穿着那灰制服，埋伏在麦子地里，参加模拟战，令我感到坐立不安。学校在战后还会需要军训吗？我想，你们会同意，答案得问政治家，而不是学校的校长。

政府发言人在战时公布的措施，多是出于权宜之计。当暴风雨平息下来，一切归于平静，疲乏、焦虑的中国青年会像英国青年一样，回到他们饱受战争之苦的家园。随着痛苦悲惨、不堪回首的战争记忆渐渐黯淡，中国青年的思想将越发明晰。

如果我们相信中国悠久丰富的文明遗产有价值，那我们也就能够相信他们眼中的光明前景。

2. IBSEN IN CHINA

—And the Chinese Annoyance at Bernard Shaw

In China, Ibsen is looked upon as a social surgeon rather than as a playwright. For a decade he was almost idolized by the Chinese intelligentsia. Not that we chose him, rather he expressed the mood of the young Chinese when the literary revolution was launched. In those days, China was so hopelessly ill, that she needed a daring doctor capable of prescribing the most desperate remedies. Ibsen appeared the most violent iconoclast to us then. It is difficult for a Westerner to imagine the effect on us when we found a dramatist inciting wives to flee from their egoistic but lawful husbands and making a hero of a crazy doctor who defies the unanimous decisions of a whole town. Social conventions dating from the time of the Yellow Emperor began to be challenged. Individuals began to assert their right to think and act. China, the giant sleeper in the valley of eternity, suddenly woke up from an agonizing nightmare. For the nineteenth century had come to be associated with poverty, corruption and the threats of "ocean devils". The great Chinese Empire was about to sink at any moment. Fate was merely waiting for the partitioning powers to agree. Young Chinese had read the ominous stories of India and Korea. Aware of the impending danger, they were naturally appalled, impatient and deeply angry with native traditions that bound the feet of their women and bent the backs of their men. They revolted, and the Imperial executioner cut off many an intelligent head in the Covent Garden of Peking. But the revolt continued. The Chinese press itself was aflame. In 1909, a newspaper editor was sentenced to one year's imprisonment for printing the headline: To Save China We Need Violent Upheaval. And from 1909 on there was indeed an upheaval! Feuds among waning warlords, demonstrations by students, anarchists and

communists. Placid, stoical Confucian China suddenly became a cauldron seething with an unprecedented concoction of good and evil.

In the midst of the revolt, young Chinese, especially those who had studied abroad, found sympathizers in Europe. Foremost of these was the Norwegian dramatist Ibsen. His works seemed to express their own resentment against existing society and their passion for revolt. Too excited to bother about the details of his theatrical art, they called to him from their desperate loneliness, "Beloved teacher, at last we have found you!" He was hailed by young China as a comrade rebel, a champion of individual rights. Thus an Oriental shrine was built for the Sage from Scandinavia. Like all shrines, of course, it was not a permanent one. However, Ibsen was revered by the intellectuals of rebellious China for well over a decade, a very juvenile but memorable decade during which both problem plays and problem fiction enjoyed a nation-wide vogue.

With the rising popularity of the vernacular, nothing could have departed more from tradition than the modern Chinese drama. It was first experimented with by a group of Chinese students in Tokio, and the earliest European plays adapted were *La Dame aux Camélias* and *Uncle Tom's Cabin*. Both appealed strongly to the Chinese who were suffering from racial oppression, and the bonds of a narrow matrimonial convention. But no European playwright had been introduced into China seriously and systematically before Ibsen. About 1917, translations of his plays began to appear in *New Youth*, the leading organ of the movement. *A Doll's House* was followed by *The Enemy of the People* and others, including *The Lady from the Sea*. The sexes were still segregated on the Chinese stage, and at that time men were proud to play the role of the mutinous Nora. In 1918, Dr. Hu Shih, the guiding spirit of the movement (former Chinese Ambassador to Washington) published his essay on Ibsenism. He presented Ibsen as the most sound social doctor for China, "the quintessence of the healthy individualism of the last century. To improve society, we must first build up a sound self, a free and independent personality, critical

of our existing environment. We must have the courage to speak the truth, to attack society when it becomes corrupt, like that indomitable soul, Dr. Stockmann."

Ibsen's popularity in China between 1917 to 1921 cannot be exaggerated. For a time the theme of a play was crudely interpreted as "the social problem it dealt with". Obviously it was also held by critics as a convenient criterion. Some have accused our moralizing critics of counting the number of fashionable terms like "hunger" and "exploitation" employed by the author before they passed their final verdict as to whether a work was "solid". But playwrights themselves also formed a habit of describing their works in terms of "problems" dealt with. One author wrote apologetically, "Although the play is aesthetically immature, I am glad to say that I have touched on matrimony and rural bankruptcy, the two up-to-date social problems confronting us." The People's Theatre in its opening announcement in 1921 declared, "Mr. Bernard Shaw once said that the theatre is the place for propaganda. Although we do not fully endorse this, we can at least say that the age to look down on drama as a form of recreation has definitely passed. The modern theatre is a wheel to drive social progress forward; it is also a microscope to detect the diseases in our environment. It is a merciless mirror in which all the squalid aspects of our community life will be reflected."

Exposure of social injustice and evil has always been a favourite theme of Chinese fiction. Innumerable novels and stories had been written throughout the ages caricaturing wicked mandarins and rapacious country squires. These were in fact the sole outlet for public sentiment under the Imperial regime. This cardinal function of our literature has continued till to-day without a break, from *The True Story of Ah Q* by Lu Hsün to Chang Tien-yi's *Mr. Hua Wei*. Thanks to Ibsen, this attempt became even more conscious and deliberate. In the Chinese plays of the 'twenties, the settings were often laid in an atmosphere of corruption, the plot evolving in a family full of concubines, with an ostensibly Confucian but inwardly rotten public

figure as chief protagonist. In this inferno, one hears the affected titters of prostitutes, the yawns of millionaires and the mutters of the oppressed. It is not unusual at the climax to have a sober youth flourishing a torch who condemns all the "lice and worms of an accursed society", and welcomes with open arms a vague and undefined new world. One fact that particularly interests me is that Ibsen was an anarchist in youth. The early period of modern Chinese literature was strongly anarchist in character. It expressed a vehement indignation with this clumsily created world and a passion for a rosy paradise where the individual is free.

It is quite safe to say that there is a vein of Ibsenism in nearly every Chinese author. Kuo Mo-jo, one of our most prolific and versatile writers, in his three historical plays written in 1922 entitled *Three Rebellious Women*, preached a mixture of socialism and feminism. *Cho Wen-chun*, for instance, is the story of a widow of about 100 B. C. who eloped with the scholar Ssu-ma Hsiang-ju who had wooed her by playing his lute. For centuries this incident had been regarded as a shocking scandal. Kuo chose this theme to champion the right of a widow to remarry. The performance of this play by the girls of a Normal School in Chekiang province in 1923 caused the dismissal of its president. Later it was gravely condemned as obscene by the local Educational Board.

After a while the development of problem plays satisfied neither the pure dramatist nor the ideologist. Not Ibsen but the restless spirit of young China was really to blame. Looking back on the waves that washed the banks of modern Chinese literature one finds, to the great displeasure of the Marxists, that the tide immediately following Ibsen's individualism was romantic even to the verge of decadence. When the mania for the serious Ibsen subsided, Oscar Wilde and Baudelaire in various exotic hues caught the imagination of young Chinese writers. In poetry, "the flower of fire" (in block type) was an image used to excess. In drama, the popularity of problem plays was supplanted by that of the sentimental plays of Tien Han, founder of the famous Nan

Kuo Movement. For a time, the stage nearly drained the tear-ducts of Chinese theatre-goers. When they heard that Goethe's *The Sorrows of Young Werther* had caused many suicides in Germany, several ultra-sensitive souls promptly sacrificed their lives after seeing Tien Han's *Tragedy on the Lake*, or after reading Kuo Mo-jo's *Fallen Leaves*. However, this morbid condition did not last long. In 1925, when the incident occurred in which the Shanghai police protecting the interests of Japanese mill-owners, shot a number of Chinese students and workers, the whole country was flooded with natural indignation. Creation Society, the influential literary group which had been mainly responsible for the decadent trend, suddenly became the passionate exponents of proletarian literature. Thence began the literary civil wars which lasted until the outbreak of the Sino-Japanese war in 1937 when Chinese writers formed a united front.

Technically, the problem playwrights made a serious blunder. They had grasped the social gospel of Ibsen and preached it in earnest. But they had overlooked the function of popular entertainment. Consequently problem plays became synonymous with medieval didactic plays. Of all the alleged "disciples" of Ibsen, Bernard Shaw is the best known in China. His visit to us a decade ago was as eventful as that of Tagore, though he came merely as a tourist. But how intimately he is associated with the problem play is difficult to say. The average reader is probably most impressed by his devastating humour and fantastic and fruitful situations. That he is the most successful preacher among modern playwrights is beyond doubt. There have been many attempts to build him a shrine in China. However, a somewhat unfortunate occurrence once served as a warning to all problem playwrights. In the spring of 1921, a Chinese audience rudely cold-shouldered *Mrs. Warren's Profession*. Till then, adaptations of European plays had been mainly supported by the student class. An ambitious producer, Mr. Wang Chung-hsien, wanted to extend his audience to the ordinary theatre-goers of Shanghai. It took him a long time to persuade several popular actors and actresses

to take part in the Chinese version of Mr. Shaw's play. Generally, the theatre in which it was to be produced advertised its programme in two newspapers only. This time, Mr. Wang decided to advertise in five. But the most prosperous day of this "problem play" was only 60 per cent of the leanest day of an ordinary variety. Even more regrettable, in the second act, when Mrs. Warren began to tell Vivie the story of her life, several fashionable ladies in the front stalls rose to leave and not without grumbling. After this heavy blow, the producer good-humouredly commented on his ungrateful and unintelligent audience: "Some of them quite failed to understand the play, some understood but found the plot lacking in surprise. Some had moral objections to Mrs. Warren herself and others disliked the repetition of such frequently abused terms as 'freedom of woman' and 'economic equality'. Of course to those who had seen the play abroad, our performance was far below European standards." Some impulsive critics immediately suggested that we should separate "play" from "ism" altogether. Mr. Wang, however, preferred a compromise. He wanted plays with simple progressive ideas and an intriguing plot. We could thus assure the intelligentsia of the country that we were still on the right track while sparing the yawns of an unintellectual audience.

This "patching-up" scheme did not meet with the approval of the more serious-minded. Admittedly, Chinese dramatic critics began to question the advantage of linking problem to play. Prof. Wen Yi-to, author of *Dead Water*, thought the whole question was but a comedy of errors. "Modern drama came to China by accident. The first playwright happened to be Ibsen, and Ibsen happened to use drama as a medium for preaching his social ideas, so we have imagined ever since that the idea is the foremost element of drama. When Wilde, Shaw, Hoffmann and Galsworthy were introduced to us their ideas always came before their art." The protest of Prof. Chao T'ai-mo was even more frank. He warned playwrights that they had no right to employ actors as mouthpieces for their views on social and political problems. "I think we have misplaced art and life altogether. It is the

domain of art to seek into the depths of human nature and to express the fundamental power of life."

To be fair, the primary motive of the entire literary movement was social reform. At first, the campaign was really "psychological reconstruction". Literature was the medium. Art seems to have come in as an afterthought. Since then, Chinese critics have become increasingly sophisticated. But in the beginning of the Republican era, the young Chinese generation, of whom the writers were the most articulate, was like an adolescent. The sudden realization of the vastness of the outside world dazzled him, but the senseless civil wars and wretched conditions at home made him despair. He was tormented by both past and present. The future held nothing but uncertainty. He longed to be healthy and free like others, but he did not know how. He was not yet armed with the means of revolution, nor had he mastered weapons of sarcasm. But he realized that mere pessimism was no solution. This helpless, undefined anger culminated in a state of aloof solitude. He was like a dissatisfied boy, tramping a filthy back lane on a sunny afternoon, with his hands in his pockets. He spat at everything. Even to the little dog rushing up to play with him, he would cry "Go away, and leave me alone!" Ibsen seemed to have understandingly patted the back of this sullen downhearted child. When Dr. Stockmann gallantly concluded in *The Enemy of the People*, "The strongest man on earth is he who stands most alone", he seemed to have expressed young China in that memorable period far more than Confucius in any of his utterings.

贰 易卜生在中国

——中国人对萧伯纳的困扰

与其说易卜生在中国被视为一个戏剧家，还不如说他被当成一位外科医生，专治各种社会问题。十年间，他几乎被中国知识分子顶礼膜拜。并不是我们选择了他，而是因为当文学革命发起时，他表达了中国年轻一辈的心声。当时中国病入膏肓，需要一位勇敢的医生，能给她开出最大胆的药方。而对我们来说，易卜生是最猛烈攻击传统观念的人。西方人难以想象易卜生对我们的影响：这位戏剧家煽动太太们从合法但自私的丈夫身边逃走或将一位敢于蔑视全镇一致通过的决定的疯狂大夫塑造为一位英雄。在中国，始自黄帝时期的社会习俗受到挑战。个人要求维护自己思想和行为的权利。中国这个在永生山谷里沉睡的巨人，突然被从一场痛苦的噩梦中惊醒。十九世纪的中国同贫穷、腐败和“洋鬼子”的威胁联系在一起。大清帝国随时都会沉没，命运只能是等待列强的分割。中国的年轻一辈读了印度和朝鲜有警示意义的小说，清楚认识到迫在眉睫的危险，他们自然对妇女缠足、男人打躬作揖的传统习俗感到恐惧、不耐烦并极其愤怒。他们反叛了，有许多富于思想的头颅，被清廷刽子手在菜市口砍下。反叛在继续，中国新闻界也燃烧起来。1909年，有位报社编辑因印刷标题“只有剧变才能救中国”被判处一年徒刑。但从1909年开始，中国确实开始了剧变！日渐衰落的军阀之间出现仇恨，学生、无政府主义者和共产主义者开始示威游行，平静、禁欲的孔教中国，突然变成一口前所未有的煮沸的大锅，锅里调配着善良与邪恶。

在反叛期间，中国的年轻一辈，尤其那些留洋学生，找到了欧洲的支持者。第一位便是挪威戏剧家易卜生。他的剧作似乎表达出他们自身对现行社会秩序的憎恨和对反叛的热望。他们太兴奋了，以致并不去考虑易卜生戏剧艺术的细节，他们因为自身绝望的孤独而呼唤他：“亲爱的老师，我们终于找到你了！”他被年轻的中国当成一位叛逆的同志和个人权利的捍卫者。就这样，这位来自斯堪的纳维亚的圣人的东方神殿建立起来了。当然，像所有的神殿一样，它也不是永恒的。但易卜生受反叛的中国知识分子的崇拜达十年之久，在这幼稚却令人难忘的十年里，问题剧和问题小说在中国国内广泛流行。

随着白话文的日益普及，没有比现代中国戏剧更背离传统的了。一群在东京求学的留日学生作了最早的尝试，最先改编的是两出欧洲戏《茶花女》和《黑奴吁天录》。它们对遭受种族压迫和婚姻习俗束缚的中国人具有强烈的吸引力。但在易卜生之前，并没有哪位欧洲戏剧家被认真而有系统地介绍到中国过。大约1917年，易卜生戏剧的译作开始出现在新文化运动的喉舌《新青年》上，先后有《傀儡家庭》、《国民公敌》、《海上夫人》等剧作。当时中国的舞台上还禁止男女同台，男演员为能饰演叛逆的娜拉而感自豪。1918年，新文化运动领导人胡适博士（前中国驻华盛顿大使）发表《易卜生主义》一文，称易卜生为救治中国最高明的社会医生，上个世纪健康的个人主义的典范，他认为要改进社会，必须首先确立健全的自我、自由独立的人格，并对现行社会状况提出批判。要像《国民公敌》里那个不可征服的斯托克曼一样，敢于说实话，敢于攻击社会腐败情形。

1917年到1921年间，易卜生在中国非常受欢迎。那时，一出戏的主题总被粗略地理解为它所“涉及的社会问题”。显然，这对批评家来讲也是实用的标准。有人指责惯于说教的批评家只会统计像“饥饿”、“剥削”等时髦的新词在剧中出现的次数，从而对一部剧作是否“扎实”作出最后的评判。不过，戏剧家自己也形成了用剧作所涉及的问题来描述其作品的习惯。一位作家愧疚地写道：“尽管这出戏在艺术上尚不成熟，但我很高兴地说，它涉及了婚姻和农村破产这两个当今我们所面临的社会问题。”1921年人民剧院揭幕时宣告：“萧伯纳先生说过，剧院是宣传的场所。虽然我们不完全赞成这种说法，但至少可以说，把戏剧贬为一种娱乐形式的时代已经一去不复返。现代剧院是推动社会进步的车轮和发现社会病症的显微镜。它是一面无情的镜子，我们社会生活中所有丑恶的一面都会被映照出来。”¹³

揭露社会的邪恶与不公正始终是中国小说最喜欢表现的主题。多年来，无数的长篇、短篇小说都在用漫画式手法讽刺邪恶的官吏和贪婪的乡绅。事实上，这也是处在清帝国统治下的人们发泄情感的唯一方法。从鲁迅的《阿Q正传》到张天翼的《华威先生》，中国文学的这一主要功能一直持续到今天，从未间断。感谢易卜生，使这种努力变得更自觉和从容。二十年代的中国戏剧，常常把背景置于腐化堕落的环境下，剧情从一个妻妾成群的家庭展开，主角是一位表面上仁义道德内心却腐烂不堪的公众人物。在这阴森恐怖的地狱里，可以听到妓女装腔作势的窃

笑声、大富翁困倦的呵欠声和被压迫者的抱怨声。这样的戏剧高潮并不罕见：一个头脑清醒的青年挥动火炬，诅咒着“社会的虫豸蛀蛆”，张开双臂迎接一个模糊的新世界。特别叫我感兴趣的一个事实是，易卜生年轻时是一位无政府主义者。早期的中国现代文学具有强烈的无政府主义气质，表达出对这个丑陋世界的强烈愤慨和对个性自由的乐园的热切向往。

不妨说几乎每一位中国作家身上都具有易卜生主义倾向。我们最富创造力、多才多艺的作家之一郭沫若，在1922年写成的《三个叛逆的女性》三部历史剧中，提倡社会主义与男女平等。又如，《卓文君》讲的是大约公元前100年，卓文君这位寡妇与以弹琴求爱的学者司马相如私奔的故事。几个世纪以来这件事一直被视为大逆不道的丑闻。郭沫若选择这一题材是要维护寡妇再婚的权利。1923年这出戏在浙江的女子师范学校演出，导致校长被开除。之后，当地教育会严厉指责该剧伤风败俗。

没过多久，不光剧作家，连理论家也对问题剧的发展感到不满意。青年中国的急躁情绪，而不是易卜生应该受到指责。回顾冲刷中国现代文学的波浪，人们可以发现，紧随易卜生个人主义的潮汐甚至浪漫到了颓废的边缘，这引起马克思主义者的极大不满。随着对严肃的易卜生的狂热减退，奥斯卡·王尔德和波德莱尔以其各不相同的异国色调激发起中国年轻作家的想象力。在诗歌中，“火花”成了被过度使用的一个意象。在戏剧界，流行的问题剧被著名的南国运动的发起者田汉的情感剧所取代。舞台一时几乎排干了中国剧迷的泪腺，一些过于敏感的人听说歌德的《少年维特的烦恼》在德国导致许多人自杀，也在观看了田汉的《湖上的悲剧》或读了郭沫若的《落叶》之后，猝然间结束了自己的生命。然而，这种病态的情形没有持续多久。1925年，上海发生了警察为保护日本厂主的利益，开枪射杀中国学生和工人的五卅惨案，这在全国激起了极大的愤慨。创造社是个有影响的文学社团，对文学的颓废倾向负有主要责任，却突然间变成了普罗文学的热情拥护者。由此开始了文学内战，一直持续到1937年抗日战争爆发，中国作家才形成统一战线。

从技术上讲，问题剧作家们犯了个大错。他们只是抓住易卜生的社会福音并竭力宣传它，但他们忽略了大众娱乐的功能。结果，问题剧成了中世纪说教剧的同义语。在所有声称是易卜生的“门徒”的人当中，萧伯纳是在中国最为熟知的一位。十年前，他虽然只是以旅游者的身份来

中国，但他的到来同泰戈尔访华一样重大。不过他同问题剧的联系有多密切，这很难说。一般读者对他的最深刻印象，大概来自其富有魅力的幽默和丰富而奇特的剧情。毫无疑问，他是现代剧作家中最成功的说教者。问题剧作家们也曾多次想为他在在中国建立圣殿，但一件不幸的事使他们得到了警告。1921年春，中国观众对上演的《华伦夫人之职业》冷淡得近乎无礼。直到那时，支持改编欧洲戏的主要是学生。而雄心勃勃的制作人汪仲贤想把观众扩展到上海的普通戏迷。他花费很多时间说服了几位知名的男女演员，参加演出中文版的《华伦夫人之职业》。通常情况下，那家剧院只在两家报纸为其演出目录打打广告，这次，汪先生决定在五家报纸上做广告。但演出这一“问题剧”时，观众人数最多的一天都未及一场普通杂耍表演观众最少时的六成。更令人遗憾的是，第二幕当华伦夫人向维维讲述自己的生活故事时，坐在前排的几个时髦太太抱怨着离座而去。在这一沉重打击过后，好幽默的汪仲贤评论这些无知又不领情的观众时说：“有些人是根本不知所云，有的人倒是看明白了，可觉得剧情还不够离奇。有些人道德上并不赞成华伦夫人，还有些人不喜欢‘妇女自由’和‘经济平等’这种词的频繁出现。当然，对那些在国外看过该剧演出的观众，又会觉得我们的表演离欧洲水准相差太远。”¹⁴一些冲动的批评家立即提出，我们应当把“剧”和“主义”完全分开。然而汪先生更喜欢折衷的办法，他要把简单的进步思想融入复杂的戏剧情节里。这样，我们就能向中国知识分子保证，我们既坚持了正确的道路，又不会使无知的观众呵欠连天。

严肃的人们是不会赞同这种“拼凑”路子的。诚然，中国的戏剧批评家们已经开始质疑将社会问题与戏剧联系起来的优势。《死水》的作者闻一多教授认为，整个问题只是一场错误的喜剧。“近代戏剧是碰巧走到中国来的。他们介绍了一位社会改革家——易卜生。碰巧易卜生曾经用写剧本的方法宣传过思想。第一次认识戏剧既是从思想方面认识的，所以从此我们仿佛说‘思想’是戏剧的第一个条件。不信，你看后来介绍萧伯纳，介绍王尔德，介绍哈夫曼，介绍高尔斯华绥。哪一次不是注重思想，哪一次介绍的真是戏剧的艺术？”¹⁵赵太侔教授的批评更为尖锐，他告诫说剧作家没有权利利用演员来作他们社会观和政治观的传声筒。“我感到，我们完全把艺术与生活摆错了位置。探求人性的深奥，表现原始的生命力，才是艺术的范畴。”¹⁶

公正地说，整个文学运动的主要动机是社会改革。起初，这场运动

实在是一场“心理重建”，文学是媒介，艺术似乎不过是事后的想法。在这之后，中国的批评家逐渐变得老练。可在民国初年，中国年轻一代还像个正值青春期的少年，而作家是其中最善于表达的一群人。外部世界的广阔让他眼花缭乱，而国内毫无意义的内战和恶劣的境况又让他绝望。他被以往和现在折磨着。未来是那么难以把握。他盼望像其他人一样健康、自由，却不知如何去做。他还没有被革命的手段武装起来，也没有掌握讥讽的武器。但他明白，只有悲观主义无助于事。这种无助而又模糊的愤怒最终累积成一种清冷的孤独。他就像个失意的孩子，在一个阳光灿烂的午后，手插在兜里，走在一条肮脏丑陋的巷子里，对着一切啐唾沫。有条小狗跑过来跟他玩，他喊道：“走开，让我一个人呆在这儿！”易卜生在这个愁眉不展、心灰意冷的孩子的背上，善解人意地拍了拍。当斯托克曼博士在《国民公敌》的剧终勇敢地说出“世上最强有力的人就是那个最孤独的人”时，在这个令人难忘的时期，这句话比孔子的任何言论都更能表达年轻中国的想法。

3. THE DRAGON BEARDS VERSUS THE BLUEPRINTS

—An Apology for Modern China

The twentieth century has not been a pleasant period, and we have all had our bitter experiences. Here in England people have painful memories of the last European war, Munich, and the dark summer of 1940. They have seen the beautiful coastline of their islands fenced with hideous barbed wire, their enchanting lawns and meadows ploughed up for potatoes or sugar beet, and for long enough people slept under pianos or dining-tables, or in the "tube". Not long ago I visited Bath, a city whose name drifted through my dreams like a gentle breeze. To me it is the most charming of the English provincial towns. When I went to the Abbey there was a queue of some length, mostly women, staring in the direction of the tower. I thought they were visitors waiting to see the Abbey, and I looked for a Fanny Burney or a Jane Austen, enjoying a leisurely morning gossip. But they all looked too anxious for gossip; and soon my wartime commonsense told me that they were queueing for chocolates and sweets. So many changes have come to England, this pleasant land, because of the war. China has been fighting a desperate battle ever since the middle of the nineteenth century, not only against military invasion, not only against economic exploitation, but also against an alien way of life, a mode of thinking that was to be imposed on her. Until 1900, China resisted at an enormous cost the cultural infiltration of the West. Like all agricultural countries, she was conservative to the point of bigotry. She wanted to keep her own charming if perhaps sluggish way of living. She turned her back on the machine, and burned the first railway built on her soil. She wanted to keep her ancient calligraphy in the face of a world of typewriters, she wanted to drift in junks with vermilion sails through a world of aircraft

carriers and torpedoes. Above all, she wanted to keep away from the world of inventions, which was busily harnessing nature's powers instead of simply appreciating them. Would she be allowed to do so? Defeat upon defeat, from 1840 onwards, provided the outside world's eloquent and effective answer. From 1900, China struggled in earnest for readjustment, not without a sense of inferiority which was sometimes expressed in servility to Western ways and sometimes in sheer arrogance.

The mood of the intellectuals of modern China is a very odd one, and I am not sure that Westerners have ever understood it, for if they had, they would not try to encourage a nostalgia for the past. If I may liken the whole world to a schoolroom, then China entered, or rather was propelled into this schoolroom some time in the early part of the nineteenth century as a new student, shy yet arrogant, clumsy and outlandish, wearing an old-fashioned pigtail and with finger-nails some four inches long. Until then this student had roamed at large, protected by high mountain ranges and wide oceans, not to mention the Great Wall; but once he entered the classroom he found himself obliged to get his certificate, by which I mean "national existence", or perish. Although this clumsy big boy was much older than the others and had quite a sound classical education, he came to the school very much later than anyone else. He looked so haughty and so awkward that no decent student could help teasing him. One pulled his ear, another tweaked his nose, and another twisted his pigtail. He didn't like that a bit, but the person who really infuriated him was the chap who tried to choke him altogether. That student's name, as you will probably have guessed, was Japan. He had never thought the little fellow capable of so much mischief, and it was a real shock to him. When he faced the schoolmaster, he was simply desperate.

"Do you know any algebra?" asked the teacher.

"No sir. But I can distinguish eighty varieties of orchid."

"Are you a mechanical draughtsman? Could you design a drainage system?"

This time the big boy decided to have a try. He ground his ink and waved his time-honoured brush and dashed a few exquisite strokes on to the paper, like wispy dragon-beards seen through cloud.

The teacher snatched away the brush angrily.

"Drainage is a practical thing. You study the dynamics of water and apply them to the needs of an irrigation system. What the devil are you trying to do? Are you dreaming?"

The whole class burst out laughing and the big boy bit his lips. He felt like crying, but he swallowed his tears and muttered under his breath, "Damn you all!" But the teacher got impatient.

"What about sport? Do you play football? Or tennis? Or squash? Or cricket?"

"I play the bamboo flute and the seven-stringed harp" was all the big boy could say. You see, however superior his accomplishments they did not qualify him for the certificate, and the certificate he had to have. From then onwards, it became the fashion in the school to kick the big boy and tease him in every possible way. In such circumstances, what do you think he did? Do you think he went on drawing dragon-beards? Not if he had had the least ambition to get the certificate. You may be sure that he learnt his algebra by heart, even while he cursed its crudeness; that he kicked his hot-water bottle out of bed, imagining it to be a football; that he tried his hand at designing a drainage system, which after all is not as difficult as drawing dragon-beards. Oddly enough, the rest of the school began to take an interest in the dragon-beards after a while—though they thought them a spare-time hobby, of course—and they were surprised to find the big boy making blue-prints for dear life, and well on the way to becoming a footballer, too. The ones who were tired of tweaking his nose began to patronize him.

"What marvellous dragon-beards you used to draw! Why do you go on with these crude plans which you used to think so meaningless?" they said, or "I think it's a pity that an elegant person like yourself should have anything to do with a rough game like

football. You should have gone on wearing your long gown—and where are your beautiful finger-nails? What, no pigtail, either!" And all the time the big boy, being a well-mannered big boy, grinned at them and murmured to himself, "Don't worry about the dragon-beards. They are in my blood and they are my inheritance. But I'm not going to miss that school certificate. Let me get the certificate and then perhaps I may make you all draw dragon-beards. And that wouldn't be a bad thing for you, either!" To-day, the big awkward boy is very nearly a professional footballer, covered with scars and bandages, and quickly becoming a proficient draughtsman, too. Do you think it is reasonable to expect the literature produced in such a mood to be genteel and unworldly, like the peaceful productions of the Tang dynasty?

No period in Chinese history has been more unsettled than the past forty years. Take *The Story of the Hair*. Before the 10th October, 1911, anyone who had his pigtail cut off was regarded as a rebel, and was therefore liable to be beheaded. The next morning the Revolutionary Army marched in and proclaimed the abolition of the pigtail, and at once anyone with a pigtail was regarded as a counter-revolutionary and therefore liable to be beheaded. Thirty years ago a bride had no idea of her husband's identity until the wedding night, unless she had managed to bribe her maid. To-day, if a mother dared to ask her daughter how she was getting on with her boy-friend, she might be told, "It's nothing to do with you; we're getting on fine!" In the summer the modern Chinese girl often goes about bare-legged, and her ambition is either to get into the P. P. C. (our provisional Parliament) or to become a national swimming star. (I am writing, of course, only of the city girls.)

Quite imperceptibly China has been going through an immense transformation. In the past, filial piety was the cardinal virtue and the family the unit of society. To-day, the individual has replaced the family, just as industry is taking the place of craftsmanship and agriculture. Literature, in the face of such changes, cannot remain the

same. It is less balanced, less sophisticated; it bears the scars of our age. But it is an honest record of life in contemporary China.

There has been no fundamental departure from the strong yet flexible tradition of European literature comparable with the new movement in China. It is true that they have modern writers who experiment with words, like the author of *Finnigan's Wake*, but the main body of their literature to-day does not differ greatly in form and diction from works produced during the last 300 years. I can find few instances in world history, apart from the growth of modern Turkey, to illustrate the changes which have taken place in present-day China.

When we talk of literature, we speak in terms of at least four things: its language, its form, its content, and why it came to be written. If one examined the work of any Chinese writer, say from Chü Yuan, the author of *Li Sao*, to the end of the nineteenth century, one would find it the same in all these aspects. They all wrote in the traditional "*wenli*" style, known as the classical Chinese style. If they wrote prose, the models were the famous essayists of the eighth and ninth centuries A. D. If they wrote verse, they followed the prosody which has been passed down from the second century B. C. If one asked the poet why he composed his verses, he would probably say, "I want to speak to the clouds, I want to converse with the flowers, and pay my tribute to the delightful season." They wrote a verse when a friend was taking up a new post, they wrote a verse when a friend had a new baby, above all, they wrote when they were just on the borderline between drunkenness and sobriety. If you had asked them why they wrote, you might as well have asked why tulips bloom in spring or why it always snows at Christmas.

They wrote from inspiration according to a traditional pattern.

If one asks a present-day Chinese writer what language he writes in, he will begin by dividing language into two categories, the living and the dead. The dead language means the classical language understood only by the privileged few, while the living language, the vernacular, is the language of the man in the street.

If one asks him what form he uses, he will say: Lu Hsün writes novels, I only write short stories, but Hsü writes poetry and Tsao plays. Literature has been classified, and is at a pedestrian stage. But when one asks why he writes, the answer is even more prosaic, for most of them would answer with a burning look, "I write in order to criticize contemporary life." One curses poverty, another disease, a third the insensitiveness of the urban population, and most of them even expect to see some result from their complaints!

Having parted, so rashly but so inevitably, from their own ancestors, modern Chinese writers were for a period very much astray. Perhaps, after all, some kind of idol-worship is a necessity. Together with this violent outburst of iconoclasm, there developed a centrifugal force seeking inspiration from abroad. The anti-Confucian sentiment at the beginning of the Republic was similar to the English reaction from Puritanism. It is something an outsider finds difficult to understand, because the reaction was not so much against the thing itself but against its social repercussions after more than 2,000 years. When we stay in a room too long, we all feel inclined to draw up the blind, open the window and stretch, to get some fresh air. Well, every writer in China for the past three decades has been trying to force open that old shutter of solid wood, trying to look out beyond the walls of ages. It is in a way similar to the longing for Greek culture and the pagan world which comes out in the English writers. "Ah, Athens", "Ah, Venice", "Ah, Bagdad"; but our route is westbound.

Many people in China during the past centuries had peeped out from behind that solid shutter and had seen in the distance the glories of Western astronomy and mathematics, but it was not until the latter part of the nineteenth century that a Chinese naval student in Liverpool brought back something different. He brought back John Stuart Mill's political economy, Darwin's theories of evolution and of the survival of the fittest. Others introduced the pathos of Dickens, the romance of Scott and above all, the plays of that great social rebel, Ibsen. From the suffering of the negroes in *Uncle Tom's Cabin* we

learned that the Westerners were not all callous, and that we were not the only ones to be oppressed. It was then that we began to realize that Europe meant more than battleships and limited companies, and since then, our conception of the West has been completely dualistic. Rightly or wrongly, we resented military power and commercial enterprise of the West, but Western literature aroused our wholehearted admiration.

At the beginning of the vernacular movement, there was a deliberate attempt to enlarge the range of poetic themes, and many poets tried to avoid such hackneyed subjects as a weeping willow in moonlight or the loneliness of a rainy evening, introducing instead eugenics, politics, or a quarrel between a landlord and a tenant. The sexual emancipation of men and women opened up a vast new field for the poets. The passion of newly-emancipated lovers found profuse expression, some of it valuable, most fit only for the fair lady's eyes. The majority of these poems were clumsy, naive, and without restraint. One poet went so far as to write:

"When I sleep, I see you on the canopy of my mosquito net,
When I drink tea, I see your image at the bottom of my cup."
(American "jazz" influence... you're the cream in my coffee.)

You see, a more spiritual way of expressing the emotions had not yet emerged, and the old forms had been thrown overboard. As far as the theme of love is concerned, the growing sophistication of poetry in China means to a large extent the exclusion of the physical.

The vernacular movement in its initial stages was a literary back-to-nature movement, a revolt against the ornate and the sophisticated. Our mistake lay in confusing freedom with formlessness, and much of the poetry of the early 'twenties was hardly distinguishable from prose, except that it took up more printing space. Poetry was deliberately stripped bare. This was the natural reaction of the modern Chinese against the elaborate diction and hackneyed imagery

handed down through centuries; the moon ceased at last to be a "jade wheel" or a "silver toad". One of the eight principles laid down by Dr. Hu Shih, then the leading rebel against traditional poetry, was the abolition of all "allusions", which led later on to the disappearance of all imagery. Think of poetry stripped of imagery! Partly as a result of the influence of Tagore's contemplative verse from the West, and partly from the Japanese couplets from the East, a kind of little" poem came into being, which reminds one of casual jottings in a traveller's notebook.

By the latter part of the 'twenties, the tide had turned, and poets had begun to elaborate their work. Poetry can be sophisticated on the one hand by the use of alien and obscure images, and on the other, by experiment in new and rigid forms, such as the sonnet. At this point I must say a word about the unreliability of translated poems, except Mr. Arthur Waley's, for I think he has done more than translate. The most obvious attractions of poetry are rhythm and imagery. Generally speaking, rhythm must be ruled out in a translation, for it is too difficult to reproduce. As for images, they delight us with their freshness and strange charm. Here is a pitfall, for what has become hackneyed in one language may well strike us with unusual freshness in another. If you have ever asked a Persian friend what he thinks of Omar Khayyám, you will remember how he shrugged his shoulders and said: "Oh well, of course to the English he seems exotic." Two kinds of imagery have been used by recent Chinese poets, the first a rehabilitation of the ancient as in the works of Lin Keng, the other drawn from entirely new sources.

All this confusion was due to a misapprehension as to the place of literature in a democracy. We became republicans thirty-two years ago, and it has taken us a long time to learn where democratic principles should end. We seem to have wanted even poetry to be "democratic". Democracy in politics means equality for all, rich and poor, sensitive and insensitive. How is poetry to cater for the insensitive? Yet the early Chinese vernacular poets actually tried to do

so. They regarded poetry as a part of mass education. As a result, a counter-acting dose of strict formalism had to be taken later. It is largely to England that we owe the revival of poetic form, through the late Hsü Chih-mo, who returned from Cambridge to China in the late 'twenties, and started a Poetry Magazine, in which he was at once the poet, the critic, and the translator.

During the period of gradual sophistication the vernacular style was handled by many sensitive writers who had only their creative instinct as guide. One may have guessed the result. An ivory tower was built within the camp of the vernacular writers, and the living language which was supposed to be the language of the people become more obscure than the classical. Far from using the language for the education of the masses they used it to express the obscurities of their own tortuous souls. This artistic separatism outraged the social conscience of other writers, and a literary civil war followed. From the purely artistic point of view, this growing social consciousness is perhaps a loss, but it is a symptom which we should condone and not deplore. Can you imagine a story written to attack the practice of footbinding, a novel on the necessity of matrimonial freedom, a play showing the life of an exploited miner, a poem to encourage the peasants to co-operate with the army and sabotage the enemy's communications? Much of our present-day literature is concerned with such themes. Some of it is so well written that it may live after its immediate purpose has been served, but the greater part has little hope of survival. Perhaps, if the day ever comes when the earth has been turned into a paradise, a socialist's heaven or an anarchist's dream, every writer will retire into his own Ivory Tower. For there would be no poverty for us to fight, no social injustice to expose, nothing but comfort and security, freedom and equality. Until this Utopia is achieved, I can see very little hope of our writers shutting their eyes to modern evils and writing like Pope or Pater, or the aesthetes of the Tang dynasty.

We are torn, as writers everywhere are torn, between the natural

privilege of a writer to address himself to the clouds, and the citizen's obligation to help his fellow-beings. Aeroplanes overhead and flames on your own roof, the murmur of suffering everywhere, cannot be ignored. Whoever manages to reconcile these two conflicting instincts will write a masterpiece; whoever fails will be forgotten. At least we have begun to realize that the writer who allows his social conscience to override his artistic one has the lesser chance of survival. We have, in fact, begun to distinguish literature from social gospel.

The relationship between experience and technique is another of the universal contradictions of our times. So much gold is revealed by the realist hidden among the rubble of misery and squalor. To see human beings deeply, we need to see them suffer; prisoners in Siberia, or victims in the concentration camps of to-day. There is wit and charm in your Restoration plays, but depth is more often found when character is under strain, in tragic figures such as King Lear. It is an unfortunate paradox that, if the writer has sufficient education and leisure to write, he may know little of suffering to write about, while if he has access to the raw material of life he is probably too much concerned with earning a living or too sensitive to remain detached from his conditions. Neither extreme produces good writing. To survive poverty and suffering and yet acquire an expressive vocabulary is not easy, and I can think of few examples in China. An exception is Mr. Shên Ts'ung-wên, whose early dreams of becoming a general nearly ended in his joining the Peking police force. In the meantime, he became in turn a private in the army, a tax-collector, a clerk and a proofreader, and for the last fifteen years he has been one of the most brilliant of our novelists.

The sad truth is that writing is not a profitable profession, except perhaps in America. Individual patronage has gone, and State patronage is practised only in Soviet Russia. Literature is neither a celestial blossom nor a social parasite; it is simply a commodity, when considered from the point of view of economics. We cannot expect to read something beautiful without paying the price, any more than we

can have a watch repaired by an expert and walk out, simply saying "Thank you"; But a watchmaker, after taking your money, will turn to other watches and restore them to their normal working, while a writer is always trying to produce something more than normal—in fact, his aim is always a miracle. Wouldn't a fixed wage tempt him to think only of pleasing his customers? There are not many millionaire writers in China, but I know of one who built himself a smart house in Shanghai by turning out four "eternal triangle" novels a year. Now he is almost forgotten, but what a temptation for a writer to compromise and make sure of a house which may well last longer than his masterpieces! The risk of starvation and the risk of popular success are equally menaces to good literature.

The material for *Midnight*, an ambitious novel showing the urban and rural life of China in 1930, was gathered by the author during the year 1929, when he was suffering from eye-strain. Not being able to continue his writing, Mao Tun frequented the stock exchanges of Shanghai, where he acquired an intimate knowledge of a specialized side of life. His trilogy, *Disillusion*, *Turmoil*, *Seeking*, was based on his experience as a Left-wing political worker during the Wuhan government in 1927. The playwright Ts'ao Yü, in writing the third act of *Sunrise*, visited the brothels of T'ientsin to record the racy dialogue of these social outcasts. (That act remains the most lively portion of the play.) This search for experience is not confined to male writers. Ting Ling used to work as a factory girl in Shanghai, a background used for several of her stories. Some of you may have read Dr. Lin Yutang's translation of *A Chinese Amazon*. The authoress Hsieh Ping-ying, joined the revolutionary army before girl soldiers became almost a commonplace. However poor the writing, the book stands as a record of feminine courage. The war in China, however, has forcibly solved this problem for all writers. It has been fought from the beginning on our own soil (something the British people have been spared), which means an equal share of suffering and misery, and an equal share of experience in the greatest event in history. From the

beginning, Chinese writers were recruited by the Chinese M. O. I. to act as political workers among the troops. For six years Chinese writers have watched the horizon of life broaden before them. They have seen misery, cruelty, heroism, villages deserted, and soldiers dying, over the plain of North China and the desert of Mongolia. They have seen the rebirth of China. If they are writers at all, they must have recorded in their memories, felt in their hearts, reflected in their minds. Might they not produce something readable after this war?

In the 1930s there was a curious similarity in the literary climate the whole world over. The Great War saw the beginning of a general disillusion in the West as well as in China. The depression came, with much the same consequences for the man in a panama on Wall Street, the man in a bowler hat in Lombard Street, the rubber planter in his topee, and the broker in the red-buttoned cap in Shanghai. After that came a long train of political disenchantment. In the West, you saw Abyssinia overrun, the defeat of the Spanish Republican Government, and Czechoslovakia swallowed by that avaricious mouth. No one can say that individuals in Britain did not do their bit. One of your promising young writers, Julian Bell, with whom I spent many memorable days in Peking and Hankow, and to whom we owe much knowledge of contemporary English literature, was killed in the Spanish war, as an ambulance driver. It is not surprising that a feeling of frustration, of helplessness in face of a callous world, should have come over the young people of all nations.

Now consider what happened to us in China. In addition to watching and protesting against the suffering of others, which was painful enough, we also saw a part of China, larger than France and Germany put together, and richer too, snatched away from us overnight. Agitation spread. Demonstrations in the streets, hunger strikes, shopkeepers' strikes, hundreds of students lay on the railway tracks of Peking, refusing to get up until the Government promised to resist Japan. I was one of those lying under the stars on the cold steel rails, sharing a rug with two strangers. There was indeed a worldwide

brotherhood among young people. It was the time when Mr. Auden was writing his poem *Spain*, and with Isherwood, *The Ascent of F6*, and the *New Writing* was gathering together its international cast. Had China not decided eventually to resist, not only would the military situation be different to-day, but the youthful vitality and courage of the Chinese intellectuals would have been broken for ever. In the East, as in the West, the 'thirties was a suffocating period of human history.

Emerging from the tragedy, one sees a few reassuring gleams. First, it has shown us that a sense of justice is inherent in the writer, and when that is violated, he becomes restless. It is in fact the most encouraging sign of human sanity.

Second, frontiers may have their strict barriers, literature has none. Nationalism has never been a strong feature in a literature of any importance, and the possibility of a world brotherhood has been demonstrated over and over again by the intellectuals. We do not wish to see writers forming an international cartel, but we do want to see in every modern writer an element of internationalism. To a Chinese, it seems that we must arrive sooner or later at this goal, so that imagination can fly across artificial boundaries and intellectual honesty can be valued above petty loyalty.

And so, to go back to my metaphor, our friends in the West need not worry about those dragon-beards. They are our inheritance and they run in our veins. But Westerners will only make us angry if they ask us to throw the football into the Yellow River; in a world of force, fear and frustration, everyone must play football or perish. But when real peace and security are assured, may we all return to our respective dragon-beards.

[Lecture delivered at the Wallace Collection, London.]

叁 龙须与蓝图

——为现代中国辩护

二十世纪绝非一个令人愉快的时期，我们都经历了苦难。在英国，人们仍记得上次欧洲大战、慕尼黑及1940年黑色夏季的痛苦经历。他们目睹美丽的海岸被铁丝网环绕；迷人的草坪被犁开，种上了土豆、甜菜；很长一段时间，人们睡在钢琴、餐桌下，或地铁里。不久前，我参观了巴斯（Bath）。在我的睡梦中，它的名字像一阵轻风拂过。对我来说，它是英国最美丽的城镇。在大教堂，我看到一些人，大多是妇女，她们都排着长队朝塔尖观望。我以为她们是游客，等着领略大教堂的风采。于是我想寻找一位正在晨光中快乐地闲谈的芬尼·伯尼¹⁷或简·奥斯汀式的人物。但他们都面露焦虑，无暇闲聊。很快，战时常识提醒我，她们排队是在等着买巧克力和糖点。战争给英国这个迷人的国度带来许多变化。中国自十九世纪中叶以来，一直进行着一场歇斯底里的战争：不仅仅是反抗外国的军事侵略和经济剥削，而且也在反抗着一种强加给她的陌生的生活方式和思维模式。直到1900年，中国一直在以巨大的代价抵制着西方的文化渗透。同所有农业国一样，它保守得近乎顽固。她极力想维持自身迷人但略显懒散的生活方式。她对机械不屑一顾，并烧毁了在她土地上修建的第一条铁路。在世界各处都是打字机的时代，她仍要保留古老的书法艺术；她想划着一艘带有红帆的舢板漂流在一个拥有航空母舰和鱼雷的世界里。总之，她是要与充满发明的世界隔绝，与一个忙于征服和利用自然力量而不是单纯欣赏自然力量的世界隔绝。她会被允许这样做吗？中国在1840年以后所遭受的接连失败便是外部世界作出的雄辩有效的回答。1900年以后，中国也曾力争改良，但这种改良不无一点自卑感，有时表现为对西方模式的奴性崇拜，有时表现为一种妄自尊大。

中国现代知识分子的心态是奇特的。我不能肯定西方人是否能理解，因为如果他们理解，就不会再鼓励人们去怀旧了。若把整个世界比喻成一间教室，那么，在十九世纪上半叶，中国才进入，更确切地说，被推入这间教室。这位新生自负、笨拙、古怪，头上留着过时的辫子，手上的指甲足有四英寸长。在此之前，他受着高山阔海和长城的保护，生活得悠闲自在。现在，一进入这间教室，他就发现必须要取得毕业证

书——“民族的生存权”，否则就会灭亡。这个略显笨拙的孩子比别人的年龄都大，而且受过良好的古典教育，可他入学比别人晚得多。他显得那么傲慢、笨拙，别的学生禁不住要戏弄他。一个拉耳朵、一个捏鼻子，另一个揪辫子。他自然不喜欢别人这样待他，但真正使他愤怒的是那个想一下子使他窒息而死的家伙。那个学生的名字，我们或许已猜到，就是日本。他没想到这小家伙心肠如此歹毒，着实吃了一惊。当他站在老师面前时，感到非常绝望。

“你学过代数吗？”老师问。

“没有，先生。但我能区分八十种不同的兰花。”

“你是机械制图员吗？能否画一张排水系统图？”

大男孩决定试一下。他磨墨，挥动那杆年头久远的毛笔，在纸上画出几缕精致的线条，宛如云雾中的龙须。

教师生气地一把将笔夺过去。

“排水系统是实用的东西。你要研究水的流量，并运用到灌溉系统中去。你这是在干什么？做梦吗？”

全班哄堂大笑。大男孩子咬着嘴唇，他想哭，但又咽下眼泪，小声抱怨：“见你们的鬼！”但老师变得很不耐烦。

“体育怎么样？踢足球吗？或打网球？壁球？板球？”

“我会吹笛子，弹七弦琴。”大男孩只能说这些。你们看，无论他有多么深的造诣都无法获得毕业证，而这又是必需的。打那以后，学校里的学生都想方设法地愚弄他，踢打他。在这种情况下，你认为他会怎么做？你认为他还会继续画龙须吗？只要他还有一点要获取毕业证的决心，便不会再这么做。可以肯定，他会用功学代数，虽然边学边诅咒它；会把热水袋从床上踢下去，像踢足球一样；会试着设计排水系统，这还没有画龙须难。奇怪的是，别的同学开始渐渐对龙须发生了兴趣，虽然只把它当成业余爱好。他们还惊奇地发现，这个大男孩正设计着甜蜜生活的蓝图，而且正成为一名足球运动员。那些对拧鼻子已感到厌倦的人开始支持他。

“你过去画的龙须多棒啊！你干吗要做那些你过去认为是毫无意义的事？”他们这样说道，“我认为像你这样有教养的人去踢粗野的足球，真是太令人遗憾了。你应该继续穿长袍。你那漂亮的长指甲哪儿去了？什么？你的辫子也没了！”每当这时，这个颇有教养的大男孩子总是对他们笑笑，暗自说道：“不必为龙须担心，它在我的血液里，在我的天性之

中。但我不能放过这张毕业证。我要先拿到证书，然后或许我能让你们都画龙须，这对你们也不是件坏事！”今天，这个笨拙的小伙子差不多已经是职业球员了，身上留着伤疤，缠着绷带，同时，正尽快成为一名制图员，你们认为在这种情绪中产生的文学，会像唐朝太平盛世的文学作品一样文雅脱俗吗？

过去四十年是中国历史上最动荡不安的时期。以《头发的故事》为例。1911年10月10日以前，剪掉辫子的人被当成叛匪砍头。第二天一大早，革命军开进来，宣布剪辫子，于是立刻，所有留辫子的人便被当成反革命斩首。三十年前，新娘在新婚之夜前对新郎一无所知，除非她贿赂丫环。今天，如果母亲问女儿与男友处得怎样，女儿也许会说：“没你的事，我们相处得很好。”夏天，现代的中国姑娘常露着大腿，她们有雄心要进入我们的临时议会或成为泳星（我指的当然是城里姑娘）。

中国在不知不觉中经历了巨大变革。过去，孝道是基本美德，家庭是社会单位。现在，个人替代了家庭，正如工业替代了手工业和农业。面对这些，文学不可能不发生变化。它变得不那么和谐，少了深奥，并烙上了时代的伤痕。但它是现代中国社会生活的忠实记录。

与中国现代文学运动相比，欧洲的文学发展并未从根本上脱离其强大而富有韧性的传统。诚然，他们有许多现代作家对文字进行试验，如《芬内根的觉醒》的作者，但当今文学的主体在措辞和形式上与三百年来来的文学作品没有什么根本的差异。我感到，在世界历史中，除了现代土耳其的发展，几乎找不到什么可与中国现在发生的变化相提并论的。

我们谈论文学，至少涉及四个方面：语言、形式、内容及写作的动机。如果你有幸研究一下从《离骚》作者屈原到十九世纪末中国作家的作品，就会发现它们在上述四个方面都是一致的。他们都用中国古典的“文理”形式来写作。写散文，常以八九世纪散文名家的作品为范例。写诗，则遵循公元前二世纪流传下来的韵律体裁。倘若有人问诗人为什么要写诗，他会说：“我要向云述说，向鲜花倾吐，我要歌颂这怡人的季节。”友人升迁，写诗；亲朋得子，写诗；半醉半醒时，也写诗。如果你问他们为什么写诗，等于在问为什么郁金香在春天开放，为什么圣诞节时总是下雪。他们根据传统模式由灵感而作诗。

若有人问一位中国现代作家用什么语言创作，他会先将语言分成两类：活着的与死去的。死去的语言是只能被少数特权阶级理解的语言古语，而活着的语言则是街头大众的白话。

若问他用什么形式，他会说：鲁迅写长篇小说，我只写短篇，徐志摩写诗，曹禺写剧本。文学被分类，并处在一个缺乏想象力的阶段。当有人问他为什么而写时，回答更是毫无悬念。他们大多会激奋地说：我写是为了批判现实生活。一个诅咒贫困，一个诅咒疾病，第三个批判都市人的冷漠，他们中的大多数甚至希望看到他们的批评能有所结果。

中国现代作家与他们的祖先如此轻率而不可避免地分手之后，曾一度感到茫然。也许人们总需要偶像崇拜。随着反传统运动的爆发，一种希冀从国外寻求灵感的离心力产生了。民国初年的反孔浪潮与英国的反对清教思想有些类似。对局外人来说，这种反孔思想难以理解，因为它不是反对某一事物本身，而是反对该事物两千多年来对社会的影响。我们在室内呆得久了，就会拉开窗帘，打开窗户，伸展一下四肢，呼吸点新鲜空气。所有中国作家在过去三十年中，一直试图打开那扇坚固的木制百叶窗，看看年岁已久的墙壁外面的世界。这与英国作家渴求希腊文化和非基督教世界相似。“啊，雅典”，“啊，威尼斯”，“啊，巴格达”；但我们寻求的是通向西方之路。

在过去几个世纪里，中国有许多人从坚固的百叶窗缝隙中窥见了西方天文学和数学的光辉。但直到十九世纪后半叶，一位在利物浦海军学院学习的中国学生才带回一些与众不同的东西，他带回了约翰·斯图尔特·穆勒的政治经济学、达尔文的进化论及物竞天择的理论。还有一些人带回了一些狄更斯的小说，司各特的浪漫小说，最重要的是带回了易卜生这位伟大的社会叛逆者的戏剧。我们从《黑人吁天录》里黑人的遭遇了解到，不是所有西方人都那么冷酷无情，我们也不是唯一的被压迫者。从那时起，我们开始理解，欧洲并不仅仅意味着炮舰和公司。从那时起，我们对西方的看法有了双重性。不管正确与否，我们反对西方的军事力量及商业公司，但对西方文学怀着由衷的钦慕。

白话文运动初期，诗人们有意拓宽题材范围；许多诗人极力回避月光下的垂柳或雨夜的孤寂这类陈俗意象，而是介绍优生学、政治，或描绘地主与佃农间的争吵。男人与妇女的婚姻解放为诗人开拓出一片新的广阔天地。恋人们能找到许多话来表达自己的感情，这些语言有些很有价值，但大多只适合女人们看。这些诗大体上都很粗糙、幼稚、随便。有个诗人甚至这样写道：

睡觉时，我在蚊帐顶上看到你；

饮茶时，在杯底还能看到你的影像。

（受美国“爵士”乐的影响你是我咖啡中的牛奶。）

你们看，一种更为精神化的情感表达方式尚未出现，而旧的形式已被抛去。就爱情题材而论，中国诗歌的逐步完善似乎在很大程度上是对肉体的摒弃。

白话文运动在初期是一场回归自然的文学运动，是对华丽和深奥的文学的反叛。但我们的错误在于把自由与杂乱无章混淆了起来。因此，二十年代初期的诗歌与散文几无多大区别，只是前者占用更多的版面。人们对诗歌的刻意简化，是现代中国人对过分修饰和几百年流传下来的陈俗意象的自然反叛；月亮终于不再是“玉轮”或“银蟾”了。反传统诗歌的领袖胡适博士的八项主张之一就是摒弃所有典故，最终导致意象完全消失。没有意象的诗是难以想象的。也许是受西方泰戈尔沉思类诗歌和“东方日本俳句”的影响，出现了一种“小诗”，使人想起旅行随笔。

二十年代后半期，潮流发生了变化，诗人们开始对作品进行推敲。使诗歌变得精致深奥有两种途径：一方面，运用外来的和朦胧的意象；另一方面，试用新型、严谨的格式，如十四行诗。在此，我必须指出诗歌翻译的不可靠性，除了亚瑟·魏理，因为我认为他不仅仅是在翻译。诗歌最显著的吸引力是其韵律和意象。一般说来，韵律在翻译时不可不予理会，因为它太难以用另一种语言复制。至于意象，则以其新颖和奇特的魅力令我们愉悦。这里有个陷阱：某种语言中的陈俗意象也许能在另一种语言中产生非凡的新鲜感。假如你问一位波斯朋友如何看待欧玛尔·海亚姆¹⁸，他会耸耸肩说：“哦，对英国人来说，他当然是新奇的。”中国现代诗人运用两种意象，一种是像林庚诗作那样，重建古代作品中的意象；一种是从别的地方得来的全新的意象。

所有这些混乱应当归咎于我们对民主制下文学的位置的错误理解。三十二年前，我们成了民国人，我们用了相当长的时间来学习民主制到底是什么。我们似乎要让诗歌也变得“民主”。政治学上的民主是指不论贫或富，聪敏或愚钝，人人平等。可诗歌怎能迎合那些愚钝的人呢？然而，早期的白话诗人努力在这么做。他们把诗歌视为大众教育的一部分。结果，他们不得不采用一种与之相反的、严格的形式主义创作方法。我们诗歌形式的复活主要归功于英国，以已故的徐志摩为首。他在二十年代末由剑桥回到中国，创办了《诗镌》，并成为此刊的诗人、批

评家兼翻译家。

在诗歌逐渐成熟的阶段，许多聪敏的诗人都只在其创造性本能的指引下用白话创作。其结果可以想见。象牙塔建在白话作者的营地，本来要成为大众语言的现用语言变得比古文更为难懂。他们不是用这种语言来教育大众，而是用它来表达自己的内心的迷茫。这种艺术分裂主义激怒了其他作家的社会良知。于是，一场文学内战爆发了。单纯从艺术角度看，日益增强的社会意识也许是一种丧失，但它是值得宽恕的，而不应谴责。你们想象得出一个批判缠足陋习的故事，一本阐述婚姻自由必要性的小说，一部展现矿工受剥削的生活的戏剧以及一首号召农民与军队合作、破坏敌人通信设施的诗吗？我们现在大部分文学作品都与这些主题有关。有些写得如此之好，它们在完成当前的使命后会永远流传下去，但绝大多数作品生存的希望则非常渺茫。也许有一天，地球变成了天堂——一个社会主义者的仙境或无政府主义者的梦境——那时每个作家都会回到自己的象牙塔里休息。因为，没有贫困需要抗争，没有社会不公需要揭露，只有舒适和安全，自由和平等。除非这个乌托邦实现，否则我很难想象作家们会对现代的邪恶视而不见，会像蒲柏¹⁹或佩特²⁰，或唐代的美学家那样进行写作。

我们同任何地方的作家一样，都处在进退维谷的境地，一方面作家有向云朵倾诉的天然特性，另一方面他们又有一种帮助同仁的公民职责。头上盘旋的飞机，自家房顶上的火焰，到处可闻的苦难的呻吟，这些都不容忽视。谁将这两个矛盾的特性完美地结合起来，就会写出名著；若不能调和这对矛盾，他就会很快被人遗忘。至少，我们已经开始明白，如果作家听任其社会意识超越艺术意识，那他生存的可能性就会更小。我们实际上已开始将文学同社会福音区别开来。

经历与技巧的关系是我们时代所面临的另一普遍矛盾。现实主义者苦难和肮脏的瓦砾中挖掘出很多金子。要更深地了解人类，我们有必要认识他们的苦难；西伯利亚的囚徒，或今天集中营里的受害者。你们王政复辟时期的戏剧充满了智慧和魅力，但只有当主人公如李尔王那样的悲剧人物饱受磨难时，我们才有更深一层的感受。不幸的是，倘若作者受过良好的教育，又有创作的闲暇，他可能对苦难知之甚少；倘若他有生活的亲身体验，他可能又太关心生计，或有意回避其生活环境。这两者都不能产生好作品。生活在贫困苦难中，并能很好地掌握富于表现力的词汇，不是件容易的事，在中国我只能想出很少几个人。沈从文先

生便是一个极好的例证，他早年想当将军的梦想在他在北京当警察时几乎终止了。他当过列兵，后来成了税务员、职员、校对员。在过去的十五年里，他成为我们最杰出的小说家之一。

不幸的现实是，写作不是一个赚钱的职业，或许美国是个例外。私人赞助不再存在，国家赞助只在苏俄才有。文学不是天堂里的仙花，也不是社会的附属品。从经济角度看，它只是一种商品。我们不能不花钱就读到漂亮的文章，就像我们不能让一个修表行家修好表后，说一声“谢谢”一走了之。修表匠拿了你的钱后，会继续去修别的表，使它们恢复正常运转；而作家则必须时刻创新——实际上，他的目标是要创造奇迹。一份固定的工资能诱使他只想着如何取悦顾客吗？中国作家中没有几个百万富翁，但我知道有一个人在上海靠一年内出了四部“三角恋爱”小说，建造了一座漂亮的小洋楼。现在，他已被遗忘，但一座房子肯定比一部著作长寿，这种诱惑对一个作家是多么大啊。挨饿的危险与深受大众喜爱的危险对好的文学作品来说，是同等的威胁。

《子夜》这部反映1930年中国城乡生活的名著的素材，是作者1929年患眼疾时搜集的。由于不能继续写作，茅盾就常去上海的股票交易所，在那里，他对这种特殊的生活有了深刻了解和感受。他的三部曲《幻灭》、《动摇》、《追求》，是根据他1927年在武汉政府当左翼职员时的经历创作的。剧作家曹禺在写《日出》第三场时，访问了天津的妓院，记录下这些社会弃儿富于挑逗性的对话。（那一场一直是全剧最有活力的部分。）对经历的追求不仅限于男性作家。丁玲曾在上海一家工厂当过女工，这为她的几部小说提供了背景材料。你们有些人也许读过林语堂先生翻译的《从军日记》。女作家谢冰莹参加革命军的时候，女兵还不多。不管作品如何，它表现出了女性的勇气。中国的战争为所有作家解决了素材问题。这场战争从一开始就在我们的土地上进行（而英国人得以幸免），这意味着我们分担了苦难，共同经历了历史上最重大的事件。战争伊始，中国作家就被招募为军队的政工人员。六年来，中国作家们开拓了生活的视野。他们目睹了华北平原和蒙古沙漠上的苦难、残酷、英雄主义、废弃的村落和死亡的战士。他们看到了中国的再生。如果他们是真正的作家，他们就会在记忆、心灵和头脑中，记录、感受和浮现这些苦难的经历。战后，他们能不创作出一些可读性高的作品吗？

二十世纪三十年代，全世界的文学氛围有着奇特的相似性。大战使

西方以及中国普遍产生了失望情绪。大萧条的来临，对所有人的影响都一样，从华尔街上头戴巴拿马草帽的金融家，到朗伯德街上头戴圆顶硬礼帽的绅士，从橡胶林里戴遮阳帽的种植园主，到上海滩戴红色纽扣帽的股票经纪人。接踵而来的是一连串对政治的失望。在西方，你们看到阿比西尼亚被蹂躏，西班牙共和国政府失败，捷克斯洛伐克被贪婪的大嘴吞没。没有人会说英国人没尽自己的一份力。你们一位年轻有为的作家朱里安·贝尔²¹在西班牙战争中驾驶救护车时被打死了。我在北平和汉口同他度过许多值得回忆的日子，他向我们介绍了许多英国当代文学的情况。在这样一个冷酷的世界里，所有国家的青年都会感到痛苦、无助，这不足为怪。

现在，让我们看看中国发生了什么。除了痛苦地目睹和反抗别人的苦难外，我们还看到中国的大片土地一夜之间就被掠走了，它比法国和德国相加还大，而且更为富饶。愤怒在蔓延。街头游行，绝食抗议，店老板罢市，数百学生卧在北平的铁轨上，政府不答应抗日不起来。我也是在星光下卧在冰凉铁轨上的学生中的一员，与两位陌生的学生合盖着一条毛毯。青年人四海一家，亲如兄弟。这也正是奥登先生写作诗歌《西班牙》、与伊塞伍德合著《F6的上升》以及《新写作》形成国际规模的时候。如果中国没有最终决定抗日，不仅今天的军事情况会大不一样，而且中国知识分子的青春活力和勇气也将从此一蹶不振。同西方一样，三十年代在东方也是人类历史上一段令人窒息的时期。

人们从悲剧中看到一丝希望。首先，它告诉我们，作家有着天生的正义感，一旦这种正义感被侵犯，他会变得坐立不安。这实际上是最振奋人心的人类心智健全的讯号。

第二，疆土有严格的界限，而文学没有。民族主义在任何一部文学作品中，都从未成为一个主要特点。知识分子一次又一次地显示出世界各国人民拥有手足之情的可能性。我们不是希望看到作家们达成什么国际盟约，但我们确实希望看到每个现代作家都有一种国际主义精神。对一个中国人来说，我们必须迟早达到这一目标，使想象力飞越人为的界限，使理智的诚实高于可怜的忠孝。

因此，回到我刚才的比喻，我们的西方朋友不用为那些龙须担心。它们是我们的传统，在我们的血液里。但如果西方人让我们把足球扔到黄河里，只能令我们愤怒。在一个充满强权、恐惧与挫折的世界里，每个人都必须踢足球，否则就会灭亡。但当真正的和平和安全有了保证

时，希望我们都能回归各自的龙须。

[此篇为作者在伦敦华莱士藏画馆所做的演讲]

4. LITERATURE AND THE MASSES

For years, an ideological battle has raged between the Right-wing and the Left-wing writers over the question of whether a writer should be a free agent or a servant of the community. This question sounds perhaps quite childish, but it does in fact create actual problems in the technique of writing. One of the many difficulties young Chinese writers face today is the question of diction. For some years before the outbreak of the present war with Japan, many even of the staunch supporters of the vernacular movement had begun to complain, and often quite rightly, that the "artistic prose" and the "symbolic verses" of the vernacular writer had become even more remote from the masses than those of the classical writers. Sentence structures were distorted without regard to their intelligibility, images and allusions were employed which sometimes were really based on Greek or other European origins. Characters in novels often talked as though they were foreigners. Even in landscape description, many scenes were more typical of the Siberian steppes than of the plains of North China. In point of fact, a great deal of our proletarian literature was as difficult for the ordinary reader as, say, the works of our decadent symbolists. So many critics and writers in the early 'thirties clamoured for a "language of the masses".

Now how do we account for this departure from the masses? First of all, the translation of European literature was largely responsible; secondly, perhaps the original syntax of Chinese was not accommodating enough to express the more complicated feelings of the modern man, especially when he begins to explore the world of the subconscious. Thirdly, as the position of the vernacular became more established, writers of the next generation became more sophisticated too. Ho Chi-fang, for instance, a young essayist, wrote once about his attempts in writing thus:

"I have made it my task to seek a new direction in lyrical prose. I

have tried, using words sparingly, to create a new mood. Sometimes it is an imaginary tale, sometimes an emotional wave accompanied by deep thought. As in the writing of poetry, my aim is pure harmony and pure beauty. Often an essay two or three thousand characters long takes me several days to design. Nearly every word has been fondled by my spiritual fingers...."

It would be too cruel to force such a sensitive writer to use plain unmistakable language. Shên Ts'ung-wên, among the novelists the best stylist, I think, wrote in the preface to his *Selected Works*:

"All I try to do is to get hold of my momentary sensations and images. Otherwise I think a writer should be as isolated as possible from the external world. All writing must have individuality, it must be soaked in the personality and sentiments of its author. To achieve this, we need to assert ourselves thoroughly. There are people who attempt to build towers and pavilions on rocks or near water. I only wish to build a little Greek temple on a well-chosen piece of 'mountain land'. My ideal architecture is delicate, solid, symmetrical, tiny but not slender. In this temple, I shall enshrine 'human nature'. With pride or modesty, I am a countryman. I have my deep-seated temper as a countryman: conservative, stubborn, loving the soil. I have wit but not much cunning. As a child I wandered from river to lake, rambling, suffering hunger and cold. Undernourishment retarded the development of my body, but thereby my imagination gained wings. To confess the truth, I feel very lonely. I still express through my writing my eternal devotion to wisdom and the beauty of humanity, my worship of what is healthy and honest, and my disgust with stupidity and selfishness. This is the hope of a countryman; I hope that I can stimulate you with these sentiments, inspire you to look upward toward life, and to doubt the present. I believe this is not a vain hope."

To such a conscientious, and, in fact, ambitious writer, we cannot very well deny poetic licence to experiment with words, so as to bring out his exquisite feelings which would otherwise be impossible to express. However, not all stylists have such justification, for sophistication in its early stage involves a great deal of external ornament. Hence the often unjustified obscurities. But there is another

factor which is perhaps a fundamental one: the new literature is entirely a product of the urban people of China. They were progressive, but that did not save them from being ignorant of the intimate life of the Greater China which has as its soul the peasants. This is exactly the challenge Mrs. Pearl Buck made to the Chinese writers in 1933, when she accused China of being entirely wanting in creative spirit. Today the war has solved the problem completely, for the dispersal of population in general, and the carrying on of political work by the writers in particular, has for the first time erased the hard line between the metropolitan and the provincial, the learned and the illiterate, the one who lives life and the one who is supposed to describe life. This I should say is the greatest and most invigorating effect the war has had on our literature, and it is the fundamental solution for the dilemma of diction.

Another controversy, a more recent one, was over the "new sentimentalism". Some critics in China condemned a vogue among writers in Free China for harping on their nostalgia for their lost homes, the little brooks and the tremulous bamboo bridges. Robust critics thought this futile and morbid. They exhorted writers to forget that "small ego" and remember the fate of that "noiseless China", meeting the masses. Writers, however, defended themselves by saying that spontaneity and sincerity were the cardinal virtues of writing and that if they felt nostalgic, why should they not write nostalgically? This dispute, although it arose out of war-time conditions, was actually part of the same struggle between the writers' desire to be unfettered and the critics' to see that writers were not wasted in the community. One critic, for instance, wrote: "Let us sing of industrialization! Reality demands industrialization. It is up to the writer to create a nation-wide enthusiasm for machines, motors, levers, hydraulics, and even windmills. To do so, one must not rely upon dead formulae. The writer must steep himself in industrial life in order to absorb the 'food of writing.'"

One poet, for instance, Yuan Shui-pai, sneered at the "aesthetic

poems" in his poem called "Balloon":

"Poetry, are you still lingering with the aesthetes,
Still keeping away from ministers, diplomacy, stock exchange and
international murder?
Why do you deal so delicately with social complaints?
Indeed, you are 'the horn of the age', you see far away,
But you tell us it is daybreak when it is yet dark,
You are so chubby, so soft, and so remote,
Let yourselves float comfortably under the green leaves,
With a five-coloured string tied at the end.
The lady leaning on the garden chair says to the playboy,'
Careful do not let this balloon go!"

When I say writers refuse to give up their nostalgia, I don't mean that there is nothing else. Actually, in Free China, most writers concentrate on the China that is rising from the ruins. Take an essay with the title "A Tribute to the Highways". If you had assigned this subject to a Chinese writer in pre-war days, he would have been sure to dwell on the fineness of the road or the beauty of the landscape. But let me quote you the opening paragraph of this essay by Tso Liang: you will find that there is more youthful enthusiasm for a brand-new nation in growth than praise for the mountains and rivers:

To the man who does not know the soul of his country, the best way to teach him is to pack him into a coach, between any city of Free China and Chungking. Since he travels on bleak rocky mountains, he may find his fellow-passengers' eyes unusually bright; below their ruddy faces may be gowns of coarse homespun. The landscape on the road is too harsh for him to expect refinement. But he will have plenty of compensations. From sunrise till twilight, the singing and humming of the wind, the coolness and straightforwardness of the rain, what a day it is when you are on a new motor road. Who can refrain from stretching his hand to catch the white clouds underneath the wheels when the coach rises above the mists on the peak? The coach rushes on, but the peaks of the surrounding mountains remain motionless and aloof. Sunshine scintillates on the raindrops, and you feel the world is majestic and fresh, your heart gives a bound; revelation comes to you. Just for that immortal moment, you feel you

have got rid of all the bondage of a decaying life. You feel you are a new-born child, scanning with your naked eyes this vast, magnificent world. This moment of course is only transitory. You return to your own world. You remember the inn where you stayed the night before, and the mountains you are to cross tomorrow. Then, purple twilight descends on you. You hear the motor throbbing across the silence of a ten-thousand-year-old valley. One peak is passed. Someone cries out, 'Look, here is a town!' Hundreds and thousands of families crowding in that valley, touched by the fringe of a little stream. Culture?—wisdom?—the outside world? Perhaps they exist, for the little stream pleasantly runs on, right beyond the horizon."

I have not said anything about the novel or about drama, because I feel that unless I can give you some idea of their work, mere names mean very little. You have probably heard the name of a Chinese woman writer, Miss Ting Ling, for we in China learned with great interest that her *Reunion*, a play about the Japanese in occupied China, scored a success in India. It was produced by Professor A. Aronson at Shantinaketan in 1941. Professor Aronson afterwards wrote: "We chose this play not only because of its political reality, but also because of its intense human interest." It was perhaps the first time that a modern Chinese play had been produced abroad, and it was a fitting introduction. That play is one of many samples of our war-time drama. Some day I hope Ts'ao Yu's plays will be introduced into India. His *Rainstorm* and *Sunrise* have already been translated into English, but they were published in China. He is one of the most talented of our young dramatists, having both warmth and vision. In addition, he understands the stage. *Sunrise* as a play is like Mao Tun's novel *Midnight*, a merciless mirror of a degenerate, bankrupt city life.

In fiction, besides those short stories published in *New Writing*, and a volume of Lu Hsün's short stories published late last year which, by the way, was the first individual collection of a modern Chinese author in English, you have no doubt seen Edgar Snow's *Living China*, an anthology of modern short stories. That was done nearly eight years ago, during which time much has been written.

Like everything else, this vernacular literature of ours went through a three-fold process. It began as a furious revulsion against everything that existed. Outbursts of iconoclasm are not always rational, but they are usually the short cut to reform. During this period, one notices that Chinese writers hated form most, whether in prose or verse. We also have writers who, like some notorious writers in the West, dislike punctuation. After this orgy of wiping out the old, there came a period of systematic innovation from the West: Ibsen, O'Neill, Synge, in the drama; Tolstoy, Romain Rolland, Flaubert, Dickens, Galsworthy, Wells, in the novel; Tagore, William Blake, Paul Valéry, and many others in poetry. These Western masterpieces were translated with the conscious intention of introducing models for Chinese writers. Writing on Japanese fiction, Chou Tso-jen, then a very respected critic, thought Chinese novelists needed more effort in "imitating foreign works". Only in recent years has real creativity begun to take shape. This destruction-imitation-creation process is most characteristic of modern Chinese poetry, on which the earliest influence from abroad was Tagore. In the first stage, modern Chinese poetry aimed at the destruction of metres and the adoption of the natural rhythm of speech. This shook the age-long conventions of the Chinese verse-forms, on which not much new was built; it also succeeded in enlarging the range of themes, adding to nature and love an interest in social problems. With the second stage came experiment with new forms. The guiding spirit was Hsü Chih-mo, who after his return from England began the movement for restoring musical qualities which originally existed in Chinese poetry. Mr. Hsü himself was well read in classical Chinese poetry and at the same time a lover of English verse. He made many bold experiments, from a sonnet to a long poem.

The third stage was a reaction against the rigid alien metrical restrictions imposed on the free souls of Cathay, especially the form of sonnet which seemed unreasonably mechanical. The reaction came mainly from two groups. Kuo Mo-jo, the leading writer of the Creation

Society, wanted poetry to be a medium of force. His poems were mainly directed against social injustice. He achieved magnificence in theme and great fluency in the vein of Walt Whitman. His passion was so wild that it knew no bounds. In his confession he wrote:

"I am a man somewhat subjective, gifted with more imagination than observation. I am also impulsive. Even when I write a poem, I let myself be carried away by impulse. Every time I have the impulse, I become like a galloping horse; when the impulse is calmed down, I become like a spent porpoise."

This will tell you how very different modern Chinese can be from the Stoical Confucian teachings. In one of his poems, Kuo condemned the modern city. It began thus:

"It is not the cement of the avenue,
It is the blood and sweat of the lives of the labourers!
The bleeding lives, oh the bleeding lives,
Under the tyres of opulent motors roll and roll."

Another reaction came from Li Chin-fa, who formed quite a school, and his influence has never died out, although Li himself has gone back to sculpture. Li, like Tai Wang-shu, studied in France, and thereby was influenced by French symbolism. You have probably read the volume of modern Chinese verse translated by Harold Acton and Ch'ên Shih-hsiang, in which you would notice that obscurity plays an important role in some of our new poetry. Since the war, there has been a distinct change. Many poets compose their works with the express purpose of reciting them in the open to the people. They are often lyrical but seldom very sophisticated, which, of course, is to the good.

[A broadcast to India.]

肆 文学与大众

左翼作家和右翼作家就应当自由写作还是服务大众的思想论争已经持续好些年了。这一问题听起来很幼稚，可它确实带来了写作技巧上的现实问题。现在的年轻中国作家面临许多困难，其一便是措辞。在中国抗日战争爆发前几年，就连许多白话文运动的坚定支持者都开始抱怨，而且常常是很正确的，说我们现在白话作家的“艺术性散文”和“象征性诗歌”，甚至比文言作家的作品更远离大众。他们根本不考虑可理解性，肆意扭曲句子结构，意象和引喻有时直接来自古希腊或其他欧洲文学经典。小说中人物的对话，让读者觉得好像他们是外国人。即便描写自然景致，许多风景倒像是典型的西伯利亚大草原，而不是中国北部平原。事实上，大量的普罗文学对一般读者来说，同颓废的象征派作家的作品一样难读。于是，许多批评家和作家在三十年代初喊出了“大众语”的口号。

那我们该如何解释这种文学与大众的偏离呢？首先，对欧洲文学的翻译负有主要责任；第二，也许中文的固有句法不足以表现现代人更为复杂的情感，特别是当他开始探索人的潜意识世界的时候；第三，随着白话文地位的确立，第二代作家也变得更老练。例如，青年散文家何其芳在谈到他的创作时写道：

我的工作是在为抒情的散文找出一个新的方向。我企图以很少的文字制造出一种新的情调：有时叙述着一个可以引起许多想像的小故事，有时是一阵伴有深思的情感的波动。正如以前我写诗时一样入迷，我追求着纯粹的柔和，纯粹的美丽。一篇两三千字的文章的完成往往耗费两三天的苦心经营，几乎其中每个字都经过我的精神的手指的抚摸。²²

要强迫这样一位敏感的作家使用平淡直白的语言，实在是过于残酷了。我认为沈从文是中国现代小说家中最好的文体家，他在《从文小说习作选》的代序中写道：

我除了用文字捕捉感觉和事象以外，俨然与外界绝缘，不相粘附。一切作品都需要个性，都必浸透作者人格和感情，想达到这个目的，写作时要独断，要彻底地独断！这世界上或有想在沙基或水面上建造崇楼杰阁的人，那可不是我。我只想造希腊

小庙。选山地作基础，用坚硬的石头堆砌它。精致、结实、匀称，形体虽小而不纤巧，是我理想的建筑。这神庙供奉的是‘人性’。我实在是个乡下人。说乡下人我毫无骄傲，也不在自贬，乡下人照例有根深蒂固永远是乡巴佬的性情，爱憎和哀乐自有它独特的式样，与城市中人截然不同！他保守，顽固，爱土地，也不缺少机警却不甚懂诡诈这乡下人又因从小飘江湖，各处奔跑，挨饿、受寒，身体发育受了障碍，另外却发育了想像，而且储蓄了一点点人生经验。我感觉异常孤独。乡下人实在太少了。从一个乡下人的作品中，发现一种燃烧的感情，对于人类智慧与美丽永远的倾心，康健诚实的赞颂，以及对于愚蠢自私极端憎恶的感情。这种感情且居然能刺激你们，引起你们对人生向上的憧憬，对当前一切腐烂现实的怀疑。先生，这打算在目前近于一个乡下人的打算，是不是？

对像这样一位富于真诚和抱负的作家，为了让他抒发用别的方法无从表达的精微细致的感情，我们不能剥夺他在文字上尝试诗的破格的权利。但并非所有的文体家都有如此正当的理由，因为老练早期包含大量雕饰成分，容易造成不合理的晦涩。然而还有另外一个因素，或许也是一个根本因素，即新文学完全是中国城里人的产物。他们是进步的，却完全不了解作为伟大中国灵魂的农民的内心生活。1933年，赛珍珠就此向中国作家挑战，她指责中国完全缺乏创造精神。而今，战争已经解决了一切问题，因为中国人口的分散和作家们从事政治工作的举动，第一次消除了城里人和乡下人之间的界限，学者和文盲之间的界限，生活在现实中的人和想要描绘人们生活的人之间的界限。我要说的是，这恰是战争带给我们的文学最伟大也最令人鼓舞的影响，它还从根本上解决了作家们在措辞用字上进退维谷的难题。

最近有一场关于“新感伤主义”的辩论。中国有批评家指责非沦陷区作家中正流行这样一种文风：留恋怀乡，说起沦陷家乡的小溪和颤悠悠的竹桥便唠叨个没完。尖锐的批评家认为这是种无益而病态的文风，他们劝诫作家们要忘掉“小我”，牢记“无声的中国”的命运，面对大众。然而，作家们为其自身辩解说，自发性和诚实是文学写作的基本特征，如果他们感到怀乡的苦楚，为什么不能留恋怀旧呢？作家们渴望不受约束，自由地去写作，而批评家希望作家在社区作出应有贡献。关于“新感伤主义”的争论虽然正值战时，实际上也是这一论争的一部分。例如，有位批评家写道：“让我们颂扬工业化！现实要求工业化。作家要承担起这样一个职责，在全国范围内创造出爱好机器、马达、操纵杆、水力学甚至风车的热情。这自然没有死套路可循。作家要汲取‘创作食粮’，必得

把自己置身于工业生活中。”

例如，诗人袁水拍在一首题为《气球》的诗中，这样嘲笑“艺术诗”：

诗歌，你还在缠绵艺术

远离部长、外交、股票交易和国际谋杀？

为何你把社会抱怨处理得如此精致？

的确，你是“时代的号角”，卓有远见，

但你说那只不过是黎明前的黑暗，

你如此丰满，如此柔软，如此遥远，

让自己舒适地在绿叶下漂浮，

在末端还系了一条五色彩带。

小姐靠在花园的椅子上告诉顽童，“小心，别放走这只气球！”²³

我说作者们犯了怀乡病，并不是说他们就没有做别的。事实上，非沦陷区的绝大多数作家都在全神贯注于从毁灭中复活的那个中国。以题为《公路礼赞》的这篇散文为例，若在战前，作家准会着笔于公路的精致和风景的优美。我把曹亮这篇散文的开头一段引下来，你们会发现对一个崭新的成长中的民族所倾注的青春激情，远远超过对山河的赞美：

对于对国家魂灵一无所知的人来说，教育他的最好办法是把他塞进一辆行驶在非沦陷区哪个城市和重庆之间的长途客车上。在荒凉的崇山峻岭间旅行，他会发现同车乘客的眼睛异常明亮，脸膛红润，穿着粗布外衣。公路两旁荒漠的景致远不能激起他的雅兴。但他将得到充分的补偿。当你从日出到黄昏，行驶在一条新建的公路上，听着风在低声哼唱，看见凉爽的雨丝飘落下来，会感到这是多么美好的一天。当汽车攀上云雾缭绕的山顶，谁都会禁不住伸出手抓一把车轮下面的白云。汽车在急速行驶，连绵起伏的山峦却孤零零地静止在那里。雨滴被阳光照得闪着金光，你会觉得世界是那么的壮丽，那么的新鲜，连心都要蹦出来，你得到了某种启示。在这不朽的一刻，你感觉自己已经摆脱了所有腐烂生活的束缚。你会觉得自己是个新生的婴儿，在用肉眼审视这个广阔而壮丽的世界。当然，这样的一切只是昙花一现。回到自己的现实世界，你就会记起昨夜住过的客栈和明天要穿越的高山。这时，绛紫色的黄昏落下了帷幕。你听到发动机的震颤打破了万年山谷的沉寂。汽车又驶过一座山峰，有人喊道：“看，这儿有个镇子！”在那条山谷里，沿着一条小溪的边缘，聚居着千百个家庭。这里有外部世界的文化和智慧存在吗？也许吧，因为小溪在欢快地流淌着，流向了地平线的那一边。²⁴

关于小说和戏剧，我还没有说什么，因为我觉得，除非我能介绍一

下他们的作品，否则只列些名字意义不大。你们或许听说过中国女作家丁玲，中国人都知道她反映日占领区人民生活的话剧《重逢》在印度演出获得成功。那是1941年，由阿伦森教授执导的《重逢》在孟加拉和平大学上演。阿伦森教授说：“选择这出戏，并非只因为它的政治内容，还因为它具有强烈的人文情调。”中国话剧在国外上演，这可能还是第一次，也是一个恰当的开端。这部话剧只是我们战时众多话剧中的一部。我希望有一天曹禺的话剧能介绍到印度。他的《雷雨》、《日出》都已被译成了英文，但只是在中国出版了。他是中国最有才华的青年剧作家之一，既有热情，又有想象力。另外，他懂得戏剧舞台。他的《日出》像茅盾的小说《子夜》一样，是反映腐烂、破产的城市生活的一面冷酷无情的镜子。

说到小说，除了那些发表在《新写作》²⁵上的短篇小说和去年年底出版的一本鲁迅短篇小说集——中国现代作家的第一本英文个人选集外，你们肯定看过埃德加·斯诺编的《活的中国》，那是一本中国现代短篇小说选集。这已是八年前的事了，这八年间，中国作家又写出了很多小说。

同所有事物一样，中国的白话文学经历了三个进程。它以猛烈的剧变开始，反抗现存的一切。对传统观念的攻击并不总是理性的，但却通常是改革的捷径。在这一时期，中国作家最为痛恨的是诗歌和散文形式上的束缚。我们也还有些作家，很像西方一些声名狼藉的作家，不喜欢标点法。在这大规模的扫除传统之后，源自西方的中国文学有系统的创新期到来了：戏剧上有易卜生、奥尼尔和辛格；小说上有托尔斯泰、罗曼·罗兰、福楼拜、狄更斯、高尔斯华绥和韦尔斯；诗歌上则有泰戈尔、威廉·布莱克、保罗·瓦莱里等众多西方诗人。这些西方作家的名作被有意识地翻译成中文，作为中国作家的文本典范。对日本小说颇有研究的周作人，在当时也是受人尊敬的批评家，他认为中国小说家需要更努力地“模仿外国作品”。就在最近几年真正的创新才开始成形。这一毁灭——模仿——创造三部曲最能反映中国现代诗的特点，中国现代诗最早的外来影响来自泰戈尔。第一阶段，中国现代诗的目的是要消灭格律，采用说话的自然韵律。虽然新的韵律形式还没有建立，但它足以震撼中国传统的诗歌韵律形式。同时，它还成功拓展了诗歌主题的范围，在自然和爱情的基础上增加了对社会问题的兴趣。第二阶段便是对新的诗歌形式的尝试，核心人物是徐志摩，他从英国回国以后，就开始着手恢复

中国传统诗原有的诗歌音乐性的运动。徐志摩本人有很好的中国古典诗词的修养，同时又非常喜欢英国的韵诗。从十四行诗到长诗，他在诗歌创作上作了许多大胆尝试。

第三阶段是反击强加在中国人自由灵魂上的那种异域僵硬的韵律限制，特别是看上去显得荒唐机械的十四行诗。反击主要来自两方面，一方面以创造社领导人郭沫若为代表，他把诗歌当成力量的媒介。他的诗主要是反抗社会不公正。他在诗歌主题上获得了极大成功，诗也非常流畅，颇有惠特曼的气质。他的激情是如此狂放，常常是一发而不可收。他在一篇自白里写道：

“我是一个主观的人，天生想像力超过观察力。我还很冲动，每当写诗，便让冲动带着走。每次有了冲动，我就变得像一匹脱缰的野马；等冲动平静下来，我又变得像一条筋疲力尽的海豚。”²⁶

从这里可以看出，现代中国人与禁欲主义的孔子信条差得多么远。郭沫若在一首谴责现代都市的诗中这样开头：

这不是水泥的大街，
这是劳动者生命的血与汗！
流血的生命，啊，流血的生命，
在华丽的汽车轮胎下滚动，滚动。²⁷

反击的另一方是完全自成一派的李金发。尽管他已回过头搞他的雕塑了，但他的影响一直存在。像戴望舒一样，李金发也曾留学法国，并受到法国象征主义的影响。你们或许读过由哈洛德·艾克敦和陈世骧英译的《现代中国诗选》，该注意到朦胧在中国新诗里所起的重要作用。战争以后，诗歌也发生了根本变化。许多诗人写作的目的是向公众朗诵，因此其作品多是抒情诗，没什么深奥难懂的，这当然有好处。

[此篇为作者在美国所作，对印度广播]

How the Tillers Win Back Their Land

土地回老家

萧乾 中译

1. CHANGES ON THE HORIZON

"Speed up the payment of the autumn tax and get ready for land reform." The call was sent forth by the Huilung *hsiang* Peasants' Association as early as the beginning of August. And yet the peasants of Hsinlu Village, like many other Hunan peasants, were hesitant. They met the call to land reform with hope but also with some misgiving. Few of them were aware of the deep and startling significance the event would have for them and their children and grandchildren.

This is not to be wondered at. For thousands of years, feudal exploitation had drained away the life blood of the area. There had been little change in the peasants' life. Only in 1927, freedom had shone then for a brief but glorious moment in the weeks of the People's Power. Then bitter darkness had descended again. Peasants under thirty had but dim memories of that time and the Chiang Kai-shek tyranny had not encouraged prattling, on the part of the old timers, about those dazzling days. They could still recall to mind the short-lived days of the peasants' triumph, but side by side was another mental picture—landlords reinstated and the fertile earth around Huilung *hsiang* soaked with the blood of courageous peasants.

The seasons revolve like a wheel and the peasants in Hsinlu Village followed, mechanically and unceasingly, toiling, toiling. Like wheels bearing a great load, they had groaned under the joint oppression of the Kuomintang (KMT) magistrate, the "gentlemen" of the *hsiang* Office, the *pao* heads and landlords who collected rent and practised usury with equal proficiency. The wheel turned. It was spring. The peasants must spread fertiliser, sow seeds and plant young shoots. Under the scorching summer sun they operated water wheels, weeded the fields and cut rice. Now the wheel had turned to autumn. With the fifth watch², men got up to plough the fields and cultivate

vegetables. At sunrise they were carting away the crop and sunning it. Bare-footed women, with suckling babes tied to their backs, went to the fields to gather hay as soon as they had finished preparing the meals.

Everybody in Hsinlu Village agreed that the livelihood of the peasants had improved since liberation. Bandits had been exterminated and taxes lightened. What is more, local granaries were erected so that instead of having to carry your tax-grain over 70 *li*³ to town, now all one had to do was to deliver it to the Seventh Storehouse near the Nunnery— a matter of only 20 *li*. The most important thing, however, was the way the "landlord-masters" drew in their horns. During the first half of the year, when, with the help of the government, rents were reduced and deposits refunded⁴, the peasants had succeeded in making the big landlords part with some of their loot. Many of the peasants got back grain, and others ready cash. It was a breathing spell for all except the poorest farmhands who owned not one square inch of soil. Peasants who had been beggared used the money they got back to set up as stall keepers in town or to buy fresh land. So it was not unnatural that a new illusion should grow up among some of the peasants. Feeling the load which had accumulated on their backs for centuries somewhat lightened, they began to get complacent. "The landlord is already down. No need to kick him in the shins any more." Or: "the times have become better so long as they keep steadily improving, there is no need to get worked up and act rashly." Unpleasant memories of 1927 troubled them, nagging at their subconscious mind like phantoms. They feared a sudden reversal.

As for the landlords, taking even such a small setback lying down was, of course, extremely distasteful to men. But they tried to act chastened and subdued. At Ch'ing Ming Festival⁵ this year, for instance, none of the landlords thought it prudent to keep up the age-old tradition of giving the villagers a talk at the ancestral temple. In the old days, besides the talk, it was by no means uncommon for landlords to have recalcitrant farmhands put into sacks and beaten up

as an example of the dangers of disobedience. Another established custom was for tenants to make gifts to their landlords, besides their annual rent, of vegetables, tea, beans or chickens. This year, however, the masters became unusually generous. "Save them for yourselves, please," they would say, with an ingratiating smile. Some of the cunning ones even went so far as to hand out presents to their tenants and farmhands in order to seal up the mouths of their "kitchen-gods." Then again, since time immemorial, the tenant had had to ask the landlord to dinner. He took around a sedan-chair to fetch the landlord and considered himself lucky if the latter condescended to come. This year, the tables were turned, and a good many landlords tried to extend their hospitality to their tenants.

The landlords too had not forgotten 1927. History to them also seemed to go in cycles. They looked forward to the day when they would have a chance to hit back—hard. They were not sitting back and waiting for that day either. They were plotting for it, patiently, cunningly, relentlessly....

The first people to talk "land reform" directly to the villagers were some workers from the Telephone Company in town.

A little before the *Chung Yang* Festivals⁶, over the light brown field-paths of Hsinlu Village, one began to see a new skyline. Along the northern boundary of the village, that is to say, on the opposite bank of the Pigeon River, which formed the line of demarcation between Huilung *hsiang* and Shihma *hsiang*, a series of telephone poles appeared against a background of yellow hill-slopes and floating clouds.

Then one morning early in November, a boat loaded with some 30 poles and four uniformed workers came drifting towards the south bank. Peng Fu-chuan, who was cutting firewood on the bank, stared at the boatman standing on the prow straining hard to steer the boat. Seeing the boat finally touch the bank, he could not contain himself any longer but ran down the slope and asked, "Shuang-chuan, Shuang-chuan, what are these people here for?"

One of the uniformed workers, with the characters "Telephone Company" sewed on his satchel, yelled before the ferryman had a chance to answer:

"What for? For land reform, that's what. Land reform is to make the peasants masters of the land."

This said, the worker called his companions to carry the poles onto the bank.

A vague notion presented itself to Peng Fu-chuan's brain—those telephone poles were intimately related with him and his welfare. Laying down his scythe and basket without thinking, he bent down and put one pole on his shoulder. As he was thus employed, the worker kept talking: how they would have to hurry; how the land reform Work Team would get there the moment they were through with the cadres-meeting in town. Apparently, eight days were given them to finish the job of putting up the wires.

"You four, that's all?" asked Peng Fu-chuan, concerned.

"No, four in one group," the worker told him. "Huiling *hsiang* has nine villages in all, right? Four times nine makes thirty-six."

Peng Fu-chuan was impressed. One could see this fellow had come from the town, so methodical and efficient. Yet he still could not help asking a final question, "Where does this telephone lead to?"

No idle question, that. True, he had been in town several times, turning in his crop-payment, but he had never stayed over ten days and had never touched or even seen a telephone.

"Why, to the District Government, to the local Land Reform Committee, to the Provincial Land Reform Committee. Right up to Chairman Mao himself."

The worker winked sympathetically at his peasant comrade and continued:

"All through the twenty years of the KMT, the telephone system was restricted to the town. Now we are here, in the country, and we want to help you to do away with the landlord class."

Peng Fu-chuan's head was in a whirl. When all the poles had been

transferred to the bank and the workers were getting ready to start setting them up, he also picked up his scythe, slung his basket over his shoulder and ambled off. His way took him along the dyke and down another slope, and he was deep in thought.

When he had reached the foot of the slope named Seven Star, he lifted his head and gazed at the Peng-Chu Homestead, which rose above the bare tree-tops. The roof of Master Peng the Second's mansion was broad and spread out like those thick shoulders of its owner. All around on the outskirts were groups of dilapidated mud huts. Ever since he was six years old, Peng Fu-chuan had lived with his father in one of those huts. At times, he, too, hated Peng Erh-hu, Peng the Second Tiger, especially when he smelled the meals being prepared in the big house. Fish, meat and what not. And he, Peng Fu-chuan could only have strips of dried potato all the year round. Still, to Peng Fu-chuan, it was all a matter of "fate". "To have or have not depends solely on fate; no human effort can come to anything." Take the way his luck had turned two months ago. Out of the clear blue sky came an invitation from Master Peng the Second, who insisted on presenting him free a piece of land valued at five *tou* and seven *sheng*, and good, fertile land at that. Also he was asked to move into one of the tile-roofed rooms in the master's outer yard. Hum, his luck had certainly turned!

It came to Peng Fu-chuan like a shock that perhaps he should not have helped carry those poles after all, that he had somehow betrayed his master. However he had acted in the past, thought Peng Fu-chuan, Master Peng the Second had certainly grown more enlightened since liberation. Without him, where else on earth could he, Peng Fu-chuan, get his food and clothing?

Most of the villages in Hunan are formed of several homesteads, each of which in turn is composed of one or more clans. In the small homesteads, as far as blood relationship goes, the members were usually three to five times removed from each other at the most. So, in a sense, each of these homesteads was a little feudal stronghold. In

Hsinlu Village there were three prominent homesteads: the Peng-Chu Homestead, Big House Lo, and the Li Garden. Not far from the dyke, near the Seven Star Slope, was a one-street town.

When Peng Fu-chuan came back to the Peng-Chu House, he naturally told others about the affair of the telephone poles. The news passed around quickly and before noon all three homesteads had heard about it. Some of the old folk remained indifferent. But even they stepped up to the footstone in front of the Arch of Chastity and Filial Piety and leaning on their crutches, took a weary look. They had seen many new things: the Japanese; the KMT Army... The bitter experiences of many years told them: what is new is not necessarily well-meant.

The younger generation, however, could not repress their excitement. One by one, they bypassed the woods and the graveyard, and ran up the narrow field-path towards the river bank. Crazy Grandma, with bound feet, was also among the crowd. She was fifty-three. And there she was, with her crutch, caught in a sea of people, staring wide-mouthed at the poles standing upright this side of the bank.

The moment the peasants arrived on the spot, they began showering questions at the workers. Crazy Grandma, lightly passing her bony fingers over one worker's arm, whispered "Ah, you look exactly like my Teh-ming. Look, he was as tall as you are. I brought him up myself, from so high." There was a catch in her voice and soon she was sobbing.

"There, there, no tears! This is not a time for crying but for laughing," said the worker to Grandma. Then after scribbling something in a pad with his pencil, he announced, "No more questions, please. The telephone is put up for land reform. After land reform, up come you peasant comrades, and out go the landlords. Understand? Come, those who are strong, help us carry these!"

At this, all the peasants got to work. Some dug holes, others helped carry the already numbered poles. Especially in the matter of

hole-digging, the peasants exhibited a thorough expertness which commanded great admiration from the workers. With the help of so many "extras," the job was finished ahead of time while the sun was still lingering over the western horizon. Slender shadows were cast by the poles right across the new-mown fields, forming a pattern, like a seal-impress, claiming ownership and authority.

Crazy Grandma also lived in Peng-Chu Homestead, and when she got back she pounded on all the doors and shouted at whoever opened, "Hey, land reform, land reform! My son Teh-ming must be coming back!"

Peng Hsin-wu's pregnant wife was just stepping out to call the pigs home when Crazy Grandma ran right into her and, quite befuddled, fell down. Alarmed for fear she might have got hurt, Mrs. Peng told her soldier husband to go and fetch Chun-hsing, Crazy Grandma's daughter. She helped the old lady up, led her into the room and sat her down on a stool. She poured out some water for her and holding her hand, she said, as if explaining something to a child, "Grandma Li. Your son is not coming back. Didn't Hsin-wu tell you? He was telling the truth. Don't go on hoping like that. You won't be able to stand it."

"Not coming back!" Crazy Grandma repeated mechanically. Then with a piercing shriek she fell off the stool in swoon.

Neighbours came pouring in, all talking at the same time. Uncle Kuang-lin, fingering his thin beard, said musingly, "Better not mention to her any more this business of her son having died in the battle. Her daughter is getting married pretty soon, isn't she? What will happen to the poor old soul after that?"

At this point, Crazy Grandma's only daughter, Chun-hsing, still a child with pigtails, broke upon the scene. Seeing the old lady's dusty, waxen pale face, she was distraught and wailed, "Mama, O Mama!" It was Peng Hsin-wu who lifted Crazy Grandma up in his arms and laid her down on the bed.

After a few moments Grandma's eyelids began to flutter. The first

person she saw was her daughter. She took Chun-hsing's hand and, stroking it gently, said as if quite resigned, "Don't worry. Don't worry!" Then again in agony: "So your brother is gone," and lapsed into silence, hopeless with sorrow.

Although only seventeen, Chun-hsing had already been a child-bride for five years. Her "intended" was twenty-two, a son of the Lo family, thin as a rake and frequently visited by violent attacks of haemorrhage. Not long ago his family had proposed holding the wedding. At first, Crazy Grandma felt helpless about it. Hadn't she given out her daughter as child-bride because she could not support her? And hadn't the others a perfect right to ask for a wedding after giving her board and lodging for five years?

But ever since Peng Hsin-wu came back from the army a year ago, he had taken an active interest in all the goings-on in the village. This ceaseless activity on his part more or less explained why he had been elected the head of the local Small Group.

He had been forcedly drafted into the KMT army together with Teh-ming, Crazy Grandma's son, and he knew Teh-ming was killed. Hence, upon hearing that Teh-ming's young sister was going to be married to a consumptive weakling, he took it upon himself to go over to Big House Lo in order to discuss calling the marriage off. The Lo family's airy answer was: "Sure, you can call it o, but not until you've paid us back the amount we've spent feeding her these last five years." There the matter had rested.

Anger surged in Peng Hsin-wu. He knew Teh-ming had been killed. "Grandma Li, Chun-hsing, just think of it," shouted Hsin-wu, his eyes ablaze, "Who was it that killed Teh-ming? Wasn't it that landlord son-of-a-turtle Peng Erh-hu? Didn't he send me off too as cannon fodder? Where would I be today if it were not for the Communists? They captured me, but they did not treat me as a prisoner. They saved me as though I were their own brother. Now I'm determined to have a showdown with Peng Erh-hu or I won't call myself a man!"

Peng Erh-hu. The name struck horror and hatred into the hearts

of all the peasants. Peng the Second Tiger! When the Japanese were here, his brother Yin-ting, as the bogus village-elder, undertook to pressgang men and women for them. After the defeat of Japan, Peng the Second Tiger stepped into his place. For four full years, he was the tyrant in Huilung *hsiang*, acting for Chiang Kai-shek, harassing the peasants with continuous demands for able-bodied men and various contributions.

Liberation threw Peng Erh-hu out on his ears. For a while, supported by his contacts and henchmen, he tried to keep up his old prestige. Acting the part of a kind, easy-going superior, he would deliver threats like the following to the peasants in public: "Don't you get too active. We are settled, homely people. One should leave a margin in doing things so that there won't be any hard feelings in the future." For the last few months, however he had started giving out presents to all the tenants and farmhands in his employ, past or present. Like a conjuror's cloak, his house disgorged numberless green American blankets and other "surplus material."

While Hsin-wu was loudly cursing Peng Erh-hu, the other peasants in the room only looked at each other and said nothing. Some thought: he had coughed up quite a lot at the "rent reduction and deposit refund," more or less withdrawn from local affairs and had in general acted in a pretty humble and penitent manner. Why bring up all the old scores? Some knew that Peng Erh-hu still had hidden small arms and a lot of henchmen. A word too much and something might happen to you. There was silence in the room.

Chu Yao-hsien, known locally as "The Scholar" was the first to put these thoughts into words. Before speaking, he cleared his throat in the manner of a fortune-teller; then he scratched at a scar on the back of his head. All this was in order to show that his statement was made with great care and deliberation.

"Huilung *hsiang* will soon have land reform," said he with an air of authority. This spring he had attended a meeting of peasant representatives in town and had come back with an exaggerated sense

of self-importance. Ever since then, he had shown up on every important social occasion with a peasant representative's red silk insignia pinned on his breast, swaggering like an ox. "In land reform everybody gets what's coming to him. Chairman Mao is fair and impartial. There will be no mistake about it." A loud cough here, then, "Master Peng the First, Master Peng the Second, what does it matter? They are right here among us. They can't fly away. As for their land, it can't walk off either. So why get so excited? After all we're all men of the same homestead!"

The peasants, most of them already nervous and thinking of backing out, were easily persuaded by the scholar's words. Many of them now voiced the opinion that they should postpone settling accounts with Peng Erh-hu until the Work Team arrived.

Hsin-wu found himself standing alone. He realised that his anger had carried him away, so he did not press his point. He called to mind a passage from a speech he had heard several days before on "Work Preparatory to Land Reform" made by the Secretary of the District Communist Party Branch. "You can't pull the landlords down until the masses are fully organised to act together. If you don't think you can pull them down, don't make any rash move and frighten them unnecessarily."

A mark of interrogation was planted in the heart of every peasant and every landlord in Hsinlu Village with the planting of the telephone poles. The mark became bigger, nearer and clearer as one after another the poles were set up.

Since the Huilung *hsiang* government had its office in the ancestral temple of the Peng-Chu Homestead, and the village-chairman of Hsinlu Village, Peng Yu-tang was himself a member of the Peng-Chu Homestead, the telephone system naturally centred there. The long line of erect telephone poles led towards that hamlet and everybody within, high or low, was in great excitement.

On the morning following the coming of the workers Peng Yu-tang called a meeting of the small-group leaders in the temple

courtyard. Passing on instructions from the District People's Government, he said the land reform Work Team would probably arrive around the 25th of November. In the meantime, a matter of more than ten days, they must devote themselves to dispelling rumours and combating any sabotage on the part of the landlords. They must redouble their vigilance and watch carefully every move the landlords made. At the same time no peasant should be blamed or attacked if he should hesitate to fight the landlords or should be deceived by them, because one cannot expect the peasants to wake up very fast after they had been oppressed and hoodwinked for thousands of years. Instead, one should employ all kinds of methods to rouse the masses' class consciousness. When that is done and the masses have really "stood up", then fighting the big racketeers, hunting down rumours and stopping the illegal activities of the landlords will all proceed smoothly.

The landlords, too, now saw that the coming land reform would destroy their power. It would not be as easy as the "rent reduction and deposit refund" campaign. They knew from the newspapers and booklets that the people wanted to destroy only the landlord class, not the landlords themselves; that not all their lands would be taken away from them so that they had no means of livelihood, but that they would get a similar share like everyone else. But, to the landlords, who had ridden roughshod over the peasants for centuries, a "similar share" was treated with contempt. Used to reign supreme in the villages, they were determined not to take the coming blow lying down.

When he was told Peng Hsin-wu wanted to settle accounts with him, Peng the Second Tiger's face fell. His eyes bulging, he rapped the edge of the hardwood table with his pipe and addressing himself to his concubine said, "Turtles and tortoises are kings today. And here am I, bitten by a mad dog."

Peng Erh-hu's study was very ornately furnished. Scrolls and paintings hung on the walls above boxes and boxes of old editions.

Only one thing was missing. Below the wall-clock there used to hang a picture showing a group of people welcoming the arrival of the KMT army. If it had been there still, one would have discovered Peng Erh-hu sitting proudly beside the Divisional Commander of the KMT's 107th Division. Those days were past, but Peng Erh-hu still gloated over them with pleasure.

His hands clasped behind his back, he strode out of the study. In the big hall he paced to and fro, pondering. In the centre of the hall were his ancestral tablets, tracing his lineage back twenty generations. Then there were scrolls and tablets signed by "all the gentry of the district". On the main beam hung a horizontal piece with oversized characters: "A Precious Star Illumines This House".

Thoughtfully, Peng the Second Tiger gazed at the ancestral tablets as if asking his ancestors' advice to meet this new crisis. Stuck in the incense burner were a few incense sticks not yet burnt out. He rearranged them.

"Pang...Pang..." From the other side of the courtyard came the sound of someone monotonously knocking the "wooden fish^s". It was Peng Erh-hu's wife, reciting the Buddhist sutras.

"The meal is ready, sir!" an anaemic-looking girl of about fifteen announced, standing outside the threshold.

Peng the Second Tiger gave an impatient grunt. Suddenly he raised his head and said, "Yueh-lien!" The girl turned around. "How would you say I've been treating you?"

Yueh-lien, already at the foot of the terrace, was slightly taken aback. She too had sensed a change in the atmosphere around the house. The other day while out shopping for Mrs. Peng at the Seven Star Slope, she had seen a lot of people, in groups of two or three, engaged in animated discussion around the well and on the field-paths. The walls were covered with slogans and picture-posters, with one showing a fat landlord sitting astride the back of a thin, under-nourished peasant. As for her, she had served Mrs. Peng for eight years. She had never stolen a needle or a piece of string. Yet she had

to take beatings—both from Mrs. Peng and the younger concubine. Once in December, the concubine's baby had fallen off the bed and she was stripped naked and beaten. Compared with these two women, Master Peng the Second could well be said to be kind. A kick or two was the worst you got from him. Therefore she answered, "You have treated me all right, sir." But the words were accompanied by a brief glance at Peng the Second Tiger through eyes blood-shot from constant exposure to kitchen smoke. The verdict was too good for him and she gave it but reluctantly.

The Pengs did not all eat together. Peng the Second Tiger, his concubine and the baby had their meals in the study. After lunch, he broke his usual habit of taking a nap. He locked himself and the concubine in and the two of them started packing quietly.

This lasted until evening when Peng the Second Tiger stepped out of the study and made his way to his brother's house. On the way he passed his farmhand Peng Fu-chuan.

For the whole afternoon Fu-chuan had been pounding rice, and while he worked he turned over in his mind the perplexing problem: Is the master his enemy or benefactor after all? Hsin-wu had told him a lot of bad things about his master, but here he was, retained and treated with consideration when all the other four farmhands had been dismissed. Destroy Master Peng and where would he get another job as a farmhand? Who would feed him? Master Peng had made the point clear several times. "Land reform? Land reform means Communism. This year the landlords. Next the rich peasants. The year after the middle peasants. In five years' time everybody will be penniless. That's what it is." To tell the truth, the prospect did not strike Fu-chuan as so ominous. All he had was one cotton quilt, practically in rags—but wait. Yes, hadn't Master Peng "presented" him with a piece of land only last month? Well did he remember that evening—the way Master Peng dramatically pointed at the ancestral tablets in the hall and said, "We all belong to the Peng family. Let those who can help others. But no outsider is going to come and share

our land!"

Seeing Fu-chuan pounding rice, Peng Erh-hu was displeased.

"Ah, stop it," he ordered. "Who knows to whom the rice will go?" This had been his constant attitude ever since the day the telephone poles were put up. He once even told Fu-chuan to let the cattle eat just grass and not beans.

His hands behind his back, Peng the Second Tiger went on his way through a side-door in the west wall towards his brother Peng Yin-ting's house.

The Village Chairman and the small-group leaders did their best to persuade the peasants not to listen to idle rumours and to get the autumn work done so as to clear the way for a successful land reform. Yet, in spite of their efforts the malicious rumours gained ground and the whole of Hsinlu Village was in a state of great agitation.

Take Chou Hsiang-jui, for instance. He was the proprietor of Chien Hsiang Department Store on the street near the Seven Star Slope. Without a *sheng* of land to his name in the village, yet he confided to regular customers over the counter. "We're not going to buy in any more goods from Hsiangtan. Who knows who will be the victims in this land reform business?" Owners of groceries and herb stores also showed signs of uneasiness. Observant people reported that even the smoke rising from the chimneys of the brickkilns was daily getting thinner.

No one knew for certain whether the rumours originated in the village and then passed on to the street or the other way round. Peasants going up to town with basketfuls of vegetables and eggs would be questioned in great detail by the merchants and after having got rid of their goods, come back in the evening with basketfuls of rumours. The Village Chairman was pestered with questions: Is it true that a married person won't get any land? Or must a person get married before he can be given any land? It got so that even peasants with tiny bits of land worth only one or two *tou* began to get thoroughly nervous.

A woman named Tu Yu-chen had worked as a wet-nurse for the family of Chu Yao-hsien for three months while her husband was away. Then her mother-in-law suddenly showed up and insisted on her coming home. It seemed the mother-in-law was anxious since she had been told that after the land reform able-bodied women would be sent up to Manchuria.

It was at this anxious time that Peng Hsin-wu received a small package, probably thrown over the wall by someone. On opening it he found a note wrapped up in a ball of cotton: "One Peng doesn't want to hack off the head of another Peng. Let this be a warning to you not to throw your weight around too much."

Rumours buzzed and flew like mosquitoes and like mosquitoes were hard to squelch. The village activists tried to hunt the rumours down. The trail went from house to house. Sometimes would lead right into another village. Some peasants were especially cautious. They refused to disclose the source of their information. "Don't know," they would say, shaking their heads or claimed they could no longer remember where they heard it from.

The *hsiang* Chairman called a meeting every other day to combat rumours. They wanted to get actual witnesses and evidence before they jailed any rumour makers. Several clues were gained at these meetings. The house of landlord Lo Pei-jung, in the Big House Lo Homestead and that of the Peng brothers seemed to be the two main sources of rumours. Lo Pei-jung had called progressive members in his homestead "new-style racketeers". He had also whispered that the small-pox serum that the government brought from Hengyang contained poison. Peng the Second Tiger had boldly torn off the poster put up by the Peasants' Association with the characters: "He who Tills Shall Also Reap!" An old used bank note, with the characters "getting poorer with each land reform" crawled across it was found in the street. It was traced back to Hsieh Chang Store and there it was discovered to be a trick of Peng the Second Tiger's.

On the morning of November 23, the Village Chairman and the

leaders of the small-groups were discussing whether to hold the three rascals for questioning when Peng the Second Tiger's wife burst into the office. Her face was tear-stained. She stamped her feet and beat her breast in lamentation.

"Oh the scoundrel, the thief!" she cursed. "Ever since he took that wench, we've not spoken to each other. Last night the lights were on in his room for the whole night. We only found out what he had done when Yueh-lien went in to clear the room this morning. He has run off with that dirty little trollop and taken the suitcase which had my dowry in it too!"

Everybody immediately jumped to his feet. Hsin-wu especially was in such a rage that he wanted to start the chase at once.

The Village Chairman hurriedly phoned this news to the *hsiang* Chairman. Then he dispatched some cadres with Mrs. Peng to make an investigation of the house.

At noon the District Government phoned back ordering that both Lo Pei-jung and Peng Yin-ting be immediately arrested as rumour spreaders. The two criminal landlords with three small-group leaders as guards made their way along the field-path north of the Pigeon River towards the District Government. Hsin-wu, one of the three guards, carried a rifle.

They passed along the line of sentinel telephone poles. The early winter wind playing on the vibrating wires produced a sort of mellow and portentous music. It seemed to express the age-long sufferings of the peasants. Yet mingled in the complaint was a note of hope, a resonant twang singing of Huilung *hsiang's* fertile land and its hard-working inhabitants.

Two days more and the land reform Work Team would arrive in the village.

壹 新的风景线

虽然8月初，回龙乡的农民协会便号召了“搞完秋征好土改”，但是新炉村的农民，正如大部分湖南的农民，对于土改本身还是懵懵懂懂的：只晓得土改就是分点子田，不晓得土改对于他们自己和他们的子子孙孙，将是怎样翻天覆地的一个巨变。

这也难怪他们，几千年来除了昙花一现的1927年，在广大土地上实行着的封建剥削制度从来没有改变过，整个人吃人的社会一直没有改变过。提起1927年来，三十岁以下的农民印象是很模糊的——在蒋介石二十多年的统治下，上年纪的农民们只是在心里记着那段辉煌的日子；他们缅怀当时农民短时间的翻身，然而也会记起地主复辟以后，回龙乡的肥沃土地上怎样淌满了善良农民的鲜血。

一年四季像车轮那么旋转，新炉村的农民也随了那车轮机械地不停息地旋转，车轮子上边载着千钧重量，直到1949年8月湖南解放时，新炉村农民的脊背上还压着国民党的县太爷，乡公所的绅士老爷，保长，和一手收租一手放高利贷的“东家”们。车轮转到春天时，农民们就沤粪，下籽，插秧；夏天了，就顶着炽热的太阳车水，踩草，割稻子；如今季节的车轮转到深秋了。男人们起五更去犁田，种菜；太阳冒了芽就车谷晒谷。女人们烧过饭就光了脚板去地里收稻草，背上还裹着吃奶的小娃子。

解放后，新炉村农民的日子的确好过了不少。出没无常的土匪肃清了。公粮负担轻了，而且区里修起仓库后，只要挑个廿里到庵门口县立第七分仓就够了，再也不需要挑到七十多里外的县城去。但是更重要的是“东家”们一个个都龟缩起来了，上半年双减时候，在政府的支持下，农民硬是逼着大户们把吞噬下去的利息又吐了出来。农民有退到谷子的，有退到光洋的，除了田无丘地无角的雇农，一般农民们都喘了口气，本来讨饭的，有了点小本，上镇上摆摊去了；本来几辈子没有一升田的，用退回的谷洋置起家产了。给千斤闸压了几千年的农民，脊背刚刚直过来，很自然的会起一种错觉，有的认为地主阶级已经是死老虎了，不必再去打它；有的认为既然日子一天比一天好了，只要一直好下去，何必扯破了脸去搞——1927年血腥的记忆，仍然像魑魅般萦绕在他

们的潜意识中，他们害怕变天。

被拔了几根毛的地主当然是不甘心的，表面上他们是龟缩起来了，今年清明各屋场都没有敢召集村人去祠堂里训话——往年，地主训完话还得挑几个不顺眼的贫雇农装到麻袋里去吃棍子呢！收租子时候每年佃户们照例得送给“东家”一些农业副产品：蔬菜、茶叶、豆子和新鸡。今年，识时务的“东家”赶忙笑眯眯地拦住说：你们留着吃哒！特别狡猾的地主，为了封“灶王爷”们的嘴，还送礼给佃户或长工呢！开天辟地，只有佃户请东家的酒，而且得抬了轿子去接，接到就算人家赏了脸；今年，有的地主倒过来请佃户的客了。地主的想法是：这些搓泥巴的，一辈子没尝过油水，给他点甜头尝，还愁他不说我好话，听我使唤！

地主们的心坎上也挂着一个血淋淋的1927——地主复辟后屠杀农民大众。在他们的心中，想着历史是循环的，反正他们仍有还手的那一天。而且地主阶级并不是坐在那里等着“那一天”。面临着农民的翻身，他们作起最后的挣扎。

第一个具体和新炉村农民提起土改的，是县里来的电话公司工人。

重阳节前，新炉村淡赭色的田埂上出现了崭新的风景线：从村子北界，也就是回龙乡与石马乡交界的斑鸠河那岸，一根根的电线杆子，衬着黄古岭上的朵朵云彩，由地面拔起来了。

起先，河南岸新炉村的农民还以为是为了石桥村新开的合作分社装的；但是11月初的一天早晨，三四十根杆子，由四个穿制服的工人，押载到南岸来了。正在堤岸上砍柴的彭福全呆呆地望着撑篙的人在船缘上使力气，等渡船靠了岸，他忍不住跑下坡去问：“喂，他们来干吗哩啊？”没等摇义渡的回答，船头上一个穿蓝斜纹布制服，腰间口袋上绣着“电话公司”四个大字的工人就大声嚷：“干吗哩，搞土改咯，搞好土改大家农民好翻身哒！”随说着，那工人就招呼伙伴们来扛杆子了。

彭福全一听，他就直觉地放下了镰刀和筐子，赶快俯下身去，拣了两根杆子挑在肩上。随搬动，随听那个工人说：工作队在县里开完扩干会就下来了，公司限他们在八天内完成任务。

“你们一共四个吗？”彭福全关切地问。

“不，四个人算一组，”工人告诉他，“你们回龙乡不是九个村吗？四九三十六个人。”

彭福全听了很佩服，到底是县里来的工人，真有头绪，有办法。他又追问了一句：

“咯，电话通到哪点？”在彭福全，这话问得是很高明的。他虽然去过县城，送过公粮，每次都不上十天。他没摸过甚至没看见过电话机。

“通么？通区政府，通县土委会，通省土委会，一直通到毛主席那点。”说完，工人又眨眨眼，很同情这个农民弟兄说：“国民党二十年，电话没出过县城。现在我们也下乡来了，帮你们来消灭地主阶级。”

这段谈话使彭福全的脑子转了起来。等杆子都搬上了坡，看看工人们要动手了，他就拾起镰刀，背上筐，踱开了。一面沿着堤坡走，他一面寻思着。

下了七星岗，福全抬头朝彭朱家那边望望，一片疏林里翘出了彭二爹家的屋脊，宽大得正像彭二爹那副肥硕的肩膀。拱立在四周的是一簇半截土的破屋。彭福全从六岁便跟着爸爸住在那片土屋的一间里，有时候他也恨那个彭二爹，特别闻到灶房里炒菜的味，又是鱼又是肉，他彭福全一年到头吃的是苕丝。但是在彭福全看来，一切都出不了个“命”字，“命里有来一定有，命里无来不强求”。

像两个多月前，运转了，彭二爹无缘无故把他找去，硬“送”了他五斗七升田，而且是垅上好田，同时又要他搬到东家外院的瓦房里了。这叫做“时来运转”。

想到这里，彭福全心里觉得好像刚才做了一件对不起彭二爹的事，不该去搬那堆杆子了。彭福全想，无论彭二爹过去怎么样，解放以后，他蛮开通啰。而且，彭二爹说的对：凭他彭福全，没有了二爹，还吃谁的穿谁的呢？

湖南一般的自然村，都是若干屋场形成的。每个屋场里又都是一个或两个宗族形成的。小的屋场血统关系近到不出三五代，都是一座座小小的封建堡垒。新炉村便有：彭朱家，大屋罗和黎家园三个屋场，离堤不远，七星岗那边还有一条街镇。

彭福全回到彭朱家，少不得同人讲了上港装电线杆子的事。于是，一个屋场传一个屋场，太阳还没到中天，三个屋场都传遍这件事了。有些彭朱家上了年纪的农民，对于装电话并不感到兴奋，只是扶了根拐杖，站在屋场前节孝牌坊的石墩上望望就算了。这些年新鲜的事他们见过多了：联总美国鬼子来放过赈，蒋介石过过兵，从来新鲜的事并不一定就是好事！

但年轻力壮的小伙子和走得开的媳妇们可耐不住了。他们一个个，绕着丛林、坟地，沿着田埂上的小道，都奔向上港来。人群里，还撵着

一个裹了脚的“疯媛驰”。五十三岁了，她也拄着根棍子，撅着干瘪瘪的嘴，挤在人群里，眼睛直直地望着堤这边已经竖起了的几根杆子。

农民们一赶到，先是问长问短的。“疯媛驰”还用她那枯柴似的手，沿着一个工人的胳膊轻轻的抚摸了一下，伤感地说：“啊，你真像我那个德明。瞧，他也有你这么高的个子，我一点点养大了他！”说着，她呜咽起来了。

“哭哭啼啼的啦！留着那眼泪跟地主算账去！”工人一面掏了铅笔在本子上记些什么，一面对“疯媛驰”说。接着他又掉过脸来告诉大家，“一句话，安了电话好搞土改，搞了土改，农民朋友们好做主人。明白了吧？来，有力气的帮我们抬抬！”

经这么一提醒，农民动起手来了，这个刨坑，那个去扛漆了号码的杆子。在刨坑上农民内行得使电话工人们很佩服。

太阳向西边天际线落下去时，工作在这么多“零工”的帮忙下，是完成了。一根根电线杆子竖起来，细长苗条的影子便斜投在新割的稻田上了，直好像在田上面，打下了主人的印记。

那天看工人们栽完了电线杆子，“疯媛驰”便一路上扭着秧歌回到屋场。到了屋场，挨家叩门，门打开她就伸了脖子嚷：“嗨，土改了，土改了，我伢崽德明快回来了。”

嚷到彭新五的家里，他那怀了大肚子的老婆走出来叫猪，疯婆正撞了她个满怀，几乎撞倒在地上。她就一面招呼她男人披上军衣快去把“疯媛驰”的女儿春杏喊来，别出什么差池，一面把“疯媛驰”搀到她屋里矮凳上，趁着棉油灯的橙黄光亮，从三口火砖架起的灶上，拿下一只细长水壶，给她倒了杯开水，拉了她的手劝慰着说：

“疯媛驰，你崽不会回来了。新五不是说了吗？那不假。这么天天盼，你身子受不住。”

“不会回来了！”“疯媛驰”重复了一句，突然，尖声叫了一声，她由矮凳上晕倒下来了。

屋场里的农民黑压压地拥了进来，你一嘴我一嘴的。光林大叔捂着腮巴上疏疏朗朗几根胡子说：“还是莫提她伢崽阵亡了的话好，她的女儿春杏眼看也就嫁人家了，她这婆子活着还有么哩着落！”

正说着，肩头上垂了两条小辫的春杏从大屋罗赶来了。她一扑就扑到“疯媛驰”身上，“妈呀！妈呀！”地哭个好惨，新五一面喊他媳妇倒点开水，一面就把“疯媛驰”搀上床。

到了床上，“疯媛驰”的眼皮动了，裂出一道缝。她摸索着春杏的手说：“杏子，杏子，莫给他冲喜呀！新五管得有理，看谁敢糟蹋你！”春杏今年才十七，她在大屋罗一共当了五年小媳妇。男人二十二了，从小就瘦得像小鸡子，时常大口大口地吐血，男家近来要圆房。疯婆起初也没办法。她是养不活女儿才把她送出做小媳妇的。送去五年，人家要娶，有么哩话说！

从去年复员回来，彭新五专好管村里的事，他因此被选做小组长。他是和“疯媛驰”的儿子德明同一回被抓的丁，他知道德明打死了，听说德明的妹子要嫁一个痨病鬼，就硬去大屋罗阻止。男家对新五说：婚姻打消也可以，只要退我们五年的伙食！

“疯媛驰，春杏，你们想想，”新五瞪了眼睛嚷，“谁害的德明，还不是那个狗日的彭二虎！我还不也是他给送上炮眼的！没有共产党，我能有今天！共产党把我俘虏以后，没把我当俘虏，把我当作弟兄救了。我这回不跟彭二虎算账，我算白活了！”

春杏一只手擦着颊上的眼泪，一只手给“疯媛驰”捶着腿。她呆呆地望着两个人，脸上没有一点表情。

提起彭二虎来，全乡农民没有不怕，没有不恨的！平时他们只好叫他做彭二爹。日本人在的时候，他哥哥荫庭当伪乡长，替日本拉夫，找“花姑娘”，还收买几十口袋的铜板运到日本去。胜利后，荫庭为了汉奸“嫌疑”下了台，就把彭二虎换上了。当时据说是因为1928年，他当过清乡委员，但是解放以来，他一再否认，说都是他那个跑到台湾的旅长侄子背着他活动出来的，事后推也推辞不了。无论如何，彭二虎足足当了四年回龙乡的土皇帝，替蒋介石逼丁逼税。

解放以后，彭二虎滚下台了。起初，仗着他耳朵多，爪牙多，还神气过一阵，假装忠厚长者的口吻，公开对农民恫吓说：我们是家门，做事留线，日后好见面！近几个月来，彭天保见了从前的和现在的佃户长工就送礼。他的家好像什么魔术师的礼帽：抽出不晓得多少条绿色的美国毯子，都是“剩余物资”！八月节，他还请佃户们吃了回酒！

当新五大声骂着彭二虎的时候，屋子里的农民们你看看我，我看看你，都不吱声。有的觉得双减时候，他东西拿出来，在地方上又不大露面了，见人低三下四的，何必再去算旧账？也有的知道彭二虎手里还有硬家伙，他耳目又多，怕吱声惹出事来。于是，只听见春杏给“疯媛驰”捶腿的咚咚声音。

屋场里有了“秀才”称号的朱耀先发言了。像他给人看八字一样，话没出来前先得咳嗽一声，然后轻轻搔搔脑袋上的疤，表示很慎重，很用心思。

“回龙乡马上就要土改了。”语气间很带点权威，这是因为今年春天，他曾去县里开过一次农民代表会议，回来以后，非常神气。遇到谁家有婚丧大事，他还常把农代会的红绸条，挂在胸前，走路摇摆得活像一头水牯。“土改的时候，谁该怎么办，就得怎么办。毛主席公公道道，毫厘不爽的。”接着，嗓子里又重重咳了一声。“彭大爹也罢，彭二爹也罢，他们的人就在我们屋场里，还怕他插翅飞走！他们的田地没有腿，更跑不了啦，动么哩火气！”

农民们本来勇气就不够，顾虑多，听“秀才”这么一说，更觉得多一事不如少一事了，于是，大家交谈起来，大致说，电线杆子没几天就安起了，率性等几天再算账吧。

新五记起了前些日子乡主席古玉章传达区委书记关于“土改准备工作”中的一段重要指示：在群众没有充分发动起来以前，地主是斗不倒的。估计斗不倒，就不要打草惊蛇。他决定耐心地等群众觉悟了。

自从新炉村栽下了电线杆子，新炉村的农民和地主心坎上也都栽下了新的问号。那问号，随着一根根竖起的电线杆子变得更大，更逼近，更逼真。

因为回龙乡的乡政府是在彭家祠堂里，新炉村的村主任彭玉堂也是彭朱家屋场的人，电话的路线显然是以彭朱家为中心，一根一根的电线杆子笔直向彭朱家奔来。屋场里，各阶层都骚动起来了。

彭玉堂在安电线杆子的第二天早晨，便在祠堂的侧院召集了一个农会小组长会，报告区政府有指示来，估计土改工作队同志们大约11月25号左右可以到达，要各小组长在这十几天里注意追谣，反分散，反破坏，也即是提高警觉，好好监视地主们的行动。同时，如果贫雇农向恶霸地主作斗争时有顾虑，甚至受恶霸地主们的骗，绝不可以责备农民，打击农民，因为农民受了几千年的压迫蒙蔽，不是一下子可以觉醒过来的，而应该利用一切机会去启发群众的阶级觉悟。只有群众觉悟了，站起来了，反霸，追谣，镇压地主的不法行为才能做得成功。

地主方面也意识到眼前到来的土地改革这一关，没有双减退押那么好过了。尽管从报纸和书册上，地主们知道人民要消灭的仅仅是地主这个阶级，并不是要消灭他们的肉体；并不是把田没收后，不给他们一条

活路，而是要分给他们与农民同样的一份，但是作威作福几千年的地主阶级是不甘心接受那“同样的一份”的，对于在农村里一向称孤道寡的土皇帝——恶霸地主，那尤其是不可想象的事。

听说彭新五要向他算账，彭天保就把一脸的横肉搭拉下来了，三楞眼一瞪，水烟袋往硬木八仙桌的桌边一顿，对他的小老婆骂道：“现在乌龟甲鱼都出哒呢，活了四十六岁，我给癞狗咬了一口！”

彭二虎的书房充满了雅气，一墙的字画，一箱箱的古版书。本来挂在挂钟下面那幅“欢迎国军莅临”的团体照片已摘下去了，不然，还可以看见彭二虎如何威风地坐在国民党一〇七师师长旁边的神气。那样的事情总归是过去了，但是在彭二虎还是万分依恋的。

他背着双手踱出了书房，在大厅里一面踱着，一面寻思着。大厅中间供着彭天保的“历代始太高曾祖”的牌位，上溯直达廿代；一边题着：“序昭穆如闻如见”，一边是“荐枣栗必敬必恭”；两边柱子上挂着“阡邑绅士拜题”的对联，两块细长、黑漆金字的长匾上刻着：“先代有贻谋肇基端由勤俭，后人宜继续务本只在读耕”。正梁上还悬着一块横匾，刻着斗大的“宝婺光闾”四个字。

彭天保若有所思地望着祖先牌位。他伸手把香炉里未燃尽的香摆正了一下，直好像在“先代”面前请教对付眼前土改的高明计谋。

天井那面有人唧唧地叩着木鱼，声音单调而且疾速。彭二虎的大老婆又在念经了。

“二爹，吃饭了！”正想着，门槛外站着一个脸色苍白的女孩子，年纪约摸十五六岁。

彭天保不耐烦地哼了一声。忽然，他抬起头来喊：

“月莲！”等女孩子回过头来后，问：“我待你怎么样？”

已经退下台阶的月莲给他问了个楞。她也觉出近来整个屋场的空气是不同往常了。前天替彭天保的大老婆去七星岗上一趟街，看见井边、田埂上、每家屋角都有两三个人在议论着。墙上还新贴了许多标语和漫画——一幅画的是个瘦弱的种田人，背上骑着个肥大的“东家”。她已经侍候彭二爹的大太太有八年了，她没偷过一针一线，但是彭二爹的大老婆和小老婆全打过她——有一回腊月天，为了小老婆的娃娃自己跌下了床，还把她衣服脱光了打过呢！比起她们来，彭二爹的确算好人了，顶多踢她一脚半脚的。想到这里，她就回答说：“二爹待我蛮好！”说完，她那对被灶房的柴烟熏得爬满了红丝的眼睛朝彭天保望了一下，好像这

么说过奖了他，也委屈了自己似的。

彭家的饭是分两处开。彭天保和小老婆带着一个小娃子是在书房里吃的。饭后，彭天保没有午睡。他跟他那小老婆两个倒扣上了门，咕咚咕咚地收拾起箱笼来。

到傍晚，彭天保才打开门踱出来。

整个下午，福全都在外院舂米。沿着院墙，两头黄牛在啮草，一条小牛犊拼命用嘴巴追着一条母牛，哐着奶头。

福全一面舂米，一面心里为一个难题困惑着：彭二爹究竟是他的仇人还是恩人？彭新五对他讲了许多彭二爹的坏话，解放以前的彭二爹当然是刀子一样地狠了。但是如今彭二爹把其余四个长工全散了，单单留了他一个，对他又这么“厚道”，如果真把彭二爹消灭掉，他这份长工不是也消灭光了吗，他还吃什么？彭二爹几次对他说：“土改是什么？土改就是共产。今年共地主，明年共富农，后年共中农，五年之内，大家都共光了算数！”其实，那话他听了倒没觉得有什么可怕的。他一共只有一条破棉絮——对了，别忘了上个月里彭二爹“送”了他五斗七升田呢！彭二爹那晚上在大厅里指着祖宗牌位对他说，都是彭家人，谁能照顾谁，就照顾谁，分田也不能分到外族去。

看见福全在舂米，彭二虎很不高兴。

“别舂了！”彭天保吩咐，“舂好了不一定给谁吃呢！”从新炉村装了电线杆子那天起，彭二虎一直唱着这个论调，他甚而告诉福全：牛只许喂草，不许喂豆子。

吩咐完了，彭天保背着双手，推开西墙一道便门，到他哥哥彭荫庭屋里去了。

接连几天，尽管村主任和各小组长们挨户宣传大家应该努力生产，热烈欢迎土改，新炉村各阶层却还是被谣言骚动得人心惶惶的。

七星岗的街上，千祥百货店的老板周祥瑞在农村没有半斗田，他竟也倚着柜台对熟主顾说：“湘潭的货一时先不进来了，谁知道这回土改都改些什么人！”街上的布铺、西药房的老板神气之间都表现出些不安定。有人甚至说，砖窑的烟筒里最近两三天烟愈冒愈稀了。

谣言究竟是由农村传到街上去的，还是由街上传下来的，谁也不敢说。农民挑了一箩箩的蔬菜鸡蛋到镇上去，商人们见了农民就问长问短；傍晚农民又挑着一箩箩的谣言回来。有的回来就去问村主任：是不是结了婚的不分田了？又有的问：是不是结了婚的才有资格分田？闹

得甚至有一斗两斗田的农民心里也起着疙疸。

在朱耀先家里当了三个月奶妈的涂玉贞，忽然她婆婆来要替她辞工不干了。她婆婆一定要把她送回娘家去，因为听说土改工作队一来，便吸收妇女到东北去，她丈夫又在湖上摇船，涂玉贞的婆婆说：“我可担不起那责任！”

东北！造谣的家伙们好像特别看上了这个地方。多少谣言都是针对东北的。东北掉了原子弹。东北进了美国兵。地主们似乎希望用东北的灾难来做他们的救星！

这期间，彭新五还收到了一个小包包，大约是隔着墙丢过来的。打开一看，一团棉花里包着一张字条，写着：“姓彭的不愿砍姓彭的头！少积极些！”

谣言像蚊子般到处嗡嗡地飞，也像蚊子般不好扑灭。各小组组长听见了谣言就追根。新五一家家地追，从这个屋场追到那个屋场，有时候甚至追到邻村去。有的农民，特别是上年纪怕事的妇女，摇摇头说“不知道”，也有的说：“记不清谁说的了。”

为了追谣，乡主席隔天就召集一次反谣言反攻势的汇报。一定要抓到人证物证才好把坏人押起来。从这些汇报中间，终于抓到了些线索。大屋罗的罗培荣和彭朱家的彭天保的家里是两个主要的谣言工厂。罗培荣骂屋场里的积极分子作“新恶霸”，又说政府新从衡阳运来的牛痘种里有毒。彭天保把农会贴在他家大门外雕花墙上的标语“谁种谁收”硬给撕下来了。街上发现一张上面歪歪斜斜涂了“愈改愈穷”四个字的钞票，查到协昌洋货店那里，追出来也是彭天保干的。

11月23日的上午，村主任正在和小组长开会商议去搜查彭天保和罗培荣的家，并审讯这三个恶霸的时候，彭天保的大老婆满脸的眼泪，跺脚捶胸地到乡政府来了。

“这个贼男人！”她边哭边骂着。“自从他娶了那个小的，我就没和他讲过话。昨晚上他的灯总是亮着。今天早上月莲去打扫，才发觉他干的鬼事！他带了一只皮箱——里面还有我的陪嫁，又带了那个骚女人和那个小野种跑了！”

开着会的人们听了都站起脚来。新五气得马上要去追。

村主席一面派人同彭二虎的大老婆去彭家搜查，一面自己赶紧向乡主席报告去了。

那天中午，村主任奉了乡主席转来的区政府命令，将罗培荣和彭荫

庭同时逮捕了。两个不法地主由三个小组长押着，新五还揣了支手枪，沿着田埂便道向斑鸠河北岸的区政府出发了。

电线杆子已经全部完成。初冬的风在微颤的电线上吹起委婉细柔的声音，像是在吐诉着几千年来农民的遭际，又像是在歌颂着回龙乡土地的肥沃，农民的辛勤。

这时，距工作队到达的日期还有两天了。

2. ON THE THRESHOLD TO ACTION

Though the Peng household's ancestral temple had only been built 90 years ago in the second year of *Tung Chih*, some of the yew trees which grew in a half circle in front of it were said to have a history of over 500 years. Yet it is certain that neither trees nor temple had ever witnessed a more significant event than that which took place on November 26, 1950.

It was an event that shattered the traditions enshrined in this fortress of feudal superstition. The people gathered in their hundreds on the open space in front of the stone temple steps for the first mass meeting of Huilung *hsiang's* land reform.

On the order of the *hsiang* government on the day before the Work Team's arrival, a platform had been built on the terrace of the temple and two national flags were draped over the imposing entrance. They hid completely the wide-eyed door gods, Chun Chung and Ching Teh, whose images decorated the two leaves of the gate, but incongruously, as if reminding the peasants of the past. There could be seen behind the platform the cruelly spiked railing, that had been used by the landlords to prevent imprisoned peasants from escaping.

Framed by the flags was a picture of Chairman Mao Tse-tung. His thoughtful, kindly face smiled down at the peasants gathered on the ground below.

Two carved walls flanked the temple. One bore the inscription: "The Gate of Propitious Ceremony", the other "The Road to Righteousness". Now they bore signs indicating the seats of the Peasants' Association officers and the representatives of the Handicraft Workers' Union and the Chamber of Commerce.

On the jutting eaves of the temple roof, rows of gargoyles that appeared unconcerned, gazing with lifted heads at the wandering

autumn clouds. The two stone lions guarding the temple entrance were less stoic. Their gaping mouths and bared teeth betrayed emotion, but it was hard to say whether a frown or a smile was intended.

The meeting was scheduled to start at ten. From early in the morning the representatives, one from every household of all the nine Huilung *hsiang* villages, had started for the *hsiang* government in Hsinlu Village along the field-paths spread almost as bewilderingly and intricately, as the nervous system of a human body. Some carried small paper flags bearing the characters "Welcome, Comrades of the Land Reform Work Team!". Representatives of the street near the Seven Star Slope arrived. Some of them had their heads stuffed full of doubts and problems. They engaged in whispered tête-a-tête or stood wordlessly by, their hands tucked in their sleeves.

A cheerful note was struck by the handicraft workers and pedlars from the street, who entered the meeting place in great jubilation beating side-drums. But, in general, there was an atmosphere of tension. It was, of course, natural that a person like Li Chao-chu from the Li Garden, a notorious landlord, should keep his hands in his sleeves and stand trembling in a corner by himself, like a prisoner awaiting the final verdict. But there was a section of the peasants who had been confused by the landlord's rumours and who, although they owned only a *sheng* or a half *tou* of land, were apprehensive at the thought of "redistribution on the spot" which, they had been whispered, might be the decision of the day's meeting. Hu Pin-tsan, who owned a department store on the street, ostentatiously put on a jacket that was almost in rags. Ever since the arrival of the Work Team, he had refused to show up behind the counter of his own store.

The "Scholar" Chu Yao-hsien was assailed by the most painful and complex emotions. This was a big event, and, to live up to it, he once more pinned on his gown the ever faithful red silk insignia which had been given him when he once attended a meeting of peasant delegates. Now he jostled his way back and forth through the crowd

with an air of solemn importance, as if he were presiding over the whole affair. Still, he could not get away from the fact that only a year ago he was known to have hired two farmhands and lent out money at usurious interest. He was dimly aware of the fact that this was not going to be anything like the "rent reduction and deposit refund" campaign. His uneasiness was not lessened when he learnt that the night before the Work Team had gathered together a number of peasants for a consultation which lasted till far into the night and he had not been invited. Outwardly he assumed an appropriately joyful expression. But deep down within him he was afraid and an unaccountable feeling of jealousy kept gnawing at his heart.

At quarter past ten, *hsiang* Chairman Ku Yu-chang, clad in a new blue-cloth jacket, took his place on the platform. Already there were the Secretary of the Communist Party District Branch, Hsiung Peng, the chairmen of the Handicraft Workers' Union, the Peasants' Association and the Chambers of Commerce, Headmaster Hsu Tzu-chiang of the primary school at the Seven Star Slope and some of the comrades of the Work Team. Ku Yu-chang called the meeting to order and the hum of discussion and gossip died down. He announced the three-fold purpose of the meeting: To welcome the Work Team comrades who had just arrived after half a month of anxious waiting on the part of all the peasants of Huilung *hsiang*; to hear the report on current affairs by Hsiung Peng, the District Party Secretary, so that a final end could be put to rumours and scandals; and to ask Comrade Chao Chieh-min of the Work Team to explain the People's Government's policy on agrarian reform.

Hsiung Peng rose to his feet. A native of Hsiangyin and short in stature, he was ordinarily soft-spoken, but a booming voice seemed to come to him naturally when he spoke at a mass meeting.

"Peasant Comrades: We're going to carry out the land reform! All reforms bring something new and I know that it is only natural that we should have some distrust for new things with which we are at first not very familiar. In this case, however, distrust is neither

necessary nor justified. But none should blame a peasant for such an attitude. For thousands of years a cruel and greedy feudal landownership system has robbed you of your livelihood and of a chance to get an education. Now taking advantage of your inability to read the newspapers and get to know the People's Government policy better, the landlords are trying to deceive you, to disturb your peace of mind by spreading the most outrageous rumours, in order to prevent you from carrying out the land reform properly.

"I know that they are spreading the story that Chiang Kai-shek is coming back. But what a foolish thing to imagine! Comrades! The KMT that sucked our blood and stole our children for over 20 years was kicked into the sea by our People's Army over a year ago. We have wiped out that bandit army of eight million men. Now there is not one single KMT soldier left anywhere on our mainland from the Northeast to Hainan, from Shanghai to Sinkiang. Chiang Kai-shek with some of his henchmen are still on Taiwan, but who can doubt that their days are numbered? Would they dare come back on the mainland again? Then we will have the pleasure of finishing them off even more quickly!" The peasants laughed. They remembered the sorry sight of the KMT army in retreat.

Hsiung Peng dealt in forthright terms with all the rumours that had spread around the countryside like a rash. He mentioned the one about the Americans rushing help to Chiang. But hadn't the Americans helped Chiang before? And the Americans themselves? Our people's volunteers and the Korean People's Army who had given the American imperialists a thorough beating in Korea could say exactly how much American aid to Chiang was worth!

"The landlords say that Chiang Kai-shek has returned to Hankow," continued Hsiung Peng, "but if he couldn't hold Nanking with eight million men how could he get to Hankow with his remnants now while his American friends are taking a beating in Korea?"

The peasants laughed again, for the logic was unassailable.

"Therefore, when we carry through this land reform, let us do it

with a perfectly clear mind. The landlords, too, had better give up their idle dreams. Your Chiang Kai-shek has been kicked out never to return. Lay down your weapons and surrender to the people. It will be better for you. And you peasant comrades! Now that you are masters of the situation, what do you have to fear?' The peasants thundered out their applause as Hsiung Peng sat down. Hsin-wu thrust his arm up and springing to his feet shouted vigorously: "Down with the feudal landlord class!" and the peasants in unison echoed his shout.

The few landlords in the crowds already felt isolated. These thoughts were hard to take. But they tried to clap their hands too. Only somehow their palms just would not meet together.

Next came Comrade Chao of the Work Team. He sprang up with the litheness of a panther, a mature down-to-earth peasant cadre. He travelled much and travelled light. A fountain pen and a toothbrush showed above the breast pocket of his worn gray cadre's uniform. His face was deeply tanned and he had a scar on his forehead—a souvenir of the days of Japanese aggression. He had been wounded in a battle while serving as vice-magistrate in Wutai, the Shansi guerrilla area, when he was only 23 years old.

"Comrades! I am a native of Shansi. So, perhaps you will not understand everything I say. I'll try to say each word slowly and clearly. If you still cannot understand, well then, don't hesitate to ask questions later. My comrades of the Work Team and I are going to be around here to work for your full liberation with you every day until the land reform in Huilung *hsiang* is completed. We'll try to make plain all the things that perhaps you cannot understand now.

"Peasant comrades! You have cultivated the land all your lives. It is clearer to you than to anyone else how necessary it is to give the land to the tiller. The feudal land system is cruel and outrageous beyond description. Those who tilled the land got nothing in return. Everything went to the landlord sitting idly and in luxury at home. Is it any wonder then that production was low? And prices high?

"Take cotton for instance, a thing very much needed in industry.

Since we did not produce sufficient cotton, industry was not able to develop. And so cloth was expensive and we have always had to go in rags. The business of merchants and makers of cloth was not good because it had to depend only on a very small number of rich customers. After land reform with the peasants producing much more cotton, industry will prosper; so will traders because they will have the prosperous peasant masses as their customers."

Many a head in the crowd nodded assent.

"When one is struggling day and night to get just enough to eat, there is little time left to think about getting educated. Eighty per cent of our people are peasants and most of them are illiterate. They can never become truly and fully masters of the country if they still live under feudal exploitation. If we do not rid ourselves of the feudal land system, how could we think of building a really free, strong and prosperous country?

"This feudal land ownership lies at the root of our nation's troubles. It made us poor, backward and weak, an easy prey for the imperialists. Now that must all be ended forever.

"Ever since 1927 land reform has gone on in the liberated areas north and south of the Yangtse River. All the experience we gained during those 23 years as to what is the right way and what the wrong way is written down in *The Agrarian Reform Law* which our Central People's Government adopted this year. This is why we must follow *The Agrarian Reform Law* in our work of liberation. Land reform can justly be called an earth-shaking event. Those who formerly ruled in the countryside, the landlord class who have sat on the people's back for thousands of years, now must submit to the people's democratic dictatorship—the people's will. Those who were formerly ruled, the farmhands and the poor peasants, the most exploited groups, will now move up to the places of power. Land reform is aimed at bettering their life and raising their authority. That is what we mean by liberation.

"Everyone who supports land reform must, therefore, first learn to

respect the peasants' opinions and consider their interests. The unity among farmhands, the poor and middle peasants, during and after the period of the land reform, is the best protection to the people's democratic dictatorship in the countryside. The farmhands and the poor peasants especially must be the backbone of the whole revolution in the countryside. They must stand up!

"Advance boldly! Mighty forces are backing you up—the workers, the Communist Party, the People's Army, the People's Government. All are ready to fight for you, ready to aid you! And Chairman Mao Tse-tung is leading you."

This much made clear, Chao Chieh-min went on to describe various aspects of the land reform work on the basis of opinions that he and the village chairman and Peasants' Association officers had exchanged on the night before. He pointed out with special emphasis that People's Army men, dependents of revolutionary martyrs, workers, employees, professional people, pedlars and others who do not work in the fields but have other occupations, or those who lack labour power, shall not be classified as landlords if they rent out only small portions of land. He also explained from the point of view of the poor peasants why it is still necessary to preserve the rich peasant economy. This, he showed, would give a better start to the work of increasing production, protect better the interests of the middle peasants, isolate the landlord class, the main enemy, and thereby the land reform would proceed more smoothly.

He explained simply the nature of the new democratic revolution. Touching on how the free flow of goods between the city and the countryside would be advantageous to the peasants, he explained why industry and trade must be protected.

To those industrialists and merchants who were concurrently landlords he had this to say: Concentrate on developing your business in the city, and do not go on exploiting the peasants by monopolising land, houses or farm implements. He reminded them again: "In the past, landlords and rich peasants were your only customers. The

landlord class occupies less than 10 per cent of the entire population. When the peasants really start buying you'll see which proves the bigger customer.'

To the landlords he spoke up again in a cold, determined voice. First he made it clear that landlords would be deprived of their feudal land holdings and abolished as a social class, but they would not be physically molested. However, he gave the following warning:

"Two ways are open to you. One leads to a bright future and that is: repent and reform. Guard well your land, draught animals, farm implements, surplus foodstuffs and houses and hand over everything according to regulations when the moment for confiscation comes. Then the peasants will certainly treat you leniently. You'll be given a similar share of land and housing so that you too will have a chance to reform through actually taking part in labour.

The other way is one which can only end badly for you. That is the way of Peng Yin-ting and Lo Pei-jung. They plotted and created disturbances. Now they are awaiting trial. Landlords of this type can never escape from the people's long arm of justice...."

Before he stood up to speak, Chao Chieh-min had been somewhat uneasy about his Shansi accent. But he had been in Hunan ever since the summer of 1949 when he arrived together with the Liberation Army. His northern brogue had mellowed. Judging from the smiles on the faces of the peasants and the relief on the faces of the businessmen from the Seven Star Slope, undoubtedly the audience had grasped the essence of his speech.

The next to speak was Pan Chih-chao, Chairman of the Huilung *hsiang* Handicraft Workers' Union. The gist of his speech was that workers and peasants are comrades working for the same cause. The workers would lend whole-hearted support to the peasants in their struggle for freedom. Only when the peasants have been fully emancipated can a new China based on the union between workers and peasants be firmly established.

By profession, Pan Chih-chao was a blacksmith. He offered, by

way of concrete help, to speed up the making of weapons for the militia during the land reform, and make more improved farm tools for the emancipated peasants.

Next came the turn of Yen Shu-cheng, Chairman of the Huilung *hsiang* Peasants' Association, who spoke on behalf of all the peasants. He called to them all to rise up in good order and in accordance with the policy and regulations laid down by the Central People's Government, take back from the feudal landlords the land they had tilled for so many centuries. Then he too stressed that the industrial and commercial enterprises run by the landlords and the land and other properties used directly by landlords for the operation of industries and trades should not be touched.

Old Tu Yu-chun stood up. He was Chairman of the Chamber of Commerce and chief proprietor of the Kaikuo Herbalist Shop. To show proper regard for the occasion, he respectfully took off his horn-rimmed spectacles. Then he started to speak with a faint trace of embarrassment.

"During the last few days we people on the street have been unduly alarmed. That land reform means to help develop the rural economy is now perfectly clear, but some of us merchants insisted on getting the wind up. Some had even refused to buy in any more goods." At this, Chou Jui-hsiang of Chien Hsiang Department Store felt himself blushing so violently that his ears also turned red.

"What the other comrades have just said came to us as a great relief," he continued. "It was as though we merchants and industrialists were made to take some anti-toxin which neutralised the poison rankling inside us.

"I, too, felt some poison in me. I have a piece of irrigated land near the Big Graveyard, valued at seven *tou* and two *sheng*. Let me be honest. I got all my money by exploiting the labour of the peasants. My two sons are both doing revolutionary work in Changsha. In some way, this is a repayment to the people. Did I not use the tainted money I got from the peasants to pay for their education? Since now

the peasants are good enough not to touch my herbalist business, the greater part of my property, so that I can go on supporting a family of seven and contribute what little I can to the prosperity of Huilung *hsiang*, I in my turn will of course follow the law of the government too. Tomorrow morning I am going to turn over to the *hsiang* government the deeds of that piece of land together with a complete inventory of other property there and farm implements."

Tu Yu-chun's candid remark won him a prolonged burst of applause.

At noon the meeting came to an end. All along the field path people went talking and debating, quite unlike the silent manner in which they had come.

Because he had not been allowed to get up and speak, the "Scholar" Chu Yao-hsien was feeling very much piqued. Mixing with the home-going crowd, he tried to crack jokes.

"One can see Comrade Chao is resourceful," he said. "Look at the way he extolled the people's long arm of justice by mentioning only Peng Yin-ting and Lo Pei-jung. But did he say anything about the one that had already wriggled out of legal punishment, namely, Peng the Second Tiger?"

This was overheard by Hsin-wu, who threw a scornful glance at him and said, "Don't you worry. We'll catch him sometime and then you'll see."

Comrade Chao Chieh-min, the leader of the Work Team, insisted on the Team finishing up all the meetings devoted to investigating the *hsiang* as a whole, within two days, so that the cadres could go out quickly to the individual villages and begin the actual work of land reform. These meetings would also serve to give the various circles in Huilung *hsiang* a clearer conception of the government's policy.

First came the meeting of cadres. Ten Work Team members sat in a row on a long bench underneath an ancient memorial tablet which said "The Roots Go Deep" and scribbled hurriedly in their notebooks while listening to *hsiang* Chairman Ku Yu-chang explaining the local

set-up. They wrote:

"Human geography: Huilung *hsiang* has altogether 2,127 households, a population of 6,989. Nine villages. Created through the merging of the Fifth, Sixth and Seventh *pao* under the KMT regime. 1,527 *tan* of irrigated rice fields. 470 *tan* of dry land, largely planted with cotton. Land ownership quite concentrated, e.g., Lo Pei-jung of Big House Lo alone owns 90 *tan* of land.

"Hemmed in on three sides by rivers. Pigeon River to the north. Lienchiang to the west. Shaho to the south. All three empty into Lake Tungting. Frequent floods between spring and summer. Land near the rivers suffers most.

"History: This *hsiang* was under Japanese occupation during the War of Resistance and suffered a lot of damage. The whole street near the Seven Star Slope was burnt down. Many peasants killed.

"Political analysis: This *hsiang* was on the outskirts of the old Soviet zone during the Great Revolution. Hence the older peasants had considerable experience in organising. For this reason, during the 22 years of the KMT regime, the landlords were particularly cruel. The *hsiang* has seven or eight despotic landlords. Worst of the lot are the two Pengs in Hsinlu Village.

"'The Circle'—a reactionary, superstitious society, has a good deal of influence locally. Membership in this *hsiang* reached around 560 at the time the Liberation Army crossed the Yangtse. About 80 per cent are deluded farmhands and poor peasants. But most of them had left the organisation when the 'rent reduction and deposit refund' campaign went into force. 'Master' of the Circle, Tan Ching-wu, of Shuangfeng Village, plotted insurrection at beginning of year and was shot. The organisation itself still going on underground. Needs close watching.

"The current *hsiang* government was elected during the 'rent reduction and deposit refund' period and has four *hsiang* cadres. Among them, three are poor peasants or farmhands. One is a middle peasant. Among the nine village cadres, six are poor peasants or

farmhands. Three are middle peasants. "The whole *hsiang* has 46 Communist Party and New Democratic Youth League members. Party headquarters kept underground successfully after 1927. Since liberation, Party and League members have been very influential in all kinds of work—aiding the front, campaigning for the rent reduction etc., etc. ...e.g. Peng Hsin-wu of Hsinlu Village has been consistently ahead of the others in struggling against reactionary elements ever since he was first won over."

When the Chairman finished reporting, the members of the Work Team raised several questions. Among them was Comrade Lu Yang, who was assigned to go to Hsinlu Village. A native of Liuyang county and originally a schoolmaster, Comrade Lu came from a tenant-middle-peasant family and had four months of training after the liberation of Hunan in the Construction Academy, a school in Hsiangtan for cadres. He had taken part in the rent reduction campaign and was considered competent. However, the prospect of having to tackle such a complex set-up as Hsinlu Village disturbed him. Seven Star Slope with its shops and workshops was a complicating factor. and then "the most reactionary landlords" were Hsinlu Village inhabitants. Hence he kept asking about this and that until finally Chao Chieh-min sensibly suggested: "Suppose we three, you and old Peng, the Village Chairman, and myself go into the problems connected with Hsinlu Village some time later."

After supper the meeting went on under a brilliant gas lamp hung from the main beam of the temple. Chairman Yen of the Peasants' Association was reporting.

"The Huilung *hsiang* Peasants' Association," he said, "was first organised during the 'rent reduction and deposit refund' campaign. Therefore there is a relatively high percentage of middle peasants in it. However, no definite figures can be given until a final differentiation of class status has been made. The Association has three divisions, each comprising three villages, Hsinlu, Shih-chiao and Yunhu, for instance, form the First Division. Total membership—957.

But this is not a completely reliable guide to the degree of class consciousness of the peasants since many of the members only enrolled when Association officers went to their homes to canvass. Five hundred and thirty four of the members are men; 423 are women. At present the Association has 15 officers working. Eight of them are farmhands or poor peasants. Seven are middle peasants. You cadres must know our Association well because it is the mass organisation which enables the peasants to protect their own interests both during and after the land reform. We on our part will work in close contact with the Peasants' Representative Conference, the people's local government authority. It is through our Association that the peasants heighten their own class consciousness, develop the tradition of collective work and pooling of knowledge, so as to cope with the various kinds of constructive work. It is through the Conference that the peasants organise mutual help activities and cooperation to develop agriculture and improve their living standards. This is especially important work.

"Since the present Huilung *hsiang* Peasants' Association is the product of the 'rent reduction and deposit refund' campaign, a campaign carried out on a narrower mass basis, it cannot yet shoulder the responsibility of starting such a gigantic task as land reform. Therefore we must learn how to strengthen and expand it in the process of struggling, rid it of landlords and rich peasants or their agents who might have infiltrated into it, educate the politically backward elements and promote new active members from among the peasants."

Next morning even before the cadres had had time to wash their faces, people began to arrive. The meeting was a joint one held by the Work Team and local intellectuals. Chao Chieh-min explained the proper attitude which the intellectuals should have towards land reform and the government's policy towards the intellectuals as laid down in *The Agrarian Reform Law*. Then they began discussing how the Huilung *hsiang* intellectuals could best cooperate with the Work

Team in helping the peasants to liberate themselves.

All the schoolmasters spoke. Some admitted that they had a landlord background but that in the course of political studies they had come to realise the justness and absolute necessity of land reform. Hence they were prepared to side resolutely with the peasants in abolishing the class to which they themselves had belonged. Some promised to take on the job of writing "blackboard newspapers" and making posters. Some said they would do propaganda work on current affairs. Others agreed to help publicise what the Work Team was doing and its policies. Personnel from the Seven Star Slope Primary School offered to get up a dramatic group and use plays to educate the peasants. All promised to study *The Agrarian Reform Law* and the Documents on Rural Class Status Differentiation promulgated by the Central People's Government. Preparations were also made to open night schools in which the peasants would be taught how to distinguish between the different classes and the various groups of peasants, how to assess the various degrees of exploitation.

Lu Yang listened to the opinions which these schoolmasters expressed and then started putting in order the notes he had taken the night before. The report made by the Village Chairman seemed to him especially significant. In his notebook he listed the names of the peasants as nearly as could be judged according to their status, then the landlords. He starred the names of all those who were concurrently industrialists or merchants, and queried those who might be rich peasants or small land lessors. On another page he wrote out a whole list of names of people who were without doubt farmhands or poor peasants. Constantly in his mind was the instruction given by the Secretary of the County Committee of the Communist Party at a cadre meeting: "In searching activists, pick the ones who have always been the poorest, the most exploited and worked the hardest, and watch the landlords vigilantly."

Now the job before Lu Yang was perfectly plain. He must arouse and organise the poorest, the most exploited and at the same time the

most hardworking peasants and watch closely the most stubborn, most reactionary and black-hearted landlords.

And he knew the two tasks were closely inter-linked. You cannot watch the landlords effectively unless the peasants have been awakened.

贰 回龙乡：一幅立体地图

拱围着彭氏家祠作新月形的枞树，有的据说已经五百多年了，但是这座封建堡垒本身却是在同治二年和祠堂前面那块坟场同时修起的。在它九十来年的寿命中，最辉煌，最具历史意义的，无疑的是1950年11月26日那天——尽管这日子的举动和这建筑本来的宗旨有多么不调和。

农商联合大会——回龙乡土地改革的第一个群众大会，是在祠堂石阶前面的广场上举行的。

工作队下来的头一天，乡政府使用木板在石阶上搭起一座台。台的背面是钉满了的铁蒺藜栅栏（那原是为了防备囚在里面的农民逃跑的）。祠堂高峻的大门上，交叉起五星国旗——粗壮的旗杆刚好从作为门环的两只青铜龙头的鼻梁上面斜过去，原来贴在大门上的瞪大了眼睛的秦琼和敬德，整个被掩在旗子下面了。毛主席庄严祥和的画像，由两旗之间，向着广场和广场后面的整个回龙乡的农民们关切和祥地微笑着。祠堂左边的“礼门”和右边的“义路”的雕墙上各贴了“农民协会委员席”和“手工业工会及商会代表席”的条子。

大会在10点开。清早，全乡九个村子以户为单位派出的代表便沿了错综如神经系统的田埂，向新炉村的乡政府集合。有的手里还打着纸糊的小旗：“欢迎土改工作队同志！”七星岗街上，商会代表也来了。到会的人们，有的似乎脑袋里装着个问号，那些人，不是在交头接耳地打听，便是揣了手站在那里，一声也不响。只有街上的手工业工人和小贩是打着锣鼓，兴高采烈地走进会场。

会场的空气是紧张的。有充分资格被划为地主的，像黎家园的黎朝初，自然把手揣在衣袖筒里，撅着他那酒糟鼻子，哆哆嗦嗦地站在广场的一角，好像等着宣判的囚犯一样。但上了地主谣言的当的，即使仅有一升半斗田，竟也担心今天在会上“当场摊派”。街上开百货店的胡斌灿特意穿了一件很破的短衫。工作队一到，他就一直没敢在柜台露面。

表情很复杂的，倒是朱耀先。这样大的日子，他自然又把去县里开农代会时的红绸条子挂在衫襟上了。在人群里像煞有介事地跑来跑去，直像在主持着会场。但是他究竟是在一年前还雇过两个长工，又放过光洋的，他心里觉得这回跟秋征不是一回事——尤其工作队昨晚上召集一

些农民谈话，听说一直谈到深更半夜，然而并没有找他。外表上，朱耀先像是很喜欢，然而那喜欢很不实在；骨子里他是很怕，同时，又酸溜溜的。

10点过1刻，台上穿了一件新青布褂的乡长古玉章走到台口上了。台上还坐着区委，手工业工会、农民协会和商会的主席，七星岗中心小学校长许自强，和几个工作队的同志。

嘈杂的人声随着古玉章宣布“开会”逐渐安静下来。他说今天开这个会，一方面是为了欢迎刚刚到的土改工作队同志；半个月来，全乡农民天天盼着他们，终于盼到了。第二，自从美国帝国主义者仁川登陆，地主造了许多谣言，一下说蒋介石到汉口了，一下说东北掉了原子弹，弄得大家不能安心生产。今天区委特别来给大家讲解一下时事，使大家不致再上当。第三呢，请工作队的赵洁民同志给我们讲解人民政府的土改政策。几天之后，工作队下了乡，在正式土改工作中，随时还要讲解，今天，他先给一个总的轮廓。

话讲完，区委站起来了。区委是湘阴人，个子很矮，平时说话声音很低，但是到了群众面前，声音立刻就洪亮起来。

“农友们，我们现在要实行土改了。凡是改革都是新的，凡是新的，我们对它起初都必是很不熟悉，于是，就会存在些不必要的，不应该有的顾虑。这不能怨农友们，几千年的封建土地制度夺去了你们学文化的机会。尽管解放了一年多，你们还不能看报看书，不能好好了解政策。那些夺去你们学文化机会的家伙们，又利用你们这个不该有的缺点，来造谣，使你们不能安心过日子。而且，谣言造得荒唐到了家。”

“农友们！祸害我们廿多年，刮我们民脂民膏，抓我们壮丁的国民党，一年以前便被我们人民武装踢下海里去了。八百万匪军都被我们歼灭干净了。不是仅仅捉到了几个头目，而是在大陆上没有了国民党的一连一排兵。火车从满洲里直通到广州，从上海通到柳州。现在只剩下台湾那一小撮残匪——他们想靠了美国的保镖，苟延残喘下去。”

美国这支镖可靠不可靠呢？每个朝鲜人民军或中国志愿军都可以作见证说：“美国这支镖很不可靠。”

“麦克阿瑟的胡子都烧焦了（又是笑声），他还顾得了蒋介石。蒋介石有八百万军队和成千成百的飞机大炮坦克的时候，不是中国人民的对手，他缩在台湾，守着几十万残兵败将会到汉口？他也可以来，不过到不了汉口，我担保就一定给我们捉到牢里去了（笑声）。 ”

“地主们不要再存幻想，你们的朋友蒋介石完蛋了。他永远不会回来了。你们还是向人民投降吧！诸位农友们呢，你们不要上谣言的当。你们怕什么？这是你们的天下。”

区委说完，台下不停的鼓掌。新五举着拳头喊：“消灭封建地主阶级！”农民随着也喊起来。几个显著的地主站在人群中间窘促地感到孤立，也想假装鼓掌，但是两个手掌拍不到一起。

工作队的赵同志像一匹小豹似的蹿到台前来了。灰制服的胸袋上挂着一支钢笔，旁边还插着一把牙刷。农民出身的老干部，黑黝黝的脸，额上有一块疤——那是二十三岁在山西五台当副县长时挂的彩，是日本侵略者给他留的一个纪念。

“各位同志：我是山西老西儿，我讲的话你们未必全能听懂，我一定一个字一个字地讲。如果你们还不懂也不要紧，反正在回龙乡土改完成以前，我和同来的几位同志要在这里扎根，同你们天天在一起搞翻身，有什么不明白的，随时可以讨论。”

“种了一辈子田的农友们，你们比谁都更明白为什么要土改。因为封建的土地制度太不合理，太残忍了。种田的人收不到谷子，不种田的人坐享其成。结果呢？大家自然生产得不起劲。工业需要棉花，咱们拿不出好多棉花来，工业也兴不起来。咱们棉花出的少，手里自然也没有钱，买不起布，买不起牙膏，工业也兴旺不起来。”

“农友们肚子吃不饱的时候，当然就不会热心学文化。占全国人口百分之八十的农民如果还在封建统治之下，不能成为国家的主人，我们就不能建立强大的国防，就不能彻底实现民主化。这就是我们民族被侵略，被压迫，穷困和落后的根源，是我们国家民主化、工业化、独立统一及富强的基本障碍。土改不是为了别的，就是为了把这个障碍物消灭。”

“从1927年到现在，在长江南北，土改已经搞了一二十年，这一二十年的经验真理都已经包含在政府今年公布的土改法里面了。我们要根据那本土改法来搞翻身。”

“土改是一件翻天覆地的事情。那就是说，从前农村里的天——地主，几千年来骑着农民脖子的阶级，如今是人民民主专政的对象了。地呢——雇贫农，尤其雇贫农，农村最受压迫的阶级，他们必须由地变做天，成为农村的领导阶级。土改就是叫土地回老家，归还给农民，把他们的日子改好，把他们的身价抬高。这就叫做翻身。凡是拥护土改的，

就必须尊重雇贫中农的意见，照顾他们的利益。雇贫中农在土改时期和土改以后的团结，是人民民主专政的切实保障。这中间，雇贫农尤其要起骨干作用。”

交代完了这番道理，赵洁民就针对着昨天晚上和几个村主任及农协委员交换的意见，分别强调了土改的几方面。他着重地说，革命军人、烈士家属、工人、职员、自由职业者、小贩等，因为有了别的职业，或者缺乏劳动力而出租小量土地的，都不会划作地主的。他从雇贫农的角度解释了为什么要保存富农经济——为了更好地保护中农，对生产有利，使地主更孤立，土改更容易进行。他从新民主主义革命的性质，又从城乡交流对农民的好处，讲了为什么坚决保护工商业，同时又告诉兼地主的工商业家应该集中力量在城市去经营他们的工商业，不应占有着农村土地、房屋和农具来继续剥削农民。

“过去，你们仅仅做了地主的买卖呀！地主富农占乡村人口不到百分之十。等咱们农民买起东西来，你们比比地主这个主顾大还是农民这个主顾大。”赵同志弯下腰来，似乎特别找台下的商人。

台下的笑声被他突然转为严厉坚定的声音压下来了。他对地主们训起话来。先说明土改就是为了废除地主这个阶级，废除他们封建的所有制——消灭的是个社会阶级，不是消灭地主的肉体。然后，他警告说：

“在土改中间，地主有两条路可走：一条是有前途的活路，那就是悔过自新，在没收以前好好保护土地、耕牛、农具、粮食、房屋，不破坏，不隐藏，不分散。在没收的时候，依着办法如数交出。农民对你们一定会宽大，一定会分给你们一份土地房屋，使你们能在劳动中改造。另外一条是没有前途的死路，那就是像彭荫庭、罗培荣那样阴谋捣乱。这样的地主是逃不出人民的法网的。”

赵洁民讲话以前，很担心自己的山西口音，他是1949年夏天随军南下到湖南的。从贫苦农民脸上的笑容，从街上的工商业家一张张笑嘻嘻的脸可以看出，群众都听懂了要点。因此，会场上，一般的情绪都由波动而安定下来。

接着回龙乡手工业工会主席潘志昭站起来讲话，说工人农民是盟友。工人们一定用全力支持农民的翻身，只有农民翻了身，以工农联盟为基础的中国才能巩固。潘志昭是铁匠。他说，譬如土改中间民兵需要梭镖，土改以后，农民要造新农具，手工业工人们一定加紧赶制。

底下，回龙乡农民协会主席晏树铮代表全乡农民起来讲话，号召全

乡农民拥护保存富农经济的政策，并且根据政府土改政策积极起来搞翻身。他特别保证了在土改运动中，不动地主兼营的工商业。

这时，回龙乡商会主席，开国药行的涂遇春站起来了。为了表示郑重，他把鼻梁上那副玳瑁边的镜子恭敬地摘下来，微带着惭愧地说：

“这几天，我们街上有些无病呻吟。土改明明是为了繁荣农村经济，但是我们商人却惊三怕四的，有的连货都不敢进了。”台下千祥百货店的周祥瑞听了，连耳朵都红起来。“今天听了各位同志的话，我们工商界就像吃了一剂羚翘解毒丸，把我们心窝里的毒给消光了。”

“我呢，肚子里也有我的毒，”下面都笑起来了。“我在大坟坪有一丘水田，一共是七斗二升。那也是我用从农民身上剥削来的钱置的——我所有的财产都是那么来的。我两个儿子现在都参加了革命工作。他们当年的教育费，还不也是从农民身上赚来的！如今，农民既然不动我的药铺，使我一家七口有饭吃，又使我在回龙乡的繁荣上有所贡献，我还有不遵守政府法令的道理！明天早晨我就把大坟坪的红契和房屋农具的清单送到乡政府来！”

下面是一片掌声。

中午散会的时候，田埂上，人们边走边讨论着，不像来的时候那样沉默了。

没有能上台讲两句的朱耀先，今天心里别扭极了。他夹在人群里耍俏皮说：“赵同志真是个聪明人。他说地主逃不了法网。他举了彭荫庭和罗培荣两个，他可不提已经逃出法网的彭天保呢！”这话给新五听见了，就狠狠瞪了他一眼说：“你不必操心，等我们把彭二虎捉给你看吧！”

赵洁民同志坚持在两天内工作队得把全乡性的会开完，一面使村干部下去以前对回龙乡有个全面认识，一面使回龙乡各界对于土改政策，事先也能有比较透彻的了解，两个合在一起，才是回龙乡的立体地图。于是，彭氏家祠里，就一个会接着一个会开起来。

首先开的是干部会。十个工作队同志坐在悬了“根深蒂固”匾额下面的长凳上，每个人手里拿着笔记本子，一面听着古玉章乡长报告的本乡情况，一面在小本上记着：

“人文地理：回龙乡共有2127户，6989口人。共有九个自然村，是国民党伪第五、第六、第七三个保合并而成的。它有稻田1527石（每石七亩），旱地470石，种的多是棉花。全乡土地相当集中，像大屋罗的罗培荣，一户便有90石田。全乡三面都是以河为界，北有斑鸠河，西有

练江，南面是沙河，都是向洞庭湖注流。每年春夏之交，河水泛滥，近河的田，十年九涝。”

“回龙乡在抗日战争时期，曾经沦陷在日本人手里，所以，全乡遭受了残酷的蹂躏。七星岗街上完全烧光了。很多农民遭到屠杀，接着是国民党的血腥统治。”

“政治情况：大革命时期，本乡是老苏区的边缘，农民组织略有基础，因此，在国民党二十二年的统治时期，当权的地主也特别残酷。全乡恶霸地主有七八个，其中属新炉村的两彭最跋扈。农民诉苦时候，应注意他们的血债。”

“圈子会——一种反动的迷信组织，在本乡也很猖獗。约在解放军渡江的时候，全乡发展了560多个会员，其中百分之八十是雇贫农，都是受骗的。在双减期间，农民大半退了会。圈子会‘大爷’——双枫村的谈经武在年初阴谋暴动，也已经枪决了。但是这个反动组织仍旧潜伏着，还未根除。应当继续注意它的活动，并且在农民面前揭发它的反动性。”

“目前的乡政府是减租退押时期选出来的，有四个乡干部，其中三个是雇贫农，一个是中农。九个村干部之间，六个是雇贫农，三个是中农。”

“全乡有46个党团员，从1927年，地下党的支部一直坚持下来。解放以来，在支前双减秋征的工作上，党团员都起了作用。像新炉村的彭新五，吸收进来以后在和反动派斗争上，一直是起着带头作用。”

主席报告完了，工作队同志便抢着提问题。派在新炉村的卢扬，浏阳人，小学教员出身，家里是佃中农成分。解放后在湘潭建设学院受了四个月的训，搞过双减、秋征，能力是强的。他本来就担心新炉村太复杂，有着一一条属于工商业范围的街，如今听说最反动的地主也在他这个村子里，就更着急起来。他问东问西，问个不停。后来还是赵洁民这样提议：

“新炉村的问题，等下由卢扬、村主任老彭和我单独来讨论吧！”

晚饭后，祠堂的大梁上挂起一盏汽灯，在水月的灯光下，农协晏主席继续报告农民协会的情况。

回龙乡的农民协会是在双减期间组织起来的，因此，中农的成分占了很大的比重。目前，在阶级未划分以前，还不能确切说出确实数字来。乡农会共分做三个分会（新炉村、石桥村、云湖村三个村子属第一分会），全乡会员总数是957人，这个数目不足以说明农民的觉悟程

度，因为大半是农会负责人登门造册的。其中男会员是534人，女会员423人。农会有15个委员，8个是雇贫农，7个是中农。

农会在土改期间和土改以后，是农民保护自身利益的一个群众组织，通过它，和政权组织的农民代表会议，农民实行对地主阶级的专政；通过它来提高阶级觉悟，加强组织习惯和文化知识，好来进行人民民主政权与各种建设工作；“尤其是组织互助合作，发展农业，改善农民的经济生活”。

目前回龙乡的农会是在减租退押那样群众基础较小的运动中产生的，还不能担任这艰巨的土改工作。它的斗争性还不够强，它的领导和群众联系的不够密切，它的会员中间还有不纯的分子。因此，我们必须在斗争中来加强它，提高它。随时洗刷潜入的地主富农，随时教育落后分子，随时吸收农民中间的优秀分子。这个工作，在土改过程中间一定要完成，农民的胜利才能够巩固下来。

“在广大农民还没有觉悟起来，先进的雇贫农小组在土改中，必须随时起着骨干作用。”

最后，赵洁民同志作了总结，决定在土改每个重要阶段开始前，由他召集九村干部开会讨论。每隔三天，各农民协会分会（三个村子）本身举行一次汇报，互报情况，交流经验，调整进度，并且做工作上必要的联系。

会开完以后，村主任彭玉堂又把新炉村三个屋场和一条街的情况向赵洁民和卢扬谈了一下。谈到将近一点钟。

第二天早晨，干部们还没洗完脸，七星岗中心小学的教员便来了。接着，全乡九个完小、十五个初小的教员也陆续到了。这是土改工作队和当地知识分子合开的一个座谈会。在这个会上，赵洁民讲了一下知识分子对土改应有的态度，和土改里面对知识分子的政策。然后，就展开来讨论回龙乡知识分子怎样和工作队一起帮农民翻身的问题。

各学校的教员都分别发了言。有的说自己是地主阶级出身，但是在学习中间已经明白了土改的正义性与土改的绝对必要性，因此，一定坚决站在农民方面，消灭自己出身的阶级。有的答应了负责出黑板报，大字报。有的负责宣传时事，有的愿意替工作队传达情况和政策。七星岗的中心小学愿意组织一个剧团，用话剧来向农民宣传。所有的教员都答应加紧学习《土地改革读本》和中央人民政府颁布的《关于划分阶级成分的决定》，准备开办夜校，教农民怎样划阶级，算剥削量。

卢扬一面听着他的“老同行们”发表着意见，一面整理着昨晚上的笔记，特别是村主任的汇报。他在笔记本的一页上写下了根据财产占有及使用情况来看，本村哪些人是地主。他又在兼工商业的地主姓名上各划了一个星号，在可能是富农的地主姓名上打了个问号。在另一页上，他记下了一串肯定是雇贫农成分的农民的姓名，又在雇农的姓名下划了一道杠子。他记住了县里扩干会上县委的一句指示：找发动对象的时候，先找那最贫的，最苦的，最劳动的。

眼前，卢扬的工作是摆得清清楚楚的：发动那最贫、最苦、最肯劳动的农民，监视那最跋扈、最反动、最坏的地主。

只有当农民真正发动起来的时候，才能够认真去监视地主。

3. OUT OF THEIR SORROWS, STRENGTH

With the escape of Peng Erh-hu and the arrest of his brother Peng Yin-ting, the Peng household, once the scene of never-ending bustle, immediately took on the mournful look of a deserted temple. Most of its twenty-odd rooms had been sealed up by the *hsiang* government. The one in which they had found a cache of weapons even had its door nailed shut. Throughout the enclosed courtyard resounded the monotonous syncopated music of the "wooden fish", with Peng Erh-hu's wife, her eyes closed, playing the musician in a grey Buddhist garment. No wonder Yueh-lien, the servant girl, as she went about her household work had the feeling of living inside a coffin. Fu-chuan too felt lost.

Gongs and drums had been beating in the village for two or three days, and here were Fu-chuan and Yuen-lien, still squirming inside their "coffin". The change she had witnessed during the last few days seemed in Yueh-lien's mind merely to centre around this moral problem: Peng, the Second Master, was a heartless brute to have thus abandoned his wife. Peng Fu-chuan kept worrying about his five *tou* and seven *sheng* of land which his master had given him as a "gift". Would that be divided up, too, in land reform?

On the evening of November 28, Fu-chuan had just come back from where he had been filling his water buckets when he found Comrade Lu of the Work Team waiting for him right there in the kitchen.

The thought immediately occurred to Fu-chuan—someone in uniform, making another arrest perhaps?

"How many buckets of water have you fetched, Fu-chuan?" asked Comrade Lu with a smile. He talked as though they were old friends, and his voice showed both intimacy and concern. Fu-chuan was still

tense, but deep inside he had become a little less apprehensive.

"With only the three of us around these days, four or six buckets would do," said Fu-chuan, untying the rope around the buckets.

"Where do you have to go to get the water?" Here Comrade Lu helped Fu-chuan move the buckets and stood the pole up against the kitchen's blackened wall.

"Three *li* away at the reservoir. It's flowing water. Goes into the Lienchiang." With these words Fu-chuan became somewhat bolder. He lifted up his head and looked straight at the stranger. The light was quite dim and he blinked, eyeing Lu Yang up and down.

"Three *li*?" Lu Yang looked surprised. "How many buckets a day did you have to fetch before liberation?"

Before liberation? There were then four farmhands, one manager and cook, and a constant flow of guests. Divisional commanders, colonels and what not. Usually over ten people. He distinctly remembered the number of dishes he had to help wash in the kitchen.

"Those were hard times. Fourteen or sometimes 16 buckets, two at a time, I had to fetch," sighed Fu-chuan. Then he thought he should make some boiling water, so he ladled some water into a cauldron and went and got an armful of firewood from a pile in the corner.

"That means seven or eight trips. Three *li* per trip," calculated Lu Yang. "So you had to cover over 20 *li* a day merely fetching water. Did you have other jobs as well?"

"Oh, lots!" That he should have so light a load now appeared to Fu-chuan almost a miracle. "I had to feed the pigs, feed the cattle, and feed a foreign-breed dog. I had to spread fertiliser and cultivate some land too.'

"How much land did you have to work on?"

The crackling wood-fire in the oven cast a reddening glow on Fu-chuan's face. He stared dully at the leaping flame. By adding up individual pieces of land, he finally arrived at the total. "One *tan* and eight *tou* of land."

To Lu Yang, who had helped with various jobs in the fields but

had never independently cultivated any land, one *tan* and eight *tou* of land sounded enormous for one man to look after. You have to plough it, fertilise it, and weed it before you can reap anything. Admiration mingled with sympathy as he gazed at Fu-chuan's thin, bony frame.

"Let's see," said Lu Yang, counting rapidly on his fingers. "That would produce around 70 piculs of grain, wouldn't it?"

"Only in a good year." Steam was rising from the cauldron now. Fu-chuan got a basin for himself and settled down to washing his feet. "But the river is not so obliging. In times of flood, you would consider yourself lucky if you could bring in 50 piculs."

"How much out of that did Peng Erh-hu give you?"

"Depending on the year," answered Fu-chuan, noisily washing. "Sometimes ten piculs. Sometimes seven or eight. I didn't begin to earn full wages until I was 20."

"Only ten piculs, did you say?" Indignant, Lu Yang climbed off the oven. "Tell me, in collecting rent, did he go according to the year too?" he asked sarcastically.

This question left Fu-chuan at a loss for words. Somehow the thought had never occurred to him.

"How long have you been working for him?" went on Lu Yang.

"I started out at six as a cow-herd." Bitter memories were surging up in his breast. "Then I began taking on other odds and ends. When I was 14, father died and I became a regular farmhand. I am now 24."

"You're 24," repeated Lu Yang. "You should get a wife."

"I have no special skill. How could I support her?" sighed Fu-chuan.

"No special skill?" said Lu Yang with disagreement. He propped one foot up on the edge of the oven and placed both hands on his hips. "You fetched 14 or 16 buckets of water a day. Covered 20 *li* and fed cattle and pigs. You cultivated one *tan* and eight *tou* of land with a yearly output of 60 or 70 piculs of grain. And you talk about not having any skill?"

"Well, no skill and no luck." He really had not been getting his

due, thought Fu-chuan vaguely. "Take the Second Master. He could write and do arithmetic. So there he was eating and drinking his fill every year without even having to cross the threshold."

"Brother, you really are silly," exclaimed Lu Yang with a mixed feeling of bitterness and sympathy. He looked at Fu-chuan's legs, legs that had known so much hard labour, bespattered with mud, and here and there he could see blue veins throbbing. "It wasn't because of his skill or his 'luck', as you put it. Land and feudal influence were what turned the trick. He had been exploiting you."

"Exploit?" The meaning of such a term was entirely lost on Fu-chuan.

"Yes, exploit. A mixture of open robbery and pocket picking," explained Lu Yang, accompanying his words with suitable gestures. "Now you, for example, turned out 70 piculs. He gave you only ten. That means he had exploited 60 piculs from you. You have worked for him 18 years. Say he gave you ten piculs every year (actually you often got less) and we still have the staggering sum of 1,080 piculs of grain—the amount he exploited from you."

"But," said Fu-chuan in a feeble voice, "the land was his."

"Indeed? Now tell me. How did he get his land in the first place?" Lu Yang and Fu-chuan stood up simultaneously at this point.

"The land was left behind by his grandfather. First Master and Second Master each got a portion." Fu-chuan was trying to defend the Pengs, but he could not help feeling that perhaps he had not been treated right after all.

"And how did his grandfather get the land? Come, tell me." Lu Yang's voice now sounded almost as though it were edged with steel. The cross-examination was proving too much for Fu-chuan. "Well, his grandfather was a magistrate in the Manchu days," was all that Fu-chuan could answer.

"Right you are." The answer seemed to have furnished additional proof of Lu Yang's argument. "And all that a magistrate loved was to hear money clink. The money was squeezed from your grandfather by

Peng Erh-hu's grandfather, and then used to buy land so that you in turn could be exploited!"

Fu-chuan was struck speechless. A cold wet towel seemed to have enveloped his brain. Leaning against the oven, he pondered over the problem and remained like this for a long, long time.

That evening Lu Yang returned with his quilt. Fu-chuan had willingly agreed to his staying there and the two of them spent the better part of the night in a heart-to-heart talk, lying side by side in a narrow bamboo bed.

Lu Yang was like Fu-chuan's elder brother now and to him he poured out everything. When Fu-chuan was six, his mother, already seven months with child, was ordered by Peng Erh-hu's wife to climb up a ladder to get some firewood from the attic. She slipped and fell and had a miscarriage. Death resulted after two days of acute suffering. His father, too, had come across some Japs while out carrying grain for Peng Erh-hu and they had killed him in cold blood on the dyke near the Seven Star Slope and taken the grain off him.

Into their conversation Fu-chuan adroitly introduced the question that had been bothering him. Will the land given by the landlord to a farmhand be divided?

"Dear younger brother," said Lu Yang, "don't tell me Peng Erh-hu had given you some land?"

"Yes, five *tou* and seven *sheng*," admitted Fu-chuan with complete honesty.

"Now suppose," continued Lu Yang, pushing up his quilt, "this quilt of mine originally belonged to you and I took it away from you by force. Would you be grateful if, knowing you are going to want it back, I just grabbed a handful of cotton padding from inside the quilt and said to you, 'Here, you have this.'?"

"Certainly not." Something which Peng Erh-hu had made him sign a few days ago fluttered through Fu-chuan's brain.

"Then," said Lu Yang, turning to Fu-chuan while propping himself up on an elbow. "Peng Erh-hu's land has long ago ceased to be his. It

belongs to whoever tills it. What do you think land reform means? Doesn't it mean that peasants must have their land back for cultivation? You, Fu-chuan, among all the peasants, are most entitled to getting a piece of land, for you belong among the poorest, most exploited and hard-working. In dividing up land, it is people like you who do not own a strip of land that have priority. Five *tou* and seven *sheng*! It was yours to begin with, you silly melon!"

Fu-chuan sat up at this.

"Oh, Peng Erh-hu, that son of a bitch," he cursed, almost in tears. "He's got me fooled. I must go and ask for it back." Forgetting that Peng Erh-hu was at large, he felt like putting on his clothes right away to find the swindler.

"Ask for what back?" asked Lu Yang with some curiosity.

"That piece of paper." For the first time, Fu-chuan felt the urge to confide in someone about it. "Peng Erh-hu gave me a deed of transaction—I didn't have to pay him, he said—but he also made me put my thumbprints to a statement saying that the land is to revert to him when Chiang Kai-shek comes back."

"Huh. That son-of-a-turtle!" Even Lu Yang was somewhat taken aback, but he pushed Fu-chuan down again and said reassuringly, "Don't you worry. Chiang Kai-shek will never come back. Still, it just goes to show what kind of stu a landlord's heart is made of."

The next morning when Yueh-lien came to the kitchen to get some water, Fu-chuan told her the conversation of the night before and the two of them made an appointment to go to Hsin-wu's home together after supper.

That evening Hsin-wu's two dilapidated-looking rooms practically burst their joints on all sides. Crazy Grandma Li, Fu-chuan, Uncle Kuang-lin, over ten people crowded in. Yueh-lien was the last to join the throng. "Scholar" Chu Yao-hsien, anxious as usual to be in the limelight, tried also to edge his way in when he heard Comrade Lu was calling a meeting. But he was stopped halfway by Hsin-wu, who

said sharply and with sarcasm, "Today we want to discuss how to catch Peng Erh-hu alive. Come around again when we've caught him.'

When everybody had come, the meeting began and Hsin-wu led the way.

"I was as good as stuffed in the cannon's mouth already by Peng Erh-hu," said Hsin-wu. "If it hadn't been for the Communists, I, too, would have been part of the ashes blown over the common burial ground. We started out having five *tou* of land. There were two sons in the house, my brother and I. Only two of us, but we got drafted three times. In 1938 my brother was one of the draftees. Peng Yin-ting was then Village Elder and he insisted on my brother's going. The *pao* head would come over every day to bring pressure upon us. At night he would turn up again, with a different story: a little money might do too. So the long and short of the matter was we sold three *tou* of land for a little over 200 silver dollars and paid for someone to go in my brother's stead. While they were trying so to rope in my brother, Peng Erh-hu got me to work for him without pay. Otherwise, he said, he would tell his brother to come and pressgang me too. So I had to work for him for two months.

"Before long, however, it was again my brother's turn to go. The lot-drawing at the Village Office seemed to be under a magic charm. Only the poor got drawn. Big families nearby, like Lo Pei-jung, who had four big husky sons, were untouched. The three sons of Li Chao-chu never got drafted either, but Teh-ming, Crazy Grandma's only son, was among the first of the lots drawn. When 1945 came around, Peng Erh-hu became Village Elder. By then my family didn't have one *sheng* of land left; so that when I was drafted, there was nothing I could do. I was taken away tied with a piece of rope!

"Before I knew how to fire a gun, they put me into the KMT 75th Division and the first thing I knew I was sent to the front lines. Of course, I did not realise then the Communists were fighting for us peasants, but, still, it was difficult to get together enough strength to fight against people you had no grudge against! First time was at

Tsinan. We retreated together with the army ahead of us without even firing a shot. Second time was at Mukden. That son-of-a-rabbit, the KMT commander Chen Cheng, threw us soldiers into the flames. A bullet got me in my side, here. (He pointed at his ribs.) It was summer, then. For three days I huddled under a tree, as good as dead, and my wound was festering horribly. Luckily the KMT army quickly collapsed. Two Liberation Army orderlies found me and had me moved to a front hospital. There the bullet was dug out and my wound was cared for. While I was at the hospital, they taught me to read and write and I began to understand why the revolution was good and the reactionaries were bad.

"When my wound was healed, I asked to be sent to the front lines again—this time to fight the KMT reactionaries! Lots of my old comrades had done so. They got a doctor to look me over and he said I was still unfit for front-line duty, because I had lost too much blood. So I did garrison duties in the rear. Later I asked to join the army that was going to liberate Hainan Island. But they looked me over again and finally decided to give me an honourable discharge to return to civilian life. (Here he produced his veteran's certificate.)

"There were other veterans like me on the train that left Peking. At all the stops along the way there were people meeting us. Before we left, each of us was given a pair of shoes and socks, a suit and money, equal to 500 catties of grain—according to the number of years you served in the army..."

Before Hsin-wu could finish what he had to say, Crazy Grandma burst out crying. If only Teh-ming could have come back too, with new shoes and socks and a new suit!

"I'm an old woman," she said amidst sobs, and lifted herself up with the aid of her crutch, "but I want to tell my sorrow too. I don't know yet where my son Teh-ming's bones are buried, but I know Peng Erh-hu is the one that's responsible. I had four daughters and two sons. Now only Chun-hsing is left. It wasn't because I didn't know how to bring up children that they died. Four of them died of hunger and

cold. Once I didn't have a piece of cloth to wrap a baby up in. Neighbours lent me straw to cover the newly born.

"I hadn't been idle. I worked all the year round for the landlord and that was what I got—only misery! How could I remain strong when I never had enough to eat? Is it any wonder that my breast became loose and flabby, and that, one after another, the babies died off? The third one I throttled myself. Flesh of my flesh, how could I bear to speed it to an early death?" Here she began weeping loudly. "But that was better than to see it die by slow starvation. Finally all I saw near me was a son and a daughter, and the cursed Peng Erh-hu had to come and drag my Teh-ming away, my 19-year-old Teh-ming, whom I brought up with what little rice I could get begging from others! He went, leaving us two behind, mother and daughter, and he never came back..."

Crazy Grandma was sobbing convulsively. Hsin-wu's pregnant wife attempted to help her sit down and regain her breath. But no, she simply must go on.

"Never in all my life of 53 years did I have one day of happiness. Mother died when I was only two, and at eight I was given away as a child-bride. First I had to take a lot of beating from my mother-in-law. Then later on when I went to work for the landlord's family, the landlord's wife also beat me. For three months every year I lived on wild vegetables; for the second half of the year dried potato was the only food I knew. As for meat or fat, it had never been my good luck to even get a smell of them, year in and year out.

"After 20 years of hard labour, my husband and I saved up enough money to buy four *tou* of marshy land. My man, Li San, was straightforward and dependable but not very strong in health. One day during the hot season he was turning the landlord's waterwheel when he dropped down in a dead faint. The landlord acted as though such a thing was below his notice and I had to sell one *tou* of land to give him medical treatment.

"Then the Japs came. That opium fiend Peng Yin-ting was helping

them to pressgang able-bodied men and he got the idea of having Li San carry bullets and dig trenches for them. One day for no known reason whatsoever he got badly beaten up, my Li San, he just managed to crawl home. His clothes were soaked through with blood. Later his wounds began to pus and he bled and bled. I sold another *tou* of land, but this time nothing could save him. Chun-hsing was only seven when he died. Giving Li San a decent burial cost me another *tou* of land.

"We two, mother and daughter, had a very hard time living on one *tou* of land. The next year, the harvest was late and we had to borrow from Lo Pei-jung—five *sheng* of rice and one *tou* of beans—just to tide us over. Two months later he told me that what I owed him together with interest was 20 times more than we borrowed. And so my last *tou* of land was seized from me.

"Chun-hsing followed me around begging for three whole years, we never knew where our next meal was to come from. Finally I could stand it no longer and gave her away as a child-bride. I too have been a child-bride. Surely I realised what it meant. Hsin-wu, I'm not a heartless person. I'm not crazy. It's just that I've suffered so much and there was no one I could tell it to before."

Lu Yang hurried over. "Grandma Li—don't anyone call her 'Crazy' Grandma any more—Grandma Li, certainly you're not crazy. See," Lu Yang began counting on his fingers for the benefit of the others. "As a child-bride, you were ill-treated. That means you suffered from living in a feudal family. Your husband was exploited by the landlord on the one hand and kicked around by foreign imperialism on the other. Two-fold suffering common to all of us peasants, also two of our chief enemies. Peng Yin-ting, Lo Pei-jung, they are now both under lock and key. We want to do the same thing to Peng Erh-hu and to all the other rascals. This is our job, and we must all help out. The government will surely back us up in this."

"Landlords are such fiends." said Tu Yu-chen, wiping away her tears. "They would come and snatch away your cauldron the moment

they see your chimney smoking. My husband used to have a few *tou* of land to his name too. After my father-in-law died, Peng Erh-hu asserted brazenly that we owed him 80 silver dollars. If we didn't believe him, he said, we could go to the County Court and have a lawsuit. A lawsuit! With him who strutted in and out of the County Court as though it were his own kitchen! Naturally we didn't dare. Thus the few *tou* of land passed away from our hands.

"The year before liberation came, my husband was asked by Lo Pei-jung to help with the crop-threshing. The verbal understanding was each person must thresh three *tan* and five *tou* of grain a day and get paid daily one *tou*, two *sheng* of rice. The crop then had become quite dry and some of the grain stuck and didn't come off—not full-sized grain at that. Lo Pei-jung saw this and said nothing. When my husband asked to have his wages, he answered, 'You threshed 70 bundles. On each bundle was left unthreshed over two *ho* of grain. Two times 70 makes roughly one *tou* and five *sheng*, and you still want your wages? Haven't I been generous enough in not asking you to pay me the balance of three *sheng*?' Thus all my husband's strenuous work during those days came to nothing.

"My husband was so mad that he decided to quit being a peasant. Therefore off he went to Lake Tungting and found himself a job rowing boats. As for me, it fell to my lot to breastfeed someone else's baby while my own was yammering for more milk. My mother-in-law turned up a few days ago and insisted on sending me back to my own family, but I held firm. I don't know what the new government is like, but surely it couldn't be worse than the way the KMT bullied us."

When Tu Yu-chen finished talking, Lu Yang remarked that it was a good thing she did not go home, for she could stay and see with her own eyes what the People's Government was like. Far from bullying people, the new government considered stamping out those "despots" who did bully others one of its main jobs.

"Am I not telling the truth?" Lu Yang asked, more or less rhetorically.

"Every word of it," all the people in the room, men, women, old folks and children exclaimed in one voice. Yueh-lien and Tu Yu-chen, the girl who worked as a wet-nurse in Chu Yao-hsien's house, both started crying. Tu Yu-chen had stayed for the meeting and hadn't gone home despite her mother-in-law's urging.

"But," continued Lu Yang, sensing that they were now with him, "it is up to you to rise up and see that justice is done. You know all the wicked landlords and you have in hand all the evidence of their past crimes. The government will not convict anybody wrongly. So all of you who have evidence that might come in useful should produce it."

Chu Kuang-lin, fingering his beard delicately, was the next one to speak up.

"I am old, so I have plenty of old scores to settle with Lo Pei-jung. I used to have a three-room hut of my own near Huangkuling, also three *tan* of marshy land which I rented from Hu Pin-tsan. That was in the year 1939. Then Hu suddenly took into his head to work up his business in town and sold part of his country property including my three *tan* of land to Lo Pei-jung. When the land changed hands, Hu Pin-tsan guaranteed that my tenancy wouldn't be touched for the next five years.

"Think of my surprise when, the moment the deal was completed, Lo Pei-jung called me over to his place and named three conditions, otherwise, he said he would 'have my hoe sawed in half' (take my land away). They were: one, a 30 per cent increase in rent; two, for three years I would not be allowed to go to cut firewood in his hills; and three, I must not keep fish in his pond. What spawn I'd planted I must immediately take out again. The blow practically stunned me, but I pulled myself together and begged him to loosen a bit. I went on for a long time, but all he did was to pick his teeth leisurely and murmur this phrase taken from the classics. 'Those who find the terms unsuitable are at liberty to go!'

"I was so mad that I almost decided to have it out with him then and there. But, as my family and some neighbours pointed out, what

can you expect to gain from such an unequal struggle? Is it sensible for a piece of bean-curd⁹ to declare war on a knife?

"In the year 1942, Hunan had an especially bad case of locusts. So I prepared a banquet, roused up a few local people, with the intention of 'getting on the good side' of Lo Pei-jung, so that he might come down a bit in his rent. I had a very difficult time getting him to come in a sedan chair. And all that he said when he stepped off the chair was, 'Just as insects are bad for the tenants, so is drought for the landlord!' This said, he climbed up on the chair again and was carried away.

"When the KMT came back, their slogan sounded quite promising, '25 per cent rent reduction'. I was stupid enough to believe them. My, you should have seen the way he threatened to saw my hoe in half again. Of course, I had to pay the 25 per cent balance after all, and quick too.

"It would be impossible to tell you all the wrongs I suffered at his hands. I only rented some land from him, that's all. Yet the arrangement was such that I could hardly call my very life my own."

By this time Yueh-lien's eyes had become red and swollen from weeping. Lu Yang tried to get her to move over from where she was standing by the threshold and pour out her grievances too.

"Go ahead, tell them how the Second Mistress used to beat you," said Fu-chuan, nudging her.

Her mouth clamped shut, Yueh-lien stared dully at Fu-chuan and the others. Tears kept trickling down her cheeks, and behind all the tears one could detect the beginning of flaming anger.

Similar accusation meetings went on for five evenings. Most of the people who turned up at the first ones were inhabitants of the Peng-Chu Homestead, but gradually the thing widened and took in people from other homesteads as well as from the street. Lu Yang made it a rule to say a few words by way of explanation and encouragement after each such gathering. The bitter, cold facts were

eloquent proof to the peasants as to who had sweated in honest labour and who had been parasites.

One factor that came up again and again in the peasants' accusations was: "I can only blame my horoscope, which brought me bad luck." To show how false this was, Lu Yang cited the example of Comrade Chao Chieh-min of the Work Team.

"Old Chao was formerly a Shansi peasant. He, too, used to float around like an odd-jobber without a bit of land to his name and, of course, not knowing how to read or write. Ten years ago, after the Japanese devils had invaded North China, the Eighth Route Army, as the People's Liberation Army was then called, happened to pick him up while in Shansi. You all know the way the Eighth Route Army helped the poor wherever they went. So they taught him how to read, helped him realise how he'd been exploited and built him up to be a stubborn fighter against the landlord class. He was later elected as a Peasants' Association officer. He did his work well, rose to be Village Elder and then became Vice-Mayor of Wutai County.

"Look at him today. He can now read, write, make speeches and do administrative work. His family has been allotted some land and he's out here to work for the people. Don't tell me all this is because of 'fate'! If he had resigned himself to being what he was, then he would truly have been a victim of the fortune-teller's nonsense!"

Thus the Hsinlu Village Small Group of Farmhands and Poor Peasants was set up, and Hsin-wu was elected head of the group.

The following afternoon all the men brought along their mothers and wives, and the women, their mothers-in-law and sisters-in-law. That was an idea of Lu Yang's. It certainly did not appeal to some of the mothers-in-law, who looked reluctant and apprehensive.

The meeting opened with the accusations made by Grandma Li, Tu Yu-chen and Mrs. Peng Hsin-wu. Even Yueh-lien found her voice. She explained how she had been taken away from her parents by force, since her family owed Peng Erh-hu two piculs of grain. Her tearful account of the way the two Peng women maltreated her caused

many of her listeners to weep in sympathy.

The wife of handicraftsman Hsu Tsung-lien stood up and told how her mother-in-law had made life miserable for her. Lu Yang waited till she finished, then made the following comment:

"The bickerings among ourselves, who all belong to the peasant class, are not to be confused with the oppression by the landlords. For thousands of years, the landlords have been persistently squeezing us. There hasn't been a single exception. Therefore, the landlords, as a class, must be overthrown. As for members in a family, there are bound to be some who are good-tempered and some who are bad-tempered. Most of us, however, become irritable because we have to contend with such a difficult life, owing to the landlords' exploitation. Bickerings and squabbings naturally arise when people don't know where their next meal is to come from.

"Wait till the land is properly divided, till nobody has to suffer from hunger any more and all men and women have learned how to read, and then see. I'm convinced the relationship between mothers-in-law and daughters-in-law will become infinitely better, and so will the relationship between husbands and wives. We must all realise that the old land system is at the root of all disrupted homes. When land reform is put into practice, not only will the peasants be richer, but their family life will also be more harmonious."

All the women—mothers-in-law in particular—were deeply impressed by these words. Lu continued:

"The point, therefore, is that women as well as men must take part in the struggle to overthrow the landlord class. Not only because women as well as men are entitled to their share of land in land distribution, but because women constitute half of this world. Without women, the landlord class couldn't be pulled down, and until they have been pulled down, no peasant, man or woman, can breathe freely.'

After holding similar sessions two or three times, the Hsinlu Village women also organised a small group of their own, with Lo

Shu-min, an activist in the Big House Lo, as the leader.

One day, at the end of a meeting, when all the women were going home, Yueh-lien elbowed her way through the crowd and came up to Lu Yang. Pulling at his sleeve to attract his attention she said, "Look at this, Comrade Lu," and produced a neatly folded letter which had been tucked away inside her clothing. She handed it over with the mumbled explanation that "it had just been delivered, the Mistress hadn't seen it yet" and that "it was all Fu-chuan's idea."

Lu Yang was completely at a loss as to what it was all about. He looked at the envelope, which said, "Kindly deliver this to my wife", and also noted that, instead of putting his name on the envelope as was the usual practice, the writer had merely put, "Read what's inside". He broke open the envelope and drew out a piece of paper, on which were scrawled these words:

"I'm now staying with Uncle Yun in town. Everything is fine. Don't worry."

The signature read: "By someone you know."

Lu Yang had a sudden brainwave. Peng Erh-hu, of course! Who else could it be?

Without delay, Lu Yang sent a message to Fu-chuan to come to the temple.

"Do you know if Peng Erh-hu has an Uncle Yun in town?" Lu asked. Thinking over the question, Fu-chuan suddenly remembered that once when he had to go to town to turn in Peng Erh-hu's crop payment, he had been told to take a couple of chickens and a bundle of bamboo shoots to an uncle of Peng Erh-hu's in town. The place was somewhere near the railway station, he remembered, not far from Wanshou Bridge.

"Good, get ready," said Lu Yang to Fu-chuan. "You may be sent to town, this time without your pole and baskets, but when you return, don't forget to bring back Peng Erh-hu alive."

叁 吐出了苦水

彭二虎逃跑，彭荫庭被捕以后，当年车水马龙的彭府就变成了一个鬼魅魍魉的大庙了。20多间房屋大部分贴了乡政府的封条——查出武器的屋子，还钉上木板。彭二虎的大老婆披了件灰色道袍，整天阖上眼睛不停地敲着木鱼，声音单调而细碎，在这广大的院子回响着，难怪月莲时常感到像住在棺材里一样。

这两天，村里又是锣又是鼓，福全和月莲却都闷在“棺材”里。所有几天来的变动在月莲脑子里只留下一个“道德”问题：彭二爹不该这么丢下大奶奶，他没有良心！福全在担心着土改时候彭二爹送给他的那五斗七升田会不会也被分掉。

11月28号的黄昏，福全刚坵打里挑水回来的时候，灶房里，卢同志已经在等着他了。

福全第一个反应是：穿制服的又捉谁来了？

“福全，挑好多担了？”卢同志笑嘻嘻地说，话又亲切又带着关心，好像老朋友见了面似的。福全还是绷着脸，但是心里的惧怕已经去掉一半了。

“人就剩三个，挑不到两三担就够了。”福全一面解下桶口的绳子，一面说。

“你是从哪点挑来的？”卢同志赶过去把扁担接过来，顺着灶房乌黑的墙竖起来。

“从古坵那点——通练江的活水。”这时福全敢抬头来正视这个不速之客了。他趁着苍茫的光线，打量着卢扬。

“隔这里有好远？”当福全提起水桶往缸里倒的时候，卢扬问了，而且语调迫切得直好像他也想去挑几担来。

“嗯！三里路足有。”福全在脑子里量着。

“三里路？”卢扬等福全把空桶放下时，过去摸了摸这个长工的肩膀。“解放以前你一天挑几担？”

解放以前，喝！彭家四个长工，一个司账的，川流不息的客人，这个师长那个司令官的，十来口子，灶房里家伙一洗就是一大堆。

“那时候苦了，七担八担也是它！”福全叹息了一声。

福全大约是想烧点水。他往大锅里舀了点水，又从屋角抱来一捆柴。

“七八担，一担三里路，”卢扬自己在计算着。“那么你一天光挑水就得跑二十多里路，你还做别的吗？”

“有的做呢！”福全自己也不相信今天会这么清闲，“喂猪，喂牛，喂洋狗。还得沤粪，种田。”

“你种好多田呀？”灶洞里，柴火嘎吧吧地干响着，把福全那张受磨难的脸映得忽红忽紫的。他的眼睛对了火焰呆呆凝视着。他心里是第一次盘算着自己过去干的活。他把一丘丘的田加在一道，才得出个总数来：

“一石八斗田。”

卢扬在田里帮过工，但是从没单独种过田。一石八斗是很大很大一片田，又得刨，又得施肥，又得拔草，又得收割。望着福全枯瘦的身子，他心里又是同情又是佩服。

“一石八斗田能出七十石谷子哒。”卢扬掐指估算着。

“那得好年成！”锅里冒起热气了。福全站起来，拿过一只脚盆来。“可就是怕涨水。涨水一淹，出得五十石谷子。”

“那么彭二虎把你好多谷子呢？”卢扬这时坐在灶边上了，从袋子里掏出一根烟卷，让了让福全，福全摆手。他便自己燃起来了。

“那得看年成了。”福全哗啦啦洗着脚，回答着。“有时候十石，有时候七八石。我到二十岁才拿到长工钱。”

“才把你十石八石！”卢扬从灶上跳下来，很不平地说。“他收佃户的租也按年成吗？”

这句话使福全发了一下愣。他还没想到过这一点。“你帮他干了好多年了？”卢扬又往下问。

“从六岁就帮他放牛。”这么说着，许多痛苦的记忆都涌出来了。“慢慢也打些杂活。到十四岁，我爷死了，我才当长工。今年我二十四了。”

“你爷怎么死的？”

“他呀，”热水浸着福全的脚心，他心窝里酸辛地，想到他父亲死得惨。“日本鬼子弄死的。”

“你二十四了，还不该讨个堂客？”卢扬也看出福全不愿提起他爷来，就转了语锋。

“没得本事，拿么哩养呀？”福全叹了口气。

“没得本事？”卢扬一只脚踏在灶边，扭了腰，不服气地说。“你一天挑七八担水，走二十多里路，又喂猪、喂牛，一年种一石八斗田，要出六七十石谷子，你没有本事？”

“又没本事，又没运气！”福全这时心里有些替自己抱屈了。“二老板能写会算，他大门不出，二门不迈，一年到头吃喝不愁！”

嚷“傻老弟！”卢扬又是气又是笑地这样叫出来。他望着福全那双劳动的脚，青筋凸起的地方还挂着泥巴。“他不是有本事，有运气，他是靠土地和封建势力来剥削你！”

“剥削？”福全不懂这个名词的含义。

“剥削——就是明抢暗夺。”卢扬用手指比划着。“譬如你种了七十石，他只把你十石，那他就是剥削了你六十石。你帮他做了十八年工，就算他每年把你十石吧，他还是剥削了你一千零八十石谷子！”

“但是田是他的呵！”福全是用很微弱的声音反驳着。

“他的田是何处来的，你说说看！”卢扬和福全同时站起来了。

“他老爹传下来的，大爹二爹，每人一份。”福全在替彭家辩护着。他心里其实是在替自己抱着不平。

“他老爹何处来的田，你说！”卢扬像审案那么斩钉截铁地问。

“他老爹在前清时候当县太爷哩。”福全说。

“对了！”这个答案似乎刚好做卢扬的例证。“县太爷有不刮钱的吗？县太爷有好东西吗？告诉你吧，彭二虎的老爹是从你爹身上刮下来的钱，用那钱买的田又来剥削你！”

福全没话可说了。他的脑袋好像突然放上了一块湿漉冰凉的手帕。他倚在灶边上发起愣来。

那天晚上，卢扬带了条被子来找福全来了。两个挤在一张又窄又破的床上，攀谈了多半夜。

福全这时候已经把卢扬当做大哥哥看待了，就告诉卢扬说，他六岁的时候，妈妈带着七个月的身子替彭二虎的大老婆到楼板上去取柴，梯子一滑，她人跌下小产了，唉哟了两天就咽气了。他爷给彭二虎挑谷子，碰上了日本鬼子，结果，被日本鬼子在七星岗的堤上打死了。

在谈话中间福全就提了这么个问题：地主送给雇贫农的田，将来分不分呢？

“老弟，”卢扬问，“是不是彭二虎把田给你呢？”

“把我五斗七升，”福全老老实实地说了。

“比方说，”卢扬把身上的被子撑起来，“我这条被子本来是你的，是我硬抢来的；如今，你就要收回了，我由被子里掏出一撮棉花来说，哪，送把你啦！你知情吗？”

“不呀！”福全一面说一面在想着彭二虎那些日子搞的字据。

“那么，”卢扬欠起身来对福全说，“彭二虎的土地早已不是他的了，土地已经回了老家，是种田人的了。土改是什么？还不是农民们把田收回来自己耕？你福全是农民里最有资格分田的，因为你最贫，最苦，最劳动。那五斗七升田，本来是你的啦，傻瓜！”

这时，福全也坐起来了。

“彭二虎，狗养的！”福全气得快哭出来了。“我上了他的当了，我得跟他要回来。”他恨不得马上就要穿衣服。

“要回来什么呀？”卢扬好奇地问。

“要回那字据！”福全头一次把自己一件心腹事说出来。“彭二虎一手把我一张卖田契约——他说也不跟我要钱；一手要我在一个字据上打指模，答应他蒋介石回来以后，田还是他的。”

“呃，这个王八蛋！”卢扬也愣了。他把福全按到枕头上宽慰他说：“你放心吧，那个字条没有用处的，因为蒋介石永远不会回来了。不过，你从这个可以看出地主的心有多黑！”

第二天早晨月莲到灶房里来舀水的时候，福全把头天晚上的话告诉了她，并且约她吃过晚饭到新五的家里去。

那晚上，新五的两间破房快被挤塌了，疯媛驰，福全，光林叔叔，一共十来个人。后来，月莲也蹭进来了。酸溜溜的朱耀先听说卢扬同志召集开会，也想挤进去。新五把他拦住说：“我们今天大家想商量活捉彭二虎，待我们捉到了你再来罢！”

都坐下后，新五领头来诉苦。

“我是已经被彭二虎送进炮眼的人。”彭新五说。“没有共产党，我今天早埋在乱死岗子上了。”我家本来有五斗田，两弟兄倒中了三次丁；1938年我大哥中了丁。那时候彭荫庭正做乡长，他白天派保长来催丁，夜里派保长来催款。结果，家里卖掉三斗田，用一百多光洋买了一个丁。抓我哥哥的时候，彭二虎喊我去白给他做工，不然就叫他哥哥一道来抓。我白白替他帮了两个月的工。可是没多久，我哥哥又中了丁。那时乡公所的签筒子就好像变戏法的匣子，只见穷人中；左近大户，像罗培荣，四个儿子一崭齐，就一回丁没中过。黎朝初的三个男的也没中

过。疯媛驰的德明，还是一个独崽哪，一抽就中！等到1945年彭二虎当了乡长，来抓我的时候，我家里已经一升田也没有了。白绳一绑，我就得跟着走！

“连枪还不会放，他妈的就给编到七十五师，一送就是前线。那时候哪里知道共产党是帮咱农民打天下呀，反掉过头来打共产党！但是怎么说，和共产党无仇无怨，打得不起劲！头一回在济南上前线，跟着前面的部队退下来了，根本没开火；第二回在沈阳，那兔崽子陈诚硬拿人往火坑里推，一颗子弹穿进我这里（指指肋下），又是夏天，在一棵树根上足足躺了三天，伤口都爬了蛆也没有管。还亏了国民党军队垮得快，两个解放军的卫生员把我抬到后方医院，把子弹挖出来，把伤口洗好，缝上，上了药。在医院教我学文化——那是我从娘胎里出来头一回认得字。我明白了为什么革命好，反动派不好。”

“好了以后，我要求到前线去打国民党反动派——我们很多弟兄们都去了。上级请大夫验了验我的身体，说我流血过多，不适宜于战斗，就留我先在后方卫戍。先在张家口封锁，北京解放以后，又去卢沟桥修堤。今年我要求参加解放海南，上级又验了验，决定要我复员了。（掏出复员军人证来。）”

“几列车的复员军人从北京出发，沿途有人来接，走的时候，每人一双鞋袜，一套军装，一些钱——相当于五百斤大米，照着参军的年限算的”

新五没说完，疯媛驰已经哭出声来了。她是想着，如果德明也领着一双新的鞋袜、一套新军服回来有多么好！“我这老婆子今天也得吐吐苦水！”她扶着拐杖，站起来说。“我伢崽德明，不定埋在哪块乱死岗子上哪！（她哽咽着。）这笔账我非跟彭二虎算不可！我生过四个女的，两个男的。我命苦，就剩下春杏一个了。四个小子可都不是因为我婆子不会带才死的。一个个生下来没的吃，没的盖，伢子落地连块包布都没得。向邻人借了把谷草，但是有的盖了又没的烧，于是就抽身上盖着的谷草，越抽越薄，愈薄伢子愈冷。一年到头帮地主做工，就混到这个地步：大年初一都还得上河滩去挖藕！吃不饱，我的奶头永远瘪瘪的。一个一个，一连死了四个伢子，那第三个的确是我捏死的。那是我身上的肉呵，我捏的时候能不心痛（哭起来）！但是早捏死比看着饿死还强些。死来死去，我就剩下一儿一女了。彭二虎这个该死的，还把我东一把西一把讨来的米养到十九岁的德明抓了去，抓了去，就丢下我这婆子

不回来了”

疯媛驰呜呜哭起来。新五的老婆弯了个大肚子把她扶下来，劝她先歇口气。不成，她哪里停得住！

“我这五十三年，就没过过一天好日子！两岁没了娘，八岁就给人当小媳妇，先挨婆婆的打，后来去地主家里做工，又挨地主婆子的打。一年吃三个月的黄花菜，下半年就靠茴丝过日子，一年到头闻不到一点子的猪油味。”

“和老馆子（丈夫）干了二十多年，才置下四斗水田。黎三是个老实人，就是身子单薄。大热天他帮地主在田里像畜牲一般地车水，一回晕倒了，地主睬也不睬，还是我卖一斗田给他治的。日本鬼子来了，那个大烟鬼彭荫庭又帮着日本人拉，把黎三拉去背子弹，挖壕沟。一天不晓得为么哩不顺眼，狠狠给了他一顿棍子。黎三差不多爬着回的家，衣服都给血浸透了。后来，身上的伤冒了黄水。嘴里吐着一块块的血，这回我又卖了一斗田，可没把他治活。他咽气的时候，春杏才七岁！我又卖了一斗田把他埋葬的。”

“我们母女两个就剩一斗田了。第二年青黄不接的时候，和大屋罗的罗培荣借了五升米，一斗豆子，过了两个月，他要我本息十二石谷子。就这么，他把我那一斗田也滚去了。”

“春杏跟着我讨了三年饭，有上顿没下顿的，我实在忍心不下了，才把她送出去做小媳妇的。这年月，地主我攀不上，穷人自己还不够吃，谁接得起小媳妇呵？我当过小媳妇，我难道不晓得小媳妇的日子吗？新五，我不是没心肝的人，我不疯，我有苦没地方告诉呵！”

卢扬赶紧走过去说：“疯媛驰——大家以后不要叫她疯媛驰了。疯媛驰，你不疯，你吃的苦头太多了！”卢扬屈指数给大家听：“你做小媳妇受气，那是封建家庭的苦；你的丈夫一面受地主剥削，一面又被帝国主义压迫，那是我们农民双重的苦——也是我们农民的两大敌人。彭荫庭、罗培荣都已经捉起来了，现在我们一定把彭二虎也捉起来，把坏蛋全抓起来。这是大家的事，得大家来办。政府一定给我们撑腰的。”

月莲和在朱耀先家里做奶妈的涂玉贞都哭了。

“地主咯种家伙真可恶！”涂玉贞擦着眼泪说。“看见你家屋上冒烟，他就来端你的锅。”我丈夫本来也有几斗田。公公死了以后，彭二虎硬说我们欠了他八十光洋，说，不相信可以到县里去打官司。他到县里衙门走动像跑自己的灶房，我们哪敢和他打！几斗田就这么滚掉了。

“解放前一年，我丈夫帮罗培荣打场，说好了每人每天打三石五斗谷子，工钱一斗二升五合一天。那时候因为禾干了，有些草上巴些半米谷，没打脱，罗培荣看见了，背着手不做声。等领工钱时候，他才说：你打了七十扎草，每扎草上还剩下二合多谷没打下来，二七不是一斗四升吗？哪里还有工钱，不要你补我一升五合就算客气了！这么一来，几天的工都白干！”

“我丈夫气的不种田了，他到洞庭湖上找了个摇船的营生。我呢，自己的伢子喂不饱，帮人家当奶妈。前几天婆婆一定要把我送回娘家，我死不肯走。我不晓得新政府怎么样，反正没有比国民党再欺负人的了。”

涂玉贞说完了，卢扬说，她没回娘家很好，她可以在这里亲眼看看人民政府怎么样。它不但不欺负人民，而且还替人民捉拿那些欺负人民的恶霸。

“我这话假不假？”卢扬问了一声。

“一点也不假！”屋子里的男女老幼都这么说。

“但是，”卢扬趁势说，“你们自己得起来主持自己的公道！你们晓得哪个是地主，哪个是坏蛋——他们所有的证据都在你们手里。政府不能错办一个人。所以，你们有证据的，得拿出证据来。昨天——”他望了望福全，“昨天福全就提出一件关于彭二虎的证据，有了证据，政府就好办事了。”

朱光林撸撸胡子说：

“我老头子也要向罗培荣那坏蛋算账哪！1939年，我在黄古岭还种着胡斌灿的三石水田，我自己还起了三间茅屋。忽然东家想在街上发展了，就把一部分田卖给了罗培荣，黄古岭我那三石也在内。转手的时候，胡斌灿还卖了个‘顺水人情’，保我五年不退佃。哪晓得罗培荣刚接过手去就把我喊了去，提了三个条件，不答应就锯我的锄头把（夺佃）。他一要加三成租；二呢，三年之内不许我上山砍柴；塘里不许我放鱼，已经放的鱼种要我拿出来。我听了气得差点晕过去了，然而我还是硬了头皮向他苦苦哀求。他一面剔着牙龈一面还对我甩着文说：‘合则留，不合则去！’”

“当时我很想和他拼一场，但是一家子好几口人，邻人又都劝我说，豆腐跟刀子拼，还能拼得出什么名堂来！”

“我呵，我在他手上遭的殃，数也数不尽。租了他的田，就等于把命根子给他抓到手了。我连踩在他脚底下的泥巴都不如！”

听着大家诉苦，靠门坎的月莲把眼睛都哭肿了。卢扬要她也来诉诉苦。

“你说说吧，二婆子怎么打你！”福全催她。

月莲只是咬紧了下嘴唇，呆呆地望望福全，望望大家。眼泪珠子不停地沿着双颊往下滚。眼泪后面，射出来强烈的愤怒。

这样的诉苦会一连继续了四五个晚上。头一晚上，大半都是彭朱家屋场的人，以后，别的屋场同街上都有人来了。卢扬在每次诉苦以后，必然做一些宣传启发工作：用今日的形势同1927年来比，说明变天的不可能；用以后的美丽远景来说明土改的必要；又用地主和农民生活享受的比较来暴露地主剥削的残酷，说明谁养活谁的道理。

“同是姓彭，”卢扬指着彭福全说，“然而福全吃的是苕丝，睡的是牛棚；彭二虎吃的是鸡鸭鱼肉，睡的是高大的瓦房，里面又是琴棋书画，又是虎皮席子。你们想想，是宗族管事呢，还是阶级管事？”

诉苦中间农民时常提到命苦，八字不好。卢扬就拿工作队的赵洁民同志打了个比方：

“老赵是个山西农民。当年他也是帮人做长工，自己一丘田也没有，一个大字也不识。十年前，日本鬼子侵略华北的时候，八路军——就是现在的人民解放军，到了山西，八路军走到那里专找穷人帮忙，于是，就找到了老赵。教他识字，把他思想打通，跟地主斗争得坚决。后来农民选他当农会委员。他做事认真负责，后来又选他作乡长，一直当了五台县的副县长。今天你看他，能念、能写、能演讲、能办事。家里分到了田，他出来给人民办事，能说这是命吗？如果他当长工认了命，不再反抗，那才上了八字先生的当哪！”

这样，新炉村的雇贫农小组就成立了，大家并且公推彭新五做组长。

第二天下午，雇贫农们又照着卢扬的提议，男的把自己的妈妈、媳妇，女的把自己的婆婆、小姑子约了来。有些婆婆从表情上看，来得还有些勉强。

在这个会上，黎媛驰，涂玉贞，新五的老婆都带头诉了苦。连月莲也把她家里怎样欠了彭二虎两石谷子，彭二虎怎样派人硬把她拖了去的话说了，并且随哭随述说彭家两个婆子怎样打她，说得许多人都流了泪。

街上一个手工业工人许宗良的媳妇起来诉了一番受婆婆的苦，卢扬

等她诉完，起来插嘴说：

“咱们农民自己的吵嘴纠纷和受地主阶级的压迫是两回事。几千年来，地主没有一个不欺负咱们的，这个阶级咱们必须把它打倒，至于家庭里，有的脾气好，有的脾气坏；有的今天好，明天坏；而我们所以脾气会坏，主要还是因为地主剥削得太厉害了，日子太难过了，上顿不保下顿，于是彼此吵起嘴来。等田分了，大家肚皮不再饿了，男男女女都认了字，你看，那时候媳妇对婆婆会更孝顺，婆婆也会更疼媳妇，夫妻也会更和睦亲爱起来。所以，旧的土地制度是拆散家庭的祸根，土改是为了把农民的家庭变得不但富裕，而且亲热起来。”

这段话，深深打入了妇女——特别是婆婆们的心坎。

“因此，”卢扬接着说，“妇女们应该和男人们一道起来打倒地主阶级。这还不只是因为分田的时候，男女都有份，而是因为妇女占半边天下；没有妇女，地主阶级就打不倒；打不倒地主阶级，男的女的农民就都翻不了身！”

这样的会开了二三次，新炉村的妇女小组也成立了，组长是大屋罗的一个积极分子罗淑敏。

第二次妇女会开完以后，妇女们都走了，月莲却由人丛中挤到前边来，扯了卢扬的袖子说：

“卢同志，你看！”她从里衣里掏出一封折了许多叠的信来，并且低声咕哝着，“刚送来的，大奶奶还不知道哪。是福全的主意。”

卢扬起先还有些莫名其妙，信封上写的是“面交内子”，下面署的是“内详”。但是打开信封，看见八行书上潦潦草草地写着：

“吾现寓县内云叔处，一切甚平安，勿虑。知名不具。”

卢扬忽然灵机一动，这是彭二虎呵！这狗养的，还有人替他送家书！

卢扬马上把福全找到祠堂来，问他可知道彭二虎县里有个“云叔”。福全想了想，有一回给彭二虎往县里挑公粮，曾经捎过几只鸡、一捆笋给他一个叔叔。他还隐约记得是靠火车站那点，离万寿桥不远。

“你准备一下吧！”卢扬对福全说，“这回你得空着肩头上去，挑一个活的彭二虎回来！”

4. EXTRACTING THE POISONOUS SHAFT

When he saw that the organisation of farmhands and poor peasants had thus got underway, Chu Yao-hsien, whom a preliminary investigation revealed to be a rich peasant, grew bitter. He would say with a wry smile, "Wasn't I the one who had to go up to town to see to the autumn taxation business? Those illiterate bumpkins, what do they know besides pounding mud-cakes?" The insinuation was perfectly clear—land reform could not succeed without him. When this reached the ears of the farmhands and poor peasants, they were naturally indignant.

Tu Yu-chen, who was working as a wet-nurse in the Chu family, said, "He saw to the autumn taxation, did he? He was a representative, but he cheated by not reporting the five *tou* of land he had on the river bank and paid three or four piculs less grain tax than he should. He certainly has got nerve, still swaggering about the way he does!"

With the memory still fresh in their minds of how Chu Yao-hsien used to harp on "supporting the People's Government", the whole group got furious. Some said he should be arrested at once.

"Don't let us forget that Peng Erh-hu, and not he, is the man we want," Lu Yang pointed out. "Chu Yao-hsien is sore simply because he wants to find an outlet for his own petty jealousies. If he should actually do anything to undermine our land reform, like spreading rumours or dispersing properties, then we would certainly arrest him."

Two problems were taken up in the Small Group that evening: the organisation of a people's militia and closer unity with the middle peasants to enlarge the ranks for struggling against the landlords.

Around 30 people had registered to join the people's militia during the last few days. Those who were under 18 or over 30 had to be turned down. According to regulations, people between 30 and 60

are only allowed to join the militia after the completion of land reform. This is because during land reform a militia man has quite a strenuous job, requiring physical strength and endurance.

Following the establishment of the Small Group of Farmhands and Poor Peasants, a number of middle peasants, who had shown courage in unmasking the landlords' schemes, had also been drawn into the struggle. At first this had given rise to some misunderstanding on the part of a few poor peasants who feared the drawing in of new members would mean cutting down their future share of land.

Lu Yang, however, made it clear to them that land distribution is not the sole aim of land reform, and that political emancipation, with the complete overthrow of the landlord class, is equally important for the peasants. To achieve this, farmhands and poor peasants must join hands with the middle peasants and work at it together, with the former as the backbone.

But in this united front, a rich peasant like Chu Yao-hsien still could not be allowed a foothold in the Peasants' Association. The sight of more and more middle peasants joining the Association while he himself was excluded further tormented him. He began to act queerly.

For instance, in ordering his wife to prepare something good for him to eat, he said:

"In times like these, it would be downright foolish not to eat all that one can get hold of. After all, who knows when the Third World War might be here and the atom bombs dropped!"

Little did he know that someone quite nearby had already made giant strides in her political awakening. Tu Yu-chen was breastfeeding the baby when her ears caught that remark and she spoke up with some vehemence, "It's wrong to say things like that!"

"How do you mean, wrong?" Chu Yao-hsien really didn't know what the world was coming to. Imagine Tu Yu-chen using that tone to him.

"Because you're making up rumours!" Yu-chen pointed out sternly.

The way Chu Yao-hsien reasoned out the matter was like this:

You, Tu Yu-chen, are paid and fed by me and you dare to accuse me of rumour-manufacturing. All right, out you go!

Buttoning up her jacket, Yu-chen left without a word. She knew whom she wanted to find: Hsin-wu and Lu Yang.

The next morning, Fu-chuan and the Secretary of the *hsiang* Peasants' Association went up to town together. They had an official letter with them made out by the Huilung *hsiang* government and addressed to the Bureau of Public Security in town, introducing them and explaining what their mission in town was. There was another letter, a letter of accusation, signed by the *hsiang* Peasants' Association, in which landlord Peng Erh-hu's crimes were enumerated. It closed with this sentence, "We peasants want to appeal to the Bureau of Public Security to see that justice is carried out."

Soon after Fu-chuan and his companion left, Hsin-wu, together with two militia members, set out to arrest Chu Yao-hsien and escort him to the District Government. Returning in the afternoon around two o'clock, Hsin-wu made the following report to the *hsiang* chairman. "I told the District officer of Chu Yao-hsien's suspicious conduct, how he spread rumours about land reform and disturbed us peasants. 'Please keep an eye on him for us.' I said, 'and don't let anyone bail him out without our consent.'"

Chu Yao-hsien's wife got really frantic. Finally she got eight "high-class gentlefolk" of the village to write out a petition for her. The letter was duly written, but someone would have to deliver it in person to the District Government. This unpleasant duty all the guarantors declined to perform. In the end it was the fiftyish Lo Chao-chen who volunteered his service.

Well, he went and came back, and Chu Yao-hsien was still not with him. Sadly shaking his head, he said to Chu Yao-hsien's wife, "*Ta Sao* (big sister-in-law), a guarantor has to have certain qualifications. You'd better strike my name off from the list. I don't have those qualifications. I used to lend out bits of money from time to time and the interest rate was apparently a little too high. I don't know yet

what the peasants will do to me!"

At this, the other seven naturally withdrew their support too.

It was not till then that Chu Yao-hsien's wife thought of the head of the Small Group of Farmhands and Poor Peasants, Peng Hsin-wu, who actually escorted her husband to the District Government after his arrest. She went to his home and upon entering, immediately went down on her knees in front of the man who used to work for her as an odd-jobber before liberation. Hsin-wu helped her to her feet and said, "You'll have to speak to Tu Yu-chen about this."

That evening the problem of Chu Yao-hsien was thoroughly gone into in the Small Group of Farmhands and Poor Peasants. They discussed how and under what conditions they would bail him out. The final consensus of opinion was: one, upon his return Chu Yao-hsien must publicly admit his mistakes in a mass meeting; two, he must undertake to guarantee never to spread rumours again or undermine in any manner the carrying out of land reform; and three, he must turn in the crop payment he cheated the government during the period of autumn taxation. Yu-chen was the one who put forward these three ideas, and the others all agreed.

Three days later Chu Yao-hsien was let out of jail. Three days had already brought him down quite a bit. At a public meeting held that evening, the now subdued Chu who had little resemblance to the "scholar" of old made his apologies before the peasants. He promised never to spread rumours again or to do anything detrimental to land reform. As for cheating the government during the autumn taxation, he said that this was true and that he would go to the *hsiang* government immediately after the meeting to make a clean breast of things and to hand over the amount he owed.

Peng Kuo-chang, a teacher at the primary school in Big House Lo, was holding a class when he heard someone yell inside the homestead, "Peng Erh-hu is caught!" Throwing down the textbook, he rushed out of the room and hurried after the peasant who had been shouting the news.

"Is it really true?" he asked.

"Every single word of it," said the peasant with pride. "I saw it with my own eyes in Shihma *hsiang*. He was all tied up with ropes, and Fu-chuan, who was following behind, had on a grin which practically stretched from ear to ear."

When Peng Erh-hu was brought back to the District Government, the Second Divisional Tribunal of the People's Tribunal immediately decided to have an open hearing in the Huilung *hsiang* government office. District Government Chairman Shao Tsu-chang was to act as judge, and eight peasants were invited to make up part of the jury. Among them were Yueh-lien, Fu-chuan and one Li Chen-nan, who had worked as a farmhand for Peng Yin-ting.

By then the Huilung *hsiang* militia could already boast of possessing weapons of a rudimentary kind—namely, spears. True, they were primitive weapons, but in the hands of grimly determined peasants, their gleaming points could still send a shiver down the spines of landlords. Behind the militia were crowds of peasants from the village.

Confronted with this awesome display of the power of the people, the three landlords resorted to all kinds of crafty evasions. It was too bad that right there sitting among the jury were farmhands who had toiled for them and maidservants who had heated their opium and emptied their chamber pots. They simply had to plead guilty to some of the charges.

For instance, Peng Yin-ting admitted that he had collected together 80 sacks of copper coins for the Japs, for how could he deny it with Li Chen-nan as a witness to everything? Didn't Li Chen-nan have to transport some of the coins in a hand-cart himself and get tenants to help him ship off the rest? Another more heinous crime was also laid at his door—that of abetting the Japs in capturing two young guerrilla fighters. He was present when soldiers of the "Japanese Imperial Army" hacked off their heads on the open ground in front of the ancestral temple. Later, at the order of his Japanese masters, he

had their heads tied to bamboo poles and planted on the dyke near the Seven Star Slope for exhibition until they rotted. Finally, Peng Yin-ting had to confess to yet another charge. He admitted that a remnant organisation of the "Circle" had its headquarters in his house. But "the members had disbanded long ago". At first he denied that he had any small arms, but two ex-Circle members, a carpenter and a builder, who had helped him construct a secret double wall, testified and gave the whole thing away. Two six-shooters, one revolver, 500 cartridges and one huge trunk of jewellery and valuables were found in the hiding place.

Now for Lo Pei-jung. He admitted that prior to liberation he had treated peasants in the village somewhat roughly since he thought, with his son-in-law serving in the KMT army as a battalion commander, he had nothing to fear. Shortly before the arrival of the Land Reform Work Team, he had twice visited the Peng brothers. According to him, Peng Erh-hu had made repeated attempts to contact that KMT battalion commander through him. He did ask someone to pass the word but nothing ever came of it as later on his son-in-law was reported to have been arrested in Canton. As for rumours, he confessed he might have spread around a few, but not intentionally.

Peng Erh-hu at first would not plead guilty to any of the charges. Crossing his arms over his breast, he said defiantly, "I've been told the People's Government is reasonable and would never browbeat people. Now let us see!" The fake deed of transaction which Fu-chuan produced momentarily threw him off-balance. To make it worse, a search of his person revealed that he had on him a written statement with Fu-chuan's thumbprints on it saying that the land was to revert back to its original owner in case Chiang Kai-shek should come back.

Peng Erh-hu was tongue-tied. Before he had a chance to recover his composure, accusations from different quarters began to pile up.

One accused him of embezzling public money for dyke repairing when he was Village Elder, causing yearly floods. Grandma Li's shrill voice was also heard. "My Teh-ming! Give me back my son!" The

school teacher Peng Kuo-chang said, with a catch in his voice, "Peng Erh-hu, how did my father die at your hands? My aunt didn't tell me until after liberation that you were responsible for his death, but I still don't know the details. Tell me!"

Of the three criminal landlords held in temporary custody in the temple, two had blood on their hands. Peng Yin-ting was guilty of collaborating with foreign imperialism and causing the deaths of patriotic youths, and hiding weapons during land reform, with the intent of carrying out subversive activities. Peng Erh-hu had killed revolutionary cadres during the First Revolutionary Civil War of 1927. After the victory over Japan, he had committed many corrupt and fraudulent acts besides helping the KMT by levying taxes and pressganging able-bodied men. He, too, hid weapons during land reform and spread rumours to undermine the land reform.

Lo Pei-jung was not much better, though no death could be traced to him. A tyrant landlord, he had consistently adopted a high-handed attitude towards peasants and by spreading rumours had also tried to sabotage land reform.

The confessions of the three prisoners and recommendations of the Divisional Tribunal were passed on to the County People's Tribunal over the telephone. In the evening came the telephoned reply: "Regarding Lo Pei-jung's tyrannical deeds before liberation, the peasants should certainly take them up when they settle accounts with him. But since he also went in for rumour-mongering during land reform, he should be duly punished. The five-year sentence which the District Government recommended is too light for such a misdeed. To give other landlords an appropriate warning, it should be changed to a longer term, the actual length depending on the masses' accusations. With regard to the Peng brothers, this Tribunal thinks the death sentences suggested by the Divisional Tribunal are just. However, a meeting for public judgement should be held before their execution, to make sure that all peasants have an opportunity to express their opinion and to pour out their grievances. Then execute them on the

spot in the presence of the masses, so that the peasants can shake off the last trace of dread they have for the landlords and other landlords may thereby receive a timely warning."

December 17th. The sky was overcast. On the Huilung *hsiang* field-paths one could see here and there red flags fluttering against a grey backdrop. Peasants, men and women, beating gongs and drums, once more poured into the open meeting place in front of the ancestral temple. Again a platform was made on the terrace, in front of which were placed two square tables. A horizontal tablet was hung on the spiked railing outside the temple with the characters: "Second Divisional Tribunal of the County People's Tribunal: Meeting for Public Trial" written across it.

At around ten, the Judge together with 16 members of the jury walked to the platform amidst prolonged, enthusiastic applause from the masses. Following them came two cadres to keep a record of the trial. The meeting opened with the singing of the national anthem, with the students of the primary school at the Seven Star Slope in the lead. Then everybody took off their hats and bowed to the national flag and to the portrait of Chairman Mao.

"Today," announced the Judge, who rose to his feet, "we are going to pass judgement on three criminal landlords from Huilung *hsiang*."

At this the three prisoners, handcuffed, clambered up onto the two square tables in front of the platform, under the close surveillance of a squad of militia and six guards from the District Government. The guards were armed with rifles or six-shooters with floating silk tassels. Peng Yin-ting was trembling all over, his head bent low. Lo Pei-jung made a deep bow to the audience when he got up. His face was as pale as the mackerel sky. Peng Erh-hu's mouth was clamped shut, and with cruel bulging eyes he scanned the jostling masses below, expressionless.

"We've caught these rogues," continued the Judge. "They couldn't escape if they had wings on them, so you don't need to be afraid of

them any more. Now is the time for everyone to pour out the grievance he has kept in his heart for years—murder, swindle, rape, ill-treatment, everything. The final verdict of this tribunal on the prisoners will be based on your evidence and your opinions."

The first to reach the platform was a woman in her early fifties.

"My name is Peng Shu-min," she said, fingering the red insignia pinned on her breast. One of the first Huilung *hsiang* women to join the Peasants' Association.

"I am Peng Kuo-chang's aunt, and I am accusing Peng Erh-hu on behalf of my third brother, Peng Chiang, Peng Kuo-chang's father. In the 16th year of the Republic,¹⁰ my third brother was Vice-Chairman of the local Peasants' Association. At the return of the reactionaries, he took me and his wife, and their 3-year-old son Kuo-chang to the hills, where he became a member of the Red Army. My old father was thus left alone at home.

"Peng Erh-hu had a group of soldiers from the 'Countryside Liquidation Corps' quartered in our house. They ate up everything they could find and burnt and destroyed. What's more, they dragged my father, who was then in his eighties, to the temple where they strung him up, beat him, and trampled on his back, in order to get him to hand over a list of the members of the Peasants' Association. My father's spine was broken but he died without giving them the list.

"In the 12th moon of that year, my brother thought he'd come back in disguise and look my father up for the lunar New Year. Before he had a chance to set foot inside the homestead, Peng Erh-hu caught him. He was stabbed several times and left to die. After he died, we still didn't dare collect his body; so finally, we had to ask some country people to stuff it inside a sack and take it to the foot of the hill to be buried. I had a glimpse of him before they lowered him into the grave. His ten fingers were covered with bruises from the bamboo pricks they forced between the flesh and finger nails and all his upper and lower teeth had been knocked out...."

Her face was white with fury. She pointed an accusing finger at

Peng Erh-hu. Tears of sympathy trickled down the cheeks of the militia members standing nearby.

With raised fists, the audience below shouted in one voice, "Down with reactionary landlords!" "We demand that Peng Erh-hu be shot!"

Standing there as though rooted to the ground, Peng Shu-min tried to go on, but couldn't, because there seemed to be a lump in her throat. Finally she managed to get these words out:

"Killing one of the chickens we have around the house would practically scare me to death ordinarily. But now I feel I could kill this Peng Erh-hu with my bare hands!"

A young peasant was the next to appear on the platform. Bowing to the audience, he began:

"My name is Tien Yi-che, and I came from Tienchialung in Shihchiao Village. In 1939 when the KMT said they would co-operate with the Communists, the New Fourth Army marched up north to fight the Japanese, leaving behind a People's Livelihood Team, with my father, Tien Chih-cheng as its captain. The Team was to mobilise the peasants into guerrilla units to fight the Japs.

"Seeing the people organised and armed, Peng Yin-ting began to feel nervous about the security of his own position as Village Elder, so he sent for a whole regiment of Yang Sen's (a KMT general's) men and made a raid on the Team's headquarters on the night of March 23, taking seven comrades away. Later on they got on the track of my father, the captain, and to this day I've never heard from him.

"The arrival of the Japs made no difference to Peng Yin-ting's position. He still continued as Village Elder, and not for one instant had he taken his eyes off our family. Without even bothering to give a pretext, he took our ox away from us. It finally got so that we had to take other names and live away from home. We didn't dare come back until after liberation. Nothing short of death is good enough for this traitor, Peng Yin-ting!"

Paper flags crackled and the square was a forest of upraised fists. The crowd yelled, "Down with this traitor-landlord!" "Wipe out

reactionary power!" "A life for a life!"

Mass sentiment continued to run high when Fu-chuan and Grandma Li unburdened themselves of their grievances.

They were followed by a young peasant, Lo Yung-nien. With a deep bow he introduced himself and began: "I'm landlord Lo Pei-jung's nephew. Sometime before the Land Reform Work Team came here, Lo Pei-jung once gave me some of his title deeds to be taken to a photographer's shop at the Seven Star Slope to be photographed. 'So that I'll have some evidence on hand once the real deeds are burnt,' he said. Also he hid two of his trunks in the attic of my house. The way I looked at it in the past—well, he's my uncle, isn't he? I hadn't the guts to refuse him. Now I realise that he's a landlord, and I'm a poor peasant. He has fish and meat by the mouthful, and rotten potato is all my family ever tasted. I was a fool. I can't face Chairman Mao if I don't deliver at once to the *hsiang* government the two trunks he asked me to keep for him!"

The masses again shouted in unison. "Down with criminal landlords who hide and disperse their properties!" "Long live the unity of the peasants!"

It had started raining. But the tense atmosphere did not in any way lessen. A woman tearfully told of how Peng Erh-hu had raped her 14-year-old daughter. The accusations were practically drowned in the shouts from the masses. Hoarse voices were heard, shaking the half-moist fields:

"Shoot Peng Erh-hu!"

"Shoot Peng Yin-ting!"

"Punish the criminal landlord, Lo Pei-jung!"

"We won't go home until the Peng brothers are shot!"

By four o'clock over 20 peasants had poured out their grievances from the platform. Mass sentiment had surged to boiling point. Over and above there was a curious hush of expectancy. Not one person left or took shelter in spite of the terrific downpour.

After retiring to the inside of the temple to deliberate over the

cases, the Judge and the jury came back and took their seats amidst thunderous applause.

The pale features of the three prisoners standing on the tables suddenly became hard and drawn. Leaning a little to one side, they pricked up their ears to listen to the Judge pronounce the final verdict.

"Peasant Comrades!" The Judge's voice was grave. "We have just heard some of the accusations made by local peasants. From these accusations, it ought to be clear to everyone how the landlord class has always worked hand in glove with the enemy of the peasants—whether it was Japanese imperialism or the KMT—to oppress the peasants themselves. The same motive has prompted them to act as fawning lackeys to American imperialism, since American imperialism is directly opposite to the people's interests, too.

"Our verdicts on the three criminal landlords are as follows: Lo Pei-jung, age 40, native of Hsinlu Village, is charged with rumour-mongering and dispersing of properties. Now these are crimes that the people won't tolerate. Not only has Lo Pei-jung dispersed his belongings, but he had made photostat copies of his title deeds, which shows that he is still pinning his hope on the KMT reactionaries. After careful consideration, the jury decided on a unanimous sentence of seven years. Do you all agree?"

There was a great burst of joyous applause and Lo Pei-jung was led away by militia members to be placed in temporary custody inside the temple.

"Peng Yin-ting, age 49, native of Hsinlu Village, has caused the deaths of patriotic youths during the Resistance War. After liberation, he organised superstitious societies and spread rumours to delude the public. Also he has hidden firearms with the intent to plan for an uprising. The sentence for him is—death. Do you all agree?"

The sound of applause that came from below the platform was deafening.

"Peng Tien-pao, alias Peng Erh-hu, age 47, native of Hsinlu

Village, was a captain of an anti-Communist guerrilla team and of the Countryside Liquidation Corps during the First Revolutionary Civil War of 1927, in which capacities he had several times broken up peasant organisations and caused peasant leaders to be arrested or killed. After the defeat of Japan, he succeeded his brother as the bogus Village Elder and spared no efforts in pressganging men and extorting 'contributions' for the KMT reactionaries, with a view to furthering the war against the people. In addition to these, he has been charged with misappropriating dyke funds, with disastrous results to the welfare of the peasants. For him also the death penalty. Do you all agree?"

The applause that greeted this pronouncement was even more enthusiastic. The militia held their spears way up to express wholehearted support, and voices had almost become strained with the shouting of slogans:

"Abolish the wicked landlord class!"

"Long live the People's Government that sides with the peasants in their struggle!"

Peng Yin-ting and Peng Erh-hu were then led off the platform by the militia and the guards. The latter were to see to the actual execution. The masses opened up to let them pass through.

With one arm sheltering his tear-stained face, Peng Yin-ting was hurried along. Intermittent sobs kept issuing from his gaping mouth. Peng Erh-hu's face had taken on an ashen pallor, and his bulging eyes were fixed and full.

When Grandma Li, with her bony fist clenched, edged her way through the crowds and tried to hit him on the shoulder, the guards immediately stopped her. A cordon was quickly formed by them around the prisoners as more blows were about to shower from all directions.

It was now raining harder. Once outside the temple ground, there were not even many trees to take shelter under. But men and women in an uninterrupted stream followed closely behind, almost as though they wanted to make sure that not one prisoner would escape.

The prisoners were escorted to the graveyard south of the temple. From the back of the graveyard came the sound of several shots.

The sound shrilly pierced through the thick, moist atmosphere enveloping Huilung *hsiang*. Sighs of relief were heaved as justice was meted out to the convicted.

"Down with the reactionary landlords!"

"Long live the emancipation of the peasants!"

"Long live the Communist Party!"

"Long live Chairman Mao Tse-tung!"

The masses, for the first time, freed from their dread and restraints, let out these slogans with a voice stronger than ever. The poisonous shaft that was thrust in their bosom was at last extracted. With the disappearance of fear came the atmosphere of freedom the peasants had never breathed before.

肆 心尖上的刺拔下来了

从雇贫农开会起，朱耀先（初步了解他的剥削程度，是个富农）一直是酸溜溜的，他撇了嘴岔说：“当初秋征就是我上县里搞的，乡里的事不是一个大字不识、只会搓泥巴的种田人搞得来的！”意思说土改没有他，改不成。这话雇贫农们听了都很生气。在朱耀先家里当奶妈的涂玉贞说：

“他搞秋征呀！当代表，他把自己出溪垅的五斗田瞒了，少缴了三四石公粮，他还得意呢！”

小组上记起当初他怎样满嘴里“拥护人民政府”，都气得冒火。有人主张把他扣起来。

“别忘了我们要的不是他，是彭二虎。”卢扬说，“他这样吃醋，只是个人不正当情绪的发泄。如果他真有了破坏土改的行为，无论是造谣，还是分散，那就不管他是什么成分也得扣了。”

雇贫农小组那晚上讨论了两个问题，一个是组织民兵，另一个是进一步团结中农，扩大斗争队伍。

几天来，全村已经有三十人上下报名当民兵了，其中有不到十八岁或超过三十岁的，都没有收。按规定，土改以后，民兵队才收三十到六十岁的人。这道理就是因为在土改期间，民兵的工作太吃力了。

这时，勇于揭发地主阴谋的中农已经逐渐地被吸收到队伍里，队伍大了，有些雇贫农想不开，怕这么一吸收，将来田不够分的了。卢扬针对这种想法，强调了土改不仅是为分田，而是为了农民在政治上翻身，也就是打倒了地主阶级，永远不让它复辟，要做到这一点，只有雇贫中农拉起手来，共同搞翻身。

但是在这统一战线里，富农朱耀先仍是没份的。他眼看许多中农参加到农民队伍去了，自己没有份，他就更眼红起来。

他喊他堂客去弄点好菜吃，本来没有人干涉他，但是他是这么吩咐的：

“这年头，不定什么时候美国兵就会来，要不原子弹就会下来，还是得吃且吃吧！”

朱耀先还不知道涂玉贞近来政治上飞跃的进步。正在奶着小娃子的

玉贞听到这话，就气冲冲地搭了腔：

“你这话说得有問題！”

“怎么有问题？”朱耀先觉得真是有些天翻地覆了，玉贞居然敢这么顶撞他！

“因为你在造谣！”玉贞挑明了说。

朱耀先当时的逻辑是：你涂玉贞吃我的饭，你敢说我造谣，你滚蛋！

玉贞扣上了钮子就出去了。她找到新五，找到卢扬。

第二天早晨，福全和乡农协秘书一同去县里了。他们拿着回龙乡乡政府致县里公安局的一封公函，介绍他们二人的身份和去县里的目的，另外，乡农民协会有一封控诉书，上面陈述着彭二虎的罪状，最后写着：“请公安局替我农民主持公道。”

福全他们走了没多久，新五和两个民兵也押了朱耀先到区政府去了。下午一两点钟新五回来向乡主席报告说：“我见了区委就说朱耀先这个人不老实，他造土改的谣，捣我们农民的乱。请把他看起来，我们不说放，谁保也不成。”

彭二虎的老婆还在敲着木鱼，不知道丈夫已在押解途中了。朱耀先的老婆可急坏了。她一辈子生了三个孩子，可是从没自己带过一个。她拖了啼哭着的小娃子，满七星岗找人写保。她找到八个村里的“体面人”，写了个呈文。但写好以后，还得送到区政府去。保人们推来推去，谁也不愿意去。还是年近五十的罗超仁自告奋勇。

罗超仁从区政府回来了，朱耀先可并没有跟他一道回来。他对朱耀先的老婆摇摇头说：“大嫂，当保人还得有个资格。你把我的名字勾掉吧，我没这个资格。我放的那点款子，利息高了点，农民还要同我算账呢！”

这么一来，另外七个也溜肩膀了。

到这个时候，朱耀先的堂客才想起小组长彭新五来——人又是他送去的。走到新五屋里，她就对着这个解放前曾经给她打过零工的农民下了跪，彭新五把她拉起说：“这件事你得找涂玉贞去说。”

那天晚上，在雇贫农小组会上研究在哪些条件下才能由雇贫农把朱耀先保出来——因为对于一个没有犯严重错误的富农，关他三天蛮够了。他们决定：（一）朱耀先回来在群众大会上当众认错；（二）他得保证以后永不造谣，或做任何破坏土改的事；（三）向政府补缴秋征时

候所隐瞒的公粮。这三个条件是农民大家想出来的。

这时，彭二虎被抓的消息已经传遍回龙乡了。本来怕彭二虎反过手来报复而不敢讲话的，敢讲了。特别是罗家屋里罗氏小学的教员彭国璋。他正在上课的时候，听到屋场里有人嚷：彭二虎捉到了！他把课本放下，跑出去，抓住那个农民问：“真的吗？”

“一点也不假，”那个农民很骄傲地说，“我亲眼在石马乡看见的。身上绑了绳子，跟在后面的福全还朝我咧了咧嘴呢！”

彭二虎押到区政府以后，就决定由人民法院第二分庭在回龙乡乡政府里开庭。区长邵祖光下来作审判长，聘请了八位农民做半数的陪审员，其中自然有月莲、福全和曾经给彭荫庭当过长工的黎振南。

回龙乡的民兵队这时已经有了初步的武器——梭标。虽然这武器很原始，但是那些尖刺闪烁的标头拿在斗争坚决的农民手里，还足够使站在中间的地主战慄的。民兵后面挤满了村里的农民。

面对着人民的威权，地主们把所有的狡猾都使出来了，怎奈陪审员里就有给他们种过田的长工，烧过大烟、倒过尿盆的丫环，他们无法不招认一部分罪行。譬如彭荫庭便招认了替日本鬼子搜购过八十麻袋的铜板，因为那铜板不是黎振南自己用小车子推去的，便是他经手找佃户运去的。他也承认了曾经带日本鬼子捉过两个抗日青年，他亲眼在祠堂前面广场上看见他们的脑袋被“皇军”砍下来，事后他还遵照日本鬼子的命令，把脑袋用竹竿挑起，挂在七星岗的堤上呢——一直挂得都臭烂了。到最后，彭荫庭才招认圈子会的残余组织是设在他家里，但是“人都散了！”。最初他还不承认有武器。帮他做夹墙的两个圈子会会员——一个木匠和一个泥水匠，把他的底兜出来了。搜出两枝六轮，一把快慢机，五百发子弹，和一大皮箱。

罗培荣承认解放以前，倚仗着他的女婿在国民党军队里当旅长，在农村里欺负过人。土改工作队下乡以前，他到过彭家两趟。彭二虎一再想拉上他那个旅长女婿的关系，要点接济，他也托人送过信，但是后来听说他在广州被捕了，所以关系没接上。谣言他是造过的，但他不承认是有意的。

彭二虎上来什么也不肯招认。他把双臂盘在胸前说：“你们说人民政府讲理不讲理，我今天瞧瞧看！”但是福全把那张假造的卖田契约拿出来了，同时，那张蒋介石回来以后田归原主的收条也从他家里翻了出来。

乘着彭二虎张口结舌的时候，群众诉起苦来。有告他修堤贪污，年

年成灾的，有向他索诈骗款的。黎媛驰嚷着：“我的德明，你把儿子还给我！”教员彭国璋哽咽着说：“彭二虎，你到底怎么弄死我父亲的！我姑姑到解放后，才告诉我他是你弄死的，但不肯告诉我死时候的情形。你说说吧！”

“暂押在祠堂里的三个不法地主，两个是有血债的——彭荫庭勾结了帝国主义残杀爱国青年，土改期间仍藏匿武器，图谋不轨。彭天保在大革命时候残杀过革命干部，胜利后又贪污舞弊，”帮国民党抽税抽丁；在土改期间又藏匿武器，散布谣言，企图破坏土改。罗培荣也不是好东西，但罪行中还没有血债，是个一向欺凌农民，并且企图破坏土改的恶霸地主。

审判长便将三犯的全部口供和分庭意见在电话上报告了县里的人民法庭，当晚接到回电说：

“罗培荣解放以前的恶霸行为，农民在斗争中自然要和他清算的。他既然在土改中造了谣，就应当判他徒刑。分庭提的五年太轻了，不足以给其他地主适当的警告，应根据群众的控诉，酌量加重。彭荫庭，彭天保二人，同意分庭判的死刑。应当举行公审大会，务必让农民把委屈诉尽，然后当众执行，因为这样既可以消灭农民对地主残存的恐惧，又可以及时给其他地主一个警告。”

12月17日，天阴阴的，回龙乡田埂上红旗衬着灰色的天空招展着，男男女女的农民随着领先的锣鼓向祠堂前面的广坪涌来了。祠堂石阶上又搭起台来，台前放着两张八仙桌。祠堂铁栅栏上挂着一块横楣，写着“人民法庭第二分庭公审大会”。

10点钟的光景，审判长和十六位陪审员在群众热烈的掌声中走上台来了。两个书记也随着走上去。先由七星岗中心小学的学生领着唱国歌，然后向国旗和毛主席像鞠躬。

“今天，”审判长起来宣布，“我们是来公审回龙乡的三个不法地主。”

这时，胳膊被绑了起来的三个犯人，在一簇民兵的押解下，爬上了台前的八仙桌。民兵之外，还有五个区中队队员，有的背了步枪，有的挎着扎绸的六轮。彭荫庭的脑袋低垂着，两只手揣在袖管里，一身都在哆嗦。罗培荣上了桌先给大家深深鞠了个躬。彭二虎撇着嘴巴，努着充满了凶暴的眼睛，毫无表情地望着八仙桌三面的群众。“坏人已经被咱捉到手了。”审判长接着说，“他们就是插翅也飞不掉了。你们不必再害怕

他们了。有苦的，有冤的，今天大家诉个痛快罢！我们一定根据大家提出的证据和意见来判他们的罪名。”

第一个抢上台去的是一个五十多岁的妇女。

“我叫彭淑敏，”她捏了捏挂在胸前的红绸条。她是回龙乡妇女中间参加农会最早的一个。“我是彭国璋的姑姑。我代表彭国璋的父亲——我的三哥彭强，来控诉凶手彭二虎。1927年，我的三哥是本乡农民协会的副主席。后来反动派回来了，我的三哥要我同嫂子和刚三岁的侄儿国章逃到山里去，他参加了红军。家里就剩下我的老父亲。”

“彭二虎先派他的清乡团住在我们家里吃、烧、毁，还把我那个八十多岁的父亲拉到这祠堂里头吊了打，踩杠子，逼他交出苏维埃的名册。我父亲的脊梁骨都给他踩断了（说着就狠狠给了彭二虎一个嘴巴），他到死也没交出名册来。”

“这年腊月，我三哥化了装，想在年关回来看望父亲。喝！没进屋场，就给彭二虎抓到了。受尽了苦刑，然后挨了他几刀，痛了三天才死的。死了以后我们都不敢去验尸，还是托老乡把尸体装到布袋里，挑到山脚埋的。我看见他尸首的十个指头都扎烂了，上下牙齿全被敲下来”

她说，又激动起来，弯下身去打彭二虎。站在旁边的民兵一把拦住她。他们也咬牙切齿地瞪着面前的犯人。

台下，群众举高了拳头嚷：“打倒反动地主！”“枪毙彭二虎！”

彭淑敏呆呆站在那里，还想往下讲，但是嗓子给什么噎住了。她只说：

“屋里喂的鸡，我都怕杀得。我如今硬下得手来杀这个彭二虎。他害得我们太凶了！”

这时，台上又上来一个青年农民。他向台下打了个躬说：

“我叫田以哲，是石桥村田家垅的。1939年国共合作的时候，新四军北上抗日了，留守处就成立了民生队，发动大家起来抗日，我的爷田志成是民生队的队长。彭荫庭怕我们人民武装起来他的乡长就做不成，他勾结了杨森的一营人在3月23日的晚上先搜查留守处绑去七个同志，又下去抓民生队队长。我的父亲从那以后就没有了音讯。”

“日本鬼子来了以后，彭荫庭还是当他的乡长。他的眼睛一直盯住我们一家子，硬把我们的水牛夺了去。我们一直更名改姓在外边住，解放以后才敢回来。这个汉奸彭荫庭非杀不可！”

台下群众举着拳头，哗哗挥动着纸旗嚷：“打倒汉奸地主！”“消灭反

动势力！”“杀人要偿命！”

在福全和黎媛驰诉完苦以后，控诉会上出现了朱耀先。三四天的拘禁生活使他丢掉不少锐气。爬上台去，已不是当初的“秀才”了。

“诸位父老，诸位雇贫农！”朱耀先深深鞠了个大躬，这个躬似乎特别是鞠给他平时最看不起的搓泥巴的雇贫农的，所以脱口就这么叫出来。

“不对，”台上新五抗议了，“天下农民是一家。对中农也得赔礼！”

“诸位父老，诸位雇贫中农！”朱耀先赶紧修改过来，而且又鞠了个大躬。“我朱耀先，新炉村人。曾经因为个人风头主义没得到满足，造过谣，对土改不利。今天趁这个大会，向大家道歉，我保证以后不再造谣，不再做不利土改的事。同时，秋征的时候，我瞒了一丘黑田，等会开完我就到乡政府来坦白，并且把应缴的公粮，马上补出来。”

说完，他拱着手，对会场转了个半圆形，重复的说着：“大家原谅！”

朱耀先刚下去，又一个青年农民上来了。

“我也得检讨自己一下！”他也深打了一躬，“我叫罗永年，我是罗培荣的侄儿，在土改工作队还没有下来的时候，罗培荣叫我把他的地契在七星岗似真照相馆拍照，说是将来真契烧掉好有个底。他还有两口箱子藏在我屋里顶楼里。以前，我只知道他是伯父，我是侄儿，他说一，我不敢道二。如今，我懂得了他是地主，我是农民。他家里吃鱼吃肉，我家里吃红苕。我糊涂，他藏在我家里的箱子，等下我就送到乡政府来。”

台下群众嚷：“打倒分散财产的不法地主！”“农民团结万岁！”

天落起雨来。但会场里的空气愈诉愈紧张。有控诉彭二虎抽壮丁的，有控诉他吞修堤费的，还有一个妇人控诉彭二虎强奸了她十四岁的女儿。随诉群众随呐喊着，嘶哑的声音在湿漉漉的田野上震荡着！

“枪毙彭二虎！”

“枪毙彭荫庭！”

“惩办不法地主罗培荣！”

“不杀彭二虎我们不散会！”

4点光景，有二十来个农民都诉过苦了。会场里的情绪是沸腾的，同时又是有所期待的。雨落得那么大，没有一个人走开，或躲进祠堂里去。

审判长和陪审员回到祠堂里研究了一个时候，然后在群众鼓掌声中

回到台上来了。

八仙桌上，三个囚犯，惨白的脸也紧张起来，侧过脸来倾听审判长的宣判。

“诸位农友！”审判长语气很庄严。“刚才本庭听取了本乡农民的控诉，从大家的控诉里，更可以看出地主阶级怎样一向与农民的敌人勾结——不论是日本帝国主义，还是国民党，来欺负农民。他们一样想做美国帝国主义天然的狗腿子，因为美国帝国主义也是和人民作对的。”

“这三个不法地主，我们是这样判的：罗培荣，年四十岁，新炉村人，犯的是造谣和分散罪。这种非法行为是人民所不容许的。罗培荣不但分散了财产，并且还把手契拿去拍照，这都说明他仍然把幻想寄托在国民党反动派身上。刚才陪审员大家商量的结果，判他七年徒刑。大家同意不同意？”

台下面一片喧天的掌声。罗培荣便被民兵由八仙桌上拖下来，带到祠堂里暂押起来了。

“彭荫庭，年四十九岁，新炉村人。在抗日战争中，屠杀爱国青年。解放后，又搞反动会门，谣言惑众，并且私藏枪支，图谋不轨，判他死刑，大家同意不？”

群众又震天地鼓起掌来。

“彭天保，年四十七，新炉村人，大革命时代，曾充铲共游击队队长，清乡委员，屡次肆意残害我农民组织，捕杀我农民领袖。抗战胜利后，任本乡伪乡长，替国民党反动派抽丁抽税，支持反人民的内战，此外，并贪吞堤费，造成农民巨大损失。判他死刑，大家同意不？”

台下轰起震天的掌声。农民欢喜得跳了起来。民兵把梭标举到半天，表示拥护。会场的四周，都起伏着口号：

“消灭万恶的地主阶级！”

“拥护替农民撑腰的人民政府！”

“共产党万岁！”

“毛主席万岁！”

民兵们扛了梭标和执法的区中队队员把彭荫庭和彭二虎拖下了台，有的群众自动给让路，有的还挤过去想揍彭二虎两巴掌。

彭荫庭一只胳膊横在满了泪痕的脸上，一路被推了走，随走随咧了嘴呜呜地哭。彭二虎的脸上灰里发青，两只凸出的眼珠子这时候是直呆呆、冰冷冷的，当黎媛驰由人丛中伸出一只枯瘦的拳头，在他肩头揍了

他一下时，他还像那垂死的老虎，向她龇了一下牙。周围的拳头太多了，他没敢还手。

雨下得更大了些。但是男男女女紧紧跟在后面，生怕跑了一个囚犯。

犯人被押到祠堂南边的坟场，绕到坟场后面，砰！砰！砰！连续响了八九枪。枪声锐利地穿过回龙乡阴湿的氛围，那回响，在农民心中，变成为轻快的音符。

“消灭恶霸地主！”

“农民翻身万岁！”

没有了顾虑的群众，壮大胆地嚷出口号来了。声音洪亮得宛如他们心尖上的刺被拔了下来。

5. RED, YELLOW AND WHITE

The rain gradually came to a stop as dusk approached.

It was a new Huilung *hsiang* that greeted the sunrise the following morning. On the dykes on either side of the quietly flowing Pigeon River, one could see tall, withered grass weighed down by raindrops, glistening in the early morning sun. A soft breeze sang through the telephone wires.

Curling smoke was seen once more above the Peng-Chu Homestead. In a stream beside the temple, a duck was drifting gracefully, eagerly looking for food. Behind it followed a train of ducklings. Even the long-shut-in buffaloes had been let out to take the sun, and, as they made their way leisurely up to the field-path, they seemed the picture of contentment.

There were women laundering by the pond and men with baskets on their backs cutting grass. From time to time one of them would straighten up and stare at the graveyard south of the temple. "So tyrants are made of flesh and blood too, and a few bullets can easily dispose of them! You, Peng Yin-ting, why don't you get up again to bully us? And you, Peng Erh-hu, where are your old airs now?"

For thousands of years it had been the invariable rule for people like Fu-chuan and Grandma Li to be kicked around, swallow insults and cringe without hitting back. But the sight of the two tyrants gone down before the law had instilled confidence into them and the last vestige of fear for the landlords was dispelled.

The day was December 18 and, for a change, instead of Lu Yang going out to call on the peasants, they had come to look for him. One of them reported how a certain "big family" had sunk their pewterware into a pond to avoid confiscation. Another came lugging a number of trunks and bundles which some landlord had deposited with him before the arrival of the Work Team. "I now understand," he said, "that

these are really ours, and I'll be damned if I act as 'an air-raid shelter!' ¹¹ any more."

What kept Lu Yang busiest, however, was the registration of militia members.

"Comrade Lu," Li Ta-ming, a farmhand from Li Garden, thus addressed him. "Please put down my sister's name too. We would like to do night patrol together."

"Comrade Lu!" This came from Tu Yu-chen, who bounced into the room. "My mother-in-law says it's all right for me to join." At first Tu Yu-chen had wanted to enlist in the militia in spite of her mother-in-law's strong opposition. Lu Yang had dissuaded her from it, saying that such over-straining of relations would only create greater handicaps. He'd advised her then, "Come when she's changed her mind." Now Tu Yu-chen had her wish. She also confided in Lu Yang that she had sent word to her ferryman husband to quit his present job and come back for a share of land.

Hsin-wu's wife, already eight months with child, also wanted to join. Lu Yang shook his head.

"The militia will go on. It's not for only one or two days. After the land reform, it will be kept up as a regular peasants' military organisation to protect the peasants' own interests. There's plenty of time."

Chun-hsing also joined, and that was a big event. Ever since she became a member of the Women's Small Group, she had stubbornly refused to return to Big House Lo. To the Lo family she had this to say: "For me to go on being a child-bride is out of the question. You want me to pay for what I've eaten during the five years, don't you? All right and good. First you must pay me my five years' wages. During the past five years, I've fed pigs and cattle, spun three ounces of yarn a day and woven I don't know how many hundreds of yards of cloth for you. Pay me my wages and I'll pay you my board."

She owed this brilliant stratagem to the instruction of Mrs. Peng Hsin-wu. As had been more or less expected, the Lo family at first

yammered about a lawsuit but thought better of it.

All the militia members being activists of the village, scarcely a night went by without their patrolling around, armed with spears, to watch over the landlords. When off duty, they attended night schools where they studied how to differentiate between the various classes. The school, sponsored by the *hsiang* Peasants' Association, was located in the Lo Family's Primary School in Big House Lo. There the peasant-pupils all sat on long benches and they easily filled the classroom. Grandma Li, Fu-chuan, Chun-hsing, Tu Yu-chen—they all attended classes regularly and threw themselves heart and soul into the study of this fundamental work so essential to land reform.

In the night school Lu Yang first explained the purpose behind this class differentiation—to draw a clear line of demarcation between peasants and landlords, between friends and enemies. He pointed out how necessary it was in the work of preparing the further transformation of rural society. As to how the actual differentiation was to be made, Lu Yang's approach was to get at the essential points first and avoid the technical details. For instance, he pointed out that a rich peasant differed from a landlord by taking part in labour and that whether a person was to be classified as a rich peasant or middle peasant depended on whether or not his income from exploitation exceeded 25 per cent of his total annual income. Middle peasants depended chiefly upon their own labour for their living and did not usually hire themselves out. Those who only slightly exploited others without over-shooting the 25 per cent mark were to be considered well-to-do middle peasants. Poor peasants were those who had to cultivate land and sell their labour power as well. Farmhands generally had neither land nor farm tools, and depended mainly on the sale of their labour power for their living.

Then with the Village Chairman and Chairman of the Peasants' Association as guides, the peasants picked out a few landlords and rich peasants from the three homesteads in Hsinlu Village and discussed each individual case.

While class differentiation was being taught in the night school, members of the Small Group of Farmhands and Poor Peasants began making tentative classifications on the basis of what they had learnt. Small-Group Leader Peng Hsin-wu had gone through a three-month land reform training course in town shortly after his discharge from the army. Therefore he led the others in making classifications, starting with the big families. In the course of classifying, they also had a chance to investigate all the related problems touching each landlord or rich peasant such as his labour conditions, the extent of his exploitation, the number of labourers he hired from 1946 to 1949 and whether or not he practised usury.

There was the case of a woman in Big House Lo who had a six-year-old boy. Her husband, formerly a battalion commander in the KMT Army, had not been heard from since 1945. Her land was all rented out and she had lent out money. Both Fu-chuan and Li Ta-ming voted for making her a landlord.

Hsin-wu wanted to know why, and Fu-chuan answered, "She never laboured. And that's not all. Didn't her husband help the reactionaries fight us? What else could she be if not a landlord?" Chun-hsing, whose experience as a child-bride in Big House Lo made her qualified to judge, thought so too and justified her opinion by remarking that the woman was "mean and nasty".

Good-naturedly Hsin-wu went into a detailed explanation. "The degree of exploitation," he pointed out, "should be our chief consideration in class differentiation. We must not confuse class status and political background. As for personal likes or dislikes, there is still less reason for their entering into the matter. It's not as though she were actually anti-revolutionary, in which case she'd certainly be arrested. She has no labour power in her family and the amount of land she rents out is quite small. Therefore a small land lessor is the correct classification for her."

This went on for over 10 days. A great many peasant activists in

Hsinlu Village succeeded in grasping the correct standard for class differentiation. The Small Group of Farmhands and Poor Peasants made out a tentative list of local landlords and rich peasants and submitted it to the Peasants' Association for inspection. A two-day check-up followed, mainly to see if any rich peasant had been classified as landlord by mistake. Then came the first Class Differentiation Meeting, this time inside the temple, in the big hall.

The day before, all those who had been classified as landlords were notified by the Peasants' Association to register punctually at eight o'clock in the morning. The meeting place was simply furnished with a square table and a few benches placed beneath the portrait of Chairman Mao. Before the landlords showed up, the hall was already filled with peasants. Tu Yu-chen's ex-ferryman husband cheerfully threaded his way through the crowd with a fat baby in his arms and a broad grin on his face. "Catch me wandering outside," said he, "when I can get a share of land at home!"

When the landlords arrived on the scene, the peasants saw that they were followed by a group of the people's militia, including such people as Fu-chuan, Li Ta-ming and Chun-hsing, all carrying spears, alert and vigilant. Most of the landlords, by contrast, looked abject and cowed. A few of them brought along tiny bamboo baskets, in which some charcoal was burning in sand to warm their hands.

Around half past eight, the Chairmen of the village and the Peasants' Association and the Secretary of the Village Government, with files, account-books and abaci under their arms, took their seats around the square table, and Lu Yang stood up and called the meeting to order.

"Our Hsinlu Village," said he, "will begin our class differentiation today. We've had half a month of preparation and discussion. Now, the people standing there we regard as landlords. Our decision naturally is backed by strong factual evidence. We'll start by asking them to state their own financial standing. Mind you, we want absolute honesty. If anybody catches them in a lie or a trick, don't

hesitate, point it out to their face. Of course, they also have the right to defend themselves if they think our decision is unjust."

Li Chao-chu was the first landlord to stand up. Considered an educated man because he had gone through a normal school course in Changsha, he had carefully studied every article of *The Agrarian Reform Law* in preparation for this very meeting. He had on a light blue gown, and his small sharp features were half-shaded by a felt hat. His cheeks and chin were protected from the cold by a white towel which he had tied under his hat. After delivering a sketchy account of his financial condition, he cast a scornful glance at the peasants and said in an icy, cutting tone: "Make me a landlord if you like! Remember, however, that I'm not one of those idlers who reap what other people have sown. I labour also. Therefore, if we go by the Law, I ought to be classified as a rich peasant."

"In what way have you laboured?" asked Li Ta-ming with suppressed anger. He'd worked as a farmhand for Li Chao-chu for five years.

"When work was busy down in the fields, didn't I also climb out of bed before it was light?" replied Li Chao-chu.

"Sure!" The excited Li Ta-ming rose and pointed his finger at Li Chao-chu. "You climbed out of bed to hustle us farmhands to work. Then you returned to your sleep. Lots of times after I'd fetched six bucketfuls of water, I could still hear you snoring!"

"But," said Li Chao-chu in a faint voice, his cockiness fast disappearing. "I used to go down to the field even when it was raining. If that is not labour, what is?"

"You have the nerve to mention that?" Li Ta-ming noisily spat on the floor to show his contempt. "When we were threshing corn, you stood leisurely by on the field-path and 'directed' us. That's all you did. You wanted the corn well threshed. Not one single grain was allowed to go to waste. Our work had to be both fast and thorough. Now, look at me. I started ploughing the field early in spring when the soil was still frozen hard. My feet were covered with cuts and bruises, and the

pain I felt when I washed them in the evening was something awful. Then turning the water-wheel in June under a scorching sun until I felt groggy—you wouldn't understand that either, In August, bringing the hay in would often keep me busy until well into the night. When I finally collapsed on the hay pile, I'd sleep like a log and wake up to find myself covered with dew. These, and lots more, are things that you don't know. I've worked for five landlords. You're all as bad! You all eat a lot but don't stir yourselves. And you talk about labour!"

Uncle Kuang-lin, one of Li Chao-chu's old tenants, also could not contain himself any longer. In a voice shaking with emotion, he said: "I've stood about as much as I can from Li Chao-chu. A few *tou* of land was all I rented from him and what treatment I had to put up with! For every *tou* of land, he must have a chicken as 'extra'. One year his wife bore him a daughter. He was disappointed and took it out on me, saying it was because I had been sending him hens. From that time on, he wouldn't accept anything but roosters. But roosters can't lay eggs, so we had to present him with eggs too, by the hundreds.

"When it was time for him to collect rent, he said there were three kinds of grain he would absolutely refuse to touch: wet grain, flat grain and reddish grain. His invariable rule to test the quality of the grain was first to scoop up a handful and scatter it over the table. Then he'd blow at it hard with all his breath. If the grains of rice remained where they were, he was satisfied. Otherwise he'd say they were bad and refuse to take them."

A young peasant rose and, pointing at Li Chao-chu, said, "My name's Li Jih-chang. I happen to be his nephew but he's treated our branch of the family as though we were dirt. A year before liberation, mother got jaundice, and we needed money to give her treatment. We borrowed 15 silver dollars from him and paid him two months' interest. Grain was cheap then, so he calculated the loan in terms of grain, and said it was 20 *tan*. For four months, he didn't ask for any interest. Quite the big-hearted Master, wouldn't you say? Then came a time when the price of grain went up, since the harvest was a little

behind time. He therefore converted the loan into money again. After the autumn crop came in, he turned it back into grain. The result was, after a period of eight months, we found we owed him 58 *tan* of grain. That's why I've no padded clothes to wear in winter. As for him," he flipped open Li Chao-chu's gown to give the people a full view of its fur lining, "just you see—a fox-fur-lined gown! I don't care if you are my uncle or not. All I know is you're one of those cruel landlords!"

Seeing that his own nephew had thus turned against him, Li Chao-chu's defences began to break down. Time and again, he tried to put in a word edgewise, "All right! All right! Call me a landlord!" But the peasants' accusations went on and on. Obviously, to many of them, still getting the pent-up grievances off their chests was at least as important as class differentiation, possibly even more so. Hence although a queue of would-be landlords had lined up waiting for their turns to speak, Lu Yang gave no sign of trying to cut short or stop the peasants' accusations. On the contrary, as they made the accusations, he noted them down. When he got to some of the crimes, he would throw glances of intense hatred at the landlord, sometimes even muttering, "the son-of-a-bitch", or words to that effect. At the end of each accusation he would turn around to look at the masses expectantly as though saying, "Sure no one has anything more to say? Let's not keep anything back!"

An unfamiliar looking peasant had detached himself from the crowd. With one hand on his hip and the other pointing at Li Chao-chu, he said, "I come from Ssupu of Hsuehhu Village. Our place is high up and the water-supply has always been a problem. Every year we have to pass through his fields to operate the water wheels, and in return pay him seven *tou* of grain a day. If no grain is handy, we must pay him in the second half of the year plus one *tan* interest. Besides that we have to get him enough water to irrigate about three *tou* of land—free. If we'd been paid for it, the wages would have amounted to about one *tan* of grain. In the year 1936, he made over 100 *tan* of grain merely through that scheme, and in a few years' time he had

bought another 20 *tan* or so of land. Once before liberation, our village thought of sounding him out on the subject of the 'transit land'—just to see if he was willing to sell. But he just rolled his eyes and answered that the land had been handed down by his ancestors and was therefore sacred! Another hundred or thousand years, and it would still remain in the Li family, he said."

After five days and five nights of unceasing accusation and struggling, a first list of Hsinlu Village landlords was drawn up. The ones that had given most trouble were the landlords on the street near the Seven Star Slope, because a great many of them were concurrently industrialists and merchants. With every meeting, more new facts and new methods of exploitation would turn up, thus increasing the peasants' hatred towards their oppressors. Then followed three more days of classifying the rich peasants.

When the lists of landlords and rich peasants were ready, they were passed on to the Peasants' Association and the Small Group of Farmhands and Poor Peasants for review. Only one error was found—that of a well-to-do middle peasant who had been included among the rich peasants, and it was quickly corrected. Thus the first "class list" of Hsinlu Village's populace was posted up on the carved wall outside the Pengs' ancestral temple, one white, bearing the names of the landlords, and one yellow, the rich peasants.

When the classification process came around to the farmhands, poor peasants and middle peasants, the atmosphere changed completely. True, occasionally after someone had reported on the size of his family, his land, farm implements, draught animals and debts, others who were present might still point out omissions or mistakes. But it was, at the worst, not unlike a family quarrel. A lot of shouting but scarcely any rancour.

Outwardly, too, they were not in conflict. They all sat in rows on the long benches facing one direction and not opposite each other. Some of the women were busy nursing children. Militia members were polishing their spears on their sleeves. A small boy with a copper ring

around his neck, a charm, was dashing to and fro in the crowd with the slipperiness of an eel. All present were at ease. They knew they were among themselves, and that they all belonged to the exploited class crushed under the millstone of a feudal society.

The reports were accompanied by the noisy computations of an abacus and the Village Secretary busily entered everything in his book. As soon as one peasant had finished, the Chairman of the Peasants' Association would ask, "How do you people think we should classify him?"

The rule was to work from the top down. Therefore the peasants started with those whose life was comparatively less bitter—in other words, the middle peasants. Naturally some who fell into this category attempted to get themselves lowered. Uncle Kuang-lin was made a "tenant-middle-peasant". Although his land was rented from Li Chao-chu and he laboured himself, yet he owned quite a complete set of implements and never had to sell his labour power. On the whole, his life had not been as difficult as some. Still, he felt disgruntled and, smoothing his beard, murmured, "How come I can't be classified as a poor peasant? Do I own one *mou* of land? Don't I have to pay my annual rent to the landlord same as everybody else?"

Lu Yang hastily explained, "In the past, the land wasn't yours. After the land reform, you'll have your own land." Then he added, with a view to reassuring the middle peasants, "The main purpose in class differentiation is to draw a line separating us from the landlords. All of us peasants are in one group. We're all the masters of the countryside. The farmhands and poor peasants of to-day will soon become middle peasants too, since their wealth will increase after they've got their own land."

The classification of farmhands and poor peasants also proceeded on the basic principle of each reporting on his own financial conditions. Time and again, tragic happenings were recalled. Grandma Li burst out crying when she blurted out the words, "no labour power", which reminded her again of her long lost son.

When she told how she used to take Chun-hsing with her on a begging tour, she suddenly fell into a fit of convulsion. With gaping mouth and eyes that stared fixedly, she stood for a long time speechless. Chun-hsing furnished the explanation: "One day, a landlord let out a great Mongolian dog which bit my mother on the thigh. She still has a huge scar there."

The tinfoil, incense and candle manufacturers on the street near the Seven Star Slope sent in a request to be made poor peasants. It seemed that business had declined sharply since liberation. After the land reform they said, the peasants' cultural level would be raised and no one would want to buy superstitious articles any more. Therefore their trade was doomed to go. It seemed to them that the land reform had offered them a merciful 'out', and they would like to leave their trade and become peasants. Lu Yang replied that they were still handicraftsmen in class status; however, in the distribution of land, their cases would certainly be considered.

When the whole thing was over, a file containing all the necessary information—name, age, amount of land and implements owned, extent of exploiting of others or exploitation sustained—was submitted to the *hsiang* government and the *hsiang* Peasants' Association for review and ratification.

As a result, the status of some of the peasants was altered. For instance, Lo Tung-sheng of Big House Lo had joined the Red Army during the Great Revolution. When the Red Army marched north, however, he got left behind and made a living out of pushing handcarts, cutting firewood and doing odd jobs. He did not start renting and tilling his four *tou* and five *sheng* of land until after liberation when the landlord had to refund interest on a debt Lo Tung-sheng had been paying interest on for years. Hence his status should be that of a farmhand, but in the file he had been mistakenly listed as a poor peasant.

The second class-list of Hsinlu Village was on red paper. It was posted up beside the first list. The names of all the farmhands, poor

peasants and middle peasants were on it. All the peasants in the village, together with the children and the old people, rushed over to "take a look at the list". Those who could read stood on tiptoe and called out the names. Even the order of listing appeared significant to them, and as they pronounced each name, some would query, "number how many?"

Among the crowd were Fu-chuan and Chun-hsing, their spears tied with red tassels. Both of them had been attending night school; so they could recognise their own names, although most of the others still remained unintelligible to them.

"Aren't you happy, Fu-chuan," asked Chun-hsing, "that they've made you a farmhand?"

"Me?" Fu-chuan glanced at the list again, "Oh, that's not the only thing I feel happy about."

Hsin-wu, who had been helping other peasants with the names, turned round at this remark.

"What else do you feel happy about, Fu-chuan?"

Pointing to the list posted up on the wall, Fu-chuan replied, "I feel happy because there are so many of us on the red list."

Hsin-wu nodded. "True. Everyone should bear in mind the fact that there are ever so many of us—and with one heart. On top of this, we have the leadership of Chairman Mao and the Communist Party. Never, never again will the landlords be able to regain their old position.'

On the following day, Lu Yang and a responsible leader of the Peasants' Association summoned all the landlords to the temple for a talk. There they were informed that, if they thought they were unjustly classified as landlords, they could appeal to the County People's Tribunal within the next 15 days. Further, they were told that after the third list, which was to be final, landlords were to turn over the whole of their land, farm implements, surplus houses and foodstuffs. The money deposited by peasants who rented land was to be refunded. All debts which the peasants owed the landlords prior to

liberation were to be cancelled. In case a landlord had sold some land or draught animals to others after liberation, he must either try to get them back or pay their equivalent value in cash. Until the Peasants' Association officer took things over, they were ordered to protect very carefully what was to be confiscated. If anything were damaged or missing, they would be held responsible. In conclusion, Lu Yang told the landlords that they were not allowed to have guests staying in their houses and that whenever they wanted to leave the village, they must first obtain permission from the Small-Group leader.

Next, the rich peasants were called together. They, too, were allowed to appeal to the People's Tribunal. Then Lu Yang reiterated the government's policy of preserving the rich peasant economy, adding, however, that according to *The Agrarian Reform Law*, the portion of land they rented out would be requisitioned after the ratification of the District Government, since it was a well-known fact that Huilung *hsiang* had a shortage of land. The land they tilled themselves and their other properties would not be touched. Finally Lu Yang urged them to work hard at production and not listen to rumours. "You can rely on the People's Government," said he, "never to go back on its word."

The complete file of Hsinlu Village's class differentiation documents was put together by Village Chairman Peng Yu-chang and sent to the District Government. A meeting was subsequently called by the Chairman of the District Government of all the land reform cadres of the nine villages, at which he announced that on the whole all nine villages had carried out the task of class differentiation correctly and justly.

In summing up the cadres' reports, he pointed out a few cases which deserved close study. One was a rich peasant in Shihchia Village, Second Division, who insisted on giving up part of the land he tilled himself. Naturally, the cadres declined to accept it. The incident was a significant one in so far as it reflected some uneasiness which still existed in the minds of some of the rich peasants. "We haven't yet

fully convinced them of our policy of preserving the rich peasant economy; hence they dare not as yet devote themselves wholeheartedly to production. More energetic propaganda work is necessary, as only in this way can we rid them of their unwarranted scruples and fears."

Then there was the a air of Liao Cho-nan. Himself Village Chairman of Shuangfeng Village, Third Division, yet he helped landlord Liao Peng-fei "slip through" part of his land with the result that the latter was made a rich peasant instead of a landlord. The fraud was quickly discovered. Liao who was exposed as an old henchman of the landlord had cunningly slipped into the job of village chairman. He was yanked from his post, and his name was struck off from the membership list of the local Peasants' Association. His accomplices also had their membership suspended. This went to show that vigilance must not be relaxed and, as the peasants' organisation expanded through struggles with the landlords, the importance of "cleaning house" must not be overlooked. He finally summed up the experiences of the nine villages, in drawing class differentiations. The proper method, he said, was to work from the top down: first, enemies; then, friends; and last, our own people. Outstanding cases should be dealt with before routine ones, and complex cases should be saved till the last. In dealing with farmhands, poor peasants and middle peasants, a little leniency wouldn't do any harm.

The final lists were duly ratified by the District Government and sent back to the village to be posted up. That was a big day—the biggest, in fact, since the land reform work got underway in Hsinlu Village. Once more, a platform was set up in front of the temple, and the wall was splashed with slogans like: "Follow the Communist Party forever!" "Long live the unity of peasants!" and "Wipe out the feudal landlord class!" Everyone in Hsinlu Village came out to attend the meeting and to read the final decision of his class status which in turn would decide his status economically as well as politically.

It was a cloudy day. Occasionally, white flakes of snow would

drift past. Li Chao-chu stood shivering as he read his name on the white list, the list of landlords. He had on only a torn, thinly padded jacket and a battered hat that was pulled down practically to his eyebrows. He dared not risk having other people point at his fox-lined gown again. Behind him stood a few other landlords. Not very many to begin with, and everyone of them looked downcast and apprehensive, with knit eyebrows and lowered heads.

The rich peasants by contrast were quite different. Their number was also small. Chu Yao-hsien was there, with a hat which came down right over his head, leaving only his eyes and nose exposed. He wore, in addition, a woolen muffler around his neck, and he was more than usually quiet. Others, however, were placidly smoking their long "water pipes". Manipulating the spill with one hand, they puffed and inhaled noisily.

The long, lively and jubilant team of farmhands, poor peasants and middle peasants entered the meeting place together, in formations. Li Ta-ming marched ahead of the rest, carrying a huge red banner, on which were embroidered the characters: "Huilung *hsiang* Peasants' Association First Division". Behind him were gongs and drums and several rows of militia armed with shining spears. Women, young men and children followed, all waving flags with anti-feudal slogans. In no time at all, the entire space was taken up while the tail of the procession was as yet invisible. The handful of landlords and rich peasants were asked to step to one side and give them the room. Even so, some of the peasants still had to remain outside the meeting place.

After singing the national anthem, Comrade Chao Chieh-min spoke up: "What is land reform for anyway? To do away with all the privileges which this handful of people," pointing at the landlords, "have assumed in order to exploit you all," and he made a wide gesture taking in the greater part of the audience. "So long as the strong team of peasants remains organised and closely united in production, education and self-defense, there isn't any doubt but that

we will pull clean out the last roots of feudalism...."

伍 红·黄·白

雨落到天黑时分，就慢慢住了。

第二天，太阳又照耀在回龙乡赭色的田野上了。斑鸠河安详地流着，堤坝上的枯草，叶身还挂着雨珠，迎着新出来的太阳，晶莹地焕发着光彩。初冬的微风，在电线上吹出细婉的声音。

彭朱家的屋场上又袅袅飘起炊烟了。祠堂旁边的小渠里，一只母鸭正闲适地率领着一串小鸭崽在寻食。闷在牛棚里的水牯，也蹒跚在田埂上，依恋地晒着和祥的太阳。

弯着腰在塘里浣衣的妇女，背着筐砍草的男人们，跑出门来第一眼都先望望祠堂南边那座坟场，心里想着：恶霸原来也不过是那么回事！恶霸也吃不住砰砰几枪。看你彭荫庭再爬起来！你彭二虎的威风哪里去了？

几千年来，福全们，黎媛们，只有受欺负，从没还过手。昨天可痛痛快快地出了一口气。打比方说，以前睡的那泥巴和烂草堆起来的茅屋，经昨天这么一番举动，直仿佛里面支起钢骨水泥来了。两个恶霸的伏法消灭了农民对地主怀的惧怕，同时，朱耀先的腰昨天在台上弯下来了，农民的腰今天更挺了起来。因为他们更清楚地知道人民政府是替谁办事的了。

这一天，12月18日，卢扬不是出去找农民，而是农民来找他了。有的农民来报告某某大户把锡器丢在塘里了，还有的把地主或富农在工作队下来以前寄存的箱笼包袱提了来，说：如今我才懂得这东西是咱大伙的，我不能给他们当“防空洞”。

更忙的，是民兵登记。“卢同志，把我妹妹的名字也写上吧。”黎家园的一个贫农黎大明说。

“卢同志，”涂玉贞跳着跑出来，“我婆婆同意我当民兵了。”当初涂玉贞想不顾她婆婆的反对，硬来参加。卢扬怕这种家庭内部的勉强会造成更大的阻力，所以劝她等婆婆想通了以后再参加。如今她婆婆懂了土地改革是怎么回事。涂玉贞并且托人带信给她在湖上摇船的丈夫，要他辞了船工，回来分田。

新五的堂客捧着个八个月的大肚皮也要参加。卢扬摇摇头说：

“民兵不是一天半天的事。土改以后它是个经常的农民武装组织，将来靠它来保护农民的利益。你有的是日子呢！”

因此，她只参加了妇女小组。

春杏的参加是件大事。自从参加妇女小组以后，她就一直没回过大屋罗，她告诉男家说：“小媳妇是定规不做了。你们要五年的饭钱，可以；但是你们先把我五年的工钱，——五年来，我从早到晚帮你们喂猪，喂牛，一天纺三两纱，织了不晓得几百丈布！你们把了我工钱，我就把你们饭钱。”

这话是新五老婆教她的。男家最初还不依不饶，嚷着要打官司。等朱耀先抓进区政府以后，才不声不响了。

这些民兵都是村里的积极分子，所以每天晚上不是扛了梭标去查夜，监视地主，就是上划阶级的夜校。这夜校是由农会主办的，每村一个。新炉村的夜校便设在大屋罗的罗氏小学。课室的长板凳上，黑压压地坐满了农民，黎媛驰、福全、春杏、涂玉贞，都是一课也不肯缺地学习着这土地改革的基本工作。

在夜校里，卢扬首先讲解了划阶级，是为了使农民和地主、自己人和敌人截然分开来。说明只有这样才好进行农村革命。讲到“怎样划法”，卢扬的讲法是先抓要点，避免细节。譬如：富农和地主的分别就在有没有主要劳动，富农和中农的分别就在剥削量不超过全年收入的百分之二十五。中农是自给自足，不出卖劳动力的。对别人有轻微剥削，但是不及百分之二十五的，是富裕中农。贫农自耕兼出卖劳动力，雇农多半没田没农具，主要靠出卖劳动力吃饭。

把大道理讲完，卢扬又解释了细节。主要劳动指的是一年之中，有四个月的劳动；一家得有三分之一以上有劳动力的人口参加劳动，这家才能算有主要劳动。他又指出地主的剥削方式多半靠把田租出去，富农靠请长工。从长工人数来计算剥削量，请一百二十天短工算一个长工。请一个长工以下的，剥削量不会超过百分之二十五，也就不会是富农。请两个以上的，就得算算了。所有的计算都从解放那天起，倒推三年。

接着，工作队和村农会主任领导农民就新炉村三个屋场里的地主和富农，抓了几户来分析，作为具体的典型。

小学教师们这时又给大家演了一次戏。一出是《谁养活谁》，主要是暴露地主不劳而获的寄生性质，另外一出是《懒婆娘》，描写一个不爱劳动的农村妇女的改造。往常，乡里也演戏，但只是热闹一番。这回

演完了，农民一路在田埂上，灶火旁谈论着戏里的道理。

夜校讲解着划阶级的时候，雇贫农小组上，农民们便根据学习来的标准开始试划了，雇贫农小组组长新五在复员以后，曾经在县里一个土改训练班上学习过三个月。他领导大家先从大户划起。随划随调查地主富农们的劳动情况，剥削程度，他们在1946年到1949年请的长工的数目，和他们放债的情况。

大屋罗家一个女人，带着个六岁的伢崽。她男人在国民党军队里当营长，从1945年就没了音讯。她的田是全部出租的，并且放点债，福全和黎大明都认为应该划她做地主。新五问他们为什么，福全说：“她不劳动还不说，她男人还给反动派帮忙打我们，不划她做地主划成什么！”在大屋罗当过小媳妇的春杏也赞成，她的理由是“那个女人讨厌！”新五很好性子地向他们解释说：“我们划阶级，主要是看剥削关系。除非她自己是反动分子，那我们一定把她抓起来；我们不能把阶级和政治面貌混起来，更不应该掺上个人的好恶。她家里根本没有劳动力，出租的田地数量又不大，她应该是一个小土地出租者。”

这样继续了十来天，新炉村的农民骨干分子把握了划阶级的标准；同时，雇贫农小组也把本地的地主富农大致划出来了。划的结果送到农会，给大家提意见审查，又经过两天复查，看看有没有把富农划成地主的。于是，第一个划阶级会便开始了，地点在祠堂的正厅。

头一天，农会通知了被划为地主的人，要他们早晨8点正报到。会场的布置很朴素。毛主席的像下面放着一张八仙桌，几条板凳。地主还没来，农民已经密匝匝站在一起等了。黎媛驰坐在长板凳的一头，嘴箍得紧紧的，一脸都是紧张。她知道今天“谁是好人，谁是坏人，马上就分明了”。涂玉贞的丈夫从洞庭湖船上辞工回来了，手里抱着自己的一个胖崽，见了人就笑眯眯地说：“有田分自然不想在外头晃荡了。”

福全、黎大明、春杏他们，都执了梭标站在地主行列的后面，一个个瞪大了眼睛看守着。地主们一个个瑟缩缩地揣着手，有的腕上挂了只竹篮，篮里放着烤手的炭盆。

8点半光景，村主任，村农会主席，村政府书记便夹了账本，提了算盘，各占据八仙桌的一面坐下了。卢扬站在八仙桌前宣布说：我们新炉村，经过半个多月的酝酿，今天开始划阶级了。现在站在这边的，我们认为是地主。我们这种认为，当然有事实的根据。等下先由他们自报经济情况，他们应该老老实实地报。如果他们有隐瞒，农友们可以马上

把他们的马脚指出来。如果我们说的他们不服，也准许他们申辩。

地主黎朝初曾经在省里读过师范。从《土地法》颁布后，他一直在研究着条文。他细眉细眼的，穿了件浅蓝褂子，毡帽下面围了块白布手巾，报完了财产情况以后，他很鄙夷地望着农民说：

“划我做地主没关系，”口气冷冰冰地，很尖酸。“但我不是‘不劳而获’的。我有劳动，因此，照政策看，我应该是富农。”

“你有什么劳动？”黎大明气冲冲地问。他给黎朝初当了五年长工了。

“田里忙的时候，天不亮我不也爬起来吗？”黎朝初不服气地反问。

“对，”黎大明索性站出来指了黎朝初的鼻尖讲：“你爬起来是为了把我们长工一个个赶起来，你又钻回被窝里去睡觉啊！我挑了三担水，你还在打鼾呢！”

“下着雨我都下田，那不算劳动？”黎朝初的声音低下来，没刚才那么“理直气壮”了。

“哼，你不要脸！”黎大明狠狠往地上啐了口痰。“打场的时候，你自己撑把伞，站在田埂上打秧，指挥我们。一下又嫌我们打得不干净了，你要我们搞得又快，又好。我从起春就犁田，田里的泥块还冻得硬邦邦的呢，把我的脚板都切破出了血。你可知道晚上我洗脚的时候有多么疼！6月里车水，太阳像火盆似的烤着，你可知道我头有多昏！8月里收草，一收收到深更半夜，我困倒在草堆上人事不省了，醒来满身都是露水，那滋味你尝过吗？我一辈子给五个地主干过活，你们都是一模一样的好吃懒做，你懂得什么叫劳动！”

这时，光林大叔——黎朝初的老佃户——也捺不住了。他激动地说：

“黎朝初的苦头我算吃够了。种了他这几斗田，年年受他的气！他每斗田要搭一只鸡。有一年他老婆养孩子，养下一个女崽，怪我送了母鸡，那以后，年年得送雄鸡。送雄鸡他又嫌不生蛋，还得论百地送蛋。每年收租谷时候，他有‘三不要’：不要湿谷，不要瘪谷，不要红谷。他看谷子先抓一把谷子放在桌上，然后伏在桌边用嘴吹，一粒也吹不动才要。要不他就捡瘪谷多的地方扫起来量一石，放在风车里用力车，壮谷都被车出来，然后量一下。所有没车的谷子全照这个打折扣。”

这时，另外一个年轻农民指了黎朝初的鼻尖说：“我叫黎日昌。说起来，我还是他的侄子。他把我们这一房搞得没有点点日子过了。解放头

一年，为了给我母亲治痼病，向他借了十五块光洋，付了两个月的息。在谷子贱的时候，他把钱合成谷子，作为二十石。他还送了个‘人情’，四个月没要利息。等到青黄不接，谷子贵的时候，他又把它变成了钱，秋收后，他又把它合成了谷子，结果，前后八个月，他要我们五十八石谷子。所以弄得我冬天连棉衣都没得穿。他呢？（青年农民撩起黎朝初的皮袄，）大家看吧，狐狸皮袄！我管你什么叔叔不叔叔，你是个杀人不见血的地主！”

这时，黎朝初看见自己的亲侄子也出来了，气便虚了下来。他几次想打断话头，说“好，好，划我做地主算了。”但是农民的控诉并没有因此而停下来。显然，农民把诉说内心的怨恨和划分阶级看得一般重要——也许更重要些。因此，尽管新炉村的几个地主“候选人”一排等在那里，卢扬一点也没有意思缩短或打住农民的诉苦。反之，他们一边诉，他一边记；诉到可恨处，他时常仇恨地瞪地主两眼，忍不住骂一声“狗婆养的”。诉完以后他又转过头来向群众看看，好像是说：有苦大家诉个痛快吧！

人群里，这时站出一个面孔陌生的农民。他一手叉了腰，一手指了黎朝初说：“我是云湖村曾家垅的。我们那边的地高引水难。年年车水要通过他的田。车一天水，每天要出‘车水埠头’谷一石。没有现谷，到下半年加息谷一石。还要白白替他车够灌三斗田的水——值工钱谷一石。1936年，他凭‘租埠头’就赚了一百多石谷子。在几年里头，他又置了二十多石田。解放前，我们云湖村探探他的口气，大家想把他这‘过水田’买过来，这家伙眼睛一翻说：这几丘‘过水田’是我祖传的，风水特别好，几百几千年后，这田还出不了黎家的门坎！多少年来，我们姓曾姓黎的农民们还为此一直吵闹着，如今我才明白毛病不在什么姓曾姓黎的，毛病是地主想尽了方法来剥削咱们农民！”

一连五个昼夜，结合着农民的诉苦和斗争，新炉村的地主们初步划出来了。这中间，比较复杂的还是七星岗街上兼工商业的地主。接着，又划了三天富农，每划一个地主或富农，就有更多的剥削事实和方法在农民面前暴露出来，因而也就更加深了农民对地主的阶级仇恨。

地主和富农划好以后，就由农民协会和雇贫农小组去审查。其中，只有一个富裕中农被划成了富农。纠正过来后，新炉村第一道阶级榜贴在彭氏家祠的花墙上了，白纸上写的是地主，黄纸上写的是富农。

划雇贫中农的时候，空气大大不同了。尽管被划的人把自己的人

口、田亩、农具、耕牛和债务报告完了后，在座的农民还会指出遗漏或错误，但整个空气是像家庭内部的吵嘴，嗓门尽管高，却没有些许仇恨。从现象来说，划中贫农时候大家都坐在长凳上，并不对立着。女人们还忙着奶孩子，民兵们用袖口擦着梭标，一个脖项上戴了白铜圈子的孩子在人丛中像条泥鳅般钻来钻去。座中的农民穿着打扮都一样，都是挣扎在封建社会碾石下面的被剥削者。

农民随报着，算盘子随着啪啪响着，登记表册的村书记紧张地记着。一个农民自报完了，村农会主席就问：大家看应该怎么划？

根据自上往下划的原则，农民也先找日子好过的划——即是中农。被划的自然也有拼命想降低成分的。彭云章被划成中农时候，撇了嘴说：“欠了一屁股债，还落个中农成分！”福全就插嘴说：“你欠的是什么债？是赌债！”

光林大叔被划成为“佃中农”。他虽然种的是黎朝初的田，完全靠自己的劳动，但是生产工具很全，生活得很好，从来不出卖劳动力。他也撸了胡须，抱怨着说：“我一亩田也没有，年年把谷子挑给地主去缴租，怎么还算不得个贫农？”

卢扬赶紧解释说：过去，田不是你的，土改以后，你就分到田了。然后又针对着中农们的顾虑开导说：划阶级主要是为了和地主分家，咱们农民是一条阵线。当中农一样光荣，一样是农村的主人。

划雇贫农的时候，也是由农民自报经济情况。时常在报的时候，大家联想起过去悲痛的事。黎媛驰说到“没有劳动力”的时候，又想起她那一去不回头的儿子德明来了，呜呜哭了起来。说到她带着春杏去地主家讨饭的时候，她忽然通身痉挛起来，嘴张着，眼睛直直的说不出话来了。春杏在旁边对大家解释说：

“那一天，地主放出一条大狼狗，在我妈的大腿上咬了一口——现在还有一块大疤。”

七星岗街上锡箔香烛业工人要求划作贫农。解放以来，他们的生意一天比一天淡了。土改以后，文化提高，迷信破除，他们这一行是注定了要消灭的，所以他们想索性趁土改转业当农民了。卢扬的答覆是：成分还是手工业工人，分田的时候可以照顾。

划完以后，把写明了姓名、年岁、人口、田亩、耕牛、农具、剥削与被剥削量的表册，送到乡政府和乡农会去慎重审查了。审查的结果，有几个农民的成分改动了。像大屋罗的罗冬生在土地革命的时候，参加

过红军。后来红军北上，他掉了队。靠着推手车、砍柴和卖零工过日子。一直到解放以后，才租种了四斗五升田，他应被划做雇农，但是却划成了贫农。

新炉村的阶级榜第二榜贴出来了。这回，白（地主）黄（富农）两榜以外，还贴出来浩浩荡荡的红榜，上面写着雇贫中农的名字。新炉村的农民，都携老带少地赶来“看榜”。认识字的，踮起脚来帮助不识字的农民看，随看随数自己是第几名，直好像那次序也含有意义似的。然后，看的人朗声报出来。

福全和春杏提了梭标，也在人群中挤。他两个都上了文化夜校，别人的名字还念不出来，却能辨识自己的了。

“福全，你高兴么？”春杏问，“高兴划成了雇农？”

“我呵，”他望了望那榜，“我不单高兴那个。”

这时，正在帮着农友们看榜的新五回过头来问：

“福全，你还高兴什么？”

福全指了指墙上的榜说：

“我高兴咱红榜上的人真多。”

新五听了不住地点头，并且说，一定把福全这句“高明话”在雇贫农小组和农会上传达一下，要大家都记住咱人真多——而且心齐。有了这个，再加上毛主席和共产党的领导，管保地主万世也复不了辟。

出榜的第二天，卢扬便和农会负责人把地主召集到祠堂来，谈了一次话。一面宣布凡是被划做地主的人，若是不服气，可以在批准以后十五天内向县人民法院去申诉。同时，通知他们等三榜定案后，就要没收他们的全部土地、农具、多余的房屋和粮食。农民租田时交的押金一律得退出来。解放前，农民欠地主的债作废，解放后，地主变卖的土地耕牛一律无效，得交回或者赔偿。所有应没收的东西，在农会没来接收以前，必须好好保存。若有损坏短少，要负完全责任。最后，卢扬宣布地主不许在家留客，出门得向小组长请假。

然后，又召集富农谈了一次，仍是声明准他们申诉，强调政府保存富农经济的政策。接着，卢扬告诉他们回龙乡人多田少。按土改法的规定，并且经过区政府批准，要征收他们出租部分的土地，但是自耕的土地和别的财产绝不动丝毫。最后，卢扬要他们好好生产，不要听信谣言。人民政府说一是一，说二是二的。

新炉村的全部阶级表册都由主任彭玉堂送到区政府去了。接着，

区委召集了九村的土改干部会议，在这会议上，肯定了九个村子划的阶级大致都很公平正确。区委总结干部汇报时指出：（一）二分会的石桥村有一个富农要献出一部分自耕的田来，干部自然没有接受，但是从这事实，可以反映一部分富农心里还有顾虑，还不够相信我们的保存富农经济政策，因而还不敢放手生产。应该对政策随时大力宣传，只有这样才能消除不安定的情绪。（二）三分会的双枫村在划阶级的时候，那个村主任廖卓南替地主廖鹏飞瞒了田，把他划成为富农。发觉以后，那个村主任立刻被撤职并且开除了他的农会会籍。同时，和那个村主任搭伙的也洗刷了。这说明我们农民的队伍还不纯。我们目前还得好好警惕，一面在斗争中扩大队伍，一面还得洗刷坏分子。最后，（三）总结这次九个村子划阶级的经验，应该自上而下，先划敌人，后划朋友，最后划自己；先划典型的，后划一般的。先划容易的，后划难的。划中贫雇农的时候，尺寸不妨放得宽些，划地主富农的时候，要十分严格。

表册由区政府批回来，阶级三榜贴出来的那一天，是新炉村土改开始以来的一个大日子。这一天，祠堂前面又搭起台来了。祠堂的墙上贴着“永远跟着共产党走！”“农民团结万岁！”“消灭封建地主！”一类的标语。广坪上，农民、富农和地主都出来开会，并且看榜了——看决定他们今后在农村的地位的最后一榜。

天气很冷，偶尔还有好像雪花般的白屑飘动。黎朝初怕人撩他的狐皮袍子，穿了件破棉袄，戴了顶破毡帽，瑟瑟缩缩地站在广坪一角，帽沿拉得快盖住了眉毛。他后面，地主们本来就稀稀朗朗没有几个，一个个又都是那么锁紧了眉头，或低了脑袋，一个孱弱无力、萎缩待毙的阶级了。

相形之下，富农们是很不同了。他们的人数也是单薄的，但表情上是愉快的。朱耀先戴了一顶仅仅露出眼睛和鼻子的“夜壶帽”，下面围了条毛线的围巾，一声不响地站在那里。但大多数富农还端着水烟袋，掂着纸捻，呼噜噜抽着水烟。

壮大，活跃，欢欢喜喜的雇贫中农是排了队，一齐进场的。首先，黎大明扛了红绸锦旗走在前面，旗上绣着“回龙乡乡农会第二分会”。他后面便是锣鼓，然后是扛了闪亮梭标的民兵，后面是妇女组、青年组、少儿队，一个个手里都晃动着写了反封建标语的旗帜。广坪上的空地站满了以后，田埂上还看不见殿后的队伍。于是，人数稀少的地主和富农被挤到贴墙边去了，农民队伍占去广坪的绝大部分，然而就这样还有些

农民挤不进来，只好就站在或坐在田埂上。

唱完了国歌，赵洁民同志走到台边，望望台底下的队伍说：

“土地改革是什么呢，就是取消这小撮人（指了指地主）欺负这么大一伙子人（用手向广坪划了半个圈子）的特权。只要农民的壮大队伍组织起来，团结起来，在生产，在学文化，在自卫上永远一条心的团结着，我们一定可以把这个封建的恶根子拔干净了”

6. SUNSHINE AFTER THE STORM

A few days after the final classification of classes, the Huilung *hsiang* peasants saw the year 1950 draw to a close. Ordinarily, the solar new year had been a matter of utter indifference to them, but this year, spring scrolls were pasted up on the doors and a huge party was held jointly by the farmhands and poor peasants. Yes, the year 1950 had been an unprecedented one—a year that the peasants would recall for generations.

It was at the party that the problem of reorganising the Peasants' Association was taken up.

The plan was first to get the masses to investigate the Association from the top down: To what extent had the peasants become their own masters since liberation? Was the influence of the landlord class thoroughly eliminated? Was the Association itself sufficiently strong? Were there still people outside the Association who should have been won over? On the other hand, had any irresponsible loafers or bad elements who were secretly in sympathy with the landlords infiltrated into the organisation? Then, the leadership of the Peasants' Association needed going into also. Were the cadres active in their work? Were they firm in struggling? Had there been cases of rank selfishness or protection of landlords? Such a thorough-going investigation laid an excellent foundation for the election of officers.

The Huilung *hsiang* Peasants' Association was divided into nine "big groups", each centring in one village. Three big groups formed one "division". Each big group was again subdivided into small groups, according to geography, customs and nature of work. Hsinlu Village, for instance, had four small groups. Each small group could name three Peasants' Association officers, one of whom must be a woman. In the final count, the Peasants' Association officers of the whole village must have no less than a two-thirds majority of farmhands and poor

peasants. That is to say, the number of middle peasants must not exceed one-third of the total.

Before the election got underway, Lu Yang stressed the following qualities as requisites for all the candidates: a clean record, honesty, diligence, activeness in work and firmness in struggling, and impartiality in making decisions. Each candidate must make a public self-criticism before the election started and then the peasants could offer their opinions. One candidate, for example, had it pointed out to him that he had once ill-treated his wife. However, a great many praiseworthy and exemplary acts of the peasants during the past month also came out. For example, Fu-chuan was known to have covered over 60 *li* on an empty stomach the day he went in search of Peng Erh-hu. When his sandals got torn, he went ahead on bare feet. Not until he had escorted Peng Erh-hu safely to the District Government did he discover that his feet were bruised and bleeding.

When the good points and shortcomings of each of the candidates had been brought out and discussed, the election began. People held up their hands to show support of a certain candidate. Altogether 12 officers were elected, and the chairmanship of the Association devolved on Peng Hsin-wu, who was publicly acknowledged to be militant and advanced in his political awareness and struggling, impartial and friendly in his dealings, with the additional advantage of having had some education, so that he could write and do arithmetic and was especially adept at making out lists and charts. He had under him four sections: militia, organisation, culture and publicity, and the women's group. A temporary "Committee on Requisition, Confiscation, Custody and Distribution" was also set up in order to facilitate the completion of land reform.

After this sifting process, the Hsinlu Village Peasants' Association emerged as a new body with all the activists picked out and marked down for certain duties. Lo Shu-min of the Big House Lo who was concurrently head of the Women's Small Group, and Peng Kuo-chang, a teacher at the Lo Primary School, both found themselves in the

Requisition Section. Fu-chuan and Chun-hsing were in the Confiscation Section and to Li Ta-ming and Yueh-lien were entrusted the work of taking over and transportation. As a rule, each section had four people. The Distribution Section, however, could boast of 16, including seven farmhands, five poor peasants and four middle peasants, all elected from the small groups, since distribution is the most complicated and difficult process in land reform. It involves the discovery of "black land"¹², correct evaluation of yearly yields, computation and redistribution of land. It could therefore be said to be the most important supervisory organ of land reform work.

With the full backing of the newly strengthened team of peasants, a firm foundation was thus laid down, and the land reform work in Huilung *hsiang* went soaring ahead.

Faced with the peasants' final offensive, the landlords, though shorn of their old glory and prestige, were yet unwilling to give in docilely. They retaliated with such tactics as the dispersion and hiding of properties and instigation of factional conflict among the peasants.

Lo Meng-hsiung, nephew of the landlord Lo Pei-jung who was serving a seven-year sentence, had several pine-trees on his land felled while the Peasants' Association was busily engaged in classification work. He got a carpenter from the Seven Star Slope, Liao San, to make two coffins for him; and sold the rest of the timber. However, he was smart enough always to appear in a shabby gown, and his wife would pretend they were poor and rush around borrowing rice from others. Actually, scarcely a day went by without their killing a chicken or a duck or what not and eating their fill. The ruse was soon discovered by the Confiscation Section. Lo was forced to cough up the cash and the coffins and all the left-over timber were promptly confiscated in accordance with *The Agrarian Reform Law*.

Practically all landlords tried to perform a few sleight-of-hand tricks in addition to perpetrating a certain amount of wilful destruction. They would extract the inner mechanism out of a merrily ticking desk clock. It was almost as though they all believed that a

thing destroyed was a thing gained. Another landlord was caught by militia members while emptying sackfuls of grain into a pond at night.

Besides making clearly known its regulations governing confiscation, members of the Confiscation and Requisition Sections also attempted to guard against any deviations in the process of confiscation through signing a common pledge.

The two sections met together before setting out to work and a programme of five "wants" and five "don't wants" was passed by the eight members after a careful study of *The Agrarian Reform Law*. The five "wants" were: Confiscation of land, farm implements, draught animals, surplus houses and surplus foodstuffs. The five "don't wants" were: properties directly employed in industry or commerce, capital, movable property, physical violence and the infringement of the middle peasants' interests. Also, the members all swore not to cover up misdoings, not to practice fraud or accept bribes from the landlords. At Fu-chuan's suggestion, everyone affixed his thumb-print to the text of the pledge.

Before going to Lo Meng-hsiung's house, Fu-chuan first made a trip to the Seven Star Slope and got hold of Liao San, the carpenter. From the latter he got a piece of valuable information. It seemed in addition to making two coffins, Liao San had also been asked to construct a double wall for Lo. Armed with this information they entered the Lo house. According to a careful plan, the confiscation officers immediately divided up. Some stood by on guard. Some searched the rooms and some inventoried the various articles. Chun-hsing was entrusted with the job of forcing Lo Meng-hsiung's wife to hand over the title deed to her husband's property.

Well, the deed was produced and the implements and animals were correctly inventoried. Then, placing his hands on his hips, Fu-chuan asked Lo Meng-hsiung, "Anything more?"

"You've taken away almost everything my ancestors left me. Are you still dissatisfied?" mumbled the landlord; pointing at the baby nestling in the arms of his wife, he added, "I swear by him, my only

precious offspring, that all my properties are here before you."

"All right," said Fu-chuan, nodding imperceptibly to the militia members. They made their way straight toward a chicken-roost at the corner of the house. Lo Meng-hsiung's face turned pale as he watched them dragging it aside. Then the pickaxe Fu-chuan had brought along with him began to resound through the yard. The landlord's family trembled, and the militia, leaning on their spears, stared at the wall fascinated. A few bricks were worked loose, and a plank was visible behind. With that hacked open, a shining padlock fastened on to a huge camphor-wood trunk finally came into view.

The landlords' scheming was by no means limited to the dispersal and hiding of properties. In their dying struggle, they would never let slip any opportunity to fan up bad feelings among the peasants, to break up their unity.

It was during this critical period that the Hsinlu Village peasants went over to Shihchiao Village to witness a public trial. There were certain complications involved, as some of the backward peasants of that village had been at feud with each other owing to a slight misunderstanding arising out of class differentiation. One group, the Yu Homestead, had charged the peasants of another group, the Tseng Homestead, with over-leniency in struggling against their landlord, Tseng Kuang-wen. There was also some talk to the effect that in making up for their surplus foodstuffs in terms of gold, Tseng Kuang-wen and the Yu Homestead landlord, Yu Tzu-wen, received unequal treatment, Tseng being favoured with a higher exchange ratio. Actually it was all a pack of lies fabricated by someone behind the scenes with the intent of creating mischief. But a lot of peasants fell for it. Hence when the three villages that belonged to the Third Division held a joint meeting to struggle against the landlord Yu Tzu-wen, one loafer of the Yu Homestead by the name of Yu Feng-ching suddenly stood up and shouted, "The Tsengs are unfair. Why didn't they struggle against their own landlord equally hard?" The atmosphere in the meeting place immediately became tense, and for a

short while it was touch and go whether the peasants would forget about their real enemy—namely, landlord Yu Tzu-wen, who stood complacently in front of the platform waiting to be accused—and return to the age-old custom of family feuding. Fortunately, the chairman of the Third Division had enough presence of mind. Then things came to a head. He ordered the meeting to be adjourned since "we are not sufficiently prepared". Careful investigation after the meeting revealed Yu Tze-wen to be the real wirepuller. It was he who had bribed the loafer to come out and create a disturbance—preferably an armed clash.

Yu Tzu-wen was condemned to be shot and was executed on the spot. That was an important lesson for the Hsinlu Village peasants who thereby learnt to heighten their vigilance. Therefore, when Li Chao-chu tried to get on the good side of Li Ta-ming by saying ingratiatingly, "Ta-ming, I'm sorry I treated you in such a rotten manner in the past. I hope when the land is distributed you'll let that piece of mine near Hsiping, fertile, high up and close to a pond," Ta-ming's face immediately fell and he turned on him, "Land distribution is the job of us peasants. You don't need to come butting in. Let the end of Yu Tzu-wen be an example to you if you are also thinking of alienating us!"

The complete inventory list for Hsinlu Village was made out and checked by the Confiscation Section, and passed on to the take-over people. Then it was for Li Ta-ming and Yueh-lien and others to see to the transportation. Farm implements and foodstuffs were concentrated in the various homesteads, where a few rooms confiscated from the landlords were specially set aside to storing them. Draught animals were temporarily kept by individual peasants to ensure their safety. Then the complete inventory, with detailed explanations as to where each item was kept, went around to the Distribution Section for general computation.

There were cases of landlords who requested to pay the amount of their foodstuffs in terms of other "movable properties". The

Association granted them permission to do so, and in no time at all the Pengs' Ancestral Temple was turned into an odd kind of department store. All kinds of ornaments, tonics, drugs and cosmetics, things hitherto unknown to the peasants were gathered together there. Glancing over them, Hsin-wu made the ironic comment: there's enough stuff for an exhibition showing "the way the landlords lived".

The first job that the Distribution Section busied themselves with was discovery of "black land". If some of the land listed were not complete, then fair and judicial distribution would be impossible. As far as the landlords were concerned, all their properties had been brought out into the open during the period of class differentiation. There was practically no problem there. But some middle peasants, especially tenant-middle-peasants, still proved intractable. It was because of this that Lu Yang decided to call an informal conference for tenant-middle-peasants.

"Talk of land reform! It left me even worse off than before!" grumbled Uncle Kuang-lin. "They are dividing up my land and struggling against me!"

Uncle Kuang-lin was by no means the only person who held those sentiments. Some of the tenants who had shown themselves unusually courageous and active in fighting the landlords began to sulk also when they saw the land they had cultivated for years marked down for redistribution.

Lu Yang listened patiently to the tenants "blowing off steam"; then he pointed out to them the indisputable truth that unless the landlords were brought down and the gigantic millstone of land rent and usury shaken off, no good living was possible for any of the peasants. So far everybody was in agreement. Then he expounded the necessity of "taking the long view". Unity among the peasants must be taken as the basis for everything. It was wrong to haggle over some immediate personal matter at the expense of the future welfare of all. That, too, was unanimously accepted. Then Lu Yang got down to brass tacks and did some actual figuring for the tenants. After land distribution, they

would each have their own land and no one would need to pay exorbitant rent (from 50 to 90 per cent of the produce) any more. Apart from crop payment to the government, all that was left could be enjoyed by themselves. At the same time, while giving up a portion of their land to be distributed, they also saved on human and animal labour and fertiliser. They could cultivate what land they had with greater care and they would have time left to develop other forms of production on the side.

Lastly, Lu Yang stressed the point stipulated in *The Agrarian Reform Law*—distribution on the basis of actual cultivation. In other words, reservation comes before distribution. The original tenants had priority in reserving a certain amount of good land or land within easy reach. What's more, after the distribution was over, the two per cent of public land in the village could also be rented to the original tillers who had first claim. Another source of tillable land for the tenants could be found in such families as had no labour power or depended on renting out small pieces of land for their living.

Thus, the essential points were all cleared up, and the Work Team and the Peasants' Association went on with propaganda work on a more general scale in order to dispel the last vestiges of selfishness still harboured by some of the peasants.

Hsin-wu got a bundle of chopsticks, from which he extracted one and showed it to the peasants. He then broke it in two, with apparently no effort at all. Then he tried breaking the whole bundle and of course did not meet with any success. Thus he illustrated the principle that "unity is strength" and that "for one peasant alone to prosper is impossible. We must all progress toward a better life together."

Next he emphasised the principle of "the plenty making up for the few and the fat for the thin" in land distribution, taking care however to point out the mistake of "equilitarianism". Those who were especially poor and helpless, like Grandma Li, and those who were especially strong in labour power, like Fu-chuan, ought to get up to

two hundred per cent more.

Somebody thought that was a good time for teasing Fu-chuan. "Sure, with two hundred per cent more land he could get a wife and have children." At this, everyone smiled and looked at Chun-hsing. The girl blushed scarlet and skipped out without saying a word.

Tu Yu-chen was nursing her baby, when an idea occurred to her. Addressing Hsin-wu, she said, "You'll soon have a baby too. I suggest we reserve a portion of land for him." Many peasants applauded the idea. Hsin-wu, however, was firm in his refusal. The others were equally firm in pressing the land upon him. Finally Lu Yang stood up.

"Theoretically speaking, land distribution goes per head. Suppose a person is very sick and dying. He still gets his portion if he is breathing on the day the land is distributed. The same rule applies to a baby. If he hasn't yet come into the world at land distribution, we shouldn't count him in. Therefore, land or no land, it all depends on how fast the baby can run and catch up with us."

Everybody roared with laughter.

The discussion then turned to the problem of handicraftsmen who dealt in superstitious articles like tinfoil, incense and candies. They had asked to be given some land so that they could become peasants. The request was promptly granted.

Then the problem of production after land reform came up. First, the Village Chairman announced that they had received a notice from the County Government through the District Government, which said that this county had been entrusted the job of spreading the use of selected seeds to the extent of 100,000 *mou* this year in accordance with a five-year plan sponsored by the Central People's Government. Five comrades had come down from Changsha specially to help out, and the different levels of the Peasants' Association would assume the responsibility of publicising the campaign. The good seeds to be promoted were known as Golden-Queen Grain. Scientific tests had revealed them to be superior to the current short-stalked kind of rice on every count. Land planted with the new seeds would yield 107

catties more grain per *mou*. They developed sturdy stalks with neat ears and grew boldly upright. They could stand heavy fertiliser and were not much affected by dry spells. What's more, they showed a surprising immunity from plant disease and insects. Those who would like to get loans of this kind of seed from the government could register and send in their requests in a month's time and return the same amount at the autumn harvest. Registration forms could be obtained from the Production Committee of the Peasants' Association. There were two varieties of seeds: one kind for common promotion, and another kind for special model propagation. They could get the seeds in the beginning of February. There was only one condition to be observed: the government-loaned seeds must not be eaten up like ordinary grain.

Owing to the difference in soil and location, two pieces of land of approximately the same size could vary a great deal in value. Moreover, the rice fields in Hunan were mostly of irregular shapes and didn't lend themselves to exact measurement. Since measuring the land itself involved so many complications, the only reliable standard was the average productivity. Thus each peasant was asked to "appraise" his own land.

The correct procedure was for each peasant to write down the productivity of each plot of his land on a flag. Land that he owned himself had a red flag while a white one signified land rented from some landlord or rich peasant. Distribution officers would come around and make the final assessment.

On the eve of the planting of flags, the peasants all held family meetings. Each racked his memory and tried to think back how much his land used to yield in the past. Then the amount which was believed to be accurate would be written down on the paper flag. Landless peasants had a lot of work to do also. They hacked bamboo sticks and pasted paper flags for the others.

The next morning countless small flags fluttering in the wind appeared on the Hsinlu Village field-paths. Often a peasant would

bring his whole family along to witness the grand ceremony of flag-planting. One was heard to mutter while sticking up his flag, "I couldn't dare look Chairman Mao in the face again if I made the amount too small." Another pointed at the Peasants' Association Membership Certificate pinned on his breast and swore that he had put down the absolutely correct amount. "I'm willing to forfeit this red silk insignia if I'm found to have cheated."

Around nine o'clock, the four small groups of Hsinlu Village and a few Appraisal Officers specially invited for that purpose appeared on the scene to conduct an actual investigation piece by piece. There was a secretary in every group with a ledger and a copper ink box. When the final amount for a piece of land was decided after due deliberation, he would write it down on the flag and also enter it in his ledger.

Most of the Appraisal Officers were peasants in their fifties or sixties. Standing there on the field-paths, they would run their eyes expertly over the land lying at their feet, just like old cowherds judging the age of a cow by looking at its teeth.

Almost all the peasants proved to be quite fair and unbiased in appraising their own land. It was obvious the propaganda work done by Lu Yang and his comrades was producing good results. Now and then the Appraisal Officers might decide to raise the original amount fixed by a peasant by four or five *tou*, but even then there would be no hard feelings, because the peasant would admit cheerfully, "You people certainly ought to know better than I do." Some thought of the marvellous new seeds they would have soon and insisted that they had fixed the amount too low, because the new seeds would "grow better".

An exhibition was held at the same time by the Association of all the "fruits of struggle" they had confiscated from the landlords. Peng Yin-ting's old mansion, now also confiscated, was turned over temporarily for that purpose. A piece of red cloth, on which were written the characters "Exhibition Showing the Way the Landlords

Lived", was hung over the entrance to the huge, sumptuously decorated sitting room where Peng Yin-ting used to entertain passing Japanese military officers, including Brigadier-General Shirakawa. Inside the room, on the long sideboards under the shuttered windows were displayed gold and silver ingots of the Manchu regime, buddhas and bracelets of gold, carved ivory fans, silver chopsticks, jade rice bowls, a huge closet with ingenious carvings and gold lettering and a four-poster bed with a row of small drawers on the side where delicacies and candies could be kept.

The peasants were ignorant with regard both to the names and the uses of these fancy articles. However, by contrasting them with what they themselves possessed, they could not help feeling angry and bitter. Hatred surged up in their breasts as they made the rounds, viewing each article, cursing as they went. Among them was also Yueh-lien. To her these were familiar sights, but she also paused and thought back on the way the owner of these beautiful things used to treat her.

Meanwhile, Comrade Chao Chieh-min called all the Work Team Cadres of the nine villages to a Land Distribution Meeting in the temple. First, they went over together the conditions of land distributed among the three divisions. As a result, it was found that the Third Division has comparatively less land than the other two. Thereupon he decided that the First Division should transfer 23 *tan* and five *tou* of land to the Second Division, which, in turn, should transfer 17 *tan* and four *tou* of land to the Third. Thus the three divisions would all have an average of 2.4 to 2.5 *tou* for each person entitled to receive land.

Adjustment was thus made on the *hsiang* basis. Next they had to investigate the problem of land owned by each village. The average of Hsinlu Village for instance, was 0.04 *tou* higher than that of Shihchia Village, and 0.07 *tou* higher than that of Yunhu Village. The three villages, therefore, got together and discussed the best method of readjustment. It was not merely a job for the mathematicians. In

adjusting land, you have to think about the peasants' domestic problems and the problem of housing. Nothing is easier than to shift people around on paper, but the moment you want it done, human problems begin to pile up. Finally they decided to follow the way of the Old Liberated Area. Yunhu Village, which adjoined Shihchiao Village, would have a tract of land pared down equal in size to what Hsinlu Village should allocate. Then Hsinlu Village, in its turn, would also rule out the corresponding amount of land where it touched Yunhu Village.

It was almost 50 days now since land reform started. The peasants of Huilung *hsiang* had risen early and gone to bed late, and one by one they had pulled the landlords down. They had made out class differentiation lists for the whole *hsiang* down to the minutest detail, assumed control of the properties handed over by the landlords and hunted down what the latter had dispersed or hidden. They had achieved so much simply because they had refused to compromise, ignored temptation and threats and kept on struggling to the very end. Undoubtedly, the last month or so had been a stormy period.

On the eve of land distribution, the whole of Huilung *hsiang* seemed to brighten up. The storm was over, the sun had come out and joy was in every heart. From now on, a peasant would be able to enjoy fully the fruits of his own labour. He could brace back his shoulders and, waving a hand at the land he cultivated, say with honest pride, "This is *my* land. A new, rational state of things had risen like a fresh, golden dawn breaking over the horizon.

And for three days and three nights, the main hall in the Pengs' Ancestral Temple swarmed with people—people on whose faces were written happy expectations.

Peng Yu-chang, Lu Yang, Hsin-wu and other Distribution Officers of the Association clustered around a square table beneath Chairman Mao's portrait. The time was already nearing the end of January, 1951, and the overthrow of the feudal land system was all but completed. Inside the feudal temple, an icy wind whistled down

people's necks. A few peasants had brought along bundles of hay from their homes and built a huge fire in the middle of the hall. Fu-chuan and Li Ta-ming sat one on each end of the haystack and fed the fire when it got low. The dry rice stalks crackled and the flame leaped up and down. Shadows played on the peasants' smiling faces, and warmth and harmony and deep-felt joy pervaded the whole gathering.

Each peasant would step up beside the fire and report on the number of people he had in his family. (Actually, in most cases, they were also there with him.) Then how much land and farm implements he owned. The Distribution Section would then open their ledger of "land to be divided" and select a share of land according to the amount the peasant was entitled to. Opinions from the masses could be offered on the spot. The peasant himself was also allowed to make suggestions. Aged people would get land that was located conveniently near. Those who owned water-wheels were given land higher up. Those who lacked certain implements could report and get new ones. Draught animals were shared, one among several families. In order not to overwork the animal, a three *tan* maximum of ploughing was set for each ox.

When Fu-chuan's turn came, he handed over his bundle of hay to Chun-hsing. Family? "One—myself." Land? "No land." Implements? "No implements." The crowd insisted that he should have two portions. Hence he was given a plough, a hoe, a big piece of land near the Big Graveyard valued at five *tou* and 2 *sheng* and a share together with three other families of a three-year-old calf that used to belong to Peng Erh-hu. For living quarters, he was given Peng Erh-hu's study.

While people applauded and edged up to shake hands with a slightly dazed Fu-chuan, Yueh-lien rushed into the room, brushing off snowflakes from her shoulders and sleeves. "Brother Hsin-wu. Brother Hsin-wu!" Hsin-wu, who was bending over the table busily registering, raised up his head.

"Go home quickly!" she cried, gesticulating wildly, her mouth open. "Hurry and get the midwife. Your wife is in great pain!"

Hsin-wu instantly pushed his papers over to another Distribution Officer and threaded his way out through the crowd.

Tu Yu-chen also stood up. Momentarily forgetting her turn in land distribution, she thrust her own baby into the grins of her mother-in-law and followed Hsin-wu to help.

At around two o'clock in the night, the land distribution work was still in full swing when Chun-hsing entered carrying a steaming cauldron of glutinous rice. Placing it on the square table, she said, "You must all be tired out. Have something to eat!"

The officers did not think they should, since they knew Grandma Li was not so well off that she had a lot to spare, but the old woman herself was insistent. Leaning on her crutch, she urged them. "Go and eat! Otherwise we won't feel happy. This is the rice we originally saved for the lunar New Year. But now for the first time since the world began the poor folks have their own land. Isn't that better than a hundred, a thousand New Years?"

The men gave in. Someone went and got a whole stack of bowls from the back of the temple, and Chun-hsing started ladling out the rice.

In the midst of this tumult, Tu Yu-chen again appeared, slightly out of breath. Planting herself squarely before the table, she shouted:

"Attention everybody. Hsin-wu *Sao* (sister-in-law) has just had twins. A boy and a girl!"

The applause that greeted this announcement was nothing short of deafening. Tu Yu-chen was immediately surrounded by a crowd of curious people who wanted to know more of the details.

Then a radiant Hsin-wu showed up, bowing right and left in response to people's congratulations. A moment later, he was back in his seat, once more buried in the intricate registration work.

The next morning, all the peasants got up early and trudged through the snow to have a look at their newly acquired land. Standing on the field-path, they surveyed the snow-covered fields, in their minds figuring out the amount of fertiliser and seeds needed and

also imagining the ocean of lush green that would come with the autumn. Some of the fields already had markers on them saying proudly "Victory" or "Liberation" with careful notations on the side of the new owner's name and date.

The Emancipation Meeting—the climax of land reform and an unparalleled joyous event for the peasants—was held at two o'clock on that very afternoon. Once more the scene was laid in the open ground in front of the Pengs' Ancestral Temple. The meeting was under the auspices of the three villages that came under the First Division; for several days all the village activists had been busily preparing for it. The stage was lit up by a pair of bright red scrolls, one saying "Earth and heaven overturned and feudalism destroyed!" and the other, "Resist America and aid Korea; defend our home and country!" On a horizontal tablet were written the words, "All peasants everywhere are brothers."

The celebration started in the morning around ten o'clock. Troops of peasants carrying spears or beating gongs and drums could be seen making their way along labyrinthine field-paths toward the Peng-Chu Homestead. The primary school students led the procession. Some of them were got up in multicoloured clothes, with towels tied around their heads, lightly skipping along doing a harvest dance. Some were members of the Young Pioneers with flowing red ties. A few had their faces heavily rouged and bounced among the procession, waving wooden swords.

The handicraftsmen on the Seven Star Slope had constructed two sedan chairs tied together with bamboo sticks and wrapped in red silk. Each chair bore four pictures framed against a background of heavy colourful brocade. On the first chair were portraits of Chairman Mao, Commander-in-Chief Chu, Vice-Chairman Liu Shao-chi and Premier Chou En-lai. On the other were portraits of Marx, Engels, Lenin and Stalin.

Some of the workers acted as chair-carriers. Some were beating gongs and drums and some were blowing bamboo flutes.

To Fu-chuan on that day was entrusted the job of looking after all the draught animals. In order to get them away from the crowd near the meeting place, all the animals were collected in the graveyard in front of the temple. Some of the oxen, when led there, were found to have colourful rings and balls tied around their horns.

Before the meeting started, Peasants' Association cadres of the three villages had already collected all the title deeds the landlords had handed over and piled them up in the centre of the meeting place in neatly tied bundles. Some of the deeds had turned yellow around the edges, having first been drawn up in the Manchu period. Some were wrapped up with layer after layer of silk. A great variety of seals were affixed to those deeds, representing the Manchu emperors, the warlords, the Wang Ching-wei puppet government and the KMT government. And some of the conditions stipulated in the deeds were cruel beyond belief. For example, a "big-headed contract" meant you must write down the five *tou* of land you rented as seven *tou* and pay your rent accordingly. "Fixed rent" meant the amount of rent you had to pay remained the same even in exceptionally bad or disastrous years. "Flexible rent" meant the tenants could get the landlords to come over to a banquet in a bad year; if upon looking at the crop, he should decide to cut down the rent, all right and good. But it all depended on his whim, and very often the amount discounted was not even sufficient to cover the banquet expenses. There they were, all written down in black and white on those deeds. As the peasants looked at them, their eyes flamed with pain and hatred.

A string of firecrackers about five feet long, especially made for the occasion by the Seven Star Slope workers, was hung up right beside the pile of deeds.

The noise made by the gongs and drums grew louder as more and more people flowed in. Those who had a part in theatrical performances were already made up. The item offered by the peasants of Shihchiao Village was a dragon dance. The fabulous animal was over 50 feet in length, with its head painted gold. Its jaws moved up

and down and its copper wire whiskers twitched most realistically. Yunhu Village put on a drum dance—"the Third Scholar Keeping Company with His Lass." The one who played the Third Scholar did not put his beard on right; so it kept falling o, to the great amusement of the audience. The dance performed by Hsinlu Village peasants was copied from the dance of fishermen around Lake Tungting. Chun-hsing in a pink shirt and a baby-blue skirt was "the oyster". She had two huge pieces of stiffened cloth tied to her arms, red on the outside and white inside, which represented the two halves of her shell. She was fleeing from a young fisherman, played by Yueh-lien, who followed behind her with a fishing net, acting out gestures of casting and drawing in the net.

The national anthem was sung, with the fresh voiced primary school students in the lead. Next everybody bowed to the national flag and the picture of Chairman Mao. Then the presidium, formed by the three Association Chairmen, Chairman of the Women's Association, Captain of the Militia, leader of the Small Group of Farmhands and Poor Peasants and the three Village Chairmen, mounted the stage and the meeting began.

Great promises and solemn declarations were made during the meeting by peasants who never before in their lives had spoken in public. Li Chen-nan pledged that he would work hard at production and dyke repairing. Lo Shu-min demanded that women be allowed to take equal part in dyke repairing since in land distribution women received equal treatment with men.

Finally Fu-chuan also pulled himself together and ran up the stage. Nervously twisting his hat in one hand, he made a stiff bow to the audience and began:

"I only know how to meddle with mud and I can't talk. But, when we drink, we don't forget the well-digger; in emancipation, let us not forget the Communist Party! Without Chairman Mao, without the Communist Party, where would I be today? Wouldn't I still be trampled underfoot by Peng Erh-hu?"

With arms raised, the peasants sent out shouts like roaring tides.

"Long live the Communist Party!"

"Long live Chairman Mao, the peasants' Saviour!"

When the slogans gradually quieted down, Fu-chuan went on:

"I understand very well now that landlords and imperialism cannot be separated. Look at the Peng family, Peng Yin-ting and Peng Erh-hu! Didn't my father die at their hands? But we were then all 'sealed up in a drum', since the Communists hadn't yet come to help us open our eyes. Now it's different. If America should want to do what Japan did and try to push us around, we'll get up and smash them all—American imperialists as well as all the Taiwan traitors!"

Shouts and applause shook the quiet fields of Hsinlu Village, echoing the rise of China's new peasantry.

Then a crackling sound was heard. The firecrackers were lit and bundle after bundle of deeds began to catch fire and burn. They were the weapons of the landlord class, by which they sucked the blood of the peasants. Now they were all in shreds and ashes and the wind carried them away.

陆 空前的大喜事

阶级划完不上几天，回龙乡的农民便和1950年辞别了。往常，农民们对于阳历年是漠不关心的，但是今年家家都在门上贴了春联，还开了一个雇贫中农的联欢大会，大家对于空前的1950年，都怪依依不舍的。

在联欢大会上，农民们酝酿起整顿农民协会的问题来。

首先是由群众从上到下检查农会：检查农民从解放到今天，翻了多少身；地主阶级是不是斗垮了；农会的力量大不大，有多少应当吸收而没有吸收的，有哪些二流子或者和地主有勾结的坏分子混在里面。最后，检查农会的领导：干部工作得积极不积极，斗争得坚决不坚决，有没有自私自利或者包庇地主的情形。这样检查就为选举打下了基础。

回龙乡全乡的农会分为九大组，即是每个村子为一大组，每三大组为一分会。各大组下的小组是根据地形、习惯、工作基础来分的。新炉村便分为四个小组。每小组选举三名农协委员，其中一名是妇女；全村农协委员中，雇贫农不能少于三分之二，中农不能多于三分之一。

在新炉村选举以前，卢扬说明了候选人应有的品质：历史清白，为人正派，工作积极，斗争坚决，办事公正，作风老实，劳动勤快。在举行选举以前，候选人先自我检讨，然后农民提意见。一个候选人被指责打过堂客，但是农民在过去一个月中间所做的许多可敬的事迹，也在这会上表扬出来了。譬如福全去抓彭二虎那天，空着肚子一口气跑了六十几里路，草鞋踏破了就打赤脚板，等把彭二虎送到区政府他才察觉脚底下皮肉都磨出了血。

每个候选人的优缺点都反复讨论完了以后，就举手表决。新炉村的村农协一共选出十二名委员来，被群众认为觉悟高，斗争坚决，处理事情大公无私，群众关系好，又能写会算，善于造表册的彭新五被选为村农协主任。在他领导下，农协分为四组：武装、妇女、组织和宣传。生产委员会以外，又成立了一个临时性质的“没收征收接管分配委员会”，负责完成土改工作。

经过整顿，职责明确化了的新炉村的农协中，村中的积极分子都受到群众的拥护，担任了一定的任务。大屋罗的罗淑敏（妇女组的组长）和罗氏小学的教员彭国璋在征收组，福全和春杏同是在没收组，黎大明

和月莲负责接管和搬运。每小组四个人，但是分配组有十六个人，其中包括七个雇农，五个贫农，四个中农，都是由四个小组里推选出来的。因为分配是最复杂、最艰巨的一项。它包括挤黑田，评产量，统计和分配——这是土地改革工作的顶点。

这样布置了以后，回龙乡的土地改革就有了更纯洁更壮大的农民队伍，在更坚实的基础上进行了！

工作队不但明确地宣布了没收政策，并且曾用公约方式保证在没收过程中，不发生任何偏差。

在出发以前，没收征收两组先开了一个会。八个组员根据土改法通过了“五要”和“五不要”。“五要”是：土地、农具、耕畜、农村中的房屋和多余的粮食。“五不要”是：直接用于工商业的财产、底财、浮财、不乱打乱杀、不侵犯中农利益。同时，组员们宣誓保证在征收没收过程中，不包庇、不贪污、不受地主的收买利诱。经福全提议，大家还在公约上打下了手印。

卢扬在公约订好以后，又根据上级指示，作了几点补充：一、解放以前农民欠地主的债一律作废。但是解放前后，地主欠农民的债一律要归还；二、所有地主分散隐藏的财产，不论是浮财底财，一旦发觉就没收，作为斗争果实；三、地主富农瞒的黑田，查出来后，都要按税率补偿公粮，半数交县，半数由乡农协保管，用来补助本乡的生产资料。

当农民布置着最后的攻势时，威风已经快削光了的地主们自然也不会“坐以待毙”的。他们的战略是分散和隐藏财产，破坏农民的团结。

几乎所有的地主都隐藏了些东西，他们大半都进行了或大或小的破坏。桌上的座钟走得好好的，地主却把它的囊子掏出来，直好像毁坏一件，自己便捡到一件似的。又一个地主被民兵发觉半夜把满麻袋的谷子倒到门前塘里去，宁可这样，也不给农民吃！

被判七年徒刑的地主罗培荣的侄子罗梦熊趁农会忙着划阶级的时候，偷偷把他的山田上的松树砍掉了一半，找了七星岗上木匠廖三来做了两口棺材，剩下的换了光洋。同时，他穿上一件破袍子，他堂客四处去讨米。其实，他们家里天天不杀鸡便宰鸭，正在大吃大喝。没收组发现以后，他才把光洋吐出来，棺材和剩余的木料也照土地改革法充公了。

去罗梦熊家里以前，福全先到七星岗找到了廖三，打听出来罗除了要廖三给他做两副棺材，还造了一道夹墙。进了罗梦熊的门，没收组照

预先布置好的，有的负责监视，有的进行搜查，有的忙着登记表册。春杏的工作是向罗梦熊的堂客追红契。那女人一边抹着眼泪，一边開箱子。交出时候那种舍不得的神情，直好像那张纸还有多大效力。

契追出来，农具耕牛点验完了以后，福全插了腰问罗梦熊：

“还有东西没有了？”

“我祖宗三代的点子产业全拿出来了。”地主嘟囔着说。然后指了他堂客怀里抱着的娃子说：“我指着我这条命根子起誓，什么都摆在这块了。”

“好！”福全朝扛了梭标的民兵努了努嘴。他们一直就走近屋角的一只鸡埘。当民兵把鸡埘往外拖的时候，罗梦熊的脸惨白了。随着是福全用带来的斧头砍动的声音。屋里地主一家颤抖着，民兵拄了梭标，专注地望着屋角。墙砖砍裂了，砖后面是一块木板。木板再敲裂，樟木箱子上亮晃晃的锁便露出来了。

地主的阴谋还不止于分散和隐藏财产。在殊死的挣扎中，他们更随时想破坏农民间的团结。

这时期，新炉村的农民到石桥村去参加了一个公审大会。事情是这样：石桥村的曾家屋场和喻家屋场的落后农民在划定阶级后，闹了点意见。几天来便听说喻家有些人暗地里抱怨曾家农民斗他们的地主曾广文时，斗得不狠。又说曾广文和喻家屋场的地主喻子文同是用金子赔偿余粮，但是折合的比率，曾家定的比喻家的高。这两点其实都不是事实，显然有人在幕后操纵，制造空气。当第三分会三个村子开会斗争地主喻子文的时候，喻家屋场的一个痞子喻凤清突然在会场上嚷“曾家人自私自利，专会斗别姓的地主！”当时会场空气紧张，农民一刹那几乎把真正的敌人——站在台前等待被控告的喻子文——忘记了，思想好像又回到几千年的宗派家族去。幸亏第三分会的会长掌握得好，他马上宣布“今天开会酝酿不充足，改天再开，现在散会！”会后仔细深入调查，才知道是喻子文用钱收买了痞子，想制造一场农民的械斗。

看过喻子文当场枪决后，新炉村的农民对地主更提高了警惕。所以当黎朝初对长工黎大明讨好说“大明，我过去对你实在不好，我希望将来分田时，你能分到细坪墩我那块土肥、地高、离水塘近的田”的时候，黎大明瞪起眼睛对他正颜厉色地吆斥说：“分田是我们农民的事，用不着你多嘴。你也想挑拨吗？你记住喻子文的下场吧！”

没收组点查登记后，随着便把清单交给接管组。黎大明、月莲他们

便拿着清单，按户接管搬运了。农具余粮集中在各个屋场，由农协拨几间没收的多余房屋来放置，房门上由接管组贴上封条。耕牛为安全起见，由农民们分头寄养。按项注明了保管情形的清单，转到分配组去统计了。

有的地主交不出余粮来，要求用别的浮财代替。农协同意了。即刻，五花八门的奇怪东西都堆集到彭氏祠堂来，各种首饰、补品、化妆品，都是农民闻所未闻、见所未见的东西。新五提议：把这些古怪东西凑齐了开个“地主生活展览会”吧！

分配组首先忙的是挤黑田。如果表册上的田亩不完全，有隐瞒，分田的时候就一定不可能公平。地主的田，在划阶级时候已经差不多挤干净了，只是个别中农，尤其佃中农还想不通。因此，配合着挤黑田的工作，卢扬又特别召集了一个佃中农座谈会。

“改了还不如不改哪！”光林大叔撸了胡须发着牢骚。“如今，分了我的田，革起我的命来了！”

发牢骚的还不止光林大叔一个。几个在斗争地主的时候很勇敢很积极的佃农，临到自己佃种了多少年的田地被登记下来重新分配的时候，思想上起了波动。

卢扬让佃农们把牢骚发完，然后他提醒佃农们，如果地主打不倒，大家还生活在田租和高利贷的巨石下面，谁也没好日子过。这一点大家很快地都承认了。然后，他指出农民的长远利益完全建筑在农民的团结上面，所以，不能为了眼前的局部利益，牺牲长远的全体利益。这一点，大家也懂了。这时，卢扬才从实际得失来帮佃农们打打算盘：分田以后，田属了自己，农民再也不要缴那五成到九成的田租了，除了缴公粮，扮多少禾都是自己的。同时，把一部分田拿出来分，可以省出劳力、畜力和肥料。这样，田可以耕得更细，并且还得力量发展副业。

最后，卢扬强调了《土地改革法》上规定的“在原耕基础上分田”，采取先留后分的办法。这是说，佃农们可以尽先留些好田、近田，并且分田后，本村留下的百分之二的公田也可以尽先佃给原耕的农民。这以外，没有劳动力的鳏寡孤独的田和小土地出租者的田也可以佃给他们。

重点地打通了佃农思想以后，工作队和农协又广泛地对农民宣传，有力并且及时地打破了有些农民存在的自私自利思想。

新五拿了一把筷子。他先抽出一根来，两下一撇便断了。但是一把筷子谁也撇不断。他用这生动的比喻说明团结的力量，也就说明了“一个

人发家致富”的不可能，必须要人人过得好。接着，他强调了分田时候“抽多补少，抽肥补瘦”的原则，指出平均主义思想的不正确。对于特别贫苦的，和鳏寡孤独像黎媛驰，对于劳动力特别强的，像福全，可以多分一份半到两份。

说到这里，有人就逗笑说，“多分一份半份的就可以娶堂客抱娃子了！”这话说完，许多只眼睛就向福全和春杏的脸上瞟，春杏连耳根子都烧红了，赶忙溜出去了。

这时，涂玉贞一边奶着崽一边对新五说：“你家里眼看就要生了，我提议给那细伢崽留一份。”这话说完，许多农民都拍掌表示赞成。新五坚决表示不留，大家又一定坚持他留。卢扬这时站起来说：

“照原则，我们分田有一口算一口，重病在分田那天未死的，仍分一份，马上分娩，但是分田那天没落地的，不能算数。因此，分不分给那细伢崽的田，就看他两条小腿赶得上赶不上吧！”

大家哄地笑了。

然后又讨论七星岗从事迷信（锡箔，香烛）手工业工人分田可以使他们转业的问题。大家一致同意照分。

最后，讨论转入到土改以后的生产问题上去。首先，村主任报告区政府转来的一个县政府通知：为执行中央五年良种普及计划，分配本县今年推广十万亩的任务，长沙并且派来五位同志到县里协助，由各级农协负责推广繁殖。推广的良种名叫“万利籼”，经过典型试验，证明它比目前种的“矮脚粘”每亩多产107斤谷子，而且，抽穗整齐，茎秆粗硬，不易倒伏，受得住肥料，经得起旱，对稻热病和钻心虫都具有强大抵抗力。凡想向政府借这种子的，在一个月內可以登记请求，秋收归还。登记表可以向农协生产委员会领取，分普通推广和特约示范繁殖两种。种子2月初可以贷下来，只有一个条件：不许把贷下的种子作口粮吃。

由于土质、地势的不同，同样大小的两块田地，价值却可以很悬殊。同时，多边形的湖南稻田，单凭面积来衡量田地也是不适宜的。从地势来说，最好是当中（平原）的田，其次是边上的农田，最坏的是港边的低田，因为随时可能被水冲了。从土质来说，最好是色灰体松的油沙土，其次是容易干的火烧土。自然，水源的远近也有关系。既然土地本身是这样复杂，分田就得以每丘田的历年平均产量为标准。这便需要大家评议产量了。

评产的手续是先由农民把自己每丘田的产量写在纸旗上——红旗是农民自己的田，白旗是由地主富农那里佃来的。然后由分配委员来评定。

插旗的头天晚上，农民家家都开起家庭会，凭记忆核算历年的产量，然后把自认为公允的产量写在纸旗子上。没有田的农民就帮着砍竹子，糊纸旗。第二天清早，新炉村的阡陌田野上，迎风刷刷地吹动起一面面的小旗子。插旗的时候，农民一家老幼都参加，有的农民还一面插，一面说：“如果评少了，我对不起毛主席！”也有的指着胸前的农协会员证发誓说：“如果瞒了产量，我愿意把这红绸子交出来。”

9点光景，新炉村四个小组和特约的评议委员到田里按丘踏查了。每组都有一个书记，一手提着簿子，一手拿着墨盒。当一丘田经过反复商议评定了时，书记就把评定的产量，注在旗子上，并且登记到簿子里。

大部分评议委员是五六十岁的农民，他们站在田埂上打量着躺在面前的田丘，就像一个老牧人望着牲口的牙齿来判断年岁那样熟悉。

农民经过思想动员，大致自报的都很公道。被评议委员在原报的加上三五斗的农民，也表示“大家评的总比一个人评的公道。”有的想起不久便贷下来的“万利糶”，还说：照改良的种子计算，评的一定还是太低了。

这时，农协把由地主没收来的斗争果实开了一个展览会，会场设在没收了的彭荫庭的住宅里。中间，特别富丽堂皇的那间大客厅，沦陷期间彭荫庭曾在那里招待过多少过路的日本军官，像白川少将。这时，檐下挂了一块红布上面写着“地主生活展览会”。屋里，沿着百叶窗的梨木长案上，放着清代铸的金银元宝、金菩萨、金手镯、金钏、象牙雕的团扇、银筷子、玉做的饭碗。雕花的衣柜外面金字写着“堆金积玉”，四柱床靠里边还有一排为放零吃用的小抽屉。

“农民对这些器皿，珍品的名字和用处都不熟悉，只是对照着自己的生活，他们充满了愤恨。每看一件，就骂一声。比较熟悉的月莲，”望到那些精致摆设，心里更充满了仇恨。八年来，那些精致家具的主人曾怎样恶毒地虐待她啊！

这时，赵洁民同志在祠堂里召集了九个村的工作队干部，开分田会议。先汇报三个分会的分配情况。在这会议上，他发觉第三分会的田比较少，决定一分会应调出给二分会二十三石五斗田，二分会调出十七石

四斗，这样，三个分会照分田人口计算，平均数便都在2.4或2.5斗了。

在全乡的基础上调整了之后，三个分会又分头聚在一起，来调整村与村的田地。新炉村的平均数比石桥村的多了0.04斗，比云湖村多了0.07斗，于是，三个村子商量怎样调整了。这不只是个数学问题。调整田地，要照顾到住房问题，也要照顾到农民的心理，移民在纸上看来最简单，但是实际困难最多。最后还是决定在与石桥村毗连的云湖村，分田时候留下相当于新炉村应调出的田地，然后新炉村再在与云湖村交界的地方，把应调出的给两村的田调给云湖村。

将近两个月来，回龙乡的农民起早睡晚，凭了自己团结的力量把地主一个个斗垮，把全乡人口的阶级成份毫厘不爽地划出来，接管了地主应交出的财产，也追出他们所分散隐藏的。所有这些成就，都由于农民不妥协，不怕威胁利诱，坚持到底的斗争。无疑地，过去一个多月是一场暴风骤雨。

在分田的前夕，回龙乡的原野就恰如雨过天晴那样的明朗灿烂，屋场里是一片喜气洋洋。耕田的农民，将享受到田地的收获，他可以挺了胸脯，指着他耕种的田地说：“这是我的了。”一个新的合理的秩序，像金黄色的曙光一样，在地平线上冒芽了。

3日夜间，彭氏家祠的正堂挤满了人——欢欢喜喜的人。

毛主席的挂像下面还是那张八仙桌，桌边坐着彭玉堂、卢扬、新五和农协的分配委员们。时间到了1951年1月的下旬了，祠堂里冷风向人们脖颈里飕飕地刮。农民自动从家里抱来一捆捆的稻草，在堂当中烧起一堆熊熊的火。福全和黎大明各坐在草堆的一端，一撮一撮地续着草。枯干的稻草茎格格响着，火光忽明忽晦地在农民一张张微笑着的脸上晃着，烘托出一片温暖，一片和谐，一片由心坎上溢出的喜悦。

一个个农民站在火焰旁边，报着人口（一家大小多半都已经站在眼前了），报田地，报农具，然后分配组打开待分配的田地账簿，照那农民应分的数量来选择，大家当场提意见，本人也当场表示意见。年纪大的，就分近些的田。有水车的，就分给地势高些的田。农具报缺被缺，耕牛几户分一头，但是为了怕把牲口累坏了，规定一头牛顶多耕三石田。

分到福全的时候，春杏把草捆接过去了。福全报人口是“一个”，田“没有”，农具“没有”。大家坚持分他两份，分他一把犁，一把锄，他分到大坟坪的一大丘田，还和三户伙分了彭二虎的牛犊子。房子，他分

到了彭二虎的书房。

大家正在拍掌向福全道贺的时候，月莲从外面挤进来了。她肩胛上，身上都是雪花，一路嚷着“新五哥，新五哥！”她挤进人圈，便扑到正在伏案登记着表册的新五面前。

“快回去吧！”她直着眼睛，张大了嘴，好像出了什么事。“快到七星岗找接生娘去，新五嫂肚子痛得在床上打滚呢！”

新五只好把表册交给另一个分配委员，从人丛中挤出去了。涂玉贞也不顾自己的分田，把孩子交给婆婆，也跟出去帮忙了。幸亏县政府在七星岗街上新设的诊疗所里有一个会接生的。新五嫂已经去那里检查过了。

夜里2点光景，分田正在进行着的时候，春杏端着一锅热腾腾的糯米饭放在八仙桌上说：“委员们辛苦了，垫垫肚子吧！”

大家都知道黎媛驰也没什么多余，都不忍吃她的。她拄了杖，站在火旁说：“你们用了，我们母女才心安。这原是我们预备用来过年的。但是开天辟地穷人头一回分田，这比过一百个年还更喜欢！”

于是，有人从祠堂后面抱出一叠碗来，春杏就赶过去一勺勺地盛。正盛着，涂玉贞喘着气跑进来了。她站在八仙桌前，大声宣布：

“大家听着：新五嫂双喜临门，而且是一男一女！”

农民们听了震耳地鼓起掌来，把涂玉贞包围起来，问长问短。

跟着进来的新五，笑眯眯地接受了大家的道贺，然后，就又回到八仙桌上去登记表册了。

一清早，农民们爬起床来便冒着雪去踏看他们新分到的田地去了。站在田埂上，他们呆呆地对着覆盖在雪下面的田地出神，估量着肥料、种籽，也冥想着秋天一片油绿绿的收成。有的田还插上牌，上面写着“胜利田”或“翻身田”，旁边写着某某人置于某年某月。

翻身大会——土改的顶点，农民空前的大喜事，就在这天下午2点举行，地点还是彭氏家祠的广坪。这是第一分会三个村子合办的。几天来，三村的积极分子一直在筹备着。台上贴了嫣红的对联，一边写的是“翻天覆地消灭封建”，一边是“抗美援朝保家卫国”。横批是“天下农民是一家”。

田埂上，从10点多钟便开始了庆祝的活动。东一队西一队的农民，扛着梭标，敲着锣鼓，向彭朱家屋场进发。最前面还有各村小学生，有的穿了花花绿绿的服装，头上扎了羊肚手巾，步子轻盈如雏燕般扭着秧

歌；有的是打了红领巾；还有的扮上花脸，手里提着木剑木刀，在队伍里耍动。

七星岗的手工业工人们用竹子扎成两辆彩轿，轿身都用红绸子包起，中间用五色缤纷的绫缎嵌成四面框子，一辆悬了毛主席，朱总司令，刘少奇副主席和周恩来总理的画像，另一辆悬的是马恩列斯。

工人们有的担彩轿，有的走在旁边敲着锣鼓，有的悠悠地吹着唢呐。

福全在这一天的任务是照顾集中起来的耕牛。为了避免广坪上的拥挤，所有的牛都集中在祠堂前面的坟场里。有的牛牵来的时候，犄角上还扎了花花绿绿的彩球，有的身上挂着牌子，写着：“感谢毛主席，土地还了家，牛也还了家！”

开会之前，三村的农会干部把从地主家里追回的地契一捆捆地堆在会场中央。有的契纸陈旧得已经发了黄，还是清朝时代订下来的，有的是用绸布厚厚包起的。契上盖了清朝皇帝，民初军阀，日本帝国主义的伪组织，以及国民党民政衙门的印。契文里，写着种种残酷血腥的条件：“大头文约”是明明租了五斗田，契约上却写作七斗，而且世世代代都得照七斗缴租，“额租”是不论天灾人祸，一律照额缴租。“行租”是遇到灾年，佃户用轿子把地主抬来吃酒席，当场验禾纳租，但是减不减全看地主的兴致，时常，减掉的还抵不上一顿酒席钱。农民们望着那堆契纸，眼睛里充满了仇恨。

地契旁边，架起了五尺多长的一挂爆竹，是七星岗的工人们特别制作的。

人愈拥愈多，锣鼓的声音也愈来愈响了。准备演出戏剧节目的农民们也化好了装。石桥村的农民耍了一条五丈长的龙。描金的龙头，嘴一张一闭的，铜丝弹簧做的龙须，不停地颤动着。云湖村的节目是花鼓戏《三郎伴姐》，三郎的假胡子松了些，一来便掉下来了，逗得农民们笑个不停。新炉村演的是洞庭湖渔民的一种舞蹈：春杏穿了淡粉色的衫子，天蓝色的裙子，双臂撑了两面可开可阖的“蚌壳”，壳的外面是大红色的，里面是雪白的。月莲扮成一个打鱼的青年，一手提了只渔网，舞在春杏后面，作追赶捕捞的姿态。

开会之前，三村的小学生用脆嫩的嗓音领着大家唱了国歌。然后向国旗和毛主席像行鞠躬礼。随着，以三村农会主席，妇女会主席，民兵队长，雇贫农小组长和三村村主任组成的主席团便上了台。会于是正式

开始了。

在翻身大会上，农民们不停地热烈地发着宏愿。许多农民一辈子做梦也没上过高的地方向大家讲话的，都讲了。黎大明向大家保证一定好好生产，好好修堤坝。罗淑敏说，在分田上，男女平等了，要求在修堤坝时候，妇女也同样来分担。

福全鼓足了勇气跑上台去，他一手抓住毡帽，愣愣地向台下打了个躬说：

“我这黑脚板子不会讲话。但是吃水忘不了开井人，翻身忘不了共产党。没有毛主席，没有共产党，今天我就还踩在彭二虎的脚底下哪！”

台底下，农民举起胳膊浪涛般喊着：

“中国共产党万岁！”

“农民的恩人毛主席万岁！”

口号静下来，福全又接下去说：

“我明白地主和帝国主义是分不开的。彭荫庭、彭二虎一家人就是例子。我爷就糟蹋在他们手里了。但是那时候没有共产党帮我们扒开眼睛。我们都蒙在鼓里头！这回，要是美国学日本来欺负咱，不论他老美自己来，还是用台湾的那些‘汪精卫’打冲锋，我们一定起来，揍死他们这群乌龟！”

欢呼呵，鼓掌呵，声音震彻了新炉村的原野。

这时，一阵噼啪爆竹声响，一叠叠的地契，封建地主阶级的武器，人吃人的“合法凭据”，在火焰中燃烧起来了。随着黑烟，纸灰袅袅地向上飘，终于落在地上，被踩在泥里去了。

可咒诅的封建土地制度随着灰烬永远消失了，一个新的天地在农民和农民的子子孙孙面前灿烂地展开了。

7. THE FIRST TASTE OF HAPPINESS

In the newly emancipated Peng-Chu Homestead a tender undulating sound could be heard, regular, rhythmic, like the beat of the heart. It was Hsin-wu's twins crying.

The two babies lay in a pair of wicker baskets, yelling at the top of their lungs, sometimes alternately, sometimes in unison. They kicked up their heels and threw their arms about wildly, as though doing their best to announce to the world the good news: there won't be any more feudal exploitation in the new China—the new China is ours!

Hsin-wu's wife, her hair dishevelled, had to breastfeed the babies(tinned milk and Tu Yu-chen's milk also helped), as well as look after the other household duties. At the foot of the bed stood a gold lacquered stool confiscated from a certain landlord and on it were displayed a piece of cake sent along by solicitous peasant friend and a tin of condensed milk, already opened. Diapers of various size were hung up all around the room and the smell of the babies' excretion brought out by the woodfire laid in the oven pervaded the room.

Peasants kept going in and out of the room. Some brought food and delicacies. Some just wanted to "lend a hand". And some came out of a curiosity to see what those clever babies were like. Clever they certainly were, because they had chosen a most opportune moment to be born.

Instead of enjoying a bit more leisure now that the land had been distributed, Hsin-wu was, if anything, busier than before. He would leave his home early in the morning, buttoning up his coat as he went. After dashing from one small group to another the whole day, he would come back very late at night.

Enriched with the fruits of struggle, both Chun-hsing and Yuen-lien started thinking about their "trousseaux". The romance between

Chun-hsing and Fu-chuan had long been a matter of common knowledge, and people had gradually stopped teasing them. But the first inkling people had that there was "something" between Yuen-lien and Li Ta-ming only came on the day of the Emancipation Meeting when the two partnered in long harvest dance, totally oblivious of the others. The two young couples all belong to the militia. It was this that drew forth from Hsin-wu the jocose remark that the joint wedding ought to be officiated through the Militia Headquarters.

Grandma Li's first reaction to her daughter's coming marriage was one of undiluted joy. She was proud of Fu-chuan who had none of the bad habits like gambling or swearing. He worked hard and was dependable. As she went on, however, tears began to trickle down her cheeks. Yes, she'd be very lonely once Chun-hsing left.

Chun-hsing understood perfectly what was troubling her mother and reassured her by telling her that Fu-chuan had promised that she would not be deserted. Since it was owing to Chairman Mao that we'd all been emancipated, a person like Grandma Li was certainly entitled to some better days. Fu-chuan would personally see to readjusting the rooms, so that mother and daughter needn't be separated.

On the evening of the day of the Emancipation Meeting, an "Exchange of Opinions" was held in the temple, attended by the Work Team cadres and various Peasants' Association officers. The purpose was to get the peasants to point out to the land reform cadres mistakes and deviations in their working methods and attitude during the period of the land reform. The next morning, all the Work Team comrades, scattered throughout the Huilung *hsiang* villages, met together first in the District Government Office and from there were led by Chao Chieh-min to the county seat to attend an enlarged cadres' meeting. There they were to sum up the experiences they had obtained and exchange opinions. Then they would go on to some other *hsiang* to take part in further land reform work.

Thus, the important job of consolidating the success of peasant

emancipation devolved on the shoulders of people like Peng Hsin-wu—activists who rose from among the ranks of peasants.

On the morning of January 26, when Lu Yang was scheduled to start o, all of the Hsinlu Village peasants gathered together, amidst the music of gongs and drums, to give him a warm send-o . There were the militia men and women, harvest dancers, Pioneers wearing red ties and bearing flowers and, way up in front, Fu-chuan carrying a red banner on which were embroidered the characters, "Victory in Land Reform". This strong well-organised and disciplined procession of peasants picked its way along the telephone poles and went towards the Seven Star Slope.

With Shuang-chuan punting, the boat slowly glided towards Shihma *hsiang* on the other side of Pigeon River. Standing near the helm, Lu Yang first pointed at the dyke and then formed a trumpet with his hands, through which he shouted to the peasants who had come to see him off : "Work on those dykes and have a good year. Remember, this year you're bringing in your own harvest."

At this, many of the peasants standing on the dyke shouted back that they would do what he said, and Peng Shu-min certainly expressed the sentiment of the majority when she shouted in a voice slightly off-key: "Come back at the Autumn Festival, Comrade Lu, and taste our new rice!"

The boat had almost touched the other bank. Seeing that the peasants were still reluctant to go back, Lu Yang shouted again, his voice echoing back to him faintly over the icy river: "Don't forget to strengthen your organisation!"

The same evening, a meeting of Hsinlu Village Peasants' Association Officers and activists was called by Hsin-wu and Village Chairman Peng Yu-tang. One topic came up to which Uncle Kuang-lin, Tu Yu-chen and Lo Yung-nien all contributed factual details—the evils brought by water. Uncle Kuang-lin recalled eloquently how his whole family had suffered from the "tyranny of water" all through the years. The crops would have just begun to display tassels, when along would

come a huge flood. The dyke would collapse and everything sink under water. Lo Yung-nien's land was situated on a high ridge to which the water supply was controlled by the landlord, Lo Pei-jung, his uncle. During drought years, he had to buy water from the latter, using the "green sprouts" as his security. What frequently happened was that the interest piled up, with the result that when autumn came along, his entire harvest, over which he had sweated for a year, would go into Lo Pei-jung's barn.

The Village Chairman then reported on Winter Production Plans for the whole county. The central work was to be the repairing of dams and dykes, and getting it done before spring cultivation began. He also explained how, in the other districts which had gone through land reform already, every family made out its own production plan. Then discussion began as to how they should make their own production plan.

Everyone agreed that two sub-committees should be set up under the Production Committee of the Peasants' Association, on the basis of the four small groups of the village, one on dyke-repairing and one on the repairing of the reservoirs. Seventy per cent of the expenses involved were to be met by the peasants themselves, the amount being determined by the degree of benefits enjoyed by individual plots of land. Farmhands and poor peasants could pay with actual physical labour. For the 30 per cent deficit, they could apply for a government loan.

The work has already been planned by the County Committee on Dyke Repairing. The section that Hsinlu Village was supposed to be responsible for extended from the Seven Star Slope to the Shaho, altogether 12 *li* in length. The width was to be increased from the original 4.5 feet to 20 feet, and the height from the original 10 feet to 33.8 feet. The local sub-committee would take care of the division of labour among the four small groups as well as the driving in of stakes.

There were 33 reservoirs of various size in the village and most of them badly needed to be repaired. It was decided that for this year

repair work would be done on a selective basis, repairing only the most dilapidated and those with the greatest capacity in water-reservation and irrigation. If there were time and labour to spare, new reservoirs would be opened. For instance, the reservoir that watered the largest area in this village was the "Horseneck Reservoir" near the Big Graveyard, but it had long been leaking like a sieve. The cornerstones were out of position and on the verge of breaking and the main pillar had already toppled down in the flood last year. The plank to keep the water back had also fallen down. That was where they needed to put in some good hard work without delay.

Schoolmaster Peng Kuo-chang was the next one to stand up and report. Ever since the conclusion of class differentiation, he had been conducting a "character recognition" class for peasants in Big House Lo three evenings each week. The number of students, he said, has grown so that there wasn't even standing room left, let alone benches for sitting. Old people like Grandma Li had also registered. What would the Association advise?

Hsin-wu said that the best thing would be for them first to take the problem up in class. If the public demand was really pressing, a solution would surely be found somehow.

Early the next morning, when the fields were still wrapped in a haze, the Hsinlu Village peasants, old and young, under the leadership of small-group officers, began to journey towards the dyke near the Slope. Some carried hoes or shovels, some baskets for carrying the earth and some pushed handcarts. The winter sun was smiling warmly on a Huilung *hsiang* decked in silver. Along the way, they could see nail-shaped prints made by the magpies in the snow. Treading lightly on the snow-covered path, the peasants chattered, laughed and sang as they went on their way.

"Grandma Li! Surely at your age you could stay behind and let Chun-hsing go alone!"

The remark was made in obvious admiration of her "activeness"

and not intended to dissuade her from going.

Grandma Li, with a meal-basket dangling loosely from one arm, turned around: "Chun-hsing's got her land and I've got mine, haven't I? How can she go in my place then? I've lived for over 50 years and this is the first time I repair the dyke 'for my own good'. How could I have the heart to stay at home?"

On the dyke the Construction Team from town had already marked out with chalk and willow branches the projected height and width of the dyke, according to an All-County Plan. The moment the peasants arrived, Hsin-wu summoned together the small-group leaders and divided up the work into "zones". Some of the peasants started digging earth at the foot of the dyke. Some busied themselves with carrying basketfuls of earth up the terrace-shaped slope. Above and below, you could see the energetic peasants at work, perspiring freely in spite of the bitter cold weather. As the "squares" of various size got deeper, shovels of solid, hard, wintry earth were added on to the dyke. Thus slowly against a cold blue sky, the dyke began to grow.

That went on until the sun had gone down behind the hills. The small-group leaders had to beat their gongs three times before the peasants reluctantly left off.

"Now that the local tyrants are down, it seems to be pretty easy to tackle the water tyrant."

This came from Uncle Kuang-lin, as he jauntily swung his hoe on to his shoulder. Each then went back to the group he belonged to and the peasants started on their homeward journey. In the deepening twilight, more than one head turned from time to time to look at the visibly heightened dyke with pride and elation.

On the way, the groups also discussed launching an emulation drive to increase efficiency.

That evening the classroom in the Lo Primary School was even more crowded than ever. Children of seven or eight rubbed elbows with their elders. His mind busy with the practical problems involved,

Peng Kuo-chang was fully aware that it was going to be a red-letter day in the cultural emancipation of the Hsinlu Village peasants.

When Li Ta-ming complained that no more copies of the "Elementary Reader for Workers and Peasants" were available at the Local *Hsinhua* Bookstore, he nodded sympathetically, but there was a suggestion in his manner that "everything would come out all right".

"Peasant comrades!" At these words of Peng Kuo-chang's the noise quieted down. "You have worked hard the whole day at the dyke and you must be very tired. Can anyone tell me why you're still so enthusiastic about studying?"

They could think of a lot of reasons. One said in the past he had been cheated out of his pay while working for the landlord and he didn't want it to happen again. Another said he would like to be able to read the "Blackboard News". Here someone nudged Grandma Li. "And why do *you* want to study, you who already have one foot in the grave?"

Puffing up her hollow cheeks, Grandma Li replied: "When I was going around begging with Chun-hsing, many were the times I'd stopped outside a private school and peeked in at the landlords' children studying inside and learning all kinds of things. Those were the days for the landlords. Now the world belongs to us peasants, and we must study and learn too. Am I not right?"

Her speech was greeted with a wave of applause.

Other peasants also told about what they had suffered through "having no education". Some got swindled when the landlords made out contracts which they could not read. Some could not even read the lots they drew and were pressganged into the KMT military service. Fu-chuan also spoke up: "If we can't read, we can't look at the newspapers and can't tell the truth from the rumours! We must know what are the things the reactionaries said and what are the things Chairman Mao said!"

Seeing that the mass feeling was so high, Peng Kuo-chang said: "Peasant comrades! Your demand for literacy is natural and legitimate.

The difficulty, however, is in the shortage of classrooms and teachers. Ours is a fairly big village, seven or eight hundred people, and we have only two primary schools. Of course free education will be provided for all by the government before long. But the problem is: What are we to do now?"

There was temporary lull and everybody began to think.

"I'm willing to contribute five *tou* of grain out of what I've received in land distribution so that we may also have a school in the Peng-Chu Homestead!"

The one that spoke was Tu Yu-chen, nursing her baby as usual. She turned her head slightly and glanced meaningfully at her ex-ferryman husband, who promptly raised his hand in support of the motion, as he, too, had suffered from being illiterate. The ball started rolling. One *tou* from Uncle Kuang-lin, some from Grandma Li and some from Fu-chuan. Twenty-odd *tan* was got together in no time at all by the peasants of the Peng-Chu Homestead. Those of the Li Garden followed.

At Lo Yung-nien's suggestion, the peasants of the Big House Lo and the Seven Star Slope, who already had schools of their own, also chipped in and helped with small amounts of grain.

At this point, Head of the Women's Small Group Lo Shu-min had a brainstorm. There used to be a good deal of "school land" in the villages, but the landlords usurped it all. They collected rent but didn't build any school. In land distribution all "public lands" had gone into the pool but the Association reserved two per cent of the "public land", and further confiscated a whole lot of lumber and coffins from the landlords. They had carpenters and builders right in the village. Why couldn't the Association contribute the land and the building material and the peasants contribute labour power? They could then build a school house easily.

Everybody applauded the brilliant idea.

Going home in the starlight, the peasants from the two homesteads carried on heated discussions about the architecture and

setup of their future school. It seemed as though the building had already risen up before their eyes and was no longer only in their dreams.

When the future marriage of Fu-chuan and Chun-hsing, of Li Taming and Yueh-lien was taken up during a militia meeting, everyone agreed that these two couples symbolised the true emancipation of the peasants of Hsinlu Village. The two bridegrooms both used to be farmhands, kicked around by the landlords; of the two brides, one had worked as a maid-servant for Peng Erh-hu and the other was within an inch of becoming a direct victim of feudal society—it was learnt that the consumptive boy to whom Chun-hsing was originally promised had recently died. The double wedding was set for the 29th of the Twelfth Moon, according to the lunar calendar, and it was to take place in the office of the *hsiang* government. The militia body was prepared to pool its strength and resources and make it a really big event.

The two couples were moved beyond words when the meeting dispersed. In the old society all they had to expect was to be spat and trampled upon, and now a new life was open before them. They knew that this would not have been possible without Chairman Mao and the Communist Party. Hence they planned to write a letter to the benefactor—Chairman Mao, in which, besides thanking him for helping them in their struggle, they would tell him the future plans the four of them had made. It was naturally a bold thing to do, but they felt they ought to do it.

By this time Grandma Li and Chun-hsing had also moved into the wing of Peng Erh-hu's house as arranged. All three of them would get up before dawn and go down to the fields to weed, sift fertiliser and repair the edge of the paddy fields which became straight and shiny like rails. That much done, they would go work on the dyke.

On the "Kitchen-God Day", the Association decided to give the two couples a day off so that they could go shopping for the things

they would need in the "bridal chambers". Chun-hsing and Fu-chuan had already converted some of the "fruits" they got from land distribution into cash, and they went forth happily toward the Seven Star Slope.

The street certainly looked different. Formerly, the peasants were only there to sell, and now scores of them could be seen, with baskets on their arms, negotiating to buy fish and ham for the New Year. The restaurant "Home of Spring" which only catered to the landlords in the past now advertised its "economic meals" to appeal to the peasants. Newly-made implements piled up in the blacksmith shops, with name tags pasted on them of the people who had sent in the orders. Six new cotton-bowing machines from Hsiangtan were being operated in the four cotton stores. An atmosphere of ease and prosperity enveloped the whole street. When Fu-chuan and Chun-hsing entered Chou Jui-hsiang's department store to buy some towels and a wash basin, they saw quite a number of people from other villages who seemed also to be on the look out for various things. Thought Chun-hsing, "Strange, is everybody getting married?"

At the west end of the street a new store had just opened—in many ways entirely different from the other stores. A placard told the passers-by that it was the "Mobile Section of the Hunan Trade Company". The attendants of this state-owned enterprise had on light-blue uniforms. The way it did business was a pleasant surprise to the peasants. In the past the peasants had to sell their by-products at an impossibly low price to the merchants, from whom again they had to buy in industrial products at a high price. The Mobile Section bought in pig bristles, eggs, tea and tobacco leaves. Being free from middlemen's exploitation it was in a position to offer better prices, frequently 30 or 40 per cent higher than what peasants could get from the shops. At the same time it sold all kinds of equipment for production to the peasants, including things like new-model implements, refined cotton and chemical fertilisers, at a low price.

What pleased Fu-chuan and Chun-hsing most was a copy of the

eagerly-awaited "Elementary Reader", which they picked up at a Rural Branch Office of the *Hsinhua* Bookstore. Among other things they also bought an exercise-book and a pencil for each of them, and then the crowning touch—a coloured portrait of Chairman Mao.

Li Ta-ming and Yueh-lien, who had gone to the Shihchiao Village Co-operative Store instead, also came back with armfuls of packages. In addition, they brought back some of the co-op's publicity pamphlets. From them, the peasants learnt that already over 2,000 farmhands, poor and middle peasants had joined the co-op, and that with the conclusion of land reform they would develop further and take in all the nine villages of the *hsiang*. Landlords and rich peasants were, however, excluded. Each share cost only one *tou* of grain, and arrangements could be made for payment in installments. Yueh-lien then mentioned how much things like soap, candles, oil, homespun cloth and salt cost there, and the prices were really cheap. "The co-op is the place to go if you want to get good things and cheap," commented some of the peasants.

At the general call sent out by the *hsiang* Association to make redoubled efforts at hoeing, fertilising and threshing, the Hsinlu Village Production Committee also got busy organising Mutual-aid Small Groups. Benefiting from the experience of the Peasants of North China, they spontaneously co-operated in their production work, thus solving the problem of the shortage of implements, draught animals and labour power. The way they did it was by passing out bamboo chips, one hundred to a family. Each unit of full-term labour was worth ten chips, half-term labour, five chips. The payment for full-term labour was six catties of grain. Each unit of animal labour was reckoned as four and a half units of human labour. Accounts were settled once every five days and at the end of each month, they would make a general clearance.

To meet the growing demand for fertiliser during the period for spring cultivation, the Production Committee was making plans for

collecting 150 *tan* of grain and setting up a lime factory so that fertiliser could be mass-produced.

The "Blackboard News" announced the "production plans" made by the various families in Hsinlu Village. Young people who were strong would repair the dyke and cultivate their own land. If there was still time left, they would go far into the hills to work at reclaiming wasteland. Older men would weed, sweep leaves and sift and store up fertiliser, and older women could spin yarn, make shoes and sandals and look after chickens and pigs.

One thing had caused a good deal of comment among the villagers: so far there had been no trace of production plans for Fuchuan and Li Ta-ming, two of the most generally admired activists.

An idea had occurred to lots of peasants while pondering over their production plans. Why couldn't we also write to Chairman Mao and tell him about our emancipation just as the two couples were doing? Our improved livelihood, our plan for tomorrow—surely these were things we should let Chairman Mao know.

Schoolmaster Peng Kuo-chang was the one to whom most people turned. Every day over a dozen "letters" would be handed to him many of which were actually scraps of paper with a barely intelligible sentence or two, the stationery as well as the handwriting showed a tremendous variety. Some of them contained very detailed homely information like what they would plant on their newly-acquired land and how family discord (especially among in-laws) was smoothed out after land distribution.

It was Uncle Kuang-lin who remarked wisely that they should ask Peng Kuo-chang to incorporate everybody's ideas into one composite whole. Eyeing the sheaves and sheaves of letters on the table, he said, "We have hundreds of thousands of villages like ours in China, don't we? If you write a letter and I write a letter and everyone writes a letter, won't Chairman Mao get tired out?"

His idea met with general approval. Thus, in the literacy class of the night school, collaboration in letter-writing became an item of

universal interest.

Each peasant stood up and told what he wanted to have put in and Peng Kuo-chang took everything down swiftly.

"Say that in the past those who could read in our village could be counted off on one hand and now many of us know over 100 characters!"

"Say this year on 'Kitchen-God Day' we had glutinous rice. We also bought two new coverlets. In the past dried potato was all we had, even on New Year's Day, and our clothes were in tatters and there was only one quilt for the whole family!"

Fu-chuan said, "Be sure to let Chairman Mao know that I wouldn't have got a wife if it hadn't been for land reform!"

"And Chun-hsing?" yelled the peasants in great glee. "You must say something too, Chun-hsing!"

When they finally got the remark out of her, Chun-hsing was already in tears. "I—I'd be a widow now if it hadn't been for Chairman Mao!"

On the morning of February 4 (the 28th of the Twelfth Moon, according to the old calendar), the two couples, accompanied by the Village Chairman Peng Yu-tang, went to the District Government to apply for their marriage licences.

A charcoal fire was burning in the District Chairman Shao Tsu-chang's office. Portraits of Chairman Mao, Commander-in-chief Chu, Vice-Chairman Liu Shao-chi and Premier Chou decorated the walls. Since the District Chairman was having a meeting inside, Peng Yu-tang used the opportunity to introduce these national leaders to the four young people, who stood for a long time under each picture gaping with undisguised interest and admiration.

At last the District Chairman came out and listened to Peng Yu-tang describing the miserable past of the young couples and the courage they showed in struggling. Peng Yu-tang also took care to point out that it was during land reform that their love for each other grew.

Shao Tsu-chang then asked a few questions about their personal background and made sure that they were getting married of their own free will. Then he produced application forms from a drawer, and the young people filled in their names, age and home town. Under the heading "profession", Peng Yu-tang came to their rescue. For the men, one character sufficed, "cultivation"; for the girls, similarly one character, "weaving". The forms were subsequently passed on to the Clerical Section where the licences were issued.

At this point, Hsiung Peng, the Secretary of the Communist Party's District Branch, also arrived on the scene. He congratulated the two couples and the conversation turned to their plans after marriage.

"Chun-hsing and I have already decided," Fu-chuan was the first to speak up. "We're both young. I have no family and she has only her mother. The two of them could easily support themselves by labouring. Therefore I request to be allowed to join the People's Liberation Army."

"We too have decided," said Li Ta-ming, rising from his seat. "If the People's Liberation Army wants me, as a soldier, as a cook or as anything, I'm ready to go!"

"Aren't all four of you already members of the militia?" asked Hsiung Peng.

"Yes," replied Fu-chuan. "We joined the militia to watch the landlords. Now that land reform is completed, the Peasants' Association can take care of them. We know Chiang Kai-shek is the master of the landlords, and American imperialism is the master of Chiang Kai-shek. Until their masters are overthrown, the landlords will never really behave!"

When the District Chairman and Hsiung Peng heard this, they both shook hands with each of the four young people. Hsiung remarked, "I'm sure what the People's Liberation Army needs are just such emancipated peasants like yourselves, courageous, loyal, and with a high level of political consciousness."

When the young couples returned, they were met at the ferry

place by the entire militia body. The dyke-repairers also quit early, and, carrying implements on their shoulders, they trailed behind the two couples to the Peng-Chu Homestead. On the way everybody sang songs.

In front of the temple, once more a platform was put up. Red scrolls on either side read: "Freedom in marriage!" and "Companions in revolution!" Even the old trees on the open ground had red silk streamers tied around them. The slanting sun threw a pale golden veil over the portrait of Chairman Mao.

Amidst the music of gongs and drums and the rising and falling of harvest songs, the two couples mounted the stage. Chun-hsing and Yueh-lien had on newly-made gowns with bright patterns. Grandma Li wore a blue silk gown with fur lining which was confiscated from some landlord. And Fu-chuan and Li Ta-ming, too, were in new blue uniforms.

Under the supervision of Peng Yu-tang, the young people put their seals on the marriage certificates. Scattered shouts came from the peasants below. "Come on, bridegrooms! Speech!"

Fu-chuan and Li Ta-ming stood up and announced, one after the other, that they were going to join the army after they got married and that their wives had consented.

In the midst of the loud applause that greeted this announcement Li Chen-nan's voice was heard: "Chairman, I want to join too!" A forest of arms were raised to express the same intention.

Here, Hsin-wu felt an explanation was needed, hence he went up to the stage, and the people quieted down. "Peasant comrades! It's good that so many of you should want to join the Liberation Army after you have been emancipated through land reform. This shows that not only has land reform broken the economic chains of us peasants but it has also stimulated our patriotism. It has made us see that the motherland belongs to us all and it is up to us to defend it.

"Yet, joining the Liberation Army impulsively without careful deliberation beforehand isn't right either. I would like to ask those

who demand to enlist in the Liberation Army to study the examples of these two newly-married couples. They have been discussing this since the day of the Emancipation Meeting and have got everything finally settled. They know how to carry on production alongside with their enlistment, since production work is just as important as national defence.

"After you have thoroughly considered this matter, if you still think you should join, then the Association and the Village Government will certainly recommend you, provided you're in good health and have the consent of your family."

There was another wave of applause.

The next one to go up was Peng Kuo-chang. After he had carefully unrolled a sheet of paper, he addressed the audience: "During the last ten days or so, lots of people in our village, the old as well as the young, have offered to write to Chairman Mao. Now I have collected all of your ideas and have put them together in one letter. I have tried to keep your original remarks but avoided repetitions. Let me take this good opportunity to read it aloud to you. If there are things you don't approve, say so and we'll change them. If everything is all right, we'll stamp and address the envelope and in five or six days, Chairman Mao will have it in Peking!"

Immediately everybody became quiet and attentive. This was their letter, therefore of the utmost importance. In a clear and resonant voice, Peng Kuo-chang started to read, articulating each word clearly:

"Our Beloved Chairman Mao, Saviour of the Chinese People:

"We are peasants of Hsinlu Village, Huilung *hsiang*. We are writing to you to express our thanks for the emancipation you helped us obtain and also to report to you on our future plans.

"There are still in our village people who can remember the year 1927 when you led us in a bitter struggle against the reactionary warlords and landlords. Later on, you were forced to leave because the dirty swine, Chiang Kai-shek, betrayed the revolution, and a period of utter darkness began to come

upon us. On the one hand, the landlords took staggering rents from us; on the other, we had to pay taxes and provide manpower to meet all kinds of impossible demands from a reactionary government. For over 20 years, we rice-growers had not been able to taste one grain of rice. We subsisted entirely on dried potato strips. Our clothes were shot through with holes and a pair of sandals were a great luxury to us. In the night, we slept together with draught animals in damp and filthy barns. Our life was not even on a par with that of some kinds of animals, and all the time open to the threat of Chiang Kai-shek.

"In August 1949 you came back. That is to say, the Army and cadres you led and trained came back. To us peasants, that was like coming upon an oasis in a desert or seeing a withered tree bursting forth in bloom. Needless to say, the landlords still had fond dreams of another 'comeback', and among ourselves there were not lacking backward elements who shied away from struggling against the landlords and blamed everything instead on 'fate'. Finally, however, all of us woke up, and once we are awakened, we know how to struggle relentlessly.

"For the last 30 years, you and those under your leadership have led the Chinese people in their determined struggle to free China from its semi-colonial fetters and now we have our first taste of happiness. We owe all this entirely to you. With your shining example and the example of the Communist Party before us, we have come to see that all the talk about 'fate' and 'horoscope' has no truth at all."

"Your instruction has helped us to change our fate. Our village has now carried through land reform, wiped out the feudal system of exploitation and cut apart the chains of slavery. We can now stand up erect and be the masters of our village.

"We want especially to tell you about two marriages: between Fu-chuan and Chun-hsing, Li Ta-ming and Yueh-lien. All four are members of the militia. The bridegrooms both used to be farmhands without a *sheng* of land or a roof above them that they could call their own. Now each has got some land, a house and a wife. Chun-hsing used to be a child-bride, and Yueh-lien a maid-servant. Both were direct victims of feudal society. And now both have got land and houses of their own and have chosen their own life companions of their free will.

"There are altogether 192 families in our village, of which 115 were families of landless or almost landless farmhands or poor peasants before land reform. After we carried out land reform, we got from the landlords 82 *tan* and seven *tou* of marshy land, 12 *tan* and five *tou* of dry land, 45 farm implements, six oxen, 52 rooms both big and small, and over 4,000 catties of surplus

foodstuffs. In the past, both the land beneath our feet and the roof over our heads belonged to others, we dared not complain or shed tears. Now we have our own houses and our own land, and a prosperous future is well in sight.

"Now that a breathing spell is given us economically, we have also thought of studying culture. Since the beginning of class differentiation, everyone in our village has begun to learn to read. Now we can tell you with pride that, except for children under five, everybody in our village can at least write his own name. Some have mastered as many as 300 characters. It's a momentous achievement and the starting point of the development of our peasant culture. We shall go steadily on and on, the sky is the limit.

"We understand that these changes have only become possible with the liberation of the whole nation. Only with a government of our own could we have obtained the present conditions. We realise that the future success of the nation rests largely on our efforts at production and in protecting the people's democratic dictatorship in the rural areas. We also realise that the consolidation of national security is indispensable to the effective protection of our hard-won victory.

"Therefore we have decided to devote all our power to repairing dykes and water-gates and cultivating and fertilising the land, so that in the coming autumn we can bring in a bumper harvest to repay your goodness and help strengthen our nation economically.

"In national defence, we shall also play our part, whether as local militia, volunteers or as fighters of the Liberation Army. We fully realise that national defence is the first condition for safe-guarding the fruits of our anti-feudal struggle and for consolidating our victory.

"There is a lot else we might tell you. We are planning to build a school of our own. We will soon have our own co-op. A medical clinic will soon be established near the Seven Star Slope. We have also heard that the 'vet' in town will soon come around with a whole team of medical workers to help immunise our animals against diseases.

"After the autumn harvest the women in the village plan to open a weaving factory with the financial backing of the co-op. We are convinced our days will become steadily better and better. Today is but the beginning of a yet more glorious tomorrow.

"We know if we really cherish our happiness, we should persist in the Resist-America-and-Aid-Korea Campaign until we have completely overthrown the enemies to our happiness—American imperialism and its lackey, Chiang Kai-shek.

"Hence, we peasants of Hsinlu Village have solemnly undertaken to do the

following things:

"One, repair all dykes and water-gates, step up spring cultivation and increase the production of foodstuffs.

"Two, enlarge and strengthen the organisation of the Peasants' Association and the militia. Heighten our vigilance against counter-revolutionary elements and strengthen public security.

"Three, support whole-heartedly the campaign to resist America and aid Korea with material and manpower and carry on the revolution to a victorious end.

"We wish you:

"Unbreakable health like the rock's and

"Eternal brightness like the sun's.

(Signed by)

The whole body of Hsinlu Village peasants

January 28, 1951."

柒 为了更伟大的明天

翻了身的彭朱家屋场，日夜都有娇嫩的声音。一起一伏地，像脉息的悸动，使人强烈地感到重生：那就是新五家里一对细伢崽的哭声。

两个细伢崽各躺在一只藤篮里，有时一答一应地，有时合起喉咙来哭。随哭四肢随像猴子般踢蹬，像是尽他们所有的气力在向世界宣布着：新的中国再没有封建剥削了——新的中国是属于他们的了！

新五嫂披着凌乱的头发一边轮班奶着崽，一边操持着家务。床头是一张由地主家没收来的漆金茶几，上面放着农友们送的鸡蛋糕。屋子四角挂的都是形状大小不一的尿布，屋里弥漫着尿布被灶上一块燃着的树根烘出的婴儿的尿味。

屋里陆续不断地出入着农友们，有的是来送吃送喝的，有的经常来帮忙，也有的是来结识一下很会选择出世时间的这对细伢崽。

田分完了，但是新五比分田以前还忙了些。他清早扣上钮子出去，便往四个农协小组跑，很晚很晚他才回得来。

春杏和月莲分到斗争果实以后，两个都筹备起嫁衣来了。春杏和福全两个要好的事，村里大家都晓得了。他们已渐渐不是大家戏谑的对象了。但是月莲和黎大明之间的恋爱，到翻身大会那天，当他们忘情地手挽着手跳秧歌的时候，才透露出来。这两对青年伴侣都是民兵，所以新五半逗笑着说，他们的婚事应该由民兵大会来主持。

当黎媛驰听到女儿这门亲事的时候，最初她心里自然是替女儿高兴，夸福全不赌钱，不骂街，干活勤快，是个正派小伙子；但说的时候，她却簌簌掉下泪来——她想到春杏走了以后，自己的孤零。

春杏猜出母亲的心事，马上告诉她，福全说了，毛主席帮咱都翻了身，他彭福全一定给受了一辈子苦的黎媛驰一点好日子过，他一定想法子把房子跟人调换一下，使母女不分离。

翻身大会开完，当晚工作队和农协联合在祠堂里召集了一个检讨会，请农民们指出在土改过程中，干部们在工作方法和作风上的缺点和错误。第二天早晨，散在回龙乡各村的工作队同志们便集中区政府，然后由赵洁民同志率领去县里开扩大干部会议，总结这一段过程的经验，然后再分到别的乡里去进行土改。

于是，巩固农民翻身胜利的重大工作，便落到像新五这样由农民队伍中间出现的骨干分子的肩头上了。

1月26日，卢扬起身那天的清早，各屋场一阵锣声，新炉村的全体农民都热烈地出来欢送了。男女民兵们和敲锣打鼓的秧歌队形成仪仗队，脖颈上系了红领巾的少年儿童队队员捧着鲜花，福全扛了那面新绣的“土改胜利”红旗走在前面。新炉村农民壮大、整齐、有组织的队伍，沿了电线杆子向七星岗进发了。

当摆渡朝着斑鸠河的对岸石马乡滑动时，卢扬迎风站在船头，着重地指着河岸，用手卷成传音筒，对送行的农民嚷：“修好堤坝，争取丰收呵——今年你们打自己的谷子了！”

堤岸上许多农民浸在惜别的情绪里，听到这话，大家扬起胳膊来向他保证。彭淑敏还嘎了嗓子说：“八月节卢同志来吃我们的新米哒！”

摆渡快靠岸了，卢扬看大家还不肯回去，就又嚷——声音砰击在冰冷的河面上，回响异常清脆：“认了字，好好学习政治，更别忘了巩固你们的组织！”

当天晚上，新五和村主任彭玉堂便召集新炉村的农协委员们和各小组的积极分子开会。在这个会上，光林叔、涂玉贞、罗永年都诉了历年“水”给他们的苦。光林叔痛苦地追忆斑鸠河这个“水霸”害得他一家大小多么惨！眼看上了穗的禾，一场大水，堤一垮，就都淹了。罗永年的田在高垅上，地主罗培荣（他的叔叔）把持了“水分”（塘坝）。遇到旱年，他得用青苗抵押向罗培荣买水，秋后利上滚利，辛辛苦苦打的谷子又滚到罗培荣的仓里去了。

接着，村主任报告全县的冬季生产计划。重点是赶春耕以前，完成修堤坝工作，并且介绍了土改完成的地区，家家户户怎样订生产计划。然后，便展开本村生产计划的讨论。

在农协生产委员会下面，大家同意设两个委员会，都以本村四个农协小组为基础：一个负责修堤，另一个负责修塘坝。两项工程的经费，决定基本上都由农民按受益的程度来摊筹，准许雇贫农以工代款，不足的数目再请政府贷。

修堤的工程已由全县的修堤委员会统一设计好了，本村担任由七星岗到沙河的一段，共长十二里，宽度由原来的4.5尺加到20尺，高度由原来的10尺加到33.8尺。本村的修堤委员会负责内部四个小组的分工及插桩工作。

本村大小有三十三座塘坝，大半都年久失修了。大家决定今年首先在现有的基础上，重点地修补，增加它们蓄水灌溉的力量，如果有余力，再去开新塘。像大坟坪的马颈坝，是本村灌溉面积最大的塘，但是漏得已像米筛子一般了。坝墩子东倒西歪的，眼看就要崩裂，将军柱去年被水冲倒，拦水板也塌了，必须先把它抢修起来。

从划阶级以来，每星期三个晚上一直在大屋罗给农民们开识字班的彭国璋，这时站起来报告说：自从分了田，他那里的学生愈来愈多，连黎媛驰那样年纪的人，也来报名了，以前是凳子不够坐，最近，连站也站不下了。他问农协要办法。新五说，这个问题拿到识字班上去酝酿，群众的要求真正高涨了，办法也一定出来了。

第二天，天还没有大亮，蜿蜒的田埂上，新炉村有组织的农民老老少少便在各组组长率领下，向着七星岗的堤上进发了，有的扛着锄头，提着簸箕，有的推着手车。冬天早晨的阳光，灿烂温煦地照着，回龙乡直像是镀了银。覆在田上的雪，印着“个”字形的喜鹊爪痕。农民们的脚咯吱吱地踩在雪上，他们一路上有说有笑，歌声悠扬地震荡着。

“黎媛驰，这样年纪，有春杏来，你可以歇歇啰！”这么说的人，语气间不是劝她回去，实在是夸奖她积极。

胳膊上挂着一只饭篮的黎媛驰回过头来说：

“春杏分了田，我婆子也分了田，她代我不得！我活了五十多年，这回是头一回给自己修堤，我有心肝蹲在家里！”

堤上，县里派来的工程队已经照全县的设计，用石灰和柳枝把应加的高度和宽度划了出来。到了堤上，新五便召集四组组长，把各组担任的地区划清。

于是，有的农民在堤脚划定的地方挖土方，有的沿着砍成梯级形的堤坡一担担地挑土。堤上堤下，黑压压一片人，尽管是隆冬，还擦着汗干活。各种形状的土方愈挖愈深，一锹锹挖出的硬邦邦的冬土，贴到堤身上去了。堤随着向晴蓝的冬空长高起来。

太阳落到黄古岭后面的时分，各组组长连打了三遍锣，农民们才不甘心地歇了手。

“恶霸打倒了，水坝看来就好对付了！”光林叔扛起锄来，很满意地说。随后，他便站到彭朱家屋场这一组的队伍里，沿了田埂往回走，随走，农民们随回过头，在暮色苍茫中兴奋地望着加高了的堤身。

一路上，各组间已在酝酿着竞赛。

那天晚上，大屋罗的罗氏小学的教室里外挤满了人。有七八岁的小娃子，也有比黎媛驰年纪还大的老人家。彭国璋充分预感到今晚上对于新炉村农民文化翻身的重要，所以当黎大明抱怨七星岗街上新华书店农村服务社的《工农文化读本》卖光了时，彭国璋只同他点点头，像是说：问题都会迎刃而解的。

“农友们，”彭国璋用手招呼大家安静下来。“大家修了一天的堤，辛苦了！我问问大家，究竟为什么这么累，还这么热心学习？”

农民们抢着讲。有的说，过去给地主做工，不会算账吃了亏；有的是为了好看黑板报。这时，有人指了黎媛驰说：“你黄土壅了半节哒，还学习做什么哩？”黎媛驰鼓起没了牙的腮帮说：

“过去我带着春杏讨饭的时候，常常站在私塾门口，眼巴巴望着地主的孩子们念书，学本事。那时候是地主的天下。今天，是咱农民的天下了，咱也得学本事才行！”

大家听了鼓起掌来。

跟着，别的农民也诉起“文化苦”。有的在写租约时候上过地主的当，有的抽丁时候认不得签，出了冤枉丁。福全说：

“不认字就看得不得报，就辨不出哪是谣言哪是真话；哪是反动派的话，哪是毛主席的话！”

彭国璋看见群众情绪这么热烈，就说：

“农友们，大家对于文化要求的高涨是很自然的。但是目前我们的困难是教室不够，教员不够。我们这么大个村子，七八百口子人，只有两座小学。政府是要办义务教育的。但是眼前我们怎么办？”

这么一问，声音由嘈杂而安静下来了。

“我愿意由我分到的果实里，拿出五斗谷子来，在彭朱家屋场也办个学校！”正在奶着崽的涂玉贞从人群里嚷出来。报完了，她才侧过头来望她那个曾经在洞庭湖上摇船的丈夫。

他也是吃过不识字亏的人，所以也举起手来响应他的堂客。跟着，光林叔出一石，黎媛驰、福全，都报出了数目。彭朱家屋场的农民一下便凑了二十多石谷子。接着黎家园的农民也报起来。

由罗永年领头，已经有了学校的大屋罗和七星岗的农民也出了谷子，来帮助两个没有学校的屋场。

这时，妇女小组组长罗淑敏提议说：过去村里有不少“学田”，但是都被地主霸占了，只收租，不办学。分配土地时候，农会留了百分之二

的公田。农协又没收了一批地主盗卖的木材和棺材。村里现成有些木匠和泥水匠。她提议由农协拨地基和木材，大家出人力，学校就可以盖成了。

农民们听了鼓起掌来。

那晚上，彭朱家屋场和黎家园的农民们在归途中兴奋地议论着学校的建筑和组织。星光下，萦绕在他们脑际的学校好像已经在地面上出现了。

当民兵大会讨论到福全和春杏、黎大明和月莲的婚姻时，大家一致认为这是新炉村农民翻身的象征。两个新郎都是一向被地主当牛马使唤的长工，两个新娘，一个给彭二虎当过丫环，一个几乎当了封建家庭的牺牲品——春杏做童养媳那家的那个患痨病的男人，一个富农的儿子，新近死去了。两对民兵未婚夫妇当场同意在农历腊月二十九日一道结婚，地点是乡政府。民兵大会决定用集体的力量把这件喜事热闹起来。

两对新人，一向受尽旧社会的唾弃蹂躏，在会散以后感动得不知道说什么好了。他们想到能有今天这份幸福日子，都是搭帮了毛主席，搭帮了共产党。他们准备联名给恩人毛主席写一封信，好好谢谢他领导他们翻身，并且报告他们四个人的计划——他们正在商量着做一件大胆而且应该做的事。

这时，黎媛驰和春杏已经调到彭二虎的厢房来了。两个人天不亮就同去田里铲草皮，沤绿肥，把田塍刨得像铁轨一样，又直又光。然后，一家就上堤了。

过小年那天，农协一定要放他们四个人一天假，要他们去买些新房用的东西。春杏和福全就带了他们分到的一部分果实（已折成款子），去七星岗街上了。

街上可和以前不同了。以前，只见农民挑卖，如今，农民也熙熙攘攘提了菜篮在摊上挑选着鲤鱼，买着腊肉。一向做地主生意的“一家春饭馆”改卖“经济小食”了。铁匠铺里堆积着新打成的农具，上面都贴着订货者的名字。街上四家棉花店由湘潭运来六架弹棉机。整个七星岗街上浮动着一片繁荣的景象。当福全和春杏在周瑞祥的百货店里买洋瓷脸盆和手巾时候，店里还有一簇别村里的农民也在物色着什么。春杏想：莫非他们都要结婚了吗？

在街的西端，新开了一个店铺——一个格式很不同的店铺。店外写着“湖南贸易公司机动小组”，店员们都穿着浅蓝色的制服。农民们的副

产品向来是低价卖给商人的，然后又从商人手里高价买进工业品。机动小组专收猪鬃、茶叶、鸡蛋和烟叶，因为是国营机构，没有中间人的剥削，出的价钱都比私商高了三四成。“机动小组”同时低价卖给农民生产资料，如同改良农具，弹棉机和肥田粉。

福全和春杏最得意的，是在新华书店农村服务社买到了久已缺货的《工农文化课本》，每人买了一本练习簿，一管铅笔——并且买到一张彩色的毛主席画像。

黎大明和月莲也大包小包的买了些东西——他们去石桥村的供销合作社了。他们回来的时候，带来了一些合作社的宣传品，上面写着：合作社在本乡已经有了二千多个会员，土改既然结束了，马上就要发展到全乡九个村子去。所有会员都是雇贫中农，地主富农不收。每股股金一斗谷，可以分批交付。月莲还一五一十地背出那里肥皂、蜡烛、洋油、土布、芦盐的价钱，农民们都说：合作社的东西确实便宜公道！

在乡农协“多锄一遍地，多上一车粪，多打一成粮”的号召下，新炉村的生产委员会积极酝酿起互助小组来了。同时，全村各家各户在订着生产计划。学习了华北农民的经验，新炉村的农民为了解决土改后农具、耕牛和劳动力的缺乏，三五户人家自动联合起来共同搞生产。开始的时候，每家发给一百分的竹签，每一个整工算十分，半工算五分。一个整工的工资是六斤粗粮，一个牛工等于四个半人工。这样互助组员给谁帮工，便向谁要竹签。每五天一结账，一月一算账。

为了解决春耕时期的肥料问题，生产委员会正在酝酿集一百五十石谷子办一座石灰窑，大量生产肥料。

新炉村一家家的生产计划都在黑板报上公布出来了。年轻力壮的，除了修堤坝，耕现有的田地以外，还计划去山里开荒。年老的男人铲草皮，扒叶子，沤粪积肥，年老的妇人们加紧纺纱，做鞋，或者打草鞋和养猪养鸡。

但是村里人纳闷：福全和黎大明两个积极分子的生产计划怎么始终没有公布出来？

在搞生产计划的时候，有许多农民说：两对新人正在给毛主席写信，报告翻身；我们现在都翻了身，不应该把我们今天的好日子，连我们未来的计划，一起告诉我们的毛主席吗？

这么一来，可忙坏了改信的彭国璋老师。用各种形状的纸，斜斜歪歪的字体写成的信，每天都有十多封递到他那里。有的报告打算在分的

田地上种些什么，有的报告婆媳一向吵嘴，分了田以后和睦起来。

光林大叔望到那一叠叠的信说：中国不晓得有几十万个新炉村，要都像我们这么你一封我一封地，还不把毛主席累坏了！他提议还是全村合为一封，大家会写的动笔，会说的动嘴，最后请彭国璋把大家的意思都写进去。这意见得到了大家的赞同。

热烈的集体创作便成为夜校识字班上一个重要节目了。

你一嘴我一嘴地嚷着，彭国璋伏在桌上，笔疾速地滑动着。

“过去村里没几个人识字，现在大半都认得三百多个字了！”

“过去年下还吃苕丝，衣裳满身都是补丁，一家子盖一条被子；今年过小年就有糯米吃了，家里添了两条被子。”

福全说：“一定得告诉毛主席，不是土改，我这辈子休想娶老婆。”农民们戏谑着嚷：“春杏呢？请春杏表示表示！”

过了好半天，春杏才含了眼泪说：“不是毛主席，我现在早守了寡了！”

2月4日（腊月二十八）的上午，彭玉堂村主任陪着两对新人上区政府登记去了。

区长办公室烧着一盆炭火，墙上，除了毛主席，还挂着朱总司令，刘少奇副主席和周总理的像。区长正在开会，彭玉堂便指了墙上的领袖照片，向两对新人介绍着。

区长出来了。彭玉堂介绍了两对新人的贫苦的过去，在斗争中他们英勇的表现，最后说明他们是在土改中间自由恋爱的。

这时，区长又问了些他们的个人背景，和他们是不是甘心情愿的。然后，就由抽屉里给他们每对拿出一张结婚申请书。先填了名字、年龄和籍贯。职业一项，是村主任帮他们填的，男的填的是“耕”字，女的填了“织”字。区长便把申请书交给文书科，填发结婚证书。

这时，区委也来了，向他们道完了喜，就和新人们谈起婚后的计划。

“我和春杏商量好了，”福全第一个开口。“我们俩都年轻。我孤身一人，她也只有个妈妈。她们两人有一个半劳动力，够吃饭了。我要求出去参军。”

“我也商量好了，”黎大明站起来说：“如果人民解放军要我的话，打仗，做伙夫，我什么都愿意干！”

“你们四个不都是民兵了吗？”区长问。

“是的，”福全说，“我们当民兵是为了看地主。土改完成后，地主有农会看管了。我们知道蒋介石是地主的后台，美国帝国主义又是蒋介石的后台。不打倒后台，地主还会不老实的！”

区委和区长听了，赶紧过去和他们四个人一一握了手。区委说：“我相信人民解放军要的正是你们这样英勇、忠实、觉悟高的翻身农民！”

两对新人回来的时候，民兵队已经在七星岗摆渡地方迎接他们了。修堤的农民提早收了工，扛了农具拥着新人们集合到彭朱家屋场来，一路上唱着《团结就是力量》的歌。

祠堂前，那座台又搭起来了，台的两柱上，贴着“自由结婚，革命伴侣”的红对联。广坪上，连古树身上都飘起了红绸的彩穗。毛主席的像朝着被夕阳镀成金黄色的田野慈祥地微笑着。

在锣鼓、秧歌和起伏不已的歌声中，两对新人走上了台。这时，春杏和月莲都已换上新缝的花布衣服，黎媛驰穿着分到的那件蓝缎面的皮袍子，福全和黎大明也都换上新蓝布的短褂。

在彭玉堂的主持下，双方都在婚书上盖了印。这时，台下的农民嚷着“新郎新娘讲话！”

福全和黎大明先后站起来，宣布已经完全得到妻子的同意，婚后他们两个便去参军，并且说：

“区委说了，人民解放军要的正是咱们这样英勇，忠实，觉悟高的农民！”

台底下鼓起掌来。黎振南首先嚷着：“村主任，我也要报名！”许多只胳膊随着也都举起来。

这时，新五就走到台口向群众说：

“农友们，大家爱国情绪高涨，在土改翻身以后，自觉自愿地要求参军，这完全是应该的。说明新炉村的土改，不但解除了我们农民的经济上的枷锁，并且也使我们在政治上明了祖国是我们大家的，我们必须自己去保卫。”

“但是，我们不要单凭一时的情感去参军。请要求参军的农友们，学习今天结婚的两对夫妇：他们从翻身大会那天便开家庭会，讨论好，安排好才决定参军的。他们首先把生产和参军配合好了，因为生产阵线上，国家同样需要我们。”

“各方面考虑成熟以后，凡是要求参军的，只要体格强健，家庭同意，农会和村政府一定负责介绍。”

农民们听了一齐鼓掌。

跟着，彭国璋走上台来。他很谨慎地展开一个纸卷，然后才说：

“十几天来，村里老老少少参加给毛主席写信这件大事情。现在，我已经把大家的意思合拢了起来，合拢成这么一封信。我现在趁着这个大喜的日子，念给大家听听。大家不同意，咱们再改；大家同意，咱们贴上邮票，一发就可寄到北京，寄到毛主席那里去了！”

台上台下，农民都静寂下来，细心倾听这封他们自己写成的信。彭国璋的嗓音今天特别响亮，他咬着字读：

我们敬爱的毛主席，中国人民的大救星：

我们——回龙乡新炉村的男女老幼农民，写信感谢你领导我们翻身，并且向你报告，翻身以后我们巩固胜利的计划。

在我们村里，还有人记得1927年你领导我们同军阀和地主作斗争。后来，狼心狗肺的蒋介石出卖了革命。你走了以后，我们就变成了见不得天的“黑人”。一边，地主像抽肋骨般向我们逼租，一边，反动政府编出五花八门的名堂向我们要税要丁。二十多年来，我们种白米的人吃不到白米——只能吃苕丝；衣服露了肉，连双草鞋都买不起。夜里，我们和牲畜同在阴湿肮脏的牛棚里打滚，过着牛马不如的生活，时刻受着蒋介石的威胁。

1949年8月，你回来了——你带领的部队和干部回来了。我们农民就像沙漠上见到了井水，枯树开了花。地主们那时候还幻想着复辟，我们中间也有落后分子，因为一肚子的八字风水，竟也不敢起来反抗地主。但是我们终于觉醒了。一觉醒我们就斗起来了。

你和你的同志们，三十年来，领导着人民，艰苦奋斗，改变了中国半殖民地的命运，使我们有了今天的好日子。你的历史本身，中国共产党历史的本身，就是否定八字、风水最有力的例证。

在你的英明领导下，我们农民也改变了自己的命运——完成了我村的土地改革，彻底消灭了封建剥削制度，斩断了奴隶的锁链，直起腰板来，成为我村的主人了。

特别是举出新近两对民兵——福全和春杏、黎大明和月莲——的结婚。两个新郎都是无田无屋，一向给地主干活的雇农。如今，他们有了田，有了房子，又结了婚。春杏本来是童养媳，月莲本来给地主当丫环。这两个受尽封建社会欺侮压迫的女人，也有了田地和房屋，并且自己选择了一生的伴侣。

我们村里一百九十二户人家，土改以前有一百一十五户是无田或少田的雇贫农。这回土改，我们从地主那里没收来八十二石七斗水田，十二石五斗旱地，四十五件农具，六头牛，大小五十二间房，和四千多斤余粮。从前，我们脚踏别人地，头顶别人屋，有苦无处诉，有泪无处流。如今，我们有了房子有了田地，扎下了致富的根子。

从划阶级以来，我们村里老老少少都认起字来。现在，我们骄傲地说，村里除了五岁以下的细伢崽，没有一个不会写自己名字的，有的还认了二三百字。这是破天荒

的一件大事。这是我们农民文化无限前途的一个起点。

我们深深明白所有这些改变，根本上都是因为全国解放了，我们有了自己的政府，我们农民在政治上和以前有了天地的分别。

因此，我们决心使出所有的力气来修堤坝、锄地、施肥，准备今年秋天用一场大丰收来报答你，并且来巩固我们的国家。

为了保卫国家，我们村里已经在酝酿起参军运动。我们——新炉村的农民也得替祖国出一份力。

可报告你的好消息太多了：我们正在凭自己的力量开办学堂，我们不久就要发展合作社，七星岗街上已经有了新式产婆了，——我们村里新五嫂头一个用现代方法接的生，一胎生了一男一女，都是白胖胖的。

村里的妇女们还打算在秋收以后，向合作社贷点款子，合力开一个织布厂呢！我们坚决相信我们的日子会一天比一天更幸福起来。今天还只是更伟大的明天的萌芽。

要更幸福起来，我们知道就必须坚持抗美援朝运动，就必须打倒威胁我们幸福的敌人——美帝国主义和它的走狗蒋介石。

为了这个，我们全村农民，向你认真保证：

一、修好堤坝，加紧春耕，多打粮食。

二、继续扩大并且巩固农协和民兵大会，对一切不法分子提高警惕，加强地方治安工作。

三、用人力和物力，热烈支援抗美援朝运动，将革命进行到底！

愿你：

永远像岩石那样健壮，

永远像太阳那样灿烂地照耀着我们！

新炉村全体农民上

1951年1月28日

In Memory of Some Friends
回忆几位友人
Some Friends

1. THE FRIENDS I MADE IN GREAT BRITAIN

I am fully aware that name-dropping is rather vulgar in the West as well as anywhere. But now I am going to do the very thing—to drop some illustrious names before you, of people more dead than alive. I shall do it with restraint. But somehow, the general atmosphere of Chung Chi College reminds me of my days in England over 40 years ago and evoked in me a sense of nostalgia.

My pilgrimage to the West started in 1939 and from Hong Kong when I accepted the post as a lecturer at London University where I taught for three years. That was followed by two years at King's College, Cambridge as a student and two years in Fleet Street as a correspondent. It was truly great to be in war-time London. For then, I saw the British at their best spiritually though materially they were at the worst. London then was the citadel of the anti-Nazi war. A number of refugee-governments of Europe and the headquarter of Free France were there. I believe it was also a golden period for the international PEN, the organization of world writers which located in London. Then there was also the London chapter which I remember its president H. G. Wells and then EMF. I was then a member to both. Hardly one week passed without some luncheon, tea or lecture given by such organisation. The secretary of the London PEN was then the British poet, Hermon Ould who edited and published my first book in 1940, *Etching of a Tormented Age*. I met many veteran writers at the PEN such as Thornton Wilder, the author of that beautiful but sad novel, *The Bridge of San Luis Rey*. There were Stephen Spender and John Lehman and other young writers.

For a period, I did a number of broadcast for the BBC, mostly to China and India. It was George Orwell, the author of *Animal Farm* who got me to do them. He was then the head of the Far-eastern section of

the BBC, probably because of his early link with the east having been a policeman in Burma. While I was in England a month ago, a friend told me that he saw a paragraph about me in Orwell's diary and he assured me that Orwell remembered me kindly.

In SOAS where I taught, the secretary happened to be Ronald Botterel, quite an important British poet in those days.

I think I have dropped enough names on you. Now I am going to talk about some of the people that I really did know well. I would like to start with Harold Acton—now Sir Harold Acton, because he was my oldest friend in England (He is now in Florence). I knew him well before I went to England.

He was a professor at Peking University in the early 30's. Some Western intellectuals in China adored the old China and would spend time and money on collecting curios and historic relics. They showed no interest in contemporary China. Others were interested only in modern development, collecting facts and figures so that they could become competent China-watchers. Harold Acton fell in love with China, especially with Peking, the moment he got there. He called himself a true mandarin. He rented a big house with a large courtyard. Several years after he left China he was still paying rents for that house, hoping he would go back there one day, until the Japanese came in when he could no longer remit his rent through the bank. No doubt he loved the old China, having translated four naughty tales of the Ming Dynasty, published under the title of *Glue and Lacquer*. But he was also the co-author of the first anthology of modern Chinese poetry in English. So he was equally interested in our modern period as well.

In the 40's, we renewed our friendship in London and Paris. During the war, because of his profound knowledge in French and Italian, he served as PRO with the RAF. So he was always in grey uniform. I never asked him what his job was—one never asked such questions with a military personnel, no matter how well you knew him in civilian life. Furthermore, although in military uniform, he was

still fond of talking of old time in Peking, the temple fairs or boating in Beihai, and of course about literature and the arts. Walking together on the Strand or Charing Cross, he would tell me the various types of European architecture, sometimes with appreciation, sometimes with disgust. "Oh, that hideous Victorian arch", or "Isn't that gorgeous? It's William and Mary." I owed to him for my scanty knowledge about European painting, sculpture and music. Now I still have a set of Boswell's *Life of Johnson* given by him, a *de luxe* edition.

Since 1949, I lost touch with all my friends abroad, including Harold. I retrieved some of them during my first trip abroad for 30 years, it was to Iowa City when I was sent as the first batch of Chinese writers to America for thirty years. But I did not resume correspondence with Harold until 1983 when I appeared in a TV serial: *The Heart of the Dragon* in which I denounced the Cultural Revolution as a sheer disaster. When it was shown in Britain and Italy, a number of friends got in touch with the BBC and through them traced my whereabouts.

I have been reading his *Memoirs of an Aesthete* and his *More Memoirs of an Aesthete*, in which he wrote a bit about me. It was he who recommended me to be a visiting scholar in N. Y. University two months before I came here.

I had quite a number of dear friends in England during the war days. Most of them are all dead now except a few, such as my old tutor Dadie Rylands who figured prominently in the letters and diaries of Virginia Woolf. Many of my friends belonged to the Bloomsbury group, which I suppose represented the Ivory Tower in Britain from the 20's to the 40's.

I knew Arthur Waley, the sinologist, quite well. You may have read his translation of our Tang poetry for which he had been awarded by the Queen, or his *Lady Murasaki*², that Japanese 11th century novel about romances inside the Japanese Palace. It was one of the best sellers in England then. Waley had translated many of our major classics. He summarised the teachings of Laotse and Chuangtse

in his book *Three Ways of Thought in Ancient China*. Now you have a full translation of *The Journey to the West* by a Chinese professor in Chicago. Waley had done an abridged edition of it in his book *The Monkey*.

During the war, he served as a Censor and all my correspondence for my paper in Chongking had to pass through his hands. He sometimes made a slip of his tongue by saying, "Oh, sorry. I chipped off your first paragraph yesterday." He even wrote a poem, dedicated to me, entitled "Censorship", satirizing the life of being a censor which was published in the *Horizon* and which has been translated into Chinese by Prof. Yu Kwong Chung. I found it in Yu's *Collected Poems*.

I very often went to see him in the 40's, in Gordon Square where he lived with the British lady Beryl de Zoete who was an expert on Bali dance. But a month before his death, Waley married another lady whom I have never met. I would cite Arthur Waley as a glorious example to show that Chinese is a language you can master without being able to speak it. He told me he had only lessons for 15 days from a Chinese genealogist who passed through London on his way to Berlin in the 20's. Since then, Waley persevered on his own. He learnt Japanese the same way. (He had never been to the East and he told me that he did not want to go because he wanted to preserve the image of the China of Tang Dynasty and he hated to let it be spoiled by chimneys and railroads.) Waley is also the translator of another Japanese classic: *The Pillow Book*. The literary success of Waley also reveals to me that in translation, comprehension of the original text is important, but still more important is the style and taste of the translator.

Since my college days in mid 30's, I have always admired the works of Virginia Woolf. So when I arrived in England, my one wish was to go and see her. But for no reason, I was given the status of Enemy Alien and as such I was not allowed to go anywhere within five miles from the coast. (Of course I became a Great Ally overnight immediately after Pearl Harbour.) Mrs. Woolf was then living in

Sussex (Monk House) and quite near the coast. I got there only after her death. Her most devoted husband, Leonard, was very kind to me. He took me to the spot where she drowned herself and allowed me to read and copy some of her diaries during the weekend I spent with him. Unfortunately all my notes were lost during the Cultural Revolution.

You may have heard of a Quaker lady, Margery Fry, who was a sister of Roger Fry, the famous art critic. She herself was a great prison reformer. One day she took me to Roger's cottage in Aylesbury. There, she produced before me a pile of papers. They were the old issues of Hansard—record of the Parliament. But they were the Hansards of the 1840's! There I read the speeches of her great great grandfather, long and virulent speeches, condemning the Opium War. I realised there were two Englands: one the supporters of the imperialist gunboat policy and the other, the England of Francis Bacon and John Stuart Mill who stood for justice.

I was also a close friend of Kingsley Martin, then editor of *The New Statesmen and Nations*. Through him, I knew a number of British intellectuals including Harold Laski. And it was Kingsley who introduced me to E. M. Forster.

It happened in May, 1941, at a Memorial Meeting for the Indian poet Tagore in Conway Hall. On the platform were the Soviet Ambassador Maisky who spoke for Russia, Forster spoke for Britain and I was there to speak for China. I had just read his *Passage to India* and admired his humane attitude toward India. The novel was anti-colonial in a mild way.

Forster was most keen on making friends. Because of his early links with Egypt and India and the influence of his friend Lowes Dickenson, he was particularly fond of befriending orientals. Soon after, he wrote a letter inviting me to his club. I believe it was the Reform. I have also been to his house, the Hackhurst in Arbing, Surrey, hence *Abinger Harvest*, and met his mother who hated anything mechanic. There was no electric light in the house. They used kerosine

oil lamp. Forster was a most filial son. He was so gentle and obedient with her that really put an oriental to shame. For centuries before, we had been taught by Confucius to be filial, but few could be as filial as Forster. There was a cat in the house called Tom. I also had a cat in Hampstead called Rhea. So after the visit, Forster one day came to my basement in Hampstead. He unwrapped a handkerchief in which were some synthetic food. He said gently, "This is for Rhea, from my Tom." I quickly brought my cat over. Rhea sniffled and coldly walked away. She seemed not to care for it at all. It was rather embarrassing indeed. I accepted the gift on behalf of Rhea and thanked Forster for it all the same.

During my two years as graduate student at Cambridge, doing research in the English novel, Forster was one of the authors that I concentrated. I have not only read all his novels and two volumes of short stories already in print, but also the posthumously published novel *Maurice*, the one about homosexual love which he took out from the bank vault and lent me for a month. I have great admiration for him both as a storyteller and a stylist. I also have great respect for his liberal attitude and his philosophy: Only connect. He believed in human friendship above everything else. In one of his essays in *Abinger Harvest*, he said: "If I were to choose between betraying my country or my friend, I hope I shall have the courage to betray the former."

I quote this because our friendship ended rather tragically. I must have over 80 letters from him, which were all lost during the Cultural Revolution. In 1984, when I revisited Britain, the archive keeper of King's College, Dr. Michael Halls, managed to find a typescript of the initial 40 letters.

Now I want to end this with the story about the tragic end of our friendship. When I left Hong Kong for Peking in 1949, knowing from what happened in Russia in the mid 30's and in post-war East Europe, I wrote to all my friends to suspend our correspondence and asked them not even to send me a X'mas card, Forster included of course.

But in 1954, there was a British cultural delegation to Peking on which was a close friend of Forster, Prof. Jack Sprout of Nottingham whom I had met in England before through Forster. On arrival in Peking, he made an express request to the Ministry of Culture to see me. So, I was included in the welcoming party in those days I might not be invited otherwise. At the party, Sprout told me that he had brought a book with a letter from Forster for me and he wanted to pass them to me in person. So he wanted a separate session with me. He did not know that in those days such a meeting simply could not be arranged and it was not. As a result, he took the book and letter back to England. I have no doubt that Forster was deeply hurt and in his annoyance, might well have torn all my letters to him, as the archive keeper of King's told me there are now only two left, probably by accident.

I feel very mortified by what happened and I realised that when it came to choose between which to desert, the country or the friend, it was not so easy as Forster thought. Perhaps I was a coward. But whatever one may believe, there were also the wife and children to consider. Being a bachelor all his life, Forster never had the problem that I had to face.

So ended a beautiful friendship tragically. It remains one of the regrets in life to my dying day.

My apologies for this unhappy story and I hope it won't spoil your appetite for the meal. Thank you!

[Speech delivered on January 7th, 1987 at the College life luncheon, Chung Chi College of Chinese University, Hong Kong]

壹 我在英国结交的文友

我十分清楚，不论在西方还是任何地方，罗列一些重要人物的姓名是相当庸俗之举。然而眼下我就是要这么做——在你们面前历数几位杰出人士的大名，他们大多已经作古了。我会有所节制地去做。诚然，不知怎地，崇基学院的普遍气氛使我想起四十余年前在英国的日子，勾起怀旧之情。

我的西方之旅始于1939年。那时我从香港应聘赴伦敦大学，任教三年。随后在剑桥王家学院攻读两年，接着又在舰队街度过两年记者生涯。呆在战时的伦敦的确棒极了。尽管物质匮乏到极点，我看到英国人的精神境界却无比崇高。当时伦敦是反纳粹战争的要都。一批欧洲流亡政府和自由法国的司令部云集此地。我相信，那也是国际笔会中心的黄金时代，世界各国作家的这个组织就设立在伦敦。还有英国笔会中心，我记得主席是赫·乔·威尔斯，后来由爱·摩·福斯特接任。我既是伦敦国际笔会又是英国笔会的成员，这两个组织几乎每周都举行午餐会、茶会或讲座。那时，英国笔会中心的秘书是英国诗人赫尔曼·奥尔德。1940年，他编辑出版了我的第一本书《苦难时代的蚀刻》。在笔会上我遇到许多老作家，如索尔顿·怀尔德，那部优美然而催人泪下的小说《圣路易·莱之桥》的作者。再就是斯蒂芬·斯彭德、约翰·莱曼以及其他年轻作家。

我为英国广播公司工作过一段时期，主要是针对中国和印度进行广播，是《兽园》的作者乔治·奥威尔推荐我去做的。当时他主管英国广播公司远东部。这可能缘于他早年与远东的联系——在缅甸做警察。一个月前，我曾赴英，有位朋友告诉我，他读到过奥威尔的日记中写我的一个段落，他肯定地说，奥威尔关于我的回忆很亲切。

我所任教的东方学院，秘书刚好是罗纳德·勃特勒，当时的一个相当重要的英国诗人。

我想我已经为各位罗列了相当多的名字，现在我准备谈谈那些我真正熟悉的人。我想从哈洛德·艾克敦——如今是哈洛德·艾克敦爵士了——谈起，因为他是我结识最久的英国朋友，眼下在佛罗伦萨。我赴英之前就跟他结为莫逆。

他是三十年代初期的北京大学教授。有些旅居中国的西方知识分子

爱慕古老的中国，花时间、花钱去搜集古玩和历史文物。他们对当代中国不感兴趣。另外一些人只关注现代化的发展，搜集事例和数字以便能成为出色的中国观察家。哈洛德·艾克敦刚一抵达就深深地爱上了中国，尤其是北京。他自称为真正的中国达官贵人。他租了一座很大的四合院。他离开中国后，还继续付了好几年房租，希望有朝一日能返回。直到由于日军入侵，再也不能通过银行汇寄房租才作罢。毫无疑问，他热爱古老的中国，翻译了明朝的四篇言情小说，并以《如胶似漆》为名出版。然而他又跟人一道编译过第一部英文的《中国新诗选》。因此他对现代中国同样有兴趣。

四十年代，我们在伦敦和巴黎又重叙友谊。战争期间，由于他在法语和意大利语方面的渊博知识，遂以公关人员的身份在英国皇家空军服务。因此，他总是身着灰色制服。我从来没有问起过他从事什么工作——不论你在市井生活中跟一个人多么熟悉，他一旦服役于部队，你就绝不可以问这类问题。不过，他虽然身着军装，却依旧津津乐道往昔在北平度过的岁月：逛庙会，在北海泛舟，当然还有文学和艺术。我们在河滨马路或查林十字路并肩步行之际，他就向我讲述各种类型的欧洲建筑，时而用赞扬的口吻，时而又用厌恶的口吻。“哦，丑得吓人的那座维多利亚拱顶”，或是“这不是蛮漂亮吗？这可是威廉和玛利！”我对欧洲绘画、雕刻和音乐的那点不充足的知识，还都是从他那儿获得的。我至今保存着他赠送给我的一套豪华版鲍斯韦尔的《约翰逊传》。

自1949年起，我与海外所有的朋友失去了联系，包括哈洛德。30年后，我在第一次国外旅行期间重新联系上了一些朋友。当时我是作为第一批中国作家，在30年的隔绝后，应邀到衣阿华市出访的。然而直到1983年我在电视系列片《龙的心》中露面（那一次我曾痛斥“文化大革命”纯粹是一场浩劫），这才与哈洛德联系上。这部电视片在英国和意大利播出后，一些朋友通过英国广播公司联系上了我。

我一直在拜读他的自传《一个唯美主义者的回忆录》正、续集。在书中，他提到我。来这里之前两个月，他推荐我到纽约大学去做访问学者。

战争年代，我在英国结交了相当数量的好友。除了少数几个人——如我的老导师戴狄·瑞兰兹，他在弗吉尼亚·吴尔夫的信件和日记中扮演过重要角色——他们大多已作古。我的许多朋友属于“布卢姆斯伯利团体”，我认为这个团体代表着二十年代至四十年代英国的象牙之塔。

我跟汉学家亚瑟·魏理很有交情。你们也许读过他翻译的我国唐诗（为此他获得了女王的嘉奖），或者他译的《源氏物语》，讲述日本十一世纪宫廷内部风流韵事的长篇小说，当年它在英国成为畅销书之一。魏理翻译过我国的许多经典著作。他在《古代中国的三种思潮》这一著作中概述了老子和庄子的学说。如今你能读到由芝加哥的一位华裔教授翻译的《西游记》了。而那时，魏理完成了一部节译本，叫作《猴子》。

战争期间，他的身份是检查官，我给重庆报刊的全部函件都要经过他的手。他有时脱口而出：“哦，对不起，昨天你的第一段可给我剪掉啦。”他甚至还作了一首诗献给我，题目就叫《检查制度》。诗中对检查官的生活进行了一番嘲讽。这首诗登在《地平线》上，后由余光中教授翻译成汉语。我曾在余的诗集里看到过。

四十年代，我经常到戈登广场去拜访他，他跟一位英国女士贝里尔德·佐特一道住在那里。她是巴厘舞专家。然而魏理却在去世前一个月，跟一位我从未谋过面的女士结为伉俪。我把亚瑟·魏理作为一个光辉的范例来说明，汉语这个语言，即使你不会讲，也能精通。魏理告诉我，二十年代，他仅仅向一位经由伦敦赴柏林的中国宗谱学家学习了15天。打那以后，他坚持不懈地自学下去。他用同样的方式掌握了日语。（他从未到过东方。他曾告诉我，他不愿意来，因为想在心目中保持唐代中国的形象，生怕让铁路和烟囱把这形象破坏掉。）魏理也是另一部日本经典作品《枕草子》的译者。在文学上卓有成就的魏理也向我揭示了，就翻译而言，理解原文是重要的，但更重要的还是译者的风格与品味。

自从三十年代中叶我上大学的时候起，我就一直欣赏弗吉尼亚·吴尔夫的作品。因而当我抵达英国后，我的一个愿望是想去见见她。但是我无缘无故地被当作敌性外侨，禁止到距海岸五英里以内的任何地区。

（当然，珍珠港事件后，一夜之间我就成了“伟大盟邦”之一员。）吴尔夫夫人当时住在苏塞克斯（僧屋），离海岸很近。她逝世后我才到那儿去。对她一往情深的丈夫伦纳德十分殷勤地接待了我。我到 he 那里去度周末的时候，他领我去她投河自尽的所在地，还让我阅读并抄录她的一部分日记。不幸的是，我所有的笔记在“文革”期间都遗失了。

你们也许听说过贵格会信徒玛杰利·弗赖伊的名字，她是著名的美术评论家罗杰·弗赖伊的妹妹。她自己是一个伟大的监狱改革者。一天，她带我到她哥哥坐落在艾利斯勃里的小别墅去。在那儿，她捧出一摞文

件，放到我跟前。那是汉萨德——英国议会议事录——的古老册子。但它们是十九世纪四十年代的英国议会议事录！我从中读到了她那位高祖父的诸多长篇讲演，义愤填膺地谴责鸦片战争。我意识到有两个英国：一个是帝国主义炮舰外交支持者的英国，另一个是伸张正义的弗朗西斯·培根和约翰·斯图尔特·穆勒的英国。

我也是金斯莱·马丁的挚友。当时他是《新政治家与民族》的编辑。通过他，我结识了包括哈罗德·拉斯基³在内的一批英国知识分子。也是他把爱·摩·福斯特介绍给我的。

那是1941年5月，在康伟礼堂为印度诗人泰戈尔举行的追悼会上。坐在台上的有代表俄罗斯讲话的苏联大使迈斯基、代表英国讲话的福斯特，以及代表中国讲话的我。我刚读完他的《印度之旅》，很赞赏他对印度的人道态度。小说是以温和的态度反对殖民主义的。

福斯特非常热心于交朋友。由于他早年与埃及和印度结下的因缘，又受了他的朋友洛斯·迪肯森的影响，他格外乐于结交东方人。不久，他写信邀我去他的俱乐部。我想那就是改良俱乐部。我还去过他的家，坐落在萨里郡哈宾芝尔镇的哈克赫斯特，故有《哈宾芝尔收获集》⁴。我见到了他那位讨厌一切机械的母亲。房子里没有电灯，他们用煤油灯。福斯特是个非常孝敬的儿子。他对母亲那么温柔恭顺，确实让东方人感到汗颜。多少世纪以来，孔夫子教育我们尽孝，然而很少有人能做到像福斯特那样孝顺。福斯特家里有一只叫作托姆的猫。我在汉普斯特德也有一只猫叫作瑞雅。因而，我拜访之后不久，有一天福斯特到汉普斯特德我所住的那间地下室来了。他打开一块手绢，里面包着一些人造猫食。他柔声说：“这是我的托姆送给瑞雅的。”我赶快把我的猫抱过来。瑞雅嗅了嗅就冷漠地掉头而去。她好像对它压根儿不屑一顾，着实让人十分尴尬。我还是替瑞雅收下了这份礼物，并向福斯特致了谢。

我在剑桥攻读硕士学位期间，钻研英国小说。福斯特是我集中研究的小说家之一。我不但读了他已经出版的所有长篇小说和两卷短篇故事，而且也读过他那部去世后才出版的写同性恋的《莫瑞斯》。当时他从银行保险库里取出来，借给我读了一个月。不论是作为小说家还是文体家，我对他都钦佩不已。我对他那开明的心态与他所奉行的“惟有融合”这一人生哲学，也怀着极大敬意。他把人间的友谊看得高于一切。他在《哈宾芝尔收获集》里的一篇文章中说：“倘若我不得不在背叛我的国家和我的朋友之间作出抉择的话，我但愿自己有勇气背叛前者。”

我援引这句话，因为我们的友谊是相当悲剧性地结束的。他应该是给我写了八十几封信，但因为“文化大革命”全无踪迹了。1984年，当我重访英国时，王家学院的档案管理员迈克尔·豪尔博士总算找到了最早的40封信的打字稿。

现在我想谈谈我们友谊的悲剧性结局，以结束这个讲话。1949年，当我从香港动身赴北平时，由于晓得三十年代中期在俄罗斯以及战后在东欧所发生的事，就发函给所有的朋友，嘱他们别再跟我通信，就连贺年片也别寄，福斯特当然也包括在内。然而在1954年来北京访问的英国文化代表团中有一位福斯特的密友——诺丁汉大学的杰克·斯普劳特教授。早先在英国，我曾通过福斯特见过他。他一到北京，就特意向文化部提出要见我。于是，我应邀参加了欢迎酒会。否则，在那年月我是不会受到邀请的。在酒会上，斯普劳特告诉我，他带来了福斯特送给我一本书，还附有一封亲笔信，他要私下交给我。所以他要求单独会见我。他不晓得，在那年月，根本就不可能给安排那样会面的机会，确实也没给安排。结果，他把书和信带回英国去了。我相信福斯特必定深感痛心，气得将我写给他的信统统撕个粉碎。王家学院的档案管理员告诉我，如今只剩下两封，多半是出于偶然。

发生了这件事，使我感到十分羞愧。我意识到，非要在国家和朋友之间作出抛弃一方的抉择，可不像福斯特所想的那么容易。也许我是个懦夫。然而，不论一个人相信什么，总还得替老婆孩子考虑啊。福斯特打了一辈子光棍，他从来也没有我必须面对的问题。

于是，一段美好的友谊就以悲剧告终了。这是使我遗恨终身的事情。

请原谅我讲了这么个不愉快的故事。我希望它不至于损害你们用餐的食欲。谢谢大家！

[此篇为作者1987年1月7日在香港中文大学
崇基学院生活午餐会上的致辞]

2. IN MEMORY OF SIR HAROLD ACTON —The Passing of an Aesthete

Sir Harold Acton, historian, poet, aesthete and China lover, died at the end of February at his home in Florence.

I should have written an article in his memory a long time ago, but I was so busy translating James Joyce's *Ulysses* that I failed to do so.

But now that the Chinese version of the great Irish classic is going off press, I shall settle the long overdue "debt" I owe to Sir Harold.

Beijing, with its charm as the ancient capital of the country, used to attract lots of famous people from overseas. The whiskered and bearded Tagore, for example, came to Beijing when I was a school boy. Bertrand Russell was attracted to the city when I was a middle-school student. In the 1930s when I was a college undergraduate, many other English literary geniuses came to town. Literary critic I. A. Richards and poet William Empson both taught at Qinghua and Beijing universities.

And there was another gifted man who loved Beijing more than the others—the self-professed "aesthete" Sir Harold Acton.

Sir Harold continued to send his rent to the landlord of the compound house where he lived before the city fell to the hands of the Japanese, hoping he would one day come back to Beijing.

Sir Harold worked as a professor at Beijing University (Peking University) in 1932, teaching English poetry. He stayed there until Britain declared war against Nazi Germany in 1939 and went back to England to do his bit for his country.

In the 1930s, I used to visit the homes of professors of Qinghua and Beijing universities regularly. I often met Sir Harold in the salons and tea-parties at the homes of professors like Zhu Guangqian, a

renowned aesthete, and writer Lin Huiyin.

Sir Harold was tall and amiable. He was soft-spoken and his eyes were full of understanding and appreciation. He often appeared in theatres and ballad-singing places around Qianmen, itching to plunge himself into Chinese culture.

Together with the late Professor Chen Shixiang, he compiled the English version of *Selected Modern Chinese Poems*. In addition, he chose four stories from the famous Ming (1368-1644) romances and translated them into English. They were published under the title *Glue and Lacquer*, which was illustrated by English artist Iric Gill.

He also wrote a novel *Peonies and Ponies*, which vividly described the dissipation of Western diplomats and business people in China.

What impressed me most was his ability to read English poems aloud. His voice was so resonant and mellow. I did not hear such a beautiful recitation again until I saw Sir John Gildud perform a Shakespearian drama in London in the 1940s.

People say that of all the European languages, Italian sounds the most beautiful. No wonder Sir Harold recited English poems so beautifully. He was half Italian.

Sir Harold was drawn towards Italian culture all his life. His major work, *The Last Medici*, tells the story of an ancient clan in Florence.

In the 1920s, he was one of the famous Oxford poets. His contemporaries were Evelyn Waugh, Peter Quennel and Cyril Connally.

But Sir Harold was a dutiful son. His mother, who lived in Florence, was under house arrest when Italy entered World War II. She later managed to flee to Switzerland and did not return to Florence until after the war.

After he was demobilized from the Royal Air Force, Sir Harold lived in La Pietra outside Florence, where he took care of his mother.

The old lady demanded that her dutiful son, who was in his 50s by this time, still get home before 7:30 p.m. every evening. No key

was given to him in case he managed to steal into the mansion after the deadline.

I didn't become familiar, or even intimate, with Harold until after I arrived in England in the late 1930s.

I still remember in the spring of 1940, the London-based International Association of Poets, Playwrights, Editors, Essayists and Novelists (PEN) co-sponsored a fund-raising dinner. The chairman of the occasion was H. G. Wells, author of *Outline of History*. He was flanked by novelist E. M. Forster, Chinese-culture expert Arthur Waley and so on. Acton also participated. I gave a lecture on war literature in China on that occasion.

Even before that, we had already been closely associated. I left Cambridge for London on the Christmas of 1939. He was living in the lush Ritz Hotel in London. He was in silver grey RAF uniform, wearing major's insignias. He told me that he was not allowed to combat troops because of his knowledge of French, Italian and Portuguese. Instead he found that he was desk bound doing clerical work every day.

We simply could not talk enough about Beijing, the Dong'an Market, Dazhalan and all.

Our last meeting was in Paris, which had just been liberated by the Allies. He was still in his silver grey uniform and I was in mine. The words on my insignias said "China: Reporter". My pass told the enemy that I should be treated as a major if I was taken prisoner.

I was as curious as I was timid. I was deaf and mute in the French-speaking Paris and did not dare to go around the city, although I very much wanted to.

If I had not run into Sir Harold that day, Paris would have remained just another geographical term for me. He took me to the mysterious Montparnasse, where I had a glimpse of the unique Parisian way of life.

After our meeting in Paris, we never met again. But 40 years later, we picked up the broken pieces that we left in the French

capital.

In the early 1980s, I was told one day that the BBC wanted to shoot some episodes of my life as part of the film *Heart of the Dragon*. The programme was about China's reform and opening up to the outside world.

The film was shown in Britain, the United States and other countries. Afterwards many of my old friends, with whom I had lost contact with for many years, saw my appearance.

It was during this period of time that Sir Harold and I began to contact each other again. He sent me a picture album of his inherited mansion in La Pietra and invited me to visit his home. I wanted to go there very much but I was very busy at the time and couldn't go.

In 1990, he posted me his reminiscences: *Memoirs of an Aesthete* and *More Memoirs of an Aesthete*. He labelled himself as an "aesthete" and I think the label fits him well.

Now that he has passed away, I hope that Western scholars and teachers, who come to China to teach in colleges and universities, love Chinese culture as much as Sir Harold did.

[July 21, 1994, China Daily]

贰 悼哈洛德·艾克敦

——一个唯美主义者的陨落

也许是由于故都的吸引力，北京一向总有一些域外的名家来访。我读小学时，从印度来过一位大胡子诗人：泰戈尔。读中学时，又来过英国哲学家罗素，而且都是由诗人徐志摩陪同在全国访问。三十年代我上大学的时候，也来过几位，而且碰巧都是英国人，文艺理论家I. A. 理查兹和八十年代故去的诗人威廉·安普森，前者在清华，后者从北大（北平沦陷后）一直疏散到昆明西南联大。还有一位更加钟情于北平的（故都沦陷几年后，为了渴望有一天能回去，他还托人在交着四合院的房租），那就是以唯美主义者自诩的哈洛德·艾克敦。他于1932年应聘在北大任教，一直呆到1939年秋张伯伦对希特勒宣战的前夕，才为了报效祖国而赶回英国去服兵役的。

我不是北大的，但当时北平大学（尤其燕京和清华是紧邻）之间并无畛域，串门之风甚炽。家宅宽敞的朱光潜和林徽音二位又喜欢举行一些沙龙式的茶会，所以我常同艾克敦碰头。他个子很高，为了谦逊，跟人谈话总低下身子，声音柔和，眼神里充满着理解和赞赏。他经常在前门戏园子里或说书唱大鼓的场所出现，恨不得一头扎进中国文化里。他同已故陈世骧编译了第一部英文的《中国新诗选》，又从三言二拍里选了四篇小说，译成《如胶似漆》（由英国著名版画家厄里克·吉尔插图），还写了一本挖苦旅京洋寓公的小说《赛马与牡丹》，淋漓尽致地描绘了当年住在北京的西方外交官和商人骄奢淫逸的生活。不同于有些在华的西方文人，他对明代的冯梦龙和民国初年的朱湘同样爱慕。给我印象最深的是他的英诗朗诵：声音那么深厚、宏远，我只有在伦敦看吉尔戈德演莎剧时才又听到过。有人说欧洲语言中，意大利语音色最美妙。也许正由于艾克敦几乎是半个意大利人，他的朗诵才那么出色。

艾克敦一生都与意大利文化有着密切联系。他生平主要著作《最后的米迪齐》是写意大利佛罗伦萨一个古老家族的。二十年代他是英国牛津的著名诗人之一，还主编过大学诗刊，虽然在三十年代文学界他的名气并不如他的同辈易沃林·沃、彼得·奎耐尔或希尔·康诺里那么响。他是个大孝子——也许正因此才终身未娶。二次世界大战初，意大利参战后，他的老母适在佛罗伦萨，当时被软禁，后逃到瑞士，战后才回意大利。

利。艾克敦退役后，就一直住在那座中古幽宫里侍奉老母。老太太限她这位年逾半百的孝子每晚7点半前必须回家，而且不给钥匙，以防他过溜进来。

我同艾克敦真正熟起来是在我抵英以后。记得1940年春间，伦敦国际笔会与英国笔会联合举行了一次以支援中国抗战为主旨的聚餐——餐费很高，是变相募捐。那天主席是《世界史纲》的作者赫·乔·威尔斯。他旁边坐着小说家福斯特、汉学家阿瑟·魏理等。艾克敦也参加了。那天由我主讲战时中国文艺。在那之前，1939年圣诞节我从剑桥去伦敦度假时，我们就联系上了。他住在繁华的西区皮克迪理一家十分豪华的旅馆（瑞兹）里。他已穿上了军服——是空军银灰色的，肩章属校级。他告诉我由于他的语言能力（法、意、葡），没让他参加战斗部队（正如魏理由于会中、日文，就管检查信件），每天只坐办公室。我们就像后来我在巴黎见到斯诺一样，从东安市场扯到大栅栏，聊起北平简直没个完。

我同艾克敦最后一次相聚是在刚从纳粹手里解放出来的巴黎。他仍旧穿着银灰色的空军服，我也穿上了军装，是棕色的。

肩章上是“中国：战地记者”。照我身上的记者证说，“此人如被俘，应享受少校待遇”。

我这人既好奇，又胆小，尤其法语不灵，在巴黎不敢乱撞。倘若不是那天与艾克敦邂逅，巴黎对我很可能只是个地理名词。是他把我带到神秘的（文化兼色情）孟巴那斯去的。

那次同艾克敦分手，就未再见着了。我那两年马不停蹄地在大西洋两岸追踪着新闻。40年后，我们才又联系上了。

八十年代初，单位人事科通知我说BBC（英国广播公司）要来我家拍电视。原来英国一家电影公司正与中国文化部合拍一部记述中国改革开放的电影，片名《龙的心》。后来此片在英美及世界许多国家放映了。我在国外许多老友都是看了此片（其中第12集描绘知识分子复苏的那段，有我几分钟镜头），写信给放映此片的BBC，再经文化部与我重新联系上的。当时艾克敦正在意大利。他也是这样写信同我联系上的。他还给我寄来有关他所世袭（当时他的老母已故去）的那所宫殿的画册，表示欢迎我们去小住。我早年就从徐志摩文中读到过“翡冷翠”，也很想去看看他。只是八十年代我几乎像40年前那样奔忙起来，挤不出时间。另外，我对去一个语言不通的地方，一向发怵。所以洁若去日本做

访问学者的那一年，日方愿为我提供旅费和用度，我也没为之所动。

1990年，他先后寄给我两本他的自传正、续集《一个唯美主义者的回忆录》。这顶帽子是他自己扣的，我看很合适。我记得1942年我做了一件蠢事：我请艾克敦去伦敦上海饭馆吃饭，同席的还有印度作家安纳德和他的英裔夫人。请客不一定先了解被请者的政治观点。原来安纳德的夫人是位激烈的共产党员。席间，她就同艾克敦这位保守的古典主义者争辩得面红耳赤。

最近几年，除了每年交换圣诞贺卡之外，我们两人只间接打过交道。一次是1985年纽约大学校长布赖德玛斯来京约我偕洁若去该校小住。后来才知道原来艾克敦刚立下遗嘱，把他世袭的那座宫殿捐赠给纽大了——他母亲是美国人。捐赠时，他曾表示希望该校邀请我们去校园小住。当时洁若还在日本，不久我们就去了。另外，两年前一位意大利记者突然来访。他是从艾克敦那里听说我们在译乔伊斯的，我们交谈的主要内容是西方小说在中国。

得悉艾克敦去世的消息，我在悲痛之余就想到：八十年代以来，有更多的西方学人在中国高等院校里任教，他们中间可有像艾克敦那样热爱中国和中国文化的人，会在中西之间起些穿针引线的作用。

[原载《解放日报》，1994年8月4日]

3. HELEN SNOW: A PERSONAL REMINISCENCE

It has been almost one year since Helen Snow, a sincere friend of the Chinese people, left us. In the 1930s she and Edgar Snow played a remarkable role in promoting friendship between the Chinese and American peoples and in introducing China's new literature to the English-speaking world. Though they divorced in 1949, nine years after they left China, their life-long friendship with the Chinese people never ceased. After 1949, Edgar Snow revisited China three times, in 1960, 1964 and 1970, and Helen Snow in 1972-73 and 1978.

I got to know the Snows in 1933. At that time Edgar Snow was teaching a journalism course at Yenching University and I was enrolled at Yenching after leaving Furen University. Snow taught at Yenching for two years. Since I was a journalism major, it was natural for me to register in Snow's classes, including a feature-writing class. Helen and I were classmates at Yenching, as both of us were attending a course on an aesthetics class taught by Prof. Huang Zitong. During World War II, I encountered Edgar in Paris and we spent almost a whole day together; we were both war correspondents assigned to cover the war in Western Europe. In 1979, when I revisited the United States, I made a special trip to see Helen at her home in a small town in Connecticut.

In the 1930s, a time when most foreigners in China still held the Chinese people in contempt, the Snows were fully confident that the Chinese people would one day stand up. They not only fully supported, but also participated with great zeal in the December 9th Movement in 1935. In the postscript to *Chestnuts*, my collection of stories published in 1936, I recalled how I accompanied an American couple to visit some students who were wounded and hospitalized the day after the December 9th student demonstration. That American

journalist friend of mine and his wife spent a sleepless night, because they were so shocked by what had happened during the day. The wife suddenly gripped my arm, her hair disheveled, and shouted at me: "How could the Chinese soldiers (i.e., Song Zheyuan's 26th Army which suppressed the student demonstration in cold blood) be so cruel to their own people!" That American couple were the Snows.

At that time they were living in a courtyard house in the Haidian district of northwestern Beijing, where Yang Gang (then called Yang Bin) and I spent most of our free time. After they read my article about new Chinese literature published in 1931 in *China in Brief*, they invited me (and later Yang Gang) to join their efforts in translating and editing the book, later entitled *Living China: Modern Chinese Short Stories*.

It took a very long time to translate and edit the book, and to finally get it published. In the beginning, Snow had planned just to publish an English version of *Selected Short Stories* by Lu Xun. At Snow's request, Lu Xun wrote a "Preface to the English Translation of My Selected Short Stories" (later included in *Fragmentary Recollections*, Vol. 7 of *The Complete Works of Lu Xun*). Helen actively participated in Edgar's *Living China* project, as Lu Xun's diary entry for June 19, 1934 suggests: "Yao Ke came with a letter from Mr. Snow and his wife, I wrote them a letter of permission entitling them to translate and publish my works in the U. S." On August 22 that same year, in his reply to Harold Isaacs, editor of *Straw Sandals*, Lu Xun wrote: "Early in the spring I gave permission to Mr. Snow to translate my short stories into English. That's why I cannot give them again to another person." In the section on Lu Xun in his *Journey to the Beginning* (a selected translation of the book was published in China entitled *My Thirteen Years in China*) Snow recalled a meeting with Lu Xun in the company of Yao Ke in Shanghai: "At that time we were trying to publish an anthology of contemporary Chinese vernacular short stories, for which we received warm support from Lu Xun."

Unfortunately, the English version of Lu Xun's *Selected Short*

Stories was not published as originally planned for a variety of reasons. Instead, it was included in Part One of *Living China: Modern Chinese Short Stories*. The book included seven short stories by Lu Xun, two each by Mao Dun, Ding Ling, and Tian Jun, as well as one each by Rou Shi, Ba Jin, Shen Congwen, Sun Xizhen, Lin Yutang, Yu Dafu, Zhang Tianyi, Guo Moruo, and Sha Ting. At the suggestion and insistence of Snow, the story "Fragment from a Lost Diary" (the Chinese version was published in *China Weekly Review* in 1935 under the title "Corporal Punishment") by Yang Gang, who used the pseudonym Yi Ming, and my story "The Conversion", which denounced imperialist cultural aggression by describing the Salvation Army's missionary activities among the lower class of Beijing society, were also included in the book.

The publication of *Living China* by George G. Harrap & Co. in London in 1936 evoked remarkable responses from its readers and reviewers. In my preface to the Chinese version entitled "Edgar Snow and China's New Literary Movement" (published by the Hunan People's Publishing House in April 1983), I wrote: "In the early 1930s Snow did a job of great significance. He and his wife Helen Foster made painstaking efforts to introduce China's new literary movement and works by Chinese writers to the English-speaking world, thus building a spiritual bridge between China and the rest of the world."

Included in *Living China* as an appendix was an essay written by Helen under the pen name Nym Wales, entitled "The Modern Chinese Literary Movement". In his Editor's Note to the book, Snow praised Nym as "an authoritative source on modern Chinese literature and art. This essay was written based on extensive and in-depth investigations of works by Chinese writers, and the opinions of many outstanding Chinese literary critics were solicited before the writing began. I believe this was the first time such an approach was ever taken to completely analyze the subject in English." Here I would like to reaffirm that Helen loved the Chinese people as much as Edgar did. She worked very hard, and was a great help to her husband in those

days. She was deeply concerned with and had a good understanding of China's new literary movement. More significantly, they both recognized the value of China's new literature. Her essay was based on a wide range of sources, and whatever she heard about the subject was included in this essay. This inclusiveness did not reduce the significance of her essay, and her work remains a lasting contribution she rendered to the Chinese people. Helen showed great courage in exposing in detail and denouncing the Kuomintang's cruel purge and bloody oppression of the Left-wing writers. Under the Kuomintang's terrorism and tight information control at that time, her exposure of the fascist atrocities committed by the Kuomintang displayed dauntless heroism. Her motive was clear: to help the progressive peoples of the world understand and pay attention to China's new literature.

Through their study of China's new literary movement and the voluminous works created by Chinese writers in the 1930s, Helen and Edgar tried to understand the enthusiasm, passion, misery, and hope of the Chinese people then living in dire circumstances. It was Edgar Snow's insight into the reality of Chinese society that spurred him to take a courageous trip to Yan'an, the sacred center of the Chinese revolution, in 1936. Like John Reed, the American journalist who wrote *Ten Days That Shook the World*, Snow had discerned that the final victory of the Chinese people's revolution was an inexorable law of history.

It is not an overstatement to say that Edgar and Helen were the two most active and most objective-minded Western journalists among their colleagues in China and the Far East during the 1930s. Though a good wife and an indispensable assistant to her husband's work, Helen was more than a housewife. When Edgar finished his *Red Star over China* after his Yan'an trip in 1936, Helen made her own journey to Yan'an in April 1937 to "catch up with her husband", at even greater risk. Shortly after this visit she published her own book, *Inside Red China*, which was acclaimed the companion piece to Edgar's *Red Star*

over China and drew attention both in China and worldwide.

When I met Helen at her old house in Connecticut in 1979 we talked about her separation and divorce from Edgar. Early in the 1930s when I first met them I felt their personalities were in sharp contrast. Edgar was always calm, refined and taciturn, while Helen was enthusiastic, impulsive and overwhelming. These differences eventually led to their divorce. Many years later in his *Journey to the Beginning*, Edgar wrote that Helen was "an extraordinary woman, sometimes a torture, but more often an inspiration to me. She is full of energy and creativity. She was my loyal partner, my companion as well as my critic." With deep affection Edgar continued: "She is a Greek goddess, admired wherever she goes. She is exquisite and healthy, with a pair of ever-twinkling blue eyes, really a rare crystallization of beauty and wisdom." After her divorce Helen lived for almost half a century in the old house in Madison, Connecticut which Edgar had bought with his *Red Star over China* royalties. In October 1979 when I went to see her at her home in the company of Prof. Hans H. Frankel (Sinologist and husband of famous Kunqu opera actress Zhang Chonghe), Helen showed me 17 books in manuscript placed in cardboard boxes. After I returned to Beijing, I wrote some articles—one was entitled "What Helen Snow Had Said"—to appeal on Helen's behalf, urging Chinese publishers to translate and publish some of her works. Unfortunately, it seems to me that only two of Helen's books have been published in China so far, one is *My China Years*, and the other is *China Revisited* (a collection of writings about her trip to China in 1978).

Both Helen and Edgar had devoted a great part of their life to promoting mutual understanding between China and America. The more I think of their profound friendship with the Chinese people, beginning in the 1930s, the more I cherish it.

[September 19, 1997]

叁 悼念海伦·斯诺

中国人民的挚友海伦·斯诺去世已将近一年了。三十年代，在沟通中美人民之间的友谊，并向世界介绍中国新文艺方面，她和埃德加·斯诺曾起过卓越的作用。这对夫妻离开中国后，婚姻关系早于1949年就破裂了，然而埃德加曾于1960年、1964年、1970年，海伦也于1972年至1973年以及1978年分别重访过我国。他们对中国人民的深厚情谊持续终身。

我和这对美国夫妇是1933年结识的。说来也真巧，斯诺在燕京大学新闻系统共只教过两年书，我刚好从辅仁转入燕大，读的还是新闻系。当然选了斯诺的课，其中一门是特写。我和海伦另外还有一层同学关系，因为我们二人都上了黄子通教授的“美学”（她是旁听生）。二次大战期间，在奔赴西欧战场的途中，我曾同也是一身从军记者戎装的埃德加于巴黎偶然相逢，而且一道盘桓了大半天。1979年我重访美国，曾去海伦蛰居的那个东岸小镇探望过她。

三十年代，当许多洋人对中国心存蔑视时，海伦和埃德加坚信中国人民有一天必将会站起来。他们不但支持、而且还以极大的热情参加了一二·九运动。他们走在游行队伍的前列，挥动着标语旗帜，并同抡着大刀的军警搏斗。1936年，我曾在小说集《栗子》的跋中谈到我陪一对美国夫妇在一二·九的次日去医院探视受伤同学的情景。“一个作新闻记者的美国朋友和他的太太也由于神经受到过重的刺激，一夜未能阖眼。那位太太披散着乱发，抓住我的胳膊嚷：‘中国人（指宋哲元的二十六军）怎么对自己的人民那么凶狠！’”那位美国记者就是斯诺，他的太太就是海伦。

当时他们夫妇住在海淀军机处八号一所四合院里。我和杨刚（当时名杨缤）几乎天天都泡在那儿。当他们看到1931年我在《中国简报》（*China in Brief*）上所写的有关中国新文艺的介绍时，马上就把我（后来加上杨刚）拉进《活的中国》的编译工作中去了。

《活的中国》的编译、出版过程相当曲折。斯诺首先计划出版的是鲁迅的《短篇小说选》英译本。为此，鲁迅还写了一篇《英译本〈短篇小说选集〉自序》（后来收入《鲁迅全集》第七卷《集外集拾遗》）。

海伦对埃德加的工作一直是积极参与的，这从鲁迅1934年6月19日的日记中可以得到证实：“姚克来并交施乐（即斯诺）君及夫人信，即写付作品翻译及在美印行权证一纸。”同年8月22日，鲁迅又在致《草鞋脚》编者伊罗生的复信中说：“我的小说，今年春天已允许施乐君随便翻译，不能答应第二个人了。”斯诺在《我在中国十三年》一书的“鲁迅印象记”一节中提到，他在上海曾偕同姚克与鲁迅晤面：“那时候，我们计划把一些现代的白话短篇小说翻译成为英文结集出版，为此，鲁迅热情地给予支持。”

后来由于种种原因，鲁迅的《短篇小说选》不曾单独出版，却改成了《活的中国——现代中国短篇小说选》的第二部分，其中收入了鲁迅的七篇小说。第二部分还选译了茅盾、丁玲、田军的小说各二篇，柔石、巴金、沈从文、孙席珍、林语堂、郁达夫、张天翼、郭沫若、沙汀的小说各一篇。在斯诺的建议和坚持下，还收进了杨刚那篇〔署名“佚名”的〕《日记拾遗》（中文版易名《肉刑》，发表在1935年的《国闻周报》上）和我那篇通过救世军在北平下层社会的宗教活动写帝国主义文化侵略的《皈依》。

《活的中国》于1936年由伦敦乔治·G.哈拉普公司出版后，曾引起巨大反响。正如我在该书中文版（湖南人民出版社，1983年4月）的代序《斯诺与中国新文艺运动》中所说的：“三十年代上半期，斯诺在中国曾做过一件极有意义的工作：他和他当时的妻子海伦·福斯特花了不少心血把我国新文艺的概况及一些作品介绍给广大世界读者，在国际上为我们修通一道精神桥梁。”

《活的中国》后面有一篇附录，那是海伦用“妮姆·威尔斯”这一笔名所撰写的《现代中国文学运动》。斯诺在该书的“编者序言”中说，妮姆是“研究现代中国文学艺术的权威。此文是在对原著做了广泛而深入的调查研究的基础上写的，执笔之前又曾同中国几位最出色的文学评论家磋商过。我相信这是第一次用英文写成的全面分析的探讨。”这里，首先应该肯定海伦对中国人民的友谊是跟埃德加同样深厚真挚的。她总是勤勤恳恳地工作，是丈夫当时的好帮手。她对中国新文艺运动是关心的，也有一定的了解。更重要的是他们二人都认识到中国新文学的重大价值。她的材料来源庞杂，几乎是“有闻必录”。然而她这篇文章仍然是重要的——甚至说得上是她对中国做出的一项不可磨灭的功绩。最可贵的是她在文中详尽具体地揭露并义正词严地声讨了国民党对左联作家的残酷迫

害与血腥镇压。在国民党一面实行白色恐怖，一面对内对外严密封锁消息的当时，仅仅把这些法西斯暴行公诸于世就是大无畏的正义之举。她的出发点是明确的：使世界进步人士了解、注意并重视方兴未艾的中国新文艺运动。

海伦和她丈夫埃德加一道把精力倾注在中国新文艺运动的探讨上，通过沸腾的三十年代像雨后春笋般涌现的文艺作品，探索了处在水深火热中的中国人民的憎与爱、咒诅与憧憬。正因为埃德加窥见了现实更本质的方面，他才于1936年突破黑暗的重围，奔赴陕北革命圣地，才像另一位美国记者——著有《震撼世界的十天》的约翰·里德那样，洞察到人民革命的胜利是历史的必然规律。

应该说，海伦和埃德加是三十年代在中国、在远东最活跃也是最正直的一对西方新闻记者。尽管海伦对丈夫照顾得无微不至，倘若她仅仅是一位“贤内助”，我们也不需要对她本人进行什么了解了。然而她不但是埃德加的得力助手，而且往往还独立地平行地活动着。例如埃德加于1936年去陕北后写了《西行漫记》，海伦也不甘落后，转年4月她冒着更大的风险只身去了陕北，并写成《续西行漫记》。这是《西行漫记》的姊妹篇，在国际国内产生了广泛影响。

那一次我在海伦那古色古香的小木屋里与她叙旧的当儿，话题曾转到她和埃德加分手的事。三十年代我就感到这对夫妇性格迥乎不同。埃德加总是那么温和典雅沉静，而海伦则激烈冲动，热心肠。尽管性格的差异最后导致这对夫妇分道扬镳，然而多年后，埃德加还在《复始之旅》（*Journey to the Beginning*）一书中说海伦是位“极不寻常的女人。她时常折磨我，又经常给我以启发。她充满活力，创造力，是一位忠诚的合作者。她既是我的伴侣，又是我的批评家。”他还满怀深情地这样形容她的容貌：“她是一位希腊女神。走到哪里，都为人们所爱慕。她漂亮、健康，一双蓝眼睛闪闪发亮，是美貌和智慧两者罕见的结晶。”

与丈夫离异后，海伦在埃德加当年用《西行漫记》的版税买下的那座小木屋里度过了将近半个世纪。它坐落在康涅狄克州的门格尔镇。18年前的10月下旬我在汉学家傅汉斯教授（昆曲大师张充和的丈夫）的陪同下去拜访海伦时，她把装在硬纸盒里尚未能出版的17部稿件指给我看。回京后，我曾在《海伦·斯诺如是说》等文章里替她呼吁过，然而令人遗憾的是，其中迄今得以在我国翻译出版的好像只有《我在中国的岁月》和《重返中国》。

海伦和埃德加都为促进中美友谊献出了自己的大半生。三十年代以来他们对中国人民的那份隆情厚谊，至今回忆起来仍是弥足珍贵的。

[1997年9月19日]

苦难时代的蚀刻——现代中国文学鸟瞰

1 英文音译名应为米尔，今通译为约翰·斯图尔特·穆勒（1806—1873），英国哲学家、经济学家和逻辑学家。

2 Burma：缅甸（Myanmar）的旧称。

3 Manchuria：满洲，旧指中国东北一带。

4 Dairen：大连的旧译。

5 约瑟夫·康拉德（1857—1924），英国航海家、小说家。

6 安德烈·马尔罗（1901—1976），二十世纪法国著名小说家。

7 威廉·布莱克（1757—1827），英国漫画家、诗人。

8 保罗·瓦莱里（1871—1945），法国诗人、评论家。

9 沃尔特·惠特曼（1819—1892），美国诗人。

10 见《笔立山头展望》，收入《女神》。

11 A. A. 米尔恩（1882—1956），英国幽默作家。

12 该剧为英国唯美主义剧作家王尔德的名作。

13 詹姆斯·巴里（1860—1937），英国剧作家、小说家。

14 该剧即萧伯纳的名作《华伦夫人之职业》。

15 此处引文根据英文转译。

16 J. K. 杰罗姆，英国小品文作家。

17 W. H. 赫德森（1841—1922），英国作家、博物学家和鸟类学家。

18 纳克索斯，希腊神话中因爱上自己映在水中的美丽影子以致淹死而变为水仙的美少年。

19 哈夫洛克·蔼理斯（1859—1939），英国随笔作家、编辑、医师。

20 参见欧阳竟《谈何其芳的散文》，原载《宇宙风》（乙刊）1941年第37期。

21 参见何其芳著《还乡日记·街》，上海良友图书公司1939年8月初版。

22 康斯坦斯·加尼特夫人（1862—1946），英国女翻译家，是最早把陀思妥耶夫斯基和契诃夫的作品译成英文的人。

23 利顿·斯特雷奇（1880—1932），英语传记作家、批评家。

24 韦塞克斯，盎格鲁撒克逊英格兰诸王国之一，其君主后来成为全英格兰的国王。

25 指抗战爆发。

龙须与蓝图——战后文化的思考

1 意为乌托邦，即nowhere的倒拼，预示对永恒进步所抱幻想的破灭。

2 英国城镇，英格兰萨洛普郡首府。城市存有许多著名建筑，其中包括旧市政厅、部分城墙、城楼、多种风格的圣玛丽教堂等。

3 据查证资料，汤若望曾被软禁在家，于1666年7月病故于宣武门内天主教堂南堂。

4 杨光先（1595—1669），康熙初年曾上书反对西洋人制《时宪历》。著有《不得已》一书，反对西方科学技术。

5 王壬秋，即王闾运，晚清著名辞章家，辛亥革命后任清史馆馆长。此处根据英文转译。

6 清朝（Qing Dynasty）。

7 伦敦阿尔伯特纪念堂，常用作音乐会和其他集会的会场。

8 英文疑为作者笔误，实为Liang Shuming。

土地回老家

(英文原注)

1 The tithing system of the Manchu regime in which every 10 families make a *chia* and every 10 *chia* a *pao*. The KMT also adopted this system. It made families within a *pao* responsible for each other's action and all responsible to the local Japanese or KMT officials.

2 About three o'clock in the morning.

3 A *li* is slightly more than one third of a mile, about 633 yards.

4 Before the liberation, peasants renting land had to pay the landlords a deposit in advance which customarily amounted to a year's harvest yield.

5 The traditional day for visiting the graves of the ancestors. It falls in early April.

6 The 9th day of the 9th moon which is about mid-October in the solar calendar.

7 *Tou* is one tenth of a *tan* (picul) which is 50 kilogrammes. Ten *sheng* make a *tou*. In Hunan, land is sometimes measured by the average yield, as around Changsha. In the locality where the events related here are set, it is measured according to the amount of seeds the land requires. One *tan* equals roughly 7 *mou*. A hectare is approximately 16 *mou*.

8 A hollow drum shaped like a fish used by Buddhists during their chants.

9 Jellied soya beans resembling junket in substance.

10 The Qing Dynasty was overthrown and the Republic began in 1911. Therefore, the 16th year is 1927.

11 Term used by peasants indicating a hiding place for landlords and their properties.

12 Land the ownership to which has been hidden to avoid pooling for redistribution.

回忆几位友人

1 指英国国王威廉三世 (1650—1702) 及其妻子玛利二世统治英国的时代 (1689—1702)。这里指某座建筑是那个时代的。

2 *The Tale of Genji* by Lady Murasaki.

3 哈罗德·拉斯基 (1893—1950)，英国政治家、教育家，杰出的工党成员。1945年当选为工党主席，同年大选中工党获胜。

4 《哈宾芝尔收获集》(1936) 为福斯特的一部散文集。

“博雅双语名家名作”出版说明

1840年鸦片战争以降，在深重的民族危机面前，中华民族精英“放眼世界”，向世界寻求古老中国走向现代、走向世界的灵丹妙药，涌现出一大批中国主题的经典著述。我们今天阅读这些中文著述的时候，仍然深为字里行间所蕴藏的缜密的考据、深刻的学理、世界的视野和济世的情怀所感动，但往往会忽略：这些著述最初是用英文写就，我们耳熟能详的中文文本是原初英文文本的译本，这些英文作品在海外学术界和文化界同样享有崇高的声誉。

比如，林语堂的*My Country and My People*（《吾国与吾民》）以幽默风趣的笔调和睿智流畅的语言，将中国人的道德精神、生活情趣和中国社会文化的方方面面娓娓道来，在美国引起巨大反响——林语堂也以其中国主题系列作品赢得世界文坛的尊重，并获得诺贝尔文学奖的提名。再比如，梁思成在抗战的烽火中写就的英文版《图像中国建筑史》文稿（*A Pictorial History of Chinese Architecture*），经其挚友费慰梅女士（Wilma C. Fairbank）等人多年的奔走和努力，于1984年由麻省理工学院出版社（MIT Press）出版，并获得美国出版联合会颁发的“专业暨学术书籍金奖”。又比如，1939年，费孝通在伦敦政治经济学院的博士论文以*Peasant Life in China—A Field Study of Country Life in the Yangtze Valley*为名在英国劳特利奇书局（Routledge）出版，后以《江村经济》作为中译本书名——《江村经济》使得靠桑蚕为生的“开弦弓村”获得了世界性的声誉，成为国际社会学界研究中国农村的首选之地。

此外，一些中国主题的经典人文社科作品经海外汉学家和中国学者的如椽译笔，在英语世界也深受读者喜爱。比如，艾恺（Guy S. Alitto）将他1980年用中文访问梁漱溟的《这个世界会好吗——梁漱溟晚年口述》一书译成英文（*Has Man a Future? —Dialogues with the Last Confucian*），备受海内外读者关注；此类作品还有徐中约英译的梁启超著作《清代学术概论》（*Intellectual Trends in the Ch'ing Period*）、狄百瑞（W. T. de Bary）英译的黄宗羲著作《明夷待访录》（*Waiting for the Dawn: A Plan for the Prince*），等等。

有鉴于此，外语教学与研究出版社推出“博雅双语名家名作”系列。

博雅，乃是该系列的出版立意。博雅教育（Liberal Education）早在古希腊时代就得以提倡，旨在培养具有广博知识和优雅气质的人，提高人文素质，培养健康人格，中国儒家六艺“礼、乐、射、御、书、数”亦有此功用。

双语，乃是该系列的出版形式。英汉双语对照的形式，既同时满足了英语学习者和汉语学习者通过阅读中国主题博雅读物提高英语和汉语能力的需求，又以中英双语思维、构架和写作的形式予后世学人以启迪——维特根斯坦有云：“语言的边界，乃是世界的边界”，诚哉斯言。

名家，乃是该系列的作者群体。涵盖文学、史学、哲学、政治学、经济学、考古学、人类学、建筑学等领域，皆海内外名家一时之选。

名作，乃是该系列的入选标准。系列中的各部作品都是经过时间的积淀、市场的检验和读者的鉴别而呈现的经典，正如卡尔维诺对“经典”的定义：经典并非你正在读的书，而是你正在重读的书。

胡适在《新思潮的意义》（1919年12月1日，《新青年》第7卷第1号）一文中提出了“研究问题、输入学理、整理国故、再造文明”的范式。秉着“记载人类文明、沟通世界文化”的出版理念，我们推出“博雅双语名家名作”系列，既希望能够在中国人创作的和以中国为主题的博雅英文文献领域“整理国故”，亦希望在和平发展、改革开放的新时代为“再造文明”、为“向世界说明中国”略尽绵薄之力。

PREFACE

[Gardens in dynastic China] were expensive pieces of real estate, but they were also consciously constructed and aesthetically perceived artifacts. They overlap intriguingly the boundaries of several Chinese categories, and have a power to illuminate the border regions they traverse.¹

The human relationship with land is fundamental. It predates society—we were pillaging the land for food and shelter long before we understood much of nature's power and abundance—and the phenomenon of the garden, which the settling of people in one location and the societies that evolved as a result, enabled. With the fact of the first consciously constructed dwelling established, as time flowed on, social structures gained ever deeper footholds within human communities and engendered inevitable societal differences; certain groups of people discovered new and various relationships to the land that afforded what we now describe as privilege. But these conditions further required a degree of economic stability before the land could be put to uses other than that of accommodating purely pragmatic needs of survival. As this economic foundation assumed tangible form, however, so too did the garden as enclosed stretches of nature, owned and altered at will by those to whom they were granted. In time, too, these gardens became less private, less exclusive, soon to occupy a place in almost every culture and geography worldwide, with some of the earliest examples dating back over four thousand years, to Egyptian times. Today we might venture to describe the garden as that most democratic and welcoming of all cultural forms. As one reads in the pages of this book,

Even the rank and file, including those who are hard up, know how to enjoy themselves by gracing their homes with miniature rockeries and potted islets.

That love is only slightly diminished today, as a result of the speed and voluminous elements of contemporary life which increasingly encroach on the time and the level of general knowledge once

commonly held amongst that "rank and file."

In every sense, then, gardens embody man's relationship with nature culturally and, to recent generations carrying the insights of the father of psychoanalysis, the German Sigmund Freud, psychologically. From whatever perspective it is viewed, that relationship constitutes, arguably, a dominion over nature as much as an admiration of its forms and a tangible, if idealized, desire to enhance the natural world and experience it as nature surely intended—Man was, from the first, subject to the folly of immodesty. Ultimately, as demonstrations of our ability to bend and fashion nature to our vision and will, gardens are, both practically and metaphysically, a keystone of human civilization. From Mesopotamia to Greece, Rome to Europe and the modern world, examples abound, and for civilizations as diverse as Arab, Seljuk, Persian, Islamic, European, and Asian. Amongst all these, the most enduring association is perhaps that between China's classical cultural traditions and the exquisite aesthetics that affectionate energy brought forth in the process of creating some of the world's most famous gardens.

Gardens in China have their origins in imperial parklands and hunting grounds but proliferated in aesthetic form from the 12th century as private estates, the purview of wealthy individuals, became a phenomenon. As a concept, a garden provided "scholargentlemen a means, at least in part, of achieving these antithetical ideals of pursuing self-cultivation while fleeing from the 'dust' of the world and living in reclusion in nature."²

The story of a garden almost always begins with an individual, be that the adroit lord of the manor or person of social standing who commissioned and funded it or in whose name it was enshrined. Equally, it might be the individual designer to whose vision the garden first owed its formal beauty and emotive appeal. From the 12th century onwards, the task of providing China's scholar-gentlemen with a sanctuary for self-cultivation provided a livelihood for numerous individuals who took on the responsibility of formulating

garden designs, a task at which they worked assiduously as this book can attest. Foremost amongst these was the eminent 17th-century scholar Ji Cheng (1582-c. 1642), a native of Wujiang in Jiangsu province, who created a number of exquisite gardens, examples of which remain today as some of this art form's finest archetypes.

Significantly, Ji Cheng's concepts are preserved for posterity in the celebrated volume *The Craft of Gardens*, which its author completed in 1631, and with which his handiwork was readily compared through the succeeding several centuries. For recent generations, the singular significance of Ji Cheng's skill is how well his creations have stood the test of time. *The Craft of Gardens* continues to be of immeasurable influence to anyone interested in the richly entwined cultural concerns brought to bear on his life's work of cultivating gardens as an art form. This influence was firmly embraced by 20th-century garden expert, Chen Congzhou, whose diligent scholarly writings are collected together in this exhaustive volume.

Modestly titled *Literati Gardens: Poetic Sentiment & Picturesque Allure*, this compendium brings together transcripts from lectures Chen Congzhou presented at Shanghai's Tongji University between 1979 and 1982 and presented at various seminars with a range of articles penned for the university's journal. It further includes a range of articles published across China in museum newsletters and academic journals in the late 1950s, early 1960s, and on through to the early 1990s. *Literati Gardens* thus represents a serious, in-depth work of research into the history of gardens across China concerning their form and content, the discrete biography of their creators and the individual characteristics that make up the rich history of garden design in China through time. Within the nation's distinct socio-cultural history, the concept of the garden as consciously formulated sanctuary-retreat was, from the first, viewed as "an artistic synthesis of architecture, rockery, water, and horticulture." Enclosed within physical parameters of a piece of land, a garden was cultivated for the pleasure of communing with nature but in an elegant, restrained

manner. As so many classical brush paintings illustrate, where figures are depicted in states of meditative reflection standing on a rock, beneath a tree, or seated in a pavilion, at times with friends, but usually alone, these enclaves were viewed as a composite realm of navigable form, where the mind was calmed and wildness dispensed with.

It took designers and horticulturalists more than two thousand years—beginning in the Zhou dynasty (1046-256 BC)—to evolve a holistic conceptual aesthetic of the ideal garden which drew upon the multitude of sensibilities that were brought to other art forms through the same period. This process surely involved a great deal more trial and error than is ever discussed, although allusions can be read between the lines Chen Congzhou writes where plants are transplanted from their native regions and not to best effect, or where later hands are seen to intervene in the classical lines of an ancient garden. We might say the invisible force of time at work in nature here is complemented by the invisible hand of the original designer which sought to lead the meditative wanderer to the vistas that lie within. For it is once inside that the observant visitor recognizes a multitude of such scenic settings that allow one to "make sense of the divine philosophy implied in landscape gardening."

By Ji Cheng's time in the 17th century, the aesthetic was at a peak of perfection, aided by this particular master's contributions, which Chen Congzhou duly notes. "Love for nature, indeed, is borne deeply in the hearts of folks in Suzhou," he says, where many of Ji Cheng's designs flourished. "No place in the world has more traditional gardens—and has them in a complete array," Chen Congzhou confirms. From the first, the essential components remained elemental, but the garden was, under Ji Cheng's deft hand, a physical mapping of a harmony achieved through a sequence of imperceptible transitions, often completed using physical structures like the architectural form of the pavilion. These also provided places to pause, to contemplate, to enjoy and appreciate seasonal shifts

reflected in changing contours and colors. "Ideal gardens," Chen Congzhou wrote in 1994, "are like superb lines of verse." In common with poems and paintings, the perfect garden, he adds, should be filled with "implicit undertones." These he recognizes in the work of many others besides Ji Cheng, for few it seems, at least in recent history, can have looked at so many gardens and looked so closely as Chen Congzhou. Intricately observed, detailed and described, Chen Congzhou's writings combine to a comprehensive survey of ancient buildings, gardens and dwellings. Even a casual glance reveals an extraordinary eye for details that are both lovingly observed and explained.

One example is the following anecdote concerning the structure of bridges found in simpler gardens:

The bridges in traditional Chinese gardens are often balustraded on one side and left open on the other, to the bewilderment of many observers. This arrangement is actually adapted to everyday rural life. When a peasant crosses a bridge with a load on both ends of his shoulder pole, or with a buffalo in tow, his movement is likely to be hampered if the bridge is narrow, and, worse, balustraded on both sides. This is why many rural bridges have no balustrades at all or have a balustrade on just one side. In what is a typical case of someone being well-read but having a poor memory of his ancestors' way of doing things, garden crafters of later generations often forget this simple reason and turn a small bridge into a narrow lane by sandwiching it between tall railings.

Chen Congzhou's investigation of gardens was ever underscored by his interest in examining and re-establishing the personalities with which each garden was "imbued with the botanical character of the place in which it finds itself," and was, in many cases, conceived to express. He found in the writings of Ji Cheng inspiring examples of creativity in the diverse elements and materials that this master himself employed to achieve texture and depth in the designs and which were both a response to place and to craft, techniques in which Chen Congzhou delighted. Within the wide-ranging aspects of the gardens Chen Congzhou discussed, historic context is not without influence in the evolution of the garden as form and aesthetic, but his interpretations

draw with particular intensity upon his deep knowledge of the arts and the evolving relationship these enjoyed with the concepts applied to garden designs. "...poetry and prose, calligraphy and painting, and theater and balladry are, after all, different forms of expression for the same thought or feeling." Chen Congzhou explains:

The gardens made by literati-officials, most of whom were proficient in poetry and prose and could paint and sing, were inevitably rooted in their shared ideals or feelings, with elegance as the chief mode of expression. Full of allusions to poetry and prose, their gardens achieve oneness with literature by means of inscribed boards and vertical couplets, as well as records and colophons on classical paintings. That is why whenever a visitor steps into such a garden, he feels as if he were visiting the realms of poetry and painting. If he is highly attained in literature, he may improvise a poem on the spot; if he is a painter, he may depict the garden's scenery with freewheeling brush strokes in the late Ming tradition. All this I believe has happened to every educated visitor to such a garden.

More pertinent still to the achievement to which Chen Congzhou's writings attest, he writes that "...to make convincing comments on a garden, one must delve into its history and, more than anything else, become well acquainted with the lifestyle of its day. Every garden provides an integral sightseeing route that cannot be put upside down. This is like a piece of writing that must have a beginning, development, transition and a conclusion..."

It is a process Chen Congzhou clearly adopted and followed. The density of detail involved in the lengthy descriptions, as well as the effects of repeated visits through time, may at times imbue the writing with a prosaic air, but, the gentle interweaving of references in the text to ink painting or Kunqu Opera, juxtaposed with a profusion of poems, serves to evoke the various moods one might encounter whilst perusing in a garden's myriad vistas should a visit be possible—and, should the garden be unaltered by the machinations of time and the demands of urban development and growth. The phenomenon of urban sprawl is not uncontainable, it is desired as a means of coping with the density of large cities and their burgeoning populations.

For the love Chen Congzhou exhibits in these writings, perhaps because of it, we understand that he was also aware of how gardens always were, as Craig Clunas describes at the beginning of this text, in essence "pieces of real estate." This sense is prescient today as those ancient gardens that continue to exist are preserved by contemporary hands and, increasingly, monetized in the name of modern tourism. Chen Congzhou laments the practice of renaming gardens and altering aspects of their content which disturbs the original aura of place with which they were imbued. He goes to great lengths to describe how the reorganisation of the form—such as the opening up of new gates, or the altering of pathways—impacts the flow of "beginning, development, transition and conclusion" upon which the design was conceived, and turning, in his view, that flow "upside down." That only lends greater import to the body of research and writings compiled here in the *Literati Gardens: Poetic Sentiment & Picturesque Allure*; the life-time work of a man from possibly the last generation in China to experience a traditional education schooled in the four classics, to have been afforded a university education and to have seen the gardens he describes in an almost original state. The preserving of these writings together in one volume achieves a fitting tribute to the life work of a man delightfully evoked in the words of Song Fansheng, professor of Zhejiang University, as the "only man in modern China who could make gardens and restore old ones with his own hands while writing books to appreciate and comment on Chinese gardens."

That the poetic language of the original writings is also preserved in the masterful translation presented here is to the credit of the team led by Professor Ling Yuan, an FLTRP senior translator whose painstaking work on rendering Chen Congzhou's texts available in elegant English echo the diligent efforts that the great garden designers expended to cultivate a traditional garden. The translation is nothing less than meticulous, and every effort has been made to retain the authentic aura of the original text with particular diligence brought to achieving the appropriate meter of the poetic verse

contained within and the descriptive names which apply. Like the gardens Chen Congzhou describes, the manifold writings in the *Literati Gardens* can be seen to overlap the boundaries of multiple intriguing "Chinese categories" and beautifully "illuminate the various borders they traverse."

前言

[历朝历代的园林]都是身价不菲的地产；与此同时，也是精心建造且富有美感的人类遗产。园林横亘于几类中国学科的交叉地带，烛照它们所跨越的边缘区域，并拥有为之一亮的艺术魅力。

人与土地之间的关系是最根本的。这种关系的产生早于社会的产生——早在对大自然的力量与丰饶有所了解之前，人类就为食物和蔽身之处而搜刮着土地——也早于园林这一现象的产生。人们在某地定居，因此社会得以演化，园林成为可能。随着时间的流逝，人类第一次有意识地建造住所，社会结构在人类聚群中更加牢固，社会差异随之而来，不可避免。某些群体发现了人与土地之间新的关系，由此产生我们现在所谓的“特权”。这就要求在土地满足人类纯粹的生存需求之余、用于其他目的之前，社会经济必须达到相当稳定的程度。因此当这一经济基础形成之时，由绵延不尽的大自然围合而来的园林之形也随之诞生，园林作为封地被拥有、随意让渡或改建。随着时间的推移，这些园林的私有、专属性越来越低，很快在几乎所有文化和地区都占据了一席之地。最早的园林可追溯到四千多年前的埃及。今天，我们甚至可以大胆地将园林描述为所有文化形态中最为民主、最受欢迎的一种形式。正如读者在本书中所读到的，

虽閭阎下户，亦饰小山盆岛为玩。

时至今日，对于园林的热衷略有减褪，究其原因，是由于当代生活节奏加快、内容繁多，不断侵蚀这些“閭阎下户”曾经拥有的闲暇时光以及赏识水准。

园林从文化层面上彻里彻外地体现了人与自然的关系；而对于拥有德国精神分析学之父西格蒙德·弗洛伊德之洞察力的近代人而言，这种关系还体现在精神层面上。不论哪个层面，可以说这一关系既体现了人类对大自然的控制欲望、对其千姿百态的崇敬心情，也寄托着人类加强大自然、本然体验大世界的真切理想。人类从来都是傲慢不逊的动物。作为人类有能力按自身意志塑造大自然的最终实证，神形兼备的园林称得上是人类文明的基石。从美索不达米亚到希腊、从罗马到欧洲与现代世界，有大量例证可循；阿拉伯、塞尔柱、古波斯、伊斯兰及欧亚大陆等

文明也概莫能外。这当中一条源远流长的纽带，也许要数中国的古典文化传统及其精湛的美学之间的联系了。这种美学，在创造世界名园的过程中产生了深情和动力。

中国园林起源于皇家苑囿和狩猎围场，但是从12世纪起，当园林作为私人庭园即富豪的专属领地问世时，其审美形式也更上一层楼。作为一种理念，园林“给士大夫提供了一种方式，至少在某种程度上，让他们得以自我陶冶，同时又能避尘嚣、隐自然”。

园林的故事总是以个人开场，几乎无一例外。这个“他”也许是精明的地主或社会名流，他们雇人出资兴建园林，或以其大名为园林命名。同样，也可能是一个设计师，园子因其设计而初具样式之美和情感魅力。12世纪以来，给中国文人士大夫提供修身之所，成为众多营造匠师的生计着落；他们不遗余力构园的业绩，本书足以见证。其中最突出的，当数17世纪的知名学者计成（1582—约1642），江苏吴江人氏。他营造了许多精致的园林，其中一些至今仍是这门艺术形式的最佳典范。

值得注意的是，计成的理念在其著作《园冶》（1631年完成）中得以留传后人，他的实际营造物在接下来的几百年中可随时随地供人评说。近代人认为，计成技艺的奇特之处在于，他的作品都完美地经受了时间的考验。他毕生从事的造园活动是一种艺术形式，有着丰富的文化联系，对有志于此的人而言，《园冶》有着不可估量的影响。20世纪的园艺巨擘陈从周身上就体现了这一影响，他勤勉而成的学术论著就囊入本书。

编者自谦，集子取名为《中国文人园林》，汇集了陈从周先生1979年至1982年在上海同济大学以及各种研讨会上的演讲笔录，还有他为校刊撰写的一系列文章。此外还包括他20世纪50年代末、60年代初直到90年代早期在博物馆通讯和学术期刊上发表的一系列文章。《中国文人园林》因此体现了严肃深入的园林史研究，遍及中国大地，提及园林的样式与内涵、造园者传记以及中国由来已久的精深造园史的特性。在这个国家独特的社会文化范围内，园林作为有意规制的避隐之所，从一开始就被赋予了“由建筑、山水、花木等组合而成的一个综合艺术品”的观念。园林圈围在一片实在的土地之内，为了与自然相应的乐趣而营造，优雅而有节奏。正如许多中国画所描绘的那样，画中人或参悟冥想，或肃立巨石之上，或栖身大树之下，或休憩凉亭之中，间或友朋为伴，但

常形单影只。置身其中的这些园林是一综合领域，游憩其间则心田澄静而粗野顿消。

自周朝（前1046—前256）始，设计师和园艺师花了两千多年时间才演化出理想园林审美观的整体概念，汲取了同时期其他艺术形式的审美情怀。审美观的形成肯定涉及各种试错实践，数量之多远超议论范围。陈从周的字里行间也提到植物从原生地移栽未果，抑或后人干预古旧园林的原有形制。可以说，自然里存在着无形的时间力量，造园师有着引导沉思冥想的访客进入景点的无形之手，二者互为补充。细心敏锐的访客一旦进入，便能从众多的场景中领会“构园神理”。

到了17世纪计成的年代，缘于这位大师的贡献，造园美学达到巅峰。对此，陈从周敏锐地指出：“这足以说明当地人民对自然的爱好。”他确认，计成的许多园林创意在苏州兴旺不衰，“苏州园林在今日保存者为数最多，且亦最完整。”那些基本的组成元素是最起码的要求；但在计成灵巧手下，园林的物理布局处处体现着和谐之美。这是通过一系列巧妙的过渡实现的，如使用亭子这类建筑形式进行贯穿连接等。这些过渡为人们提供了一个空间，能够停留、沉思、玩味轮廓及色彩变换中的季节更替。陈从周在1994年写道，“造园如缀文。”完美的园林与诗文和绘画如出一辙，他认为每一个这样的园林应该“蕴藉有余味”。这余味在计成之外许多造园家的作品中都得到了体现。很少有人能像陈从周那样有缘欣赏并仔细观察如此之多的园林，至少在近代史上如此。陈从周那些观察细致、描述详细的文章，结合起来就是对古建筑、园林和住宅的综合调查。即便是随意一瞥，人们也能看出陈从周的慧眼，他能注意到那些细节并详作解释。

如下例谈到在一些小园子里见到的桥：

对于古代园林中的桥常用一面阑干，很多人不解。此实仿自农村者。农村桥农民要挑担经过，如果两面用阑干，妨碍担行，如牵牛过桥，更感难行，因此农村之桥，无阑干则可，有栏亦多一面。后之造园者未明此理，即小桥亦两面高阑干，宛若夹弄，这未免“数典忘祖”了。

陈从周对园林的调查凸显其在观察、重建园林个性方面的浓厚兴趣。在他看来，每座园林“应该有那个地方的植物特色”，而且大多是为了表达某种蕴藉之意而设计。他在计成的著作里发现了各种具有启发性、创造性的例子。令陈从周为之欢欣的是，为保障设计的质感与深度，计成针对园林内部布局和工艺不惜运用多种元素与材料。在他讨论

的园林的各方面当中，历史语境在园林形式与审美的演变中不无影响。他的阐释非常仰仗于自身深厚的艺术造诣，以及各艺术门类与构园理念之间的演进关系。“……诗文、书画、戏曲，同是一种思想感情，用不同形式表现而已。”陈从周解释道：

士大夫可说皆为文人，敏诗善文，擅画能歌，其所造园无不出之同一意识，以雅为其主要表现手法了。园寓诗文，复再藻饰，有额有联，配以园记题咏，园与诗文合二为一。所以每当人进入中国园林，便有诗情画意之感，如果游者文化修养高，必然能吟出几句好诗来，画家也能画上几笔晚明清逸之笔的园景来。这些我想是每一个受过教育的游者所必然产生的情景，而其产生之由就是这个道理。

谈到与他所见证的园林成就更密切相关的一点，他写道：“……评园必究园史，更须熟悉当时之生活，方言之成理。园有一定之观赏路线，正如文章之有起承转合……”

这也是陈从周采纳遵循的一个过程。冗长描述中的细节之密，加之经年累月一访再访的结果，有时可能给文章增添了学究般平淡的气息，但是文中穿插提到的书画、昆曲、诗词等，都激发了读者的心绪：那是倘若一旦成行之时——且园林并未因时间的流逝、城市的发展而有所变化——在园林的无数景观中徜徉沉思，可能际遇的种种心绪。城市扩张只是一种手段，用以对治密集的都会及其日渐膨胀的人口，并非无法控制。

陈从周在这些文章中所展现出的热爱之情，也许正由于此，我们知道他也意识到了园林始终在本质上——正如柯律格在本文开篇处描述的那样——是“地产”。这一见识在今天是先见之明，因为现存的古园林正是经由当代之手得以保存下来，并正以现代旅游的名义搞得越来越商业化。园林改名换姓，部分内涵不复原貌，陈从周哀叹不已，这都破坏了园林本身的氛围。他不厌其烦地描述形式的改变——开启新大门或改变步道——在他眼中是如何影响、“颠倒”了构园中“起承转合”的自然流畅。这就使得编入此书中的研究与文章越发重要了。这是他毕生的结晶，而他可能是中国最后一代于私塾治四书、接受大学教育，并得以一睹“原”林风采的学者。浙江大学的宋凡圣教授称陈从周先生为“现当代既能亲自动手造园、复园，又能亲自著书立说、品评论述中国园林的第一人”。这部汇编作品便是对他一生工作的礼赞。

中文原著诗般的语言，在本书高超的翻译中也得以延续，这归功于外研社资深翻译凌原教授带领的团队。他努力将陈从周的作品以优雅的

英文呈现在读者面前，这种努力与伟大的造园师营造传统园林时煞费苦心是和声共振的。翻译细致有加，尽力保留原作风韵，尤其为了再现其中诗行音步以及园林名称的文学历史渊源而不懈努力。正如陈从周描绘的那些园林，这本《中国文人园林》中的篇章也可看作是巧妙融合了若干的“中国元素”，洵美且异地“烛照它们所跨越的边缘区域”。

NOTES FROM THE TRANSLATOR

The traditional Chinese gardens are known as "literati gardens." Originated in the cultural heritages of the Ming and Qing dynasties (1368-1911), they were owned, designed and built by scholar-officials, men of letters, painters or garden-makers who excelled in prose, poetry, painting, calligraphy, opera and shared the desire to shun the turmoil of the mundane world by returning to nature. According to Chen Congzhou, the literati gardens are conceived in literature, and their names are spread through literature as well. In this mutually supplementary relationship, the gardens are tangible embodiments of literature, and literature finds tangible expression in gardens.

This bilingual *Literati Gardens: Poetic Sentiments and Picturesque Allure* features by far the largest translation of the late Tongji University professor's writings on gardens. As Chen Congzhou worked for much of his lifetime as a teacher, prose writer, painter and garden-maker in the literati tradition of the Ming and Qing dynasties, it is safe to say the Chinese text of this book is written by a modern-time literatus on literati gardens. In the sixteen articles featured in Section I, "Gardens Wrought in Spitten Images of Nature," Chen Congzhou turns himself into a scholarly tour guide to share his "everyday joy of rambling gardens" by showing his readers around some of the nation's best literati gardens. He ushers them into one fascinating scenery after another in deep recesses or along a serpentine stream or roofed walkway, and reels off one anecdote after another about people, history or events off his finger-tips, but all the while he does not forget to introduce garden-making precepts and technicalities such as siting, layout, view borrowing, in-situ and in-motion viewing. Section II, "Garden-Making Precepts and Aesthetic," begins with "On Gardens," a five-installment discourse that establishes him as the patriarch of

gardens of 20th-century China and the legitimate heir to the mantles of Ji Cheng (1582-c. 1642), the 17th-century Chinese garden-maker whose *The Craft of Gardens* is the world's first ever garden-making manual. However, insofar as accomplishments are concerned, Chen considerably overshadows his predecessor. This is proved not only in "On Gardens," whose coverage is already broader and profounder than *The Craft of Gardens*, but also in his seven other essays presented in Section II, in which he goes beyond garden-making *per se* to delineate the intricate ties of the literati gardens with classical Chinese poetry and prose, traditional Chinese painting and calligraphy, Kunqu Opera, and dwellers' everyday life.

Between the pages of this Chinese-English edition, he introduces hundreds of gardens and scenic views in detail or in passing, quotes more than one hundred works of literature, and cites even more literati-officials, writers, painters, garden crafters and owners. With such wealth of information and the author's compelling and exquisite narrative, it is hoped that the *Literati Gardens* will provide garden experts and students with a valuable textbook on all aspects of the legendary craft of Chinese gardens. As to our general Chinese or English readers, even if you are cocooned alone in your tiny room, with this book in hand you can still have the fun to traverse some of the nation's best gardens with exuberant flowers and bushes, limpid waters and ethereal mountains, and to ponder the poetic implications and picturesque charms of rosy clouds framing emerald pavilions, threads of rain and petals borne on a breeze, and gilded pleasure boats in waves of mist.

Chen Congzhou's success as an ingenious polymath in Chinese culture originated in his well-disciplined upbringing. He kowtowed to a portrait of Confucius in a traditional illiteracy-breaking ceremony to begin learning to read and write when he turned five, and, at seven, was sent to a small private school where he memorized classic texts in the morning and exercised calligraphy in the afternoon, with a class set aside every four days to make sentences. The studies went without

letup all year long, and he must fluently recite all the texts he had been taught over the past twelve months before he could enjoy Spring Festival celebrations. When he turned eight, his newly widowed mother increased his workload by having him practice calligraphy from a copybook in the morning and keep family accounts using traditional Chinese numerical symbols¹ at night. He recalls in a short memoir, "A Man's Soliloquy Beside Bookshelves"²:

Life was boring and lonesome all those years, and my private teacher's sense of responsibility was stringent to the utmost, but it was exactly in those years that I acquired the basic skills in calligraphy and learning by heart, among other things.

After he was enrolled in a church-run primary school as a third-year grader at age ten, his mother put him under the tutelage of an uncle on her side for after-school education in such classics as *The Finest of Ancient Prose*, *Children's Treasury of Knowledge* and *Three Hundreds of Tang Poems*, all of which he smoothly committed to memory. He says,

What was required of the school children of my age was to learn by rote all the books you could lay your hand on, practice calligraphy with a writing brush, and nothing else. It may sound primitive nowadays to ask someone to memorize all the classic texts, but looking back, it beats all the sophisticated things like computers and audiovisual devices, because all the knowledge I acquired through such training can never be disowned, and because I, with time, could fathom out what was said in the books and put them at my fingertips, which means I could retrieve them from my mind and put them to use without the aid of reference books or such gadgets as photocopiers. Learning by rote is one of the many things in this world that appear to be stupid but are actually rather smart.

Rigorous school and family training and self-study helped cultivate a photographic memory in him. Apart from the classroom book knowledge he had memorized, he also remembered every morsel of culture or folkways that came casually to his attention, including couplets, inscribed steles and name boards, and street scenes, as well as tidbits and anecdotes overheard from elders' chitchats over a cup of wine or tea. According to him,

I know how to use my brain like a data bank, in which all my knowledge is

systematically categorized, so that all the new things I have learned can be put where they belong in my mind for easy retrieval.

His well-developed memory made his studies so much easier and enjoyable, and it also kindled an unquenchable thirst to learn more. As a young boy he learned to paint, mount and repair paintings, grow grass and flowers, and build mini-landscapes. He availed himself with every opportunity to learn how houses were built from the treatment of timber to the installation of beams and rafters, and how rocks were selected and piled up to become rockery or mountain. All the knowledge and expertise accumulated year in, year out replenished the easily retrievable stock of encyclopedic knowhow in his mind.

In his youth he loved to visit his mentors in their homes, so that he could see their manuscripts and book collections, and learn things that could not be learned in the classroom. In the course of it, he fostered a modest attitude toward teachers. Some of them might be hot-tempered and given to scolding people, but he never minded:

The sterner the teacher's countenance turns, the more obedient the student should be, because they love teaching and are so pleasant and affable when they talk, offering extremely valuable things derived from their lives' experience. When they hit the nail on the head, you see the light right away.

Without an obedient attitude, he adds, "How can you find favor with your teacher?" Such modesty won him the mentoring of the right man at the right time throughout his formative years. The foremost scholar in classical Chinese architecture Liang Sicheng (1901-1972), for example, voluntarily became his mentor and close friend despite their age gap because of his modesty and the fact that he could recite the seemingly onerous text of the professor's *Annotated Treatise on Architectural Methods* from cover to cover.

His strict training in literature and art culminated in excellence in multiple fields. When he was a junior high student he was already contributing to local newspapers and journals with writings on local history, folkways, anecdotes, handicrafts, fauna and flora, etc., to the great emolument of his teachers. He published an article about his favorite poetess Li Qingzhao (1084-1155), "A Chronology of Li

Qingzhao and Husband" at age twenty-two, and *A Chronology of the Life of Xu Zhimo* (1889-1931) nine years later, which remains a crucial reference source for studies of the prominent modern Chinese poet. After graduating from Hangchow University with a bachelor's degree, a multi-talented Chen taught Chinese, history, geography, drawing, and biography as a high school teacher, and art history, education, aesthetics, and poetry as a junior college teacher. When he turned thirty, he held his first personal retrospective of figure, landscape and floral paintings in Shanghai as a fledgling ink and wash painter. By the time he became a Tongji University professor in classical Chinese architecture and gardens, he was already an accomplished essayist, prose-writer, poet, and painter, a calligrapher whose inscriptions graced many gardens and buildings around the country, a self-styled "carpenter" and ink-slab carver, and the first man to connect garden aesthetic with Kunqu Opera librettos, among other things.

It was literature that ushered Chen Congzhou into studies of literati gardens and classical architecture and turned him into the all-important practitioner and theoretician in both fields. He says in a June 1984 sketch, "Miscellaneous Recollections by a Table Lamp":

As I recollect today, I was fond of reading the lyrical poems of Li Qingzhao, who drew my attention to her father Li Gefe (c. 1045-c. 1105) and his book, *A Record of the Celebrated Gardens in Luoyang*. The venerated Li thus became my first teacher in the studies of gardens. In that book he taught me how to appreciate gardens and talk about them, but more importantly, it was his literary talent and grace that deepened my passion for gardens. Because his *Record* mentioned the *Classic of Architectural Carpentry*³, I came to know the *Treatise on Architectural Methods*, which became my major textbook on architecture. When I had trouble understanding the *Treatise*, I looked around and got hold of *A Compendium of Architectural Methods* and interpretative articles written by scholars of the older generation, which turned me into a self-educated student in this field. Later, I joined these scholars and adopted architecture as my career for the rest of my teaching career. No one could have imagined that my humble achievements in traditional architecture and gardens should be owed to Li Qingzhao. This sounds so incredible, but that's what really happened to me.

Obviously from this crucial switch in his career, 20th-century China gained her foremost scholar capable of interpreting literati garden-making precepts and aesthetics in terms of literature and art, and making gardens with his own hands. This is amply reflected in the *Literati Gardens: Poetic Sentiments & Picturesque Allure*, a book with a simple theme but complex topics. Its narrative is paced by the author's lucid and elegant prose belonging in a semi-vernacular, semi-classical school that puts him on a par with such eminent essayists and prose masters as Li Gefei, Zhang Dai (1597-1689), Yuan Mei (1716-1797) and Li Dou (1749-1817). Relying solely on the comprehensive data he had memorized, he apparently finished writing every essay at one sweep, without so much as a halt to look up references. As a result, his Chinese writings are sparsely annotated, with the few available footnotes looking more like his afterthoughts than interpretations, and in these writings, so many prose passages and poems are quoted without mentioning their titles and authors, and virtually all the ancients and his contemporary friends are addressed by their sobriquets or style names. In all, Chen Congzhou's classical garden literature makes pleasant and intellectual reading for well-read Chinese readers who either can take the "missing parts" for granted or simply do not want their enjoyment of his limpid prose impeded by what they may see as so many frivolous things.

As much as I enjoyed reading Congzhou's prose as a translator, I could not afford to ignore these things when I was entrusted to produce a bilingual book of sinology for international readers by matching his Chinese texts with English renditions I was supposed to deliver. If all those "frivolous things" were not properly addressed in English along with so many historical and literary allusions, professional parlance and technical terms, our English readers unfamiliar with the Chinese culture might be hard put to make sense of the book.

For this reason, we took pains in researching the Chinese texts while translating them into English. A wealth of "invisible"

information "surfaced" in the process, including 140 titles of literary works and 197 personal names. The simplest sort of information thus found, such as a quoted poem's title or an author's name, is blended into the flow of the English narrative as far as possible. While all the style names and sobriquets are retained in the Chinese text, they are replaced with formal names in the English text as per a sinology stylebook, but we make a point of attaching the style name or sobriquet where a formal name is annotated in a footnote. The names of people, gardens, scenic attractions, terminologies, and so on are also categorized in the Glossary's four columns. The lion's share of our research findings, however, are represented in 260 English footnotes we have written. Chen Congzhou's twenty original footnotes, including four stripped from relevant original texts for succinctness's sake and eight unusually long ones that are highly informative and of stellar literary value, are also rendered into English and attributed to his name.

In the days and months in which we were immersed in this task of research-based translation, we were increasingly fascinated by the garden and scenery names that kept popping into our eyes. We pondered their literary and poetic meanings and undertones and cultural roots, and replaced some long-standing *pinyin* names that mean little to foreign readers with our English translations, such as "Shanjuan's Hermitage Cave" for Shanjuan Cave, "Solace-Imbued Garden" for Jichang Garden, "Gratification Garden" for Yuyuan Garden, Mountain-Level Hall for Pingshan Hall, each having a footnote attached to explain the reason. We have also found some long established English names of gardens and scenery inappropriate, including the very popular "Cloud-Dispelling Hall" for 排云殿 in the Summer Palace, which should be "Hall of Immortals Lining Up in Clouds." We have no intention to shake up all the available English translations of Chinese literati garden names, some of which are well-established and have even made the UNESCO world heritage list, even though we are doubtful about their correctness. We offer our English

versions with a desire to return the Chinese names of gardens and famous scenery to their cultural origins, and to help English-speaking readers appreciate their rich, profound, and oftentimes poetic and picturesque implications.

While preparing Chen Congzhou's original Chinese texts to match our English translations for this bilingual book, my colleague and co-translator Zhong Zhilan amended quite a few typos, missing words and other mistakes that were unavoidable given the fact that these originals had been repeatedly typeset for different books by different publishers, and that the author habitually committed information from his memory to paper without looking up references. For example, he attributed two quotations in "On Gardens 4" to the same article "Record of the Estate of Suburban Delights" by Wang Shimin (1592-1680), but the second one is actually originated in Wang Baoren's *Chronicle of the Respected Flagbearer*. In another example, Chen's quotation from Wang Yuanqi in "On Gardens 5" puts it as "study its concept, strengths and drawbacks....," but the correct version reads, "study its concept and its composition, its discrepancies, strengths and drawbacks...." These and other oversights we have addressed in the current Chinese text and rendered into English accordingly. In between the copy-editing work, she also contributed her excellent English translation of the second longest, book-sized "Suzhou Gardens: An Overview"⁴ and her classical-style Chinese translation of the "Notes from the Translator" while researching and proofreading every piece of my English texts, and working as copy editor, liaison, and Yangzhou gardens investigator; she also translated the articles of "Qiao's Garden, Taizhou" and "A Note on Rebuilding Water-Inked Garden." Three other young colleagues also contributed to the book. Ren Xiaomei offered her meticulously annotated English translation "Shen's Garden, Vernal Waves Bridge, Shaoxing" and her exquisite prose translation of the English Preface written by Karen Smith; Duan Huixiang translated "Summer Palace, Beijing," and Qian Jingyu did the "South-and-North Lakes."

The success or failure of the *Literati Gardens: Poetic Sentiment & Picturesque Allure* hinges on if the host of quoted classical poetic lines and prose passages in Chen Congzhou's narrative have been translated into proper English. We translated the lion's share of them on our own and enjoyed doing it very much, as we regarded them as the most meaningful and challenging part of the entire translation project. But at the same time we have also quoted from the peerless works by some of the world's elite translators, including James Legge's *Book of Poetry*, *The Four Books*, and *The Yi King*; Yang Xianyi and Gladys Yang's *A Dream of Red Mansions* and David Hawkes' *The Story of the Stone: a Chinese Novel*; Cyril Birch's *The Peony Pavilion*; Leonard Pratt and Chiang Su-Hui's *Six Records of a Floating Life*; Alison Hardie's *The Craft of Gardens*; and Yang Xiaoshan's *A Record of the Celebrated Gardens of Luoyang*. (For a full list of the translated works we have quoted, adapted or consulted in this book, see "Bibliography.")

Before this book comes off the press, we would like to take the opportunity to thank the late professor's elder daughter Chen Shengwu for permitting us to publish this book, providing copies of her father's precious pictures and paintings, and taking time from her busy schedule to check up and replenish the "Chen Congzhou Timeline" we have compiled for this book; Yue Feng, last student of the late professor and author of the book *Chen Congzhou's Life*, for supplying the photo of the Astor Court on the cover of this book; Su Meijuan for correcting some of the mistakes in the original text; Wang Weiqiang for supplying a photo of the Gratification Garden; as well as Wang Shuaishuai and Yao Wu for supplying photos of the Summer Palace from their respective repositories. Our thanks also go to professor Han Feng with Tongji University, without whose advice we could not have presented the essays in such a logical and sensible order.

I am deeply indebted to Cheng Zhaojun of the Yangzhou Municipal Development and Reform Committee, and Zhao Yulong of the Municipal Garden and Forestry Administrative Bureau, for hosting my visit to Yangzhou and sponsoring a forum on Chen Congzhou's

"Yangzhou Gardens and Dwellings" during Beijing's November 2014 APEC holiday; to Xu Shaofei for contributing vital corrections to this essay's original text at the forum and his appendix "Yangzhou Gardens Today."

It is my hope that this bilingual *Literati Gardens: Poetic Sentiment & Picturesque Allure* that we have managed to put on the table in the wake of twenty months of toil will do justice to the late professor's state-of-the-art garden prose and verse and live up to our Chinese and foreign readers' expectations.

译者絮语

中国古典园林实为“文人园”。士大夫、文人、画家或造园家秉承明清文化传统，设计、建造、拥有文人园。他们敏诗善文，能写会画，兼工戏曲，皆欲避喧嚣以归自然。正如陈从周先生所言，园之筑出于文思，园之存，赖文以传；相辅相成，互为促进，园实文，文实园，两者无二致也。

《中国文人园林》是一部汉英对照作品，也是迄今为止，这位同济大学教授园林著作中最大体量的译作。陈先生是教师、作家、画家，毕生投身于明清传统的造园事业。可以说本书的汉语就是当代文人写的文人园。书中第一部分“虽由人作，宛自天开”由十六篇文章组成，先生变身儒雅的导游，带读者游园赏景，分享他的日涉之趣。他引领读者或探寻幽深之处，或信步曲折水岸游廊，领略不同风景，一路走来逸闻趣事信手拈来，同时还不忘介绍选址、布局、借景、静观、动观等造园原则和技术细节。第二部分“造园准则与美学”以《说园》五篇连载开篇，奠定了他20世纪中国园林大家的地位。他继承了明朝计成的衣钵，计氏的《园冶》是世界上首部造园著作，他则青出于蓝而胜于蓝。《说园》五篇的内容比《园冶》更加广泛深入；第二部分收录的其他七篇文章更是超越了造园本身，讲述了文人园与中国诗文、绘画、书法、戏曲和居住者日常生活的微妙联系。

据统计，此书详述和提及的园林、景点有几百个，引用古典文学、诗词散文作品百余处，涉及的士大夫、作家、画家、造园家或园林主人更是数不胜数。如此丰富的信息，加之作者引人入胜的文笔，希望本书能使专家和普通读者得以管窥中国园林造园的方方面面。读者即便身处斗室，一卷在手，亦可神游名园，嗅花香临清池品假山，体会云霞翠轩、雨丝风片、烟波画船的诗情画意。

陈从周先生的博学多才源于良好的教育背景。他五岁向孔夫子叩头破蒙，七岁进私塾，从早到晚就是读书背书，午后习字，隔三天要学造句。寒暑不辍，到年终要背年书，就是将一年所读的书全部背出来才可放年学。八岁丧父，母亲要他清晨临帖习字，每晚灯下记账。他在《书边人语》里回忆：

当时的生活是枯寂的，然而塾师对学生的责任感是强的，真是一丝不苟，我背书与写字的功夫，基础是这时打下的。

十岁那年上教会小学，插入三年级。母亲将他托付给老姑丈，放学后读古文，《古文观止》《幼学琼林》《唐诗三百首》等，统统要背。他写道：

当时孩子的读书任务，说得简单点，就是背书、写字。看来似乎是原始，但今天看来，比电脑、录音机、录像机等都先进，因为通过这样的训练，知识都为我所有了，什么办法也拿不走。所以我后来能逐渐领会书中内容，又能不需检书而信手拈来，也不用仪器来画字，用复印机来代替抄书，我自己掌握了主动权。天下有许多事看来似乎是愚蠢，但反过来又觉得是先进。

通过学校、家里的训练以及自修，他练就了惊人的记忆力。除去背书，门联、字屏、匾额、街景以及父老茶余酒后的清谈，一方的乡土历史知识也背得一字不差。他说：

我懂得利用脑瓜子这个仓库，分门别类，迅速归档。

博闻强记，学起来轻松愉快，也激发了他更大的学习兴趣。他从小就学画画、裱画、艺花，把玩小盆景；喜欢看建屋造园，从断木到架梁，从选石到叠山。如此经年累月，获得的知识技能极大扩充了他的信息储备。

学生时代他常去老师家中，看老师的藏书手稿，学习课堂中得不到的东西。在此过程中形成了事师必谨的态度。有些老师还有点脾气，但他毫不介意。

色愈厉而礼愈恭，人家还是乐于教导的，娓娓清谈，其中真有极宝贵的东西，都是他一生总结下的经验。一语道破，豁然开朗。

他说，没有谦恭的态度，“又如何能得到前辈的垂青呢？”这一美德每每给他在恰当的时候赢得恰当的老师。因他心诚，并能逐页背诵中国建翹楚梁思成的《营造法式注释》，梁就主动收他为徒，二人谊兼师友。

他在文学艺术领域获得了极高的成就。早在初中时就开始投稿，写些传闻掌故、花鸟工艺之类的文章，赢得老师好评。喜读李清照词，二十二岁就完成了《李易安夫妇事迹系年》；九年后发表的《徐志摩年谱》，至今仍是研究徐志摩的宝贵资料。之江大学毕业后，他在中学里教语文、史地、图画、生物，在大专院校教美术史、教育史、美学、诗选。三十岁举办首场个人画展，以人物、山水、花鸟画蜚声沪上。同济大学聘其为教授，教授古建筑和园林。他还写文章，作诗绘画，习字，

给园林、建筑题词，做木工，制砚，并首先将园林美与戏曲美联系起来。

文学为陈从周打开了文人园和古建筑的大门，成就了这位理论家和践行者。他在1984年的《灯边杂忆》写道：

今天回忆起来，我因喜读李清照的词，进而读了她父亲李格非的《洛阳名园记》。这位李老太爷还是我研究园林的启蒙老师，他不但教导了我怎样品园，怎样述园，而最重要的，他的文采使我加深了钟情于园。因为文章中提到《木经》，因《木经》知道了《营造法式》，找到了《营造法式》，我的大建筑课本有了，但是看不懂。我再寻着了《中国营造学社汇刊》，我们古建筑的老一辈的文章，有了说解，使我开始成为一个私淑弟子。后来又进入了他们的行列，终于成为我终生事业。谁也料不到我今天在古建筑与园林上的一点微小成就，这笔功劳贼还要算到李清照身上，似乎太令人费解了，然而事实就是这样。

显然，他这次事业转型，使20世纪的中国得以产生了一位园林大家，善用古典的文学语言阐述文人园的准则、美学并亲手造园，这一切在这本汉英对照的《中国文人园林》中得到充分体现。本书主题简明，话题丰富，行文半文半白，可与李格非、张岱、袁枚、李斗的文字相媲美。他凭着过人的记忆力，笔不停歇，一气呵成；很少作注释，仅有的几条也不像当时批注，更似事后所为。他旁征博引，无暇提及引文题目、作者信息等，对古人和同代好友皆以字号呼之。总体来讲，古文基础较好的读者能踏上愉快的阅读之旅，增广见闻。对于“未点明的部分”，他们或认为理所应当，或不愿顺畅的阅读为此类琐碎而打断。

作为译者，我也很喜欢读他的文章；但接受了翻译任务，要给中外读者奉上尽量与原作相应的英文，就不能忽视上述省却的文字。若这些“琐碎”、历史文学掌故，术语在英文中没有体现，对中国文化生疏的英语读者难免感到艰深。

为此，我们一边翻译一边调研原文，不敢懈怠。大量“无形的”信息由此浮出水面，包括140部文学作品的题目和197个人名。其中简练的信息，如所引诗文题目或作者大名，尽量糅入英语行文。文中人物都以字号称呼，在英文里则一律替换为正名，并于注释内附上相关字号。附录中罗列了人名、园林名、景点名称、术语等信息，数百个英文脚注更是译者多方调研的成果。陈从周先生原作有二十条脚注，带有“从周案”字样，均以汉英对照形式出现，其中四条是为行文简便从文中挑出者；另有八条尤长，内容充实，兼具文采。

沉浸在翻译的日日夜夜，我们对书中琳琅满目的园林、景点名称所

蕴含的文情诗意、文化渊源日渐着迷。这样，我们就有机会把充斥坊间的那些外国读者不知所云的拼音名字替换为得体的英文名称，并做注说明如此翻译的原因，如：Shanjuan Cave（善卷洞）为Shanjuan's Hermitage Cave；Jichang Garden（寄畅园）为Solace-Imbued Garden；Yuyuan Garden（豫园）为Gratification Garden；Pingshan Hall（平山堂）为Mountain Level Hall。同时我们还发现有些流传已久的译名并不确切，例如颐和园的排云殿应是Palace of Immortals Lining Up in Clouds，而不是Cloud-Dispelling Palace。现有的译名——有些甚至已经登上联合国教科文组织的世界遗产名录——尽管对其准确性持有异议，我们并无意颠覆它们，只希望在我们亲手生成的译文中，让这些名称回归各自的历史和文化原点，帮助英语读者欣赏它们背后无限的诗情画意。

在中文编辑工作中，我的同事仲志兰对原稿中的打印差错、错字漏字和其他纰漏进行了修订、弥补。这些文章经由不同出版社重复排印，加之作者下笔立就不查资料，纰漏在所难免。如《说园（四）》中的两条引语，陈从周称都引自王时敏的《乐郊园记》，实际上第二条源自王宝仁编撰的《奉常公年谱》。再如《说园（五）》引用王原祁的文章作“视其定意若何，偏正若何……”，应为“视其定意若何，结构若何，出入若何，偏正若何……”她发现的此类疏忽都在汉语中加以更正，并译成相应英文。在忙碌的编务工作之外，她承担了《苏州园林概述》的英译任务，这是本书第二长篇幅的文章，曾单独成书出版；翻译了《泰州乔园》和《重修水绘园记》；还将我的《译者絮语》英文稿译成汉语，对全部英译文进行调研、编校，并联络调查扬州园林的工作。感谢其他三位年轻同事，任小玫详细注释翻译了《绍兴的沈园与春波桥》，并将凯伦·史密斯的英文前言译成典雅的汉语；段会香翻译了《颐和园》一文；钱静雨翻译了《南北湖》一文。

本书的成败在于是否能将原作征引的大量诗文译成准确的英语。这是此次翻译任务中最有意义、最具挑战的一部分。我们自己翻译了大部分并乐享其中，同时也引用了世界顶级译者的译作以增添风采，包括理雅各的《诗经》《四书》《易经》；杨宪益、戴乃迭的《红楼梦》，霍克斯的《石头记》，白芝的《牡丹亭》，白伦和江素惠的《浮生六记》，艾丽森·哈迪的《园冶》，杨晓山的《洛阳名园记》等。（参考、改写或引用的资料，请详见附录《参考书目》。）

付梓之际，衷心感谢陈教授长女陈胜吾女士同意出版此书，提供数幅珍贵照片画作，并拨冗核实我们编译的《陈从周生平》的有关信息。感谢先生关门弟子、《陈从周传》的作者乐峰老师提供封面明轩照片。感谢苏美娟女士对中文原文错讹之处加以订正。感谢王伟强提供豫园照片。感谢王帅帅、姚武提供颐和园相关照片。感谢同济大学韩锋教授对我们的目录提出修改建议，将所选文章以这样一个有逻辑的顺序呈现给大家。

在此也向扬州发改委主任程兆君和扬州园林局长赵御龙致以诚挚的谢意。2014年北京APEC假期之时，我去扬州考察，他们二位亲自接待并组织了陈从周《扬州园林与住宅》研讨会。感谢许少飞先生在会上对该篇原文的错讹之处加以修正。

此书耗时近两载，希望能还原陈先生精美的原文韵味，不辜负中外读者的厚望。

**PART ONE Gardens Wrought in
Spitten Images of Heaven**
第一部分 虽由人作，宛自天开

SUZHOU GARDENS: AN OVERVIEW

Architectural History Panel, Tongji University, October 1956

Translated by Zhong Zhilan

·(I)

From a historian's point of view, the Chinese garden takes its earliest forms as *you* and *yuan* in remote antiquity, and *yuan* as recorded in *A Study of the Han Institutions* by Wang Yinglin (1223-1296)¹. According to *Interpreting and Dissecting the Chinese Characters*, a dictionary of the Eastern Han (25-220) in the second century,

You is a *yuan* behind an enclosure wall. Some argue that a *you* is where poultry and animals are kept. *Pu* is where vegetables are grown, *yuan* is where fruit trees are planted, and *yuan* is where animals are kept.

And people are assigned to run these gardens, according to *The Rites of Zhou*,

"Offices of Heaven" (Greater Minister): ... of the nine professions that employ people, the second one is gardening, which entails cultivating grass and trees.

"Offices of Earth" (The Person in Charge of "You"): ... The person in charge of a *you* patrols and herds all the animals.

"Offices of Earth" (The Master of Loads): ... the vacant land between the inner and outer city walls is used as threshing ground.

Thus the differences between these three Chinese characters are clarified.

From *Zhuangzi* we learn that in remote antiquity Xiwei² had his *you* and the Yellow Emperor (2717-2599 BC)³ his *pu*, which may be deemed predecessors of these two kinds of gardens. The *yuan* and *you* were fenced off as a hunting ground during the first three Chinese dynasties—Xia (2070-1600 BC), Shang (1600-1046 BC) and Zhou (1046-256 BC). According to *Mencius*, King Wen of Zhou (1152-1050 BC)⁴ had a *you* 70 square *li* wide, with entrance permission granted to

grass collectors, faggot cutters, and catchers of pheasants and hares.

From the Qin (221-206 BC) and the Han (206 BC-220 AD) onward, gardens were gradually turned into feudal monarchs' pleasure grounds, where elaborately appointed buildings were erected for this purpose. Some became very large, according to historic records. The Epang Palace of Qinshihuang (259-210 BC)⁵, for example, covered an area of 300 *li* on the Wei River in Xianyang, the capital of the Qin near present-day Xi'an. In comparable sizes were the sprawling Shanglin Park of Emperor Wu of Han (156-87 BC)⁶ with the Grand Fluid Pond to the north of the Jianzhang Palace on its premises, and the Sweet Springs Park in Chang'an, the Han capital in present-day Xi'an. Prince Xiao of Liang (?-144 BC)⁷ made Chinese garden history with the first ever-known rockeries piled up in his Hare Garden in present-day Shangqiu, Henan province. Emperor Wen of Wei (187-226)⁸ had his Fragrant Forest Garden in Luoyang, the same city where Emperor Yang of Sui (569-618)⁹ built his Western Park some four centuries later. Emperor Yizong of Tang (828-873)¹⁰ decorated his gardens with trees and rock formations. The Northeast Mount Garden, in the possession of Emperor Huizong of Northern Song (1082-1135)¹¹ in present-day Kaifeng, is the most elaborately documented in history books.

After the imperial court of the Northern Song moved south and settled down in Lin'an (present-day Hangzhou),¹² new gardens mushroomed there, including the Jade Ford Garden, the Prospects Assembly Garden, and the Fragrance Collection Garden. In presentday Beijing, Kublai Khan of Yuan (1215-1294)¹³ had the Grand Fluid Pond dug and dredged at the Longevity Hill, which was called "Jade Flowery Islet" during the Liao (907-1125) and the Jin. In addition to inheriting the former ones, more gardens were built from the Ming (1368—1644) down to the Qing (1616—1911), such as the Western Park, the Southern Park, as well as the Unimpeded Spring Garden, the Limpid Ripples Garden, and the Garden of Perfect Splendor in the western suburbs of Beijing.

Descriptions of private gardens also abound in historical records. For example, Yuan Guanghan, a well-heeled man from Maoling in present-day Xingping county, Shaanxi, had a garden constructed at the foot of the Beimang Mountain north of Luoyang during the reign of Emperor Wu of Han. In his garden, which ran east-west for four *li* and north-south for five *li*, stones were arranged into rockeries and a variety of poultry and animals raised. Liang Ji (?-159)¹⁴ defined gardens within a circumference of several thousand *li* that bordered on Hongnong in the west, Yingyang in the east, Luyang in the south, and Heqi in the north. The garden of Zhang Lun (*fl.* 5th century)¹⁵ featured a rockery known as "Scenic Sun Mountain" against a background in close imitation of nature. These examples show that the Chinese craft of gardens had come a long way by that time. In addition, Ru Hao (*fl.* 5th century), a man from south of the Yangtze who served in the Northern Wei (386-534) court earlier than Zhang Lun, quarried fine rocks from the Beimang and Southern mountains to build the Flowery Forest Garden¹⁶, in which stately lofts and pavilions were erected in keeping with the line of the land, and bubbling spring water was channelled in to keep flowers irrigated in an attempt to match the craft of gardens with natural landscape.

No episode in Chinese history has seen more wars than the period that encompassed the Wei, the Jin and the Southern and Northern Dynasties. However, it was also one in which pivotal changes took place in the annals of the Chinese thought while Buddhism thrived more than ever. Everyday apparels and food, easygoing "pure conversations" on lofty and non-mundane matters, and mental cultivation through worshipping the Buddha were all the rage among scholar-officials of the time. Living in cities, they pined for wooded mountains where they could forget all worldly engagements. As a result, literary works in eulogy of nature emerged along with landscape painting; in the field of architecture, landscape gardens began to appear right beside their residences. Shi Chong (249-300)¹⁷ built his Garden of Golden Valley in Luoyang with the intention to

"shun the hustle and bustle of the world" and "invest passion in enjoyment of nature," as he professed in his "Preface to 'Longing to Return.'" His intention is echoed in the *Book of Liang* ("Biography of Xiao Tong"), in "A Letter of Admonitions to My Son Xu Song" by Xu Mian (466-535)¹⁸, and in the "Small Garden Rhapsody" by Yu Xin (513-581)¹⁹. The gardens built during the Tang, such as the Lantian Villa of Song Zhiwen (c. 656-712)²⁰, the Wangchuan Villa of Wang Wei (706-761)²¹, and the Pingquan Villa of Li Deyu (787-850)²² were invariably graced with picturesque bamboo islets, sunken parterres, and pellucid brooks. In these villas, man-made scenes are easily mistaken for natural ones. Of all these gardens of the Tang, the Thatched Hut of Bai Juyi (772-846)²³, Li Deyu's contemporary, stands out by taking advantage of natural landscape through ingenious view-borrowing techniques. The accounts in *A Record of the Celebrated Gardens of Luoyang* by Li Gefei (c. 1045-c. 1105)²⁴ of the Northern Song about the Garden of Duke Fu of Zheng²⁵ and other private gardens from the Sui and the Tang down to his day, and the presentations in "Records of Gardens in Wuxing" by Zhou Mi (1232-1298)²⁶ of the Southern Song (1127-1279) of Minister Shen's Garden and other gardens in his time, are so factual that they tally with what we can see in gardens seven centuries later today.

Far more gardens were built during the Ming-Qing years than the total made in previous dynasties. There were, to name just a few, the Ladle-of-Water Garden²⁷ and the Water-Brimmed Garden²⁸ in Beijing; the Mountain-Water-Willow Shadows' Garden, the Nine Peaks Garden and the Geyuan's Garden in Yangzhou; the Billow-Tranquilizing Garden in Haining; the Small Sky Garden in Hangzhou; as well as the Eastern Garden among those described in Wang Shizhen's²⁹ "A Tour of Gardens in Jinling" of the Ming period.

Fortunately, quite a few gardens listed in those writings are still there today, including the Gao Yu Garden³⁰ in Hangzhou, the Obedience-to-Parents Garden, the Congenial Garden and the Small Lotus Village Garden in Nanxun, the Gratification Garden in Shanghai,

the Homecoming Swallow Garden in Changshu, the Ancient Garden of Lush Bamboos in Nanxiang and the Solace-Imbued Garden in Wuxi. However, no place in the world beats Suzhou in the number of surviving ancient gardens.

Now let us have a look at the historical rise and fall of Suzhou gardens.

·(II)

Suzhou got a fine head start in political, economic, and cultural development when it was part of the kingdom of Wu of the Spring and Autumn period (770-476 BC), and it continued to grow through the Western Han, the Eastern Han, the Western Jin and the Eastern Jin. Suzhou gardens were heralded by the Phoenix Tree Garden built in the kingdom of Wu during the Spring and Autumn period and Gu Pijiang's Garden³¹ during the reign of Emperor Xiaowu of Eastern Jin³². The region south of the Yangtze, known more popularly as the "Jiangnan area," prospered in the Six Dynasties period that encompassed the Kingdom of Wu of the Three Kingdoms period (220-280), the Eastern Jin, and the Song-Qi-Liang-Chen Southern Dynasties (420-589). Suzhou emerged as a local aristocratic landlords' consumer city along with Yangzhou and Nanjing in this region, with its economy hinged on silk and handcraft industries.

From the Six Dynasties onward, the exchange of goods between north and south China grew robustly thanks to the completion of the Grand Canal under the rule of Emperor Yang of Sui. During the Tang, booming foreign trade through maritime shipping fleets brought unprecedented wealth to the Jiangnan area. Toward the end of the Tang, while the provinces in the Central Plain were considerably enfeebled by incessant war and turmoil, the kingdoms of the Southern Tang and Wuyue (907-978) in the Jiangnan area remained stable politically and affluent economically, with enough resources to spare for the construction of more gardens, one of which was the Lepu's

Garden developed by Zhu Changwen (1039-1098)³³ on a Wuyue prince's old garden. With its Southern Tang and Wuyue economic legacies emerging unscathed from the destructive war north of the Yangtze, the Jiangnan area was able to maintain its affluence, and garden-making went on as usual in the Northern Song. After Emperor Gaozong crossed the Yangtze and founded the Southern Song, he stayed for a time in Suzhou, the seat of Pingjiang prefecture. Prefect Wang Huan (*fl.* 12th century)³⁴ had ponds dug and pavilions erected in north Suzhou to build gardens attached to government buildings, not to mention the emergence of more mansions of the rich and powerful in the wake of a scramble for land annexation. Among the Suzhou gardens built during the Northern and Southern Song period were Su Shunqin's³⁵ Dark Blue Waves Pavilion on the former site of a Wuyue king's garden, Zhu Changwen's Lepu's Garden, Mei Xuanyi's³⁶ Five-"Mu" Garden, the Northeast Mount Garden built by Zhu Mian (1075-1126)³⁷ as a tribute for Emperor Huizong of Northern Song, and Zhu's own Garden of Universal Joy.

After the Mongols toppled the Southern Song in 1279 and extended the rule of the Yuan south of the Yangtze, the provinces of Jiangsu and Zhejiang remained as repositories of great wealth. More gardens were built as a result, and the Lion's Grove was one of them. During the subsequent Ming-Qing period, land annexation went from bad to worse. Suzhou, an established national silk-producing and handicrafts centre since the Tang-Song period, was by now a concentrated settlement for landowners and government officials while leading the nation in the number of successful candidates for imperial exams. During the Qing alone, it was home to more *zhuangyuan*, or number one successful candidates in the highest imperial examination, than any other city across the land. Upon retirement, these scholar-officials, especially those who were Suzhou natives, would settle down in the city to purchase land and open stores. With the earnings from land and business, they had gardens built to entertain themselves in their evening years, and became big

consumers of local handicraft products, something that had also happened in Luoyang of the Sui-Tang period, Wuxing (present-day Huzhou, Zhejiang province) of the Southern Song, and Nanjing of the Ming.

In terms of natural environment, Suzhou is crisscrossed by waterways and studded with lakes, which makes it easy to draw mountain springs and divert water to gardens, and its fertile soil is salubrious to flowers and trees. To the convenience of local consumers and crafters of rockeries, the city runs its own quarries in the local Yaofeng Mountain and obtains Lake Tai stones from its East and West Dongting Mountains. Stone supplies are also available within manageable distances, such as the Yellow Hill in Jiangyin, the Lord Zhang's Cave in Yixing, the Chuishan Mountain and Greater Xianshan Mountain in Zhenjiang, the Mountain of Dragon's Pool in Jurong, the Blue Dragon Mountain in Nanjing and the Saddle Mountain in Kunshan. Though these rocks compare unfavorably in quality with Suzhou's own supplies; they are situated in the vicinity and within easy reach. Lake Tai stones are choicest for rockwork in Suzhou gardens for their picture-evocative shapes. As *Book of Song* ("Biography of Dai Yong") puts it,

When [Dai] Yong came to live in Suzhou, local scholars managed to build a house for him. They collected stones, brought in water, planted trees and dug creeks. Before long, the estate was densely wooded and looked like born of nature.

Insofar as cultural environment is concerned, the land of Suzhou teems with gifted men in poetry, prose, calligraphy and painting. Local literati officials not only offered their own ideas about garden designing, but also drew inspirations from assorted hangers-on. In his *Record of Wu Customs*, Huang Xingzeng (1496-1561)³⁸ describes a group of such retainers who happened to be Zhu Mian's sons and grandsons,

The sons and grandsons of Zhu Mian live at the foot of the Tiger Hill. They hang around with kings and dukes, offering service in horticulture and rockery making. "Layabout garden spongers" they are called.

Another passage from the *Miscellaneous Discoveries from Guixin Street* by Zhou Mi has this to say,

The workmen, those hailing from Wuxing in particular, are called rockery crafters in a custom handed down from Zhu Mian perhaps.

From among these designers and skilled workmen, a legion of garden crafters came to the fore in the two provinces of Zhejiang and Jiangsu, beginning from the Song. These included Yu Cheng (*fl.* 13th century), Lu the Rockery Builder, Ji Cheng (1582-c. 1642), Wen Zhenheng (1585-1645), Zhang Lian (1587-1673), Zhang Ran (*fl.* 17th century), Ye Tao (*fl.* 17th century), Li Yu (1611-1680), Qiu Haoshi (1723-1795) and Ge Yuliang (1764-1830).³⁹ Good rockery designers invariably come from Nanjing, Suzhou and Jinhua, with Suzhou having the very best to offer—a fact that is not without its historical reasons. Landscape gardening, however, is not limited to wealthy literati officials, as the author of the *Record of Wu Customs* observes,

Even the rank and file, including those who are hard up, know how to enjoy themselves by gracing their homes with miniature rockeries and potted islets.

Love for nature, indeed, is borne deeply in the hearts of all folks in Suzhou.

No place in the world has more traditional gardens—and has them in a complete array—than Suzhou, which may be called a "Garden City" if all these gardens are properly repaired and conserved. It is why the name of Suzhou would leap into mind at the mere mention of Chinese gardens. Small wonder the Jiangnan gardens are extolled as the best under heaven, with Suzhou boasting the best Jiangnan gardens.

I have spent five years on on-the-spot surveys of these gardens and participated in their repairs and restorations. In the last two summers I have led students from the Architecture Department of Tongji University on cartographical fieldwork tours of these gardens, with focus on ancient architecture and garden-making. Availing myself of the long hours I had spent there, I compiled cartographical files and photographs, with the two largest gardens—the Humble

Administrator's Garden and the Lingering Garden—as cases in point so that I can illustrate in a small way the historical metamorphosis of the Suzhou gardens and of the design techniques employed on them. Where necessary, I also referred to some smaller gardens in my narration.

·(III)

The Humble Administrator's Garden, 178 Northeast Street. Situated between Loumen and Qimen City Gates in the northeast corner of Suzhou, the predecessor of this garden was a villa built during the Jiajing reign (1522-1566) of the Ming by Wang Xianchen (1469-?)⁴⁰ on the debris of the Temple of Grand Preachers of the Yuan. Its name, "Humble Administrator's Garden," is derived from a line in the famous poet Pan Yue's⁴¹ "Idle Life Rhapsody,"

[You ought to be filial, and discharge your brotherly duties.] This is how a humble administrator exercises his government duties.

The garden changed hands a couple of times. It was first sold to a local man surnamed Xu by Wang Xianchen's son to pay off a gambling debt. Chen Zhilin (1605-1666)⁴² bought it for a song from Xu's offspring in the early Qing. After Chen was exiled to a place north of the Great Wall for military servitude, it became the official residence of a Manchu garrison commander of provincial bannermen, and then served as the seat of the Circuit Intendant. Wang Yongning (*fl.* 17th century), a son-in-law of Wu Sangui (1612-1678), the notorious Ming general who surrendered to the Qing army and led them through the Shanhai Pass, resided in this garden for a time before it was confiscated as a result of Wu's revolt against the Qing. The garden was converted into the Bureau of the Circuit of Suzhou, Songjiang, and Changzhou established soon after Emperor Kangxi succeeded the throne, who personally visited this estate on one of his imperial tours of the south. After the Circuit of Suzhou, Songjiang, and Changzhou was abolished, the whole property was downgraded to a civilian

dwelling. In the early years of Emperor Qianlong's reign (1736-1796), it was divided into western, central and eastern parts, and Prefect Jiang Qi (fl. 18th century) took possession of the central part and renamed it "Restored Garden." During the reign of Emperor Jiaqing, it was acquired by Zha Shitan (fl. 19th century), a Haining native who was a department head of the Ministry of Punishment, and then it came under the ownership of Wu Jing (1747-1822)⁴³ from Pinghu. When the Taiping Heavenly Kingdom Uprising troops took control of Suzhou, Li Xiucheng (1823-1864), the King of Loyalty, took the western and eastern parts as his mansion, but the Qing government seized the garden again after the uprising fell through. In the tenth year of Emperor Tongzhi's reign (1862-1875), it was converted into the Guild of Eight-Banner Members from Fengtian and Metropolitan Provinces, and resumed its original name, Humble Administrator's Garden. In 1877, its western part was sold to Zhang Lüqian (1838-1915), a rich merchant from Wuxian county, who named it "Additional Garden." The three parts were not put together again until the 1960s.

The plan of the Humble Administrator's Garden is centered on water, which covers approximately three fifths of the total garden. Accordingly, eighty to ninety percent of the main buildings on the premises are water-bound. Wen Zhengming says in his "Record of the Humble Administrator's Garden,"

In the area between the Loumen and Qimen City Gates in the northeast of the prefecture's seat, many vacant lots were waterlogged. They have been slightly dredged and conserved, with trees transplanted around them....

The water conservancy arrangement in compliance with the local terrain tallies with the principle of flexible adaptation of gardens to the lie of the land laid down by Ji Cheng in his *The Craft of Gardens* ("Suitable Sites"),

... If it is high and square you should make use of pavilions and terraces. If it is low and concave you can dig out pools and ponds.

These lines speak volumes for the feasibility of centering the layout of

the Humble Administrator's Garden on its rich water resources.

Taking topography into full account is a common practice in many other gardens in this city, including the Master-of-Fishnets Garden at Kuojietao Lane, where eighty percent of the space is covered with water, and the Five-"Mu" Garden at the Pingmen City Gate, where ponds and pools are interconnected to form a serpentine water belt. In both gardens the bodies of water are dredged and regulated by giving full play to the topography. The Beauty-Encircled Mountain Abode on Jingde Road is another example, where the water problem is tackled in a clever way. When Jiang Ji (fl. 18th century), the property's owner in the early years of Emperor Qianlong's reign, was digging a pond in the garden, he hit upon a fountainhead with water gushing out of it, which he delightfully named "Flying Snow Flakes."

As is mentioned above, the Humble Administrator's Garden is made up of three parts. The central part has kept most of its old layout. The western part, known as "Additional Garden" under Zhang Lüqian's ownership, has been properly arranged after drastic renovations. The derelict eastern part, the Return-to-Farming Abode owned by Wang Xinyi (1572-1645) during the Ming, is now being restored from long years of dilapidation.

The main building in the central part, the Hall of Far-Drifting Fragrance, is a three-bay structure with floor-length windows on four sides, under a gable and hip roof with a side eave under one gable. Looking out from its sash bars, one gets a panoramic view of the garden. In the south, there is a small pond with rockeries around it, where blooming *yulan* magnolias are well spaced, an old elm tree stands by a rock at the foot of an undulating wall, and green bamboos lean quietly against rockeries. A slender colonnade runs along the curve of the rockeries to usher the visitor into the garden—an arrangement that not only makes one wonder if he has entered a woody mountain upon crossing the threshold, but also makes the entrance somewhat "disappear" as a rockery blocks the prospects when

he looks southward. Here, the rockery functions more or less like a screen wall standing behind the front gate of a house or dividing up the interior of a room. East of the Hall of Far-Drifting Fragrance stands the Embroidered Damask Pavilion, with the Leaning-on-Jade Verandah sitting in the west and a lotus pond lying in the north. Poised atop the small mountains beyond the pond are the Fragrant Snow and Luxuriant Cloud Pavilion and the Frost Awaiting Pavilion. Along the north-south axis with the Hall of Far-Drifting Fragrance at the middle point, buildings now rise, now plummet to bring the scene's central theme into bold relief. The islets of the pond, in particular, are surrounded by flowing water, shaded by clustered bamboos, and adorned with shapely Lake Tai stones along the embankment. The whole view seems to extend infinitely, giving the impression that one is roving the realm of a natural lake.

A stroll along the shore eastward from the Hall of Far-Drifting Fragrance brings one to the Rainbow-Leaning Bridge. The bridge and its railings, which both originated in the Ming, lie low and short. A few steps away from the other end of the bridge stands the Rainbow-Leaning Pavilion, an otherwise hexagonal structure that clings upon a colonnade and only shows its three sides—as if its other half were slashed crosswise, hence its name, "East Half-Pavilion."

A passageway from the Rainbow-Leaning Pavilion conducts northward to the Secluded Parasol-and-Bamboo Pavilion, sporting a pyramid-shaped roof and an arched door on each of its four sides, situated at the eastern end of the garden's central part. Observed through the pavilion's two opposite arched doors, the scenery in the pond seems to be framed inside a ring. Looming faintly in the deepest recess on the other side of the wide pond is the West Half-Pavilion, or the Pavilion of Celestial Vistas, opens onto the garden's western part while its arched gate is silhouetted in the pond. Behind this pavilion there is the towering Northern Temple Pagoda, which looks like close at hand but is actually one kilometer away from the garden. This is, indeed, another fabulous case of view borrowing.

Standing here, one sees the Hall of Far-Drifting Fragrance, the Leaning-on-Jade Verandah, and the Fragrant Isle on the left, and two islets on the right. The former is a set of magnificent buildings, and the latter a veritable scroll painting of natural scenery. "This is where the concept of contrast is used in the craft of gardens in full glory," my mentor Liu Dunzhen (1897-1968)⁴⁴ told me.

As a matter of fact, the distance between the pond's eastern and western shores is not that long, but the visual effect of the design yields an illusionary sense of depth thanks to the presence of a stone beam bridge on the water surface—one must look beyond the bridge to see what is going on on the other side of the pond. The narrow strip of water cuts the scenery in two, with gorgeous buildings on one side and nature-wrought lush green hills on the other, thereby enhancing the depth of distance and the width of field. On the other side of the pond, aged elms snuggle upon the embankment, weeping willows stroke the rippling water with soft twigs, and lofts and terraces are framed invitingly in an elegant arch gate.

A walk from the Secluded Parasol-and-Bamboo Pavilion and over a triple-bend Bridge brings one to a forked road at the foot of a triangular islet, where a winding trail leads up to the Frost Awaiting Pavilion at the top, a hexagonal structure whose roof juts out over the bamboos like a wing. To the east is the Green Ripples Pavilion, and to the west the rectangular Fragrant Snow and Luxuriant Cloud Pavilion perches on an elliptical islet. The two islets are separated by a creek with a small bridge across it, where bamboo groves in sequestered repose and old trees recline over the gurgling creek to greet the orioles flying between them—a setting that is thoroughly insulated from the mess and noise of the outside world.

Stroll from the Fragrant Snow and Luxuriant Cloud Pavilion, and one arrives at the Pavilion of Lotus-Scented Breeze from Four Sides, another hexagonal building at the intersection of three passageways, with one zigzagging bridge linking its front to the Leaning-on-Jade Verandah and another at its back providing access to the Mountain-in-

View Loft and the Pavilion of Celestial Vistas through the Willow-Shaded Winding Walkway. A two-storied structure crowned with a double-eave gable and hip roof, the loft is found in the northwest corner of the central part and keeps itself at a considerable distance from what is contained in its surroundings; from its upper storey, reachable via steps in a rockery, the views in the city's northern corners meet the eye instantly when one looks afar. The scenic vintage point of this kind is commonplace in the Chinese garden. For example, the pentagonal pavilion of the Half Garden at Zhongyouji Lane, and the fan-shaped pavilion in the Lion's Grove are sitting respectively on a high hilltop in a corner. Due to the large size of the Humble Administrator's Garden and its expansive water surface, however, such a two-storied loft does not look so overwhelming. What is more, the reflections in the calm water add beauty to the entire vista. Nonetheless, when designing a multi-storied building in a garden, due attention ought to be paid to skintled brickwork in elevation. Horizontal lines parallel to the water surface are preferred in order to achieve coherence.

The Fragrant Isle is known by tradition as a "land boat" because it looks like a boat that cannot sail. A large mirror is hung inside of its cabin, so that when looking west from the Leaning-on-Jade Verandah, one cannot tell whether the view he sees is real or merely mirrored reflection. The upper storey of the Fragrance Isle is named "Loft of Cloudless Vistas," which commands a panorama that extends far into the horizon. To the south of the Fragrant Isle is the Truth Attaining Pavilion⁴⁵ with another mirror fixed inside of it to bring about a similar effect. This is where the water surface narrows down to a strip and is cut in two by a stone bridge known as "Lesser Flying Rainbow." To the south, the Lesser Dark Blue Waves Gazebo, a three-bay waterside structure, sits squarely on the water to divide its surface in two again. However, with open space beneath the bridge and the gazebo, one never feels constrained. Instead, the water looks vast enough to engender an unusual feeling of dynamic airiness,

spaciousness, and gradation in depth.

At the Lesser Dark Blue Gazebo, when one looks over the Lesser Flying Rainbow and through the Pavilion in a Yard of Pines Howling in Wind and under Autumn Moon, the silhouettes of the Pavilion of Lotus-Scented Breeze from Four Sides, the profile of the Fragrant Isle and the corners of the Mountain-in-View Loft simmering in the immense water surface come into sight one after another—a grand montage observed through a tiny portal that never fails to cheer up the observer in no time.

Separated from the garden proper by an undulating wall is the self-contained Loquat Courtyard to the southeast of the Hall of Far-Drifting Fragrance. A moon gate provides the access to the courtyard, in which the Pavilion of Fabulous Fruits sits on one side and the Hall of Dainty Rocks and Delicate Bamboos on the other. Looking back upon the moon gate, one finds the Fragrant Snow and Luxuriant Cloud Pavilion framed squarely in it—where the "opposite views" technique is employed to great advantage. Sitting in the courtyard, one espies an excellent scene of view borrowing, as the tall scholar trees and pavilions beyond the wall seem to have drawn themselves closer in no time. The ground of the courtyard is paved with cobblestones in patterns exceptionally elegant and neat. The pity is that the rockery along the wall has been distorted in the aftermath of shabby reconstruction, and the wall itself, in want of a traditional top, looks somewhat rigid and awkward the way it twists and turns.

A colonnade winds its way by the side of the Hall of Dainty Rocks and Delicate Bamboos, and encircles a two-framed verandah upon entering the Vernal Crabapple Yard, where two crab apple trees crane over a few rockeries at the foot of its stairway, and where pavilions, water and rocks are faintly visible beyond the latticework windows. The courtyard seems isolated, but actually it is connected to the outside world in all directions, and every façade of it is wrought exquisitely. Inside of it, sparseness is made up for with density, and greatness is found in small details, which speaks volumes for its

designer's ingenuity.

The Humble Administrator's Garden used to be an integral whole before a wall was built to divide it into western and central parts during the early years of Emperor Qianlong's reign. It was not until latticed windows were built into the wall that the two parts were united again. Some modifications were made in the western part to make it self-contained, including the addition of a waterside colonnade along its wall. Acclaimed as the best of its kind among all Suzhou gardens, the colonnade rises and falls and turns this way and that over the water, giving the impression as if it were treading rippling water.

The centerpiece of the western part is the Twin Hall, which consists of the Hall of Thirty-Six Pairs of Mandarin Ducks in the north and the Hall of Eighteen Camellias in the south. The halls, sitting under a big gable and hip roof, are actually a joint three-framed structure with four interior round ridge roofs. In each hall's four corners there is a small heating room, which is one of a kind in shape and structure in this country.

After the western part was partitioned off to stand on its own, the Twin Hall became its main architectural hallmark. To fit its bulky body to a constrained space, its frontal portion was downsized and its posterior extended over the pond. The problem is thus solved, but the resultant drastic reduction in the pond's water surface and distance to the rockeries on the opposite bank, coupled with its more constrained ground, makes the building look out of place in the whole garden. It is, indeed, a blemish in an otherwise perfect layout.

The Twin Hall is where the owner feasts his guests and appreciates Kunqu Opera performances, with the acoustic effects enhanced by interior round ridge roofs. The heating rooms in the corners serve multiple functions: as buffer zones for people entering and leaving the hall, waiting rooms for servants during banquets, and makeshift back stages for opera performers. How considerate the designers were! Among Suzhou gardens this Twin Hall is a rare

interior-decoration gem along with the Stay-and-Listen Belvedere. As the Hall of Eighteen Camellias is where such flowers are marvelled at in early spring, and the Hall of Thirty-Six Pairs of Mandarin Ducks is where these love birds frolic among lotuses in summer, there are good reasons to have one hall face north and the other face south.

Facing the Twin Hall across the pond is the Floating Emerald Belvedere, a two-storied octagonal building whose top floor offers a bird's-eye view of the garden. The pity is that it is so high as to be disproportionate to its surroundings. The belvedere overlooks two tiny pavilions atop a hillock that is separated from it by a creek. They are the Bamboo Hat Pavilion and the Fan-Shaped Pavilion, looking diminutive because the hillock itself is low and tiny. The Fan-Shaped Pavilion is also known as "With Whom Shall I Sit" Verandah for its location at the slender creek's bend that offers a vantage point for leisurely sightseeing. Below the pavilion a wisp of water flows by. A walk along the colonnade over the water brings the visitor to the Loft of Inverted Reflections, a two-storied structure under a gable and hip roof. Some distance away is the Good for Both Families Pavilion, a hexagonal affair with a roof drawn up to a single point. The loft and the pavilion with their opposite views are both reflected in the water. Occupying the ends of a long and narrow creek west of the Twin Hall are the Stay-and-Listen Belvedere and the Pagoda Silhouette Pavilion, another pair of opposites that look alike and are arranged on a lower level in a similar layout and design.

The entrance from south of the Pagoda Silhouette Pavilion to the Additional Garden (that is, the Zhang's Mansion) in the west is now closed.

The eastern part of the Humble Administrator's Garden has long been deserted. Its rebuilding is being planned, but the details are beyond this book.

The Lingerin Garden, 338 Liuyuan (Lingerin Garden) Road. Located outside the Changmen City Gate, the Lingerin Garden was originally the East Garden in the possession of Xu Taishi

(1540-1598)⁴⁶ during the mid-Ming. Under Emperor Jiaqing's reign of the Qing, the garden was rebuilt by Circuit Intendant Liu Shu (1759-1816), which was also known as "Wintry Emerald Mountain Abode" for the lacebark pines planted in it or "Liu's Garden." The twelve peak rockeries Liu had procured were built of choicest Lake Tai stones. The garden assumed its present name, the "Lingering Garden," when it came under the possession of Provincial Administrative Commissioner Sheng Kang (1814-1902) in the second year of Emperor Gaungxu's reign (1875-1909). Occupying an area of fifty *mu*, it is the largest garden in Suzhou.

The garden can be divided into central, eastern, western, and northern parts for convenience's sake. The central part features a lake surrounded by artificial mountains, lofts and pavilions linked with colonnades and bridges. The layout of the eastern part teems with changes, where large halls are kept apart with verandahs and rockeries. The western part highlights an artificial mountain covered all over with maple trees and graced with a few pavilions, with its southern side rimmed by a zigzagging stream to imitate the Peach Blossom Springs in Wuling dating back to the Eastern Jin. The western part, separated from the central part by an undulating wall, offers the best view to be borrowed by the central part when its maple trees would drape boughs of leaves over its white-washed wall like rosy clouds in congregation in autumn. The old structures in the northern part were no more, but their recent replacements are too mediocre and insipid to be elaborated.

Entering the garden's front gate and passing through two tiny courtyards, one arrives at the Green Shade Verandah in the garden's central part. Looking north through the latticed windows, one gets an eyeful of the hills and buildings in the garden. A passageway leads west to the Green-Soaked Mountain Villa. As the main building of the central part, the villa is a three-framed structure under a flush gable roof, with a courtyard containing a peony parterre in the front and a lotus pond at the back. Abutting on the villa to the left is the Bright

and Clear Loft, a delicate two-storied building sporting a hipped roof, whose top floor is reached via a scaling ladder.

Turning west at the Green-Soaked Mountain Villa and embarking on a roofed walkway that climbs up a mountain, one reaches the Osmanthus Fragrance Verandah, which affords a panoramic view of the central and eastern parts, where the Sinuous Gully Loft, the Refreshing Breeze Pond-Verandah, the Studio to Get "Rope" and Draw "Water" from "Ancient Well," and the Distant Emerald Belvedere are arranged one behind another in picturesque disorder and echo each other up and down amidst ancient trees and exotic rockeries. Adjoining each other south of the Osmanthus Fragrance Verandah are chambers, lattice walls and waterside pavilions. The Bright and Clear Loft extends a little bit over the water surface, while the balcony of the Villa stretches a little farther in what looks like two arms poised to embrace the lake and the loft silhouetted in it.

Starting northward from the Osmanthus Fragrance Verandah and turning east, one goes by a colonnade to stop at the Distant Emerald Belvedere in the northeast corner of the central part of the Lingering Garden. The belvedere serves the same purpose as the Mountain-in-View Loft in the Humble Administrator's Garden, though the former is seated on land and the latter surrounded by water on three sides. Separated from the eastern part only by a lattice-windowed wall, the Distant Emerald Belvedere offers the best view to be borrowed in the eastern part.

The foot of the Lesser Islet for Immortals in the center of the lake and that of the Hao & Pu Pavilion by its side look like at the same level of the water surface, an arrangement that makes the nearby hills and lofts look higher. Visitors ambling along the Sinuous Gully Loft would invariably find that the picture-perfect scenery keeps changing with the shift of their footsteps as they look through an array of brick frames and latticed windows opened into the building's western wall on the first floor. When autumn sets in, the maples beyond the undulating wall will be crimsoned through and become a fiery ocean

that seems to ebb and flow hand in hand with the wall—no visitor could bear to tear his eyes from this most fabulous scene. North of the Sinuous Gully Loft stands the Pavilion for Scenic Enjoyment, a hexagonal structure perched atop an artificial mountain, with a long colonnade at its back.

The eastern part of the Lingering Garden features two major buildings, the Five-Peak Celestial Hall fashioned out of *Phoebe nanmu*, and the Hall of Woods and Springs for the Senior and Renowned. The five-framed Five-Peak Celestial Hall with a flush gable roof is regarded as one of the best old-style halls in the Jiangnan area for its fine interior décor and furnishing. Its four sides are each attached to a yard of varying sizes. The rockeries in both its front and back yards often make those sitting in the hall feel they were confronted with high rimrocks, a design that fails to impress Ji Cheng, who notes in *The Craft of Gardens*,

People always construct mountains in front of halls, with a row of three lofty peaks sticking up inside an enclosing wall. This looks exceptionally ridiculous.

Five rockeries are laid out in the front yard, making the court look crammed and robbing it of appeal. Ji Cheng suggests,

In my opinion, if you have some fine trees in your courtyard, just arrange a few delicately shaped rocks around them; otherwise, you may embed stones into the wall or plant some flowering shrubs or hanging creepers on it. Only thus can some depth be achieved in the scenery.

This method of Ji Cheng's, as I see it, is a lot more workable. In the backyard, there is a pool of clean spring water in front of the rockery, which evokes a sense of utmost quietude. The pity, though, is that the spring has lost its source, so that the pool now dries up, now brims with water. On the artificial mountain's backside a colonnade runs parallel to the wall, but as it leads to all directions, the visitor might get lost if his attention is by chance detracted. The Distant Emerald Belvedere on the other side of the wall is highly visible when one looks left from this backyard. The expansive spatiality of the garden is driven home to the visitor this way.

The Studio to Get "Rope" and Draw "Water" from "Ancient Well," a

one-frame room adjacent to the Five-Peak Celestial Hall, borrows views from the central part through bright windows in its four walls. In what is an ingenious treatment of small space in garden design, a Chinese parasol stands straight under its canopy-like foliage in the tiny yard between the Studio and the Hall.

Two small courts to the left of the Five-Peak Celestial Hall—the Return-to-Read Study⁴⁷ and the Kowtow-to-Peak Verandah—provide transition between this Hall and the Hall of Woods and Springs for the Senior and Renowned. Surrounded by winding colonnades and kept apart with brick windows in its walls, the courts are interspersed with fine trees, slender bamboos, day lilies and small rockeries, all of which come in matching sizes in a layout at once neat and tidy. One can derive pleasure in the peace and quiet of the place and would hate to go away anytime soon.

To the east of the Kowtow-to-Peak Verandah stands the Hall of Woods and Springs for the Senior and Renowned, more popularly known as the "Twin Hall." Decorated and appointed most elaborately, the hall is five-framed with a single-eave gable and hip roof. Its two interior halls, one facing south, the other facing north, are each topped with a round ridge roof. The main beam in the northern hall assumes a rectangular shape with carved patterns, and the one in the southern hall is round without patterns.

North of the Hall there are the Cloud-Crowned Pool, the Cloud-Crowned Pavilion, the Cloud-Crowned Loft, and three rockeries which have been there since the Ming as the largest Lake Tai rocks ever found in Suzhou: the Cloud-Crowned Peak, the Riddled-Through Peak Enveloped in Clouds and the Cloudlet-Enshrouded Peak.

The hexagonal Cloud-Crowned Pavilion behind the Cloud-Crowned Peak is tucked away under *yulan* magnolia trees. A scaling ladder north of the pavilion leads up to the Cloud-Crowned Loft, where open views beyond the garden, including trails, cultivated fields and the Tiger Hill Pagoda, come into sight before the windows. Flanking the Cloud-Crowned Pool are the Cloud-Anticipating Hut to

the east and the Cloud-Crowned Terrace to the west. A walk from the terrace through a moon gate brings one to the Pavilion of Fine Weather, Beloved Rain and Timely Snow that houses six intricately carved *Phoebe nanmu* latticed doors, which, the pavilion being facing west, bear marks of damage inflicted by the elements. The eastern part, newly built with its commonplace rockeries, stands no comparison with the old dramatic scenery.

The western part seems to be a legacy of Xu Taishi's East Garden from the Ming. The hill inside it is built of soil and arranged with yellow stones as per an old method described by Li Yu,

Small hills are built with rocks, while large hills are piled up with soil.

Thus the maple trees all over the hill in the western part are nourished by the soil in which they are rooted. Upon this hill there are two pavilions: the Pavilion for Untrammelled Whistlers with a conical roof, and the hexagonal Pavilion of Uttermost Delights which, regarded as one of a kind in south Jiangsu, is a slightly modified replica of the Imperial Stele Pavilion at the Fan's Memorial Shrine on the Tianping Mountain. The former of the two small pavilions is concealed amongst maple trees, and the latter is snuggled halfway up the hill in the northwest and visited by those who come to gaze up and down and look far into the distance. The southern slope of the hill borders on a clear creek flowing in the shade of peach and willow trees; created in an assumed fashion, this man-made scenery fails to become the utopia retreat it was intended to be. Indeed, in landscape gardening it is no easy job to outdo nature with human artifice. The creek flows on until it reaches the Belvedere for the Vivacious and Enterprising, giving those who happen to be inside the impression that they were standing right on the creek, without realizing that the creek has met its end right under their feet. The only weakness of the western part is that the rockeries in it have lost their original forms as a result of repeated additions and repairs.

The northern part of the Lingering Garden, however, has lost its appeals in the form of classical pavilions, terraces and horticulture, all

of which have been destroyed and replaced with new constructions.

·(IV)

Small in floorspace as they are, all the classical landscape gardens in the Jiangnan area look picture-perfect with so many rockeries and ten times as many ravines that are also crisscrossed by tranquil streams, and strewn with green pools. The secret to this impression is decoded by Qian Yong (1759-1844)⁴⁸ in *A Collection of Anecdotes in the Lü Garden*,

Garden-making is the same as composing poetry and prose,

In which every twist and turn must be made methodically.

Accordingly, only if everything—artificial hills, waters, pavilions, terraces, halls, lofts, winding or square ponds, lattice walls, colonnades, and whatnot—are arranged and allocated by eschewing hackneyed prototypes can a garden be refreshing and enchanting all the time and rank among the top-notch ones. For this reason, in overall planning and space treatment, it is imperative to make a garden look expansive and its scenery ever-changing.

The layout in Suzhou gardens is centered on the following themes:

First, water. A body of water is usually the centerpiece of such a garden, with a bridge spanning its surface, a colonnade encircling it, and the premises interspaced with pavilions, terraces and lofts. And an islet is always set in a large pond, as is the case with the Master-of-Fishnets Garden and the Garden of Brotherly Indulgence. Small as the Comfort-Giving Garden on Temple-Shrine Lane is, it still leaves room for a pond in its center, and surrounds itself with chambers in such a way that it looks like a miniature landscape. Though the Lingering Garden also has a lake in its center, my teacher Liu Dunzhen believes that the garden as a whole is predicated on a cluster of buildings in its eastern part. His opinion is definitely not unfounded.

Second, artificial hills and exotic rocks. A garden with no readily

available headwater or low-lying land cannot but give the limelight to such hills and rocks, just like what is done in the Cheng's Garden on Western Hundred Flower Lane. In the case of the Beauty-Encircled Mountain Abode, a large pond is out of the question for its small area. So its sole solution lies in building hills and erecting rocks, and spring water was then channeled in to bring the dead stones to life, cover the ground or stones with fresh and moist moss, and allow grass and trees to multiple and thrive, so that the garden, though man-made in its entirety, looks like reborn of nature.

Third, pervasive water surface. This works for a place endowed with a rich accumulation of runoffs and large enough to have much leeway for landscaping without being constrained by old ruts. The Humble Administrator's Garden and the Five-"Mu" Garden definitely belong in this category—their large sizes allow them to make manifold changes while maintaining a high degree of spatiality. The small artificial hills in the central part of the Humble Administrator's Garden, in particular, are, to quote Zhang Lian, "complete with traverse ridges and tiny slopes, zigzagging lake embankments and curved sandy shores." Ji Cheng suggests in *The Craft of Gardens*,

The garden is created by man, but should look as if wrought by heaven.

My mentor Liu Dunzhen puts it this way,

The bodies of water in a garden ought to be concentrated in the main, with scattered ones supplementing. It is better to keep water concentrated than scattered in a small garden. In a large garden, it can be partly concentrated, partly dispersed, but a decision must be made before action is taken: which approach should be prioritized, concentration or scattering?

Both the Humble Administrator's Garden and the Master-of-Fishnets Garden are fine examples for the utilization of large bodies of water, which is why they are celebrated as the best of all Suzhou gardens in my opinion.

Fourth, water in the foreground and rockwork in the background. This calls for building a hall in front of a pond or stream so that it looks like a waterside verandah sitting astride the waves, and someone staying in the hall can feast his eyes upon the hills and rocks

across the water. This layout finds expression in the Garden of Cultivation at 5 Literary Yamen Lane. The Fragrant Grass Garden to the east of the Northern Temple Pagoda seems to bear a close resemblance to it.

Fifth, juxtaposing hill and water in the center and surrounding them with an uninterrupted circuitous belt of lofts and chambers whose heights are congruous to these hills and waters. Examples of this plan are few and far between in Suzhou. A smattering of it can be espied in the eastern part of the Loving Couple's Garden at Small New Bridge Lane, and the Han's Small Garden on Northeast Street shares something in common even though its hill and water are graced with two rows of buildings. As to the Half Garden on Zhongyouji Lane and the Song's Garden on Immortal Cultivation Lane, their clusters of buildings stand on one side of their respective central hills and waters.

The Suzhou gardens dating back to the Ming era bear a close affinity to nature, especially those created with techniques summarized by later garden crafters like Ji Cheng and Zhang Lian to factor in original terrains with minor modifications. The rocks used are primarily yellow stones, as exemplified by the two small hills in the central part and the one at the foot of the Embroidered Damask Pavilion in the Humble Administrator's Garden. Though lacking the exquisiteness of riddled-through Lake Tai stones, the yellow stones, when piled up judiciously, produce natural-looking rockwork without the least suggestion of affectation and the risk of collapse that piled-up rocks are prone to. If these and other techniques are studied to the minute detail, a lot of fine traditions can be carried forward to update landscape gardening today.

From the Qing era onward, all the rockeries in gardens in Suzhou were built of Lake Tai stones. The number of such stones and the merits and demerits of a single peak in a garden became the benchmarks for the quality of gardens, benchmarks which prompted greedy and curious rockwork crafters and garden owners alike to compete with each other in garden-making. Typical examples of such

competition can be found in the Garden of Brotherly Indulgence, where choice Lake Tai stone rockeries were collected from three ruined gardens around the Dongting Mountain. Apparently, the principle that "small hills should be built with rocks" does not exclude the use of soil at all; otherwise, trees planted in them would have nothing to survive on. The Beauty-Encircled Mountain Abode, on the other hand, is a good example. Renovated extensively during the Qianlong reign, it boasted, within its small space, a Lake Tai stone rockery built by drawing upon the Song-dynasty "axe-chopping" landscape painting brush technique and by inlaying stones in its surfaces to generate an unaffectedly vigorous style. Furthermore, nourished and moistened by water meandering in its deep ravines, the rockery exudes verdure and liveliness and ranks among the finest of its kind in all the gardens in the Jiangnan area. Such artistic masterpieces would not have been created at all if their designers had no sense of natural mountains and ravines in their vision and failed to apply their imagination and expertise with facility. All this speaks volumes for the importance of assiduous study and cultural cultivation for garden crafters.

Artificial mountain construction in the craft of gardens should be adapted to existing terrain and topography, whose unpredictable changes provide no set rules, but fortunately, the formation and development of a certain terrain still follow some principles. There is a grain of truth in the saying, "It is better to learn from nature than from the ancients." We can understand this philosophy by analyzing a given natural scenery and testify to it with the works of our ancients. One can come up with the best possible garden design by drawing upon these works and by clarifying its merits and demerits. However, nine out of ten Suzhou gardens built in recent times were, to our dismay, schematized at best. In the absence of an overall plan, such a garden is just a hotchpotch of pavilions, lofts and verandahs. As to the stones selected for artificial hills and rockeries, they were treated like antiques and curios to the neglect of their relationship with

horticulture and architecture. The construction of the Garden of Brotherly Indulgence, for example, was intended to benefit from the strengths of a host of counterparts, but its general plan is so lax and undisciplined that it seems to have fallen short of expectations—a lesson, indeed, poignant enough to sober up all the garden-makers today.

To keep or build a body of water in a garden, the first thing to do is to seek out its source. A pond or stream without a source is dead water. The Humble Administrator's Garden, for example, saves the day by making use of its original pools and marshes. The Beauty-Encircled Mountain Abode obtains water by digging into its ground; the water obtained this way comes only in a trickling stream, but it is clean and cool all the same.

There are two tricks to make a pond of water in a tiny garden look expansive and boundless. Firstly, to make full use of the pond's irregular plane, sprinkle it with islets and build small bridges across it, so that its entirety cannot be seen through at one glance. Secondly, to add enough bends and twists to the shores and outlets of a pond or stream to make it look like having more than one source or coming out of nowhere or disappearing into an unfathomable hole or ravine. Reeds and cattails may also be planted along the shorelines and at the outlets to heighten the mystery of the scene. This second trick, however, is viable only to large gardens.

The Belvedere for the Vivacious and Enterprising in the Lingering Garden is situated where a creek meets its end, but some of its water keeps flowing underneath, so that, from a bird's-eye view, the belvedere looks like sitting right on water and the creek seems to be flowing on. The water-bound rockery in the Garden of Salubrious Shades on Southern Xianzi Lane is built cleverly of layered rocks to resemble a cavernous cave with a hut atop it. Water is channelled into the cave and stepping stones are fixed inside, making visitors feel like venturing into the depth of a ravine. Celebrated as a unique structure in the central Wu area, this rockery's design is probably based on one

in the Southern-Song Garden of Zhao Yiwang (fl. 12th century) in Hangzhou.

The Dark Blue Waves Pavilion's scenery is dominated by rock formations. The waterside colonnade in the western part rises drastically in elevation to offer a bird's-eye view of the seemingly unfathomable pool below. Bridges in the Garden of Cultivation are almost level with the water surface that sets off the height and steepness of the rocks on both banks, whereas the bridges in the Garden of Brotherly Indulgence, though kept below the surrounding rockeries, are a little higher than water surface. What about setting up a bridge over a small creek? It is not hard to imagine, and this is why our predecessors used steppingstones instead, and the result is more natural and tasteful. There is a waterfall cascading to the rockery from the eave of a nearby loft when it rains in the Beauty-Encircled Mountain Abode, which is but a rarity among Suzhou gardens.

In addition to waters, rocks and ponds, architectural structures like halls, chambers, terraces, pavilions, gazebos, verandahs, vaultings, and walkways are also part and parcel of the traditional Chinese garden. Most Jiangnan gardens are known for the air of sequestered repose and low-key elegance about them, which ought to be matched with delicate and graceful buildings, and their siting, plane and appearance, too, must be brought into full account. Ji Cheng says in *The Craft of Gardens*,

What is fundamental to a garden to be constructed is to decide the positions for halls and chambers. Priority should also be given to the choice of sceneries, but the key to success lies in making the buildings face south. Where there are trees, keep just a few of them in the central courtyard.

This tenet on garden architecture is carried out to the letter in southern Jiangsu gardens, such as the Hall of Far-Drifting Fragrance in the Humble Administrator's Garden and the Green-Soaked Mountain Villa in the Lingering Garden.

As to the positioning of a loft, a terrace or a pavilion, there are no prescribed rules to go by, though principles can be found in *The Craft*

of Gardens, the *Treatise on Superfluous Things*, the *Notes on Sections of Construction Projects* and other books: "Form should accord with the shape of the foundations"; "Patterns should be agreeable to the circumstances"; "Prospects should be adapted to the surroundings so that each owns its right niche"; "Every rafter or corner must look out of the ordinary"; "Let every gazebo be tucked away amidst flowers, and let every pavilion be found by the side of a pond or brook." All these principles call for flexible application by bearing the whole picture in mind.

Take the Humble Administrator's Garden for example. Looking down at the garden, we find that the orientation of buildings varies with the lie of land. Their exterior invariably looks lively, be their plane a square, a rectangle, a polygon, or a circle. As far as roofs are concerned, they assume a variety of forms, including *yingshan*, a pitched roof with two slopes on the front and the rear respectively; *xuanshan*, which adds to *yingshan* two walls up through to the roof on the left and right; *xieshan*, a gable and hip roof with eaves under one gable or both gables; and pavilion roofs. The main ridge of such a roof is always curved rather than straight. None of the roofs takes the *wudian* form, that is, a pitched roof with a slope on each of its four sides, which is exclusive for royal use. Their ridge ends usually turn up in the shape of a half-moon, which is called *faqiang*. In the manner of *shuiqiang faqiang*, overhang is achieved by turning up the four ridge ends instead of the minor hip rafters. The structures appear light and lively in a style similar to that of the hanging fascia beneath the eaves and the "Backrest for the King of Wu," that is, a slightly curved balustrade.

The buildings in the central part of the Lingering Garden are good examples in elevation treatment. When one looks east from the Osmanthus Fragrance Verandah, the Sinuous Gully Loft comes in sight as the verandah's major opposite view. With a gable and hip roof, the loft has its ground floor designed like a platform, with its molding in parallel with the water surface and separated from the upper floor, so

that its two-storied structure does not look overwhelming in height. Moreover, the roofs of the three adjacent buildings positioned one after another—the Sinuous Gully Loft, the Western Loft, and the Refreshing Breeze Pond-Verandah—have elevations and roofs that look alike but, at a close look, are actually different and go well with the rockeries and water around them. The weathered ancient tree crabbing over the rippling surface of the stream, the brick-framed and lattice windows in contrast with the wall in which they are fixed, and the sparse and thin shadows of flowers are all unique features to the Suzhou gardens that, when mirrored in the water, beggars description.

The Green-Soaked Mountain Villa abuts upon the Bright and Clear Loft. Both have round ridge roofs, but the latter is hipped, and the former is flush-gabled on one side and has a vertical ridge on the other side—a change that, instead of looking awkward, perks up an otherwise dull design. A similar example is found in the treatment of the structure by a pond in the middle of the Comfort-Giving Garden's long and narrow plan: in the absence of a waterside verandah, a pavilion is installed that sports a roof with a side eave under one gable.

There are counterexamples, however. A corner pavilion in the Eastern Garden is crowned with a hexagonal conical roof. Its cornice is flat and its ridges upturn a little at the hip, but to keep the structure light and graceful, the columns are too thin and too tall to bear the weight of the heavy upper section. Consequently, the pavilion looks a little shaky. The Pavilion for Untrammelled Whistlers and the Pavilion of Uttermost Delights in the eastern part of the Lingering Garden are both flawed in proportion. The former is small but not exquisite, and the roof of the latter seems too heavy despite the variations made to it. Indeed, the pavilions built more recently in the gardens in south Jiangsu by craftsmen from Xiangshan, Suzhou, are all marred by putting thin and tall columns under high roofs. The Ming structures in the Garden of Cultivation, by contrast, appear much steadier under slightly lower roofs.

In a word, single buildings must be designed by keeping in mind the whole picture of the garden in which they are located. As to plane variations, even if in the innermost rooms or chambers, adequate open space must be left in solid areas, and outlets should be built where the bends lead. Small verandahs—one-framed, two-framed or two-and-half-framed—should be set up where they are needed in the milieu. The Vernal Crabapple Yard in the Humble Administrator's Garden, for instance, is two-framed, with one frame obviously larger than the other. The Kowtow-to-Peak Verandah in the Lingering Garden, for another example, consists of two and a half frames, but the half-frame section is the most intriguing, a fact which bears out the theory of *The Craft of Gardens* on the aesthetics of offbeat designs.

High and low in accord, left and right in balance, intangibles and tangibles in mutual contrast, none of these aspects in a building are to be ignored. The Wan's Garden on Editorial Service Librarian Wang's Lane is a small affair, but its study stands on its own to form a quiet zone whose furnishing and interior decoration rank among the best in Suzhou together with the eastern and western parlors in the Ren's House on Iron Vase Lane, the parlors of Gu Wenbin's⁴⁹ Estate, the Master-of-Fishnets Garden, the Cheng's Garden on Western Hundred Flower Lane, and the Wu's House on Big Stone Lane. (For details, please refer to my book *Collected Records of Decorative Devices*.) The pity is, however, there is still much left to be desired in this regard in many other gardens in Suzhou. The interior decoration in the Lingering Garden is too trivial and vulgar, and exquisite designs are few and far between. The Humble Administrator's Garden is finely appointed, but there are still cases in which the interior decorations are pedestrian and invariant, as if they were scraped together haphazardly during restorations and repairs done in later periods. The Garden of Brotherly Indulgence, on its part, has virtually lost all its original furnishing but its land boat survives fortunately to be seen as a paragon of exquisite interior décor for the whole area of the former kingdom of Wu.

As the arteries of a garden, roofed walkways are noteworthy for their importance in garden architecture. Common to today's Suzhou gardens is the double-lane walkway, with a white-washed wall running along its middle line to provide a lane or passageway on either side of the wall, which is usually adorned with latticed windows. (See my book *Latticed Windows* for details.) This kind of walkway is usually built in an open garden, such as the one that runs along the river in the Dark Blue Waves Pavilion. A double-lane walkway may also serve as a partitioning wall to expand space or provide transition between the entrance and the interiors of a garden. The double-lane walkway in the Garden of Brotherly Indulgence, for example, is a replica of the one in the Dark Blue Waves Pavilion, which serves the same purpose but is also designed to ward the Thatched Hut of Wintry Friends⁵⁰ and the Verandah in Obedience to Rocks off direct afternoon sunrays and the north wind, while the shadows the sun tosses through the latticed windows conjure up fascinating patterns.

Roofed walkways are built on land or along a stream. Some are winding, the others straight. Flat and stiff ones are taboo. Those in present-day Suzhou gardens, however, look somewhat unnatural and stilted for their excess emphasis on twists and turns, and the walkway at the foot of the northern wall of the central part of the Lingering Garden is such an example. Its lower section is a balustrade built of bricks, which seems stifling and out of place for the hanging fascia. Worse, its columns, being sandwiched between brickwork, make the entire walkway look exceptionally rigid and bulky. A better effect can be achieved with latticed brickwork, as is exemplified by the walkway in the Ren's House on Iron Vase Lane and by the gazebo on a waterside walkway in the western part of the Humble Administrator's Garden. The sinuous Willow-Shaded Winding Walkway in the Humble Administrator's Garden, for another, employs a wooden balustrade on the waterfront and the King of Wu's Backrest on the other side, an arrangement that stands to reason.

The waterside walkway in the western part of the Humble Administrator's Garden is extolled as a picturesque structure for its judicious winding course and gradients that measure up to the standard prescribed in *The Craft of Gardens* for a "floating walkway that also serve ferrying purposes." This walkway is particularly commendable for gracing some of its bends with a tiny water gazebo amidst plantains and Lake Tai rockeries to make a difference in an otherwise conventional scenery.

Employed sparingly in the Lion's Grove, the Lingering Garden, and the Humble Administrator's Garden, most of the mountain-climbing walkways run along bordering walls. Due attention must be paid to keeping such a walkway's sloping gradients in tune with the mountain's height; otherwise, it would be top-heavy and out of balance. If the terrain is uneven in width, it is advisable to alternate single- and double balustrades on the slopes, and a case in point is found in the walkway in the western part of the Lingering Garden. The bends of twisted walkways are oftentimes left open and interspersed at random with a few bamboos, rocks or plantains to yield dainty, tiny attractions. Commenting on walkways, Li Dou (1749-1817)⁵¹ says in the *Record of the Painted Pleasure Boats of Yangzhou*,

A walkway paved with bricks is called an echoing walkway. One that twists and turns in line with the terrain is a wandering walkway....One that runs into a bamboo grove is a bamboo walkway, and one that is close to water is a waterside walkway. A walkway's ridge ends may occasionally protrude out of a cluster of flowers; and its corners may project over the northern bank of a pond once in a while. Sometimes it clings to a cliff, hence its imposing balustrade. Sometimes it arches over a red plank board with boats sailing underneath, or straddling pavilions, terraces and lofts to facilitate gentle and convenient passage. The walkways are valued for their balustrades—a nice balustrade is often likened to a beauty wearing a short-sleeved or sleeveless dress to accentuate her slender waist. The wooden boards fixed on the walkway are known as "flying benches" or "beauty's backrests." The bulging part of a walkway is regarded as a verandah.

One may learn a great deal from this piece of elaborate advice.

Nowadays we have roofed walkways flanked by plantains, which are therefore called plantain walkways; and those running through willows are willow walkways. Both designs are well-intended, offering cooling shades to keep off heat waves in summer, and making people feel toasty in warm sunshine in winter. Some walkways have paintings hanging under their roofs, which have been known as painting walkways since ancient times; some of those built in recent years have their walls inlaid with stone tablets inscribed with poems in calligraphic handwriting. Both practices put the walkways to best use.

A bridge is to a water surface what a roofed walkway is to an open space in the Chinese garden. Stone beam bridges are commonplace in Suzhou gardens, be they straight ones, zigzagging ones with three, five or nine bends, or curved ones. Some are level with the shores of a stream or lake. Others are kept lower than the banks or look like floating on water, which are legacies handed down from days of yore and can be found in the Garden of Cultivation of Suzhou, the Solace-Imbued Garden of Wuxi, and some other gardens in the nearby county of Changshu. The bridge in the Garden of Brotherly Indulgence, and the one in ruins in the Yan's Garden in the ancient town of Mudu, Suzhou, share something in common, but they are kept a little higher than the water surface. In my view, these bridges were designed to achieve the following effects. First, walking through a bridge at water level gives one the feeling of treading rippling water while the water surface looks vast and the bridge precipitous; second, the surrounding buildings and hills look more impressive against a low-lying, water-hugging bridge, which also set off congenially the hills, lofts and terraces ashore. The bridge in the Solace-Imbued Garden in Wuxi is such an example, which spanning a secluded valley below the flat ridge of an artificial hill, with the nearby Huishan Mountain offering the best views to be borrowed in the backdrop, employs a typical Mingdynasty landscape gardening design to best advantage.

Today's beam bridges, however, are often deployed carelessly, as

if the topography and their own sizes were nonexistent. Not to mention the height and style of such bridges' balustrades, which are often adopted without looking into the bridge and its surroundings as a whole. Sometimes even iron balustrades are used, which is what happened exactly in the western part of the Humble Administrator's Garden. However, the small bridges in the Garden of Cultivation and the Rainbow-Leaning Bridge in the Humble Administrator's Garden are among the most desirable. The two three-bend and five-bend bridges in the central part of the Humble Administrator's Garden have railings proportionate enough to their respective bridges and environment, but the pity is that both are a little too tall. The stone bridge that connects the two hillocks on which the Fragrant Snow and Luxuriant Cloud Pavilion and the Frost Awaiting Pavilion are perched respectively is fashioned out of a single stone slab with no railings on it—natural and plain, it is born of a stroke of genius.

Another common type of bridges is the small arch bridge. There is one such bridge in the Lion's Grove and another in the Master-of-Fishnets Garden. The former compares unfavorably with the latter in that an arched bridge is not supposed to sit on a rivulet's middle section, where it would appear clumsy and overwhelming and block the view, with no spaciousness and airiness to speak of. The latter is found at one end of a river; viewed from the west, it is exquisitely reflected in the expansive water surface, and viewed from the east, the pavilions and terraces are mirrored in the river—the scenes may be different, but the concepts are the same. In what looks like a stopgap, the arch in the stone bridge in the Half Garden on Zhongyouji Lane is modified to fit into a constrained space. As to the treatment of tiny, shallow creeks, *The Craft of Gardens* suggests,

You may set stepping stones in the water.

I think that for tiny and shallow brooks, stepping stones are more natural and much better than a bridge. It is a shame this clever approach is all but lost today.

The *Leisure Sketches by a Little Window* says of the roads in

gardens,

A trail inside of the gate should be made to twist and turn....A footpath by the side of a house must be made to fork.

The roads we see today in Suzhou gardens more or less follow these principles. The paths in the central part of the Humble Administrator's Garden are good examples. The designers took into consideration the lay of land and added appropriate changes to the Ming-dynasty rules they were following, thereby achieving clear distinction between primary and secondary paths with graceful twists and turns. The paths at the Beauty-Encircled Mountain Abode are made to bend and swerve a little bit to hug the villa's cramped space, but such bends are tweaked to a nicety to make sure people can see every sight of interest as they traipse along the road. The trails in the Lion's Grove and the Garden of Brotherly Indulgence, however, twist and turn in ways that fly in the face of common sense and nature's law, to the bewilderment of those who happen to hit such trails. Indeed, affectation and arbitrariness are not just inartistic, and they defeat the purposes as well.

Paving the ground is another important garden-making aspect that merits serious attention, whether it be a front courtyard, a trail, or a main road. In today's Suzhou gardens, bricks are paved obliquely on a main road, which makes the job easy and simple and allows the freedom to work out the patterns. Gravels are used on main roads, footpaths and in front of halls, and this type of pavements can also be adorned with patterns wrought with pottery shards. Sometimes pottery shards are paved obliquely and mingled with porcelain shards. Pebbles, sometimes interspersed with porcelain shards, can produce more elaborate and elegant patterns than bricks or gravels, as is shown by some roads in the Linger Garden, but pebble pavements call for regular maintenance—the soil in the gaps between the pebbles is often washed down by the rain or swept away by garden cleaners, and weeds tend to be another headache.

"Cracked-ice pattern" is not uncommon in paving front

courtyards, and it comes in two structures in south Jiangsu gardens. First, laying stone slabs of different shapes flatly on the ground in such a pattern, as is done in front of the Hall of Far-Drifting Fragrance in the Humble Administrator's Garden, which looks simple and natural, but the ground may become warped here and there. Second, putting such stone slabs together in a mortise-and-tenon fashion to form rippling patterns—a laborious job indeed, but it produces a durable pavement that is also neat and tidy. Examples of it are found in front of the Green-Soaked Mountain Villa in the Lingering Garden and the Gen'an's Parlor in Gu Wenbin's Estate at Iron Vase Lane. The stairway in front of a hall sometimes assumes the natural forms of stones, such as those in front of the Hall of Far-Drifting Fragrance in the Humble Administrator's Garden and the Five-Peak Celestial Hall in the Lingering Garden.

The walls of Suzhou gardens are built of riprap or finely ground bricks. They are latticed, whitewashed, or both, but most of them are simply whitewashed. The surrounding walls, in most cases, have latticed tile windows opened into their upper half; and the inner walls are inlaid with tile-latticed or brick-framed windows. The whitewashed wall with flower shadows thrown on it is readily talked about by everybody who see it. Finely ground brick walls are used sparingly on buildings inside a garden. Most gateway walls are bedecked with patterns fashioned out of finely ground bricks, as is exemplified by the gateway of the Humble Administrator's Garden. Riprap is actually reserved for a wall's lower section, from the ground up to one third of the wall's height. I remember seeing, in an old house in Shanghai, a state-of-the-art wall that is lined with stones in cracked-ice patterns and dotted with plum flower patterns, which I surmise is a legacy of the Ming. A wall with latticed windows that divides up a water surface in the middle inside the Western Garden is a school in its own right.

Antithetical couplets and inscribed tablets are as indispensable to Chinese gardens as beard and eyebrows are to a man. In Suzhou,

scholars and artists, through the ages are deeply involved in garden-making by vesting man-made garden scenery and structures with poetic passion and picturesque images drawn from nature, places of historical interest, and texts of verse and prose, while eulogizing every mountain, wood, rock, ravine, pavilion or verandah in the gardens with the finest and most proper diction. Thus an affective visitor feasting his eyes on a garden scenery would be mesmerized by the calligraphic couplet or tablet attached to it, because the inscriptions always give the most fitting interpretation of the scenery in question and never fail to strike a deep chord in his heart. The Hall of Far-Drifting Fragrance and the Stay-and-Listen Belvedere in the Humble Administrator's Garden are both dedicated to lotus flowers, but their names are derived from different lines—the former, "The farther the aroma drifts, the purer it becomes"; the latter, "May the withered lotus leaves stay to listen to the pattering rain." The Osmanthus Fragrance Verandah of the Lingering Garden and the Vernal Crabapple Yard of the Humble Administrator's Garden are named respectively after the trees planted in them, and those who chance upon such trees and settings have come up with so many fine literary and art works, something which can happen only in a Chinese garden. It is my hope that all such couplets and tablets on garden scenery be preserved for posterity. Every garden in Suzhou is in possession of well-written inscriptions. The Garden of Brotherly Indulgence, in particular, once had a complete array of couplets drawn from Song lyric poems that describe scenic sights in meticulous and tactful ways, but, alas, few of them have survived! Eight or nine out of ten inscribed boards or tablets are made of ginkgo wood, which is more resistant to the high wind in the gardens than other woods. The Chinese characters engraved in such boards are in intaglio and covered with malachite green pigments or sometimes lacquered in cold color tones. Brick boards are also used for this purpose, which look clean and lovely. The inscriptions usually come in seal script, official script, or the running hand for their simplistic and natural forms. Regular script is

rarely used. Chinese calligraphy and painting share the same origin, so the boards and tablets bearing calligraphic inscriptions are objets d'art themselves to help enhance the allure of the gardens in which they are placed.

The importance of trees to gardens is self-evident. Because most gardens in the Jiangnan area are small and closed behind tall walls, due attention ought to be paid to a number of factors before trees are planted in them: the sunny or shady side of the site and its elevation; the selected trees' growing speed, cold-resistance and drought-enduring properties, and whether they can grow into ancient-looking, gnarled or exuberant shapes. Based on these observations, further importance ought to be given to the trees' positions and their relationship with rockeries. As microcosms of natural landscape, rockeries and ponds should never be overshadowed by trees. The trees' sizes and shapes, therefore, must be controlled. What merits attention is that a tree stretching its gnarling branches into water and twist its knotted roots around a rock always make the scene look hoary and unsightly. Just as Li Gefei puts it,

The touch of venerable age pales where human skill steals the limelight.

A good variety of trees are found in Suzhou gardens, such as elms and wingnuts in the Humble Administrator's Garden, and ginkgo trees in the central part and maples all over the western part of the Lingering Garden. Being relatively small, the Garden of Brotherly Indulgence features osmanthus trees, pines, and lacebark pines. Lacebark pines are particularly cute despite their simple shapes, but they are such a rarity in small gardens. There are also gardens having an assortment of pines, plums, palms, and boxwoods that are known for their slow growth. A small garden tucked away behind a high wall tends to have more shady areas than sunny ones, so cold-resistant plants are cultivated along the shady side of a wall, such as privets, palms and bamboos. Alpine trees such as pines and firs belong in mountain valleys. For stone crevices in front of steps, shade-tolerant evergreen grass is the best choice. A garden with more evergreens than

deciduous plants will remain green all year round and has little chance to go "bald" in late autumn and winter. The elms, scholar trees, wingnuts, hackberries, water elms and maple trees and the like must be pruned annually to keep them in rugged shape, and another plus for such trees is that they sport nice-looking roots. The elms and wingnuts look their best when fully grown, with verdant twigs thriving on their hollow trunks.

In Suzhou gardens trees are generally planted on artificial hills in two ways. Firstly, the top and foot of such a hill are reserved exclusively for large trees so that visitors can take in the beauty of their exposed roots amidst rockwork; examples of this are found in both the Lingering Garden and the Humble Administrator's Garden. Secondly, the trees planted atop a hill or at its foot are made to overlook the bamboos or the shrubs or creepers that cling to rocks to generate a feeling of depth and utmost luxuriance. The Dark Blue Waves Pavilion and the Humble Administrator's Garden are excellent examples in this regard. Analyses indicate that such tree-treating methods originate in different styles of legendary painters. The former embodies the placid and facile style of Ni Zan (1301-1374)⁵² of the Yuan; the latter assimilates the somewhat gloomy and dark-toned style of Shen Zhou (1427-1509)⁵³ of the Ming. It is advisable to choose willows, bamboos, or reeds for water-bound, low-lying places. The shady side of a wall ought to be covered with ivies, slender bamboos, nandinas and begonias with green leaves, cold-colored flowers and bright-colored fruits, but again, they need annual pruning to keep their growth in check.

Growing flowers follows the one and same principle for trees in a garden. Osmanthus and camellias should be planted in shady areas with a little sunshine. Both are evergreens that bloom when other flowers do not—osmanthus in autumn and camellias in early spring; both look their serene and plump best when nodding and flickering among quaint rockeries with graceful postures. Pergolas of wisterias present green shades and a profusion of jewellery- or dewdrop-like

flowers in time for late spring. Peonies are often shown on terraces skirted by a balustrade of stones with nice veins because they need an abundance of sunshine and a high location to show off their resplendent flowers. Magnolias, crabapple trees, peonies, and osmanthus are by tradition cultivated in courtyards for their names suggest "riches and honours descending upon a jade hall." This implication may sound hackneyed, but the way our predecessors coordinate different flowers by taking their florescence and color into account is not without their reasons. If planted in groves, peaches and plums are suitable for viewing from afar, but they are feasible for large gardens such as the Lingering Garden and the Humble Administrator's Garden in Suzhou.

There are two rules of thumb for the treatment of trees in Suzhou gardens. One is to plant the same type of trees in a grove, such as the pines at the Wave-Listening Place in the Garden of Brotherly Indulgence, the maples in the western part and the osmanthus in front of the Osmanthus Fragrance Verandah in the Lingering Garden. At the same time, designers should consider the height and density of the trees in relation to their surroundings. The other is to allocate a variety of trees in the same grove, but like the composition of a painting, meticulous attention must be paid to a number of issues, such as if the orientation of the chosen trees and the elevation of the site are suitable for a grove of multiple tree species, the contrast and balance of leaf colors, the ratio between evergreen and deciduous trees, their flowering seasons, and the shape of leaves and postures of the trees. The relationship between trees and rocks, too, should not be lost on the designers—the two factors must be combined into an organic whole so that every single stone in a rockery can fascinate the visitors and every inch of rock can rivet the observer's attention. What is more, consistency between plants and buildings must be adjusted to the point where their styles and colors can complement each other.

The number of lotuses growing in a pond must be limited. Otherwise, both the water surface and the silhouettes of buildings in it

would be marred badly. Just let one or two slim lotuses sway invitingly in the middle of the pond, and it will become the apple of the spectator's eye without fail. In the Gu's Garden in the city of Kunshan in Jiangsu, lotus roots are reportedly planted under stone slabs that line the bottom of a pond. There are a few holes in every such slab, and the propagation of the lotuses planted is well controlled. My mentor Liu Dunzhen told me, "In the Xu's East Garden of the Ming in Nanjing, a vat is placed at the bottom of a pond, with lotuses buried in it." The slabs in the Gu's Garden of Kunshan differ from the aforementioned vat in Nanjing, but their purposes are the same.

The delicate elegance and serenity of the gardens of south Jiangsu come in striking contrast to the green-and-gold glamour of the royal gardens of north China. The success of south Jiangsu in this regard is owed to four factors.

First, cold color tones are applied to residential buildings, such as maroon or non-glossy black for the capitals of rafters and beams, and dark green for the hanging fascia. Such cold color tones come into bold relief against the whitewashed walls that are properly toned down by the well-spaced shadows thrown by flowers upon them, thereby providing the needed transition to bring about a quaint scenery.

Second, almost all the Suzhou gardens are attached to dwellings where the places for reading and self-cultivation are provided. The peace and quiet needed for such rooms in southern gardens is predicated on cold color tones, which is a far cry from the pomp and pageantry of the royal gardens up north. Nevertheless, Suzhou scholar-officials did show off their affluence through fine furnishing, meticulous rockwork as well as their collections of antiques and curios, but their quest for serenity and elegance remained the order of the day.

Third, the southern school of Chinese landscape painting characterized by delicate ink and reddish color tones was having a

deep impact on the scholar-officials, men of letters and painters in the Jiangnan area. The gardens born under such impact are imbued with a graceful and elegant style, to the exclusion of elaborate color and gilding.

Fourth, vermilion and other warm colors are out of place in the Jiangnan area's hot weather, not to mention the fact that commoners, not allowed the privileges reserved for royalty with regard to buildings, apparels and whatnot, were limited to the use of simple and quiet color tones, which, however, can often achieve what exuberant colors cannot. Unpretentious play of color is in congruity with the garden architecture, greyish skies, thriving vegetation, exquisite rockeries and flowing water in the Jiangnan area, and contribute to an aura of peace and tranquillity, the very soul of Jiangnan gardens.

Another salient feature of Suzhou gardens in particular and Chinese gardens in general is that they induce maximum comfort and aesthetic well-being and draw throngs of visitors with their perennial charms no matter what the natural conditions. Contributing to such charms are not only these gardens' rockeries and bodies of water, but also their lofts and halls that are lined up in rows and columns, corridors and galleries winding or twisting, their railings and balustrades that encircle and connect the spaces, as well as their trees and flowers that contrast or supplement each other.

Circumstances evoke different feelings in poets and painters. Plantain colonnades in summer, plum shadows and moonlit snow in winter, bright sunny days and luxuriant flowers in spring, red knotweeds and reed-rimmed lakes in autumn—the sceneries may change with the season, but all of them are lovable. As to the wind rustling through pines, the rain spattering on wild rice and cattails, the moonlight shifting on swaying flowers, or the fog enveloping a loft or terrace, it is a typical case of "beauty lies in the eye of the beholder"—the fascinations of these ideal scenes are achieved by fusing the designer's refined literary and artistic attainment with the quintessence of an actual setting, and played up through dramatic

means. The piling up of rocks, the erection of a building, the dredging of a stream, the search for spring water, or the planting of flowers or bamboos, every such effort is meant for the same result.

An artist or a writer's appreciation of nature's beauty is not limited to sunny weather on a spring day. Rather, his eye is set on every season as he endeavours to convert it into a realm of beauty. He would like to see flowers' shadows on whitewashed walls, listen to the wind whistling through pines and the rain spattering on lotus leaves, and enjoy the moonlight on the tips of willows and the radiance of the setting sun on plums and bamboos. All the while he hopes to see all the things he dreams of come true. He imbues every rock or tree with overflowing feelings, so that there is sentiment everywhere and liveliness in every direction, and evocations implied in every twist or turn in the scenery. Herein lies another rich aspect of the traditional Chinese garden.

·(V)

So much for the few observations garnered from my daily involvement in the craft of gardens, which I present here for everybody's reference. The Suzhou gardens have written a brilliant page in Chinese garden-making history. Today, they are still accommodating people who flock in to see sights or take a break. For the sake of inheriting and carrying forward the fine cultural Chinese traditions embodied in these gardens, I deem it necessary to put this article on my readers' desks.

苏州园林概述

.一

我国园林，如从历史上溯源的话，当推古代的囿与园，以及《汉书》上所称的苑。《周礼天官大宰》：“九职二曰园圃，毓草林。”《地官囿人》：“掌囿游之兽禁，牧百兽。”《地官充人》：“以场圃任园地。”《说文》：“囿，苑有垣也。一曰禽兽有囿。圃，种菜曰圃。园，所以种果也。苑，所以养禽兽也。”据此则囿、园、苑的含意已明。我们知道稀韦的囿，黄帝的圃，已开囿圃之端。到了三代，苑囿专为狩猎的地方，例如周姬昌（文王）的囿，刍豢雉兔，与民同之。秦汉以后，园林渐渐变为统治者游乐的地方，兴建楼馆，藻饰华丽了。秦嬴政（始皇）筑秦宫，跨渭水南北，覆压三百里。汉刘彻（武帝）营上林苑、甘泉苑，以及建章宫北的太液池，在历史的记载上都是范围很大的。其后刘武（梁孝王）的兔园，开始了叠山的先河。魏曹丕（文帝）更有芳林园。隋杨广（炀帝）造西苑。唐李淮（懿宗）于苑中造山植木，建为园林。北宋赵佶（徽宗）之营艮岳，为中国园林之最著于史籍者。宋室南渡，于临安（杭州）建造玉津、聚景、集芳等园。元忽必烈（世祖）因辽金琼华岛为万岁山太液池。明清以降除踵前遗规外，并营建西苑、南苑，以及西郊畅春、清漪、圆明等诸园，其数目视前代更多了。

私家园林的发展，汉代袁广汉于洛阳北邙山下筑园，东西四里，南北五里，构石为山，复蓄禽兽其间，可见其规模之大了。梁冀多规苑囿，西至弘农，东至荥阳，南入鲁阳，北到河淇，周围千里。又司农张伦造景阳山，其园林布置有若自然。可见当时园林在建筑艺术上已有很高的造诣了。尚有茹皓，吴人，采北邙及南山佳石，复筑楼馆列于上下，并引泉蒔花，这些都以人工代天巧。魏晋六朝这个时期，是中国思想史上大转变的时代，亦是中国历史上战争最频繁的时代，士大夫习于服食，崇尚清谈，再兼以佛学昌盛，于是礼佛养性，遂萌出世之念，虽居城市，辄作山林之想。在文学方面有咏大自然的诗文，绘画方面有山水画的出现，在建筑方面就在宅第之旁筑园了。石崇在洛阳建金谷园，从其《思归引序》来看，其设计主导思想是“避嚣烦”“寄情赏”。再从

《梁书萧统传》、徐勉《戒子嵩书》、庾信《小园赋》等来看，他们的言论亦不外此意。唐代如宋之问的蓝田别墅、李德裕的平泉别墅、王维的辋川别业，皆有竹洲花坞之胜，清流翠筱之趣，人工景物，仿佛天成。而白居易的草堂，尤能利用自然，参合借景的方法。宋代李格非《洛阳名园记》、周密《吴兴园林记》，前者记北宋时所存隋唐以来洛阳名园如富郑公园等，后者记南宋吴兴园林如沈尚书园等。记中所述，几与今日所见园林无甚二致。明清以后，园林数目远迈前代，如北京勺园、漫园，扬州影园、九峰园、个园，海宁安澜园，杭州小有天园，以及明王世贞《游金陵诸园记》所记东园等，其数不胜枚举。今存者如杭州皋园，南浔适园、宜园、小莲庄，上海豫园，常熟燕园，南翔古猗园，无锡寄畅园等，为数尚多，而苏州又为各地之冠。如今我们来看看苏州园林在历史上的发展。

·二

苏州在政治经济文化上，远在春秋时的吴，已经有了基础，其后在两汉、两晋又逐渐发展。春秋时吴之梧桐园，以及晋之顾辟疆园，已开苏州园林的先声。六朝时江南已为全国富庶之区，扬州、南京、苏州等处的经济基础，到后来形成有以商业为主，有以丝织品及手工业为主，有为官僚地主的消费城市。苏州就是手工业重要产地兼官僚地主的消费城市。

我们知道，六朝以还，继以隋代杨广（炀帝）开运河，促使南北物资交流；唐以来因海外贸易，江南富庶视前更形繁荣。唐末中原诸省战争频繁，受到很大的破坏，可是南唐吴越范围，在政治上、经济上尚是小康局面，因此有余力兴建园林，宋时苏州朱长文因吴越钱氏旧园而筑乐圃，即是一例。北宋江南上承南唐、吴越之旧，地方未受干戈，经济上没有受重大影响，园林兴建不辍。及赵构（高宗）南渡，苏州又为平江府治所在，赵构曾一度“驻蹕”于此。王唤营平江府治，其北部凿池构亭，即使官衙亦附以园林。其时土地兼并已甚，豪门巨富之宅，其园林建筑不言可知了。故两宋之时，苏州园林著名者，如苏舜钦就吴越钱氏故园为沧浪亭，梅宣义构五亩园，朱长文筑乐圃，而朱勔为赵佶营艮岳外，复自营同乐园，皆较为著的。元时江浙仍为财富集中之地，故园林亦有所兴建，如狮子林即其一例。迨入明清，土地兼并之风更甚，而苏

州自唐宋以来已是丝织品与各种美术工业品的产地，又为地主官僚的集中地，并且由科举登第者最多，以清一代而论，状元之多为全国冠。这些人年老归家，购田宅，设巨肆，除直接从土地上剥削外，再从商业上经营盘剥，以其所得大建园林以娱晚境。而手工业所生产，亦供若辈使用。其经济情况大略如此。它与隋唐洛阳、南宋吴兴、明代南京，是同样情况的。

除了上述情况之外，在自然环境上，苏州水道纵横，湖泊罗布，随处可得泉引水，兼以土地肥沃，花卉树木易于繁滋。当地产石，除尧峰山外，洞庭东西二山所产湖石，取材便利。距苏州稍远的如江阴黄山、宜兴张公洞、镇江圖山、大岷山、句容龙潭、南京青龙山、昆山马鞍山等所产，虽不及苏州为佳，然运材亦便。而苏州诸园之选峰择石，首推湖石，因其姿态入画，具备造园条件。《宋书·戴颙传》“颙出居吴下。吴下士人共为筑室，聚石引水植林开涧，少时繁密，有若自然。”即其一例。其次，苏州为人文荟萃之所，诗文书画人才辈出。士大夫除自出新意外，复利用了很多门客，如《吴风录》载：“朱勔子孙居虎丘之麓，尚以种艺垒山为业，游于王侯之门，俗呼为花园子。”又周密《癸辛杂识》云：“工人特出于吴兴，谓之山匠，或亦朱勔之遗风。”既有人为之策划，又兼有巧匠，故自宋以来造园家如俞渤、陆叠山、计成、文震亨、张涟、张然、叶洮、李渔、仇好石、戈裕良等，皆江浙人。今日叠石匠师出南京、苏州、金华三地，而以苏州匠师为首，是有历史根源的。但士大夫固然有财力兴建园林，然《吴风录》所载，“虽閭閻下户亦饰小山盆岛为玩”，这可说明当地人民对自然的爱好了。

苏州园林在今日保存者为数最多，且亦最完整，如能全部加以整理，不啻是个花园城市。故言中国园林，当推苏州了。我曾经称誉云：“江南园林甲天下，苏州园林甲江南。”这些园林我经过五年的调查踏勘，复曾参与了修复工作。前夏与今夏又率领同济大学建筑系的同学作教学实习，主要对象是古建筑与园林，逗留时间较久，遂以测绘与摄影所得，利用拙政园、留园两个最大的园作例，略略加以说明一些苏州园林在历史上的发展，与设计方面的手法，供大家研究。其他的一些小园林，有必要述及的，亦一并包括在内。

拙政园：拙政园在娄齐二门间的东北街。明嘉靖时（1522—1566年）王献臣因大宏寺废地营别墅，是此园的开始。“拙政”二字的由来，是用潘岳“拙者之为政”的意思。后其子以赌博负失，归里中徐氏。清初属海宁陈之遴，陈因罪充军塞外，此园一度为驻防将军府，其后又为兵备道馆。吴三桂婿王永宁亦曾就居于此园。后没入公家，康熙初改苏松常道新署，其后玄烨（康熙）南巡，也来游到此。苏松常道缺裁，散为民居。乾隆初归蒋棨，易名复园。嘉庆中再归海宁查世倓，复归平湖吴璥。迨太平天国克复苏州，又为忠王府的一部分。太平天国失败，为清政府所据。同治十年（1871年）改为八旗奉直会馆，仍名拙政园。西部归张履谦所有，易名补园。解放后已合而为一。

拙政园的布局主题是以水为中心。池水面积约占总面积五分之三，主要建筑物十之八九皆临水而筑。文徵明《拙政园记》：“在郡城东北，界娄齐门之间。居多隙地，有积水亘其中，稍加浚治，环以林木。……”据此可以知道是利用原来地形而设计的，与明末计成《园冶》中《相地》一节所说“高方欲就亭台，低凹可开池沼……”的因地制宜方法相符合。故该园以水为主，实有其道理在。在苏州不但此园如此，阊头巷的网师园，水占全园面积达五分之四。平门的五亩园亦池沼逶迤，望之弥然，莫不利用原来的地形而加以浚治的。景德路环秀山庄，乾隆间蒋楫凿池得泉，名“飞雪”，亦是解决水源的好办法。

园可分中、西、东三部，中部系该园主要部分，旧时规模所存尚多，西部即张氏“补园”，已大加改建，然布置尚是平妥。东部为明王心一归田园居，久废，正在重建中。

中部远香堂为该园的主要建筑物，单檐歇山面阔三间的四面厅，从厅内通过窗棂四望，南为小池假山，广玉兰数竿，扶疏接叶，云墙下古榆依石，幽竹傍岩，山旁修廊曲折，导游者自园外入内。似此的布置不但在进门处可以如入山林，而坐厅南望亦有山如屏，不觉有显明的入口，它与住宅入口处处置内照壁，或置屏风等来作间隔的方法，采用同一的手法。东望绣绮亭，西接倚玉轩，北临荷池，而隔岸雪香云蔚亭与待霜亭突出水面小山之上。游者坐此厅中，则一园之景可先窥其轮廓了。以此厅为中心的南北轴线上，高低起伏，主题突出。而尤以池中岛屿环以流水，掩以丛竹，临水湖石参差，使人望去殊多不尽之意，仿佛置身于天然池沼中。从远香堂缘水东行，跨倚虹桥，桥与阑皆甚低，系明代旧构。越桥达倚虹亭，亭倚墙而作，仅三面临空，故又名东半亭。向北

达梧竹幽居，亭四角攒尖，每面辟一圆拱门。此处系中部东尽头，从二道圆拱门望池中景物，如入环中，而隔岸极远处的西半亭隐然在望。是亭内又为一圆拱门，倒映水中，所谓别有洞天以通西部的。亭背则北寺塔耸立云霄中，为极妙的借景。左顾远香堂、倚玉轩及香洲等，右盼两岛，前者为华丽的建筑群，后者为天然图画。刘师敦楨云：“此为园林设计上运用最好的对比方法。”根据实际情况，东西二岸水面距离并不太大，然而看去反觉深远特甚。设计时在水面隔以梁式石桥，逶迤曲折，人们视线从水面上通过石桥才达彼岸。两旁一面是人工华丽的建筑，一面是天然苍翠的小山，二者之间水是修长的，自然使人们感觉更加深远与扩大。对岸老榆傍岸，垂杨临水，其间一洞窈然，楼台画出，又别有天地了。从梧竹幽居经三曲桥，小径分歧，屈曲循道登山，达巅为待霜亭，亭六角，翼然出丛竹间。向东襟带绿漪亭，西则复与长方形的雪香云蔚亭相呼应。此岛平面为三角形，与雪香云蔚亭一岛椭圆形者有别，二者之间一溪相隔，溪上覆以小桥，其旁幽篁丛出，老树斜依，而清流涓涓，宛若与树上流莺相酬答，至此顿忘尘嚣。自雪香云蔚亭而下，便到荷风四面亭。亭亦六角，届三路之交点，前后皆以曲桥相贯，前通倚玉轩而后达见山楼及别有洞天。经曲廊名柳荫路曲者达见山楼，楼为重檐歇山顶，以假山构成云梯，可导至楼层。是楼位居中部西北之角，因此登楼远望，其至四周距离较大，所见景物亦远，如转眼北眺，则城隈景物，又瞬入眼帘了。此种手法，在中国园林中最为常用，如中由吉巷半园用五边形亭，狮子林用扇面亭，皆置于角间略高的山巅。至于此园面积较大，而积水弥漫，建一重楼，但望去不觉高耸凌云，而水间倒影清澈，尤增园林景色。然在设计时，应注意其立面线脚，宜多用横线，与水面取得平行，以求统一。香洲俗呼“旱船”，形似船而不能行水者。入舱置一大镜，故从倚玉轩西望，镜中景物，真幻莫辨。楼上名激观楼，亦宜眺远。向南为得真亭，内置一镜，命意与前同。是区水面狭长，上跨石桥名小飞虹，将水面划分为二。其南水榭三间，名小沧浪，亦跨水上，又将水面再度划分。二者之下皆空，不但不觉其局促，反觉面积扩大，空灵异常，层次渐多了。人们视线从小沧浪穿小飞虹及一庭秋月啸松风亭，水面极为辽阔，而荷风四面亭倒影、香洲侧影、远山楼角皆先后入眼中，真有从小窥大，顿觉开朗的样子。枇杷园在远香堂东南，以云墙相隔。通月门，则嘉实亭与玲珑馆分列于前，复自月门回望雪香云蔚亭，如在环中，此为最好的对景。我们坐园中，垣外高槐亭

台，移置身前，为极好的借景。园内用鹅卵石铺地，雅洁异常，惜沿墙假山修时已变更原形，而云墙上部无收头，转折又略嫌生硬。从玲珑馆旁曲廊至海棠春坞，屋仅面阔二间，阶前古树一木，海棠一树，佳石一二，近屋回以短廊，漏窗外亭阁水石隐约在望，其环境表面上看来是封闭的，而实际是处处通畅，面面玲珑，置身其间，便感到密处有疏，小处现大，可见设计手法运用的巧妙了。

西部与中部原来是不分开的，后来一园划分为二，始用墙间隔，如今又合而为一，因此墙上开了漏窗。当其划分时，西部欲求有整体性，于是不得不在小范围内加工，沿水的墙边就构了水廊。廊复有曲折高低的变化，人行其上，宛若凌波，是苏州诸园中之游廊极则。卅六鸳鸯馆与十八曼陀罗花馆系鸳鸯厅，为西部主要建筑物，外观为歇山顶，面阔三间，内用卷棚四卷，四隅各加暖阁，其形制为国内唯一孤例。此厅体积似乎较大，其因实由于西部划分后，欲成为独立的单位，此厅遂为主要建筑部分，在需要上不能不建造。但碍于地形，于是将前部空间缩小，后部挑出水中，这虽然解决了地位安顿问题，但卒使水面变狭与对岸之山距离太近，陆地缩小，而本身又觉与全园不称，当然是美中不足处。此厅为主人宴会与顾曲之处，因此在房屋结构上，除运用卷棚顶以增加演奏效果外，其四隅之暖阁，既解决进出时风击问题，复可利用为宴会时仆从听候之处，演奏时暂作后台之用，设想上是相当周到。内部的装修精致，与留听阁同为苏州少见的。至于初春十八曼陀罗花馆看宝朱山茶花，夏日卅六鸳鸯馆看鸳鸯于荷藕间，宜乎南北各置一厅。对岸为浮翠阁，八角二层，登阁可鸟瞰全园，惜太高峻，与环境不称。其下隔溪小山上置二亭，即笠亭与扇面亭。亭皆不大，盖山较低小，不得不使然。扇亭位于临流转角，因地而设，宜于闲眺，故颜其额为“与谁同坐轩”。亭下为修长流水，水廊缘边以达倒影楼。楼为歇山顶，高二层，与六角攒尖的宜两亭遥遥相对，皆倒影水中，互为对景。鸳鸯厅西部之溪流中，置塔影亭，它与其北的留听阁，同样在狭长的水面二尽头，而外观形式亦相仿佛，不过地位视前二者为低，布局与命意还是相同的。塔影亭南，原为补园入口以通张宅的，今已封闭。

东部久废，刻在重建中，从略。

留园：在阊门外留园路，明中叶为徐泰时“东园”，清嘉庆间（1800年左右）刘恕重建，以园中多白皮松，故名“寒碧山庄”，又称“刘园”。园中旧有十二峰，为太湖石之上选。光绪二年（1876年）间归盛康，易

名留园。园占地五十市亩，面积为苏州诸园之冠。

是园可划分为东西中北四部。中部以水为主，环绕山石楼阁，贯以长廊小桥。东部以建筑为主，列大型厅堂，参置轩斋，间列立峰斧劈，在平面上曲折多变。西部以大假山为主，漫山枫林，亭榭一二，南面环以曲水，仿晋人武陵桃源。是区与中部以云墙相隔，红叶出粉墙之上，望之若云霞，为中部最好的借景。北部旧构已毁，今又重辟，平淡无足观，从略。

中部：入园门经二小院至绿荫，自漏窗北望，隐约见山池楼阁片断。向西达涵碧山房三间，硬山造，为中部的主要建筑。前为小院，中置牡丹台，后临荷池。其左明瑟楼倚涵碧山房而筑，高二层，屋顶用单面歇山，外观玲珑，由云梯可导至二层。复从涵碧山房西折上爬山游廊，登“闻木樨香轩”，坐此可周视中部，尤其东部之曲谿楼、清风池馆、汲古得绠处及远翠阁等参差前后、高下相呼的诸楼阁，掩映于古木奇石之间。南面则廊屋花墙，水阁联续，而明瑟楼微突水面，涵碧山房之凉台再突水面，层层布局，略作环抱之势。楼前清水一池，倒影历历在目。自闻木樨香轩向北东折，经游廊，达远翠阁。是阁位于中部东北角，其用意与拙政园见山楼相同，不过一在水一在陆，又紧依东部，隔花墙为东部最好的借景。小蓬莱苑在水中央，濠濮亭列其旁，皆几与水平。如此对比，容易显山之峻与楼之高。曲谿楼底层西墙皆列砖框、漏窗，游者至此，感觉处处邻虚，移步换影，眼底如画。而尤其举首西望，秋时枫林如醉，衬托于云墙之后，其下高低起伏若波然，最令人依恋不已。北面为假山，可亭六角出假山之上，其后则为长廊了。

东部主要建筑物有二：其一五峰仙馆（楠木厅），面阔五间，系硬山造。内部装修陈设，精致雅洁，为江南旧式厅堂布置之上选。其前后左右，皆有大小不等的院子。前后二院皆列假山，人坐厅中，仿佛面对岩壑。然此法为明计成所不取，《园冶》云：“人皆厅前掇山，环堵中耸起高高三峰，排列于前，殊为可笑。”此厅列五峰于前，似觉太挤，了无生趣。而计成认为，在这种情况下，应该是“以预见：或有嘉树，稍点玲珑石块；不然，墙中嵌埋壁岩，或顶植卉木垂萝，似有深境也”。我觉得这办法是比较妥善多了。后部小山前，有清泉一泓，境界至静，惜源头久没，泉呈时涸时有之态。山后沿墙绕以回廊，可通左右前后。游者至此，偶一不慎，方向莫辨。在此小院中左眺远翠阁，则隔院楼台又炯然在目，使人益觉该园之宽大。其旁汲古得绠处，小屋一间，紧依五峰仙

馆，入内则四壁皆虚，中部景物又复现眼前。其与五峰仙馆相联接处的小院，中植梧桐一树，望之亭亭如盖，此小空间的处理是极好的手法。还我读书处与揖峰轩都是两个小院，在五峰仙馆的左邻，是介于与林泉耆硕之馆中间，为二大建筑物中之过渡。小院绕以回廊，间以砖框。院中安排佳木修竹，萱草片石，都是方寸得宜，楚楚有致，使人有静中生趣之感，充分发挥了小院落的设计手法，而游者至此往往相失。由揖峰轩向东为林泉耆硕之馆，俗呼鸳鸯厅，装修陈设极尽富丽。屋面阔五间，单檐歇山造，前后二厅，内部各施卷棚，主要一面向北，大木梁架用“扁作”，有雕刻，南面用“圆作”，无雕刻。厅北对冠云沼，冠云，岫云，朵云三峰以及冠云亭、冠云楼。三峰为明代旧物，苏州最大的湖石。冠云峰后侧为冠云亭、亭六角、倚玉兰树下。向北登云梯上冠云楼，虎丘塔影，阡陌平畴，移置窗前了。伫云庵与冠云台位于沼之东西。从冠云台入月门，乃佳晴喜雨快雪之亭。亭内楠木榻扇六扇，雕刻甚精。惜是亭面西，难免受阳光风露之损伤。东园一角为新辟，山石平淡无奇，不足与旧构相颉颃了。

西部园林以时代而论，似为明“东园”旧规，山用积土，间列黄石，犹是李渔所云：“小山用石，大山用土”的老办法，因此漫山枫树得以滋根。林中配二亭：一为舒啸亭，系圆攒尖；一为至乐亭，六边形，系仿天平山范祠御碑亭而略变形的，在苏南还是创见。前者隐于枫林间，后者据西北山腰，可以上下眺望。南环清溪，植桃柳成荫，原期使人至此有世外之感，但有意为之，顿成做作。以人工胜天然，在园林中实是不易的事。溪流终点，则为活泼泼地，一阁临水，水自阁下流入，人在阁中，仿佛跨溪之上，不觉有尽头了。唯该区假山，经数度增修，殊失原态。

北部旧构已毁，今新建，无亭台花木之胜。

·四

江南园林占地不广，然千岩万壑，清流碧潭，皆宛然如画，正如钱泳所说：“造园如作诗文，必使曲折有法。”因此对于山水、亭台、厅堂、楼阁、曲池、方沼、花墙、游廊等之安排划分，必使风花雪月，光景常新，不落窠臼，始为上品。对于总体布局及空间处理，务使有扩大之感，观之不尽，而风景多变，极尽规划的能事。总体布局可分以下几

种：

中部以水为主题，贯以小桥，绕以游廊，间列亭台楼阁，大者中列岛屿。此类如网师园以及怡园等之中部。庙堂巷畅园，地颇狭小，一水居中，绕以廊屋，宛如盆景。留园虽以水为主，然刘师敦桢认为该园以整体而论，当以东部建筑群为主，这话亦有其理。

以山石为全园之主题。因是区无水源可得，且无洼地可利用，故不能不以山石为主题使其突出，固设计中一法。西百花巷程氏园无水可托，不得不如此。环秀山庄范围小，不能凿大池，亦以山石为主，略引水泉，俾山有生机，岩现活态，苔痕鲜润，草木华滋，宛然若真山水了。

基地积水弥漫，而占地尤广，布置遂较自由，不能为定法所囿。如拙政园、五亩园等较大的，更能发挥开朗变化的能事。尤其拙政园中部的一些小山，大有张涟所云“平岗小坡，曲岸回沙”，都是运用人工方法来符合自然的境界。计成《园冶》云：“虽由人作，宛自天开。”刘师敦桢主张：“池水以聚为主，以分为辅，小园聚胜于分，大园虽可分，但须宾主分明。”我说网师园与拙政园是两个佳例，皆苏州园林上品。

前水后山，复构堂于水前，坐堂中穿水遥对山石，而堂则若水榭，横卧波面，文衙弄艺園布局即如是。北寺塔东芳草园亦仿佛似之。

中列山水，四周环以楼及廊屋，高低错落，迤逦相续，与中部山石相呼应，如小新桥巷耦园东部，在苏州尚不多见。东北街韩氏小园，亦略取是法，不过楼屋仅有两面。中由吉巷半园、修仙巷宋氏园皆有一面用楼。

明代园林，接近自然，犹是计成、张涟辈后来所总结的方法，利用原有地形，略加整理。其所用石，在苏州大体以黄石为主，如拙政园中部二小山及绣绮亭下者。黄石虽无湖石玲珑剔透，然掇石有法，反觉浑成，既无矫揉做作之态，且无累石不固的危险。我们能从这种方法中细细探讨，在今日造园中还有不少优良传统可以吸收学习的。到清代造园，率皆以湖石叠砌，贪多好奇，每以湖石之多少与一峰之优劣，与他园计较短长。试以怡园而论，购洞庭山三处废园之石累积而成，一峰一石，自有上选，即其一例。至于“小山用石”，非全无寸土，不然树木将无所依托了。环秀山庄虽改建于乾隆间，数弓之地，深谿幽壑，势若天成，其竖石运用宋人山水的所谓“斧劈法”，再以镶嵌出之，简洁遒劲，其水则迂回曲折，山石处处滋润，苍岩欣欣欲活了，诚为江南园林的杰

构。于此方知设计者若非胸有丘壑、挥洒自如者，焉能至斯？学养之功可见重要了。

掇山既须以原有地形为据，自然之态又变化多端，无一定成法，可是自然的形成与发展，亦有一定的规律可循，“师古人不如师造化”，实有其理在。我们今日能通乎此理，从自然景物加以分析，证以古人作品，评其妍媸，撷其菁华，构成最美丽的典型。奈何苏州所见晚期园林，什九已成“程式化”，从不在整体考虑，每以亭台池馆，妄加拼凑。尤以掇山选石，皆举一峰片石，视之为古董，对花树的衬托，建筑物的调和等，则有所忽略。这是今日园林设计者要引以为鉴的。如怡园欲集诸园之长，但全局涣散，似未见成功。

园林之水，首在寻源，无源之水必成死水。如拙政园利用原来池沼，环秀山庄掘地得泉，水虽涓涓，亦必清冽可爱。但园林面积既小，欲使有汪洋之概，则在于设计的得法。其法有二：一、池面利用不规则的平面，间列岛屿，上贯以小桥，在空间上使人望去，不觉一览无余。二、留心曲岸水口的设计，故意做成许多湾头，望之仿佛有许多源流，如是则水来去无尽头，有深壑藏涵之感。至于曲岸水口之利用芦苇，杂以菰蒲，则更显得隐约迷离，这是在较大的园林应用才妙。留园活泼泼地，水榭临流，溪至榭下已尽，但必流入一部分，则俯视之下，榭若跨溪上，水不觉终止。南显子巷惠荫园水假山，系层叠巧石如洞曲，引水灌之，点以步石，人行其间，如入涧壑，洞上则构屋。此种形式为吴中别具一格者，殆系南宋杭州“赵翼王园”中之遗制。沧浪亭以山为主，但西部的步磻廊突然逐渐加高，高瞰水潭，自然临渊莫测。艺圃的桥与水几平，反之两岸山石愈显高峻了。怡园之桥虽低于山，似嫌与水尚有一些距离。至于小溪作桥，在对比之下，其情况何如，不难想象。古人改用“点其步石”的方法，则更为自然有致。瀑布除环秀山庄檐瀑外，他则罕有。

中国园林除水石池沼外，建筑物如厅、堂、斋、台、亭、榭、轩、卷、廊等，都是构成园林的主要部分。然江南园林以幽静雅淡为主，故建筑物务求轻巧，方始相称，所以在建筑物的地点、平面，以及外观上不能不注意。《园冶》云：“凡园圃立基，定厅堂为主。先乎取景，妙在朝南，倘有乔木数株，仅就中庭一二。”苏南园林尚守是法，如拙政园远香堂、留园涵碧山房等皆是。至于楼台亭阁的地位，虽无成法，但“按基形式”，“格式随宜”，“随方制象，各有所宜”，“一榭一角，必令出自己

裁”，“花间隐榭，水际安亭”，还是要设计人从整体出发，加以灵活运用。古代如《园冶》《长物志》《工段营造录》等，虽有述及，最后亦指出其不能守为成法的。试以拙政园而论，我们自高处俯视，建筑物虽然是随宜安排的，但是它们方向还是直横有序。其外观给人的感觉是轻快为主，平面正方形、长方形、多边形、圆形等皆有，屋顶形式则有歇山、硬山、悬山、攒尖等，而无庑殿式，即歇山、硬山、悬山，亦多数采用卷棚式。其翼角起翘类，多用“水戗发戗”的办法，因此翼角起翘低而外观轻快。檐下玲珑的挂落，柱间微弯的吴王靠，得能取得一致。建筑物在立面的处理，以留园中部而论，我们自闻木樨香轩东望，对景主要建筑物是曲谿楼，用歇山顶，其外观在第一层做成仿佛台基的形状，与水相平行的线脚与上层分界，虽系二层，看去不觉其高耸。尤其曲谿楼、西楼、清风池馆三者的位置各有前后，屋顶立面皆同中寓不同，与下部的立峰水石都很相称。古木一树斜横波上，益增苍古，而墙上的砖框漏窗，上层的窗棂与墙面虚实的对比，疏淡的花影，都是苏州园林特有的手法；倒影水中，其景更美。明瑟楼与涵碧山房相邻，前者为卷棚歇山，后者为卷棚硬山，然两者相联，不能不用变通的办法。明瑟楼歇山山面仅作一面，另一面用垂脊，不但不觉得其难看，反觉生动有变化。他如畅园因基地较狭长，中又系水池，水榭无法安排，卒用单面歇山，实系同出一法。反之东园一角亭，为求轻巧起见，六角攒尖顶，翼角用“水戗发戗”，其上部又太重，柱身瘦而高，在整个比例上顿觉不稳。东部舒啸亭至乐亭，前者小而不见玲珑，后者屋顶虽多变化，亦觉过重，都是比例上的缺陷。苏南筑亭，晚近香山匠师每将屋顶提得过高，但柱身又细，整个外观未必真美。反视明代遗构艺圃，屋顶略低，较平稳得多。总之单体建筑，必然要考虑到与全园的整个关系才是。至于平面变化，虽洞房曲户，亦必做到曲处有通，实处有疏。小型轩馆，一间，二间，或二间半均可，皆视基地，位置得当。如拙政园海棠春坞，面阔二间，一大一小，宾主分明。留园揖峰轩，面阔二间半，而尤妙于半间，方信《园冶》所云有其独见之处。建筑物的高下得势，左右呼应，虚实对比，在在都须留意。王洗马巷万氏园（原为任氏），园虽小，书房部分自成一区，极为幽静。其装修与铁瓶巷任宅东西花厅、顾宅花厅、网师园、西百花巷程氏园、大石巷吴宅花厅等（详见拙著《装修集录》），都是苏州园林中之上选。至于他园尚多商量处，如留园太繁琐伦俗，佳者甚少；拙政园精者固有，但多数又觉简单无变化，力求

一律，皆修理中东拼西凑或因陋就简所造成。怡园旧装修几不存，而旱船为吴中之尤者，所遗装修极精。

园林游廊为园林的脉络，在园林建筑中处极重要地位，故特地说明一下。今日苏州园林廊之常见者为复廊，廊系两面游廊中隔以粉墙，间以漏窗（详见拙编《漏窗》），使墙内外皆可行走。此种廊大都用于不封闭性的园林，如沧浪亭的沿河。或一园中须加以间隔，欲使空间扩大，并使入门有所过渡，如怡园的复廊，便是一例，此廊显然是仿前者。它除此作用外，因岁寒草庐与拜石轩之间不为西向阳光与朔风所直射，用以阻之，而阳光通过漏窗，其图案更觉玲珑剔透。游廊有陆上、水上之分，又有曲廊、直廊之别，但忌平直生硬。今日苏州诸园所见，过分求曲，则反觉生硬勉强，如留园中部北墙下的。至其下施以砖砌阑干，一无空虚之感，与上部挂落不称，柱夹砖中，僵直滞重。铁瓶巷住宅及拙政园西部水廊小榭，易以镂空之砖，似此较胜。拙政园旧时柳荫路曲，临水一面阑干用木制，另一面上安吴王靠，是有道理的。水廊佳者，如拙政园西部的，不但有极佳的曲折，并有适当的坡度，诚如《园冶》所云的“浮廊可渡”，允称佳构。尤其可取的，就是曲处湖石芭蕉，配以小榭，更觉有变化。爬山游廊，在苏州园林中的狮子林、留园、拙政园，仅点缀一二，大都是用于园林边墙部分。设计此种廊时，应注意到坡度与山的高度问题，运用不当，顿成头重脚轻，上下不协调。在地形狭宽不同的情况下，可运用一面坡，或一面坡与二面坡并用，如留园西部的。曲廊的曲处是留虚的好办法，随便点缀一些竹石、芭蕉，都是极妙的小景。李斗云：“板上甃砖谓之响廊，随势曲折谓之游廊……入竹为竹廊，近水为水廊。花间偶出数尖，池北时来一角，或依悬崖，故作危槛，或跨红板，下可通舟，递迢于楼台亭榭之间，而轻好过之。廊贵有阑。廊之有阑，如美人服半臂，腰为之细。其上置板为飞来椅，亦名美人靠，其中广者为轩。”言之尤详，可资参考。今日复有廊外植芭蕉，呼为蕉廊，植柳呼为柳廊，夏日人行其间，更觉翠色侵衣，溽暑全消。冬日则阳光射入，温和可喜，用意至善。而古时以廊悬画称画廊，今日壁间嵌诗条石，都是极好的应用。

园林中水面之有桥，正陆路之有廊，重要可知。苏州园林习见之桥，一种为梁式石桥，可分直桥、九曲桥、五曲桥、三曲桥、弧形桥等，其位置有高于水面与岸相平的，有低于两岸浮于水面的。以时代而论，后者似较旧，今日在艺圃及无锡寄畅园、常熟诸园所见的，都是如

此。怡园及已毁木渎严家花园，亦仿佛似之，不过略高于水面一点。旧时为什么如此设计呢？它所表现的效果有二：第一，桥与水平，则游者凌波而过，水益显汪洋，桥更觉其危了。第二，桥低则山石建筑愈形高峻，与丘壑楼台自然成强烈对比。无锡寄畅园假山用平冈，其后以惠山为借景，冈下幽谷间施以是式桥，诚能发挥明代园林设计之高度技术。今日梁式桥往往不照顾地形，不考虑本身大小，随便安置，实属非当。尤其阑干之高度、形式，都从不与全桥及环境作一番研究，甚至于连半封建半殖民地的阑干都加了上去，如拙政园西部是。上选者，如艺圃小桥、拙政园倚虹桥都是。拙政园中部的三曲五曲之桥，阑干比例还好，可惜桥本身略高一些。待霜亭与雪香云蔚亭二小山之间石桥，仅搁一石板，不施阑干，极尽自然质朴之意，亦佳构。另一种为小型环洞桥，狮子林、网师园都有。以此二桥而论，前者不及后者为佳，因环洞桥不适宜建于水中部，水面既小，用此中阻，遂显庞大质实，略无空灵之感。后者建于东部水尽头，桥本身又小，从西东望，辽阔的水面中倒影玲珑，反之自桥西望，亭台映水，用意相同。中由吉巷半园，因地狭小，将环洞变形，亦系出权宜之计。至于小溪，《园冶》所云“点其步石”的办法，尤能与自然相契合，实远胜架桥其上。可是此法，今日差不多已成绝响了。

园林的路，《小窗幽记》云：“门内有径，径欲曲。”“室旁有路，路欲分。”今日我们在苏州园林所见，还能如此。拙政园中部道路，犹守明时旧规，从原来地形出发，加以变化，主次分明，曲折有度。环秀山庄面积小，不能不略作纡盘，但亦能恰到好处，行者有引人入胜之慨。然狮子林、怡园的，故作曲折，使人莫之所从，既悖自然之理，又多不近人情。因此矫揉做作，与自然相距太远的安排，实在是不艺术的事。

铺地，在园林亦是一件重要的工作，不论庭前、曲径、主路，皆须极慎重考虑。今日苏州园林所见，有灰砖铺于主路，施工简单，并凑图案自由。碎石地，用碎石灰铺，可用于主路小径庭前，上面间有用缸片点缀一些图案。或缸片灰铺，间以瓷片，用法同前。鹅子地或鹅子间加瓷片并凑成各种图案，称“花街”，视上述的要细致雅洁多，留园自有佳构。但其缺点是石隙间的泥土，每为雨水及人力所冲扫而逐渐减少，又复较易长小草，保养费事，是需要改进的。冰裂地则用于庭前，苏南的结构有二：其一即冰纹石块平置地面，如拙政园远香堂前的，颇饶自然之趣，然亦有不平稳的流弊。其一则冰纹石交接处皆对卯拼成，施工难

而坚固，如留园涵碧山房前、铁瓶巷顾宅花厅的，都是极工整。至于庭前踏跺用天然石叠，如拙政园远香堂及留园五峰仙馆前的，皆饶野趣。

园林的墙，有乱石墙、磨砖墙、漏砖墙、白粉墙等数种。苏州今日所见，以白粉墙为最多，外墙有上开瓦花窗（漏窗开在墙顶部）的，内墙间开漏窗及砖框的，所谓粉墙花影，为人乐道。磨砖墙，园内仅建筑物上酌用之，园门十之八九贴以水磨砖砌成图案，如拙政园大门。乱石墙只见于裙肩处。在上海南市薛家浜路旧宅中，我曾见到冰裂纹上缀以梅花的，极精，似系明代旧物。西园以水花墙区分水面，亦别具一格。

联对、匾额，在中国园林中，正如人之有须眉，为不能少的一件重要点缀品。苏州又为文人荟萃之区，当时园林建造复有文人画家的参与，用人工构成诗情画意，将平时所见真山水、古人名迹、诗文歌诗所表达的美妙意境，撷其精华而总合之，加以突出。因此山林岩壑，一亭一榭，莫不用文学上极典雅美丽而适当的辞句来形容它，使游者入其地，览景而生情文，这些文字亦就是这个环境中最恰当的文字代表。例如拙政园的远香堂与留听阁，同样是一个赏荷花的地方，前者出“香远益清”句，后者出“留得残荷听雨声”句。留园的闻木樨香轩、拙政园的海棠春坞，又都是根据这里所种的树木来命名的。游者至此，不期而然的能够出现许多文学艺术的好作品，这不能不说是中国园林的一个特色了。我希望今后在许多旧园林中，如果无封建意识的文字，仅就描写风景的，应该好好保存下来。苏州诸园皆有好的题辞，而怡园诸联集宋词，更能曲尽其意，可惜皆不存了。至于用材料，因园林风大，故十之八九用银杏木阴刻，填以石绿；或用木阴刻后髹漆敷色者亦有，不过色彩都是冷色。亦有用砖刻的，雅洁可爱。字体以篆隶行书为多，罕用正楷，取其古朴与自然。中国书画同源，本身是个艺术品，当然是会增加美观的。

树木之在园林，其重要不待细述，已所洞悉。江南园林面积小，且都属封闭型，四周绕以高垣，故对于培花植木，必须深究地位之阴阳，土地之高卑，树木发育之迟速，耐寒抗旱之性能，姿态之古拙与华滋，更重要的为布置的地位与树石的安排了。园林之假山与池沼，皆真山水的缩影，因此树木的配置，不能任其自由发展。所栽植者，必须体积不能过大，而姿态务求入画，虬枝旁水，盘根依阿，景物遂形苍老。在选树之时，尤须留意此端，宜乎李格非所云“人力胜者少苍古”了。今日苏州树木常见的，如拙政园，大树用榆、枫杨等。留园中部多银杏，西部

则漫山枫树。怡园面积小，故易以桂、松及白皮松，尤以白皮松树虽小而姿态古拙，在小园中最是珍贵。他则杂以松、梅、棕树、黄杨，在发育上均较迟缓。其次园小垣高，阴地多而阳地少，于是墙阴必植耐寒植物，如女贞、棕树、竹之类。岩壑必植高山植物，如松、柏之类。阶下石隙之中，植长绿阴性草类。全园中长绿者多于落叶者，则四季咸青，不致秋冬髡秃无物了。至于乔木若榆、槐、枫杨、朴、榉、枫等，每年修枝，使其姿态古拙入画。此种树的根部甚美，尤以榆树及枫杨，年龄大后，身空皮留，老干抽条，葱翠如画境。今日苏州园林中之山巅栽树，大别有两种情况：第一类，山巅山麓只植大树，而虚其根部，俾可欣赏其根部与山石之美，如留园的与拙政园的一部分。第二类，山巅山麓树木皆出丛竹或灌木之上，山石并攀以藤萝，使望去有深郁之感，如沧浪亭及拙政园的一部分。然两者设计者的依据有所不同。以我们分析，这些全在设计者所用树木的各异，如前者师元代画家倪瓒（云林）的清逸作风，后者则效明代画家沈周（石田）的沉郁了。至于滨河低卑之地，种柳、栽竹、植芦，而墙阴栽爬山虎、修竹、天竹、秋海棠等，叶翠，花冷，实鲜，高洁耐赏。但此等亦必须每年修剪，不能任其发育。

园林栽花与树木同一原则，背阴且能略受阳光之地，栽植桂花、山茶之类。此二者除终年常青外，开花一在秋，一在春初，都是群花未放之时，而姿态亦佳，掩映于奇石之间，冷隽异常。紫藤则入春后，一架绿荫，满树繁花，望之若珠光宝露。牡丹之作台，衬以文石阑干，实牡丹宜高地向阳，兼以其花华丽，故不得不使然。他若玉兰、海棠、牡丹、桂花等同栽庭前，谐音为“玉堂富贵”，当然命意已不适于今日，但在开花的季节与色彩的安排上，前人未始无理由的。桃李则宜植林，适于远眺，此在苏州，仅范围大的如留园、拙政园可以酌用之。

树木的布置，在苏州园林有两个原则：第一，用同一种树植之成林，如怡园听涛处植松，留园西部植枫，闻木樨香轩前植桂。但又必须考虑到高低疏密间及与环境的关系。第二，用多种树同植，其配置如作画构图一样，更要注意树的方向及地的高卑是否适宜于多种树性，树叶色彩的调和对比，长绿树与落叶树的多少，开花季节的先后，树叶形态，树的姿势，树与石的关系，必须要做到片山多致，寸石生情，二者间是一个有机的联系才是。更须注意它与建筑物的式样、颜色的衬托，是否已做到“好花须映好楼台”的效果。水中植荷，似不宜多。荷多必减

少水的面积，楼台缺少倒影，宜略点缀一二，亭亭玉立，摇曳生姿，隔秋水宛在水中央。据云昆山顾氏园藕植于池中石板底，石板仅凿数洞，俾不使其自由繁殖。刘师敦桢云：“南京明徐氏东园池底置缸，植荷其内。”用意相同。

苏南园林以整体而论，其色彩以雅淡幽静为主，它与北方皇家园林的金碧辉煌，造成对比。以我个人见解：第一，苏南居住建筑所施色彩，在梁枋柱头皆用栗色，挂落用墨绿，有时柱头用黑色退光，都是一些冷色调，与白色墙面起了强烈的对比，而花影扶疏，又适当地冲淡了墙面强白，形成良好的过渡，自多佳境了。且苏州园林皆与住宅相连，为养性读书之所，更应以清静为主，宜乎有此色调。它与北方皇家花园的那样宣扬自己威风与炫耀富贵的，在作风上有所不同。苏州园林，士大夫未始不欲炫耀富贵，然在装修、选石、陈列上用功夫，在色彩上仍然保持以雅淡为主的原则。再以南宗山水而论，水墨浅绛，略施淡彩，秀逸天成，早已印在士大夫及文人画家的脑海中。在这种思想影响下设计出来的园林，当然不会用重彩贴金了。加以江南炎热，朱红等热颜料亦在所非宜，封建社会的民居，尤不能与皇家同一享受，因此色彩只好以雅静为归，用清幽胜浓丽，设计上用以少胜多的办法了。此种色彩，其佳处是与整个园林的轻巧外观，灰白的江南天色，秀茂的花木，玲珑的山石，柔媚的流水，都能相配合调和，予人的感觉是淡雅幽静。这又是江南园林的特征了。

中国园林还有一个特色，就是设计者考虑到不论风雨明晦，景色咸宜，在各种自然条件下，都能予人们以最大最舒适的美感。除山水外，楼横堂列，廊庑回绕，阑楯周接，木映花承，是起了最大作用的，使人们在各种自然条件下来欣赏园林。诗人画家在各种不同的境界中，产生了各种不同的体会，如夏日的蕉廊，冬日的梅影、雪月，春日的繁花、丽日，秋日的红蓼、芦塘，虽四时之景不同，而景物无不适人。至于松风听涛，菰蒲闻雨，月移花影，雾失楼台，斯景又宜其览者自得之。这种效果的产生，主要在于设计者对文学艺术的高度修养，以及与实际的建筑相结合，使理想中的境界付之于实现，并撷其最佳者而予以渲染扩大。如叠石构屋，凿水穿泉，栽花种竹，都是向这个目标前进的。文学艺术家对自然美的欣赏，不仅在一个春日的艳阳天气，而是要在任何一个季节，都要使它变成美的境地。因此，对花影要考虑到粉墙，听风要考虑到松，听雨要考虑到荷叶，月色要考虑到柳梢，斜阳要考虑到梅竹

等，都希望使理想中的幻景能付诸实现，安排一石一木，都寄托了丰富的情感，宜乎处处有情，面面生意，含蓄有曲折，余味不尽。此又为中国园林的特征。

·五

以上所述，系就个人所见，掇拾一二，提供大家参考。我相信，苏州园林不但在中国造园史上有其重要与光辉的一页，而且至今尚为广大人民游憩之所。为了继承与发挥优良的文化传统，此份资料似有提出的必要。

1956年

MASTER-OF-FISHNETS SUZHOU

GARDEN,

Literary and Museum Newsletter, Museum of Nanjing, Issue No. 23,
January 1976

I celebrate the Master-of-Fishnets Garden as the ultimate small garden of Suzhou, as one of the best gardens nationwide, and as a garden-making paragon in "prevailing over the many with the few."

The Master-of-Fishnets Garden at 11 Kuojietou Lane sprawls on the former site of the Hall of Ten Thousand Volumes built by Shi Zhengzhi (1119-1179) after he was dismissed as vice-minister of personnel of the Southern Song (1127-1279). During the Qianlong reign (1736-1796) of the Qing, Song Luru (1710-1779) purchased the property on which he built his own garden and named it after *wangshi*, meaning "master of fishing nets," which is analogical to fish and pronounced roughly the same as the lane's former name Wangsi Cove. After the garden fell into disrepair, it came under the possession of Qu Yuancun (1808-1876), who renamed it "Qu's Garden" after piling up rockeries, planting trees, and replacing old pavilions and houses with new ones according to his own plan. In 1795, the sixtieth year of the Qianlong reign, Qian Daxin (1728-1804) wrote an essay on the garden,¹ whose size has remained to this day. When Li Hongyi (1831-1885) took possession of the garden during the Tongzhi reign (1862-1874), he renamed it "Eastern Neighbor of Su Shunqin,"² which was to be inherited by his son, Shaomei.³ Da Gui (1860-?) had lived in it for some time. In the Republican years (1912-1949), the warlord Zhang Zuolin (1875-1928) bought the garden and made his mentor Zhang Xiluan (1843-1922) a gift of it.⁴ Ye Gongchuo (1881-1968)⁵, and the two brothers Zhang Ze (1882-1940) and Zhang Yuan (1899-1983) had lived in this dwelling-garden as tenants.⁶ Then He

Yanong (1880-1946)⁷ bought it and refurbished it in a small way. After the garden was taken over by the Municipal Bureau of Parks and Woods of Suzhou in autumn 1958, it was done over completely so that, "The legendary beauty Xishi puts on a new dress," in the words of Ye Gongchuo in his lyrical poem to the tune of "Effusing Aroma Court."

The dwelling part of this garden faces south, with a screen wall in front of it and an outer gate on its eastern and western sides respectively. A corridor behind the frontal gateway conducts to a sedan-chair hall, and an alleyway east of the hall conducts to another hall in the second row. Behind the sedan-chair hall stands the stately main hall, a five-bay structure consisting of a three-bay central room and two one-bay wing rooms, with an exquisitely engraved and thorough-carved brick arch atop its gateway. To the west is a studio whose portal enshrines a stone tablet inscribed with a record of the garden's history. Behind the sedan-chair hall stands the hall in the second row, a storied building of five bays whose wings are each fronted with a small yard of flowers and osmanthus trees which are at their sweet-scented best in autumn. A horizontal board hanging inside of the hall is inscribed with the name "Beauty-Garnering Loft" in the calligraphic handwriting of Yu Yue (1821-1907)⁸. Climbing upstairs and looking out westward, one sees the Tianping Mountain and Lingyan Mountain shimmering darkly before the windows. The back of the building is connected with the Five-Peak Study and the Gathering-in-Emptiness Chamber⁹. Going downstairs, one reaches the Verandah of a Twig Beyond Bamboos and gets a panoramic view of the garden.

Entering the garden by way of the sedan-chair hall's western end, the visitor finds himself under a lintel bearing the name, "Master-of-Fishnets' Tiny Court." A roofed walkway winds its way to a hall with glass and lattice windows on four sides, which, as the inscription on its horizontal board indicates, is none other than the Verandah of Osmanthus-Clustered Hillock, whose frontal boundary takes the form

of a latticed wall, where the air is heady with the lingering aroma of osmanthus flowers growing in the peace and quiet of a small hill. A footpath to the east of the verandah brings the southern and northern parts of the garden together like a side alleyway. To the west of the verandah is the Lute-Playing Chamber and the Studio for Fostering Modesty and Amiability, where a roofed walkway turns this way and that dreamily along a wall. As the saying goes, "Tighten the reins before you let go of yourself, and hold your breath before you sing resonantly." This is why the scenery north of the Verandah of Osmanthus-Clustered Hillock is surrounded with a yellow stone wall known as "Cloudy Ridge." If one runs over the slope through the roofed walkway, he comes to the Pavilion of Moon Arriving and Breeze Coming, where a rock prepared for anglers projects into the air and a zigzagging painted bridge are silhouetted in a mirror-like pond, where tangible and intangible scenery mesh with the drifting clouds high up and the rippling waves down low to turn such a tiny space into a seemingly boundless landscape.

As spring water trickles through stone stairs, let me dig a pool to bring in the moon, so that lacquered columns can sway busily and pink lotus flowers open themselves upside down inside of the pool.

The beauty of this airy-fairy sight is captured exactly by this pavilion's name.

West of the Cloudy Ridge stands the Hat-Ribbon Washing Belvedere, which overlooks a belt of water at its foot while beckoning on the Verandah for Seeing Pines and Reading Paintings across the water. In front of the main hall south of the verandah, a bunch of ancient trees make an ideal prototype for traditional Chinese painting, with coiled branches clinging to rugged trunks and vine-like root tresses curling over moss-clad stones. By the side of the verandah, a corridor makes a specific turn to connect with the Verandah of a Twig Beyond Bamboos. The "Ringtossing-at-Ducks Corridor" to the east turns out to be a half-pavilion, which echoes the Pavilion of Moon Arriving and Breeze Coming west of the pond, and whose balustrade

offers an ideal site for the fun of in-situ viewing. There, as one looks down at the pond, its water seems to be rippling infinitely and its waves huddle together at one moment and drift away at another to no one knows where—a make-belief illusion that is improbable without the ingenious disposition of the pond's inlets together with its bends and boulders jutting out of the water. A zigzagging bridge lies low enough to hug the water, and stepping stones are strewn about the pond in the tradition of Ming-dynasty bridge builders, a tradition that shows no intention to divide up the water surface while the pond looks like branching out into the distance. The stairs built into the embankment and the boulders projecting out of water give the impression as though those who step on them were floating on water, whereas all the pavilions, terraces, corridors and gazebos are made to face the pond so that each seems to have water at its own disposal. A garden need not be big, a pool of spring water need not be broad, but they cannot do without each other. As Du Fu (712-770) puts it,

A famed garden invariably snuggles up to green water.

The meaning of this line, however, is not limited to a famous garden. From it we can also infer the law governing the treatment of water in landscape gardening, and get the key to the rock-piling success of the Beauty-Encircled Mountain Abode. The rocks around the pond in the Master-of-Fishnet's Garden are not as ingeniously arranged as those in the said mountain abode, but they are rich and varied enough in postures and affable and fascinating enough to appeal to visitors thanks to the fact that they are patterned after the White Lotus Pond at the Tiger Hill in the same city.

The Late-Spring Peony Lodge in the western part of the garden used to be a nursery where herbaceous peony was its last crop in spring, hence its name. In this small court of three bays with a small room attached to its western side, bamboos, rocks, plums and plantains are faintly rouged by the sunshine that penetrates the windows, behind which they conceal themselves to evoke a delicate painting. Of all the gardens in Suzhou, the courtyard that contains this

lodge is the best conceived. Small as it is, it expands itself almost instantly by opening up to vistas all but in existence—nowhere else is the idea of "thoroughness" in penetration better applied. An artificial mountain in front of the lodge faces a winding roofed walkway to the west. In the southwest corner there is the Emerald Containing Spring, whose placid and refreshing water comes from the large pond in the center of the garden, which echoes the philosophy, "Invaluable is water that has an origin." A pavilion sits on the spring with its nameboard "Cool Spring" hanging in it, and a peak-shaped rock standing south of it offers the opposite view to the lodge. The clearance is paved with pebbles and broken bricks and tiles in smooth and tidy patterns. Within the courtyard, the same principle of arranging a large pond in the center of the garden is applied, which calls for setting water and land in mutual contrast. The difference is that in the center of the garden stones are set in contrast with a vast body of water, while in this court, a small body of water is set in contrast with the rocks. This arrangement, in variance with the garden's general idea of setting constructions against artificial mountains, is reminiscent of a singer's clever use of a new tune to avoid parroting a hackneyed one.

The natural grace and refined elegance of the Master-of-Fishnets Garden is comparable with what is described in literary parlance. As Yan Jidao (1038-1110)¹⁰ of the Song says in his *Xiaoshan's Collection of Lyric Poems*,

Tasteful is every delicate word,
And refined is every plain word.

The garden has just a few buildings and a limited number of rockeries, yet it can put wind and moon at its beck and call to impact the visitor's mood. Its sublimity would have been impossible without its creator's original craftsmanship.¹¹ It shows why garden-making should be called "garden-structuring," for it is not just about civil engineering or horticulture. The term "imagined realm," coined by Wang Guowei (1877-1927)¹² in his *Poetic Remarks on the Human World*, is the

primary goal for landscape gardening. It can be said that the Master-of-Fishnets Garden has by and large attained all that this term entails.

苏州网师园

苏州网师园，我誉为是苏州园林之小园极则，在全国的园林中，亦居上选，是“以少胜多”的典范。

网师园在苏州市阔街头巷，本宋时史氏万卷堂故址。清乾隆间宋鲁儒（宗元，又字恂庭）购其地治别业，以“网师”自号，并颜其园，盖托鱼隐之义，亦取名与原巷名“王思”相谐音。旋园颓圯，复归瞿远村，叠石种木，布置得宜，增建亭宇，易旧为新，更名“瞿园”。乾隆六十年（公元1795年）钱大昕为之作记，【从周案一】今之规模，即为其旧。同治间属李鸿裔（眉生），更名“苏东邻”，其子少眉继有其园。【从周案二】达桂（馨山）亦一度寄寓之。入民国，张作霖举以赠其师张锡奎（金坡）【从周案三】。曾租赁与叶恭绰（遐庵）、张泽（善子）、爰（大千）兄弟，分居宅园。后何亚农购得之，小有修理。1958年秋由苏州园林管理处接管，住宅园林修葺一新。叶遐庵谱《满庭芳》词，所谓“西子换新装”也。

住宅南向，前有照壁及东西辕也。入门屋穿廊为轿厅，厅东有避弄可导之内厅。轿厅之后，大厅崇立，其前砖门楼，雕镂极精，厅面阔五间，三明两暗。西则为书塾，廊间刻园记。内厅（女厅）为楼，殿其后，亦五间，且带厢。厢前障以花样，植桂，小院宜秋。厅悬俞樾（曲园）书“撝秀楼”匾。登楼西望，天平、灵岩诸山黛痕一抹，隐现窗前。其后与五峰书屋、集虚斋相接。下楼至竹外一枝轩，则全园之景了然。

自轿厅西首入园，额曰“网师小筑”，有曲廊接四面厅，额“小山丛桂轩”，轩前界以花墙，山幽桂馥，香藏不散。轩东有便道直贯南北，其与避弄作用相同。蹈和馆琴室位轩西，小院回廊，迂徐曲折。欲扬先抑，未歌先敛，故小山丛桂轩之北以黄石山围之，称“云冈”。随廊越坡，有亭可留，名“月到风来”，明波若镜，渔矶高下，画桥迤迳，俱呈现于一池之中，而高下虚实，云水变幻，骋怀游目，咫尺千里。“涓涓流水细侵阶，凿个池儿，唤个月儿来，画栋频摇动，红蕖尽倒开。”亭名正写此妙境。云冈以西，小阁临流，名“濯缨”，与看松读画轩隔水招呼。轩南之主厅，其前古木若虬，老根盘结于苔石间，洵画本也。轩旁修廊一曲与竹外一枝轩接连，东廊名射鸭，系一半亭，与池西之月到风来亭相映。

凭阑得静观之趣，俯视池水，弥漫无尽，聚而支分，去来无踪，盖得力于溪口、湾头、石矶之巧于安排，以假象逗人。桥与步石环池而筑，犹沿明代布桥之惯例，其命意在不分割水面，增支流之深远。至于驳岸有级，出水留矶，增人“浮水”之感，而亭、台、廊、榭，无不面水，使全园处处有水“可依”。园不在大，泉不在广，杜诗所谓“名园依绿水”，不啻为是园咏也。以此可悟理水之法，并窥环秀山庄叠山之奥秘，思致相通。池周山石，虽未若环秀山庄之曲尽巧思，然平易近人，蕴藉多姿，其蓝本出自虎丘白莲池。

园之西部殿春簃，原为药阑。一春花事，以芍药为殿，故以“殿春”名之。小轩三间，拖一复室，竹、石、梅、蕉，隐于窗后，微阳淡抹，浅画成图。苏州诸园，此园构思最佳，盖园小“邻虚”，顿扩空间，“透”字之妙用，于此得之。轩前面东为假山，与其西曲廊相对。西南隅有水一泓，名“涵碧”，清澈醒人，与中部大池有脉可通，存“水贵有源”之意。泉上构亭，名“冷泉”。南略置峰石为殿春簃对景。余地以“花街”铺地，极平洁，与中部之利用水池，同一原则。以整片出之，成水陆对比，前者以石点水，后者以水点石。其与总体之利用建筑与山石之对比，相互变换者，如歌家之巧运新腔，不袭旧调。

网师园清新有韵味，以文学作品拟之，正北宋晏几道《小山词》之“淡语皆有味，浅语皆有致”，建筑无多，山石有限，其奴役风月，左右游人，若非造园家“匠心”独到，不克臻此【从周案四】。足证园林非“土木”、“绿化”之事，故称“构园”。王国维《人间词话》指出“境界”二字，园以有“境界”为上，网师园差堪似之。

南京博物馆《文博通讯》1976年1月第23期

DARK BLUE WAVES PAVILION, SUZHOU

Literary and Museum Newsletter, Issue No. 28, December 1979

The mere mention of Suzhou gardens invariably brings to mind estates locked behind tall walls with few outlets available to the outside world—a garden-making phenomenon apparently born of geo-historical conditions. Nevertheless, the garden craftsmen of ancient times still managed to create one distinctive garden after another in such small spaces by segmenting cityscape from mountains and woods with walls. Were these walls torn down, these gardens would be changed beyond recognition in no time and robbed of their value thoroughly. However, there is such a garden—and a familiar one at that—that does not belong among the secluded gardens in Suzhou. This is none other than the Dark Blue Waves Pavilion. The Fengxi Stream makes quite a few twists and turns around the South Garden before flowing past the Thatched Nunnery—where Suzhou's tallest lacebark pine tree is found—to become an eddying blue belt that forms the garden's northern boundary. The stretch from the Anglers' Platform to the Lotus Root Flower Gazebo, graced with ancient terraces, beautiful gazebos and a winding roofed walkway amid tall trees, is already beckoning on passers-by and giving free rein to imagination before they set foot in the garden.

The Dark Blue Waves Pavilion is a water-fronted garden, but its interior is dominated by artificial mountains separated categorically from water. As the saying goes:

Water keeps people at a distance

Rocks impart serenity to people.

Upon entering the garden through the level bridge over the Fengxi Stream, one sees forbidding mountains and awe-inspiring woods

whose hushed quietude changes one's mood at the blink of an eye. The garden is encircled entirely with a roofed walkway divided in two lanes with a wall in the middle; what delights the visitors most are this wall's latticed windows, through which they can take in the views outside of the garden. Because of this wall, the garden's internal and external worlds seem to be at once separable and inseparable, and the knolls and ravines within and the river without look both attached and detached. This is exactly what the conception of the garden of the Dark Blue Waves Pavilion is focused upon. Without the belt of water in front of the garden, all its rockeries and ravines would be mediocre and not worth seeing. It is this finishing touch added to the scene through the creator's ingenious hand that the Dark Blue Waves Pavilion stands a winning chance against other gardens in the same city. Indeed, the contrast between vistas within and without is exactly captured in the following line,

Without putting down a single word,
All charms under heaven are attained.

A garden cannot look venerated without bristling trees and rugged rocks, and the garden of the Dark Blue Waves Pavilion is a most pertinent case in point. Its halls and verandahs are free from gaudy ornamentation. Its stone-paved footpaths and diagonal walkway thread through bamboo groves and plantain foliage in a stately and immaculate fashion, without the least trace of vulgarity gilded or rouged. Its central structure, the Hall to Understand the Way, opens itself in four directions. To the north, an artificial mountain spreads out like a mammoth screen; rising above an arbour grove is the garden's namesake, the renowned Dark Blue Waves Pavilion *per se*, which offers a panoramic view of the whole garden. As a roofed walkway meanders up and down the slope of the artificial mountain, it provides balustrades that people can lean upon to look afar or take a rest. A verandah to the hall's west forms a courtyard of its own with a number of windows, whose gateways come in versatile shapes, and the best latticed windows of all Suzhou gardens are found right here.

The Mountain-Watcher's Loft in the southwest corner sits upon a tortuous cave and overlooks the South Garden and country homes on a level field that has given way to new buildings today and brings the shimmering views of the Lankavatara Mountain and the Seven-Peak Mountain in the distance right before its balustrades. The stream running in the front and the scenery borrowed from the mountains in the distance become part and parcel of the garden's own landscape.

The garden abounds in tall trees. There are lots of bamboos as well, whose swaying slim trunks keep throwing droplets of verdure into the air to refresh people's hearts and boost their spirits. With orchid aroma infiltrating visitors' sleeves, and bamboos tossing their shadows onto whitewashed walls, this little garden offers captivating pictures worth all the scrutiny and rambling, and provides natural themes for painting or poetry. Celebrated writers and painters through the ages, ranging from Su Shunqin (1008-1048), Ouyang Xiu (1007-1072)¹ and Mei Yaochen (1002-1060)², to Wu Changshuo (1844-1927)³, not to mention so many celebrities of modern and contemporary times, have come up with voluminous works in eulogy of this very garden. None of them, however, describe its serenity and elegance better than its earliest owner Su Shunqin in this seven-character truncated quatrain, "Touring the Dark Blue Waves Pavilion Right after Rain":

Night to dawn it rains upon a vernal river,
Sly clouds makes it now overcast, now fine;
Faint behind curtains are sun, bamboo, flower,
Squab doves sing to each other now and then.

The Dark Blue Waves Pavilion is the oldest extant garden in Suzhou. It began as the mansion of Qian Yuanliao (886-942), Prince of Guangling of the Wu-Yue Kingdom of the Five Dynasties (907-960). Another theory, however, attributes it to Sun Chengyou (*fl.* 10th century), a military commissioner and close relative of the royal family. Under the Qingli reign (1041-1048) of the Northern Song, the poet Su Shunqin bought the property, built a pavilion on it, and

named it "Dark Blue Waves Pavilion." During the Xining reign (1068-1077) of the Northern Song, it was acquired by Grand Councillor Zhang Dun (1035-1105)⁴. After it was destroyed during the Jianyan reign (1127-1130) of the Southern Song, Han Shizhong (1089-1151) came into possession of it. During the Yuan-Ming period it had assumed different identities—the Wonderful Temple to Hide In, a Buddhist dormitory, and the Memorial Shrine of King of Qi⁵ during the Jiajing reign of the Ming. Shi Wenying (*fl.* 16th century) restored the property from its ruins. During the Kangxi reign (1661-1722) of the Qing, the Memorial Shrine of Su Shunqin was built in 1684, and Song Luo (1634-1713), a governor of Jiangsu, had the pavilion rebuilt. When it was rebuilt once again in 1827, the seventh year of the Daoguang reign (1821-1851), the Shrine of Five Hundred Sages⁶ was added west of today's Hall to Understand the Way. After being rebuilt again in 1873, or the twelfth year of the Tongzhi reign, the garden has remained to this day. A picture of a full view of the garden under Qing Emperor Guangxu's reign (1875-1908) engraved on a stone tablet in front of the garden provide valuable reference to its history. The Dark Blue Waves Pavilion differs from its counterparts in that it has long been treated as a public facility, where local officials and gentries throw banquets, and men of letters gather for literary functions—all of which is attributed to the garden's one-of-a-kind design and layout.

苏州沧浪亭

人们一提起苏州园林，总感到它被封闭在高墙之内，窈然深锁，开畅不足。当然这是受历史条件所限，产生了一定的局限性。但古代的匠师们，能在这个小天地中创造别具风格的宅园，间隔了城市与山林的空间；如将园墙拆去，则面貌顿异，一无足取了。苏州尚有一座沧浪亭，也是大家所熟悉的名园。这座园子的外貌，非属封闭式。因葑溪之水，自南园潏洄曲折，过“结草庵”（该庵今存白皮松，巨大为苏州之冠），涟漪一碧，与园周匝，从钓鱼台至藕花水榭一带，古台芳榭，高树长廊，未入园而隔水迎人，游者已为之神驰遐想了。

沧浪亭是个面水园林，可是园内则以山为主，山水截然分隔。“水令人远，石令人幽”，游者渡平桥入门，则山严林肃，瞿然岑寂，转眼之间，感觉为之一变。园周以复廊，廊间以花墙，两面可行。园外景色，自漏窗中投入，最逗游人。园内园外，似隔非隔，山崖水际，欲断还连。此沧浪亭构思之着眼处。若无一水萦带，则园中一丘一壑，平淡原无足观，不能与他园争胜。园外一笔，妙手得之。对比之运用，“不着一字，尽得风流”。

园林苍古，在于树老石拙，唯此园最为突出；而堂轩无藻饰，石径斜廊皆出于丛竹、蕉荫之间，高洁无一点金粉气。明道堂闳敞四合，是为主厅。其北峰峦若屏，耸然出乔木中者，即所谓沧浪亭。游者可凭陵全园，山旁曲廊随坡，可凭可憩。其西轩窗三五，自成院落，地穴门洞，造型多样；而漏窗一端，品类为苏州诸园冠。

看山楼居园之西南隅，筑于洞曲之上，近俯南园，平畴村舍（今已皆易建筑），远眺楞伽七子诸峰，隐现槛前。园前环水，园外借山，此园皆得之。

园多乔木修竹，万竿摇空，滴翠匀碧，沁人心脾。小院兰香，时盈客袖，粉墙竹影，天然画本，宜静观，宜雅游，宜作画，宜题诗。从宋代苏子美、欧阳修、梅圣俞，直到近代名画家吴昌硕，名篇成帙，美不胜收，尤以沧浪亭最早主人苏子美的绝句：“夜雨连明春水生，娇云浓暖弄阴晴；帘虚日薄花竹静，时有乳鸠相对鸣。”最能写出此中静趣。

沧浪亭是现存苏州最古的园林，五代钱氏时为广陵王元璩池馆，或

云其近戚吴军节度使孙承佑所作。宋庆历间苏舜钦（子美）买地作亭，名曰“沧浪”，后为章申公家所有。建炎间毁，复归韩世忠。自元迄明为僧居。明嘉靖间筑妙隐庵、韩蕲王祠。释文瑛复子美之业于荒残不治之余。清康熙间增建苏公祠，道光间建五百名贤祠（今明道堂西），又构亭。道光七年（公元1827年）重修，同治十二年（公元1873年）再重建，遂成今状。门首刻有图，为最有价值的图文史料。园在性质上与他园有别，即长时期以来，略似公共性园林，“官绅”谦宴，文人“雅集”，胥皆于此，宜乎其设计处理，别具一格。

南京博物馆《文博通讯》1979年12月第28期

RETREAT AND REFLECTION GARDEN, TONGLI

January 1991

When the vast land of Jiangnan was draped in the feeble sunshine of an early-winter day, I paid a second visit to the Retreat and Reflection Garden in Tongli, a small town in the water-bound county of Wujiang. Past events faded and vanished like mist, but when this garden's scenery met my eyes, memories of the people associated with it kept flashing into mind. It is a long story, but I have got to make it short in this brief note.

Since I labelled the Retreat and Reflection Garden a "water-hugging" one, local authorities have taken the cue and gone out of their way agreeably to repair and renovate it. As I paused at its pond, I remembered coming across this garden's name some forty years ago. At the time I was teaching in St. John's University in Shanghai, and my colleague Ren Chuanxin (1887-1962)¹ happened to be the garden's owner. The venerable Ren was thirty years my senior, but we became bosom friends despite the age gap. A scholar and a celebrity, German educated, and, like his friend Wu Mei (1884-1939)², a polymath in Chinese theater, Ren could compose music and sing Kunqu Opera. He was also a pioneering educator in modern China and the founder of the Lize Girls' School east of the garden.

The Retreat and Reflection Garden is connected with dwellings. In front of it is a yard in which a thousand chrysanthemums are as luxuriant as the Chinese rose planted in the Ethereal Outline Garden by Zeng Pu (1872-1935)³ in the nearby county of Changshu. I gather someday these chrysanthemums will become a seasonal attraction at the Retreat and Reflection Garden.

Tongli is the hometown of Ji Cheng (1582-c. 1642), an immortal

name in Chinese garden-making history. His three-volume *The Craft of Gardens* is a classic that has impacted China and spread to Japan and the West. As the next year will be the 410th anniversary of his birth, I would like to propose that under the auspices of the government of Wujiang county, a memorial meeting be held at Tongli and a pavilion dedicated to him so that garden-makers and tourists from around the world can come to honour his memory.

Wujiang county is a cultural center. The tea houses and wine shops in town have hosted so many famous scholars and theatrical experts who come to appreciate paintings, recite poems, take in a story-telling performance or two, or gather to learn how to sing Kunqu operas correctly. Among those who are my acquaintances are Jin Songcen (1873-1947)⁴, Ling Jingyan (1904-1959)⁵, Jin Lichu (1911-1994), Cai Zhengren (1941-), Ji Zhenhua (1943-), and Xu

Xiaomu (1916-1998)⁶, whose lives approximately encompassed a hundred years. Inspired by the cultural tradition of this water-bound town famous for its garden and Kunqu Opera repertoire, I call Wujiang "Glorious Cultural Edifice of Jiangnan and Waterbound County with a Celebrated Garden." Now that Wujiang's another name is "Songling," I also add "Opera Singers' Songling" to the appellation.

Ren Chuanxin was the last owner of the Retreat and Reflection Garden. As he lived in Shanghai in his evening years, the garden gradually fell into decay, and became dilapidated in early post-1949 years. Out of concern for this esteemed colleague of mine, I put in a word for the garden with the local government, and as a result it has been resurrected at last. Isn't it karma, to cite a Buddhist term, that is at work?

The town of Tongli is named after her abundance of water. Without water there would be no Tongli today. In the past there was a clear stream flowing by the Retreat and Reflection Garden, but it has long been filled in. How I wish it were restored! In terms of seniority, this garden is a latecomer among others, but probably because of this it has a much better layout. It features a main road, a screen wall, a

portal gateway, servants' rooms, a sedan-chair hall and a main lobby. The master's suite is located in the east, which is a horse-accommodative loft⁷ connected left and right by a storied walkway, with a spacious patio in the center. Guestrooms and a studio are situated further east. Tranquillity is enhanced with rockery and trees in between the buildings. The easternmost part of the property is found in the garden, while the aforementioned girls' school sprawls in the distance. The whole estate extends west and east in a series of self-contained sections. There are other gates opened onto the garden. The well-preserved buildings and the picturesque garden supplement each other in delightful and comfortable ways. The only pity is that the external view borrowed by the garden is marred by a water tank, an embarrassing eyesore that makes me wonder when it shall be removed.

Everybody is talking about economic growth nowadays. At the town of Tongli, it is water that has revived its famous garden. It is water, too, that brings wealth to town. With its water-bound land and garden over and above its Kunqu Opera's water-mill tune, Tongli is China's veritable answer to Italy's Venice. If the stream that used to run across town is restored, Tongli will rise to become the Jiangnan area's another tourist center that entices visitors with its abundant water.

With the tune over, I have passed Songling Road,

Looking back, fourteen bridges in mist I descried.

Through these two beautiful lines, the poetic sentiment and picturesque charm imbued in the views of Tongli are brought to vivid life.

同里退思园

初冬的微阳，浅照在江南的原野，我又重游了水乡吴江同里的退思园。往事如烟，触景怀人，说来也话长了。

退思园自从我誉为贴水园后，地方上能欣然会意，花了很大的力量，修理得体。我小立池边，想起我初知退思园之名，还是四十多年前的事了。我当时在圣约翰大学教书，同事任味知（传薪）先生就是该园的主人。任老长我三十岁，与我为忘年交，学者兼名士，他能度曲，是曲学泰斗吴瞿安（梅）的好友。留学过德国，又在园东创办了一所女子中学，开风气之先。园与宅相连，前有菊圃，植菊千本，与常熟曾孟朴先生的虚廓园中栽月季一样豪华，我相信将来退思园的艺菊也可能添一时景吧。

历史上，同里有位计成，在中国造园史上享有不朽的盛名。计成生于明万历十年（公元1582年），他著有《园冶》一书，是造园学的经典著作，不但影响我国，而且传播到日本及现在的西方。明年是他诞生四百十岁周年，我建议我们造园界在吴江县委政府的倡导下，在同里开个纪念会，并在那里造一个“计亭”，让世界的园林界与旅游者前来凭吊。

吴江这地方，真是文化之地，过去茶坊酒肆中品画闲吟，听书拍曲，仅以我认识的学者名流曲家来谈，除任老外，还有金松岑、凌敬言、金立初、蔡正仁、计镇华、徐孝穆诸先生，人物前后跨越约一百年。这个以园名曲名的江南水乡，触发了我的情思，因此叫出了“江南华夏，水乡名园”两句话，还加了一句“度曲松陵”（吴江又称松陵）。

任味知先生是退思园的最后主人了，晚年住上海，园渐衰落，一直到解放后已是残毁不堪了。因为任老的关系，我关心了一下，终于救了出来，这也是佛家所谓“缘”吧？

同里以水名，无水无同里，过去退思园边就有清流，现在填掉了。我多么希望能恢复原状。退思园论时代是较晚近一些，布局进步了，正路照壁门屋下房轿厅大厅，东边上房是主人居住之处，一个大走马楼，左右楼廊联之，天井大，很是开朗；再东为客房、书房，在楼屋中，点缀山石乔木，极清静；再东为花园，园外远处为女校，其平面发展自西向东，各自成区，园又有别门可出入。华夏完整，园林如画，相配得很

是可人、宜人，可惜园外有一座水塔，借景变成增丑，不知何日可以迁走呢？

目前大家在谈经济开发，同里以园带水，以水带财，水乡、水园、水磨腔（昆曲名水磨腔）——中国的威尼斯。如能恢复已填的市河，可形成以水游为主的水乡风味特色的江南景点。“曲终过尽松陵路，回首烟波十四桥。”太富有诗情画意了。

1991年1月

YANGZHOU GARDENS AND DWELLINGS

Social Science Front, Issue No. 3, 1978; first manuscript, August 1961; revised, November 1977

An old city with a hallowed tradition, Yangzhou of Jiangsu province was the richest place in its early years thanks to a succession of economic booms taking place on its land. The abundant economic and material resources thus accrued furnished favorable conditions for development in culture and art, and as a result, the city's gardens and dwellings acquired an inimitable style through a unique course of development.

The history of Yangzhou can be traced back to 486 BC, the thirty-fourth year of the reign of the King of Jing of Eastern Zhou (770-221 BC), when Fu Chai (?-473 BC), the last king of the state of Wu of the Spring and Autumn period (770-467 BC), built the city of Hancheng in what is present-day Yangzhou, and dug a rice-shipping canal that ran northeast to Lake Sheyang and northwest to the Huai River at Mokou. Hence the name of the canal, "Han Ditch." As Yangzhou occupied an area of strategic importance between the Yangtze and the Huai, it became a major political and military centre in southeast China toward the end of the Spring and Autumn period. Economically speaking, local fishery, salt-making, handicrafts and agriculture went a long way as Yangzhou gradually grew into a national distribution hub for grain, salt and iron. After the Sui-Tang period, it evolved into a trade and cultural centre for exchanges with the outside world. All this set the stage for the prosperity of Yangzhou.

By the Sui-Tang period Yangzhou had become a rich city of utmost importance to the nation. The reunification of south and north China after Yang Jian (541-604), or Emperor Wen (in reign 581-604)

founded the Sui (581-618), offered good opportunities to tap the wealth of the Yangtze-Huai basin, and Yangzhou, centrally located in this area, was quick to hit the riches. When the second monarch of the Sui, Yang Guang (569-618) or Emperor Yang (in reign 569-618), came to town, he went on a binge of dissipation and debauchery while building imperial palaces and resorts in a big way. Yangzhou's prosperity peaked as a result, even though her wealth failed to grow substantially for one reason or another. The Grand Canal dug under Emperor Yang's reign turned the city into a pivotal link on this waterway that spanned south and north China and provided favorable conditions for economic development.

Advances achieved in architectural technology through exchanges between builders dispatched from north China by the imperial court and those from the Jiangnan area boosted the building industry in a big way in Yangzhou. Just as the Tang-dynasty poet Du Mu (803-852)¹ writes in his poem "To the Chan Wisdom Temple of Yangzhou,"

Who knows when all's quiet on West Bamboo Road,
Yangzhou comes alive with notes of flute and ballad.

This line gives a glimpse at the glamour and prosperity of Yangzhou.

As early as the Southern and Northern dynasties, Xu Zhanzhi (410-453)² of the Song (420-479) built the Wind-Bathing Pavilion, Moon-Watching Platform, Flute-Playing Terrace, and Lute-Playing Chamber at the foot of the Mountain-Level Hall. By the Zhenguan reign (627-649) of the Tang, Pei Chen's Cherry Garden was completed, offering fabulous sights with "multiple layers of lofts and pavilions with a refreshing and graceful flower culture," but it was outshined by the Hao's Garden before long. These gardens, alas, failed to survive war and turmoil during the last years of the Tang. New gardens emerged during the Song, including those attached to the prefect's *yamen*, the Aromatic Beauty Garden, Spring-in-Kettle Garden and Garden of Ten Thousand Flowers, whose views were based on waters and trees. When the Jurchen troops invaded south China,³ Yangzhou

sustained considerable destruction. As Jiang Kui (1154-1221)⁴ says in his "Lyrical Poem to Yangzhou in Slow Tempo,"

After barbarian cavalymen coveting the land in the south abandoned Yangzhou and crossed the Yangtze, the city wall and moat were reduced to shambles along with all the tall trees, and the local people abhorred the war more than anything else. When dusk fell, the dreary sound of bugles rose, reverberating around the deserted city.

The Grand Canal was silted up and no longer navigable during the Southern Song-Jin period (1127-1234), and waterway transportation gave way to offshore marine shipping by the early Yuan. The economy of Yangzhou went downhill as a result, which is why in Yuan history books only two or three gardens are recorded, including the Flat Wilderness Verandah and Cui Boheng's Garden. It was not until the early Ming that the Grand Canal was dredged and restored to become the major waterway between north and south China, and Yangzhou re-established itself as the salt distribution center for areas on both sides of the Huai. During the mid-Ming, Yangzhou came back into its own thanks to the emergence of capitalist economy in embryo, with the salt industry growing apace along with commerce and handicraft. The boom of Yangzhou reached its pinnacle during the seventeenth and eighteenth centuries. While the feudal ruling class indulged in extravagance and dissipation, the industrious and intelligent labouring people of Yangzhou created a unique school in garden-making and left a rich cultural heritage to posterity.

From the mid-Ming onward, merchants from Anhui flocked to Yangzhou alongside those from Jiangxi, Hunan, Hubei, and Guangdong provinces. They joined local people in running businesses, but the whopping profit they had made was not invested in reproduction. Instead, the lion's share of it was used partly to pay for a luxury lifestyle and partly for large-scale construction of gardens and mansions. Architects and constructors from Huizhou arrived on the heels of Anhui merchants, and blended their technical know-how into the Yangzhou style of architecture and garden-making. Local

construction of buildings and gardens was augmented by artisans from nearby Xiangshan of Suzhou with construction materials brought in from various parts of the country through the area's convenient waterway shipping network. This gave rise to a host of landmark gardens, including the Plum Flower Ridge built by Prefect Wu Xiu during the Wanli reign (1573-1619) of the Ming, in which pavilions and terraces were built around rockeries.

The gardens owned by the four brothers surnamed Zheng⁵ during the Ming-Qing transition—Yuansi's Five-"Mu" Garden, Yuanxun's Mountain-Water-Willow Shadows' Garden, Yuanhua's Propitious Trees Garden, and Xiaru's Leisure Garden—were extolled for their big sizes and distinct craftsmanship. The Mountain-Water-Willow Shadows' Garden, for one, was created by the renowned garden crafter Ji Cheng from Wujiang with the support of its owner, Zheng Yuanxun, who knew a smattering of the craft of gardens under the influence of local garden-makers. The literati-officials in those years vested their sentiments in mountains and rivers, and the artisans they employed stacked up rocks and dug ponds to conjure up limitless spectacles in limited spaces on the level ground of Yangzhou. Every fabulous garden thus made looked as if they were wrought through the divine hand of Mother Nature. Although these gardens were badly destroyed after Yangzhou was sacked by Manchu conquerors in 1645 and after, and only a fragmental impression of their architectural achievements can be gained from the few *Phoebe nanmu* halls that had survived the conquest, their legacies still furnished technical groundwork for large-scale construction of landscape gardens during the Qianlong reign (1736-1796) of the Qing.

In the early years of the Qing, local aristocrats came up with what was known as "Eight Famous Yangzhou Gardens": the Garden of Librarian Wang (in the Editorial Service of the Heir Apparent), the Bian's Garden, the Yuan's Garden, the He's Garden, the Spring Outing Garden, the Couth Garden, the Garden of Censor Zheng, and the Slim Bamboo Garden. During the Qianlong reign, the rulers went on a

construction binge in which large numbers of pavilions, terraces, lofts and gardens were built in Yangzhou to satisfy the emperor's indulgence in comfort and pleasure on his repeated inspection tours of the south.⁶ To curry favor with the imperial family, local gentries and merchants joined in the garden-making rush and built a lot of gardens. As a result, the area from the Slender West Lake to the Mountain-Level Hall⁷ was clustered with the world-famous "Twenty-Four Sights" where

On both dykes flowers and willow cling to water surface;

Stretching all the way to hills are many a hall and terrace.

This scenery prompts Li Dou (1749-1817) to quote Liu Dagan (1753-1834)⁸ as saying in his *Record of the Painted Pleasure Boats of Yangzhou* (Volume Six),

Hangzhou puts its name on the map with its lakes and mountains, and Suzhou does so with its markets and shops, whereas Yangzhou excels with its gardens.

The three cities face each other like the legs of a tripod—there is no telling which city is the best.

This statement, indeed, hits the nail on the head. Availing themselves of the Qing emperors' repeated inspection tours of the south, the rich and powerful in Yangzhou lined their pockets with the wealth the populace had created with blood and sweat under the pretence of collecting "tributes" to the emperors. Local merchants stepped up ripping off their customers by hiking salt prices and drawing commissions from the so-called "wear and tear" cost. The emperors profited from manipulating the interest rate on loans granted to these merchants and from deducting commissions from salt sales in the name of the state treasury. As salt prices skyrocketed, local people found it increasingly hard to afford table salt as a daily necessity. Feudal bureaucratic merchants wilfully squandered the money they had embezzled and scrambled to build large gardens and sumptuous mansions for themselves. The ulterior motives and high-handed actions, with which the feudal rulers and local tyrants, evil gentry and rich merchants dealt with the gardens created by the labouring people, were natural reasons why these gardens could not be made to

last. Xie Rongsheng (?-1790)⁹ says of the upsurge in garden construction during this period in his preface to *The Record of the Painted Pleasure Boats of Yangzhou*,

To build ranges, more rockeries are added,
So each family is in an emerald city dwelled;
To build canals, stagnant water is dredged,
All lofts and belvederes are in fog enveloped.

Garden-making became the order of the day wherever construction went apace. Apart from the gardens on the Slender West Lake, the other parts of Yangzhou were also studded with famous gardens. These included the Imperial Garden in the emperor's temporary palace near the Heavenly Peace Temple, the eastern and western gardens of the Dharma Purity Temple, the Literati's Embosoming Studio of the Salt Distribution Commission, the Kerria Garden of the Hunan Fellow Provincials' Guild, as well as the Nine Peaks Garden, the Qiao's East Garden, the Qin's Imagined Garden and the Lesser Exquisite Mountain Abode, not to mention so many ancestral shrines, academies, assembly halls, restaurants, brothels, and bathhouses. In these gardens, rockeries were built, water was channelled in, and flowers and bamboos were planted. Spotty ornamentation of this kind in courtyards seemed to have become an indispensable part of garden construction. As the Qing empire began to go downhill after the Qianlong reign, feudalism was falling apart after ruling the nation for two thousand years, and the succeeding emperors dared not go on inspection tours down south any more. Large-scale confrontations were fermenting as class and ethnic conflicts sharpened, Western powers increased their pressure on the empire, and the feudal society was shaken to the core. By Emperor Jiaqing's reign (1796-1821), monopoly salt sales in Yangzhou had been dwindling with each passing day. The signing of the Sino-British Treaty of Nanjing in 1842 in the aftermath of the Opium War (1840-1842) and the Treaty of the Bogue on July 3, 1843 that forced China to open Shanghai, Ningbo, Xiamen, Fuzhou and Guangzhou as

new trade ports, plus the completion of the Tianjin-Pukou Railway in 1908 and the booming marine shipping—all these factors added up to strip Yangzhou of its importance to national economy and transportation.

In his "Postscript to *The Record of the Painted Pleasure Boats of Yangzhou*" in 1834, or the fourteenth year of the Daoguang reign, and in his "Second Postscript" to the same book five years later, the writer and thinker Ruan Yuan (1764-1849)¹⁰ concludes after recounting every sign he sees of an empire on its last legs,

No guest can bear a loft or terrace deserted;

No wilting or fallen tree can stand faggoting.

These words, written nineteen years before Yangzhou was sacked in the Heavenly Kingdom Uprising in 1853, give the lie to the many records that unanimously blame the uprising army as the culprit for the destruction of the gardens around the Slender West Lake. After the emperors Xianfeng (in reign 1851-1862) and Tongzhi (in reign 1862-1874), Yangzhou enjoyed a short spurt of prosperity "staged" by local aristocrats and rich merchants who rose to power by quelling the Heavenly Kingdom Uprising in an attempt to prop up the delaying Qing empire, and then the city collapsed and local gardens were caught in the throes of massive devastation. By the Republican years (1912-1949), the national economy had been on the ropes after going through the rules of warlords and the Kuomintang reactionaries, and Japanese occupation and their puppet regime, and even more gardens and mansions in Yangzhou were reduced to shambles. Local salt merchants, having lost their profiteering opportunities with the abolition of monopoly salt coupons and eaten up their resources, were forced to tear down their homes and artificial mountains and sell the building materials and rocks thus acquired. Gardens and big mansions in the city fell into desolation.¹¹

Sandwiched between south and north China, Yangzhou has fostered an original style in architecture, so much so that no study of traditional Chinese architecture would be complete without it. The

architecture of Yangzhou is something of a compromise between the royal buildings in the north and what is native to the Jiangnan area, a compromise that had a lot to do with the south China inspection tours of the Qing emperors, the intermingling of merchants from across the country, and the convenient local road and waterway transportation, but the key lies in technical exchanges between artisans from various quarters. Qian Yong says in *A Collection of Anecdotes in the Lü Garden* (Volume Twelve),

It is certain that Yangzhou leads the country in the craft of house construction. There, like compositions written in different styles, no two buildings look alike. Even a building with a few rooms must have high and wide doors and windows, and the interiors must be sensibly convoluted.... Every hall or main room should be tidy and exude an aura that rivals a ranking official's mansion. The study and the backroom should be kept apart the way the pavilions in a garden are spaced, but neither one can do without the other. Only thus can a building be deemed a masterpiece.

Interior decoration in Yangzhou's buildings is no less ornate. According to the same book quoted above,

The Zhou's Principles [for interior decoration] are peculiarly Yangzhou's own. They were laid down by a man surnamed Zhou toward the end of the Ming. Hence the term.

The Zhou's Principles were also followed in the interior décor of major buildings in the Garden of Perfect Splendor in Beijing.¹² Among the famous specialists in palace interior decoration were Gu Licheng and Cheng Lie, while Yao Weichi, Shi Songqiao, Wen Qi, Xu Lü'an, Huang Sheng, and Huang Lüxian's brothers Lühao and Lü'ang were also well accomplished in architecture and furnishing. According to *The Record of the Painted Pleasure Boats of Yangzhou* (Volume Two),

Yangzhou makes a name for herself with famed gardens; her gardens put their names on the map with stacked rockwork.

There was no lack of well-known artificial mountain builders active in Yangzhou as well. During the Ming-Qing period there were Ji Cheng (1582-c. 1642), who built the artificial mountain for the Mountain-Water-Willow Shadows' Garden; Shitao (1642-c. 1707)¹³, who crafted the Garden of Ten Thousand Rocks and the Small-Rock

Mountain Abode; Zhang Lian (1587-1673), who constructed the mountain for the White Sand, Emerald Bamboos and Riverside Village; Qiu Haoshi (1723-1795), who built the Xuan Stone Mountain at the Hall of Mental Serenity; Taoist Priest Dong (1736-1795)¹⁴ who piled up the Nine-Lion Mountain; Ge Yuliang (1764-1830), who built the Qin's Lesser Winding Gully; as well as Wang Tianyu¹⁵ and Zhang Guotai. Among the latecomers was Yu Jizhi (1903-1961)¹⁶, who built artificial mountains for the Emerald Garden, the Mind Cheering Hut, the Gourd Hut, Li Weiru's Garden¹⁷ and the Spring Outing Garden. Some of them were natives, and some came from other parts of the country. These rockery virtuosos often huddled together to compare notes for the ways and means to improve the craft of artificial mountains. With wisdom and diligence they have bequeathed a wealth of artistic mountains on posterity.

Apart from general histories and prefecture or county gazetteers, records on Yangzhou gardens and buildings are also found in such books as *Grand Occasions of Southern Inspection Tours*, *Scenic Sites of the Jiangnan Area*, *Illustrated Interpretations of Temporary Royal Palaces*, and *An Illustrated Manual on Scenic Gardens and Pavilions*, Cheng Mengxing's *Records of the Celebrated Gardens of Yangzhou* and *A Compact Record of the Mountain-Level Hall*, Wang Yinggeng's *Records of the Mountain-Level Hall*, Zhao Zhibi's *An Illustrated Record of the Mountain-Level Hall*, and Li Dou's *Record of the Painted Pleasure Boats of Yangzhou*, all of which were written during the Qianlong reign of the Qing. This list is followed by such later works as Ruan Heng's *An Illustrated Record of Scenic Spots in Guangling*, and Qian Yong's *A Collection of Anecdotes in the Lü Garden*, and Luo Zaitian's *A Painting of Scenic Spots in Yangzhou* during the Daoguang reign. More recent works include Wang Zhenshi's *Records of Scenic Fascinations of Yangzhou* and Dong Yushu's *Nostalgic Memories of a City Deserted*. Of all these works, *The Record of the Painted Pleasure Boats of Yangzhou* offers the most elaborate and truthful records, whose seventeenth volume, "Construction Specifications," draws on the *Construction*

Regulations of the Ministry of Works of the Great Qing and the *Engineering Specifications of the Garden of Perfect Splendor*, and many of its accounts on construction work are backed up with extensive collations and allusions, something books produced prior to it failed to do.

Yangzhou sits opposite Zhenjiang from the northern bank of the Yangtze, with the Shugang Hillock to the north, the Dirt-Sweeping Mountain (known originally as Dogs-in-Heat Mountain) to the west, and the Grand Canal to the east. Its terrain is rather flat, with its northwest slightly higher than its southeast. Its soil falls in two categories: calcium-rich clay in the hilly area in the northwest, and sandy soil in the alluvial plain in the southeast, with a considerable part of its land lying under a layer of rubble. As to the climate, the city is in a north temperate belt in gradual transition to a subtropical zone, with temperatures averaging 30 degrees Celsius in summer and 1-2 degrees Celsius in winter. The wind from the sea in close proximity keeps the city cool in summer and a little cold in winter. Soil frozen depth stands at 10-15 centimeters, and annual precipitation above 1000 millimeters. As Yangzhou is situated in a seasonal monsoon region, its wind is mostly easterly in summer and northeasterly in winter, but the northeasterly is the dominant wind, and it is affected to a certain degree by typhoons.

With flat terrain, mild climate, ample rainfalls and fine soil quality, Yangzhou's natural environment is friendly to labour, production and everyday life. Its central location in a transportation network, well-developed commerce, and long years of prosperity combine to boost the local building industry. However, given its natural conditions, Yangzhou lacks such building materials as timber and stone and relies heavily on imports. Imported precious building materials are found in the former residences and gardens of aristocrats and rich merchants, including *Phoebe nanmu*, red sandalwood, mahogany, rosewood, ginkgo, marble, and exotic stones shipped in from Gaozi and Lake Tai in Jiangsu province, and from Lingbi and

Xuancheng counties in Anhui province.

Yangzhou's gardens and former mansions were concentrated in city proper, whereas its largest buildings were mostly in the New City. In the past, the residents of the Old City were literati-officials and ordinary citizens, whereas those living in the New City were mostly salt merchants. Prior to the mid-Qing, most salt merchants lived in gardens in the area around Eastern Pass Street, including the Lesser Exquisite Mountain Abode, the Garden of Longevity Fungus or the predecessor of the Geyuan's Garden, the Belvedere of Hundred-Foot Phoenix Tree, the Garden Scraped Together and the Garden of Matchless Talent built at a later time. Adjacent to them were later buildings such as the Wang's Small Garden on Taoist Earth Official's Domain Lane and the Cangzhou Estate on Easterly Violet Rays Lane. And the cluster spread on, until it reached Garden Lane and Down the South River Street, such as the Sound-of-Autumn Mansion, the Loft for Reading with the Moon, the Small-Rock Mountain Abode, the Kerria Garden, the Small Meandering Valley, and the Whistling Scholar's Mountain Abode¹⁸. These gardens and mansions were surrounded with tall walls, and looked similar to those in the other cities of the Jiangnan area. The buildings in the Old City, whose simplicity is typical of the architecture style of northern Jiangsu, were mostly small and low, but its lanes and alleys were aligned in good order, a fact that is inseparable from the economic conditions of the local dwellers. Better residential quarters in the city are always found where road and waterway conditions are convenient or close to the Salt Shipping Administration and the shopping center.

In urban Yangzhou, thirty classical gardens of varying sizes remain relatively intact today, as exemplified by the Small-Rock Mountain Abode, the Geyuan's Garden, the Whistling Scholar's Mountain Abode, the Small Meandering Valley, the Garden of Matchless Talent, the My Half-"Mu" Garden, the Mind Cheering Hut and Li Weiru's Garden. These gardens are outnumbered by well-preserved mansions in different architectural styles, including those

once in the possession of Lu Shaoxu (1843-1905)¹⁹, Wang Boping (*fl.* 19th century), Zhao Haishan (*fl.* 19th century) and Wei Cigeng (*fl.* 19th century)²⁰.

In most cases, Yangzhou mansions are so judiciously put together with gardens that they look at once detached and attached, yet neither one can stand on its own without the other.

·Gardens

The Small-Rock Mountain Abode is found in the former mansion of He Weijian (1835-1908)²¹. Known also as "Twin Pagoda Trees Garden," it was Wu Jialong's villa before Wu Huimo²² took over. The artificial mountain that remains of it was said to be wrought by Shitao, and, therefore, is celebrated as the only extant rockwork he bequeathed on humanity. The mountain faces south, and, judging from its plane, it is a wall-leaning rock formation with its width exceeding its height. Judging from its dynamic appearance, its main peak should have stood at its western end, its steep and verdant form rising up in the wind, nodding its fantastic head at the visitor while looking down upon a pond at its foot. As the visitor mounts the stone stairway by way of a bridge fashioned out of a single stone slab, he sees a wintersweet with well-spaced boughs and lush leaves while a narrow path threads its way up the cliff and terminates at the top.

Below the mountain there are two square rooms built of bricks, which is why the entire rockwork is called "Small-Rock Mountain Abode." As the mountain winds its way eastward, it leads to a deep and quiet cave, with all the component rocks integrated into a whole as if by heaven's divine hand. Unfortunately, the part of the mountain west of the cave has crumbled; gone, too, are the buildings atop it, making it impossible to see the original rock formation in its entirety. Judging from its layout, it follows by and large the Ming-dynasty tradition of artificial mountains. Its main peak and stone cave are accentuated so that what is primary is visibly told apart from what is

secondary. Small though the space is, the layout appears natural, with density and spacing sensitively handled, and the rugged shapes of the component rocks give apt expression to the name of the work, "Small-Rock Mountain Abode."

The Yangzhou style of rockwork is marked for its clever use of small rocks. As Shitao had built an artificial mountain in the Garden of Ten Thousand Rocks, I surmise he must have done it by piecing and imbedding that many small stones with masterful expertise. Before he set about building the mountain in the Small-Rock Mountain Abode, he must have carefully picked the stones he wanted, with due attention to size as well as their horizontal and vertical veins and wrinkles. Only then did he put his raw materials together to come up with a lifelike mountain by applying the theory he had summarized in his book, *Monk Balsam Pear on Painting*,

Only when texturing brushwork tallies with a peak being portrayed in a painting can the veins and wrinkles look like born of the peak.

Only in this way can one create a work in which, according to Shitao's colophon on "A Small Landscape Painting by Monk Balsam Pear,"

A single peak overlooks a sweeping stretch of ridges replete with ruptured chasms, with the vista shifting at every wink of the eye and appearing at once connected and disconnected.

For this reason, this rock formation with lofty peak and deep cave shows no trace of axing and chiselling. Instead, it is characterized by consistent texturing, compact layout and design, and methodical contrast between intangibles and tangibles. As *A Collection of Anecdotes in the Lü Garden* (Volume Twenty) puts it,

At Garden Lane in the New City of Yangzhou there is the Small-Rock Mountain Abode. At the back of its two halls water converges in a square pool on which a mountain built of Lake Tai stones stand fifty to sixty feet tall and looks very imposing and steep. Legend has it that it was Monk Shitao's work. The property is the former residence of a man surnamed Wu, which later came into the possession of a female matchmaker, who converted it into a noodle eatery that doubled as an opera house. For this purpose she remodelled the large sitting room and converted it into a theater at the Qianmen neighborhood of the capital city, but it looks unbearably vulgar.

The address mentioned in this quotation tallies with what is recorded in local gazetteers, but today, only a three-framed *Phoebe nanmu* hall remains of the aforementioned double halls. It should have been built during the Qianlong reign of the Qing. A "through house" with corridors on its four sides, large and tall enough for horses to trot through, still stands by the artificial mountain. The pool has long been levelled, but by tracing its Lake Tai stone-lined embankment, we can figure out what the water surface looked like in old days.

The Lake Tai stones selected to pile up the artificial mountain accord with what is described in historical accounts, and so does the height of the mountain peak that rises over the surrounding wall, even though its peak has collapsed. As to the cleverness with which the mountain was built, with a singular peak leaning against the clouds while casting its reflections down low in the transparent pond at its foot, it really deserves its reputation of being "fantastically steep," but most distinctive of all are its stone wall, stone stairway, and stone cave. Shitao's rockery construction expertise has a tremendous influence on posterity, and Ge Yuliang, a rockery master active during the reigns of Jiaqing and Daoguang after Qianlong, was counted among the finest successors to Shitao's craft. *A Collection of Anecdotes in the Lü Garden* (Volume Twelve) has this to say:

....If rocks large and small are hooked and connected in the same way as a chain bridge is built, [the rockery] can last for a thousand years. Only when the rockery is as sturdy and looks as natural as a real mountain or cave can the craftsman be deemed capable.

The artificial mountains in the Beauty-Encircled Mountain Abode of Suzhou, the Homecoming Swallow Garden of Changshu, and the Lesser Winding Gully in the Qin's Imagined Garden of Yangzhou were among the masterpieces of Ge Yuliang. The stone-hooked rock formations remain intact in the first two gardens.

Built by Huang Yingtai (1770-1838)²³, chief administrator of salt commerce of Huainan and Huaibei during the Jiaqing and Daoguang reigns, the Geyuan's Garden with ten thousand bamboos planted in it

at Eastern Pass Street derives its name from the owner's style name. According to Liu Fenggao's (1760-1830) "Notes on the Geyuan's Garden," the garden is built on the former site of the Garden of Longevity Fungus, whose original rockwork is said to have been built by Shitao, but there is no evidence to back it up. It is attributed to Shitao probably because the artificial mountain built of yellow stones in the garden resembles Mount Huangshan in Anhui, whose scenery Shitao was fond of portraying in his paintings. The original Geyuan's Garden was a bit larger than it is now. After the estate was renovated, only the central and eastern columns of residences on the premises are in existence, and both the front gate and the portico were destroyed. Only the brick carvings on the screen wall have kept its original exquisite looks. Each column of the residence consists of three rows of houses in interconnected courtyards. The two piedroits in the outer room of the hall on the central column were torn down so that the hall can double as an opera chamber. The hall in every row features a wing room and a tiny yard that contains parterres in different shapes to enhance the serenity of bamboos' shades and the aroma of flowers. The garden sits behind the residence, and entrance to it is by a fire lane beside the dwellings. The thick foliage of an old wisteria in it tosses rich shadows onto the ground, which the visitor finds mind-soothing and eye-pleasing upon stepping into the garden.

Take a left turn down the road, and one reaches a roofed two-storied walkway, with a parterre on either side planted with slender bamboos interspaced by stalagmites of different heights known in Chinese as "stone bamboo shoots," so that real bamboo couple with sham bamboo shoots to symbolize mountain wood in vernal sunshine. A moon gate opens into the wall behind the bamboos with the name "Geyuan's Garden" inscribed above it. Behind the gate stands the Osmanthus Hall, with osmanthus trees straggling in front of it and a pond behind it. In the north a seven-room loft, rising along a wall which connects artificial mountains with the walkway, is reposed in the peace and quiet of trees and flowers. The loft's top floor

commands a panoramic view of the garden. To the west of the pond there used to be two painted land boats nicknamed "A Couple of Loving Birds," and standing opposite them is a hexagonal pavilion whose form is reflected in clear water to evoke a picture-perfect scene.

An artificial mountain built of Lake Tai stones sits to the west of the loft. Known as "Autumn Cloud," it is nestled in the shades of shapely trees, including a pine tree whose thick leaves take the form of an overhead canopy. At the mountain's foot, a stream empties itself into a cave down low. On the other end of a zigzagging bridge stands an unfathomably spacious and intricately dynamic cave built of Lake Tai stones of unpredictable shapes and featuring an outstretching ceiling; the greyish green color of the stones, coupled with the water flowing into its depth, makes the cave feel a lot cooler in summer. It is said that in the former days there were twelve caves on the spot.

The artificial mountain faces the sun squarely, and its component Lake Tai stones are studded with varied surfaces. The unpredictable shadows cast by sun, wind and rain onto these surfaces make the mountain look exceptionally bewitching in summer. Hence the name, "Summer Mountain." The space south of it is empty and wild today, but in its former days, it was a sea of bamboos whose rippling green waves were echoed by a susurrating stream that surrounds it. A stairway in the Lake Tai mountain leads to its top, where the visitor turns east to reach a giant yellow stone mountain before he goes past the seven-room loft and the sutra library through the roofed walkway.

The artificial mountain faces west. When its yellow stones are swathed in rosy sunset glow, its perpendicular cliffs shine forth in striking hues. The mountain rises up to a height of several dozen feet. High and steep in an image evocative of an autumn mountain painting, it makes an ideal place for mountain climbers in that season. Its designer makes this autumn mountain stand out distinctively the way he does the vernal and summer mountains by giving full scope to the component rocks' varying positions, directions and forms. The stoic contours of some ancient cypresses growing out of stone chasms

serve to modulate the mountain's momentum, and their green leaves and gnarled boughs are set in contrast with the ochre rocks. Such deployment of cypresses as foils to enhance the depth of an autumn scenery, just like using bamboos to accentuate the spring view and pines to spruce up the summer sight, must have been intently hammered out.

The other arrangements, including building a stone stairway inside the cave, letting yellow stones hang down from its roof in the manner of an overhanging stalactite, and allowing skylight to penetrate holes in the rocks, are designed to catch the observer by surprise with the heightened effects of piled-up yellow stones and a three-dimensional trail system. The ingenuity of the designer is also manifest in inventions unseen in other gardens, such as building tiny yards, stone bridges and stone chambers into the artificial mountain. The pavilion standing atop the mountain not only puts all the other mountains at the foot of the spectator, but also incorporates into this garden a section of the city wall lined with green willows, the Slender West Lake, the Mountain-Level Hall, and the Avalokitesvara Mountain in the north—the clever garden-making craft known as view borrowing is obviously at work.

A loft on the southern slope provides access for those who want to climb up and down the mountain. Next to the loft is a hall that features a traditional roof with sloping eaves on both sides and gables sitting astride two opposite walls; a horizontal board hanging inside of the hall is inscribed with its name, "Wind Infiltratable and Moonlight Permeable" in the calligraphic handwriting of Yao Zhengyong (1811-?)²⁴. In front of the hall stands an artificial mountain of white quartz sandstones from Xuancheng, Anhui province; this is where dwellers sat around a fire in winter to enjoy fallen snow. The mountain is found at the foot of the southern wall to resemble snow yet to thaw—an arrangement which would have been impossible if the mountain were built to face south, for in this way the sandstone would glisten against the sun. This problem ought to be avoided when

piling up white stones into artificial mountains. The vernal scenery on the other side of the wall can be borrowed into the courtyard through holes in the eastern wall to allude to the return of springtime to the world. A two-storied walkway atop the mountain that conducted and into the garden is nowhere to be seen today.

The Geyuan's Garden is famous for its exquisite craft of artificial mountains. The builder outwitted all his Yangzhou counterparts by applying different kinds of stones to make his mountains look different from each other. His brainchild, known as Four-Season Mountains, thus became one of a kind among all Chinese gardens. The same conception was applied to the Garden of Eight Stanzas at Greater Prestige Lane, but the artificial mountains thus built did not have obvious peaks. The Four-Season Mountains of the Geyuan's Garden seem to have summarized a renowned painter's conception that, in Guo Xi's (c. 1000-c. 1080)²⁵ words in *The Lofty and Sublime Messages of Forests and Streams*,

The spring mountain should be faintly rouged and smile demurely; the summer mountain should be so drenched in emerald as to drip with it; the autumn mountain should be bright and clean like a lady dressed up; the winter mountain should stay so pale and lethargic as to seem asleep.

The Four-Season Mountains stand out among all the gardens in Yangzhou because it also follows the principle that, as Dai Xi (1801-1860)²⁶ puts it in his *Colophons on Paintings of the Studio of Hard Practice*,

Spring mountains can be toured, summer mountains enjoyed, autumn mountains climbed, and winter mountains dwelled.

The Whistling Scholar's Mountain Abode at Garden Lane is known as the "Ho Family Garden." Built in 1883 by He Weijian, a circuit intendant under the Guangxu reign, and believed to be Yangzhou's last sizeable garden dating back to the Qing, it can be entered from the family's residence. Another door is opened for guests in the back of the garden at Diaos' Lane. The dwellings sport a Western style save for a hall built of *Phoebe nanmu*. Surrounded with a canopied two-floor walkway, the multi-storied buildings are laid out in horizontal rows

while the halls are lined up in vertical columns—the plane is, as a whole, traditional Chinese despite the buildings' Western style. The brick-framed latticed windows in the wall of the last row of the residence offer a glimpse at a corner of the garden. To the north of the large pond in the center of the garden sits a seven-span hall whose three central spans stick out slightly and two wings extend sideways with upturned eaves. As the entire building looks like a butterfly on the wing, locals call it "Butterfly Hall." Both ends of the hall are attached to the double-floor walkway that meanders its way around the garden, making those walking in it feel like being spirited away for a flight to the blue sky.

The same walkway also serves to keep the garden's central and eastern parts apart, so that the garden looks more spacious and airy and people can look through its latticed windows to see vistas on both sides. Here the Chinese landscaping technique of space segmentation designed to extend the view is at work in a spontaneous, yet very effective manner. A square pavilion surrounded by water stands in the east of the pond. As this is where people sit to cool themselves and compare notes on the vocal music of Kunqu Opera, the echoes from the water come handy to enhance acoustic effects. The encircling walkway is used to accommodate the audience. In the past, females could only sit behind a translucent curtain in the section of the double-floored walkway closer to the residence to watch what was performed in the pavilion through assorted hollowed windows in the wall. This technique of building a waterside deck to improve acoustics is still feasible today, but the practice of watching performances through a curtain behind windows should absolutely be abandoned. However, latticed windows remain an effective means to let in or out the views and increase the depth and variety of vista inside a garden, so that, as the saying goes,

Scenes and sights can hardly be locked up in the presence of a small open window.

The southwest corner of the pond is occupied by an artificial

mountain, behind which is hidden the West Verandah, with a peony terrace to the south. The whole terrain undulates naturally in tune with the contours of the artificial mountain. Such an arrangement ought to be promoted in new gardens, for it is easily done, endearing to people, and free from pretentious artifice. A Lake Tai stone stairway conducts to a mystic-looking cave and a perpendicular mountain; though built of different kinds of stones, the stairway and the mountain can still twist and turn in delightful ways and be mixed and interwoven into an integral whole. There is something profound about the water-curtained cave at the eastern foot of the mountain, but the way the cave's other end connects with a pillar leaves something to be desired, and I would choose to regard it as an oversight on the part of its designer. The three-span loft south of the artificial mountain fronted with a craggy peak can be mounted by a trail that joins the double-floored walkway in the east to the residential part of the estate.

The double-floored walkway is a multiple construction whose roofs go up and down in line with the building's changing height, and some sections of it are segmented into double lanes. The estate is divided into central and eastern parts as a result. The large latticed windows in the walls are constructed by fitting finely ground bricks snugly together to form patterns at once succinct and tasteful. East of the walkway and opposite the three-span verandah, a hall with windows on four sides sits in a court where a green parasol tree leans against a rockery and blocks the sun with its thick leaves. The ground at the foot of the hall's stairway is paved with a mixture of cobbles and broken bricks and tiles in patterns that are becoming to the brick railings and benches in front of the hall, an unmatched combination that, like the aforementioned hollowed-out windows, is an unrivalled objet d'art exuding rustic native charms.

Behind the hall an artificial mountain leans upon a whitewashed wall without the least trace of bluntness in both its surface and its stone stairway. Small though it is, this rock formation is self-contained

in good taste, with a tiny pavilion sitting at its crest and snuggling up to the wall under trees' green boughs. When the setting sun bathes the scene in its twilight, the entire stone stairway is covered with broken shadows, conjuring up a picture that teeters between real and surreal, an effect that belongs only to a scenery set against a white-washed wall in a traditional Chinese garden. The space is small, but the view seems ever changing—an arrangement that is indeed workable. The stone stairway northwest of the artificial mountain leads to a half-deck on the double-floored walkway. This half-deck, like the old one at this walkway's western end, is where the rise and fall of the moon are marvelled at. As to the disposition of vegetation, sweet-scented osmanthus trees are planted in the mountain in front of the hall, arboreous and herbaceous peonies in parterres, lacebark pines at the mountain's foot, parasol trees in front of the stairway, plantains at the corners, and all of them are arranged in groves that flourish in utmost beauty and color in spring, cast thick cooling shades in summer, hit the nostrils with heady fragrance in autumn, and remain green in winter. All these arrangements have rules to go by, and can be adapted to the nature of the plants and local conditions.

The garden in question is known for its extensive openness and masculine robustness. Waters and rocks are employed to complement buildings and set rockeries' color and water's light in fabulous contrast with majestic lofts, high belvederes, and the double-floored walkway. Buildings, however, are always kept in the limelight, which are now linked, now segmented by the canopied double-floored walkway and the artificial mountains—the arteries and veins are always there to bring about a three-dimensional communication network and a garden enjoyable at multiple layers. The scenery is spread out around a pond of water. Walls with latticed windows present a constant stream of views, with lofts, terraces, flowers and trees shimmering within their frameworks. As this garden was built relatively more recently, its interior decoration abounds in new materials and patterns, with an additional gate erected to greet guests. Its layout is more spacious and

smooth than those built in the past, which enables visitors to shift gradually from in-situ viewing to in-motion viewing. Its paths are labyrinthine at one place and straightforward at another, its sceneries now widely open, now sequestered in mystic solitude, and all these arrangements are imbued with the salient features of the Chinese garden as well as innovations in the craft of landscape gardening.

The Small Meandering Valley at Big Tree Lane. Zhou Fu (1837-1921)²⁷, who was appointed viceroy of present-day Jiangsu, Anhui and Jiangxi provinces in 1904, the thirtieth year of the Guangxu reign (1875-1908) of the Qing, and became viceroy of Guangdong and Guangxi in 1906, rebuilt the garden on an estate he bought from Xu Naiguang (1859-1922)²⁸ in 1897. Refurbished in the early Republican years (1912-1949), the garden, situated in the eastern part of the estate, has its name "Small Meandering Valley" engraved above a moon gate by the side of its main hall. Judging from its brushwork style, the inscription seems to be in the handwriting of Chen Hongshou (1768-1822)²⁹, one of the eight founding fathers of the Xiling Seal Engravers Society at the West Lake, Hangzhou. Its three-bay parlor facing an artificial mountain sports a façade in the shape of a carpenter's square. When the visitor finds his way to the back of this parlor, a pond brimming with clear water flashes into his eyes, and his vista brightens and opens up all of a sudden. A belvedere sitting astride the stream beside the parlor is attached to a meandering walkway, a combination that is in striking contrast with the rockeries and the ambiguous form of a partitioning tracery-topped wall on the other side of the pond. Such contrast between buildings and scenery is common to the Chinese gardens. In front of the walkway sits a zigzagging bridge that conducts to a mystic cave on the opposite bank of the pond. The cave is so spacious that a chess table is put in it, with natural light penetrating the apertures in the cave's ceiling.

A door is created in front of the water, where one can take a flight of stone stairs to reach the pond. Stepping stones planted in the pond to the left of the cave in lieu of a bridge combine with a

mountain trail to provide access to the parlor in the rear. A stone stairway is available in front of this parlor for those who want to climb up the artificial mountain. This is where a nice entrance is provided to the valley, as an inscription in the rock says, "The water flows therefrom to where the clouds are." The mountain cave is wide open, yet it has no lack of twists and turns—a fine example of cave construction indeed. Leaving the cave through an exit to the right, one enters a tiny yard where a meandering corridor runs directly to the Wind-Bathing Pavilion atop the mountain, which provides a vintage point to gaze at the views of the eastern and western parts of the garden. The eastern part is in ruins, but is now under restoration. Entrance to it is by a peach-shaped door whose lintel is inscribed with two Chinese characters that stand for "Clustered Verdure." The hall in the shape of a carpenter's square to the north of the pond has been rebuilt with an amended plan. The lofty but rugged shape of the artificial mountain there earns itself the name "Mountain of Nine-Lion Picture." Over nine meters in height, it was damaged slightly during a refurbishment in the early Republican years, but can still be countered among the best in Yangzhou. Rockwork, the pond and buildings are handled in a lump, and striking contrasts are achieved on an otherwise cramped piece of land between buildings and rockeries, between rocks and white-washed walls, between rockwork and the pond, between frontal courtyards and posterior garden, between mystic depth and extrovert openness, and between high-rising and low-lying sceneries, turning the whole garden into a veritable fairyland.

Thanks to flexible segmentation by way of tracery walls, the foothill, the wall-leaning mountain, stepping stones and the ravine's inlet are aptly positioned, so that the steep cliff appears like a body of three-dimensional verdure, its rugged peak overlooks the stream, with water and rock in perpetual harmony, and all of them are combined to become an integral whole—a garden-making feat accomplished through the artistic approach of "using the few to triumph over the

many." Though there are no tall buildings and double-floored walkway on the premises, the rooms are not elaborately appointed and all the timber appears in natural colors, this does not prevent the property from becoming a serene and circuitous garden of many splendors. With its artificial-mountain construction technique comparative with that of the Beauty-Encircled Mountain Abode of Suzhou—the Small Meandering Valley is, without a doubt, a certain master drafter's masterpiece. *The Sequel to the Gazetteer of Jiangdu County* (Volume Twelve) compiled under the Guangxu reign of the Qing, says of the Small Rock Mountain Abode,

This garden excels in its Lake Tai rockery in the images of nine lions, images that are matchless examples of exquisite craftsmanship and dynamic portrayal.³⁰

Judging from an analysis of the composition of the artificial mountain in the Small Meandering Valley, it seems to have been copied from the Small-Rock Mountain Abode while assimilating other fine works. *The Record of the Painted Pleasure Boats of Yangzhou* (Volume Two) says,

The Nine-Lion Mountain piled up by Taoist Priest Dong from Huai'an is the talk of town.

The same book adds in its sixth volume,

Behind the Sutra-Chanting at City Wall sits the Rolling Stone Cavern.... From an old water-bound artificial mountain of Lake Tai stones, [the Taoist master] sought out those stones riddled with cavities, drilled new holes into them, and arranged them in the images of nine lions. Then he shifted the whole thing into the pond, crowned them with a pavilion-capped bridge, and gave the product of his labour its present name, "Rolling Stone Cavern."

A colophon by Zang Gu (1834-1910)³¹ on the hanging scroll "Nine-Lion Mountain" in the Yangzhou Museum collection points out that the painting is a likeness of the Nine-Lion Mountain at the Rolling Stone Cavern, but he does not specify that the mountain was wrought by Taoist Priest Dong.

According to the former owner Zhou Xian (1891-1984)³² and his nephew Zhou Xuliang (1905-1984)³³, the artificial mountain of the Small Meandering Valley had been known as "Mountain of the Nine-

Lion Picture" for a long time, and they surmise there must be some evidence behind it. Therefore I believe there might be more than one nine-lion mountain in Yangzhou, but the one at the Rolling Stone Cavern is the best known. Taoist Priest Dong was renowned for his construction of this type of artificial mountains, which gradually emerged as a school in its own right. Evidence shows that this mountain's peak, cave, mountain trail, mountain-leaning wall, stepping stones and ravine inlet all belong to his time, that is, under the Qianlong reign. The horizontal board inscribed by Chen Hongshou was not too distant from that age. Therefore I assume that even if this mountain were not originated in the Taoist priest, it must be an imitation of his work.

The Lesser Winding Gully in the Qin's Imagined Garden, situated at Bathhouse Lane near the Old City's south gate, was a miniature yellow-stone mountain built after Qianlong's reign by the renowned garden crafter Ge Yuliang from Changzhou, but it is in nonexistence today. *A Collection of Anecdotes in the Lü Garden* (Volume Twelve) writes,

A Changzhou native by the name of Ge Yuliang has come to the fore lately, whose rock-piling skill exceeds many others.

This indicates that Ge came to the fore later than Priest Dong. Judging from its ruins, the Qin's Lesser Winding Gully exuded feminine elegance under a plain and simple surface, whereas the Small Meandering Valley in question stands tall and steep in majesty and masculine vigour. Both crafters were in Yangzhou at the same time, and it was precisely with their respective masterpieces that they stood neck and neck between them as garden-makers.

To the west of the Geyuan's Garden at Eastern Pass Street there is an estate built by Li Songling (1871-1937)³⁴. Upon entering its front gate, one comes upon an octagonal gate³⁵, with the name, Garden of Matchless Talent, engraved in the lintel. Turning left, one sees the property's residential section. The octagonal gate opens into a slender and straight corridor. An artificial mountain twists and turns

circumspectly against the eastern wall, forbidden-looking and in striking contrast with the tile latticed windows on the top part of the wall. Beside the mountain there is a bed of peony flowers which, when in full bloom, seem to be embroidered on a piece of brocade. At the northern end of the mountain, a half pentagonal pavilion clings to a wall with a mirror-like crystal clear pool at its foot. There, facing south, stands a three-span parlor exquisitely decorated and elaborately appointed, and the ceiling of its corridor is carved all over with patterns in bas relief.

Behind the parlor there is a three-span verandah with an eastern wing and a western corridor, and flowers, trees and exotic rocks are placed in the front. Its back is attached to a small yard which, at the first glance, is often mistaken for a mere wooden wall because its door is always shut. A stone stairway provides access to a double-floored loggia that takes a turn at the back of a loft before disappearing into a neighboring garden. The garden is linked to the dwellings behind it by the roofed walkway and rockeries. In the northwest corner, facing west against a rockery, there is a three-bay loft with its spiral staircase winding from top floor down to ground floor. By the side of the loft a trellis of wisteria with entangled weather-beaten branches adds to the fascination of the scene by showering greenness all over the stairway. This garden is akin to the Twisted Garden of Suzhou in that it is laid out by filling every space of a small lot in the shape of the carpenter's square with tiny scenery, but it does so more cleverly with its vistas "woven" up and down in intricate ways. Using a method to "deliver a vista unexpectedly from an impasse," the garden's designer knows how to transit the sight in a tiny yard into the neighboring garden to ensure continuity of the entire scenic view. Such a practice is by no means a rarity; on the contrary, it is a defining feature of Yangzhou gardens.

The Mind Cheering Hut at Ji Family Cove, as a component part of the parlor in the mansion of a money-shop owner by the name of Huang Yizhi, is the work of Yu Jizhi, a rockwork specialist who is also

well-versed in floral art and particularly good at gracing small gardens with fantastic rockeries. The parlor in the Mind Cheering Hut consists of two rows of buildings. The front and back of the first row are linked respectively with a tiny yard. The eastern and southern side of the courtyard are lined with a corridor, and a white stone rockery tucked away in an osmanthus grove at the western side. The back of the first row has two wings, and the parterres in its tiny yard are planted with stalagmites and bamboos whose swaying twigs and quivering leaves seem to be dripping wet with greenness. To the west of the parlor stands a latticed wall, whose moon gate opens on to the internal court of a suite of chambers, an arrangement that makes people wonder, "How deep would this deep courtyard really be?" Thanks to views borrowed from an external court, the otherwise small internal court looks bigger. At work here is also a space-expanding method in Chinese architecture, that is, to make a residential courtyard look bigger through segmentation or spatial grouping. The back row of the parlor with all its three bays facing rockeries features another suite of chambers in its own yard. The Mind Cheering Hut is small, and judging from its plane, there is nothing surprising about it. Nevertheless, its buildings and yards are proportionate to each other and its interior décor is accentuated as a rule with horizontal lines so as to yield just enough room to have rockeries erected and flowers planted. Large and small yards are so impeccably grouped and mixed that the scenes and sights are always well spaced even in places seemingly crowded, and that in the peace and quiet of the entire estate there are plenty of delightful surprises. All this speaks volumes for the importance of greenery and spatial grouping to small architectural projects.

On Guangling Road there is My Half-"Mu" Garden, originally known as "Back Garden of Longxi." It was built by a salt merchant surnamed Liu on an old garden on this spot during the Guangxu reign (1875-1908) of the Qing, hence its other name, "Liu's Manor." Because this was the venue of the Yida Money Shop, the local people generally

call it "Yida Garden." Located behind its residential area, the garden is divided in two yards. The frontal yard contains a south-facing hall with some houses attached to its western side, as well as a parterre built of Lake Tai stones and two lacebark pine trees at the foot of a wall. In the backyard, slender bamboos are planted at its western end, and a yellow-stone artificial mountain by the side of the wall features a flight of stone stairs leading to the upper floor of a building. In the eastern yard, a loft facing north overlooks a pond with a rock formation on it, whose Lake Tai stone mountain against the wall is the pick of the entire garden.

The Li Weiru's Garden, 6 Billows Lane Cove, whose entrance is by a door at its southeast corner. In the center of the garden stands an artificial mountain among rattans and cypress trees that, though age-old, still exude emerald, leafy luxuriance. This mountain looks tiny against the wall, but it still offers a cave to be explored and a peak to be marvelled at, and it looks awe-inspiring when observed from inside the hall in the north. There are canopied walkways at the eastern and western sides, and a water gazebo sits in the southwestern corner with a dainty and refreshing fish pond at its foot. Sparse though the scenery is, this small garden is still decorated in good taste.

By the side of the Li Weiru's Garden is the Yang's Tiny Nook, a small garden that takes up just a corner originally belonging to a studio that opened onto a two-bay parlor. The small yard in its front is strewn with a smattering of rocks, bamboos and trees, and segmented by a latticed wall. A diagonal corridor reaches up to a small belvedere. A pool lying between rocks in front of the belvedere is just large enough for a fish bowl to be placed in it to collect water, yet the whole assemblage looks rather becoming. The garden's owner was deft at cultivating orchids, and this is why potted orchids are the stars of this tiny nook. Beautiful flowers and trees are avoided, lest the dominance of orchids and their heady aroma be undermined. Though the Yang's Tiny Nook is too small to be called a garden, yet it has all the makings of a legitimate one. Thanks to a well-conceived

segmentation scheme, no visitor would feel cramped upon arriving at this tiny place; instead, they would look left and right and be immensely delighted with its sceneries so resourcefully created.

The garden-owners in Yangzhou were mostly rich merchants. Apart from the material wealth they had obtained through business dealings, they often donated in return for a nominal official title as a status symbol. Insofar as designs are concerned, their gardens are somewhat different from those in the possession of bureaucratic landlords, and the most striking difference lies in their unquenchable quest for luxury and extravagance to advertise their richness and pretentious "elegance" and "refinement." During the Kangxi (1662-1723) and Qianlong (1736-1796) reigns of the Qing, some of them went so far as to copy certain aspects of royal gardens with the hope to hit the windfall, that is, the emperor's award of position and wealth. For this purpose, they would run after what was the best and most sumptuous, be it a garden's configuration, building size, or the variety of building materials. Halls and lofts should have as many as seven bays; buildings should have multiple floors and double-floored walkways; an artificial mountain should be big and built of famous rocks, and the Geyuan's Garden and the Garden of Eight Stanzas have peaks fashioned out of different kinds of stones to represent the four seasons. Soil and rocks were piled up to build gamecock arenas, one of which is found in the Kettle Garden. As the majority of rich merchants in Yangzhou were natives of Anhui, gardens were often built to represent the landscape of south Anhui.

As to building materials, *Phoebe nanmu* was the choicest, square bricks were reserved for flooring purposes, and marble was mixed with pebbles and porcelain shards to pave floral-patterned grounds in the courtyard. With regard to the sumptuous interior decoration and furnishing in Yangzhou gardens, other than meeting the same designing purposes as in Suzhou gardens, that is, to serve garden owners' need to enjoy the poetic and picturesque connotations of landscaping sights and to show off their corrupt lifestyle, they were

also adopted to satisfy these owners' obsession to turn their gardens into socializing venues that could accommodate as many guests as possible. Such an obsession is manifest in such big Yangzhou gardens as the Geyuan's Garden and the Whistling Scholar's Mountain Abode. The Yangzhou school of verse and prose, and the Eight Eccentrics' styles of painting are more untrammelled and profound than those of Suzhou; this has influenced and enhanced the Yangzhou craft of gardens. No study of the Yangzhou gardens can be complete without clarifying the material resources and spiritual needs of their former masters, because such resources and needs had predetermined the requirements and principles for garden designers and impacted the conceptions and styles of these gardens.

Natural environment and building materials can affect garden styles to varying degrees. With a level terrain, mild soil humidity, climate and precipitations, and with the best south and north China conditions converging in the city, Yangzhou's natural environment is salubrious for flowers and trees, with arboreous and herbaceous peonies growing particularly well—a fact that furnishes indispensable condition for the construction of posh gardens. Yangzhou's huge fleets of salt-shipping boats enabled local gentries and merchants to ship in more varieties of stones for artificial mountains than Suzhou from as near as Zhenjiang, Gaozi, Jurong, Suzhou, Yixing, Wuxing and Wukang and as far as Xuancheng, Lingbi and Hekou of Anhui and Jiangxi, over and above rocks of exotic shapes and images or unusual qualities from southwestern China.

The Chinese garden is always built in light of local conditions, which is particularly the case in water-bound and hilly areas. Different from what is available in Suzhou and Hangzhou, the topographical and scenic conditions characterized by the Yangtze-Huai basin's low water level and wide open land are, simply put, uniquely Yangzhou's own. That is why most large gardens in Yangzhou feature a pond in the center while halls are architectural centerpieces—the relationship between ponds and halls must be well coordinated. The scenery in

large gardens, as exemplified by the Geyuan's Garden and the Whistling Scholar's Mountain Abode, is segmented with walls, rockwork and trees to conjure up multilayered and variegated views, while exotic rocks are erected by the pond, pavilions and belvederes are scattered but ultimately connected by a circuitous walkway. Medium-sized and small gardens in Yangzhou, such as the Small-Rock Mountain Abode and the Small Meandering Valley, are compactly structured, in which an artificial mountain clings to a wall with a pond rippling at its foot, while a winding corridor or water-front gazebo puts the finishing touch to the entire scene.

In Yangzhou's courtyards, a few peak-shaped rockeries are deployed and a small fish pond sits by a gazebo, but they can also sport an arboreous peony terrace or a herbaceous peony garden. The possession of a minimal number of scenic elements often makes a courtyard look bright, clean and cozy, and the Li Weiru's Garden and the Yang's Tiny Nook are good examples in this regard, but the Garden of Matchless Talent is another outstanding case in that its narrow space in the shape of a carpenter's square is properly fitted to a layout to pull off a rich variety of pleasant surprises.

Generally speaking, Yangzhou's gardens feature level and tidy layouts, and offer views for both in-situ and in-motion viewing. Their success, however, is attributed to their three-dimensional road structures and multi-layered sightseeing routes. That is to say, their roofed double-floor walkways, lofts, belvederes as well as artificial mountains replete with cavities, caves, abodes or stone chambers are interconnected up and down and brought within reach, resulting in plenty of scenic changes. However, these gardens have still left something to be desired. For instance, the roles of water surfaces, rockwork and buildings are yet to be better coordinated; most water surfaces' shorelines look too straight for lack of bends and twists and turns; and rocks projecting over a pond or foamy rapids tumbling over stones are almost nowhere to be seen. But all these are, if anything, blemishes in an otherwise perfect scene.

The Small-Rock Mountain Abode, the Small Meandering Valley, and the foothills of the Garden of Matchless Talent and the Autumn Cloud Mountain in the Geyuan's Garden are studded with laudable delights. There are also instances in which a water-less garden is made to look like water-bound. In the Yuan's Loft of Two-Thirds Bright Moonlight, built during the Daoguang reign of the Qing on Guangling Road, the ground lies low while the hall with windows on four sides sits upon a raised yellow-stone foundation to look as if it were perched on an isle—thus water presents itself in imagination in a garden with little water. The same conception seems to be at work in the back of the Rosy Autumn Clouds Garden in Jiading, Shanghai, but the effect is not as striking. The approach to "giving wings to imagination where brush strokes cannot reach" belongs in the Chinese art, and it is admirable for our clever artisans to apply it with such success under relatively unfavorable natural conditions. The bridges built over water surfaces in Yangzhou gardens come in two types. First, beam bridges, most of which are zigzagging ones, and the flying stone beam bridge of the Small-Rock Mountain Abode is among the best of its kind for its unaffected simplistic and classic looks and its affinity to the mountain abode's wooded mountain views; second, stepping stones, those adopted in the Small Meandering Valley are the most congruously arranged. If the bends in a zigzagging bridge over a low-level water surface look too stiff, it would rob people of the feeling as if they were treading waves, a problem that should be avoided at the designing and construction stage. The designer of the bridge at the Small-Rock Mountain Abode seemed to have blazed a new trail in addressing this problem with the adoption of a flying stone beam.

The Yangzhou school of gardens has all along been extolled for its rockery building techniques. Most of the city's extant artificial mountains are built entirely of rocks except for the one in the Qin's Lesser Winding Gully, which is a combination of earth and stones but it is in ruins. As Yangzhou is located in a place where no stone is

produced, the rocks needed for rockeries are shipped in from elsewhere and, for transportation purposes, they come in small sizes. Artificial mountain peaks are mostly built by putting together small rocks in light of shapes, colors, veins, textures and quality on frames propped up with stone slabs, and reinforced with iron fastenings and braces—bricks are also used, as is shown in the Ming-dynasty artificial mountain in the Qiao's Garden in Taizhou—a method which also applies to rock embankment around ponds. All this costs a great deal of manpower, and with the passing of time the component rocks tend to break loose and fall, and the peaks crumble as a result. This is why even the finest rock formations cannot last forever. Such problems, however, cannot tarnish Yangzhou's achievements in the craft of artificial mountains, and the ones in the Geyuan's Garden are deemed grand and majestic to the utmost: its yellow stone mountain stands about nine meters tall, and its lake stone mountain about six meters. As huge constructions, they are not without their oversights on the part of their designers, but on the whole they can still be reckoned as fine works of art of a high order. The artificial mountain of the Small-Rock Mountain Abode stands out for its rugged rocks and steep cliff, the one in the Small Meandering Valley twists and turns in unadorned grace, and the one in the Garden of Matchless Talent brims with feminine beauty, and all of them are excellent structures. The stalactite hanging down from the roofs of the Kerria Garden's winding cave is unseen elsewhere in Yangzhou, and the stone stairway for the artificial mountain in the Whistling Scholar's Mountain Abode are good examples as well. However, what the artificial mountains in Yangzhou gardens excel the most are those leaning against walls; with thrift use of materials and judicious employment of space made possible through first-rate wrapping and inlaying techniques, they look natural and lifelike, and better than their counterparts in Suzhou. Such walls are found in many Yangzhou gardens, including the Small-Rock Mountain Abode, the Small Meandering Valley, the Whistling Scholar's Mountain Abode, the Garden of Matchless Talent, and the

My Half-"Mu" Garden, a fact which makes me wonder if the wrapping and inlaying techniques were invented and first used in Yangzhou as early as the late-Ming.

During the Qianlong reign, Taoist Priest Dong and Ge Yuliang made even bigger strides in the craft of artificial mountains by carrying forward the legacies of Ji Cheng and Shitao. All the artificial mountains cited in the foregoing embody the notion that different shapes of mountains should be built with different kinds of stones and give expression to Shitao's rule of painting that "when the interior texturing brushwork tallies with the peak, the texture shall look like born of the peak." With their lofty and awe-inspiring images, the Yangzhou artificial mountains stand parallel with their Suzhou counterparts marked for lucid grace and far-reaching vistas. As to the use of different kinds of stones on different peaks or of mixtures of stones on a single peak, these are measures of expediency to make up for the short supply of a particular variety of stones. The rock-piling techniques employed in Yangzhou and south Jiangsu are more or less the same. The best artificial mountains are always produced with flexible application of the same principle, that is, "Let water encircle a mountain, so that the mountain comes to life on account of the water." The glue used to hold the stones together in a rockwork during the Ming was made by lacing lime with fine sand and glutinous rice juice; as this glue turns pinkish when coagulated, it is often applied to artificial mountains built of yellow stones. During the Qing, the glue was whitened by adding grass ashes to it, so that it could also be used for Lake Tai stone mountains like the one in the Small-Rock Mountain Abode. The crevices between the stones are filled in a way to make the concomitant wrinkles visible while the mortar filled in between the stones is concealed. This method, when applied to yellow stones, produces lines that look like natural cracks and accentuate the ruggedness of surfaces; when applied to Lake Tai stones, brings out the integral wholeness of an artificial mountain. However, it is easier said than done. Perfect examples are few and far between nationwide.

Concerning the treatment of walls, as the traditional gardens of Yangzhou are mostly part of a residence in urban areas, they are enclosed behind high walls built of finely ground bricks and graced with gate towers built of engraved bricks, so that they appear rather tidy and straight. The external walls of Yangzhou gardens are as a rule exquisitely crafted and decorated with tile-latticed windows, and, different from the simplistic and rustic surrounding walls of the Suzhou gardens which like all the gardens in the Jiangnan area were in the possession of landed bureaucrat owners, were instrumental in showing off their owners' wealth. Both the external and internal walls of Yangzhou gardens are white-washed in sections where the effectiveness of reflections or of flowers' shadows under moonlight need be enhanced. The tall surrounding walls make it impossible to see the outside views. With the exception of the Geyuan's Garden, whose yellow-stone mountain rises higher enough than its walls to borrow vistas from the northern part of the city, all the gardens in Yangzhou have to employ opposite views to make their sceneries appear more changeable behind such walls. The sceneries framed by the latticed windows of the Whistling Scholar's Mountain Abode are indeed picturesque and sublime in facilitating mutual view borrowing between the garden and its dwelling area. The views seen through the moon gate in front of the Osmanthus Hall of the Geyuan's Garden are mesmerizing as well. Moreover, the views framed in the windows seem to be changing all the time when one shifts his footsteps. In terms of view contrasting techniques, they are basically identical to those employed in south Jiangsu gardens, as most of the gardens in Yangzhou set their buildings in contrast with wall-surfaces and rockeries in a variety of ways, such as contrasts between extravert and introvert views, between visibility and invisibility, high and low, proximity and distance, deep and shallow, large and small, and between spatiality and density—the Small Meandering Valley is exemplary in this regard. The Whistling Scholar's Mountain Abode, on its part, succeeds in giving the visitor a complete and distinct

sightseeing experience by keeping the general goal in view as far as the arrangement of walls is concerned.

In the field of architecture, the Yangzhou gardens distinguish themselves by making the most of multistoried structures. This is a matter of course for large gardens, but small ones also employ it to advantage. The Loft of Two-Thirds Bright Moonlight, for example, goes so far as to erect a seven-bay building in its precinct. As the parlor is rather big in most cases, and the double-floored walkway extends without a letup, so the small gazebos and waterside verandahs along the walkway are set off agreeably with the tall building. Such an arrangement, as compared with the subdued gracefulness of Suzhou gardens, is evocative of the heroic verve generated by chanting Su Shi's³⁶ "The Great Yangtze Flows East" to the musical accompaniment of copper *pipa* and iron clappers. Visitors can make a circuit of the Whistling Scholar's Mountain Abode following its two-storied walkway, and the same is true with the Geyuan's Garden when in its prime. In such a garden, the visitor may lose his way while reaching a pavilion by way of a mountain stairway or arriving at a cave through an archway in the artificial mountain. These three-dimensional sightseeing gimmicks, though different from Suzhou gardens' one-dimensional trail that conducts surreptitiously through maze-like dense willows to bright flowers, lead to the same result. Thus Yangzhou and Suzhou gardens are neck and neck once again in this field.

With regard to structures and details, the buildings in Yangzhou gardens are hybrids of south and north China styles. An independent building's base above ground is built of blue stones in early periods and white stones in later periods, with the staircase made randomly of natural rocks. Plinths may take the form of an "ancient mirror" in the northern tradition or a "stone drum" in the southern tradition; pillars are thick and tall, with the proportion between diameter and height being a compromise between southern and northern traditions. In most cases windows are detachable ones, and balustrades are thick

and sturdy. Ridge ends always assume a half-moon shape with an upturning minor hip-rafter at the front, but in angles lower than those in south Jiangsu.

Roof ridges are graced with latticed brickwork all along, and thicker and heavier than in south Jiangsu. Latticed windows and gates in walls are elaborately crafted, and come in a variety of patterns and integral structures, which are different from the soft and delicate style of south Jiangsu. Lintels are generally made of marble or stones quarried from Gaozi in Zhenjiang across the Yangtze, and engraved bricks are seldom used, which is apparently different from the Suzhou tradition. Architectural details are terse and tidy, with a few twists and turns at skintles and corners, all of which looks straightforward, with gentleness contained in tasteful sturdiness. All the timber retains original colors, and exterior walls are not white-washed, which has something to do with the arid weather, but is also intended to display craftsmanship on raw materials. Timber constructions are all formed with methodically prepared round and straight beams, though rectangular beams are occasionally used. The round ridges over the façade of a building are as sumptuous as possible because of their conspicuous positions. The interiors are floored with square bricks and partitioned with latticed screens and latticed doors fashioned out of red sandalwood, mahogany, *Phoebe nanmu*, ginkgo, and little-leaf box, or lacquer carvings either inlaid with precious stones and mother of pearl or panelled with gauze. Furniture and screens and couplets are also elaborately built; those made of mahogany, different from their Suzhou and Guangzhou counterparts, are in an elegant and vivacious style peculiarly Yangzhou's own. (For further details, see the following section on dwellings.)

The buildings in Yangzhou gardens come in a limited variety, including halls, multi-storied buildings, belvederes, pavilions, gazebos, painted land boats, double-floored walkways and corridors, and are more regularly grouped than those in south Jiangsu. The multistoried building is often positioned conspicuously at the end of a garden. The

hall is often the centerpiece, but has to be built at the end of a garden if it takes the form of a loft. Land boats and gazebos are water-bound, with verandahs and belvederes nestled against mountains; pavilions may be placed beside a pool or atop a mountain. A half loft, half belvedere or half pavilion can be built on sites too cramped for space; examples like these are few, but they are adapted to the circumstances as a rule, or adopted to break monotony or uniformity in a layout. These methods also apply to roofed walkways, which may be made to wind or run up and down a terrain, or contain double floors or lanes, but most of them follow a circulating route, and some of them are built to serve viewsegmentation purposes.

Halls fall into miscellaneous types, and are handled in original ways, as is shown in *The Record of the Painted Pleasure Boats of Yangzhou*. Among the common types today are those with floor-length windows on all four sides, those sporting a hip and gable roof, and those consisting of multiple floors. Their purlin trusses are mostly of the turtle-shell type, whose ridges are not round. A lot of halls are built of *Phoebe nanmu*, the most precious of all species of timber, and those built of cypress are rarely seen today. The ground in gardens are mostly paved in patterns with pebbles and porcelain shards, and stones are occasionally used when one of the cracked-ice pavement patterns is chosen. What merits attention in architectural treatment is that the interiors of a Yangzhou garden are always made to twist and turn unpredictably, whereby suites, lofts, covered walkways, small courts, artificial mountains and stone chambers are grouped in a variety of ways to create a bewildering maze—a salient feature of the Yangzhou style of garden architecture that can still be seen in the Garden of Matchless Talent.

Horticulture is yet another major aspect of garden-making. Indigenous traits of flowers and trees bring about varied styles to gardens in which they are planted. Owing to climatic and geographical differences, the same species of flower or tree growing in Yangzhou would look different in color and shape than if it were

planted in north or south China, but the trees and flowers indigenous to Yangzhou generally look sturdy and elegant. Trees that are commonplace in Yangzhou gardens include pine, cypress, juniper, elm, maple, pagoda, ginkgo, broad-leaf privet, parasol, and little-leaf box. Weeping willows are all but extinct in south Jiangsu gardens built in later periods, but they are often found thriving in Yangzhou gardens with distinct local characteristics: tall and sturdy on trunks whose lower part is never oversized, their twigs so slender and well-scattered as to exude picturesque flavor—all of them are totally domesticated in Yangzhou.

Yangzhou's parasol trees are marked for their speedy growth rate. Whether they are planted in a garden or a courtyard, they never fail to shield people from the high-noon sun with their green trunks and coolness-gathering foliage, and they join weeping willows to steal the limelight of the city's scenic beauty in summer and spring. Yangzhou's flowering trees include osmanthus, crabapple, *yulan* magnolia, camellia, pomegranate, wisteria, plum, wintersweet, flowering peach, banksia rose, rose bush, China rose, and azalea. Osmanthus, crabapple, *yulan* magnolia and crape myrtle are often planted in front of a hall or verandah. Maples and elms are laid out where they are needed, mostly by the side of a pavilion or gazebo. Arbours and flowering trees are most becoming to buildings; in Yangzhou, the former provide cooling shades and the latter become the feast of the eyes, but arbours become the choicest primarily for their impressive contours and flowering trees for their color and aroma. An artificial mountain's rugged and weathered looks are best accentuated amidst a cluster of pines and cypresses, while a few weeping willows can work wonders on the scenery when planted on a pond or brook's shore.

Plantain, bamboo and nandina add a picture-perfect touch to the scene wherever they are—inside a small court or a clearance in a big garden, in the corner of a wall or walkway, under the eaves, or in combinations with wintersweet or chrysanthemum. The "book-binder grass," or the dwarf lilyturf, if planted beside a rockery, tree, stairway,

or road, keeps the ground green in all four seasons, and looks like white balls when cocooned in snow in winter; like the begonia thriving in stone crevices, it also offers a needed sprinkle of decoration wherever it strikes root, and it can also improve an artificial mountain's appearance by covering up its drawbacks the way dots of moss do to a landscape painting. The peony, whether herbaceous or arboreous, are household favorites. According to Kong Wuzhong's³⁷ *Compendium of Herbaceous Peony* cited in the *Random Notes of "That Can Also Be Changed" Studio*,

The herbaceous peony of Yangzhou is renowned under heaven. I praise it not simply for its abundance. Yes, it is plump and big, but at the same time, it is daintily beautiful and cleverly clustered—with all these traits it outshines those in other cities.

In "Seeing Meng Haoran off to Guangling at Yellow Crane Tower," Li Bai writes of the herbaceous peony,

West to Yellow Crane Tower I bid my pal goodbye;
Oars to Yangzhou in flowery March mist he will ply.

From these lines you can imagine the pomp and pageantry of the peony's flowering scene. For this reason peony beds and nurseries are ubiquitous in Chinese gardens. Such a parterre or herbal nursery either assumes the natural appearance of a piled-up rockery, or is built of bricks and white stones; no matter what the pattern or shape, they are products of ingenious garden designers. When springtime sets in, these beds and nurseries would be carpeted with peony flowers, whose brocade-like exuberance stands comparison with the peony gardens in Luoyang, native home to arboreous peonies in the country.

As complements to garden scenery, trees are planted individually or in clumps. The trees growing in the same grove may come of singular or mixed species, which is determined by the garden size and landscaping design. Small gardens are suitable for trees individually planted, but their postures and contours should be carefully chosen. Large gardens may have a lot of tree clumps, which should be deployed by bringing into consideration the images of rock formations and the elevation and size of the terrain, so that the groves can be

separated or linked, scattered or congregated. If an artificial mountain is not tall enough, trees cannot be planted on its top. To set off the mountain's primitive and steep looks, trees must be planted on low-lying spots at the mountain's shady side, so as to keep the mountaintop higher than all the treetops—only thus can the garden resemble a wooded mountain. This principle for tree planting pertains to the building of pavilions as well. In the relationship between pavilion, tree and artificial mountain, it is essential to decide which one should stand taller than the others and what distances should be kept between them. There are cases in which a pine tree is set to lie prone over a water surface at the foot of an artificial mountain, which is after all a nice approach to bring about a congenial vista. Wisteria may be arranged to hang down a rockery, and a water surface may be dotted with lotus flowers, but the quantity of such vines and flowers should be limited to the point where the pictured vision is brought about and the desired scenery created. Because every garden has its own sunny and shady sides, the environmental adaptability of the trees to be adopted should also be brought into account. For example, camellia, osmanthus, pines and cypresses are suitable for shady places, whereas bamboo can bring a scene to life wherever it finds itself.

Yangzhou's artistic potted plants and miniature landscapes differ from those of Suzhou and Hangzhou in that they are exceptionally sturdy, dynamic and resistant to wind and frost. Using deft cutting and binding skills, local horticulturists can train dwarf trees into "knots," "cloud sheets," or "bends" to bring about distinctly varied shapes, but it takes time to train a tree or plant into a potted scenic masterpiece. Pine, cypress, little-leaf box, chrysanthemum, camellia, azalea, plum, bitter orange flower, jasmine, kumquat, orchid, and *hui* orchid³⁸ are ideal themes for miniature landscapes, which are potted in earth or water, a treatment, indeed, uniquely Yangzhou's own. Yangzhou's sweet flags, which are verdant all year round growing purely in water contained in bowls fashioned out of palm sheaths, are unseen elsewhere, and the potted asters developed by local floriculturists are

a fabulous local specialty as well. These potted dwarf trees and miniature landscapes provide ideal finishing touches to a garden's scenery. As artificial mountains in a garden are often set under the foliage of arbours, flowers can hardly survive in them; this is exactly where potted plants and landscapes come handy to spruce up the scenery. Such an arrangement, in use as early as the Song, can also be applied to a pond; in fact, most lotuses growing in Yangzhou's ponds are potted. Garden horticulture in this country as a whole cannot do without potted plants and miniature landscapes.

The themes for the Yangzhou school of traditional Chinese painting are dominated by flowers, and those commonly seen in Yangzhou's gardens naturally become the prototypes. As local painters wielder their brushes with facility and abandon, flowers leap into many a painting to become celebrated masterpieces, from which one gains some idea about the impact of flowers on Yangzhou gardens. On the other hand, the way local painters graft red upon white, prune and reshape the plants in the pictures composed by them has inspired local horticulturists to improve their skills to some extent. Goldfish in which Yangzhou also abounds, birds that make Yangzhou home, and caged birds bred by locals—these have also contributed immensely to the fascinations of Yangzhou gardens.

To sum up, there are set rules but no hard-and-fast formulae for garden-making. Only through a myriad changes can new conceptions come about one after another. Gardens win with scenery; scenery differs from one garden to another. The secret to their success boils down to high adaptability to circumstances and mutual borrowing of views. Only by judicious view accommodating and borrowing can a garden stand out in distinction. The reason why Yangzhou gardens can become a school in their own right, and why they can entail dainty gracefulness in magnificent bodies—or, in literary jargon, write subtle heartthrobs with a robust brush—is because local crafters through the ages know how to avail themselves of the strengths of southern and northern gardens. Peerless are the gardens of Yangzhou,

what with their upright and spacious buildings, solid classical artificial mountains, thoroughly perforated and intricate latticed walls, as well as fairy flowers and grass endowed by nature and bred by local gardeners. Not to mention the artificial mountains, piled up with a broad variety of stones, pieced together and imbedded with numerous smaller stones, with peaks distinguished with different kinds of stones, and the water-less gardens made to look water-rich. These Yangzhou inventions, achieved by putting materials to best use and humouring the circumstances, are still of immense value for garden crafters of today. Their only drawback lies in the lack of changes among their ponds, so much so that they have failed to bring the role of water in permeating the environment and in interplaying with rockeries and buildings to bring a garden's attractions to sublimity.

Greeneries play a due role in keeping Yangzhou beautiful. Flowers and bamboos are not uncommon even in the city's ordinary courtyards, where tall trees provide much needed shades, and flowering trees, wisteria trellises, potted dwarf trees, miniature landscapes, and a few rocks are brought together to pull off dainty views. All these have long been part of the aboriginal Yangzhou tradition, which helps not only augment local residents' cultural life but also extend the city's greenery acreage.

·Dwellings

The Lu's Mansion, 22 Kangshan Street. Built during the Guangxu reign of the Qing for a whopping sum of seventy thousand taels of silver by Lu Shaoxu, a rich salt merchant from Jiangxi province, the Lu's Mansion is the largest extant classic mansion in Yangzhou. Its gateway is built of finely ground bricks with carvings and graced with a giant screen wall. Facing north behind the front gate is a converse room that sits opposite the main suite in the south. The second gate leading to the main court provides access to two rows of buildings each having a seven-bay hall divided by latticed wooden screens and

floor-length lattice windows into three rooms—a three-bay central room and a pair of double-bay wing rooms that serve reception and reading purposes. Large latticed windows are built into walls to screen the central part of the courtyard from two side yards in which a flower bed built of Lake Tai stones is supplemented with trees to create quiet spaces in contrast with the airy and spacious central hall. Further north are two rows of seven-bay lofts which serve as the owner's residence. Behind the halls there are two more rows of five-bay rooms, where guests are lodged. The kitchen in the east is no more. Behind the residence there is the Imagination Garden. By the side of a pond in the northeast of the garden, two rows of buildings, including a study and a library, form an independent zone. A land boat sitting on the eastern shore of the pond is now in ruins. A pavilion with a helmet-shaped rooftop is seen leaning against the garden's southern wall, where a corridor winds its way up to the northern part of the garden. Arbours, most of which are sweet-scented osmanthus trees, occupy the clearances on the premises. Wooden structures in this mansion are all fashioned out of unadorned choice fir shipped in from the Hu-Guang region³⁹, and all the interior decoration and furnishing are made of delicately carved *Phoebe nanmu*. Tall and spacious, and magnificent in scale, the Lu's Mansion is representative of the luxury mansions built by rich salt merchants in the final stage of Chinese feudalism.

Wang's Small Garden, 14 Taoist Earth Official's Domain Lane, a mansion of the salt merchant Wang Taijie (1889-1935)⁴⁰. Expanded during the Republican years (1912-1949), it is the most complete of all large mansions in the city. Its buildings are laid out in three columns each containing three rows. The eastern and western parlors are furnished differently. Entrance to the eastern parlor is by a gate made of unadorned and simplistic woven bamboo strips. The parlor is built of cypress, whose interior is furnished with and divided into frontal and posterior parts by latticed screens and a floor-length screen embedded with six pieces of delicate marbles. All the screens

are fastidiously carved. South of the parlor is a three-bay building that faces north, with rainwater streaking from an eave to fall on a Lake Tai stone artificial mountain in its court, where wintersweets and macrocephalums are planted. An eastern gate opens the yard onto a tiny clearance which serves the mere purpose to expand the space. A moon gate separates the western parlor from the yard in which there is an artificial mountain and a winding roofed walkway at the end of a boat-shaped verandah overlooking a tiny pool to the east, where a potted miniature landscape placed on a brick platform is reflected in the water. Looking out of the moon gate into the yard from inside the parlor, one sees a picture-perfect scene of well-spaced flowers and trees and rugged rockeries. A latticed wall with a moon gate in it divided the backyard north of the mansion into eastern and western sections; and a latticed screen cuts a six-bay northern parlor in the western section in two parts, with the western part being a three-bay study graced with stained glass windows. Between the study and the corridor in front of it, two crape myrtles arise to form an overhead canopy as if to shield the entire place from sunlight and to make the vistas on both sides look unfathomable. A peony parterre south of the parlor is built of rocks, but the flower deck in the west looks somewhat dull. When people look through the latticed windows and the moon gate built into the partition wall to see the other section, they will be impressed by the mystic, yet spirited quietness of the scene conjured up by way of view borrowing. Residential buildings dominate the mansion's precinct, with the garden itself playing a supplementary role at best. On account of its small size, it is extolled as "A Small Garden Where Spring Is Deep."

Zhao's Mansion at the Palace of Assisting Transforming Powers⁴¹, 33 Absolute Devotion Lane. The residence of cloth merchant Zhao Haishan consists of three rows of halls and chambers facing south, with the portal and kitchen kept outside of the enclosing wall. Its garden is separated from the dwellings by a tall wall, but can be entered directly from the portal to avoid mutual interference between

garden and dwelling. The plane of this building is clearly segmented. There is a three-bay study in the garden's eastward front, which is separated from the back of the mansion with a winding walkway. The spacious size of the two-row parlor in the back of the garden is commensurate with the scale of the residence.

Wei's Mansion on Invincible Street. The former residence of the salt merchant Wei Cigeng is a medium-sized structure with its front gate facing west. Built on an irregular plane, it is cut sharply in two, with dwellings in the rectangular eastern part, and a garden taking up the irregular western part. The dwellings, including the southern rooms facing north, fall into four five-bay rows. The three-bay hall in the center is flanked on either side by a small yard with a suite of rooms inside of it. Such dwelling suites are connected with the living rooms but appear to be independent and free from disturbance. The small yards, in particular, play an efficient role in facilitating daylight and ventilation and in expanding indoor and outdoor spaces. The garden is narrow in its front and wide in its back. Close by the gate in the front part is a room for sundries. Its back is divided into two zones. In the front zone, sitting amidst rockeries, *yulan* magnolias, green parasol trees and a tiny belvedere facing the southeast corner, is the Flute-Playing Terrace, which is actually a hall with windows on all four sides, with its lintel inscribed with the line in Zheng Xie's (1693-1765)⁴² handwriting, "Ancient Yangzhou Sung to the Accompaniment of Songs and Flutes." The back zone, serving as foil for the frontal zone, consists of two parts as well, in whose east part a land boat sits by a small belvedere, and a yellow-stone artificial mountain protrudes from a cluster of nandinas and little-leaf boxes at the foot of a latticed wall through which exterior views are subtly visible. Small as this garden is, it seems to have enough room to spare even with two big structures inside of it thanks to its latticed wall, which brings depth to the space while cutting the garden into sections that borrow each other's views—a method that is often used to handle empty space beside a house.

Liu's Residence, a small affair at 23 Abundant Benevolence Lane. Inside its front gate facing east, a row of rooms facing west sits in line with its portal, with a tall wall in front of it, and a narrow courtyard atrium helps ward the house off the scorching sun in summer and the frigid high wind in winter. With its wide open doors and windows, the residence receives plenty of cool breeze in summer despite its narrow space and tall wall. Behind the wall there is a south-facing hall three rows deep, with a secret room contained in the suite of rooms in the last row. Through a moon gate in the latticed wall beside the hall, one sees a parlor inside a small yard where rockeries and flowers and trees are arranged. This residence's architecture design is a good example in making flexible use of a piece of land oriented eastward.

Jia's Residence at Greater Armed City Lane, which was in the possession of Jia Yuan⁴³, a salt merchant during the Guangxu reign of the Qing. Its gate opens to the east, while its two columns of halls face south. The halls in its eastern part are ingeniously designed, each having a courtyard garden in which the parterres are planted with flowers and bamboos, and a pond and rocks are put together to form a tiny scenery encircled by a covered walkway whose walls sport sparsely latticed windows. Tidy and refreshing is the whole scene. There was a garden to the west of the residence, but it is in ruins today.

Toiler's Garden at Abundant Benevolence Lane was the mansion of Zhou Yifu. Entering the estate from its east gateway, one sees a row of rooms that face west, a common arrangement in handling a lot that faces east in Yangzhou. These rooms are part of a quadrangle that features a south-facing hall, eastern and western corridors, and a north-facing converse room. West of the hall is a parlor with a half-pavilion at its entrance and a study opposite it. The space south of the hall is divided up with a latticed wall, with a clearance about a foot wide left empty to form an imaginative scenery. An old flowering osmanthus drapes its boughs over the latticed wall, so that when autumn sets in, the courtyard is drenched in its fragrance, making one

feel as if he were roving a realm heady with airy-fairy aroma. (The flowering osmanthus must be encircled with walls to retain its fragrance.) The back of the hall is opened in the west to a moon gate whose lintel is inscribed with the name of the property, "Toiler's Garden" centered upon a fish pond with a zigzagging bridge over it and a tiny pavilion by the side. With interior décor fashioned out of unadorned ginkgo wood, the parlor looks clean and elegant, and the ground in the front is paved smooth and level with mosaic white stones. Dwellings take up only a small portion of this property, and, as a result of repeated expansions, more space is devoted to greenery that brings manifold changes to the environment.

Hanhou's Hut, 7 Ornamental Stone Archway, used to be the residence of Wu Tingyang (1799-1870)⁴⁴ during the Daoguang reign of the Qing. Its northern front gate opens into a courtyard, and its southern quadrangle is reached by way of a fire lane in the western end of the courtyard. In what is a typical Yangzhou way of handling north-facing houses, the main house is made to face side houses in the oblong courtyard paved all over with stone slabs.

Gourd Hut, 211 Sweet Spring Road, built by the capitalist Lu Dianhu (1876-1936)⁴⁵ in early Republican years. By way of a west gate one enters its south-facing main hall whose southern end serves as the parlor. A yellow-stone parterre lies north of the main hall, and a Lake Tai stone rockery stands amidst luxuriant verdure south of it. A verandah to the right of the mountain is reflected clearly in the serene water of a pond whilst plantains' swaying shadows caress the windows. Beyond the western gate at the northern end stands a yellow-stone rockery, where a road threads through a door and conducts to the back of the main hall. In the eastern part of the residence, a winding walkway and a latticed wall run across a ground the shape of a carpenter's square. The southeast corner of the small pond is occupied by a square pavilion. A three-bay verandah on the other side of the pond is reachable by the walkway; though small, it looks compact in a subdued way. This residence is a good example of

a south-facing main hall with a west-facing gate and an irregular-shaped lot for the design of a residence.

A compound at Ding Family Cove in which two residences—one in the east and the other in the west—share the same gateway. The eastern residence is a three-sided courtyard where a latticed wall divides its atrium in two, and all the rooms on the premises cover two bays. The western residence contains two three-sided courtyards each having two rows of differently aligned three-bay rooms. This type of residence makes it easy to adapt the plane to the lie of the land and provides plenty of leeway for space segmentation purposes.

Facing south at 2 Buffalo-Ridge Well is one of the smallest old residences in Yangzhou. Behind its front gate is a three-bay hall that forms a quadrangle together with two wing rooms and a north-oriented converse room on the southern side. The kitchen is found outside of the residence in what is a fundamental layout for residences in the Yangzhou tradition.

Present-day urban Yangzhou is encircled by the Grand Canal, while the Lesser Qinhuai River flows through the North City Gate to cut the municipality in two parallel sections: New City and Old City, whereas the Wenhe River runs parallel to the Lesser Qinhuai through Old City from south to north. Because these waterways run along straight courses, urban Yangzhou's roads and buildings are distributed in a fairly regular pattern. The Cross Avenue, which consists of an east-west road and a south-north road, provides thoroughfares to all four directions that are joined vertically by lanes and alleyways, a road pattern which is even more pronounced in Old City. Similar to the *hutongs* in Beijing, lanes in Yangzhou are numerically serialized. The layout of New City is somewhat in disorder due partly to the presence of a host of rich merchants and powerful bureaucrats' mansions and partly to a boom of modern commercial buildings, a disorder in which the impact of the cities in the Jiangnan area is keenly felt. Bay Street in New City, for example, becomes a shortcut because it functions like one of the slanting streets of Beijing. Quite a

few streets are entangled with narrow alleyways, resulting in some "dead ends." However, despite its seemingly complicated structure, urban Yangzhou's road system is by and large orderly as it follows its own arteries and veins. In bygone years entrance to the city's large lanes was by archways that are a salient feature of urban neighborhoods in both north and south China.

Yangzhou's classical dwellings are adapted with a fair degree of flexibility to the direction of the street or lane in which they are located, and their interiors are labyrinthine and replete with changes. They usually face south, or at least have their north gates face south, because most of them are located in lanes and alleyways that run east and west. There are also houses that run south and north whose owners' favor for the southern orientation has given rise to houses whose main rooms face south and whose gates face east or west. The general gateway is a good invention with which a cluster of medium-sized or small houses with different floor plans can be enclosed to form an integral whole that allows for changes in its interiors. Such a gated community, concealing small units in large ones and bringing odds and ends of space into order, not only gives families a sense of security but also helps maintain a clanbased lifestyle, not to mention its contribution to keeping the city clean and tidy.

Many large and medium-sized mansions are still there in urban Yangzhou today. They are supplemented with gardens and courtyards of different sizes, which provide ample greenery to neighborhoods and brings about a cosy living environment.

The layout of such a dwelling generally takes the shape of a courtyard, and its centerpiece is a three-bay hall, but five-bay ones are not uncommon. As *Notes on Sections of Construction Projects* puts it,

If a hall has five bays, a floor-length window or an overhanging latticed screen ought to be set up to demarcate its wing rooms, so that despite having five bays, it looks like a three-bay structure. Hence the term, a "house that looks like three-bayed but actually contains five bays."

There are also halls having four or two bays, depending on the floor

space of their foundations. There are also seven-bay halls, but they are actually a combination of a three-bay parlor and two two-bay wing rooms, like the one in the Lu's Mansion on Kangshan Street. A side lane, known as "fire lane," is built by the side of a large or medium-sized residence for female family members and servants entering or exiting the estate, but if a large residence has more than two "fire lanes," they become its main roads. The "fire lane" in a Yangzhou dwelling is more airy and straight than a Suzhou home's "avoidance lane." Known commonly as "auxiliary lane," according to Wen Zhenheng's *On Superfluous Things* (Volume One) such a lane serves to make the dwellers believe they are taking a tidy and clean road. Of all such lanes, the one in the Gong's Cangzhou Estate at Easterly Violet Rays Lane is the widest, so wide that it allows people to enter or leave the property in sedan chairs.

The halls fall into five types: firstly, those which are singlerow deep and have no wing rooms, nicknamed "Oldie's Head"; secondly, those attached on either side to a wing room to assume a carpenter's-square plan; thirdly, three-bay halls with wing rooms on both ends to form a three-sided courtyard; fourthly, those having wing rooms on both sides and a converse room to form a quadrangle; and fifthly, those without wing rooms but having an opposite hall. However, those three-bay halls with wing rooms attached on both sides, and those quadrangles, with corridors in four directions, high and spacious enough for horses to trot through, are called "Lofts Strung Together." Generally speaking, such a structure consists of a big hall in the front and an internal hall in the rear that contains the master's three-bay suite (two bedrooms with a sitting room), according to *Notes on Sections of Construction Projects*. A wing suite or secret room is often attached to the master's suite, such as the one in the Liu's Residence at Abundant Benevolence Lane.

The hall usually has a side door with a triangular top, an octagonal gate, or a moon gate that allows access to the parlor or study. Auxiliary buildings like the kitchen, the sundries room and the

servants' dormitories are kept outside the wall to free the master's dwelling area from disturbance—an arrangement that reflects the class gap in feudal society. The numbers of suites and secret rooms are determined by the layout's degree of complexity. More twists and turns mean more such suites and rooms. *Notes on Sections of Construction Projects* has this to say,

Most halls consist of three bays, and those with five bays invariably contain eastern and western wing rooms. Known as "flatlet," such a wing room belongs in such categories as secret room, double room, attached room, or boudoir....

A tiny yard with a parterre in it is often found in the front of such a suite to provide comfort in everyday life by allowing in refreshing cool air in summer and warding off frigid wind in winter. In old days such arrangements were agreeable to the secluded dwellings of Yangzhou. The study can be as small as one or two bays, or has three bays so that it is large enough to double as a parlor, and in front of it there invariably are rockery, pond, flowers and trees and bamboos, or at least a parterre or herbaceous peony nursery to bring about a quiet and clean ambience. A dwelling with south-facing main rooms and an eastern or western gate has secondary rooms for book-keepers, private school or sundries by the side of its portal. The narrow courtyard atrium in front of such rooms is used only to block sunlight and facilitate ventilation. Entrance to a residence with a north-facing front gate is by a "fire lane" that connects with the south-facing main house in the front.

A screen wall stands opposite the front gate of a medium-sized or large residence in Yangzhou in compliance with its owner's official or royal rank. A high-ranking screen wall features a splayed plane in the shape of the Chinese character "人"; a lower-rank one takes the plane of the Chinese character "一"; and a screen wall of the lowest rank is "built" by drawing the likeness of a square screen wall on the back wall of the opposite house belonging to another family. A luxurious screen wall, like the one in front of the Geyuan's Garden, is surfaced with finely ground bricks and engraved with bas-relief patterns, and

the Chinese character "福" is embedded in the center. The exterior wall of such a residence is built of shale bricks, but finely ground bricks are put together seam to seam on elaborate ones. The gate towers are also built of bricks and ornamented with bas-relief brick carvings, while sumptuous portals assume the shape of the Chinese character "八," and feature corbel brackets and a caisson ceiling, like the front gate of the Kettle Garden at Eastern Loop Gate. Even ordinary gate towers can look compact and sprightly when surfaced with finely ground bricks. By the way, brick engraving is one of the eight engraving crafts for which Yangzhou are famous along with engravings on ivory, wood, stone, bamboo, lacquerware, jade, and porcelain.

Front gates, lacquered black and flanked by a red inscribed couplet, hinge on richly engraved stone gate piers whose sizes are determined by the rank of the dwellers. Rooftops consist of two slopes topped with a striking ridge built of tiles in latticed patterns, which, therefore, set off the gable walls with trceries running up and down their tops. Sometimes a row of latticed windows are opened in the upper part of the enclosing wall so that treetops and rattans and vines can be espied behind it and views in the neighborhood brought to life, which adds vivacity to the lane's vista.

The front gate opens onto a screen wall, brick-engraved with the likeness of a village god's shrine that looks so lifelike and in such accord with the gateway that it naturally becomes the most eye-catching part of the inner screen wall. The ground inside the courtyard is paved with bricks or stones. The second gate is similar to the front gate in both shape and specification. The main hall, tall and roomy, is propped up on a framework built of unadorned fir of the choicest type, but *Phoebe nanmu*, cypress, or spinulose tree fern described in the *Notes on Sections of Construction Projects*, are used on the halls of large mansions. The timber for such purposes is sometimes polished to look smoother and more well-rounded. Such giant wooden frames, deliberately kept simple to shun ostentation, are in accord

with the style of the walls built of shale bricks.

The portal of a hall is decorated with flying eaves. Floor-length latticed windows are used on the central room, and detachable windows on side or wing rooms. But the windows in such rooms built in a later period are replaced with lattice ones on a short wall between two columns. The central part of an inner hall or parlor has only a pair of floor-length windows flanked by detachable windows. If the wall under the lattice windows of a storied hall is replaced with a balustrade, wooden plates are furnished to be removed in summer to improve ventilation. An internal yard is often divided with a latticed wall, and a gate is opened in the wall to facilitate traffic.

The ratio between a courtyard's length and the height of buildings in it is 1:1 to insure enough sunlight indoors in Yangzhou dwellings. In summer days, an overhead mat-awning is erected in the courtyard to provide cooling shade while the front and back gates and windows are kept open to let in the refreshing wind, but the breeze drifting through the gate in the wall feels a lot cooler. In winter, the gate is shut up so that when the stairway is bathed in sunshine, the dwellers will be warded off the subfreezing winter. Latticed walls and multiple layers of doors also add to the spaciousness and depth of the courtyard, so that small residences do not appear cramped for space and large ones do not appear deserted and empty. Thus aesthetic effects are achieved under the premise that all the needed functions are amply provided. The courtyard containing the central hall is invariably sidelong and sometimes features two wings or corridors designed to accentuate the position of the central hall. The internal halls in the second row have wing rooms and are situated in a square court. Their depths are usually shallower than those in south Jiangsu; some of them have no windows on their northern walls to keep the interior cool and cosy in summer and to prolong the warmth of the sunlight let in from southern windows in winter.

Indoor spaces should be kept at once apart and combined, twisted and turned moderately, and deployed flexibly to make those staying

indoors feel that there is always a lot of room to spare. Thus the parlor must be segmented with overhanging latticed screens or floor-length windows to yield spaces that are at once attached and detached, that can be scaled up and down, and that are packed with changes while the main ones are clearly told apart from the minor ones. Examples like these are found in the Toiler's Garden at Abundant Benevolence Lane and the Wang's Small Garden at Taoist Earth Official's Domain Lane. The central hall in a large and deep residence may feature two flying frontal eaves, like the one in the Lu's Mansion on Kangshan Street. An inner room is both joined and disjointed with side rooms, and is separated from wing rooms with overhanging latticed screens or floor-length windows. The overhanging screen in most cases forms a round hollow in the middle and is exquisitely crafted, and sometimes covered with patterned gauze.

The interior of a study can also be segmented flexibly. All the halls go without ceilings or rough-frame superstructures (double roofs), but ceilings may be fixed in residential rooms. Round ridge may also be built inside a parlor. All the ground indoors are covered with square bricks whose four corners are propped up on as many overturned bowls so that the floors are elevated by one inch or so[see *On Superfluous Things* (Volume One)], and the hollow between floor and ground is filled in with yellow sand. Finely ground bricks are erected edgewise to keep the floor flat and off subterranean dampness. If such a brick floor is built in a bedroom, it is covered with a mobile wooden floor on legs in winter to keep warm and reduce the net height of the interior. In a posh loft, a raised brick floor is paved on rooms upstairs, with a removable wooden floor added to it to soften the noise of footsteps—a method that tallies with the saying in *On Superfluous Things* (Volume One) that walking in such a loft is "no different than [walking] in a single-story house." Such floors, of course, appear only in high-grade classical residences; those built in later periods are all covered with ordinary floors.

The interior and exterior walls are all built solidly of bricks.

Baked shale bricks are ideal for posh residences, while tightly budgeted houses can also put on a tidy appearance by putting together bricks of miscellaneous sizes with mortar. The corners of exterior walls are cut off up to man's average height for traffic convenience. A corridor's walls are partly white-washed, while wooden wainscots are used to cover its internal walls, with bricks' original color preserved on other parts. A courtyard atrium is usually floored with square or rectangular bricks made to lie flatly or stand edgewise, but it can also be paved with stone plates in cracked-ice patterns, large square marble slabs or stone plates from Gaozi in Zhenjiang. Column plinths come as thin as an ancient mirror, but block stones are also used in buildings dating back to the Ming and early Qing periods. In large residences, "stone drums" are used, some of which are fixed on a stone base in the shape of an overturned basin; such "drums" and "bases" are made of Gaozi stone or marble as well.

All the columns in Yangzhou's mansions are straight ones. The capitals of extant pillars in Ming mansions are rounded off in entasis to look thick and sturdy, with a 1:9 ratio between diameter and height, like the one in the central hall of the Mao's Residence at Greater East Gate, but it ranges between 1:10 and 1:16 for most of those available today. The alignment of columns is identical to the saying in *Notes on Sections of Construction Projects* that the central column does not exist in halls but can be seen in dwellings. A full-length horizontal tablet or architrave is used in the central room of a hall, with two central bay columns removed in order that the view of the audience watching a performance onstage is not blocked.

The timber for building beam frames comes in three styles: firstly, oblong timber popular in south Jiangsu; secondly, straight and round timber popular in Yangzhou; thirdly, something between the crescent beam and the straight beam, made by rounding off the lower part of both ends of a straight beam in entasis, a structure that seems to come about under the influence of the Anhui tradition of architecture. Of these three styles, the second is representative of the Yangzhou style.

The only example of it is found in the Wu's House at Down North River Street, which is wrought by an artisan from Ningbo, Zhejiang province, by using a sturdy log as the beam, with the mortise and tenon at the joints axed and chiselled with perfect precision. The beam frame in an ordinary hall consists of a five-purlin beam between the front and back columns, with short columns placed on it, and then a three-purlin beam and a small pillar are installed. However, square beams and underboarding are not used under the purlins, which should be a northern Jiangsu invention because it does not tally with the instruction in *Notes on Sections of Construction Projects*, and therefore is somewhat flawed in structure. Some parlors have six sets of round ridges with stairway-shaped gable walls round in the upper part. Some luxury halls are fixed with square pillars and beams, which belong to the "square hall" type illustrated in the *Notes on Sections of Construction Projects*. Round ridges over the façade of the building generally have rafters curving into the shape of crabapple flowers, water caltrops, or a crane's neck, but most of such rafters are in the shape of a boat awning. Rough-frame superstructure is only used occasionally.

The balustrades of the Yangzhou tradition are relatively tall, and their lattices are of the shaped reel pattern surrounded with convex moldings. The concise hanging fascias under the eaves are set in tune with the elevation of the entire building. Rooftop tiles are paved on top of sheathing tiles, and the tile ends for ornamental and drainage purposes become thick and sturdy. Ends of arched tiles are longer in the lower part and those of plate tiles are raised in the upper part.

Insofar as water supply is concerned, there is at least one well in every urban dwelling in Yangzhou except for those homes that draw water from the Lesser Qinghuai River and the Wenhe River. Such wells are found in courtyards, in front of kitchens, inside gardens, or in "fire lanes," There are also "hidden" wells indoors, which refers to wells without brandriths. Public wells are available in almost every neighborhood. Brick arches are built into the lower part of the walls

beside wells (those in Hangzhou and Shaoxing are lined with vertical stone plates) to prevent the wall from sinking or caving in, which is something seldom seen elsewhere. In addition to washing and drinking, well water is also reserved for fire prevention purposes, and rainwater is also preserved in vats placed under the eaves to meet the same needs. Underground shafts are built in courtyards to connect with sewages outside the front doors. Fish bowls are placed in ponds for wintering golden fish.

Neat, tidy and thriving dwelling buildings have impacted the cityscape of Yangzhou to a certain degree. Few old cities in China can match Yangzhou's sheer number of methodically laid out residential quarters. Such dwellings are bright, clean and quiet, with large ones containing small ones that are integrated or separated with facility. In handling spaces, due attention is paid to segmenting courtyards and grouping wide and narrow spaces, and sunlight and ventilation problems are addressed efficiently. Buildings large and small come in proper proportions and allocated proportionately, and floor spaces are economically deployed for the comfort of dwellers and to the delight of visitors. The plan of every dwelling is adapted to the environment and arranged cleverly. Every building is made to face south no matter in what direction a particular terrain is facing; every dwelling has its spaces well grouped to meet various functional needs no matter how large or small its lot is. Their architectural precepts are a hybrid of southern and northern styles, with emphasis on polish and order. So much for the characteristics of traditional dwellings in the Yangzhou tradition.

The gardens and residences of Yangzhou are of uttermost values to the history of Chinese architecture. I believe that garden crafters of today could learn a lot from the achievements of the local labouring people in garden construction in ancient times.⁴⁶

扬州园林与住宅

扬州是一个历史悠久的古城，很早以来就多次出现繁华景象，成为我国经济最为富裕的地方；物质基础的丰厚，为扬州文化艺术的发展创造了有利的条件。表现在园林与住宅方面，也有其独特的成就和风格。

试从历史的发展来看，公元前486年周敬王三十四年，吴王夫差在扬州筑邗城，并开凿河道，东北通射阳湖，西北至末口入淮，用以运粮。这是扬州建城的开始和“邗沟”得名的由来。扬州由于地处江淮要冲，自春秋末便成为我国东南地区的政治军事重地之一。从经济条件来说，鱼、盐、工农业等各种生产事业都很发达，同时又是全国粮食、盐、铁等的主要集散地之一；隋唐以后更是我国对外文化联络和对外贸易的主要港埠。这些都奠定了扬州趋向繁荣的物质基础。

隋唐时代的扬州，是极其重要而富庶的地方。从隋文帝（杨坚）统一南北以后，江淮的富源得到了繁荣的机会，扬州位于江淮的中心，自然也就很快地兴盛起来。其后隋炀帝（杨广）恣意寻欢作乐来到扬州，又大兴土木，建造离宫别馆。虽然这时的扬州开始呈现了空前的繁荣，却不能使扬州的富庶得到真正的发展。但是隋炀帝时所开凿的运河，则又使扬州成为掌握南北水路交通的枢纽，为以后的经济繁荣提供了有利的条件。在建筑技术上，由于统治阶级派遣来的北方匠师，与江南原有的匠师在技术上得到了交流与融合，更大大地推进了日后扬州建筑的发展。唐朝的诗人杜牧曾用“谁知竹西路，歌吹是扬州”的诗句来歌咏扬州的繁荣。

早在南北朝时期（公元420—589年），宋人徐湛之在平山堂下建有风亭、月观、吹台、琴室等。到唐朝贞观年间（公元627—649年），有裴谔的樱桃园，已具有“楼台重复、花木鲜秀”的境界，而郝氏园还要超过它。但唐末都受到了破坏。宋时有郡圃、丽芳园、壶春园、万花园等，多水木之胜。金军南下，扬州受到较大的破坏。正如南宋姜夔于淳熙三年（公元1176年）《扬州慢》词上所诵：“自胡马窥江去后，废池乔木，犹厌言兵。渐黄昏，清角吹寒，都在空城。”同时宋金时期，运河已经阻塞，至元初漕运不得不改换海道，扬州的经济就不如过去繁荣了。元代仅有平野轩、崔伯亨园等二三例记载。明代初叶运河经过整

修，又成为南北交通的动脉，扬州也重新成了两淮区域盐的集散地。明中叶后由于资本主义经济的萌芽，城市更趋繁荣，除盐业以外，其他的商业与手工业也都获得了发展。到十七八世纪的清代，扬州的经济，在表面上可说是到了最繁荣的时期。这种繁荣实际上是封建统治阶级穷奢极侈、腐化堕落、消极颓唐、享乐寻欢的具体表现，而扬州的劳动人民，却以他们的勤劳与智慧，创造了独特的园林建筑艺术，为我国古代文化遗产作出了一定的贡献。

明代中叶以后，扬州的商人，以徽商居多，其后赣（江西）商、湖广（湖南、湖北）商、粤（广东）商等亦接踵而来。他们与本地商人共同经营了商业，所获得的大量资金，并没有积累起来从事再生产。除了花费在奢侈的生活之外，又大规模地建筑园林和住宅。由于水路交通的便利，随着徽商的到来，又来了徽州的建筑匠师，使徽州的建筑手法融合在扬州建筑艺术之中。各地的建筑材料，及附近香山（苏州香山）匠师，更由于舟运畅通源源到达扬州，使扬州建筑艺术更为增色。在园林方面，如明万历年间（公元1573—1619年）太守吴秀所筑的梅花岭，叠石为山，周以亭台。明末清初郑氏兄弟（元嗣、元勋、元化、侠如）的四处大园林——影园（元勋）、休园（侠如）、嘉树园（元化）、五亩园（元嗣），不论在园的面积上及造园艺术上都很突出。影园是著名造园家吴江计成的作品，园主郑元勋因受匠师的熏陶，亦粗解造园之术。这时的士大夫就是那样“寄情”于山水，而匠师们却在平原的扬州叠石凿池，以有限的空间构成无限的景色，建造了那“宛自天开”的园林。这些给后来清乾隆时期（公元1736—1795年）的大规模兴建园林，在技术上奠定了基础。清兵南下，这些建筑受到了极大的破坏，只有从现存的几处楠木大厅，尚能看到当时建筑手法的片断。

清初，统治阶级在扬州建有王洗马园、卞园、员园、贺园、冶春园、南园、郑御史园、篠园等，号称八大名园。乾隆时因高宗（弘历）屡次“南巡”，为了满足尽情享乐的欲望，便大事建筑亭、台、阁、园【从周案五】。扬州的绅商们想争宠于皇室，达到升官发财的目的，也大事修建园林。自瘦西湖至平山堂一带，更是“两堤花柳全依水，一路楼台直到山”。有二十四景之称，并著名于世。所以李斗《扬州画舫录》卷六中引刘大观言：“杭州以湖山胜，苏州以市肆胜，扬州以园林胜，三者鼎峙，不可轩轻”，洵至论也。清朝的统治阶级正利用这种“南巡”的机会进行搜刮，美其名为“报效”。商人也在盐中“加价”，继而又“加耗”。皇帝还从

中取利，在盐中提成，名“提引”。皇帝又发官款借给商人，生息取利，称为“帑利”。日久以后，“官盐”价格日高，商人对盐民的剥削日益加重，而广大人民的吃盐也更加困难。封建的官商，凭着搜刮剥削得来的资金，不惜任意挥霍，争建大型园林与住宅，做了控制它命运的主人。封建社会的统治阶级与豪绅富贾，以这种动机和企图来对待劳动人民所造成的园林作品，自然使这些园林蕴藏着难以久长的因素。这时期的园林兴造之风，正如《扬州画舫录》谢溶生序文中说：“增假山而作陇，家家住青翠城闉；开止水以为渠，处处是烟波楼阁。”流风所及，形成了一种普遍造园的风气。因此除瘦西湖上的园林外，如天宁寺的行宫御花园、法净寺的东西园、盐运署的题襟馆、湖南会馆的棣园，以及九峰园、乔氏东园、秦氏意园、小玲珑山馆等，都很著名。其他如祠堂、书院、会馆，下至餐馆、妓院、浴室等，也都模拟叠石引水，栽花种竹了。这种庭院内略加点缀的风气，似乎已成为建筑中不可缺少的部分。

从整个社会来看，乾隆以后，清朝的统治开始动摇，同时中国两千年的长期封建社会，也走向下坡，清帝就不再敢“南巡”了。国内的阶级矛盾与民族矛盾，正酝酿着大规模的斗争，西方资本主义的浪潮日益紧逼，从而动摇了封建社会的基础。到嘉庆时，扬州盐商日渐衰落。鸦片战争后，继以《江宁条约》五口通商，津浦铁路筑成，同时海上交通又日趋发达，扬州在经济、交通上便失去了其原有的地位。早在道光十四年（公元1834年），阮元作《扬州画舫录跋》，道光十九年（公元1839年）又作《后跋》，历述他所看见的衰败现象，已到了“楼台荒废难留客，林木飘零不禁樵”的地步，比太平天国军于1853年攻克扬州还早十九年。由此可见，过去的许多记载，把瘦西湖一带园林毁坏的责任，硬加于农民革命军身上，显然是错误的。咸丰、同治以后，扬州已呈时兴时衰的“回光返照”状态，所谓“繁荣”只是靠镇压太平天国革命起家的官僚富商，在苟延残喘的清朝统治政权的末期，粉饰太平而已。民国以后，由于“盐票”的取消，盐商无利可图，坐吃山空，因而都以拆屋售料、拆山售石为生。园林与大型住宅渐趋破坏【从周案六】。

扬州位于我国南北之间，在建筑上有其独特的成就与风格，是研究我国传统建筑的一个重要地区。很明显，扬州的建筑是北方“官式”建筑与江南民间建筑两者之间的一种介体。这与清帝“南巡”、四商杂处、交通畅达等有关，但主要的还是匠师技术的交流。清道光间钱泳的《履园丛话》卷十二载：“造屋之工，当以扬州为第一。如作文之有变换，无雷

同，虽数间小筑，必使门窗轩豁，曲折得宜……盖厅堂要整齐如台阁气象，书斋密室要参差如园亭布置，兼而有之，方称妙手。”在装修方面，也同样考究，据同书卷十二载：“周制之法，唯扬州有之。明末有周姓者始创此法，故名周制。”北京圆明园的重要装修，就是采用“周制”之法，由扬州“贡”去的【从周案七】。其他名匠谷雨成、成烈等，都精于宫室装修。姚蔚池、史松乔、文起、徐履安、黄晟、黄履暹兄弟（履昊、履昂）等，对于建筑及布置方面都有不同造诣。又据《扬州画舫录》卷二记载：“扬州以名园胜，名园以垒石胜。”在叠石方面，名手辈出，明清两代有叠影园山的计成，叠万石园、片石山房的石涛，叠白沙翠竹江村石壁的张涟，叠怡性堂宣石山的仇好石，叠九狮山的董道士，叠秦氏小盘谷的戈裕良，以及王天于【从周案八】、张国泰等。晚近有叠萃园、怡庐、匏庐、蔚圃和冶春等的余继之。他们有的是当地人，有的是客居扬州的。在叠山技术方面，他们互相交流，互相推敲，都各具有独特的造诣，在扬州留下了不少的艺术作品，使我国叠山艺术得到了进一步的提高。

关于扬州园林及建筑的记述，除通志、府志、县志记载外，尚有清乾隆间的《南巡盛典》《江南胜迹》《行宫图说》《名胜园亭图说》，程梦星《扬州名园记》《平山堂小志》，汪应庚《平山揽胜志》，赵之璧《平山堂图志》，李斗《扬州画舫录》，以及稍后的阮亨《广陵名胜图记》，钱泳《履园丛话》，道光间骆在田《扬州名胜图》，和晚近王振世《扬州览胜录》，董玉书《芜城怀旧录》等，而尤以《扬州画舫录》记载最为详实，其中《工段营造录》一卷，取材于《大清工部工程做法则例》与《圆明园则例》，旁征博引，有历来谈营造所不及之处。

扬州位于长江下游北岸，与镇江隔江对峙，南濒大江，北负蜀冈，西有扫垢山，东沿运河，就地势而论，较为平坦，西北略高而东南稍低。土壤大体可分两类：西北山丘地区属含钙的黏土；东南为冲积平原，地属砂积土；地面上则多瓦砾层。扬州气候属北温带，为亚热带的渐变地区。夏季最高平均温度在30℃左右，冬季最低平均温度在1—2℃。因为离海很近，夏季有海洋风，所以较为凉爽，冬季则略寒冷。土壤冻结深度一般为10—15厘米，年降雨量一般都在1000毫米以上。属季候风区域，夏季多东风，冬季多东北风。常年的主导风向为东北风。在台风季节，还受到一定的台风影响。

扬州的自然环境，既具有平坦的地势、温和的气候、充沛的雨量以

及较好的土质，有利于劳动生产与生活；又地处交通的中心，商业发达，因此历来便成为繁荣的所在，促进了建筑的发展。不过在这样的自然条件下，以建筑材料而论，扬州仍然是缺乏木材与石料的，因此大都仰给于外地。在官僚富商的住宅与园林中，更出现了珍贵的建筑材料，如楠木、紫檀、红木、花梨、银杏、大理石、高资石、太湖石、灵璧石、宣石等。

当时扬州园林与住宅的分布，比较集中在城区，而最大的建筑又多在新城部分。按其发展情况，过去旧城居住者为士大夫与一般市民，而新城则多盐商。清中叶前，盐商多萃集在东关街一带，如小玲珑山馆、寿芝园（个园前身）、百尺梧桐阁、约园与后来的逸圃等。较晚的有地官第的汪氏小苑、紫气东来巷的沧州别墅等，亦与此相邻。同时又渐渐扩展到花园巷南河下一带，如秋声馆、随月读书楼、片石山房、棣园、小盘谷、寄啸山庄等。这些园林与住宅的四周都筑有高墙，外观多半与江南的城市面貌相似。旧城部分建筑，一般较低小，但坊巷排列却很整齐，还保留了苏北地区朴素的地方风格。这是与居住者的经济基础分不开的。较好的居住区，总是水陆交通便利，接近盐运署和商业地区。

目前扬州城区还保存得比较完整的园林，大小尚有三十处。具有典型性的，要推片石山房、个园、寄啸山庄、小盘谷、逸圃、余园、怡庐和蔚圃等。住宅为数尚多，如卢宅、汪宅、赵宅、魏宅等，皆为不同类型的代表。

·园林

片石山房一名“双槐园”，在新城花园巷何芷舫宅内，初系吴家龙的别业，后属吴辉谟【从周案九】。今尚存假山一丘，相传为石涛手笔，誉为石涛叠山的“人间孤本”。假山南向，从平面看来是一座横长形的倚墙山。西首以今存气势来看，应为主峰，迎风耸翠，奇峭迎人，俯临着水池。人们从飞梁（用一块石造成的桥）经过石磴，有腊梅一株，枝叶扶苏，曲折地沿着石壁可登临峰顶。峰下筑正方形的石室（用砖砌）两间，所谓片石山房就是指此石室说的。向东山石蜿蜒，下面筑有石洞，很是幽深，运石浑成，仿佛天然形成。可惜洞西的假山已倾倒，山上的建筑物也不存在，无法看到它的原来全貌了。这种布局的手法，大体上还继承了明代叠山的惯例，不过重点突出，使主峰与山洞都更为显著罢

了。全局的主次分明，虽然地形不大，布置却很自然，疏密适当，片石峥嵘，很符合片石山房的这个名字的含义。扬州叠山以运用小料见长。石涛曾经叠过万石园，想来便是运用高度的技巧，将小石拼镶而成。在堆叠片石山房之前，石涛对石材同样进行了周密的选择，以石块的大小，石纹的横直，分别组合摹拟成真山形状；还运采了他画论上的“峰与皴合，皴自峰生”（见石涛《苦瓜和尚画语录》）的道理，叠成“一峰突起，连冈断壑，变幻顷刻，似续不续”（见石涛《苦瓜小景》题辞）的章法。因此虽高峰深洞，却一点没有人工斧凿痕迹，显出皴法的统一，全局紧凑，虚实对比有方。按《履园丛话》卷二十：“扬州新城花园巷，又有片石山房者。二厅之后，湫以方池，池上有太湖石山子一座，高五六丈，甚奇峭，相传为石涛和尚手笔。其地系吴氏旧宅，后为一媒婆所得，以开面馆，兼为卖戏之所，改造大厅房，仿佛京师前门外戏园式样，俗不可耐。”据以上的记载与志书所记，地址是相符合的，两厅今尚存一座，面阔三间的楠木厅，它的建筑年代当在乾隆年间。山旁还存有走马楼（川楼），池虽被填没，可是根据湖石驳岸的范围考寻，尚能想象到旧时水面的情况。假山所用湖石，与记载亦能一致。山峰高出园墙，它的高度和书上记载的相若，顶部今已有颓倾。至于叠山之妙，独峰依云，秀映清池，确当得起“奇峭”二字。石壁、磴道、山洞，三者最是奇绝。石涛叠山的方法，给后世影响很大，而以嘉道年间的戈裕良最为杰出。戈氏的叠山法，据《履园丛话》卷十二：“……只将大小石钩带联络，如造环桥法，可以千年不坏。要如真山洞壑一般，然后方能事。”苏州的环秀山庄、常熟的燕园，与已毁的扬州秦氏意园小盘谷是他叠的，前两处今都保存了这种钩带联络的做法。

个园在东大街，是清嘉庆、道光间盐商两淮商总黄应泰（至筠）所筑。应泰别号个园，园内又植竹万竿，所以题名个园。据刘凤诰所撰《个园记》，园系就寿芝园旧址重筑。寿芝园原来叠石，相传为石涛所叠，但没有可靠的根据，或许因园中的黄石假山，气势有似安徽的黄山；石涛喜画黄山景，就附会是他的作品了。个园原来范围较现存要大些。现今住宅部分经维修后，仅存留中路与东路，大门及门屋已毁，照壁上的砖刻很精工。住宅各三进。正路大厅明间（当中的一间），减去两根“平柱”，这样它的开间就敞大了，应该说是当时为了兼作观戏之用才这样处理的。每进厅旁，都有套房小院，各院中置不同形式的花坛，竹影花香，十分幽静。园林在住宅的背面，从“火巷”（屋边小弄）中进

入；有一株老干紫藤，浓荫深郁，人们到此便能得到一种清心悦目的感觉。往前左转达复道廊（两层的游廊），迎面左右有两个花坛，满植修竹，竹间放置了参差的石笋，用一真一假的处理手法，象征着春日山林。竹后花墙正中开一月洞门，上面题额是“个园”。门内为桂花厅，前面栽植丛桂，后面凿池，北面沿墙建楼七间，山连廊接，木映花承，登楼可鸟瞰全园。池的西面原有二舫，名“鸳鸯”。与此隔水相对耸立着六角亭。亭倒映池中，清澈如画。楼西叠湖石假山，名“秋云”（黄石秋山对景，故云），秀木繁阴，有松如盖。山下池水流入洞谷，渡过曲桥，有洞如屋，曲折幽邃，苍健夭矫，能发挥湖石形态多变的特征。因为洞屋较宽敞，洞口上部山石外挑，而水复流入洞中，兼以石色青灰，在夏日更觉凉爽。此处原有“十二洞”之称。假山正面向阳，湖石石面变化又多，尤其在夏日的阳光与风雨中所起的阴影变化，更是好看，予人有夏山多态的感觉。因此称它为“夏山”。山南今很空旷，过去当为植竹的地方，想来万竿摇碧，流水湾环，又另生一番境界。从湖石山的磴道引登山巅，转至七间楼，经楼、廊与复道，可到东首的黄石大假山。山的主面向西，每当夕阳西下，一抹红霞，映照在黄石山上，不但山势显露，并且色彩倍觉醒目。而山的本身又拔地数丈，峻峭凌云，宛如一幅秋山图，是秋日登高的理想所在。它的设计手法，与春景夏山同样利用不同的地位、朝向、材料与山的形态，达到各具特色的目的。山间有古柏出石隙中，使坚挺的形态与山势取得调和，苍绿的枝叶又与褐黄的山石造成对比。它与春景用竹、夏山用松一样，在植物配置上，能从善于陪衬加深景色出发，是经过一番选择与推敲的。磴道置于洞中，洞顶钟乳垂垂（以黄石倒悬代替钟乳石），天光隐隐从石窦中透入，人们在洞中上下盘旋，造奇致胜，构成了立体交通，发挥了黄石叠山的效果。山中还有小院、石桥、石室等与前者的综合运用，这又是别具一格的设计方法，在他处园林中尚是未见。山顶有亭，人在亭中见群峰皆置脚下，北眺绿杨城郭、瘦西湖、平山堂及观音山诸景，一一招入园内，是造园家极巧妙的手法，称为“借景”。山南有一楼，上下皆可通山。楼旁有一厅，厅的结构是用硬山式（建筑物只前后两坡用屋顶，两侧用山墙），悬姚正鏞题“透风漏月”匾额。厅前堆白色雪石（宣石）假山，为冬日赏雪围炉的地方。因为要象征有雪意，将假山置于南面向北的墙下，看去有如积雪未消的样子。反之如将雪石置于面阳的地方，则石中所含石英闪闪作光，就与雪意相违，这是叠雪石山时不能不注意的事。墙东列

洞，引隔墙春景入院，借用“大地回春”的意思。上山可通入园的复道廊，但此复道廊已不存。

个园以假山堆叠的精巧而出名。在建造时就有超出扬州其他园林之上的意图，故以石斗奇，采取分峰用石的手法，号称四季假山，为国内唯一孤例。虽然大流芳巷八咏园也有同样的处理，不过没有起峰。这种假山似乎概括了画家所谓“春山淡冶而如笑，夏山苍翠而如滴，秋山明净而如妆，冬山惨淡而如睡”（见郭熙《林泉高致》），与“春山宜游，夏山宜看，秋山宜登，冬山宜居”（见戴熙《习苦斋题画》）的画理，实为扬州园林中最具地方特色的一景。

寄啸山庄在花园巷，今名何园。清光绪间官僚做道台的何芷舠所筑，为清代扬州大型园林的最后作品。由住宅可达园内。园后刁家巷另设一门，当时是为招待外客的出入口。住宅建筑除楠木厅外，都是洋房，楼横堂列，廊庑回绕，在平面布局上，尚具中国传统。从宅中最后进墙上的什锦空窗（砖框）中隐约地能见到园的一角。园中为大池，池北楼宽七楹，因主楼三间稍突，两侧楼平舒展伸，屋角又都起翘，有些像蝴蝶的形态，当地人叫作“蝴蝶厅”。楼旁连复道廊可绕全园，高低曲折，人行其间有随势凌空的感觉。而中部与东部又用此复道廊作为分隔。人们的视线通过上下壁间的漏窗，可互见两面临色，显得空灵深远。这是中国园林利用分隔扩大空间面积的手法之一。此园运用这一手法，较为自如而特出。池东筑水亭，四角卧波，为纳凉拍曲的地方。此戏亭利用水面的回音，增加音响效果，又利用回廊作为观剧的看台。不过在封建社会，女宾只能坐在宅内贴园的复道廊中，通过疏帘，从墙上的什锦空窗中观看。这种临水筑台增强音响效果的手法，今天还可以酌予采取，而复道廊隔帘观剧的看台是要扬弃的。如用空窗作为引景泄景，以加深园林层次与变化，当然还是一种有效的手法。所谓“景物锁难小牖通”，便是形容这种境界。池西南角为假山，山后隐西轩，轩南的牡丹台，随着山势层叠起伏，看去十分自然。这种做法并不费事，而又平易近人，无矫揉造作之态，新建园林中似可推广。越山穿洞，洞幽山危，黄石山壁与湖石磴道，尚宛转多姿，虽用不同的石类，却能浑成一体。山东麓有一水洞，略具深意，唯一头与柱相交接，稍嫌考虑不周。山南崇楼三间，楼前峰峦嶙峋，经山道可以登楼，向东则转入住宅复道了。复道廊为叠落形（屋顶顺次作阶段高低），有游廊与复廊（一条廊中用墙分隔为二）两种形式，墙上开漏窗，巧妙地分隔成中东两部。漏

窗以水磨砖对缝构成，面积很大，图案简洁，手法挺秀工整。廊东有四面厅，与三间轩相对置，院中碧梧倚峰，阴翳蔽日，阶下花街铺地（用鹅石子与碎砖瓦等拼花铺成的地面），与厅前砖砌阑凳极为相称，形成一种成功的作品。它和漏窗一样，亦为别处所不及，是具有地方风格的一种艺术品。厅后的假山贴墙而筑，壁岩与磴道无率直之弊，假山体形不大，尚能含蓄寻味。尤其是小亭踞峰，旁倚粉墙之下，加之古木掩映，每当夕阳晚照，碎影满阶，发挥了中国园林就白粉墙为底所产生的虚实景色。虽然面积不大，但景物的变化万千，在小空间的院落中，还是一种可取的手法。山西北有磴道，拾级可达楼层复道廊中的半月台，它与西部复道廊尽端楼层的旧有半月台，都是分别用来观看升月与落月的。在植物配置方面，厅前山间栽桂，花坛种牡丹芍药，山麓植白皮松，阶前植梧桐，转角补芭蕉，均以群植为主，因此葱翠宜人，春时绚烂，夏日浓荫，秋季馥郁，冬令苍青。这都有规律可循，就不同植物特性因地制宜地安排的。此园以开畅雄健见长，水石用来衬托建筑物，使山色水光与崇楼杰阁、复道修廊相映成趣，虚实互见。又以厅堂为主，以复道廊与假山贯串分隔，上下脉络自存，形成立体交通、多层欣赏的园林。它的风景面则环水展开，而花墙构成了深深不尽的景色，楼台花木，隐现其间。此园建造时期较晚，装修已多新材料与新纹样，又另辟园门可招待外客等。其格局更是较之过去的为宏畅，使游者由静观的欣赏，渐趋动观的游览，而逶迤衡直，闾爽深密，曲具中国园林的特征，在造园手法上有一定程度的出新。

小盘谷在大树巷。清光绪二十年后，官僚两江两广总督周馥购自徐姓重修而成。至民国初年复经一度修整。园在宅的东部，自大厅旁入月门。额名“小盘谷”，从笔意看来，似出陈鸿寿（字曼生，杭州人，西泠八家印人之一，生于清乾隆三十三年〔公元1768年〕，歿于道光二年〔公元1822年〕）之手。花厅三间面山作曲尺形，游者绕到厅后，忽见一池汪洋，豁然开朗。厅侧有水阁枕流，以游廊相接，它与隔岸山石、隐约花墙，形成一种中国园林中惯用的以建筑物与自然景物相对比的手法。廊前有曲桥达对岸，桥尽入幽洞。洞很广，内置棋桌，利用穴竅采光。复临水辟门，人自此可循阶至池。洞左通步石（用石块置水中代桥）、崖道，导至后部花厅，厅前山尽头有磴道可上山。这里是一个很好的谷口，题为“水流云在”。山洞的处理，既开敞又曲折多变化，应该说是构筑山洞中的好实例。右出洞转入小院，向上折入游廊，可登山

巔。山上有亭名風亭，坐亭中可以顧盼東西兩部的景色。今東部布置已毀，正在修復中。其入口門作桃形額為“叢翠”。池北曲尺形廳，今改建。山拔地崢嶸，名九獅圖山。峰高約九米餘，惜民國初年修繕時，略損原狀。此園假山為揚州諸園中的上選作品。山石水池與建築物皆集中處理，對比明顯，用地緊湊。以建築物與山石、山石與粉牆、山石與水池、前院與後園、幽深與開朗、高峻與低平等對比手法，形成一時難分的幻景。花牆間隔得非常靈活，山巒、石壁、步石、谷口等的疊置，正是危峰聳翠，蒼岩臨流，水石交融，渾然一片了。妙處在於運用“以少勝多”的藝術手法。雖然園內沒有崇樓與復道廊，但是幽曲多姿，淺畫成圖。廊屋皆不髹飾，以木材的本色出之。疊山的技術尤佳，足與蘇州環秀莊抗衡，顯然出於名匠師之手。案清光緒《江都縣續志》卷十二記片石山房云：“園以湖石勝，石為獅九，有玲瓏夭矯之慨。”【從周案十】今從小盤谷假山章法分析，似以片石山房為藍本，並參考其他佳作綜合提高而成。又據《揚州畫舫錄》卷二云：“淮安董道士壘九獅山，亦籍籍人口。”卷六又云：“卷石洞天在城闔淸梵之後……以舊制臨水太湖石山，搜岩剔穴為九獅形，置之水中，上點橋亭，題之曰‘卷石洞天’。”揚州博物館藏李斗書九獅山條幅，臧谷跋語指為卷石洞天九獅山，但未言系董道士所疊。據旧園主周叔弢丈及其侄煦良先生說，小盤谷的假山一向以九獅圖山相沿稱，由來已很久，想系定有所據。因此我認為當時九獅山在揚州必不止一處，而以卷石洞天為最出名。董道士以疊此類假山而著名，其後漸漸形成了一種風氣。董道士是乾隆間人，今証以峰巒、洞曲、崖道、壁岩、步石、谷口等，皆這一時期的手法，而陳鴻壽所書一額，時間又距離不太遠。姑且提出這個假設，即使不是董道士的原作，亦必摹擬其手法而成。旧城南門堂子巷的秦氏意園小盤谷，系黃石堆疊的假山小品，乾隆以後所築，出名匠師常州戈裕良之手，今不存。《履園叢話》卷十二載：“近時有戈裕良者，常州人，其堆法尤勝於諸家。”據此，則戈氏時期略遲於董道士。從秦氏小盤谷遺迹來看，山石平淡蘊藉，以“陰柔”出之，而此小盤谷則高險磅礴，似以“陽剛”制勝。這兩位疊山名手同時作客揚州，那麼這兩件藝術作品，正是他們頡頏之作，用以平分秋色了。

東關街個園的西首，有園名逸圃，為李姓的宅園。從大門入，迎面有八角門，額書“逸圃”二字。左轉為住宅。八角門內有廊修直，在東牆疊山，委婉屈曲，壁岩森嚴，與牆頂之瓦花牆形成虛實對比。山旁筑牡

丹台，花时若锦。山间北头的尽端，倚墙筑五边形半亭，亭下有碧潭，清澈可以照人。花厅三间南向，装修极精。外廊天花，皆施浅雕。厅后小轩三间，带东厢配以西廊，前置花木山石。轩背置小院，设门而常关，初看去与木壁无异。沿磴道可达复道廊，即由楼后转入隔园。园在住宅之后，以复道与山石相连，折向西北，有西向楼三间，面峰而筑。楼有盘梯可下，旁有紫藤一架，老干若虬，满阶散绿，增色不少。此园与苏州曲园相仿佛，都是利用曲尺形隙地加以布置的，但比曲园巧妙，形成上下错综，境界多变。匠师们在设计此园时，利用“绝处逢生”的手法，造成了由小院转入隔园的办法，来一个似尽而未尽的布局。这种情况在过去扬州园林中并不少见，亦扬州园林特色之一。

怡庐是嵇家湾黄宅（银钱商黄益之宅）花厅的一部分，系余继之的作品。余工叠山，善艺花卉，小园点石尤为能手。怡庐花厅计二进。前进的前后皆列小院。院中东南两面筑廊，西面则点雪石一丘，荫以丛桂。厅后翼两厢，小院的花坛上配石笋修竹，枝叶纷披，人临其间有滴翠分绿的感觉。厅西隔花墙，自月门中入，有套房内院，它给外院造成了“庭院深深深几许”的景色，又因外院的借景，而内院中便显得小中见大了。这是中国建筑中用分隔增大空间的手法，是在居住的院落中较好的例子。后厅亦三间，面对山石，其西亦置套房小院。从平面论，此小园无甚出人意料处，但建筑物与院落比例匀当，装修亦以横线条出之，使空间宽绰有余，而点石栽花，亦能恰到好处。至于大小院落的处理，又能发挥其密处见疏、静中生趣的优点。从这里可见绿化及空间组合对小型建筑的重要性了。

余园在广陵路，初名“陇西后圃”。清光绪间归盐商刘姓后，就旧园修筑而成，又名刘庄。因曾设怡大钱庄于此，一般称怡大花园。园位于住宅之后，以院落分隔，前院南向为厅，其西缀以廊屋，墙下筑湖石花坛，有白皮松二株。厅后一院，西端多修竹。墙下叠黄石山，由磴道可登楼。东院有楼北向筑，其下凿池叠山，而湖石壁岩，尤为这园精华的所在。

蔚圃在风箱巷。东南角入门，院中置假山，配以古藤老柏，很觉苍翠葱郁。假山仅墙下少许，然有洞可寻，有峰可赏，自北部厅中望去，景物森然。东西两面配游廊，西南角则建水榭，下映鱼池，多清新之感。这小院布置虽寥寥数事，却甚得休。

蔚圃旁有杨氏小筑，真可谓一角的小园，原属花厅书斋部分。入门

为花厅两间，前列小院，点缀少量山石竹木，以花墙分隔。旁有斜廊，上达小阁。阁前山石间有水一泓：因地位过小，以鱼缸聚水，配合很觉相称。园主善艺兰，此小园平时以盆兰为主花，故不以绚丽花木而夺其芬芳。此处虽不足以园称，然园的格局具备，前后分隔得宜，咫尺的面积，能无局促之感，反觉多左右顾盼生景的妙处。

扬州园林的主人，以富商为多。他们除拥有盘剥得来的物质财富外，还捐得一个空头的官衔，以显耀其身份，因此这些园林在设计的主导思想上与官僚地主的园林有了些不同。最特出的地方，便是一味追求豪华，借以炫富有，榜风雅。在清康熙、乾隆时代，正如上述所说的还期望能得到皇帝的“御赏”，以达到升官发财的目的，若干处还摹拟一些皇家园林的手法。因此在园林的总面貌上，建筑物的尺度、材料的品类，都从高敞华丽方面追求。即以楼厅面阔而论，有多至七间的；其他楼层复道，巨峰名石，以及分峰用石的四季假山（个园、八咏园）和积土累石的“斗鸡台”（壶园有此）。更因多数富商为安徽徽州府属人，间有模拟皖南山水者。建筑用的木材，佳者选用楠木，楼层铺方砖。地面除鹅石的“花街”外，院中有用大理石的。至于装修陈设的华丽等，都是反映了园主除享受所谓“诗情画意”的山水景色意图与暴露其腐朽的生活方式外，还有为招待较多的宾客作为交际场所之意，因此它与苏州园林在同一的设计主导思想下，还多着这一层的原因。这种设计思想在大型的园林如个园、寄啸山庄等最容易见到。并且扬州的诗文与八怪的画派，在风格上亦比吴门派来得豪放沉厚，这些多少给造园带来了一定感染与提高。无疑地要研究扬州园林，必须先弄清这些园主当时的物质力量与精神需要，根据主客观愿望，决定了其设计的要求与主导思想，因而影响了园林的意境与风格。

自然环境与材料的不同，对园林的风格是有一定影响的。扬州地势平坦，土壤干湿得宜，气候及雨量亦适中，兼有南北两地的长处。所以花木易于滋长，而芍药、牡丹尤为茂盛。这对豪华的园林来说，是最有利的条件。叠山所用的石材，又多利用盐船回载，近则取自江浙的镇江、高资、句容、苏州、宜兴、吴兴、武康等地，远则运自皖赣的徽州府属——宣城、灵璧、河口等处，更有少量奇峰异石罗致自西南诸省的，因此石材的品种要比苏州所用为多。

中国园林的建造，总是利用“因地制宜”的原则，尤其在水网与山陵地带。可是扬州属江淮平原，水位不太高，土地亦坦旷，因此在规划园

林时，与苏杭一带利用天然地形与景色就有所不同了。大型园林多数中部为池，厅堂又为一园的主体，两者必相配合。池旁筑山，点缀亭阁，周联复道，以花墙山石、树木为园林的间隔，造成有层次、富变化的景色。这可以个园、寄啸山庄为代表。中小型园林则倚墙叠山石，下辟水池，适当地辅以游廊水榭，结构比较紧凑。片石山房、小盘谷都按这个原则配置。庭院还是根据住宅余地面积的多寡，或院落的大小，安排少许假山立峰，旁凿小鱼池，筑水榭，或布置牡丹台、芍药圃，内容并不求多，便能给人以一种明净宜人的感觉。蔚圃与杨氏小筑即为其例。而逸圃却又利用狭长曲尺形隙地，构成了平面布局变化较多的一个突出的例子。总的说来，扬州园林在平面布局上较为平整，以动观与静观相结合。然其妙处在于立体交通，与多层观赏线，如复道廊、楼、阁以及假山的窠穴、洞曲、山房、石室，皆能上下沟通，自然变化多端了。但就水面与山石、建筑相互发挥作用来说，未能做到十分交融；驳岸多数似较平直，少曲折弯环；石矶、石濑等几乎不见，则是美中不足的地方。但从片石山房、小盘谷及逸圃、个园“秋云”山麓来看，则尚多佳处。又有“旱园水做”的办法，如广陵路清道光间建的员姓二分明月楼（钱泳书额），将园的地面压低，其中四面厅则筑于较高的黄石基上，望之宛如置于岛上，园虽无水，而水自在意中。嘉定县秋霞圃后部似亦有此意图，但未及扬州园林明显。我们聪明的匠师能在这种自然条件较为苛刻的情况下，达到中国艺术上的“意到笔不到”的表现方法是可贵的。扬州园林中的水面置桥，有梁式桥与步石两种，在处理方法上，梁式多数为曲桥，其佳例要推片石山房的利用石梁而作飞梁形的，古朴浑成，富有山林的气氛；步石则以小盘谷所采用的最为妥帖。这些曲桥总因水位过低，有时转折太僵硬，而缺少自然凌波的感觉。这对园林桥来说，在建造时是应设法避免的。片石山房的用飞梁形式，即弥补了这些缺陷，而另辟蹊径了。

扬州园林素以“垒石胜”，在技术上，过去有很高的评价。因此今日所存的假山，多数以石为主，仅已损毁的秦氏小盘谷似由土石间用的。因为扬州不产石，石料运自他地，来料较小，峰峦多用小石包镶，根据石形、石色、石纹、石理、石性等凑合成整体，中以条石（亦有用砖为骨架，早例推泰州乔园明构假山）铁器支挑，加固嵌填后浑然成章；即使水池驳岸亦运用这办法。这样做人工花费很大，且日久石脱堕地，破坏原形，即有极佳的作品，亦难长久保存。虽然如此，扬州叠山确有其

独特的成就，特出的作品以雄伟论，当推个园。个园的黄石山高约九米，湖石山高约六米，因规模宏大，难免有不够周到的地方，但仍不失为上乘之作。以苍石奇峭论，要算片石山房了；而小盘谷的曲折委婉，逸圃的婀娜多姿，都是佳构。棣园的洞曲、中垂钟乳，为扬州园林罕见。其他如寄啸山庄的石壁磴道，亦是较好的例子。在扬州园林的假山中，最为突出的是壁岩，其手法的自然逼真，用材的节省，空间的利用，似在苏州之上，实得力于包镶之法。片石山房、小盘谷、寄啸山庄、逸圃、余园等皆有妙作。颇疑此法明末自扬州开始，乾隆间董道士、戈裕良等人继承了计成、石涛诸人的遗规，并在此基础上得到更大的发展。总之，这些假山，在不同程度上，达到异形之山运不同之石，体现了石涛所谓“峰与皴合，皴自峰生”的画理。以高峻雄厚，与苏州的明秀平远互相颉颃，南北各抒所长。至于分峰用石及多石并用，亦兼补一种石材难以罗致之弊，而以权宜之计另出新腔了。堆叠之法一般皆与苏南相同。其佳者总循“水随山转，山因水活”一原则灵活应用。胶合材料，明代用石灰加细砂和糯米汁，凝结后有时略带红色，常用之于黄石山；清代的颜色发白，也有其中加草灰的，适宜用于湖石山。片石山房用的便是后者。好的嵌缝是运用阴嵌的办法，即见缝不见灰，用于黄石山能显出其壁石凹凸多态，仿佛自然裂纹；湖石山采用此法，顿觉浑然一体了。不过像这样的水平，其作品在全国范围内也较罕见。

在墙壁的处理上，现存的园林因为多数集中于城区，且是住宅的一部分，所以四周是磨砖砌的高墙，配合了砖刻门楼，外观很是修整平直。不过园林外墙上都加瓦花窗，墙面做工格外精细。它与苏南园林给人以简陋的园外感觉不同（苏南园林皆地主官僚所有），是炫富斗财的方法之一。内墙与外墙相同，凡在需增加反射效果或需花影月色的地方，酌情粉白。园既围以高墙，当然无法眺望园外景色，除个园登黄石山可“借景”城北景物外，余则利用园内的对景，来增加园景的变化。寄啸山庄的什锦空窗所构成的景色，真是宛如图画，其住宅与园林部分均利用空窗达到互相“借景”的效果。个园桂花厅前的月门亦收到引人入胜的作用。再从窗棂中所构成的景色，又有移步换景的感觉。在对比手法方面，基本与苏南园林相同，多数以建筑物与墙面山石作对比，运用了开朗、收敛、虚实、高下、远近、深浅、大小、疏密等手法，以小盘谷在这方面运用得最好。寄啸山庄设计能从大处着眼，予人以完整醒目的感觉。

扬州园林在建筑方面最显著的特色，便是利用楼层。大型园林固然如此，小型如二分明月楼，也还用了七间的长楼。花厅的体形往往较大，复道的延伸又连续不断，因此虽安排了一些小轩水榭，适与此高大的建筑起了对比作用。它与苏州园林的“婉约轻盈”相较，颇有铜琶铁板唱“大江东去”的气概。寄啸山庄循复道廊可绕园一周，个园盛兴时，情况亦差不多。至于借山登阁，穿洞入穴，上下纵横，游者往往至此迷途，此与苏州园林在平面上的“柳暗花明”境界，有异曲同工之妙，不能单以平面略为平整而判其高下。

扬州园林建筑物的外观，介于南北之间，而结构与细部的做法，亦兼抒二者之长。就单体建筑而论，台基早期用青石，后期用白石，踏跺用天然山石随意点缀，很觉自然。柱础有北方的“古镜”形式，同时也有南方的“石鼓”形式；柱则较为粗挺，其比例又介于南北二者之间。窗则多数用和合窗，栏杆亦较肥健。屋角起翘，虽大都用“嫩戗发戗”（由屋角的角梁前端竖立的一根小角梁来起翘），但比苏南来得低平。屋脊则用通花脊，比苏南的厚重。漏窗、地穴（门洞）工细挺拔，图案形式变化多端，轮廓完整，与苏南柔和细腻的不同。门额多用大理石或高资石，而少用砖刻，此又是与苏州显然不同的。建筑的细部手法简洁工整，在线脚与转角的地方，略具曲折，虽然总的看来比较直率，但刚中有柔，颇耐寻味。色彩方面，木料皆用本色，外墙不粉白，此固然由于当地气候比较干燥的缘故，但也多少存有以原材精工取胜的意图。其内部梁架皆圆料直材，制作得十分工致完整，间亦有用扁作的。翻轩（建筑物前部的卷棚）尤力求豪华，因为它处于显著的地位，所以格外突出一些。内部以方砖铺地，其间隔有罩与榻扇，材料有紫檀、红木、楠木、银杏、黄杨等，亦有雕漆嵌螺钿与嵌宝的，或施纱隔的。室内家具陈设及屏联的制作，亦同样讲究。海梅（红木）所制的家具，与苏、广两地不同，手法和其他艺术一样，富有扬州“雅健”的风格（参看住宅部分）。

建筑物在园林中的布置，在今日扬州所有的类型并不多，仅厅堂、楼、阁、亭、榭、舫、复道廊、游廊等，其组合似较苏南园林来得规则。楼常位于园的尽端最突出处，厅往往为一园之主体，有些厅加楼后，形成楼厅就必建在尽端了。其他的舫榭临水，轩阁依山，亭有映水与踞山的不同处理。如因地形的限制，则建筑物可做一半，如半楼、半阁、半亭等。虽仅数例，亦发挥了随宜安排的原则，以及同中求异，异

中见其规律的灵活善变的应用。廊亦同样不出这些原则方法，不过以环形路线为主，间有用作分隔的；形式有游廊、叠落廊、复廊、复道廊等。厅堂据《扬州画舫录》所载，名目颇多，处理别出心裁。今日常见的有四面厅、硬山厅、楼厅等。梁架多“回顶鳖壳”式（卷棚式的建筑，在屋顶部仍做成脊）。在材料方面，楠木与柏木厅最为名贵，前者为数尚多，后者今日已少见。园林铺地，大部分用鹅卵石花街，间有用冰裂纹石的。在建筑处理上值得注意的，便是内部的曲折多变，其间利用套房、楼、廊、小院、假山、石室等的组合，造成“迷境”的感觉。现存的逸圃尚能见到，此亦扬州园林重要特征之一。

花木的栽植是园林中重要的组织部分。各地花木有其地方特色，因此反映在园林中亦有不同的风格。扬州花木因风土地理的关系，同一品种，其姿态容颜，也与南北两地有异。一般说来，枝干花朵比较硕秀。在树木的配置上，以松、柏、栝、榆、枫、槐、银杏、女贞、梧桐、黄杨等为习见。苏南后期园林中，杨柳几乎绝迹，然在扬州园林中却常能见到，且更具有强烈的地方色彩。因为此地的杨柳，在外形上高劲，枝条疏修，颇多画意，下部的体形也不大，植于园中没有不调和的感觉。梧桐在扬州生长甚速，碧干笼阴，不论在园林或庭院中，都给人以清雅凉爽之感，与柳色分占夏春二季的风光。花树有桂、海棠、玉兰、山茶、石榴、紫藤、梅、腊梅、碧桃、木香、蔷薇、月季、杜鹃等。在厅轩堂前，多用桂、海棠、玉兰、紫薇诸品。其他如亭畔、榭旁的枫榆等，则因地位的需要而栽植。乔木与花树同建筑的关系，在扬州园林中，前者作遮阴之用，后者用作供观赏之需，姿态与色香还是占着选择的最重要标准。在假山间，为了衬托山容苍古，酌植松柏，水边配置少许垂杨。至于芭蕉、竹、天竹等，不论用来点缀小院，补白大园，或在曲廊转处、墙阴檐角，或与腊梅丛菊等组合，都能入画。书带草不论在山石边，树木根旁，以及阶前路旁，均给人以四季常青的好感。冬季初雪匀披，粉白若球。它与石隙中的秋海棠，都是园林绿化中不可缺少的小点缀。至于以书带草增假山生趣，或掩饰假山堆叠的疵病处，真有山水画中点苔的妙处。芍药、牡丹更是家栽户植。《芍药谱》（《能改斋漫录》十五，“芍药”条引孔武仲《芍药谱》）载：“扬州芍药，名于天下，非特以多为夸也。其敷腴盛大而纤丽巧密，皆他州所不及。”李白诗（《送孟浩然之广陵》）：“烟花三月下扬州”，可以想见其盛况。因此花坛、药阑便在园林中占有显著的地位。其形式有以假山石叠的自然

式，有用砖与白石砌的图案式，形状很多，皆匠心独运。春时繁花似锦，风光宛如洛城。树木的配合，仍运用了孤植与群植的两种基本方法。群植中 useful 同一品种的，亦有用混合的树群布置，主要的还是从园林的大小与造景的意图出发。如小园宜孤植，但树的姿态须加选择；大园多群植，亦须注意假山的形态，地形的高低大小，做到有分有合，有密有疏。若假山不高，主要山顶便不可植树；为了衬托出山势的苍郁与高峻，非植于山阴略低之处不可，使峰出树梢之间，自然饶有山林之意了。此理不独植树如此，建亭亦然，而亭与树、山的关系，必高下远近得宜才是。山麓水边有用横线条的卧松临水，亦不失为求得画面统一的好办法。山间垂藤萝，水面点荷花，亦皆以少出之，使意到景生即可。至于园内因日照关系有阴阳面的不同，在考虑种树时应注意其适应性，如山茶、桂、松、柏等皆宜植阴处，补竹则处处均能增加生意。

扬州盆景刚劲坚挺，能耐风霜，与苏杭不同。园艺家的剪扎功夫甚深，称之为“疙瘩”“云片”及“弯”等，都是说明剪扎所成的各种姿态特征的。这些都非短期内可以培养成。松、柏、黄杨、菊花、山茶、杜鹃、梅、玳玳、茉莉、金橘、兰、蕙等都是盆景的好主题。又有山水盆景，分旱盆、水盆两种，咫尺山林，亦多别出心裁。棕碗菖蒲，根不着土，以水滋养，终年青葱，为他处所不常见。他如艺菊，扬州花匠师对此有独到之技。以这些来点缀园林，当然锦上添花了。园林山石间因乔木森严，不宜栽花，就要运用盆景来点缀。这种办法从宋代起即运用了，不但地面如此，即池中的荷花，亦莫不用盆荷入池。因此谈中国园林的绿化，不能不考虑盆景。

按扬州画派的作品，以花卉为多。摹写对象当然为习见的园林花木，经画家们的挥洒点染，都成了佳作，则扬州园林中的花木其影响可见。反之，画家对园林花木批红判白，以及剪裁、配置、构图等，对花木匠师亦起了一定的启发与促进。扬州产金鱼；天然禽鸟兼有南北品种，且善培养笼鸟，这些对园林都有所增色。

总之，造园有法而无式，变化万千，新意层出，园因景胜，景因园异，其妙处在于“因地制宜”与相互“借景”，所谓“妙在因借”，做到得体（“精在体宜”），始能别具一格。扬州园林综合了南北的特色，自成一格，雄伟中寓明秀，得雅健之致，借用文学上的一句话来说，真所谓“健笔写柔情”了。而堂庑廊亭的高敞挺拔，假山的沉厚苍古，花墙的玲珑透漏，更是别处所不及。至于树木的硕秀，花草的华滋，则又受自然条件

的影响与经匠师们的加工而形成。假山的堆叠，广泛地应用了多种石类。以小石拼镶的技术，以及分峰用石、旱园水做等因材致用、因地制宜的手法，对今日造园都有一定的借鉴作用。唯若干水池似少变化，未能发挥水在园林中的弥漫之意，似少构成与山石建筑物等相互成趣的高度境界。一般庭院中，亦能栽花种竹，荫以乔木，配合花树，或架紫藤，罗置盆景片石，安排一些小景。这些都丰富了当时城市居民的文化生活，同时集腋成裘，又扩大了城市绿化的面积，是当地至今还相沿的一种传统。

·住宅

卢宅在康山街。清光绪间盐商江西卢绍绪所建，造价为纹银七万两，是今存扬州最大的住宅建筑。大门用水磨砖刻门楼，配以大照壁。入门北向为倒座（与南向正屋相对的房屋），经二门有厅二进，皆面阔七间，以当中三间为主厅，其旁两间为会客读书之处，内部用罩（用木制镂空花纹做成的分隔）及槁扇（落地长窗）间隔。院中以大漏窗与两旁的小院区分。小院中置湖石花台，配以树木，形成幽静的空间，与中部畅达的大厅不同。再入为楼厅二进，面阔亦七间，系主人居住之处。厅后二进面阔易为五间，系亲友临时留居的地方。东为厨房，今毁。宅后有园名“意园”。池在园东北，濒池建书斋及藏书楼二进，自成一区。池东原有旱船，今亦废。园南依墙建盔顶亭，有游廊导向北部。余地栽植乔木，以桂为主。这宅用材精选湖广杉木，皆不髹饰。装修皆用楠木，雕刻工细。虽建筑年代较迟，然屋宇高敞，规模宏大，是后期盐商所建豪华住宅的代表。

汪氏小苑（盐商汪伯屏宅）在地官第，民国间扩建，为今存扬州大住宅中最完整的一处。它分三路，各三进。东西花厅布置各别，东花厅入口用竹丝门，甚古朴。厅用柏木建造，内部置罩及槁扇。槁扇上嵌大理石，皆雕刻精工，作前后分隔之用。其南有倒座三间。院中置湖石山，有檐瀑，栽腊梅琼花。东有门，入内仅一小小余地，所谓明有实无，以达扩大空间的目的。西花厅以月门与小院相隔。院内中有假山一丘，面东置船轩，缀以游廊，下凿小池，轩下砌砖台，可置盆景，映水成趣。自厅中穿月门以望院中，花木扶疏，山石参差，宛如画图。宅北后园列东西两部，间以花墙月门。西部北建花厅六间，用罩分隔为二。

厅西有书斋三间，缀五色玻璃，其前有廊横陈，两者之间植紫薇两株，亭亭如盖，依稀掩映，内外相望有不尽之意。厅南叠假山为牡丹台，西部亦筑花台，似甚平淡。两部运用花墙间隔，人们的视线穿过漏窗月门望隔园景色，深幽清灵，发挥了很大的“借景”作用。这处当以住宅建筑占主要部分，而园则相辅而已，因面积不大，所以题为“小苑春深”。

赞化宫赵宅（布商赵海山宅），厅堂三进南向，门屋及厨房等附属建筑，皆建于墙外，花园亦与住宅以高墙隔离；但亦可由门屋直接入园，避免与住宅相互干扰。在建筑平面的分隔上来说，很是明晰。花园前部东向有书斋三间，以曲廊与后部分隔，后有宽敞的花厅两进，与住宅的规模很相称。

魏宅（盐商魏次庚宅）在永胜街，属中型住宅，大门西向，总体为不规则的平面。因此将东首划出长方形的地带作为住宅，西首不规则的余地辟为园林，主次很是鲜明。住宅连倒座计四进，皆面阔五间。它的布置特点：厅为三间带两厢，旁皆配套房小院，在当时作为居住之用。这类套房，处理得很是恰当，它与起居部分，实联而似分，互不干扰。尤其小院，不论在采光通风与扩大室内外空间上，皆得到较好效果。园前狭后宽，前部邻大门处有杂屋，后部划分作前后两区，前区筑四面厅名“吹台”，郑板桥书额为“歌吹古扬州”，配以山石、玉兰、青桐，面对东南角建有小阁。后区为前区的陪衬，又东西划为两部分，东部置旱船，旁辅小阁，花墙下叠黄石山，栽天竹、黄杨，穿花墙外望，景色隐约。这园虽小，而置两大建筑物，尚能宽绰有余，是利用花墙划分得宜、互相得以因借之法，使空间层次增加，也是宅旁余地设计的一种方法。

仁丰里刘宅，宅不大，门东向。入内沿门屋筑西向屋一排，前有高墙，天井作狭长形，可避夏季炎阳与冬季烈风；而夏季因墙高地狭，门牖爽通，反觉受风较多。墙内南向厅三进，而未进除置套房外，更增密室（套房内的套房）。厅旁有花墙，过月门，内有花厅，置山石花木。整个建筑设计是灵活运用东向基地的一个例子。

大武城巷贾宅，清光绪间盐商贾颂平所有。大门东向，厅计二路，皆南向而建。而东部诸厅设计尤妙，每一厅皆有庭院，有栽花植竹为花坛，有凿池叠石为小景，再环以游廊，映以疏棂，多清新之意。宅西偏原有园林，今废。

仁丰里辛园，为周挹扶宅，大门东向。入内筑西向房屋一排，为扬

州东向基地的惯用手法。南向的厅与东西两廊及倒座构成四合院。厅西花厅入口处建一半亭，对面为书斋，厅南以花墙间隔。其外尺余空地留作虚景，老桂树超出花墙之上，秋时满院飘香，人临其境，便体会到一种天香院落的境界（桂树必周以墙，香不散）。厅后西通月门，有额名“辛园”。园内中凿鱼池，有曲桥，旁建小亭。花厅装修以银杏木本色制成，未髹漆更是雅洁。厅前以白石拼合铺地，很是平整。此宅居住部分小，绿化范围大，平面上的变化比较多，是由于过去宅主在扩建中逐步形成的现象。

石牌楼黄氏汉庐，清道光间为金石书画家吴熙载的故居。大门北向，入门有院，其西首的“火巷”可达南向的四合院。院以正屋与侧座相对而建，院子作横长形，石板墁地。此为北向住宅的一例。

甘泉路匏庐，民国初年资本家卢殿虎建。门西向，入内南向筑大厅，其南端为花厅。厅北以黄石叠花坛。厅南以湖石叠山，殊葱郁，山右构水轩，蕉影拂窗，明静映波。极西门外，北端又有黄石一丘。越门可绕至厅后。宅的东部，有一片曲尺形地，以游廊花墙通贯。小池东南隅筑方亭，隔池尽端筑小轩三间，皆随廊可达，面积虽小，尚觉委婉紧凑。此宅是利用西门南向及不规则余地设计的一例。

丁家湾某宅，是扬州用总门的住宅。总门内东西各有两宅，东宅有三合院，天井中以花墙分隔，形成前后两部分，而房屋面阔皆作两间，处理很灵活。西宅正屋二进皆三合院，面阔作三间，二进的三合院排列又非一致。此类住宅有因地制宜，分隔自由的好处。

牛背井二号某宅，为最小住宅的一例。南向，入门仅厅三间，由厢房倒座构成一个四合院。外附厨房。这种平面布局是扬州住宅的基本单元了。

扬州城由平行的新旧两城组合成今日的城区。运河绕城，小秦淮自北门流入，为新旧两城的分界。旧城南北又以汶河贯串，所以河道都是南北平行的，由于河道平直，道路及建筑物可以得到较规则的布局。其间主要干道为通东西南北的十字大街，与大街垂直的便是坊巷。这一点在旧城更为突出。巷名称头巷、二巷……九巷，和北京的头条胡同、二条胡同相似。新城因后期富商官僚的大住宅与若干商业建筑的发展，布局比旧城零乱，颇受江南城市风格的影响。新城的湾子街就不是垂直线，好像北京的斜街，是一条交通捷径。在这许多街道中，掺杂了不少小巷，有的还是“死胡同”，因此看来似乎复杂，其实仍旧井然有序，脉

络自存。过去大的巷口还建有拱门，当地称为“圈门”。它是南北街坊布置的介体，兼有南北城市街坊布置特征。

住宅是按街巷的朝向布置，在处理上大体符合“因地制宜”的要求，较为灵活，而内部尤曲折多变。住宅主要位于通东西坊巷中，因此都能取得正南的朝向，或北门南向。通南北的坊巷中，亦有些住宅，因为要利用正南或偏南的朝向，于是产生了东门南向，或西门南向的住宅。又运用总门的办法，将若干中小型不同平面的住宅，利用一个总门，非常灵活地组合成一个整体。这样在坊巷中，它的外貌仍旧十分整齐，而内部却有许多变化，这是大中藏小、化零为整的巧办法。在封建社会，不但能满足了聚族而居的生活方式和封建家族的治安防卫，并且在市容整齐等方面，也相应地带来了一定的好处。

扬州城区，今日尚存的多为大中型住宅，这些住宅的特点是，都配合着大小不等的园林和庭院，使居住区中包括了充裕的绿化地带，形成了安适的居住环境。

住宅平面一般是采用院落式，以面阔三间的厅堂为主体，更有面阔到五间的，即《工段营造录》所谓：“如五间则两梢间设榻子或飞罩，今谓明三暗五。”也有四间、两间的，皆按地基面积而定。虽然也有面阔七间的，其实仍以三间为主，左右各加两间客厅，如康山街卢宅的厅堂。大中型住宅旁设弄，名“火巷”，是女眷、仆从出入之处。如大型住宅有两路以上的“火巷”，又为宅内主要交通道。扬州的“火巷”，比苏州“避弄”（俗称备弄，今据明代文震亨著《长物志》卷一）开朗修直，给居住者以明洁坦直的感觉，尤其以紫气东来巷龚姓沧州别墅的“火巷”最为广阔，当时可乘轿出入。厅堂除一进不连庑的“老人头”外，尚有两面连庑的“曲尺房”（由两面建筑物相连，平面形成曲尺形），三面连庑的“三间两厢”（厅堂左右加厢的三合院），以及“四合头”（四合院）、“对合头”（两厅相对又称对照厅）等。但是“三间两厢”及“四合头”作走马楼的称“串楼”。厅堂的排列程序，前为大厅，后为内厅（女厅），即所谓“上房”（主人所住的地方），多作三间，《工段营造录》称“两房一堂”（两间房一间起居室）。旁边大都置套房，还有再加密室的，如仁丰里刘宅还能见到。厅旁建圭形门、长八方形门，或月门通花厅或书房。墙外附厨房杂屋及“下房”（仆从居住），使与主人的生活部分隔离，充分反映了封建社会的阶级差别。套房与密室数目的多少，要看建屋需要的曲折程度而定，越曲折则套房、密室越多。《工段营造录》：“……三间居

多，五间则藏东西梢间于房中，谓之套房，即古密室、复室、连房、闺房之属。”在这类套房前面，皆设小院，置花坛，夏日清风徐来，凉爽宜人，入冬则朔风不到，温暖适居。在封闭性的扬州住宅中，采用这种办法还是切合当时实际的。书房小者一间、两间，大者兼作花厅，一般都是三间。其前必叠石凿池，点缀花木修竹；或置花坛、药阑等，形成一种极清静的环境。在东门南向或西门南向的住宅，门屋旁的房屋，则属账房、书塾及杂屋等次要房屋。这些屋前的天井狭长，仅避日照兼起通风的作用。大门北向的住宅，则以“火巷”为通道，导至前部进入南向的主屋。

扬州住宅的外观，在中型以上的住宅，都按居住者的地位设照壁。大者用八字照壁，次者一字照壁，最次者在对户他宅的墙上，用壁面隐出方形照壁的形状。华丽的照壁，贴水磨面砖，雕刻花纹，正中嵌“福”字，像个园的大门上者，制作精美。外墙以清水砖砌成，讲究的用磨砖对缝做法。门楼用砖砌，加砖刻。最华丽的作八字形，复加斗拱藻井，如东圈门壶园大门即是。一般亦有用平整的磨砖贴面，简洁明快。按扬州以八刻著世（砖刻、牙刻、木刻、石刻、竹刻、漆刻、玉刻、磁刻），砖刻即为其中之一。大门髹黑漆，刊红门对，下有门枕石。石刻丰富多彩，大小按居住者的地位而定。屋顶皆作两坡顶，屋脊较高，用镂空脊（屋脊以瓦叠成空花形），这些与高低叠落的山墙相衬托。有时在外墙顶开一排瓦花窗，可隐约透出院中树梢与藤萝，这些自然形成一种整齐而又清新的外貌，给巷景增加了生趣。

入大门，迎面为砖刻土地堂，倚壁而建，外形与真实建筑相似。它的雕刻和大门门楼的形式相协调，是内照壁中最令人瞩目的。虽同时想起一定的装饰作用，但总是封建迷信的产物，理应扬弃。门屋院内以砖或石墁地。二门与大门的形制相类似。厅堂高敞轩豁，一般用质量很高的本色杉木，而大住宅的厅堂又有用楠木、柏木，《工段营造录》载有用杪椽的。木材加工有外施水磨的，更是柔和圆润了。这种存素去华的大木构架，与清水砖墙的格调一致。厅堂外檐施翻轩，明间用榻扇，次间和厢房用和合窗。后期的建筑，则有改用槛窗的。在内厅与花厅，明间的榻扇只居中用两扇，两旁仍旧用和合窗。楼厅的槛窗，其槛墙改用栏杆，则内装活动的木榻板，在炎热季节可以卸除，以便通风。在分隔上，内院往往以花墙来区分，用地穴（门洞）贯通。地穴有门可开启。

院落的大小与建筑物高度的比例一般为1:1，在扬州地区能有充分的

日照。夏日上加凉棚，前后门牖洞开，清风自引。从地穴中来的兜风，更是凉爽。到冬季，将地穴门关闭，阳光满阶，不觉有严寒的袭人了。这些花墙与重重的门户，却增加了庭院空间感与深度，有小宅不见其狭，大宅不觉其旷的好处。在解决功能的前提下，同时又扩大了艺术效果。大厅的院子用横长形，有的配上两厢或两廊，使主体突出。内厅都带两厢，院子形成方形，房屋进深一般比苏南浅，北面甚至有不设窗牖的。因夏季较凉爽，冬季在室内需要较多日照的缘故。

室内的空间处理，主要希望达到有分有合，曲折有度，使用灵活，人处其间觉含蓄不尽的设计意图。因此在花厅中，必用罩或榻扇，划成似分非分、可大可小的空间，既有主次，又有变化。如仁丰里辛园、地官第小苑皆可见到。厅室前面的翻轩，在进深较大的建筑中有用两卷（两个翻轩）的，如康山街卢宅。内室与套房有主副之别，似合又分。内室往往连厢房，而以罩或榻扇分间。罩以圆光罩（罩作圆形的）为多，有的还施纱榻（罩的花纹中夹纱），雕刻多数精美。书房中亦可自由划分，应用上均较灵活。厅堂皆露明造（不用天花），亦不施草架（用两层屋顶）。居住房屋有酌用天花的。花厅内部亦有作轩顶（卷棚）。房屋内都墁方砖，砖下四角置复钵的“空铺法”（见《长物志》卷一），垫黄沙，磨砖对缝，既平且无潮湿之患。卧室内冬天上置木地屏（方形木制装脚的活动地板）以保暖，同时亦减低了室内空间的净高。有些质量高的楼厅，二层亦墁砖，更有再加上地屏的，能使履步无声，与明代《长物志》卷一上所说办法“与平屋无异”相符合。这些当然只会高级的住宅中出现，一般近期的住宅，则皆用地板了。

内外墙都用砖实砌，在质量高的住宅中用清水砖，经济的住宅则用灰泥拼砌大小不等的杂砖，外表也很整齐。在外墙的转角，当一人高的地位，为了便利交通用抹角砌。廊壁部分刷白，内壁用木护壁，其余仍保存砖的本色。天井铺地通常用砖石铺。砖铺有方砖、条砖平铺，及条砖仄铺的。石铺则用石板与冰裂纹铺，更有用大方块大理石、高资石拼铺的。柱础用“古镜”式。在明代及清代早期的建筑中，还沿用了礪形石础。大住宅皆用“石鼓”，或再置垫“复盆”础石，取材用高资石，兼有用大理石的。

柱都为直径。明代住宅的柱顶，尚存“卷杀”（曲线）的手法，比例肥硕。柱径与柱高的比例约为1:9，如大东门毛宅大厅的。现在一般见到的比例在1:10—1:16之间。柱的排列，与《工段营造录》所说“厅堂无中

柱，住屋有中柱”一致。大厅明间有用通长额枋，而减去平柱两根的，此为便利观剧，不阻碍视线。梁架做法可分为三种：一是苏南的扁作做法；二是圆料直材，在扬州最为普遍；三是介于直梁与月梁（略作弯形的梁）间的介体，将直梁的两端略作“卷杀”，下刻弧线，此种做法看来似受徽式建筑的影响。这三种做法中，以第二种足以代表扬州的风格。尚有北河下吴宅，建筑系出宁波匠师之手，应当是孤例了。圆料的梁架，用材挺健，而接头处的卯榫，砍杀尤精，很是准确。一般厅堂，主要梁架在前后柱间施五架梁，上置蜀柱，再安三架梁与脊瓜柱。不过檩下不施枋及垫板，与《工段营造录》所示不符，当为苏北地方做法。从结构上来说，似有不够周到的地方。花厅有用六架卷棚的，其山墙作圆形叠落式。豪华的厅堂有改为方柱方梁的，系《工段营造录》所谓方厅之制。翻轩一般为海棠轩（椽子弯作海棠形），或菱角轩（椽子弯作菱角状），但多变例。此外鹤颈轩（椽子弯如鹤颈）也有见到，总的以船篷轩为多，草架只偶有用在翻轩之上。

栏杆的比例一般较高，花纹常用拐子纹，四周起凸形线脚。檐下挂落也很简洁，都与整个建筑物立面保持协调。屋顶在望砖上酤瓦。其瓦饰有勾头滴水等，勾头的下部较长，滴水的上部加高，形式渐趋厚重。

扬州城区住宅的给水问题，除小秦淮与汶河一带有河水可应用外，住宅内皆有水井，少者一口，多者几口。其地位有在院子中，厨房前，园中，或“火巷”内，更有掘在屋内的暗井（无井栏）。坊巷中的公共用井随处可见。凡在井的边墙，必砌发券（杭绍一带用竖立石板），以免墙身下陷，也是他处所罕见的。井水除洗涤及供作饮料外，必要时还可作消防用水。此外，住宅内还置有积储檐漏供食用的天落水缸，与供消防用的储水缸并备。每宅院子中有窨井，在大门外有总的下水道。至于池中置鱼缸，则供金鱼栖息度冬用。

扬州住宅建筑在外观上是修整挺健的，对城市面貌起到一定的影响。这许多井然有序的居住区，在我国旧城市中还是较少有的。它的优点是明洁宁静，大中寓小，分合自如。在空间处理上注意到院落分隔与宽狭的组合，以及日照与通风的合理解决办法。建筑物不论大小，都配置恰当，比例匀整，用地面积亦称经济，达到居之者适，观之者畅的目的。在平面处理上能“因地制宜”巧于安排，不论何种朝向的地形，皆能得到南向；不论何种大小的地形，皆能有较好的空间组合并解决了功能上的需要。而建筑手法，介于南北二地之间，以工整见长。这些都是扬

州住宅的特征。

扬州的园林与住宅，在我国建筑史上有其重要的价值，尤其是古代劳动人民在园林建筑方面的成就，可供社会主义园林建筑借鉴【从周案十一】。

1978年第3期，1977年11月修订

SMALL-ROCK MOUNTAIN ABODE, YANGZHOU—SHITAO'S CRAFT OF ARTIFICIAL MOUNTAINS

1962

Monk Shitao (1642-c. 1707) was a preeminent painter of the early Qing, but his other artistic attainments also culminated in sublimity and played an innovative role in his time in verse, prose, calligraphy, and theories on painting. However, according to the *Record of the Painted Pleasure Boats of Yangzhou*, the *Gazetteer of Yangzhou Prefecture under Jiaqing Reign* and *A Collection of Anecdotes in the Lü Garden*, he was also a consummate rockwork crafter, having built a number of artificial mountains after he settled down in Yangzhou for the rest of his life.

Two of the artificial mountains built by Shitao in Yangzhou are recorded in history books. One of them is in the Garden of Ten Thousand Rocks. According to the *Record of Painted Pleasure Boats of Yangzhou* (Volume Two),

Shi Daoji, whose style name was Shitao....was also dexterous at piling up rocks as a sideline occupation. Yangzhou puts its name on the map with its famed gardens, and famed gardens make a name for themselves with piled-up rocks. The Yu's Garden of Ten Thousand Rocks crafted by Daoji remains a scenic attraction to this day.

The *Gazetteer of Yangzhou Prefecture under Jiaqing Reign* (Volume Thirty) has this to say:

The Garden of Ten Thousand Rocks, the former residence of a man surnamed Wang, was laid out according to one of Monk Shitao's paintings. The Lake Tai rocks collected in the garden were counted by tens of thousands, hence the garden's name. Its major attractions include the Loft in Aromatic Tree Shade, the Balustrade over Ripple Water, the Towering Pine Pavilion, and the Painted Boat Docked in a Plum Sea. The garden fell into decay after its rockeries were dismantled to build the Thatched Cottage in the Kangshan Mountain during the

Qianlong reign.

The other artificial mountain crafted by Shitao is the Small-Rock Mountain Abode. As *A Collection of Anecdotes in the Lü Garden* (Volume Twenty) puts it,

The Small-Rock Mountain Abode is found at Garden Lane in New City, Yangzhou. Behind its two halls there is a square pond. An artificial mountain built of Lake Tai rocks sits on the pond, and looks exceptionally steep at a height of fifty or sixty feet. Legend has it that it was personally wrought by Monk Shitao.

We are no strangers to the Garden of Ten Thousand Rocks thanks to the many extant records about it, but no trace of it can be found in reality because it was ruined during the Qianlong reign of the Qing. The Thatched Cottage in the Kangshan Mountain, built with the rocks torn from the garden, is no more, too. The Small-Rock Mountain Abode, which I have discovered during my current visit to Yangzhou, therefore, is the only artificial mountain Shitao has bequeathed on the human world.

During my visit, which is part of a survey I have conducted over the last few years of ancient buildings, gardens and dwellings in Yangzhou, I espied an artificial mountain clinging against a wall in the Ho Family Garden (that is, the Whistling Scholar's Mountain Abode) at the eastern end of Garden Lane in the city's southeast corner. It was small in floor space, and the pond at its foot has long been levelled. Judging from its exquisite craftsmanship and its naturalistic, yet classical design, it is a rare objet d'art, and, dating back to the early Qing, the earliest of all artificial mountains known to exist in Yangzhou. Based on my analysis of its rock-piling technique, and by referring to descriptions of it in Qian Yong's *A Collection of Anecdotes in the Lü Garden*, I can ascertain that it is by far the only extant artificial mountain that Shitao has bestowed on humanity.

Seen from its plan, the Small-Rock Mountain Abode, facing south in front of the posterior wall of the Ho Family Garden, is a rectangular wall-hugging rockwork. The main peak rises from its western end to impose its steep and verdant presence upon the pond at its foot. A

bridge propped up in the air is connected with a stone stairway which winds its way along the stone wall to the top of the peak. Below the peak stands the so-called "Small-Rock Mountain Abode," a two-bay square stone chamber (actually built of bricks). A mystic and seemingly unfathomable cave is ensconced beneath a range of small rocks that twist and turn eastward as a whole. As the western part of the cave has collapsed together with the building atop it, there is no way of knowing what the artificial mountain looked like in its entirety. Its layout by and large follows the tradition of Ming-dynasty artificial mountains, but through Shitao's ingenious craft, both its main peak and cave are brought into focus and properly set off by subsidiary structures. Manoeuvring in an untrammelled way despite the lack of space, the peerless monk painter kept density and space on an even keel in his masterpiece, and its lofty and steep image is apt to the name "Small-Rock Mountain Abode."

Yangzhou is located in a plain between the Yangtze and the Huaihe River. With no quarriable mountains available in the vicinity, Yangzhou outdid Suzhou by procuring more varieties of materials for rockwork construction—including Lake Tai stones, yellow stones, snow stones and Lingbi stones—from Suzhou, Zhenjiang, Xuancheng and Lingbi counties in Anhui. As waterways are the only means of bulk transportation for Yangzhou, the stones shipped in are mostly of small sizes, a fact which is challenging to artificial mountain crafters and calls for higher stone-piling expertise. I surmise that Shitao must have made do with such small stones when he was building his mountain for the Garden of Ten Thousand Rocks. It is also apparent that he had taken great pains in selecting his rocks for the Small-Rock Mountain Abode, and put them together according to their sizes, textures and veins and following the principle that "construction of mountain peaks should accord with a painter's texturing brush strokes derived from natural peaks" (quoted from the *Monk Balsam Pear on Painting*) to bring about mountain tops reigning over ravines and cliffs whose shapes change all the time and appear to be at once linked and

delinked. (For Shitao's theory on painting, see the colophon of *A Small Landscape Painting by Monk Balsam Pear*.) In this way no traces of axing and chiselling can be found on his tall peaks and deep caves, while the unity of his texturing work, the contrast between tangibles and intangibles, and the compact makeup of his designs are unimaginable for those who know little about the principles of painting or those who are not good enough to put such principles into practice. Shitao's techniques were frequently imitated, but because of lack of dexterity and understanding, his imitators could only pile up stone slabs horizontally and coat and imbed them with small stones. The artificial mountains thus built always look unnatural.

Because stones are somewhat hard to come by in Yangzhou, stone embankments are seldom built around ponds in local gardens, but stone walls are repeatedly built, which not only enhances scenic depth, but also saves land and stones, with the resulted products appearing more exquisite than those in Suzhou. Peaks, caves, stone stairways, stone bridges, and stepping stones are also properly crafted in Yangzhou gardens.

Qian Yong says in *A Collection of Anecdotes in the Lü Garden* (Volume Twelve),

Among the pioneering artificial mountain builders, Zhang Lian (1587-1673) was the best in the beginning years of the dynasty. During the Kangxi reign there was Monk Shitao, who was followed by such masters as Qiu Haoshi (1723-1795), Taoist Priest Dong (1736-1795), Wang Tianyu (1736-1795)¹, and Zhang Guotai. More recently there was Ge Yuliang (1764-1830), a Changzhou native whose rock-stacking craft was better than those of others.

Ge Yuliang, who came to the fore in the wake of Shitao during the Qianlong-Jiaqing reigns, was a famous mountain builder who assimilated Shitao's techniques in many of his works. The artificial mountains he built in the Beauty-Encircled Mountain Abode of Suzhou and the Homecoming Swallow Garden of Changshu (as well as the Lesser Winding Gully built of yellow stones in the Qin's Imagined Garden in Yangzhou, which unfortunately, are in ruins today), show that he had improved his craft while inheriting Shitao's legacies.

Because Ge had mastered Shitao's principle that "mountain peaks ought to accord with a painter's texturing brush strokes derived from natural peaks," the mountain he had built of Lake Tai stones in the Beauty-Encircled Mountain Abode look deep, tranquil and replete with surprises, while the one he built of yellow stones for the Homecoming Swallow Garden look natural and life-like despite their seemingly plain appearances. The former is complicated but well-organized, with the builder's workmanship shining forth through the kind of depth and tranquillity that evokes Wang Meng's horizontal painting scrolls; the latter looks simple but is never shallow thanks to the builder's rich expertise derived from Ni Zan's sketches. As each of the two rockeries used a different kind of stones, the builder adjusted his techniques accordingly, and came up with two masterpieces whose knolls and ravines and artistic allure stood out in distinct differences. It is thus no exaggeration to say that Shitao was as outstanding in building artificial mountains as he was in the realm of painting.

Rereading Qian Yong's *A Collection of Anecdotes in the Lü Garden* and checking his records of the Small-Rock Mountain Abode, I found the address he gives of this rockery is factual. Of the two halls cited in this book, one is still there today, a threebay structure built of *Phoebe nanmu* during the Qianlong reign; the pond has long been filled in, but traces of Lake Tai stone embankments are still there. The mountain turns out to be fashioned out of Lake Tai stones as well, a fact that tallies with Qian Yong's record. The peak of the artificial mountain overlooks the surrounding wall at a proper height. And the mountain's imposing structure, its lone peak enveloped in greenery in particular, deserves the superlatives, "exceptionally perpendicular." According to Fu Baoshi's *A Chronicle of Shitao the Venerable Buddhist*, Shitao was a regular visitor to Yangzhou in the period 1678-1697, and he never left Yangzhou during the years from his settlement in the city in 1697, the thirty-sixth year of the Kangxi reign, to his death in 1707, the forty-sixth year of the Kangxi reign. The Great Mind-Cleansing Thatched Hut, the Thatched Belvedere Amidst Green Lotuses, the Heart-

Ploughing Thatched Hut, and the Thatched Hut for Revering Mount Tai were names of his residences that he often signed—though not as often as the Mountain-Level Hall and the Quiet Prajna Temple—on his inscriptions and paintings during his years in Yangzhou³. In a colophon on his painting *Cloud Waves over Mount Huangshan* done in 1687 at age forty-five,⁴ he says, "It was a winter day in a *ding-mao* year that I overnighted at the Lane Under Giant Trees in Guangling after a failed northbound trip...." On a one-foot scroll done on a piece of Heart-Purifying Hall paper: "Signed on a winter day in a year of *wu-yin* at the Thatched Hut of East City in Guangling." In his "Postscript to the Album of Mount Huangshan Paintings" in 1699 at age fifty-seven: "Upon returning to Guangling after a tour of Mount Huangshan, Mr. Jin'an gathered us at Down the River Street to recount the sceneries of the mountain... in the seventh month of a year of *ji-mao*." The Small-Rock Mountain Abode is found in the southeast of the city, with Down the South River Street in front of it and Down the North River Street to the east, and Lane Under Giant Trees behind it. I am not sure if the "East City" mentioned in Shitao's colophon refers to the eastern part of Yangzhou today, but his "Down the River Street" is the present-day Down the South River Street or Down the North River Street, whereas Lane Under Giant Trees should be today's Big Tree Lane. Thus Shitao's lodging at the time was probably close by Garden Lane. He was born in 1642, and died in 1707, with his body entombed at the foot of the Shugang Hills⁵. Qian Yong was born in 1759, the twenty-fourth year of the Qianlong reign, and died in 1844, the twenty-fourth year of the Daoguang reign, just fifty-two years after Shitao's demise. This short span of time, plus the fact that Qian Yong, an artist with all-round attainments, had unique perspectives on gardens and architecture and had personally visited and recorded the famous gardens of his day, indicates that his *A Collection of Anecdotes in the Lü Garden* and his comments on Shitao in it are of immense reference value to researchers of Chinese garden history. Qian Yong himself had also settled in Yangzhou for some years, and had inscribed in his own

handwriting many boards for the city's scenic resorts and gardens, including the nameboard of the Loft of Two-Thirds Bright Moonlight. This further convinces me that his records are well founded and, therefore, can never be put on a par with the notes of ordinary folks or hearsay. Moreover, judging from the time of Shitao's settlement in Yangzhou, the artificial mountain in the Small-Rock Mountain Abode should be attributed to his evening years, which fell on the early Qing.

Based on the sights I have presented in the foregoing, as well as the documentations I have cited, it is safe to attribute, at least initially, the Small-Rock Mountain Abode to Shitao as by far the only extant rockwork he had personally wrought. According to our survey findings of Yangzhou, this artificial mountain is also the earliest of its kind extant in Yangzhou today. It is not only a major testimony to the development of Chinese rockwork techniques, but also an authentic model of Shitao's landscaping painting. Insofar the craft of gardens is concerned, its value speaks for itself⁶.

扬州片石山房——石涛叠山作品

石涛是我国清初杰出的一个大画家。他在艺术上的造诣是多方面的，不论书画、诗文以及画论，都达到高度境界，在当时起了革新的作用。在园林建筑的叠山方面，他也很精通。《扬州画舫录》《扬州府志》及《履园丛话》等书，都说到他兼工叠石，并且在流寓扬州的时候，留下了若干假山作品。

扬州石涛所叠的假山，据文献记载有两处：其一，万石园。《扬州画舫录》卷二：“释道济字石涛……兼工垒石，扬州以名园胜，名园以垒石胜，余氏万石园出道济手，至今称胜迹。”《嘉庆扬州府志》卷三十：“万石园汪氏旧宅，以石涛和尚画稿布置为园，太湖石以万计，故名万石。中有樾香楼、临漪槛、援松阁、梅舫诸胜，乾隆间石归康山，遂废。”其二，片石山房。《履园丛话》卷二十：“扬州新城花园巷又有片石山房者，二厅之后，湫以方池。池上有太湖石山子一座，高五六丈，甚奇峭，相传为石涛和尚手笔。”

万石园因多见于著录，大家比较熟悉，可是早毁于乾隆间，而利用该园园石新建的康山今又废，因此现已无痕迹可寻。唯一幸存的遗迹，便是这次我发现的片石山房了。

近年来，我在扬州对古建筑与园林住宅作较全面的调查研究。在市区东南隅花园巷东尽头旧何宅内，有倚墙假山一座，虽然面积不大，池水亦被填没，然而从堆叠手法的精妙，以及形制的古朴来看，在已知的现存扬州园林中，应推其年代最早，其时间当在清初，确是一件不可多得的精品。现在从其堆叠的手法分析，再证以钱泳《履园丛话》的记载，传出石涛之手是可征信的，确是石涛叠山的“人间孤品”。

假山位于何宅的后墙前，南向，从平面看来是一座横长的倚墙假山。西首为主峰，迎风耸翠，奇峭迫人，俯临水池。度飞梁经石磴，曲折沿石壁而达峰巅。峰下筑方正的石屋（实为砖砌）二间，别具一格，即所谓“片石山房”。向东山石蜿蜒，下构洞曲，幽邃深杳，运石浑成。可惜洞西已倾圮，山上建筑亦不存，无从窥其全璧。此种布局手法，大体上仍沿袭明代叠山的惯例，不过石涛加以重点突出，主峰与山洞都更为显著，全局主次格外分明，虽地形不大，而挥洒自如，疏密有度，片

石峥嵘，更合山房命意。

扬州属江淮平原，附近无山。园林叠山的石料，必仰给于他地，如苏州、镇江、宣城、灵璧等处。有湖石、黄石、雪石、灵璧石等，品类较苏州所用者为最多。因为扬州主要依靠水路运输，石料不能过大，所以在堆叠时要运用高度的技巧。石涛所叠的万石园，想来便是以小石拼凑而成山的。片石山房的假山，在选石上用过很大的功夫，然后将石之大小按纹理组合成山，运用了他自己画论上“峰与皴合，皴自峰生”（《苦瓜和尚画语录》）的道理，叠成“一峰突起，连冈断壑，变幻顷刻，似续不续”（石涛论画见《苦瓜小景》）的章法。因此虽高峰深洞，了无斧凿之痕，而皴法的统一，虚实的对比，全局的紧凑，非深通画理又能与实践相结合者不能臻此。此种做法，到后期因不能掌握得法，使用条石横排，以小石包镶，矫揉做作，顿失自然之态。因为石料取之不易，一般水池少用石驳岸，在叠山上复运用了岩壁的做法，不但增加了园林景物的深度，且可节约土地与用石，至其做法，则比苏州诸园来得玲珑精巧。其他主峰、洞曲、磴道、飞梁与步石等的安排，亦妥帖有致。钱泳《履园丛话》卷十二：“堆假山者，国初以张南垣为最。康熙中则有石涛和尚，其后则仇好石、董道士、王天于【从周案十二】、张国泰，皆为妙手。近时有戈裕良者，常州人，其堆法又胜于诸家。”戈裕良比石涛稍后，为乾嘉时著名叠山家。他的作品有很多就运用了这些手法。从他的作品——苏州环秀山庄、常熟燕园（扬州秦氏意园小盘谷，亦戈氏黄石叠山小品，惜仅存残迹），可看出戈氏能在继承中再提高。由于他掌握了石涛的“峰与皴合，皴自峰生”的道理，因而环秀山庄深幽多变，以湖石叠成；而燕园则平淡天真，以黄石掇成。前者繁而有序，深幽处见功力，如王蒙横幅；后者简而不薄，平淡处见蕴藉，似倪瓒小品。盖两者基于用石之不同，因材而运技，形成了不同的丘壑与意境。如果说石涛的叠山如其画一样，亦为一代之宗师，启后世之先声，恐亦非过誉。

如今再研究钱泳《履园丛话》所记片石山房地址，也是相合的。二厅今存其一，系面阔三间的楠木厅，其建筑年代当在乾隆间。池虽填没，然其湖石驳岸范围尚在，山石品类用湖石，更复一致。山峰出围墙之上，其高度又能仿佛，而叠山之妙，独峰耸翠，确当得起“奇峭”二字。综上则与文献所示均能吻合。案石涛晚年流寓扬州，傅抱石著《石涛上人年谱》所载，从清康熙三十六年（1697年）石涛六十八岁起，到

康熙四十六年（1707年）七十八岁歿，一直没有离开扬州。就是在1678年至1697年前后八九年的时间中，也常来扬州。书画上所署的大滌草堂、青莲草阁、耕心草堂、岱瞻草堂等，都是在扬州时，除平山堂、静慧寺二处外所常用的斋名。复据五十八岁（1687年）所作黄海云涛题语：“时丁卯冬日，北游不果，客广陵大树下……”六十九岁（1698年）所作澄心堂尺幅轴款云：“戊寅冬日，广陵东城草堂并识。”七十岁（1699年）所作《黄山图卷跋》云：“劲庵先生游黄山还广陵，招集河下，说黄山之胜……己卯又七月。”案片石山房在城东南，其前为南河下，东为北河下，后有巷名大树巷。今虽不能确指东城即今市区东部（亦即扬州新城东部），但河下即南河下或北河下，大树下即大树巷。要之，石涛当时居停处，可能一度在花园巷附近。他生于明崇祯三年（1630年），歿于清康熙四十六年（1707年），葬于蜀冈之麓【从周案十三】。而钱泳则生于乾隆二十四年（1759年），歿于道光二十四年（1844年）。从1795年上推至1707年，为时仅五十二年，论时间并不太久。再者钱泳是一个多面发展的艺术家，在园林与建筑方面有很独到的见解，尤其可贵的是对当时各地的一些名园，都亲自访观过，还作了记录，不失为我们今日研究园林史的重要资料。他亦流寓过扬州，名胜与园林的匾额有很多为他所写，今扬州的二分明月楼额，即出钱泳笔。因此他的记载比一般人的笔记转录传闻的要可靠得多，一定是有所根据的。再以石涛流寓扬州的时期而论，这片石山房的假山，应该属于他晚年的作品，时间当在清初了。

从以上所述实物与文献的参证，可以初步认为片石山房的假山出石涛之手，为今日唯一的石涛叠山手迹，也是我们此次扬州调查所知的现存最早假山。它不但是叠山技术发展过程中的重要证物，而且又属石涛山水画创作的真实模型。作为研究园林艺术来说，它的价值是可以不言而喻的【从周案十四】。

1962年

QIAO'S GARDEN, TAIZHOU

Literary and Museum Newsletter, Museum of Nanjing, Issue No. 16,
November 1977

Translated by Zhong Zhilan

The second largest city behind Yangzhou in north Jiangsu province, Taizhou develops its economy on the basis of commerce and handicrafts production. As the scourge of war rarely occurred on its land over the years, Taizhou is the largest repository of ancient buildings, gardens, and other cultural and historical heritages among all the cities in northern Jiangsu. Heading the list is the Southern Mountain Temple, whose stone tablet pedestal dates back to the Five Dynasties (907-960), and whose Ming-dynasty Heavenly Kings Hall¹, completed in 1463, the seventh year of the Tianshun reign (1457-1464), is a study of pre-Yuan (1271-1368) architecture on account of its main hall's timber structure, whose inner and outer columns are of equal height, with inverted V-shaped braces resting underneath ridgepoles. Also noteworthy are two other Ming halls that remain relatively intact today: one is fashioned out of *Phoebe nanmu* in Jiang Ke's² Mansion built during the Longqing reign (1567-1572), and the other hall, built toward the end of the Ming inside of the Gong's Mansion. There is also the Mount Dai Temple, known for its Tongguang³ Bronze Bell and two bronze statues cast respectively in 1107, the first year of the Daguan reign (1107-1110), and 1126, the first year of the Jingkan reign (1126-1127) of the Song (960-1279).

Insofar as Taizhou's gardens are concerned, no talk about them is complete without the Qiao's Garden on the east-west Straight Road of Character Eight Bridge⁴.

The Qiao's Garden was built by Chen Yingfang (1534-1601)⁵, a landed official who served as Chamberlain for the Imperial Stud

during the Wanli reign (1573-1620) of the Ming. Drawing inspirations from a line in Tao Qian's "Come Away Home," "The garden enriches my soul through my daily rambling of it," Chen named it "Daily Rambler's Garden" and wrote his *Jottings from the Daily Rambler's Garden*. The garden changed hands repeatedly after the Chens' fortune went downhill. Tian Jingxi⁶ became its owner in the early years of the Kangxi reign (1662-1722) of the Qing. A man surnamed Gao renamed it "Three Peaks Garden" after coming into possession of it during the Yongzheng reign (1723-1735). When Wu Wenxi (1800-1870)⁷ acquired the garden in 1858, the eighth year of the Xianfeng reign (1851-1861), he called it "Hibernation Garden." Soon afterwards, Qiao Songnian (1815-1875)⁸, Salt Distribution Commissioner of Huaidong and Huaixi, gave it a new leash of life and a new name, "Qiao's Garden."

When Gao Fengzhu⁹ lived in the garden, he asked a man by the name of Li Yu to paint a picture of it for him. Barely a century later in 1825, the fifth year of Daoguang reign (1821-1850), Zhou Xiang¹⁰ came up with four other paintings with views on each side of the Thatched Hall in the Cuckooing Birds' Mountains¹¹. Wu Wenxi wrote the "Notes on the Hibernation Garden" after he had the garden renovated in 1859, the ninth year of the Xianfeng reign (1851-1861). From these literary sources we get a glimpse of what had happened over the years to this oldest garden in northern Jiangsu.

Sprawling over a large area in its heyday, the Qiao's Garden used to be graced with exterior dwellings that gradually grew into a mammoth mansion after the mid-Ming through repeated expansions and annexations by landed bureaucrats. We have no way of knowing the mansion's former glory from the buildings we can see around the garden today, but we can still gain some idea about it from its four remaining Ming-dynasty halls, one of which looks rather intact.

Facing south, the Qiao's Garden is nestled in the center of the mansion. During the years when it was known as "Three Peaks Garden," it offered fourteen sights: the Evergreen Mountain Abode; the

Hall with a Rope to Draw Water from a Well¹²; the Fish Enumerator's Pavilion; the Cloud Enshrouded Cave; the Howling Pine Belvedere¹³; the Thatched Hall in the Cuckooing Birds' Mountain; the Bamboo Cottage that Splits a Forest in Two¹⁴; the Nest Pavilion¹⁵; the Zither Playing Verandah¹⁶, the Imminent Greenness Belvedere; the Laizi Blessing Hall¹⁷; the Rain-Splattered Plantain Verandah; the Literary Osmanthus Landboat¹⁸; and the Rock Forest Trail. Though we cannot see the garden's former glory in its entirety, it is not too difficult to restore it based on its present size.

The centerpiece of the garden is the Thatched Hall in the Cuckooing Birds' Mountains. Hemmed in by a massive artificial mountain with a brook flowing in front of it, the hall's front gate opens onto three stalagmites that soar into the sky from atop the mountain, hence the hall's byname, "Three Peaks Thatched Hall." A Lake-Tai rock embedded in a wall at the western end of the mountain foot is easily mistaken for a lattice window. As per a description in the "Notes of the Hibernation Garden," this very rock is "thoroughly creased, hollowed through and looking slim." A small arch bridge sits astride one end of the brook and a stone beam spans its other end. The bridge conducts to the Cloud Enshrouded Cave that meanders its way through the mountain. There used to be a Flower Goddess Belvedere south of the Three Peaks Mountain, but it is nowhere to be seen today.

An ancient Chinese juniper rises from among the three peaks in front of the former site of the vanished belvedere. As the "Notes of the Hibernation Garden" puts it: "With galls and gnarls piling up upon its curling and coiling branches, this tree belongs unmistakably to a remote generation." Whilst adding an impressive touch to the garden, it is also the most celebrated ancient tree in Taizhou. A half pavilion that clings against the western wing of the mountain foot seems to have been added to the fold in recent times, because its absence is conspicuous among the garden's old pictures. Stepping eastward across the stone beam and the valley, one arrives at the Fish Enumerator's Pavilion, which has collapsed, with its site remaining

there for all to see; the ancient pine standing by the pavilion is rare and rustic to the uttermost, but to visitors' dismay, it is rotting away. To the north of the Thatched Hall in the Cuckooing Birds' Mountain, a trail threads through a moon gate in a wall adorned with lattice windows. Inside of the courtyard, a yellow-stone terrace rises along a zigzagging stone stairway before one reaches the Hall with a Rope to Draw Water from a Well. The hall, equipped with floor-length windows on its four sides, is found between two reconstructed structures, the Howling Pine Belvedere to the left and the Nest Pavilion to the right. Jutting out like a wing, the hall is encircled by a parterre that features a cornucopia of trees, slim bamboos, rugged vines and imposing rocks, all of which mingle to accentuate the exceptional seclusion and fascination of the entire scene. With sparse embellishments and a layout akin to a traditional Chinese painting, this courtyard evokes elegance and quietude in ways both unconventional and ingenious.

Comparisons made between historical archives and literature and what remains of the Qiao's Garden indicate that the garden we see today is worlds apart from its former self. Nevertheless, it still offers something noteworthy as far as the craft of gardens is concerned.

Judging from its general layout, the garden is centered upon the Thatched Hall in the Cuckooing Birds' Mountain, and supplemented with a belt of water and a mountain in the front to conjure up its focal scenery. The small courtyard laid out in the rear to add a deliberate digression, serves, in literary parlance, to revive the visitor's spirits with another fabulous scene. Significantly different in size, visibility and importance, the focus and foil give full play to space grouping in a clever way. The integration of simple elements—a hall situated up north, a pond in the middle, a mountain opposite the hall, a cave with rocks hidden inside of it, and a stone beam lying across a brook—brings fresh and original prospects to the premises without falling into the beaten track, an integration that is exactly what the Ming tradition of garden-making is all about. With scenic sights arrayed in all

directions, the garden also makes the most of the view-borrowing technique by keeping its belvederes on either side of its enclosing wall. The main travel route takes a circuitous track, with the trail atop the mountain and the cave below it offering two more optional sightseeing routes. More changes are also added to the main travel route in the form of small bridges, steppingstones, and a footpath that forks out at the foot of the artificial mountain.

In terms of rockwork arrangement, all the Lake-Tai rocks and yellow stones were carefully chosen and cleverly arranged in compliance with a unified plan before they were shipped to the Qiao's Garden. There being absolutely no stones to be quarried locally in Taizhou, these rocks and stones were procured from other places, and came in sundry categories and sizes, yet they were assembled and stacked up so intelligently that no trace of cobbling is found in all the artificial mountains constructed on the site. In the pond, for instance, yellow stones are kept under water while Lake-Tai rocks protrude from the water surface to show their distinctive shapes and postures to best advantage. At the Cloud Enshrouded Cave, yellow stones are paved to form the base, with Lake-Tai rocks piled up upon them to beautify the garden's scenic skyline. Moreover, bricks are used to build the archway inside of the cave to make up for the shortage of stones, with a small yard built in the valley to facilitate smooth transition from rock structures to brickwork, thereby forestalling feels of bluntness or blemishes. To further economize on rocks, construction of all-stone walls is minimized and interspersed with brick-and-earth walls surfaced with Lake-Tai rocks. All caves inside of the garden, built in the techniques of brick trail building and dynamic balance of blocks in stone caves (see *The Craft of Gardens*), are apparent Ming-dynasty legacies. Compactly structured with agreeable variants, and produced with superb craftsmanship with the least traces of artistry, they are among the best of small caves comparative with those found in the Ming-dynasty Five Peaks Garden in Suzhou. Moreover, the brick archway tunneled through the mountain is a rarity unseen elsewhere.

The three stalagmites that stand atop the summit and mingle with the curling branches of an ancient juniper are definitely the highlight of the entire garden's scenery, an arrangement that obviously breaks the convention that such stone pillars can only be situated among lush bamboos. At the foot of the mountain, the pond meanders its way into the distance as an admirable supplement; foot roads, bridges and steppingstones are scattered to a nicety. All these excellent ways of doing things are rarely seen in other gardens in north Jiangsu. In similar rockwork techniques, the artificial mountain builder of the Qiao's Garden obviously outdid such consummate rockery builders as Shitao and Ge Yuliang.

In horticultural arrangement, priority is given to arbors, with ancient-looking cypresses highlighted, and pines and plum groves supplementing. Nandinas are planted at most mountain cols and brook bays, and winter sweets and osmanthus clumps are arranged in front of courtyards. Bamboos and plantains offer delightful shade to the surroundings of halls, and arboraceous and herbaceous peonies are cultivated in parterres. These trees and flowers not only give inspirations to building names such as "Evergreen Mountain Abode," "Howling Pine Belvedere" and "Rain-Splattered Plantain Verandah," but also conjure up kaleidoscopic seasonal changes in the garden's scenery. More importantly, the adoption of the aforementioned botanical combinations is in accord with traditional Chinese painting theories. In terms of spiritual setting, demure elegance and unadorned delicacy are the starting point before such trees and flowers are put together. For instance, plantains are used for their coolness and green hues; sparse bamboo twigs can cast picturesque shadows on windows; and nandina, winter sweet, pine and cypress branches intertwine to set off each other agreeably. As prototypes in traditional Chinese painting, all these botanical groupings have captivated so many literati officials through the generations. Bookbinding grass (*Ophiopogon japonicus*) is also planted to fill in baldness on crags and turn an entire mountain into an unblemished green carpet. In this

way, bluntness and flaws in artificial mountains are cleverly covered or concealed so that the entire garden looks like a harmonious whole. The way the bookbinding grass is applied in the Qiao's Garden has long been commonplace among northern Jiangsu gardens, but in my opinion, it ought to be popularized in southern Jiangsu gardens as well, where such grass is still used sparsely for patchwork purposes. It ought to be assimilated by all the garden-makers in China, for that matter. Just as Guo Xi puts it in *The Lofty and Sublime Messages of Forests and Streams*:

A mountain takes streams as its arteries, grass and trees as its hair, and the misty clouds above it as its spiritual verve.

To sum up, as the one and only completely extant traditional Chinese garden in Taizhou, as well as the most venerable one in northern Jiangsu, the Qiao's Garden deserves a prominent position in regional studies of Chinese gardens.

泰州乔园

泰州是仅次于扬州的一个苏北大城市，以商业与轻工业为主，在历史上复少兵灾，因此古建筑园林与文物保存下来视他市较多。如南山寺五代碑座，明代的天王殿及正殿，正殿建于明天顺七年癸未（公元1463年），在大木结构上，内外柱皆等高，脊檩下用叉手，犹袭元以前的建筑手法。明隆庆间的蒋科住宅的楠木大厅，明末的宫宅大厅，现状尚完整。其他岱山庙的唐末铜钟、宋铜像等，前者款识为“同光”，后者为宋崇宁五年（即宋大观元年，公元1107年）及宋靖康元年丙午（公元1126年）年所造。园林则推乔园。

乔园在泰州城内八字桥直街，明代万历间官僚地主太仆陈应芳所建，名曰涉园，取晋陶潜《归去来辞》中“园日涉以成趣”之意名。应芳名兰台，著有《日涉园笔记》。园于清康熙初归田氏。雍正间为高氏所有，更名三峰园。咸丰间属吴文锡（莲芬），名蜚园。旋入两淮盐运使乔松年（鹤齐）手，遂以乔园名。在高凤翥（麓庵）一度居住时期，曾由李育（某生）作园图。周庠（西苓）绘园四面景图，时在道光五年（公元1825年）。咸丰九年己未（公元1859年）吴文锡修复是园后，又作《蜚园记》。从记载分别可以看到当时的园况，为今存苏北地区最古的园林。

乔园在其盛时范围甚大，除园林外尚拥有大住宅，这座大住宅是屡经扩建及逐步兼并形成的。从这里可以看出，明代中叶后官僚地主向农民剥削加深的具体反映。今日园之四周住宅部分，虽难观当日全貌，然明代厅事尚存四座，其中一座还完整。

园南向，位于住宅中部，三峰园时期有十四景之称：皆绿山房；绶汲堂；数鱼亭；囊云洞；松吹阁；山响草堂；二分竹屋；因巢亭；午韵轩；来青阁；莱庆堂；蕉雨轩；文桂舫；石林别径。今虽已不能窥见其全豹，但根据今日的规模，是不难复原的。

园以山响草堂为中心，其前水池如带，山石环抱，正峙三石笋，故又名三峰草堂。山麓西首壁间嵌一湖石，宛如漏窗，殆即《蜚园记》所谓具“绉、透、瘦”者。池上横小环洞桥及石梁。过桥入洞曲，名囊云，曲折蜿蜒山间。主山则系三峰所在，其南原有花神阁，今废。阁前峰间

古柏桧一株，正《蛰园记》所谓“瘿疣累累，虬枝盘拿，洵前代物也”。实为园中最生色之处，同时亦为泰州古木之尤者。山麓西则为半亭，案旧图记无此建筑，似属后造。东度小飞梁跨幽谷达数鱼亭，今圯，遗址尚存。亭旁原有古松一株，极奇拙，已朽。山响草堂之北，通花墙月门，垒黄石为台，循迂回的石蹬达正中之绁汲堂。堂四面通敞，左顾松吹阁，右盼因巢亭。今阁与亭名存而实非。绁汲堂翼然邻虚，周以花坛丛木，修竹古藤，山石森然，丘壑独存。虽点缀无多，颇曲尽画理，是一园中另辟蹊径的幽境。

乔园今存部分，与文献图录所示对照，已非全貌。然就现状来看，在造园艺术上尚有足述的地方。

在总体布局上，以山响堂为中心，其前凿池叠山以构成主景。后部辟一小园，别具曲笔，使人于兴尽之余，又入佳境。这两者不论在大小隐显与地位高卑上，皆有显著不同的感觉，充分发挥了空间组合上的巧妙手法。至于厅事居北，水池横中，假山对峙，洞曲藏岩，石梁卧波等，用极简单的数事组合成之，不落常套，光景自新，明代园林特征就充分地体现在这种地方。此园林以东南西北四个风景面构成，墙外楼阁是互为“借景”。游览线以环形为主，山巅与洞曲又形成上下不同的两条游径，并佐以山麓崖道及小桥步石等歧出之，使规则的主线中更具变化。

叠山方面，此园在运用湖石与黄石两种不同的石种上，有统一的选择与安排。泰州为不产石之地，因此所得者品类不一，而此园在堆叠上使人无拼凑之感。在池中水面以下用黄石，水面以上用体形较多变化的湖石。在洞中下脚用黄石，其上砌湖石。在石料不足时，则以砖拱隧道代之，它与石构者是利用山涧的小院作过渡，一无生硬相接之处。若干处用砖墙挡土，外包湖石，以节省石料。以年份而论，山洞部分皆明代旧物，盖砖拱砌法以及石洞的大块“等分平衡法”（见《园冶》），其构造既有变化又复浑融一片，无斧凿之痕可寻，洵是上乘的作品，可与苏州明代旧园之一的五峰园山洞相颉颃，为今日小型山洞中不可多得的佳例。至于山中置砖拱隧道，则尤为罕见。主峰上立三石笋，与古柏虬枝构成此园之主要风景面，一反前人以石笋配竹林的陈例。山下以水池为辅，曲折具不尽之意。以崖道、桥梁与步石等酌量点缀其间，亦能恰到好处。这些在苏北诸园中未见有此佳例。此种叠山艺术的消息，清代仅在石涛与戈裕良的作品中尚能见之，并有所提高。

花木的配置以乔木为主，古柏重点突出，辅以高松、梅林。山坳水曲则多植天竺。庭前栽腊梅、丛桂，厅周荫以修竹、芭蕉，花坛间布置牡丹、芍药，故建筑物的命名遂有皆绿山房、松吹阁、蕉雨轩等。至于其所形成四季景色的变化，亦因此而异。最重要的是此类植物的配合，是符合中国古代画理的，当然在意境上，还是从优雅清淡上着眼，如芭蕉分绿，疏筠横窗，天竹腊梅，苍松古柏，交枝成图，相映生趣，皆古画中的粉本，为当时士大夫所乐于欣赏的。山间以书带草补白，使山石在整体上有统一的色调。这样使若干堆叠较生硬处与堆叠不周处能得到藏拙，全园的气息亦较混成，视苏南园林略以少数书带草作补白者，风格各殊。此种手法为苏北园林所习用，对今日造园可作借鉴。宋人郭熙说，“山以水为血脉，以草木为毛发，以烟云为神采”（《林泉高致》），便是这个道理。

总之，乔园为今日泰州仅存的完整古典园林，亦是苏北已知的最古老的实例，在中国园林研究中，以地区而论，它有一定的代表性。

A NOTE ON REBUILDING WATER-INKED GARDEN

May, 1992

Translated by Zhong Zhilan

The Water-Inked Garden in Rugao, Jiangsu province, was a garden of national renown built by Mao Xiang (1611-1693)¹ in the waning years of the Ming dynasty. The much-told tale of Mao and the courtesan Dong Bai (1624-1651)² has come down as a legend in Chinese literary history along with the garden.

I still remember having the honour in my youth to make the acquaintance of Mao Xiaolu (1909-1988)³ during a visit to his father Mao Guangsheng (1873-1959)⁴ in their Shanghai residence.⁵ Descendants of the owner of the Water-Inked Garden, the revered father and son were more than familiar with the history of the garden. I wanted to visit it, but procrastinated and never made it, which pretty much choked me through the years.

Of late the local government asked me to make cartographic records of this famed heritage site and draw a conservation plan for it. I ruminated, and was slow and hesitant to take action. Judged from its name, this garden was apparently predicated on water. Enveloped in water and nestled against a vast bamboo grove, it also clung to a city parapet topped with imposing crenellations, which made it a true rarity among private gardens across the country. When the restoration task eventually came under way, we worked to preserve the water surfaces in the first place while repairing and expanding the city wall and rejuvenating the bamboo groves on the premises. An artificial mountain was built, with water splashing out of a fountainhead into a pool at the mountain foot. In this way, the entire scenery looked at once integral and judiciously divided, the lofts and terraces tossed

their silhouettes into the water to conjure up a vista in which tangibles and intangibles mingled to the enchantment of visitors, and vivid expression was somewhat given to water as the overriding theme of the Water-Inked Garden.

I hereby jot down this brief note upon completion of the restoration project to commend the Rugao government's devotion to conserving local cultural and historical legacies. Only with such devotion can our nation's spirit be boosted and our local cultures be rejuvenated. It will be my uttermost delight if, on a fine spring or autumn day, I, walking stick in hand, can join some local friends for a visit to this famous garden. Only thus can a fifty-year-long wish of my life come true.

重修水绘园记

如皋水绘园，天下名园也，明冒辟疆所筑，董小宛故事，遍传人间，名园名姬，流为艳谈。忆少时谒冒丈鹤亭于沪寓，获交孝鲁先生，贤乔梓为水绘后人，熟知园之史实，尝拟往访，因循未果，耿耿于怀。近如皋市以保此名迹，嘱为摹画修复，迟迟未敢举笔。此园以水绘名，重在水字。园故依城，水竹迷漫，城围半园，雉堞严然，于我国私园中别具一格。今复斯园，仍以水为主，城墙水竹，修复而扩大之。筑山一丘，山中出涧，泻泉入池，合中有分；楼台映水，虚虚实实，游者幻觉迷目，水绘意境，于是稍出。园成，为记此文，知如皋重历史之文物，振民族之正气，地方文化得兴。他时春秋佳日，携筇与如皋人同游名迹，以偿五十年前访园之夙愿，实平生一大快事也。

GRATIFICATION GARDEN, INNER GARDEN, SHANGHAI

Cultural Artifacts, Issue No. 6, 1957

The complex comprising the Gratification Garden and the Inner Garden, with the City God's Temple in between, is one of the old gardens that remain relatively intact to this day in Shanghai. As it is located in the most densely populated area of the metropolis, the municipal culture bureau and cultural heritage administration has stepped up its management and refurbishment in an effort to provide ideal greenery to this area and a cosy place where people can relax and see the scenery. As a participant in such an effort over the years, I would like to share my experience and discoveries with my readers.

The garden was built by Pan Yunduan (1526-1601)¹, a Shanghai native who served as administrative commissioner of Sichuan province during the Wanli reign of Emperor Shenzong (1573-1620) of the Ming. He called it "Gratification Garden" because he built it to gratify his father Pan En (1496-1582), a retired minister of justice during the Jiajing reign of Emperor Shizong (1521-1566) of the same dynasty. Its construction began in 1559, the thirty-eighth year of the Jiajing reign, and was completed eighteen years later in 1577, the fifth year of the Wanli reign. Sprawling on a lot of over seventy *mu*, it became one of the few famous gardens in the Jiangnan area at the time. The Pans' Mansion, situated to the east of the garden on Benevolence-Cherishing Street at Phoenix Tree Road, with one of its Five Old Peaks now in the former Yans' Mansion on Yan'an Road Central, was at the time the largest of its kind in Shanghai. In the mid-17th century, the garden fell into dilapidation with the decline of the Pan family. In 1760, the twenty-fifth year of the Qianlong reign of the Qing, some local gentries pooled money and bought part of the

garden complex, restored it and named it "West Garden," with the Inner Garden built in 1709, the forty-eighth year of the Kangxi reign, renamed "East Garden."

During the Daoguang reign (1821-1851) of the Qing, local authorities consigned the long decaying Gratification Garden to twenty-one trade associations, whose leaders overhauled their respective portions and converted them into conference halls. The garden sustained a major destruction during the five-day occupation of the City God's Temple by the British troops during the First Opium War in 1842, the twenty-second year of the Daoguang reign, and was destroyed even more seriously in 1860, the tenth year of the Xianfeng reign (1851-1862), at the hands of the BritishFrench troops who took the City God's Temple and suppressed the Heavenly Kingdoms uprising in league with the Qing government. Towards the end of the Qing, the area west of the garden became marketplace, and the size of the garden diminished as a result. The roads close by the garden today, such as Sunshine Condensing Road, Painted Boat Road, and Nine Lions Road, are named respectively after the Sunshine Condensing Belvedere, Hall of Painted Boat and Nine Lions Pavilion in the garden's precincts in old days.

Though the Gratification Garden remains torn apart to this day, its former glory is still discernable for the most part of it. According to a new urban development plan of Shanghai, the lost parts shall be reverted to the garden. The Gratification Garden we see today was actually part of its original northeast corner, which features a massive artificial mountain, with a pond dug and pavilions built at its foot, and its space divided vertically in two by a bridge sitting astride a stream. Across the stream stands a belvedere, with a roofed walkway with latticed windows running through them, whereas the stream takes a series of twists before turning to the garden's east part, where it is flanked by more rockeries and verandahs. Thanks to adoption of Ming-dynasty garden-making techniques, rockeries and water surfaces in the garden are now clustered, now strewn to humour the terrain,

with major scenic spots set off properly by secondary ones.

The central building in the area of the great artificial mountain is the "Profuse Beauty Hall," which faces the mountain at its eastern foot. The mountain, built by Zhang Nanyang (c. 1517-1596)² on a pile of earth, is the largest extant yellow stone work in the Jiangnan area. The path winding its way up and down the mountain, and the stream taking a zigzagging course at its foot seem ever ready to conduct the visitor to fascinating nooks and crannies. Having walked along the aforementioned roofed walkway by the side of the Profuse Beauty Hall, one steps upon the mountain's footpath and sees a stone tablet inscribed with the words, "Stream and mountain to be marvelled at in serenity," in the handwriting of the celebrated calligrapher Zhu Yunming (1460-1526)³.

The observation deck atop this mountain provides a panoramic view of the garden. In old days, the masts of junks drifting down the Huangpu River in the distance could be seen from the balustrade of a tiny pavilion standing by the deck. Hence its name, "RiverWatcher's Pavilion." Another small pavilion at the foot of the mountain is silhouetted in the pond. Also tossing its reflection into the water from the other side of the pond is the Mountain-Admiring Hall, a two-story building with a richly variegated façade. This is where the water in the pond forks, with one branch running northwest into the mountain and cascading down to a ravine in a noisy chaos of spray. The other branch is a narrow strip of clear water that takes a detour beyond the gazebo and runs eastward past the Loft of Ten Thousand Flowers, where it flows on through a moon gate in the wall to no one knows where—all the while it is flanked by graceful-looking rockeries and ancient trees whose rich foliage blocks the sun and enhances the peace and quiet of the scene.

In the courtyard before the Loft of Ten Thousand Flowers, a large gingko tree extends its boughs in all directions to interplay with well-spaced *yulan* magnolia's leaves. Judging from its trunk, with a girth larger than a man's arm span, the gingko is likely to have been there

as early as the Ming. The grand artificial mountain excels in magnificence and majesty, and the pond wins with its widely extravert character, but the stream, for all its tininess, can still square them off with its deep and serene presence. What is laudable about the garden's design is that its placid stream and double-lane loggia are well coordinated, whereas through the waterside gazebo's pivotal transitional role, coupled with the brick-framed hollowed windows' segmentation and play of perspective, the space is expanded instantly and layered richly, making it possible to pack a profusion of spellbinding sights into a small lot.

Running eastward, the tiny stream begins to widen gradually upon reaching the front of the Spring Adorning Hall. (There used to be a Western-style building in front of this hall in the southwest, but it was demolished in 1958 to make way for a rearrangement of vistas.)

Opposite the Spring Adorning Hall, and surrounded on three sides by water is the Belvedere of Female Phoenix Waltzing and Male Phoenix Wobbling. In front of the belvedere stands the Hall of Balmy Sunshine, with a wall to the east providing the background for an artificial mountain in the breathtaking shape of an overhanging cliff. This mountain is encircled by a pond filled with water cascading down the rockery. Gazing westward from the Belvedere of Delight on the mountain's summit at the eastern end, one finds that the garden's giant artificial mountain looks as if it were shifted right before the balustrade. Its steep cliff is enclosed behind a tracery-topped wall together with the Verandah of Reposed Comfort. The views beyond this verandah are faintly visible through latticed windows, but if observed from without, the sights within the wall look like belonging to the pavilions and terraces inside the seemingly unfathomable courtyard next door.

The winding roofed walkway of the Spring Adorning Hall provides access to the Room for Private Dialogue by the side of a pavilion with a well under its roof and the studio upon the artificial mountain reachable through a cave in it. The Spring Adorning Hall is

a former site of the people's revolution—in 1853, the third year of the Xianfeng reign of the Qing, it was the headquarters of an uprising launched by Liu Lichuan (1820-1855) and members of his Small Dagger Society, who liberated the seat of Shanghai county from the government for seventeen months.

The Inner Garden was as "East Garden" when it was built in 1709, the forty-eighth year of the Kangxi reign of the Qing. As one of the small traditional gardens in Jiangnan, it is well conserved, with its pavilions, terraces, flowers and trees, as well as the pond and rockeries laid out tidily on a two-*mu* lot. Its architectural centerpiece, the Sunny Snow Hall, faces an artificial mountain whose back and wings are encircled by storied buildings. Its other major buildings include the Loft of Prolonged Serenity and the Wave-Watchers' Loft. The Pavilion of Manifold Verdure sits on a knoll surrounded by a dragon-topped wall and exotic rocks scattered among emerald bamboos. A small gate opens onto the Nine-Lion Pond, with the said pavilion and terrace reflected in its crystal clear water. Anyone sitting in the roofed corridor by the side of the pond and watching the slender bamboos and swimming fish will be impressed with the exceptional serenity of the surroundings. The pond could not be smaller, yet no crampedness is felt as water keeps flowing out of it from the mouth of a cave underneath the dragon-topped wall. The roofed walkway takes a turn at the pond before returning to the Sunny Snow Hall. The name of the Wave-Watchers' Loft, where the waves in the Huangpu River could be observed in old days, is only nominal today because the view is totally blocked by a cluster of shopping malls.

Given their small sizes, the gardens built during the Qing are greedily packed with buildings and sceneries. As pavilions, terraces, lofts and verandahs are squeezed into their small lots, there is no way for these gardens to look natural and commodious. The impact of such greediness is especially apparent in the Inner Garden, which, therefore, compares unfavorably with the Gratification Garden whose

builders refused to be encumbered by frivolities in their bold and rather concise plan for it. However, fine designs can still be found in the Inner Garden, including the methodically circuitous layout close by the Nine-Lion Pond, and the vast space in front of the Sunny Snow Hall.

Notwithstanding the "preordained" differences in layout between the Gratification Garden and its Inner Garden, much of the scraggly disorder in rockwork and architecture and the uncouth additions and repairs are aftermaths of wilful repairs done by the aforementioned trade associations in the late years of the Qing. Future repair and maintenance planners ought to pay due attention to restoring both gardens' original plans, so that all the elements that have an ill effect upon the eye can be removed and all the old delights restored.

In this short article I have said little of the other attractions that belonged to the Gratification Garden in its former days because all of them have been inundated in the din and traffic of metropolitan Shanghai. These include the Greater Lotus Pond, the Nine-Bend Bridge, the Moon-Bestowed Loft, the Exquisite Jade Boulder from Lake Tai, and the Nine Lions Pavilion⁴.

上海的豫园与内园

豫园与内园皆在上海旧城区城隍庙的前后，为上海目前保存较为完整的旧园林。上海市文化局与文物管理委员会十分重视这个名园，除加以管理外，并逐步进行了修整，给人口密度最多的地区以很好的绿化环境，作为广大人民游憩的地方，充分发挥了该园的作用。年来我参与是项工作，遂将所见，介绍于后：

豫园是明代四川布政使上海人潘允端为侍奉他的父亲——明嘉靖间尚书潘恩所筑，取“豫悦老亲”的意思，名为豫园。从明朱厚熜（世宗）嘉靖三十八年（公元1559年）开始兴建，到明朱翊钧（神宗）万历五年（公元1577年）完成，前后花了十八年工夫，占地七十余亩，为当时江南有数的名园（潘宅在园东安仁街梧桐路一带，规模甲上海，其宅内五老峰之一，今在延安中路旧严宅内）。17世纪中叶，潘氏后裔衰落，园林渐形荒废。清弘历（高宗）乾隆二十五年（公元1760年），该地人士集资购得是园一部分，重行整理。当时该园前面已在清玄烨（圣祖）四十八年（公元1709年）筑有“内园”，二园在位置上所在不同，就以东西园相呼，豫园在西，遂名西园了。清道光间，豫园因年久失修，当时地方官曾通令由各同业公所分管，作为议事之所，计二十一个行业各处一区，自行修葺。旻宁（宣宗）道光二十二年（公元1842年）鸦片战争时，英兵侵入上海，盘踞城隍庙五日，园林遭受破坏。其后奕訢（文宗）咸丰十年（公元1860年），清政府勾结帝国主义镇压太平天国革命，英法军队又侵入城隍庙，造成更大的破坏。清末园西一带又辟为市肆，园之本身益形缩小，如今附近几条马路如凝晖路、船舫路、九狮路等，皆因旧时凝晖阁、船舫厅、九狮亭而得名的。

豫园今虽已被分隔，然所存整体，尚能追溯其大部分。上海市的新规划，将来是要将它合并起来的。今日所见豫园是当年东北隅的一部分，其布局以大假山为主，其下凿池构亭，桥分高下。隔水建阁，贯以花廊，而支流弯转，折入东部，复绕以山石水阁，因此山水皆有聚有散，主次分明，循地形而安排，犹是明代造园的一些好方法。

萃秀堂是大假山区的主要建筑物，位于山的东麓，系面山而筑。山积土累黄石而成，出叠山家张南阳之手，为江南现存最大黄石山。山路

泉流迂曲，有引人入胜之感。自萃秀堂绕花廊，入山路，有明祝枝山所书“溪山清赏”的石刻，可见其地境界之美。达巔有平台，坐此四望，全园景物坐拥而得。其旁有小亭，旧时浦江片帆呈现槛前，故名望江亭。山麓临池又建一亭，倒影可鉴。隔池为仰山堂，系二层楼阁，外观形制颇多变化，横卧波面，倒影清晰。水自此分流，西北入山间，谷有瀑注池中。向东过水榭绕万花楼下，虽狭长清流，然其上隔以花墙，水复自月门中穿过，望去觉深远不知其终。两旁古树秀石，阴翳蔽日，意境幽极。银杏及广玉兰扶疏接叶，银杏大可合抱，似为明代旧物。大假山以雄伟见长，水池以开朗取胜，而此小流又以深静颀颀前二者了。在设计时尤为可取的，是利用清流与复廊二者的联系，而以水榭作为过渡，砖框漏窗的分隔与透视，顿使空间扩大，层次加多，不因地小而无可安排。

小溪东向至点春堂前又渐广（原在点春堂前西南角建有洋楼，1958年拆除，重行布置）。“凤舞鸾鸣”为三面临水之阁，与堂相对。其前则为和煦堂，东面依墙，奇峰突兀，池水潏洄，有泉瀑如注。山巔为快阁，据此东部尽头西眺，大假山又移置槛前了。山下绕以花墙，墙内筑静宜轩。坐轩中，漏窗之外的景物隐约可见，而自外内望又似隔院楼台，莫穷其尽。点春堂弯沿曲廊，可导至情话室，其旁为井亭与学圃。学圃亦踞山而筑，山下有洞可通。点春堂，在清奕訢（文宗）咸丰三年（公元1853年）上海人民起义时，小刀会领袖刘丽川等解放上海县城达十七个月，即于此设立指挥所，因此也是人民革命的重要遗迹。

内园原称东园，建于清玄烨（圣祖）康熙四十八年（公元1709年）。占地仅二亩，而亭台花木，池沼水石，颇为修整，在江南小型园林中，还是保存较好的。晴雪堂为该园主要建筑物，面对假山，山后及左右环以层楼，为此园之主要特色，有延清楼、观涛楼等。耸翠亭出小山之上，其下绕以龙墙与疏筠奇石。出小门为九狮池，一泓澄碧，倒影亭台，坐池边游廊，望修竹游鱼，环境幽绝。此池面积至小，但水自龙墙下洞曲流出，仍无局促之感。从池旁曲廊折回晴雪堂。观涛楼原可眺黄浦江烟波，因此而定名，今则为市肆诸屋所蔽，故仅存其名了。

清代造园，难免在小范围中贪多，亭台楼阁，妄加拼凑，致缺少自然之感，布局似欠开朗。内园显然受此影响，与豫园之大刀阔斧的手笔，自有轩轻。然此园如九狮池附近一部分，尚曲折有致，晴雪堂前空间较广，不失为好的设计。

总之，二园在布局上有所差异，但局部地方如假山的堆砌，建筑物的凌乱无计划，以及庸俗的增修，都是清末叶各行业擅自修理所造成的后果。今后在修复工作中，还是要留心旧日规模，去芜存菁，复原旧观才是。

其他如大荷池、九曲桥、得月楼、环龙桥、玉玲珑湖石、九狮亭遗址等，均属豫园所有，今皆在市肆之中，故不述及【从周案十五】。

SHEN'S GARDEN, VERNAL WAVES BRIDGE, SHAOXING

Wen Wei Po, Hong Kong, October 2, 1963

Translated by Ren Xiaomei

Several years ago I went to Shaoxing in Zhejiang province for the restoration of the Temple of King Yu's Footprints¹ and the Orchid Pavilion. Upon my arrival I was lodged in the Memorial Museum of Lu Xun (1881-1936) within spitting distance of the Vernal Waves Bridge² and the Shen's Garden. Recently refurbished, with a surrounding wall newly added, the garden was where Lu You (1125-1210)³ wrote a legendary lyrical poem to lament the collapse of his first marriage under feudal pressure, and a hall on the premises is dedicated to the memory of this celebrated patriotic poet of the Southern Song (1127-1279). For this reason, the Shen's Garden is thronged all year round with visitors who come to pay homage to him. The crowd is larger than usual when spring sets in.

Only a small yard remains of the old Shen's Garden today, where a few ancient trees, a tiny mound decorated with some yellow stone rockeries, and a limpid pond at its foot combine to engender an ambience tranquil and serene to the utmost. Lu You's memorial hall is housed in a row of rooms by the side of the mound, with a funeral portrait of the poet and a collection of his works on display. According to historical records, the Shen's Garden was quite well-known during the Southern Song and several times larger than it is today.

During his brief first marriage, Lu You was in deep love with his wife, Tang Wan (*fl.* 12th century), a childhood sweetheart who happened to be his mother's niece. However, the old lady did not get along with her daughter-in-law and demanded a divorce.⁴

Not wanting to abandon his wife, Lu You hid her away, but his

effort was short lived. The marriage buckled under soon after, and Tang Wan ended up marrying a royal clansman by the name of Zhao Shicheng. In the first lunar month of 1155, the twenty-fifth year of the Shaoxing reign (1131-1163) of Emperor Gaozong,

the two star-crossed lovers chanced upon each other at the Shen's Garden next to the Temple of King Yu's Footprints. When they sat down for some wine and food, an emotional Lu You, at age thirty-one, improvised a lyrical poem to the tune of "Phoenix Hairpin," and scribbled it down on a wall to unbosom himself to his ex-wife:

Fine pink hands⁵, golden wine,
Spring paints willows green walls can't confine.
East wind unfair, affections wearing thin.
In my heart sad thoughts throng;
Our hearts were severed for years long.

Wrong, wrong, wrong!
Spring is as green, in vain she's become lean,
Her silk scarf tear-soaked, red with stains unclean.
Our oath does remain.
No word to her can go.
No, no, no!

Revisiting the Shen's Garden a year later, Tang Wan wrote a poem to the same tune to echo her ex's melancholy feelings:

Worldly sentiments flimsy, Man's feeling hateful,
Easy victim to dusk rain, floral petals tumble.
The wind stills at dawn, yet tear stains remain.
Failing to speak my mind,
I'm left alone to murmur at the balustrade.
Hard! Hard! Hard!

Broken the wedlock, today not as of old,
Sickness haunts me like a swinging hood.
When dusk falls, blaring horns bring in cold.
Fearing to attract an enquirer,
I swallow down tears under joyful cover.
Faker! Faker! Faker!

Tang Wan died shortly afterward, a death which dealt a heavy blow to Lu You and tormented him for the rest of his life. At age sixty-eight in 1192, the third year of the Shaoxi reign (1190-1195) of the Southern Song, he lapsed into a poetic mood again, and wrote the following lines:

To the south of the Temple of King Yu's Footprints, there is a little garden belonging to a man surnamed Shen, where I scribbled down a short lyrical poem on a wall forty years ago. I happen to be here once more, only to find that the garden has changed hands thrice. Sadness wells up my heart when I reread my poem.

When maples begin to redden, oaks are yellowed,
New frost to his temples Heyang judge does dread⁶.
Woods and pavilion plunge me into nostalgic mood,
To whom can I open broken heart on death's road?
My drunk scribbling on ruined wall in dust covered,
Past events drift like cloud or dream long dissipated.
Gone, too, in my aging years are fantasies wild,
As I burn a joss stick in Buddha's niche in solitude.

Lu spent his twilight years in a mountain abode by the Mirror Lake in the outskirts of Shaoxing. Whenever he went to town he would stop at the Temple of King Yu's Footprints and go upstairs to gaze at the Shen's Garden. These visits culminated in "Shen's Garden: Two Stanzas":

For four decades she is unheard from, in dream even,
Willows too old to set catkins flying in Shen's Garden.
Though to be buried under loess upon Mount Ji anon,
Honoring her memory my tears rain on.

As sun sinks below town wall, a painted horn bewails;
The garden's old self is no more, be it pool or terrace.
My heart aches as vernal wave 'neath a bridge greens;
The startled swan's⁷ silhouette I espied once.

The last two lines of the second stanza are so heart-wrenching that they never fail to haunt those familiar with them whenever they walk up the Vernal Waves Bridge and see the clear water flow underneath. Lu You was already seventy-five when he wrote these lines. Turning

eighty in 1205, the year Emperor Ningzong began his Kaixi reign (1205-1208), he wrote "Touring Shen's Garden in a Year-End Dream," in which he lamented once more:

My feet wobble as south town draws nearer;
The Shen's Garden finds me even sadder.
Aroma fills guests' sleeves, plum blooms lingering.
The temple bridge greens as water rises in spring.

As spring sets in anew on south town path's course,
I get an eyeful of plum blooms, yet not her presence;
Long after her bones under Yellow Spring turned ashes,
Locked beneath dust on the wall is my ink's trace.

Indeed, even in the twilight years of his life, Lu You still found his tragic first marriage hard to forget.

The poems quoted in this short article drive home what really happened in a love story gone wrong and shed some light on the history of the Shen's Garden and the Vernal Waves Bridge. Though couched in a plain and unassuming language, the passion and implications behind the lines are forever heartrending and poignant. Today, the Shen's Garden has been restored to its former glory, with the said memorial hall added to honour the poet's memory. Gone forever is the old society with its moribund feudal system. If our Old Man Set Free knew all this, he would wake up smiling broadly in the nether world.

绍兴的沈园与春波桥

前几年我因绍兴的禹庙与兰亭的修复工程，到绍兴去了，住在鲁迅纪念馆。相近有一座春波桥【从周案十六】，桥旁就是沈园，里面并设了南宋爱国诗人陆放翁（游）的纪念馆。沈园亦经过整理，新筑了围墙，常常有从各地方去凭吊的人，尤其是在春日。这里是放翁最有名的一首作品——《钗头凤》词的诞生地。这词使人联想到放翁在旧社会封建势力压迫下的一幕悲剧。

沈园在春波桥旁，现存小园一角，古木数株，在积土的小坡上，点缀一些黄石。山旁清池澄澈，环境至为幽静。旁有屋数椽，今为放翁纪念馆，内部陈列了放翁遗像以及放翁作品。根据记载，沈园在南宋是个名园，范围比今日要大几倍。

放翁原娶唐琬，是他母亲的侄女，两人感情很好。后来因为他母亲不喜欢这位媳妇，放翁又不忍出其妻，将她居住到另一个地方，但终因迫于母命而分开了。唐琬不得已改嫁给当时的宗室赵士程。有一年正月，两人相遇在城南禹迹寺（今尚存，建筑物已重建）沈氏园，酒间放翁赋《钗头凤》一词，题于壁间。词云：“红酥手，黄滕酒，满城春色宫墙柳。东风恶，欢情薄，一怀愁绪，几年离索。错，错，错！春如旧，人空瘦，泪痕红浥蛟绡透。桃花落，闲池阁。山盟虽在，锦书难托。莫，莫，莫！”唐琬的和词云：“世情薄，人情恶，雨送黄昏花易落。晓风干，泪痕残，欲笺心事，独语斜阑。难，难，难！人成各，今非昨，病魂常似秋千索。角声寒，夜阑珊，怕人寻问，咽泪装欢。瞒，瞒，瞒！”这是绍兴二十五年（公元1155年），放翁三十一岁。不久唐琬死，这对放翁当然是一个刺激，这刺激与隐痛可说一直延续到他将死。绍熙三年（公元1192年）放翁六十八岁，又作了一首诗，序云：“禹迹寺南有沈氏小园，四十年前尝题小词壁间，偶复一到，园已三易主，读之怅然。”诗云：“枫叶初丹槲叶黄，河阳愁鬓怯新霜；林亭感旧空回首，泉路凭谁说断肠。坏壁醉题尘漠漠，断云幽梦事茫茫；年来妄念消除尽，回向禅龕一炷香。”放翁晚年是住在城外鉴湖畔的山上，每次入城，必登寺眺望沈园一番，因此又赋了二首诗说：“梦断香消四十年，沈园柳老不吹绵；此身行作稽山土，犹吊遗踪一泫然。”“城上斜阳画角

哀，沈园非复旧池台；伤心桥下春波绿，曾见惊鸿照影来。”第二首诗的末后两句写得那么真挚，今日熟悉这诗的游客过春波桥，望了桥下清澈的流水，总要想起这两句来。此时的放翁已七十五岁了。到开禧元年（公元1205年），放翁八十岁那年，又作了《岁暮梦游沈氏园》的两首诗：“路近城南已怕行，沈家园里更伤情；香穿客袖梅花在，绿蘸寺桥春水生。”“城南小陌又逢春，只见梅花不见人；玉骨久成泉下土，墨痕犹锁壁间尘。”已是垂老的情怀，尚是难忘这段旧事。

我们谈了这一些诗词，使人很清楚地明白了这一个故事与沈园及春波桥的由来，但见文字是那么平易能懂，情感与意思是那么的深刻动人。如今人民政府已将沈园修复，又添设了纪念馆。旧社会一去不复返，旧的封建制度再也不会再来。我想放翁地下有知，亦当含笑于九泉了。

香港《文汇报》1963年10月2日

英译：任小玫

WEST LAKE GARDENS, HANGZHOU

Wenhui Daily, March 14, 1962

Garden architecture at the West Lake has long been a requisite theme for local landscape gardeners. On this lake, it is both complex and diverse, and strewn with monumental landmarks and fabulous scenic "sketches." Essayists and poets through the ages, too, have written profusely about it and come up with quite a few immortal works that, one way or another, give wings to imagination and longings.

The West Lake is one of the premier scenic zones in our country, but it is becoming even more beautiful through the diligent labour of so many people. However, she is by no means a new picture drawn on a piece of white paper. She has a history of over a thousand years that, to say the least, dates back to the Tang-Song period, and is still being rebuilt and revised on the basis of what was done by our predecessors. Chinese literature and history archives abound in Tang poems and Song narratives on it. As society develops, the West Lake changes on as well. More discussions about it are necessary because we cherish the hope that she will become still better.

Wang Weilin (1763-1822)¹ writes in a poem on overhauling his Literary Garden:

I had flower hedge replaced, stone railing mended,
Alas, it's harder to improve a garden than a rondel;
If I can settle down with every word to be recited,
Even a small pavilion or terrace can stand perusal.

These lines, indeed, pinpoint the bittersweetness in the heart of this garden-maker, a feeling that is comparable to a fish knowing whether the water it drinks is cold or warm. Whether it be a flower hedge or a stone railing, uppermost on our minds is how the West Lake can be ameliorated in the ongoing reconstruction drive, an issue that

invariably brings into focus the landscaping style of the gardens on and around the West Lake and calls for contention among a hundred schools of thought. Let me kick off the "contention" by relating a little bit about the lake's scenery.

The West Lake sprawls over the western part of Hangzhou. The present-day Lakeshore Road used to be the city wall in days of yore, so that people on their way to the West Lake must go through the wall's three city gates—the Clean Waves Gate, the Gold-Revealing Gate² and the Qiantang Gate. The Gold-Revealing Gate is where Xu Xian and White Maiden meet for the first time, according to the folktale "Legend of the White Snake." As the lake is encircled on three sides by mountains, with the city wall on its backside, a visitor standing on this wall can look out in three directions at the southern mountain, the northern mountain, and the western mountain that faces downtown Hangzhou in the distance. The sights observed northward and westward are on the sunny side and therefore more eye-pleasing than those seen southward; this explains why most of the buildings in private gardens face north, such as the Mountain-in-View Lofts and the Lotus-Flower Halls. A building made to face a view of the West Lake ought to be situated on the shady side—a dilemma about directions that has to be manoeuvred with utmost ingenuity if satisfaction is to be met in both respects. Only then can all the "beauty's four elements"³ be procured.

Because the western and northern mountains, the Gushan Mountain included, offer the best views of the West Lake, we should consider if it is feasible to erect buildings of excess heights and allow them to obscure too much of the mountain greenery and scenery in both directions. If the Gushan Mountain, for its small size, were covered all over with buildings, would its own vistas be put upside down? Such is the question I once put before the Tongji University architectural designers working on a library to be set up on the Gushan Mountain. Firstly, if the library were an absolute necessity, it should be handled like a small garden contained in a large one, with

its buildings cleverly strewn and concealed behind amidst trees and exotic rockeries—only in this way could architecture and scenery echo each other brilliantly. Secondly, some scenic attractions look their best only if seen in the distance, and a building would come handy for this particular sightseeing purpose. However, this justifies neither a construction spree at the vintage point in question nor the building of a structure to monopolize such a scenic spot. Rather, a building erected for this purpose must be kept at a proper distance from the scenery to be savored, and this is where conceptions for view borrowing or opposite views are needed. If houses were built all over the best part of a scenic belt, not only the belt itself would be ruined, but people staying in them would have no views to feast their eyes on as well. Just as Su Shi (1037-1101) says,

Why can't I see Mount Lushan's true face?

Because I am caught right in its embrace.

Classical verse and prose make frequent mentions of the scenic sights of southern Hangzhou, but in my opinion, the views of the Precious Stone Mountain, the Gushan Mountain and the Memorial Causeway of Bai Juyi up north deserve even more attention.

The landscape of the West Lake is all-encapsulating. There are clear, open water surfaces sparkling like mirrors; sinuous mountain trails now plunging deep into a ravine, now threading their way through an ocean of bamboos; water-side verandahs and storied buildings by the lake; and dwellings tucked away in ravines or nestling against mountain coves. Even vistas of the same kind can look different because of their different whereabouts. It is the rich and varied mountains and waters that make the matchless West Lake Scenic Resort possible and provide landscape gardeners with ample grounds to fall back on when adapting their designs to actual conditions.

Compositions vary with contents and genres that include long essays and short vignettes, but no matter what the content or genre, every composition must be pertinent to its subject matter and

methodically written. Qian Yong (1759-1844) says a mouthful as he puts it,

Making a garden is like writing prose or verse;

Every twist and turn must be made judicious.

This line also justifies the requirement for a garden to have a tortuous plan with plenty of changes. The vastly changeable scenery available at the West Lake can be likened to such literary genres as poetry and rhymed prose that offer the needed options for writing a composition—what a landscape gardener needs to do is to come up with well-conceived blueprints and know where to put his finishing touch to make what is better still better.

I feel that arrangements ought to be made painstakingly before we can do something about the West Lake's myriad scenic gems. But most importantly, we have got to seek out all the historical records and literary allusions, so that all-round fieldwork can come under way for us to look here and there and search high and low for a number of vintage sightseeing points. Only after such vintage points are selected can we decide where new buildings can be erected, where viewing facilities can be built without being encumbered by excess buildings, which places are quiet enough for the construction of sanatoriums, and where a cultural recreational center is needed. Everything, however, is contingent on "siting." As a couplet that graces the Belvedere with Windows on All Four Sides on the premises of the Xiling Seal Engravers Society puts it,

Affective is facet after facet,

With water hugging hills that hug water;

Affinitive is heart to heart,

As man inherits the land that inherits him.

This couplet's first line captures exactly the two requirements pivotal to the craft of gardens: "siting" and "view borrowing." I surmise anyone who has been to the Belvedere with Windows on All Four Sides must have been deeply impressed. The Lei's Peak⁴ Pagoda in the southern mountain area is an important structure designed for view highlighting.

A colossal scenic zone invariably contains views that are either "dormant" or "prominent." The West Lake with its pictureperfect natural environment is no exception, where the lake surface and the surrounding mountains are not only affective in every façade but also captivating wherever they burst upon the eye. Its Cloud-Piercing Twin Peaks seem to be close at hand when observed from afar but disappear into nowhere when seen close at hand; its Taoguang⁵ Temple and Dragon Well Village offer the best venue to discover narrow footways meandering their way to mystic recesses. These and other clever techniques employed by our forbearers in handling different scenic spots need be inherited and carried forward. To weed through the old and bring forth the new, and to avoid falling into old rut, we still need to take stock of our heritages through thoroughgoing investigations and all-round analyses. Only thus can we be down-to-earth enough when arranging garden views.

In a mammoth scenic zone like the West Lake, architecture and scenery are mutually dependent, with the former playing a major role in the latter. As the saying goes, "Good flowers need a good pavilion or terrace to shine forth." Such a relationship is pronounced in every Chinese garden. Unlike private gardens, the West Lake does not need a legion of pavilions, terraces, lofts and chambers to stand on its own, but it cannot do without such buildings altogether. Different from the traditional gardens of Suzhou and Yangzhou, the West Lake does not flaunt gigantic buildings with flying eaves in the southern Chinese tradition, nor are red chambers under blue-glazed tile roofs congruous to it. What is becoming to it may well be white-washed walls and unadorned tiled roofs that are commonplace in central Zhejiang province, whose simplistic, yet graceful style sets people's minds at peace without fail. Large buildings may need flying eaves, whereas what small ones need are well-arranged *yingshan* (pitched roofs with two slopes on the front and the rear respectively), *xuanshan* (*yingshan* plus two walls up through to the roof on the left and right) or *shuiqiangfaqiang* (overhang of roof ridges achieved by turning up the

four ridge ends instead of the minor hip rafters) roof forms, winding roofed walkways, and halfpavilions. Take, for example, the complex centered on the Buddhist Incense Belvedere in the Summer Palace, Beijing. Its main building features a gigantic roof with glazed tiles, but its secondary halls, chambers and pavilions are all covered with double-eave roofs with gray tiles, which shows that even in feudal society royal buildings were not always treated with the same level of extravagance and pomp. In the vast West Lake scenic zone, buildings should be applied flexibly—they ought to be given prominence in one place, kept in low profile in another, and scattered somewhere else. Before actions are taken, the following question must be answered: which should play the leading role, architecture or scenery? But under all circumstances, architecture and scenery should be made to set off each other in delightful ways. The fact that the buildings at the West Lake have taken on new functions today makes it impossible to emphasize which should come first, content or form, but it prompts us to be mindful of the unity between the two. Fortunately, these questions are not at issue for the West Lake, which has already got everything needed for a mammoth scenic zone—waters and mountains, ravines and peaks, frontal mountains and back hills, among other things. Unity in style throughout the zone, and the salient features of every scenic attraction on its premises can be maintained if the entire zone is clearly and strictly demarcated.

The West Lake has long established itself with its "Ten Sights," but more fabulous sights are needed in the days to come. The "Ten Sights" refer to the best of all views that the West Lake has to offer. Some are seasonal, like "Spring Sets In on Memorial Causeway of Su Shi" and "Autumn Moon over a Calm Lake"; some occur at a particular moment of the day, like "Sunset Beyond the Lei's Peak Pagoda"; some are related to weather, like "Wind-Blown Lotus Flowers at a Winery"⁶ and "Remnant Snows on a Broken Bridge"; some accentuate mountain views, like "Cloud-Piercing Twin Peaks"; and some are pleasing to one's ears, like "Orioles Singing in Weeping Willows." It is no

accidental for these sights, available at different sites and times and in different spaces, to be entrancing and enduring and for their reputation to spread far and wide. Once the secret to such a sight is given away, it becomes the toast of the town in no time, not to mention the fact that no visitor leaves the West Lake without being indelibly impressed. For this reason, I would like to call attention to the need to make every scenic sight look unique or focused on a central theme. A scenic place cannot live up to its reputation if it is not unique enough or overshadowed by secondary things. If, for example, the lotus flowers at the "Wind-Blown Lotus Flowers at a Winery" merely serve ornamental purposes, how can the sight's name make sense? I would like to propose that this complex issue be handled with utmost caution. In other words, our gardens should exude poetic sentiment and picturesque allure, their scenic spots should look at once attached and detached, their mountains should be enshrouded in mist and their waters ethereally misty. The West Lake may be characterized in various ways—as a painting, a poem, an enormous garden, or whatever—it all depends on what point of view one takes.

Trees have a certain role to play in defining a garden's character. I remember reading verse lines that bring into bold relief the landscape of the West Lake,

The lake that sparkles like an emerald,
With green mountains all around,
Willows, six bridges in misty water mingled.

The term "misty water" instantly brings to mind the weeping willows on the West Lake; through it one sees in one's mind's eye their soft twigs swaying to stroke the water surface ever so affectionately. Just like the trees mentioned in such sayings, "The city greened with willows is none other than Yangzhou" and "Weeping willows at the White Gate are dense enough to shield crows," the willows are what the West Lake and the two cities of Yangzhou and Nanjing depend heavily on to be carpeted in emerald. Other trees, like pines for Mount

Huangshan and redleaf trees for the Rosy Clouds' Dwelling Mountain, all adequately serve forestation purposes in their respective areas. At the West Lake, however, some other tree species are needed to properly supplement or mix with the willows, but such trees ought to be sensibly selected. Otherwise, the aftermath would be unimaginable.

Just as a painting must have cohesive tone and style, just as an artificial mountain must be built with a cogent texturing pattern, I believe the West Lake scenic zone should be covered mainly with willow trees because they love water and are easy to take care of and most effective in keeping the land green. What is more, the choice of trees must tally with the "personality" of a particular scenic spot. A tree species chosen properly can easily become the landmark of a certain place. Examples of it abounds in Hangzhou, such as the *Phoebe nanmu* grove at the Taoguang Temple, the bamboos that flank the footpaths at Cloud Dwelling Valley and Dragon Well Village, the sweet-scented osmanthus in the Perfect Enlightenment Gully, and the plum trees at the Gushan Mountain. The combination of principal and subsidiary trees helps improve a place's scenic prospects. The West Lake scenic zone also abounds in camphor trees and bamboos. It takes only a few years for camphor trees to develop canopy-like foliage, whereas bamboos become tall enough to provide cooling shades a year after they are planted, not to mention the fact that both are of considerable economic value. All this is why they are often adopted as the major greeneries for gardens in central Zhejiang. I would like to suggest both camphor trees and bamboos be popularized so that they can become "hallmarks" for gardens all over the province. As to exotic tree species, they can be used with discretion, but we had better keep them in botanical gardens, which is more effective than having them scattered everywhere. The potted dwarf trees I have seen in Zhejiang are richer and more varied than those in Suzhou and Yangzhou. Of all the potted stumps of plum trees, fingered-citrons, and fragrant citron trees in Zhejiang, those crafted by artisans from Jinhua and Lanxi counties are peerless, particularly those having moss-covered branches

and jade-like plum flowers, and those with golden fruits hanging down green twigs. These potted dwarf trees are bound to make the West Lake even more enchanting if their local characteristics become even more pronounced.

西湖园林风格漫谈

西湖的园林建筑是我们园林修建工作者的一个重大课题，它既复杂又多样，其中有巨作、有小品，是好题材。古来的作家诗人，从各种不同角度，写成了若干的不朽作品，到今日尚能引起我们或多或少的幻想和憧憬。

西湖是我国最美丽的风景区之一。今天在党的领导下，经过多少人的辛勤劳动，使她越变越美丽。可是西湖并不是从白纸上绘制的一幅新图画，她至少已有一千多年的历史（说得少点从唐宋开始），并在前人的基础上一一直在重建修改。唐人诗词上歌咏的与宋人笔记上记载的西湖，我们今天仍能在文献资料中看到。社会在不断发展，西湖也不断地在变，今天我们希望她变得更好，因此有必要来讨论一下。清人汪春田有重葺文园诗：“换却花篱补石阑，改园更比改诗难；果能字字吟来稳，小有亭台亦耐看。”这首诗对我们园林修建工作者来说，真是一言道破了其中甘苦的，他的体会确是“如鱼饮水，冷暖自知”。花篱也罢，石阑也罢，我们今天要推敲的是到底今后西湖在建设中应如何变得更理想，这就牵涉到西湖园林风格问题，这问题我相信大家一定可以“争鸣”一下。如今我来先谈一谈西湖的风景。

西湖在杭州城西，过去沿湖滨路一带是城墙，从前游西湖要出钱塘门、涌金门与清波门，因此《白蛇传》的许仙与白娘娘就是在这儿会面的。她既位于西首，三面环山，一面临城，因此在凭眺上就有三个面：即向南山、北山及面城的西山。以风景而论，从南向北，从东向西，比从北望南来得好，因为向北向西，山色都在阳面，景物宜人，如私家园林的“见山楼”“荷花厅”多半是北向的。可是建筑物面向风景后，又不免要处于阴面，想达到“二难并，四美具”，就要求建筑师在单体设计时，在朝向上巧妙地考虑问题了。西山与北山既为最好的风景面，因此应考虑这两山（包括孤山）是否适宜造过于高大的建筑物，以致占去过多的绿化面与山水；如孤山，本来不大，如果重重地满布建筑物的话，是否会产生头重脚轻失调现象。同济大学设计院在孤山图书馆设计方案时，我就开宗明义地提出了这个问题。即使不得已在实际需要上必须建造，亦宜大园包小园，以散为主，这样使建筑物隐于高树奇石之中，两者会

显得相得益彰。再其次，有些风景遥望极佳，而观赏者要立足于相当距离外的观赏点，因此建筑物要发挥观赏佳景作用，并不等于要据此佳丽之地大兴土木，甚至于踞山盘居，而应若接若离地去欣赏此景，这就是造园中所谓“借景”“对景”的命意所在。我想如果最好的风景面上都造上了房子，不但破坏了风景面，即居此建筑物中亦了无足观，正所谓“不见庐山真面目”了。过去诗文中常常提到杭州城南风光，依我看还是北望宝石山、孤山与白堤一带景物更为美妙吧！

西湖风景有开朗明净似镜的湖光，有深涧曲折、万竹夹道的山径，有临水的水阁湖楼，有倚山的山居岩舍，景物各因所处之地不同而异。这些正是由西湖有山有水的优越条件而形成。既有此优越的条件，那么“因地制宜”便是我们设计时最好的依据了。文章有论著、有小品，各因体裁内容而异，但总是要切题，要有法度。清代钱泳说得好：“造园如作诗文，必使曲折有法。”这就提出了园林要曲折、要有变化的要求，因此西湖既有如此多变的风景面，我们做起文章来正需诗词歌赋件件齐备，画龙点睛，锦上添花，只要我们构思下笔就是。我觉得今后对西湖这许多不同的风景面，应事先好好地安排考虑一下，最重要的是先广搜历史文献然后实地勘察，左顾右盼，上眺下瞰，选出若干观赏点。选就以后，就能规定何处可以建筑，何处只供观赏不能建造多量建筑物，何处适宜作安静的疗养处，何处是文化休憩处。这都要先“相地”，正如西泠印社四照阁上一联所说的：“面面有情，环水抱山山抱水；心心相印，因人传地地传人。”上联所指，是针对“相地”“借景”两件园林中最主要的要求而言，我想如果到四照阁去过的人，一定体会很深。而南山区的雷峰塔，则更是重要的一个“点景”建筑。

大规模的风景区必然有隐与显不同的风景点，像西湖这样好的自然环境，当然不能例外，有面面有情、处处生姿的西湖湖面及环山；有“遥看近却无”的“双峰插云”；更有“曲径通幽”的韬光龙井。古人在处理这许多各具特色的风景点，用的是不同的巧妙手法，因此今后安排景物时，如何能做到不落常套，推陈出新，我想对前人的一些优秀手法，以及保存下来的出色实例，都应作进一步的继承与发扬。当然我们事先应作很好的调查，将原来的家底摸摸清楚，再作出全面的分析，这样可能比较实事求是一些。

西湖是个大风景区，建筑物对景物起着很大的作用，两者互相依存，所谓“好花须映好楼台”。尤其是中国园林，这种特点更显得突出。

西湖不像私家园林那样要用大量的亭台楼阁，可是建筑物却是不可缺少的主体之一。我想西湖不同于今日苏扬一带的古典园林，建筑物的形式不必局限于翼角起翘的南方大型建筑形式；当然红楼碧瓦亦非所取，如果说能做到雅淡的粉墙素瓦的浙中风格，予人以清静恬适的感觉便是。大型的可以翼角起翘，小型的可以水戗、发戗或悬山、硬山，游廊、半亭，做到曲折得宜，便是好布置。我们试看北京颐和园主要的佛香阁一组用琉璃瓦大屋顶，次要的殿宇馆阁，就是灰瓦复顶。即使封建社会皇家的穷奢极欲，也还不是千篇一律的处理。再者西湖范围既如此之大，地区有隐有显，有些地方建筑物要突出，有些地方相反地要不显著，有些地方要适当地点缀，因此在不同的情况下，要灵活地应用，确定风景和建筑何者为主，或风景与建筑必须相映成趣，这些都要事先充分地考虑。尤其是今天，西湖的建筑物有着不同的功能，这就使我们不能强调内容为先还是形式为先，要注意到两者关系的统一。好在西湖范围较大，有水有山，有谷有岭，有前山有后山，如果能如上文所说能事先有明确的分区，严格地执行，这问题想来也不太大。如此就能保持整个西湖风格的统一，与其景物的特色。

西湖过去有“十景”，今后当有更多的好景。所谓“十景”是指十个不同的风景欣赏点，有带季节性的如“苏堤春晓”“平湖秋月”；有带时间性的“雷峰夕照”；有表示气候特色的“曲院风荷”“断桥残雪”；有突出山景的“双峰插云”；有着重听觉的“柳浪闻莺”；等等。总之根据不同的地点、时间、空间，产生了不同的景物，这些景物流传得那么久，那么深入人心，是并非偶然的。好景一经道破，便成绝响，自然每一个到过西湖的人都会留下不灭的印象。因此今日对于景物的突出、主题的明确，是要加以慎重考虑的。如果景物宾重于主，或虽有主而不突出，如“曲院风荷”没有荷花，即使有亦不过点缀一下，那么如何叫人一望便知是名副其实呢？所以我这里提出，今后对于这类复杂课题，都要提高到主宾明确，运用诗情画意、若即若离、空濛山色、迷离烟水的境界去进行思考处理。因此说西湖是画，是诗，是园林，关键在我们如何地从各种不同角度来理解她。

树木对于园林的风格是起一定作用的。记得古人有这样的句子：“明湖一碧，青山四围，六桥锁烟水。”将西湖风景一下子勾勒了出来。从“六桥烟水”四字，必然使读者联想到西湖的杨柳。这是烟水杨柳，是那么的拂水依人。再说“绿杨城郭是扬州”“白门杨柳好藏鸦”，都是说像

扬州、南京这种城市，正如西湖一样以杨柳为其主要绿化物。其他如黄山松、栖霞山红叶，也都各有其绿化特征。西湖在整个的绿化上不能不有其主要的树类，然后其他次要的树木才能环绕主要树木，适当地进行配合与安排。如果不加选择、兼收并蓄的话，很难想象会造成什么结果。正如画一样必定要有统一的气韵格调，假山有统一的皴法，我觉得西湖似应以杨柳为主。此树喜水，培养亦易，是绿化中最易见效的植物。其次必定要注意到风景点的特点，如韬光的楠木林，云栖、龙井的竹径，满觉陇的桂花，孤山的梅花，都要重点栽植，这样既有一般，又有重点，更好地构成了风景地区的逗人风光。至于宜于西湖生长的一些花木，如樟树、竹林，前者数年即亭亭如盖，后者隔岁便翠竿成荫，在浙中园林常以此二者为主要绿化植物，而且经济价值亦大，我认为亦不妨一试，以标识浙中园林植物的特点。至于外来的植物，在不破坏原来风格的情况下，亦可酌量栽植，不过最好是专门辟为植物园，其所收效果或较散植为佳。盆景在浙江所见的，比苏州、扬州更丰富多彩。我记得过去看见的那些梅桩与佛手桩、香橼桩，培养得好，苔枝缀玉，碧树垂金，都是他处不及的，皆出金华、兰溪匠师之手。像这些地方特色较重的盆景，如果能继续发扬的话，一定会增加西湖不少景色。

《文汇报》1962年3月14日

SLENDER WEST LAKE, YANGZHOU

Wenhui Daily, June 14, 1962

The Slender West Lake of Yangzhou is a narrow strip of water dotted with some isles at the confluence of several rivers. On its banks numerous twigs of weeping willows flutter in the wind ever so gently. As landmarks go, the Five-Pavilion Bridge and the White Pagoda situated in the water's widest section are to the Slender West Lake what the Jade Flowery Islet is to the Beihai Park of Beijing and what the Pagoda in Protection of Qian Chu is to the West Lake of Hangzhou. The White Pagoda looks like the very spit of its namesake in the Beihai Park except that the latter looks more proportionate; tall, slim and graceful as it gazes down at the lake through sun-lit clouds, it is worlds apart from the solid and poised presence of its prototype. Looking into the distance from the Anglers' Platform, one finds the White Pagoda and the Five-Pavilion Bridge framed separately in its two gates, forming a picture of high spatiality and spirituality. Every visitor who catches this vista intentionally or unintentionally will be captivated by its highly resonant but utterly unspeakable delicateness. This is a textbook example of view borrowing, a technique unique to the traditional Chinese craft of gardens. The largest isle in the lake is fashioned in imitation of the Golden Hill of Zhenjiang, and is therefore named "Lesser Golden Hill." The adjectives in the names of the Lesser Golden Hill, the Slender West Lake and the Lesser Qinhuai River are apt for the graceful images of these three landmarks of Yangzhou. For the same reason, I would like to liken the Slender West Lake to a potted miniature landscape—despite its smallness one can easily decipher an abundance of beauty from it.

There are no tall mountains around the Slender West Lake. The Mountain-Level Hall and the Avalokitesvara Mountain to its northwest

are neither sky-reaching nor precipitous—they just bear a rough resemblance to a mountain. Gardens were therefore built along the lakeshores to adorn the landscape of Yangzhou. From the *Grand Occasions of Southern Inspection Tours*, a Qing-dynasty compendium of one hundred and twenty volumes, as well as Zhao Zhibi's *An Illustrated Record of the Mountain-Level Hall*, Li Dou's *Record of the Painted Pleasure Boats of Yangzhou*, and Luo Zaitian's *Paintings of Scenic Spots in Yangzhou*, we may get some idea about the scenery of the Slender West Lake in its heyday under the reigns of emperors Qianlong and Jiaqing of the Qing. There, every loft, terrace, pavilion, or verandah, every chamber or cave, and every flower or rockery dating back to those years was not without its innovative conception. The private gardens built around the Slender West Lake were now congregated, now dispersed, but all the while they accommodated to each other and borrowed one another's vistas to form a fabulous scenic belt that extended from the North City Gate to the Mountain-Level Hall, with boats on the lake ferrying visitors from one garden to another. The buildings around the lake were single- or two-storied structures laid out on an irregular, ever-changing plan that enhanced the three-dimensional space and echoed the low-lying water surface, thereby giving prominence to the White Pagoda and the Five-Pavilion Bridge and incorporating far-off scenes and sights at the Mountain-Level Hall and Avalokitesvara Mountain through view-borrowing.

Extra attention was paid to meshing the buildings along the lakeshore with the water surface, and to guiding the water to flow along winding embankments, so that the water surface could be utilized to increase the limited land acreage. The techniques adopted by our predecessors in the scenic arrangement of the Slender West Lake are still viable today. As to artificial mountains, I believe they should be built into flat ridges or gentle slopes to form undulating terrains that help break the flat and straight lake surface and the flat field around it, so that the landscape can be beautified and more changes can be facilitated to the topography and spatial segmentation

of small gardens contained in larger ones.

The Yangzhou school of traditional gardens is a synthesis of the grand and majestic style of north China and the subtle and elegant style of south China, a synthesis in which the relationship between Suzhou gardens' emphasis on gracefulness and subtlety and northern gardens' stress on weightiness and solidity is tweaked to a nicety. In terms of color tones, it would not hurt to add a bit of bright color to the low-key ornamental style of Yangzhou gardens, which is how the Slender West Lake's mist-and-drizzle water surface is brought to life in vivid and refreshing ways. The Rainbow Bridge of today, for instance, was known as "Red Bridge" in bygone days for its vermilion-lacquered balustrades.

The Mountain-Level Hall commands a vantage point over the scenic zone of the Slender West Lake. Those standing in front of it can stretch their eyes over many a mile of terra incognita over the land of the Yangtze River Delta, and what they can see is thoroughly condensed in the couplet inside of the Mountain-Level Hall,

Rising at dawn to lean over a rail,
All the six dynasties' green hills I behold;
Raising a cup of wine at nightfall,
Two thirds of shiny moon I see overhead.

The celebrated poet Du Mu (803-852) improvised while climbing a mountain on an autumn day,

Faint are the green hills and distant the waters,
At autumn's end Jiangnan's grass never withers.

The hall stands as tall as the mountains on the other side of the Yangtze, hence its name, the "Mountain-Level Hall," which captures exactly the secret of the view in question. As the Mountain-Level Hall commands a far and wide vista, discretion should be applied to the heights of buildings in front of it. If a thick cluster of storied buildings were built at its foot so that the visitor can look afar to see the hilly scenery of the Jiangnan area and look down at the Slender West Lake close at hand, they would unavoidably rival with the Mountain-Level Hall for visitors' favor, but neither side would be happy with the

result. My suggestion is that nearby buildings be kept low enough to hug the winding tail of the lake's scenic belt. In this way the height of the hall is brought into focus and people's field of vision will not be blocked, so that when they look afar against a railing beyond the Slender West Lake's mirror-like surface, he would keep aching and oohing over the celestial picture of hills and abodes gleaming amidst the thick foliage of weeping willows.

As an ancient city dating back to the Sui-Tang period (581-907), the former site of Yangzhou behind the Mountain-Level Hall is strewn with spots of cultural and historical interest accumulated over the last millennium and more. Such a fact is deeply ingrained in people's minds through so many famous men of letters' poems and inscriptions. These include the maze-like former palaces of Emperor Yang of the Sui, the Bridge of Twenty-Fours eulogized by Du Mu and Jiang Kui (1154-1221) in verse, the Mountain-Level Hall built by Ouyang Xiu (1007-1072), and the Rainbow-Leaning Garden at the Rainbow Bridge, where famous poets gathered to improvise verse to the tinkling of earthen bowls. Like the Slender West Lake's Twenty Sceneries, including the Mist and Rain over Four Bridges, the White Pagoda in Clouds on a Fine Day, the Spring Terrace under the Bright Moon, and the Shugang Hillock in Evening Glow, they have enticed numerous visitors to the Slender West Lake and added a wealth of perennial tales to local folklore. These ancient sites and scenic resorts should be assiduously selected for repairs and refurbishment, for every one of them is a condensed embodiment of the Chinese craft of gardens as well as a crystallization of landscape in combination with literature and art.

As Yangzhou used to be known as a "Green Willow City," and as the Green Willow Village is found on the Slender West Lake, it follows all too naturally that the Slender West Lake should be kept green primarily with weeping willows. The willow tree's high profile in this city probably began with the excursions of Yangzhou by Emperor Yang of the Sui, and has since been maintained to this day. Having

gone through a metamorphosis of more than one thousand years, the fascinations of Yangzhou seem to have everything to do with the emerald richness of the willows. By singlehandedly dressing up Yangzhou into the famed seat of the Eastern Huainan Circuit, these willows cannot but be regarded as a success story. Achieved by giving due consideration to a single tree species' graceful appearances and high adaptability to local conditions, such a success need be made to last.

Talk about the springtime beauty of the Slender West Lake, and I think my favorite view is that of the Long Dyke Draped with Spring Willows. Talk about the lake when the sun emerges right after a summer rain, and I love nothing more than the Mist and Rain over Four Bridges. After all, weeping willows can always be suited to their environment to a T wherever they find themselves, be it a mountain slope or riverside, along a canopied walkway or at the foot of a pavilion. They look exceptionally pliant and endearing when swaying in the wind.

Apart from the willows, Yangzhou is also known for its arboreous and herbaceous peonies. In fact, a woody peony terrace, and a herbaceous peony hedge in particular, can be the centerpiece of a certain garden. The popularity of the herbaceous peony on the Slender West Lake during the Song is well attested in the "The Yangzhou Adagio" by Jiang Kui:

The Bridge of Twenty-Fours does still exist,

While ripples glitter and undulate,

Frigid is the moon ever so silent.

I wonder the peonies that by the bridges sit,

For whom do they bloom year in, year out?

The bamboos, too, enjoy a long history in Yangzhou, where, as the saying goes, "Beauty lies west of the bamboo-flanked road." Ancient painters like Shitao (1642-c. 1707), Zheng Xie (1693-1765) and Jin Nong (1687-1763), among others, have bestowed a rich legacy of bamboo paintings on posterity. The Yangzhou species of bamboo

differs from its Jiangnan counterparts in that there is always a touch of masculine vigour in its serene gracefulness. There being no mountains in the surroundings of the Slender West Lake, it seems the bamboo should be planted widely so that its lush green foliage can sway and roll in the air while goose-yellow willows' twigs keep stroking the lake surface—it does not sound unreasonable to enhance the lake's appeals by bringing the elegant and divine charms of both the bamboo and the willow into full play, does it?

The other plants that thrive in the climate of the Slender West Lake include *yulan* magnolia and plantain, nandina and wintersweet, crabapple and flowering peach and apricot. All of them should be cultivated because, firstly, they are harmonious with bamboos and willows in both color and imagery, and, secondly, they can take seasonal turns to bedeck the lakeside scenery with beautiful leaves and flowers. The evergreen "book-binding grass" spotted at the foot of a mountain or a tree is another local specialty. The lake being rather small, the acreage of its water space sown to lotus ought to be strictly minimized. Pines, supplemented with ginkgos, should be planted as barriers around the Mountain-Level Hall, for both trees can grow tall enough to form a wall, not to mention the fact that Yangzhou actually leads all the ancient cities in this country in the number of mammoth ginkgo trees. All the big trees in the city should be preserved the best we can in future urban development efforts. Just as *The Craft of Gardens* puts it,

If a site is covered with many old trees that would get in the way of the eaves or walls of a building, one must erect a house at a certain distance, or just lop off a few branches to keep off the roof. As the saying goes, it is easy to carve pillars and build flying beams, but it takes a long time to get a Chinese scholar tree to grow tall and develop a shady foliage.

Yangzhou's miniature landscapes follow a hallowed tradition that has long been neck and neck with those of Suzhou in the Jiangnan area. Rugged, wrinkled, durable, and highly resistant to the elements and adaptable to the environment, such miniature landscapes are marked

for their robust and richly varied contours and postures without the least bit of pretentious bashfulness. Thanks to local craftsmen's painstaking efforts in pruning and binding, every dwarf pine, cypress or little-leaf box features curvy branches on an ancient-looking trunk, with boughs dexterously trained into "cloud sheets"—artistic results attained by dovetailing human craftsmanship to nature's endowment. The other Yangzhou miniature landscapes include potted chrysanthemums, stumps of peach, plum and pomelo trees, and medicinal citrons, but every one of them is alluring in a special way. The Yangzhou style of miniature landscapes is a hybrid of southern and northern styles, particularly those of Jiangsu and Zhejiang provinces. It is the local artists' enduring innovative craftsmanship that makes them stand out as a school in their own right.

To enjoy and digest the charms of all the man-made scenic wonders along the small, narrow and gyrating water surface of the Slender West Lake calls for an appropriate means of touring and sightseeing. Observed through the window of a fast-moving automobile, the entire scenic resort comes and goes without so much as an eyewink, which robs the visitor of the chance to feast his eyes on every scenery in rain and breeze or the gentle waves beyond misty islets. If the automobile is replaced with a painted boat that starts from the Lesser Qinhuai River in city proper and spies slowly into the lake, the lengthened route and timetable allow the visitor to scrutinize and ruminate, through the boat's window frames, numerous enchanting pictures that flash by in a magic montage. Such an experience, which also allows for measured drinking and toasting, is worlds apart from wining and dining on board a pleasure yacht that prowls the West Lake in Hangzhou. As Wang Shizhen (1634-1711)¹ writes in a poem:

A painted boat passed 'neath the bridge at high noon,
Gone are her figure and scented sleeves all too soon.

My advice to those opting to visit the Slender West Lake: Take your time and appreciate everything you can see over there. It makes no

sense to go all the way there only to take a cursory look and leave in a hurry.

The inscriptions on couplets and boards in traditional Chinese gardens and scenic resorts are most helpful to visitors, offering them the most succinct and beautiful interpretations to relevant scenes and sights. The Slender West Lake is no exception, where every phrase or sentence for such inscriptions was painstakingly hammered out, and their calligraphic styles discreetly chosen. Just to cite two such couplets quoted from Tang poems on the Loft of Mist and Rain over Four Bridges in the *Record of the Painted Pleasure Boats of Yangzhou*:

Silent the flowers, gentle the swinging tree shadows;
Thin clouds in sunny sky, spreading out the willows.

Spring mist arises from ancient stones;
Sparse willows reflected in new pools.

Both couplets, coming readily from the poets' fingertips, brim with wits and verve. In them, scenery and architecture boil down to one word, "leanness," which is apt for the Slender West Lake, and contravening words are prudently shunned. Thus unity is maintained not only on the color tones of various scenery but also on the poems selected, which convinces me that the craft of Chinese gardens is a combination of multiple principles of art.

To sum up, as a scenic resort of Yangzhou, the Slender West Lake is a veritable depository of small gardens designed and built by bringing a narrow strip of water and natural terrain into full play. Such gardens are at once detached and attached, some playing a leading role, some are supplementary, but all the time they borrow and accommodate to each other's views. Such mutual view borrowing, though limited in scope, brings about an infinite panoply of scenes and sights. Many such gardens are patterned after prototypes in ways that are never mechanical but highly creative, which is why the Slender West Lake can figure prominently among all traditional Chinese gardens with a "personality" peculiarly its own. It is thus clear

the craft of gardens does have its principles but offers no set patterns. Once such principles as "accommodating to different conditions" and "view borrowing" are deftly mastered, every plateau or low slope, and every mountain pavilion or waterside verandah can be deployed with a high degree of adaptability and discipline, and all the scenic sights thus created can prolong their "youth" no matter what happens to their environment.

The rise of the picturesque Slender West Lake is not without its historical background. To refurbish and preserve such a historical scenic resort, we have got to bear its inherent characteristics in mind, but more importantly, we must consider how to adapt it to everyday life today, so as to make the past serve the present without ruining its originality. This issue merits deliberation and discussion. If we do a good job in this regard, more new scenes and views are bound to emerge beyond the existing twenty views of the Slender West Lake. As to such issues as how to adapt scenic attractions to the circumstances and achieve good view-borrowing results while economizing on human and material resources, I believe the Slender West Lake has a lot to learn from, especially in how to arrange gardens and scenic belts in medium-sized and small cities. However, the wisdom and initiatives of localities must be keenly mobilized, for only thus can gardens look different from one another and every scenery thus created can stay novel on its own. This account of mine about the Slender West Lake is, if anything, just a glimpse of it.

A new fairyland as if painted on a scroll ten-mile wide;

Having two-thirds shiny moon, Yangzhou is in itself old.

It is my belief that through reconstruction efforts in the days to come, the Slender West Lake shall become more enchanting.

瘦西湖漫谈

扬州瘦西湖由几条河流组织成一个狭长的水面，其中点缀一些岛屿，夹岸柳色，柔条千缕。在最阔的湖面上，五亭桥及白塔突出水面，如北海的琼华岛与西湖的保俶塔一样，成为瘦西湖的特征。白塔在形式上与北海相仿佛，然比例秀匀，玉立亭亭，晴云临水，有别于北海白塔的厚重工稳。从钓鱼台两圆拱门远眺，白塔与五亭桥正分别逗入两圆门中，构成了极空灵的一幅画图。每一个到过瘦西湖的人，在有意无意之中见到这种情景，感到有但可意会不可言传的妙境。这种手法，在园林建筑上称为“借景”，是我国造园艺术上最优秀巧妙手法之一。湖中最大一岛名小金山，它是仿镇江金山而堆，却冠以一“小”字，此亦正如西湖之上加一“瘦”字、城内的秦淮河加一“小”字一样，都是以极玲珑婉约的字面来点出景物。因此我说瘦西湖如盆景一样，虽小却予人以“小中见大”的感觉。

瘦西湖四周无高山，仅其西北有平山堂与观音山，亦非峻拔凌云，唯略具山势而已，因此过去皆沿湖筑园。我们从清代《乾隆南巡盛典》、赵之璧《平山堂图志》、李斗《扬州画舫录》及骆在田《扬州名胜图》等来看，可以见到清代乾隆、嘉庆二代瘦西湖最盛时期的景象。楼台亭榭，洞房曲户，一花一石，无不各出新意。这时的布置是以很多的私家园林环绕了瘦西湖，从北门直达平山堂，形成一个有合有分、互相“因借”的风景区。瘦西湖是水游诸园的通道。建筑物类皆一二层，在平面的处理上是曲折多变，如此不但增加了空间感，而且又与低平水面互相呼应，更突出了白塔、五亭桥，遥远地又以平山堂、观音山作“借景”。沿湖建筑特别注意到如何陆水交融，曲岸引流，使陆上有限的面积用水来加以扩大。现在对我们处理瘦西湖的布置上，这些手法想来还有借鉴的必要。至于假山，我觉得应该用平冈小坡形成起伏，用以点缀冲破平直的湖面与四野，使大园中的小园，在地形及空间分隔上，都起较多的变化。

扬州建筑兼有南北二地之长，既有北方之雄伟，复有南方之秀丽，因此在建筑形式方面，应该发挥其地方风格，不能夸苏式之轻巧，学北方之沉重，正须不轻不重，恰到好处。色泽方面，在雅淡的髹饰上，不

妨略点缀少许鲜艳，使烟雨的水面上顿觉清新。旧时虹桥名红桥，是围以赤栏的。

平山堂是瘦西湖一带最高的据点，堂前可眺望江南山色。有一联将景物概括殆尽：“晓起凭阑，六代青山都到眼；晚来把酒，二分明月正当头。”而唐代杜牧的“青山隐隐水迢迢，秋尽江南草未凋”，又是在秋日登山，不期而然诵出来的诗句。此堂远眺，正与隔江山平，故称平山堂。平山二字，一言将此处景物道破。此山既以望为主，当然要注意其前的建筑物，如果为了远眺江南山色，近俯瘦西湖景物，而在山下大起楼阁，势必与平山堂争宠，最后卒至两难成美。我觉得平山堂下宜以点缀低平建筑，与瘦西湖蜿蜒曲折的湖尾相配合。这样不但烘托了平山堂的高度，同时又不阻碍平山堂的视野。从瘦西湖湖面远远望去，柳色掩映，仿佛一幅仙山楼阁，凭阑处处成图了。

扬州是隋唐古城（旧址在平山堂后），千余年来留下了许多胜迹，经过无数名人的题咏，渐渐地深入了大家的心中。如隋炀帝的迷楼故址，杜牧、姜夔所咏的二十四桥，欧阳修的平山堂，虹桥修禊的倚虹园等，它与瘦西湖的“四桥烟雨”“白塔晴云”“春台明月”“蜀冈晚照”等二十景一样，给瘦西湖招来了无数的游客，平添了无数的佳话。这些古迹与风景点，今后应宜重点突出地来修建整理。它是文学艺术与风景相合形成的结晶，是中国园林高度艺术的表现手法。

扬州旧称绿杨城郭，瘦西湖上又有绿杨村，不用说瘦西湖的绿化是应以杨柳为主了。也许从隋炀帝到扬州来后，人们一直抬高了这杨柳的地位，经千年多的沿袭，使扬州环绕了万缕千丝的依依柳色，装点成了一个晴雨皆宜、具有江南风格的淮左名都，这不能不说是成功的。它注意到植物的适应性 with 形态的优美，在城市绿化上能见功效，对此我们现在还有继承的必要。在瘦西湖的春日，我最爱“长堤春柳”一带，在夏雨笼晴的时分，我又喜看“四桥烟雨”。总之不论在山际水旁，廊沿亭畔，它都能安排得妥帖宜人，尤其迎风拂面，予人以十分依恋之感。杨柳之外，牡丹、芍药为扬州名花，园林中的牡丹台与芍药阑是最大的特色，而后者更为显著。姜夔词：“二十四桥仍在，波心荡、冷月无声。念桥边红药，年年知为谁生。”可以想见宋代湖上芍药种植的普遍。至于修竹，在扬州又有悠久的历史，所谓“竹西佳处”。古代画家石涛、郑燮、金农等都曾为竹写照，留下许多佳作。扬州的竹，清秀中带雄健，有其独特风格，与江南的稍异。瘦西湖四周无山，平畴空旷，似应以此遍植，则

碧玉摇空与鹅黄拂水，发挥竹与柳的风姿神态，想来不致太无理吧。其他如玉兰芭蕉、天竹腊梅、海棠桃杏等，在瘦西湖皆能生长得很好。它们与前竹、柳在色泽构图上，皆能调和，在季节上，各抒所长，亦有培养之必要。山旁树际的书带草，终年常青，亦为此地特色。湖不广，荷花似应以少为宜，不致占过多水面。平山堂一区应以松林为障，银杏为辅，使高挺入云。今日古城中保存有巨大银杏的，当推扬州为最。今后对原有的大树，在建筑时应尽量地保存。《园冶》说得好：“多年树木，碍筑檐垣让一步可以立根，斫数桠不妨封顶。斯谓雕栋飞楹构易，荫槐挺玉成难。”

盆景在扬州一带有其悠久的历史，与江南苏州颀颀久矣。其特色是古拙经久，气魄雄伟，雅健多姿，而无忸怩作态之状；对自然的抵抗力很强，适应性亦大。在剪扎上下了功夫，大盆的松、柏、黄杨，虬枝老干，缀以“云片”繁枝，参差有序，具人工天然之美于一处。其他盆菊、桃桩、梅桩、香橼、文旦桩等，亦各臻其妙。它可说是南北、江浙盆景手法的总和，而又能自出心裁，别成一格，故云之为“扬州风”。

瘦西湖湖面不大，水面狭长曲折。要在这样小的范围中游览欣赏，体会其人工风景区的妙处，在游的方式上，亦经推敲过一番。如疾车走马，片刻即尽，则雨丝风片，烟渚柔波，都无从领略。如易以画舫，从城内小秦淮慢慢地摇荡入湖，这样不但延长了游程，并且自画舫中不同的窗框中窥湖上景物，构成了无数生动的构图，给游者以细细的咀嚼，它和西湖的游艇是有浅斟低酌与饱饮大嚼的不同。王士禛诗说：“日午画船桥下过，衣香人影太匆匆。”我想既到瘦西湖去，不妨细细领略一番，何必太匆匆地走马看花呢。

我国古典园林及风景名胜地的联额，是对这风景点最概括而最美丽的说明，使游者在欣赏时起很大的理解作用，瘦西湖当然不能例外。其选词择句，书法形式，都经细致琢磨，瘦西湖的大名，是与这些联额分不开的。在《扬州画舫录》中，我们随便检出几联，如“四桥烟雨”的集唐诗二联：“树影悠悠花悄悄，晴烟漠漠柳毵毵”“春烟生古石，疏柳映新塘”等，都是信手拈来，遂成妙语。其风景点及建筑物的命名，都环绕了瘦西湖的特征“瘦”来安排，辞采上没有与瘦西湖的总名有所抵触。瘦西湖不但在具体的景物色调上能保持统一，而且对那些无形的声诗，亦是作同样的处理，益信我国园林设计是多方面的一个综合艺术作品。

总之，瘦西湖是扬州的风景区，它利用自然的地形，加以人工的整

理，由很多小园形成一个整体，其中有分有合，有主有宾，互相“因借”，虽范围不大，而景物无穷。尤其在摹仿他处能不落因袭，处处显示自己面貌，在我国古典园林中别具一格。由此可见，造园虽有法而无式，但能掌握“因地制宜”与“借景”等原则，那么高冈低坡、山亭水榭，都可随宜安排，有法度可循，使风花雪月长驻容颜。

瘦西湖的形成，自有其历史的背景。对于在一定历史条件下形成的风景区，在今日修建时，我们固要考虑其原来特色，而更重要的，还应考虑怎样与今日的生活相配合，做到古为今用，又不破坏其原有风格，这是值得大家讨论的。我想如果做得好的话，瘦西湖二十景外，必然有更多新的景物产生。至于怎样“因地制宜”与“借景”等，在节约人力、物力的原则下，对中小型城市布置绿化园林地带，我觉得瘦西湖还有许多可以参考的地方，但仍要充分发挥该地方的特点，做到园异景新。今日我介绍瘦西湖，亦不过标其一格而已。“十里画图新阆苑，二分明月旧扬州。”我相信在今后的建设中，瘦西湖将变得更为美丽。

《文汇报》1962年6月14日

SOUTH-AND-NORTH LAKES, HAIYAN

Written towards the end of 1991

Translated by Qian Jingyu

Having paid quite a few visits to the South-and-North Lakes¹, I come to the conclusion that this scenic zone in Haiyan county, Zhejiang province, is the place to be

With mountains, waters and the sun to admire,
And teas, oranges and bamboo shoots to savor.

Occupying 1,600 *mu* on the East China Sea coast between Shanghai and Hangzhou, the South-and-North Lakes look more exquisite than the West Lake of Hangzhou and more ethereal than the Slender West Lake of Yangzhou. A dyke² divides what used to be the Yong'an Lake or Ganshui Lake in two, hence its present name. There is a bridge and a pavilion on either end of the dyke. On the east end stands the Star Pavilion, built in commemoration of Hu Die (1908-1989), a Shanghai Mingxing Film Company superstar who shot the movie *Salt Tide* here on location in 1932; on the west end is the Memorial Pavilion of Dong Bai (1624-1651), where this talented courtesan from Nanjing buried flower petals after she settled down in Haiyan with her husband Mao Xiang (1611-1693) to shun war and turmoil during the Ming-Qing transition period.

Blue waves ripple and sparkle under the sun while flocks of white egrets dance in the sky. The lakeside itself is strewn with orange and pear orchards, with pink peach flowers blooming amidst green willows in spring and branches weighed down with fruits in autumn—a fabulous landscape that mingles with local dwellings' whitewashed walls and black-tiled roofs to conjure up one idyllic scenery after another. Added to the allure of the South-and-North Lake Scenic Zone are a host of tourist attractions, including "Wild Goose Diving at Sinking Rainbow,"³ "Dawn at Jing Mound," and "Thatched Hut on

Western Brook,"⁴ each having its own mesmerizing sight to offer.

A footpath beginning at the dyke's western end conducts to a mountain that changes the scenery as it stands to the left, with the lake lying to the right. This is none other than the "Ridge in Remembrance of Gu Kuang⁵," a Tang-dynasty Haiyan native and poet who often came here to get lost for a while in the landscape. As the footpath extends further west, it is hemmed in between two steep cliffs, where little birds twitter incessantly to echo a susurrating roadside rivulet. While the terrain twists and turns to usher in a succession of fascinating views, the footpath climbs up the slope for 250 or so meters before stopping at the foot of the well-known Stone Fort of Celestial Tan's Mountain⁶.

Small though the Stone Fort is, it reigns over a jumble of high mountains. Built entirely of monoliths, it looks breathtaking and precipitous, so much so that the locals call it "Badaling Fort⁷ South of the Yangtze." Take a look around atop the fort's turret, and everything comes into vivid sight, with the South-and-North Lakes of Haiyan to the east and the field of Huangwan township of Haining to the west. As the Celestial Tan's Mountain sits at the juncture of the Haining-Haiyan boundaries, it was a bone of contention between warring strategists in bygone years. During the Ming dynasty it was garrisoned by the legendary General Qi Jiguang (1528-1588) and his warriors in resistance against Japanese pirates. By the time of the 1840-1842 and 1856-1860 Opium Wars, the Qing government rebuilt the fort to keep Western invaders at bay; and a stone statue of Xu Xingjian (?-1556)⁸, a Ming-dynasty anti-Japanese hero and commander of the Haining Garrison, is erected here for worshippers in recent times.

Sauntering across a woodland with a tea plantation on it, one espies a tip of vermillion walls of the venerated Nunnery at Cloud-Enshrouded Peak⁹ on the other side of a bamboo forest. As a domain of the Bodhisatva Avalokitesvara, the temple is also known for its "Eight Cloud-Enshrouded Sights"—the Snow-Hole Spring, the Ming-dynasty ginkgo tree, the Scripture Library, the Homecoming Birds'

Kiosk, the ancient stage, the great castiron tripod, the Celestial Crane Pool, and the Small Attainment Pagoda. The mineral water spewing from the Snow-Hole Spring is the choicest for brewing tea. For these scenic gems, the CloudEnshrouded Peak is extolled as a "celebrated mountain on the sea," and its nunnery was known in old days as the Evening Potalaka.¹⁰

Further south along the footpath stands the Eagle-Nest Pinnacle, the site of an astronomical miracle in which the sun and the moon rise simultaneously on the morning of the first day of the tenth lunar month every year. At the foot of the pinnacle lies the Yellow Sand Nook, home to a village with an eight-century-long tradition in orange farming. Surrounded on three sides by mountains, with its southern side facing the sea, the nook is warm in autumn and cool in summer—a favorable microclimate that enables orange trees to bear golden and sweet fruit that account for eighty percent of the total annual output of oranges in the Hangzhou-Jiaxing-Huzhou area. A trail runs northward along the ridge of the Eagle-Nest Pinnacle and leads to the osmanthus-covered Northern Woody Mountain, where flowers bloom and tree saplings flourish all year round. Adding to the glamour of this place are also such scenic attractions as the Golden Buffalo Cave and cliff carvings on the Tea Mill Mountain.

To sum up, the South-and-North Lakes are characterized by mountains that rise range upon range, waters that twist and turn endlessly, and a seascape that brims with exotic sights. The entire scenic zone exudes dynamic vigour and demure grace that provide inspirations for men of letters and prototypes for ink-and-wash landscape painters in the Northern Song tradition. In terms of scenic appeals, the South-and-North Lake is none the inferior to the West Lake of Hangzhou. While the West Lake excels in glamorous feminine beauty, the South-and-North Lakes are at her delicate best—in other words, they make a perfect pair of siblings. For this reason, you can never crack the secret code to West Lake's heavy make-up without taking a look at the South-and-North Lakes. It is high time that you

went to the South-and-North Lakes for a look around!

南北湖

“观山观水观日，品茗品橘品笋。”这是多次游览海盐南北湖风景区后得出的评价。

南北湖湖临东海之滨，地处沪杭之中，面积1600亩，比杭州西湖玲珑，比扬州瘦西湖逸秀。湖上有堤，堤上有桥，桥旁有亭。东曰明星，是纪念1932年上海明星影片公司名演员胡蝶等来此拍摄电影《盐潮》而建。西曰小宛，是明代末年秦淮名妓董小宛随冒辟疆来此避难葬花的遗址。湖上碧波粼粼，白鹭飞舞，湖周是成片的橘林和桃园，春日桃红柳绿，秋季果实累累，加上白墙黑瓦的民居点缀其中，组成了一幅幅朴素、典雅的农村风光图画。此外，湖周还有“垂虹落雁”“荆陵初晓”“西涧草堂”等风景点，各有特色，都足使游人流连忘返。

过堤西行，名思顾岭，是唐代海盐诗人顾况经常驻足的地方，这里，左侧是山，右侧是湖，景色为之一变。继续西行，则两侧山峰夹峙，路旁一小溪，流水淙淙，小鸟时鸣，峰回路转，引人入胜。顺小径逐渐登高，约半里，一座古城堡在面前耸立，此谈仙岭石城也。

石城占地不多，但因位于崇山峻岭之中，又用大石砌筑，显得特别雄伟险峻，故有“江南八达岭”之称。上得城来，有箭楼一座，举目四望，东属海盐县，南北湖历历在目。西属海宁市，黄湾乡一片平畴。谈仙岭正处在宁、盐两邑交界，故历来为兵家必争之地。明代，抗倭劲旅戚家军曾在此驻防。鸦片战争期间，清政府在此再筑石城，故至今在城内立有抗倭英雄、海宁卫指挥徐行健石雕像。

穿过一片林和茶园，在竹海尽头，千年古刹云岫庵，露出红墙一角。庵内供奉观世音菩萨，有雪窦泉、银杏树、藏经阁、鸟还亭、古戏台、大铁鼎、仙鹤池、小成就塔等“云岫八景”。其中雪窦泉为优质矿泉水，烹茗最佳，故云岫庵素有“海上名山”和“夜普陀”之称。再往南是鹰窠顶，每年农历十月初一清晨，在此能看到“日月并升”天文奇景。然后下山，即是黄沙坞桔村，这里三面环山，南面向海，故冬暖夏凉，小气候特佳，栽培柑桔已有八百多年历史，所产本山桔，皮色金黄，甜中带鲜，产量占杭嘉湖地区百分之八十。

沿山脊线往北是北木山，满山桂花，花卉四时不断，苗木郁郁葱

葱，附近还有金牛洞和茶磨山摩崖石刻等名胜古迹。纵观南北湖风景区的特色为，山有层次、水有曲折、海有奇景，是集雄健与雅秀于一处，故历来为南宋水墨山水的范本、文人画家描绘歌咏之宝地，比杭州西湖，毫不逊色。西湖是浓妆，南北湖是淡妆，是西湖的姐妹行。因此，不看南北湖，就不得西湖浓妆之妙。劝君一游南北湖！

1991年岁末

NOTES ON PRINCE GONG'S MANSION

May 1979, Department of Architecture, Tongji University

It happened a long time ago, yet it seems pretty new. Whenever the Prince Gong's Mansion is mentioned, a mixture of melancholy and excitement would well up in my heart. In winter 1961, I joined He Qifang (1912-1977)¹, Wang Kunlun (1902-1985)² and Zhu Jiajin (1914-2003)³ in a survey of this mansion, reportedly the former site of the legendary Grand View Garden that appears in the celebrated 18th-century novel *A Dream of Red Mansions*. Today, however, Qifang has been gone for two years, which makes our joint survey more than a decade ago look like a dream. How could I not feel down and blue?

When I returned from overseas last winter to spend some time in Beijing, Feng Qiyong (1924-), whom I regard as my younger brother, asked me to see the mansion again and probe the possibility for a memorial hall to be set up there in honour of Cao Xueqin (c. 1715-c. 1763), author of the aforementioned novel. Now that springtime had returned to this land and energized my fatigued body, I was naturally thrilled by his invitation, even though I could not but be nostalgic about my first visit with my friends.

I remember seeing photos of Prince Gong's Mansion in the book *Gardens of China* written by Osvald Sirén (1879-1966)⁴ and published in Britain in 1949. Its majestic lofts, belvederes, rock formations and ponds, bright and clear vistas of trees and waters looked rather enchanting to me. Later, when I rambled the mansion's garden for the first time in my life during a trip to Beijing, the scenes and sights described in *A Dream of Red Mansions* kept flashing into my mind despite the fact that though somewhat faded through the years, its former glory was still there. How many changes had happened to the mansion in so many years! "The late poet should recognize me if he

was sentient enough", as the Tang-dynasty poet Wen Tingyun (c. 812-866) says. If Cao Xueqin could feel it in his grave, my second survey of the mansion would not come in vain.

Sitting south of the Silver Ingot Bridge at the Lake of Ten Temples⁵, Prince Gong's Mansion has, over and above its large garden, the most delicately structured and best laid out architectural complex among all the extant princely mansions in Beijing. A royal-mandated rule has it that the front gate of a princely mansion should face east rather than south, with all the gates inside of it aligned from south to north. Prince Gong's Mansion is no exception, but the pity is that its original plan has been altered. In spite of this, the pomp and pageantry of its bygone years are still there, albeit somewhat vaguely. Its surrounding wall covers an immense circumference, but only its eastern section has retained its simplistic classical shape, characterized by a stocky body tapering off at the top, a shape that is identical to, and a bit more imposing than that of the Shrine of Monarchs of Various Dynasties on Goat Market Street at the Xisi subdistrict. The royal temple was first built on the site of the Peace-Sustaining Temple in 1530, the ninth year of the Jiajing reign of the Ming, and rebuilt in 1729, the seventh year of the Yongzheng reign of the Qing. This very fact testifies to the venerable history of Prince Gong's Mansion.

The buildings in the mansion fall into three columns, but only two gates remain of the central column because its central hall has been destroyed. The horizontal board inscribed with the name "Hall of Auspicious Joy" in the posterior hall is said to have come from the Mansion of Heshen (1750-1799)⁶ during the Qianlong reign, which somewhat indicates when this hall was built. The eastern column is three rows deep, with its first row featuring a smaller five-pillared frame often seen in buildings dating back to the Ming, according to Ji Cheng's *The Craft of Gardens*, but has virtually disappeared in those built after the Qianlong reign of the Qing. The buildings in the other two rows are built of the same materials as those in the first row, whose forms are as tall and graceful as, but in striking contrast to, the

thick and sturdy ones dating back to the Qianlong reign. The bricks used on these structures indicate that they were all built during the Kangxi reign. The western column is three rows deep as well, and the horizontal board "Celestial Fragrance Court" hanging on the floral pendant gate of the rear row and another board "Chamber of a Prized Jin Calligraphy Model"⁷ in the central suite are both original to Prince Gong's Mansion. The plinths are carved and the interiors partitioned, and the boudoirs and suites, arranged along the four sides of a quadrangle yard, are so wonderfully appointed that they rival the Belvedere in Keeping with an Original Wish in Emperor Qianlong's garden in the Imperial Palace. It was the flowering season when I arrived here, with pear flowers clustered like clouds and falling crabapple flowers drifting like rain, whilst snowy cloves interacted with well-spaced lush bamboos so dramatically that I could not but chant the poem "Gazing Afar after the Spring Rain" by Yang Ning (?-802)⁸:

The southbound road ends where sky joins ocean,

The outlet for the lovesick exists only in the moon.

The 160-meter-long storied posterior building lying crosswise in this row features slender, straight balustrades and exquisite windows through which the enticing reflections of human figures and the aroma from ladies' apparels make one reluctant to depart. Its stairway used to be where the country's only wooden artificial mountain was located. This storied structure was built in a later period. Construction of the mansion itself began in the east and gradually extended westward.

Spreading behind this posterior building is the mansion's garden, whose eastern section contains a small court where, gleaming amidst emerald bamboo leaves, the corridor is roomy, the chambers are quiet, curtains are transparent and tea tables spick and span, and the décor is elegant in a subtle way. This small court was a latecomer, but its layout accords with the mansion's old pattern; in front of its floral pendant gate there stand four pagoda trees so weather-beaten that

their hollowed trunks stand testimony to this garden's olden age. The small court turns out to be home to the Bamboo Lodge⁹, where a roofed walkway links all the buildings, and pavilions and belvederes spread out amidst green pines, emerald cypresses, ancient pagoda trees and weeping willows.

The presence of water and rock formations brings to life an otherwise arid and lonesome northern Chinese garden like Prince Gong's Mansion. Spreading out at the foot of its northern wall and screened by an artificial mountain is a bat-shaped hall, a three-bay structure whose front portico is designed to let in sunlight from morning till dusk. The only one of its kind in Beijing, the Bat Hall (or Bliss Hall, for in Chinese, "bat" pronounces the same as "bliss") is said to be on the former site of the Happy Red Court¹⁰. Judging from its architectural style, characterized by a roofed walkway in its left wing that conducts to the western part of the garden, it is original to the Prince Gong's Mansion. The artificial mountain in front of the hall in the western part consists of two sections, but the rear section, built of slates, was added at a later time; its frontal section, built of Lake Tai rocks and therefore original to the mansion, has a belvedere atop it and a cave built into it with a stone lintel, a technique that was in use prior to the Qianlong reign. The trees planted in the mountain are apparently of old age. The rear section of the artificial mountain are all built of slates, where the trees look as new as those in the nearby Mirror Garden—they should have been built during the lifetime of Prince Gong. The crenulated wall whose name "Elm Pass" is inscribed in a stone tablet and the Green Cloud Mountain with its name engraved in a stone in the front of the western section of the garden were also built at a later time. There used to be a pavilion in the center of the lake in the garden's backyard, but with the lake filled a long time ago, the rippling water surface is no more. The glamorous and commodious theater in the back of the eastern end of the garden is the only one of its kind that has remained intact to this day in the city.

According to Yu Tongkui (1876-1962), father of modern China's chemistry education who also contributed immensely to the restoration of classical Chinese architecture,

The garden sits at the rear of Prince Gong's Mansion; the mansion itself was Emperor Qianlong's wedding gift for his youngest daughter, Gulun Princess Hexiao (1775-1823), when she was married to Fengshenyinde (1775-1810), the eldest son of the emperor's right-hand man Heshen.... In 1799, the fourth year of the Jiaqing reign, when Heshen's property was confiscated, the garden became Prince Qingxi's mansion.¹¹ In about 1851, during the Xianfeng reign, it was given to Prince Gong, who had a garden built behind it.

Thus it is apparent that the mansion gained its status as a prince's mansion as early as the Qianlong reign (1736-1796), and was expanded as a result.

This mansion is elaborately documented in "A Brief Review of the History of Prince Gong's Mansion" written by Shan Shiyuan (1907-1998)¹², which was carried in the *Journal of Fu Jen Catholic University* forty years ago. This short account of mine is the result of an initial survey of the mansion's buildings and artificial mountains. I cannot come up with a detailed report about its buildings because their frameworks are concealed behind ceilings, which makes it impossible for me to take a close look.

In foreign countries, famous people's former residences are well protected and open for all to see. Prince Gong's Mansion was not really the Grand View Garden described in *A Dream of Red Mansions*, but its author Cao Xueqin must have frequented the mansion of Nalanmingzhu (1635-1708)¹³, which was later procured by Heshen. Furthermore, Cao had lived in south China for some time as a visitor. He must have also visited the famous gardens in the Jiangnan area. This being the case, I share Yu Mingheng's¹⁴ view that the Grand View Garden is but a synthesis of the art of Chinese gardens, and Cao's story about it is just another folk tale being told and retold in the same way as the Golden Hill Temple in Zhenjiang, which was flooded by the White Maiden¹⁵, and the Sweet Dew Temple, where Liu Bei (161-223)¹⁶ won the heart of the younger sister of Sun Quan

(182-252)¹⁷. I therefore see nothing improper to designate Prince Gong's Mansion as the venue of a memorial hall for Cao Xueqin. In this way, it will become the only princely mansion in Beijing to be opened to the public as a showcase of our motherland's cultural heritage and a repository of Cao's historical records. When this happens, I surmise no one will accuse me of talking nonsense in this article.

恭王府小记

是往事了！提起神伤。却又是新事，令人兴奋。回思1961年冬，我与何其芳、王昆仑、朱家溍等同志相偕调查恭王府（相传的大观园遗迹），匆匆已十余年。何其芳同志下世数载，旧游如梦！怎不令人黯然低徊。去冬海外归来，居停京华，其庸兄要我再行踏勘，说又有可能筹建为曹雪芹纪念馆。春色无边，重来天地，振我疲躯，自然而然产生出两种不同的心境，神伤与兴奋，交并盘旋在我的脑海中。

记得过去看到英国出版的一本Oswald Sirén所著的《中国园林》，刊有恭王府的照片，楼阁山池，水木明瑟，确令人神往。后来我到北京，曾涉足其间，虽小颓风范而丘壑独存，红楼旧梦一时涌现心头。这偌大的一个王府，在悠长的岁月中，它经过了多少变幻。“词客有灵应识我”，如果真的曹雪芹有知的话，那我亦不虚此行了。

恭王府在什刹海银锭桥南，是北京现存诸王府中，结构最精，布置得宜，且拥有大花园的一组建筑群。王府之制，一般其头门不正开，东向，入门则诸门自南往北，当然恭王府亦不例外，可惜其前布局变动了，尽管如此，可是排场与气魄依稀当年。围墙范围极大，唯东侧者，形制极古朴，“收分”（下大上小）显著，做法与西四羊市大街之历代帝王庙者相同，而雄伟则过之。此庙为明嘉靖九年（公元1530年）就保安寺址创建，清雍正七年（公元1729年）重修。于此可证恭王府旧址由来久矣。府建筑共三路，正路今存两门，正堂（厅）已毁，后堂（厅）悬“嘉乐堂”额，传为乾隆时和珅府之物。则此建筑年代自明。东路共三进，前进梁架用小五架梁式。此种做法，见明计成《园冶》一书，明代及清初建筑屡见此制，到乾隆后几成绝响。其后两进，建筑用材与前者同属挺秀，不似乾隆时之肥硕，所砌之砖与乾隆后之规格有别，皆可初步认为康熙时所建。西路亦三进，后进垂花门悬“天香庭院”额，正房有匾名“锡晋斋”，皆为恭王府旧物。柱础施雕，其内部用装修分隔，洞房曲户，回环四合，精妙绝伦，堪与故宫乾隆花园符望阁相颉颃。我来之时，适值花期，院内梨云、棠雨、丁香雪，与扶疏竹影交响成曲，南归相思，又是天涯。后部横楼长一百六十米，阑干修直，窗影玲珑，人影衣香，令人忘返。其置楼梯处，原堆有木假山，为海内仅见孤例。就年

代论此楼较迟。以整个王府来说似是从东向西发展而成。

楼后为花园，其东部小院，翠竹丛生，廊空室静，帘隐几净，多雅淡之趣，虽属后建，而布局似沿旧格，垂花门前四老槐，腹空皮留，可为此院年代之证物。此即所谓潇湘馆。而廊庑周接，亭阁参差，与苍松翠柏，古槐垂杨，掩映成趣。间有水石之胜，北国之园得无枯寂之感。最后亘于北垣下，以山作屏者为“蝠厅”，抱厦三间突出，自早至暮，皆有日照，北京唯此一处而已，传为怡红院所在。以建筑而论，亦属恭王府时代的，左翼以廊，可导之西园。厅前假山分前后二部，后部以云片石叠为后补，主体以土太湖石叠者为旧物，上建阁，下构洞曲，施石过梁，视乾隆时代之做法为旧，山间树木亦苍古。时期固甚分明。其余假山皆云片石所叠，树亦新，与其附近鉴园假山相似，当为恭王时期所添筑。西部前有“榆关”“翠云岭”，亦后筑。湖心亭一区背出之，今水已填没，无涟漪之景矣。园后东首的戏厅，华丽轩敞，为京中现存之完整者。

俞星枢（同奎）先生谓：“花园在恭王府后身，府系乾隆时和珅之子丰绅殷德娶和孝固伦公主赐第。”可证乾隆前已有府第矣。又云：“公元1799年（清嘉庆四年）和珅籍没，另给庆禧亲王为府第。约公元1851年（清咸丰间）改给恭亲王，并在府后添建花园。”此恭王府由来也。足以说明乾隆间早已形成王府格局，后来必有所增建。

四十年前单士元同志曾写过《恭王府考》载《辅仁大学学报》，有过详细的文献考证。我如今仅就建筑与假山作了初步的调查，因为建筑物的梁架全为天花所掩，无从作周密的检查，仅提供一些看法而已。

在国外，名人故居都保存得很好，任人参观凭吊。恭王府虽非确实的大观园，曹氏当年于明珠府第必有所往还。雪芹曾客南中，江左名园亦皆涉足，故我与俞平伯先生同一看法，认为大观园是园林艺术的综合。其与镇江金山寺的白娘娘水斗，甘露寺的刘备招亲，同为民间流传了的故事。如今以恭王府作为《红楼梦》作者曹雪芹的纪念馆，则又有何不可呢？并且北京王府能公开游览者亦唯此一处。用以显扬祖国文化，保存曹氏史迹，想来大家一定不谓此文之妄言了。

1979年5月写成于同济大学建筑系建筑史教研室

SUMMER PALACE, BEIJING

Translated by Duan Huixiang

I love mounting a tall loft at moonlit night,
To toast long and gentle the hills in the west.

These lines, written by Mi Wanzhong (1570-1628)¹ of the Ming in his garden in the western suburbs of Beijing, are apparently inspired by the following lines by Tao Yuanming (c. 365-427)², a poet of the late Eastern Jin and the early Song of the Southern Dynasties:

While picking asters 'neath Eastern Fence,
My gaze upon the Southern Mountain falls.

Both Mi's "toast" and Tao's "gaze" are in tribute to mountains in the distance. This is what is meant by view borrowing, a Chinese landscape gardening technique. Such borrowing, designed to incorporate a scene faraway and diversify the vista in a garden being built, has been in practice since antiquity. However, the term "view borrowing" was actually coined by Ji Cheng (1582-c. 1642) in the late Ming as he enunciates in no uncertain terms in *The Craft of Gardens*,

To borrow from a view means that although the interior of a garden is distinct from what lies outside it, as long as there is a good view you need not be concerned whether it is close by or far away.

No place is better for garden-making than the western outskirts of Beijing, where the Western Hills rise like a zigzagging screen and clear spring water converges in many a lake or marsh. This explains why the gardens in this city were concentrated in its western outskirts in ancient times, when they eventually reached their apex during the Ming and the Qing. One of them is the world-famous Garden of Perfect Splendor, nicknamed "Garden of Ten Thousand Gardens." The key to the success of this garden lies in "accommodating scenery to waters, and borrowing views from the Western Hills"—in short, view accommodating and view borrowing, two major concepts in the classical craft of Chinese gardens. For a garden as large as this, the

vistas would not have been so sagaciously arranged without acting on such concepts. It shows that landscape gardening is heralded by conception. Both view accommodating and view borrowing ought to be applied more emphatically in gardens in the outskirts of a city surrounded with plenty of idyllic views. Of all the Beijing gardens, the well-preserved Summer Palace is another illustrious case in point.

Pillaged and torched by the allied Anglo-French invaders in 1860 and the allied troops of eight Western powers in 1900, the Garden of Perfect Splendor was reduced utterly to ruins and has remained so to this day. This leaves the Summer Palace as the only large garden in Beijing I can refer to in my delineation of the technique of view borrowing.

The Summer Palace, ten kilometers to the northwest of downtown Beijing, abounds in intriguing sights, where waves in the Kunming Lake lap at the foot of the lush-green Longevity Hill in the north and the picture-perfect Jade Spring Mountain serpentine to the west.

Known as "Jug Hill and Gold Sea"³ during the Yuan, the Summer Palace was augmented during the Ming and renamed "Garden of Fine Mountains." In 1702, the forty-first year of the Kangxi reign of the Qing, it became the emperor's "Jug Hill Temporary Palace." After undergoing massive reconstructions in 1750, the fifteenth year of the Qianlong reign, it was called "Limpid Ripples Garden." It was destroyed by the allied Anglo-French invaders in 1860, and restored and renamed "Garden for Nourishing Harmony of Heaven and Earth" (but more popularly known as the Summer Palace) in 1886, only to be torched and damaged once again at the hands of the Eight-Power Alliance invaders in 1900. The Summer Palace as it is today was born of restoration work done in 1903.

The Summer Palace was created by extending an existing body of water in elaborate imitation of the West Lake of Hangzhou, Zhejiang province. The West Causeway, the islands, the misty weeping willows, and the painted bridges look like adaptations of the Jiangnan area's "light make-ups" to the northland's "rouged and powdered beauty" of

Beijing. Such mock-ups may look like their prototypes, but are apparently different in aesthetic appeals.

The Summer Palace sprawls in an area of less than four square kilometers. With three quarters of its space covered by water, it is a veritable Jiangnan garden in north China. Upon entering the garden from the East Palace Gate, one sees the Benevolence and Longevity Hall, an imposing structure with eaves flying like a giant bird's wings over a massive artificial mountain and rockeries in front of it. As one strolls around the hall and turns south, the vista opens widely upon the sparkling Kunming Lake.

Overlooking the Kunming Lake is the Longevity Hill crowned with the Buddhist Incense Belvedere, a four-storied octagonal edifice that commands the vintage point of the entire garden. Mount the belvedere, and one takes in the Western Hills, evoking a beauty's eyelashes, and the lake, looking like a gigantic mirror. Looking down from the belvedere, one sees a cluster of pavilions and halls hugging the terrain and the Long Corridor meandering its way along the lakeshore like a ribbon, all of which are found on a single garden's premises. The garden's illimitable array of scenic delights, however, is achieved primarily by view borrowing. It is with such borrowings that the nearby Jade Spring Mountain and its pagoda are seemingly shifted right before the balustrades of the lakeside True-Meaning Lake and Mountain Pavilion, whereas the Western Hills in the distance makes their presence felt as part and parcel of the cityscape of the nation's capital. Indeed, the landscape of the Summer Palace is peerless for its mixture of intricate grace and awesome magnificence.

It seems there is nothing the roofed walkway cannot do to wreak a riot of picturesque changes in the Chinese garden. The Long Corridor in the Summer Palace is an outstanding example in this regard, as it keeps the visitor engrossed while ushering him into what looks like a hand scroll of landscape painting. As the scenery changes with the shift of the visitor's footsteps, he is led by the corridor for a rambling of the royal garden and summering palace of yore without

realizing it. The gardens and buildings inside a scenic resort like the Summer Palace, indeed, made an ideal dwelling place for the Qing monarchs away from the Forbidden City.

The Garden of Harmonious Charms is nestled alone at the eastern foot of the Longevity Hill. In it, runoffs converge in a pond encircled by pavilions and verandahs, a tiny bridge is kept so close to the pond's surface that it is perceptibly mistaken for a pontoon, and a roofed walkway winds its way to vistas designed for in-situ viewing in every corner. As a small garden standing on its own inside of a large one, the Garden of Harmonious Charms is a replica of the Solace-Imbued Garden in Wuxi, another mountain-foot garden that, too, has a pool to collect rainwater and exterior views to borrow from.

Water twists and turns in line with embankments and is segmented by dykes. In the Summer Palace, water is divided up by long courseways to bring forth varied scenery, whereas bridges are designed so beautifully that every one of them is picturesque enough to be patterned after in painting. Sparkling, dustless and gentle is the Jade Belt Bridge, and the Seventeen-Arch Bridge appears like a rainbow descending upon water. When the hills shimmer in ethereally springtime mist, and when lake-side fresh willow trigs start stroking the water, the views presented to those boating on the Kunming Lake are categorically different from what they see ashore, whereas the fact that the Western Hills are always in the picture indicates how thoroughly the view-borrowing technique is executed in the Summer Palace.

颐和园

“更喜高楼明月夜，悠然把酒对西山”，明米万钟在他北京西郊的园林里，写了这两句诗句。一望而知是从晋人陶渊明“采菊东篱下，悠然见南山”脱胎而来的。不管“对”也好，“见”也好，所指的都是远处的山。这就是中国园林设计中的借景。把远景纳为园中一景，增加了该园的景色变化。这在中国古代造园中早已应用，明计成在他所著《园冶》一书中总结出来，有了定名。他说：“借者，园虽别内外，得景则无拘远近。”已阐述得很明白了。

北京的西郊，西山蜿蜒若屏，清泉汇为湖沼，最宜建园，历史上曾为北京园林集中之地。明清两代，蔚为大观，其中圆明园更被称为“万园之园”。这座在历史上驰名中外的名园——圆明园，其于造园之术，可用“因水成景，借景西山”八字来概括。圆明园的成功，在于“因”、“借”二字，是中国古代园林的主要手法的具体表现。偌大的一个园林，如果立意不明，终难成佳构。所以造园要立意在先。尤其是郊园，郊园多野趣，重借景。这两点不论从哪一个园，即今日尚存的颐和园，都能体现出来。

圆明园在1860年英法联军与1900年八国联军入侵北京时已全被焚毁，今仅存断垣残基。如今，只能用另一个大园林——颐和园来谈借景。

颐和园在北京西北郊10公里，万寿山耸翠园北，昆明湖弥漫山前，玉泉山蜿蜒其西，风景洵美。

颐和园在元代名瓮山金海，至明代有所增饰，名好山园。清康熙四十一年（公元1702年）曾就此作瓮山行宫。清乾隆十五年（公元1750年）开始大规模兴建，更名清漪园。1860年为英法联军所毁，1886年修复，易名颐和园。1900年又为八国联军所破坏，1903年又重修，遂成今状。

颐和园是以杭州西湖为蓝本，精心模拟，故西堤、水岛、烟柳画桥，移江南的淡妆，现北地之胭脂，景虽有相同，趣则各异。

园面积达三四平方公里，水面占四分之三，北国江南因水而成。入东宫门，见仁寿殿，峻宇翬飞，峰石罗前。绕其南豁然开朗，明湖在

望。

万寿山面临昆明湖，佛香阁踞其巅，八角四层，俨然为全园之中心。登阁则西山如黛，湖光似镜，跃然眼帘；俯视则亭馆扑地，长廊萦带，景色全囿于一园之内，其所以得无尽之趣，在于借景。小坐湖畔的湖山真意亭，玉泉山山色塔影，移入槛前，而西山不语，直走京畿，明秀中又富雄伟，为他园所不及。

廊在中国园林中极尽变化之能事，颐和园长廊可算显例，其于游者之兴味最浓，印象特深。廊引人入胜，中国画山水手卷，于此舒展，移步换景，上苑别馆，有别宫禁，宜其清代帝王常作园居。

谐趣园独自成区，倚万寿山之东麓，积水以成池，周以亭榭，小桥浮水，游廊随径，适宜静观。此大园中之小园，自有天地。园仿江南无锡寄畅园，以同属山麓园，故有积水，皆有景可借。

水曲由岸，水隔因堤，故颐和园以长堤分隔，斯景始出，而桥式之多，构图之美，处处画本。若玉带桥之莹洁柔和，十七孔桥之仿佛垂虹，每当山横春霭，新柳拂水，游人泛舟，所得之景与陆上得之景，分明异趣。而处处皆能映西山入园，足证“借景”之妙。

英译：段会香

MOUNTAIN SUMMER RESORT, CHENGDE

The outskirts of Chengde in the northern province of Hebei used to be a hunting ground for monarchs of the Qing. Thoroughbred steeds galloping in the autumn wind is typical of north China's country scene, but the contrary is true with the Chengde Mountain Summer Resort, whose scenery evokes the apricot flowers and vernal rains of the Jiangnan area. It is north China's answer for the Yangtze River Delta's scenic beauty. Visitors to this royal summer palace of yore would invariably wonder, "Who says the northland stands no comparison with the Jiangnan area?"

Siting is pivotal to the making of a garden. The site chosen for this purpose must be endowed with natural beauty in the first place, with man's creative effort playing a secondary role. The selection of scenery is a priority, but the tricky part of the job is how to pinpoint the focus of such scenery. A garden's views become perfect only if a good job is done in both aspects, and this is precisely where the success of the Mountain Summer Resort lies. This resort is hemmed in by mountains. The Wulie River flows northeast before taking a southward track at the resort's palace wall, and its water remains warm in winter thanks to the hot-spring water pouring into it. Hence the river's other name, Rehe, or Warm River, which is also a byname for the city of Chengde.

Emperor Kangxi (in reign 1661-1722) of the Qing started building a summer palace in Chengde in 1703, but it took him six years to have it initially completed. As the new estate was characterized by an unadorned elegance, with all its thirty-six sights brimming with natural delight, he named it "Chengde Mountain Summer Resort." Not wanting to let his grandfather down, Emperor Qianlong (in reign 1736-1796) began expanding the resort in 1751. Another thirty-six

sights were added as a result, along with a cluster of Buddhist monasteries in the mountains. As a result, the precinct of this mountain resort swelled considerably.

With a circumference of twenty kilometers, the Chengde Mountain Summer Resort is, as its name suggests, mostly mountainous. Its flat land, accounting for one fifth of the total acreage, is strewn with lakes and ponds, with mountains and lakes setting off one another bewitchingly. The front gate of the imperial residential and court quarters that occupy the eastern part of the resort, opens onto a *Phoebe nanmu* hall whose natural elegance is conspicuous in the absence of lavish ornamentation. Sitting on a vintage point, this hall is an epitome in view borrowing—the sparkling lakes in close proximity and the mountain ranges in the distance can all be seen indoors when window curtains are lifted.

The landscape of the summer resort falls into two sections. In the southeast section, all the spring water converges in lakes and ponds; in the northwest section, mountain ranges run up and down like so many floating ribbons, where plenty of birds nest in dense woods, and grazing David's deer bell and rove unhurriedly. The waters are made to twist and turn with embankments, and their surfaces, dotted with isles, are partitioned with dykes in imitation of famous gardens of the Jiangnan area, looking so genuine they are northland's spit images of the Mist and Rain Loft of Jiaxing in Zhejiang province, and the Lion's Grove of Suzhou in Jiangsu province.

Buildings in the mountains are designed for visitors to look afar or take a rest, which is why those in the Chengde Mountain Summer Resort are small and exquisite in design and brimming with changes. They are also interspersed with temples, so that the ear is delighted in the morning by bell tolls and at dusk by drum beats punctuating chants of Buddhist sutras. The Belvedere of Literary Way is right there, a library in which the *Complete Library of Four Branches of Books*¹ is kept. The Eight Outer Temples, laid out north and east of the mountain resort, offer fabulous scenes and sights for view borrowing,

so that the scenic attractions within and without the mountain resort are mingled into an integral whole.

Covering an area of 5.64 million square meters, the Chengde Mountain Summer Resort is the largest extant garden in this country. Its natural topography encompasses mountains, plains and lakes, and its garden-making scheme is adapted to the topography in many a becoming manner. Immensely variegated, too, is local horticulture. Pines are planted among other trees in the mountains, willows on the water's edges, and lotuses in the lakes. The Wind-Swept Pines in Myriad Gullies and the Aromatic Lotuses in a Bending Stream inside of it are two scenic attractions that are named after their respective horticultural themes. The Garden of Ten Thousand Trees turns out to be a forest of elm trees, whose canopy-like foliage obscures the sun while sending forth refreshing breeze to conjure up an otherworldly ambience.

Waters are concentrated in most Chinese gardens, but the lakes and pools in the Chengde Mountain Summer Resort are now clustered, now separated, with water flowing down a host of valleys and exiting through a water gate at the Literate Garden in the southeast corner before joining the Wulie River. The S-Shaped Sceptre Sandbar, the River Murmuring in Moonlight, the Zigzagging Trails on a Cloudy Causeway, the Midstream Gazebo, and other isles and sandbars join bridges and weirs to divide the resort's body of waters into the East Lake, the Lake of S-Shaped Sceptre Sandbar, the Upper Lake Zone and the Lower Lake Zone. These lakes, sparkling amidst pavilions and lofts and encircled by willow-lined low embankments, set the stage for a landscape at once deep and labyrinthine. Gurgling mountain brooks interact with placid lakes and ponds to yield such scenic attractions as the Warm Stream and Hot Waves, the Clouds' Looks and Water's Postures, the Splashing Spring Far and Near, the Manifold Verdure Reflected in Crystal Waves, the Mirror-like Water and Cloudy Hills, and the Fragrant Islet on a Gurgling Brook. In this resort, indeed, waters may assume a hundred postures, and views may change in a

thousand and one ways.

Ubiquitous are pavilions, terraces, lofts and chambers, bridges, and waterside gazebos that are adapted to the natural topography of the Chengde Mountain Summer Resort. Accommodating to its tranquil ravines and exotic peaks are also Buddhist and Taoist temples and nunneries, including the Golden Mountain Temple and the Dharma Forest Temple in the East Lake Zone, but more of them are found in the mountainous zone, including such Taoist sanctuaries as the Palace in Honour of a Resourceful Female Immortal and the Belvedere in Honour of the Mother of Big Dipper, and Buddhist domains like the Source of Pearl Waterfall Temple, the Green Peak Temple, the Temple of Sandalwood Forest, the Temple of Herons in Clouds, and the Nunnery of Moon in Water among the Eight Inner Temples. The halls and lofts of these religious establishments are scattered in eye-pleasing disorder, with Buddhist stupas glinting among them. The peace and quiet of the mountain woods are shattered when sutra chants and bell tolls rise at dawn and dusk to turn the place into a divine dreamland. Natural scenery and religious architecture are thus subtly combined to bestow a personality unseen elsewhere on this mountain resort.

Encircled by mountains, the views of the resort are fascinating enough to feast the eye. Looking afar across the Wulie River, one sees the Pestle-Shaped Peak at Sunset. On a stretch that begins north of the Pestle-Shaped Peak and turns west at the Lion's Gully, religious sanctuaries and royal villas are arrayed in the following order: the Temple of Omnipresent Benevolence, the Temple of Omnipresent Goodwill, the Temple of Universal Happiness, the Temple of Frontier Pacification, the Temple of Universal Blessing, the Temple of Universal Peace, the Temple of Sumeru, Happiness and Longevity, the Temple of Potaraka Doctrine, the Temple of Manjushri's Statue, the Temple of Universal Pacification, the Arhats Hall, and the Lions' Garden. Patterned after the architectural styles of the Uygurs, Tibetans and other ethnic minorities and those of hinterland China, these temples are majestic and splendid enough to rival or match all the

royal palaces on the premises. Anyone climbing up the boundary wall of the northern part of the summer resort can take in all these temples, aligned from east to north to form an integral spatial entity with the whole estate while each remaining as the centerpiece of an independent scenic zone.

It suffices to sum up the all-encapsulating beauty of the Chengde Mountain Summer Resort in a single line,

To move heaven and condense earth—it all depends on how highminded the garden builder is.

In other words, the Chengde Mountain Summer Resort is a congregation of landscape gardens in southern and northern Chinese styles and buildings of many ethnic architectural backgrounds, a congregation of elements that, instead of being lumped together higgledy-piggledy, set off and complement one another in every becoming way to strike a sentimental chord in the beholder's heart and generate sceneries everywhere in good taste. The Principal Palace and the River Murmuring in Moonlight are actually complexes of quadrangle dwellings not uncommon in north China, whereas the Wind-Swept Pines in Myriad Gullies and the Mist and Rain Loft are flexibly laid out in a Jiangnan landscape gardening style. Thus the grace of the south and the vigour of the north are presented before the eye, enabling one to savor the masterstrokes of this peerless mountain resort's creators.

避暑山庄

河北省承德市附近原为清帝狩猎的地方，骏马秋风，正是典型的北地风情。然而承德避暑山庄这个著名的北方行宫苑囿，却有杏花春雨般的江南景色，令人向往。游人到此总会流露出“谁云北国逊江南”这种感觉。

苑囿之建，首在选址，须得山川之胜，辅以人工。重在选景，妙在点景，二美具而全景出，避暑山庄正得此妙谛。山庄群山环抱，武烈河自东北沿宫墙南下。有泉冬暖，故称热河。

清康熙于1703年始建山庄，经六年时间初步完成，作为离宫之用。朴素无华，饶自然之趣，故以山庄名之，有三十六景。其后，乾隆又于1751年进行扩建，踵事增华，亭榭别馆骤增，遂又增三十六景。同时建寺观，分布山区，规模较前益广。

行宫周约20公里，多山岭，仅五分之一左右为平地，而平地又多水面，山岚水色，相映成趣。居住朝会部分位于山庄之东，正门内为楠木殿，素雅不施彩绘，因所在地势较高，故近处湖光，远处岚影，可卷帘入户，借景绝佳。园区可分为两部，东南之泉汇为湖泊，西北山陵起伏如带，林木茂而禽鸟聚，麋鹿散于丛中，鸣游自得。水曲因岸，水隔因堤，岛列其间，仿江南之烟雨楼、狮子林等，名园分绿，遂移北国。

山区建筑宜眺、宜憩，故以小巧出之而多变化。寺庙间列，晨钟暮鼓，梵音到耳。且建藏书楼文津阁，储《四库全书》【从周案十七】于此。园外东北两面有外八庙，为极好的借景，融园内外景为一。

山庄占地564万平方米，为现存苑囿中最大。山庄自然地势，有山岳平原与湖沼等，因地制宜，变化多端。而林木栽植，各具特征，山多松，间植，水边宜柳，湖中栽荷，园中“万壑松风”“曲水荷香”，皆因景而得名。而万树园中，榆树成林，浓荫蔽日，清风自来，有隔世之感。

中国苑囿之水，聚者为多，而避暑山庄湖沼，得聚分之妙，其水自各山峪流下，东南经文园水门出，与武烈河相接。湖沼之中，安排如意洲、月色江声、芝径云堤、水心榭等洲、岛、桥、堰，分隔成东湖、如意洲湖及上下湖区域。亭阁掩映，柳岸低迷，景深委婉。而山泉、平湖之水自有动静之分，故山麓有“暖流暄波”“云容水态”“远近泉声”。入湖

沼则“澄波叠翠”“镜水云岑”“芳渚临流”。水有百态，景存千变。

山庄按自然形势，广建亭台、楼阁、桥梁、水榭等。并且更就幽峪奇峰，建造寺观庵庙，计东湖沼区域有金山寺、法林寺等。山岳区内，其数尤多，属道教者有广元宫、斗姥阁；属佛教的有珠源寺、碧峰寺、旃檀林、鸞云寺、水月庵等，有内八庙之称。殿阁参差，浮图隐现，朝霞夕月，梵音钟声，破寂静山林，绕神妙幻境。苑囿园林，于自然景物外，复与宗教建筑相结合。

山庄峰峦环抱，秀色可餐，隔武烈河遥望，有“锤峰落照”一景。自锤峰沿山而北，转狮子沟而西，依次建溥仁寺、溥善寺、普乐寺、安远庙、普佑寺、普宁寺、须弥福寿之庙、普陀宗乘之庙、殊像寺、广安寺、罗汉堂、狮子园等寺庙与别园，且分别模仿新疆、西藏等少数民族建筑造型，以及山海关以内各地建筑风格，崇巍瑰丽，与山庄建筑呼应争辉。试登离宫北部界墙之上，自东及北，诸庙尽入眼底，其与离宫几形成一空间整体，蔚为一大风景区。

用“移天缩地在君怀”这句话来概括山庄，可以说体现已尽。其能融南北园林于一处，组各民族建筑在一区，不觉其不协调不顺眼，反觉面面有情，处处生景，实耐人寻味。故若正宫、月色江声等处，实为北方民居四合院之组合方式，而万壑松风、烟雨楼等，运用江南园林手法灵活布局。秀北雄南，目在咫尺，游人当可领略其造园之佳妙。

PART TWO Garden-Making
Precepts and Aesthetic
第二部分 造园准则与美学

ON GARDENS 1₁

Architecture Edition, Tongji University Journal, Issue No. 2, 1978

With a venerable history and a distinctive character, the craft of Chinese gardens is a school of its own worldwide. Over the years scholars around the world have been studying it in every perspective, and contributed a wealth of eloquent and judicial discourses. Today I would like to spell out my take on the basis of what I have witnessed and learned in my daily involvement in gardens. Hence the title of this essay, "On Gardens."

The first thing to consider before making a landscape garden is that there are vistas for in-situ viewing and those for in-motion viewing, the former pointing to sceneries that people can take in while sitting down, and the latter calling for a tour route of considerable length so that the vista changes with the shift of the visitor's feet. Small gardens should be predicated on sights for insitu viewing and supplemented with those for in-motion viewing, courtyard gardens should be catered entirely to in-situ viewing, but it should be the other way round for large gardens. The Master-of-Fishnets Garden of Suzhou is a typical example for small gardens, and the Humble Administrator's Garden of Suzhou is a case in point for large gardens.

Visitors to the Master-of-Fishnets Garden are invariably delighted to see a pond surrounded by buildings where they can sit down or hang around. They can lean over a balustrade to count the fish swimming in the water, or stay in a pavilion to await the moon in the breeze. Beyond the balustrade, shadows of flowers sway on the walls, and hills in the distance are framed in the windows to evoke a classical painting that exude serenity and appeal. In the Humble Administrator's Garden, a footpath encircles a pond and a roofed walkway meanders its way through an agglomeration of scenic

attractions to bring along the visitor—which is similar to the Slender West Lake of Yangzhou, where, in the words of Wang Shizhen (1634-1711),

A painted boat passed 'neath the bridge at noon,

Gone were her scented dress and figure so soon.

The secret to this ever-changing view lies in the shift of the visitor's footsteps, which is exactly what in-motion viewing is all about. Conception always comes before a garden is made, just as writing is always heralded by conception as well. Only with an exquisite conception can a scenic setting be wondrous enough. Whether scenery should be adapted to in-situ or in-motion viewing depends on a garden's nature and size. The Garden of Miniature Landscapes under construction in Shanghai, for example, makes sense largely because its sights are devoted to in-situ viewing.

The traditional Chinese garden is an artistic synthesis of architecture, rockery, water, and horticulture that emanates idyllic sentiments and picturesque fascinations. Though rockery and water are set out by man, they must look like wrought by nature. What is the relationship between rockery and water? In a nutshell, rather than squeeze an entire landscape into the limited space of a garden, only a part of it should be used, which accords with the principles of painting. (A fabulous example is the way the pond in the Master-of-Fishnets Garden is patterned after the White Lotus Pond at the Tiger Hill in Suzhou.) The value of rockery is borne in its veins, and that of a stream or pond lies in its headwater; only when the veins and the headwater are meshed can the entire garden come to dynamic life. I once illustrated the relationship between rockery and water in a garden with inspirations from real mountains and real streams: firstly, water should follow the contours of rockery, so that the latter comes alive because of the former; secondly, water should accommodate to the shape of the rockery to carve out a winding course, whereas a mountain trail should follow the lie of the land and stay low and level. Zhang Lian (1587-1673), a prominent rockery architect during the

Ming-Qing transition, advocates the use of level ridges, small slopes, and high mounds to bring man's landscaping and gardening efforts close to nature. If we know a smattering of the reason behind it, we will not stray too far from nature and can create, to varying degrees, intriguing scenes in which water and rockery are well meshed.

Trees are planted in the traditional Chinese garden not just for keeping the land green, but more importantly, they are supposed to add picturesque fascination to the landscape. A flowering tree ought to be partially framed in a window to look like a foot-long scroll of Chinese painting with a single bough in it. The combination of a few old trees craning over a clump of bamboos by the side of a boulder invariably draws its inspiration from a landscape painting of withered trees overlooking bamboos and rocks. He who favors the beauty of shape over species can train a potted plant any way he would to evoke a classical painting. The Chinese wingnut trees in the Humble Administrator's Garden, and the age-old cypresses in the Master-of-Fishnets Garden are both scenic attractions pivotal to the general plan of their respective gardens. Were these picture-perfect old trees taken away, the scenic charms of the entire garden would be irretrievably lost right away. Most of the tree species introduced to the Chinese garden are distinctive in their own ways. Chosen fastidiously, they can bestow a unique personality on a garden, which is exactly what the lacebark pines mean to the Lingering Garden, what the pines and plum trees mean to the Garden of Brotherly Indulgence², and what the broad-leafed indocalamus bamboos mean to the Dark Blue Waves Pavilion.

Nevertheless, this issue seems to have eluded attention in recent years. Confusion has reigned over the choice of tree species, and some gardens' personalities are tarnished as a result. It seems a lesson ought to be drawn from it. The Northern Song (960-1127) painter Guo Xi (c. 1000-c. 1080) says a mouthful,

A mountain takes streams as its arteries, grass and trees as its hair, and the misty clouds above it as its spiritual verve.

Even grass can be so indispensable to landscape, to say nothing about trees. I always believe a garden should be imbued with the botanical character of the place in which it finds itself, not to mention the fact that trees growing in their native places have a high survival rate and grow fast—it may take only a few years for their saplings to grow into a wood. The Chinese garden differs from the arboretum in that its trees, instead of having their diversity in species flaunted, are there to be viewed and appreciated. However, it is by no means easy for a garden to excel with its own scenery and for sceneries to look different from one garden to another. This, without question, is also pertinent to flowers. You have got to seek difference from similarity and vice versa, for only in this way can every garden in this nation stand on their own. Garden-crafters in ancient times did their best to create scenes and sights for every season with the same pavilions, terraces, lofts, rockeries, streams and ponds while keeping them perennially new. This practice conforms to the fact that our nation has developed a discerning eye in appreciation of arts. For example, we are highly demanding of the shapes and postures of flowers and trees to be cultivated, of the melodies of music to be appreciated, and of the intended conceptions for calligraphy and painting to be practiced. Thus to produce a work of art that stands the most stringent scrutiny and has lasting artistic value, the artist has got to take pains and be attentive to the minute detail. This idea seems to be inspiring for us in exploring the "Chinese form" of landscaping gardening.

The views inside of a garden are to be observed from angles of elevation or depression and, therefore, each view should be handled on its own merits. Accordingly, lofts and pavilions must set off each other, hills and rockeries must be solemn and towering, streams must twist and turn, and bays must be made to encircle the premises.

By a tiny pavilion, beyond a red bridge,
Many a cicada warbles in tall willow trees.

In green willows' shadows,

By a pavilion amid crabapple flowers,
Atop red apricot branches.

Through these poetic lines, the depth of field, space and sound in a garden are recreated, while the tall willows and the tips of apricot branches direct the eye to look up. We learn, as we should, from poets, who definitely belong in the most sensible sort.

A winding trail hides itself in a mount,
So at measured pace I climb along it.

This reminds us the concealed trail can be discovered only by looking down at the foot of the mount. Therefore, the arrangement of details like rooftops, the foot of a rockery, water inlets, and treetops tolerates no negligence and rashness. Erecting a pavilion up a hill serves to guide the eye upward whereas leaving a crag by a stream or pond directs the eye downward.

Why is it that our country's places of interest and gardens can draw a constant stream of visitors from home and abroad? Why is it that people are never tired of looking at them? Fabulous landscape is no doubt a major reason behind it, but another important factor is that these tourist attractions are rich repositories of Chinese culture and history. I have pointed out that the presence of cultural artefacts and sites of historical interest enriches the cultural undertones of a scenic resort or garden, adds to their appeals, and gives more food for thought, so that people do not visit them for visit's sake or they just come to eat and drink. A cultural artefact and a tourist resort or garden are not a pair of opposites but a pair of mutually complementing factors. In this pair, the cultural artefact finds an ideal sanctuary whereas the resort or the garden becomes more culturally endowed. Only in this way can the garden in China epitomize traditional and modern Chinese culture.

The beauty of the Chinese garden lies in its implicit undertones. Every hill or rock inside of it is worth contemplating. An artificial peak is an impressionist work of sculpture; the name of the Beauty Peak makes sense only by putting it under close scrutiny, and the

same is true with the Nine-Lion Mountain. The front and rear beams in a twin hall come in different forms to imply a couple of loving birds, but nobody can notice it without being prompted. The fear that visitors may not know what they are seeing has compelled many a well-intentioned garden keeper to erect, say, a big artificial fish in a pond, or a clay panda in front of a giant pandas' arena. They want to advertise their "wares," without realizing that their action contravenes the value of implicitness, robs the Chinese garden of its quintessence, and spoils the scenery. But what can we do about it? Fish faintly discernible in the water are the most bewitching to see. A bamboo grove in a giant pandas' world tends to guide the visitor to where the fun is and keep his eyes peeled. From some gardens' old names one can easily figure out what can be seen in them, such as lacebark pines in the Wintry Emerald Mountain Abode (*i.e.*, the Lingering Garden of today),³ plum trees in the Plum Garden, and water in the Master-of-Fishnets Garden. Better examples in this regard can be found in the ten views of the West Lake in Hangzhou.

The inscription on a board hanging in the front or at the top of a pavilion or hall is illustrative for the curious sightseer. At the Pavilion of Lotus-Scented Breeze from Four Sides, for instance, the visitor would be caught up in a reverie in the wind even if no scented breeze is drifting from the lotus pond. The wondrous implication and brilliant calligraphy of an antithetical couplet are enough to make the visitor reluctant to go away. The Hut on Another Peak of Jiao's Mountain in Zhenjiang used to be Zheng Xie's studio. The front gate of this small three-room affair in a courtyard of flowers and trees is flanked by a couplet that reads,

Should a room be large to look elegant?

Flowers needn't be many to be fragrant.

Upon reading these lines, one would forget all worries and immerse himself in the pleasant scenery in no time. The studio would become the talk of the day among visitors, and its good reputation would spread far and wide through their lips. Inscribed name boards may be

made of brick or stone; antithetical couplets may be engraved on wooden or bamboo boards, or screens made of stone or marble. Rectangular stone slabs with calligraphic inscriptions are sometimes used as well. These calligraphic works are more implicit and thought-provoking than pictures, whose use is somewhat deliberately avoided on these name boards and couplets. Mounted scrolls are seldom employed, as most garden buildings are left open all the time and, therefore, destructive to anything made of paper under their roofs. The materials used for the name boards and couplets are chosen in light of locales: brick and stone for those left in the open, and bamboo and wood for those to be kept indoors. Mounted calligraphic work or paintings hanging in a dwelling house helps improve light and acoustic effects indoors, and enhances the sense of peace and quiet on the part of the dwellers. In old days the Xuan paper made for this purpose and the mounted work came in specifications and sizes well adapted to the sizes of building in which it is to be kept.

Curving and straight lines are relevant to each other in the Chinese garden. They should be applied flexibly, with straight lines contained in curves and with every line running its natural course. When drawing a tree, the painter is absolutely right to make sure that none of the lines he draws is straight. The zigzagging bridge, trail and corridor are set from one point to another to serve transport and communication purposes, but in a garden they are invariably flanked by scenic attractions, and made to twist and turn along a line so that its sceneries can meet the visitor's eye as he looks this way and that, while the lengthened route serves to heighten his pleasure as he ambles along. Curving lines are born of straight ones, but most importantly, the use of curves should be measured. A zigzagging bridge should be kept below the shoreline of a brook or pond and set as close to the water surface as possible to induce the feeling as if one was treading waves, and the number of its bends should be decided according to circumstances. However, some bridges are forced to twist and turn for nine times or set high above the water surface—so

mechanically are they designed as to make people feel like torture walking on them, most probably because the rule of thumb has been sidetracked. The Nine-Bend Bridge in the Gratification Garden of Shanghai is a bad case in point.

Once a site has been chosen for a garden to be made, its central theme should be decided in the light of the environment, and the anticipated ambiance fostered to give the garden a distinct character. I see the Garden of Perfect Splendor in Beijing as a classic case of "accommodating scenery to bodies of water and borrowing views from the western hills." In other words, it is celebrated as the "Garden of Gardens" because all the views in it are pivoted to water while sights from the said hills are ushered in. The Solace-Imbued Garden⁴ sits at the foot of the Huishan Mountain, with its scenes and sights structured to face the mountain, whose scenery thus becomes part and parcel of the garden. The Master-of-Fishnets Garden is predicated on water, but there is no water at all at its Late-Spring Peony Lodge⁵, which would have been in danger of being "expelled" from the garden. The builders meet the challenge by drilling a fountainhead at its southwest corner and let water run through all the streams in the garden. Thus the Lodge's desperate problem is addressed, and the Master-of-Fishnets Garden's reputation as a water-bound garden saved. However, the garden's newly added eastern part is a failure, for it is devoid of water—a dilemma resulting from a thoughtless design adopted in total disregard of the garden's general layout and in violation of its general principle.

An excellent garden calls to mind a well-written quatrain or a short lyric poem whose success hinges on pithy witticism. Though having only a few lines, such a creation is rich in connotations that never cease to resonate like lilting melodies. (Large gardens are not without their failures or oversights, just as a full-length song in a drawn-out tune can hardly be vocalized in a single breath.) This is exactly what I mean by "letting there be gardens beyond a garden and views beyond a view." The secret of a garden that has gardens beyond

it lies in "borrowing"; and the key to a view having views beyond it lies in its "timeline" that governs the never-ending shift of the four seasons. The shadows of flowers, trees, clouds or reflections in water, the rustling of wind, the gurgling of water, the chirping of birds, and the aroma of flowers...all these intangible views mix with tangible ones to stage a symphony in which poetic beauty overflows and picturesque appeal flourishes.

A garden of ten thousand *qing* (one *qing* equals 6.6667 hectares) can hardly be compact, nor can a garden of a few *mu* (one *mu* equals one fifteenth of one hectare) be extensive enough. What really matters is to make sure that the visitor does not mind the largeness of a garden because he is not fatigued by its compact dispositions, and that he does not mind the smallness of a garden because its spaciousness contains something of everything for his appreciation. This is why gardens should provide for both in-situ and in-motion viewing, which helps make a large place look small and a small place large. To put it in traditional Chinese painting parlance, it is essential to be "bold enough to set the brush to paper and cautious enough to bring it to a finish." In the words of a calligrapher, a garden should be roomy enough somewhere for a horse to gallop through, and close-knit enough in other places so that not a single needle can be inserted in it. Thus in the Summer Palace of Beijing we have both the ethereally vast Kunming Lake and the exquisite Garden of Harmonious Charms—a hill-rimmed small courtyard patterned after the Solace-Imbued Garden in Wuxi, Jiangsu province. There are principles but no hard and fast rules for the making of scenic gardens—it all depends on whether or not the principles can be applied with felicity. What Ji Cheng (1582-c. 1642) means by "melting into the existing lie of the land" and "borrowing from available scenery" are two of the garden-making principles, but he sets no stereotypes in his *The Craft of Gardens*. All that matters is to distinguish large gardens from small ones, in-situ viewing from in-motion viewing, and rural gardens from urban ones—only then can you make the most of each of them and do something

proper and fitting.

Simple as the orchid and bamboo are in traditional Chinese painting, every painter can depict them in a distinct way. The reason why the theatergoer never tires of watching the performance of a classical opera episode is because every performer can act it out with originality. The same is true with garden-making. If hard-and-fast rules are needed for scholars, like the *Mustard Seed Garden Manual of Model Paintings* for painters and the "eight-legged essay" for essayists, small-garden builders ought to draw something to go by from the Master-of-Fishnets Garden in Suzhou, recognized as a consummate example of "being small in quantity but exquisite in quality" and "beating the many with the few"—simple rules that call for mutual relevance and substitution between artificial mountains and buildings in a small garden where there is no land boat, large bridge or artificial mountain, and where buildings are small and few but methodically spaced. Virtually all the gardens in Suzhou have followed these rules, but the Master-of-Fishnets Garden's newly added eastern section is a complete flop because such rules are violated. Another negative example in this regard is the Lion's Grove, where a newly added boat is too bulky for its water surface and, therefore, is nondescript and off-key. Wang Weilin (1763-1822) of the Qing says in his note "Refurbishing the Literary Garden":

I replaced flowery hedge and stone railing repaired,
It is more difficult to modify a garden than poetry.
If only I could use every word to the point, and build
A pavilion or deck that, though tiny, stands scrutiny.

These thorough and succinct lines still sound sincere and resonant to garden-makers today.

The size of what is contained in a garden is relative rather than absolute. There is no smallness without largeness, and vice versa. The more the space is partitioned, the larger and the more changeable the garden is felt, so that limitless space can be created on a limited lot, and a large garden can contain several small ones. (The Three Pools

Mirroring the Moon in the West Lake is a fitting example of how a large lake can embrace a number of small pools.) Actually more examples can be cited, for this principle has become a critical garden-making rule. The Loquat Courtyard and the Vernal Crabapple Yard in the Humble Administrator's Garden and the Garden of Harmonious Charms in the Summer Palace are marked for their sublime artistic attainments. If a visitor is daunted by a garden's hollow and insipid interior and sheer size the moment he sets foot in it, or if he calls it quits before he reaches all its recesses, this garden is a complete mistake because it cannot stoke the visitor's appetite for a thoroughgoing visit. If the scenery in a garden looks special, richly variegated, and euphemistically laid out, people tend to visit them time and again. Is there anything wrong to make sure that the attractions inside of a scenic resort or garden cannot be exhausted through a single visit, with ample room reserved to accommodate repeated visits? It is a pity that quite a few scenic resorts are given to expansions in hopes that they are large enough for one-day or half-day tours and that one can finish seeing it all on a single visit and need not come back again. For this purpose they tear down walls in their precincts, but contrary to their intentions, they harvest emptiness instead. This is exactly what has happened to the Autumn Moon over a Calm Lake and the Xiling Seal Engravers Society at the West Lake, where the newly built seven-storied Xiling Hotel⁶ also dwarfs the nearby scenic Geling Mountain by half.

By contrast, the Slender West Lake of Yangzhou owes its beauty partially to its slenderness and partially to local planners' far-sighted decision to ban tall buildings on its shorelines. The Slender West Lake Scenic Resort is actually a cluster of private gardens that reach out to the outside world through waterways (another cluster of private gardens at Garden Lane in Yangzhou's city proper is predicated on roads), where every garden is water-bound and stays on its own inside of a courtyard. The houses, decks, and red apricot boughs stretching over neighboring walls all throw their reflections into the lake,

presenting one divine picture after another. Slender though the lake is, it never looks shabby for its manifold demure elegance. There, everything is fine save for a single defect: the total layout seems to be less than compact. What is more, more landmark buildings are needed, and the space should have been segmented more elaborately. No matter what, however, the character of the Slender West Lake should be preserved in future refurbishing efforts. The Humble Administrator's Garden in Suzhou has gained size by annexing what becomes its eastern part, but the new addition makes the garden's original layout look rather cramped, whereas its vast eastern part is virtually reduced to a passageway for the garden proper because of its lack of scenic attractions. Indeed, annexation did no good to either scenic spot—it would have been nice to keep them separated.

Chinese wooden structures have both individuality and liabilities in form and size. Every one of them, be it a hall or a pavilion, must conform to prescribed specifications that cannot be bypassed—rules must be followed even if such structures are merely enlarged or scaled down. Otherwise, "You want to draw a tiger but end up with what looks like a dog," as the saying goes. The lack of floor space can be amended by putting several buildings together. The Islamic mosque, for example, gains enough room by way of continuous-span construction or by surrounding itself with colonnades. The enlargement of a pavilion in the eastern part of the Humble Administrator's Garden has raised quite a few eyebrows because it has ended up being neither a pavilion nor a belvedere. The Five-Pavilion Bridge and the White Pagoda at the Slender West Lake are replicas of the Beihai Bridge, the Five Pavilions Arranged to Assimilate a Dragon, and the White Pagoda of Beijing, but to make up for the lack of space, the Five-Pavilion Bridge was constructed by putting these pavilions on a single bridge and downscaling the White Pagoda, resulting in an assembly that fits the water surface to a T and brings the character of the Slender West Lake into bold relief. The entire layout is so well conceived that, sans a close look, nobody could tell that the scenery as

a whole is just a microcosm of the pavilions and pagoda of the Beihai Lake in Beijing.

"Let there be no foot in a distant mountain, no root in a distant tree, and no hull in a distant boat save for its sail." This rule of thumb for traditional Chinese painting also applies to landscape gardening. Every scenic spot in a garden should look like a singular painting with rich depth and multi-layered graduation in light and color.

[Of Kou Zhun (961-1023) at the Autumn Wind Pavilion,
which was built when he was magistrate of Badong county,]

He often leans upon a railing to gaze at water in greed,
With no wall built around it lest the views be clogged.

If this line by Lu You (1125-1210) can be well understood, then we know what is to be hidden, screened, left wide open, or separated in a garden being made. The idea is that rather than present a vista in its entirety, only a fragment of it ought to be kept in sight, so that there seems to be pictures beyond pictures and that the scenery close at hand looks like extending for miles on end—in this way the charms of the vista are made to linger infinitely. To put it more specifically, a pavilion should be kept slightly below a mountaintop; a tree should not be planted atop a mountain; a mountain should reveal its foot if its top is hidden and hide it if its top is revealed; a big tree should show off its crest if its root is concealed, and vice versa; and so on. To apply these rules, however, takes a lot of hammering out, with attention to the minute detail. Seemingly niggling details like pruning a tree or moving a small rock, if mishandled, can mar the whole thing. Indeed, a misplaced tree twig can spoil the beauty of an entire garden. In the Humble Administrator's Garden, a dead old tree was replaced with a new one in the back of the Yulan Magnolia Hall, but the scene lost its classical allure in no time; the same mishap also happened in front of the Sinuous Gully Loft in the Lingering Garden. These lessons indicate that it is hard to lay out a garden, but even harder to manage it. To be a good garden manager, one has got to be well-versed in a garden's history, and more importantly, he has got to have all the

artistic characteristics of the garden at his fingertips, just like a well-trained nurse must know her patients well enough to take good care of them. This is particularly the case with government-protected heritage sites and cultural artefacts, where rashness and impetuosity must be guarded against. Such sites and artefacts must not be changed without the consent of the authorities. Otherwise, not only the "personality" of such a garden or relic will be blemished, but it also runs the risk of violating relevant government law.

Suburban gardens should be steeped in rural charms, and gardens attached to residences are valued for being refreshingly neat and cosy. Country charms are born of affinity to nature, while the quest for neatness and cosiness ought not fall into old rut. The Memorial Garden of Fan Li⁷ in Wuxi is a typical failure for its vulgarity and awkwardness in taste and lack of idyllic beauty, whereas the Master-of-Fishnets Garden is typically tidy and comfortable. The former is big but seldom draws raves; the latter is small but is flooded with praises. This comparison justifies the idea that the beauty of a garden lies not in size but in exquisiteness, for only with exquisiteness can a garden become a classic objet d'art. The difference lies not only in style but also in interior decoration and furnishing. In a garden's interior decoration, everything must be done by bearing its circumstances in mind. Open structures hinge on dainty lines and delicate contours, but hanging fascias should not be used for they are susceptible to damage; furnishings such as stools and tables fashioned out of stone or brick should be chosen mainly from among simple and unadorned ones. Halls, verandahs, rooms and all those structures with doors and windows should be appointed elaborately. Furniture should be made of mahogany, red sandalwood, *Phoebe nanmu*, or rosewood. To cope with seasonal changes, chairs should be covered with rattan-plaited cushions in summer and upholstered in winter. The furniture for pompous buildings should be made of mahogany or red sandalwood and thoroughly carved; those for simple buildings should be made of *Phoebe nanmu* and rosewood and come in good taste. The importance

of furniture is self-evident, as it is commonly referred to as a house's "innards." A sparsely furnished room evokes someone who does not know how to read and write; an adequately furnished room can be graded by the quality and style of its furniture. In old days the Master of Fishnets Garden was furnished painstakingly and appointed gorgeously so that the visitor could learn a great deal about this aspect of the craft of gardens in our country.

In days of yore, hanging out lanterns for display was frequently portrayed in poetry and prose as a big evening event for every garden. Garden keepers would put valuable lanterns away immediately after the show was over. Being part and parcel of a garden, the lanterns, like the aforementioned name boards and couplets, are also fashioned in compliance with prescribed specifications and come in varied styles and sizes. Nowadays, however, some gardens have electric lamps fixed on their premises to draw visitors at night, which invariably spoils a garden's looks. A case in point is the Shan Juan's Hermitage Cave of Yixing, whose grottoes should have been returned to nature, but the reality is that when night falls, a myriad of electric bulbs were switched on, turning the place into a bizarre world of kaleidoscopic colors that is easily mistaken for a busy restaurant. At the Lion's Grove, too, lamps have been conspicuously installed upon the ends of every pavilion's roof ridges. I would like to suggest caution when handling ancient structures, traditional gardens, and places of historical interest, and we should also guard against imposing incongruous fixtures on them. In my opinion, lamps for illuminating purposes should be kept out of sight, and only ornamental lamps can be displayed in ways congruous to the building and environment. Open or closed structures ought to be fixed with different kinds of lamps. Lamps should not be left to dangle under the roofs of a walkway, for they tend to break easily when they sway and tinkle in the wind. Electric wires and poles must be handled with uttermost caution, for they molest the scenery and block the view, and are eyesores for photographers.

This discourse of mine, replete with clichés and platitude, is about trivialities that are of not much account, but I have delivered it here anyway in hopes that it will help bring our work to perfection and promote cultural prosperity. This foolish man will be elated if you can derive some useful reference from my words.

说园【从周案十八】

我国造园具有悠久的历史，在世界园林中树立着独特风格，自来学者从各方面进行分析研究，各抒高见。如今就我在接触园林中所见闻掇拾到的，提出来谈谈，姑名《说园》。

园有静观、动观之分，这一点我们在造园之先，首要考虑。何谓静观？就是园中予游者多驻足的观赏点。动观就是要有较长的游览线。二者说来，小园应以静观为主，动观为辅。庭院专主静观。大园则以动观为主，静观为辅。前者如苏州“网师园”，后者则苏州“拙政园”差可似之。人们进入网师园宜坐宜留之建筑多，绕池一周，有槛前细数游鱼，有亭中待月迎风，而轩外花影移墙，峰峦当窗，宛然如画，静中生趣。至于拙政园径缘池转，廊引人随，与“日午画船桥下过，衣香人影太匆匆”的瘦西湖相仿佛，妙在移步换影，这是动观。立意在先，文循意出。动静之分，有关园林性质与园林面积大小。像上海正在建造的盆景园，则宜以静观为主，即为一例。

中国园林是由建筑、山水、花木等组合而成的一个综合艺术品，富有诗情画意。叠山理水要造成“虽由人作，宛自天开”的境界。山与水的关系究竟如何呢？简言之，范山模水，用局部之景而非缩小（网师园水池仿虎丘白莲池，极妙），处理原则悉符画本。山贵有脉，水贵有源，脉源贯通，全园生动。我曾经用“水随山转，山因水活”与“溪水因山成曲折，山蹊（路）随地作低平”来说明山水之间的关系，也就是从真山真水中所得到的启示。明末清初叠山家张南垣主张用平冈小陂、陵阜陂阪，也就是要使园林山水接近自然。如果我们能初步理解这个道理：就不至于离自然太远，多少能呈现水石交融的美妙境界。

中国园林的树木栽植，不仅为了绿化，且要具有画意。窗外花树一角，即折枝尺幅；山间古树三五，幽篁一丛，乃模拟枯木竹石图。重姿态，不讲品种，和盆栽一样，能“入画”。拙政园的枫杨、网师园的古柏，都是一园之胜，左右大局，如果这些饶有画意的古木去了，一园景色顿减。树木品种又多有特色，如苏州留园原多白皮松，怡园多松、梅，沧浪亭满种箬竹，各具风貌。可是近年来没有注意这个问题，品种搞乱了，各园个性渐少，似要引以为戒。宋人郭熙说得好：“山以水为血

脉，以草木为毛发，以烟云为神采。”草尚如此，何况树木呢！我总觉得一个地方的园林应该有那个地方的植物特色，并且土生土长的树木存活率大成长得快，几年可茂然成林。它与植物园有别，是以观赏为主，而非以种多斗奇。要能做到“园以景胜，景因园异”，那真是不容易。这当然也包括花卉在内。同中求不同，不同中求同，我国园林是各具风格的。古代园林在这方面下过功夫，虽亭台楼阁，山石水池，而能做到风花雪月，光景常新。我们民族在欣赏艺术上存乎一种特性，花木重姿态，音乐重旋律，书画重笔意等，都表现了要用水磨功夫，才能达到耐看耐听，经得起细细的推敲，蕴藉有余味。在民族形式的探讨上，这些似乎对我们有所启发。

园林景物有仰观、俯观之别，在处理上亦应区别对待。楼阁掩映，山石森严，曲水湾环，都存乎此理。“小红桥外小红亭，小红亭畔，高柳万蝉声。”“绿杨影里，海棠亭畔，红杏梢头。”这些词句不但写出园景层次，有空间感和声感，同时高柳、杏梢，又都把人们视线引向仰观。文学家最敏感，我们造园者应向他们学习。至于“一丘藏曲折，缓步有跻攀”，则又皆留心俯视所致。因此园林建筑物的顶、假山的脚、水口、树梢，都不能草率从事，要着意安排。山际安亭，水边留矶，是能引人仰观、俯观的方法。

我国名胜也好，园林也好，为什么能这样勾引无数中外游人百看不厌呢？风景优美，固然是重要原因，但还有个重要因素，即其中有文化、有历史。我曾提过风景区或园林有文物古迹，可丰富其文化内容，使游人产生更多的兴会、联想，不仅仅是到此一游，吃饭喝水而已。文物与风景区园林相结合，文物赖以保存，园林借以丰富多彩，两者相辅相成，不矛盾而统一。这样才能体现出有一个有古今文化的社会主义中国园林。

中国园林妙在含蓄，一山一石耐人寻味。立峰是一种抽象雕刻品，美人峰细看才像美人，九狮山亦然。鸳鸯厅的前后梁架，形式不同，说不明白，一说才恍然大悟，竟寓鸳鸯之意。奈何今天有许多好心肠的人，唯恐游者不了解，水池中装了人工大鱼，熊猫馆前站着泥塑熊猫，如做着大广告，与含蓄两字背道而驰，失去了中国园林的精神所在，真太煞风景。鱼要隐现方妙，熊猫馆以竹林引胜，渐入佳境，游者反多增趣味。过去有些园名如寒碧山庄（留园）【从周案十九】、梅园、网师园，都可顾名思义，园内的特色是白皮松、梅、水。尽人皆知的西湖十景，更

是佳例。

亭榭之额真是赏景的说明书，拙政园的荷风四面亭，人临其境，即无荷风，亦觉风在其中，发人遐思。而联对文辞之隽永，书法之美妙，更令人一唱三叹，徘徊不已。镇江焦山顶的“别峰庵”，为郑板桥读书处，小斋三间，一庭花树，门联写着“室雅何须大，花香不在多”，游者见到，顿觉心怀舒畅，亲切地感到景物宜人，博得人人称好，游罢个个传诵。至于匾额，有砖刻、石刻，联屏有板对、竹对、板屏、大理石屏，外加石刻书条石，皆少用画，比具体的形象来得曲折耐味。其所以不用装裱的屏联，因园林建筑多敞口，有损纸质，额对露天者用砖石，室内者用竹木，皆因地制宜而安排。住宅之厅堂斋室，悬挂装裱字画，可增加内部光线及音响效果，使居者有明朗清静之感，有与无，情况大不相同。当时宣纸规格、装裱大小皆有一定，乃根据建筑尺度而定。

园林中曲与直是相对的，要曲中寓直，灵活应用，曲直自如。画家讲画树，要无一笔不曲，斯理至当。曲桥、曲径、曲廊，本来在交通意义上，是由一点到另一点而设置的。园林中两侧都有风景，随直曲折一下，使行者左右顾盼有景，信步其间使距程延长，趣味加深。由此可见，曲本直生，重在曲折有度。有些曲桥，定要九曲，既（疑衍。——编者注）不临水面（园林桥一般要低于两岸，有凌波之意），生硬屈曲，行桥宛若受刑，其因在于不明此理（上海豫园前九曲桥即坏例）。

造园在选地后，就要因地制宜，突出重点，作为此园之特征，表达出预想的境界。北京圆明园，我说它是“因水成景，借景西山”，园内景物皆因水而筑，招西山入园，终成“万园之园”。无锡寄畅园为山麓园，景物皆面山而构，纳园外山景于园内。网师园以水为中心，殿春簃一院虽无水，西南角凿冷泉，贯通全园水脉，有此一眼，绝处逢生，终不脱题。新建东部，设计上既背固有设计原则，且复无水，遂成僵局，是事先对全园未作周密的分析，不假思索而造成的。

园之佳者如诗之绝句，词之小令，皆以少胜多，有不尽之意，寥寥几句，弦外之音犹绕梁间（大园总有不周之处，正如长歌慢调，难以一气呵成）。我说园外有园，景外有景，即包括在此意之内。园外有景妙在“借”，景外有景在于“时”，花影、树影、云影、水影、风声、水声、鸟语、花香，无形之景，有形之景，交响成曲。所谓诗情画意盎然而生，与此有密切关系。

万顷之园难以紧凑，数亩之园难以宽绰。紧凑不觉其大，游无倦

意，宽绰不觉局促，览之有物，故以静、动观园，有缩地扩基之妙。而大胆落墨，小心收拾（画家语），更为要谛，使宽处可容走马，密处难以藏针（书家语）。故颐和园有烟波浩渺之昆明湖，复有深居山间的谐趣园，于此可悟消息。造园有法而无式，在于人们的巧妙运用其规律。计成所说的“因借”（因地制宜，借景），就是法。《园冶》一书终未列式。能做到园有大小之分，有静观动观之别，有郊园市园之异等等，各臻其妙，方称“得体”（体宜）。中国画的兰竹看来极简单，画家能各具一格；古典折子戏，亦复喜看，每个演员演来不同，就是各有独到之处。造园之理与此理相通。如果定一式，使学者死守之，奉为经典，则如画谱之有《芥子园》，文章之有“八股”一样。苏州网师园是公认为小园极则，所谓“少而精，以少胜多”。其设计原则很简单，运用了假山与建筑相对而互相更换的一个原则（苏州园林基本上用此法。网师园东部新建反其道，终于未能成功），无旱船、大桥、大山，建筑物尺度略小，数量适可而止，亭亭当当，像个小园格局。反之，狮子林增添了大船，与水面不称，不伦不类，就是不“得体”。清代汪春田重葺文园有诗：“换却花篱补石阑，改园更比改诗难；果能字字吟来稳，小有亭台亦耐看。”说得透彻极了，到今天读起此诗，对造园工作者来说，还是十分亲切的。

园林中的大小是相对的，不是绝对的，无大便无小，无小也无大。园林空间越分隔，感到越大，越有变化，以有限面积，造无限的空间，因此大园包小园，即基此理（大湖包小湖，如西湖三潭印月）。此例极多，几成为造园的重要处理方法。佳者如拙政园之枇杷园、海棠坞，颐和园的谐趣园等，都能达到很高的艺术效果。如果入门便觉是个大园，内部空旷平淡，令人望而生畏，即入园亦未能游遍全园，故园林不起游兴是失败的。如果景物有特点，委婉多姿，游之不足，下次再来。风景区也好，园林也好，不要使人一次游尽，留待多次有何不好呢？我很惋惜很多名胜地点，为了扩大空间，更希望能一览无余，甚至于希望能一日游或半日游，一次观完，下次莫来，将许多古名胜园林的围墙拆去，大是大了，得到的是空，西湖平湖秋月、西泠印社都有这样的后果。西泠饭店造了高层，葛岭矮小了一半。扬州瘦西湖妙在瘦字，今后不准备在其旁建造高层建筑，是有远见的。本来瘦西湖风景区是一个私家园林群（扬州城内的花园巷，同为私家园林群，一用水路交通，一用陆上交通），其妙在各园依水而筑，独立成园，既分又合，隔院楼台，红杏出

墙，历历倒影，宛若图画。虽瘦而不觉寒酸，反窈窕多姿。今天感到美中不足的，似觉不够紧凑，主要建筑物少一些，分隔不够。在以后的修建中，这个原来瘦西湖的特征，还应该保留下来。拙政园将东园与之合并，大则大矣，原来部分益现局促，而东园辽阔，游人无兴，几成为过道。分之两利，合之两伤。

本来中国木构建筑，在体形上有其个性与局限性，殿是殿，厅是厅，亭是亭，各具体例，皆有一定的尺度，不能超越，画虎不成反类犬，放大缩小各有范畴。平面使用不够，可几个建筑相连，如清真寺礼拜殿用勾连搭的方法相连，或几座建筑缀以廊庑，成为一组。拙政园东部将亭子放大了，既非阁，又不像亭，人们看不惯，有很多意见。相反，瘦西湖五亭桥与白塔是模仿北京北海大桥、五龙亭及白塔，因为地位不够大，将桥与亭合为一体，形成五亭桥，白塔体形亦相应缩小，这样与湖面相称了，形成了瘦西湖的特征，不能不称佳构。如果不加分析，难以辨出它是一个北海景物的缩影，做得十分“得体”。

远山无脚，远树无根，远舟无身（只见帆），这是画理，亦造园之理。园林的每个观赏点，看来皆一幅幅不同的画，要深远而有层次。“常倚曲阑贪看水，不安四壁怕遮山。”如能懂得这些道理，宜掩者掩之，宜屏者屏之，宜敞者敞之，宜隔者隔之，宜分者分之，等等，见其片断，不逞全形，图外有画，咫尺千里，余味无穷。再具体点说：建亭须略低山巅，植树不宜峰尖，山露脚而不露顶，露顶而不露脚，大树见梢不见根，见根不见梢之类。但是运用上却细致而费推敲，小至一树的修剪，片石的移动，都要影响风景的构图。真是一枝之差，全园败景。拙政园玉兰堂后的古树枯死，今虽补植，终失旧貌。留园曲谿楼前有同样的遭遇。至此深深体会到，造园困难，管园亦不易，一个好的园林管理者，他不但要考察园的历史，更应知道园的艺术特征，等于一个优秀的护士对病人作周密细致的了解。尤其重点文物保护单位，更不能鲁莽从事，非经文物主管单位同意，须照原样修复，不得擅自更改，否则不但破坏园林风格，且有损文物，关系到党的文物政策问题。

郊园多野趣，宅园贵清新。野趣接近自然，清新不落常套。无锡蠡园为庸俗无野趣之例，网师园属清新典范。前者虽大，好评无多；后者虽小，赞辞不已。至此可证园不在大而在精，方称艺术上品。此点不仅在风格上有轩轻，就是细至装修陈设皆有异同。园林装修同样强调因地制宜，敞口建筑重线条轮廓，玲珑出之，不用精细的挂落装修，因易损

伤；家具以石凳、石桌、砖面桌之类，以古朴为主。厅堂轩斋有门窗者，则配精细的装修。其家具亦为红木、紫檀、楠木、花梨所制，配套陈设，夏用藤棚椅面，冬加椅披椅垫，以应不同季节的需要。但亦须根据建筑物的华丽与雅素，分别作不同的处理，华丽者用红木、紫檀，雅素者用楠木、花梨；其雕刻之繁简亦同样对待。家具俗称“屋肚肠”，其重要可知，园缺家具，即胸无点墨，水平高下自在其中。过去网师园的家具陈设下过大功夫，确实做到相当高的水平，使游者更全面地领会我国园林艺术。

古代园林张灯夜游是一件大事，屡见诗文，但张灯是盛会，许多名贵之灯是临时悬挂的，张后即移藏，非永久固定于一地。灯也是园林一部分，其品类与悬挂亦如屏联一样，皆有定格，大小形式各具特征。现在有些园林为了适应夜游，都装上电灯，往往破坏园林风格，正如宜兴善卷洞一样，五色缤纷，宛若餐厅，几不知其为洞穴。要还我自然。苏州狮子林在亭的戗角头装灯，甚是触目。对古代建筑也好，园林也好，名胜也好，应该审慎一些，不协调的东西少强加于它。我以为照明灯应隐，装饰灯宜显，形式要与建筑协调。至于装挂地位，敞口建筑与封闭建筑有别，有些灯玲珑精巧不适用于空廊者，挂上去随风摇曳，有如塔铃，灯且易损，不可妄挂。而电线电杆更应注意，既有害园景，且阻视线，对拍照人来说，真是有苦说不出。凡兹琐琐，虽多陈音俗套，难免絮聒之讥，似无关大局，然精益求精，繁荣文化，愚者之得，聊资参考！

《同济大学学报》建筑版1978年第2期

ON GARDENS 2

Tongji University Journal, Issue No. 4, 1979

The term "garden-making" may also be put as "garden-structuring," with stress on "structuring," a word that points to incisiveness of thought and delicacy of aesthetics. Incisiveness of thought calls for artistic conception, and delicacy of aesthetics depends on temperament and interest that give resonance to life, for "garden-structuring" is not merely about construction and horticulture. In "Visiting General He's Wooded Mountains as Escort to Academician Zheng: Ten Stanzas" and "He's Garden Revisited: Five Stanzas," the great poet Du Fu (712-770) portrays what he sees and thinks of as he goes along on his itineraries. What he sees includes views in the garden, people belonging in a scenic setting, people and scenery combined in one, as well as vistas that change with people. All the while his verse is intimately associated with garden-structuring. Some of his lines depict views in the garden:

The famed garden snuggles up to water green,
While wild bamboos soar into blue empyrean.

Broken by wind, a green bamboo shoot bows;
Nourished by rain, the plum tree scarlet turns.

Some portray people belonging in fabulous scenes:

Distracted by scenery, the yard we quit wiping;
Sitting on green moss, liquor we keep imbibing.

Leaning on stone railing, I dip my brush in ink;
Sitting down, on a parasol leaf I improvise lyric.

Only when one finds himself in such scenic settings can one make sense of the divine philosophy implied in landscape gardening.

Wind, flowers, snow and moon are in objective existence, but when the garden designer dishes up his trump card, he puts them at

his beck and call, and the desired vista materializes on its own accord. In the Master-of-Fishnets Garden of Suzhou there is the Pavilion of Moon Arriving and Breeze Coming, which faces west by the side of a pond, with a white-washed wall providing a nice backdrop to it. This scenery is captured exactly by the pavilion's name, in which the moon and the wind seem to be on call in case the pavilion beckons. At the West Lake, the presence of the Three Pools Mirroring the Moon would be out of the question without these pools, which is a typical example of view highlighting, with the pools adding the finishing touch to a perfect man-made scene. "View highlighting" is analogous to a Chinese idiom, that is, to "bring a painted dragon to life by putting the pupils into its eyes." At times, one falls in love with a scenic sight but does not know why; this is where a fitting inscription board comes handy. In *A Dream of Red Mansions* (Chapter Seventeen), "Literary Talent Is Tested by Composing Inscriptions," Jia Zheng says of the poetic lines to be inscribed on the boards in the Grand View Garden,

All those prospects and pavilions—even the rocks and trees and flowers will seem somehow incomplete without that touch of poetry which only the written word can lend a scene.

Such an inscription implies another approach to view highlighting. Before an inscription is composed for a scenic view, one has got to spend time on it and carefully fathom out what is special about it. This is what is termed "view finding." The poet Jiang Shi (1818-1866)² has this to say,

I am a fool if I go and seek poetry out, but
When poetry finds me it's hard to reject.
Now poetry has once more sought me out,
As I, alone, get an eyeful of hill and rivulet.

Only when "view finding" reaches such a realm can one hit upon a fitting inscription in a stroke of genius.

In ancient times the creation of a Chinese garden began in most cases with architecture. In a private garden, a parlor should be completed before trees and rockeries were arranged. Such a garden was often done over repeatedly until every requirement was met. Shen

Yuanlu (fl. 18th century) says in his "Notes on the Ancient Garden of Lush Bamboos":

Nothing sets a garden's momentum better than a hall;

Nothing defines a garden's scenery better than a hill.

This is why in days of yore a garden was predicated on architectural construction, with trees and rockeries serving as ornamental supplements. This, however, has been changed nowadays, with ponds dug and roads paved before principal buildings come under construction. Thus a whopping sum of money has been spent when a garden being made is barely half way through, with little space available for visitors to set foot in. Such mix-up of priorities tends to give rise to "ghost gardens."

Some gardens, scenic resorts and places of historical interest are treated like tree nurseries, where old trees are hacked and new saplings transplanted under the nonsensical excuse to "make a garden earn its own upkeep."

"View finding" and "view ushering" are essential to the making of the Chinese garden. What is entailed in "view ushering"? It is to give prominence to a certain view in order to engage the visitor. The entire landscape of the South Hill of the West Lake lost its appeal with the collapse of the Lei's Peak Pagoda. A scenic vista becomes inviting only after it is invested with sentiment, and sentiment originates in humanity. Just as a poem has it,

Sentient is grass exuding aroma,

But speechless is the sun setting;

Wild geese fly across the South River

While a lady leans upon a west baluster.

Indeed, where there is no chamber there will be no lady to be seen; where no lady is present there will be no sentiment; where there is no sentiment there will be no scenery. In the scenery depicted in this poem, it is the west baluster that holds the key. The importance of buildings to a garden or scenic resort is there for all to see.

Our forebears made a point of arranging scenery in a garden according to a prescribed plan, so that masterstrokes could spring up

at the onset to avoid scenes and sights being detached from their environment. In the Perfect Enlightenment Gully at the West Lake of Hangzhou, a trail meandering its way into the deepest recesses used to be lined with clusters of sweet-scented osmanthus, whose flowers stayed longer than usual as they were nourished by babbling creeks and refreshing mountain air, and whose aroma was detained longer than usual because the gully is hemmed in by high mountains. When autumn set in, visitors would flock in to savor the flowers and their fragrance and be immersed for a while in the sights of the picturesque gully. Nevertheless, with automobiles kicking up clouds of choking dust along a newly built highway that pushes its way into the gully, this infatuating scene is no more.

Insofar as trees and plants in small gardens are concerned, those with fragrant flowers ought to be walled in. Plantains, whose giant leaves provide delightful verdure but break easily in the wind, should be planted at the foot of a wall or the corner of a house. The peony, whose beautiful aromatic flowers thrive in sunshine, ought to be planted south of a garden's main hall. These examples indicate that some trees and plants must be well concealed, while the others can be displayed in the open.

The merit of a potted plant is that it provides a "microlens" through which to see a big picture. This ingenuous conception of potted trees or miniature landscapes is well depicted in the line,

A pot leaps to life with a dwarf tree grown in it;

A pedestal greens with hills into its turf packed.

Potted plants and miniature landscapes are meant to be itsybitsy, but unfortunately, they are ballooning in size nowadays, a malpractice no different from squeezing an elephant into a canary's cage. Potted trees or miniature landscapes depend on three factors: plant, pot and trellis, none of which can be dispensed with. A miniature landscape is made for in-situ viewing, and should be viewed in solitude.

Most classical gardens in China are shut behind closed doors, as they are designed to create limitless immensity in a limited space.

Thus it is essential to make such a garden physically spacious and spiritually resonating. A chosen flowering plant or tree should strike a good pose, and a rock to be erected is prized for its "knolls" and "valleys." Their numbers should be kept sparse and their designs highly compact. As an antithetical couplet on a theater stage claims,

In three or five steps one traverses the world;

With six or seven men a mighty foe is breasted.

This performing art principle, too, pertains to landscape gardening.

The lacebark pines dominate the Chinese garden with their graceful shapes and knotted, ancient-looking trunks. Even a mere sapling of it can appear as wrinkled as an old tree. As is much extolled in classic verse, willows are another choice species for garden decoration, so much so that some gardens have made a name for themselves on account of their vast possessions of such trees. However, willows are ill fit for tiny gardens in the Jiangnan area because they are supposed to stand by a pond or a stream in rows of threes and fives that take a lot of space, and because their foliage is so thick they can rarely be seen through. In the north, nevertheless, most gardens are large enough for willows to reach out to the cloudy skies while their long, pliant trigs bow low to flirt with waters, thereby adding substantially to the appeals of these gardens. However, a concrete issue like this calls for concrete analysis—arbitrary unanimity goes nowhere. If it stands reason to say willows should be barred from southern gardens for they wither in early autumn and are therefore ill omens, then why is it that the Humble Administrator's Garden can still pride itself with its "Willow-Shaded Winding Walkway"?

The trees planted in a scenic resort are marked for their local distinction. Take pine trees for instance. There are Mount Tianmu Pine, Mount Huangshan Pine, Mount Tai Pine, and so on, all of which are so well attuned to local circumstances as to become natural landmarks for their respective mountain sanctuaries. Today, however, there are quite a few "fashion-savvy" garden-makers who take great pains to beautify our homeland by "making things foreign serve

China." In their eyes, snow cedars from alien lands are to Chinese gardens what penicillin is to the treatment of a hundred diseases. As a result, such cedars are ubiquitous in virtually every garden across the land.

Dense enough are weeping willows to hide crows
At the White Gate of Nanjing.

The city that has all its walls greened with willows
Is none other than Yangzhou.

Both lines describe views gone for ever today. Snow cedars have usurped virtually all the gardens where willow trees have so aged that they can no longer set catkins flying everywhere. Having had showcased itself to the world with its Mount Tai Pine for so long, Mount Tai has not but to let snow cedars be planted at the Mount Tai Temple. Even a venerated Chinese structure like this can be decked with such a "foreign coat"! I have no alternative but to call it "nondescript."

In the Chinese garden, pavilions, terraces, lofts and chambers are arranged along with rockeries, brooks and ponds in distinctly local styles that are also rich and varied. Old gardens in the Lingnan area (comprising Guangdong, Guangxi and Hainan provinces) are surrounded with storied buildings. When the wind rises from waterside buildings and the cool air generated in the thick foliage of trees towering over deep ponds begins to drift, the heat waves of a smothering summer day will vanish in no time, while the orchids' seasonal aroma accumulated in bamboos' shades penetrates visitors'sleeves. It is with such unique fascinations that the Lingnan gardens stand proudly among all counterparts in the Divine Land.

A garden cannot look colorful merely with tangible colors. Gardens in north China obtain multiple hues by setting off green pines and vermilion corridors against white clouds and blue skies. As to gardens in the south, they can pull off myriad changes in color and image by mingling tiny riverside belvederes with whitewashed

parapets and low branches. Colorless is white, but color is engendered therein; colorless, too, is a pool of water, yet its color is at its richest. This being the case, we have got to seek color in colorlessness, rather than look for color in colors. The same is true with gardens: scenery ought to be found where there is no scenery, sound where there is no sound, and motion where there is no motion. To capture sceneries where there is no scenery, nothing beats a giant mirror or a big pond, so that scenery can be found where there is no scenery at all.

It is proper to plant plenty of deciduous trees in small gardens, but such trees should be sparsely scattered to leave the space open and ventilated; in large gardens more evergreen trees should be added where the space is wide so as to avoid crowdedness in small space through sparse planting, whereas empty space ought to be filled with a commensurate number of trees. Deciduous trees enable people to visually experience substitution of the four seasons; evergreen trees keep a place verdant even after winter sets in. Winter arrives early in the north, so more pines and cypresses are planted there.

Rocks come in unpredictable shapes, but construction of artificial mountains calls for predictable rules. Such rules are the same as those governing painting in that they are both about veins and momentum. However, poetry dies when stereotypes are imposed on it; lyrics deteriorate when music scores are set for them. Of all genres of verse, be it classical-style poems of the Han (206 BC-220 AD) and Wei (220-265), or short lyrics of the Northern Song (960-1127), the finest pieces are never born of stereotyped tonal patterns and rhyme schemes. When it comes to gerund-grinders chanting verse, or a bookworm filling in a poem to a stylized tune, his composition is bound to lack ingenuity and resonance, let alone sublimity of mood. The same is true with the craft of gardens.

When building an artificial mountain with rocks, heights are brought about on level ground, and twists and turns are derived from straight lines. One must keep the overall picture in mind while proceeding from the minute detail. It is easy to lay down the base for

an artificial mountain of yellow stones and hard to bring its top to completion, but the opposite is true with artificial mountains built of Lake Tai stones. Artificial mountains of yellow stones are supposed to look solid and simple, with enough holes and cavities in them, while those of Lake Tai stones are intricately hollowed out but still look solid and strong. In short, the former type tends to lack diversity, and the latter tends to look petty and trivial. Stones differ from one another in shape, quality, veins, and texture, and therefore cannot be measured by the same standard. This is where the cardinal law of dialectics comes handy. It is rare, and therefore commendable, for artificial mountains built of yellow stones to look vivacious with plenty of twists and turns in them, and for those built of Lake Tai stones to appear naturally graceful and intriguing in multiple natural ways.

It is hard to pile up stones and build a hefty and rugged mountain and still harder to produce a peak with a solid and primitive look, but it is the hardest to bring into shape a mountain against a wall. In the sketches by the Yuan-dynasty (1206-1368) painter and poet Ni Zan (1301-1374), what looks like a nonchalant and effortless brush stroke often rivets the closest attention. However, such "nonchalance" can be attained only with great pains, elaborate deliberation and a complete mastery of the entire picture. Only thus can the master painter set his dexterous brushstroke to work; only thus can the mere addition of, say, three hairs to the cheek can bring a human figure to vivid life.³ In the same token, the minutest detail in a garden often merits the utmost attention, be it a single boulder protruding from a water surface, a stone slope, a stone stair, or a stepping stone. The artificial mountains built during the Ming (1368-1644) stand the most intense scrutiny exactly for their casual, but massive and weighty looks.

Artificial-mountain builders during the Tongzhi (1862-1874) and Guangxu (1875-1908) reigns of the Qing pinned their hopes for success on exquisiteness, but they ended up with works that look too thin or too weak. The truth is that none of the best artificial

mountains comes from those looking heavy and crude. The beauty of yellow stones lies, as per a rule of nature, in their hefty mass and simplistic appearance. Indeed, where there are no solidity and weightiness there will be no fabulously structured artificial mountains.

The artificial mountains dating back to the Ming could not be simpler in layout. They are composed of stairs, terrace, main peak, cave and nothing else, yet they can conjure up innumerable changes. Their secret rests with well-coordinated openness and closeness. Why? To be open, a mountain must have some outlets in the form of a valley or dale, and the grand artificial mountain of Shanghai's Gratification Garden is a fine example. To be close, it must have a protruding main peak and its slopes must appear in conspicuous graduation. Its foothills and rocks must be scattered to enhance its openness. The same purpose for openness can also be served with the foothills and rocks of an artificial mountain on land, or by rocks on land and in water about a water-bound artificial mountain. The impact of the concise landscape painting style of the Ming and the over-elaborate style of the Qing are keenly felt on the artificial mountains born of their respective ages.

The Ming essayist Zhang Dai (1597-1689)⁴ says of the three peak-shaped rocks in Wang's Garden of Yizheng, Jiangsu, in his *Dreamy Memories of Tao'an*,

While there I espied an upended white stone ten feet long and twenty feet wide, which looked eccentric in an inviting way. I also came across a black stone eight feet in width and fifteen feet in length, looking lean but rather enchanting. By characterizing stones as "eccentric in an inviting way" and "lean but rather enchanting," Zhang Dai invested his sentiment in his discoveries. Gong Zizhen (1792-1841)⁵ of the Qing often describes people as being "ugly in a lovable way," a term which is also apt for evaluation of stones. The fine-grained chrysotile (known as "yellow wax stone" in Chinese) recently added to gardens in Guangzhou looks rather mischievous, a description I believe can make up for what is lacking in the two terms coined by Zhang Dai.

An artificial mountain can be made to look like water-bound in a landlocked garden, such as the one in the back of the Rosy Autumn Clouds Garden in Jiading, Shanghai, and the rockery in front of the Loft of Two-Thirds Bright Moonlight⁶ in Yangzhou. An undulating mountain and a piece of low-lying land can be set in mutual contrast to bring about a make-belief pond in a garden that has no water at all. But it is absurd to assert that a water-bound artificial mountain can be wrought in the same way as a landlocked one or vice versa, because the foot of a landlocked mountain and the outlet of a water-bound mountain need be treated differently. The stone trail, boulder and dock belonging to a water-bound mountain cannot be used upon a landlocked one; the stones strewn at the foot of a landlocked mountain would be utterly misplaced if applied on a water-bound one. It is even more obvious that yellow stones cannot be heaped up the way Lake Tai stones are, and the same is true the other way round. To sum up, success is guaranteed if we keep observing the natural landscape, consulting the principles of traditional Chinese painting, learning from Mother Nature the creator, cultivating our thought and temperament, and learning by analogy.

A large garden can contain small gardens. A large lake can contain small lakes, and the Three Pools Mirroring the Moon at the West Lake of Hangzhou is a good example in this regard. Zhong Xing (1574-1624)⁷ says in his "Notes on the Plum Flower Villa":

Herein lies a water-bound garden. Observed above and below the water, and left and right of it, its height is embodied by a terrace, its depth by a hall, its intangibles by a pavilion, and its circumambience by a roofed walkway; what lies horizontally is a ferry crossing, and what stands vertically is a rockery; its fauna and flora are represented by birds and flowers, and its passers-by are visitors. All these are what belong to the garden. Why should every man own his own garden? Oftentimes a man stays in a garden without realizing it. It is only natural if it takes a long time before a man realizes that the garden he knows so well is actually a combination of some small gardens.

In garden-making there is no lack of philosophies and principles to be referred to.

If the scenic sights within and without a garden can contrast and complement each other in pleasant ways, it shows the builder's dexterous mastery of siting as a garden-making technique. In his "Notes on the Plum Flower Villa," Zhong Xing goes on,

The river running through the precincts of the three former Wu counties⁸ begins to flow smoothly only after it reaches Fuli⁹. It is nowhere to be seen a few steps from the Plum Flower Villa, yet it is right there inside the villa. It turns out that an underground canal is diverting water from the river to the villa's garden. As I open the door, a straight path conducts me past the Wolfberry and Aster Chamber....When I mount a belvedere, I do not see water at the first sight, but water is always there—at the foot of a pavilion, ahead of a roofed walkway, underneath a bridge, by the side of a rockery standing or reclining, and under the thick foliage of drooping willows and slender bamboos.... As I take another look around from atop the building, I find that the roofed walkway is encircled by water, with a wall running parallel to the walkway, and there seems to be a pavilion standing upright beyond the wall. Trees and duckweed turn the whole body of water into a carpet of verdure that dyes people's clothes green. Hereabouts water is all-encapsulating and close at hand, yet it seems beyond reach.... I then walk through a tiny stone grotto and take a break in the comfort of the Beckoning for Cosiness Pavilion, where rocks draped in mosses and lichens seem to be gnawing at the waves in what is known as "Gurgling Brocade Shoal." The long roofed walkway runs by the side of a stream lined with cloves of bamboos and trees that share the breeze but scramble for sunshine amid babbling water, while sunshine streaks right before my eyes. As it is impossible to locate a place in such haste, I could not but settle with this roofed walkway.

The aforementioned garden is based on water. There, water appears at one moment and disappears at another, and exists inside and outside of the garden; when it flows it now rises and falls, now twists and turns. To make water serve people's needs, it is flanked with pavilions, belvederes and corridors, because only buildings like these can generate spatial changes between water and land. Hence the saying, "A garden must be segmented; a body of water must be made to bend." Of all the waterside roofed walkways extant today, the one in the western part of the Humble Administrator's Garden is the most celebrated, and the one in the Plum Flower Villa seems to be a replica of it. It is not unfounded to say that all the gardens in the former

kingdom of Wu, that is, the Jiangnan area, can be traced back to the same root.

The venerable Tong Jun (1900-1983)¹⁰ says of the Humble Administrator's Garden,

The roads are concealed beneath mosses and lichens, whereas the mountains and ponds look like born of nature. Even the faded color and peeled lacquer of the buildings fill the garden with a cornucopia of delights.

Indeed, a traditional garden's slightly worn-out appearance can in no way spoil the integrity of its hill and dale—its natural rustic looks, indeed, beat tons of tawdry ornamentation. By contrast, like a seven-treasure terraced pavilion having been torn apart, the scenery of Suzhou's fabulous Lingering Garden has become fragmentary, which means damages, however minor, still spell doom for scenic wonders. In some well-known gardens today, everything is fine when no refurbishment is going on, but once refurbishment comes under way, it is often overdone. In the Humble Administrator's Garden, pond embankments used to be lined by interlocking earth and rock in a jigsaw fashion, but today not an iota of earth can be found there, so that the pond looks like a man flashing gold teeth in his mouth. When the Eight-Tone Gully in the Solace-Imbued Garden of Wuxi lost its tones, the garden is robbed of its former glory right away. We should be careful about all this, shouldn't we?

Scenery is brought into bold relief when its outline is drawn. Not long ago I was invited to Changzhou, Jiangsu province, for discussions about the design of a so-called "Red Plum Belvedere-Garden." Now that the garden was named after the Red Plum Belvedere on the premises, I suggested that red plums be its theme. But to my dismay, plum trees had been planted all over that garden—instead of "Red Plum Belvedere," it should be renamed "Plum Tree Nursery." In that way, nobody could turn such a place into a garden overnight. I remember that during the discussion session I suggested to run a corridor across the garden, with plum trees judiciously spread out on both sides. In this way, the trees could toss their slanting shadows to

the scene, while the delicate aroma of plum flowers could waft along with the visitor's swinging sleeves. The presence of the red plum could be easily felt even if the garden were not named after it. The corridor could also serve to outline the garden's shape, with the scenery evolving into a montage of pictures wherever the visitor finds himself. Thus "the few can prevail over the many," and "from the minute detail one can see the big picture."

It is harder to make a garden look commodious by keeping its scenery well scattered than to crowd it with scenes and sights. In the same token, it is easy to be ornate and flashy but difficult to stay simple and in good taste—scenic vistas ought to be well scattered to prevent a garden from losing its spaciousness, and gardens should be kept simple and tasteful to avoid looking humble and shabby. The reason why the middle section of the Humble Administrator's Garden has been celebrated all over the Jiangnan area from the Ming to this day is exactly because it has maintained its simplicity and good taste through well-diffused attractions. Unfortunately, such reasoning seems to be lost on the gardener-makers of today.

Our forbears made a point of naming the gardens they had just built, but such names were invariably well-conceived rather than jumbled together. Yang Zhaolu (*fl.* 17th century)¹¹ writes of the Approximate Garden in Changzhou,

Upon returning to my hometown on sick leave, I bought six to seven *mu* of wasteland behind the Sutra Annotation Hall. After five years of painstaking labour, I produced something that approximates to a garden. So I call it "Approximate Garden."

From this terse account of the origin of a garden's name, we come to know it was a product of a man's modesty and self-restraint. I remember seeing a poorly designed pavilion in the Rainy Lake Park in Ma'anshan, Anhui, a few years ago. At my host's request, I named it "Temporary Pavilion," a name that speaks for itself, that everyone understands, and that stands contrary to such big names as "Grand View Garden" and "Hall with Ten Thousand Willows."

The gardens of Suzhou have considerably influenced the stage design and decoration of the traditional Chinese theater. Of course, natural scenery cannot be mentioned in the same breath as stage property, but it is not uncommon to see garden buildings imitating stage settings, some looking like the intricately crafted paper models on sale in the City God's Temple of Shanghai, and some looking like facsimiles of old paintings, in the same way as a woman stroking her coiffure in coquettish provocation.

Latticed windows play an apparent part in "view diverting" and "view ushering." A large garden can have its views diverted, but for small gardens, scenery can only be ushered in. The Vernal Crabapple Yard in the Humble Administrator's Garden is actually a courtyard whose latticed windows help usher in views from the large garden beyond its walls. The Garden of Brotherly Indulgence of Suzhou is small, but the large lattice windows that flank its front gate are instant failures in that, aside from their ill-fitting size, they expose all the garden's views to the outside world, so that it has no implicit beauty whatsoever to speak of. The newly built front gateway of the Humble Administrator's Garden is another awkward structure, for its monastic design could likely lead visitors to mistake the garden for a temple. Another tendency that flies in the face of garden-making precepts is the erection of a grand building that overshadows or dwarfs the scenic resort or place of historic interest next to it. Examples like this are too many to be counted. As modesty is a celebrated virtue in this nation, only when a new structure is built to supplement a traditional garden can it draw rave reviews.

Having found ponds and chambers altered wilfully, and cultural heritages gone down the drain, my eyes brim with tears as I mount the tower.

This line is quoted from my poem dedicated to the late Liang Sicheng (1901-1972)¹² and Liu Dunzhen. I wrote it a few years ago after I saw the damages done to some gardens that I had happened upon on a return visit to Yangzhou. Today, however, I am in a different mood as I finish writing this essay, "On Gardens 2."

续说园

造园一名构园，重在构字，含意至深。深在思致，妙在情趣，非仅土木绿化之事。杜甫《陪郑广文游何将军山林十首》《重过何氏五首》，一路写来，园中有景，景中有人，人与景合，景因人异。吟得与构园息息相通，“名园依绿水，野竹上青霄”，“绿垂风折笋，红绽雨肥梅”，园中景也。“兴移无洒扫，随意坐莓苔”，“石阑斜点笔，桐叶坐题诗”，景中人也。有此境界，方可悟构园神理。

风花雪月，客观存在，构园者能招之即来，听我驱使，则境界自出。苏州网师园，有亭名“月到风来”，临池西向，有粉墙若屏，正撷此景精华，风月为我所有矣。西湖三潭印月，如无潭则景不存，谓之点景。画龙点睛，破壁而出，其理自同。有时一景“相看好处无一言”，必藉之以题辞，辞出而景生。《红楼梦》“大观园试才题对额”一回（第十七回），描写大观园工程告竣，各处亭台楼阁要题对额，说：“若大景致，若干亭榭，无字标题，任是花柳山水，也断不能生色。”由此可见题辞是起“点景”之作用。题辞必须流连光景，细心揣摩，谓之“寻景”。清人江弢叔有诗云：“我要寻诗定是痴，诗来寻我却难辞；今朝又被诗寻着，满眼溪山独去时。”“寻景”达到这一境界，题辞才显神来之笔。

我国古代造园，大都以建筑物为开路。私家园林，必先造花厅，然后布置树石，往往边筑边拆，边拆边改，翻工多次，而后妥帖。沈元禄记古猗园谓：“奠一园之体势者，莫如堂；据一园之形胜者，莫如山。”盖园以建筑为主，树石为辅，树石为建筑之连缀物也。今则不然，往往先凿池铺路，主体建筑反落其后，一园未成，辄动万金，而游人尚无栖身之处，主次倒置，遂成空园。至于绿化，有些园林、风景区、名胜古迹，砍老木，栽新树，俨若苗圃，美其名为“以园养园”，亦悖常理。

园既有“寻景”，又有“引景”。何谓“引景”？即点景引人。西湖雷峰塔圯后，南山之景全虚。景有情则显，情之源来自于人。“芳草有情，夕阳无语，雁横南浦，人倚西楼。”无楼便无人，无人即无情，无情亦无景，此景关键在楼。证此可见建筑物之于园林及风景区的重要性了。

前人安排景色，皆有设想，其与具体环境不能分隔，始有独到之

笔。西湖满觉陇一径通幽，数峰环抱，故配以桂丛，香溢不散，而泉流淙淙，山气霏霏，花滋而馥郁，宜其秋日赏桂，游人信步盘桓，流连忘返。闻今已开公路，宽道扬尘，此景顿败。至于小园植树，其具芬芳者，皆宜围墙。而芭蕉分翠，忌风碎叶，故栽于墙根屋角；牡丹香花，向阳斯盛，须植于主厅之南。此说明植物种植，有藏有露之别。

盆栽之妙在小中见大。“栽来小树连盆活，缩得群峰入座青”，乃见巧虑。今则越放越大，无异置大象于金丝鸟笼。盆栽三要：一本，二盆，三架，缺一不可。宜静观，须孤赏。

我国古代园林多封闭，以有限面积，造无限空间，故“空灵”二字，为造园之要谛。花木重姿态，山石贵丘壑，以少胜多，须概括、提炼。曾记一戏台联：“三五步，行遍天下；六七人，雄会万师。”演剧如此，造园亦然。

白皮松独步中国园林，因其体形松秀，株干古拙，虽少年已是成人之概。杨柳亦宜装点园林，古人诗词中屡见不鲜，且有以万柳名园者。但江南园林则罕见之，因柳宜濒水，植之宜三五成行，叶重枝密，如帷如幄，少透漏之致，一般小园，不能相称。而北国园林，面积较大，高柳侵云，长条拂水，柔情万千，别饶风姿，为园林生色不少。故具体事物必具体分析，不能强求一律。有谓南方园林不植杨柳，因蒲柳早衰，为不吉之兆。果若是，则拙政园何来“柳荫路曲”一景呢？

风景区树木，皆有其地方特色。即以松而论，有天目山松、黄山松、泰山松等，因地制宜，以标识各座名山的天然秀色。如今有不少“摩登”园林家，以“洋为中用”来美化祖国河山，用心极苦。即以雪松而论，几如药中之有青霉素，可治百病，全国园林几将遍植。“白门（南京）杨柳可藏鸦”，“绿杨城郭是扬州”，今皆柳老不飞絮，户户有雪松了。泰山原以泰山松独步天下，今在岱庙中也种上雪松，古建筑居然西装革履，无以名之，名之曰“不伦不类”。

园林中亭台楼阁，山石水池，其布局亦各有地方风格，差异特甚。旧时岭南园林，每周以楼，高树深池，阴翳生凉，水殿风来，溽暑顿消，而竹影兰香，时盈客袖，此唯岭南园林得之，故能与他处园林分庭抗衡。

园林中求色，不能以实求之。北国园林，以翠松朱廊衬以蓝天白云，以有色胜。江南园林，小阁临流，粉墙低桷，得万千形象之变。白本非色，而色自生；池水无色，而色最丰。色中求色，不如无色中求

色。故园林当于无景处求景，无声处求声，动中求动，不如静中求动。景中有景，园林之大镜、大池也，皆于无景中得之。

小园树宜多落叶，以疏植之，取其空透；大园树宜适当补常绿，则旷处有物。此为以疏救塞，以密补旷之法。落叶树能见四季，常绿树能守岁寒，北国早寒，故多植松柏。

石无定形，山有定法。所谓法者，脉络气势之谓，与画理一也。诗有律而诗亡，词有谱而词衰，汉魏古风、北宋小令，其卓绝处不能以格律绳之者。至于学究咏诗，经生填词，了无性灵，遑论境界。造园之道，消息相通。

假山平处见高低，直中求曲折，大处着眼，小处入手。黄石山起脚易，收顶难；湖石山起脚难，收顶易。黄石山要浑厚中见空灵，湖石山要空灵中寓浑厚。简言之，黄石山失之少变化，湖石山失之太琐碎。石形、石质、石纹、石理，皆有不同，不能一律视之，中存辩证之理。叠黄石山能做到面面有情，多转折；叠湖石山能达到宛转多姿，少做作，此难能者。

叠石重拙难，树古朴之峰尤难，森严石壁更非易致。而石矶、石坡、石磴、石步，正如云林小品，其不经意处，亦即全神最贯注处，非用极大心思，反复推敲，对全景作彻底之分析解剖，然后以轻灵之笔，随意着墨，正如颊上三毛，全神飞动。不经意之处，要格外经意。明代假山，其厚重处，耐人寻味者正在此。清代同光时期假山，欲以巧取胜，反趋纤弱，实则巧夺天工之假山，未有不从重拙中来。黄石之美在于重拙，自然之理也。没其质性，必无佳构。

明代假山，其布局至简，磴道、平台、主峰、洞壑，数事而已，千变万化，其妙在于开合。何以言之？开者山必有分，以涧谷出之，上海豫园大假山佳例也。合者必主峰突兀，层次分明，而山之余脉，石之散点，皆开之法也。故旱假山之山根、散石，水假山之石矶、石濑，其用意一也。明人山水画多简洁，清人山水画多繁琐，其影响两代叠山，不无关系。

明张岱《陶庵梦忆》中评仪征汪园三峰石云：“余观其弃地下一白石，高一丈、阔二丈而痴，痴妙。一黑石阔八尺、高丈五而瘦，瘦妙。”痴妙，瘦妙，张岱以“痴”字、“瘦”字品石，盖寓情在石。清龚自珍品人用“清丑”一辞，移以品石极善。广州园林新点黄蜡石，甚顽。指出，“顽”字，可补张岱二妙之不足。

假山有旱园水做之法，如上海嘉定秋霞圃之后部，扬州二分明月楼前部之叠石，皆此例也。园中无水，而利用假山之起伏，平地之低降，两者对比，无水而有池意，故云水做。至于水假山以旱假山法出之，旱假山以水假山法出之，则谬矣。因旱假山之脚与水假山之水口两事也。他若水假山用崖道、石矶、湾头，旱假山不能用；反之旱假山之石根，散点又与水假山者异趣。至于黄石不能以湖石法叠，湖石不能运黄石法，其理更明。总之，观天然之山水，参画理之所示，外师造化，中发心源，举一反三，无往而不胜。

园林有大园包小园，风景有大湖包小湖，西湖三潭印月为后者佳例。明人钟伯敬既撰《梅花墅记》：“园于水。水之上下左右，高者为台，深者为室；虚者为亭，曲者为廊；横者为渡，竖者为石；动植者为花鸟，往来者为游人，无非园者。然则人何必各有其园也。身处园中，不知其为园。园之中各有园，而后知其为园，此人情也。”造园之学，有通哲理，可参证。

园外之景与园内之景，对比成趣，互相呼应，相地之妙，技见于斯。钟伯敬《梅花墅记》又云：“大要三吴之水，至甫里（用直）始畅。墅外数武反不见水，水反在户以内。盖别为暗窦，引水入园。开扉坦步，过杞菊斋……登阁所见，不尽为水。然亭之所跨，廊之所往，桥之所踞，石所卧立，垂杨修竹之所冒荫，则皆水也。……从阁上缀目新眺，见廊周于水，墙周于廊，又若有阁亭亭处墙外者。林木荇藻，竟川含绿，染人衣裾，如可承揽，然不可得即至也。……又穿小西洞，憩招爽亭，苔石啮波，曰锦淙滩。诣修廊，中隔水外者，竹树表里之，流响交光，分风争日，往往可即，而仓卒莫定其处，姑以廊标之。”文中所述之园，以水为主，而用水有隐有显，有内有外，有抑扬、曲折。而使水归我所用，则以亭阁廊等左右之，其造成水旱二层之空间变化者，唯建筑能之。故“园必隔，水必曲”。今日所存水廊，盛称拙政园西部者，而此梅花墅之水犹仿佛似之。知吴中园林渊源相承，固有所自也。

童寯老人曾谓，拙政园“藓苔蔽路，而山池天然，丹青淡剥，反觉逸趣横生”。真小赀风范，丘壑独存，此言园林苍古之境，有胜藻饰。而苏州留园华瞻，如七宝楼台拆下不成片段，故稍损易见败状。近时名胜园林，不修则已，一修便过了头。苏州拙政园水池驳岸，本土石相错，如今无寸土可见，宛若满口金牙。无锡寄畅园八音涧失调，顿逊前观，可不慎乎？可不慎乎？

景之显在于“勾勒”。最近应常州之约，共商红梅阁园之布局。我认为园既名红梅阁，当以红梅出之，奈数顷之地遍植红梅，名为梅圃可矣，称园林则不当，且非朝夕所能得之者。我建议园贯以廊，廊外参差植梅，疏影横斜，人行其间，暗香随衣，不以红梅名园，而游者自得梅矣。其景物之妙，在于以廊“勾勒”，处处成图，所谓少可以胜多，小可以见大。

园林密易疏难，绮丽易雅淡难，疏而不失旷，雅淡不流寒酸。拙政园中部两者兼而得之，宜乎自明迄今，誉满江南，但今日修园林未明此理。

古人构园成必题名，皆有托意，非泛泛为之者。清初杨兆鲁营常州近园，其记云：“自抱疴归来，于注经堂后买废地六七亩，经营相度，历五年于兹，近似乎园，故题曰近园。”知园名之所自，谦仰称之。忆前年于马鞍山市雨湖公园，见一亭甚劣，尚无名。属我命之，我题为“暂亭”，意在不言中，而人自得之。其与“大观园”“万柳堂”之类者，适反笔出之。

苏州园林，古典剧之舞台装饰，颇受其影响，但实物与布景不能相提并论。今则见园林建筑又仿舞台装饰者，玲珑剔透，轻巧可举，活像上海城隍庙之“巧玲珑”（纸扎物）。又如画之临摹本，搔首弄姿，无异东施效颦。

漏窗在园林中起“泄景”“引景”作用，大园景可泄，小园景，则宜引不宜泄。拙政园“海棠春坞”，庭院也，其漏窗能引大园之景。反之，苏州怡园不大，园门旁开两大漏窗，顿成败笔，形既不称，景终外暴，无含蓄之美矣。拙政园新建大门，庙堂气太甚，颇近祠宇，其于园林不得体者有若此。同为违反园林设计之原则，如于风景区及名胜古迹之旁，新建建筑往往喧宾夺主，其例甚多。谦虚为美德，尚望甘当配角，博得大家的好评。

“池馆已随人意改，遗篇犹逐水东流，漫盈清泪上高楼。”这是我前几年重到扬州，看到园林被破坏的情景，并怀念已故的梁思成、刘敦桢二前辈而写的几句词句，当时是有感触的。今续为说园，亦有所感而发，但心境各异。

ON GARDENS 3

Written in May 1980 in a guesthouse in Zhenjiang

Having finished the first two instalments of this discourse on the Chinese garden, I found I was so sentimentally attached to this field of endeavour that I could not call it quits any time soon. Sitting by the window of my studio on a sunny day, I set pen to paper once again to go on with this long and jumbled presentation in hopes to seek counsel and correction. Hence the title of this instalment, "On Gardens 3."

Tao Yuanming (c. 365-427), active during the interregnum between the Eastern Jin (317-420) and the Song (420-479) of the Southern Dynasties (420-589), writes in his essay "The Peach Blossom Spring":

There are no other species of trees [but peaches];

Fresh and lovely are aromatic grass and flowers.

These lines on the planting of flowers and trees in a scenic resort have become one of two unrivalled poetic gems along with his following lines,

Picking chrysanthemums by East Fence,

I gaze pensively on the south mountains.

The former line indicates that peach trees ought to be planted in groves and watched at a distance, so that their thick clusters of flowers, set daintily against greensward, arrest the eye spontaneously with the vista thus created. The latter line says nothing of the craft of gardens, but its implication on "view borrowing" is self-evident.

Watching mountains is like flipping over the pages of an album of paintings, which brings one view after another into focus; touring a mountain is like unfolding a long hand scroll of painting, which shows the continuity of a scenic scene. Sights for in-situ or in-motion viewing conjure up different aesthetic appeals. The point is that the observer

"I" is always seen in the picture like in the following lines,

Alluring is the green mountain that I see;

I hope it'll stay this way when it sees me.

Where do such appeals stem from? From the poetic colophon on a painting or an inscription dedicated to a scenic sight. A painting without a colophon is uncouth; a view lacking a stone inscription (an inscribed board, or a couplet for that matter) looks perplexing. Literature and art are, indeed, inseparable. In his verse "Homeward Bound I Go!" Tao Yuanming portrays motion and sound beyond a view:

Purposeless, clouds idle away from mountain recess;

Tired of travels, it's time to go home the bird knows.

Upon arriving at the Slender West Lake in Yangzhou for a short visit one day, I got off the boat and went ashore to stop at the Moon Platform on the Lesser Golden Hill. While there, I went in-motion viewing by sauntering about to marvel at the moon, and did some in-situ viewing when I paused to get a personal touch with the sight. All the while the aroma of orchids kept wafting in and the shadows of bamboos quivered, the birds chirped to echo the creaking oars, and the setting sun tossed slanting rays on the windows. In this interplay of aroma, shadow, light and sound, one discovers motion through stillness, and finds stillness ensconced in motion. The law of dialectics is obviously at work in this typical example of garden-making.

When a garden is being made, scenery is created intentionally or happened upon unintentionally. This is particularly the case with private gardens, where the designer often feels helpless with the lack of space. However, such helplessness is oftentimes rescued with a desperate stroke that saves the entire garden. At the corner of the "Tiny Lodge at Floral Wharf" in the Lingering Garden, a long, narrow trail is segmented by a brick gate in a wall so that the visitor is enticed to explore how deep this otherwise teeny-weeny courtyard can be.

Things present cannot prove things past, nor can things foreign

bear out things Chinese. The present and the past have their respective systems, and so have China and other nations. Therefore, no one is allowed to resurrect a ghost in someone else's corpse. It is equally absurd to impose one's opinion upon an ancient architect without knowing his philosophy and the functions of the buildings he designed. Take, for example, the shortcut passageway along the eastern wall of the Master-of-Fishnets Garden in Suzhou. Serving the same purpose as the "avoidance alleyway" in a mansion to keep women folk and servants off the male guests and masters of an estate, this passageway is set in striking contrast to a corridor straying up a mountain opposite it. Indeed,

No road is more convenient than a shortcut, but only a circuitous trail can ensure a wonderfest for the visitor.

What I am driving at here is that, to make convincing comments on a garden, one must delve into its history and, more than anything else, become well acquainted with the lifestyle of its day. Every garden provides an integral sightseeing route that cannot be put upside down. This is like a piece of writing that must have a beginning, development, transition and a conclusion, or you may also compare it to a hand scroll of painting that must have a frontispiece at the right side, the painting itself in the middle, and a margin at the left side for colophons. Today, however, the Humble Administrator's Garden has shifted its entrance to a side gate in its eastern section, and the Master-of-Fishnets Garden is entered from the back door of its northern part—both arrangements fly in the face of common sense and bring to mind the fun-spoiling things listed in *Yishan's Records of Miscellaneous Things* by Li Shangyin (813-858)¹:

Shooing passers-by away in a pine forest; shedding tears while watching flowers; laying out a mat on mosses and lichens; sunning one's underwear on a flowering tree's branch; carrying heavy luggage on a springtime pleasure trip; tethering a horse to a stalagmite; holding a torch under the moon; building a storied house behind a mountain; growing vegetables in an orchard; and breeding poultry under a flower trellis.

To this list I would add one more item, that is, "Opening a back door

to let in visitors." I wonder what our garden managers will think of it. There is a saying in Suzhou that the city's four renowned gardens—the Dark Blue Waves Pavilion, the Lion's Grove, the Humble Administrator's Garden, and the Lingering Garden—belong respectively to the Song, Yuan, Ming and Qing dynasties. The fact is, however, the Lingering Garden and the Humble Administrator's Garden were both built in the Ming and rebuilt in the Qing, which makes people wonder why each of them should be dated back to a different dynasty. In my opinion, they would not have become Suzhou's "Big Four" without different personalities: the Master of Fishnets Garden is made for in-situ viewing and the Humble Administrator's Garden for in-motion viewing, while the Dark Blue Waves Pavilion is known for its ancient looks and the Lingering Garden for its sumptuous decoration. In this way, visitors can easily know what the "Big Four" really stand for.

Garden-making is comparable to creative writing that allows for a wealth of changes. Can anyone come up with a good composition who, instead of seeking forcefulness of articulation and soundness of conception, depends solely on play of words? The key to literature lies in style and momentum, which can be masculinely virile or femininely gentle. Can landscape gardening stay different? Jumbled logic and incoherence never yield a fluent and coherent piece of writing. A garden-maker bent on making a name for himself with a single pavilion or verandah goes nowhere, because structures like these, though much extolled today as dainty garden-making "sketches," can hardly reflect the essence of Chinese culture, let alone foster a riveting aura in a garden to be laid out.

Buildings in the south are represented by the hut that is mostly open, and those in the north are typified by the cabin that is mostly closed, with the former originating from bird nests and the latter from animal dens. That is why in the south open structures are supplemented with luxuriant trees and slender bamboos, a combination that was exactly the embryo of south China's gardens.

Roominess and airiness are as essential to gardens as they are to buildings. This is where northern gardens compare unfavorably with their southern and central China counterparts, because northern buildings are commended mostly for their profusion of doors and windows, as seclusion gets in the way of ventilation and blocks the view. As to dwelling houses, they must evince an endearing human touch, which is best illustrated in this remark of Tao Yuanming:

Birds are lucky having nests to lay back on.

In my case, I do have a home I can dote on.

Small gardens, like a tiny room with one or two famous paintings hanging in it, are suitable for in-situ viewing. Large gardens, evocative of a big art gallery, are appropriate for in-motion viewing. The former should be implicit and thought-provoking; the latter would look insipid and bland if they lack highlight scenery. A garden's function changes with the times, so does the creation of scenic attractions.

The way gardens are named is changing as well. It worked in pre-1949 years to call every garden "park," so that they could be told apart from private gardens, but this practice seems questionable nowadays. I once questioned the wisdom of turning every garden into a "park." Today, the city of Nantong in Jiangsu province has renamed its Wolf Hill Park "Northern Foothill Garden," Suzhou has renamed its East City Park "East Garden," and Kaifeng's Bianjing Park has become "Bianyuan Garden"—it seems the three cities have become national trendsetters in this regard. Different categories of gardens, such as city gardens, suburban gardens, flatland gardens and piedmont gardens, differ from one another in environment and topography, and therefore should not be designed identically.

The trouble with refurbishing gardens handed down by our forebears is that, in most cases, we are not clear about their original conceptions. I suggest such gardens be handled in two ways, that is, either to restore them or to change them. Before a famous garden is restored, relevant literature and pictures must be canvassed; otherwise, we run the risk of changing it arbitrarily. This is like

mounting an old painting, in which a missing brush stroke must be restored to its original style and coloration, for only thus can the integrity of the painting stay intact. If we employ the artificial-mountain construction expertise of Ge Yuliang (1764-1830) to refurbish a rockery of the Ming (1368-1644), it is like grafting the orthodox brushwork techniques of the Four Wangs of the early Qing² onto Shitao's landscape painting of an untrammelled style—the work will be robbed of its originality. By damaging such a cultural artefact, we are doing our ancestors a monstrous disservice. If a garden has fallen into total decay but what remains of its artificial mountains and waters can still be used, I see nothing wrong to rebuild it with a modern design. This is what I mean by "changing a garden."

The advent of potted plants and miniature landscapes in our country was closely related to architecture. In ancient times, dwellings lacked space and sunshine for they were mostly a combination of courtyards and atriums encircled by a wall or a storied walkway for rain-collecting and ventilating purposes. Residents in the Jiangnan area, which belonged to the fiefdom of Wu during the late Spring and Autumn period (770-476 BC), are in the habit of arranging small rocks and plants into miniature landscapes to decorate their dwellings. For the potted plants or miniature landscapes to be enjoyable, the species chosen should be able to live on the sunshine and warmth that were allowed only briefly in such dwellings. The philosophy behind the potted plants is best portrayed in the poem of Su Shi (1037-1101),

Beyond a tiny window the drizzle off and on goes,
Yet even more enticing are the dimmed vistas.
Though the empty yard sunshine lacks,
Its grasses and trees still look lustrous.

All delightful things are probably born of life's everyday needs, for when one comes to a dead end, he thinks of changing his course, and only through such a change can he find his way out. This is what is meant by "survival of the fittest." Today, however, big and spacious gardens often display potted plants by the hundred, or transplant trees

three meters tall in huge pots—they are going big for unwarranted reasons. Subject to excess evaporation resulting from high wind and the scorching sun, these miniature landscapes, made in violation of the principles for potted plants, have little chance of survival.

A sumptuous garden can hardly look simple and delicate, and a garden with subdued elegance can hardly achieve depth. Simplicity saves a garden from vulgarity, and depth makes up for the lack of taste. A few simple brush strokes can be pregnant with meaning, and a mere sketch can ooze heroic verve. As Yan Shu (991-1055)³ puts it,

The moonlight floods a yard full of pear flowers;

A breeze wafts over a pond amid willow catkins.

A brilliant piece of art tends to look colorful without vulgarity and become tasteful in simplicity. A garden belonging to royalty is likely to look too elaborate whereas a private garden, for the owner's limited resources, tends to be humble and shabby. The best way to avoid going too far or falling too short is to go fifty-fifty between the two extremes. To part with what one loves one must endure the pain, and to make up for what is lacking one must not be stingy. In painting, every brush stroke counts, so that one must think it over before committing brush to paper. Only thus can a young lady's painting be free from pretentious femininity; only thus can a Buddhist or Taoist painting shed chilliness and desolation. Nevertheless, fine examples are few and far between nowadays. Forcefulness ought to be modulated with grace while gracefulness ought to look forceful. An actor must not appear humble and pedantic when playing an inexperienced young scholar's role, and he must look upright and magnanimous when acting in the role of a general or a marshal, but in either case excellence is hard to come by. The craft of gardens is intimately associated with other branches of art. That is why I say that the gardens of the Ming, their differences in form notwithstanding, were born of the same ideas and sentiments as the literature, art and theater of their day.

Only those who appreciate gardens can craft gardens; only those

who aim high can muster their abilities to measure up to it. A man who cannot tell tastes apart can never come up with a cookbook. In the same token, those in charge of making gardens ought to be a cut above field workers in education and cultural endowment. Ji Cheng (1582-c. 1642) says,

Thirty percent of the success of a garden created is attributed to the builder, and seventy percent of it is owed to its designer.

This old saying is in no way meant to belittle field workers, for it is meant merely to emphasize the importance of garden designers. The reason why the saying has become an excuse to put Ji Cheng under fire today is because those who read his *The Craft of Gardens*, the world's first ever monograph dedicated to landscaping and garden architecture, don't really understand an iota of it. To impose a political hat on academic discussion—this trend should never be made to last!

Truth becomes falsehood when falsehood usurps truth; real becomes surreal where surreal becomes real. In the Grand View Garden portrayed in *A Dream of Red Mansions*, there is truth in falsehood and falsehood in truth, and there are things that the author sees with his own eyes as well as things that he fabricates. This is why readers find the novel intriguing. In the same token, an artificial mountain is fantastic if it looks real, but a real mountain becomes weird if it looks unreal. A real person may look like a wax figure, and a wax figure may look real, herein lies the trick. The key to successful garden-making lies in grasping its quintessence, but it is really disappointing that quite a few people have dedicated their careers to this craft but never learned how to grasp it! It is, indeed, challenging to craft a garden. To erect an artificial mountain peak in a garden is an undertaking that conceals illusion in reality—meaning that the designer should approach the rockery with his heart and go further to bring his creation to life by imparting a personality to it.

Conception, which Wang Guowei (1877-1927) puts as "envisioned setting" in his *Poetic Remarks on the Human World*, is as pivotal to

literature and art as it is to landscape gardening. This term can be interpreted and expressed differently on different subjects, so that there is poetic conception in poetry, lyrical conception in lyrics, and musical conception in music. Poetic conception can be perceived in Chang Jian's⁴ "An Inscription Dedicated to the Posterior Meditation Chamber of the Cleaved Mountain Temple":

A path leads to a quiet realm of bough and flower,
In whose recess is hidden a meditation chamber.

Lyrical conception can be perceived in Yan Jidao's "Riverside Narcissus":

Inebriated, I dreamed of a shut-up terraced tower,
Sobering up, I saw curtains hanging a lot lower.

And musical conception can be perceived in "Autumn Reverie" by the master playwright Ma Zhiyuan (c. 1250-c. 1324)⁵:

Dry vines, crows nesting in old tree at sunset;
A small bridge on a rivulet rippling by a hut.

Conception changes with the setting, and the same happens to garden-making as well. A garden's poetic sentiment and pictorial imagination find expression in actual scenes and sights known collectively as "envisioned setting."

Imagined aura fades in a vista too revealing;
It enhances if such vista is concealed subtly.

Water ought to be brought in along the lie of land;
Never should pine trees be transplanted in rows.

Where there's kiosk or terrace there is water;
Thou' houses are many, hills can't be blocked.

The number of lofts and decks may be limited,
Their fascinations can be limitless;
There may be just a single brook,
It can still tangle and entangle by itself.

These quotations were written by our forebears while sight-seeing or appreciating a particular painting, but all the conceptions implied in

them are compatible to garden-making. If a garden can look like what one of these quotes describes, then it speaks volumes for the aura its creator has conceived for it.

In garden-making the relationship between mountain and water cannot be severed, nor can they be handled separately or in stereotyped ways, because they supplement each other and can be put together in many a combination. A waterless mountain can look like having a creek or pool at its foot, and a rock-less body of water can have rocks implied in it—in both scenarios mountain and water are mutually containing in a natural high-and-low relationship that, however, can be achieved only with a well-conceived plan. This is exactly the case with the vistas in front of the Gen'an's Parlor in Gu Wenbin's estate at Suzhou's Iron Bottle Lane.

Artificial mountains in Jiangnan gardens are often accentuated with a white-washed wall that serves as a "sketch pad" on which a compact assembly of steep rockeries is "sketched." Without such a wall, an artificial mountain would look like a pell-mell of rocks. This is why well-structured artificial mountains are such a rarity in big gardens built nowadays. The mountain and water brought into a garden are like the bone and flesh of a living creature or the brush and ink in a Chinese painting. Only with both "bone" and "flesh" and both brush and ink can a painting or artificial mountain come to life, which is why the paintings of the Qing-dynasty master Shitao can stay peerless through the ages. Zheng Xie was a professional calligrapher, but his paintings, like a garden constructed by an engineer rather than a garden crafter, fall short of lasting appeal because, owing to his stress on brushwork and neglect of nuance in ink application, his paintings have plenty of bones but little flesh.

In a scenic resort or garden, buildings should be positioned in light of the terrain or topography, but the main building should always face one direction squarely and extend at right angles. The reasons are obvious, but they are lost on quite a few unobservant scholars. The temples up the Golden Hill, the Jiao's Mountain, and the

Unassailable Mountain South of the Yangtze in Zhenjiang differ in layout and style. The Golden Hill is encircled by temple buildings connected up and down the slopes by a three-dimensional road system; the Jiao's Mountain encircles all the temple buildings arranged in several courtyards in its embrace; and the Unassailable Mountain South of the Yangtze is crowned with a temple that overlooks its surroundings. All the three mountains rise over the same river, the Yangtze, but they look bewitching in different ways. The scenic beauty of the Golden Hill is best enjoyed at a distance; that of the Jiao's Mountain, by keeping the eyesight parallel to the ground; and that of the Unassailable Mountain South of the Yangtze, by looking down from its top. The designers of this trio kept their respective observational vantage points in mind when they took great pains on the layout of buildings until perfection was achieved; sublime, indeed, are both their knowledge and expertise.

A mountain need not be tall to look lofty; it is its topographical gradation that matters. A body of water need not be deep; it is its twists and turns that count. The beauty of a towering mountain lies in the scenes and sights deeply seated in it. The reason why the Yushan Mountain of Changshu, the Huishan Mountain of Wuxi, the Shangfang Mountain of Suzhou, and the mountains on the southern outskirts of Zhenjiang can become the apples in tourists' eyes in the Jiangnan area is because they are richly imbued with these features. Mount Tai leads the Five Holy Mountains because it has both mountains and waters. Despite its beautiful peaks, Mount Huangshan is handicapped by its lack of dashing cascades; it would not have become so renowned without its ocean of misty clouds that flow and ebb constantly in magical ways.

In a scenic resort, roads should be zigzagging rather than straight, and narrow trails ought to outnumber main roads, so that the scenery can be concealed bewitchingly in nooks and crannies. In this way visitors are well scattered and have plenty of views to explore and marvel at, gurgling springs to listen to and rockeries to hang about,

and there would be enough settings to rhapsodize or contemplate on. Just as the saying goes, "Mountaineers dread mountains lacking depth; forest lovers dread woods falling short of density." In ancient times, stone stairs were built for mountain climbers to stop for respites and look around every now and then, an arrangement that accords with the physique of us Homo erectus. Today, however, quite a few mountain stairways have been changed into sloping roads that imperil the wayfarers and violate the law governing mountaineering. Worse, some mountain trails have been converted into highways that ruin the natural gullies and peaks and enshroud mountains in choking traffic dust, while the tourists, instead of having a good time sightseeing, are compelled to scramble with automobiles for the right of the road. In old days, the Twilight Mist Cave at the West Lake could only be reached by a few mountain tracks, but people today can virtually "descend" on it directly by automobiles; thus an otherwise fun-filled outing into the mountains is reduced to what looks like a flatland journey to the Peak Flown In from Afar at the Soul's Retreat Temple. You may applaud the convenience the highway brings to the journey, but where on earth are the spectacular morning mist and sunset glow that are part and parcel of the fun?

I learned that bus routes are being pencilled out for all the mountain resorts around the West Lake to cater to those who want to see it all on a single-day tour. I personally doubt the wisdom of such a plan, for once it comes under way, the size of the whole scenic zone will start shrinking with each passing day, while the principle that sight-seeing routes ought to be lengthened is violated. Being a tourist differs in purpose from being a hasty wayfarer. Sightseeing takes time, whereas traveling stresses speediness, but today these two things seem to have been put upside down. A highway spiralling up a solitary mountain makes it difficult to see fabulous sights in its deep recesses; like a snake coiling around someone's neck, such a road also dismembers the mountain and robs it of its lush verdure and breathtaking loftiness. The merits or demerits of it are evidenced by

the roads already built on the Jade Emperor Mountain at the West Lake and the Drum Mountain of Fuzhou, but in the latter case, the ugliness of the road is fortunately covered up by multiple layers of mountain slopes. Absolute discretion ought to be applied before roads are paved in famous mountains because their legendary scenery can disappear forever once the demolition commences, even though the good or ill wrought by our garden creators can only be judged by future generations. It is imperative that old paths leading into mountains be properly preserved, at least for the sake of those willing to make unhurried journeys up there. Fountainheads are a mountain's eyes, but the bad news is that in a number of celebrated scenic resorts, such "eyes" have been damaged beyond repair. The Spouting Spring in Jinan, Shandong province, has lost its musical gurgles, and the Nine Creeks Gully in the mountains west of the West Lake are drying out—such happenings can on no account be overlooked. Destroying natural veins when reclaiming mountains, and digging wells to draw water from fountainheads—engineering projects undertaken in contradiction to landscaping plans can only jeopardize local interests and dismay landscape gardeners. Storied buildings, those in gardens in particular, should be roomy and airy, so that, as the poem goes,

Morn, painted beams "fly" over south bank into stratus;

Dusk, a pearly veil unfurls raindrops from west peaks.

Pine trees ought to be well spaced; their graceful shapes can shine forth only if they have fewer boughs and leaves. Only with both sturdiness and grace can a tree look impressive. Such unity of opposites always brings good effects. Burgeoning willows must have ancient-looking trunks, and bamboo groves must show off their tips with tender leaves. However, on the Memorial Causeway of Bai Juyi on the West Lake, all the old willows have been replaced with new saplings, and the place is robbed of its classical spectacle as a result. How can government reshuffling methods be applied to garden management?

Scenic resorts today are invariably equipped with many tea

houses and toilets. Toilets should be concealed for obvious reasons but in our gardens, virtually all of them are ornamented with see-through lattice windows that are intended to evoke "dainty scenic sketches." But in reality they are not. I think perhaps it is my fault to publicize such windows in my 1953 book *Lattice Windows*, in which I wrote this doggerel:

I cry unfair for lattice windows misplaced,
To grace toilets all of them are being forced.

Lattice windows are designed to "divulge" views. Are there any views that a toilet is supposed to "divulge"? I remember seeing a newly built toilet whose walls were bristled with lattice windows, with a stone erected to its left inscribed with the words, "Fragrant Spring," while the inscription on another stone to its right says, "Flying Dragons and Dancing Phoenixes." People cannot but laugh out loud upon seeing them.

Tea houses, in my opinion, are suitable for sizeable scenic resorts, so that visitors can come to quench their thirst, but they are unnecessary in small scenic spots like the Xiling Seal Engravers Society at the West Lake and the Master-of-Fishnets Garden in Suzhou, which do not have enough space to spare for such facilities in the first place. The bad news is that most tea houses built in large scenic resorts look like a hotel or restaurant—seldom have I seen an appropriate one among them. The rub here is that what is primary and what is secondary are confounded, and that the incidental is taken for the fundamental. It seems commercialism is taking over our scenic resorts and gardens, with sightseeing tours being converted into shopping tours. Thus a venerated Buddhist temple becomes the venue of a temple fair, and wherever there is a famous garden there is a market. Indeed,

Now that the East Fence has become a fair,
Isn't it a shame for many a yellow aster?

Following this line of logic, one may ask, should the Chamber of Gardens be renamed Chamber of Commerce? It is, indeed, a typical

case of dereliction of duty on the part of our garden administrators.

Among artificial-mountain builders in central Zhejiang province, technicality overweighs artistry, and cave construction becomes their forte, with the result that the mountains they have built often stand in isolation. The best artificial mountains in Hangzhou are found in the Hu's Estate at Shoe-shaped Ingot Street, the Wu's Estate at School Official Lane, and the Literary Waves Belvedere at the Gushan Mountain for the single reason that all of them are supplemented with bodies of water. A new type of artificial mountains emerged in more recent years, which were built on level ground, with a grotto inside of them and a terrace at the top. Being the crudest of all artificial mountains, they were invented by artisans of Dongyang, Zhejiang province, who were by no means experts in this field but bricklayers or, in the words of folks in Hangzhou, "sewer builders" out to hoodwink laymen by palming off fakery for the real thing. By the Republican years (1912-1949) the grottos had been replaced with tiny hills topped with a flower deck under the pretext that "caves are, in most cases, ill omens."

In ancient times, artificial mountain crafters belonged geographically to the Suzhou, Nanjing, Yangzhou, Jinhua and Shanghai schools, with the Shanghai school being a hybrid of the Nanjing and Suzhou schools. After the Southern Song, the best known artificial mountain experts, hailed from Wuxing, where they were referred to as "mountain smiths," and from Suzhou, locally known as "garden men." They were called "mountain craftsmen" in central Zhejiang province, "stone masons" in Yangzhou, and "mountain artisans" in Shanghai, the former Songjiang prefecture. The "Stone Masons Zhang and Son"—Zhang Lian (1587-1673) and his son Zhang Ran (*fl.* 17th century) from Songjiang—were so popular among the rich and powerful for their unrivalled expertise that they were eventually summoned to Peking, where their business was handed down to family members collectively known as "Mountain-making Zhangs."

To sum up, the artificial mountains built in the Lake Tai basin are a school of their own. Those in Nanjing and Yangzhou became the "North Jiangsu School," and their counterparts in east Zhejiang belonged in another school. As was the case with any profession or trade, there were always skilled and less skilled artificial mountain builders. The less skilled knew no more than rocks and compiling skills *per se*, and it was beyond them to examine and select suitable rocks, let alone stone textures and veins. What they were interested in was to "finish a grotto in five days and an artificial mountain in ten days." They went about their business like a children's game, that is, copying and downsizing real mountains without realizing that building a good artificial mountain is nothing short of an art.

To tell whether an artificial mountain is original or a rehashed one, the foot of the mountain and the bottom of its grotto should be examined carefully, because both are the least susceptible to damage and therefore easy to tell if they were rebuilt or rehashed. Close examination of mortar joints, seams and stone veins and texture always yields tell-tale evidence because the seams between rocks can be old or new, the glues or mortar used to put the rocks together come of different formulas, and the patina on stones and the marks of axing and chiselling can be easily discerned. When refurbishing the Lingering Garden in Suzhou during the Jiaqing reign (1796-1820) of the Qing, the then owner, Liu Shu (1759-1816), had a Lake Tai stone fixed on a yellow stone rockery, and the difference is still there for all to see. Old artificial mountains were mostly built by putting many mountain rocks together in compact combinations, and wedges and mortar were applied profusely on the joints to keep the whole thing in balance. Once some of the rocks are moved or torn down, it would be difficult to leave such an artificial mountain's old appearance intact. A well-built artificial mountain must look natural through clever rockwork; its lines should be arranged like tactful brush strokes in a painting, and the space should be "contracted" skilfully by taking individual parts and the whole scene into full account—only by

repeatedly weighing over all these factors can a satisfactory work be hammered out.

People are extolling the Gratification Garden in Shanghai lately, but they are often reticent about a structure that the garden used to be a part of—the Pan's Mansion across a lane to the east on Phoenix Tree Road at Anren Street, known as Anren Cove in old times. As Ye Mengzhu (1623-?)⁶ says in *A Compendium on Living in the World*,

This is the largest estate in Shanghai. With its front gate opening onto an engraved screen wall, it looks tall and majestic. With row upon row of buildings connected by a double-floor roofed walkway, it is nearly comparable to a prince's vermilion mansion. Its posterior building is built entirely of *Phoebe nanmu*, and all the floors upstairs are paved with bricks so that they feel like level ground. Its structures are gilded or painted red and white, and carved in a most elaborate fashion.

This phenomenal complex stood testimony to the impressive scale of the Gratification Garden in its heyday. The pity is that nothing has been left of it today.

In *A Compendium of Fragrant Cup Studio* (Book Twelve), the early-Qing painter Yun Ge (1633-1690)⁷ puts it this way,

In the eighth month of a *ren-xu* year [1682], I was lodged as a guest in the Humble Administrator's Garden at Wumen [in Suzhou]. Long lines of trees were sodden with refreshing autumn rain when I sat, alone, in the Southern Verandah, and saw an artificial mountain rising high and steep above a pool of clear water from a transverse plateau on the other side of a rippling brook. Following a footpath that winds its way up the mountain, I spotted a grove of scholar trees, tamarisks, willows, junipers and cypresses whose tangled branches reached out into the skies, whereas the lotuses around the pond's embankment sported crimson flowers and emerald leaves. Looking down at the pool, I could count the fish swimming in the limpid water, which enabled me to indulge a little bit in Zhuangzi's fun of strolling along the Hao and Pu rivers.⁸ Departing from the Southern Verandah, I sauntered past the Bright Snow Pavilion, crossed the Red Bridge, and took a rockeryflanked road that conducted me northward across the transverse plateau to the artificial mountain, where a dyke led me to a small knoll hidden under the rich foliage of trees. There, the Pure Luster Loft sat on the pond opposite the roofed walkway on the other side of the brook, which offered the best vista on the premises.

The highlight of the Humble Administrator's Garden is the

aforementioned Southern Verandah, known as the Leaning-on-Jade Verandah today. The Bright Snow Pavilion seems to be the Pavilion of Lotus-Scented Breeze from Four Sides, and the Red Bridge should be the Zigzagging Bridge. Judging from its location, the Pure Luster Loft should be the Mountain-in-View Loft. Yun Ge's description of the roofed walkway beyond the creek basically tallies with the view of the Willow-Shaded Winding Walkway of today. Yun Ge was actually writing about what he personally saw in this renowned garden from a painter's point of view. If those engaged in garden restoration can gain from his descriptions some insight into the garden's conception, they must belong in the erudite category. "How many people can really catch this song?" in the words of the famed monk-painter Guanxiu (823-912)⁹, but what can we do about it! It is hard to preserve a garden, and even harder to repair it. If you are repairing a garden, you have got to pull off a surprise. I would like to conclude this essay by reiterating the importance of garden history research. Many years ago, the late Ye Gongchuo (1881-1968) wrote me a couplet that says,

Famous Gardens of Luoyang, Painted Pleasure

Boats of Yangzhou;

Old Tales of Wulin [Hangzhou], Archives of

the Imperial Capital.

In it he lists, by way of exhorting me, the titles of four books on gardens and places of historical interest. Reviewing this couplet again today, I have the feeling that what I have written down in this essay was probably not a waste of time.

说园（三）

余既为《说园》《续说园》，然情之所钟，终难自己，晴窗展纸，再抒鄙见，芜驳之辞，存商求正，以《说园》（三）名之。

晋陶渊明（潜）《桃花源记》：“中无杂树，芳草鲜美。”此亦风景区花树栽植之卓见，匠心独具。与“采菊东篱下，悠然见南山”句，同为千古绝唱。前者说明桃花宜群植远观，绿茵衬繁花，其景自出；而后者暗示“借景”。虽不言造园，而理自存。

看山如玩册页，游山如展手卷；一在景之突出，一在景之连续。所谓静动不同，情趣因异，要之必有我存在，所谓“我见青山多妩媚，料青山见我应如是”。何以得之？有赖于题咏。故画不加题则显俗，景无摩崖（或匾对）则难明，文与艺未能分割也。“云无心以出岫，鸟倦飞而知还”，景之外兼及动态声响。余小游扬州瘦西湖，舍舟登岸，止于小金山“月观”，信动观以赏月，赖静观以小体，兰香竹影，鸟语桨声，而一抹夕阳，斜照窗棂，香、影、光、声相交织，静中见动，动中寓静，极辩证之理于造园览景之中。

园林造景，有有意得之者，亦有无意得之者，尤以私家小园，地甚局促，往往于无可奈何之处，而以无可奈何之笔化险为夷，终挽全局。苏州留园之“华步小筑”一角，用砖砌地穴门洞，分隔成狭长小径，得“庭院深深深几许”之趣。

今不能证古，洋不能证中，古今中外自成体系，绝不容借尸还魂，不明当时建筑之功能，与设计者之主导思想，以今人之见强与古人相合，谬矣。试观苏州网师园之东墙下，备仆从出入留此便道，如住宅之设“避弄”。与其对面之径山游廊，具极明显之对比，所谓“径莫便于捷，而又莫妙于迂”，可证。因此，评园必究园史，更须熟悉当时之生活，方言之成理。园有一定之观赏路线，正如文章之有起承转合，手卷之有引首、卷本、拖尾，有其不可颠倒之整体性。今苏州拙政园入口处为东部边门，网师园入口处为北部后门，大悖常理。记得《义山杂纂》列人间煞风景事有：“松下喝道。看花泪下。苔上铺席。花下晒褥。游春载重。石笋系马。月下把火。背山起楼。果园种菜。花架下养鸡鸭。”等等，今余为之增补一条曰：“开后门以延游客”。质诸园林管理者以为如何？至

于苏州以沧浪亭、狮子林、拙政园、留园号称宋、元、明、清四大名园。留园与拙政园同建于明而同重修于清者，何分列于两代，此又令人不解者。余谓以静观为主之网师园，动观为主之拙政园，苍古之沧浪亭，华瞻之留园，合称苏州四大名园，则予游者以易领会园林特征也。

造园如缀文，千变万化，不究全文气势立意，而仅务词汇叠砌者，能有佳构乎？文贵乎气，气有阳刚阴柔之分，行文如是，造园又何独不然。割裂分散，不成文理，藉一亭一榭以斗胜，正今日所乐道之园林小品也。盖不通乎我国文化之特征，难以言造园之气息也。

南方建筑为棚，多敞口；北方建筑为窝，多封闭。前者原出巢居，后者来自穴处。故以敞口之建筑，配茂林修竹之景。园林之始，于此萌芽。园林以空灵为主，建筑亦起同样作用，故北国园林终逊南中。盖建筑以多门窗为胜，以封闭出之，少透漏之妙。而居人之室，更须有亲切之感，“众鸟欣有托，吾亦爱吾庐”，正咏此也。

小园若斗室之悬一二名画，宜静观。大园则如美术展览会之集大成，宜动观。故前者必含蓄耐人寻味，而后者设无吸引人之重点，必平淡无奇。园之功能因时代而变，造景亦有所异，名称亦随之不同，故以小公园、大公园（公园之“公”，系指私园而言）名之，解放前则可，今似多商榷，我曾建议是否皆须冠“公”字。今南通易狼山公园为北麓园，苏州易城东公园为东园，开封易汴京公园为汴园，似得风气之先。至于市园、郊园、平地园、山麓园，各具环境地势之特征，亦不能以等同之法设计之。

整修前人园林，每多不明立意。余谓对旧园有“复园”与“改园”二议。设若名园，必细征文献图集，使之复原，否则以己意为之，等于改园。正如装裱古画，其缺笔处，必以原画之笔法与设色续之，以成全璧。如用戈裕良之叠山法续明人之假山，与以四王之笔法接石涛之山水，顿异旧观，真愧对古人，有损文物矣。若一般园林，颓败已极，残山剩水，犹可资用，以今人之意修改，亦无不可，姑名之曰“改园”。

我国盆栽之产生，与建筑具有密切之关系，古代住宅以院落天井组合而成，周以楼廊或墙垣，空间狭小，阳光较少，故吴下人家每以寸石尺树布置小景，点缀其间，往往见天不见日，或初阳煦照，一瞬即过，要皆能适植物之性，保持一定之温度与阳光，物赖以生，景供人观，东坡诗所谓：“微雨止还作，小窗幽更妍。空庭不受日，草木自苍然。”最能得此神理。盖生活所需之必然产物，亦穷则思变，变则能通。所谓“适

者生存”。今以开畅大园，置数以百计之盆栽，或置盈丈之乔木于巨盆中，此之谓大而无当。而风大日烈，蒸发过大，难保存活，亦未深究盆景之道而盲为也。

华丽之园难简，雅淡之园难深。简以救俗，深以补淡，笔简意浓，画少气壮。如晏殊诗：“梨花院落溶溶月，柳絮池塘淡淡风。”艳而不俗，淡而有味，是为上品。皇家园林，过于繁缛，私家园林，往往寒俭，物质条件所限也。无过无不及，得乎其中。须割爱者能忍痛，须添补者无吝色。即下笔千钧反复推敲，闺秀之画能脱脂粉气，释道之画能脱蔬笋气，少见者。刚以柔出，柔以刚现。扮书生而无穷酸相，演将帅而具台阁气，皆难能也。造园之理，与一切艺术，无不息息相通。故余曾谓明代之园林，与当时之文学、艺术、戏曲，同一思想感情，而以不同形式出现之。

能品园，方能造园，眼高手随之而高，未有不辨乎味能著食谱者。故造园一端，主其事者，学养之功，必超乎实际工作者。计成云：“三分匠，七分主人。”言主其事者之重要，非诬蔑工人之谓。今以此而批判计氏，实尚未读通计氏《园冶》也。讨论学术，扣以政治帽子，此风当不致再长矣。

假假真真，真真假假。《红楼梦》大观园假中有真，真中有假，是虚构，亦有作者曾见之实物，又参有作者之虚构。其所以迷惑读者正在此。故假山如真方妙，真山似假便奇；真人如造像，造像似真人，其捉弄人者又在此。造园之道，要在能“悟”，有终身事其业，而不解斯理者正多，甚矣！造园之难哉。园中立峰，亦存假中寓真之理，在品题欣赏上以感情悟物，且进而达人格化。

文学艺术作品言意境，造园亦言意境。王国维《人间词话》所谓境界也。对象不同，表达之方法亦异，故诗有诗境，词有词境，曲有曲境。“曲径通幽处，禅房花木深”，诗境也。“梦后楼台高锁，酒醒帘幕低垂”，词境也。“枯藤老树昏鸦，小桥流水人家”，曲境也。意境因情景不同而异，其与园林所现意境亦然。园林之诗情画意即诗与画之境界在实际景物中出现之，统名之曰意境。“景露则境界小，景隐则境界大。”“引水须随势，栽松不趁行。”“亭台到处皆临水，屋宇虽多不碍山。”“几个楼台游不尽，一条流水乱相缠。”此虽古人咏景说画之辞，造园之法适同，能为此，则意境自出。

园林叠山理水，不能分割言之，亦不可以定式论之，山与水相辅相

成，变化万方。山无泉而若有，水无石而意存，自然高下，山水仿佛其中。昔苏州铁瓶巷顾宅艮庵前一区，得此消息。江南园林叠山，每以粉墙衬托，益觉山石紧凑峥嵘，此粉墙画本也。若墙不存，则如一丘乱石，故今日以大园叠山，未见佳构者正在此。画中之笔墨，即造园之山水，有骨有肉，方称上品。石涛（道济）画之所以冠世，在于有骨有肉。笔墨俱备。板桥（郑燮）学石涛，有骨而无肉，重笔而少墨。盖板桥以书家作画，正如工程家构园，终少韵味。

建筑物在风景区或园林之布置，皆因地制宜，但主体建筑始终维持其南北东西平直方向。斯理甚简，而学者未明者正多。镇江金山、焦山、北固山三处之寺，布局各殊，风格终异。金山以寺包山，立体交通。焦山以山包寺，院落区分。北固山以寺镇山，雄踞其巅。故同临长江，取景亦各览其胜。金山宜远眺，焦山在平览，而北固山在俯瞰。皆能对观上着眼，于建筑物布置上用力，各臻其美，学见乎斯。

山不在高，贵有层次。水不在深，妙于曲折。峰岭之胜，在于深秀。江南常熟虞山，无锡惠山，苏州上方山，镇江南郊诸山，皆多此特征。泰山之能为五岳之首者，就山水言之，以其有山有水。黄山非不美，终鲜巨瀑，设无烟云之出没，此山亦未能有今日之盛名。

风景区之路，宜曲不宜直，小径多于主道，则景幽而客散，使有景可寻、可游。有泉可听，有石可留，吟想其间，所谓“入山唯恐不深，入林唯恐不密”。山须登，可小立顾盼，故古时皆用磴道，亦符人类两足直立之本意，今易以斜坡，行路自危，与登之理相背。更以筑公路之法而修游山道，致使丘壑破坏，漫山扬尘，而游者集于道与飚轮争途，拥挤可知，难言山履之雅兴。西湖烟霞洞本由小径登山，今汽车达巅，其情无异平地之灵隐飞来峰前，真是“豁然开朗”，拍手叫好，从何处话烟霞矣。闻西湖诸山拟一日之汽车游程可毕，如是，西湖将越来越小。此与风景区延长游览线之主旨相背，似欠明智。游与赶程，含义不同，游览宜缓，赶程宜速，今则适正倒置。孤立之山筑登山盘旋道，难见佳境，极易似毒蛇之绕颈，将整个之山数段分割，无耸翠之姿，峻高之态。证以西湖玉皇山与福州鼓山二道，可见轩轻。后者因山势重叠，故能掩拙。名山筑路，千万慎重，如经破坏，景物一去不复返矣。千古功罪，待人评定。至于入山旧道，切宜保存，缓步登临，自有游客。泉者，山眼也。今若干著名风景地，泉眼已破，终难再活。趵突无声，九溪渐涸，此事非可等闲视之。开山断脉，打井汲泉，工程建设未与风景规划

相配合，元气大伤，徒唤奈何。楼者，透也。园林造楼必空透。“画栋朝飞南浦云，珠帘暮卷西山雨。”境界可见。松者，鬆也。枝不能多，叶不能密，才见姿态。而刚柔互用，方见效果，杨柳必存老干，竹林必露嫩梢，皆反笔出之。今西湖白堤之柳，尽易新苗，老树无一存者，顿失前观。“全部肃清，彻底换班”，岂可用于治园耶？

风景区多茶室，必多厕所，后者实难处理，宜隐蔽之。今厕所皆饰以漏窗，宛若“园林小品”。余曾戏为打油诗“我为漏窗频叫屈，而今花样上茅房”（我1953年刊《漏窗》一书，其罪在我）之句。漏窗功能泄景，厕所有何景可泄？曾见某处新建厕所，漏窗盈壁，其左刻石为“香泉”，其右刻石为“龙飞凤舞”，见者失笑。鄙意游览大风景区宜设茶室，以解游人之渴。至于范围小之游览区，若西湖西冷印社、苏州网师园，似可不必设置茶室，占用楼堂空间。而大型园林茶室，有如宾馆餐厅，亦未见有佳构者，主次未分，本末倒置。如今风景区以园林倾向商店化，似乎游人游览就是采购物品。宜乎古刹成庙会，名园皆市肆，则“东篱为市井，有辱黄花矣”。园林局将成为商业局，此名之曰“不务正业”。

浙中叠山重技而少艺，以洞见长，山类皆孤立，其佳者有杭州元宝街胡宅，学官巷吴宅，孤山文澜阁等处，皆尚能以水佐之。降及晚近，以平地叠山，中置一洞，上覆一平台，极简陋。此浙之东阳匠师所为。彼等非专攻叠山，原为水作之工，杭人称为阴沟匠者，鱼目混珠，以诈不识者。后因“洞多不吉”，遂易为小山花台。此入民国后之状也。从前叠山，有苏帮、宁（南京）帮、扬帮、金华帮、上海帮（后出，为宁苏之混合体）。而南宋以后著名叠山师，则来自吴兴、苏州。吴兴称山匠，苏州称花园子。浙中又称假山师或叠山师，扬州称石匠，上海（旧松江府）称山师，名称不一。云间（松江）名手张涟、张然父子，人称张石匠，名动公卿间，张涟父子流寓京师，其后人承其业，即山子张也。要之，太湖流域所叠山，自成体系，而宁扬又自一格，所谓苏北系统，其与浙东匠师皆各立门户，但总有高下之分。其下者就石论石，必存叠字，遑论相石选石，更不谈石之纹理，专攻“五日一洞，十日一山”。摹拟真状，以大缩小，一实假戏真做，有类儿戏矣。故云叠山者，艺术也。

鉴定假山，何者为原构，何者为重修，应注意留山之脚、洞之底，因低处不易毁坏，如一经重叠，新旧判然。再细审灰缝，详审石理，必渐能分晓，盖石缝有新旧，胶合品成分亦各异，石之包浆，斧凿痕迹，

在在可佐证也。苏州留园，清嘉庆间刘氏重补者，以湖石接黄石，更判然明矣。而旧假山类多山石紧凑相挤，重在垫塞，功在平衡，一经拆动，涣然难收陈局。佳作必拼合自然，曲具画理，缩地有法，观其局部，复察全局，反复推敲，结论遂出。

近人但言上海豫园之盛，却未言明代潘氏宅之情况，宅与园仅隔一巷耳。潘宅在今园东安仁街梧桐路一带，旧时称安仁里。据叶梦珠《阅世编》所记：“建第规模甲于海上，面照雕墙，宏开俊宇，重轩复道，几于朱邸，后楼悉以楠木为之，楼上皆施砖砌，登楼与平地无异。涂金染丹垩，雕刻极工之巧。”以此建筑结构，证豫园当日之规模，甚相称也。惜今已荡然无存。

清初画家恽寿平（南田）《瓯香馆集》卷十二：“壬戌八月，客吴门拙政园，秋雨长林，致有爽气，独坐南轩，望隔岸横冈，叠石峻嶒，下临清池，涧路盘纤，上多高槐、桤、柳、桧、柏，虬枝挺然，迥出林表，绕堤皆芙蓉，红翠相间，俯视澄明，游鳞可数，使人悠然有濠濮间趣。自南轩过艳雪亭，渡红桥而北，傍横冈循石间道，山麓尽处有堤通小阜，林木翳如，池上为湛华楼，与隔水回廊相望，此一园最胜地也。”南轩为倚玉轩，艳雪亭似为荷风四面亭，红桥即曲桥。湛华楼以地位观之，即见山楼所在，隔水回廊，与柳荫路曲一带，出入亦不大。以画人之笔，记名园之景，修复者能悟此境界，固属高手。但“此歌能有几人知”，徒唤奈何！保园不易，修园更难。不修则已，一修惊人。余再重申研究园史之重要，以为此篇殿焉。曩岁叶恭绰先生赠余一联：“洛阳名园（记），扬州画舫（录）；武林遗事，日下旧闻（考）。”以四部园林古迹之书目相勉，则余今日之所作，又岂徒然哉！

1980年5月完稿于镇江宾舍

ON GARDENS 4

Department of Architecture, Tongji University, October 10, 1981

A year of rambling has brought me in intimate touch with quite a few scenic sights across the land. As my feelings keep changing with what I have seen, I have the urge to share my humble opinions even though they might be interpreted in different ways to meet different needs. Like an armchair strategist's prattle about the art of war, my views can probably do little to remedy what has gone wrong today. After all, I am just offering some food for thought and discussion. I title this article "On Gardens 4," as a sequel to the three previous instalments of this ongoing discourse.

As a discipline of learning, the craft of gardens is predicated on the crafter's own intentions. On this basis, he sets a conception and comes up with an intricate layout. He will be extolled if his garden is a success, and derogated if it flops. Be it a success or a flop, a garden without a personality is devoid of life.

Waters are the eyes of land. A garden having lots of land should keep water behind its walls; a garden having a lot of water should have it scattered. If water is pivotal to a garden's views, it should also be made to ameliorate environment and climate. Rivers, lakes and ponds in the countryside, lotus ponds and water-caltrop marshes, crab-catching weirs and fishing villages—these bodies of water, no less productive than fertile land once they are devoted to aquiculture, not only augment local earnings but also beautify local landscape. Just as Wang Shizhen (1634-1711) puts it,

On the river many a fishermen's abode
Is clustered around a caltrop pond
Or scattered by a path willow-lined.
When the sun slants and the wind settles,
Perches are hawked under red maples

Halfway down the river shoals.

Nothing endears itself to man more than the divine verve of this everyday natural scene.

In days of yore there was a city where the paths were fringed with weeping willows, the riverside patches of pollia ran for miles on end, the jagged city-wall ramparts were faintly visible in the distance, and architecture and nature were meshed to present a picture-perfect cityscape. But what city is it anyway? Wang Shizhen lets the cat out of the bag in the following line,

The city with its walls lost in the green foliage of willows is none other than Yangzhou.

Alas! This picturesque view has gone for ever since Yangzhou lost its city wall to demolition. A topography complete with scenic mountains and rivers can be a city's salient feature, but it is the flowers and trees that often hog the limelight. This shows why visitors are impressed indelibly by what they see in Chengdu, the "City of Hibiscus Flowers," and in Fuzhou, the "City of Banyan Trees."

Yun Ge (1633-1690) says of coloration in painting,

Blue and green are heavy colors. They gain richness easily, but are difficult to achieve lightness, and even more difficult to attain richness upon hard-to-come-by lightness.

This observation is particularly pertinent with the craft of gardens. To search for intangibles from tangibles and vice versa, and for colors to be light without being flimsy, and rich without being stiff—this rule of the thumb, if followed to the letter, can yield natural fascinations. Today, however, there is no lack of garden-makers out to abandon nature and embrace forgery. They destroy real mountains and rush to pile up artificial ones, and block up placid brooks to make room for artificial fountains. Natural springs and rocks of top-notch quality are often changed whimsically as a result. In their eyes, a garden without a spurting fountain cannot be counted as a famous one. In his notes on the Cork Tree Mountain Abode on the Dragon-Sleeping Mountain in Tongcheng county, Anhui province, Qian Chengzhi (1612-1693)¹ writes,

People from the former state of Wu love making artificial mountains. They flatter each other on their creations while jeering at the gardens and pavilions in our rural areas for being shabby. To this phenomenon I retort, "Given all the real mountains and waters in the country, why should we need artificial ones? Because we believe in things real and do little about it, our gardens and pavilions look a bit too simple. Indeed, we are no better than the Wu people when it comes to fakery."

About the Cork Tree Mountain Abode, Qian says,

The views are not patterned after each other, so that every one of them is a study of perfection and exudes the essence of real mountain and water.

The merit of this comment boils down to a single word, "essence."

A wooded mountain looks good on account of its affinity to nature. To keep it natural is to preserve what is real in it. Buildings play a role in "view highlighting," a role that somehow sets them apart from gardens. This is like "adding a flower to a piece of brocade," but the flower can never steal the show from the brocade. A hotel is designed for guests to stop over and take a break. It should guarantee the needed peace and quiet, and provide a scenic setting in which the guest can loiter for a look around. There should also be ample space within and without, with the interiors and exteriors echoing and connected to each other, so that the guest can bask in the morning sun while having breakfast, and lay his head on the pillow while luxuriating in evening glow and get a feel of nature's immensity from inside a tiny room. If a mountain is weighed down by a tall building, and drowned in road traffic and the din of honking automobiles, even the bravest of all birds could be startled away. Observed from the top floor of the building, people on the ground are reduced to tiny beans and houses shrink to a few cubic inches—to discover smallness in a large world like this, what meets the eye is too small to be of any account. To erect buildings that otherwise belong to cities on a wooded mountain can do nothing but rob it of its idyllic appeal, mar the beauty of the landscape, and discourage the travelers. Ravines and hillocks that are levelled to look as flat as a whetstone, and tall buildings that jam the space between sky and earth are commonplace

in scenic resorts today. It is reported that some planners are going so far as to remove every indigenous dwelling from the mountains, heedless to the fact that these dwellings are essential to a scenic spot—dwellings that are picturesquely scattered can always make a mountainous area look charming, which is why they are often spotted in landscape paintings handed down from antiquity. During my sojourn in Geneva, I saw every visitor fall in love with the bright and clean homes that adorn local mountains. I believe the buildings in a scenic resort should be low-key rather than high-profiled, scattered rather than clustered, low rather than tall, on foothills rather than on mountaintops, and in rich and varied designs, with adorable delights camouflaged in unaffected ruggedness. They should also be laid out in conformity to topography and "borrow" vistas cleverly, but at the same time their identity as indigenous dwellings should not be compromised, so that the eye can be delighted by the sight of their tiny courtyards gleaming bewitchingly amidst whitewashed walls and flowers' shadows. Visitors can be pampered in the convenience afforded by such a "wooded urban mountain"—where they can either come to lose themselves for a while in solitude or entertain guests. In *Dreamy Memories of Tao'an*, Zhang Dai (1597-1689) describes Fan Yunlin's² Garden at the Tianping Mountain, Suzhou,

Winding on the lake beyond the garden is a dyke bordered with peach and willow trees, which conducts to the garden at the other end of a zigzagging bridge. The garden's front gate, set deliberately low and narrow at the bridgehead, opens onto a long roofed causeway by the side of a double wall that meanders its way to the foot of the mountain, where painted lofts and curtained pavilions, secret chambers and obscure rooms are all hidden lest they be seen by outsiders.

In *Gleanings from Female Scribes' Records of Daily Lives Inside Imperial Chambers*, Mao Qiling (1623-1716)³ talks of a Yangzhou native who was the Ming emperor Chongzhen's favorite concubine,

[She] was so tired of the lofty living quarters reserved for the empress and imperial concubines locked behind heavy door bars and large windows that she made do in a side chamber fixed with a low threshold and curving balustrades,

screened with wide latticed windows, and furnished with a motley of utensils, beds and mats procured from Yangzhou.

The royal concubine's preference for simple buildings echoes my penchant for hotels in wooded urban mountains.

For obvious reasons, the space in gardens and buildings can look deep with partitions and shallow if left unimpeded. Artificial mountains, roofed walkways, bridges, latticed walls, screens, curtains, latticed windows, and shelves for books or curios can all serve partitioning purposes, and so can mosquito nets and green-gauze floor-length latticed windows in bedrooms that were common in old days. The Japanese sleep on the floor in tiny rooms segmented with small paper screens. At the West Lake today, newly built hotels and restaurants are often as grand as palaces, so much so that the freshly built Louwailou (Loft-Beyond-Loft) Restaurant⁴ at the Gushan Mountain ought to be renamed "Tower of Supreme Harmony" because it is already larger than the Palace of Immortals Lining Up in Clouds⁵ in the Summer Palace of Beijing. Even the interior of the Palace of Supreme Harmony in Beijing's Former Imperial City is segmented with screens and pillars, but our large restaurants nowadays are easily mistaken for gymnasiums. In a scenic resort, stones were quarried and a mountain was levelled as if to make room for new barracks, but all the fuss was actually about making room for a grand banquet hall to be erected on the spot. Huge amounts of money and manpower went down the drain like this, not to mention the threat such construction spree poses on nature's scenic beauty. There may be eastern and western parlors in old gardens, but grand parlors are unheard of. However, grand hotels, grand restaurants, grand murals, grand miniature landscapes, grand vases, and so on are everywhere nowadays, and the tendency to go big and grand seems to have become the fad. If this is allowed to run unbridled, all I can say is, "Well done! Well done!"

I have not been to Suzhou for well over a year now, but I am so haunted by its celebrated gardens and scenic attractions that I often

dream of them. However, my friend Wang Xiye (1914-1997)⁶ has this to say in a recent letter to me,

A "miniature landscape garden" of an unrivalled size is being laid out on the ruins of the East Hill Shrine at the eastern corner of the Tiger Hill. Dedicated to the memory of Wang Xun (350-401)⁷, the shrine was also called "Memorial Temple for the Short Magistrate" on account of the man's short stature and official title, "assistant magistrate." Wang Wan (1624-1691)⁸, "[His] home was in the Long Isle Garden beside an emerald river, but his person was in the Short Magistrate's Temple beside a green hill." Chen Pengnian (1663-1723)⁹, "A spring breeze wafted across Daosheng's Stone Terrace again, yet the setting sun still clung to the Short Magistrate's Temple." Both lines are still very much on the lips today for their nostalgia for a man long gone and their vivid depictions of the scenery in that part of the Tiger Hill. Today, however, the celebrated natural wonder is thoroughly erased with the completion of a giant mountain built of yellow stones. A tiny mound though it is, the Tiger Hill could still rival all the famed mountains under heaven, and for good reasons: firstly, it is hidden in the Tiger Hill Temple where visitors can see grand views from this tiny mount; secondly, the inscription-bearing cliffs of the Sword Pool¹⁰ are constructed in such a way that one can perceive depth in their shallowness; thirdly, numerous poetic inscriptions contributed by celebrities through the ages have added to the luster of the scene. Today, however, a sham mountain is being piled up in front of the real one—indeed, a typical case of "making a mountain out of a molehill" or "going for wool but coming home shorn." When you have a chance to see it, I am sure you will wring your wrists in despair and cry out loud over this futile undertaking.

I cannot agree more with my friend's comments. I am afraid that because of their ignorance of literature and history, those responsible for the project in question have overlooked the historical factors in that famous scenic spot, while their minds are possessed with the desire to "go big."

The constructor of a scenic resort must learn to woo visitors not only with fabulous scenery and but also with comfortable climate. In many cases nowadays, however, scenery is favored over the need to preserve the microclimate, so much so that by the time such a resort is completed the local climate has already turned nasty. In July this year, when I was visiting the West Lake of Hangzhou, the municipal

garden administration invited me for a tour of the Golden Sand Harbour. It was late afternoon of an early summer day, and the heat wave was not gone yet when I arrived. As I strolled leisurely into the woods, however, the humid heat instantly gave way to a gentle breeze generated by the lake's vast body of water, making me wonder if I were rambling a celestial world. Everywhere I went, water kept gurgling and green bamboos presented an ocean of lush green, while on the opposite side of the lake the southern hills took on a dark green hue as they shimmered in misty clouds so pale and light that they evoke an ink and wash painting wrought ever so gently with the brush. This scenery is recaptured in the lines,

I jeer at fuming south wind for being too clamant,
Forcing Xi Shi¹¹ to dance "Rainbow-Feather Raiment."

I came from a family living on a lake, but never had a chance to enjoy the leisure and bliss of such a lifestyle. If its unusually cosy environment can be made to last, the Golden Sand Harbour will live up to the conception of its original creators. Were this environment allowed to fall apart, the harbour would become nothing but an empty shell even with the ostensible presence of a storied building within every five steps and a pavilion within every ten steps—the original conception would be brutally blasphemed. In a water-bound environment like this, buildings and bridges ought to snuggle up to the water surface and be silhouetted in it, so that the breeze from the nearby woods and bamboo groves can keep the place cool and refreshing. In the midst of swaying verdure, the air will be filled with lotus-flower aroma, and the entire place will be brimmed with idyllic appeal.

With tanglehead-thatched pavilion, tiny room, deck,
Pains should be taken to mesh mountain and brook.

The lotus flowers would look exceptionally graceful if mat sheds and bamboo pavilions can be added to the fold like the subtle makeup the legendary stunning beauty Xi Shi is wearing. If this summer resort on the West Lake can be made to last, then when I come to rove it with a

walking stick in hand some day, I can really take my time for a blissful rest.

The town of Tongli in Wujiang county is an outstanding example of the idyllic beauty of water-bound country in the Jiangnan area. It is surrounded in all directions by five lakes, with houses facing each other across water surfaces. Everything in town, be it a street, a market or a garden, comes into being on account of the waters. Ren Lansheng (1837-1888)¹² and his family blazed a new garden-making trail, and the Retreat and Reflection Garden they built beat all its counterparts in the area to become a unique water-bound garden. With artificial mountains, chambers, corridors, verandahs and waterside pavilions hovering just a few inches above water surface, the garden looks as if it had sprung up from water's depth. The Retreat and Reflection Garden of Wujiang and the Master-of-Fishnets Garden of Suzhou are both water-bound, but one has water in its embrace and the other snuggles up against it. Both have artificial mountains and buildings set around water, but at a close look, they can be told apart by their different vertical and horizontal distances from water's surface. Both are laid out in snug proximity to water, but each follows a different conception and plan and offers good lessons to be emulated. In my opinion, large gardens had better be nestled against water, and small ones should in the main be made to hug water. In both cases, the water level holds the key. What is used most often in the Chinese garden is still water. This is why Xu Zongyan (1768-1818)¹³ called the library he had built in Hangzhou "Studio of Tranquil Mirror-like Water," a name that stems from Chinese philosophy and gives expression to the dialectical viewpoint of "staying still to comprehend motion."

Water is made to twist and turn by embankments. It is segmented by dykes. Flowers are moved to attract butterflies. Fantastic rocks are bought and fixed for cloud and mist to hang around them. If used to their best advantage, ornamentations like flowers and rockery can yield bewitching views. The appearances of mountains and the hues of

water can be put to best use if handled with facility. It would be wonderful if a medium-sized or small city can turn every mountain in its precincts into a garden and every body of water into a scenic attraction. It would be wonderful, too, if cities can look different from each other in cityscape and scenery.

The Pearl Spring of Jinan, Shandong province, is known under heaven for its sparkling, crystal clear water. I had, during a visit to the place, basked in morning sunlight as I drank dew drops and marvelled at the gurgling spring, feeling most relaxed and energized in its bright and tranquil atmosphere. But during a second visit I was utterly dismayed to see the place changed beyond recognition—a mammoth artificial mountain built of yellow stones looks ferocious and terrifying, and the spring itself is overwhelmed by tall buildings around it. Unexpectedly, the lines in Du Fu's poem "Gazing Mount Tai" flashed into my mind,

I am certain to mount the tallest cliff,
For a glimpse of the hills it will dwarf.

In this part of the world today, mountains are small and low while buildings are massive and lofty, and streams are small and shallow while bridges are big and tall, all the while automobiles running by the mountains kick up clouds of choking dust—such a vista is neither ancient nor modern, neither Chinese nor Western. Nondescript, that is what they really are. Can caution be tossed into thin air when creating gardens?

By contrast, the Garden of Ten S-Shaped Tablets in Weifang, Shandong province, is a small affair. This is probably why it is named after the scepters held in the hands of ministers when attending the emperor's court in the country's dynastic past. However, the only pond existing in this garden is encircled with a roofed corridor, with verandahs and gazebos seemingly floating on its rippling water. I was so touched by this lithe and delicate scenery that I improvised these lines then and there,

My love for landscape dies hard tho' I am ageing fast,

I can't help showering praises on the garden at its sight.
Though tiny, its pavilion and deck have charms limitless,
As they linger touchingly between waters and rocks.

Of all the small gardens in north China, the Garden of Ten S-Shaped Tablets is the most successful in combining water and rockery into an integral whole.

At Mount Tai a road conducts all the way to the Southern Heavenly Gateway at the mountaintop, where mountain after mountain lies under the visitor's feet while the vast land of QiLu¹⁴ extends magnificently for miles on end. Known as the Eighteen-Bend Road, with every bend offering a dainty scenery that changes with the shift of one's footstep, the road was built for emperors to be carried up the mountain for the holiest of all imperial sacrificial services. If the road were replaced with cable-cars that come and go at hastened intervals, the sightseers would be treated like commodities whisked up and down the mountain, not to mention the result that the mountain vista would be utterly spoiled. It is really beyond them why our ancestors should mount the Jade Emperor's Summit by way of the Eighteen-Bend Road simply to "dwarf the world." As to the relationship between travel and sightseeing, they are categorically opposed to each other—the former should be speedy and therefore defeats the purpose of a visit to the holy mountain, and the latter should definitely be kept at a slow pace. I do not mean cable cars are useless—they are suitable for travelers, but not for sightseers.

On no account should the foothills of a holy mountain be encircled with buildings or factories, which can do nothing but sever the mountain's natural veins. Such flagrant constructions, however, are not uncommon nowadays. During a recent visit to the scenic zone of the Swallow-Shaped Boulder¹⁵ and the Evening Glow's Dwelling Temple in Nanjing, it turned out that people could not see the zone before they reached the Boulder or the Temple—the original "prelude" to the entire scene is gone forever, leaving the "protagonist" to put on a solo show amidst a cacophony of automobile din and traffic. Worse,

sightseers to the scene find it impossible to take their time for a look around. At the Swallow-Shaped Boulder, only its waterside could be seen; the other sides were smothered in black smoke that threatened to swallow the entire Yangtze River. When I sat down on the boulder I came up with this doggerel,

Swallow, swallow, why don't you fly away?

You are courting death if too long you stay.

People hate to miss a scenic attraction like this, but once you've seen it you may never return for another visit. Now that it is a no-no to build tall buildings and factories at foothills, low buildings, however, cannot be dispensed with. When such low buildings are well scattered in a scenic resort, the vista appears to be deep and remote in multiple ways; far-off mountains that have no foothills can also be handled this way.

Recent years have witnessed scenic resorts locked in sharpening clashes with the mining industry. Incidents of "killing the hen to obtain the egg" are a dime a dozen. In Nanjing, iron ore is being mined at the Grand Secretariat Mountain, and silver ore exacted at the Rosy Clouds' Dwelling Mountain. Thus smoke-belching factories are erected at the expense of "smokeless factories," and exhaustible resources are being tapped while exhaustless resources are scrambled for in a tug-of-war in which both parties are losers. It is imperative to take a long-term view, and weigh up one thing against another—I would suggest that authorities should absolutely not take this lightly. The ancient looks of places of historical interests should be conserved. Ill-fitting buildings should never be built into them. The Northern Peak behind the Soul's Retreat Temple of Hangzhou and the television tower at the Drum Tower of Nanjing are dreadful eyesores. In this regard, it is necessary to stress that scenic resorts should live on dainty views, places of historical interest should live on cultural relics, and irrelevant things should never be imposed on them. Otherwise, the cultural heritages of our motherland shall be completely ruined.

When Bai Juyi (772-846) was prefect of Hangzhou, he dredged

the West Lake and piled up mud to build the Memorial Causeway of Bai Juyi. In the course of it, he never built dykes to reclaim land from the lake. His legacies were inherited by Su Shi (1037-1101), who built another dyke in the same fashion during his stint as prefect of Hangzhou. Ruan Yuan (1764-1849)¹⁶ followed suit and built the islet known as "Ruan's Mound" on the same lake. Later generations built shrines south of the Gushan Mountain to commemorate Bai and Su's good deeds. The three names have been revered through the ages, which prompted the celebrated modern Chinese poet Yu Dafu (1896-1945)¹⁷ to chant,

The willows lining the causeway are still surnamed Su today.

Matters concerning life and death for a city should be handled with uttermost discretion. The West Lake is the life blood to Hangzhou. Once the lake disappears, the city shall go downhill. It is on its account that Hangzhou is designated a tourist and scenic city. Scenic views in a city cannot be treated individually. Mountain and water should be coordinated to contrast and augment each other. The mountains along the Qiantang River need be done up, for the most illustrious part of Hangzhou lies in mountains that are belted by the Yangtze and girdled by the lake. When planting trees on an ancient site, the word "ancient" must be borne in mind. The lintel of the front doorway of the Cool and Refreshing Mountain is inscribed with the words, "Former Site of the Six Dynasties,"¹⁸ but the road leading into it are flanked by cedars—was this species already there as early as those dynasties? The use of an alien tree species like this on a venerated Chinese site can do nothing but to satiate someone's curiosity.

The restoration of an ancient site should not be limited to buildings only—due attention should be paid to what is recorded in history books, such as its environment, ambience, and furnishing. Without these, there would be no "ancient site" to speak of; rather, we had better call such a place "scenic site."

None is more unfeeling than willows by palace walls;
Enshrouded in green mist the ten-*li* causeway stays.

Whoever can fathom out the connotations of these two lines, written by Wei Zhuang (836-910)¹⁹ on scenery around the imperial palaces in Nanjing? There is no lack of people today who are given to imposing their own will on our forefathers. The former residence of Pu Songling (1640-1715)²⁰ was decked off like a landed gentry's manor. Were this celebrated author of *Strange Stories from a Chinese Studio* still around, he would have a hard time recognizing his own humble cottage. The good news is that his residence is gradually being restored to its former looks.

Traditional gardens should be conserved rather than renovated; old trees should be pruned and maintained rather than have new ones added. Mountains must stay ancient, and waters must be scattered, so that grass and trees can be well nourished and birds' lovable warbling can be heard all the time. In this way the sceneries can look lovely in all four seasons. It is inappropriate to set up a market in a garden, where what is principal and what is secondary should be clearly distinguished. Garden buildings' functions should be commensurate with their characters. When our ancients built gardens, every pavilion or verandah, even the number of bends in a roofed walkway, was adapted to actual needs, and unnecessary structures were avoided. This is like composing poetry or verse, which tolerates neither wordiness nor laborious sentences. The ways of learning, be it creative writing or landscape gardening, are closely relevant to each other. An ill-conceived garden design is like a composition that lacks hammering out. A garden should be made to encourage sightseeing, and a composition is supposed to get its argument across. For the same reason, it is as painstaking to compose a five- or seven-character quatrain as to conceive a small garden.

In the "Record of the Estate of Suburban Delights," Wang Shimin (1592-1680) records,

It happened that Zhang Lian the supernatural garden crafter from Yunjian [present-day Songjiang county, Shanghai] arrived to promote construction of artificial mountains... Thus a pond was dug here, trees were planted there,

rockeries erected and artificial mountains built. The plan was revised four times beginning from a year of *geng-shen* [1680, or the nineteenth year of the Kangxi reign (1661-1722) of the Qing] until the garden was completed years later.

He describes the same garden in another note recorded in *Chronicle of the Respected Flagbearer*²¹:

It looked like nature itself, with a winding stone trail and a placid, mirror-like big pond tucked away amidst thick foliage of bamboos and trees, whereas summering rooms and deep-set belvederes were laid out on account of the terrain, with flowers and trees framed in windows that set off each other delightfully—the entire vista partakes of the allure of woods and ravines graced with terraces and verandahs.

The fact that, even with Zhang Lian's unparalleled craftsmanship, the plan of the said garden went through four rounds of revisions bears out the importance of construction work to garden-making and the necessity to leave enough leeway for reconstructions and revisions. When we observe a famous garden, we have got to study its divine charms before looking into the period in which the garden was made, in the same way as we would a cultural artefact. However, none of the surviving traditional gardens could do without repairs in the intervening years. For this reason the overall vista of such a garden must first be examined before its individual segments are perused. To plunge headlong into details to the neglect of a garden's overall picture is to be penny wise and pound foolish—a convincing conclusion is hard to come by this way.

Divine charm is what matters for mammoth mountains, giant rivers, ancient sites, and celebrated gardens. The Five Holy Mountains²² establish themselves worldwide precisely with their respective divine charms. Any landscaping plan mapped out for a mountain with no consideration to its divine charms invariably ends up in vulgarity and lowliness; if put into practice, it will be a blasphemy against the Mountain God. In the grottoes of Jiangsu and Zhejiang, however, natural and impressionist mountain rocks are often distorted to assume images so disgusting and ugly as to prompt me to cry out loud, "Give nature back to me!" Problems like this can still be

addressed with relative ease, but utmost caution must be applied when it comes to construction of huge buildings, wide highways, mid-air cableways, and high-voltage electricity towers, because every one of them, if mishandled or misplaced, can become an "arch foe" to the divine charms of our landscape. A casual oversight may compromise the "perpetrator" to angry condemnations by posterity.

Gardens differ in character because of their differences in locality and microclimate. Every garden's character stems from the peculiarities of its location, which gives rise to diverse garden styles. There can be urban gardens, suburban gardens, level-land gardens and hillside gardens in the same place, and, therefore, uniformity is out of the question for gardens. Local culture and art, folkways, tree species, and landscapes can all be employed to make gardens look different from one another in myriad ways. Whether these elements can be used to best advantage depends on the designer's ingenuity and conception. For those engaged in the art of landscape gardening, knowledge cannot but be comprehensive, and conception cannot but be profound.

Yun Ge (1633-1690) says again of painting,

Charm lies in natural grace and elegance,

Delight stems from wonderful variations.

This saying not only applies to painting, but can also be referred to in garden-making and scenery arrangement. If someone is insatiable for view highlighting in a garden, the garden thus created will invariably be devoid of charms; if he is insatiable for bigness, his garden tends to be lackluster. Charms may be derived from books, but luster can only be perceived through a garden's distinctive personality. So much for my comments and appraisals on the gardens and scenic attractions that I have encountered during my year-long rambling of the land.

说园（四）

一年漫游，触景殊多，情随事迁，遂有所感，试以管见论之，见仁见智，各取所需。书生谈兵，容无补于事实，存商而已。因续前三篇，故以《说园》（四）名之。

造园之学，主其事者须自出己见，以坚定之立意，出宛转之构思。成者誉之，败者贬之。无我之园，即无生命之园。

水为陆之眼，陆多之地要保水；水多之区要疏水。因水成景，复利用水以改善环境与气候。江村湖泽，荷塘菱沼，蟹簖渔庄，水上产物不减良田，既增收入，又可点景。王渔洋诗云：“江干多是钓人居，柳陌菱塘一带疏。好是日斜风定后，半江红树卖鲈鱼。”神韵天然，最自依人。

旧时城墙，垂杨夹道，杜若连汀，雉堞参差，隐约在望，建筑之美与天然之美交响成曲。王士禛诗又云“绿杨城郭是扬州”，今已拆，此景不可再得矣。故城市特征，首在山川地貌，而花木特色，实占一地风光。成都之为蓉城，福州之为榕城，皆予游者以深刻之印象。

恽寿平论画：“青绿重色，为浓厚易，为浅淡难，为浅淡矣，而愈见浓厚为尤难。”造园之道正亦如斯，所谓实处求虚，虚中得实，淡而不薄，厚而不滞，存天趣也。今经营风景区园事者，破坏真山，乱堆假山，堵却清流，另置喷泉，抛却天然而好作伪。大好泉石，随意改观。如无喷泉，未是名园者。明末钱澄之记黄檗山居（在桐城之龙眠山），论及“吴中人好堆假山以相夸诩，而笑吾乡园亭之陋。予应之曰：吾乡有真山水，何以假为？唯任真，故失诸陋。洵不若吴人之工于作伪耳”。又论此园：“彼此位置，各不相师，而各臻其妙，则有真山水为之质耳。”此论妙在拈出一个“质”字。

山林之美，贵于自然，自然者存真而已。建筑物起“点景”作用，其与园林似有所别，所谓锦上添花，花终不能压锦也。宾馆之作，在于栖息小休，宜着眼于周围有幽静之境，能信步盘桓，游目骋怀，故室内外空间并互相呼应，以资流通，晨餐朝晖，夕枕落霞，坐卧其间，小中可以见大。反之高楼镇山，汽车环居，喇叭彻耳，好鸟惊飞。俯视下界，豆人寸屋，大中见小，渺不足观，以城市之建筑夺山林之野趣，徒令景色受损，游者扫兴而已。丘壑平如砥，高楼塞天地，此几成为目前旅游

风景区所习见者，闻更有欲消灭山间民居之举，诚不知民居为风景区之组成部分，点缀其间，楚楚可人，古代山水画中每多见之。余客瑞士，日内瓦山间民居，窗明几净，予游客以难忘之情。我认为风景区之建筑，宜隐不宜显，宜散不宜聚，宜低不宜高，宜麓（山麓）不宜顶（山顶），须变化多，朴素中有情趣，要随宜安排，巧于因借，存民居之风格，则小院曲户，粉墙花影，自多情趣。游者生活其间，可以独处，可以留客，“城市山林”，两得其宜。明末张岱在《陶庵梦忆》中记范长白园（即苏州天平山之高义园）云：“园外有长堤，桃柳曲桥，蟠屈湖面，桥尽抵园，园门故作低小，进门则长廊复壁，直达山麓。其绘楼幔阁、秘室曲房，故故匿之，不使人见也。”又毛大可《彤史拾遗记》记崇祯所宠之贵妃，扬州人，“尝厌宫闱过高迥，崇杠大牖，所居不适意，乃就廊房为低槛曲楯，蔽以敞榻，杂采扬州诸什器、床罩供设其中。”以证余创山居宾舍之议不谬。

园林与建筑之空间，隔则深，畅则浅，斯理甚明，故假山、廊、桥、花墙、屏、幕、榻扇、书架、博古架等，皆起隔之作用。旧时卧室用帐，碧纱橱，亦起同样效果。日本居住之室小，席地而卧，以纸榻小屏分之，皆属此理。今西湖宾馆、餐厅，往往高大如宫殿，近建孤山楼外楼，体量且超颐和园之排云殿，不如易名太和楼则更名副其实矣。太和殿尚有屏隔之，有柱分之，而今日之大餐厅几等体育馆。风景区往往因建造一大宴会厅，开石劈山，有如兴建营房，真劳民伤财，遑论风景之存不存矣。旧时园林，有东西花厅之设，未闻有大花厅之举。大宾馆，大餐厅，大壁画，大盆景，大花瓶，大……以大为尚，真是如是如是，善哉善哉！

不到苏州，一年有奇，名园胜迹，时萦梦寐。近得友人王西野先生来信。谓：“虎丘东麓就东山庙遗址，正在营建‘盆景园’，规模之大，无与伦比。按东山庙为王珣祠堂，亦称短簿祠，因珣身材短小，曾为主簿，后人戏称‘短簿’。清汪琬诗：‘家临绿水长洲苑，人在青山短簿祠。’陈鹏年诗：‘春风再扫生公石，落照仍衔短簿祠。’怀古情深，写景入画，传诵于世，今堆叠黄石大假山一座，天然景色，破坏无余。盖虎丘一小阜耳，能与天下名山争胜，以其寺里藏山，小中见大，剑池石壁，浅中见深，历代名流题咏殆遍，为之增色。今在真山面前堆假山，小题大做，弄巧成拙，足下见之，亦当扼腕太息，徒呼负工也。”此说与鄙见合，恐主其事者，不征文献，不谙古迹名胜之史实，并有一“大”字

在脑中作怪也。

风景区之经营，不仅安排景色宜人，而气候亦须宜人。今则往往重景观，而忽视局部小气候之保持，景成而气候变矣。七月间到西湖，园林局邀游金沙港，初夏傍晚，余热未消，信步入林，溽暑全无，水佩风来，几入仙境，而流水淙淙，绿竹猗猗，隔湖南山如黛，烟波出没，清淡如水墨轻描，正有“独笑熏风更多事，强教西子舞霓裳”之概。我本湖上人家，却从未享此清福，若能保持此与外界气候不同之清凉世界，即该景区规划设计之立意所在。一旦破坏，虽五步一楼，十步一阁，亦属虚设，盖悖造园之理也。金沙港应属水泽园，故建筑、桥梁等均宜贴水、依水、映带左右，而茂林修竹，清风自引，气候凉爽，绿云摇曳，荷香轻溢，野趣横生。“黄茅亭子小楼台，料理溪山煞费才。”能配以凉馆竹阁，益显西子淡妆之美，保此湖上消夏一地，他日待我杖履其境，从容可作小休。

吴江同里镇，江南水乡之著者，镇环五湖，户户相望，家家隔河，因水成街，因水成市，因水成园。任氏退思园于江南园林中独辟蹊径，具贴水园之特例。山、亭、馆、廊、轩、榭等皆紧贴水面，园如出水上。其与苏州网师园诸景依水而筑者，予人以不同景观。前者贴水，后者依水。所谓依水者，因假山与建筑物等皆环水而筑，唯与水之关系尚有高下远近之别，遂成贴水园与依水园两种格局。皆以因水制宜，其巧妙构思则又有所别，设计运思，于此可得消息。余谓大园宜依水，小园重贴水，而最关键者则在水位之高低。我国园林用水，以静止为主，清许周生筑园杭州，名“鉴止水斋”，命意在此，原出我国哲学思想，体现静以悟动之辩证观点。

水曲因岸，水隔因堤，移花得蝶，买石绕云，因势利导，自成佳趣。山容水色，善在经营。中、小城市有山水能凭藉者，能做到有山皆是园，无水不成景，城因景异，方是妙构。

济南珍珠泉，天下名泉也。水清浮珠，澄澈晶莹。余曾于朝曦中饮露观泉，爽气沁人，境界明静。奈何重临其地，已异前观，黄石大山，狰狞骇人，高楼环压，其势逼人，杜甫咏《望岳》“会当凌绝顶，一览众山小”之句，不意于此得之。山小楼大，山低楼高，溪小桥大，溪浅桥高。汽车行于山侧，飞轮扬尘，如此大观，真可说是不古不今，不中不西，不伦不类。造园之道，可不慎乎？

反之，潍坊十笏园，园甚小，故以十笏名之（笏为上朝时所持手

板），清水一池，山廊围之，轩榭浮波，极轻灵有致。触景成咏：“老去江湖兴未阑，园林佳处说般般；亭台虽小情无限，别有缠绵水石间。”北国小园，能饶水石之胜者，以此为最。

泰山有十八盘，盘盘有景，景随人移，气象万千，至南天门，群山俯于脚下，齐鲁青青，千里未了，壮观也。自古帝王，登山封禅，翠辇临幸，高山仰止。如易缆车，匆匆而来，匆匆而去，景游与货运无异。而破坏山景，固不待言。实不解登十八盘参玉皇顶而小天下宏旨。余尝谓旅与游之关系。旅须速，游宜缓，相背行事，有负名山。缆车非不可用，宜于旅，不宜于游也。

名山之麓，不可以环楼、建厂，盖断山之余脉矣。此种恶例，在在可见。新游南京燕子矶、栖霞寺，人不到景点，不知前有景区，序幕之曲，遂成绝响，主角独唱，鸦噪聒耳。所览之景，未允环顾，燕子矶仅临水一面尚可观外，余则黑云滚滚，势袭长江。坐石矶戏为打油诗：“燕子燕子，何不高飞，久栖于斯，坐以待毙。”旧时胜地，不可不来，亦不可再来。山麓既不允建高楼、工厂，而低平建筑却不能缺少，点缀其间，景深自幽，层次增多，亦远山无脚之处理手法。

近年风景名胜之区，与工业矿藏矛盾日益尖锐。取蛋杀鸡之事，屡见不鲜，如南京正在开幕府山矿石，取栖霞山银矿。以有烟工厂而破坏无烟工厂，以取之可尽之资源，而竭取之不尽之资源，最后两败俱伤，同归于尽。应从长远观点来看，权衡轻重，深望主其事者却莫等闲视之。古迹之处应以古为主，不协调之建筑万不能移入。杭州北高峰，南京鼓楼之电视塔，真是触目惊心。在此等问题上，应明确风景区应以风景为主。名胜古迹，应以名胜古迹为主，其他一切不能强加其上。否则，大好河山，祖国文化，将损毁殆尽矣。

唐代白居易守杭州，浚西湖筑白沙堤，未闻其围垦造田。宋代苏轼因之，清代阮元继武前贤。千百年来，人颂其德，建苏白二公祠于孤山之阳。郁达夫有“堤柳而今尚姓苏”之句美之。城市兴衰，善择其要而谋之，西湖为杭州之命脉，西湖失即杭州衰。今日定杭州为旅游风景城市，即基于此。至于城市面貌亦不能孤立处理，务使山水生妍，相映增生。沿钱塘江诸山，应以修整，襟江带湖，实为杭州最胜处。古迹之区，树木栽植，亦必心存“古”字，南京清凉山，门额颜曰“六朝遗迹”，入其内雪松夹道，岂六朝时即植此树耶？古迹新妆，洋为中用，解我朵颐。古迹之修复，非仅建筑一端而已，其环境气氛，陈设之得体，在在

有史可据。否则何言古迹，言名胜足矣。“无情最是台城柳，依旧烟笼十里堤。”此意谁知？近人常以个人之爱喜，强加于古人之上。蒲松龄故居，藻饰有如地主庄园，此老如在，将不认其书生陋室。今已逐渐改观，初复原状，诚佳事也。

园林不在乎饰新，而在于保养；树木不在于添种，而在于修整。山必古，水必疏，草木华滋，好鸟时鸣，四时之景，无不可爱。园林设市肆，非其所宜，主次务必分明。园林建筑必功能与形式相结合，古时造园，一亭一榭，几曲回廊，皆据实际需要出发，不多筑，不虚构，如作诗行文，无废词赘句。学问之道，息息相通。今之园思考欠周，亦如文之推敲不够。园所以兴游，文所以达意。故余谓绝句难吟，小园难筑，其理一也。

王时敏《乐郊园分业记》：“……适云间张南垣至，其巧艺直夺天工，怱怱为山甚力……因而穿池种树，标峰置岭，庚申（清康熙十九年，1680年）经始，中间改作者再四，凡数年后而成。”《奉常公年谱》崇祯八年条记云：“磴道盘纤，广池澹滟，周遭竹树蓊郁，浑若天成。而凉室邃阁，位置随宜，卉木窗轩，参差掩映，颇极林壑台榭之美。”以张南垣（涟）之高技，其营园改作者再四，益证造园施工之重要，间以必要之翻工修改。必须留有余地。凡观名园，先论神气，再辨时代，此与鉴定古物，其法一也。然园林未有不经修者，故先观全局，次审局部，不论神气，单求枝节，谓之舍本求末，难得定论。

巨山大川，古迹名园，首在神气。五岳之所以为天下名山，亦在于“神气”之旺，今规划风景，不解“神气”，必至庸俗低级，有污山灵。尝见江浙诸洞，每以自然抽象之山石，改成恶俗之形象，故余屡申“还我自然”。此仅一端，人或尚能解之者，他若大起华厦，畅开公路，空悬索道，高树电塔，凡兹种种，山水神气之劲敌也，务必审慎，偶一不当，千古之罪人矣。

园林因地方不同，气候不同，而特征亦不同。园林有其个性，更有其地方性，故产生园林风格，也因之而异，即使同一地区，亦有市园、郊园、平地园、山麓园等之别。园与园之间亦不能强求一致，而各地文化艺术、风土人情、树木品异、山水特征等等，皆能使园变化万千，如何运用，各臻其妙者，在于设计者之运思。故言造园之学，其识不可不广，其思不可不深。

恽寿平论画又云：“潇洒风流谓之韵，尽变奇穷谓之趣。”不独画

然，造园置景，亦可互参。今之造园，点景贪多，便少韵致；布局贪大，便少佳趣。韵乃自书卷中得来，趣必从个性中表现。一年游踪所及，评量得失，如此而已。

1981年10月10日写成于同济大学建筑系

ON GARDENS 5

Architecture Department, Tongji University, January 20, 1982

Feeling that I have not said enough about in-motion and in-situ viewing in garden-making in "On Gardens 1," I would like to get all my thoughts on it off my chest in this final instalment of my discourse on gardens.

Motion and stillness are relevant to each other insofar as sightseeing is concerned. Where there is motion there is bound to be stillness, and vice versa. In sightseeing, however, stillness is contained in motion, whereas motion stems from stillness; together, they conjure up innumerable visual changes and scenic wonders. As the *Commentary of the Book of Changes* goes,

The numbers are combined in various ways, which exhaust all aspects of changes, and, in consequence, the hexagrams form the pattern of Heaven and Earth.

Motion and stillness can also be interpreted, in garden-making parlance, as moving scenes and still scenes respectively. To someone sitting in a pavilion, drifting clouds and flowing water, flying birds and falling flowers are moving views, whereas rockeries and trees observed from a moving boat are still views. A body of tranquil water is a still view, and the fish swimming in it are moving views. Thus motion and stillness interact in an engaging way. Therefore, scenery unveils itself to a perceiving eye which sees motion in stillness and stillness in motion.

Seen in-situ, multitudes come forth of their own accord,
Seasonal sights change in the same way as man's mood.

This line summarizes the ins and outs of mutations in all things. In a typical case of intangibles relying on tangibles for existence, a garden loses all its natural appeals if it is stripped of its fair share of water, cloud, shadow, sound, morning sunshine and setting sun.

Even in still things there is motion. Sitting in front of an erected rockery riddled through with cavities, one finds that its sprightly wrinkles and robust lines, though still, seem to be flying. A water surface seems to be still, yet it keeps swaying and rippling on its own. A painting seems to be still, yet movement presents itself before the eye. A still thing entails no motion if it appears inanimate. Thus the visual results of a garden being created hinge upon its scenes and sights for in-situ and in-motion viewing. He who can make sense of this rule has by and large grasped the rule governing the craft of gardens.

The feel of texture in certain material is real, whereas the feel of color is illusory. The feel of texture is the foremost factor in a garden's genuine appeal. This principle applies to architecture as well, which brims with divine charms if it offers the real feel of texture, but loses such charms if the illusory feel of color holds sway. If a garden loses its feel of texture, it would look like stage property. If a painting or a work of calligraphy is devoid of the feel of texture, it would look like a print. Therefore, lacquered pillars and carved

girders can only bedazzle those who are enticed by their gaudy appearances, whereas a thatched hut with bamboo hedges can be highly thought-provoking. In *A Dream of Red Mansions* (Chapter Seventeen), "Literary Talent Is Tested by Composing Inscriptions in Grand View Garden," the author comments on plagiarism perpetrated in building the Paddy-Sweet Cottage through Baoyu's mouth,

There you are! A farm here is obviously artificial and out of place with no villages in the distance, no fields near by, no mountain ranges behind, no source for the stream at hand, above, no pagoda from any half hidden temples, below, no bridge leading to a market. Perched here in isolation, it is nothing like as fine a sight as those other places [the Bamboo Lodge] which follow the law of nature and capture the appeals of nature. The bamboos and streams there didn't look so artificial. What the ancients called "a natural picture" means precisely that when you insist on an unsuitable site and hills where no hills should be, however skilfully you go about it the result is bound to jar...

Here, plagiarism stands for what is described as "artificial" and

"out of place" in a garden, whereas those which "follow the law of nature and capture the appeals of nature" stand for realness. The above quote from the 17th-century Chinese novel is worth a complete essay on garden-making.

The famed Northern Song painter Guo Xi (c. 1000-c. 1080) says,
Water adopts the mountain it winds its way through as its face...and thus
acquires feminine allure from the mountain.

In the annals of Chinese landscape painting, nobody has ever said that water and rockery can be treated separately. The above quotation of Guo Xi gives tacit expression to his insight on the rules for landscape gardening, rules that can stand those who act on them in good stead one way or another. At the first sight, water and stone appear to be a pair of opposites, but in essence, water can change itself only by relying on rockery. Without rocks, water will be devoid of form or shape, which is why rock must be made to protrude from shallow water and assume the form of an isle chain in deep water. At the Seven Star Crags of Zhaoqing, Guangdong province, rocks are spectacular and brooks bewitching, with stones shimmering in rippling water, water-curtained caves sequestered in mystic repose, and streams taking winding courses—all this is attributed to water's interminable changes, without which rocks will elude attention, and shores will be shapeless. For this reason, water and rockery cannot be separated, or else the law of nature is violated, and realness lost.

A garden's personality is hinged on interdependence between mountain and water. Therefore, it is imperative to dig a pond to bring in water. In the gardens of south Jiangsu province, ponds are graced with winding embankments to impart a gentle touch to the setting. Many gardens in the Ningbo-Shaoxing Plain in Zhejiang province feature square ponds, resulting in views that are flat and straight. Water is shapeless to begin with; it is the embankments that bring it into shape. Water inlets and embankments, be they straight or twisting, are instrumental in shaping water's surface. Because of embankments water becomes gentle or vivacious, motionless or

flowing. An embankment built of delicate rocks endows water with the spell of feminine grace, while an embankment made of rustic rocks adds masculine verve to water. A rock looks plain and simple on account of its bucolic shape, and a projecting rock owes its appearance to the manifold differences in its façade, whereas a rock with its beauty disguised in ugliness is deemed a rare treasure among all rocks because of its peculiar character. Rocks may be masculine or feminine, pretty or ugly. Water can look aggressive or gentle only with rocks as the difference-maker.

A deserted garden does not mean it is not worth visiting, just as a remnant poem or essay is not necessarily unappreciable. We have got to know that a tattered piece of brocade or a broken shard of jade can still be prized as *objet d'art*: the beholder hates to part with it merely on account of its genuine character. Gong Zizhen (1792-1841) has this to say,

"Weiji," the last hexagram, renders one at a loss,
Things'd be imperfect but for their drawbacks;
Someone my age chants beyond hills at sunset,
Hard to avoid is the lingering worldly aftertaste.

Garden-makers ought to grasp the spirit of this poem.

One sees a mountain's face in spring, finds its vitality in summer, feels its mood in autumn, and discovers its bones in winter.

Mountains appear low at night, close at hand on sunny days, and high at dawn.

By investing their sentiments in the scenery they were seeing, our forebears wanted to drive home the fact that because of changes in the four seasons, it is as hard to create scenery as to make sense of the scenery that meets one's eyes. What is implied in the line, "With tears brimming my eyes I ask the flowers, but get no answer," is silliness; what is implied in the line, "The spring breeze is let go of its untold frustration," is resentment. People go sightseeing with feelings. Such feelings give rise to interest in the sight and culminate in passion for the landscape, so much so that one is disposed to regard a spring or a rock as a bosom friend. People's aesthetic attainment or depth of

feeling, or the lack of it, has very much to do with their cultural cultivation. For this reason I would like to reiterate that if you do not appreciate a garden you should not go see it; if you cannot go see a garden, you should not make one.

The craft of gardens is a multidisciplinary science, whose rich stock of philosophy enables the crafter to observe manifold changes in the course of it. Simply put, it takes intangible poetic mood and picturesque perception to construct tangible waters, rockeries, pavilions and terraces. Dark or gloomy, wind and rain can cause infinite changes to scenery, while differences between southland and northland in geography and folkways are extra factors that ought to be taken into full account. As each visitor takes what he likes from the various functions of a garden he is visiting, on no account should the garden crafter supplant reality with illusion. A garden thus crafted is unlikely to offer well-conceived constructions. Arbitrary studies of a traditional garden to the neglect of the society and lifestyle of its time can be as far-fetched as Han-dynasty Confucians' interpretations of canonical classics. For this reason, garden crafters of today should avoid falling into the old rut of their predecessors, and make their wealth of life experience and erudite knowledge instrumental in advancing their careers.

Painters can portray the beauty of the same scenery with different brushstrokes, whereas writers can describe it from diverse points of view. Performers can vocalize the same aria and achieve sublimity in different ways as per their respective schools of performance. In the same token, a garden can be designed in different ways, but the peerless design invariably comes from the designer with the keenest eye and finest distillation from all factors.

In the beginning I had a hard time comprehending why people of the Song were so enamoured of landscape paintings done by lavishing greenish blue on vermilion color bases. It was not until I saw Mount Songshan on a midsummer day that I finally came to terms with this style of painting. There, the Central Plain's dark red soil was covered

by deep green vegetation that gleamed amidst well-scattered green-and-golden pavilions and belvederes, and it instantly reminded me of the landscape paintings of General Li Sixun (651-716)¹ and his son. Both men's paintings, done with saturated color tones on an agreeable chromatic scheme, capture exactly the celestial charms of the landscape of central China. By contrast, the landscape of the Jiangnan area is always portrayed in paintings with subtle azurite and malachite green on an ochre and green color base, with buildings outlined against a light dark backdrop. Eyecatching in a refreshing way, these paintings serve exactly as the drafts for Jiangnan gardens. In either case, it is conceptions that lead the way, and are executed through well-coordinated coloration and brushwork.

I have said that the buildings and gardens of Suzhou are of a gentle and suave style, or, to put it in the local dialect of the former kingdom of Wu, "glutinously mellow." By contrast, most gardens in Yangzhou are as elegant and dynamic as the lyrical poems of Jiang Kui (1154-1221), who portrays sentimental heartthrobs with a robust writing brush. Though different in style, these two schools of landscape architecture and gardening stem from the same quest for realness, that is, to present engrossing garden scenery. A garden's style has to be fixed before its components are dealt with individually. As to whether a pavilion or a waterside verandah ought to be built, which school of artificial mountains ought to be chosen, and in what fashion should water be brought in, all the answers could be found from a well-conceived plan in which measures are adjusted to the actual situation and views borrowed methodically. At the same time, the garden's general style must be strictly followed, flexibly employed, and prescribed rules observed when rocks and flowers were chosen and sights for in-situ or inmotion viewing decided. For this reason, the garden crafter must stay composed, have everything at his finger-tips, and take it easy as he goes about his job. Only thus can he lay out his garden in a sensible way. If a garden is to excel in natural momentum, it must show integrity in its conception and layout.

When I was sightseeing in the mountains of Fujian province, I found that their peaks were bald, trees were scarce, outcroppings were everywhere, old trees had twisted roots and gnarled trunks, and the mountainous terrain was there for all to see. I was able to identify the landscape with certain schools of painting and texturing techniques right away. We can always figure out a painting technique from a real scene, or associate such a scene with a particular painting technique. The turbulent streams and monoliths shimmering in swift rapids in Fujian make ideal prototypes for construction of artificial mountains. The precipices of Huizhou in south Anhui and Fangyan in east Zhejiang also find expression in the texturing techniques of traditional painting. The landscapes in these places, each featuring a distinct variety of topographic wrinkles and textures, never fail to captivate the sightseer with a bonanza of scenes for in-motion or in-situ viewing. Our ancients loved to appreciate rocks and meditate in front of a cliff wall because it enabled them to ruminate the philosophy and values entailed in them.

The hardest part in composing a lyrical poem to a stylized tune is that the transition between its upper and lower stanzas calls for wording and meaning that sound at once attached and detached. The same is true with garden-making, where dexterous and impeccable application of transitions between vistas is essential to achieving uninterrupted momentum and perennial aesthetic appeals in a garden of a thousand hectares, where all the streams flow along zigzagging courses, all the artificial mountains jostle in picturesque disorder, all the lofts and towers set off each other felicitously, and all the trees reach high into the sky while the ground is carpeted with flowering plants—none of these components are left in isolation on the premises. Thanks to smooth transition between views, the garden remains open and spacious while its terrain undulates and meanders, and provides ready access to various nooks and crannies. Transitions of this type, however, ought to be effected through appropriate media, perchance, such as a roofed walkway between buildings, or a bridge between a

flowing stream's different sections. Without transitional coloration, a color scheme cannot level off smoothly from dazzling brilliance to simple and subtle hues. Touch-up brush strokes employed in painting also come in handy for transitioning in a landscape garden so that its momentum can be maintained and its spatial and spiritual verve conveyed to the beholder. The relationship between intangibles and tangibles calls for smooth transition as well, so that scenes can be infinite and their appeals unailing. To attain intangibles from tangibles, and to seek a lingering effect from a song or a piece of instrumental music, the secondary may outweigh the principal, and a role player can sometimes outdo the leading actor. The reason why "a river can flow beyond heaven and earth, and a mountain's hue can teeter between nonexistence and existence" is because intangibles can sometimes accomplish what tangibles cannot.

A city cannot do without making gardens, for it really matters for the well-being of its dwellers. The key to the success of such a craft, however, lies in "view borrowing" and "view screening" techniques. No gardens in a city can do without view borrowing. The three lakes in Beijing are good examples in this regard, where views from the imposing walls and halls of the former Forbidden City are appropriately borrowed. According to Li Gefei (c. 1045-c. 1105) in *A Record of the Celebrated Gardens of Luoyang*,

There, if one gazes out to the north, he will see halls and towers in the palace compounds of Sui-Tang times, with thousands of doors and ten times as many windows, lofty and elevated, resplendent and gorgeous, extending over ten miles. What took Zuo Si² ten years of utmost efforts to describe in his rhapsodies can be exhausted here at one glance.

However, I seldom hear of gardens with smokestacks in close proximity or factory buildings lurking in the background. The only exceptions are the Humble Administrator's Garden and the Loving Couple's Garden³ in Suzhou, for whose awkwardness I can only sigh in helplessness. But there is no lack of exemplary gardens that borrow views from a mountain in a city's outskirts or from a pagoda in a

Buddhist temple in the distance. Apart from "view borrowing," there is "view screening," meaning that a city garden must be screened off vulgar and ugly vistas. Integration and separation are a pair of opposites that can also be made to supplement each other. Without screening the vulgar part of a vista off a garden, there is no way to bring the elegant part of it into the fold. Without covering up ugliness, how can a garden's beauty be brought into focus? Because a scenery to be created may be one- or double-sided, we have got to make a choice. At one end of the Gratification Garden in Shanghai there is the Profuse Beauty Hall, whose backside faces a busy street and whose front is reposed in the seclusion of the Giant Artificial Mountain's northern foot, but visitors wandering about the hall are oblivious of the urban traffic and din simply because a wall has screened the celestial world in the garden off the secular world outside of it. Screening, indeed, can work wonders. In 1980, when I was building the Astor Court, a Ming-style Chinese garden in imitation of the Master-of-Fishnets Garden's Late-Spring Peony Lodge, in the Metropolitan Museum of Art in New York City that occupies two floors and has no views to be borrowed, I had double gates and tall walls erected to create a secluded world in which fine scenic results are guaranteed. A garden must have a "prelude" to guide the visitor gradually into the heart of its scenery, which is something that should not be trifled with, and the transition methods described in the foregoing must be put to good use. None of the traditional gardens in the cities of the Jiangnan area can dispense with such a "prelude." However, the gardens built these days are often made to come straight to the point, lest the visitor fail to know they are visiting a garden, and the new front gate of the Garden of Brotherly Indulgence in Suzhou is a case in point. The Dark Blue Waves Pavilion is a semi-closed garden, and the sceneries across the river are within reach and serve as a "prelude" that ushers the visitor into the garden without knowing it for a leisured stroll.

Before a dying garden is repaired or resurrected, its history must

be studied first, its status quo thoroughly grasped, all its rock formations and architectural elements accurately dated, and their salient features pinpointed. Only then can a repair or restoration plan be considered. This is like mounting an ancient painting, whose touch-up strokes must be perused and fathomed out—a task that can be more difficult than painting a new one. In the course of the repairs, every brushstroke must be mulled over beforehand. Engineering work ought to begin with buildings, in which carpentry comes first and plastering comes next. Only after major carpentry work is done can ponds be refurbished, artificial mountains repaired and new rockwork erected. The planting of trees and flowers can sometimes be weaved into the engineering work. Roads should be paved, walls repaired and nameboards painted and hung up on the last leg of engineering work. Then the repair or restoration project is over, with furnishing forthcoming.

In landscape gardening, ancient rules can be followed and foreign practices assimilated, but these two aspects are in no way mutually exclusive. To mesh old heritages with modern things, and to make the past serve the present, is an inevitable trend, but blatant plagiarism and patchwork at the expense of judicious quest for style and spiritual charms are not recommended. For this reason, garden history and the craft of gardens past and present, Chinese and foreign must be thoroughly explored alongside their aesthetics and historical and cultural backgrounds. Only with well-documented literature and pertinent allusions from canonical classics can we assimilate the theories and expertise past and present, Chinese and foreign. Wang Yuanqi (1642-1715) says,

To copy a painting is not as desirable as to observe it. Upon coming across the authentic work of an ancient painter, we had better trace it to its root, and study its concept and its composition, its discrepancies, strengths and drawbacks, as well as its layout, brushstrokes and inkwork. There must be something that the ancient painter did better than we can, and with time, we can eventually gain a true understanding of the painting and the painter.

The way of learning introduced in this passage is worth emulating.

The Japanese learned from us Chinese before the Meiji Reform (1868-1912) and from Europe afterward. They are imitating the Americans lately, but what merits attention is that the Yamato tradition always runs through Japanese buildings and gardens. History studies naturally have all along figured prominently in Japan, and the collections of Chinese books in Japan's libraries are so extensive as to be astonishing! Ji Cheng's book *The Craft of Gardens* we see today was actually copied from its original kept in Japan. The Japanese collections of European and American materials are immense as well. Japanese scholars of the older generation, like Itō Chūta (1867-1954), Tokiwa Daijō (1870-1945) and Sekino Tadashi (1868-1935),⁴ were among the prominent figures in the study of Chinese architecture. As crystallizations of hard work and down-to-earth attitude and approaches, their books on this field of learning are still playing a major role in the academic world today. They took great pains in collecting first- and second-hand data, and, by distilling essence from a wealth of information, eventually came to the fore as erudite scholars. Indeed, "Stones borrowed from other hills are ideal for working one's own jade." As "view borrowing" is often stressed in landscape gardening, is there any difference between garden-making and learning in this regard?

Garden-making involves tangibles and intangibles. The same is true with learning. As I conclude this five-installment discourse of some ten thousand words, I think I have used up all my stock of learning. Short of substance though this discourse may be, I would not have written it if I had not devoted half of my lifetime to traversing the country, visiting all the famous gardens and practicing the craft of gardens. I am here presenting my humble opinions with a desire to consult and learn from all the experts in this field of endeavour. If my ageing heart still allows me to make new discoveries and gain new insights, I will definitely burn my candle and write them out deep into the night.

说园（五）

《说园》首篇余既阐造园动观静观之说，意有未尽，续畅论之。

动、静二字，本相对而言，有动必有静，有静必有动，然而在园林景观中，静寓动中，动由静出，其变化之多，造景之妙，层出不穷，所谓通其变，遂成天地之文。若静坐亭中，行云流水，鸟飞花落，皆动也。舟游人行，而山石树木，则又静止者。止水静，游鱼动，静动交织，自成佳趣。故以静观动，以动观静则景出。“万物静观皆自得，四时佳兴与人同。”事物之变概乎其中。若园林无水，无云，无影，无声，无朝晖，无夕阳，则无以言天趣，虚者实所倚也。

静之物，动亦存焉。坐对石峰，透漏俱备，而皴法之明快，线条之飞俊，虽静犹动。水面似静，涟漪自动。画面似静，动态自现。静之物若无生意，即无动态。故动观静观，实造园产生效果之最关键处，明乎此则景观之理初解矣。

质感存真，色感呈伪，园林得真趣，质感居首，建筑之佳者，亦同斯理。真则存神，假则失之，园林失真，有如布景，书画失真，则同印刷，故画栋雕梁，徒眩眼目，竹篱茅舍，引人遐思。《红楼梦》“大观园试才题对额”一回，曹雪芹借宝玉之口，评稻香村之作伪云：“此处置一田庄，分明是人力造作成的。远无邻村，近不负郭，背山无脉，临水无源，高无隐寺之塔，下无通市之桥，峭然孤出，似非大观，那及前数处（指潇湘馆）有自然之理、自然之趣呢？虽种竹引泉，亦不伤穿凿。古人云：‘天然图画’四字，正恐非其地而强为其地，非其山而强为其山，即百般精巧，终非相宜。”所谓“人力造作”，所谓“穿凿”者，伪也。所谓“有自然之理，得自然之趣”者，真也。借小说以说园，可抵一篇造园论也。

郭熙谓：“水以山为面”，“水得山而媚”，自来模水范山，未有孤立言之者。其得山水之理，会心乎此，则左右逢源，要之此二语，表面观之似水石相对，实则水必赖石以变，无石则水无形、无态，故浅水露矶，深水列岛。广东肇庆七星岩，岩奇而水美，矶濑隐现波面，而水洞幽深，水湾曲折，水之变化无穷，若无水，则岩不显，岸无形，故两者绝不能分割而论，分则悖自然之理，亦失真矣。

一园之特征，山水相依，凿池引水，尤为重要。苏南之园，其池多曲，其境柔和。宁绍之园，其池多方，其景平直。故水本无形，因岸成之，平直也好，曲折也好，水口堤岸皆构成水面形态之重要手法。至于水柔水刚，水止水流，亦皆受堤岸以左右之。石清得阴柔之妙，石顽得阳刚之健。浑朴之石，其状在拙；奇突之峰，其态在变，而丑石在诸品中尤为难得，以其更富有个性，丑中寓美也。石固有刚柔美丑之别，而水亦有奔放宛转之致，是皆因石而起变。

荒园非不可游，残篇非不可看，要知佳者虽零锦碎玉亦是珍品，犹能予人留恋，存其真耳。龚自珍诗云：“未济终焉心飘渺，万事都从缺陷好；吟到夕阳山外山，世间难免余情绕。”造园亦必通此消息。

“春见山容，夏见山气，秋见山情，冬见山骨。”“夜山低，晴山近，晓山高。”前人之论，实寓情观景，以见四时之变，造景自难，观景不易。“泪眼问花花不语”，痴也；“解释春风无限恨”，怨也。故游必有情，然后有兴，钟情山水，知己泉石，其审美与感受之深浅，实与文化修养有关。故我重申：不能品园，不能游园；不能游园，不能造园。

造园综合性科学也，且包含哲理，观万变于其中。浅言之，以无形之诗情画意，构有形之水石亭台。晦暝风雨，又皆能促使其景物变化无穷，而南北地理之殊，风土人情之异，更加因素增多。且人游其间，功能各取所需，绝不能以幻想代替真实，故造园脱离功能，固无佳构，研究古园而不明当时社会及生活，妄加分析，正如汉儒释经，转多穿凿，因此古今之园，必不能陈陈相因，而丰富之生活，渊博之知识，要皆有助于斯。

一景之美，画家可以不同笔法表现之，文学家可以各种不同角度描写之。演员运腔，各抒其妙，哪宗哪派，自存面貌。故同一园林，可以不同手法设计之。皆由观察之深，提炼之精，特征方出。余初不解宋人大青绿山水，以朱砂作底色赤，上敷青绿，迨游中原嵩山，时值盛夏，土色赭红，所被草木尽深绿色，而楼阁参差，金碧辉映，正大小李将军之山水也。其色调皆重厚，色度亦相当，绚烂夺目，中原山川之神乃出。而江南淡青绿山水，每以赭石及草青打底，轻抹石青石绿，建筑勾勒间架，衬以淡赭，清新悦目，正江南园林之粉本。故立意在先，协调从之，自来艺术手法一也。

余尝谓苏州建筑及园林，风格在于柔和，吴语所谓“糯”，扬州建筑与园林，风格则多雅健，如宋代姜夔词，以“健笔写柔情”，皆欲现怡人

之园景，风格各异，存真则一。风格定始能言局部单体，宜亭斯亭，宜榭斯榭。山叠何派，水引何式，必须成竹在胸也，才能因地制宜，借景有方，亦必循风格之特征，巧妙运用之。选石、择花、动静观赏，均有所据，故造园必以极镇静而从容之笔，信手拈来，自多佳构。所谓以气胜之，必总体完整矣。

余闽游观山，秃峰少木，石形外露，古根盘曲，而山势山貌毕露，分明能辨何家山水，何派皴法，能于实物中悟画法，可以画法来证实物。而闽溪水险，矾滩激湍，凡此琐琐，皆叠山极好之祖本。他如皖南徽州、浙东方岩之石壁，画家皴法，方圆无能。此种山水皆以皴法之不同，予人以动静感觉之有别，古人爱石、面壁，皆参悟哲理其中。

填词有“过片（变）”（亦名“换头”），即上半阙与下半阙之间，词与意必须若接若离，其难在此。造园亦必注意“过片”，运用自如，虽千顷之园，亦气势完整，韵味隽永。曲水轻流，峰峦重叠，楼阁掩映，木仰花承，皆非孤立。其间高低起伏，间畅逶迤，在在有“过片”之笔，此过渡之笔在乎各种手法之适当运用。即如楼阁以廊为过渡，溪流以桥为过渡。色泽由绚烂而归平淡，无中间之色不见调和，画中所用补笔接气，皆为过渡之法，无过渡，则气不贯，园不空灵。虚实之道，在乎过渡得法，如是则景不尽而韵无穷，实处求虚，正曲求余音，琴听尾声，要于能察及次要，而又重于主要，配角有时能超于主角之上者。“江流天地外，山色有无中”，贵在无胜于有也。

城市必须造园，此有关人民生活，欲臻其美，妙在“借”“隔”，城市非不可以借景，若北京三海，借景故宫，巍峨城阙，杰阁崇殿，与李格非《洛阳名园记》所述：“以北望则隋唐宫阙楼殿，千门万户，苕峣璀璨，延亘十余里，凡左太冲十余年极力而赋者，可瞥目而尽也。”但未闻有烟囱近园，厂房为背景者，有之，唯今日之苏州拙政园、耦园，已成此怪状，为之一叹。至若能招城外山色，远寺浮屠，亦多佳例。此一端在“借”。而另一端在“隔”，市园必隔，俗者屏之。合分本相对而言，亦相辅而成，不隔其俗，难引其雅，不掩其丑，何逞其美？造景中往往有能观一面者，有能观两面者，在乎选择得宜。上海豫园萃秀堂，乃尽端建筑，厅后为市街，然面临大假山，深隐北麓，人留其间，不知身处市嚣中，仅一墙之隔，判若仙凡，隔之妙可见。曩岁余为美国建中国庭园纽约“明轩”，于二层内部构园，休言“借景”，必重门高垣，以隔造景，效果始出。而园之有前奏，得能渐入佳境，万不可率尔从事，前述过渡

之法，于此须充分利用。江南市园，无不皆存前奏。今则往往开门见山，唯恐人不知其为园林。苏州怡园新建大门，即犯此病。沧浪亭虽属半封闭之园，而园中景色，隔水可呼，缓步入园，前奏有序，信是成功。

旧园修复，首究园史，详勘现状，情况彻底清楚，对山石建筑等作出年代鉴定，特征所在，然后考虑修缮方案。正如裱古画接笔反复揣摩，其难有大于创作，必再三推敲，审慎下笔。其施工程序，当以建筑居首，木作领先，水作为辅，大木完工，方可整池、修山、立峰，而补树栽花，有时须穿插行之，最后铺路修墙。油漆悬额，一园乃成，唯待家具之布置矣。

造园可以遵古为法，亦可以以洋为师，两者皆不排斥。古今结合，古为今用，亦势所必然，若境界不究，风格未求，妄加抄袭拼凑，则非所取。故古今中外，造园之史，构园之术，来龙去脉，以及所形成之美学思想，历史文化条件，在在需进行探讨，然后文有据，典有征，古今中外运我笔底，则为尚矣。古人云：“临画不如看画，遇古人真本，向上研求，视其定意若何，结构若何，出入若何，偏正若何，安放若何，用笔若何，积墨若何，必于我有一出头地处，久之自与吻合矣。”用功之法，足可参考。日本明治维新之前学习中土，明治维新后效法欧洲，近又模仿美国，其建筑与园林，总表现大和民族之风格，所谓有“日本味”。此种现状，值得注意。至此历史之研究自然居首重地位，试观其图书馆所收之中文书籍，令人瞠目，即以《园冶》而论，我国亦转录自东土。继以欧美资料亦汗牛充栋，而前辈学者，如伊东忠太、常盘大定、关野贞等诸先生，长期调查中国建筑，所为著作至今犹存极高之学术地位，真表现其艰苦结实之治学态度与方法。以抵于成，在得力于收集之大量直接与间接资料，由博返约。他山之石，可以攻玉，造园重“借景”，造园与为学又何独不然。

园林言虚实，为学亦若是，余写《说园》连续五章，虽洋洋万言，至此江郎才尽矣。半生湖海，踏遍名园，成此空论，亦自实中得之。敢贡己见，有求教于今之专家。老去情怀，容续有所得，当秉烛赓之。

1982年1月20日于同济大学建筑系

GARDENS SOUTH AND NORTH DIFFER IN SCENERY

Department of Architecture, Tongji University, October 10, 1981

Vernal rain south of the Yangtze River;

Autumn wind north of the Yellow River.

This terse line tells decisively of the climatic differences between south and north China that affect the scenic vistas in both regions. Likewise, any talk about the differences between gardens of south and north China cannot do without taking such natural differences into account. I once said that mankind's first dwellings were dens in the north and nests in the south, with the former evolving into sheds that have a window in one wall and the latter being widely open in most cases. The same is true of garden buildings. Those in the north are not as open and airy as most of their southern counterparts. Indeed, in terms of natural environment, the universal law of causality is obviously at work when it comes to differences between sumptuous northern gardens and graceful Jiangnan gardens. Like other branches of culture, a garden inevitably bears its local characteristics, a phenomenon which has multiple causes behind it.

The poetic lines, "Low bridge, stream running, cottages" and "Wooded flatland, setting sun, homecoming crows," describe different scenic views and their effects on people. The loftiness and majesty of the northland, and the demure grace of the southland bestow diverse personalities on local gardens. According to Li Gefei's *A Record of the Celebrated Gardens of Luoyang*, the northern gardens of the Tang and the Song offer imposing scenery with earthen dens and giant trees but lack such scenery as piled-up rocks and diminutive brooks. From the Ming-Qing period (1368-1911) onward, the gardens in and around Beijing changed tremendously under the influence of southern

gardens. Some of such changes were made through innovations to overcome natural barriers, which was manifest first of all in the use of water, so that in the water-poor north, only with water could a garden make a difference and put itself on the map. The gardens built in Beijing's western outskirts are naturally endowed with water, whereas those in city proper had to fill the ponds dug on their premises with water channelled from the suburbs.

Water being the case, most artificial mountains in southern gardens are built of Lake Tai rocks—chunks of moist limestone with rich postures and refined charms. When piled up to form a mountain, such rocks always "allow water to flow around the mountain and enable the mountain to come alive with water." In northern gardens, artificial mountains are built with indigenous lake rocks, which turn out to be a kind of slate that is too thick and heavy and devoid of the kind of subtle gracefulness that characterizes authentic Lake Tai rocks from the Jiangnan area.

Given the long annual defoliation periods of deciduous flowers and trees, large numbers of evergreen trees like pines and cypresses are planted in northern gardens. Under white clouds and azure skies, these trees' dark green colors contrast strikingly with yellow-glazed rooftops, vermillion pillars, and peony and crabapple flowers to bring about prospects in dazzling splendor. In comparison, gardens in the moist Jiangnan area feature white-washed walls and dark roof tiles, bamboo shades, orchids' aroma, and stream-girdled belvederes. Such gardens are segmented into quite a few yards by winding loggias, so that despite their usually small spaces, they provide enough room for people to loiter and give them the impression that there are infinite scenes and sights to be discovered in their recesses, while the ubiquitous deciduous trees keep the visitors in intimate touch with the four changing seasons. Luxurious grass and trees are special gifts bestowed by nature on this part of the country. Nevertheless, the northland is not without its small gardens and sights just as the south is not without its large ones.

Most Chinese landscape paintings in the northern tradition are splendid in green and golden colors whereas those in the southern tradition are based on gray and light carmine backgrounds, so are the gardens respectively in these two traditions because they share the same poetic sentiments, picturesque conceptions and images as poetry and painting. The imperial gardens (and the gardens built in a similar style by bureaucrats and landlords) in the north, which I call "palace gardens," look noble and majestic but are not without their vulgarities. Subtly serene and elegant, rich in scholastic quality as the gardens in the south are, there is no lack of humble and shabby ones among them. Thus successful northern gardens are invested with scholastic quality, with the finest of them always being those "northern gardens bestowed with a southern tone." Moreover, a successful northern garden invariably has some pools deployed meticulously in its precincts, just like a lady's pair of eyes that are always the most fascinating part of her looks.

I am fond of comparing the southern gardens to Kunqu Opera and the northern gardens—those built after the Tongzhi (1862-1874) and Guangxu (1875-1908) reigns of the Qing in particular—to Peking Opera. So heavily influenced is Peking Opera by Kunqu Opera that we can say the former was more or less evolved from the latter. The two are different from each other, and people, too, feel differently about them, but none of the celebrated Peking Opera stars has not worked hard on Kunqu Opera. Similarly, the creation of famous northern gardens must have involved the wisdom and labour of southern artisans. Constant cultural exchange gives rise to new things. In the Chinese garden's course of development there is a medium between southern and northern traditions, that is, the Yangzhou school of gardens which differs from both its Jiangnan and North China counterparts in that it is a hybrid of the two, and its salient features bear out the complexity of Yangzhou's geographic conditions and of the city's cultural exchanges with southern and northern regions.

Tourism is being advocated nowadays, but it is by no means

about "having a good time" merely—I would say it is an exalted form of cultural recreation. When we marvel at scenic attractions and gardens, we have got to be good at making analyses and comparisons, for the real meaning of sightseeing lies in the knowledge and wisdom we are to gain therefrom.

园林分南北 景物各千秋

“春雨江南，秋风蓟北。”这短短两句分明道出了江南与北国景色的不同。当然喽，谈园林南北的不同，不可能离开自然的差异。我曾经说过，从人类开始有居室，北方是属于窝的系统，原始于穴居，发展到后来的民居，是单面开窗为主，而园林建筑物亦少空透。南方是巢居，其原始建筑为棚，故多敞口，园林建筑物亦然。产生这些有别的情况，还是先就自然环境言之，华丽的北方园林，雅秀的江南园林，有其果，必有其因。园林与其他文化一样，都有地方特性，这种特性形成还是多方面的。

“小桥流水人家”，“平林落日归鸦”，分明两种不同境界。当然北方的高亢，与南中的婉约，使园林在总的性格上不同了。北方园林我们从《洛阳名园记》中所见的唐宋园林，用土穴、大树，景物雄健，而少叠石小泉之景。明清以后，以北京为中心的园林，受南方园林影响，有了很大变化。但是自然条件却有所制约，当然也有所创新。首先对水的利用，北方艰于有水，有水方成名园，故北京西郊造园得天独厚。而市园，除引城外水外，则聚水为池，赖人力为之了。水如此，石南方用太湖石，是石灰岩，多湿润，故“水随山转，山因水活”，多姿态，有秀韵。北方用土太湖、云片石，厚重有余，委婉不足，自然之态，终逊南中。且每年花木落叶，时间较长，因此多用长绿树为主，大量松柏遂为园林主要植物。其浓绿色衬在蓝天白云之下，与黄瓦红柱、牡丹海棠起极鲜明的对比，绚烂夺目，华丽炫人。而在江南的气候条件下，粉墙黛瓦，竹影兰香，小阁临流，曲廊分院，咫尺之地，容我周旋，所谓“小中见大”，淡雅宜人，多不尽之意。落叶树的栽植，又使人们有四季的感觉。草木华滋，是它得天独厚处。北方非无小园、小景，南方亦存大园、大景。亦正如北宗山水多金碧重彩，南宗多水墨浅绛的情形相同，因为园林所表现的诗情画意，正与诗画相同，诗画言境界，园林同样言境界。北方皇家园林（官僚地主园林，风格亦近似），我名之为宫廷园林，其富贵气固存，而庸俗之处亦在所不免。南方的清雅平淡，多书卷气，自然亦有寒酸简陋的地方。因此北方的好园林，能有书卷气。所谓北园南调，自然是高品。因此成功的北方园林，都能注意水的应用，正

如一个美女一样，那一双秋波是最迷人的地方。

我喜欢用昆曲来比南方园林，用京剧来比北方园林（是指同治、光绪后所造园），京剧受昆曲影响很大，多少也可以说从昆曲中演变出来，但是有些差异，使人的感觉也有些不同。然而最著名的京剧演员，没有一个不在昆曲上下过功夫。而北方的著名园林，亦应有南匠参加。文化不断交流，又产生了新的事物。在造园中又有南北园林的介体——扬州园林，它既不同于江南园林，又有别于北方园林，而园的风格则两者兼有之。从造园的特点上，可以证明其所处地理条件与文化交流诸方面的复杂性了。

现在，我们提倡旅游，旅游不是“白相”（上海方言：玩），是高尚的文化生活，我们赏景观园，要善于分析、思索、比较，在游的中间可以得到很多学问，增长我们的智慧，那才是有意义的。

POETRY, PROSE AND CRAFT OF GARDENS

Tongji University Journal, Issue No. 4, 1979

The classical Chinese garden is known as "literatus garden" for its rich stock of scholastic garden-making heritage. The Fragrant Hill Hotel, built two year ago in the garden of the same name in suburban Beijing's Western Hills, is a brainchild of the celebrated American Chinese architect Ieoh Ming Pei (1917-). It is acclaimed as an "elegant building of scholastic quality" because in it, architecture meshes perfectly with the garden's scenery. In my opinion, it is "elegant, clean, spic and span, tidy, and refreshing to a turn." Both descriptions are of the same meaning, pointing to the fact that no talk about the Chinese garden is complete without classic Chinese poetry and prose. But how about painting? The Chinese painting we see today stems from the Southern Song (1127-1279) literatus painting, a synthesis in which "there is painting in poetry, and poetry in painting." Poetry and prose, therefore, are at the root of Chinese painting as well. Herein lies the cardinal principle governing the Chinese craft of gardens.

After the Southern and Northern Dynasties (420-589), scholar-officials grew more and more infatuated with landscape as they sought to shun the clamour of the troubling world by abandoning themselves to mountains and waters and investing their sentiments in picturesque scenes and sights. They took action, and coupled it with poetry and prose. Gardens emerged in time to meet the demand, which evolved into a tradition during the Sui-Tang period (581-907) that was to be handed down through the Song and the Yuan to the Ming and the Qing. Bai Juyi (772-846) built a thatched hut for himself on Mount Lushan, and his "Notes on the Thatched Hut on Mount Lushan" is still read and reread to this day. Li Gefe's *A Record of the Celebrated*

Gardens of Luoyang is as elegantly worded as the gardens under his writing brush are ornately adorned. Indeed, gardens are conceived in literature, and their names are spread through literature as well. In this mutually supplementary relationship, gardens are tangible embodiments of literature, and literature gives tangible expression to gardens—in a sense, the Chinese garden and literature share the one and same identity.

The merit or demerit of a garden depends on its owner's cultural attainment. Many celebrated gardens across the land were owned by literati-painters, and naturally the conceptions of such gardens are originated in verse and prose. Apart from a garden's owner, his hangers-on, including men of letters, painters, musicians and rockery crafters, offered their fair share of counsel and designs. When a garden was completed, a coterie of celebrities and friends would gather in drinking parties to compose poetry and comment on the new garden's strengths and weaknesses, after which the garden would go through revisions and reconstructions accordingly. It took four rounds of revisions for Zhang Lian (1587-1673) to complete the Garden of Suburban Delights he was making for the renowned painter Wang Shimin (1592-1680), an example which shows a celebrated garden is not completed at one stretch. Such a practice was even more pronounced in the late Ming (1368-1644). I once argued that poetry and prose, calligraphy and painting, and traditional opera are different forms of the same thoughts or feelings. But what is the mainstream of such thoughts or feelings? It is the thoughts or feelings shared by literati-officials. The gardens made by literati-officials, most of whom were proficient in poetry and prose and could paint and sing, were inevitably rooted in their shared ideals or feelings, with elegance as the chief mode of expression. Full of allusions to poetry and prose, their gardens achieve oneness with literature by means of inscribed boards and vertical couplets, as well as records and colophons on classical paintings. That is why whenever a visitor steps into such a garden, he feels as if he were visiting the realms of poetry and

painting. If he is highly attained in literature, he may improvise a poem on the spot; if he is a painter, he may depict the garden's scenery with freewheeling brush strokes in the late Ming tradition. All this I believe has happened to every educated visitor to such a garden.

The Peony Pavilion composed by the great romantic playwright Tang Xianzu (1550-1616)¹ is not just opera—it is literature on gardens, too, as well as a manual on how to appreciate the spiritual essence of the Chinese garden. In the scene "The Interrupted Dream," for example:

Streaking the dawn, close-curved at dusk, rosy clouds frame emerald pavilion;
fine threads of rain, petals borne on breeze, gilded pleasure boats in waves of mist.... The green hillside bleeds with the cuckoo's tears of red azalea; shreds of mist lazy as wine fumes thread the sweetbriar.

The effect of empathy is at its best in these breath-taking lines, which stirs up the desire for sightseeing in a subtle and skilful way. A garden invariably gives expression to the emotion man has invested in it. Literature is born of feelings, so is the classical Chinese garden.

Qian Yong (1759-1844) says in his *A Collection of Anecdotes in the Lü Garden*,

Laying out a garden is like composing a piece of poetry or prose. Twists and turns should be made sagaciously, beginnings should be echoed in endings, and superfluous padding and complexity are most dreaded. Only thus can the final results be deemed good.

This passage, indeed, hits the nail on the head. It means that making a garden is no different from writing a composition. From poetry or prose one derives inspirations for garden design, whereas a garden can set a visitor in the mood to compose verse or prose. Both creative writing and garden-making call for conceptions. Therefore, to lay out a garden is to conceive it in the first place.

Expression must be given to any envisioned setting, which is foremost in Chinese aesthetics. The same envisioned setting can be expressed in different artistic ways. Poetry, lyrics, Yuan dramas, paintings and music have their respective settings, whereas an adroit garden-maker recreates such a setting through rich and varied

combinations of rocks, water, flowers, trees, ponds, halls, pavilions and terraces, until his garden culminates in poetic passion and picturesque enchantment. When one finds himself in such a setting, he would feel like traversing the realms of poetry and painting. The reason why the Chinese garden, "though man-made, looks like a god-send," can become a school in its own right is precisely because it is born of inspirations from poetry and prose.

Spatiality and spirituality are stressed in poetry and prose, whereas in landscape gardening, padding is most dreaded. Thus,

Rain drops dry up overnight in the first sun rays; round lotus leaves rise one after another over a limpid water surface in the wind.

This suggestive description of a garden scene, being sublimely spatial and spiritual, pertains to literature as well. The Chinese garden scenery can stir up unbounded passion that, in its turn, conjures up equally unbounded scenery, so much so that the scholar who comes to drink and versify in it is so bewitched that the garden's scenery and the passion inspired by it are totally compounded in his heart. In this way of landscape gardening, the principle of enmeshing scenery with human passion is followed. As the *Carving a Dragon at the Core of Literature* calls for "making compositions out of passion," I would like to suggest, "Let scenery be wrought out of passion." Passion yields literature, so can it yield scenery, for literature and scenery stem from the same root.

No gardens born of poetry- or prose-induced passion can dispense with a study or studio on their premises, for they are actually venues where people go to read books, recite poems, or practice painting and calligraphy. This is why there is the Verandah for Seeing Pines and Reading Paintings in the Master-of-Fishnets Garden, the Studio to Get "Rope" and Draw "Water" from "Ancient Well"² in the Lingering Garden, and the Green Vine Studio in Shaoxing. The purposes of these studios are implied in their names, but there are also unnamed ones that serve the same purposes. Therefore, literary and drinking gatherings of men of letters became special forms of garden visits.

Such gatherings that happened in Beijing's Garden to Amuse Myself³ and Nanjing's Accommodation Garden⁴ during the Qing are still the talk of the town today for their famous poems and essays, not to mention the countless literary works improvised by garden visitors. In the Accommodation Garden there is a poetry corridor where poems contributed by visitors are engraved on walls.

Reading late-Ming vignettes makes one feel like roaming a garden. Many of them are no less than accounts on the craft of gardens, as their authors were often owners of famous gardens or participants in landscape gardening. This explains why the literati gardens were most developed and artistically attained and why famous garden-makers could emerge one after another from the mid-Ming to the early Qing. Ji Cheng's *The Craft of Gardens* summarizes the theory and practice of landscape gardening during this period, but, with a text elegantly written and teeming with literary parallelisms and antitheses, it does not sound merely like an artisan's work manual. I suspect it had been polished by some scholars. *One Man's Account* ("Furniture and Curios") also makes elegant and graceful reading because its author, Li Yu (1611-1680), was himself a celebrated writer and dramatist, not to mention Wen Zhenheng (1585-1645) and his *Treatise on Superfluous Things*. The Wens made a name for themselves through calligraphy, painting, poetry, prose, and the Herbal Garden in their possession, later known as the Garden of Cultivation⁵, is still there for all to see in Suzhou. Ancient notes on gardens were often written by men of letters out to describe garden prospects, vent their feelings, and celebrate the rockeries and streams. It is known to all that the inscribed horizontal boards were made precisely to deepen visitors' impressions of the scenes and sights in such a garden.

The Chinese garden cannot do without a music chamber that is often housed in a waterside building, and the Hall of Thirty-Six Pairs of Mandarin Ducks in the Humble Administrator's Garden and the Hat-Ribbon Washing Belvedere in the Master-of-Fishnets Garden are among the legendary ones. When the Peking and Kunqu Opera

superstar Yu Zhenfei (1902-1993)⁶ and his father Yu Zonghai (1847-1930)⁷ were residing in Zhang Lüqian's⁸ Additional Garden (the western part of the Humble Administrator's Garden of today) during the Guangxu reign (1875-1908) of the Qing, he often gathered with local Kunqu Opera fans to sing arias or perform selected opera scenes. As drama and opera are pertinent with the garden, I once said that Yu Zhenfei's operatic accomplishments must have a great deal to do with his involvement in literature and traditional gardens. It was probably because of my appreciation of the venerable Zhenfei's accomplishments that he invited me to write a colophon on one of his father's calligraphic works.

A garden must be "tailored" to a particular conception, just like a piece of creative writing must be tailored to a certain literary genre. Because of this affinity between creative writing and garden-making, a garden's literary connection can always be inferred from its scenic settings. This is why I liken the gardens of Suzhou to different styles of Song-dynasty lyrical poems: the Master-of-Fishnets Garden to the refreshing and innovative lyrical verse of Yan Jidao (1030-1106); the Lingering Garden, which wouldn't be the same were its fabulous buildings dismantled, to Wu Wenying's⁹ lyrical poems; the central part of the Humble Administrator's Garden, whose spatial and spiritual resonance is reminiscent of traceless drifting clouds and wild cranes, to the lyrical poems of Jiang Kui (1154-1221) and the like; the Dark Blue Waves Pavilion to the stylized poetry of the Song; and the Garden of Brotherly Indulgence to the lyrical poems of the Qing. If a landscape garden-maker is not well-founded in poetry and prose, where on earth can he draw inspiration for his job?

On no account should literary genres be muddled up. Be it poems, lyrics, songs or rhapsodies, they should be selected in accord with a writer's passion and mood. Genres are independent of each other. Which feeling or content is proper for which genre is predetermined. Short lyrics should never be lengthened into slow-tempered, drawn-out ballad. By the same token, suburban gardens, city gardens, flat-

land gardens, and small foothill gardens each follow their own patterns, so that all the pavilions, terraces, lofts and belvederes should be laid out commensurably. If all this is done accordingly, a garden will not be scorned for being indecent or nondescript, to say the least.

In short, the Chinese garden and literature are so intricately entangled they can hardly be separated. In my opinion, studies of Chinese gardens should begin by tracing them to their roots in Chinese poetry and prose. Only thus can many problems be readily addressed. Profundity is out of the question if one studies gardens just for the gardens' sake. Superficial though my viewpoints are, I present them here anyway and beg for advice and correction from experts at home and abroad.

中国诗文与中国园林艺术

中国园林，名之为“文人园”，它是饶有书卷气的园林艺术。前年建成的北京香山饭店，是贝聿铭先生的匠心，因为建筑与园林结合得好，人们称之为有“书卷气的高雅建筑”，我则首先誉之为“雅洁明净，得清新之致”，两者意思是相同的。足证历代谈中国园林总离不了中国诗文。而画呢？也是以南宗的文人画为蓝本，所谓“诗中有画，画中有诗”，归根到底脱不开诗文一事。这就是中国造园的主导思想。

南北朝以后，士大夫寄情山水，啸傲烟霞，避嚣烦，寄情赏，既见之于行动，又出之以诗文，园林之筑，应时而生，继以隋唐、两宋、元，直至明清，皆一脉相承。白居易之筑堂庐山，名文传诵，李格非之记洛阳名园，华藻吐纳，故园之筑出于文思，园之存，赖文以传相辅相成，互为促进，园实文，文实园，两者无二致也。

造园看主人，即园林水平高低，反映了园主之文化水平，自来文人画家颇多名园，因立意构思出于诗文。除了园主本身之外，造园必有清客，所谓清客，其类不一，有文人、画家、笛师、曲师、山师等等，他们相互讨论，相机献谋，为主人共商造园。不但如此，在建成以后，文酒之会，畅聚名流，赋诗品园，还有所拆改。明末张南垣，为王时敏造“乐郊园”，改作者再四，于此可得名园之成，非成于一次也。尤其在晚明更为突出，我曾经说过那时的诗文、书画、戏曲，同是一种思想感情，用不同形式表现而已，思想感情指的主导是什么？一般是指士大夫思想，而士大夫可说皆为文人，敏诗善文，擅画能歌，其所造园无不出之同一意识，以雅为其主要表现手法了。园寓诗文，复再藻饰，有额有联，配以园记题咏，园与诗文合二为一。所以每当人进入中国园林，便有诗情画意之感，如果游者文化修养高，必然能吟出几句好诗来，画家也能画上几笔晚明清逸之笔的园景来。这些我想是每一个游者所必然产生的情景，而其产生之由就是这个道理。

汤显祖所为《牡丹亭》，而“游园”“拾画”诸折，不仅是戏曲，而且是园林文学，又是教人怎样领会中国园林的精神实质，“朝飞暮卷，云霞翠轩，雨丝风片，烟波画船”，“遍青山啼红了杜鹃，那茶靡外烟丝醉软”。其兴游移情之处真曲尽其妙。是情钟于园，而园必写情也，文以情

生，园固相同也。

清代钱泳在《履园丛话》中说：“造园如作诗文，必使曲折有法，前后呼应，最忌堆砌，最忌错杂，方称佳构。”一言道破，造园与作诗文无异，从诗文中可悟造园法，而园林又能兴游以成诗文。诗文与造园同样要通过构思，所以我说造园一名构园。这其中还是要能表达意境。中国美学，首重意境，同一意境可以不同形式之艺术手法出之。诗有诗境，词有词境，曲有曲境，画有画境，音乐有音乐境，而造园之高明者，运文学绘画音乐诸境，能以山水花木，池馆亭台组合出之，人临其境，有诗有画，各臻其妙。故“虽由人作，宛自天开”，中国园林，能在世界上独树一帜者，实以诗文造园也。

诗文言空灵，造园忌堆砌，故“叶上初阳干宿雨，水面清圆，一一风荷举”。言园景虚胜实，论文学亦极尽空灵。中国园林能于有形之景兴无限之情，反过来又产生不尽之景，觥筹交错，迷离难分，情景交融的中国造园手法。《文心雕龙》所谓“为情而造文”，我说为情而造景。情能生文，亦能生景，其源一也。

诗文兴情以造园，园成则必有书斋，吟馆，名为园林，实作读书吟赏挥毫之所，故苏州网师园有看松读画轩，留园有汲古得绠处，绍兴有青藤书屋等，此有名可徵者，还有额虽未名，但实际功能与有额者相同，所以园林雅集文酒之会，成为中国游园的一种特殊方式。历史上的清代北京怡园与南京随园的雅集盛况后人传为佳话，留下了不少名篇。至于游者漫兴之作，那真太多了。随园以投赠之诗，张贴而成诗廊。

读晚明文学小品，宛如游园，而且有许多文字真不啻造园法也。这些文人往往家有名园，或参与园事，所以从明中叶后直到清初，在这段时间中，文人园可说是最发达，水平也高，名家辈出。计成《园冶》，总结反映了这时期的造园思想与造园法，而文则以典雅骈骊出之，我怀疑其书必经文人润色过，所以非仅仅匠家之书。继起者李渔《一家言居室器玩部》，亦典雅行文，李本文学戏曲家也。文震亨《长物志》更不用说了，文家是以书画诗文传世的，且家有名园，苏州艺圃至今犹存。至于园林记必出文人之手，抒景绘情，增色泉石。而园中匾额起点景作用，几尽人皆知的了。

中国园林必置顾曲之处，临水池馆则为其地，苏州拙政园卅六鸳鸯馆、网师园濯缨水阁尽人皆知者，当时俞振飞先生与其尊人粟庐老人客张氏补园（补园为今拙政园西部），与吴中曲友，顾曲于此，小演于

此，曲与园境合而情契，故俞先生之戏具书卷气，其功力实得之文学与园林深也。其尊人墨迹属题于我，知我解意也。

造园言“得体”，此二字得假借于文学，文贵有体，园亦如是。“得体”二字，行文与构园消息相通，因此我曾以宋词喻苏州诸园：网师园如晏小山词，清新不落套；留园如吴梦窗词，七宝楼台，拆下不成片段；而拙政园中部，空灵处如闲云野鹤去来无踪，则姜白石之流了；沧浪亭有若宋诗；怡园仿佛清词，皆能从其境界中揣摩得之。设造园者无诗文基础，则人之灵感又自何来。文体不能混杂，诗词歌赋各据不同情感而成之，决不能以小令引慢为长歌，何种感情，何种内容，成何种文体，皆有其独立性。故郊园、市园、平地园、小麓园，各有其体，亭台楼阁，安排布局，皆须恰如其分，能做到这一点，起码如做文章一样，不讥为“不成体统”了。

总之，中国园林与中国文学，盘根错节，难分难离，我认为研究中国园林，似应先从中国诗文入手，则必求其本，先究其源，然后有许多问题可迎刃而解，如果就园论园，则所解不深。姑提这样肤浅的看法，希望海内外专家将有所指正与教我也。

GARDENS AND LANDSCAPE PAINTING

January 1982

To construct a diminutive scenic setting, people of the Yuan used nothing but trees, rocks and low-lying ponds, and casually laid them out along with pavilions, terraces, hedges and winding trails that set off each other to conjure up a divine ambience of inexhaustible comfort and leisure from which visitors would be reluctant to tear themselves away.

This remark by the early-Qing painter Yun Ge (1633-1690) offers valuable reference to the study of Yuan-dynasty gardens, and shows how difficult it is to dwell upon Chinese gardens if you know little of the principles and theories of Chinese painting. Chinese gardens and painters have become almost inseparable since the Yuan. The garden known as "Pure Rarity Belvedere," where the studio of Ni Zan (1301-1374) is located, exudes the natural beauty of mountains and rocks. The Small-Rock Mountain Abode built by Shitao (1642-c. 1707) is still there for all to see in Yangzhou. Virtually every famous landscape garden-maker is an accomplished painter, but their fame in painting is often eclipsed by their prestige in garden-making.

From the Yuan on, realistic painting gradually gave way to freehand brushwork that stresses imagery and sentiment in abstract and succinct ways—which are also indispensable elements with which to move the sky and contract the land in Chinese garden-making. The emphasis on imagery and the quest for spiritual resonance are combined in one in this style of painting to embody lofty sentiments and convey meanings beyond sound and rhythm, which, too, is essential to the craft of Chinese gardens. In short, painting implies poetry, and gardens allude to images portrayed in painting. Therefore, poetic sentiment and picturesque allusion provide the guideline for the making of Chinese gardens.

A painter is particular about the position of a subject in his work,

whereas a garden-maker is scrupulous with the layout of a garden he wants to make. When an artificial mountain is built, fabulous veins and textures in the component rocks are much sought after, whereas texturing brushwork is paramount when rocks are being portrayed in a painting. Landscape painting gives prominence to the sequence of subjects and momentum, which are also emphasized more than anything else in garden-making, as the sequence of subjects invites the visitor to watch while sitting down, and the momentum entices him into the scenery thus built. A garden is a three-dimensional picture that changes rain or shine, day or night more than a painting can. As to planning the mountains and shaping the waters in a garden by patterning after natural landscape, each has its own paradigms to go by.

Drawing upon the best texturing brushwork of all the famous painters dating back to the Song and the Yuan, the builder of the artificial mountain in Suzhou's Beauty-Encircled Mountain Abode was easily as preeminent to Chinese rockwork as Li Bai (701-762) and Du Fu (712-770) are to Chinese poetry. The metamorphosis of artificial mountains through the ages is also intimately associated with changes in the styles of painting. The elegant but massive artificial mountains built during the Qianlong reign (1736-1795) of the Qing are comparable to the paintings of their day, while those built under the Tongzhi (1862-1875) and Guangxu (1875-1908) reigns are as petty and fragile as the style of paintings of their time. Indeed, artificial mountains born of a particular period cannot be judged without looking into the style of painting of their time.

Rocks come in a good variety, and their veins and textures vary as well. Similarly, every possible school of texturing brushwork in painting can always shine forth on its own. Just as Shitao says,

Peaks tally with texturing brushstrokes;

Texturing brushwork stems from peaks.

It is almost impossible to paint rocks without texturing brushstrokes. The differences in such techniques give rise to different schools of

painting. Given the vast differences between rock veins and texturing brushwork, an able artist would not apply techniques designed for Lake Tai rocks on the dainty bamboo-and-rock paintings of Ni Zan, nor would he use yellow stones to build the artificial mountains portrayed in the paintings of Wang Meng (1308-1385)¹, the "Woodcutter from the Yellow Crane Mountain." Those who are ignorant of the diverse schools of painting and their respective portrayal techniques can never come up with an impressive artificial mountain. Knowledge and cultural attainment enable an artificial mountain builder to apply rocks the way a painter manoeuvres his brush, so that the peaks and dales in his creations bear a close resemblance to those depicted in a master painter's work. Painters, inspired by real mountains and rivers, set styles and invent techniques for their works, whereas artificial mountain builders employ these painters' styles and techniques to recreate landscape with rocks. It goes without saying that quite a few artificial mountains are patterned after real mountains, but if a builder, instead of consulting painting theories and assimilating painters' texturing techniques to improve on what he sees from a model mountain, mechanically copies a prototype's beauty and ugliness, his creation is bound to lack picturesque values.

In terms of shape, color and height, the flowers and trees in a Chinese garden are compatible with those depicted in a painting. The atmosphere portrayed in the line, "Weathered vines, old trees and sleepy crow; tiny bridge, flowing stream and family," is appreciated by men of letters, landscape gardeners and painters alike because it accords with the goal of their shared pursuit for beauty, and because the various elements are grouped exactly as they are depicted in a painting. Paintings are done on paper, whereas the Chinese garden uses a white-washed wall as its backdrop, which, with flowers and trees tossing their shadows onto it, looks exactly like a painting in itself.

[Zhang Lian] designed artificial mountains with original conceptions and built

them by adopting the painting techniques of Li Cheng (919-967) and Dong Yuan (?-c. 962) of the Southern Tang (937-962), as well as the "Great Eccentric Taoist" (1269-1354) and the "Woodcutter from Yellow Crane Mountain" of the Yuan.² Artificial mountains created in this way feature fantastic peaks and ravines and cascading rapids in a space that twists and turns until it tapers away into the distance. With painstaking efforts, his craftsmanship of such an artificial mountain excels nature.

The reason why the great master Zhang Lian (1587-1673) could also accomplish so much in building artificial mountains for the Chinese gardens is amply explicated in this passage.

园林与山水画

清初画家恽南田（寿平）曾经说过：“元人园亭小景，只用树石坡池，随意点置，以亭台篱径，映带曲折，天趣萧闲，使人游赏无尽。”这几句话可供研究元代园林的重要参证。所以，不知中国画理画论，难以言中国园林。我国园林自元代以后，它与画家的关系，几乎不可分割，倪云林（瓚）的清秘阁便是饶有山石之胜，石涛所为的扬州片石山房，至今犹在人间。著名的造园家，几乎皆工绘事，而画名却被园林之名所掩为多。

我国的绘画从元代以后，以写意多于写实，以抽象概括出之，重意境与情趣，移天缩地，正我国造园所必备者。言意境，讲韵味，表高洁之情操，求弦外之音韵，两者二而一也。此即我国造园特征所在。简言之，画中寓诗情，园林参画意，诗情画意遂为中国园林之主导思想。

画究经营位置，造园言布局，叠山求文理，画石讲皴法。山水画重脉络气势，园林尤重此端，前者坐观，后者入游。所谓立体画本，而晦明风雨，四时朝夕，其变化之多，更多于画本。至范山模水，各有所自。苏州环秀山庄假山，其笔意兼宋元诸家之长，变化之多，丘壑之妙，足称叠山典范，我曾誉为如诗中之李杜。而诸时代叠山之嬗变，亦如画之风格紧密相关。清乾隆时假山之硕秀，一如当时之画，而同光间之碎弱，又复一如画风，故不究一时代之画，难言同时期之假山也。

石有品种不同，文理随之而异，画之皴法亦各臻其妙，石涛所谓“峰与皴合，皴自峰生”。无皴难以画石。盖皴法有别，画派遂之而异。故能者决不能以湖石写倪云林之竹石小品，用黄石叠黄鹤山樵之峰峦。因石与画家所运用之皴法有殊。如不明画派与画家所用表现手法，从未见有佳构。学养之功，促使其运石如用笔，腕底丘壑出现纸上。画家从真山而创造出各画派画法，而叠山家又用画家之法而再现山水。当然亦有许多假山直接摹拟于真山，然不参画理概括提高，皴法巧运，达文理之统一，必如写实模型，美丑互现，无画意可言矣。

中国园林花木，重姿态，色彩高低配置悉符画本。“枯藤老树昏鸦，小桥流水人家”。文学家、园林家、画家皆欣赏它，因有共同所追求之美的目标，而其组合方法，亦同画本所示者。画以纸为底。中国园林以素

壁为背景，粉墙花影，宛若图画。故叠山家张涟能“以意创为假山，以营丘、北苑、大痴、黄鹤画法为之，峰壑湍濑，曲折平远，经营惨淡，巧夺画工”。已足够说明问题了。

GARDENS AND KUNQU OPERA: BEAUTY'S TOUR DE FORCE

Written on a mid-summer day, 1981

It was one of the dog days in the Jiangnan area. Cicadas inside of the courtyard kept chirping from morning till night, and joining in the clamour was a neighbor's blaring cassette recorder. Even though the potted orchid in my small home was at its aromatic and luxuriant best, it was a typical case of "trees wanting to be quiet, but the wind refusing to quit howling." In helplessness, I could not but "pit poison against poison." Driven by my weakness for Kunqu Opera as a "diehard literatus," I flipped on my turntable, and the air was instantly filled with the notes of such lines in *The Peony Pavilion* ("The Interrupted Dream"),

The spring a rippling thread of gossamer gleaming sinuous in the sun borne idly across the court.... Streaking the dawn, close-curved at dusk, rosy clouds frame emerald pavilion; fine threads of rain, petals borne on breeze, gilded pleasure boat in waves of mist.

The melodious music and bewitching lyrics spirited my heart from the enchantment of Kunqu Opera to the beauty of a garden in no time. In this half-day piece of leisure snatched from my floating life, I somehow found joy by revelling for a while in the comfort of my small world.

The Chinese garden reached maturity during the Ming and the Qing. Especially after Kunqu Opera became all the rage in the Jiangnan area by the mid-Ming, an inseparable relationship arose between the garden and the opera. Not only the titles of some operas were associated with gardens, but their settings and those gardens' conceptions became interdependent as well, so much so that at times the setting of a certain opera became the conception of a garden, and vice versa, albeit in a different mode of expression. The preeminent

dramatist Li Yu (1611-1680), for example, was a landscape gardener himself. The first thing a scholar official does when making a garden is to build a parlor in it, which is water-bound in most cases, but oftentimes a waterside belvedere is added as well.

Every parlor or waterside belvedere, such as the Lotus Root Fragrance Gazebo in the Garden of Brotherly Indulgence and the Hat-Ribbon Washing Belvedere in the Master-of-Fishnets Garden in Suzhou, is also a venue for appreciating operas. With a gentle breeze wafting into such a building on the water, the audience would tilt their heads while luxuriating in the melody of singing to the accompaniment of pipe-wind music drifting in from the outside world. Even in the heat waves of a high-summer day it would be divine to sing a Kunqu aria or two without accompaniment with lush green lotus leaves nodding in front of the building. Such a captivating scene never fails to bring old memories back to mind.

The opera-singing evening parties thrown by Yu Mingheng (1900-1990) and other venerable professors at the waterside I-shaped Parlor of Tsinghua University are still the talk of the town today. At the time, the renowned Professor Zhu Ziqing (1898-1948)¹ was also teaching at Tsinghua. Quite a few literary works of these two professors are somewhat related to these parties.

The western section of the Humble Administrator's Garden, known as Additional Garden from 1892 onwards, is the site of the famous Hall of Thirty-Six Pairs of Mandarin Ducks. The hall's parlor features a paraboloid roof with its truss so well concealed that the entire structure becomes both visually pleasing and acoustically effective. It turns out that this parlor was a contribution of the garden's owner Zhang Lüqian (1838-1915), who furnished the garden together with Gu Yun (1835-1896), a renowned painter who was also a Kunqu Opera enthusiast. This was also where Yu Zhenfei (1902-1993) spent his childhood with his father Yu Zonghai (1847-1930) as a private tutor with the Zhangs. Whenever I related these anecdotes to Yu, he would wax affectionate and tell me vivid

tales about the years he had spent in that garden.

In days of yore, the Chinese garden was an integral part of people's sentiments and everyday life, and Kunqu Opera was instrumental in enriching the garden's charms. The scenery of the garden is resonant with the enchanting singing of the opera in both character and appeal. When the movie *Suzhou Gardens* was in the making a few years ago, and when the Americans arrived to shoot the movie *Suzhou* two years ago, both crews accepted my suggestion that some Kunqu tunes be used as background music, and the result was a success. Because the well hammered-out water-mill tune of Kunqu Opera is most appropriate for singing and performing at small functions for its elaborate dancing techniques, accurate pronunciations, elegant lyrics, and lilting syllables, the water-bound chamber or hall inside a garden become its best venues. Unlike those tunes that have to be sung at the top of one's voice on rugged rural opera stages, the water-mill tune is as captivately subtle and graceful as the sparse but state-of-the-art structures of a garden. One of the lyrics in *The Peony Pavilion* ("The Interrupted Dream") puts it this way,

Unwearying joy—how should we break its spell even by visits each in turn to
the Twelve Towers of Fairyland?

What this line captures is exactly the spirit of the Chinese garden. The inauguration on June 18, 1980, of the Astor Court, a replica of Suzhou's Late-Spring Peony Lodge, in the Metropolitan Museum of Art in New York City, touched off a wave of Chinese garden-insanity worldwide. By the same token, I surmise Kunqu-insanity will come about before long.

The beauty of Kunqu Opera is not limited to performing art. With its literary librettos, tones, pronunciations, tonality, music and its rhythms and percussions having been thrashed out and refined repeatedly for centuries, it is a veritable repository of Chinese culture. I remember lecturing on the Chinese garden to a Kunqu Opera class at the Shanghai Theater Academy on a pre-1966 day. It sounds like a

joke, but the man who invited me was the academy's president, the far-sighted Yu Zhenfei, himself a Kunqu Opera superstar known for his roles in such operas as "The Interrupted Dream." If an opera performer has the vistas of a Chinese garden in his mind's eye, his action will no longer be "water without a source" or "a tree without roots," and his performance will be passionate, lively and lifelike. The reason why Mei Lanfang (1894-1961)², Yu Zhenfei and others could be idolized as opera gurus of their time is because of their sublime cultivation in many cultural fields aside from theater. Some garden visitors today are abandoned to beer and skittles and totally ignorant of the aesthetics of the garden's artistic conception—isn't it a great pity?

The beauty of the Chinese garden boils down to a single word, elegance, that is, elegance in demeanour, interest, mood, lifestyle, energy, and what not. A high-calibre Kunqu Opera libretto must be scholastic, and being scholastic is essentially the same as being elegant, for culture must be embodied in such a work, be it an opera or a garden. In the Chinese garden the scenery runs up and down as it turns this way and that, disappears at one moment and reappears at another, now stops the visitor on his track for in-situ viewing, now pushes him along for some in-motion viewing, but all the time it keeps him engrossed. The leisure thus generated on the tour evokes a poem or a painting that cannot be digested by those who come in a hurry, but is reserved only for those willing to take their time and ruminate what meets their eyes as they sit down or walk along. Kunqu Opera is presented for the same purpose, with each of its songs refrained three times and ended with a lingering effect on the theatergoer; far from the disco's pulsating beats, it is gentle and graceful in tonality and rhythm. The reason why young people nowadays dislike Kunqu Opera is manifold. For one thing, their understanding of it is impeded by their lack of cultural edification; for another, in a typical case of "highbrow music having few followings," this opera's melodic music contravenes, say, the rush of disco music. This has nothing to do with the aesthetics of Kunqu Opera; rather, it is like some children who do

not like eating olives because they do not know how to savor their taste. Instead of downgrading a sublime form of art to cater to a large audience, we are duty-bound to promote education in aesthetics and help the younger generation improve their cultural attainment.

As I bring this short essay to an end, the melody of the lyrics of the Kunqu Opera *The Story of the Jade Hairpin* ("Heart-Stirring Lute") seems to have drifted into my ears once more:

Heavy are shadows of flowers multilayered upon a
white-washed wall;

Curtains lift on remnant lotuses swaying in wind
from a waterside hall.

The weather is still smothering, but my vision is graced with the picture-perfect views of the Chinese garden.

园林美与昆曲美

正是江南大伏天，院子里的鸣蝉从早叫到晚，邻居的录音机又是各逞其威。虽然小斋中的这盆建兰开得那么馥郁，然而“树欲静而风不止”。在无可奈何的情况下，我也只好“以毒攻毒”，开起了我们这些所谓“顽固分子”充满了“士大夫情趣”者所乐爱的昆曲来。“袅晴丝，吹来闲庭院，摇漾春如线”。“朝飞暮卷，云霞翠轩”“雨丝风片，烟波画船”。（《牡丹亭·游园》）悠扬的音节，美丽的辞藻，慢慢地从昆曲美引入了园林美，难得浮生半日闲，我也能自寻其乐，陶醉在我闲适的境界里。

我国园林，从明、清后发展到了成熟的阶段，尤其自明中叶后，昆曲盛行于江南，园与曲起了不可分割的关系。不但曲名与园林有关，而曲境与园林更互相依存，有时几乎曲境就是园境，而园境又同曲境。文学艺术的意境与园林是一致的，所谓不同形式表现而已。清代的戏曲家李渔又是个园林家。过去士大夫造园必须先建造花厅，而花厅又多以临水为多，或者再添水阁。花厅、水阁都是兼作顾曲之所，如苏州怡园藕香榭、网师园濯缨水阁等，水殿风来，余音绕梁，隔院笙歌，侧耳倾听，此情此景，确令人向往，勾起我的回忆。虽在溽暑，人们于绿云摇曳的荷花厅前，兴来一曲清歌，真有人间天上之感。当年俞平伯老先生在清华大学工字门水边的曲会，至今还传为美谈，那时，朱自清先生亦在清华任教，他俩不少的文学作品，多少与此有关。

苏州拙政园的西部，过去名补园，有一座名“三十六鸳鸯馆”的花厅，它的结构，其顶是用“卷棚顶”，这种巧妙的形式，不但美观，可以看不到上面的屋架，而且对音响效果很好。原来主人张履谦先生，他既与画家顾若波等同布置“补园”，复酷嗜昆曲。俞振飞同志与其父亲粟庐先生皆客其家。俞先生的童年是成长在这园中。我每与俞先生谈及此事，他还娓娓地为我话说当年。

中国过去的园林，与当时人们的生活感情分不开，昆曲便是充实了园林内容的组成部分。在形的美之外，还有声的美，载歌载舞，因此在整个情趣上必须是一致的。从前拍摄“苏州园林”，及前年美国来拍摄“苏州”电影，我都建议配以昆曲音乐而成功的。昆曲的所谓“水磨调”，是那么的经过推敲，身段是那么细腻，咬字是那么准确，文辞是那么美丽，

音节是那么抑扬，宜于小型的会唱与演出，因此园林中的厅榭、水阁，都是最好的表演场所，它不必如草台戏的那样用高腔，重以婉约含蓄移人，亦正如园林结构一样，“少而精”，“以少胜多”，耐人寻味。《牡丹亭·游园》唱词的“观之不足由他遣”。“观之不足”，就是中国园林精神所在，要含蓄不尽。如今国外自从“明轩”建成后，掀起了中国园林热，我想很可能昆曲热，不久也便会到来的。

昆曲之美，不仅仅在表演艺术，其文学、音韵、音乐，乃至一板一眼，皆经过了几百年的琢磨，确是我国文化的宝库。我记得在“文化革命”前，上海戏曲学校昆曲班，邀我去讲中国园林，有些人看来似乎是“笑话”，实则当时俞振飞校长真是有见地，演“游园”“惊梦”的演员，如果他脑子中有了中国园林的境界，那他的一举一动，便不是无本之木，无源之水了，演来有感情，有生命，有声有色。梅兰芳、俞振飞诸老一辈的表演家，其能成一代宗师者，皆得之于戏剧之外的大量修养。我们有些人今天游园林，往往仅知吃喝玩乐，不解意境之美，似乎太可惜一点吧！

中国园林，以“雅”为主，“典雅”“雅趣”“雅致”“雅淡”“雅健”等等，莫不突出“雅”。而昆曲之高者，所谓必具书卷气，其本质一也，就是说，都要有文化，将文化具体表现在作品上。中国园林，有高低起伏，有藏有隐，有动观、静观，有节奏，宜细赏，人游其间的那种悠闲情绪，是一首诗，一幅画，而不是匆匆而来，匆匆而去，走马观花，到此一游；而是宜坐，宜行，宜看，宜想。而昆曲呢？亦正为此，一唱三叹，曲终而味未尽，它不是那种“嘞嘞嘞”，而是十分婉转的节奏。今日有许多青年不爱看昆曲，原因是多方面的，我看是一方面文化水平差了，领会不够；另一方面，那悠然多韵味的音节适应不了“嘞嘞嘞”的急躁情绪，当然曲高和寡了。这不是昆曲本身不美，而正仿佛有些小朋友不爱吃橄榄一样，不知其味。我们有责任来提高他们，而不是降格迁就，要多作美学教育才是。

写到此，那“粉墙花影自重重，帘卷残荷水殿风”，《玉簪记·琴挑》的清新辞句，又依稀在我耳边，天虽仍是那么热，但在我的感觉上又出现了如画的园林。

JOY OF DAILY RAMBLING OF GARDENS

Written on a mid-summer day, 1981

A crystallization of architecture, calligraphy and painting, literature and horticulture, the picture-perfect and poetic Chinese garden is a school in its own right worldwide.

Every traditional garden in this country has a personality peculiarly its own. What the Summer Palace of Beijing impresses us most is its Kunming Lake at the foot of the Longevity Hill. The centerpiece of the Beihai Park is a lake with the Jade Flowery Islet on it. Also impressive is the mist-enveloped serpentine water surface of the Humble Administrator's Garden in Suzhou, and the mammoth artificial mountain built of yellow stones in the Geyuan's Garden¹ of Yangzhou.

If the lie of the land is taken into consideration while a resourceful design is pencilled out accordingly before a garden comes under construction, not only manpower and resources can be economized, but the scenic sights can also be arranged judiciously. In garden-making parlance, this is put as "accommodating measures to the circumstances."

The traditional Chinese garden is centered on mountain or water. If a garden is predicated on mountain, water plays a supplementing role, or the other way round. Bodies of water are scattered or congregated, and the mountain takes the form of a transverse ridge or steep peak. Gardens make a name for themselves with scenic attractions; such attractions differ from one another to give every garden a distinct personality. Scenery may be enjoyed when the onlooker stays put or moves along, hence the terms, "in-situ viewing" and "in-motion viewing." A garden's artistic attainment is judged by

whether it has eschewed the old rut and worked its "trademark" scenery to the best vantage.

The overwhelming majority of traditional Chinese gardens are walled in, with scenic sights concealed in their precincts. However, external views are oftentimes incorporated into such a garden to extend its space as far as possible and to yield a haunting impression, which is what is meant by "view borrowing." Observed from a balustrade in the True-Meaning Lake and Mountain Pavilion in the Summer Palace of Beijing at sunset, the Jade Spring Mountain close at hand and the Western Hills in the distance look like they had been spirited into the garden by a celestial hand.

A large Chinese garden often contains a number of small ones. Examples are the Garden of Harmonious Charms in the Summer Palace, the Tranquil Mind Chamber in the Beihai Park, the Loquat Courtyard in the Humble Administrator's Garden, and the Kowtow-to-Peak Verandah in the Lingering Garden. Such groupings of

large and small gardens create settings that are either extravert or introvert, and set the stage for buildings in different sizes along with mountains, rocks and trees in many a becoming manner. The Three Pools Mirroring the Moon at the West Lake is a typical case of small pools ensconced in a large lake. In most cases, such a small pool or garden becomes the pick inside of a large one because it is worth pondering over for a lingering time with its architecture, rockwork and miniature landscapes designed with attention to the minute detail. In contrast with views that keep changing with the shift of the visitor's footsteps along a roofed walkway, a small scenic attraction is best observed when the visitor pauses for some time on his track.

The scenic sights inside of a Chinese garden are in the main imitations of nature. They are natural-looking vistas constructed with human resources so that, "Though man-made, they look like born of nature." Such a vista does not necessarily stress which mountain or body of water is its prototype, but the connection is generalized succinctly. A good example in this regard is the Summer Palace of

Beijing, which is patterned after the West Lake of Hangzhou but does not look the same in every aspect. Landscape painting images are also incorporated with the emotional setting of a certain poem to conjure up scenic wonders at once poetic and picturesque. Contrasting and complementing techniques are employed to add variations to a twisting and turning scene. In the Summer Palace, for example, the frontal hills are strewn with sumptuous buildings, whereas on its back hills nature presents herself in saturated verdure—the two scenic sections are designed to bring out the best in each other and engender different feelings in the spectator. The Chinese garden is replete with contrasts between architecture and rockwork large and small, high and low, scarcity and density, and so on. The leading scenery is often brought into bold relief by secondary scenery, such as the White Pagoda of the Beihai Park, the Five Pavilions atop the Prospect Hill, and the Buddhist Incense Belvedere of the Summer Palace.

Apart from rockwork and trees, the artistic layout of buildings such as a gazebo tucked away amidst flowers or a pavilion overlooking a stream is crucial to the Chinese garden. Ornamental supplements like roofed walkways, undulating walls, zigzagging bridges and latticed windows are employed as well to variegate the vistas, expand the space, and lend depth to the scenery. Visitors to Chinese gardens invariably feel that, despite their small sizes, a delightfully intricate plan resides in their scenic allure. Such a feeling is engendered through varied combinations of sights that are open or hidden, mystically distant or brightly and spaciouly close at hand. Sightseeing in such a garden is like browsing a long scroll of landscape painting—once your eyes are fixed on it, scenes and sights would flash into your eyes in a constant stream.

"Good flowers ought to be set off by good lofts and terraces," as Chen Weisong (1625-1682)² puts it. Few visitors leave the Round City in the Beihai Park of Beijing without being captivated by the clumps of pines and cypresses sagaciously arranged in front of the Light-Sustaining Palace. Why? For one thing, the contours and shapes of

these trees are tailored to the heights of the buildings. For another, planted in tree beds, they are artfully scattered or clustered to mix and interweave their green foliage and curling branches against the vermillion walls and blue-glazed roof tiles in the surroundings, thereby invoking a vista so inviting that visitors would hate to go away any time soon. In a similar fashion, the crabapple trees in front of the Hall of Joyful Longevity are integrated with the encircling buildings to bring about a picture no less exquisite and brilliant than a horticultural masterpiece. The gardens in the Jiangnan area are a school in their own right in this regard, as they present eye-pleasing pictures by setting luxuriant flowers and trees and graceful-looking bamboos and rocks against white-washed walls. Most of the flowers and trees serving this purpose have been pruned and trained repeatedly for long years until desired configurations are achieved.

Apart from artificial mountains, the Chinese garden also features shapely rocks, every one of them standing out like an impressionist sculpture waiting to be singled out for enjoyment. Spectators are apt to invest sentiments into them, and affectionately call them "peaks with a human face," or "*gui*³-shaped peaks." To find their way into a garden, these rocks must be slim, wrinkled, riddled through, and well hollowed out, for only the exquisite and well-perforated ones are the choicest. No garden can come to fame without coming into possession of such exotic rocks. The Exquisite Jade Boulder in Shanghai's Gratification Garden and the Cloud-Crowned Peak in Suzhou's Linger Garden are among the nature-wrought Lake Tai stones⁴ par excellence, which help augment the charms of their respective gardens greatly.

A pavilion or a belvedere in the Chinese garden often has a poetic name, which is sometimes graced by a well-written poetic couplet that flanks its front door. Those who have read the picaresque novel *The Travels of Lao Can* by Liu E (1857-1909)⁵ may well remember this episode: Lao Can cannot help murmuring to himself, "It's nice, really nice," upon reading this couplet during a visit to the Daming Lake⁶ in

Jinan,

Lotus flowers in four directions, willows on three sides;

A whole city of mountains, with half of it given to lakes.

This couplet speaks volumes for the finishing touch literature renders the traditional Chinese garden.

A garden's scenery changes with the seasons. Guo Xi (c. 1023-c. 1085), a famed landscape painter of the Northern Song, says in his book on the theories of painting, *The Lofty and Sublime Messages of Forests and Streams*,

The mountain is charming in a subtle way as if it is smiling in spring, so saturated in greenness as to seemingly drip in summer, bright and clean as though wearing subtle makeup in autumn, and palely demure as if asleep in winter.

Landscape gardeners through the ages have more or less assimilated these traditional painting guidelines in the gardens they have created. In the Geyuan's Garden of Yangzhou, artificial mountains are installed to represent the four seasons through a play of colors: the spring mountain is built of bluish green stalagmites; the summer mountain, grey Lake Tai stones; the autumn mountain, yellow stones the color of ochre; and the winter mountain, Xuan stones⁷ as white as snow. Accordingly, the yellow stones are breathtakingly steep and sky-reaching to attract climbers in autumn. Snow stones are piled up in front of a hall for people to marvel at while staying indoors in winter.

When spring sets in at dawn as per human will, people ought to visit gardens before it is too late.

园日涉以成趣

中国园林如画如诗，是集建筑、书画、文学、园艺等艺术的精华，在世界造园艺术中独树一帜。

每一个园都有自己的风格，游颐和园，印象最深的应是昆明湖与万寿山；游北海，则是湖面与琼华岛；苏州拙政园曲折弥漫的水面，扬州个园峻拔的黄石大假山等，也都令人印象深刻。

在造园时，如能利用天然的地形再加人工的设计配合，这样不但节约了人工物力，并且利于景物的安排，造园学上称为“因地制宜”。

中国园林有以山为主体的，有以水为主体的，也有以山为主水为辅，或以水为主山为辅的，而水亦有散聚之分，山有平冈峻岭之别。园以景胜，景因园异，各具风格。在观赏时，又有动观与静观之趣。因此，评价某一园林艺术时，要看它是否发挥了这一园景的特色，不落常套。

中国古典园林绝大部分四周皆有墙垣，景物藏之于内。可是园外有些景物还要组合到园内来，使空间推展极远，予人以不尽之意，此即所谓“借景”。颐和园借近处的玉泉山和较远的西山景，每当夕阳西下时，在湖山真意亭处凭栏，二山仿佛移置园中，确是妙法。

中国园林，往往在大园中包小园，如颐和园的谐趣园、北海的静心斋、苏州拙政园的枇杷园、留园的揖峰轩等，他们不但给园林以开朗与收敛的不同境界，同时又巧妙地把大小不同、结构各异的建筑物与山石树木，安排得十分恰当。至于大湖中包小湖的办法，要推西湖的三潭印月最妙了。这些小园、小湖多数是园中精华所在，无论在建筑处理、山石堆叠、盆景配置等，都是细笔工描，耐人寻味。游园的时候，对于这些小境界，宜静观盘桓。它与廊引人随的动观看景，适成相反。

中国园林的景物主要摹仿自然，用人工的力量来建筑天然的景色，即所谓“虽由人作，宛自天开”。这些景物虽不一定强调仿自某山某水，但多少有些根据，用精炼概括的手法重现。颐和园的仿西湖便是一例，可是它又不尽同于西湖。亦有利用山水画的画稿，参以诗词的情调，构成许多诗情画意的景色。在曲折多变的景物中，还运用了对比和衬托等手法。颐和园前山为华丽的建筑群，后山却是苍翠的自然景物，两者予

人不同的感觉，却相得益彰。在中国园林中，往往以建筑物与山石作对比，大与小作对比，高与低作对比，疏与密作对比等等。而一园的主要景物又由若干次要的景物衬托而出，使宾主分明，像北京北海的白塔、景山的五亭、颐和园的佛香阁便是。

中国园林，除山石树木外，建筑物的巧妙安排，十分重要，如花间隐榭、水边安亭。还可利用长廊云墙、曲桥漏窗等，构成各种画面，使空间更加扩大，层次分明。因此，游过中国园林的人会感到庭园虽小，却曲折有致。这就是景物组合成不同的空间感觉，有开朗，有收敛，有幽深，有明畅。游园观景，如看中国画的长卷一样，次第接于眼帘，观之不尽。

“好花须映好楼台”，到过北海团城的人，没有一个不说团城承光殿前的松柏布置得妥帖宜人。这是什么道理？其实是松柏的姿态与附近的建筑物高低相称，又利用了“树池”将它参差散植，加以适当的组合，使疏密有致，掩映成趣。苍翠虬枝与红墙碧瓦构成一幅极好的画面，怎不令人流连忘返呢？颐和园乐寿堂前的海棠，同样与四周的廊屋形成了玲珑绚烂的构图，这些都是绿化中的佳作。江南的园林利用白墙作背景，配以华滋的花木、清拔的竹石，明洁悦目，又别具一格。园林中的花木，大都是经过长期的修整，使姿态曲尽画意。

园林中除假山外，尚有立峰，这些单独欣赏的佳石，如抽象的雕刻品，欣赏时，往往以情悟物，进而将它人格化，称其人峰、圭峰之类。它必具有“瘦、皱、透、漏”的特点，方称佳品，即要玲珑剔透。中国古代园林中，要有佳峰珍石，方称得名园。上海豫园的玉玲珑、苏州留园的冠云峰，在太湖石【从周案二十】中都是上选，使园林生色不少。

若干园林亭阁，不但有很好的命名，有时还加上很好的对联，读过刘鹗的《老残游记》，总还记得老残在济南游大明湖，看了“四面荷花三面柳，一城山色半城湖”的对联后，暗暗称道：“真个不错。”可见文学在园林中所起的作用。

不同的季节，园林呈现不同的风光。北宋名山水画家郭熙在其画论《林泉高致》中说过：“春山淡冶而如笑，夏山苍翠而如滴，秋山明净而如妆，冬山惨淡而如睡。”造园者多少参用了这些画理，扬州的个园便是用了春夏秋冬不同的假山。在色泽上，春山用略带青绿的石笋，夏山用灰色的湖石，秋山用褐色的黄石，冬山用白色的雪石。黄石山奇峭凌云，俾便秋日登高。雪石罗堆厅前，冬日可作居观，便是体现这个道

理。

晓色春开，春随人意，游园当及时。

VIEW BORROWING IN GARDEN ARCHITECTURE

Tongji University Journal, Architecture Edition, Issue No. 1, 1958

View borrowing figures large in a garden's plan. It merits attention in garden designing, and cannot be dispensed with in urban planning or the designing of dwellings and public buildings. Upon arriving at a well-designed garden, the visitor would feel indescribably relaxed and amused the moment he starts looking around. At a close look, he finds that the secret lies in the clever borrowing of views, a technique already in spontaneous use among garden crafters in antiquity, but it was not summarized until the Chongzhen reign (1628-1644) of the late Ming. In *The Craft of Gardens*, Ji Cheng (1582-c. 1642) writes,

Skill in landscape design is shown in the ability to "follow" and "borrow from" the existing scenery and terrain.... Following the existing lie of the land may require any of these skills: designing in accordance with the rise and fall of the natural contours, to accentuate their intrinsic form; or lopping tree branches that block the view and using rocks to direct the flow of a stream, so that each borrows value from the other. Where a pavilion is appropriate, build a pavilion, and where a gazebo is needed, build a gazebo. It does not matter if the paths are hidden away; in fact they should be laid out to twist and turn with the land; this is what is meant by artistry through suitability. To borrow from the scenery means that although the interior of a garden is distinct from what lies outside it, as long as there is a good view you need not be concerned whether this is close by or far away, whether clear mountains enhance their beauty in the distance or a dark purple-walled temple rises into the sky nearby. Wherever the view within your sight is vulgar, block it off, but where it is beautiful, take advantage of it; never mind if it is just empty fields around farm houses, make use of it all as a misty background. This is what is known as skill in fitting in with the form of the land.... If you can have a Buddhist monastery as your neighbor, the chanting of Sanskrit will come to your ears. The remote mountain peaks, gleaming with wondrous hues, form a bewitching background.... There are no

fixed rules for designing gardens but there are certain principles for using natural scenery.... Making use of the natural scenery is the most vital part of garden design. There are various aspects such as using scenery in the distance, near at hand, above you, below you, and at certain times of the year.

Li Yu (1611-1680) also says in *The One Man's Account*,

Only through borrowing can a view be accommodated.

These words of Ji and Li have laid down the cardinal rules for garden-makers of later generations. Today, I would like to present my humble opinions on this issue, and beg for corrections if I have said anything wrong.

The view to be borrowed within comes apparently from without. In the same manner of converting something in someone else's

possession into one's own, an outside view can be incorporated into a garden to enrich or augment its attractions. The views borrowed in early years mostly came from natural landscape, which is best described by Tao Yuanming (c. 365-427):

Picking aster 'neath the eastern fence,
Upon southern mountains my gaze lies.

The gist of this line boils down to the word "gaze," a natural and unaffected means for intentional or unintentional "view borrowing." Wang Wei (701-761) announced the villa he had built in Wangchuan in what is present-day Lantian, Shaanxi province, by saying, "I have an estate at Wangchuan." Bai Juyi (772-846), who lived in roughly the same age as Wang Wei, had his famous Thatched Hut built on Mount Lushan, Jiangxi province.

In *A Collection of Anecdotes in the Lü Garden*, Qian Yong (1759-1844) says of the Garden of Perennial Spring in Wuhu, Anhui province:

The Reddish Brown Mountain presents itself before the window, with everything else—water swirling and rippling, a pagoda silhouetted in the pool, and bells tolling—coming into sight or within earshot all at once.

What views are borrowed is apparent in these lines. Just as Li Gefei (c. 1045-c. 1105) said of the Loop Stream Gully in *A Record of the Celebrated Gardens of Luoyang*:

From there, if one gazes out to the south, the layered peaks and green crests of Mount Songgao, Mount Shaoshi, Mount Longmen, and Mount Dagū present their wonder to the eye.... From there, if one gazes out to the north, he will see the halls and towers in the palace compounds of Sui-Tang times, with thousands of doors and ten times as many windows, lofty and elevated, splendid and gorgeous, stretching for a dozen miles on end. What took Zuo Si (250-305) over ten years of utmost efforts to describe in his rhapsodies can be exhausted here at one single glance.

About the Hu's Two Gardens North of the River, he says,

Its terrace offers a view that extends for over one hundred square miles in all directions: the Yi and the Luo Rivers zigzag through it; the trees and plants enveloped in mist and set off by clouds appear to be luxuriant; tall lofts and circuitous gazebos emerge at one moment and vanish at another. A painter, even after painstaking deliberations, would find it hard to paint all these out. Yet it is named "Terrace for Frolicking with the Moon."

Xu Hongzu (1586-1641)¹ says in *Diaries on Travels in Yunnan*,

In the Ma's Garden a pavilion was built on another pond's southern bank, so that it faces the brooklet northward. Across the pond, the halls and pavilions of the Dragon Spring Temple are strewn here and there. A stupa up a ridge tosses its silhouette into the center of rippling water from the top of a plateau overlooking the Nine-Dragon Pond. But even more exotic is the view, with the slope and the pond contrasting each other whilst water bubbles and ripples endlessly at the fountainhead.

These gardens were all sited by "keeping the whole picture in mind," but no garden or estate does better than Buddhist temples in this regard. At least eighty per cent of these temples are nestled at the foot of a mountain, with a tranquil stream winding in the front and mountains rising in every direction. Such a site not only offers sequestered peace and quiet, but the wind there is the mildest as well. With mountains clad in cloud, and mist and verdure "shifted" before the windows without much ado, no place is better than such a wellconcealed temple for those who come to study Buddhism. Indeed,

Green mountains are alluring in my senses,

As I expect myself into these mountains' eyes.

Take, for example, the Thriving Bliss Temple at the Yushan Mountain of Changshu, Jiangsu province. Low and small as this mountain is, the

temple seems to be rimmed in by lofty mountains and precipitous peaks. Most enviable, however, is the scenery in the temple's precinct,

Into the remotest recess a winding path stretches;

A meditation room sits deep amid flowers and trees.

This description pertains to the National Purification Temple of the Tiantai Mountain, the Soul's Retreat Temple of Hangzhou, and the Heavenly Boy Temple of Ningbo. Similar examples and records are legion. The pity is that among the best scenic resorts I seldom see evidence of conscientious efforts made in view borrowing—the siting is seldom decided on account of local topography, with buildings often perched on mountains or clustered all over a slope. Now that landscape is rendered in such disarray, there is no view borrowing to speak of. Examples of haphazard siting are so prevalent that they merit serious attention.

In garden-making architecture, the first thing to consider is to mesh buildings with surroundings, or, as Ji Cheng admonishes, "The trick lies in accommodating and borrowing [views]." The scenery for view borrowing in this regard should be arranged with a high degree of flexibility and adaptability. A masterstroke can work wonders on things that are otherwise insipid; but in eyes that stare but do not see, a perfect view can be neglected even if it beckons frantically. Take, for example, the gardens in the Jiangnan area. Most gardens in Changshu are built upon level ridges and tiny knolls, with views borrowed from the Yushan Mountain in the background. This method is assimilated in the Solace-Imbued Garden at the foot of the Huishan Mountain in Wuxi, and patterned after in the Garden of Harmonious Charms in Beijing's Summer Palace by focusing its views on water, level ridges and winding shores, but, more importantly, by borrowing the views of the Longevity Hill. Indeed, even when our forebears were imitating something, they still kept their eyes on the general picture, and never took action before they had mastered the overall spirit of the project at hand. As to the gardens in Hangzhou, Yangzhou and Nanjing, their layouts and "view borrowing" are strictly handled in accord with what

the local mountains and waters can offer. Quite a few gardens in Songjiang, Suzhou, Changshu and Jiaxing in the Jiangnan area borrow views from the Buddhist pagodas beyond their walls. Just as Qian Yong puts it,

Making a garden is like composing verse or prose;

Every twist or turn must be done with prudence.

Only in this way can a garden stand out in distinction.

In his *Diaries on Travels in Yunnan*, Xu Hongzu writes,

The Chinese pear-leaved crabapples are ripening in a northern neighbor's garden; draping their boughs over the southern wall, they appear bright red in a lovable way.

A famous Song-dynasty poem has it,

Not to be shut up by a garden full of glory vernal,

A twig of red apricot flowers ventures out of wall.

How beautiful the vistas are, offered by the red fruits in a northern neighbor's garden and the single twig of red apricot flowers protruding over a wall! *The Craft of Gardens* says again,

However sparse a glimpse at a neighbor's flowers there is to be given, their vernal charms may well be gleaned for inexhaustible enjoyment if only they can be beckoned upon.

Thus we know the views to be borrowed can be large or small. Doesn't Ji Cheng talk about "using scenery in the distance" or "near at hand"? Shen Fu (1763-1825)² says in his *Six Records of a Floating Life*,

From here we can look up to see mountain peaks, and look down to take in gardens and pavilions. Vast and quiet is the vista....

Indeed, if borrowed cleverly, exquisite views are available everywhere whether you look up or look down at them. Poets and painters of bygone years were so hard up they could only afford to build rooms with three rafters, but one thing they would never give up was "view borrowing," so that they could "lean" upon a mountainside as if it were a wall, and "bring" along water as if it came from a ditch.

In my opinion, neighboring homes in today's residential quarters may as well erect low walls or hedges between them, open lattice windows into their walls and cover them with green rattans and vines, so that they can communicate over such walls or hedges and borrow

each other's views. Good-neighborly delights of this sort are at least better than neighbors staring at each other straight through opposite doors. In his comment on the Garden Half Way up the Mountain in *Miscellaneous Notes on the Eastern City*, Li E (1692-1752)³ relates on a vista that belongs to a realm categorically different:

The Garden Half Way up the Mountain is only half the size of the Yu's Garden, and they are separated merely by an alleyway. Climb up the northern loft of the Yu's Garden for a lookout, and one sees sun-lit woods and moss-greened rocks that seem to be crowding into one's bosom along with singing birds and fragrant flowers, an engrossing vista indeed. What the Hwa Dzan (Amitabha Buddhist) Temple east of the garden offers is a totally different view. After dusk falls when everything quiets down, and before the rise of a rooster's crow breaks the silence at the fifth watch of the night, water gurgles and pines sigh to echo the drum beats and bell tolls from time to time.

Most gardens in Suzhou are walled in, making it impossible to borrow views from the outside world. This is where 'mutual borrowing of opposite views' inside of a garden comes in handy. As a matter of fact, "opposite-view borrowing" and "view borrowing" are the same thing, for you may just take "view borrowing" as an alternative to "opposite-view borrowing" that takes place outside of a garden. A stellar example of "opposite views" is found in the Humble Administrator's Garden, where the moon gate of the Loquat Courtyard opens exactly onto the Fragrant Snow and Luxuriant Cloud Pavilion, with the latter offering the former wonderful scenery to be borrowed. Close by the Loquat Courtyard is the Embroidered Damask Pavilion perched atop a knoll, where one can look down at the entire walled-in small yard and gaze far into the distance to see the Mountain-in-View Loft. This scenery is brought about by the mutual borrowing of views high and low and from the four directions. The tiny yards in front of the Yulan Magnolia Hall and the Vernal Crabapple Yard borrow views from the large garden they find themselves in, so that visitors to these tiny yards can still marvel at the spatial and spiritual resonance of a vast vista. Another good example of view borrowing can be found in the Good for Both Families Pavilion⁴.

As a fine traditional landscape-making technique, view borrowing should certainly be inherited and put to wider use today. But some garden designers tend to thrash things out merely from a blueprint, without caring to make on-the-spot feasibility studies, and the requisite view borrowing method is likely to be brushed aside as a result. Take, for example, Shanghai with its jungle of tall buildings. If an artificial mountain is ill-located amidst jumbled high-rises, it will have little chance to evoke real mountains and woods, and people would find such a setting jarring. If a designer intends to borrow views from a tall building, he has got to think it over carefully. Because there are no views worth borrowing from its surroundings, the Multi-storied Building Garden perched upon an earthen hill at Doctor Ma's Lane, Suzhou, surrounds itself with houses with two methods offered in *The Craft of Gardens*,

Where the view in sight is vulgar, block it off,

But where it is beautiful, take advantage of it.

The Sun Yat-sen Park in west Shanghai seems to be a cut above its counterparts in that it detaches itself from the city's din and traffic in a variety of ways. When we climb up an earthen knoll in the southeast corner of that garden and look into the distance, we can see none of the outside buildings—the designer has taken pains to block the views that cannot be borrowed, and then he has ponds dug and rocks stacked up to make the visitor feel like roving a wooded mountain.

In my opinion, it is inappropriate to erect tall mountains on the immense track of land of the Western Suburb Park in Shanghai because there are so many tall buildings in close proximity and in the distance. If the ponds nearby can be incorporated and interspersed with reeds in future expansion plans, those who go boating in the park will feel like they were oaring on a misty expanse of water akin to the Western Brook Wetland of Hangzhou. Once the water surface of a park is expanded, it not only adds to the allure of the vistas on the premises but also help mitigate dust and environmental pollution. For the same reason, both the Garden of Perfect Splendor and the "Three

Seas"⁵ of Beijing have kept broad water surfaces on their premises, so that incorporeal silhouettes in the water intermingle with corporeal trees and groves and buildings ashore to conjure up one fascinating scene after another through judicial mutual borrowing of a series of "opposite views." In *Diaries of Yuan Zhongdao (1570-1626)*⁶, the author writes,

I went to my friend Mi Wanzhong's garden in Haidian district together with Wu Shimei from Wanling⁷. A difficult part of garden-making in the capital city is the shortage of water. This garden, however, abounds in water, so much so that all its lofts and pavilions are water-bound and look like so many painted pleasure boats. As lotuses happened to be in the peak of their flowering season when we were there, their color and aroma were exceptionally infatuating. On the top floor of the garden's loft we also saw the scenic views of the Western Hills in the distance.

Mi Wanzhong writes of the Lush Foliage Loft in his own garden,

Nothing delights more than mounting a loft

To toast West Hills at ease at moonlit night.

Yuan Zhongdao's account illustrates the role of water in a garden while Mi's poem shows how his garden borrows views from the same hills as the Summer Palace does.

As every garden has its way with view borrowing to achieve individuality, it is unwise to impose uniformity at the expense of individuality. The Mountain Summer Resort of Chengde borrows views from the surrounding mountains and the structures of the Eight Major Temples. The Black Tortoise-Snake Lakes⁸ of Nanjing bedecked itself by incorporating the skyline of Nanjing close by and the Bell Mountain far away, but neither the skyline nor the mountain could beat the beauty of the reflections of the city wall quivering in the lake, so much so that these reflections became the lake's undisputable "name card." However, these lovely reflections are gone forever after dykes were erected along the city wall and the parapet walls demolished. In Hangzhou there is one mountain peak in the south and another in the north across the West Lake, and the center of the lake itself is graced with the Memorial Causeways of Su Shi and Bai Juyi,

but it is the Pagoda in Protection of Qian Chu⁹ and the Lei's Peak Pagoda mirrored in the lake that are more likely to make visitors reluctant to tear themselves away. In Beijing, the Jade Flowery Islet is to the Beihai Park what the Longevity Hill and the Western Hills are to the Summer Palace. Another outstanding example is the Slender West Lake of Yangzhou. If we sit on the Anglers' Platform to look at the Lotus Bridge (that is, the Five-Pavilion Bridge) through the archway, or at the White Pagoda through the square brick frame¹⁰, we find that both are state-of-the-art examples of "opposite view" borrowing, which combine to become the most striking hallmark of the Slender West Lake.

Nevertheless, ignoring the differences between gardens and bypassing the principle of adapting landscape gardening to the lie of the land, some wilful designers of large gardens today want to impose the plan of the West Lake of Hangzhou as the one and only prototype on all the large gardens to be created. Who knows what would become of our gardens if all of them were intractably patterned after the West Lake? The Summer Palace of Beijing is exactly a product of this waywardness. Even though some modifications have been made to break such imposed similarity, visitors who have been to the West Lake still come under the impression that some of the Summer Palace's sights are mechanically copied from its prototype.

Our forbears' use of the view-borrowing technique was not limited to the craft of gardens. In their choice of urban settlements and other sites, aside from political, economic and military factors, the landscape beyond a city wall to be depended upon and borrowed from was weighed with utmost discretion, because a friendly living environment is every prospective dweller's dream. Let me quote the *Diaries of Yuan Zhongdao* once more,

The scenery around the village is delicately charming, where dwellings cling to hills, lofts sit astride brooks, belvederes reach up to clouds, and footpaths are flanked by pines and bamboos.

How could one not be charmed by such an environment?

Yao Nai (1731-1815)¹¹ says of the city of Tai'an in "Notes on Breasting Mount Tai,"

Observed from atop the city wall in sunset glow, the Wenshui River and Mount Culai are picture-perfect, whilst misty clouds float half way up the mountain like a silk ribbon.

Spectacular this mountainous city is indeed! Along with the city of Tai'an in Shandong province, there are Guilin in Guangxi province and Huayin in Shaanxi province... and the list of picturesque mountainous cities in this country is too long to be exhausted. As the old saying goes,

Take a peep at a single spot on its skin through a tube, and one can visualize the whole leopard."

The selection of tomb sites has a great deal to do with geomancy, but did our ancients not take pains on view borrowing by bringing all factors into account? A comparison between two tombs in Nanjing, the Filial Piety Tomb of the First Ming Emperor and His Empress¹² and Dr. Sun Yat-sen's Mausoleum, is rather revealing. The former features a stairway meandering its way along the natural terrain of the Bell Mountain to the tomb, the Square City. Standing on the Square City, we find ourselves embraced by the surrounding mountains, with a range of cliffs forming a mammoth screen across the Yangtze; as we look down, the ancient imperial city presents itself before our eyes, all the while the wintry wind keeps howling but standing here, we cannot feel it at all. Indeed, there was good reason why Zhu Yuanzhang (1328-1398) moved his tomb from the Magic Valley Temple on the southeast slope of the Bell Mountain to its present site. By comparison, Dr. Sun Yat-sen's Mausoleum, when observed in the distance, is exposed starkly and shows no intention to hide itself, and its memorial hall thrusts up beyond the clouds like an imposing tower; when looked around on the spot, the surroundings are utterly bald and empty, and, with no view to be borrowed in the distance, there are no deep and serene sights to be savoured—all that is left with the complex is its lofty and solemn momentum. In the heat waves of

midsummer or the bitter cold of high winter, it is laborious for those climbing up to the great man's grave. Striking, therefore, are the differences between these two tombs to everyone who has visited them.

Now, a look at the Thirteen Ming Tombs in Changping, Beijing. Mountain-rimmed, with the Heavenly Longevity Mountain in the backdrop, the topography of this resting place for Ming-dynasty monarchs in their afterlife was chosen with unique wisdom. Talk of imperial palaces, and three complexes come to mind right away: the Epang Palace of the Qin (221-206 BC), stretching for three hundred *li* on end; the Great Light Palace of the Tang (618-907) in present-day Xi'an, facing the Zhongnan Mountain; and the Imperial Palaces of the Southern Song (1127-1279), spanning the Qiantang River and the West Lake in Hangzhou. The well-conceived view borrowing schemes of this trio are of textbook values for garden-makers today.

In a nutshell, view borrowing is a garden-making design principle that ought to be applied in light of location, seasonal change and other factors. From an aesthetical point of view, it should be flexibly used and carefully deliberated when it comes to independent buildings and the relationship between buildings and between buildings and the environment. Only thus can the overall conception of a garden design make sense and the dwellers' aesthetic demands be better satisfied.

建筑中的“借景”问题

“借景”在园林设计中，占着极重要的位置，不但设计园林要留心这一点，就是城市规划、居住建筑、公共建筑等设计，亦与它分不开。有些设计成功的园林，人入其中，翘首四顾，顿觉心旷神怡，妙处难言，一经分析，主要还是在于能巧妙地运用了“借景”的方法。这个方法，在我国古代造园中早已自发地应用了，直到明末崇祯年间，计成在他所著的《园冶》一书上总结了出来。他说：“园林巧于因借。”“因者：随基势之高下，体形之端正，碍木删桠，泉流石注，互相借资，宜亭斯亭，宜榭斯榭，不妨偏径，顿置婉转，斯谓‘精而合宜’者也。借者：园虽别内外，得景则无拘远近，晴峦耸秀，绀宇凌空，极目所至，俗则屏之，嘉则收之，不分町疃，尽为烟景，斯所谓‘巧而得体’者也。”“萧寺可以卜邻，梵音到耳；远峰偏宜借景，秀色堪餐。”“构园无格，借景有因。”“夫借景者也，如远借、邻借、仰借、俯借、应时而借”等。清初李渔《一家言》也说“取景在借”。这些话给我们后代造园者，提出了一个很重要的原则。如今就管见所及来谈谈这个问题，不妥之处，尚请读者指正。

“景”既云“借”，当然其物不在我而在他人，即化他人之物为我物，巧妙地吸收到自己的园中，增加了园林的景色。初期“借景”，大都利用天然山水。如晋代陶诗中的“采菊东篱下，悠然见南山”，其妙处在一“见”字，盖从有意无意中借得之，极自然与潇洒的情致。唐代王维有辋川别业，他说：“余别业在辋川山谷。”同时的白居易草堂，亦在匡庐山中。清代钱泳《履园丛话》“芜湖长春园”条说，该园“赭山当牖，潭水潏洄，塔影钟声，不暇应接”。皆能看出他们在园林中所欲借的景色是什么了。“借景”比较具体的，正如北宋李格非《洛阳名园记》“环溪”条所描写的：“以南望，则嵩高少室龙门大谷，层峰翠巘，毕效奇于前。”“以北望，则隋唐宫阙楼殿，千门万户，苍峤璀璨，延亘十余里。凡左太冲十余年极力而赋者，可瞥目而尽也。”“水北胡氏园”条：“如其台四望，尽百余里，而紫伊洛洛乎其间。林木苍蔚，烟云掩映，高楼曲榭，时隐时见。使画工极思不可图，而名之曰‘玩月台’。”明人徐宏祖（霞客）《滇游日记》“游罗园”条：“建一亭于外池南岸，北向临池，隔池则龙泉

寺之殿阁参差。冈上浮屠倒影波心，其地较九龙池愈高，而陂池掩映，泉源沸漾，为更奇也。”这些都是在选择造园地点时，事先作过精密的选择，即我们所谓“大处着眼”。像这种“借景”的方法，要算佛寺地点的处理最为到家。寺址十之八九处于山麓，前绕清溪，环顾四望，群山若拱，位置不但幽静，风力亦是最小，且藏而不露。至于山岚翠色，移置窗前，特其余事了，诚习佛最好的地方。正是“我见青山多妩媚，料青山见我应如是”。例如常熟兴福寺，虞山低小，然该寺所处的地点，不啻在崇山峻岭环抱之中。至于其内部，“曲径通幽处，禅房花木深”，复令人向往不已了。天台山国清寺、杭州灵隐寺、宁波天童寺等，都是如出一辙，其实例与记载不胜枚举。今日每见极好的风景区，对于建筑物的安排，很少在“借景”上用功夫，即本身建筑之所处亦不顾因地制宜，或踞山巅，或满山布屋，破坏了本区风景，更遑论他处“借景”，实在是值得考虑的事。

园林建筑首在因地制宜，计成所云“妙在因借”。当然“借景”亦因地不同，在运用上有所异，可是妙手能化平淡为神奇，反之即有极佳可借之景，亦等秋波枉送，视若无睹。试以江南园林而论，常熟诸园什九采用平冈小丘，以虞山为借景，纳园外景物于园内。无锡惠山寄畅园其法相同。北京颐和园内谐趣园即仿后者而筑，设计时在同一原则下以水及平冈曲岸为主，最重要的是利用万寿山为“借景”。于此方信古人即使摹拟，亦从大处着眼，掌握其基本精神入手。至于杭州、扬州、南京诸园，又各因山因水而异其布局与“借景”，松江、苏州、常熟、嘉兴诸园，更有“借景”园外塔影的。正如钱泳所说：“造园如作诗文，必使曲折有法”，是各尽其妙的了。

明人徐宏祖（霞客）《滇游日记》云：“北邻花红正熟，枝压墙南，红艳可爱……”以及宋人“春色满园关不住，一枝红杏出墙来”等句，是多么富于诗意的小园“借景”。这北邻的花红与一枝出墙的红杏，它给隔院人家起了多少美的境界。《园冶》又说：“若对邻氏之花，机分消息，可以招呼，收春无尽。”于此可知“借景”可以大，也可以小。计成不是说“远借”“邻借”吗？清人沈三白《浮生六记》上说：“此处仰观峰岭，俯视园亭，既旷且幽。”又是俯仰之间都有佳景。过去诗人画家虽结屋三椽，对“借景”一道，却不随意轻抛的，如“倚山为墙，临水为渠”。我觉得现在的居住区域，人家与人家之间，不妨结合实用以短垣或篱落相间，间列漏窗，垂以藤萝，“隔篱呼取”，“借景”邻宅，别饶清趣，较之

一览无余，门户相对，似乎应该好一点罢。至于清代厉鹗《东城杂记》“杭州半山园”条：“半山当庾园之半，两园相距才隔一巷耳。若登庾园北楼望之，林光岩翠，袭人襟带间，而鸟语花香，固已引人入胜。其东为华藏寺，每当黄昏人静之后，五更鸡唱之先，水韵松声，亦时与断鼓零钟相答响。”则又是一番境界了。

苏州园林大部分为封闭性，园外无可“借景”，因此园内尽量采用“对景”的办法。其实“对景”与“借景”却是一回事，“借景”即园外的“对景”。比如拙政园内的枇杷园，月门正对雪香云蔚亭，我们称之为该处极好的对景。实则雪香云蔚亭一带，如单独对枇杷园而论，是该小院佳妙的“借景”。绣绮亭在小山之上，紧倚枇杷园，登亭可以俯视短垣内整个小院，远眺可极目见山楼。这是一种小范围内做到左右前后高低互借的办法。玉兰堂及海棠春坞前的小院“借景”大园，又是能于小处见大，处境空灵的一种了；而“宜两亭”则更明言互相“借景”了。

我们今日设计园林，对于优良传统手法之一的“借景”，当然要继承并且扩大应用的，可是有些设计者往往专从园林本身平面布局的图纸上推敲，缺少到现场作实地详细的踏勘，对于借景一点，就难免会忽略过去。譬如上海高楼大厦较多，假山布置偶一不当，便不能有山林之感，两者对比之下，给人们的感觉就极不协调；假如真的要以高楼为“借景”的话，那么在设计时又须另作一番研究了。苏州马医科巷楼园，园位于土阜上，登阜四望无景可借，于是多面筑屋以蔽之。正如《园冶》所说“俗者屏之，佳者收之”的办法。沪西中山公园在这一点上，似乎较他园略高一筹，设计时在如何与市嚣隔绝上，用了一些办法。我们登其东南角土阜，极目远望，不见园外房屋，尽量避免不能借的景物，然后园内凿池垒石，方才可使游人如入山林。上海西郊公园占地较广，我以为不宜堆叠高山，因四周或远或近尚多高楼建筑。将来扩建时，如能以附近原有水塘加以组织联系，杂以蒹葭，则游人荡舟其中，仿佛迷离烟水，如入杭州西溪。园林水面一旦广阔，其效果除发挥水在园林中应有的美景外，减少尘灰实是又一重要因素。故北京圆明园、三海等莫不有辽阔的水面，并利用水的倒影、林木及建筑物，得能虚实互见，这是更为动人的“对景”了。明代《袁小修日记》云：“与宛陵吴师每同赴米友石海淀园，京师为园，所艰者水耳。此处独饶水，楼阁皆凌水，一如画舫，莲花最盛，芳艳销魂，有楼，可望西山秀色。”米万钟诗云：“更喜高楼（案指翠葆榭）明月夜，悠然把酒对西山。”此处不但形容与说明了

水在该园林中的作用，更描写了该园与颐和园一样的“借景”西山。

园林“借景”各有特色，不能强不同以为同。热河避暑山庄以环山及八大庙建筑为“借景”。南京玄武湖则以南京城与钟山为“借景”，而最突出的就是沿湖城垣的倒影，使人一望而知这是玄武湖。如今沿城筑堤，又复去了女墙，原来美妙的倒影，已不复可见了。西湖有南北二峰，湖中间以苏白二堤为其特色，而保俶、雷峰两塔的倒影，是最足使游人流连而不忘的一个突出景象。北京北海的琼华岛、颐和园的万寿山及远处的西山，又为这三处的特色。他若扬州的瘦西湖，我们若坐钓鱼台，从圆拱门中望莲花桥（五亭桥），从方砖框中望白塔，不但使人觉得此处应用了极佳的“对景”，而且最充分地表明了这是瘦西湖。如今对大规模的园林，往往在设计时忽略了各处特色，强以西湖为标准，不顾因地制宜的原则，这又有什么意义可谈？颐和园亦强拟西湖，虽然相同中亦寓有不同，然游过西湖者到此，总不免有仿造风景之感。

我们祖先对“借景”的应用，不仅在造园方面，而且在城市地区的选择上，除政治、经济、军事等其他因素外，对于城郭外山水的因借，亦是经过十分慎重的考虑的，因为广大人民所居住的区域，谁都想有一个好的环境。《袁小修日记》：“沿村山水清丽，人家第宅枕山中，危楼跨水，高阁依云，松篁夹路。”像这样的环境，怎不令人为之神往？清代姚鼐《登泰山记》所描写的泰安城：“望晚日照城郭，汶水徂徕如画，而半山居雾若带然。”这种山麓城市的境界，又何等光景呢？是种实例甚多，如广西桂林城、陕西华阴城等，举此略见一斑。至于陵墓地点的选择，虽名为风水所关，然揆之事实，又何独不在“借景”上用过一番思考。试以南京明孝陵与中山陵作比较，前者根据钟山天然地势，逶迤曲折的墓道通到方城（墓地）。我们立方城之上，环顾山势如抱，隔江远山若屏，俯视宫城如在眼底，朔风虽烈，此处独无。故当年朱元璋迁灵谷寺而定孝陵于此，是有其道理的。反之中山陵远望则显，露而不藏，祭殿高耸势若危楼，就其地四望，又觉空而不敛，借景无从，只有崇宏庄严之气势，而无幽深邈远之景象，盛夏严冬，徒苦登临者。二者相比，身临其境者都能感觉得到的。再看北京昌平的明十三陵，乃以天寿山为背景，群山环抱，其地势之选择亦有其独到的地方。至于宫殿，若秦阿房宫之覆压三百余里，唐大明宫之面对终南山，南宋宫殿之襟带江（钱塘江）湖（西湖），在借景上都是经过一番研究的，直到今天还值得我们参考。

总之，“借景”是一个设计上的原则，而在应用上还是需要根据不同的具体情况，因地因时而有所异。设计的人须从审美的角度加以灵活应用，不但单独的建筑物须加以考虑，即建筑物与建筑物之间，建筑物与环境之间，都须经过一番思考与研究。如此，则在整体观念上必然会进一步得到提高，而对居住者美感上的要求，更会进一步得到满足了。

《同济学报》建筑版1958年第1期

COUNTRY DWELLINGS AND GARDENS

History of Chinese Ancient Architecture, First manuscript, 1958

Rural areas are home to the overwhelming majority of the labouring people who never slacken their effort to augment their lives by blanketing their homeland in greenery. This tradition furnishes a wealth of themes and prototypes for landscape and architectural garden-making. It sounds easy and simple to keep the countryside green, but if done in light of local conditions, with materials obtained locally and put to best use, it can augment the environment, blend dwellings into nature, and bring about forest belts where man-made and natural scenery become one. This tradition is particularly pronounced in the Jiangnan area, where the landscape is typified by a tiny bridge sitting on a flowing brook and green bamboos casting shadows that sway upon white-washed walls. To summarize and study these practices and seek improvement on the basis of scientific analyses will do a great deal of good for endeavours to ameliorate our living environment, boost production, and promote the craft of gardens in urban areas.

Because the southern and northern parts of our vast homeland differ in geography and climate, especially between mountainous areas and plains, they must be dealt with differently in our forestation effort. Most mountain folks grow trees on the right, left and back sides of homes situated mostly in a mountain or at the foot of a cliff. Mao Zedong's former residence in Shaoshanchong village, Xiangtan county, is such a good example. Most villages on the plains are found by the side of a river or road; most of them are surrounded with trees, but more trees are found on the northwest side to ward off the scorching sun and high wind. The same is true with houses. A clearance is reserved in front of every house for sunning or thrashing harvested

farm crops, and a line of trees are planted in the front for demarcation purposes. Tall trees are planted north of the houses, but in the Jiangnan area they are replaced with bamboos which can also provide shade and bring in cool breezes in summer. Chickens love to nest in bamboo groves and feed on the insects that abound in bamboo roots, and their hyperactive claws can loosen the soil to facilitate bamboos' growth—the mingling of bamboos and chickens at a homestead is, indeed, a winning situation. Roads tucked away under the canopy-like foliage of trees, and weeping willows rippling every water surface with soft twigs offer idyllic views. Every tree or bamboo planted in the countryside has its own functional and aesthetic values. In the Jiangnan area evergreen and deciduous trees are often aligned in alternate rows, but there are also places where only a single species of arbor is planted for both its fruit and timber, such as chestnut, tallow and

chinaberry trees. Hardwood trees such as wingceltis and photinia, and trees that produce quality timber, such as ginkgo and Chinese little-leaf box, are not uncommon as well. These trees are pruned and intermediately felled on an annual basis, with the timber thus harvested to make farm tools and furniture. Native species such as camphor in south Zhejiang, banyans in south Fujian, and poplars and pagoda trees in north China have long been afforestation "trademarks" for their respective areas because their thick foliage provides cozy shelter against the high-noon sun and their exuberant verdure graces many a garden. Oftentimes hedgerows built of evergreen scrubs are erected where a wall is needed around a dwelling.

Bamboo groves and fruit trees growing by the side of a residence also help boost farm produce. Trees can be planted on river or pond shores for productive purposes, as exemplified by the Lichee Bay of Guangzhou in Guangdong province. Reed, water caltrop and lotus are also raised in ponds and lagoons such as the South Lake of Jiaying and the lotus ponds of Nantang to augment villager earnings. These undertakings have a direct or indirect impact on garden-making as

well. Flowers and trees serving gardening purposes are somewhat alien to nature for their poses and contours but enjoy an intimate affinity with rural dwellings. This is especially true with hardwood trees; pruned at regular intervals, they add an idyllic touch to the country scene. Landscape paintings, such as "Willow-Shaded Winding Walkway," "Secluded Parasol-and-Bamboo Pavilion," "Lotus-Scented Breeze from Four Sides," may well have been inspired by or derived from rural forestation and greening efforts—they are tiny, but practical sceneries brought about through such attempts.

The bridges in traditional Chinese gardens are often balustraded on one side and left open on the other, to the bewilderment of many observers. This arrangement is actually adapted to everyday rural life. When a peasant crosses a bridge with a load on both ends of his shoulder pole, or with a buffalo in tow, his movement is likely to be hampered if the bridge is narrow, and, worse, balustraded on both sides. This is why many rural bridges have no balustrades at all or have a balustrade on just one side. In what is a typical case of someone being well-read but having a poor memory of his ancestors' way of doing things, garden crafters of later generations often forget this simple reason and turn a small bridge into a narrow lane by sandwiching it between tall railings.

Bridges, be they fashioned out of a single board astride a rivulet, stepping stones embedded in a crystal clear stream, or zigzagging ones that span a relatively wide river, come in a myriad of shapes and designs that are captivating to those who happened to be there when nearby mountains are bathed in sunset glow, the skies disappear into the aromatic verdure on the horizon, and fishing boats come home with fishermen chanting. A waterside pavilion ought to be decorated with a tiny path, with tall trees planted to the northwest to keep off the sun, so that the sceneries high and low can set off each other and their silhouettes can wreak up a picture-perfect havoc in the water—sayings like "A pavilion settled beside water" and "A small trail poised to twist and turn" are most probably originated therein. A winding

sand embankment, or a tiny slope dipping into a wild pool never fails to become a prototype in the eyes of a landscape gardener, for they come handy to call forth natural delights. The Humble Administrator's Garden abounded in such casual delights in its old days, but many of them have been lost to the stone embankments built lately. A garden crafter unfamiliar with country sceneries tends to plunge headlong into vulgarities like someone who has just hit a windfall. Worse, some ponds have had their bottoms paved with mosaic tiles, and therefore look like swimming pools.

Rural architecture delights and enchants people by dint of terrains running up and down, sceneries now widely scattered, now thickly clustered, buildings laid out in layered depth, trees kept close by or at a distance, colors light or rich, black or white contrasting each other (such as white-washed walls against black roof tiles in the Jiangnan area), and country dwellings that come in a hundred and one styles—these and other vistas bring about a montage that I find most endearing, delighting and consoling on my journeys by boat or by car. These sceneries, however, cannot do without buildings. Wherever there are buildings there is life, and wherever there is life there are people. When people are associated with sceneries, their feelings interflow with what meets their eyes. Most traditional gardens in China draw on country scenes and sights, but they are not mere imitations of nature, for buildings always come foremost on their premises. As most garden builders hail from the countryside and love to instill their experience in rural life into what they are working on, this has resulted in distinctly unique gardens in which people can sit down to forget worldly worries for some time or see what they can as they saunter through such a garden. Congeniality is fostered between people and garden this way.

The countryside teems with quiet bamboos and fabulous woods, in which wild birds and poultry warble or chuckle in contentment. When spring sets in and water becomes warm, the rivers are seething with geese and ducks swimming imperturbably to and fro in flocks—a

view that also materializes at many a "Pavilion for Birds Flying In" in gardens. The pity is that most of the zoos today are built according to out-dated blueprints, and thus in most of them birds are shut up in large cages like prisoners craning their necks behind bars. Lack of experience in life and compassion is to blame for such cruel treatment of man's winged friends.

村居与园林

我国广大劳动人民居住的绝大部分地区——农村，在居住的所在，历来都进行了绿化，以丰富自己的生活。这种绿化又为我国园林建筑所取材与模仿。农村绿化看上去虽然比较简单，然在“因地制宜”“就地取材”“因材致用”这三个基本原则指导之下，能使环境丰富多彩，居住部分与自然组合在一起，成为一个人工与天然相配合的绿化地带。这在小桥流水、竹影粉墙的江南更显得突出。这些实是我们今日应该总结与学习的地方。在原有基础上加以科学分析和改进提高，将对今后改良居住环境与增加生产，以及供城市造园借鉴，都有莫大好处。

我国幅员辽阔，地理气候南北都有所不同，因而在绿化上，也有山区与平原之分。山区的居民，其建筑地点大都依山傍岩，其住宅左右背后，皆环以树木，毛泽东主席的湘潭韶山冲故居，即是一个好例。至于平原地带村落，大都建筑在沿河流或路旁，其绿化原则，亦大都有树木环绕，尤其注意西北方向，用以挡烈日防风。住宅之旁亦有同样措施。宅前必留出一块广场，以作晒农作物之用。广场之前又植树一行，自划成区。宅北植高树，江南则栽竹，既蔽荫又迎风。鸡喜居竹林，因为竹根部多小虫可食，且竹林之根要松，经鸡的活动，有助竹的生长，两全其美。宅外的通道，皆芳树垂荫，春柳拂水，都是极妙的画图。这些绿化都以功能结合美观。在江南每以常绿树与落叶树互相间隔，亦有以一种乔木单植的，如栗树、乌桕、楝树，这些树除果实可利用外，其材亦可利用。硬木如檀树、石楠，佳材如银杏、黄杨，都是经常见到的。以上品种每年修枝与抽伐，所得可用以制造农具与家具。至于浙江以南农村的樟树，福建以南农村的榕树，华北的杨树、槐树，更显午荫嘉树清园，翠盖若棚，皆为一地绿化特征。利用常绿矮树作为绿篱，绕屋代墙。宅旁之竹林与果树，在生产上也起作用。在河旁溪边栽树，也结合生产，如广州荔枝湾就是在这原则下形成的。池塘港湾植以芦苇，或布菱荷，如嘉兴的南湖，南塘的莲塘，皆为此种栽植之突出者。这些都直接或间接影响到造园。虽然园林花木以姿态为主，与大自然有别，却与农村村居为近，且经修剪，硬木树尤为入画。因此如“柳荫路曲”“梧竹幽居”“荷风四面”等命题的风景画，未始不从农村绿化中得到启发的，不过

再经过概括提炼，以少胜多，具体而微而已。

对于古代园林中的桥常用一面阑干，很多人不解。此实仿自农村者。农村桥农民要挑担经过，如果两面用阑干，妨碍担行，如牵牛过桥，更感难行，因此农村之桥，无阑干则可，有栏亦多一面。后之造园者未明此理，即小桥亦两面高阑干，宛若夹弄，这未免“数典忘祖”了。至于小流架板桥，清溪点步石，稍阔之河，曲桥几折，皆委婉多姿，尤其是在山映斜阳、天连芳草、渔舟唱晚之际，人行桥上，极为动人。水边之亭，缀以小径，其西北必植高树，作蔽阳之用，而高低掩映，倒影参错，所谓“水边安亭”“径欲曲”者，于此得之。至于曲岸回沙，野塘小坡，别具野趣，更为造园家蓝本所自。苏州拙政园原多逸趣，今则尽砌石岸，顿异前观。造园家不熟悉农村景物，必导致伧俗如暴发户。今更有以“马赛克”贴池间者，无异游泳池了。

农村建筑妙在地形有高低，景物有疏密，建筑有层次，树木有远近，色彩有深浅，黑白有对比（江南粉墙黑瓦）等，千万村居无一处相雷同，舟行也好，车行也好，十分亲切，观之不尽，我在旅途中，它予我以最大的愉快与安慰。这些景物中有建筑，有了建筑必有生活，有生活必有人，人与景联系起来，所谓情景交融。我国古代园林，大部分的摹拟自农村景物，而又不是纯仿大自然，所以建筑物占主要地位。造园工人又大部分来自农村，有体会，便形成可坐可留，可游可看，可听可想，别具一格的中国园林。它紧紧地与人结合了起来。

农村多幽竹嘉林，鸣禽自得，春江水暖，鹅鸭成群，来往自若，不避人们。因此在园林中建造“来禽馆”，亦寓此意。可惜今日在设计动物园时，多数给禽鸟饱受铁窗风味，入园如探牢，这也是较原始的设计方法。没有生活，没有感情，不免有些粗暴吧！

1958年《中国古代建筑史初稿》

陈从周生平 CHEN CONGZHOU TIMELINE

此生平系根据乐峰所著《陈从周传》编纂而成。

This timeline is written based on Yue Feng's *Chen Congzhou's Life*.

陈从周，浙江杭州人。别名梓室、梓翁，同济大学教授，中国闻名的建筑学家、园林艺术家。他是我国继明朝计成、文震亨，清朝李渔之后，现当代既能亲自动手造园、复园，又能著书立说、品评、记述中国园林的第一人。

Chen Congzhou (1918-2000), sobriquets Man from Carpenter's Studio and Elderly Carpenter, a native of Hangzhou, Zhejiang province, a Tongji University professor of architecture, a leading Chinese garden historian of his generation, as well as a practicing landscape architect. Following in the steps of Ji Cheng (1582-c. 1642) and Wen Zhenheng (1585-1645) of the Ming and Li Yu (1611-1680) of the Qing, he was the only man in modern China who could make gardens and restore old ones with his own hands while writing books to appreciate and comment on Chinese gardens.

1918

11月27日出生于浙江省杭州市。童年时期即喜欢养花种草、叠石理水，喜爱绘画，喜背古诗。

November 27, birth of Chen Congzhou, Hangzhou, Zhejiang province, the beginning of a boyhood in which he learns poetry, painting, and landscape gardening.

1938

入之江大学文学系中国语文学科。诗词师承夏承焘教授。

Enrolls in Hangchow University School of Literature to study

Chinese and classical poetry under Professor Xia Chengtao (1900-1986), a founding father of modern studies of classical lyrical poetry.

1942

毕业后，受聘于杭州市立师范学校。

Graduates from Hangchow University School of Literature with a B.A. and starts teaching in the Hangzhou Normal College.

1943

与海宁蒋定结婚，为徐志摩姻兄妹。徐志摩堂姐亦为陈从周二嫂。得悉志摩轶事，开始了对徐志摩的钻研。

Marries Jiang Ding (?-1986) from a distinguished family in Haining, Zhejiang province. Begins researches of Xu Zhimo (1897-1931), a prominent modern Chinese poet who is his wife's cousin and whose elder uncle's daughter is Chen's second elder brother's wife.

1944

长女陈胜吾出生。省立杭州中学任教，杭州市立中学任教。

Birth of his elder daughter, Chen Shengwu. Teaches at the Provincial Hangzhou Senior Middle School and the Hangzhou Municipal Middle School.

1946

儿子陈丰出生。圣约翰大学附中任教。张大千收其为入室弟子。

Birth of his son, Chen Feng. Teaches at the High School Affiliated to Saint John's University in Shanghai. Apprenticed to Chang Dai-chien (1899-1983) the celebrated traditional Chinese and modern impressionist and expressionist painter.

1948

于上海举办个人画展，以《一丝柳一寸柔情》蜚声海上画坛。

Debuts in Shanghai as a fledgling figure, landscape and floral painter at a personal retrospective which features the painting *A Wisp of Willow, an Inch of Tenderness*, among others.

1949

发表处女作《徐志摩年谱》，成为当今研究徐志摩和中国现代文学史的宝贵资料。《陈从周画集》刊印。

Publishes the first book of his life, *A Chronology of the Life of Xu Zhimo*, which remains to this day an indispensable source for studies of the poet and modern Chinese literary history. His album *The Paintings of Chen Congzhou* is published.

1950

任苏州美术专科学校副教授，教授中国美术史，结识古建筑专家刘敦桢教授，开始古建筑生涯。同年秋，执教于圣约翰大学建筑系，正式教授中国建筑史。

Appointed as associate professor in Chinese art history by the Suzhou Fine Arts Academy, where he comes under the tutorage of Liu Dunzhen (1897-1968), a preeminent professor of classical Chinese architecture. When the new academic year begins in September, he is already a full-time professor of Chinese architecture history at Saint John's University Department of Architecture in Shanghai.

1951

受聘于之江大学建筑系，兼课于苏南工业专科学校，课余开始了苏州古建筑、古园林以及诸多名人故居的考察。

Becomes an associate professor of architecture with the Hangchow University Department of Architecture in Shanghai and an associate professor with the South Jiangsu Industrial School of Suzhou, where in his spare time he begins fieldwork on ancient buildings, garden architecture and mansions.

1952

小女陈馨出生。院系调整，执教于同济大学建筑系，受黄作燊副主任之托筹建建筑历史教研室。

Birth of his younger daughter Chen Xin. Begins his lifelong tenure as a professor with the newly established Tongji University Department of Architecture, where he prepares for the establishment of an architecture history teaching and research office at the request of Associate Dean Huang Zuoshen (1915-1975).

1953

师从我国古建筑研究鼻祖朱启钤先生。与刘敦桢先生结伴至曲阜，对孔庙作详细的勘察与考证。《漏窗》出版。

Apprenticed to Zhu Qiqian (1872-1964), a prominent expert in ancient Chinese architecture and creator of the Society for the Study of Chinese Architecture. Goes on a surveying tour of the Confucian Temple, Qufu, with Liu Dunzhen. His book *Latticed Windows* is published.

1954

《文物参考资料》杂志上发表了第一篇有关古建筑考察专文——吴县洞庭东山杨湾庙。勘察虎丘塔，揭开了虎丘塔的结构之谜，成为太平天国之后第一登塔人。参与上海龙华塔复原修缮。

The journal *Cultural Artifacts Reference*, issue No. 3, carries "The Main Hall of the Yangwan Temple in the East Dongting Mountain in Wuxian County," his first ever essay on traditional Chinese architecture. Becomes the first man since the fall of the Heavenly Kingdom Uprising (1851-1864) to climb atop the Pagoda of the Tiger Hill to draw the structure of its dilapidated top while leading a team of architecture students for cartographic survey practice in Suzhou. Participates in refurbishing the Dragon Luster Pagoda in Shanghai.

1956

代表作《苏州园林》问世，提出了“江南园林甲天下，苏州园林甲江南”的论断，抓住了苏州园林的本质特征——文人园林的诗情画意，总结归纳了中国园林造园手法，诸如借景、屏障、对景等。

The release of his landmark book Suzhou Gardens, written by incorporating his students' cartographic survey and research results in 1954-1956, in which he summarizes such Chinese garden-making techniques as view borrowing, view screening and opposite views, and asserts that the Jiangnan region boasts the best gardens in the world, but it is Suzhou that offers the best Jiangnan gardens that exude poetic allusions and picturesque appeals.

1957

参与指导上海豫园修复工程，发现豫园原配门额。《上海的豫园与内园》发表。

Participates in restoring a part of the Gratification Garden in Shanghai, and discovers the original lintel of the garden's front gate. Publishes "Gratification Garden, Inner Garden, Shanghai."

1958

《苏州旧住宅参考图录》出版。批判营造学社，梁思成说：“我反对拆北京城墙，他反对拆苏州城墙，应该同受到批判。”返沪后同济大学建筑系将其撤职。继续勘察无锡、扬州等地。《建筑中的“借景”问题》《村居与园林》《西湖园林风格漫谈》发表。

Publishes Pictorial References to Traditional Dwellings in Suzhou at a Beijing Academy of Architecture symposium. Liang Sicheng (1901-1972), who is being criticized at a Beijing meeting as the representative of the Society for the Study of Chinese Architecture, says, "I was opposed to dismantling Beijing's city walls, and Chen Congzhou, who is with us here, was opposed to tearing down Suzhou's city walls. Thus both of us ought to be criticized together." Removed, upon returning from Beijing to

Shanghai, from his position as director of the teaching and research office of the Tongji University Department of Architecture. Undeterred, he goes on with his studies as usual, and extends his researches from Suzhou to Wuxi and Yangzhou. Publishes "View Borrowing in Garden Architecture," "Country Dwellings and Gardens" and "West Lake Gardens, Hangzhou."

1959

于北京旧香山饭店编写《中国建筑史》。

Compiles Chinese Architecture History in the former Fragrant Hill Hotel, Beijing.

1960

参与指导嘉定孔庙、松江佘山秀道者塔的修复、设计工作。赴浙江勘察古建筑，发现安澜园遗址。

Participates in restoring the Confucian Temple of Jiading, and the Taoist Xiu's Pagoda on the Sheshan Mountain of Songjiang. Discovers the former site of the Billow-Tranquilizing Garden on an inspection tour in Zhejiang province.

1962

勘察扬州园林，发现并考证了石涛唯一存世的叠石作品片石山房。

《瘦西湖漫谈》《扬州片石山房》发表。

Identifies, during a survey of traditional Chinese gardens in Yangzhou, the Small-Rock Mountain Abode as the singular surviving rockwork left behind by the celebrated monk painter Shitao (1642-c. 1707). Publishes "Slender West Lake" and "Small-Rock Mountain Abode."

1963

获硕士导师资格。与梁思成同赴扬州，参与鉴真纪念堂的设计。

《绍兴的沈园与春波桥》发表。

Appointed as a mentor for master's degree candidates. Assists

Liang Sicheng in designing the Memorial Hall of Ganjin (688-763) for the Daming Temple, Yangzhou. Publishes "Shen's Garden, Vernal Waves Bridge, Shaoxing."

1965

受陆小曼临终嘱托，后将《志摩全集》排印样本送回徐家，陆的山水长卷转交浙江省博物馆。

Acting on Lu Xiaoman's (1903-1965) deathbed entrustment, transfers the proofs of the Collected Works of Xu Zhimo to the Xus' and one of her long scroll landscape paintings to the safety of the Zhejiang Provincial Museum.

1971

皖南干校劳动改造。其间依然对歙县民居、古建筑进行勘察、研究。

Sent to the university's May 7th Cadres' School in Shexian county, south Anhui, for "reeducation" through manual labor, which gives him opportunities to explore local traditional dwellings and architecture.

1972

梁思成去世，抱病徒步翻山越岭到县城发唁电。因胃出血结束干校生活，恢复同济大学教授职位。参与连云港海清寺塔修理工程。

Death of Liang Sicheng. Hikes, in spite of bad health, along a mountain footpath from the May 7th Cadre's School to a post office at the county seat and telegraphs a letter of condolence to the bereaved Liang family. Stricken with gastrorrhagia and released from the cadre's school because of it. Restored to professorship at Tongji University. Joins in restoring the pagoda of the Haiqing Temple in Lianyungang, Jiangsu province.

1973

勘察山东、江苏古建筑。为保存聊城明初光岳楼大木结构作出重要

贡献。

Goes on fieldwork tours of Shandong and Jiangsu provinces, where he inspects quite a few ancient buildings. Plays a major part in saving the timber frame of the Tower That Illuminates Mount Tai of the early Ming in Liaocheng during a study tour of Shandong province.

1974

勘查安徽古建筑。

Inspects ancient architectural structures during a tour of Anhui province.

1975

赴湘西、长沙勘察古建筑。艰难困苦下著述《梓室余墨》四十余万字，详细记述了一生中的交往、研究、各地山川风光、民俗、民情、遗闻轶事。

Goes on ancient architecture surveys in Changsha and other parts of Hu'nan province. Finishes writing the Remnant Ink from Carpenter's Studio, a 400,000-word book of close to 500 sketches, travelogues, and random notes that elaborate in a humorous and anecdotal way on friendship, research work, and gardens, sceneries and folkways of the places he has visited through the years.

1976

《苏州网师园》发表。

Publishes "Master-of-Fishnets Garden, Suzhou."

1977

与贝聿铭先生在上海见面。

Meets the venerable Ieoh Ming Pei for the first time in Shanghai.

1978

《说园》发表，与其后四篇奠定了他20世纪园林之父的地位，前后出版英语、日语、德语、法语、意大利语译本。将网师园殿春簃模制，输出至美国纽约大都会博物馆，即明轩。贝聿铭雅嘱他写就长卷水墨丹青《名园青霄图卷》，复请国内文化耆宿、书法名家题咏，现存纽约贝氏园，成为一件极为珍贵的书画名品。

The first installment of his "On Gardens" is carried in the architecture edition of the *Tongji University Journal*, issue No. 2. This, together with the four other installments to be released and translated into English, Japanese, German, French and Italian in the next few years, is to establish him as father of traditional Chinese gardens in the 20th century. The Astor Court, a replica of the Late-Spring Peony Lodge of Suzhou's Master-of-Fishnets Garden, comes under construction in the Metropolitan Museum of Art in New York City. Completes the long scroll painting, *A Famous Garden Under Blue Sky*, at the request of Ieoh Ming Pei, who has had colophons inscribed on its margins and collects it in the Pei's Garden in New York.

1979

《苏州沧浪亭》《恭王府小记》发表。

Publishes "Dark Blue Waves Pavilion, Suzhou" and "Notes on Prince Gong's Mansion."

1980

倡导重建杭州雷峰塔。写信给山西平遥县政府，要求保护好平遥古城。到处演讲报告，所到之处极受领导、群众的欢迎和接待。

Submits a proposal for the reconstruction of the Lei's Peak Pagoda in Hangzhou. Writes to the government of Pingyao county, Shanxi province, with a demand for the conservation of the ancient city of Pingyao. Goes on lecturing tours across the country, to the delight of local officials and commoners alike.

1981

《园林美与昆曲美》发表。

Publishes "Gardens and Kunqu Opera: Beauty's Tour de Force."

1982

主持绍兴应天塔修复工作。《苏州园林》日语版出版。《园林与山水画》发表。

Presides over the design for the restoration of the Pagoda in Communion With Heaven in Shaoxing, Zhejiang. The release of the Japanese edition of his *Suzhou Gardens* in Tokyo, Japan. Publishes "Gardens and Landscape Painting."

1983

勘察苏州周庄古建筑。针对全国旅游热、修复名胜古迹热，提出口号：还我自然！绿化为文化服务。绿化在先，造园第二。创建绿文化等。针对一切向钱看的现象，宣称，“梓翁画图不要钱。”主持占鳌塔修复工作。指导修复豫园东部，营建天一阁东园。《扬州园林》出版。

Inspects the ancient village of Zhouzhuang to the southeast of Suzhou. Raises a series of slogans to address the nation's booming tourism and rush to restore famous scenic spots and historical sites: Bring nature back! Cater tourism to cultural edification! Afforestation first, garden-making second! Foster a green culture! Demurring at the widespread "money-first" mentality, he declares, "I won't ask for a penny from anyone who wants my paintings." Chairs a restoration plan for the Turtle Subduing Pagoda on an observational deck by the Qiantang River in Haining. Helps restore the eastern part of the Gratification Garden of Shanghai and construct the East Garden to the east of the Tianyige Library in Ningbo, Zhejiang province. The release of his book, *Yangzhou Gardens*, a crystallization of twenty years of hard work, by the Shanghai Scientific and Technical Publishers.

1985

受聘为美国贝聿铭建筑设计事务所顾问。

Appointed by Ieoh Ming Pei as a consultant for M. Pei & Partners, USA.

1986

《绍兴石桥》出版。5月27日蒋定去世，安葬于海盐南北湖。参加日本建筑学会百年纪念。

Publishes the book *Stone Bridges of Shaoxing*. Jiang Ding, his wife of more than forty years, passes away on May 27; her ashes are buried at the South-and-North Lakes in Haiyan, Zhejiang province. In autumn, attends a meeting in Tokyo to mark the centennial of the founding of the Japanese Architectural Institute.

1987

豫园东部竣工，成为上海招待国宾最佳处所之一。11月29日，独子陈丰在洛杉矶遇刺身亡。

Completion of the eastern part of the Gratification Garden, thereby turning it into the best place to be for foreign guests. On November 29, his son, Chen Feng, is murdered in a restaurant in Los Angeles.

1988

修复豫园东部古戏台，增建看廊。忍受着丧妻失子之痛，通过媒体和政府部门奔走呼号，阻止当地人滥采山石、大肆捕鸟，成功拯救南北湖风光。《上海近代建筑史稿》出版。

Has an old Kunqu Opera stage restored in the eastern part of the Gratification Garden, and attaches an audience hall to it. To save the picture-perfect scenic South-and-North Lakes from the perils of wonton quarrying and bird killing, he overcomes personal agony over the deaths in his family and single-handedly stems the abuse through local media and by lobbying with local government departments. Publishes *A Manuscript of Modern Architecture History of Shanghai*.

1989

天一阁东园落成。获日本园林学会海外名誉会员称号。筹划重建水绘园。常年辛劳兼亲人逝世，严重损害健康。驱车八小时赴苏北考察，中风，送上海医院救治。

Completion of the East Garden to the east of the Tianyige Library. Becomes an honorary member of the Japanese Institute of Landscape Architecture. Plans the reconstruction of the Water-Rimmed Garden in Rugao, Jiangsu province. Long years of hard work, coupled with the deaths of dear ones, takes a heavy toll upon the professor's health. In the wake of an eight-hour drive to north Jiangsu for an inspection visit, he suffers a stroke, is rushed in time to hospital in Shanghai, and cured.

1990

商务印书馆（香港）有限公司出版《中国名园》，全书用诗词一般的语言描述了各地园林之精华。

The Commercial Press (Hong Kong) publishes his book (Chinese version), *Famous Chinese Gardens*, in which he is at his narrative and poetic best as he describes some of the best gardens in the country.

1991

看到《中国环境报》2月26日有关南北湖遭受新一轮炸山捕鸟的报道，上书江泽民主席，“敬恳泽公开恩，救救南北湖！”再次成功拯救景区。设计营造的昆明楠园竣工，自评道，“纽约的明轩，是有所新意的模仿；豫园东部是有所寓新的续笔，而安宁的楠园，则是平地起家，独自设计的，是我国园林理论的具体体现。”《书边人语》由商务印书馆（香港）有限公司出版。《同里退思园》发表。

Upon reading in the newspaper *China Environment News* on February 26 that the South-and-North Lakes are suffering another bout of detonations of mountains and killing of birds, he stops it once again, this time by writing directly to President Jiang Zemin,

"Show mercy, Your Most Beneficent Excellency, and do something to save the South-and-North Lakes!" In autumn, the Phoebe Nanmu Garden he has built in Anning, Yunnan province, is completed. An emotional Chen comments, "The Astor Court I built in New York is a replica with a new conception, the eastern section of the Gratification Garden I restored is a sequel to the original with another creative idea of mine, whereas the Phoebe Nanmu Garden I built from scratch is an epitome of my garden-making theory." In winter, his *A Man's Utterings by the Side of Books* is released by the Commercial Press, Hong Kong. Publishes "Retreat and Reflection Garden, Tongli."

1992

为保护徐光启九间楼过于激动，引发脑出血兼胃出血。七日七夜不吃不喝，瑞金医院（发了两次病危通知）努力保住了生命。余生卧病不起。

Comes down with cerebral haemorrhage complicated by gastrorrhagia in Shanghai, while arguing vehemently during a meeting to protect the Nine-Bay Storied Building, the former residence of Xu Guangqi (1562-1633), a celebrated official and scientist of the Ming. Spends seven days and seven nights in bed without eating, with two critical condition notices issued, before Ruijin Hospital doctors manage to save his life. Stays bed-ridden for the rest of his years.

1994

收官之作如皋水绘园重建竣工。

Reconstruction of the Water-Rimmed Garden, Rugao, Zhejiang province, completed.

1995

复发得救，思维依然敏捷。

Cured of a recurrence, and remains nimble minded.

1998

南北湖提议在当地建立陈从周纪念馆。

Local authorities of the South-and-North Lakes submit a proposal to build a memorial hall dedicated to Chen Congzhou.

1999

9月7日，贝聿铭专程从美国来沪到梓室探望。执手相看，久久不忍离去。

September 7, the 83-year-old Ieoh Ming Pei arrives in Shanghai from the United States, knocks at the door of Chen Congzhou's home at dusk, and, upon entering the room, sits hand in hand with his bed-ridden friend for what seems an eternity, before letting go of his wrist and rising to bid him good-bye.

2000

3月15日3时23分53秒，于住处逝世，享年82岁。

3:23 am, March 15, at home, breathes his last at age 82.

2001

陈从周艺术馆落成，亦名“梓园”，隐于南北湖畔的院落里，风景如画。5月7日，骨灰从上海运抵此处。

The Memorial Art Gallery of Chen Congzhou is completed. Also known as "An Elderly Carpenter's Garden," the building is nestled in a lush bamboo grove inside of a courtyard by the paradise-like South-and-North Lakes. On May 7, the urn containing the late professor's ashes is flown from Shanghai and entombed at the foot of his statue at the western flank of the garden.

Notes from the Translator 译者絮语

1

As commercial numbers among Chinese folks, the symbols 丨, 𠄎, 𠄎, 𠄎, 𠄎, 𠄎, 𠄎, 𠄎, 𠄎, 𠄎 stand for the Arabian numbers respectively from 1 to 10. It is put as 𠄎 𠄎 for two *dou* and four *sheng* in weight and 𠄎 𠄎 for three *chi* and four *cun* in length. It is particularly convenient to use this system of symbols in vertical account books and for algebraic expression.

中国民间商业计数，以丨，𠄎，𠄎，𠄎，𠄎，𠄎，𠄎，𠄎，𠄎，𠄎代表阿拉伯数字1到10。两斗四升记作𠄎 𠄎，三尺四寸记作𠄎 𠄎。以此符号用于竖写账簿和代数式都很简便。

3

The classic was written by Yu Hao, an architect active during the period that spanned the late Five Dynasties period (907-960) and the Northern Song (960-1127).

《木经》喻皓所撰。喻皓为五代末北宋初人。

Suzhou Gardens: An Overview 苏州园林概述

1

王应麟，字伯厚，号深宁居士，南宋三朝元老。著述颇丰，计有二十余种，六百多卷。所撰《玉海》二百卷，囊括当时科举考试所需的各类知识。最为人知的却是蒙学著作《三字经》。

Wang Yinglin (1223-1296), style name Bohou, sobriquet Recluse of Shennings, a high official whose service covered three emperors of the Southern Song and a scholar and polymath whose writings amount to six hundred volumes on twenty or so fields. His *The Sea of Jade*, a major encyclopaedia on topics ranging from classics and history to astronomy and geography, amounts to two hundred volumes, but he is best known as the author of "Three Character Classic," a popular children's primer.

2

豨韦，黄帝前的古帝，建都于今河南滑县。《庄子·知北游》：豨韦之囿……

Xiwei, a ruler who lived earlier than the Yellow Emperor, with what is presentday Huaxian county in Henan province as the capital of his territory. *Zhuangzi* ("Knowledge Wandered North"):

"But Xiwei had his own park..."

3

黄帝，即轩辕，中华民族的祖先，贵为五帝之首。据《史记》，其他四帝为颡顼、帝喾、尧、舜。《庄子知北游》：.....黄帝之圃.....

Yellow Emperor (2717-2599 BC), also Xuanyuan, the ancestor of the Chinese people and the first of the Five August Emperors along with Zhuanxu (4946-4849 BC), Ku (3331-3266 BC), Yao (2377-2259 BC) and Shun (2172-2089 BC) prior to the Xia, according to *Record of the Great Historian. Zhuangzi* ("Knowledge Wandered North"): "...the Yellow Emperor's garden..."

4

周文王，周武王之父，商时封西伯。追谥为西周第一任君王。

King Wen of Zhou (1152-1050 BC) was Western Earl of the Shang and father of King Wu (c. 1087-1043 BC), the first monarch of the Western Zhou posthumously(1046-771 BC).

5

秦始皇嬴政，秦朝第一位皇帝，秦朝是中国历史上第一个中央集权的封建帝国。

Qinshihuang (in reign 246-210 BC), or Ying Zheng (259-210 BC), is the founding emperor of the Qin, the first centralized feudal empire in Chinese history.

6

汉武帝刘彻，西汉第七位皇帝，将汉王朝打造成当时最强大的帝国。

Emperor Wu of Han (in reign 141-87 BC), or Liu Che (156-87 BC), is the seventh emperor, who built the Han into the most powerful country in the world at the time.

7

梁孝王刘武，汉武帝的叔叔。其兔园是当时文人雅士常相光顾的乐土。

Prince Xiao of Liang (?-144 BC), or Liu Wu, was an uncle of Emperor Wu of Han, whose Hare Garden was a pleasure ground frequented by the most famous writers of the day.

8

魏文帝曹丕，三国魏的开国皇帝，亦是杰出多产的文学家。

Emperor Wen of Wei (in reign 220-226), or Cao Pi (187-226), was a prolific, outstanding literary figure and the founder of the Kingdom of Wei of the Three Kingdoms period.

9

隋炀帝杨广，隋朝第二位皇帝，创始了科举制度。

Emperor Yang of Sui (in reign 605-618), or Yang Guang (569-618), is the second emperor of the Sui, who endorsed the imperial examination system.

10

唐懿宗李漼，唐朝倒数第四位皇帝，游宴无度。

Emperor Yizong of Tang (in reign 859-873), or Li Cui (828-873), the fourth last emperor of the dynasty notorious for his incessant outings and lavish banquets.

11

宋徽宗赵佶，北宋倒数第二位皇帝，昏君，书画成就颇高。

Emperor Huizong of Northern Song (in reign 1100-1126), or Zhao Ji (1082-1135), the last but one emperor of the Northern Song, was a total failure as a ruler in spite of his striking achievements in calligraphy and painting.

12

靖康二年，金兵攻陷汴京（今开封），北宋灭亡。十年后，赵构渡

江，偏安临安，为南宋第一位皇帝。

In 1127, the Northern Song came to an end after the invading Jurchen troops sacked its capital Bianjing in present-day Kaifeng. A decade later, Zhao Gou (1107-1187) crossed the Yangtze River and settled down in Lin'an, where he continued his Jianyan reign (1127-1130) as the first emperor of the Southern Song.

13

元世祖忽必烈，建立元朝，将中国疆域拓展至东起太平洋西到黑海，北起西伯利亚南到阿富汗的范围，占世界版图的五分之一。

Kublai Khan (1215-1294), or Emperor Shizu of Yuan (in reign 1260-1294), is the founder of the Yuan who expanded the Chinese territory from the Pacific to the Black Sea and from Siberia to what is present Afghanistan, covering one fifth of the world's inhabited land area.

14

梁冀，字伯卓，大将军梁商之子，东汉两位皇后的哥哥，冲、质、桓三帝时擅朝政。朝廷权臣，大肆敛财，广开园林，占地广阔，中有假山、山涧、野兽等。二十多年恶贯满盈，天怨人怒，终于在桓帝时自杀。

Liang Ji (?-159), style name Bozhuo, son of a general-in-chief, brother-in-law to two emperors of the Eastern Han, and regent for emperors Chong (144-145), Zhi (145-146) and Huan (146-167). Taking advantage of his high position, he amassed a staggering amount of wealth, with which he built splendid parks that covered large tracts of wooded land and contained numerous artificial mountains, precipitous mountain creeks, and wildlife. He eventually died at the hands of the third emperor after his twenty-odd years of utterly corrupted and high-handed rule ran out of control and incurred the wrath of both the court and commonality.

张伦，北魏司农。园子华丽，可媲美皇家园林。其中重岩复岭、深溪洞壑、高林巨树。悬葛垂萝、崎岖石路，有若自然。

Zhang Lun (fl. 5th century), a treasury minister of the Northern Wei whose beautiful garden rivaled the royal ones of his time, in which mountain ranges, caves, streams, forests, vines and tendrils, winding paths, and plank roads carved out of steep rocks combined to conjure up a vista very close to nature.

作者未提及茹浩为皇帝监造的这座园子。

The author did not mention the garden, of whose construction Ru Hao supervised for his emperor.

石崇，西晋诗人、权臣，巨富，曾与国舅斗富。其金谷园中假山流水、楼榭亭阁、奇花异兽、珍珠玛瑙不一而足。人与园史书皆有记载，文学作品亦多有提及。

Shi Chong (249-300), a poet and an influential official of the Western Jin who was so rich that he once beat an uncle of the emperor in a wealth competition. His Garden of Golden Valley contained hills and lakes, bridges and pavilions, beautiful plants and exotic animals, not to mention a good variety of precious stones. Both his name and garden were recorded in history books, and portrayed in literary works.

徐勉，南梁政治家、文学家，节俭正直，为官清廉，家无蓄积。

《诫子崧书》：……非在播艺以要利人，正欲穿池种树，少寄情赏……

Xu Mian (466-535), a statesman of the Southern Liang who was frugal, upright and incorruptible, having little property to himself throughout his life. In a letter to his son, Xu Song, he said that he

farmed and gardened on a small lot not for profit, but to seek personal ease of mind.

19

庾信，南北朝诗人，《哀江南赋》为其代表作。当时诗人羁留北朝，赋中表达了强烈的南归愿望，南方是他生活、出仕之地。然而北周旋即灭亡，北朝结束，归乡终成泡影。

Yu Xin (513-581), a writer of the Southern and Northern Dynasties whose literary production is represented by "Lament for the South," in which he expressed his strong wish to return to the South, where he had lived and worked, a wish which was quickly dashed with the fall of the Northern Zhou (557-581), the last one of the Northern Dynasties (386-581), where he was retained as a high official.

20

宋之问，早唐诗人，其蓝田别业后为王维所有。

Song Zhiwen (c. 656-712), an early-Tang poet whose abode at Lantian, Shaanxi province, finally came under the possession of Wang Wei.

21

王维，字摩诘，盛唐文学家、艺术家、政治家。诗书、音乐、绘画特臻其妙，后人称其为南宗山水画之祖。

Wang Wei (701-761), style name Mojie, one of the most famous men of arts and letters and statesman during the high Tang, one of the golden ages in Chinese cultural history. Popularly known as a model of humanistic education as expressed in poetry, calligraphy, music and painting, he is also established as the founder of the revered Southern school of painter-poets concerning landscape themes.

22

李德裕，晚唐诗人、宰相，其洛阳的平泉别墅建筑与山水相得益彰。

Li Deyu (787-850), a poet and prime minister of the late Tang whose Pingquan Villa in Luoyang was known for its harmony between elegant architecture and beautiful landscape.

23

白居易，字乐天，号香山居士，现实主义诗人，语言平易通俗。与李白、杜甫并称唐代三大诗人。

Bai Juyi (772-846), style name Letian, sobriquet Retired Scholar of Fragrant Hill, a great realistic poet known for his simple and easy-to-understand style, was one of the three greatest poets of the Tang together with Li Bai and Du Fu.

24

李格非，北宋文人，同里人，女词人李清照之父。

Li Gefei (c. 1045-c. 1105), a native of Tongli town and a literary figure of the Northern Song who was father of the renowned woman ci master Li Qingzhao(1084-1155).

25

富弼，北宋时封郑国公，数次出使辽国，与文彦博同时拜相。

Fu Bi (1004-1083), who became Duke of Zheng of the Northern Song in 1061, had served among other important positions as envoy to Khitan for several times, and co-prime minister with Wen Yanbo (1006-1097) in 1055.

26

周密，南宋末年画家、雅词词派领袖。其画作、诗作多描绘家乡浙江湖州的山水园林。

Zhou Mi (1232-1298), a painter who was also the leader of a refined school of lyrical poetry during the twilight years of the Southern Song. The splendid gardens and landscape of his

hometown Huzhou, Zhejiang province, were central themes in his paintings and poems.

27

万历年间，米万钟于海淀北部水泽上营此园，借景西山，利用了原有水源。米氏大多时间居于此园，另有漫园及湛园。

This garden was built by Mi Wanzhong on a marshland in north Haidian around the period 1611-1613 by borrowing the views of the Western Hills in the distance and accommodating to available water on the site. The Mis spent most of their time in this garden, but they also owned the Water-Brimmed Garden and the Crystal Garden.

28

此园在西海德胜门，即积水潭东，中有三层楼阁，四时景色各异。

Located to the east of Jishuitan neighborhood or the Western Lake at the Desheng Gate, the garden features a three-storied belvedere where the scenery changes with the seasons.

29

王世贞，明朝诗人、史学家，主张恢复秦汉散文及唐诗传统，后略有改变。张南阳为其营弇山园假山，慧眼独具，遂成精品。张南阳另一杰作是上海豫园的大假山。

Wang Shizhen (1526-1590), a poet and historian of the Ming who advocated the restoration of the Qin and Han traditions in prose writing and of Tang standards in poetry, though he changed his mind a little bit in his later years. The artificial mountain in his Yanshan Garden was built by Zhang Nanyang (c. 1517-1596), who, with a painter's discerning eye, turned the garden into a landscaping masterpiece. Zhang's another renowned work is the big artificial mountain in the Gratification Garden in Shanghai.

30

南宋士人严浚于杭州购园，名为皋园，以诫皋鱼之失。皋鱼为孔子同时代人，有三失：少而学，游诸侯以后吾亲，失之一也；高尚吾志，闲吾事君，失之二也；与友厚而中绝之，失之三也。

The Southern Song scholar-official Yan Hang (1617-1678) purchased a garden in Hangzhou and named it "Gao Yu Garden" to guard against the failures of Gao Yu, a contemporary of Confucius who was remorseful for ranking his parents behind his pursuit of studies in other countries, not serving his prince because of his own moral integrity and losing friendship midway.

31

顾辟疆，苏州望族名士。辟疆园乃史籍所载苏州第一名园。王献之……先不识主人，径往其家。值顾方集宾友酣燕，而王游历既毕，指麾好恶，旁若无人。顾勃然不堪……便驱其左右出门……然后令送著门外。

Gu Pijiang (fl. 4th century) hailed from a well-established clan in Suzhou and was a scholar-turned high official. His garden put its name on the map as the first ever built in Suzhou thanks to an uninvited visit by the celebrated Eastern Jin calligrapher Wang Xianzhi (344-386), who, upon finishing his self-guided tour of this garden, started making derogative comments on what he had just seen. A chagrined Gu Pijiang, who happened to be busy feting a horde of friends, first threw the arrogant man into a panic by driving his entourage out, and then showed him the door.

32

孝武帝司马曜，东晋倒数第三位皇帝，击败前秦，国运中兴。

Emperor Xiaowu (in reign 373-396), or Sima Yao (362-396), the third last emperor of the Eastern Jin who somehow gave his dynasty a new lease of life by vanquishing a strong foe in the north, the troops of the Former Qin (350-394).

33

朱长文，号乐圃，北宋书学理论家，博学多才，筑乐圃为藏书楼，时人以不到乐圃为耻。

Zhu Changwen (1039-1098), sobriquet Lepu (Loving Gardener), a Northern-Song theorist on ancient books and history records, and an erudite scholar who turned his garden into a great library. It was said that the celebrities of his time would consider it a shame if they had never visited his garden.

34

王唤，南宋绍兴十四年（1144年）任平江知府，清理兵燹废墟，重建家园。绍兴十五年重刊北宋李诫编著的建筑规范书《营造法式》，此书传世，王唤功不可没。

Wang Huan (fl. 12th century) became prefect of Pingjiang (present-day Suzhou) in 1144 when he began rebuilding the city from the ruins wrought by the all-powerful invading Jurchen troops. He also contributed remarkably to the preservation of *Treatise on Architectural Methods* by republishing it in 1145, an important architectural classic compiled by Li Jie (1065-1110) of the Northern Song.

35

苏舜钦，字子美，北宋诗人。沧浪亭始建于五代末期，原为皇家园林，现列入《世界遗产名录》。园名源自屈原的《渔父》：沧浪之水清兮，可以濯吾缨。沧浪之水浊兮，可以濯吾足。

Su Shunqin (1008-1048), style name Zimei, a poet of the Northern Song. The name of his Dark Blue Waves Pavilion, now a UNESCO world heritage site, built upon the former site of an imperial garden dating back to the end of the Five Dynasties period, is derived from two lines in the poem "Fisherman" by Qu Yuan (c. 340-278 BC) of the Warring States period, "If the Dark Blue Waves River is clean I wash my hat ribbon in it; If the Dark Blue Waves River is dirty I wash my muddy feet in it."

梅宣义，苏轼同僚、诗友。其在桃花坞的五亩园，遍种桃花，流水环绕，占地五亩，亦称“梅园”。

Mei Xuanyi (fl. 11th century), one of Su Shi's colleagues and poet friends. His Five-"Mu" Garden at the Peach Blossom Lowland, a scenic area of peach groves and gentle waters, is also called Plum Garden, which covers a lot of five *mu* exactly.

朱勔，因谄得官，不可一世，声名狼藉，为皇帝从苏州运送奇花异石至京城汴京。自营同乐园，园林之大，奇石之多堪称江南第一。后钦宗将其流放、斩首，园子遂夷为平地。

Zhu Mian (1075-1126), a notorious, powerful sycophant whose job was to ship exotic flowers and stones for Emperor Huizong from Suzhou up north to the capital. His own property, the Garden of Universal Joy, was said to be number one in the south for its unmatched size and immense collection of rare stones, but it was leveled to the ground soon after he was dismissed and beheaded on a later Emperor's order.

黄省曾，明朝诗人、学者，著述颇丰，内容涉及经学、史学、地理、农学等多方面。

Huang Xingzeng (1496-1561), a productive and versatile Ming poet and scholar who authored many works on Chinese classics, history, geography, agriculture, and animal husbandry.

计成，江苏省吴江县同里人，明代造园家，江南若干园林为其所造。其《园冶》是世界上第一部系统的造园专著，涉及风景、植物、建筑等方面。后人皆遵循他制定的规矩、原则，其他国家的造园也深受其影响。

Ji Cheng (1582-c. 1642), a native of Tongli town, Wujiang county

in Jiangsu province, was a Ming-dynasty garden designer and builder who had quite a few gardens in the Jiangnan area to his credit. His *The Craft of Gardens* is the world's first manual ever dedicated to landscape, horticultural and architectural gardening, and the principles and rules of the thumb laid down by him are religiously followed by gardeners in China and having a considerable impact on garden-making in other countries.

文震亨，明末画家、藏书家，亦解造园。其曾祖文徵明与沈周、唐寅、仇英并称明四家。

Wen Zhenheng (1585-1645), a painter and book collector well-versed in landscape gardening who lived in the late Ming. His great-grandfather, Wen Zhengming(1470-1559), was one of the four famous painters during the Ming, the other three being Shen Zhou (1427-1509), Tang Yin (1470-1523) and Qiu Ying (1498-1552).

张涟，字南垣，明清之际造园家，亦通画理。关于他最详尽的记载见于吴伟业（梅村）的《张南垣传》。无锡寄畅园假山为其叠石代表作。

Zhang Lian (1587-1673), style name Nanyuan, a landscape gardener in the Ming-Qing period who was also well-versed in landscape painting theories. The most detailed record of him is found in "Biography of Zhang Lian" written by Wu Weiye (1609-1672), style name Meicun. The artificial mountain in the Solace-Imbued Garden of Wuxi is one of his rockwork masterpieces.

张然，苏州著名叠山家。清顺治年间，其父张涟派其进京为皇家营西苑。

Zhang Ran (fl. 17th century), a renowned rockwork builder active in Suzhou who was dispatched by his father Zhang Lian to Peking during the Shunzhi reign(1638-1661) of the Qing for a royal mission to rebuild artificial mountains in the Western Park.

李渔，号笠翁，明末清初戏曲家、戏曲理论家、出版家、美学家。成立芥子园书铺销售自己作品，倡编《芥子园画谱》，并作序。其

时最多才多艺的文人，敢想敢干，集演员、制片人、导演、编剧于一身，常携家班巡演。

Li Yu (1611-1680), sobriquet Liweng, a playwright, drama theoretician, publisher and aesthetician of the late Ming and early Qing period who set up the Mustard Seed Garden Bookstore to sell his own books, and who initiated the compilation of the painting manual *Mustard Seed Garden Manual of Model Paintings*, which was published with his own preface. Considered to be the most versatile and enterprising literatus of his time, he was actor, producer, director and playwright combined in one, and used to travel with his own troupe.

戈裕良，江苏常州人，早年即受雇治园叠山。其所叠环秀山庄假山，现代建筑家刘敦桢评为苏州第一座湖石山。其他作品还有扬州小盘谷、常熟燕园及如皋文园假山等。

Ge Yuliang (1764-1830), a native of Changzhou, Jiangsu province, who was hired to build gardens and pile rockeries at an early age. One of his rockwork masterpieces in the Beauty-Encircled Mountain Abode is lauded by the modern architecture historian Liu Dunzhen as the first of the Lake Tai stone rockeries in Suzhou. His other rockeries are found in the Lesser Winding Gully in Yangzhou, the Homecoming Swallow Garden in Changshu, the Literary Garden in Rugao and some other gardens.

40

王献臣，明朝人，为官正直，为宦党诬陷、流放，遂对仕途心灰意冷，归隐故乡苏州。与书画家文征明过从甚密，文积极参与了拙政园的设计，并绘园景图。

After Wang Xianchen (1469-?), an upright scholar-official of the Ming was exonerated from eunuchs' frame-up charges that had sent him into exile, and he was so disenchanted and tired of officialdom that he retired to his hometown Suzhou, where he built the Humble Administrator's Garden. He associated with the brilliant painter, calligrapher and writer Wen Zhengming

(1470-1559), who was greatly involved in the making of the garden and did paintings of its scenery.

41

潘岳，西晋诗人、赋作家。妙有姿容，竟至掩盖文名，誉为天下第一美男。其《闲居赋》称“智之不足”“筑室种树、灌园鬻蔬”，此亦拙者之为政也。

Pan Yue (247-300), a poet and prose-writer and official of the Western Jin whose fabulous literary talent is often overshadowed by his looks—he is regarded as the most handsome man of China through the ages. In his poem, "Idle Life Rhapsody," he portrays himself as a slow-witted and humble administrator who contents himself with building houses, planting trees, watering gardens and growing vegetables.

42

陈之遴，海宁人，翰林编修，与徐氏为姻亲。顺治十年（1653年），2000两银子廉价购下拙政园。

Chen Zhilin (1605-1666) was grand secretary of the Hanlin Academy from Haining, and a relative by marriage to the Xus. The exact amount of money he paid for this garden in 1653 was 2,000 taels of silver.

43

吴璥，字式如，吏部尚书协办大学士。嘉庆末年购得园中部，因此亦名“吴园”。

Wu Jing (1747-1822), style name Shiru, who served as minister of civil personnel and assistant grand secretary. He bought the central part of the garden during the late years of Emperor Jiaqing's reign. For this reason the garden is also called "Wu's Garden."

44

刘敦桢，建筑家、建筑教育家、中国营造学社成员。创办我国第一所由中国人经营的建筑师事务所，从事建筑史尤其是古代中国建筑史的教育与研究，亦研究中国传统民居和园林。

Liu Dunzhen (1897-1968), an architect and educator in architecture, also a member of the Society for the Study of Chinese Architecture. The builder of the first architects' office operated by the Chinese, Liu is most known for his architecture education and studies in architecture history, traditional Chinese architecture history in particular. He was also involved in researches of traditional Chinese dwellings and gardens.

45

亭名源自《荀子·天论》：桃李倩粲于一时，时至而后杀。至于松柏，经隆冬而不凋，蒙霜雪而不变，可谓得其真矣。

The name of this pavilion is attributed to Xunzi ("Discourse on Heavens"): "The peach and plum trees may look pretty and brilliant for a time, but they die when their season comes to an end. As to the pine and cypress trees, they refuse to wither in the throes of subfreezing midwinter. They may be smothered by frost and snow but they never change themselves. Indeed, they have attained the truth."

46

徐泰时，万历八年，四十一岁中进士。授工部营缮主事，进秩太仆寺少卿，创建维修皇家建筑。万历十七年，罢官还乡，营建祖父徐朴的园子，即为留园，苏州园林的瑰宝。

Xu Taishi (1540-1598) was a successful candidate in the highest imperial examinations when he turned forty-one in 1581. In his pursuit of officialdom, he began as a director of construction in the Ministry of Works and ended up as Chamberlain for the Imperial Stud, and his responsibilities were construction and maintenance of imperial buildings. In 1589, he was removed from his official position, and went home to build his own garden on

an estate left by his grandfather Xu Pu (fl. 15th century). The product of his labor eventually emerged as the best of all the gardens in Suzhou, and remains this way to this day.

47

名字源自陶渊明《读山海经》：既耕亦已种，时还读我书。

The name is derived from "Reading the Book of Mountains and Rivers" by Tao Yuanming (c. 365-427), "Now that tilling and sowing are over, / It's high time I returned to reading."

48

钱泳，清代文人，工诗书画。其《履园丛话》内容详实，史料精确，晓畅易懂。

Qian Yong (1759-1844), a man of letters of the Qing well versed in poetry, calligraphy and painting, but he is most remembered for his *A Collection of Anecdotes in the Lü Garden* with its substantial contents, accurate data and lucid writing style.

49

顾文彬，字艮庵，书法家、收藏金石书画，治别业怡园。

Gu Wenbin (1811-1889), style name Gen'an, a calligrapher and collector of ancient books, paintings, bronzes and stone tablets who was also owner of the Garden of Brotherly Indulgence.

50

岁寒诸友此处指松、柏、冬青、竹、梅等植物，天寒愈显苍翠。

The Wintry Friends here refer to pines, cypresses, wintergreens, bamboos and plum trees, which look their best in cold weather.

51

李斗，清戏曲作家，亦工诗、音律、算术。历时三十年写成《扬州画舫录》，书中记载了丰富的人文历史资料，包括扬州城市区划、运河沿革、文物、园林、文学、曲艺、风俗等。

Li Dou (1749-1817), a major playwright of the Qing who was also well-versed in poetry, music and mathematics. It took him over 30 years from 1764 to 1795 to finish writing the *Record of the Painted Pleasure Boats of Yangzhou*, in which he documented an abundance of cultural and historical facts, including the cityscape of Yangzhou, the history of the Grand Canal, artworks, gardens, literature, performing arts, and folklore.

52

倪瓒，号云林子，无锡人，元末明初山水画家、诗人，与黄公望、吴镇、王蒙合称元四家。时人认为其沉默寡言，过分挑剔，这在其画作中也有所反映。

Ni Zan (1301-1374), sobriquet Son of Clouds and Woods, a native of Wuxi who was a landscape painter and poet during the Yuan and the early Ming, and one of the Four Masters of the Yuan in landscape painting along with Huang Gongwang (1269-1354), Wu Zhen (1280-1354) and Wang Meng (1308-1385). He was characterized by his contemporaries as particularly reticent and fastidious, qualities that are found in his paintings.

53

沈周，号石田，明书画家，吴门画派掌门人。其画作《庐山高图》《杖藜远眺图》《沧州趣图》等表现了对自然的关切，并伴有往日美学的发现。

Shen Zhou (1427-1509), sobriquet Shitian, a famed Ming-dynasty calligrapher and painter who was also leader of the Wu (Suzhou) School of Literati Painters. Most of his paintings, such as *Lofty Mountain Lushan*, *Poet on a Mountaintop*, and *Cangzhou Landscape*, are characterized by his deep concern with preservation of mother nature and the aesthetic discoveries of bygone ages.

Master-of-Fishnets Garden, Suzhou 苏州网师园

【从周案一】钱大昕清乾隆六十年（公元1795年）《网师园记》：“带城桥之南，宋时为史氏万卷堂故址，与南园沧浪亭相望。有巷曰网师者，本名王思。曩州年前，宋光禄恣庭购其地，治别业为归老之计，因以网师自号，并颜其园，盖托于鱼隐之义，亦取巷名相似也。光禄既歿，其园日就颓圯，乔木古石，大半损失，唯池水一泓，尚清澈无恙。瞿君远邨偶过其地，悲其鞠为茂草也，为之太息。问旁舍者，知主人方求售，遂买而有之。因其规模，别为结构，叠石种木，布置得宜，增建亭宇，易旧为新。既落成，招予辈四五人，谈宴为竟日之集。石径屈曲，似往而复，沧波渺然，一望无际。有堂曰梅花铁石山房，曰小山丛桂轩；有阁曰濯缨水阁；有燕居之室曰蹈和馆；有亭于水者曰月到风来；有亭于崖者曰云冈；有斜轩曰竹外一枝；有斋曰集虚……地只数亩，而有纡回不尽之致。……柳子厚所谓奥如旷如者，殆兼得之矣。”

[Chen Congzhou: Note 1] In his "Notes on the Master-of-Fishnets Garden," Qian Daxin writes, "[The garden] on the former site of Shi's Hall of Ten Thousand Volumes of the Southern Song sits south of the Belt City Bridge and faces the Dark Blue Waves Pavilion in the south. The lane the garden is located on is named after it, but its former name was wangsi. Thirty years earlier, Song Luru, style name Queting, the surveillance commissioner, bought the lot there and built a garden where he could become an 'angling hermit' and fulfill his filial duty for his mother. He named the garden after his sobriquet, 'Master of Fishnets,' which is analogical to fish and pronounced in the same way as the lane's former name. After Song died, his garden gradually fell into decay. Most of its tall trees and ancient rockeries were gone; only the pond with its limpid water remained. When a gentleman by the name of Qu Yuancun passed by, he was sad at the sight of the overgrown weed that covered the place. Sighing, he asked a neighbor about it, and was told that its master was putting it up for sale. He bought it and set about restructuring his newly acquired property in line with its size, piling up rockeries,

planting trees, and building new pavilions and dwellings to replace its old looks. When the project was completed, he feasted us friends and told them about what he had done in those busy days (we chatted all day long). In his new estate, a stone-paved path took a twisting course, now leading forward, now turning back in a setting so labyrinthine that it seemed sometimes to have disappeared below the horizon. There were the Plum Flower and Iron Ore Mountain Abode, the Verandah of a Hillock Clustered with Osmanthus, Hat-Ribbon Washing Belvedere, an idler's dwelling called Studio for Fostering Modesty and Amiability, the waterside Pavilion of Moon Arriving and Breeze Coming, the Cloudy Ridge Pavilion on top of an artificial mountain cliff, the Verandah of a Twig Beyond Bamboos, and the Gathering-in-Emptiness Chamber.... This land, though covering only a few *mu*, seems to be pregnant with pleasant surprises.... 'Being unfathomable is to be expansive,' in the words of Liu Zongyuan (773-819), style name Zihou, but this estate is at once unfathomable and expansive."

褚廷璋清嘉庆元年(公元1796年) 《网师园记》：“远邨于斯园增置亭台竹木之胜，已半易网师旧规.....乾隆丁未（公元1787年）秋，奉讳旋里，观察（宋鲁儒名宗元）久为古人，园方旷如，拟暂僦居而未果。”

Chu Tingzhang (?-1797) says in his "Notes on the Master-of-Fishnets Garden" written in 1796, "The pavilions, terraces, bamboos and trees and other scenic elements added by Yuancun to this garden have changed half of the former arrangements.... When I went home for a family funeral in a year of *ding-wei* under the Qianlong reign (1787), the surveillance commissioner had long been deceased, and his garden was deserted. I wanted to rent it for a temporary stay, but failed."

冯浩清嘉庆四年(公元1799年) 《网师园序》：“吴郡瞿君远邨，得宋恽庭网师园，大半倾圯，因树石池水之胜，重构堂亭轩馆，审势协宜，大小咸备，仍余清旷之境，足畅怀舒眺。”园后归吴嘉道，为

时不久。

Feng Hao (1719-1801) says in his "Preface to the Master-of-Fishnets Garden," which he wrote in the fourth year of the Jiaqing reign (1799), "When the gentleman Qu Yuancun from Wujun prefecture bought the garden of Song Luru, more than half of it had crumbled. Qu had big halls and dwellings and small pavilions, verandahs and chambers rebuilt to mingle with the garden's beautiful trees, rockwork and water according to a well-conceived plan, with due attention paid to preserving the original delicate and spacious sceneries, so that the entire garden has enough to offer those who come to relax and look afar." Later, the garden came briefly under the ownership of Wu Jiadao.

2

网师园在苏舜钦的沧浪亭之东，李鸿裔遂自号“苏邻”。李氏同治元年（1862年）购得网师园，六年后辞官居园中。

The Master-of-Fishnets Garden is situated to the east of Su Shunqin's Dark Blue Waves Pavilion, hence the sobriquet of "Neighbor of Su Shunqin" chosen by Li Hongyi himself, who bought the estate in 1862, and settled down in it after giving up his post six years later.

3

【从周案二】见俞樾《撝秀楼匾额跋》及达桂、程德全之网师园题记。又名蓬园。

[Chen Congzhou: Note 2] See "Postscript to the Inscription on Beauty-Garnering Loft's Nameboard" by Yu Yue, as well as the colophons on the painting "Master-of-Fishnets Garden" by Da Gui and Cheng Dequan (1860-1930). The Master-of-Fishnets Garden's byname is "Lotus Garden."

4

【从周案三】据张学铭先生见告，园旧有黎元洪赠张锡奎书匾额。

后改称逸园。

[Chen Congzhou: Note 3] I learned from Zhang Xueming (1908-1983), the second son of Zhang Zuolin, that the garden used to have a board inscribed in the handwriting of Li Yuanhong (1864-1928), vice president of the Republic of China. The garden was later renamed "Garden of Leisure." Though Zhang Xiluan owned the Garden, he never lived there in his lifetime.

5

叶恭绰，号遐庵，晚清廪贡生，曾任北洋政府交通总长、广州国民政府财政部长等。新中国成立后，任中国画院院长。后半生致力于学术研究，其书亦佳。

Ye Gongchuo (1881-1968), sobriquet Xia'an, a successful candidate in the imperial examinations at provincial level during the late Qing, minister of communication and subsequently minister of finance in the early Republican years, and foundation president of the Chinese Academy of Painting in New China. He dedicated the second half of his life to academic studies, and he also established himself as a renowned calligrapher.

6

张泽，字善子，现代画家，尤擅画虎。其弟张爱，号大千，是20世纪享誉国际的中国艺术家，善画风景、荷花。兄弟二人建大风堂画斋，遂有大风堂画派。他们与张锡銮子师黄交好，因此赁居网师园殿春簃。抗日战争爆发前兄弟二人离开此园。

Zhang Ze (1882-1940), style name Shanzi, a modern painter famous for his tiger paintings. His younger brother, Zhang Yuan (1899-1983), sobriquet Daqian, a painter whose forte of landscape and lotus painting established his position as one of the most internationally renowned Chinese artists of the 20th century. The two brothers established the Painting Studio of Dafeng Hall, hence the School of Dafeng Hall. They had been friends with Zhang Shihuang, son of Zhang Xiluan, who lent the

Late-Spring Peony Lodge to them as a living place. The two brothers left the garden before the War of Resistance against Japanese Aggression broke out.

7

何亚农，本名何澄，字亚农，文物鉴赏家、收藏家。早期加入中国同盟会，为国民党元老，1908年毕业于日本陆军士官学校。后退出政界经营实业，投身教育。何氏对此园进行全面整修，充实字画，复用“网师园”旧名。1946年病故，其妻继承此园。四年后妻亦卒，子女将园献交国家。

He Yanong (1880-1946), born He Cheng with the style name Yanong, a connoisseur and collector of cultural relics. Before graduation from the Imperial Japanese Army Academy in 1908, he joined the Chinese United League, becoming one of the founding fathers of the Kuomintang. Later he retired from politics to become a businessman and educator. He renovated the garden, replenished it with artistic works, and named it back to the Master-of-Fishnets Garden. The garden was inherited by his wife upon his death in 1946, and his children donated it to the government when their mother died four years later.

8

俞樾，号曲园居士，清末学者、书法家，红学家俞平伯曾祖。嘉庆六年阮元于杭州创诂经精舍，俞樾于此课徒三十载。吴昌硕、章炳麟等皆出其门下。

Yu Yue (1821-1907), sobriquet Recluse of the Twisted Garden, a scholar and calligrapher in the late Qing, and great-grandfather of Yu Pingbo (1900-1990), a prominent scholar in the study of A Dream of Red Mansions. He taught for thirty years in the Confucian Classics Elucidation Academy established by Ruan Yuan(1764-1849) in 1801 in Hangzhou, where Wu Changshuo (1844-1927) and Zhang Binglin (1869-1936) were his students in 1869 and 1891 respectively.

《庄子·人间世》：唯道集虚，虚者，心斋也。

Zhuangzi ("In the World of Man"): "The Way gathers in emptiness alone; emptiness is the fasting of the mind."

晏几道，号小山，北宋词人，晏殊第七子。诗作清丽，情感真挚。

Yan Jidao (1030-1110), sobriquet Xiaoshan, a lyrical poet of the Northern Song and the seventh son of Yan Shu. His poems strike one as refreshing, sincere and sentimental.

【从周案四】苏叟《养痾闲记》卷三：“宋副使恽庭宗元网师小筑在沈尚书第东，仅数武。中有梅花铁石山房，半巢居。北山草堂附对句‘丘壑趣如此；鸾鹤心悠然’。濯缨水阁‘水面文章风写出；山头意味月传来’。（钱维城）花影亭‘鸟语花香帘外景；天光云影座中春’。（庄培因）小山丛桂轩‘鸟因对客钩语；树为循墙宛转生’（曹秀先）。溪西小隐斗屠苏附对句‘短歌能驻日；闲坐但闻香’（陈兆仑）。度香艇无喧庐琅开圃附对句‘不俗即仙骨；多情乃佛心’（张照）。”

[Chen Congzhou: Note 4] Lu Jin 陆锦 (fl. 18th century, style name Susi 素丝, a homonym of Susou), *Idle Notes Written in Recuperation*, Volume Three, "In Vice-Minister Song Luru's Net Master's Tiny Court just a few footsteps east of Minister Shen's residence, within its small space, there is the Plum Flower and Iron Ore Mountain Abode and Semi-Subterranean Den. A couplet in the Thatched Hut of Northern Mountain reads, 'With interesting knoll and dale like this, even the immortals will put their hearts at ease.' A couplet for the Hat-Ribbon Washing Belvedere: 'The beauty of the water surface is written out by the wind; the meaning of the hilltop is spelled out by the moon.' A couplet for the Flower Shadow Pavilion: 'Singing birds and

fragrant flowers form the vista beyond the window; skylight and cloud shadows are reflected in the winecups.' A couplet for the Verandah of a Hillock Clustered with Osmanthus: 'Birds learn to parrot humans just for their guests' sake; trees look as if reborn to follow the wall's contours.' A couplet for the 'Huge' Thatched Hut: 'Singing a ditty, one stops the sun on its orbit, and setting in leisure, one inhales the fragrance." A couplet for the Yard of Bamboos, 'He who frees from vulgarity has a celestial spine; he who is compassionate has the Buddha's heart.'"

12

王国维，晚清学者、古典文学评论家，以西学方法治史。融合中西哲学与美学，形成独特的美学思想体系，《人间词话》中表露无遗。于史学、文学评论、戏剧、考古、美学均有深诣。

Wang Guowei (1877-1927), a late-Qing man of letters and critic of classic Chinese literature known for his Western approach to Chinese history. He combined Western and traditional Chinese philosophies and aesthetics to come up with an aesthetic system of his own, which is crystallized in his *Poetic Remarks on the Human World*. He was well accomplished in many academic fields such as history, education, literary critique, drama, archeology and aesthetics.

Dark Blue Waves Pavilion, Suzhou 苏州沧浪亭

1

欧阳修，北宋诗人、政治家，苏舜钦挚友。唐宋八大家之一，在宋朝发起古文运动，参与编纂《新唐书》《五代史》。

Ouyang Xiu (1007-1072), a poet and statesman of the Northern Song, and a close friend of Su Shunqin. One of the Eight Tang-Song Prose Masters, he was the initiator of the "ancient prose" campaign in the Song literary circle. In addition to his literary achievements, he was also involved in the compilation of the *New*

2

梅尧臣，字圣俞，北宋现实主义诗人，诗歌革新运动的推动者。经欧阳修举荐，参与编纂《新唐书》。

Mei Yaochen (1002-1060), style name Shengyu, a realistic poet and a leading figure of a new poetic style that revived ancient literature in the Northern Song. With Ouyang Xiu's recommendation, he took part in the compilation of the *New Book of Tang*.

3

吴昌硕，清末篆刻家、书画家。同治八年（1869年），入杭州诂经精舍，师从俞樾。光绪六年（1880年），为吴云孙辈当塾师。听枫园主吴云时为苏州知府，亦是书画家、金石收藏家，昌硕目睹俞樾为吴云题联贺七十大寿。

Wu Changshuo (1844-1927), a seal carver, painter, and calligrapher of the early 20th century. When he was twenty-six in 1869, he became a disciple of Yu Yue in the Confucian Classics Elucidation Academy in Hangzhou. In 1880, as the tutor of the grandchildren of Wu Yun (1811-1883), a painter, calligrapher, and antique collector, prefect of Suzhou at the time and owner of the Listening to Maples Garden, he was able to witness Yu composing a couplet for Wu at his 70th birthday party.

4

章惇，字子厚，北宋政治家、改革家。受封申国公，故名申公。

Zhang Dun (1035-1105), style name Zihou, a statesman and reformist of the Northern Song. He was appointed as the Duke of Shen kingdom, hence his name Shengong, or the Duke of Shen.

5

蕲王即韩世忠，与岳飞、张俊、刘光世并为抗金四名将，亲见宋朝

由盛而衰。

The King of Qi was none other than Han Shizhong, one of the four major antiJurchen generals along with Yue Fei (1103-1142), Zhang Jun (1086-1154) and Liu Guangshi (1086-1142) during the period that saw the all-powerful Song go downhill.

6

祠中三面墙上嵌594幅与苏州历史有关的人物浮雕石像，包括商末自陕西岐山搬至江苏无锡、常州的泰伯、仲雍，春秋时期吴王阖闾，以及现代建筑家贝聿铭、作家苏童等。

Three of the shrine's four walls are inlaid with 594 stone portraits of historical figures related to Suzhou, ranging from Taibo (*fl.* 11th century BC) and his brother Zhongyong (*fl.* 11th century BC) who moved their dukedom from what was present-day Qishan in Shaanxi to present-day Wuxi and Changshu in Jiangsu toward the end of the Shang (1600-1046 BC), and Helü (?-496 BC), the duke of Wu of the early Spring and Autumn period (1046-770 BC), to such modern-day dignitaries as the architect Ieoh Ming Pei (1917-), and the author Su Tong (1963-).

Retreat and Reflection Garden, Tongli 同里退思园

1

任传薪，字味知，退思园第二代也是最后一代主人。深感女子教育的迫切，于1902年以退思园为校舍办丽则女校。

Ren Chuanxin (1887-1962), style name Weizhi, the second and last owner of the Retreat and Reflection Garden. Cherishing the importance of education for the weaker sex, he established the Lize Girls' School on the premises of the garden in 1902.

2

吴梅，字瞿安，戏曲理论家、教育家、曲谱收藏家，北京大学专授昆曲戏曲第一人。朱自清、田汉、梅兰芳、俞振飞皆其弟子。

Wu Mei (1884-1939), style name Qu'an, a traditional opera theoretician, educator, and collector of opera music scores, and the first professor to teach Kunqu Opera and drama in Peking University. His students included the essayist and poet Zhu Ziqing, the playwright Tian Han, the Peking Opera guru Mei Lanfang, and the Peking and Kunqu Opera superstar Yu Zhenfei.

3

曾朴，字孟朴，现代学者、出版家。其父于明朝小辋川上筑虚廓园（亦名曾家花园）。1904年，参与创建小说林书社，发行小说。金松岑与其共撰《孽海花》，由此社出版，被誉为晚清四大谴责小说之一。虚廓园中一池湖水，假山树木倒映其中。

Zeng Pu (1872-1935), style name Mengpu, a scholar and publisher of modern China. His father built the Ethereal Outline Garden (also known as Zeng's Garden) in the precinct of the Lesser Wangchuan Gully of the Ming. In 1904, he joined in the establishment of the Forest of Novels Publishing House as modern China's first publisher with an emphasis on novels. It is this press that published *A Flower in the Sea of Sin*, one of the four great condemnation novels co-authored by Jin Songcen and Zeng in the late Qing. The Ethereal Outline Garden features a large lake mirroring the artificial mountains and trees around it.

4

金松岑，《孽海花》作者之一，清末提倡新文化，1932年创中国国学会。诗人柳亚子，社会学家、优生学家潘光旦，社会学家、人类学家费孝通皆出其门下。

Jin Songcen (1873-1947), co-author of *A Flower in the Sea of Sin* and a master of classical Chinese culture, who advocated new culture toward the end of the Qing and founded the Society of Classical Chinese Studies in 1932. Among his students were such prominent figures as Liu Yazi (1887-1958), a poet who became Sun Yatsen's secretary; Pan Guangdan (1899-1967), a sociologist

and eugenicist; and Fei Xiaotong (1910-2005), a sociologist and anthropologist.

5

凌景埏，吴江人，亦名敬言，先后任教于东吴大学、燕京大学、江苏师范学院。工诗词，昆曲造诣极高。曾听吴梅先生讲座，于燕大昆曲社公演，亦与好友金立初薄酒唱曲。

Ling Jingyan (1904-1959), a native of Wujiang whose byname was Jingyan, a professor who taught subsequently at Soochow University, Yenching University, St. John's University and Jiangsu Normal College. Good at traditional-style poetry, he was also a Kunqu expert of high attainments. He attended lectures of the renowned Kunqu opera artist Wu Mei, performed in a Kunqu opera club in Yenching University and was often seen singing the opera with his good friend Jin Lichu in between toasts of liquor.

6

徐孝穆，吴江人，柳亚子外甥，书法、篆刻、竹刻方面卓有成就。

Xu Xiaomu (1916-1998), a native of Wujiang and Liu Yazhi's nephew, well-accomplished in seal cutting, bamboo sculpture and calligraphy.

7

走马楼，南方民居特有的建筑形式，四周皆有走廊通行的楼屋，甚或骑马亦畅行无阻。

Distinct of southern-style dwellings, the horse-accommodative loft is a kind of storied building joined by a walkway on its four sides, which is wide enough for a horse to trot through.

Yangzhou Gardens and Dwellings 扬州园林与住宅

1

杜牧，晚年居西安樊川别墅，故号樊川居士。晚唐诗坛领袖，作品

内容广泛，绝句尤佳。诗文中自我形象风流倜傥，饮酒作乐，喜好女色山水。仕途尚可，曾于扬州任两年监察御史。

Du Mu (803-852), sobriquet Recluse in Fanchuan for he spent his evening years in a villa of the same name in present-day Xi'an. A leading poet of the late Tang, his forte is the quatrain among his wide-ranging literary work in which he created an image of himself as a sensualist who enjoys the pleasures of wine, women, and misty landscapes. He had a moderately successful official career, including a twoyear stint as a clerical official in Yangzhou.

2

徐湛之，南朝宋武帝刘裕的外孙。永嘉廿四年（447年），任南兖州刺史，为集文士，于广陵大建园亭。或为扬州历史上最早有记载的园林构建。

Xu Zhanzhi (410-453), a maternal grandson of Liu Yu (363-422), the first emperor of the Song of the Southern and Northern Dynasties. In 447, as Regional Inspector of South Yanzhou Prefecture, he had gardens and mansions built in Guangling (present-day Yangzhou) to attract literary figures to the city, which was perhaps the earliest record of planned garden construction in Yangzhou.

3

绍兴三十一年（1161年），金兵攻占扬州，1176年姜夔弱冠过扬州。

This refers to the year 1161 when the Jurchen troops stormed Yangzhou, fifteen years before Jiang Kui's visit to the city in his early twenties.

4

姜夔，号白石道人，南宋文学家、音乐家。诗文、书法、音乐无不精擅，是继苏轼之后又一艺术全才。

Jiang Kui (1154-1221), sobriquet White Stone Taoist, a man of

letters and musician of the Southern Song. Like Su Shi, he was another clever Jack of all trades in the realm of arts and literature including poetry, prose, calligraphy and music.

5

郑氏兄弟，祖籍徽州，祖上三代治盐，囤积大量财富。明清之际，兄弟四人竞相造园，然皆毁于战火。

Hailing from a family in Huizhou that had amassed a huge fortune from salt sales under government monopoly for three generations, the Zheng brothers had established their own fabulous estates during the Ming-Qing transition, which, however, all came to ruins in war and turmoil.

6

【从周案五】《水窗春呓》卷下“维扬胜地”条：“扬州园林之胜，甲于天下。由于乾隆朝六次南巡，各盐商穷极物力以供宸赏，计自北门抵平山，两岸数十里楼台相接，无一处重复。其尤妙者在虹桥迤西一转，小金山矗其南，五顶桥锁其中，而白塔一区雄伟古朴，往往夕阳返照，箫鼓灯船，如入汉宫图画。盖皆以重资广延名士为之创稿，一一布置使然也。城内之园数十，最旷逸者，断推康山草堂。而尉氏之园，湖石亦最胜，闻移植时费二十余万金。其华丽缜密者，为张氏观察所居，俗所谓张大麻子是也。张以一寒士，五十岁外始补通州运判，十年而拥资百万，其缺固优，凡盐商巨案，皆令其承审，居闲说合，取之如携。后已捐升道员，分发甘肃。蒋相为两江，委其署理运司，为言官所纠罢去，蒋亦由此降调。张之为入，盖亦世俗所谓非常能员耳。余于戊戌（道光十八年，即公元1838年）赘婚于扬，曾往其园一游，未数日即毁于火，犹幸眼福之未差也。园广数十亩，中有三层楼，可瞰大江，凡赏梅、赏荷、赏桂、赏菊，皆各有专地。演剧宴客，上下数级如大内式。另有套房三十余间，回环曲折，迷不知所向。金玉锦绣，四壁皆满，禽鱼尤多。……”

[Chen Congzhou: Note 5] Ouyang Zhaoxiong 欧阳兆熊 (fl. 19th century) and Jin Anqing 金安清 (1817-1880?), "Scenic Spots of

Weiyang," *A Daydreamer's Vernal Murmurs by a Waterside Window* (Volume Two): Yangzhou leads the country with enchanting gardens. Built by local salt merchants who exhausted their wealth to entertain Emperor Qianlong on his six inspection tours of south China, these gardens form a scenic belt that extends for a dozen miles on end on both sides of the river from Northern City Gate to the Mountain-Level Hall, with lofts and terraces clustered cheek by jowl with absolutely no repetitions. The best section of it begins where the river turns west at the Rainbow Bridge, with the Lesser Golden Hill standing out in the south, and the Five-Pavilion Bridge lying in the middle. The area around the White Pagoda is the most imposing for its classical magnificence. When the setting sun tosses its last twilight rays and lantern boats sail into the scene to the notes of vertical flutes and the beats of drums, one feels like roaming a picture of Handynasty palaces. All this is made possible by paying renowned figures heavily to make the designs and arrange every view on the spot. Gardens in the city are counted by the dozen, but the most spacious and extraordinary one is none other than the Thatched Cottage in the Kangshan Mountain. The Wei's Garden, however, makes a name for itself with its artificial mountains of Lake Tai stones, whose transportation and transplantation costs alone amounted to two hundred thousand and more taels of silver. The garden, luxurious to the minute detail, is the residence of a General Administration Circuit supervisor nicknamed "Pockmarked Zhang." Zhang was a humble scholar to begin with, but he became a millionaire ten years after he filled in the office of the Second Assistant Salt Controller of Tongzhou in his fifties. That official position put him in such an advantage that he was appointed to try all the major cases involving salt merchants. When he was not judging cases, he could still put in a word or two and get paid for it as easily as fetching money from his own pocket. Later, he bought a position that turned him into a circuit

intendant and was dispatched to Gansu province. He was entrusted by Jiang Xiang, viceroy of Jiangsu and Jiangxi provinces, with the affairs of the Transport Monitoring Office, but after getting incriminated by an imperial remonstrating censor, he was removed from the job, and Jiang himself was demoted as a result. Zhang was one of those commonly regarded as capable officials. When I married into my wife's family in Yangzhou in a year of *wu-xu* (1838, or the eighteenth year of the Daoguang reign), I paid a visit to his garden. I should say I was lucky to have seen it with my own eyes, since it was destroyed in a fire a few days later. The garden sprawled on a land of several dozen *mu*, with a three-storied building overlooking the Yangtze River, and plum, lotus, osmanthus, and chrysanthemum were planted in separate places for people to enjoy. Theatrical performances and banquets were held in about the same pomp and pageantry as royal palaces. There were thirty or so suites of rooms laid out in such loops and turns that one got lost easily. The four walls were all imbedded with gold and jade and covered with brocade, and the whole garden abounded in fish and birds.

7

庆历八年（1048年），扬州知府欧阳修于大明寺内建平山堂，“江南诸山，历历在目，似与堂平。”

In 1048, the legendary prose writer Ouyang Xiu had built, in the Daming Temple in Yangzhou, a hall where he could enjoy the sceneries offered by the Jiangnan mountains seemingly level with the hall. Hence its name.

8

刘大观，乾嘉时期文人，为官有政声，工作游历颇广，至广西、辽宁、山西、河南等地。

Liu Daguan (1753-1834), a man of letters active in the prime of the Qing whose decent official career enabled him to travel and

work in many provinces, including Guangxi, Liaoning, Shanxi, and Henan.

9

谢溶生，东晋宰相谢安后人，李斗同乡。为李斗《扬州画舫录》作序跋者有四——谢溶生、袁枚、阮元及李斗本人。

Xie Rongsheng (?-1790), a descendent of the famous Eastern Jin prime minister Xie An (320-385), and a fellow townsman of Li Dou. Xie was one of the four who wrote the prefaces and postscripts to Li Dou's *Record of the Painted Pleasure Boats of Yangzhou*, the other three being the poet and essayist Yuan Mei, the politician and classicist Ruan Yuan, and the author himself.

10

阮元，清学者、文学家、思想家，李斗同乡。道光十八年致仕，返乡扬州。

Ruan Yuan (1764-1849), a scholar, man of letters and thinker of the Qing, and a fellow townsman of Li Dou. After his retirement in 1838, Ruan returned to settle down in his hometown, Yangzhou.

11

【从周案六】《水窗春呓》卷下“广陵名胜”条：“扬州则全以园林亭榭擅场，虽皆由人工，而匠心灵构，城北七八里夹岸楼舫无一同者，非乾隆六十年物力人才所萃，未易办也。嘉庆一朝二十五年，已渐颓废。余于己卯（嘉庆二十四年，即公元1819年）庚辰（嘉庆二十五年，即公元1820年）间侍母南归，犹及见大小虹园，华丽曲折，疑游蓬岛，计全局尚存十之五六。比戊戌（道光十八年，即公元1838年）赘姻于邗，已逾二十年，荒田茂草已多，然天宁门城外之梅花岭、东园、城闾清楚、小秦淮、虹桥、桃花庵、小金山、云山阁、尺五楼、平山堂皆尚完好。五六七诸月，游人消夏，画船箫鼓，送夕阳，醉新月，歌声遏云，花气如雾，风景尚可肩随苏杭也。……”

[Chen Congzhou: Note 6] Ouyang Zhaoxiong and Jin Anqing, "Scenic Spots of Guangling," *A Daydreamer's Vernal Murmurings by a Waterside Window* (Volume Two): Yangzhou outshines other cities with its pavilions and gazebos. Though man-made, all of them are products of divine craftsmanship and ingenious conception. Among the chambers and painted land boats that flank the river for seven or eight *li* in the north of the city, there are no identical ones—a feat that would have been improbable without the accumulation of sixty years of material and human input during the reign of Qianlong. But it took only a 25-year reign under Emperor Jiaqing for all these to go gradually to dilapidation. During a homecoming visit down south that spanned the years of *ji-mao* (1819, or the twenty-fourth year of the Jiaqing reign) and *geng-chen* (1820, or the twentyfifth year of the Jiaqing reign), I could still see the Greater and Lesser Rainbow Gardens, whose pomp and maze-like layout made me wonder if I was visiting a fabled island abode of immortals, and I reckoned that fifty to sixty of the gardens were still extant in the city in those years. Twenty years later, when I married into my wife's family in Hanjiang county in a year of *wu-xu* (1838, the eighteenth year of the Daoguang reign), I saw more land wasted and overgrown with weeds, but the Eastern Garden, the Plum Flower Ridge beyond the Heavenly Peace City Gate, the Sutra-Chanting at City Wall, the Lesser Qinhuai River, the Rainbow Bridge, the Peach Flower Nunnery, the Lesser Golden Hill, the Cloudy Mountain Belvedere, the Tower "Fifteen Inches Short of the Skies" (a name derived from a story of the Weis in the Western Han, who, along with the Dus, were so high in social rank that they "could almost reach the skies"), and the Mountain-Level Hall were still in good conditions. In May, June and July, these places were still thronged with summering people, where they could sit in painted boats to hear the notes of vertical flutes and the booming of drums, see the setting sun, and get drunken under the crescent moon, where the

melodies of singing lingered in clouds, the aroma of flowers hovered in mists, and the vistas stood comparison with those of Suzhou and Hangzhou.

《龚自珍全集第三辑：己亥（道光十九年，即公元1839年）六月重过扬州记》：“居礼曹，客有过者曰：卿知今日之扬州乎？读鲍照芜城赋则遇之矣。余悲其言。……扬州三十里，首尾屈折高下见。晓雨沐屋，瓦鳞鳞然，无零翳断甃，心已疑礼曹过客言不实矣。……客有请吊蜀岗者，舟甚捷……舟人时时指两岸曰，某园故址也，某家酒肆故址也，约八九处。其实独倚虹园圯无存。曩所信宿之西园，门在，题榜在，尚可识，其可登临者尚八九处，阜有桂，水有芙蕖菱芡，是居扬州城外西北隅，最高秀。”从周案：龚氏匆匆过扬州，所见甚略，文虽如是，难掩荒败之景。

Collected Works of Gong Zizhen (Volume Three): "Revisiting Yangzhou in the sixth month of a year of ji-hai (1839, the nineteenth year of the Daoguang reign": "When I was with the Ministry of Rites, a guest who had been there said to me, 'Don't you know what has become of Yangzhou today? If you have read Bao Zhao's "Rhapsody of a Desolate City," you would have been there.' His words filled my heart with melancholy.... When I ascended one of the parapet walls, I saw the landscape twisting and turning and going up and down for thirty li on end. After the rain stopped in the morning, the roof tiles of houses were as neat and tidy as fish scales and there were no traces of broken walls nor bricks, and I began to suspect that the guest of the Ministry of Rites did not tell me the truth.... On my way with a guest to visit and ponder the past at the Shugang Hillock, the boat sailed down the river rather quickly.... From time to time the boat people would point at a scene on either bank and told me this was the former site of a certain garden and that was where a wine shop was located. Of the eight or nine such former sites he had mentioned, only the Rainbow-Leaning Garden was no more. The Western Garden, where I spent two nights, could still be recognized from its remaining gate and horizontal nameboard.

There were eight or nine sites that could still be visited, where there were still osmanthus on knolls and lotuses, caltrops and Gordon euryales in waters to the northwest of the city of Yangzhou, where the vista was most beautiful." Given the hastiness of his journey, Gong could only see a little of Yangzhou, so this remark of his cannot cover up the desolation and decay of the scenes at the time.

钱泳《履园丛话》卷二十“平山堂”条：“扬州之平山堂，余于乾隆五十二年（公元1787年）秋始到，其时九峰园、倚虹园、筱园、西园曲水、小金山、尺五楼诸处，自天宁门外起直到淮南第一观，楼台掩映，朱碧鲜新，宛入赵千里仙山楼阁中。今隔三十余年，几成瓦砾场，非复旧时光景矣……”

Qian Yong (1759-1844), "Mountain-Level Hall," *A Collection of Anecdotes in the Lü Garden* (Volume Twenty): My first visit to the Mountain-Level Hall of Yangzhou took place in the autumn of the fifty-second year of the Qianlong reign (1787). At the time, the sceneries of the Nine Peaks Garden, the Rainbow-Leaning Garden, the Slim Bamboo Garden, the Winding Stream of the Western Garden, the Lesser Golden Hill, and the Tower "Fifteen Inches Short of the Skies" extended from the Heavenly Peace City Gate to the Greatest Temple South of the Huai (i.e., the Daming Temple 大明寺), with lofts and terraces setting off each other in bright and fresh vermilion and green colors, making people wonder if they had stepped into Zhao Boju's golden-and-blue paintings of lofts and pavilions on a celestial mountain. Thirty or so years later today, this place has all but become a world of debris—its vista has long been history.

【从周案七】据友人王世襄说：“所谓‘周制’，当指周翥所制的漆器，见谢堃《金玉琐碎》。……故钱泳说‘明末有周姓者始创此法’不可信。”

[Chen Congzhou: Note 7] My friend Wang Shixiang (1914-2009)

told me, "The so-called Zhou's Principles were first applied by Zhou Zhu to the lacquerware he was crafting. See Xie Kun's book, *Masters of Gold and Jade in Odds and Bits*. ...For this reason, Qian Yong's remark about the origin of the Zhou's Principles is groundless."

王世襄，著名文物专家、学者、文物鉴赏家和收藏家。曾学中国古典建筑，在中国营造学社任助理研究员。他清理追还了许多日本劫夺之文物。

A cultural relics expert, scholar, connoisseur and collector, Wang Shixiang learned traditional Chinese architecture and served as an assistant researcher in the Society for the Study of Chinese Architecture. He checked up and retrieved many cultural relics from Japan.

13

石涛，本名朱若极，清初一位特立独行的书画家、理论家。贵为明朝宗室，明灭后出家，法名原济，号苦瓜和尚。其绘画理论书《苦瓜和尚画语录》至今颇有影响。世人认为他于晚年叠成片石山房。 Shitao (1642-c. 1707), born Zhu Ruoji, a painter, calligrapher and theoretician who was one of the most famous individualist painters of the early Qing. An offspring of the Ming royalty, he became a Buddhist monk after the dynasty's downfall and assumed the religious name Yuanji and sobriquet Monk Balsam Pear. The impact of his book on landscape painting theory, *Monk Balsam Pear on Painting*, is still felt today. It is believed that he was the builder of the rockwork in the Small-Rock Mountain Abode after he settled down in Yangzhou in his late years.

14

据《艺能编》记载，董道士，佚其名，乾隆时人。工于堆假山石，为时名手。

According to the *Compendium of Artistic Craftsmen*, Taoist Priest Dong (1736-1795), name unknown, lived as a Taoist priest during

the Qianlong reign, and made a name for himself for his state-of-the-art craft of designing artificial mountains.

15

【从周案八】朱江同志据扬州博物馆藏王氏遗嘱，认为应作王庭余。王歿于道光十年（公元1830年），寿八十。

[Chen Congzhou: Note 8] According to Zhu Jiang, a researcher with the Yangzhou Museum, the will of Wang's indicated that it should be Wang Tingyu instead of Wang Tianyu, who died in 1830 at age eighty.

16

余继之，扬州园艺大师，善治盆景、叠石。民国初年所造园林，尤以蔚圃、匏庐、怡庐和杨氏小筑闻名。

Yu Jizhi (1903-1961), a native of Yangzhou and a landscape gardener well versed in potted plants, miniature landscapes, and rockery piling. Among the many traditional gardens he had designed in the early 20th century are the Li Weiru's Garden, Gourd Hut, Mind Cheering Hut, and Yang's Tiny Nook.

17

蔚圃原属程氏，后属李蔚如。

Li Weiru may not be the first owner of this garden, which is said to have belonged previously to a man surnamed Cheng.

18

园名源自《归去来辞》：倚南窗以寄傲.....登东皋以舒啸。又《诗经·白华》：啸歌伤怀，念彼硕人。

The name is derived from "Return Home!" by Tao Yuanming 陶渊明 (c. 365-427), "I lean by the southern window in a mood of pride...mount the eastern hill and let out long whistles." *Book of Songs* ("Bai Hua"): "I whistle and sing with wounded heart, / Thinking of that great man."

卢绍绪，晚清官员，后从商。卢宅为当时规模最大的盐商住宅建筑，亦是扬州大户人家传统民居的典型代表作。

Lu Shaoxu (1843-1905), an official turned businessman in the late Qing. The Lu's Mansion is the largest of all the properties of Yangzhou salt merchants of his time, and a typical example of traditional residence of the rich and powerful in the city.

魏次庚，晚清盐商，湖南人氏。现代作家冰心1957年4月到扬州参观视察，即住魏氏园中。

Wei Cigeng (1883/1884-1950/1951), a salt merchant of the late Qing who came from Hunan province. Contemporary writer Bing Xin participated in a small forum held in this mansion during her 1957 April Yangzhou inspection tour.

何维键，号芷舫，光绪年间任湖北汉黄道台等。举十三年构建寄啸山庄（俗称何园），其中含片石山房，被誉为“晚清第一园”。园内有百叶窗帘、法国壁炉等西洋设施，这在19世纪末的中国十分罕见。

He Weijian (1835-1908), sobriquet Zhidao, Intendent of Circuit of Hanhuang in Hubei during Emperor Guangxu's reign of the Qing. It took him thirteen years to build the Whistling Scholar's Mountain Abode (more popularly known as the Ho Family Garden) containing the Small-Rock Mountain Abode. So great and rare of its kind, the garden was lauded as "the number one Garden of the late Qing." The garden features some exotic utilities, including Venetian blinds and French fireplaces, which were rare in late-19th-century China.

【从周案九】清嘉庆《江都县续志》卷五：“片石山房在花园巷，吴家龙辟，中有池，屈曲流水，前为水榭，湖石三面环列，其最高者特立耸秀，一罗汉松踞其巅，几盈抱矣，今废。”

[Chen Congzhou: Note 9] According to *A Sequel to the Gazetteer of Jiangdu County* (Volume Five) compiled during the Jiaqing reign of the Qing: In the Small-Rock Mountain Abode built by Wu Jialong at Garden Lane, there used to be a pond and a gazebo sitting by a winding stream. The abode was surrounded on three sides by rockeries of lake stones. Atop the tallest rockery, which was exceptionally beautiful, stood a densely foliated yew podocarpus, whose trunk was one armspan in girth. But all this is in decay now.

清光绪《江都县续志》卷十二：“片石山房在花园巷，一名双槐园，县人吴家龙别业，今粤人吴辉谟修葺之。园以湖石胜，石为狮九，有玲珑夭矫之概。”

A Sequel to the Gazetteer of Jiangdu County (Volume Twelve), compiled during the Guangxu reign of the Qing: The Small-Rock Mountain Abode at Garden Lane, known otherwise as Twin Pagoda Trees Garden, was the estate of a native by the name of Wu Jialong. The salient feature of the garden is its lake-stone rockwork in the image of nine lions, every one of which is exquisite in craftsmanship and vigorous and nimble in image.

《续纂光绪扬州府志》卷五：“片石山房在徐凝门街花园巷，一名双槐茶园，旧为邑人吴家龙别业。池侧嵌太湖石，作九狮图，玲珑夭矫，具有胜概，今属吴辉谟居焉。”

A Sequel to the Gazetteer of Yangzhou Prefecture (Volume Five), compiled during the Guangxu reign: The Small-Rock Mountain Abode at Garden Lane on Xuning Gate Street, whose byname was Twin Pagoda Trees Garden, was in the possession of a native by the name of Wu Jialong in old days. Lake Tai rocks were embedded in the embankment of its pond to conjure up a picture of nine lions, whose nimble and exquisite images are absorbing. Today, the abode belongs to Wu Huimo.

黄应泰，亦名黄至筠，字个园，嘉庆年间大盐商、画家、淮东淮西商总。嘉庆廿三年，在小玲珑山馆基础上构建个园，广植修竹。个园叠石亦蜚声宇内。

Huang Yingtai (1770-1838), also known as Huang Zhiyun, style name Geyuan, a successful salt merchant, painter and General Commercial Commissioner of Eastern and Western Huai Circuits during the Jiaqing reign of the Qing. He bought the Lesser Exquisite Mountain Abode in 1818 to build his own garden with plenty of bamboos in it. Apart from bamboos, the garden is also renowned for its rockeries.

姚正镛，清书画家、金石家。与黄应泰五子锡禧交厚。

Yao Zhengyong (1811-?), a painter, calligrapher and expert in the study of inscriptions on ancient bronze and stone tablets in the Qing. Yao was a close friend of Huang Xixi, the fifth son of Huang Yingtai.

郭熙，字淳夫，山水画家、绘画理论家。北宋画院艺学，遍览历朝名画。子郭思将其绘画理论归纳于《林泉高致集》。

Guo Xi (c. 1000-c. 1080), style name Chunfu, a landscape painter and painting theorist. A member of the Royal Art Academy of the Northern Song, he was able to appreciate the paintings of all periods to his heart's content, which culminated in his series of theories on painting which his son Guo Si (c. 1055-c. 1130) collected in *The Lofty and Sublime Messages of Forests and Streams*.

戴熙，清诗人、画家、士大夫。善画人物、花鸟。道光时宫廷画多出其手。著有《习苦斋题画》，于画理多有论述。

Dai Xi (1801-1860), a poet, painter and scholar-official of the Qing, good at paintings of figures, flowers and birds. An excellent painter, Dai contributed many works for the royal family during the Daoguang reign. The *Colophons on Paintings of the Studio of Hard Practice* is a collection of colophons and notes in which Dai developed his painting theory.

27

周馥，晚清重臣李鸿章下属。农历二月买下此园，半年后入住。园内假山林立，石径盘旋，因得名“小盘谷”。

Zhou Fu (1837-1921), a senior official under Li Hongzhang (1823-1901) in the late Qing. He bought the garden in lunar February and moved in six months later. The garden, the Small Meandering Valley, took its name for its footpaths winding through a cluster of artificial mountains.

28

徐乃光，中国驻纽约第一任领事。其父徐文达与周馥同乡，亦为莫逆之交。文达始构此园。

Xu Naiguang (1859-1922), the first Chinese consul to New York, whose father Xu Wenda (1825-1890), a bosom friend and fellow townsman of Zhou Fu, built the garden.

29

陈鸿寿，号曼生，杭州人，清篆刻家，工诗书画，亦善治紫砂壶。

Chen Hongshou (1768-1822), sobriquet Mansheng, a native of Hangzhou and a seal engraver in the Qing who was also good at poetry, calligraphy, painting, and the making of boccaro teapots.

30

【从周案十】据友人耿鉴庭云：“九狮石在池上亦有，积雪时九狮之状毕现。”今毁。

[Chen Congzhou: Note 10] According to my friend Geng Jianting

(1915-1999), "The nine-lion rockery is also available on the pond. When cocooned in snow, the images of these lions are displayed to the minute detail." But today this rockery has long been destroyed.

31

臧谷，晚清扬州诗人、书法家，爱菊艺菊。友人购得李斗书《九狮山》轴，请其为之题诗，遂题诗四首。其中有“卷石洞天今不见，水环小阜迹仍留”句。

Zang Gu (1834-1910), a poet and calligrapher of the late Qing in Yangzhou. He was also known for his love and cultivation of chrysanthemums. Upon the request of a friend who had just bought the scroll "Nine-Lion Mountain" by Li Dou to compose some verse on it, Zang came up with four poems, one of which contains the line, "The Rolling Stone Cavern domain is no more, but the hill surrounded by water remains."

32

周馥，字叔弢，扬州人，周馥孙。新中国成立后，历任天津市长、第一至第五届全国人大常委会委员等。同治五年，与父亲住进小盘谷，辛亥革命爆发后与祖父离开家乡。1963年，视察扬州古典园林时重访故园。

Zhou Xian (1891-1984), style name Shutao, a grandson of Zhou Fu. After the People's Republic was founded, he was, among other important posts he had assumed, mayor of Tianjin and a five-time member of the Standing Committee of the National People's Congress. A native of Yangzhou, he moved with his father in 1866 to live in the Small Meandering Valley and left his hometown with Zhou Fu after the Revolution of 1911 broke out. In 1963, he paid a return visit to the estate on an inspection tour of traditional gardens in Yangzhou.

33

周煦良，周馥曾孙，叔弢之侄。著名英国文学翻译家、诗人、作家。叔侄二人童年皆在小盘谷度过。

Zhou Xuliang (1905-1984), a great grandson of Zhou Fu and a nephew of Zhou Xian, an accomplished translator of English literature, poet and writer. Both Xian and Xuliang had spent their childhood at the Small Meandering Valley.

34

李松龄，字鹤生，经营钱庄，1910年购得旧宅，三年后拓成逸圃。

Li Songling (1871-1937), style name Hesheng, owner of several private banks, bought an old estate in 1910, renovated it and completed the Garden of Matchless Talent three years later.

35

原文作“月门”，门实为八角。

The original text put it as a moon gate, which is actually octagonal.

36

苏轼，号东坡居士，宋朝大文豪，诗文书画集大成者。

Su Shi (1037-1101), sobriquet Retired Scholar of Eastern Slope, a great man of letters whose literary accomplishments represented the epic of poetry, prose, calligraphy and painting of the Song.

37

孔武仲，北宋诗人、多产作家，与文学名宿欧阳修、苏轼、苏辙、黄庭坚等过从甚密。撰《芍药谱》，北宋王观、刘攽亦著芍药谱。而时，扬州芍药声名鹊起。

Kong Wuzhong (1042-1097), a poet and prolific writer of the Northern Song closely associated with such literary luminaries as Ouyang Xiu, Su Shi, Su Zhe(1039-1112), and Huang Tingjian (1045-1105). His *Compendium of Herbaceous Peony* was one of the three compendia on herbaceous peony in the Northern Song,

during which time Yangzhou rose to fame with the plant. The other two compendia were written separately by the poet Wang Guan (1035-1100) and the historian Liu Ban (1023-1089).

38

一枝一花为兰，香气馥郁；一枝数花为蕙，香气清淡。二者并称，喻高洁之士。

The orchid has one blossom on a stem with rich aroma, while the *hui* orchid has several blossoms on a stem with faint aroma. Both flowers are often mentioned in the same breath in ancient Chinese literary works in celebration of men of virtue.

39

此区域包括湖北南部、湖南、重庆东南部、广东北部及广西部分地区，谚有“湖广熟，天下足”。杉木在此地区生长迅速，木材广泛用于建造屋舍、桥梁、船只等。

This region encompasses south Hubei and Hunan provinces, southeastern Chongqing, north Guangdong and a small part of Guangxi, where, as the saying goes, "When farm harvests are good in Hu-Guang, the whole country will stay free from hunger." China fir grows fast in this region, and its timber is widely used in the building of houses, bridges and ships.

40

汪泰阶，字伯屏，于民国初年构建了建筑的东路部分；其父汪竹铭早在晚清末年构建了中西两路。

Wang Taijie (1889-1935), style name Boping, actually had the eastern column of the estate built at the beginning of the Republican years, while his father Wang Zhuming had had the central and western columns built at the end of the Qing.

41

名字出自《中庸》：赞天地之化育。

The name of the palace derives from a line in *The Way of the Mean*, "able to assist the transforming and nourishing powers of Heaven and Earth."

42

郑燮，号板桥，诗人、书画家，与汪士慎、黄慎、李鱣、金农、罗聘、高翔及李方膺并称扬州八怪。各博物馆争相珍藏其所画兰、松、菊、石，其竹尤为出色。

Zheng Xie (1693-1765), sobriquet Banqiao, a poet, calligrapher and painter, and one of the Eight Eccentrics of Yangzhou of the mid-Qing together with Wang Shishen (1686-1759), Huang Shen (1687-1768), Li Shan (1686?-1756), Jin Nong (1687-1764), Luo Pin (1733-1799), Gao Xiang (1688-1753) and Li Fangying (1696-1755). Zheng's paintings of orchids, pines, chrysanthemums and stones are much soughtafter museum pieces, and his bamboo paintings are the most outstanding.

43

贾沅，字颂平，光绪年间购得二分明月楼作为后花园。

Jia Yuan (1880-1944), style name Songping, bought the Loft of Two-Thirds Bright Moonlight as his back garden during the Guangxu reign of the Qing.

44

吴廷扬，字熙载，扬州人，篆刻家、书画家，实际是此园的第二任主人。前任主人为许公澍。吴氏之后住其园中的有书画家陈含光、牙雕大师黄汉侯等。20世纪60年代，陈从周考察扬州园林时曾拜访黄汉侯，并名其园为侯庐。

Wu Tingyang (1799-1870), style name Xizai, a seal cutter, calligrapher and painter and Yangzhou native, was actually the second owner of the garden. His predecessor was a salt merchant by the name of Xu Gongshu. Those who lived in it after Wu included the renowned painter and calligrapher Chen Hanguang

(1879-1957), and the ivory carving expert Huang Hanhou (1902-1976), who was visited by Chen Congzhou during his Yangzhou garden inspection tour in 1960s and after whom the estate was named by Chen.

45

卢殿虎，弃官从商，请造园名家俞继之为其构筑宅园。卢为镇扬汽车公司董事长，倡议并修筑了江北第一条公路，是真正意义上的“开路先锋”。

Lu Dianhu (1876-1936), an official-turned businessman, had his estate built by the famous landscape gardener Yu Jizhi. General manager of the Car Company of Zhenjiang-Yangzhou, Lu was a pathbreaker in the real sense thanks to his initiative and effort in building the first highway north to the Yangtze.

46

【从周案十一】《魏源集》中有记扬州园林盛衰之诗。《扬州画舫曲十三首》之一云：“旧日鱼龙识翠华，池边下鹄树藏鸦，离宫卅六荒凉尽，不是僧房不见花。”（凡名园皆为园丁拆卖，唯属僧管之桃花庵、小金山、平山堂三处，至今尚存。）《江南吟》注云：“平山堂行宫属园丁者，皆拆卖无存，惟僧管三处如故。故有“岂独平山僧庵胜园隶”句。魏氏于清道光十五年（公元1835年）构园于扬州新城仓巷，甃石栽花，养鱼饲鹤，名曰絮园。其时尚在太平天国革命战争之前。

[Chen Congzhou: Note 11] Poems on the rise and fall of the gardens in Yangzhou are found in the *Collected Works of Wei Yuan*. One of his "Thirteen Lyrical Pomes of Yangzhou's Painted Pleasure Boats" has it, "In old days fish and dragons befriended emerald verdure, swans dived into the pools and crows nested in the trees; with the land of summer palaces lost in total desolation, no flowers can be seen where there are no monk's abodes." (All the famous gardens were dismantled and sold by garden owners. Only the Peach Flower Nunnery, Lesser Golden Hill, and

Mountain-Level Hall survived because they were under the care of local monks.) The footnote to his "Song of Jiangnan" says, "At the Mountain-Level Hall all the summer palaces owned by gardeners were torn down and sold, and only the three properties managed by monks remained intact." This gives rise to the line, "Isn't it that the monks and nuns of the Mountain-Level Hall are better than garden slaves?"

Wei Yuan (1794-1857), an enlightenment thinker of the late Qing who was a friend of Lin Zexu (1785-1850), built a garden at Granary Lane in the New City of Yangzhou, which he named "Pristine Garden." In it he had rocks piled up, flowers planted, fish bred and cranes raised. This happened before the Heavenly Kingdom Uprising.

Small-Rock Mountain Abode, Yangzhou—Shitao's Craft of Artificial Mountains 扬州片石山房——石涛叠山作品

1

【从周案十二】应作王庭余。

[Chen Congzhou: Note 12] It should be Wang Tingyu.

2

傅抱石，现代山水画家，笔力虬劲飘逸，善画祖国的名山大川，尤擅雨景。崇拜石涛，对其一生、画作、理论多有研究。

Fu Baoshi (1904-1965), a modern-time landscape painter known for his robust and untrammled brushwork and splendid portrayals of his motherland's mountain cliffs, waterfalls, and rainy scenes. An admirer of Shitao, he did a great deal of research into the painter's life, works, and theory.

3

署名原有“一枝阁”，一枝阁在南京而非扬州。——许少飞

The original list also includes the Lone-Twig Belvedere, which is actually a building in Nanjing.—Xu Shaofei

4

据傅抱石研究，石涛生于崇祯三年，即1630年，但近来研究认为其生于1642年。——许少飞

According to Fu Baoshi, Shitao was born in 1630, the third year of Emperor Chongzhen's reign (1628-1644), but recent researches put it as 1642.—Xu Shaofei

5

【从周案十三】据友人扬州牙刻家黄汉侯说，石涛墓在平山堂后，其师陈锡蕃画家在世时，尚能指出其地址，后渐湮没。

[Chen Congzhou: Note 13] According to my friend, Huang Hanhou (1902-1976), an ivory-carving specialist in Yangzhou, Shitao's tomb is found behind the Mountain-Level Hall. When Huang's teacher, the painter Chen Kanghou (1866-1937), style name Xifan, was around, he could point out its location, but the tomb had since fallen into oblivion.

6

【从周案十四】1820年刊酿花使者纂著《花间笑语》谓：“片石山楼为廉使吴之黼字竹屏别业，山石乃牧山僧所位置，有听雨轩、瓶罍斋、蝴蝶厅、海楼、水榭诸景，今废，只存听雨轩、水榭，为双槐茶园。”此说较迟，乃酿花使者小游扬州时所记，似为传闻之误。

[Chen Congzhou: Note 14] In *Banterns Amidst Flowers*, a book published in 1820, the author Flower-Fermenting Envoy says, "The Mountain Loft of Small Rocks was the estate of the surveillance commissioner Wu Zhifu, style name Zhuping. The artificial mountain in it was arranged by Monk Mushan. The other sceneries in it, such as the Rain-Listening Verandah, the Chamber of Bottles and Winecups, the Butterfly Hall, the Oceanic Loft, and the Waterside Gazebo, have fallen into oblivion today.

Only the Rain-Listening Verandah and the Waterside Gazebo are still there in the Twin Pagoda Trees Tea House." Since the author noted down this piece of information during a hasty visit to Yangzhou, it might be mere hearsay.

Qiao's Garden, Taizhou 泰州乔园

1

此处天王指佛教的护世四天王：东方持国天王持琵琶，南方增长天王持宝剑，西方广目天王右手捉龙、左手持塔，北方多闻天王左手持银鼠、右手持伞。寺庙里，天王殿在正殿即大雄宝殿之前。

The heavenly kings here refer to the four guardian gods who protect the four quarters of the universe: Dhrtarashtra holding a stringed instrument (east); Virudhaka holding a sword (south); Virupaksha holding a serpent and a stupa(west), and Vaishravana holding an umbrella and a mongoose (north). The Heavenly Kings' Hall is always situated in front of the main hall, or the Hall of Sakyamuni, in a temple.

2

蒋科，字士登，号瀛洲，泰州人士，隆庆二年（1568年）进士。

Jiang Ke (1533-1584), style name Shideng, sobriquet Yingzhou, a native of Taizhou and a successful candidate of the imperial examination in 1568.

3

同光是后唐年号。

Tongguang, a reign title (923-926) of the Later Tang (923-936).

4

嘉定桥与乐真桥相对而斜，状如八字，故名八字桥。

The Jiading Bridge and the Lezhen Bridge are characterized by the flare-wing abutments that resemble the Chinese character 八

on their bank piers, hence the name.

5

陈应芳，字元振，号兰台，宅园原属其祖陈鸢。万历年间，应芳将园并入宅中。

Chen Yingfang (1534-1601), style name Yuanzhen, sobriquet Lantai. The mansion used to belong to Chen Yuan, his grandfather. During the Wanli reign, Yingfang added the garden to the mansion.

6

陈应芳曾孙陈志纪上书触怒龙颜，刑部任职的田敬锡奉旨来抄陈家，并成为日涉园主人。

Chen Zhiji, a great-grandson of Chen Yingfang, greatly offended the emperor with his improper memorial. Tian Jingxi, then with the Ministry of Punishments, confiscated the Chens' property under orders and became the garden's owner afterwards.

7

吴文锡，号莲芬，其仪征故宅破败，故买下此园。经三月修整，园子焕然一新。

Wu Wenxi (1800-1870), sobriquet Lianfen, bought the garden after he found his house in Yizheng dilapidated. The garden took on a new look after three months' renovation.

8

乔松年，字健候，号鹤齐，儒商。乔居于高位，且距今最近，因此乔园之名留存至今。

Qiao Songnian (1815-1875), style name Jianhou, sobriquet Hechai, a scholar official and merchant in one. Due to his high rank and closeness to our time, the garden has been known as the Qiao's Garden ever since.

据《道光泰州志》记载，高凤翥，字象六，号果亭，泰州人士。高垂庆，字麓庵，凤翥曾孙。高家阔绰，苦心经营此园，终成十四景。

According to the *Annals of Taizhou in the Daoguang Reign*, Gao Fengzhu (1707-1771), style name Xiangliu, sobriquet Guoting, a native of Taizhou. Lu'an is the style name of Gao Chuiqing, Fengzhu's great grandson. The well-off Gaos took great pains in planning and improving the garden, which culminated in the fourteen sights.

周庠，字西苓，书画家，嘉庆十五年（1810年）举人。东台人士，距泰州较近。

Zhou Xiang, style name Xiling, a provincial graduate in 1810 and a painter and calligrapher of his time in nearby Dongtai.

堂名源于王维诗：万壑树参天，千山响杜鹃。

The name derives from a line of Wang Wei's poem, "Trees reach out to the sky in ten thousand valleys, / Cuckoos cry in a thousand mountains."

堂下原有一井，故名。

There used to be a well below the hall, hence the name.

阁下原有一松，故名。

There used to be a towering pine below the belvedere.

此屋在竹林中部，将竹林一分为二。

Located in the center of the bamboo forest, this cottage divides

the forest in two.

15

亭旁树上原有一鸟巢。梅兰芳大师祖籍泰州，1956年返乡祭祖、演出，下榻因巢亭。

There used to be a nest on the tree beside the pavilion. Mei Lanfang, a native of Taizhou, stayed here in the spring of 1956 when he came back for an ancestral sacrifice and a special performance.

16

此处“午”通“抚”，是主人抚琴处。

The character 午 here is interchangeable with 抚. This was where the master played his zither.

17

堂名源自老莱子，楚国隐士，行年七十，常著五色斑斓之衣，为婴儿戏于亲侧。陈应芳希望陈家人都能高寿。实际上，陈家是个长寿家族，曾祖陈佐为百岁翁，祖父陈鸞年九十八岁，兄应旂年九十六岁。

The name derives from Lao Laizi, a hermit of the Kingdom of Chu in his seventies who himself in patterned clothes entertained his parents with children's games. Chen Yingfang cherishes the hope that his family could enjoy the blessing of longevity. Actually, the Chens have produced quite a few centenarians or the like over the years. For example, Chen Zuo, Yingfang's great grandfather, lived over one hundred years; Chen Yuan, his grandfather, died at 98 and Chen Yingqi, Yingfang's brother, at 96.

18

舫上一联曰文思如潮堪折桂。桂花在古代象征着科举高中。

A line of the couplet flanking the boat reads: He is endowed with so many literary inspirations in writing that he can reap the

osmanthus. The osmanthus is a symbol of the championship in imperial examinations in ancient China.

A Note on Rebuilding Water-Inked Garden 重修水绘园记

1

冒襄，字辟疆，号巢民，如皋人，明清之际文学家。少有文名，然科场失意，后参加复社这个青年士子兴复古学、反对清朝的文学、政治团体。毛主席说他“具有民族气节……隐居山林，不仕清朝”。

Mao Xiang (1611-1693), style name Pijiang, sobriquet Chaomin (Den Dweller), a native of Rugao and a man of letters in the Ming-Qing transition. A total failure at the imperial examinations despite his high literary reputation since his teens, he joined the Rejuvenation Society, a literary and political organization of young intellectuals aimed at the revival of traditional learning and resistance against the newly-established Qing government. As Chairman Mao remarked, Mao Xiang was a man of real integrity because he, as a diehard of the Ming, refused to assume offices in the Qing and chose to live in seclusion.

水绘园实为冒一贯在万历年间筑成；辟疆是一贯的四世孙，邀请名家张涟对园子进行扩建，并臻于完善。一时名流云集，在园内吟诗唱和。其挚友杜爽有诗曰：大地绘草木，天汉绘文章，雄赋绘扬马，丽翰绘钟王，此庵胡奇绝，乃绘明月光。

As a matter of fact, this garden was built by Mao Yiguan during the Wanli reign of the Ming, but it was his fourth-generation grandson, Mao Xiang, who had it expanded and brought to excellence by Zhang Lian, the famous garden crafter. Since then the garden was thronged with men of letters who came to compose and recite poems. Du Shuang, one of Mao Xiang's best friends, remarked, "The earth is painted by grass and woods, the Milky Way by patterns and figures. Yang Xiong and Sima Xiangru compose rhapsodies; Zhong Yao and Wang Xizhi wield brushes.

Why this place is so bewitchingly exotic? Because it is an ideal site to paint under bright moonlight."

2

董白，字小宛，秦淮名妓。嫁入冒家，与上下相处融洽，帮忙料理家务，陪辟疆游于诗画。清兵南下，合家逃难，备受艰辛。辟疆身染重疾，小宛昼夜随侍，半年时日下来，身体不堪一击。

Dong Bai (1624-1651), style name Xiaowan, a renowned courtesan on the Qinhuai River before she was finally married to Mao Xiang. Well received by the whole family, she helped attend to household affairs besides keeping company with her husband in literary pursuits. The family endured great hardships when taking refuge in other places when the Qing troops stormed down to the south. Her health completely broke down after her painstaking care of the seriously sick Mao Xiang in half a year.

3

冒孝鲁，字景璠，冒广生三子。精通俄语、英语、法语等外语，曾任驻苏大使颜惠庆的一等秘书，后在复旦大学、安徽大学教授外语。徐悲鸿、梅兰芳分别于1934年、1935年去苏联进行文化交流，冒效鲁全程陪同翻译。

Mao Xiaolu (1909-1988), style name Jingfan, the third son of Mao Guangsheng. Well-versed in Russian, English, French and other foreign languages, he was First Secretary to Yan Huiqing, the then Ambassador to the Soviet Union, and then professor in Fudan and Anhui Universities. He served as interpreter and translator to Xu Beihong and Mei Lanfang when they went on their cultural exchange tours in the Soviet Union in 1934 and 1935 respectively.

4

冒广生，字鹤亭，著名学者。冒家书香门第，其为官一方，便搜集当地文献刻印集子，保存了地方文献。共和国元首对其礼敬有加，

建国初期重大事情上多次征集他的意见。

Mao Guangsheng (1873-1959), style name Heting, an erudite scholar among his other achievements. Brought up in the literary Mao family, he reserved local archives in his capacities of scholar-officials in different places. The leadership of the People's Republic held him in respect and solicited his advice on matters of importance in the beginning years of the country.

5

陈从周二十二岁那年与老师夏承焘拜谒了冒广生。

Chen Congzhou joined his teacher Xia Chengtao to visit Mao Guangsheng in Shanghai when he was twenty-two.

Gratification Garden, Inner Garden, Shanghai 上海的豫园与内园

1

潘允端，上海人，嘉靖年间任四川布政使。嘉靖三十八年（1559年）开始修建豫园，万历五年（1577年）解职回乡，扩大园林规模以奉养老亲。豫园当时占地70亩，曾为江南园林之冠。

Pan Yunduan (1526-1601), a native of Shanghai and provincial administrative commissioner of Sichuan during the Jiajing reign of the Ming. He began building the garden in 1559; when he was discharged from his officialdom in 1577, he returned to Shanghai and expanded the garden to what was known as the Gratification Garden to take care of his aging father. The 70-*mu* garden was one of the best traditional gardens in the Jiangnan area.

2

张南阳，号卧石生，明朝画家、造园家。南阳晚年三大杰作：潘允端豫园、陈所蕴日涉园及王世贞弇山园。

Zhang Nanyang (1517-1596), sobriquet Hermit Reclining on a Stone, a Mingdynasty painter turned garden-maker whose

masterpieces were found in Pan Yunduan's Gratification Garden, Chen Suoyun's Garden for Daily Saunters and Wang Shizhen's Yanshan Garden.

3

祝允明，因骈枝号枝山。擅诗，工草书，与文征明、唐寅、徐祯卿并称江南四大才子。

Zhu Yunming (1460-1526), sobriquet Zhishan for the extra finger growing on his hand. Well-versed in poetry and deft in cursive-script calligraphy, he was one of the Four Talented Scholars of Central Suzhou together with Wen Zhengming(1470-1559), Tang Yin (1470-1523) and Xu Zhenqing (1479-1511).

4

【从周案十五】在1958年的兴修中，玉玲珑湖石及九狮亭、得月楼等皆复原，并在中部开凿了大池。

[Chen Congzhou: Note 15] The Exquisite Jade Boulder, the Nine Lions Pavilion and the Moon-Bestowed Loft were restored, with a big pond dug in the center of the garden in a 1958 refurbishment project.

Shen's Garden, Vernal Waves Bridge, Shaoxing 绍兴的沈园与春波桥

1

禹迹寺，在绍兴城东南四里。大禹（夏朝第一位君主）治水有功，遂建寺祭之。东晋郭姓将军建寺，至今约1600年。

The temple, located two kilometers southeast of Shaoxing, is devoted to King Yu (or the Great Yu, the King of Xia, the first Chinese dynasty from the 22nd to 16th centuries BC) for his extraordinary flood control feats. Built by a general surnamed Guo in 416 in the Eastern Jin, the temple has been around for about 1,600 years.

【从周案十六】绍兴同样尚有一座春波桥在城外。宝庆《会稽志》云：“在会稽县东南五里，千秋鸿禧观前，贺知章诗云：‘离别家乡岁月多，近来人事半消磨，唯有门前鉴湖水，春风不改旧时波。’故取此桥名。”现在沈园前的春波桥，正对禹迹寺，嘉泰《会稽志》及乾隆《绍兴府志》均名禹迹寺桥，清光绪时重修，改名为春波桥。

[Chen Congzhou: Note 16] There is another Vernal Waves Bridge in the suburbs of Shaoxing. *The Gazetteer of Kuaiji County* of the Baoqing reign (1225-1227) says that it is situated "five *li* to the southeast of the county seat of Kuaiji, and in the front of the Taoist Temple of Immortal Well-being." As He Zhizhang (659-744), a poet of the Tang and a native of Shaoxing, says in his poem, "Upon Returning Home," "Being absent from my hometown for so long, / I learn recently old folk's been half outworn. / Yet before my door the Mirror Lake retains its way, / Whose waves changed not, even under spring wind's sway." From these lines comes the bridge's current name. The Vernal Waves Bridge in front of the Shen's Garden sits opposite the Temple of King Yu's Footprints. Hence the bridge's original name, "Bridge of the Temple of King Yu's Footprints," which appears in the *Gazetteer of Kuaiji County* of the Jiatai reign (1201-1204) of the Song and the *Gazetteer of Shaoxing Prefecture* of the Qianlong reign of the Qing. It was not until the bridge was rebuilt during the Guangxu reign of the Qing that it was given its present name.

陆游，号放翁，南宋史学家、散文家、诗人，作诗万首，著文许多。诗尤为多产，简易晓畅，关切实际。

Lu You (1125-1210), sobriquet Fangweng (Old Man Set Free), a great historian, prose writer and poet of the Southern Song (1127-1279) noted for his production of ten thousand poems as well as numerous prose pieces. Primarily a prolific poet, Lu

gained renown for his simple, direct expression and for his attention to realistic details.

4

唐婉未能给陆氏传宗接代，兼与陆游夫妻恩爱恐会阻碍仕途，故陆母大怒。

The mother's wrath stemmed, among other things, from Tang Wan's failure to bear a son for the family and the fear that her intimacy with Lu You was getting in the way of his pursuit of officialdom. The causes of the divorce remain in dispute.

5

红酥手，或曰为红色手形面点，或曰为红焖猪蹄。无论如何，这句都表达了陆游对前妻无法克制的爱和对劳燕分飞的悔恨。

The term *hongsushou* may be interpreted as a tasty food in red color, either handshaped pastry or braised pork trotters. In either way, the line expresses Lu's insuppressible love for his ex-wife and his remorse for the divorce.

6

此处指潘岳，曾任西晋河阳县令，作《悼亡诗三首》哀悼亡妻。

This refers to Pan Yue (247-300), who once served as the Heyang Magistrate in the Western Jin. Pan composed the "Three Poems in Dirge" in memory of his belated wife.

7

中国古典文学中，常以此喻指美人走路神态貌似惊鸿，文人骚客认为美女体态轻盈，会令大雁自惭形秽飞走。典出曹植《洛神赋》。

In traditional Chinese literature, this metaphor is repeatedly used to stand for a lady who walks with the grace of "a startled swan," since scholars believe that such a light-footed beauty would shame wild geese into fleeing. The term originally appeared in "A Rhapsody for the Goddess of Luohe River" by Cao Zhi (192-232),

West Lake Gardens, Hangzhou 西湖园林风格漫谈

1

汪为霖，号春田，清中期书画家、造园家。其《小山泉阁诗存》，集诗近千首，共八卷。晚年，雇戈裕良为其在江苏如皋建文园。

Wang Weilin (1763-1822), sobriquet Chuntian, a calligrapher, painter and landscape gardener of the mid-Qing, renowned for his *A Repository of Verse of the Small Mountain Fountainhead Belvedere*, an eight-volume collection of close to a thousand poems written by him. In his late years he employed the most famous artificial mountain builder Ge Yuliang (1764-1830) and paid him generously to refurbish the Literary Garden in his hometown Rugao in Jiangsu province.

2

传说，湖底有头金牛，故西湖亦名金牛湖。湖水干涸，则金牛吐水，把湖填满。金牛所现之处即为涌金门。

Legend has it that a gold bull habitats at the bottom of the lake, so the West Lake is also known as the Gold Bull Lake. Whenever the lake runs dry, the bull will fill it up by pouring water out from its mouth. The Gold-Revealing Gate is where the bull is revealed.

3

王勃，《滕王阁序》：四美具，二难并。四美指“良辰、美景、赏心、乐事”，二难指“贤主、嘉宾”。

The "four elements" refer to beautiful day, beautiful scenery, joyfulness, and happy event, which are hard to come by all at once along with the "two difficult components" (an esteemed host and a horde of graceful guests), but which were all available at a banquet held at the Prince Teng's Pavilion. Wang Bo (c. 650-c. 676), "A Tribute to Prince Teng's Pavilion": "Both the 'four

beautiful elements' and the 'two most wanted components' are available today."

4

据《淳祐临安志》载，旧有郡人雷就筑庵所居，故名雷峰。

According to the *Annals of Lin'an in the Chunyou Reign*, a native of Lin'an known as Lei Jiu once inhabited in a hut on the peak, hence the name, Lei's Peak.

5

韬光，诗僧，唐长庆间自蜀至钱塘，行前其师嘱曰，“遇天可前，逢巢则止。”游至巢枸坞时，正值白居易（字乐天）任杭州刺史，遂止，于灵隐山西北筑寺，与白交游。寺中有观海亭，是山中观海佳处。

Taoguang (*fl.* 9th century), a monk poet who traveled from Sichuan to Hangzhou during the Changqing reign (821-824) of the Tang. It was said when Taoguang arrived in Hangzhou, he found himself at a col with a bird-nest amid twisted trees, where he chanced upon a man whose sobriquet was "Happy Man from Heavens," who turned out to be the great poet Bai Juyi. The place and the man reminded him of his mentor's advice before his departure, "Go ahead when you reach the heavens, and stop right away when you come across a bird's nest." Thus he built a temple northwest of the Soul's Retreat Mountain, settled down in it, and made friends with Bai. The temple has long been famous for its Sea-Watching Pavilion, where is the best place to watch the sea in the mountain.

6

传说，南宋年间，西湖西有官家酿酒作坊，取金沙涧溪水造曲酒。夏日荷花盛开，荷香酒香沁人心脾，遂有此景。

It is said that in the Southern Song, an official winery west of the West Lake was making wine with water from the nearby Golden

Sand Creek, so that when lotuses in the lake bloomed in summer, the air would become heady with a mixture of the aromas of flowers and wine. Hence the name of the scenery.

Slender West Lake, Yangzhou 瘦西湖漫谈

1

王士禛，号渔洋山人，曾任扬州府推官、左都御史、刑部尚书，颇有政声。清初著名诗人，一生著述500余种，诗作4000余首。《渔阳古诗选》三十二卷，几乎囊括自汉至五代以来约150位诗人所有著名的五言及七言诗。康熙三年上巳节主持虹桥修禊，流芳中国文学史。此处所引是其《冶春绝句》的最后一句。

Wang Shizhen (1634-1711), sobriquet Hermit from Yuyang, was a successful official who held a series of important positions, including chief justice of Yangzhou, president of the Censorate, and minister of punishments of the early Qing. But he is better known as a preeminent early-Qing poet who authored over 500 literary works and 4,000 and more poems. The Selected Ancient Poems of Yuyang of 32 volumes contains virtually all the renowned five- and seven-character poems by 150 or so poets from the Han (206 BC-220 AD) to the Five Dynasties (907-960). The spring outing at Rainbow Bridge he hosted on the third day of the third lunar month of 1664 has come down in Chinese literary history as a legendary event. What is quoted here are the concluding lines of his classic "Spring Outing Quatrain."

South-and-North Lakes, Haiyan 南北湖

1

20世纪80年代，南北湖生态环境遭受严重破坏。这里大肆炸山砍树，滥采石材木料，连山鸟野禽也多遭捕杀。陈从周听闻后，在《人民日报》《解放日报》《新民晚报》上，呼吁拯救南北湖，还奔波于杭嘉湖一些领导机关，陈述保护南北湖之必要。后来，陈从

周直接上书江泽民，言“浙江海盐南北湖为有名风景区，自从周呼吁后略有好转，但地方破坏风景太甚，民情愤怒，附上《中国环境报》印件一张，公可抽空一阅，给浙江省与海盐一批示，望还我自然，珍惜风景，以公之威望，必能救大好河山也……敬恳泽公开恩，救救南北湖！”1991年3月，主席批转省长阅。随后，文件从省里传达到地方，立即停止炸山捕鸟，南北湖终于得救。可以说没有陈从周，就没有今天风光秀美的南北湖。陈从周虽不是海盐人，却在前前后后近三十年的时间里，为南北湖奔走呼号。为纪念陈从周教授，海盐人在南北湖建造了陈从周艺术馆。

In the 1980s, the South-and-North Lakes suffered serious environmental woes in the aftermath of rampant detonation of mountains, quarrying, denudation of woods, and bird hunting. Upon hearing the bad news, Chen Congzhou appealed for rescue efforts through newspapers such as the *People's Daily*, the *Jiefang Daily* and the *Xinmin Evening News*, and lobbied local governments for preservation of this scenic resort. When the situation came to a head in January 1991, he wrote directly to President Jiang Zemin, in which he said, "The South-and-North Lakes in Haiyan, Zhejiang is a celebrated scenic zone, but it is being gravely damaged in spite of slight improvements since my appeal for its protection, which has roused mounting public indignation. Please find attached a print copy of the *China Environment News* for Your Excellency to get around to having a look. I sincerely hope that you issue an instruction to the local governments of Zhejiang and Haiyan to ask them to cherish the scenery and bring the Mother Nature back. I believe, with the high prestige of Your Excellency, this fascinating place will surely have its day... Show some mercy, Your Beneficent Excellency, and do something to save the South-and-North Lakes!" In March, 1991, an urgent instruction from the president was delivered to the Provincial Governor of Zhejiang and relayed to the local government of Haiyan county, calling for an immediate end to mountain detonation and bird killing. The South-and-North Lakes were finally rescued. It is fair

to say that the fascinating South-and-North Lakes would have been no more without Chen Congzhou's three-decade efforts for its protection and reservation. For this reason an art museum in commemoration of him was built on the spot in 1998.

2

南北湖，因湖中有堤将湖分为南北两半而得名。堤阔10米，长500米，乃清康熙、乾隆年间海盐知县张素仁、鲍鸣凤两次浚湖时修筑而成。

Ten meters wide and five hundred meters long, the dyke runs across the lake and divides it in two. Hence its name. The dyke was built for water dredging purposes, first by Magistrate Zhang Suren in 1672, the 11th year of the Kangxi reign of the Qing, and then by Magistrate Bao Mingfeng in 1770, the 35th year of the Qianlong reign.

3

落雁指落雁轩，垂虹指垂虹桥。

The wild goose here refers to the Wild Goose Verandah, and the sinking rainbow stands for a bridge with the same name.

4

藏书家蒋光墉为避战乱，将海宁老家藏书转至海盐西涧草堂。陈从周先生夫人蒋定，亦是海宁蒋家后人。

The hut used to be a library of the book collector Jiang Guangyu (1825-1895), who moved his collections from his native Haining to this hut in Haiyan to avoid the chaos of war. Jiang Ding (1918-1986), Mr. Chen Congzhou's wife, was a descendant of the Jiangs in Haining, with her tomb built by the side of the South-and-North Lakes.

5

顾况，唐代海盐诗人，生前常来此赏景。

Gu Kuang (c. 730-806), a famous Tang-dynasty poet born in Haiyan, who often came here to admire the scenery during his lifetime.

6

据《澈水志》记载：上有谭仙庙，相传为南唐道家谭峭炼丹得道之处。

According to the *Gazetteer of Ganshui County*, there used to be a temple in memory of Tan Qiao (860/873-968/976), a famed Taoist alchemist of the Tang dynasty, who made pills of immortality and attained the Way.

7

北京八达岭是明长城中保存最好的一段。

The Badaling Fort in Beijing is situated on the best preserved section of the Ming-dynasty Great Wall.

8

明嘉靖三十二年（1553年），海宁卫指挥徐行健率军出谈仙岭，追歼倭寇，大张国威。三年后一役，寡不敌众，死于阵前。

Xu Xingjian (?-1556), a subordinate of Qi Jiguang and a Haining county garrison commander, headed his legions out of the Celestial Tan's Mountain, and pursued and wiped out Japanese pirates, greatly enhancing national prestige in 1553. He died a heroic death in a hopelessly out-numbered fight against the Japanese invaders three years later.

9

云岫庵建于北宋建隆年间，坐落于鹰窠顶山腰，内供观音菩萨。庵名源自陶渊明《归去来辞》中的“云无心以出岫，鸟倦飞而知返”。

Built in the early Jianlong reign (960-963) of the Northern Song, and situated 150 meters above sea level on the slope of the Eagle Nest Peak, this nunnery enshrines Bodhisatva Avalokitesvara. Its

name is derived from Tao Yuanming's "Homecoming Rhapsody": Free from care, clouds surge from behind the peaks; / Tired of flying, birds know it's time to go home.

10

传说，普陀山香火旺盛，观音菩萨劳累异常。她依计晚上跨海来此休息。可后来走漏了风声，善男信女遂夜里到庵里来烧香拜佛。故名。

Legend has it that Bodhisatva Avalokitesvara, much fatigued from receiving hordes of worshippers to her mythical domain at Mount Potalaka, she decided to retire across the sea to the Cloud-Enshrouded Nunnery for a good rest every night. But the secret was divulged in due time, so devout believers made their nightly pilgrimages to the nunnery. Hence the name.

Notes on Prince Gong's Mansion 恭王府小记

1

何其芳，现代诗人、散文家、文学评论家、红学家。初为新月社诗人，后来成为马克思主义文学理论家，是新中国文学研究的领军人物，为祖国的文学艺术事业做出巨大贡献。据说，恭王府就是《红楼梦》里的大观园，此说存疑。

He Qifang (1912-1977), a modern poet, prose writer, literary critic and Redologist. A Crescent Moon Society poet-turned-Marxist literary theoretician, he was a leading figure in New China's literary study, contributing tremendously to the country's literature and art. It is said that descriptions of the Grand View Garden, a major garden in *A Dream of Red Mansions*, was based on Prince Gong's Mansion, but such an opinion is still being questioned.

2

王昆仑，政治家、红学家。其《红楼梦人物论》是最早从历史唯物

主义角度来研究《红楼梦》的一部专著，其昆剧《晴雯》（晴雯是小说《红楼梦》中的一个丫鬟）亦深得观众喜爱。1962年，王昆仑陪同周总理再次参观了恭王府。

Wang Kunlun (1902-1985), a political figure and a Redologist whose *On the Figures in "A Dream of Red Mansions"* was the first work on the novel from a historical materialist perspective and whose Kunqu Opera *Qingwen* (a maid in the novel) met with considerable acclaim. In 1962, Wang paid another visit to the Prince Gong's Mansion, accompanying Premier Zhou Enlai.

3

朱家溍，南宋理学家朱熹的25世孙。朱家书香门第，凭其对古籍碑帖的熟稔，故宫博物院成立初期即被聘为专门委员。朱老不仅是文物专家，还是清史专家、戏剧研究家。

Zhu Jiajin (1914-2003), the 25th generation grandson of Zhu Xi (1130-1200), a Neo-Confucianist of the Southern Song. Hailing from a scholastic family, he served as a professional committee member in the Palace Museum in its beginning years with his profound knowledge about ancient books and tablets and calligraphy models. A cultural relics expert, he was also a Qing history expert and opera researcher.

4

奥斯伍尔德·喜仁龙，瑞典艺术史家、汉学家，芬兰出生，主要研究18世纪的瑞典、文艺复兴时期的意大利及中国艺术史。中国专著不计其数，包括《中国园林》《中国和十八世纪的欧洲园林》《中国绘画：大师与准则》《北京的城墙与城门》等。《中国园林》一书由纽约的罗纳德出版公司于1949年出版，印刷精美，内有许多喜仁龙拍摄的珍贵图片。陈从周先生或许记错了出版地点。

Osvald Sirén (1879-1966), a Finnish-born, Sweden art historian whose forte was the art of 18th-century Sweden, Renaissance Italy, and China. A Sinologist known by his Chinese name, Xi Renlong, he wrote prolifically about China, and his major books

in this field include *Gardens of China*, *China and Gardens of Europe of the 18th Century*, *Chinese Painting: Leading Masters and Principles*, and the *Walls and Gates of Peking*. The *Gardens of China* published by the Ronald Press, New York, in 1949, was beautifully printed, with many precious photos taken by Sirén. Mr. Chen Congzhou could have mistaken the place of publishing.

5

海子四周原有佛寺十座，故原名为“十刹海”，与“什刹海”读音相同。

The name used to be 十刹海, pronounced the same as 什刹海, for there used to be ten Buddhist temples around the lake.

6

和珅，号嘉乐堂，大学士、外交官、乾隆谗臣。乾隆帝年老昏聩，对其宠信有加，和珅借机垄断朝野、收受贿赂。嘉庆登基，没收和珅财产，故有“和珅跌倒，嘉庆吃饱”。和珅应为有记录的恭王府最早的主人。后来，园归乾隆之子庆禧王永璘。第三任主人恭王奕訢对园子加以整修扩建，恭王府之名延续至今。

Heshen (1750-1799), sobriquet Haller of Auspicious Joy, a Grand Secretary, diplomat and an infamous courtier whose influence with the aged Qianlong emperor allowed him to monopolize major governmental posts and accept bribes. When Emperor Jiaqing ascended the throne, his property was confiscated, hence the saying, "When Heshen stumbles, Jiaqing had eaten his fill." He was perhaps the earliest recorded owner of the estate. Later the garden came under Yonglin(1766-1820), Prince Qingxi, a son of Qianlong. The current name of the mansion derived from its third owner, Prince Gong, or Yixin (1833-1898), who refurbished and expanded it as it now stands.

7

锡晋斋的“晋”指晋朝陆机的《平复帖》。此帖为草隶体，共9行84

字。陆机是三国西晋之交的著名文学家、文学评论家、书法家。

The "prized Jin calligraphy model" refers to the "Recover" Copy Model, featuring a cursive script of eighty-four Chinese characters in nine lines in the handwriting of Lu Ji (261-303), a renowned writer, literary critic, and calligrapher of the period that spanned the Three Kingdoms and the Western Jin.

8

原诗为“南归路极天连海，唯有相思明月同”。

The original poem goes as 南归路极天连海，唯有相思明月同。

9

传说此为《红楼梦》女主人公居处。

Legend has it that the lodge was where the heroine of the novel *A Dream of Red Mansions* lived.

10

传说此为《红楼梦》男主人公居处。

As the legend goes, the court was where the protagonist of the novel *A Dream of Red Mansions* lived.

11

实际上，嘉庆帝只赐给庆禧王半个和珅的宅子，因为和孝公主与其夫丰绅殷德居于另一半宅子中。公主歿于道光三年（1823年），宅子才完全归到庆禧王名下，可惜庆禧王已于三年前逝去。

As a matter of fact, only half of Heshen's mansion was given by Emperor Jiaqing to Prince Qingxi, because Princess Hexiao and her husband Fengshenyinde were living in the other half of it. It was not until the princess' death in 1823 that the whole estate came under the name of Prince Qingxi, who died three years earlier though.

单士元，文物专家，致力于文物研究和保护，为明清建筑、档案研究做出了突出贡献。其《恭王府沿革考略》（陈从周先生或许将名字简记为《恭王府考》）一文发表于1938年，当时，此园为辅仁大学校舍。

Shan Shiyuan (1907-1998), a cultural relics expert. Devoted to the research and protection of cultural relics, he did great contribution to the study of architecture and archives of the Ming and the Qing. Shan's article, "A Brief Review of the History of Prince Gong's Mansion" (Mr. Chen Congzhou, could have remembered the name of the article as "A Study of Prince Gong's Mansion" for short), was published in 1938 when the estate served as the schoolhouse of Fu Jen University.

纳兰明珠，康熙帝时的重臣。传说，其宅子的西花园即为《红楼梦》大观园的原型。其子纳兰性德，字容若，是个才华横溢的诗人。据说性德是《红楼梦》主角贾宝玉的原型。

Nalanmingzhu (1635-1708), one of the influential officials under the reign of Emperor Kangxi. It is said that the western garden in his mansion was the prototype of the Grand View Garden in Cao Xueqin's *A Dream of Red Mansions*. Mingzhu's son, Nalanxingde (1655-1685), style name, a talented poet, was said to be the prototype of Jia Baoyu, the protagonist of the novel.

俞铭衡，字平伯，现代诗人、文人、红学家，晚清著名学者俞樾曾孙。好昆曲，其妻许宝驯乃业余昆曲家。随昆曲大家吴梅、陈延甫拍曲。1934年仲夏夜，与陈在清华工字厅举行曲集，次年初春第二次雅集。

Yu Mingheng (1900-1990), style name Pingbo, a modern poet, man of letters and Redologist. A great-grandson of Yu Yue

(1821-1907), a renowned scholar of the late Qing, he was also a Kunqu Opera enthusiast together with his wife, Xu Baoxun (1895-1982), a better opera amateur. He learned singing the opera from two masters, Wu Mei (1884-1939) and Chen Yanfu (fl. early 20th century). On a mid-summer night in 1934, Yu and Chen hosted a gathering of Kunqu Opera fans in the I-Shaped Parlor of Tsinghua University, which was followed by a second gathering in early spring the following year.

15

金山寺住持法海将其丈夫诱到寺内，白娘子为救夫君才水淹金山寺。

In order to save her husband, who was lured into the Golden Hill Temple by its abbot Dharma Sea, the White Maiden practiced witchcraft to flood the temple.

16

东汉末期三国鼎立，刘备为蜀国的开国之君。在孙权安排下，刘备娶了孙权妹妹。传说，刘备于甘露寺初见孙母，孙母满意异常，答应了女儿的婚事。这个传说虽不尽真实，却因《三国演义》和同名京剧而在民间广为流传。

Liu Bei (161-223), founder of the Shu Kingdom (221-263), one of the Three Kingdoms into which China was divided toward the end of the Eastern Han. Under Sun Quan's arrangement, Liu married Sun's sister. It is said that Liu first met Sun's mother in the Sweet Dew Temple. The old lady, feeling satisfied with Liu, agreed to her daughter's marriage. The story about the Temple, though not necessarily real, was widely known in the past, thanks partly to the influence of the *Romance of the Three Kingdoms* and of a Peking opera (actually an act of the whole play) named after this Temple.

17

孙权，三国吴的开国君主。吴国位于华东南京附近，建于222年，亡于280年。吴国都城建业即今天的南京。孙吴蜀汉势不两立，孙权安排妹妹婚事应出于政治军事目的。

Sun Quan (182-252), the founding emperor of the Wu, one of the Three Kingdoms. His kingdom occupied the area in eastern China around Nanjing and lasted from 222 to 280. Its capital, Jianye, was in present-day Nanjing. Sun arranged his sister's marriage probably for political-military purposes because Sun and Liu were rivaling rulers.

Summer Palace, Beijing 颐和园

1

米万钟，号友石，明末画家、书法家、造园家。书画家米芾后裔，亦是北京海淀勺园主人，北京大学校园里的夕园亦为其所规划。

Mi Wanzhong (1570-1628), sobriquet Youshi (A Pal of Rocks), a painter and calligrapher, garden designer in the late Ming. A descendant of the reputed calligrapher and painter Mi Fu (1051-1107), he was the owner of the Ladle-of-Water Garden in Haidian district, Beijing. The Sunset Garden on the Peking University campus is also a famous example of the gardens he designed.

2

陶渊明，即陶潜，东晋末至南朝宋伟大的山水诗人。中国第一位田园诗人，被称为“古今隐逸诗人之宗”。

Tao Yuanming (c. 365-427), aka Tao Qian, a great landscape poet of the interregnum between the Eastern Jin and the Song of the Southern Dynasties. The first landscape poet China ever produced, he is considered the great master of recluse poetry past and present.

3

瓮山是燕山余脉，金海指山前的湖。乾隆帝为母做寿，将山改名“万寿山”，将湖改名“昆明湖”。

The "Jug Hill" is an extension of the Yanshan Mountain, and the "Gold Sea" refers to the lake in front of it. Emperor Qianlong renamed the hill "Longevity Hill" and the lake "Kunming Lake" to mark his mother's birthday.

Mountain Summer Resort, Chengde 避暑山庄

1

【从周案十七】《四库全书》是清代乾隆年间（公元1772—1782年）编的一部大型丛书，内容广泛，保存并整理了大量中国古籍文献。全书共收古籍3503种，79337卷。分经史子集四部，故名《四库全书》。

[Chen Congzhou: Note 17] The largest collection of books in Chinese history, the *Complete Library of Four Branches of Books* features 79,000 chapters in 36,000 volumes and was produced in seven manuscript copies between 1773 and 1782 by more than 3,800 scribes. The four branches are: warehouse, storehouse, treasury and repository, which are in correspondence to the imperial library divisions of "Classics" (Chinese classic texts), "Histories" (histories and geographies in Chinese history), "Masters" (philosophers, artists, and scientists in Chinese philosophy, and "Collections" (anthologies of Chinese literature). The collection stored in the Belvedere of Literary Way (built in 1774-1775) was completed in 1784 as the fourth copy, the best preserved of all the copies. It was transported back to Beijing and kept in the Capital Library in 1914; today, it is housed in the China National Library, Beijing.

On Gardens 1 说园

1

【从周案十八】此文系作者1978年春应上海植物园所请的讲话稿，经整理而成。

[Chen Congzhou: Note 18] This article is adapted from a speech delivered at the invitation of Shanghai Botanical Garden in 1978.

2

《论语·子路第十三》：朋友切切偲偲，兄弟怡怡。

The Analects (Book Thirteen): "Critical and exacting with regard to the conduct of his friends; indulgent towards his brothers."

3

【从周案十九】见刘蓉峰（恕）《寒碧山庄记》：“予因而葺之，拮据五年，粗有就绪。以其中多植白皮松，故名寒碧庄。罗致太湖石颇多，皆无甚奇，乃于虎阜之阴砂磧中获见一石笋，广不满二尺，长几二丈。询之土人，俗呼为斧擘石，盖川产也。不知何人辇至卧于此间，亦不知历几何年。予以百觚艘载归，峙于寒碧庄听雨楼之西。自下而窥，有干霄之势，因以为名。”此隶书石刻残碑，我于1975年12月发现，今存留园。

[Chen Congzhou: Note 19] Liu Shu (1759-1816), style name Rongfeng, "Notes on the Wintry Emerald Mountain Abode": "To restore [the Mountain Abode], I toiled for five years until everything fell roughly into place. As I had planted many lacebark pines on the premises, I named it 'Abode of Wintry Emerald.' I had also erected quite a few Lake Tai rocks there, but none of them looked interesting until I came across a stalagmite no more than two feet in girth and some seven yards in length in a pile of sand and gravel at the north of the Tiger Hill. A local man told me that it probably came from Sichuan and they called it 'Axe-wrought Stone,' but nobody knew when it was carted to the place and by whom. I had the stalagmite shipped with a boat one hundred gu [One gu equals three liters] in loading capacity and erected to the west of the Listening-to-Rain Loft at the Wintry Emerald Mountain Abode. When observed at its foot, it seems to

be soaring into the skies. Hence its name." I found a fragment of this stalagmite inscribed in the official script, during a December 1975 visit, which can still be seen in the Lingering Garden today.

4

秦耀，明万历年间右副都御史、湖广巡抚，因诬陷获罪。获释回原籍无锡，继承曾叔祖秦金别业，秦金乃北宋秦观后人。他重整园林成二十景，并寄情其间。感于王羲之《答许椽》中“取欢仁智乐，寄畅山水阴”的旨趣，给园子起名寄畅园。

When Qin Yao (1544-1604) was released from prison after losing his positions as censor-in-chief and governor of the Hu-Guang region on false charges during the Wanli reign (1573-1620) of the Ming, he returned to Wuxi, his hometown, and settled down in a garden left behind by his paternal great granduncle Qin Jin (1467-1544), a descendent of the Northern Song poet Qin Guan (1049-1100). He rebuilt the garden and sought solace from the twenty new sights he had built into it. Inspired by the line, "I delight myself from the joy of benevolence and knowledge, and find solace in the coolness of mountain and water" in the sage calligrapher Wang Xizhi's poem, "In Reply to Xu Chuan," he gave the garden its present name, "Solace-Imbued Garden."

5

苏轼，《咏芍药》：多谢化工怜寂寞，尚留芍药殿春风。

Su Shi (1037-1101), "Ode to Herbaceous Peony": "Thanks to the Creator who, lest the goddess of spring feel lonely, leaves peony to bring up the rear of spring wind."

6

西泠饭店建于1962年，七层，西式风格。1985年并入香格里拉饭店，成为其东翼。

The Xiling Hotel is a seven-storied structure in Western style built in 1962, but its name has gradually fallen into oblivion after it

was incorporated into the ShangriLa Hotel and renamed "Eastern Wing" in 1985.

7

园名来自蠡湖，蠡湖形状颇似一只蚌壳挖出的浅勺。明末，人们附会蠡园与范蠡有关。范蠡为春秋末期军事家，辅佐越王勾践灭吴后，与西施泛舟湖上。

The garden is named after the Ladle Lake, which takes the shape of a shallow ladle fashioned out of a freshwater clamshell. Toward the end of the Ming, the name was reinterpreted as "Memorial Garden of Fan Li" (536-448 BC), a celebrated strategist of the late Spring and Autumn period, who went boating on the lake with his sweetheart Xi Shi (*fl.* 5th century) after assisting Gou Jian (520-465 BC) in vanquishing the dukedom of Wu (c. 12th century-473 BC).

8

舜以天下让善卷，善卷曰：“余立于宇宙之中……日出而作，日入而息，逍遥于天地之间而心意自得。吾何以天下为哉！悲夫，子之不知余也！”遂不受。于是去而入深山，莫知其处。

Some 4,000 years ago, a poet by the name of Shan Juan turned down King Shun's offer of throne to become a hermit in this cave. Hence the name. *Zhuangzi* ("Giving Away a Throne"): "Shun tried to cede the empire to Shan Ch'uan but Shan Ch'uan said, "I stand in the midst of space and time.... When the sun comes up, I work; when the sun goes down, I rest. I wander free and easy between heaven and earth, and my mind has found all that it could wish for. What use would I have for the empire? What a pity that you don't understand me!" (Trans. by Lin Yutang) In the end he would not accept, but went away, entering deep into the mountains, and no one ever knew where he had gone.

1

郑广文即为郑虔，盛唐作家、画家。天宝九年，唐玄宗设立广文馆，郑任博士。

Academician Zheng is Zheng Qian (691-759), a prominent high-Tang writer and painter. In 750, Emperor Xuanzong established the Academy for the Extension of Literary Arts with Zheng as "Chief Academician."

2

江湜，字弢叔，苏州人，清末诗人、官员，其诗语言简洁，多理学思想，亦精书画素描。诗论与当时正统不符，诗作风格多样，自成一家。

Jiang Shi (1818-1866), style name Taoshu, a native of Suzhou and a poet-official of the late Qing known primarily for his use of simple language in the general context of Neo-Confucianism. He was also expert in calligraphy, line drawing and brush painting. His theoretical views on poetry did not conform to the orthodox of his time, and his varied poetic styles established him as a master of poetry in his own right.

3

东晋画家顾恺之尝为西晋裴楷画像，颊上添三毛。问之，答曰益觉有神。

When the legendary figure painter Gu Kaizhi (c. 344-406) of the Eastern Jin (317-420) did a portrait of Pei Kai (237-291), a prominent official of the Western Jin(266-316), he added three hairs to Pei's cheek. When asked why, Gu replied that the addition embodied exactly the man's ability and insight, and it was a lot better than without the three hairs.

4

张岱，号陶庵，明清之际散文家、史学家，亦通茶道。江苏绍兴人士，以《陶庵梦忆》《西湖梦寻》最为人知，文字清新活泼，形象

生动。

Zhang Dai (1597-1689), sobriquet Taoan, a prose writer and historian who is also well-versed in tea ceremony in the Ming-Qing period. A native from Shaoxing, Zhejiang province, he is best known for the refreshingly lucid, lively and vivid writing style of his two essay collections, *Dreamy Memories of Tao'an* and *Searching for the West Lake in Dreams*.

5

龚自珍，浙江杭州人，清朝思想家、诗人、改良主义先驱。以《己亥杂诗》名世，述其仕途不顺之意。

Gong Zizhen (1792-1841), a native of Hangzhou, Zhejiang province, was a thinker, poet, and reformist of the Qing. He is most remembered for his *Miscellaneous Poems Written in a Year of "Ji-hai,"* in which he vented his frustrations with officialdom.

6

徐凝，《忆扬州》：天下三分明月夜，二分无赖是扬州。

Xu Ning (fl. 9th century), "Remembering Yangzhou": "If the shiny moon's light is to be divided into three shares under heaven, Yangzhou won't be happy even if offered two thirds of it."

7

钟惺，字伯敬，明末散文家。万历四十七年，游友人许自昌的梅花墅，三年后撰成《梅花墅记》。

Zhong Xing (1574-1624), style name Bojing, a prose writer of the late Ming. He visited the Plum Flower Villa as a friend of its first owner Xu Zichang (1578-1623) in 1619 and wrote these notes three years later.

8

三吴指吴郡、吴兴、会稽三地，是一个地理统称，自晋以来沿用。今指代江南地区。

The "three former Wu counties," referring to the three former counties of Wujun, Wuxing and Kuaiji, is a collective geographic term handed down from the Jin(265-420). Nowadays it is a byname for the Jiangnan area.

9

甫里即今日苏州吴中区甪直镇。

Fuli is Luzhi in present-day Wuzhong district, Suzhou.

10

童寯，建筑学家、建筑教育家。对东西现代建筑颇有研究，吸收西方建筑理论和技巧，发展了中国建筑。20世纪30年代研究古典园林，写成《造园史纲》和《江南园林志》。

Tong Jun (1900-1983), an architect and educator in architecture. An accomplished researcher on contemporary architecture in the East and the West, he contributed a lot to developing Chinese architecture by drawing on Western architecture theories and techniques. His studies of traditional gardens in the 1930s culminated in two writings, *An Outline of the History of Garden-Making* and *A Record of Jiangnan Gardens*.

11

杨兆鲁，近园主人。园建成后，邀请画家恽格、王翬、笪重光等雅集园内。杨作《近园记》，王作《近园图》，恽书石，笪为之题跋。

Yang Zhaolu (*fl.* 17th century), the owner of the Approximate Garden. Upon completion of the garden, he invited calligraphers and painters for a gathering of forty or so days, which produced a record written by himself and inscribed in stone in the handwriting of Yun Ge (1633-1690), and a painting by Wang Hui(1632-1717), with a colophon by Da Chongguang (1623-1692).

梁思成，梁启超之子，建筑家、建筑教育家，中国营造学社创始人。营造学社对研究古代中国建筑作出重大贡献。与妻子林徽因参与设计了国徽和人民英雄纪念碑。伉俪二人保护古建筑，研究古代建筑，为人所敬仰。

Liang Sicheng (1901-1972), an architect and educator in architecture, one of the initiators of the Society for the Study of Chinese Architecture which did a considerable share in the studies of ancient Chinese architecture. A son of Liang Qichao (1873-1929), Sicheng was deeply involved in the designing of the emblem of China and the Monument to the People's Heroes together with his first wife Lin Huiyin (1904-1955). The couple are always remembered for their effort in the protection of ancient structures and their work in ancient Chinese architecture.

On Gardens 3 说园（三）

1

李商隐，字义山，晚唐诗人，擅长讽刺诗、幽默诗、情感诗，但部分诗歌以过于隐晦迷离，难于理解。

Li Shangyin (813-858), style name Yishan, a late-Tang poet who is remembered for his satirical, humorous or sentimental poems, which, however, are often too allusive and obscure to be understood.

2

四王指王时敏（四人中年最长、成就最高）、王鉴（清朝推翻明朝后，由官员转为书画家）、王原祁（王时敏之孙）、王翬（王鉴、王时敏之徒，吸收古画的画法、布局、色彩等终成清初画圣）。与四王迥异的是同时代的四僧：石涛、朱耷、髡残、弘仁。四僧重视对生活、自然的真实感受，强调独抒性灵。

This refers to the four painters surnamed Wang, namely Wang Shimin (1592-1680), the oldest and most accomplished of the

four; Wang Jian (1598-1677), a lateMing official who became a calligrapher and painter after the Ming was toppled by the Qing; Wang Yuanqi (1642-1715), who was Wang Shimin's grandson; and Wang Hui (1632-1717), a disciple of Wang Jian and Wang Shimin who drew on the approaches, layouts and coloration of ancient paintings and eventually established himself as the "Sage Painter of the early Qing." Categorically different from the Four Wangs are their contemporary Four Monk Painters, Shitao, Zhu Da (c. 1626-1705), Kuncan (1612-1692) and Hongren (1610-1664), who advocated the painters' own feelings about life and nature with an unrestrained style.

3

晏殊，婉约派词人，北宋宰相。

Yan Shu (991-1055), a lyrical poet of the euphemistic and graceful school, and a high official who once served as a prime minister for a Northern Song emperor.

4

常建，盛唐诗人，诗作以田园风光主题为多。

Chang Jian (*fl.* 8th century), a poet of the high Tang whose main themes are rural sceneries and landscape.

5

马致远，元代著名戏曲家。因《天净沙·秋思》被称为秋思之祖。

Ma Zhiyuan (c. 1250-c. 1324), a renowned playwright of the Yuan whose poem "Autumn Nostalgia: To the tune of Heaven-Cleansed Sand" has established him as the "Father of Autumn Nostalgia."

6

叶梦珠，明代松江人，年十二往上海私塾就读，据其康熙二十七年《续编绥寇纪略》自序推知，康熙中叶尚在世。

Ye Mengzhu (1623-?), a native of Songjiang county who was educated during the Ming at age twelve in a private school in Shanghai and became an active writer who, judging from his 1688 preface to *A Sequel to Brief Records of Pacification of Bandits*, was still around during the mid-Kangxi reign.

7

恽格，字寿平，号南田，清初书画家，常州画派开山鼻祖。此段引自其《拙政园图》跋。

Yun Ge (1633-1690), style name Shouping, sobriquet Nantian, a calligrapher and painter of the early Qing and founder of the Changzhou school of painting. This passage is quoted from the colophon to his "Picture of the Humble Administrator's Garden."

8

《庄子秋水》：庄子与惠子游于濠梁之上。庄子曰：“儵鱼出游从容，是鱼之乐也。”惠子曰：“子非鱼，安知鱼之乐？”庄子曰：“……我知之濠上也。”

Zhuangzi ("Autumn Floods"): Zhuangzi and Huizi were strolling along the dam of the Hao River when Zhuangzi said, "See how the minnows come out and dart around where they please! That's what fish really enjoy!" Huizi said, "You're not a fish—how do you know what fish enjoy?" Zhuangzi said, "... I know it by standing here beside the Hao."

9

贯休，俗名姜德隐，浙江兰溪人，唐末五代初期画僧。

Guanxiu (823-912) was the monastic name of Jiang Deyin, a native of present-day Lanxi, Zhejiang province, and a famous monk painter active during the late Tang and the early Five Dynasties.

On Gardens 4 说园（四）

1

钱澄之，号田间老人，明末爱国志士、文学家，诗文尤负重名。

Qian Chengzhi (1612-1693), sobriquet Farmfield Oldie, a patriotic fighter of the late Ming and an outstanding man of letters who had a major impact on Chinese poetry.

2

范允临，号长白，明代书画家，范仲淹17世孙，徐泰时（留园第一任园主）女婿。

Fan Yunlin (1558-1641), sobriquet Changbai, a calligrapher and painter of the Ming, the 17th-generation grandson of Fan Zhongyan (989-1052), and son-in-law of Xu Taishi (1540-1598), the first owner of the Lingering Garden.

3

毛奇龄，字大可，号西河先生（郡望西河），康熙十八年举博学鸿儒科，授翰林院检讨、国史馆纂修等职。所著《西河合集》分经集、史集、文集、杂著，共四百余卷。

4

店名来自南宋林升《题临安邸》诗句：山外青山楼外楼，西湖歌舞几时休。

The name of this restaurant is derived from the poem "Inscription on a Mansion in Lin'an" by Lin Sheng (fl. 12th century) of the Southern Song, "Mountain beyond mountain, loft beyond loft; / When could singing and dancing stop at West Lake?"

5

排云殿名字源自郭璞诗句：神仙排云山，但见金银台。

The name of this building, Palace of Immortals Lining Up in Clouds, is derived from the lines in a poem by Guo Pu (276-324), "As immortals line up in clouds that enshroud a mountain, all they could see are terraces of gold and silver."

6

王西野，系作者同济大学建筑系同事，对中国古典文学、美术史、古建筑及园林艺术均深具造诣，兼擅书画。

Wang Xiye (1914-1997), a colleague of the author in Architecture Department, Tongji University, was well versed in classical Chinese literature, fine arts history, classical architecture, calligraphy, painting and landscape gardening.

7

王珣，字元琳，东晋大臣、书法家，出身琅琊王氏，与王羲之同宗。工草书，其《伯远帖》为三希帖之一，历来为书家所重。其祠堂在苏州。

Wang Xun (350-401), style name Yuanlin, an Eastern-Jin official and calligrapher who hailed from a family of renowned calligraphers including Wang Xizhi (303-361). An expert in the cursive script, he was author of *Letter to Boyuan Copy Model*, one of the Three Rare Calligraphic Copy Models revered by calligraphers through the generations. The temple in honor of him is located in Suzhou.

8

汪琬，苏州人，清初学者、散文家。此诗提及两处苏州名胜：长洲苑、短簿祠。

Wang Wan (1624-1691), a native of Suzhou, a scholar and prose writer of the early Qing. He mentioned in this poem two places of

historic interests, the Long Isle Garden and Short Magistrate's Temple.

9

陈鹏年，湖南湘潭人，进士出身，历任要职，卒于河道总督任上。

Chen Pengnian (1663-1723), a native of Xiangtan in Hunan, a scholar-official who was a metropolitan graduate of top-level imperial examinations, had served a series of government posts before he died in his tenure as Waterway Superintendent.

10

据传，吴王阖闾在此以三千宝剑殉葬。后世秦始皇、孙权等凿石求剑，遂成深池。

It is said that 3,000 swords were buried at the site as funerary objects for Helü(514-496 BC), a king of Wu. The pool was resulted from diggings by later rulers like Qinshihuang (259-210 BC) and Sun Quan (182-252 BC) in search of treasures here.

11

西施，本名施夷光，亦称西子，春秋末期绝代佳人。此处借指荷花。

Xi Shi (*fl.* 5th century BC), original name Shi Yiguang, also known as Xizi, was a stunning beauty who lived during the late Spring and Autumn period, but here her name is used as a figure of speech for lotus flowers.

12

光绪十年，夙六泗兵备道任兰生落职，归乡同里退思补过，建退思园。退思园为世界文化遗产。

After Ren Lansheng (1837-1888) was impeached and dismissed from his position as superintendent of the Military Defense Circuit of Fengyang, Liu'an and Sizhou Prefectures in 1879, the tenth year of the Guangxu reign, he returned to his hometown Tongli to

reflect upon his errors, and named the garden he had built there Retreat and Reflection Garden, now a UNESCO Cultural Heritage Site.

13

许宗彦，号周生，好藏书，精天文历算。

Xu Zongyan (1768-1818), sobriquet Zhousheng, a book collector well versed in astronomy, calendric system and arithmetic.

14

齐鲁指今山东，地域大抵为先秦齐鲁两国所辖。公元前256年楚国灭鲁，公元前221年秦国灭齐。

Qi-Lu is a byname of present-day Shandong province, whose land largely belonged to the states of Qi and Lu in the pre-Qin period. The state of Lu was wiped out by the state of Chu in 256 BC, and the state of Qi met its demise at the hands of the state of Qin in 221 BC.

15

岩山东北一支，伸入江中，成一巨石，高36米。山石直立江上，三面临空，形似燕子展翅欲飞，故名燕子矶。

The northeastern end of the Limestone Hill stretches into the Yangtze, resulting in a boulder 36 meters tall that overlooks the river like a swallow to be on the wing. Hence the name, Swallow-Shaped Boulder.

16

Ruan Yuan (1764-1849), a scholar, man of letters and thinker of the Qing, bestowed upon posterity the "Ruan's Mound" made of the West Lake-bottom silt.

17

郁达夫，中国20世纪20年代著名短篇小说作家，创造社发起人之一，提倡现代文学。其首部短篇小说集，是中国现代文学史上第一部白话短篇小说集。

Yu Dafu (1896-1945), a popular short-story writer of the 1920s in China, a founding member of the Creation Society devoted to the promotion of modern literature, and author of modern China's first collection of vernacular short stories.

18

建康，今南京，孙吴、东晋、刘宋、萧齐、萧梁、陈朝六代京师之地。

Jiankang, present-day Nanjing, was the capital city of the Kingdom of Wu (222-280) of the Three Kingdoms period (220-280), the Eastern Jin (317-420), as well as the Song (420-479), Qi (479-502), Liang (502-557), and Chen (557-589) of the Southern Dynasties period (420-589).

19

韦庄，晚唐诗人，韦应物（盛唐田园诗人）四世孙。

Wei Zhuang (836-910), a poet of the late Tang and a fourth-generation grandson of Wei Yingwu (737-792), a pastoral and scenic poet of the high Tang.

20

蒲松龄，清代小说家，著有短篇小说集《聊斋志异》。

Pu Songling (1640-1715), a novelist of the Qing who authored the famous collection of short stories *Strange Stories from a Chinese Studio*.

21

王时敏曾任太常寺卿，此职原名奉常，故称其为奉常公。

Wang Shimin once served as a Chief Minister of the Court of Imperial Sacrifices, originally known as Flagbearer, hence the

address Respected Flagbearer.

22

五岳指东岳泰山（山东）、西岳华山（陕西）、南岳衡山（湖南）、北岳恒山（山西）、中岳嵩山（河南）。

The Five Holy Mountains are Mount Tai in Shandong province to the east; Mount Huashan in Shaanxi province to the west; Mount Hengshan in Hunan province to the south; Mount Hengshan in Shanxi province to the north; and Mount Songshan in Henan province in the center.

On Gardens 5 说园（五）

1

李思训，中唐山水画家，明代画家董其昌推其为山水画北宗之祖。其子昭道亦善丹青。父子并称大小李将军。

Li Sixun (651-716), a mid-Tang landscape painter whom the Ming painter Dong Qichang (1555-1636) lauded as the father of the Northern School of Chinese painting. His son Li Zhaodao (fl. 7th century) was another famous landscape painter. Father and son are popularly known together as Senior and Junior Generals Li.

2

左思，字太冲，西晋文学家。其《三都赋》，大家竞相传抄，一时洛阳纸贵。

Zuo Si (250-305), style name Taichong, a major prose-poet of the Western Jin (265-316), whose long work, "Three Capitals Rhapsody," was copied by so many people that paper fell into short supply in the capital city of Luoyang.

3

沈秉成，苏松太兵备道，光绪二年于一废园上建成此园，与第三任妻子严永华居此八载。沈曾给豫园点春堂题堂匾。

Shen Bingcheng (1823-1895), superintendent of the Suzhou-Songjiang Military Defense Circuit, built this garden on a deserted one in 1876, where he lived a hermit's life with his third wife Yan Yonghua for eight years. It is Shen who wrote the horizontal board of the Spring Adorning Hall in the Gratification Garden.

4

伊东忠太，日本建筑师、建筑史学家，日本20世纪初顶级建筑史和建筑理论家。常盘大定，研究中国佛教，1920年至逝世前，五次赴中国调查，著成《支那佛教史迹》《支那佛教史迹踏查记》。关野贞，建筑史学家，为中国建筑、文化遗产的分类和历史研究作出了贡献。

Itō Chūta (1867-1954), a Japanese architect, architectural historian, and critic who is recognized as the leading architect and architectural theorist of early 20th century imperial Japan; Tokiwa Daijō (1870-1945) devoted much of his life to the study of Chinese Buddhism, visited China five times between 1920 and his death, and authored *Shina Bukkyō Shiseki* (6 vols., 1925-1929) and *Shina Bukkyō Shiseki Tōsaki* (1938), among others; Sekino Tadashi (1868-1935) was an architectural historian, and one of the influential minds behind the classification and historical studies of Chinese architectural and cultural legacies.

Poetry, Prose, Craft of Gardens 中国诗文与中国园林艺术

1

汤显祖，明代戏曲家，以《紫钗记》《南柯记》《邯郸记》《牡丹亭》四剧闻名。

Tang Xianzu (1550-1616), a great playwright of the Ming who made a name for himself with a collection of four major dramas, *The Story of the Purple Hairpin*, *A Dream under a Southern Bough*, *A Dream in Handan*, and the all-time famous *The Peony Pavilion*.

2

此名源自韩愈《秋怀诗十一首》的第五首：归愚识夷涂，汲古得修绠。

This name is derived from the fifth poem of "Autumn Remembrances: Eleven Poems" by Han Yu (768-824): "Even a foolish man knows how to find the road home; one can always enrich his learning with literature the way he draws water from a deep well with a long rope."

3

作者原文作“怡园”，疑为纳兰明珠的“自怡园”。明珠是康熙帝的堂姑父，曾任大学士。

Chen Congzhou's original text put the name as 怡园, but it is supposed to be 自怡园 in Beijing, owned by Nalanmingzhu, an uncle of Kangxi and once a Grand Secretary of the emperor.

4

园子最初由曹雪芹祖父曹寅所建，曾是江南最大园林。康熙年间，第二任园主为织造，隋氏，改名隋园。后袁枚买下，易名随，取“适应”之意。

Originally built around 1706 by Cao Yin (1658-1712), Cao Xueqin's grandfather, the garden was for a time the largest in the Jiangnan area. By the Kangxi reign, its second owner, an imperial silk manufacturing superintendent surnamed Sui, renamed it "Sui's Garden." Yuan Mei, its third owner, changed its name with a homophone, sui, meaning "accommodation."

5

文震孟，文徵明曾孙，震亨之兄，万历四十八年在醉颖堂基础上构药圃。康熙十二年，园主姜实节更名艺圃。

On the premises of the Hall of Drunken Talent, Wen Zhenmeng (1574-1636), a great-grandson of Wen Zhengming and elder

brother of Wen Zhenheng, built the Herbal Garden in 1620. It was not until 1673 that its owner Jiang Shijie (1647-1709) gave it the present name of the Garden of Cultivation.

6

俞振飞，20世纪上半叶最杰出的昆曲大师。古典文学修养极高，将京剧、昆曲精华熔于一炉，舞台表演儒雅、深邃、有活力。在业内以“儒雅表演”著称。

Yu Zhenfei (1902-1993), the best-known maestro of Kunqu Opera in the first half of the 20th century. Well accomplished in classic literature, he blended perfectly the quintessence of Peking Opera and Kunqu Opera and imbued his stage performances with cultural refinement, elegance, profundity and vigor. He was especially celebrated for his "scholarly theatric rendition" in the opera circle.

7

俞宗海，字粟庐，晚清金石学家、书法家、昆曲名家，俞振飞之父。光绪年间任张履谦家塾师达四十年之久。

Yu Zonghai (1847-1930), style name Sulu, an epigrapher, calligrapher and Kunqu Opera master of the late Qing and father of Yu Zhenfei. He was the private tutor for Zhang Lǜqian's family for almost forty years during the Guangxu reign.

8

光绪三年，苏州盐商张履谦置产，日后成为拙政园西部。两年后，他邀请顾沅、陆廉夫、俞宗海等书画家、昆曲家谋划，根据文徵明所绘此园三十一幅图画及其《王氏拙政园记》对园子大加修葺，十年后得成补园。

In 1877, Zhang Lǜqian (1838-1915), a salt merchant in Suzhou, bought the estate that was to become the western part of the Humble Administrator's Garden. Accepting suggestions of painters, calligraphers and Kunqu masters such as Gu Yun

(1835-1896), Lu Lianfu (1851-1920) and Yu Zonghai, availing himself of the thirty-one pictures of the Humble Administrator's Garden done by Wen Zhengming and Wen's "Record of the Wang's Humble Administrator's Garden," he refurbished the property on a large scale in 1879, and completed the Additional Garden a decade later.

9

吴文英，号梦窗，南宋末年词人。其《梦窗词》收词340首，数量仅次于辛弃疾的《稼轩长短句》（573首）。

Wu Wenying (c. 1200-1260), sobriquet Mengchuang, a lyrical poet toward the end of the Southern Song. His *Mengchuang's Lyrical Poems* features more than 340 elegant lyrical poems, second only to *Jiaxuan's Lyrical Poems*, a collection of Xin Qiji's 573 lyrical poems.

Gardens and Landscape Painting 园林与山水画

1

王蒙，号黄鹤山樵，书画家赵孟頫外孙。元四家中属第二代，集诸家之长自创风格。倪瓒笔法疏简，王蒙则用墨稠密。

Wang Meng (1308-1385), sobriquet Woodcutter from Yellow Crane Mountain, a grandson of the great painter and calligrapher Zhao Mengfu (1254-1322). Though belonging in the second generation of the Big Four, he developed a personal style without so much as emulating ancient masters. Unlike Ni Zan's typically thin and spare strokes, his thick and dense brushwork is achieved through profuse use of ink.

2

李成，北宋初期画家，开创齐鲁画派，其独创的营丘（李成出生地，今山东青州）山水画法成为后世画家楷模。董源，南唐李璟时任北苑（今福建建瓯）副使，南派山水画开山鼻祖，与范宽、李成

并称北宋三大家。黄公望，号大痴道人，元四家之一，作《富春山居图》。此画清初焚烧成两段，现一段藏台北，一段藏浙江。

Li Cheng (919-967), a painter living in the early years of the Northern Song, who founded the Qi-Lu school of Chinese painting. The techniques he invented for his paintings of the extensive and misty woodland of Yingqiu (his birthplace in present-day Qingzhou, Shandong) are still being emulated by landscape painters today. Dong Yuan (?-c. 962) once served as vice-commissioner of Beiyuan (presentday Jian'ou, Fujian province) under the reign of Li Jing (916-961) of the Southern Tang; as the father of the Southern school of Chinese landscape painting, he was celebrated as one of the Three Master Painters of the early Northern Song along with Fan Kuan (?-1031) and Li Cheng. The "Great Eccentric Taoist" is the sobriquet of Huang Gongwang (1269-1354), a famed painter and calligrapher among the Four Master Painters of the Yuan (1279-1368), and painter of *Abode in the Fuchun Mountain*, a precious painting that was burned in two in early Qing, with one section kept in Taipei and the other section in Zhejiang now.

Gardens and Kunqu Opera: Beauty's Tour de Force 园林美与昆曲美

1

朱自清，散文家、诗人、学者，新中国成立前民主主义战士。1927年于清华执教，作《荷塘月色》，遂成名篇。

Zhu Ziqing (1898-1948), an essayist, poet, scholar and staunch fighter for democracy in pre-1949 years who composed "Moonlight over the Lotus Pond," one of his most famous essays, as a professor of Tsinghua in 1927.

2

梅兰芳，舞台表演艺术家、京剧大师、唱念做打绝佳。祖、父皆为

京剧名家，主攻旦角，与荀慧生、尚小云、程砚秋合称四大名旦。表演风格独特，称为梅派。

Mei Lanfang (1894-1961), a theatrical performer, one of the most reputed Peking Opera artists and one of the greatest singer-actor-dancers in Chinese history. The son and grandson of noted opera singers, Mei played mostly female roles, becoming one of the Four Superstars in the Dan Role along with Xun Huisheng(1900-1968), Shang Xiaoyun (1900-1976) and Cheng Yanqiu (1904-1958). His distinctive style of performance won such acclaim over the years that it came to be known as the "Mei School."

Joy of Daily Rambling of Gardens 园日涉以成趣

1

黄至筠，亦名黄应泰，字个园，个园主人，淮东淮西商总。

Geyuan is the style name of the garden's owner, Huang Zhiyun (1770-1838), General Commercial Commissioner of East and West Huai Circuits during the Jiaqing reign of the Qing. He is also known by another name Huang Yingtai.

2

陈维崧，江苏宜兴人，举博学鸿词科，授官翰林院检讨。曾至扬州与王士禛等修禊红桥。

Chen Weisong (1625-1682), a native of Yixing, Jiangsu province, and a lyrical poet and parallel prose writer who became Erudite Literatus and Examining Editor of the Imperial Academy. He joined Wang Shizhen in one of the spring outings at Rainbow Bridge in Yangzhou.

3

古代帝王、诸侯举行典礼时手执之长方形玉牌，头三角形或圆形。

A jade tablet held by ancient emperors and ministers in ceremonial services, which is rectangular with a triangular or

round top.

4

【从周案二十】太湖石产于中国江苏省太湖区域，是一种多孔而玲珑剔透的石头，多用以点缀庭院之用，是建造中国园林不可少的材料。

[Chen Congzhou: Note 20] Named after the Taihu Lake, Jiangsu province, where they are discovered, the Lake Tai stones are riddled with pores and holes and come in exquisite shapes and images through long years of washing and pounding by swift water currents. An indispensable decorative material in Chinese gardens, they are mostly used to grace courtyards and build dainty sceneries.

5

刘鹗，字铁云，清末实业家、教育家、小说家。联合国教科文组织认定其《老残游记》为世界文学名著。

Liu E (1857-1909), style name Tieyun, a businessman involved in education and novelist in the late Qing. His *The Travels of Lao Can* is designated by the UNESCO as a world classic of literature.

6

大明是宋孝武帝的年号，宋是南朝第一个朝代。

Daming is the title of the reign of Emperor Xiaowu (457-464) of the Song (420-479), the first of the four Southern Dynasties (420-589).

7

宣石产自安徽宣城、宁国山区，颜色以白为主，最适宜作表现雪景的假山或盆景石。

Produced in the mountains of Xuancheng and Ningguo counties in Anhui province, the Xuan stone is white in most cases, and makes choice material for the making of snow-crested artificial

mountains or potted miniature landscapes.

View Borrowing in Garden Architecture 建筑中的“借景”问题

1

徐弘祖，号霞客，明代地理学家、旅行家。游历广泛，著有《徐霞客游记》，记载各地人情、地理、动植物等。

Xu Hongzu (1587-1641), sobriquet Xiake, a geographer and traveler of the Ming. He traveled extensively in the country and came up with *Travel Notes of Xu Hongzu*, documenting local cultures, topography, plants and animals, etc.

2

沈复，字三白，清代文人。林语堂称其妻陈芸为“中国文学史上最可爱的女人”。

Shen Fu (1763-1825), style name Sanbai, a man of letters in the Qing. Chen Yun, his wife, was considered the most lovely woman in Chinese literary history by the translator Lin Yutang (1895-1976).

3

厉鹗，号樊榭，清代诗人，浙江杭州人。著有《宋诗纪事》《辽史拾遗》，其《樊榭山房集》十诗九山水。

Li E (1692-1752), sobriquet Fanxie, a poet in the Qing and a native of Hangzhou, Zhejiang province. His most famous works are *Accounts of Song Poems* and *Supplements to the Liao History*, and scenic poems account for nine tenths of his *Fanxie's Mountain Abode Collection*.

4

元宗简（元八），唐朝诗人，与白居易结交二十年。传说，白居易与其邻居之前，作诗《欲与元八卜邻，先有是赠》，书写对结邻之

后的美丽憧憬：明月好同三径夜，绿杨宜作两家春。

Legend has it that when Bai Juyi was to live next door to Yuan Zongjian (Yuan Eight), a pal of twenty years who was also a famed poet, he dreamed of their good days ahead in the poem "To Yuan Eight in Hope of Becoming His Neighbor," "The moon shall be as shiny as at my hermitage; the green willows shall bring vernal comfort to both families."

5

三海：指位于紫禁城和景山西边的北海、中海、南海，明清时称西苑。三海是国内现存历史悠久、规模宏大、布置精美的宫苑之一，总体布局继承了中国古代造园艺术的传统：水中布置岛屿，以桥堤同岸边相连，在岛上和沿岸布置建筑物和景点。

Three Seas, the Northern Sea, the Middle Sea and the Southern Sea located west of the Forbidden City and the Coal Hill, collectively known as the Western Garden in the Ming and the Qing. One of the oldest, largest and most splendid gardens extant in the country, the general layout of the garden conforms to the norm of traditional landscape gardening, that is, to lay islets in the water and scatter buildings and sceneries on the islets and banks which are connected by bridges and dykes.

6

袁中道，字小修，湖北公安人，明代文学家。与兄弟袁宗道、袁宏道并称公安三袁。其游记直接晓畅，日记体散文对后世文人有重大影响。

Yuan Zhongdao (1570-1626), style name Xiaoxiu, a literary figure of the Ming from Gong'an county, Hubei province. One of the Three Yuans of the Gong'an School of Literature with his two brothers, Yuan Zongdao (1560-1600) and Yuan Hongdao (1568-1610), he wrote direct and lucid travel notes and his diary-style essays have a major impact on poets and writers of later generations.

安徽宣城，古称宛陵，三国时亦名丹阳。东临苏浙，地近沪杭，为安徽之东南门户。

Wanling is the ancient name of Xuancheng, Anhui province, also known as Danyang during the Three Kingdoms period. Bordering Jiangsu and Zhejiang provinces to the east, and in close proximity to Shanghai and Hangzhou, it is the gateway to southeast Anhui province.

六朝时（东吴、西晋、宋、齐、梁、陈）为帝王的游乐之地。出于帝都“四神布局”——东方青龙，西方白虎，南方朱雀，北方玄武——的需要，又由于宋元嘉年间湖中两次出现所谓的“黑龙”，湖名改为“玄武”。

A pleasure ground for feudal lords when Nanjing was the capital for the six dynasties—the Eastern Wu, the Western Jin, and the Song, Qi, Liang and Chen of the Southern Dynasties. The need to deploy the four gods of the four directions—Azure Dragon in the east, White Tiger in the west, Vermilion Bird in the south, and Black Tortoise-Snake in the north—in the capital city, coupled with the two appearances of the "Black Dragon" in the lake during the Yuanjia reign (307-453) of the Song, prompted the rulers to rename the lake after "Xuanwu," the Black Tortoise-Snake.

据说，吴越王钱俶为北宋皇帝诏入京中，为保其平安返回而建此塔。

It is said that the pagoda was built in hopes of the peaceful return of Qian Chu(929-988), the last king of the Wu-Yue Kingdom, from the capital when he was summoned there by the Northern Song emperor.

10

砖框实际上为椭圆形。

Actually this brick frame is oval.

11

姚鼐，安徽桐城人，散文家，与方苞、刘大櫆并称桐城三祖。

Yao Nai (1731-1815), a prose writer and a native of Tongcheng, Anhui province, who is one of the Three Patriarchs of the Tongcheng School of prose writing, the other two being Fang Bao (1668-1749) and Liu Dakui (1698-1780).

12

明代开国皇帝朱元璋与马皇后墓，名字源于皇后谥号“孝慈皇后”。

The name of the tomb of the founding emperor of the Ming, Zhu Yuanzhang, and Empress Ma (1331-1382), is derived from her posthumous name, "Empress of Filial Piety and Motherly Love."

GLOSSARY 专有名词总汇

人物 Authors, Artists and Garden Owners

- 白居易 Bai Juyi
贝聿铭 Ieoh Ming Pei
蔡正仁 Cai Zhengren
曹雪芹 Cao Xueqin
常建 Chang Jian
常盘大定 Tokiwa Daijō
陈鸿寿 Chen Hongshou
陈康侯 Chen Kanghou
陈鹏年 Chen Pengnian
陈维崧 Chen Weisong
陈应芳 Chen Yingfang
陈之遴 Chen Zhilin
程德全 Cheng Dequan
程梦星 Cheng Mengxing
仇好石 Qiu Haoshi
崔伯亨 Cui Boheng
达桂 Da Gui
戴熙 Dai Xi
单士元 Shan Shiyuan
董道士 Taoist Priest Dong
董玉书 Dong Yushu
董源 Dong Yuan
杜甫 Du Fu
杜牧 Du Mu
范允临 Fan Yunlin
傅抱石 Fu Baoshi
高凤翥 Gao Fengzhu

戈裕良 Ge Yuliang

耿鉴庭 Geng Jianting

龚自珍 Gong Zizhen

顾辟疆 Gu Pijiang

顾文彬 Gu Wenbin

顾沅 Gu Yun

关野贞 Sekino Tadashi

贯休 Guanxiu

郭思 Guo Si

郭熙 Guo Xi

何其芳 He Qifang

何维键 He Weijian

何亚农 He Yanong

和珅 Heshen

黄公望 Huang Gongwang

黄汉侯 Huang Hanhou

黄省曾 Huang Xingzeng

黄至筠 Huang Zhijun

计成 Ji Cheng

计镇华 Ji Zhenhua

蒋科 Jiang Ke

姜夔 Jiang Kui

江湜 Jiang Shi

金安清 Jin Anqing

金立初 Jin Lichu

金农 Jin Nong

金松岑 Jin Songcen

孔武仲 Kong Wuzhong

李白 Li Bai

李成 Li Cheng

李德裕 Li Deyu

李斗 Li Dou

李格非 Li Gefei

李商隐 Li Shangyin
李思训 Li Sixun
李蔚如 Li Weiru
李渔 Li Yu
李育 Li Yu
厉鹗 Li E
梁冀 Liang Ji
梁思成 Liang Sicheng
梁孝王 Prince Xiao of Liang
凌景埏 Ling Jingyan
刘大观 Liu Daguan
刘敦桢 Liu Dunzhen
刘鹗 Liu E
刘恕 Liu Shu
卢绍绪 Lu Shaoxu
陆叠山 Lu the Rockery Piler
陆锦 Lu Jin
陆游 Lu You
骆在田 Luo Zaitian
马致远 Ma Zhiyuan
毛奇龄 Mao Qiling
梅兰芳 Mei Lanfang
梅宣义 Mei Xuanyi
梅尧臣 Mei Yaochen
米万钟 Mi Wanzhong
纳兰明珠 Nalanmingzhu
倪瓒 Ni Zan
欧阳修 Ouyang Xiu
欧阳兆熊 Ouyang Zhaoxiong
潘岳 Pan Yue
潘允端 Pan Yunduan
裴谌 Pei Chen
蒲松龄 Pu Songling

戚继光 Qi Jiguang
钱澄之 Qian Chengzhi
钱大昕 Qian Daxin
钱泳 Qian Yong
乔松年 Qiao Songnian
任传薪 Ren Chuanxin
任兰生 Ren Lansheng
阮元 Ruan Yuan
阮中 Ruan Zhong
沈秉成 Shen Bingcheng
沈复 Shen Fu
沈元禄 Shen Yuanlu
沈周 Shen Zhou
盛康 Sheng Kang
石崇 Shi Chong
石涛 Shitao
宋鲁儒 Song Luru
宋之问 Song Zhiwen
苏轼 Su Shi
苏舜钦 Su Shunqin
孙承佑 Sun Chengyou
汤显祖 Tang Xianzu
陶渊明 Tao Yuanming
田敬锡 Tian Jingxi
童寯 Tong Jun
汪伯屏 Wang Boping
汪琬 Wang Wan
汪为霖 Wang Weilin
汪应庚 Wang Yinggeng
王国维 Wang Guowei
王昆仑 Wang Kunlun
王蒙 Wang Meng
王时敏 Wang Shimin

王士禎 Wang Shizhen
王世襄 Wang Shixiang
王世貞 Wang Shizhen
王庭余 Wang Tingyu
王维 Wang Wei
王西野 Wang Xiye
王献臣 Wang Xianchen
王珣 Wang Xun
王应麟 Wang Yinglin
王原祁 Wang Yuanqi
王振世 Wang Zhenshi
韦庄 Wei Zhuang
魏次庚 Wei Cigeng
文震亨 Wen Zhenheng
吴昌硕 Wu Changshuo
吴璈 Wu Jing
吴梅 Wu Mei
吴廷扬 Wu Tingyang
吴伟业 Wu Weiye
吴文锡 Wu Wenxi
吴文英 Wu Wenying
喜仁龙 Osvald Sirén
谢溶生 Xie Rongsheng
徐弘祖 Xu Hongzu
徐勉 Xu Mian
徐泰时 Xu Taishi
徐孝穆 Xu Xiaomu
徐行健 Xu Xingjian
徐湛之 Xu Zhanzhi
许宗彦 Xu Zongyan
晏几道 Yan Jidao
晏殊 Yan Shu
杨兆鲁 Yang Zhaolu

姚鼐 Yao Nai
姚正鏞 Yao Zhengyong
叶恭绰 Ye Gongchuo
叶梦珠 Ye Mengzhu
叶洮 Ye Tao
伊东忠太 Itō Chūta
余继之 Yu Jizhi
俞澂 Yu Cheng
俞铭衡 Yu Mingheng
俞同奎 Yu Tongkui
俞樾 Yu Yue
俞振飞 Yu Zhenfei
俞宗海 Yu Zonghai
庾信 Yu Xin
郁达夫 Yu Dafu
袁中道 Yuan Zhongdao
恽格 Yun Ge
臧谷 Zang Gu
曾朴 Zeng Pu
